PART I

ITEM 1. BUSINESS

Introduction

Ampex Corporation ("Ampex" or the "Company") is a leading innovator of visual information technology. The Company has traditionally specialized in the development and manufacture of high performance recording products used for the acquisition and processing of data and for the storage of mass computer data, especially images. Recently, in order to capitalize on its expertise and technology in digital video, Ampex began to focus on the development of an Internet video strategy to develop made-for-the-Internet rich media content for delivery over the World Wide Web. In 1999, the Company consolidated its various internal projects, acquisitions and strategic investments into its wholly-owned subsidiary, iNEXTV Corporation ("iNEXTV"). Ampex is seeking to leverage its significant experience in digital video through iNEXTV to become a major provider of Internet video programming, services and technology.

During its 56-year history, Ampex has developed substantial proprietary technology relating to the electronic storage, processing and retrieval of data, particularly images, certain of which it has elected to patent or seek to patent. Ampex currently holds approximately 900 patents and patent applications covering digital image-processing and recording technology, and has licensed its patents, primarily for use in videocassette recorders and other consumer products. In the five years ended December 31, 2000, the Company's licensing income averaged \$13.2 million per year. However, royalty income has fluctuated materially from year-to-year, and there can be no assurance that the Company will continue to generate comparable levels of royalty income in future periods.

The Company's Internet video businesses are conducted primarily through its iNEXTV subsidiary, which manages the Company's Internet operations, and its Internet Technology Group ("ITG"), which was organized to conduct research, development and engineering of products and services for the Internet. The

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

iNEXTV network currently includes: iNEXTV ("inextv.com") which the Company believes is one of the largest producers and aggregators of Internet specific video content, covering a growing list of life style topics, such as automobiles, exotic travel, fashion, food and wine, current events and entertainment, Alternative Entertainment Network, Inc. ("AENTV" or "AENTV.com"), a producer of web video programming about the entertainment industry; and TV1 Internet Television ("TV1" or "TV1.de"), one of Europe's leading webcasters. During 2000, the company wrote off certain of its Internet investments and consolidated certain Internet operations and websites in order to be able to focus on those operations that it believes will offer better long-term opportunities. iNEXTV's active Internet operations are at an early stage of development, and have not yet produced significant revenues. Accordingly, these operations involve a material risk of loss, and can be expected to be unprofitable for a substantial period of time. See "Risk Factors--Risks Associated with iNEXTV and Internet Video Strategy" and "Risk of Continuing Losses."

As of year-end 2000, Ampex determined to discontinue the operations of MicroNet Technology, Inc. ("MicroNet"), its subsidiary which manufactured disk arrays and related storage products, and to establish a reserve for the costs of closure. Accordingly, the operations of MicroNet have been classified as "Discontinued Operations" for all periods presented. MicroNet's principal disk storage products included Genesis disk array systems and SanCUBE, a storage area network peripheral equipped with fibre channel to support the Apple Computer market. In February 2000, the Company announced plans to sell Ampex Data Systems Corporation ("Data Systems" or "ADSC"), a subsidiary which is engaged in the manufacture and sale of high performance mass data storage and instrumentation recorders and systems. The Company continues to operate Data Systems as it had in the past but, for accounting purposes, has accounted for this subsidiary's operations as a "Business Held for Sale" for all periods presented. Data Systems products are sold primarily for use in digital archives of television broadcasters and in government intelligence gathering activities. The Company has not yet entered into a contract to sell Data Systems, and there can be no assurance that a contract will be entered into or as to the terms or timing of any sale. See "Risk of Proposed Sale of Data Systems," below.

1

Following the planned sale of Data Systems, Ampex's principal business operations will be conducted by Ampex's intellectual property licensing department, its ITG group and its subsidiary iNEXTV.

The Company was incorporated in Delaware in January 1992 as the successor to a business originally organized in 1944. References to "Ampex" or the "Company" include subsidiaries and predecessors of Ampex Corporation, unless the context indicates otherwise. The principal executive offices of the Company are located at 500 Broadway, Redwood City, California 94063, and its telephone number is (650) 367-2011. The Company's Class A Common Stock is traded on the American Stock Exchange under the symbol "AXC".

Forward-Looking Statements

This Form 10-K contains predictions, projections and other statements about the future that are intended to be "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other important factors that could cause the actual results, performance or achievements of the Company, or industry results, to differ materially from any future results, performance or achievements expressed or implied by such forward-looking statements. Such risks, uncertainties and other important factors include, among others, those described under "Risk Factors," below.

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

These forward-looking statements speak only as of the date of this Report. The Company disclaims any obligation or undertaking to disseminate updates or revisions of any forward-looking statements contained or incorporated herein to reflect any change in the Company's expectations with regard thereto or any change in events, conditions or circumstances on which any such statement is based. IN ASSESSING FORWARD-LOOKING STATEMENTS CONTAINED IN THIS FORM 10-K, READERS ARE URGED TO READ CAREFULLY ALL SUCH CAUTIONARY STATEMENTS.

Risk Factors

Risk of Continuing Losses

Ampex has incurred significant operating and net losses in the three years ended December 31, 2000, primarily due to its Internet video programming activities, operating losses of MicroNet and, in 2000, its decision to discontinue those operations and to provide reserves to close down MicroNet, amortization of goodwill of acquired businesses and interest expense. Revenues were not sufficient to offset these items. Although the Company expects that its Internet video revenues will grow in future periods, there can be no assurance that such revenues will be sufficient to offset similar expenses and/or losses that may be incurred in such periods, or that such items will not increase. The Company may incur additional indebtedness in connection with future acquisitions or its Internet expansion plans, which could increase future interest expenses. In addition, the Company cannot predict the amount of licensing royalties that it may recognize in future periods. The Company has taken steps to reduce costs and believes that operating losses from its Internet operations will decline in 2001 compared with losses incurred in 2000. However, the Company expects operating and net losses to continue at least for the near future. See "Management's Discussion and Analysis of Financial Condition and Results of Operations, " below, and the other Risk Factors included in this section.

Risks of Declining Liquidity

The Company has experienced a substantial reduction in its cash and marketable securities which declined to \$15.4 million at December 31, 2000. In November 2000, Data Systems issued Senior Secured Notes providing net proceeds of approximately \$8 million, which are included in the above amount and are being used to fund the Company's short-term working capital requirements, pending a future sale of Data Systems. The Notes are secured by certain assets of the Company and Data Systems and are due on the earlier of May 31, 2001 or the divestiture of Data Systems. Ampex is negotiating a sale and leaseback of certain real estate and would use the proceeds from the transaction to repay the Notes. The Company believes that the expected proceeds of the sale of Data Systems, together with cash and marketable securities on hand and ongoing royalty income, will be sufficient to fund its cash requirements for operations, working capital, capital

2

expenditures and debt service through at least 2001. In the event the planned sale of Data Systems is not consummated, the Company believes that it will be required to raise additional capital in order to continue to carry out its current business strategy. No assurance can be given that the Company would be successful in raising any additional funds, or as to the terms of any securities that might be issued or arrangements that might be entered into.

Risks Associated with iNEXTV and Internet Video Strategy

The Company's Internet subsidiary, iNEXTV, was formed in mid-1999, and has not yet generated any material advertising revenues. The business and prospects

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

of iNEXTV, and the Company's Internet video strategy in general, are subject to the risks and uncertainties typical of companies in the early stages of development. These risks are particularly high in new and rapidly evolving markets such as those for Internet content, advertising and electronic commerce (e-commerce). If the Company is not successful in its Internet strategy, investors in Ampex Common Stock could suffer the loss of a significant portion or all of their investment.

The development of iNEXTV and the implementation of the Company's strategy to expand its Internet video businesses involve special risks and uncertainties, including but not limited to the following:

- . the ability of iNEXTV and its affiliates to identify, produce or acquire and deliver compelling, quality video programming over the Internet that appeals to its target audiences;
- . the ability of iNEXTV and its affiliates to obtain and manage key employees and other resources for growth and profitability;
- . market acceptance of Internet broadband access connections, which improve the quality of streaming video but are more costly than methods currently used by most consumers;
- . market acceptance of streaming media technology, which is currently of lower quality than television or radio broadcasts, is subject to congestion and interruptions on the Internet, and requires specialized software, technical expertise and increased bandwidth;
- . dependence upon growth of the Internet as a significant medium for advertising, especially branding advertising formats, recognizing recent declines in banner advertising on the Internet;
- . iNEXTV's ability to generate advertising revenues from its recent "syndication strategy" whereby it seeks to sell advertising tied to content that it has produced and aggregated from third parties for distribution on popular portals and destination websites;
- . the ability of iNEXTV and its affiliates to attract content developers and other key partners in addition to content distribution partners necessary to make its web operations viable;
- . dependence upon timely delivery and integration of website software and hardware purchased from third parties used in its Internet operations and that of companies upon which the Company depends to host and serve content to users;
- . vulnerability of Internet content delivery to system failures and interruptions for a variety of reasons (including telecommunications problems and natural disasters), computer viruses and other breaches of security;
- . dependence upon Internet service providers, web browsers, providers of streaming media products and others to provide Internet access to iNEXTV's websites and programming;
- . the ability of the Company to generate sufficient revenues to offset the increased cost of bandwidth that would result from increased viewership of its streaming media video sites and the risk that the Company may compete with sites which have access to lower cost of bandwidth;
- . the ability of Ampex to innovate, upgrade and transfer to iNEXTV and its affiliates audio or video technology for Internet-based applications;

- . competition among Internet broadcasters and providers of products and services for users, advertisers, content and new products and services;
- . uncertainty about the adoption and application of new laws, proposed taxation and government regulations relating to Internet businesses, which could have a negative effect on Internet business. Some of these negative effects could include slowing down Internet growth, adversely affecting the viability of e-commerce, exposing iNEXTV to potential liabilities or negative publicity for mishandling customer security or user privacy concerns or otherwise adversely affecting its Internet businesses;
- . the ability, if needed, to obtain licenses of intellectual property developed by others that affect Internet usage. Intellectual property claims, if asserted, against the Company could be costly and could have a material adverse effect on its Internet business;
- . the ability to expand successfully in the European or other foreign markets, which is likely to be subject to cultural and language barriers, different regulatory environments, currency exchange rate fluctuations and other difficulties relating to managing foreign operations; and
- . likelihood of continued and significant expenses resulting in material losses in future periods. Such losses could negatively affect the price of the Company's securities. In addition, continued losses could require the Company to seek additional capital which may not be available on satisfactory terms, or at all.

Risks Associated with Acquisition Strategy

In order to expand Ampex's products and services, Ampex has made, and may continue to make under the right circumstances, acquisitions of, and/or investments in, other business entities. These entities may be involved in producing and distributing Internet video programming or providing related services or technology. Ampex may not be able to identify or acquire additional acquisition candidates in the future, or complete any further acquisitions or investments on satisfactory terms. In order to pay for future acquisitions or investments, Ampex may have to:

- . issue additional equity securities of the Company or a subsidiary, which would dilute the ownership interest of existing Ampex stockholders;
- . incur additional debt; and/or
- . amortize goodwill and other intangibles or incur other acquisition-related charges, which could materially impact earnings.

Acquisitions and investments involve numerous additional risks, including difficulties in the management of operations, services and personnel of the acquired companies, and of integrating acquired companies with Ampex and/or each other's operations. Ampex may also encounter problems in entering markets and businesses in which it has limited or no experience. Acquisitions can also divert management's attention from other business concerns. Ampex has made and may make additional investments in companies in which it has less than a 100% interest. Such investments involve additional risks, including the risk that Ampex may not be in a position to control the management or policies of such entities, and risks of potential conflicts with other investors. Ampex has

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

invested in companies that are in the early stage of development and may be expected to incur substantial losses. Ampex's financial resources may not be sufficient to fund the operations of such companies. Accordingly, there can be no assurance that any acquisitions or investments that Ampex has made, or may make in the future, will result in any return, or as to the timing of any return. During 2000, the Company elected to cease funding the operations of TV onthe WEB, Inc. ("TV onthe WEB") and to consolidate the production activities and website of EXBTV.com ("EXBTV") into its New York City operations and into inextv.com, requiring certain asset writedowns, including goodwill. In addition, Ampex elected to discontinue the operations of MicroNet, which it acquired in 1998. In the future, it is possible that Ampex could lose all or a substantial portion of its other investments.

4

Risk of Proposed Sale of Data Systems

The Company has announced its intention to sell Data Systems, which manufactures high performance mass data storage and instrumentation products for entertainment and government applications. The Company continues to operate Data Systems much as it had in the past but, for accounting purposes, has accounted for this subsidiary's operations as a "Business Held for Sale" for periods presented. The Company has engaged financial advisors and has had preliminary discussions and allowed certain prospective buyers to conduct due diligence related to the proposed sale but, at the date of this Report the Company had not entered into any definitive agreement of sale. There can be no assurance that the Company will be able to consummate a sale, or as to the terms, conditions or timing of any sale, if consummated. Ampex intends to use the proceeds of the proposed sale to fund and to expand its Internet video operations through its iNEXTV subsidiary and other Internet activities, and to retire debt. However, there can be no assurance that any such proceeds will be sufficient to do so, or to offset any potential losses that may be attributable to iNEXTV or other Company operations. See "Risks Associated with iNEXTV and Internet Video Strategy, " above. In addition, if the proposed sale is consummated, Ampex may retain certain liabilities associated with Data Systems' prior operations, including pension benefit obligations, environmental liabilities and indemnification obligations customarily contained in sale agreements.

Risk of Leverage

As of December 31, 2000, Ampex had outstanding total borrowings of approximately \$54.4 million, which included \$8.2 million of Senior Secured Notes due May 2001, \$44.0 million principal amount of 12% Senior Notes due 2003 and \$2.4 million of subsidiary indebtedness. The Company received proceeds of \$8 million from the issuance of the Senior Secured Notes in November 2000. Such Notes accrete interest up to \$0.9 million that is repayable together with the principal amount on May 31, 2001 or earlier upon the sale of Data Systems. The Notes are secured by liens on the Data Systems manufacturing facilities in Colorado Springs, Colorado and on the Company's future patent licensing income stream. As discussed above, the Company plans to use a portion of the proceeds from the planned sale of Data Systems to reduce its indebtedness. However, there can be no assurance that the Company will be able to consummate the sale or, if consummated, that the Company will recognize proceeds that it determines are available for such repayment. Also the Company is seeking to negotiate a sale and leaseback of certain real estate and would use the proceeds to repay the Senior Secured Notes if outstanding.

The Company may incur additional indebtedness from time to time to finance acquisitions or capital expenditures or for other purposes, subject to the restrictions in the indenture governing the Senior Notes. The degree to which

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

the Company is leveraged, and the types of investments it selects, could have important consequences to investors, including the following:

- . a substantial portion of the Company's consolidated cash flow from operations must be dedicated to the payment of principal and interest on outstanding indebtedness, and is therefore unavailable for other purposes;
- . Ampex's ability to obtain additional financing in the future for working capital needs, capital expenditures, acquisitions and general corporate purposes may be materially limited or impaired, or such financing may not be available on terms favorable to Ampex;
- . the Company may be more highly leveraged than its competitors, which may place it at a competitive disadvantage;
- . Ampex's leverage may make it more vulnerable to a downturn in its business or the economy in general;
- . investments in securities with lower credit quality or longer maturities could subject the Company to potential losses due to nonpayment or changes in market value of those securities. Transactions in derivative securities could expose Ampex to losses caused by stock market fluctuations; and

5

- . the financial covenants and other restrictions contained in the Senior Secured Notes and Senior Note indentures and other agreements relating to Ampex's indebtedness may restrict Ampex's ability to borrow additional funds, to dispose of assets or to pay dividends on or to repurchase preferred or common stock.

If Ampex does not sell Data Systems or otherwise cannot service its indebtedness, it will be forced to adopt alternative strategies. These strategies may include shutting down unprofitable operations, reducing or delaying capital expenditures, selling additional assets, restructuring or refinancing Ampex's indebtedness. There can be no assurance that any of these strategies will be successful or that they will be permitted under the Senior Secured Notes or Senior Note Indentures, if applicable.

