PROSPECTUS SUMMARY

In addition to the following summary, you should read the more detailed information about us, our common stock and our financial statements and notes appearing elsewhere in this prospectus.

OUR COMPANY

Penge Corp. was incorporated in August 2002 as a Nevada corporation and maintains its principal offices at 11231 Winter Cottage Place, Las Vegas, Nevada 89135. Our telephone number is (702) 562-3176. We are a holding company that acquires other companies or parts of other companies in the tree production and nursery industry. The target companies are small to mid-size companies with \$100,000 to \$10 million in annual revenues. We acquire these companies using a combination of cash, bank loans, common stock and seller financing.

At the end of September 2002, we purchased Major Trees, a 272-acre tree and shrub farm near Tucson, Arizona. In May of 2004, we acquired a 17-acre tree and shrub farm near Houston, Texas. We now have approximately 215,000 trees and large shrubs planted on the two farms. The average selling price of the approximately 28,600 trees that were sold from the Major Trees farm last year

Edgar Filing: PENGE CORP - Form SB-2

was approximately \$27 per tree.

Since purchasing Major Trees in late September 2002, we have become very familiar with tree farms and tree and shrub nurseries. We have found the tree and nursery business to be a high-margin business that can be run with a minimum number of employees and few liabilities and headaches. It is a very straightforward business with great economics and localized competition. As a result, during the last 24 months, we have continued to plow all available capital into improving the existing nursery operation, planting additional trees and other plants on the Tucson farm, and purchasing an additional farm in Texas in order to facilitate future growth.

We have continued to look for additional acquisitions across a broad range of industries, but have been unable to find anything available at a reasonable price with economics better than those of the tree and nursery business. After looking at dozens of businesses in varied industries and different parts of the country, we have decided to focus our efforts in the nursery industry and to buy additional tree and shrub farms and assets in this industry in the foreseeable future.

RISK FACTORS

An investment in our common stock involves a high degree of risk. You should consider the following discussion of risks in addition to the other information in this prospectus before purchasing any shares of our common stock. In addition to historical information, the information in this prospectus contains "forward-looking" statements about our future business and performance. Our actual operating results and financial performance may be very different from what we expect as of the date of this prospectus. The risks below address some of the factors that may affect our future operating results and financial performance.

Risks Regarding Our Company and Our Business

OUR LIMITED OPERATING HISTORY MAKES IT DIFFICULT FOR YOU TO EVALUATE OUR PERFORMANCE AND FORECAST OUR FUTURE.

We were formed and began operations in 2002. Our limited operating history makes it difficult for you to evaluate our ability to generate revenues, manage costs, create profits and generate cash from operations. Our limited operating history also makes it difficult to analyze our ability to compete in the marketplace. Before investing in our common stock, you should consider the risks and difficulties we may encounter as a relatively new business, including risks related to our ability to

- o implement our business plan;
- o build alliances with financing sources;
- o anticipate and adapt to changes in the market;
- o find and acquire new businesses; and
- o administer and manage our operations.

If we fail to successfully manage these risks, our business will suffer or fail. We cannot assure you that we will successfully address these risks or that our business strategy will be successful.

WE MAY NOT BE ABLE TO RAISE SUFFICIENT CAPITAL TO IMPLEMENT OUR BUSINESS PLAN.

As of June 30, 2004, we had \$2,237 in cash and cash equivalents and a working capital deficit of \$(272,551). We need to obtain significant additional working capital to implement our business plan of acquiring businesses and to be able to meet our financial obligations as they become due so as to support our current operations. We will receive no proceeds from the sale of the common stock pursuant to this prospectus, so we must find other sources of financing. We may not be able to raise the additional capital needed, or we may be forced to pay an extremely high price for capital. Factors affecting the availability and price of capital may include the following:

- o the availability and cost of capital generally;
- o our financial results;
- o market interest, or lack of interest, in our industry and business plan;

Edgar Filing: PENGE CORP - Form SB-2

- o the success of our business;
- o the amount of our capital needs; and
- o the amount of debt, options, warrants and convertible securities we have outstanding.

If we cannot raise sufficient capital or are forced to pay a high price for capital, we may be unable to meet current or future obligations or adequately exploit existing or future opportunities. If we are unable to obtain capital for an extended period of time, we may be forced to discontinue operations.