Fluctuations in Royalty Income

Ampex's results of operations in certain prior periods reflect the receipt of significant royalty income, including material nonrecurring payments resulting from negotiated settlements primarily related to sales of products by manufacturers before negotiating licenses from Ampex. Although Ampex has a substantial number of outstanding and pending patents, and its patents have generated substantial royalties in the past, it is not possible to predict the amount of royalty income Ampex will receive in the future. Royalty income has historically fluctuated significantly from quarter-to-quarter and year-to-year due to a number of factors that Ampex cannot predict. These factors include the extent to which third parties use its patented technology, the extent to which the Company must pursue litigation in order to enforce its patents, and the ultimate success of its licensing and litigation activities. As the Company expands its Internet video businesses, the significance of its royalty income, relative to operating income, is expected to increase until those businesses become profitable. Upon an event of default, the Holders of the Senior Secured Notes will receive additional collateral consisting of the right to receive the proceeds of all future royalties sufficient to repay principal and accrued

interest.

The costs of patent litigation can be material. The institution of patent enforcement litigation may also increase the risk of counterclaims alleging infringement by Ampex of patents held by third parties or seeking to invalidate patents held by Ampex. Moreover, there is no assurance that Ampex will continue to develop patentable technology that will be able to generate significant patent royalties in future years to replace patents as they expire.

Dependence on Licensed Patent Applications and Proprietary Technology

Ampex's success depends, in part, upon its ability to establish and maintain the proprietary nature of its technology through the patent process. There can be no assurance that one or more of Ampex's patents will not be successfully challenged, invalidated or circumvented or that it will otherwise be able to rely on such patents for any reason. In addition, there can be no assurance that competitors, many of whom have substantial resources and have made substantial investments in competing technologies, will not seek to apply for and obtain patents that prevent, limit or interfere with Ampex's ability to make, use and sell its products either in the United States or in foreign markets. If any of Ampex's patents are successfully challenged, invalidated or circumvented or its right or ability to manufacture products were to be proscribed or limited, Ampex's ability to continue to manufacture and market its products could be adversely affected, which would likely have a material adverse effect upon Ampex's business, financial condition and results of operations.

Litigation may be necessary to enforce Ampex's patents, to protect trade secrets or know-how owned by the Company or to determine the enforceability, scope and validity of the proprietary rights of others. Any litigation or interference proceedings brought against, initiated by or otherwise involving Ampex may require Ampex to incur substantial legal and other fees and expenses and may require some of its employees to devote all or a substantial portion of their time to the prosecution or defense of such litigation or proceedings.

6

Rapid Technological Change and Risks of New Product and Services Development

All the industries and markets from which Ampex derives revenues, directly or through its licensing program, are characterized by continual technological change and the need to introduce new products, product upgrades, services and patentable technology. This has required, and will continue to require, that Ampex spend substantial amounts for the research, development and engineering of new products and advances to existing products and, with respect to the Company's Internet operations, new content and services. No assurance can be given that Ampex's existing products, services and technologies will not become obsolete or that any new products, services or technologies will win commercial acceptance. Obsolescence of existing product lines, or inability to develop and introduce new products and services, could have a material and adverse effect on the Company's sales and results of operations in the future. The development and introduction of new technologies, services and products are subject to inherent technical and market risks, and there can be no assurance that Ampex will be successful in this regard.

Competition

The market for Internet products and services is highly competitive and characterized by multiple competitors and low barriers to entry. Ampex is attempting to develop improvements in video quality in order to differentiate

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

itself from its competitors. However, other companies may develop competing technologies and Ampex may be unable to obtain patent or other protection for its Internet video technology. In addition, the market for Internet advertising and electronic commerce, upon which iNEXTV's Internet operations will be primarily dependent to achieve ultimate profitability, is intensely competitive and the Company believes that competition in this field will intensify.

Dependence on Certain Suppliers

The Company's manufacturing subsidiaries purchase certain components from a single domestic or foreign manufacturer for use in its products. Significant delays in deliveries or defects in such components have adversely affected Ampex's manufacturing operations in the past, pending qualification of an alternative supplier. In addition, Ampex produces highly engineered products in relatively small quantities. As a result, Ampex's ability to cause suppliers to continue production of certain products on which it may depend may be limited. Ampex does not generally enter into long-term raw materials or components supply contracts.

iNEXTV has contracted with a third party to provide content hosting and to serve content to geographically dispersed users. The Company believes that this company has built a very secure and dependable network by providing sufficient hardware and software redundancy and by physically locating its servers at numerous different ISPs around the world. However, in the event of a major disaster to the Internet, iNEXTV would incur significant down time in its operations and lost revenue.

Risks Related to International Operations

International operations are subject to a number of special risks, including limitations on repatriation of earnings, restrictive actions by local governments, and fluctuations in foreign currency exchange rates and nationalization. Additionally, export sales are subject to export regulation and restrictions imposed by U.S. government agencies. Fluctuations in the value of foreign currencies can affect Ampex's results of operations. Ampex does not normally seek to mitigate its exposure to exchange rate fluctuations by hedging its foreign currency positions.

The expansion of iNEXTV's European operations, which are conducted primarily through TV1, may generate advertising and service revenues in future periods, although the Company has not recognized any revenue to date, since it does not presently consolidate the operations of TV1. The European operations of iNEXTV are expected to be subject to certain risks and uncertainties, including risks and uncertainties similar to those facing domestic development stage Internet companies.

7

In January 1999, the new "Euro" currency was introduced in certain European countries that are part of the European Monetary Union. Beginning in 2003, all EMU countries are expected to be operating with the Euro as their single currency. A significant amount of uncertainty exists as to the effect the Euro will have on the marketplace generally. Some of the rules and regulations relating to the governance of the currency have not yet been defined and finalized. As a result, companies operating or conducting business in Europe will need to ensure that their financial and other software systems are capable of processing transactions and properly handling the Euro. Ampex is currently assessing the effect the introduction of the Euro will have on its internal accounting systems and the potential sales of its products. Ampex will take appropriate corrective actions based on the results of such assessment. Ampex has not yet determined the costs related to addressing this issue. This issue

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

is not expected to have a material adverse affect on Ampex's business.

Volatility of Stock Price

The trading price of Ampex's Common Stock has been and can be expected to be subject to significant volatility, reflecting a variety of factors, including:

- . quarterly fluctuations in operating results;
- . announcements of acquisitions, Internet developments or new product introductions by Ampex or its competitors;
- . announcements regarding the Company's planned sale of Data Systems;
- . reports and predictions concerning the Company by analysts and other members of the media;
- . issuances of substantial amounts of Common Stock in order to redeem outstanding shares of its Preferred Stock, or otherwise; and
- . fluctuations in trading volume of the Company's Common Stock, and general economic or market conditions.

The stock market in general, and Internet and technology companies in particular, have experienced a high degree of price volatility, which has had a substantial effect on the market prices of many such companies for reasons that often are unrelated or disproportionate to operating performance. These broad market and industry fluctuations may adversely affect the price of Ampex's Common Stock, regardless of its operating performance.

Dependence on Key Personnel

Ampex is highly dependent on its management. Ampex's success depends upon the availability and performance of key executive officers and directors. Except for certain employees of its Internet affiliates, the Company has not entered into employment agreements with its key employees, and the loss of the services of key persons could have a material adverse effect upon Ampex. The Company does not maintain key man life insurance on any of these individuals.

Anti-Takeover Consequences of Certain Governing Instruments

Ampex's Certificate of Incorporation provides for a classified Board of Directors, with members of each class elected for a three-year term. The Certificate of Incorporation provides for nullification of voting rights of certain foreign stockholders in certain circumstances involving possible violations of security regulations of the United States Department of Defense. The instrument governing Ampex's outstanding Preferred Stock, which has an aggregate liquidation value of approximately \$36.6 million at December 31, 2000, requires that Ampex make mandatory offers to redeem those securities out of legally available funds in the event of a change of control. For this purpose, a change of control includes the following events: a person or group of people acting together acquires 30% or more of Ampex's voting securities; Ampex merges, consolidates or transfers all or substantially all of its assets; or the dissolution of Ampex. The Certificate of Incorporation authorizes the Board of Directors to issue additional shares of Preferred Stock without the vote of stockholders. The indenture

governing Ampex's outstanding Senior Notes, in the total principal amount of \$44 million, requires Ampex to offer to repurchase the Senior Notes at a

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

purchase price equal to 101% of the outstanding principal amount thereof together with accrued and unpaid interest in the event of a change of control. Under the indenture, a change of control includes the following events: a person or group of people acting together acquires 50% or more of the Company's voting stock; or the transfer of substantially all of the Company's assets to any such person or group, other than to certain subsidiaries and affiliates of Ampex. In addition, the Senior Secured Notes issued in November 2000 are mandatorily redeemable in the event of the sale of Data Systems or a change of control (as defined) of Ampex or Data Systems.

These provisions could have anti-takeover effects by making an acquisition of Ampex by a third party more difficult or expensive in certain circumstances.

Nonpayment of Dividends

Ampex has not declared dividends on its Common Stock since its incorporation in 1992 and Ampex has no present intention of paying dividends on its Common Stock. Ampex is also restricted by the terms of certain agreements and of the outstanding Preferred Stock as to the declaration of dividends.

Environmental Issues

Ampex's facilities are subject to numerous federal, state and local laws and regulations designed to protect the environment from waste emissions and hazardous substances. Owners and occupiers of sites containing hazardous substances, as well as generators and transporters of hazardous substances, are subject to broad liability under various federal and state environmental laws and regulations, including liability for investigative and cleanup costs and damages arising out of past disposal activities. Ampex has been named from time to time as a potentially responsible party by the United States Environmental Protection Agency with respect to contaminated sites that have been designated as "Superfund" sites, and are currently engaged in various environmental investigation, remediation and/or monitoring activities at several sites located off Company facilities. There can be no assurance Ampex will not ultimately incur liability in excess of amounts currently reserved for pending environmental matters, or that additional liabilities with respect to environmental matters will not be asserted. In addition, changes in environmental regulations could impose the need for additional capital equipment or other requirements. Such liabilities or regulations could have a material adverse effect on Ampex in the future.

Description of Continuing Business Operations

The Company's current operations consist principally of iNEXTV's Internet operations, Ampex's Internet Technology Group; and Ampex's technology licensing activities. As of year-end 2000, the Company determined to discontinue the operations and to provide a reserve for the estimated cost of closing MicroNet. MicroNet conducted the Company's disk based storage business. The operations of MicroNet have been classified as "Discontinued Operations." Data System's mass data storage and instrumentation businesses are being held for sale, and the Company intends to use a significant part of such proceeds upon sale to its video-based Internet businesses. There can be no assurance that the Company's Internet business strategy will be successful. Certain of the Company's Internet investments were written off and certain operations were consolidated in order to be able to direct resources to ongoing activities which the Company believes offer better long-term returns. Ampex's Internet operations are at an early stage of development, and have not yet produced significant revenues. Accordingly, these operations involve a material risk of loss, and can be expected to be unprofitable for a substantial period of time. See "Risk Factors--Risks Associated with iNEXTV and Internet Video Strategy."

The information with respect to total revenues, income (loss) from

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

continuing operations before income taxes, loss from discontinued operations and business held for disposition and identifiable assets of the Registrant's industry segments and operations outside the United States is contained in the Notes to

9

Consolidated Financial Statements captioned "Segment Reporting" and "Foreign Operations" on pages F-30 to F-32 of the Company's 2000 Consolidated Financial Statements.

Internet Operations

The Company's Internet operations are conducted primarily through its wholly-owned subsidiary, iNEXTV, which the Company organized in 1999. The mission of iNEXTV is to be a leading provider of streaming video content designed for the Internet, to deliver video enabling capability and other services on behalf of other business and corporate websites and to continue to innovate new technologies that enhance the viewing experience of video on the Internet.

The iNEXTV network of content and service oriented websites currently includes: iNEXTV.com a producer, aggregator and syndicator of video programming covering a growing list of life style topics such as automobiles, exotic travel, fashion, food and wine, and current events and entertainment; AENTV.com, a producer of entertainment oriented video programming and TV1.de, one of Europe's leading webcasters. The Company's Internet operations are at an early stage of development and have not yet produced significant revenues. The Company no longer maintains the operations or websites of TV on the WEB.com or EXBTV.com which were operational in 1999 and part of 2000.

In order to expand its Internet network, Ampex may make additional acquisitions of and/or investments in other Internet businesses or websites. Subsequent to year-end, iNEXTV increased its ownership interest in Internet video affiliates, TV1 and AENTV. The Company's strategy has typically been to make an initial investment in a potential acquisition candidate, with options to increase its investment or to acquire control at a future time, affording the Company the opportunity to evaluate the risks and merits of a further investment. See Note 3 of Notes to Consolidated Financial Statements. Nevertheless, such acquisitions and investments involve numerous risks and uncertainties, including difficulties in integrating acquired entities into the Ampex Internet operation, potential conflicts with other shareholders, and where Ampex acquires a minority interest, risks of the inability to control the management and policies of such entities. See "Risk Factors--Risks Associated with Acquisition Strategy. "

Ampex is not currently engaged in negotiating any material Internet or other acquisitions. However, it may elect to increase its investments in one or more of its existing acquired businesses, and intends to actively review investment opportunities that may be presented. There can be no assurance that any acquisitions or investments that Ampex has made, or in the future may make, will be successful or will not incur a partial or complete loss.

Internet Video Programming

The Company believes that there will be a growing demand for targeted video programming to be delivered over the Internet. Accordingly, a substantial portion of the Company's Internet activities are involved in developing such content and in aggregating video content for distribution on the web. The increase in demand for Internet video programming results from Internet infrastructure enhancements, and from the deployment of DSL and cable modems

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

that greatly increase the speed by which information can be delivered over the Internet and into the home or business. The Company believes that programming that was initially developed for broadcast or cable television and that has been repackaged for delivery over the Internet will not effectively satisfy the demand for Internet video programming. The picture quality of streaming video over the Internet will not, in the near term, equal that of television or movies. Traditional media programming does not address the user's need for highly tailored and individualized information nor the user's desire to interact with the medium. Instead, the Company believes that a significant portion of the demand for Internet video content will be satisfied by companies that develop programming that is specifically designed for the Internet.

Currently, Internet video is subject to inferior picture quality and size compared to television as well as frequent service interruptions. However, the Company believes that the user will still seek the richness of an

10

audio/video experience over the Internet if the content is properly designed. The Company's Internet video programming blends text, graphics, audio and interactivity together with video. Video is used selectively first to capture an audience, and then to inform, to persuade and to sell to them in the way that sight, sound and motion do best. The video component of made-for-the-Internet programming constitutes a smaller portion of the overall experience than the video component in made-for-television programming. Small screen size, delivery interruptions and a nearly infinite number of program choices require that video for the Internet be short in length, frequently updated, timely, easily navigated, interactive and targeted. The Company also believes that the increasing deployment of broadband will improve the video experience of a growing number of web users.

In addition to investing in multiple strategic partnerships and wholly-owned operations that produce streaming video content as discussed above, the Company hopes to gain greater scale economies by working with independent content developers and other content partners. The Company has built or is building production facilities in New York City, Los Angeles and Berlin, Germany that it intends to make available to its content partners in order to facilitate the acquisition of Internet video content on a cost-effective basis. The Company believes that independent content developers often best understand a unique audience segment and can develop programming that targets this audience most effectively and uniquely. The Company also believes that its content partners will include recognized media businesses that, as partners with the Company, seek to extend their brands and editorial capabilities to this new distribution medium. The Company's strategy is to obtain access to such programming on a revenue- or equity-sharing basis.

Internet Services. The Company believes that business and other corporate websites will increasingly look to webcasting as a tool to rapidly and effectively communicate new developments to employees, customers and other stakeholders. The Company's affiliate, TV1, is well recognized in Europe for the delivery of professionally produced webcasts and has established strategic partnerships with several Internet Service Providers in their markets. iNEXTV utilizes a combination of in-house production, design and engineering personnel as well as independent contractors to deliver these services.

Internet Technology Group. Ampex has developed technologies for making electronic sound and pictures for the television broadcast market over several decades. The Company has a thorough understanding of digital time-base correction, digital filtering and image compression that are key enabling technologies that support Internet streaming media. The Company's Internet Technology Group is responsible for developing products and services to enhance

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

the Internet video viewing experience.

Ampex provides the proprietary technology developed by ITG to iNEXTV on a royalty free basis. This technology enables the Company's programming to be clearer and flow more smoothly than competitors' video programming. The Company believes that these improvements permit the Company to encode its programming at only 160 kps, while achieving the same picture quality of video content from other companies that has been encoded at more than twice that rate. This encoding advantage results in a significant savings in bandwidth distribution costs.

The Company's Internet strategy is dependent, in part, upon the ITG's ability to continue to develop improved technologies for streaming video applications. The Company regards its internally developed Internet technology as proprietary and attempts to protect it primarily with patents, copyrights, and contractual obligations of confidentiality, regarding its trade secrets. The Company does not currently hold any patents on its Internet technologies. However, the Company has filed a patent application in the U.S. Patent & Trademark office and may seek to file in the United States and foreign countries additional patent applications with respect to technologies, such as enhancements of picture clarity of Internet video content, that it may develop in the future. There can be no assurance that the Company would be granted any patents for such technology if developed or, if granted, that it would result in any substantial competitive advantage over competing technologies. In addition, the Company's Internet technologies could be claimed to conflict with or infringe the proprietary rights of others, which could result in litigation and the Company's being required to seek a license

11

to use those proprietary assets. The Company is not currently involved in any material conflict with any third party concerning patented or proprietary Internet technology rights.

Internet Video Markets. Today, the proportion of websites that include video content is relatively small. Those that incorporate video are primarily websites affiliated with television and cable networks that repurpose clips of their news and other video feeds. There also exists a limited number of companies that are developing Internet video programming that is tailored to appeal to specific demographic groups, believed not to be served by broadcast or cable programming. In the near future, the Company believes that video content will be included in an increasing number of websites of corporations, not-for-profit agencies and other organizations that seek to enhance communications beyond that currently provided by traditional text and graphics-based content. Also, the Company believes that most Internet portals will provide access to more video programming in order to continue to attract a large number of viewers to their sites, especially those that have broadband access. Lastly, the Company believes that there will be an increasing numbers of websites that are dedicated to the delivery of video programming along specific targeted demographics, where the business model is dependent upon advertising and sponsorship revenues and fees from e-commerce activity.

The Company has begun to syndicate its video programming to Internet portals and to certain other destination websites. In these instances, the portal or destination websites receive a percentage of advertising revenues received by the Company for video in-stream ads and banner ads that appear with its programming. The portal or destination websites are responsible for promoting the Company's programming to its audience, thereby saving the Company promotional expenditures to attract an audience to its site.

iNEXTV, together with AENTV, produce "life style" programming about high end

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

personal interests of affluent individuals, including Classic Cars, Travel, Fashion and others, as well as entertainment programming and "infotainment" programming such as Hollywood Reporter Minutes and Couch Confessions. In addition, iNEXTV has begun to aggregate production from third parties which it encodes and distributes through its syndication network of portals and destination websites. The Company believes that when Internet video programming becomes more popular, a growing percentage of the programming that it distributes will be that from third parties as opposed to programming produced internally.

The Company's Internet strategy is to grow revenues from Internet video advertising, sponsorships and e-commerce partnerships. Advertising on the Internet is in its early development. Industry sources estimate that Internet advertising in 1999 totaled approximately \$3 billion, out of total U.S. advertising in excess of \$200 billion. However, by 2004, these sources estimate that Internet advertising will exceed \$20 billion and represent nearly 7% of total U.S. advertising.

Advertising on the Internet is currently conducted primarily through banner ads and sponsorships. Together, they accounted for substantially all on-line advertising in 2000. The Company believes that the advertising community has concluded that banner ads lack the branding impact of traditional media. As bandwidth into the home increases, advertisers will be able to become more creative and advertisements may begin to resemble television advertising, though more tailored for the audience being targeted. The Company contemplates that the advent and development of enhanced streaming video content will be accompanied by the growth in sophisticated advertising.

The Company believes that it will achieve modest advertising revenues once it can demonstrate significant viewership, particularly by broadband users. To obtain significant viewership, the Company is establishing syndication arrangements with popular portals and destination websites, in exchange for a percentage of advertising revenues generated from the Company's programming. The Company believes that by the end of the second quarter of 2001, it will have syndication agreements in place with portals and destination websites, many of which are broadband enabled, that currently have millions of monthly users. While the Company believes that the incremental revenues that will be received by its syndication partners will be attractive to them, there can be no assurance that these sites will continue to offer to distribute the Company's content or that they will not require financial incentives that are not economical for the Company.

12

The Company has only recently begun to solicit advertisers and sponsors for its programming to coincide with the increase in its distribution network. Material advertising and sponsorship revenues are not expected to become significant for the next several fiscal quarters. Accordingly, the Company anticipates that its Internet operations will generate material losses for the foreseeable future.

Depending on the Company's financial resources and access to additional capital, the Company may seek to take equity positions in companies that have unique Internet video content, technology or other attributes. By providing infrastructure support in production, sales and marketing and technology, the Company believes that it can accelerate access to the public capital markets for these companies. The Company may seek to make public or private offerings of the securities of one or more of its affiliates, depending on market conditions and other factors. There can be no assurance that any of these efforts will materialize or be successful.

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

Licensing Operations

As a result of its ongoing research and development expenditures, the Company has developed substantial proprietary technology, certain of which it has elected to patent or to seek to patent. As of December 31, 2000, Ampex held over 900 patents and patent applications, including approximately 300 patents in the U.S., approximately 500 corresponding patents in other countries, and approximately 100 U.S. and foreign patent applications pending. The majority of these patents and pending patents relate to the Company's recording technology. The Company continually reviews its patent portfolio and allows non-strategic patents to lapse, thereby minimizing substantial renewal fees.

Ampex has granted numerous royalty-bearing patent licenses to, and holds patent licenses from, third parties. Certain of the Company's patented innovations have been adopted for use in mass market consumer products and, as a result, the Company receives the majority of its licensing royalties from foreign manufacturers of VCRs and 8-mm camcorders. The Company intends to negotiate license agreements with unlicensed manufacturers of digital format consumer video recorders, but there can be no assurance that any such licensing efforts (including any necessary litigation) will be successful.

The Company believes that it has patents that may be used in the manufacture of television receivers. In addition, Ampex is evaluating the extent to which its technology may be employed or useful in video games, and will continue to evaluate additional products as potential licensing opportunities to the extent that its technical and financial resources permit.

It is not possible to predict the amount of royalty income that will be received in the future. Royalty income has historically fluctuated widely due to a number of factors that the Company cannot predict, such as the extent of use of the Company's patented technology by third parties, the extent to which the Company must pursue litigation in order to enforce its patents, and the ultimate success of its licensing and litigation activities. Moreover, there can be no assurance that the Company will continue to develop patentable technology that will generate significant patent royalties in future years.

U.S. patents are, at present, in force for a period of 20 years from the date of application and patents granted by foreign jurisdictions are generally in force for between 14 years to 20 years from the date of application. Ampex has obtained its present patents over the course of the past 20 years and, accordingly, has patents in force that will expire from time to time over the next 20 years. Patents are important to the current overall business of the Company, both as a source of protection of the proprietary technology used in the Company's current products, and as a source of royalty income. While results of operations would be adversely affected by the loss of patents that generate significant royalty income, management believes that none of Ampex's current product lines is materially dependent upon a single patent or license or group of related patents or licenses, and that timely introduction of products incorporating new technologies or particularly suited to meet the needs of a specific market or customer group is a more important determinant of the success of Ampex's current business. Nevertheless, there can be no assurance that the Company will continue to

13

develop patentable technology that will be able to generate significant patent royalties in future years to replace patents as they expire. See "Research, Development and Engineering."

Ampex regards its trademark "Ampex" and the Ampex logo as valuable to its businesses. Ampex has registered its trademark and logo in the U.S. and a

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

number of foreign countries. U.S. trademark registrations are generally valid for an initial term of 10 years and renewable for subsequent 10-year periods.

Trademarks of the Company used in this Report include Ampex include Ampex, DCT, DST, DCRsi and DIS, all of which are trademarks of Ampex Corporation, and MicroNet, DataDock, Genesis, FibreFlex and Premier, all of which are trademarks of MicroNet. All other trademarks and service marks used in this Report are the property of Ampex or their respective owners.

Description of Discontinued Operations

MicroNet

As of year-end 2000, the Company decided to discontinue the operations of MicroNet and to provide reserves for the estimated cost of closure. MicroNet manufactured a variety of storage solutions targeted at image-based creative professional markets, including principally digital pre-press and digital video editing. It's principal products included DataDock, Genesis and SanCUBE. MicroNet is presently liquidating its assets, including its proprietary technology and plans to distribute the proceeds in satisfaction of its liabilities. There can be no assurance that the proceeds from the sale of assets will be sufficient to satisfy in full the claims of MicroNet's creditors.

Data Systems--Business Held for Sale

In February 2000, in order to focus more sharply on its Internet business, Ampex announced plans to sell its Data Systems subsidiary, which produces high performance mass data storage and instrumentation recorders and systems. Data Systems products are sold primarily for use in the television broadcast and government markets. At the date of this Report, the Company had not yet entered into a contract to sell Data Systems, and there can be no assurance that a contract will be entered into or as to the terms or timing of any sale. Pending consummation of a sale, the Company is continuing to operate Data Systems substantially as it had in the past, although for accounting purposes its operations have been classified as a "Business Held for Sale." See "Risk Factors--Risk of Proposed Sale of Data Systems," above. A brief summary of Data Systems' business and operations is set forth below. For additional information, reference is made to the Company's 1998 Annual Report on Form 10-K and its Quarterly Reports on Form 10-Q filed with the Securities and Exchange Commission during 1999.

Data Systems' principal products are: (i) 19-millimeter scanning recorders and library systems (DST and DIS products) and related tape and after-market equipment; (ii) data acquisition and instrumentation products (primarily DCRsi instrumentation recorders) and related tape and after-market equipment; and (iii) professional video and other products (primarily its DCT video recorders and image processing systems) and related tape products and television after-market equipment.

Data Systems distributes its 19-millimeter products directly through its internal sales force and independent value-added resellers. Data Systems' DST products are sold to customers such as oil and gas companies, imaging companies, information and entertainment delivery companies and broadband telecommunications companies. Data Systems is also pursuing opportunities for storage of very large databases maintained by many commercial and government entities. Data Systems' instrumentation recorders (including its DIS recorders) are sold primarily to government agencies involved in data collection, satellite surveillance and defense-related activities, as well as to defense contractors and other industrial users for testing and measurement purposes. Sales of instrumentation recorders are made through Data Systems' internal domestic and international sales forces, as well as through independent sales

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

organizations in foreign markets. Data

14

Systems' sales to U.S. government agencies (either directly or indirectly through government contractors) represented 21% of their net sales in fiscal 2000 compared to 19% in fiscal 1999 and 26% in fiscal 1998. No single non-government customer accounted for more than 10% of Data System's total net sales in the three years ended 2000. Data Systems' products are manufactured at facilities in Redwood City, California and Colorado Springs, Colorado. The Company believes that Data Systems' manufacturing facilities, which were consolidated in 1998, continue to have sufficient capacity to meet current and future demand. Data Systems competes in all markets with a number of well-established corporations, such as IBM Corporation, Sony Corporation, Quantum Corporation and others. In the instrumentation market, its major competitors include Sony Corporation, Loral Data Systems, Data Tape Incorporated and Metrum Incorporated. Data Systems' product lines are characterized by continual technological developments, and require a high level of expenditure for research and development. Obsolescence of existing product lines, or the inability to develop and introduce new products, could have a material adverse effect on the Data Systems operation.

As of December 31, 2000, Data Systems employed 248 people, as compared to 293 people as of December 31, 1999.

Employees

As of December 31, 2000, Ampex employed 87 people (including employees of consolidated subsidiaries) in its continuing operations, as compared to 121 persons employed as of December 31, 1999, primarily reflecting the reduction of employees when the Company ceased funding TV on the WEB operations in September 2000. Also, the Company from time-to-time utilizes the services of independent contractors, primarily in its Internet operations. No employees are covered by any collective bargaining agreement. The Company is dependent on the performance of certain key members of management and key technical personnel. The Company has not entered into employment agreements with any such individuals, except for certain employees of its Internet affiliates. Edward J. Bramson, who has served as the Company's Chief Executive Officer since 1991, is also engaged in the management of certain companies affiliated with Sherborne Holdings Incorporated, a privately-owned Delaware holding company and a Company stockholder. Mr. Bramson currently devotes most of his time to the management of the Company. The loss of the services of Mr. Bramson or other key individuals could have a material adverse effect on the Company.

Environmental Regulation and Proceedings

The Company's facilities are subject to numerous federal, state and local laws and regulations designed to protect the environment from waste emissions and hazardous substances. Ampex is also subject to the federal Occupational Safety and Health Act and other laws and regulations affecting the safety and health of employees in its facilities. Management believes that Ampex is generally in compliance in all material respects with all applicable environmental and occupational safety laws and regulations or has plans to bring operations into compliance. Management does not anticipate that capital expenditures for pollution control equipment for fiscal 2001 or 2002 will be material.

Owners and occupiers of sites containing hazardous substances, as well as generators and transporters of hazardous substances, are subject to broad liability under various federal and state environmental laws and regulations, including liability for investigative and cleanup costs and damages arising out

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

of past disposal activities. The Company has been named as a potentially responsible party by the United States Environmental Protection Agency with respect to four contaminated sites that have been designated as "Superfund" sites on the National Priorities List under the Comprehensive Environmental Response, Compensation and Liability Act of 1980. The Company is engaged in six environmental investigation, remediation and/or monitoring activities at sites located off Company facilities, including the removal of solvent contamination from subsurface aquifers at a site in Sunnyvale, California. Some of these activities involve the participation of state and local government agencies. The other five sites (including the four Superfund sites) are associated with the operations of the Media subsidiaries formerly owned by the Company. Although the Company sold Media in November 1995, the Company may have continuing liability with respect to environmental contamination at

15

these sites if Media fails to discharge its responsibilities with respect to such sites. During 2000, the Company spent a total of approximately \$0.1 million in connection with environmental investigation, remediation and monitoring activities and expects to spend a similar amount in fiscal 2001 for such activities.

Because of the inherent uncertainty as to various aspects of environmental matters, including the extent of environmental damage, the most desirable remediation techniques and the time period during which cleanup costs may be incurred, it is not possible for the Company to estimate with any degree of certainty the ultimate costs that it may incur with respect to the currently pending environmental matters referred to above. Nevertheless, at December 31, 2000, the Company had an accrued liability of \$1.3 million for pending environmental liabilities associated with the Sunnyvale site and certain other sites currently owned or leased by the Company. The Company has not accrued any liability for contingent liabilities it may incur with respect to former Media sites discussed above. Based on facts currently known to management, management believes it has no contingent liability in connection with such pending matters, either individually or in the aggregate, will be material to the Company's financial condition or results of operations or material to investors.

While the Company believes that it is generally in compliance with all applicable environmental laws and regulations or has plans to bring operations into compliance, it is possible that the Company will be named as a potentially responsible party in the future with respect to additional Superfund or other sites. Furthermore, because the Company conducts its business in foreign countries as well as in the U.S., it is not possible to predict the effect that future domestic or foreign regulation could have on Ampex's business, operating results or cash flow. There can be no assurance that the Company will not ultimately incur liability in excess of amounts currently reserved for pending environmental matters, or that additional liabilities with respect to environmental matters will not be asserted. In addition, changes in environmental regulations could impose the need for additional capital equipment or other requirements. Such liabilities or regulations could have a material adverse effect on the Company in the future.

Pension Plan Matters

In 1994, the Company, the Pension Benefit Guaranty Corporation ("PBGC") and certain affiliates ("Affiliates") who were members of a "group under common control" for purposes of the Employee Retirement Income Security Act ("ERISA") entered into certain agreements in connection with the liquidation of the Company's former parent, NH Holding Incorporated ("NHI"), relating to the pension plans of the Company and of its former Media subsidiaries. See Note 19

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

of Notes to Consolidated Financial Statements. Pursuant to these agreements, the Affiliates agreed that if during the terms of the agreements Ampex fails to make a required contribution to the pension plans, the Affiliates will make or advance funds to permit Ampex to make such contribution, and Ampex agreed to repay such amounts in accordance with the terms of the agreements. Ampex has agreed to grant the Affiliates a security interest in certain assets as collateral for any advances which the Affiliates may be required to make in the future pursuant to the agreements. The agreements contain certain restrictive covenants which, among other things, restrict Ampex's ability to declare dividends, sell all or substantially all its assets or commence liquidation, or engage in specified transactions, with certain related parties, breach of which could result in acceleration of any of the Company's potential termination liabilities. Sale of Data Systems may be subject to approval of the PBGC with respect to pension plan matters. In 1994, the Company discontinued accrual of benefits under the pension plans, but has continued to fund its plan in accordance with ERISA (and remains contingently liable to fund the Media plan if Media fails to do so). No claims have been asserted or, to the knowledge of management, are threatened under these agreements.