WE HAVE PLEDGED A SIGNIFICANT PORTION OF OUR ASSETS TO SECURE FINANCING AGREEMENTS.

We have pledged substantially all of our assets to secure notes payable funding our purchase of Major Trees and the Sampres Tree Farm and to secure other short-term financing. These financings require that we afford rights and remedies that are commonly provided a secured creditor. If we default under such arrangements, subject to laws restricting the remedies of creditors, such creditors may immediately foreclose on, and seize and dispose of, all pledged assets.

WE HAVE ISSUED CONVERTIBLE NOTES TO FUND OUR OPERATIONS; PRINCIPAL PAYMENTS TOTALING APPROXIMATELY \$275,000 ON SUCH NOTES WILL BECOME DUE AND PAYABLE IN MARCH 2005.

To date, we have issued \$555,000 of convertible notes payable to fund our operations at an interest rate of 10%, \$200,000 of which is secured by 50,000 trees contained in our inventory. These notes require periodic payments of interest and principal. In addition, principal payments totaling approximately \$275,000 are scheduled to become due and payable on March 31, 2005. If we fail to make the required payments on the notes, the holders have those rights and remedies available at law. If this should occur, it could have a material adverse effect on our operations and financial condition.

WE HAVE ISSUED NOTES PAYABLE; PRINCIPAL PAYMENTS TOTALING APPROXIMATELY \$530,000 ON SUCH NOTES WILL BECOME DUE AND PAYABLE BEFORE JUNE 30, 2005.

As of June 30, 2004, we had outstanding notes payable totaling \$1,086,627, \$318,728 of which is secured by all of the assets we acquired from M7 Farms, \$117,899 of which is secured by all of the outstanding shares of our subsidiary, Major Trees, Inc., and \$400,000 of which is secured by all of the assets we acquired from Sampres Tree Farm LLC. These notes require periodic payments of principal and interest. Principal payments totaling approximately \$530,000 will be due and payable under such notes between June 30, 2004 and June 30, 2005. If we fail to make the required payments on these notes, the holders have those rights and remedies available at law. If this should occur, it could have a material adverse effect on our operations and financial condition.

WE MAY BE UNABLE TO CONTINUE TO IDENTIFY APPROPRIATE ACQUISITION TARGETS OR CONSUMMATE ACQUISITIONS OF THOSE TARGETS.

Our business plan anticipates growth primarily through the acquisition of small businesses primarily in the tree production and nursery industry. We may be unable to implement that acquisition strategy for several reasons, including the following:

- o We may be unable to continue to locate suitable businesses for

Edgar Filing: PENGE CORP - Form SB-2

acquisition for various reasons, including:

6

- o the absence of such businesses;
 - o our lack of knowledge of such businesses or the fact that they are for sale;
 - o our lack of sufficient working capital to conduct an adequate search for potential acquisition targets and to conduct the due diligence necessary to evaluate the appropriateness of a potential target; and
 - o our lack of expertise or experience in evaluating or operating the types of businesses that are for sale.
- o Businesses that we are interested in acquiring may be unwilling to sell to us for various reasons, including:
- o an unwillingness to accept our securities as consideration;
 - o a desire to receive cash and a lack of confidence in our ability to obtain the cash necessary to close;
 - o concerns with our ability to operate the business profitably or appropriately, particularly for targets that are not agricultural companies; and
 - o a desire to be acquired by a larger company for strategic or personal reasons (including the desire to be employed by a larger, more stable acquirer).
- o We may be unable to raise the capital necessary to purchase those businesses that we identify as potential acquisition targets quickly enough or at all in order to be able to consummate desired acquisitions.

If we cannot continue to identify appropriate acquisition targets and consummate acquisitions, our business will not continue to grow as planned.

WE HAVE INCURRED SUBSTANTIAL LOSSES SINCE OUR INCEPTION AND MAY CONTINUE TO INCUR LOSSES IN THE FUTURE.