16

ITEM 2. PROPERTIES

As of December 31, 2000, the Company's principal properties were as follows:

Location -----	Activities Conducted -----	Approximate Square Footage of Facility -----
Redwood City, California..	Executive offices, RD&E, manufacturing, sales and marketing(1) (7)	91,760
Colorado Springs, Colorado.....	Manufacturing(7) (8)	229,961
New York City, New York...	Executive offices, Internet marketing, sales, operations and studio(2)	19,000
Irvine, California.....	Engineering, manufacturing, sales and marketing(3)	33,089
Chineham, Basingstoke, England.....	Sales and service(4) (7)	7,184
Tokyo, Japan.....	Sales and service(5) (7)	3,886
Woodland Hills, California.....	Internet marketing, sales, operations and studios(6)	10,568

(1) These facilities are leased until September 2008, with 31,987 square feet currently available to sublet.

(2) These facilities are leased under a ten-year lease that expires in April 2008.

(3) These facilities are leased under a five-year lease that expires in May 2005. As part of the orderly liquidation of MicroNet, the Company is currently seeking to sublet the premises or negotiate the termination of the lease.

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

- (4) These facilities are leased under a ten-year lease, which is terminable at the option of the Company or landlord in December 2002.
- (5) These facilities are leased under leases that expire during July 2001. The current plan is to renew the lease on a year-to-year basis.
- (6) These facilities are leased under various leases expiring in March 2004.
- (7) These properties are used primarily for the operations of Data Systems, which is being held for sale. If the proposed sale of Data Systems is consummated, the Company anticipates that these properties will be sold or the lease will be assigned to the acquiring company in connection with the sale.
- (8) This property is subject to a deed of trust securing senior discount notes issued by Data Systems in November 2000.

In addition, the Company has outstanding lease obligations with respect to various facilities whose functions were terminated in connection with the Company's prior period restructuring of its business operations. The Company is subleasing portions of these facilities pending termination of the underlying leases.

The Company believes that its current facilities, including machinery and equipment, are generally in good condition, well-maintained and suitable for their intended uses, and that its facilities have, and will continue to have, adequate capacity to accommodate the Company's present needs and business growth for its present products in the foreseeable future.

ITEM 3. LEGAL PROCEEDINGS

The Company is a party to routine litigation incidental to its business. In the opinion of management, no such current or pending lawsuits, either individually or in the aggregate, are likely to have a material adverse effect on the Company's financial condition, results of operations or cash flows.

In response to a lawsuit filed by the Company against Mitsubishi Electric Corporation and Mitsubishi Electric America Inc. ("Mitsubishi"), which has been finally resolved as previously reported, Mitsubishi filed a

17

lawsuit against Ampex, alleging patent infringement by certain Ampex video and data recorder products. In 1997, the U.S. District Court for the Central District of California determined that Ampex has no liability to Mitsubishi patents, and Mitsubishi appealed to the Court of Appeals for the Federal Circuit. On August 30, 1999, the Court of Appeals affirmed the judgment in favor of Ampex and subsequently denied Mitsubishi's request for reconsideration. During the year, Mitsubishi filed a petition for certiorari to the Supreme Court of the United States, and the Court ruled denying the petition. No further appeal is possible.

See also "Environmental Regulation and Proceedings" and Note 15 of Notes to Consolidated Financial Statements for additional information with respect to pending legal proceedings.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

Not applicable.

ITEM 4A. EXECUTIVE OFFICERS OF THE REGISTRANT

The executive officers of the Company and their ages as of February 1, 2001 are as follows:

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

Name ----	Age ---	Position -----
Edward J. Bramson.....	49	Chairman and Chief Executive Officer
Craig L. McKibben.....	50	Vice President, Chief Financial Officer and Treasurer
K. Michael Cooper.....	53	Vice President
Robert L. Atchison.....	63	Vice President
Joel D. Talcott.....	59	Vice President and Secretary

Each of the executive officers of the Company serves in such capacity at the discretion of the Board.

Edward J. Bramson is Chairman of the Board, Chief Executive Officer and a director of the Company. He has been an officer and director of the Company since 1987, and since January 1991 has been Chief Executive Officer of the Company. Mr. Bramson also serves as President of each of Ampex Holdings Corporation and iNEXTV and as Assistant Secretary of Data Systems, which is being held for sale. Mr. Bramson is a director of each such subsidiary and Ampex Finance Corporation (a subsidiary of Ampex Corporation). He is also Chairman and Chief Executive Officer of Sherborne Holdings Incorporated, Sherborne & Company Incorporated and Sherborne Investments Corporation, is a limited partner of Newhill Partners, LP and the managing member of SH Securities Co., L.L.C. These entities, which are private investment holding companies, may be deemed to be affiliates of the Company. Mr. Bramson is also a director of Hillside Capital Incorporated, a private industrial holding company with which he has been associated since 1976.

Craig L. McKibben is Vice President, Treasurer, Chief Financial Officer and a director of the Company. Mr. McKibben has been an officer and a director of the Company since 1989. Mr. McKibben also serves in the following capacities with other Company subsidiaries: director, Vice President and Treasurer of Ampex Holdings Corporation and iNEXTV, director and Vice President of Ampex Finance Corporation and Treasurer of Alternative Entertainment Network, Inc. He also serves as Vice President and Treasurer of Data Systems, which is being held for sale. He is also Vice President and a director of Sherborne Holdings Incorporated and of Sherborne & Company Incorporated. From 1983 to 1989, he was a partner at the firm of Coopers & Lybrand L.L.P., a predecessor of PricewaterhouseCoopers LLP, independent public accountants.

Robert L. Atchison is Vice President of the Company. Since January 1994 he has been responsible for all operating activities of the Company, and in 1996 assumed responsibility for certain of the Company's sales and marketing activities. From April 1991 to January 1994, he was responsible for engineering and operations for the Company. Mr. Atchison also serves as Vice President and a director of Data Systems, which is being held for sale, and as President and a director of Ampex International Sales Corporation, a wholly-owned subsidiary of the Company. He has served as an executive officer of the Company and various subsidiaries since 1987.

18

K. Michael Cooper, who joined the Company in June 1998, is Vice President of the Company. He serves as Vice President and a director of AENTV, a subsidiary of iNEXTV, and as President and a director of Data Systems, which is being held for sale. Previously, Mr. Cooper served as President and Chief Executive Officer of a computer peripheral company, and in a number of senior management positions with the Hiller Group.

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

Joel D. Talcott is Vice President and Secretary of the Company, positions he has held since 1987. He has served as General Counsel since January 1996, a position he also held from 1987 to January 1994. He is also responsible for the Company's patent licensing activities (having served as Patent Counsel from 1987 to 1991), and has supervisory responsibility for investor relations and corporate communications functions. Mr. Talcott also serves as Vice President, Secretary and a director of Ampex Finance Corporation, Ampex International Sales Corporation and Data Systems, which is being held for sale, as Secretary of AENTV and as Vice President and Secretary of iNEXTV and Ampex Holdings Corporation.

19

PART II

ITEM 5. MARKET FOR COMPANY'S COMMON EQUITY AND RELATED STOCKHOLDER MATTERS

(a) The following table sets forth the high and low prices for the Company's Class A Common Stock for each quarter during fiscal 2000 and 1999. Since January 16, 1996, the Class A Common Stock has been traded on the American Stock Exchange under the symbol "AXC."

Fiscal Year -----	High	Low
	-----	-----
2000		
First Quarter.....	\$5.50	\$3.00
Second Quarter.....	3.44	1.50
Third Quarter.....	1.75	1.00
Fourth Quarter.....	1.06	0.25
1999		
First Quarter.....	\$5.63	\$1.06
Second Quarter.....	7.50	2.56
Third Quarter.....	6.00	2.50
Fourth Quarter.....	6.38	2.25

As of January 31, 2001, there were 805 holders of record of the Company's Class A Common Stock.

The Company has not declared any dividends on its Common Stock since its incorporation in 1992 and has no present intention of paying dividends on its Common Stock. The Company is also restricted by the terms of the indenture for its Senior Notes and certain other agreements, and of its outstanding Noncumulative Preferred Stock, as to the declaration of dividends. Under current circumstances, the Company may not pay any cash dividends on its Common Stock. See "Management's Discussion and Analysis of Financial Condition and Results of Operations--Liquidity and Capital Resources" and Notes 13 and 16 of Notes to Consolidated Financial Statements.

(b) Information as to equity securities sold by the Company during the fiscal year ended December 31, 2000 which were not registered under the Securities Act of 1933, as amended (the "Securities Act") is contained in the Company's Quarterly Reports on Form 10-Q filed by the Company for such period.

ITEM 6. SELECTED FINANCIAL DATA

The financial data required by Item 6 is included immediately following Item

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

14 hereof.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of the financial condition and results of operations of the Company and its subsidiaries should be read in conjunction with the Consolidated Financial Statements and the Notes thereto, included elsewhere in this Report.

Strategic Repositioning of the Company

In recent years, the Company began a strategic repositioning by capitalizing on its digital imaging technology to become a major provider of Internet video programming, services and technology. In 1999, the Company consolidated its internal Internet video operations, acquisitions and strategic investments into iNEXTV, a wholly-owned subsidiary.

20

In February 2000, in order to focus more sharply on its Internet video businesses, the Company announced plans to sell Data Systems, its subsidiary which makes high performance tape-based mass data storage products. The Company continues to operate Data Systems as it had in the past. However, for accounting purposes, the results of operations of Data Systems have been classified as a "Business Held for Sale" in the Consolidated Statements of Operations for all periods presented. The book value of the net assets to be sold of this segment have been reflected in "Net Assets of Business Held for Sale" in the Consolidated Balance Sheets as of December 31, 2000 and 1999. Upon consummation of a successful sale, the Company intends to use the proceeds for investment in iNEXTV and other Internet initiatives, as well as to retire debt.

As of year-end 2000, Ampex determined to discontinue the operations of MicroNet, its subsidiary which manufactures disk arrays and storage area network products. At December 31, 2000, the Company established a reserve for the costs of closure and to write-off its investment in MicroNet. Accordingly, the operations of MicroNet have been classified as "Discontinued Operations" for all periods presented.

Following the planned sale of Data Systems, the Company's continuing operations will consist of Ampex's intellectual property licensing department, its Internet Technology Group and its subsidiary, iNEXTV.

Results of Continuing Operations for the Three Years Ended December 31, 2000

Total Revenue. Total revenue was \$15.1 million in 2000, \$21.7 million in 1999 and \$10.6 million in 1998. In 2000, the revenue decrease from 1999 was primarily due to the nonrecurring royalty income received in 1999 offset in part by an increase in revenue from the Company's Internet video businesses. The revenue increase in 1999 compared to 1998 is attributed to nonrecurring royalty income and the inclusion of revenues of the Company's Internet video businesses.

Royalty Income. Royalty income was \$12.3 million in 2000, \$19.9 million in 1999 and \$10.6 million in 1998. Royalty income in 1999 were positively impacted by royalty income of approximately \$10.0 million, representing the portion of royalties earned through 1999 from a long-term license agreement extending through the year 2002. The Company's royalty income derives from patent licenses, and the Company receives most of its royalty income from licenses with companies that manufacture consumer video products (such as VCRs and

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

camcorders) and, in certain cases, professional video tape recorders. During this period, a growing portion of royalty income related to 6-mm and 8-mm video recorders and camcorders. The Company is assessing whether manufacturers of video games, DVD recorders and digital television receivers are using its patented technology. There can be no assurance that the manufacturers of these products are utilizing the Company's technology or, if used, whether the Company will be able to negotiate license agreements with the manufacturers. Royalty income has historically fluctuated widely due to a number of factors that the Company cannot predict or control such as the extent of use of the Company's patented technology by third parties, the materiality of any nonrecurring royalties received as the result of negotiated settlements for products sold by manufacturers prior to entering into licensing agreements with the Company, the extent which the Company must pursue litigation in order to enforce its patents, and the ultimate success of its licensing and litigation activities. The costs of patent litigation can be material, and the institution of patent enforcement litigation may also increase the risk of counterclaims alleging infringement by the Company of patents held by third parties or seeking to invalidate patents held by the Company. See "Legal Proceedings," above.

Internet Revenue. The Company's Internet video programming and services business began in early 1999, and in June 1999 were consolidated under its subsidiary, iNEXTV. iNEXTV recorded revenue of \$2.9 million in the year ended December 31, 2000 compared to \$1.7 million in the year ended December 31, 1999, principally from webcasting, video production and event marketing services, substantially all of which have historically been provided by the Company's subsidiary, TV onthe WEB. In August 2000, the Company announced that it would cease funding and write-off its remaining investment in TV onthe WEB, allowing it to re-deploy its financial resources to its core Internet video businesses which produce video content and technology for distribution on the web. In 2000, TV onthe WEB reported a net loss of \$9.7 million, which included \$5.4 million to amortize all remaining goodwill resulting from its acquisition by the Company and to

21

write down its investment to their estimated realizable value. In 1999, TV onthe WEB reported a net loss of \$6.0 million. Since October 1, 2000, the Company has not recognized any revenues or expenses of TV onthe WEB in its consolidated financial statements. iNEXTV will continue to offer certain web video services through its other Internet subsidiaries. Internet revenues do not include revenues of TV1, which provides Internet video services to European businesses, as TV1 is not a majority-owned affiliate and is being accounted for under the cost method. In future periods, iNEXTV will rely significantly on advertising and e-commerce revenues. The Company is seeking to grow revenues by syndicating its content and that of others for distribution to third party websites under advertising revenue sharing arrangements and by offering various services to customers who wish to add video content to their own websites. iNEXTV and its subsidiary AENTV have announced agreements with destination websites and Internet portals and broadband service providers that are being implemented. By increasing the size of its audiences through syndication, management believes that it will enhance the attractiveness of its programming to potential buyers of web based video advertising. Revenues from syndicated advertising activities are not expected to become significant before the second half of 2001.

Intellectual Property Costs. Intellectual property costs relate to those expenditures incurred by the Company's in-house patent department in procuring royalty income and expenditures associated with patent enforcement litigation. Intellectual property costs totaled \$1.1 million, \$1.3 million and \$1.5 million in 2000, 1999 and 1998, respectively. In the third quarter of 2000, the Company

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

received a reimbursement of legal costs previously incurred on a patent infringement case. The intellectual property costs for 2000, excluding this recovery, was \$1.3 million.

Internet Video Programming and Site Development. Internet video programming and site development costs of \$10.9 million in 2000 and \$7.9 million in 1999 represent costs incurred for services rendered to customers, as well as costs incurred for the development of made-for-the-Internet video programming and non-capitalized website hardware and software purchases in support of iNEXTV's websites and infrastructure. The operations of TV onthe WEB were responsible for \$3.5 and \$2.1 million of Internet Video Programming and Site Development expenses in 2000 and 1999, respectively. The Company will not record revenues or expenses of TV onthe WEB in future periods' consolidated financial statements, as a result of its decision to cease funding its operations. The Company anticipates that site development startup costs will continue to decline in 2001, as the requisite web site infrastructure is substantially in place. The Company is also seeking to add content from others to expand the scope of its programming without a commensurate increase in expenses. The Company has increased its investment in TV1 Internet Television in early 2001. After this additional investment, the Company may be required to consolidate this enterprise or to record its equity interest in the enterprise's future losses, which would result in greater losses reported by the Company in future periods.

Research, Development and Engineering Expenses. Research, development and engineering expenses associated with support of iNEXTV's Internet video strategy increased to \$0.5 million in 2000. Amounts in prior years are not significant. The Company anticipates increased spending in connection with research, development and engineering programs which support iNEXTV's Internet video strategy.

Selling and Administrative. Selling and administrative expenses increased to \$17.4 million in 2000 from \$11.4 million in 1999 and \$4.5 million in 1998. In addition to costs incurred for the Internet video programming and site development discussed above, the Company's Internet video businesses incurred direct sales, marketing and administrative expenses totaling \$12.1 million in 2000 and \$10.2 million in 1999. In 1998, there were no material Internet-related expenditures. The operations of TV onthe WEB accounted for \$2.9 million and \$3.8 million of selling and administrative expenses in 2000 and 1999, respectively. The content syndication business model reduces the Company's expenses for marketing and advertising in return for sharing advertising revenue with syndication partners. Accordingly, the Company believes its Internet marketing and advertising expenditures will decline in the future from levels incurred in recent periods. Other nonallocated administrative costs totaled \$5.3 million in 2000 compared to \$1.2 million in 1999 and \$4.5 million in 1998.

22

Amortization of Goodwill and Writedown of Impaired Assets. In connection with the acquisitions of TV onthe WEB and AENTV, the purchase price exceeded the fair value of assets acquired and liabilities assumed, resulting in the recording of goodwill. In the second quarter of 2000, the Company changed the expected life of goodwill of the acquired Internet businesses from three years to two years, given the rapid changes affecting the Internet and to conform to other Internet content companies. In the third quarter of 2000, the Company wrote off its remaining investment in TV onthe WEB, resulting in fully amortizing all remaining goodwill and providing a reserve for asset impairment to write down the assets of TV onthe WEB to their estimated realizable value. In the fourth quarter of 1999, the Company elected not to exercise options to

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

acquire additional ownership in Executive Branch Webcasting Corporation ("EBWC") but to proceed with the development of EXBTV.com as an iNEXTV-funded Internet video initiative. The Company wrote off its minority investment in EBWC totaling \$1.5 million. Also in the fourth quarter of 1999, the Company wrote off a minority investment in a company providing web hosting and Internet consulting services, totaling \$0.5 million, since the Company is no longer involved in the strategic direction of that entity.

Operating Income (Loss). The Company incurred an operating loss of \$20.0 million in 2000 compared to \$2.2 million in 1999 compared to operating income of \$4.5 million in 1998. The operating loss in 2000 and 1999 was primarily due to the Company's Internet video activities, including amortization of goodwill as a result of the acquisition of TV onthe WEB and AENTV and the write-off of two minority investments described above. This was offset in part by royalty income of which revenue in 1999 included a one-time royalty receipt of approximately \$6.7 million. The Company expects to include TV1 in its results for 2001 that may require expenditures in future periods and may also incur material charges to goodwill amortization that will increase consolidated net losses while the Company is building its Internet programming network.

Interest Expense. Interest expense is primarily due to the issuance of \$44.0 million of 12% Senior Notes due 2003 and Warrants to purchase approximately 1.02 million shares of Common Stock in January and July 1998.

Amortization of Debt Financing Costs. These amounts reflect periodic amortization of financing costs over the remaining terms of the debt. Financing costs associated with the January and July 1998 issuance of the 12% Senior Notes are being charged to expense over five years.

Interest Income. Interest income is earned on cash balances and short and long-term investments. In 1999 and 1998 the Company, pending application of the proceeds of the 12% Senior Notes, had significantly higher investment balances compared to 2000, which resulted in higher interest income.

Other (Income) Expense, Net. In connection with certain litigation between the Company and ISS the value of the settlement was included in other (income) expense for 2000. In 1999, other (income) expense, net includes a proportionate share of the net loss for the period the Company held a minority interest in TV onthe WEB and AENTV.

Provision for (Benefit of) Income Taxes. The provisions for income taxes in 2000 and 1999 consist primarily of foreign income taxes and withholding taxes on royalty income. In the first quarter of 1998, the Company reversed \$5.2 million previously reserved in connection with disputed state income taxes for the prior years, following the favorable settlement of that dispute in March 1998. In the second and third quarters of 1998, the Company reversed \$4.9 and \$5.2 million, respectively, previously reserved in connection with the liquidation of its subsidiary in Italy. See Note 22 of Notes to Consolidated Financial Statements. The Company was not required to include any material provision for U.S. Federal income tax in any of the last three fiscal years due to the utilization of net operating loss carry forwards and timing differences. At December 31, 2000, the Company had net operating loss carry forwards for income tax purposes of \$125 million, expiring in the years 2007 through 2015. As a result of financing transactions that were completed in 1994 and 1995, the Company is limited in the amount of net operating loss carry forwards that can offset consolidated Federal taxable income in a given year. The Company derives pretax foreign income from its international operations, which are conducted principally by its foreign subsidiaries. In addition, the Company's royalty income is

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

subject, in certain cases, to foreign tax withholding. Such income is taxed by foreign taxing authorities and the Company's domestic interest and amortization expenses and operating loss carry forwards are not deductible in computing such foreign taxes.

Income (Loss) of Business Held for Sale. In February 2000, the Board of Directors of the Company authorized management to pursue a sale of Data Systems, its wholly-owned subsidiary that manufactures and sells high performance, tape-based mass data storage products. As a result, for all periods presented, the Company reported as a single line item in the Consolidated Statements of Operations, an income (loss) of business held for sale, net of taxes, of \$2.0 million, (\$3.0) million and (\$3.8) million in 2000, 1999 and 1998, respectively. Revenues of this segment totaled \$47.9 million, \$51.6 million and \$57.8 million in 2000, 1999 and 1998, respectively. Total costs and operating expenses of this segment totaled \$45.6 million, \$54.9 million and \$62.2 million in 2000, 1999 and 1998, respectively. Other (income) expense of this segment totaled \$0.1 million, \$(0.2) million and (\$0.5) million in 2000, 1999 and 1998, respectively. Ampex continues to seek a buyer for the Data Systems business.

Loss from Discontinued Operations In February 2001, the Board of Directors of the Company authorized management to close MicroNet, its wholly-owned subsidiary that makes high performance disk arrays and Storage Area Network, and to establish a reserve for the costs of closure. As a result, for all periods presented, the Company reported as two line items in the Consolidated Statements of Operations, a loss from discontinued operations, net of taxes, of \$5.4 million, \$4.0 million and \$3.0 million in 2000, 1999 and 1998, respectively and a loss on disposal of discontinued operations, net of taxes, of \$6.3 million in 2000. Revenues of this segment totaled \$12.0 million, \$10.9 million and \$5.5 million in 2000, 1999 and 1998, respectively. Total costs and operating expenses of this segment totaled \$17.4 million, \$14.9 million and \$8.5 million in 2000, 1999 and 1998, respectively.

Net Income (Loss). The Company reported a net loss of \$35.8 million in 2000, \$15.4 million in 1999 and net income of \$10.4 million in 1998, primarily as a result of the factors discussed above under "Royalty Income," "Internet Video Programming and Site Development," "Selling and Administrative," "Amortization of Goodwill and Writedown of Impaired Assets," and "Loss from Discontinued Operations."

Benefit from Extinguishment of Mandatorily Redeemable Preferred Stock. In 2000, the Company issued shares of Common Stock valued at \$2.50 per share to satisfy its redemption obligation on the Redeemable Preferred Stock, which was higher than fair value per share of Common Stock. As a result the Company recorded a benefit available to common stockholders of \$1,263,000, representing the difference between the fair value and \$2.50 per share for the number of shares issued, on the Consolidated Statements of Operations. On April 28, 1999, the Company agreed to exchange 40,000 shares of its Common Stock for 287 shares of its outstanding Redeemable Preferred Stock. The resultant \$374,000 benefit on exchange has been recognized as a benefit available to the common stockholders on the Consolidated Statements of Operations.

Liquidity and Capital Resources

Cash Flow. At December 31, 2000, the Company had cash and short-term investments of \$15.4 million and working capital of \$8.3 million. At December 31, 1999, the Company had cash and short-term investments of \$41.7 million and working capital of \$34.8 million. Data Systems, which is accounted for as a "Business Held for Sale," had working capital of \$6.7 million and \$8.8 million at December 31, 2000 and 1999, respectively. Working capital of Data Systems has been classified in "Net Assets of Business Held for Sale" at December 31,

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

2000 and 1999. The decline in cash and short-term investments from 1999 to 2000 results primarily from operating losses of the Company's Internet video businesses, operations of the Internet Technology Group and operating losses of MicroNet. These losses more than offset operating income from the Company's non-Internet technology licensing activities. Cash used in continuing operations totaled \$28.2 million in 2000, \$4.6 million in 1999 and \$3.3 million in 1998. Cash used in discontinued operations totaled \$1.7 million in 2000, \$5.3 million in 1999 and \$5.4 million in 1998.

24

Major items impacting results from continuing operations in 2000, which did not affect cash, were goodwill amortization associated with the Internet businesses and a provision for asset impairment to write down assets of TV on the WEB to their estimated realizable value in the amount of \$5.4 million. Other non-cash charges affecting 2000 operations included other depreciation, amortization and accretion of \$1.9 million.

The Company intends to seek strategic partnerships with other companies in order to obtain additional content, brand recognition, user awareness, technology and infrastructure cost savings. The Company may be required to commit significant resources to these partnerships, which could increase the Company's liquidity needs and require it to issue debt or equity securities which would dilute current stockholders' interest in the Company.

The Company has announced its intention to sell Data Systems, which manufactures the Company's high performance mass data storage and instrumentation products for entertainment and government applications. In 2000, the Company received offers to purchase Data Systems and the Company believes it may receive additional offers in the future. At the date of this Report, the Company has not entered into any definitive agreement of sale, and there can be no assurance that the Company will be able to consummate a sale, or as to the terms or timing of any sale, if consummated.

Ampex intends to use the proceeds of the proposed sale of Data Systems to repay the Senior Discount Notes discussed below, and in its continuing operations, including its Internet video operations. Upon the successful sale of Data Systems at the currently anticipated price, together with cash and marketable investments on hand and ongoing royalty income, the Company believes that it will have sufficient funds to satisfy its operating cash requirements, capital expenditures and debt service costs through at least 2001.

In addition, the Company may seek to raise additional capital at any time to make new investments in streaming media Internet ventures and technology. The Company may seek to issue additional shares of Common Stock in public or private equity transactions or seek to sell equity securities of one or more of its Internet video businesses privately or in an initial public offering. There can be no assurance that a market will exist for the Company's or its affiliates' securities. The Company expects that it will face an increased number of competitors in future years, many of whom will be better capitalized and have greater financial resources than the Company. The Company may require additional capital to execute its Internet strategy, and there can be no assurance that it will be able to obtain such capital on reasonable terms or at all.

The Company has available, through a subsidiary, a working capital facility that allows it to borrow or obtain letters of credit totaling \$7.0 million, based on eligible accounts receivable, through May 2002. At December 31, 2000, the Company had borrowings outstanding of \$2.4 million and had letters of credit issued against the facility totaling \$1.1 million. At December 31, 1999,

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

the Company had borrowings outstanding of \$0.8 million and had letters of credit issued against the facility totaling \$1.1 million. The Company believes that this facility will be allowed to expire in conjunction with the sale of Data Systems.

Financing Transactions. In 2000, holders of 760 shares of Convertible Preferred Stock converted their holdings into 380,000 shares of Common Stock, leaving 1,125 shares of Convertible Preferred Stock outstanding. In 1999, holders of 8,115 shares of Convertible Preferred Stock converted their holdings into 4,057,500 shares of Common Stock. Beginning in June 2001, the Company will become obligated to redeem any remaining Convertible Preferred Stock in quarterly installments through December 2008. Beginning in June 1999, the Company became obligated to redeem the Redeemable Preferred Stock in quarterly installments through March 2008. In 2000, the Company issued 1,549,479 shares of its Common Stock to satisfy the quarterly redemption requirements. In 1999, the Company issued 1,242,245 shares of its Common Stock to satisfy the quarterly redemption requirements. The Company is obligated to redeem approximately \$6.4 million face amount of Convertible and Redeemable Preferred Stock over the next twelve months. The Company has the option to redeem the Redeemable Preferred Stock at any time and the Convertible Preferred Stock beginning in June 2001, and has the option to make mandatory redemption payments either in cash or in shares of Common Stock. In the event that the Company does not have sufficient funds legally available to make any mandatory redemption payment

25

in cash, the Company will be required to make such redemption payment by issuing shares of Common Stock. Shares of Common Stock issued to make any optional or mandatory redemption payments will be valued at the higher of \$2.50 or fair market value per share of Common Stock. The Company intends to issue shares of Common Stock to satisfy its redemption obligation on the Redeemable Preferred Stock through December 31, 2001. The difference between the fair value of shares issued to redeem the Convertible Preferred Stock and the Redeemable Preferred Stock when issued at the floor redemption price of \$2.50 per share is recorded as a benefit from extinguishment of mandatorily redeemable preferred stock. See Note 16 of Notes to Consolidated Financial Statements.

In January 1998, the Company issued \$30.0 million of its 12% Senior Notes, together with Warrants to purchase 1.02 million shares of its Class A Common Stock (the "Class A Stock"). The Warrants are exercisable at \$2.25 per share at any time on or prior to March 15, 2003. At the end of the second quarter of 1998, the Company issued an additional \$14.0 million of 12% Senior Notes. As a result of the issuance of the 12% Senior Notes, the Company's total indebtedness and future debt service obligations have increased significantly from prior levels. The Company has wide discretion as to how the debt proceeds may be invested, including for working capital and acquisitions of and investments in new businesses, including the Company's Internet video businesses. Any such investments or acquisitions are not expected to pay a current return, which could require the Company to fund debt service obligations on the 12% Senior Notes out of its liquidity and cash flow from existing operations. The indenture under which the 12% Senior Notes were issued contains customary affirmative and negative restrictive covenants that limit, among other things, the incurrence of additional senior debt, the payment of dividends, the sale of assets and other actions by the Company and certain restricted subsidiaries.

In November 2000, Data Systems issued Senior Discount Notes providing net proceeds of approximately \$8.0 million, which will be used to fund the Company's short term working capital requirements. The Notes are secured by

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

certain assets of Data Systems and the Company and are due on the earlier of May 31, 2001 or the divestiture of Data Systems. Ampex plans to repay the Senior Discount Notes out of the proceeds of the sale of Data Systems. In the event the planned sale of Data Systems is not consummated, the Company believes it will be required to raise additional capital within the next twelve months from the sale of other assets or from the issuance of debt or equity securities in order to continue to carry out its current business strategy. No assurance can be given that the Company would be successful in raising any additional funds, or as to the terms of any securities that might be issued or arrangements that might be entered into.

Recent Pronouncements

In June 1998, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 133 ("SFAS 133"), Accounting for Derivative Instruments and Hedging Activities. SFAS 133 establishes accounting and reporting standards requiring that every derivative instrument, including certain derivative instruments embedded in other contracts, be recorded in the balance sheet as either an asset or liability measured at its fair value. SFAS 133 requires that changes in the derivative's fair value be recognized currently in earnings unless specific hedge accounting criteria are met. Special accounting for qualifying hedges allows a derivative's gains and losses to offset related results on the hedged item in the income statement, and requires that a company must formally document, designate and assess the effectiveness of transactions that receive hedge accounting. SFAS 133 is effective for the Company in fiscal year 2001 and will not require retroactive restatement of prior period financial statements. The Company has evaluated the impact and concluded that SFAS 133 will not be material at the date of adoption or in the future.

In December 1999, the Securities Exchange Commission ("SEC") issued Staff Accounting Bulletin No. 101 ("SAB 101"), Revenue Recognition in Financial Statements, which outlines the basic criteria that must be met to recognize revenue and provides guidance for presentation of revenue and for disclosure related to revenue recognition policies in financial statements filed with the SEC. In June 2000, the SEC issued SAB 101B, Second Amendment: Revenue Recognition in Financial Statements ("SAB 101B"). SAB 101B deferred the implementation date of SAB 101 until no later than the fourth fiscal quarter of fiscal years beginning after

26

December 15, 1999. The Company believes that adopting SAB 101 has not had a material impact on the Company's financial position and results of operations.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company is exposed to the impact of interest rate changes, foreign currency fluctuations, and change in the market values of its investments.