We have experienced net losses in each twelve-month period since inception, with a retained deficit of approximately \$(783,724) as of June 30, 2004. To the extent we have projected that we will generate a net profit at any time in the future, such projections are based on cost and revenue assumptions that may prove to be materially inaccurate. We may never generate a net profit. Even if we do become profitable, we may not be able to maintain profitability or to increase profitability in the future.

OUR ACCOUNTANTS HAVE INCLUDED AN EXPLANATORY PARAGRAPH ON OUR FINANCIAL STATEMENTS REGARDING OUR STATUS AS A "GOING CONCERN."

Our consolidated financial statements included in this report have been prepared on the assumption that we will continue as a going concern. Our independent public accountants have issued their report dated July 9, 2004 that includes an explanatory paragraph stating that our having only recently been formed, our lack of success in establishing profitable operations and the fact that our current liabilities exceed our current assets raise substantial doubt

Edgar Filing: PENGE CORP - Form SB-2

about our ability to continue as a going concern.

7

OUR COMPETITORS HAVE GREATER RESOURCES THAN WE DO.

The markets for trees and shrubs are highly competitive, and we must compete with companies that possess greater financial, production and marketing resources than we do, as well as numerous sole proprietorships with very low overhead. These advantages may enable them to respond more quickly to new or emerging market developments and changes in customer preferences. These advantages may also allow them to engage in more extensive research and development, undertake extensive far-reaching marketing campaigns, adopt more aggressive pricing policies and make more attractive offers to potential employees and strategic partners. In addition, competition may result in price reductions, reduced gross margin and loss of market share. We may not be able to compete successfully, and competitive pressures may adversely affect our business, results of operations and financial condition.

WE MAY BE UNABLE TO MANAGE SIGNIFICANT GROWTH.

To successfully implement our business strategy, we must establish and achieve substantial growth in our customer base through sales, business acquisitions or a combination thereof. If achieved, significant growth would place significant demands on our management and systems of financial and internal controls, and will almost certainly require an increase in the capacity, efficiency and accuracy of our management and distribution support systems. Moreover, significant growth would require an increase in the number of our personnel, particularly within sales, production and management. The market for such personnel remains highly competitive, and we may not be able to attract and retain the qualified personnel required by our business strategy. If successful in expanding our business, we may outgrow our present facilities and/or management capacity, placing additional strains on our human resources in trying to locate, manage and staff multiple locations.

OUR DIRECTORS, EXECUTIVE OFFICERS AND PRINCIPAL STOCKHOLDERS HAVE EFFECTIVE CONTROL OF PENGE.

Our directors, officers, affiliates and their affiliates control approximately 68% of the outstanding shares of our common stock. These directors, officers and affiliates effectively control all matters requiring approval by the stockholders of Penge, including any determination with respect to the acquisition or disposition of assets, future issuances of securities, declaration of dividends and the election of directors. This concentration of ownership may also delay, defer or prevent a change in control of Penge and otherwise prevent you and stockholders other than our affiliates from influencing the direction and future of Penge.

WE ARE DEPENDENT UPON KEY PERSONNEL, AND THE LOSS OF SUCH PERSONNEL COULD SIGNIFICANTLY IMPAIR OUR ABILITY TO IMPLEMENT OUR BUSINESS PLAN.

We are highly dependent upon the efforts of management, particularly Kirk Fischer, our Chief Executive Officer and Chief Financial Officer, and Jim Fischer, our Vice President of Operations. Competition for management personnel is intense, and the number of qualified managers knowledgeable about, and interested in, the nursery industry is limited. As a result, we may be unable to retain our key management employees or attract other highly qualified employees in the future. In addition, the large number of shares of common stock issued to our officers and directors at inception are not subject to repurchase rights if such persons terminate employment with us. The loss of the services of any of our management personnel or the failure to attract and retain additional key

Edgar Filing: PENGE CORP - Form SB-2

employees could have a material adverse effect on our business, financial condition and results of operations.

8

OUR FARMS ARE CURRENTLY OUR SOLE SOURCE OF REVENUE AND ARE VULNERABLE TO INSECTS, DISEASE, WEATHER, DROUGHT, FIRE AND OTHER NATURAL HAZARDS THAT COULD CAUSE SIGNIFICANT DAMAGE TO THOSE FARMS.