Interest Rate Risk. The Company's exposure to market rate risk for changes in interest rates relates primarily to the Company's investment portfolio. The Company has not used derivative financial instruments in its investment portfolio. The Company invests its excess cash in debt instruments of the U.S. government and its agencies, and in high-quality corporate issuers and, by policy, limits the amount of credit exposure to any one issuer. The Company protects and preserves its invested funds by limiting default, market and reinvestment risk.

Investments in both fixed rate and floating rate interest-earning instruments carries a degree of interest rate risk. Fixed rate securities may

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

have their fair market value adversely impacted due to a rise in interest rates, while floating rate securities may produce less income than expected if interest rates fall. Due in part to these factors, the Company's future investment income may fall short of expectations due to changes in interest rates or the Company may suffer losses in principal if forced to sell securities which have declined in market value due to changes in interest rates.

Foreign Currency Risk. International revenues from the Company's foreign subsidiaries were less than 25% of total revenues. International sales are made mostly from the Company's foreign sales subsidiaries in their respective countries and are typically denominated in the local currency of each country. These subsidiaries also incur most of their expenses in the local currency. Accordingly, all foreign subsidiaries use the local currency as their functional currency.

The Company's international business is subject to risks typical of an international business including, but not limited to, differing economic conditions, changes in political climate, differing tax structures, other regulations and restrictions, and foreign exchange rate volatility. Accordingly, the Company's future results could be materially adversely impacted by changes in these or other factors.

The Company's exposure to foreign exchange rate fluctuations arises in part from intercompany accounts in which costs incurred in the United States are charged to the Company's foreign sales subsidiaries. These intercompany accounts are typically denominated in the functional currency of the foreign subsidiary in order to centralize foreign exchange risk with the parent company in the United States. The Company is also exposed to foreign exchange rate fluctuations as the financial results of foreign subsidiaries are translated into U.S. dollars in consolidation. As exchange rates vary, these results, when translated, may vary from expectations and adversely impact overall expected profitability. The effect of foreign exchange rate fluctuations on the Company in 2000 and 1999 was not material.

Investment Risk. The Company invests in equity instruments of technology companies for business and strategic purposes. These investments are included in other long-term assets and are accounted for under the cost method when ownership is less than 20% and the Company does not have significant influence over the business operations. The Company's policy is to regularly review the assumptions underlying the operating performance and cash flow forecasts in assessing the carrying values. The Company identifies and records impairment losses on long-lived assets when events and circumstances indicate that such assets might be impaired. Investments, which are in the Internet industry, are subject to significant fluctuations in fair market value due to the volatility of the stock market.

27

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The financial statements required by Item 8 and the financial statement schedules required by Item 14(d) are included following Item 14 hereof. The supplementary data called for by Item 8 is not applicable to the Company.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE COMPANY

The information required by this item is incorporated herein by reference to the Company's Proxy Statement for its 2001 Annual Meeting of Stockholders (the "Proxy Statement").

Information regarding executive officers is included in Part I hereof as Item 4A and is incorporated by reference into this Item 10.

ITEM 11. EXECUTIVE COMPENSATION

The information required by this item is incorporated herein by reference to the Company's Proxy Statement.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

The information required by this item is incorporated herein by reference to the Company's Proxy Statement.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

The information required by this item is incorporated by reference to the Company's Proxy Statement.

PART IV

ITEM 14. EXHIBITS, FINANCIAL STATEMENT SCHEDULE AND REPORTS ON FORM S-K

(a) Documents Filed with this Report:

1. Financial Statements (see Item 8 above).

Ampex Corporation Consolidated Balance Sheets and Statements of Operations and Comprehensive Income (Loss), of Cash Flows, and of Stockholders' Deficit as of December 31, 2000, 1999 and 1998 and for each of the three years in the period ended December 31, 2000.

2. Financial Statement Schedule (see Item 8 above) Schedule II Valuation and Qualifying Accounts.

3. Exhibits.

Exhibit
Number

Description

- 2.1 Stock Purchase Agreement dated as of November 10, 1995, among the Company, Quantegy Acquisition Corp., Ampex Media Holdings Incorporated, Ampex Media Corporation and Ampex Recording Media Corporation (filed as Exhibit 10.1 to the Company's Form 8-K dated November 13, 1995 and incorporated herein by reference).

SELECTED FINANCIAL DATA

The following table summarizes certain selected financial data, which have been derived from and should be read in conjunction with the Company's Consolidated Financial Statements, and the Notes thereto, and with "Management's Discussion and Analysis of Financial Condition and Results of Operations," both of which are included elsewhere herein. There have been no cash dividends declared for the periods presented.

Subsequent to year-end 2000, the Company announced that it was closing MicroNet, a business which manufactured disk-based storage products that Ampex acquired in 1998. The operating results of MicroNet have been classified as "Discontinued Operations" in the Consolidated Statement of Operations for each of the three years ended December 31, 2000. Ampex has excluded the assets and liabilities of MicroNet in the Consolidated Balance Sheets at December 31, 2000. The Consolidated Balance Sheets of prior periods have not been restated to exclude the assets and liabilities of MicroNet.

In February 2000, the Company announced its intention to sell Data Systems, a subsidiary that manufactures high performance, tape-based mass data storage and instrumentation recorders and systems. The Company continues to operate Data Systems much as it had in the past. However, for accounting purposes, the operating results of Data Systems have been classified as a "Business Held for Sale" in the Consolidated Statement of Operations for all periods presented. The net assets of Data Systems are included in the caption "Net Assets of Business Held for Sale," in the Consolidated Balance Sheets at December 31, 1999 and 2000 and included in their respective asset and liability accounts in prior periods.

REPORT OF INDEPENDENT ACCOUNTANTS

To the Board of Directors and Stockholders
of Ampex Corporation:

In our opinion, the consolidated financial statements listed in the index appearing under Item 14(a) (1) on page 30 present fairly, in all material respects, the financial position of Ampex Corporation and its subsidiaries at December 31, 2000 and 1999, and the results of their operations and their cash

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

flows for each of the three years in the period ended December 31, 2000 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the index appearing under Item 14(a)(2) on page 30 present fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. These financial statements and financial statement schedule are the responsibility of the Company's management; our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America, which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for the opinion expressed above.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 1 to the financial statements, the Company has incurred operating losses and requires additional capital to meet its obligations and accomplish the Company's business plan, which raises substantial doubt about its ability to continue as a going concern. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

F-6

AMPEX CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1--Ampex Corporation

Ampex Corporation ("Ampex" or the "Company") is a leading innovator of visual information technology. In recent years, the Company embarked to strategically reposition itself by capitalizing on its digital imaging technology to become a major provider of Internet video programming, services and technology. In 1999, the Company consolidated its internal Internet video operations, acquisitions and strategic investments into iNEXTV Corporation ("iNEXTV" or "iNEXTV.com"), a wholly-owned subsidiary.

iNEXTV produces and aggregates video content for syndication to popular portals and destination websites. It produces short form programming covering numerous "life style" topics, current events and entertainment. Its majority owned affiliate, Alternative Entertainment Network, Inc. ("AENTV" or "AENTV.com"), acquired in a series of step acquisitions during 1999 and 2000, produces web video programming about the entertainment industry and other "infotainment" topics. The Company has a minority interest in TV1 Internet

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

Television, ("TV1" or "TV1.de"), one of Europe's leading webcasters. Subsequent to year-end, the Company exercised options to increase its ownership interests in AENTV and TV1. Beginning in 1999, the Company, in a series of step acquisitions, acquired a majority interest in TV on the WEB, Inc. ("TV on the WEB") a webcaster and video production company. In September 2000, the Company ceased funding TV on the WEB, wrote off its remaining investment in the subsidiary and ceased to include it in the Company's Consolidated Financial Statements. The Consolidated Statement of Operations for 2000 includes the results of operations of the Company's internal Internet video operations, 100% of the results of operations of AENTV and 100% of the results of operations of TV on the WEB through September 2000. The Consolidated Statement of Operations for 1999 includes the Company's minority share of the net loss of AENTV and TV on the WEB for periods the Company held less than 50% of these entities and 100% of their results for periods it held a majority interest. The Company's investment in TV1 is being accounted for under the cost method.

As of the year-end 1999, in order to focus more sharply on its Internet video businesses, the Company announced plans to sell Ampex Data Systems Corporation, ("Data Systems"), its subsidiary that makes high performance tape-based mass data storage products. The Company continues to operate Data Systems as it had in the past. However, for accounting reporting purposes, the results of operations of Data Systems have been classified as a "Business Held for Sale" in the Consolidated Statements of Operations for all periods presented. The book value of the net assets to be sold is reflected in "Net Assets of Business Held for Sale" in the Consolidated Balance Sheets. At the date of these financial statements, the Company has not yet entered into a contract to sell Data Systems. Upon consummation of a successful sale, the Company intends to use the proceeds for investment in iNEXTV and other Internet initiatives, as well as to retire debt.

As of the year-end 2000, Ampex decided to discontinue the operations of MicroNet Technology, Inc. ("MicroNet"), its wholly-owned subsidiary that made high performance disk arrays and storage area network products. The operations of MicroNet have been classified as "Discontinued Operations" in the Consolidated Statements of Operations for all periods presented. At December 31, 2000, the Company established a reserve for the costs of closure and to write-off its investment in MicroNet which is included in "Loss on Disposal of Discontinued Operations." As a result, there are no assets or liabilities of MicroNet included in the Consolidated Balance Sheet as of December 31, 2000. The assets or liabilities of MicroNet are included in the Consolidated Balance Sheet as of December 31, 1999.

The Company's continuing operations consist of Ampex's intellectual property licensing department, its Internet Technology Group ("ITG") and its subsidiary, iNEXTV.

Liquidity and Going Concern Considerations

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. The Company has incurred operating losses and requires additional capital to meet its

F-7

AMPEX CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

obligations and accomplish the Company's business plan, which raises substantial doubt about its ability to continue as a going concern. The financial statements do not include any adjustments that might result from the

outcome of this uncertainty.

The Company has incurred operating losses for the years 2000 and 1999, working capital has declined substantially from December 31, 1999 to December 31, 2000, and has incurred negative cash flow from operations. The Company has experienced a substantial reduction in its cash and marketable securities which declined to \$15.4 million at December 31, 2000. In November 2000, Data Systems issued Senior Secured Notes providing net proceeds of approximately \$8 million, which are included in the above amount and are being used to fund the Company's short-term working capital requirements, pending a future sale of Data Systems. The Notes are secured by certain assets of the Company and Data Systems and are due on the earlier of May 31, 2001 or the divestiture of Data Systems. Ampex is negotiating a sale and leaseback of certain real estate and would use the proceeds from the transaction to repay the Notes. The Company believes that the expected proceeds of the sale of Data Systems, together with cash and marketable securities on hand and ongoing royalty income, will be sufficient to fund its cash requirements for operations, working capital, capital expenditures and debt service through at least 2001. In the event the planned sale of Data Systems is not consummated, the Company believes that it will be required to raise additional capital in order to continue to carry out its current business strategy. No assurance can be given that the Company would be successful in raising any additional funds, or as to the terms of any securities that might be issued or arrangements that might be entered into.

Note 2--Summary of Significant Accounting Policies

Basis of Presentation

The accompanying consolidated financial statements are presented in accordance with Generally Accepted Accounting Principles. All intercompany accounts and transactions have been eliminated. Certain reclassifications have been made to the prior years' financial statements to conform to the current year's presentation. These reclassifications had no effect on the prior years' stockholders' deficit or net income.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of net sales and expenses during the reporting period. Actual results could differ from those estimates.

Cash Equivalents

Cash equivalents consist of investments with original maturities of 90 days or less.

Short-term and Long-term Investments

The Company's investments are comprised primarily of debt securities and consist of highly liquid U.S. Treasury instruments, investments in high yield mutual funds and U.S. corporate securities. All investments are classified as available for sale. Investments with remaining maturities of less than 12 months from the balance sheet date are classified as short-term investments. Investments with remaining maturities of more than 12 months from the balance sheet date are classified as long-term assets. Unrealized gains and losses, if material,

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

AMPEX CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

are reported net of tax as a separate component of stockholders' equity under accumulated comprehensive income until realized. Realized gains and losses, if any, are determined using the specific identification method.

Inventories

Inventories are stated at the lower of cost or market. Cost is determined on a standard cost basis which approximates the first in, first out (FIFO) method. Appropriate consideration is given to obsolescence, excessive levels, deterioration and other factors in evaluating net realizable value.

Property, Plant and Equipment

Property, plant and equipment are recorded at cost and stated net of accumulated depreciation. Depreciation is computed on a straight-line basis over the estimated useful lives of the assets ranging from three to nine years for machinery and equipment and five to 50 years for buildings and improvements. When assets are disposed of, the cost and related accumulated depreciation are removed from the accounts and the resulting gains or losses are included in the results of operations.

Intangible Assets

The net book value of goodwill associated with acquisitions was \$0.2 million and \$9.8 million at December 31, 2000 and December 31, 1999, respectively. Goodwill is being amortized on a straight-line basis and is included within the Consolidated Balance Sheets caption intangible assets, net. In the second quarter of 2000, the Company changed the expected life of goodwill of the acquired Internet businesses from three years to two years, given the rapid changes affecting the Internet and to conform to other Internet content companies. Goodwill resulting from the acquisition of MicroNet had been written off over five years. During 2000, the Company wrote off its remaining investment in MicroNet and TV on the WEB, including all remaining unamortized goodwill of those acquired businesses. The Company regularly reviews the carrying value of intangible assets and writes down the carrying value of long-lived assets to the extent estimated future undiscounted operating cash flows are not sufficient to recover the carrying value of these assets over their remaining useful life.

Foreign Currency Translation

Assets and liabilities of subsidiaries located outside the United States have been translated at rates in effect at year end. Revenues and expenses are translated at average rates during the year. Local currencies are considered to be the functional currencies for substantially all of the Company's foreign subsidiaries. Accordingly, the effects of translating the financial statements of foreign subsidiaries into U.S. dollars are reported in the cumulative translation adjustment, a separate component of stockholders' deficit. Foreign currency transaction gains and losses, which are included in other expense, were not material in the periods reported.

Revenue Recognition

Royalty income is recorded when earned and receipt is assured. Internet revenues from website advertising and sponsorship are recognized ratably over the period earned which is usually based on the passage of time or the number of visitors to a site. Internet video production and service revenues are

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

recognized on the percentage of completion method for large projects and upon delivery of the final product or service for smaller projects. Revenue on product sales and services are recognized at the time products are shipped and at the time services are rendered to customers. The Company provides for estimated costs that may be incurred for product warranties upon shipment.

F-9

AMPEX CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

Website Development and Content Production Costs

Internet video programming costs consist of the costs related to developing, producing, encoding and distributing the Company's original programs over the Internet. Programming costs are capitalized if projected revenues related to the content exceed the estimated total cost of the programming. Capitalized programming costs are amortized over the expected period that revenue is to be recognized. Otherwise programming costs are expensed as incurred. In the opinion of management, pending receipt of significant Internet revenues, all website development is in the preliminary project stage. Accordingly, the Company has expensed all website development costs as incurred.

Research, Development and Engineering

Research, development and engineering of products and services for the Internet is conducted by the Internet Technology Group. Costs are expensed as incurred and amounted to \$0.5 million in 2000. Research, development and engineering expenses in 1999 and 1998 were negligible.

Advertising Costs

The Company expenses advertising costs as incurred. The costs incurred were \$2.0 million and \$1.0 million in 2000 and 1999, respectively. There were no advertising costs in 1998.

Income Taxes

The Company follows Statement of Financial Accounting Standards No. 109 ("SFAS 109"), Accounting for Income Taxes. Under this method, deferred income taxes are recognized for temporary differences by applying enacted statutory rates applicable to future years to differences between the financial statement carrying amounts and the tax basis of existing assets and liabilities. The effect on deferred taxes of a change in tax rates is recognized in income in the period that includes the enactment date. Valuation allowances are established when necessary to reduce deferred tax assets to the amounts expected to be realized. See Note 22.

Foreign withholding taxes have been provided on the undistributed earnings of foreign subsidiaries, giving recognition to applicable tax rates.

Concentrations of Credit Risk

Financial instruments that potentially subject the Company to concentrations of risk consist principally of short-term and long-term investments and trade receivables. The Company invests its temporary cash balances in short-term U.S. treasury obligations, high yield mutual funds and U.S. corporate securities and, by policy, limits the investment maturity and the amount of credit exposure to any one financial institution or type of investment. The Company

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

performs ongoing credit evaluations on its customers, and collateral is generally not required for trade receivables.

Fiscal Year

The Company's fiscal year is the 52 or 53-week period ending on the Saturday nearest December 31. Fiscal 2000, 1999 and 1998 were 52-week years.

Comprehensive Income (Loss)

Comprehensive income (loss) as defined includes all changes in equity (net assets) during a period from non-owner sources. Accumulated other comprehensive income (loss), as presented on the accompanying

F-10

AMPEX CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

Consolidated Balance Sheets, consists of the net unrealized gains (losses) on available-for-sale securities, net of tax, cumulative translation adjustments, net of tax, and the minimum pension adjustment.

Income (Loss) Per Common Share

Basic income (loss) per common share is computed by dividing net income (loss) applicable to common stockholders by the weighted average number of common shares outstanding for the period. Diluted income (loss) per common share is computed giving effect to all potentially dilutive common shares that were outstanding during the period.

Stock Options

The Company accounts for stock-based awards to employees in accordance with APB No. 25 ("APB 25"), Accounting for Stock Issued to Employees and has adopted the disclosure-only alternative of Statement of Financial Accounting Standards No. 123 ("SFAS 123"), Accounting for Stock Based Compensation. See Note 18.

Fair Value of Financial Instruments

For certain instruments that are short-term in nature, such as cash and cash equivalents, short-term investments and working capital facilities, carrying value approximates fair value. The Company's Senior Notes have been valued at approximately par value at December 31, 2000 and December 31, 1999 by the Company; however no securities have traded recently in the secondary market. Management has determined that it is not practical to estimate fair value for note payable-other, as no market for such instruments currently exists. See Note 13.

Recent Pronouncements

In December 1999, the Securities Exchange Commission ("SEC") issued Staff Accounting Bulletin No. 101 ("SAB 101"), Revenue Recognition in Financial Statements, which outlines the basic criteria that must be met to recognize revenue and provides guidance for presentation of revenue and for disclosure related to revenue recognition policies in financial statements filed with the SEC. In June 2000, the SEC issued SAB 101B, Second Amendment: Revenue Recognition in Financial Statements ("SAB 101B"). SAB 101B deferred the implementation date of SAB 101 until no later than the fourth fiscal quarter of fiscal years beginning after December 15, 1999. The Company believes that

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

adopting SAB 101 has not had a material impact on the Company's financial position and results of operations.

Note 3--Acquisition of Companies

During 1999, the Company acquired in step acquisitions a majority interest in AENTV and TV onthe WEB. The Company allocated the purchase price to the acquired assets and assumed liabilities of TV onthe WEB and AENTV as follows:

	AENTV	TV onthe WEB
	-----	-----
	(in thousands)

Note 4--Business Held for Sale

In February 2000, the Board of Directors of the Company authorized management to pursue a sale of Data Systems, its wholly-owned subsidiary that manufactures and sells high performance, tape-based mass data storage products. Revenues of this segment totaled \$47.9 million, \$51.6 million and \$57.8 million in 2000, 1999 and 1998, respectively. Total costs and operating expenses of this segment totaled \$45.6 million, \$54.9 million and \$62.2 million in 2000, 1999 and 1998, respectively. Other (income) expense of this segment totaled \$0.1 million, \$(0.2) million and \$(0.5) million in 2000, 1999 and 1998, respectively. Ampex continues to seek a buyer for the Data Systems business.

A summary of the assets and liabilities of Data Systems is as follows:

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

Note 5--Discontinued Operation

As of the year-end 2000, the Board of Directors of the Company authorized management to close MicroNet and to establish a reserve for the costs of closure and to write-off its investment. Revenues of this segment totaled \$12.0 million, \$10.9 million and \$5.5 million in 2000, 1999 and 1998, respectively. Total costs and operating expenses of this segment totaled \$17.4 million, \$14.9 million and \$8.5 million in 2000, 1999 and 1998, respectively. Management is attempting to liquidate MicroNet's assets and plans to distribute the proceeds in satisfaction of its liabilities. The Loss on Disposal of Discontinued Operations in 2000 primarily consists of the write-off of the Company's remaining investment in MicroNet, including the write-off of unamortized goodwill of \$3.6 million. The Consolidated Balance Sheet as of December 31, 2000 did not include any assets or liabilities of MicroNet, whereas, the Consolidated Balance Sheet as of December 31, 1999 included assets and liabilities of MicroNet:

	=====	=====

Note 6--Asset Writedowns

In September 2000, the Company elected to cease funding the operations of TV onthe WEB. Accordingly, the Company provided a reserve to write-off its remaining investment in the subsidiary and for estimated future costs to be incurred. The Company ceased to include the results of TV onthe WEB in its consolidated financial statements in periods subsequent to the third quarter of 2000. The following operating results of TV on the WEB are included in the Company's Consolidated Statements of Operations in 2000 and 1999:

In the fourth quarter of 1999, the Company elected not to exercise options to acquire additional ownership in Executive Branch Webcasting Corporation ("EBWC") but to proceed with the development of EXBTV.com as an iNEXTV-funded Internet video initiative. The Company wrote off its minority investment in EBWC totaling \$1.5 million. Also in the fourth quarter of 1999, the Company wrote off a minority investment in a company providing web hosting and Internet consulting services, totaling \$0.5 million, since the Company is no longer involved in the strategic direction of that entity.

Note 7--Computation of Basic and Diluted Income (Loss) per Share

=====

In connection with the acquisition of MicroNet, the Company issued 720,000 shares of Common Stock from escrow in November 2000 subsequent to the resolution of certain contingencies. These shares have been

F-14

AMPEX CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

included in the computation of basic and diluted weighted average common stock outstanding from the issue date and in diluted weighted average common stock outstanding prior to the issue date in periods when their inclusion is dilutive.

In the second quarter of 1998, the Company redeemed its 8% Noncumulative Preferred Stock by issuing 3,000,000 shares of Common Stock, \$20 million face amount of Convertible Preferred Stock and \$43.7 million face amount of Redeemable Preferred Stock. The 3,000,000 shares of Common Stock have been included in the computation of weighted average common stock outstanding since their issue date. In 1998, 5,000,000 shares of Common Stock potentially issuable on conversion of Convertible Preferred Stock and 5,000,000 shares of Common Stock potentially issuable on redemption of the Redeemable Preferred Stock, based on the Company's policy to make redemptions part in cash and part in stock, have been included in the computation of diluted weighted average common stock outstanding. In 2000, holders of 760 shares of Convertible Preferred Stock converted their holdings into 380,000 shares of Common Stock and 2,148 shares of Redeemable Preferred Stock were redeemed into 1,549,500 shares of Common Stock which are included in the weighted average common stock outstanding from the date of exchange. In 1999, holders of 8,115 shares of Convertible Preferred Stock converted their holdings into 4,057,500 shares of Common Stock and 2,538 shares of Redeemable Preferred Stock were redeemed into 1,282,200 shares of Common Stock which are included in the weighted average common stock outstanding from the date of exchange. The remaining shares of Common Stock potentially issuable on conversion of Convertible Preferred Stock and redemption of the Redeemable Preferred Stock have not been included in the computation of diluted weighted average common stock outstanding in 2000 and 1999, since they are anti-dilutive. If the Company was to make all remaining redemption payments in Common Stock based on the floor conversion price, an additional 14,300,900 shares of Common Stock would be issued over the number of common shares included in the diluted income per share computation.

Stock options to purchase 3,517,511 shares of Common Stock at prices ranging from \$0.4375 to \$6.00 per share were outstanding at December 31, 2000, but were not included in the computation of diluted income (loss) per share because they are anti-dilutive.

Stock options to purchase 3,175,134 shares of Common Stock at prices ranging from \$1.06 to \$6.00 per share were outstanding at December 31, 1999, but were not included in the computation of diluted income (loss) per share because they are anti-dilutive.

Stock options to purchase 2,384,477 shares of Common Stock at prices ranging from \$1.0625 to \$10.50 per share were outstanding at December 31, 1998, but were not included in the computation of diluted income (loss) per share because the exercise price was greater than the average market value of the common shares.

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

In January 1998, Warrants to purchase 1,020,000 shares of Common Stock at \$2.25 per share were issued in connection with the issuance of the Senior Notes. See Note 13. The Warrants were not included in the computation of diluted weighted average common stock outstanding at December 31, 1998 because the exercise price was greater than the average market value of the common shares. On May 10, 1999, Warrants were exercised for 204,000 shares of Common Stock, which are included in the weighted average common stock outstanding from the date of issuance. The remaining outstanding warrants are excluded from the computation of weighted average common stock outstanding at December 31, 2000 and December 31, 1999, respectively, as they are anti-dilutive.

TV on the WEB Notes Payable to Selling Stockholders of Affiliate

In connection with the Company's investment in TV onthe WEB, the selling stockholders of the predecessor business were issued cash and notes by TV onthe WEB and guaranteed by iNEXTV as consideration for the purchase of the common stock of the predecessor business. The Notes are payable in quarterly installments, with final payment due in 2001. The Notes bear interest at a rate of seven percent per annum.

Data Systems Senior Secured Notes

In November 2000, Data Systems issued Senior Secured Notes providing net proceeds of approximately \$8 million, which are included in "Net Assets of Business Held for Sale" in the Consolidated Balance Sheet at December 31, 2000. The Senior Secured Notes are due the earlier of May 31, 2001 or the date Data Systems is sold, accrete ratably from \$8 million to \$8.9 million from November 7, 2000 to May 31, 2001 and are secured by certain assets of the Company and Data Systems.

Note Payable--Other

The note is a noninterest-bearing demand promissory note held by NH Holding Incorporated. The outstanding balance at December 31, 2000 of \$0.2 million is expected to be paid or converted into shares of Common Stock in 2001.

Working Capital Facilities

Ampex has a revolving credit line with a domestic financial institution to finance working capital requirements. The Company's domestic revolving credit agreement permits borrowings up to \$7.0 million, based on eligible accounts receivable as defined in the agreement, less a standby letter of credit facility in the amount of \$2.5 million. Average borrowings under these agreements during both 2000 and 1999 were less than \$0.1 million at an average interest rate of 9.8% and 8.9%, respectively. Maximum borrowings outstanding at

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

any time during 2000 and 1999 were \$2.4 million and \$1.0 million, respectively. At December 31, 2000, the

F-18

AMPEX CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

Company had borrowings outstanding of \$2.4 million and had letters of credit issued against the facility totaling \$1.1 million. At December 31, 1999, the Company had borrowings outstanding of \$0.8 million and had letters of credit issued against the facility totaling \$1.1 million. The Company pays a monthly commitment fee of 0.5% per annum based on the average daily unused amount. The borrowings are collateralized by certain current assets of the Company.

TV onthe WEB Notes Payable--Capital Lease

TV onthe WEB had obligations under a number of capital leases for office equipment and company vehicles, which were terminated in 2000.

Senior Notes

In January 1998, the Company issued \$30.0 million of its 12% Senior Notes ("Notes"), together with Warrants to purchase 1.02 million shares of Common Stock. The Warrants are exercisable at \$2.25 per share at any time on or prior to March 15, 2003. At the time of issuance, the Warrants were valued using the Black-Scholes model. The value assigned to the Warrants was \$765,000, which is being amortized against interest expense over the term of the Notes. At the end of June 1998, the Company issued an additional \$14.0 million Senior Notes. Interest on the Notes is payable semi-annually on March 15 and September 15 of each year, commencing September 15, 1998. The Notes will mature on March 15, 2003. The Company may redeem the Notes, in whole or in part, at any time after March 15, 2000, at redemption prices expressed as percentages of the principal amount of the Notes ranging from 100% to 106% depending on the redemption date, together with accrued and unpaid interest, if any, to the date of redemption. The Notes are senior unsecured obligations of the Company and rank pari passu in right of payment with all existing and future subordinated indebtedness of the Company.

Present value of net minimum lease payments.....	\$ 47
	====

The gross book value and accumulated depreciation of capital leases at December 31, 2000 was \$66 thousand and \$17 thousand, respectively.

Legal Proceedings

The Company is currently a defendant in lawsuits that have arisen in the ordinary course of its business. Certain subsidiaries have been assessed income and value-added taxes together with penalties and interest. Management does not believe that any such lawsuits or unasserted claims will have a material adverse effect on the Company's financial position, results of operations or cash flows.

On January 7, 2000, a suit was filed against the Company and others by Information Super Station ("ISS"), the majority stockholder of EBWC, in which the Company's Internet subsidiary, iNEXTV, held a minority interest. On February 1, 2000, the Company filed suit against ISS and others under the Federal securities laws seeking contract rescission and damages in connection with activities related to the Company's investment. Both of these lawsuits were settled in July 2000, and all pending litigation between the parties was dismissed with prejudice. As part of the settlement, the Company made a cash payment and amended the vesting provisions with respect to warrants to purchase 100,000 shares of Common Stock at a price of

F-20

AMPEX CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

\$3.90 per share. The warrants expire if unexercised in June 2001. The cost of the settlement is recorded in other (income) expense, net in the Consolidated Statements of Operations.

In response to a lawsuit filed by the Company against Mitsubishi Electric Corporation and Mitsubishi Electric America Inc. ("Mitsubishi"), which has been resolved as previously reported, Mitsubishi filed a lawsuit against Ampex, alleging patent infringement by certain Ampex video and data recorder products. In 1997, the U.S. District Court for the Central District of California determined that Ampex has no liability to Mitsubishi patents, and Mitsubishi appealed to the Court of Appeals for the Federal Circuit. On August 30, 1999, the Court of Appeals affirmed the judgment in favor of Ampex and subsequently denied Mitsubishi's request for reconsideration. During the year, Mitsubishi filed a petition for certiorari to the Supreme Court of the United States, and the Court ruled denying the petition. No further appeal is possible.

Environmental Matters

Ampex's facilities are subject to numerous federal, state and local laws and regulations designed to protect the environment from waste emissions and hazardous substances. Owners and occupiers of sites containing hazardous

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

substances, as well as generators and transporters of hazardous substances, are subject to broad liability under various federal and state environmental laws and regulations, including liability for investigative and cleanup costs and damages arising out of past disposal activities. Ampex has been named from time to time as a potentially responsible party by the United States Environmental Protection Agency with respect to contaminated sites that have been designated as "Superfund" sites, and are currently engaged in various environmental investigation, remediation and/or monitoring activities at several sites located off Company facilities. Management has provided reserves, which have not been discounted, related to investigation and cleanup costs and believes that the final disposition of these matters will not have a material adverse effect on the Company's financial position, results of operations or cash flows.

The Company has not accrued any liability for costs that might be assessed against it by federal or state environmental agencies involving sites owned by the Company's former subsidiary Media. Media is primarily responsible for the cleanup at its facilities and at off site locations. The Company believes that it has no material contingent liability in connection with the Media properties.

Guarantees

The Company has certain arrangements with banks primarily to facilitate the issuance of performance guarantees or letters of credit. At December 31, 2000 and 1999, the Company was contingently liable for \$9.4 million and \$1.2 million, respectively, of general performance guarantees and letters of credit.

In November 2000, Data Systems issued Senior Secured Notes providing net proceeds of approximately \$8 million, which are included in the above amount at December 31, 2000. The Notes are secured by certain assets of the Company and Data Systems and are due on the earlier of May 31, 2001 or the divestiture of Data Systems.