Our tree and shrub farms are our main assets and currently our sole source of revenue. The Eldarica Pine and the other plant varieties that we grow on the farms are subject to risks associated with disease, insects, weather, drought, fire and other natural hazards. We cannot prevent or predict the impact of disease, insects, weather, drought, fire or other natural hazards on the trees and other shrubs, but if the trees and other shrubs are damaged or destroyed by any of those elements, we could suffer a significant loss of assets, profits and cash. As a result, the farms could fail and your investment could be significantly impaired or lost.

SALES OF ELДАРICA PINE TREES ACCOUNT FOR MOST OF OUR SALES REVENUE.

Sales of Eldarica Pine Trees accounted for approximately 97% of our tree and shrub sales revenue during the fiscal year ended June 30, 2004. The Eldarica Pine is subject to risks associated with disease, insects, weather, drought, fire and other natural hazards. We cannot prevent or predict the impact of disease, insects, weather, drought, fire or other natural hazards on the Eldarica Pine Trees on our farms or in our target markets. If the Eldarica Pines on our farms or in our target markets were damaged or destroyed by any of those elements, our ability to supply Eldarica Pine Trees and demand for Eldarica Pine Trees could be diminished. This could result in a significant loss of assets, sales and cash. As a result, the farms could fail and your investment could be significantly impaired or lost.

OUR TREE AND NURSERY BUSINESS IS LARGELY DEPENDENT ON A SINGLE CUSTOMER.

During the fiscal year ended June 30, 2004, a single customer, Home Depot, accounted for approximately 75% of our revenue. Home Depot has been a key customer of Major Trees since approximately 1990; however, we have no long-term contract with Home Depot, and Home Depot could discontinue purchasing from Major Trees at any time. The loss of Home Depot as a customer, or a decrease in the number of trees and shrubs purchased by Home Depot, would likely have a material adverse effect on our operating results.

OUR OPERATIONS ARE AND WILL BE SUBJECT TO GOVERNMENT REGULATION.

Our operations are and will be subject to a number of federal, state and local laws and regulations. Of most importance to our present operations are laws concerning environmental protection, employment, labor and immigration. Relevant environmental laws include, without limitation, the Clean Air Act, the Clean Water Act, the Resource Conservation and Recovery Act and the Comprehensive Environmental Response, Compensation, and Liability Act. Such environmental laws require that we take steps to, among other things, maintain air and water quality standards; protect threatened, endangered and other species of wildlife and vegetation; and preserve certain cultural resources. These laws are continually changing and, as a general matter, are becoming more restrictive.

Relevant immigration and employment laws include laws limiting our ability to employ legal and illegal aliens, laws granting certain minimum wage and other rights to employees and laws designed to facilitate the organization of labor. We may from time to time employ persons who are not citizens of the

Edgar Filing: PENGE CORP - Form SB-2

United States and may inadvertently employ persons who are in the United States illegally or whose visa does not permit them to be employed. We may also, at some time in the future, be forced to deal with organized (or organizing) labor and/or be subject to lawsuits for alleged violation of discrimination and other employment laws. Compliance with employment, labor and immigration laws may be complicated and costly.

9

Compliance with federal, state or local laws or regulations represents a small part of our present budget; nevertheless, continued compliance may be extremely costly. If we fail to comply with any such laws or regulations, we may be forced to pay fines, incur significant legal costs and/or take costly measures to ensure compliance. Any such fine or expenditure may adversely affect our development.

Risks Specific to the Purchase of Common Stock in This Offering

THERE IS NO PUBLIC MARKET FOR OUR STOCK, AND EVEN IF A MARKET DEVELOPS, IT WILL LIKELY BE THIN AND SUBJECT TO MANIPULATION.

There is no public market for our common stock, and we can provide no assurance that a public market for our common stock will develop in the future. Even if a public market does develop, the volume of trading in our common stock will presumably be limited and likely dominated by a few individuals. The limited volume, if any, will make the price of our common stock subject to manipulation by one or more stockholders and will significantly limit the number of shares that one can purchase or sell in a short period of time. An investor may find it difficult to dispose of shares of our common stock or obtain a fair price for our common stock in the market.