Note 16--Preferred Stock

Each share of Convertible Preferred Stock and Redeemable Preferred Stock entitles the holder thereof to receive noncumulative dividends at the rate of 8% per annum, if declared by the Company's Board of Directors. Each share of Convertible Preferred Stock may be converted, at the option of the holder thereof, at a conversion price of \$4.00 per share, into 500 shares of Common Stock, subject to adjustment under certain circumstances. In 2000, holders of 760 shares of Convertible Preferred Stock converted their holdings into 380,000 shares of Common Stock, leaving 1,125 shares of Convertible Preferred Stock outstanding. In 1999,

F-21

AMPEX CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

holders of 8,115 shares of Convertible Preferred Stock converted their holdings into 4,057,500 shares of Common Stock. Beginning in June 2001, the Company will become obligated to redeem any remaining Convertible Preferred Stock in quarterly installments through December 2008. Beginning in June 1999, the Company became obligated to redeem the Redeemable Preferred Stock in quarterly installments through March 2008. In 2000, the Company issued 1,549,479 shares of its Common Stock to satisfy the quarterly redemption requirements. In 1999, the Company issued 1,242,245 shares of its Common Stock to satisfy the quarterly redemption requirements. The Company is obligated to redeem

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

approximately \$6.4 million face amount of Convertible and Redeemable Preferred Stock over the next twelve months. The Company has the option to redeem the Redeemable Preferred Stock at any time and the Convertible Preferred Stock beginning in June 2001, and has the option to make mandatory redemption payments either in cash or in shares of Common Stock. In the event that the Company does not have sufficient funds legally available to make any mandatory redemption payment in cash, the Company will be required to make such redemption payment by issuing shares of Common Stock. Shares of Common Stock issued to make any optional or mandatory redemption payments will be valued at the higher of \$2.50 or fair market value per share of Common Stock. The Company intends to issue shares of Common Stock to satisfy its redemption obligation on the Redeemable Preferred Stock through December 31, 2001. To the extent that the floor redemption price exceeds the fair value of shares issued to redeem the Convertible Preferred Stock and the Redeemable Preferred Stock the Company recognizes a benefit from extinguishment of preferred stock.

The 3,500 shares of MicroNet Redeemable Junior Preferred Stock had a liquidation value of \$5.0 million and were to be redeemed out of a percentage of earnings of MicroNet beginning in fiscal 1999. No redemption payments have been made because MicroNet has reported losses since its date of acquisition. Due to the contingent nature of the redemption provision, no value has been ascribed to the MicroNet Redeemable Junior Preferred Stock in determination of the purchase price at the acquisition date in 1998. In November 2000, 2,565 shares of the MicroNet Redeemable Junior Preferred Stock were distributed to the seller by the escrow agent with the balance of 935 shares returned to MicroNet and cancelled.

Note 17--Related Party Transactions

During 1998 and prior years, the Company received notes for the purchase of Common Stock by an affiliated company in the principal amount of \$5.3 million. The notes bear annual interest at 5.69% to 7.96% and are collateralized by the purchased shares.

In June 1996, the Company received a partial payment on the notes outstanding of \$0.3 million.

During 1998, the Company modified the final maturity date of the note originally issued in 1996 to October 15, 2008. In 1998 and 1999, the Company cancelled \$0.4 million of the principal amount of the note. In certain circumstances when the stock price exceeds \$7.00 per share, the unpaid principal balance of the note shall thereupon be reduced to \$440,000. Accrued interest on the unpaid principal amount of the note during the term of the note will be forgiven subject to certain stipulated employment issues.

During 1999, the Company extended the maturity date of the remaining notes originally issued in 1995, 1997 and 1998 through 2008.

Note 18--Common Stock, Stock Options and Warrants

The Company's authorized capital stock consists of Class A Common Stock ("Class A Stock"), Class C Common Stock ("Class C Stock", and collectively with Class A Stock, the "Common Stock") and Preferred Stock. Shares of Class C Stock and Preferred Stock are generally nonvoting except in circumstances specified

F-22

AMPEX CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

in the Company's charter documents or as otherwise required by applicable corporate law. Accordingly, holders of Class A Stock are generally the only stockholders with voting rights. Each share of Class C Stock converts into one share of Class A Stock automatically following transfer unless otherwise elected by the transferee.

The Company's 1992 Stock Incentive Plan (the "Stock Incentive Plan") for directors, executive officers and other key employees provides for the granting of "nonqualified stock options" and "incentive stock options" to acquire Common Stock and/or the granting of stock appreciation rights to obtain, in cash or shares of Common Stock, the benefit of the appreciation of the value of shares of Common Stock after the grant date.

On June 18, 1999, at the Company's Annual Meeting, stockholders authorized the issuance of an additional 4,000,000 shares of Common Stock under the 1992 Stock Incentive Plan. The Company is currently authorized to issue up to 8,250,000 shares of Common Stock under the Stock Incentive Plan.

On November 6, 1998, the Committee authorized the Company to allow holders of certain "out-of-the-money" stock options to voluntarily cancel these options in exchange for an equivalent number of new options. The new options were granted at an exercise price of \$1.0625, which was the fair value of the Common Stock on November 6, 1998, and with new vesting and expiration schedules. Of the 1,474,850 options eligible for exchange, option holders elected to exchange 1,455,850 options that had exercise prices of \$2.00 to \$4.875.

At December 31, 2000, there were 3,517,511 options outstanding, including 1,772,372 vested options. The exercise prices range from \$0.4375 to \$6.00 per share and vesting schedules vary from immediate vesting to vesting over a three-year period.

	=====	=====	=====

The Company has elected to account for employee stock options using the intrinsic value method prescribed by APB 25, and therefore compensation cost

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

for stock options is measured as the excess, if any, of the quoted market price of the Company's stock at the date of the grant over the amount an employee must pay to acquire the stock. Had compensation cost for the Company's stock-based compensation plan been determined on the fair value of the grant dates for awards under those plans consistent with the method of SFAS 123, the Company's net income (loss) and diluted income (loss) per share would have been reduced to the pro forma amounts indicated below:

	Year Ended December 31,		
	2000	1999	1998
(in thousands)			
Net income (loss) applicable to common stockholders:			
As reported.....	\$ (34,530)	\$ (14,997)	\$10,438
Pro forma.....	\$ (35,867)	\$ (17,790)	\$ 8,231
Basic income (loss) per share:			
As reported.....	\$ (0.61)	\$ (0.28)	\$ 0.22
Pro forma.....	\$ (0.64)	\$ (0.33)	\$ 0.17
Diluted income (loss) per share:			
As reported.....	\$ (0.61)	\$ (0.28)	\$ 0.20
Pro forma.....	\$ (0.64)	\$ (0.33)	\$ 0.15

These proforma disclosures are not necessarily representative of the effects on reported net income (loss) for future years.

F-24

AMPEX CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

Note 19--Pension Plans

The Company's domestic employees participate in a qualified noncontributory defined benefit pension plan. Benefits are based on years of service and salary levels during the highest 60 consecutive months of the last 120 consecutive months of service. In early 1994, the Company amended the plan to terminate benefit service and compensation credit accruals as of February 1, 1994. The impact of this curtailment was not material to the Company's liability accounts relating to its pension plan. Certain of the Company's employees employed by its foreign subsidiaries are covered by contributory pension plans maintained and funded in accordance with local laws.

Pension expense for the domestic plan in 2000, 1999 and 1998 consisted of the following:

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

	Year Ended December 31,		
	2000	1999	1998
	(in thousands)		
Interest on projected benefit obligation.....	\$ 12,398	\$ 11,744	\$ 11,217
Expected return on assets.....	(14,145)	(13,006)	(12,403)
Recognized actuarial loss (gain).....	--	2,083	401
Net periodic pension cost (benefit).....	\$ (1,747)	\$ 821	\$ (785)

The domestic plan funded status and amounts included in the consolidated balance sheets are as follows:

	December 31,	
	2000	1999
	(in thousands)	
Actuarial present value of benefits:		
Vested and total accumulated benefits.....	\$ 165,752	\$ 164,747
Projected benefit obligation.....	\$ (165,752)	\$ (164,747)
Less: plan assets at fair value.....	157,722	175,803
Unrecognized net loss.....	(8,030)	11,056
Prepaid (accrued) pension cost.....	\$ (8,030)	\$ 5,571

The Company remains the plan sponsor of a pension plan ("Media Plan") although it disposed of the company ("Media") in November 1995. Media is contractually required to provide funding for its obligations under the plan, but if it fails to do so, the Company will be required to make any required termination liability payments. As of December 31, 2000, the Company's consolidated balance sheets included \$0.4 million in "other assets" for certain payments due from the Media Plan. The Media Plan's projected benefit obligation and plan assets at fair value at December 31, 2000, were approximately \$42.5 million and \$42.4 million, respectively.

F-25

AMPEX CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

The following provides a reconciliation of benefit obligations, plan assets and funded status of the plans:

December 31,

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

	2000	1999
	(in thousands)	
Change in benefit obligation:		
Benefit obligation at the beginning of the year.....	\$164,747	\$187,209
Interest cost.....	12,398	11,744
Actuarial gain (loss).....	2,000	(21,230)
Benefits paid.....	(13,393)	(12,976)
	-----	-----
Benefit obligation at the end of the year.....	\$165,752	\$164,747
	=====	=====
Change in plan assets:		
Plan assets at the beginning of the year.....	\$175,803	\$157,578
Actual return on plan assets.....	(8,640)	26,122
Company contributions.....	3,952	5,079
Benefits paid.....	(13,393)	(12,976)
	-----	-----
Plan assets at the end of the year.....	\$157,722	\$175,803
	=====	=====
Funded status.....	\$ (8,030)	\$ 11,056
Unrecognized net actuarial loss (gain).....	19,655	(5,130)
	-----	-----
Prepaid (accrued) benefit cost.....	\$ 11,625	\$ 5,926
	=====	=====

Actuarial assumptions as of December 31, 2000 and 1999 are as follows:

	December 31,	
	2000	1999
Assumed discount rate.....	7.75%	7.75%
Rate of compensation increase.....	N/A	N/A
Expected long-term rate of return.....	9.0%	9.0%

Assets of the domestic pension plan are invested in directed trusts. At December 31, 2000 and 1999, assets of the directed trusts were primarily invested in U.S. government obligations, corporate stocks and bonds and units of common investment funds consisting of short-term interest bearing instruments and common stock.

In accordance with Statement of Financial Accounting Standards No. 87, Employers' Accounting for Pensions, the Company has recorded an additional minimum pension liability for the underfunded plan of \$17.6 million representing the excess of unfunded accumulated benefit obligations over previously recorded pension cost liabilities at December 31, 2000. To the extent that these additional liabilities exceed related unrecognized prior service cost and net transition obligations, the increase or decrease in liabilities was charged directly to stockholders' deficit. For 2000 and 1998, stockholders' deficit was charged \$17.6 million and \$0.02 million, respectively. At December 31, 1999, the Company recorded a deferred pension asset of \$5.6 million representing the excess of the fair value of plan assets less the unrecognized net actuarial gain over the accumulated benefit obligation.

AMPEX CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

	-----		-----	
Prepaid (accrued) pension cost.....	\$ --	\$ (1,736)	\$ --	\$ (1,784)
	=====		=====	

The Company also maintains a 401(k) savings plan available to domestic employees. The Company matches certain portions of employee contributions after one year of service. Contributions and expenses in connection with this plan

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

amounted to less than \$0.1 million for each year ended December 31, 2000, 1999 and 1998, respectively.

Note 20--Royalty Income

In 1999 and 1998, the Company received and recognized payments attributable to the settlement of patent litigation and other negotiated settlements related to prior years' sales of products by licensees. Such payments amounted to \$6.7 million and \$2.0 million in 1999 and 1998, respectively. The royalties for 2000 and the balance of royalties earned in 1999 and 1998 represents royalties for product shipments in the current period.

F-27

AMPEX CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

Note 21--Restructuring Charges (Credits)

Restructuring charges (credits) for the years ended December 31, 2000, 1999 and 1998 are included in the "Loss on Disposal of Discontinued Operations" and "Income (Loss) of Business Held for Sale" and consist of the following:

	Year Ended December		
	31,		
	2000	1999	1998
	(in thousands)		
Provisions for vacated lease obligations.....	\$ --	\$(3,827)	\$(1,200)
Write-down of property, plant and equipment.....	--	440	400
Provisions for employee separation costs.....	--	2,545	2,747
Provisions for relocation.....	--	301	579
Costs associated with closure of MicroNet.....	2,059	--	--
Costs associated with closure of foreign subsidiaries.....	--	1,462	--
	\$2,059	\$ 921	\$ 2,526
	=====	=====	=====

As of the year-end 2000, Ampex decided to discontinue the operations of MicroNet. The Company established a reserve for the costs of closure, which is included in "Loss on Disposal of Discontinued Operations" on the Consolidated Statement of Operations and recorded \$2.1 million as part of the "Accrued Restructuring Costs" on the Consolidated Balance Sheet. Closing costs included \$0.4 million associated with the elimination of approximately 52 U.S. positions in engineering, manufacturing and administration, \$1.4 million for lease obligations and \$0.3 million for other expenses, all of which consists of cash payments in future periods.

Data Systems recorded a net restructuring charge in 1999 of \$0.9 million. The charge included \$3.3 million in connection with the relocation of the remaining portion of its DCRsi manufacturing operations and other functions from its Redwood City, California facility to its Colorado Springs, Colorado facility and \$1.5 million for the wind down of its German subsidiary, offset by

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

a credit of \$1.8 million related to the termination of the lease of one of its buildings at its Redwood City, California facility and \$2.1 million largely related to the finalization of termination clauses on two of its leased properties. The \$3.3 million restructuring charge are costs associated with the elimination of approximately 86 U.S. positions in engineering, manufacturing and administration, and \$0.3 million for relocation expenses. At December 31, 2000, Data Systems had paid and charged \$2.8 million against its liability accounts related to the termination benefits set up for the 1999 restructuring and terminated 84 employees. At December 31, 2000, the Company which assumes any remaining liability on sale of Data Systems had a remaining balance for accrued restructuring costs of \$0.3 million, all of which consists of expected cash payments in future periods.

Data Systems recorded a net restructuring charge in 1998 of \$2.5 million. The charge included \$3.3 million in connection with the relocation of a portion of its DCRsi manufacturing operations from its Redwood City, California facility to its Colorado Springs, Colorado facility and concurrent workforce reduction, offset by a credit of \$0.8 million related to the termination of the lease of one of its buildings at its Redwood City, California facility. The \$3.3 million restructuring charge includes \$2.7 million for costs associated with the elimination of approximately 106 U.S. positions in engineering, manufacturing and administration, and \$0.6 million for transition, shipping and other costs. At December 31, 2000, the Company had no remaining liability related to the termination benefits set up for the 1998 restructuring and terminated 106 employees.

Accruals for restructuring costs totaled \$2.5 million at December 31, 2000 including \$1.4 million relating to vacated or abandoned leases. The lease obligations associated with the Company's restructuring have not been discounted to present value.

AMPEX CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

The following table shows the major components of the deferred income tax assets and liabilities as of December 31, 2000 and 1999:

Edgar Filing: AMPEX CORP /DE/ - Form 10-K

	December 31,	
	2000	1999
	(in thousands)	
Inventory basis differences.....	\$ --	\$ 657
Restructuring reserves and other liabilities not yet deductible for tax purposes.....	3,879	987
Loss carryforwards.....	43,755	45,631
Foreign withholding taxes on undistributed earnings of foreign subsidiaries.....	(1,213)	(1,213)
Property, plant and equipment Basis differences.....	2,197	(107)
Credit from prior year's minimum tax.....	1,133	1,133
Other.....	2,512	315
Less valuation allowance.....	(53,476)	(48,616)
	-----	-----
Deferred tax liability.....	\$ (1,213)	\$ (1,213)
	=====	=====

A valuation allowance has been established to reduce the deferred tax asset to the amount expected to be realized.

In the first quarter of 1998, the Company reversed \$5.2 million previously reserved in connection with disputed state income taxes for the prior years, following the favorable settlement of that dispute in March 1998. In the second and third quarter of 1998, the Company reversed \$4.9 and \$5.2 million, respectively, previously reserved in connection with the liquidation of its subsidiary in Italy. As at December 31, 2000, the Company had net operating loss carryforwards for income tax purposes of \$125 million expiring in the years 2007 through 2020. As a result of the financing transactions that were completed in April 1994 and February 1995, the Company's ability to utilize its net operating losses and credit carryforwards as an offset against future consolidated federal income tax liabilities will be restricted in its application, which will result in a material amount of the net operating loss never being utilized by the Company.

Note 23--Segment Reporting

The Company has the following operating segments: licensing of intellectual property and Internet video production and distribution. The accounting policies of the segments are the same as those described in the summary of significant accounting policies.

The Company evaluates segment performance based on return on operating assets employed. Profitability is measured as income or loss from continuing operations before income taxes excluding goodwill amortization and asset writedown.