IF A MARKET FOR OUR COMMON STOCK DEVELOPS, THE MARKET PRICE FOR OUR COMMON STOCK WILL LIKELY BE VOLATILE AND MAY CHANGE DRAMATICALLY AT ANY TIME.

If a market for our common stock develops, the market price of our common stock, like that of the securities of other early-stage companies, may be highly volatile. Our stock price may change dramatically as the result of announcements of our quarterly results, the execution or termination of significant customer contracts, significant litigation or other factors or events that would be expected to affect our business or financial condition, results of operations and other factors specific to our business and future prospects. In addition, the market price for our common stock may be affected by various factors not directly related to our business, including the following:

- o intentional manipulation of our stock price by existing or future stockholders;
- o short selling of our common stock or related derivative securities;
- o a single acquisition or disposition, or several related acquisitions or dispositions, of a large number of our shares;
- o the interest, or lack of interest, of the market in our business sector, without regard to our financial condition or results of operations;
- o the adoption of governmental regulations and similar developments in the United States or abroad that may affect our ability to offer our products and services or affect our

Edgar Filing: PENGE CORP - Form SB-2

cost structure;

- o developments in the businesses of companies that purchase our products (such as Home Depot); and
- o economic and other external market factors, such as a general decline in market prices due to poor economic indicators or investor distrust.

10

THE OFFERING PRICE OF THE COMMON STOCK IS BEING DETERMINED BY THE SELLING STOCKHOLDERS AND MAY NOT CORRELATE WITH ACTUAL VALUE.

The offering price of the shares of common stock offered by this prospectus is being determined by each of the selling stockholders on a transaction-by-transaction basis based upon factors that the applicable selling stockholder considers appropriate. The offering price determined by selling stockholders may or may not relate to a current market price but should not, in any case, be considered an indication of the actual value of the common stock. We do not have any influence over the price at which any selling stockholder offers or sells the common stock offered by this prospectus and cannot assure you that any such price is reasonable.

OBTAINING ADDITIONAL CAPITAL THROUGH THE SALE OF COMMON STOCK WILL RESULT IN DILUTION OF STOCKHOLDER INTERESTS.

We plan to raise additional funds in the future by issuing additional shares of common stock, or securities such as convertible notes, options, warrants or preferred stock that are convertible into common stock. Any such sale of common stock or other securities will lead to further dilution of the equity ownership of existing holders of our common stock.

WE ARE UNLIKELY TO PAY DIVIDENDS ON OUR COMMON STOCK IN THE FORESEEABLE FUTURE.

We have never declared or paid dividends on our stock. We currently intend to retain all available funds and any future earnings for use in the operation and expansion of our business. We do not anticipate paying any cash dividends in the foreseeable future, and it is unlikely that investors will derive any current income from ownership of our stock. This means that your potential for economic gain from ownership of our stock depends on appreciation of our stock price and will only be realized by a sale of the stock at a price higher than your purchase price. Because there presently is no public market for our common stock, you may be unable to realize a gain on your investment.

OUR COMMON STOCK IS A "LOW-PRICED STOCK" AND SUBJECT TO REGULATION THAT LIMITS OR RESTRICTS THE POTENTIAL MARKET FOR OUR STOCK.

Shares of our common stock may be deemed to be "penny stock," resulting in increased risks to our investors and certain requirements being imposed on some brokers who execute transactions in our common stock. In general, a penny stock is an equity security that:

- o Is priced under five dollars;
- o Is not traded on a national stock exchange, the Nasdaq National Market or the Nasdaq SmallCap Market;
- o May be listed in the "pink sheets" or the OTC Bulletin Board;
- o Is issued by a company that has less than \$5 million in net

Edgar Filing: PENGE CORP - Form SB-2

tangible assets (if it has been in business less than three years) or has less than \$2 million in net tangible assets (if it has been in business for at least three years); and

- o Is issued by a company that has average revenues of less than \$6 million for the past three years.

11

We believe that our common stock is presently a "penny stock." At any time the common stock qualifies as a penny stock, the following requirements, among others, will generally apply:

- o Certain broker-dealers who recommend penny stock to persons other than established customers and accredited investors must make a special written suitability determination for the purchaser and receive the purchaser's written agreement to a transaction prior to sale.
- o Prior to executing any transaction involving a penny stock, certain broker-dealers must deliver to certain purchasers a disclosure schedule explaining the risks involved in owning penny stock, the broker-dealer's duties to the customer, a toll-free telephone number for inquiries about the broker-dealer's disciplinary history and the customer's rights and remedies in case of fraud or abuse in the sale.
- o In connection with the execution of any transaction involving a penny stock, certain broker-dealers must deliver to certain purchasers the following:
 - o bid and offer price quotes and volume information;
 - o the broker-dealer's compensation for the trade;
 - o the compensation received by certain salespersons for the trade;
 - o monthly accounts statements; and
 - o a written statement of the customer's financial situation and investment goals.

These requirements significantly add to the burden of the broker-dealer and limit the market for penny stocks. These regulatory burdens may severely affect our ability to create a market for our stock and the liquidity and market price for our common stock.

BENEFICIAL OWNERSHIP OF SELLING STOCKHOLDERS

The table that follows sets forth, as of October 7, 2004:

- o the name of each selling stockholder;
- o certain beneficial ownership information with respect to the selling stockholders;
- o the number of shares that may be sold from time to time by each selling stockholder pursuant to this prospectus; and
- o the amount (and, if one percent or more, the percentage) of common shares to be owned by each selling stockholder if all offered shares are sold.

Beneficial ownership is determined in accordance with SEC rules and generally includes voting or investment power with respect to securities. Common shares that are issuable upon the exercise of outstanding options, warrants or other purchase or conversion rights, to the extent exercisable within 60 days of the date of this table, are treated as outstanding for purposes of computing each selling stockholder's percentage ownership of outstanding common shares.

PLAN OF DISTRIBUTION

METHODS OF DISTRIBUTION

The selling stockholders, which as used herein includes donees, pledgees, transferees or other successors-in-interest selling shares of common stock or interests in shares of common stock received after the date of this prospectus from a selling stockholder as a gift, pledge, partnership distribution or other transfer, may, from time to time, sell, transfer or otherwise dispose of any or all of their shares of common stock or interests in shares of common stock on any stock exchange, market or trading facility on which the shares are traded or in private transactions. These dispositions may be at fixed prices, at prevailing market prices at the time of sale, at prices related to the prevailing market price, at varying prices determined at the time of sale or at negotiated prices.

The selling stockholders may use any one or more of the following methods when disposing of shares or interests therein:

- o ordinary brokerage transactions and transactions in which the broker-dealer solicits purchasers;
- o block trades in which the broker-dealer will attempt to sell the shares as agent, but may position and resell a portion of the block as principal to facilitate the transaction;
- o purchases by a broker-dealer as principal and resale by the broker-dealer for its account;
- o an exchange distribution in accordance with the rules of the applicable exchange;
- o privately negotiated transactions;
- o through the writing or settlement of options or other hedging transactions, whether through an options exchange or otherwise;
- o broker-dealers may agree with the selling stockholders to sell a specified number of such shares at a stipulated price per share;
- o a combination of any such methods of sale; and

- o any other method permitted pursuant to applicable law.

Edgar Filing: PENGE CORP - Form SB-2

The selling stockholders may, from time to time, pledge or grant a security interest in some or all of the shares of common stock owned by them and, if they default in the performance of their secured obligations, the pledgees or secured parties may offer and sell the shares of common stock, from time to time, under this prospectus, or under an amendment to this prospectus under Rule 424(b)(3) or other applicable provision of the Securities Act amending the list of selling stockholders to include the pledgee, transferee or other successors in interest as selling stockholders under this prospectus. The selling stockholders may also transfer the shares of common stock in other circumstances, in which case the transferees, pledgees or other successors in interest will be the selling beneficial owners for purposes of this prospectus.

The selling stockholders may also sell shares by means of short sales to the extent permitted by United States securities laws. Short sales involve the sale by a selling shareholder, usually with a future delivery date, of shares of common stock that the seller does not own. Covered short sales are sales made in an amount not greater than the number of shares subject to the short seller's warrant, exchange right or other right to acquire shares of common stock. A selling shareholder may close out any covered short position by either exercising its warrants or exchange rights to acquire shares of common stock or purchasing shares in the open market. In determining the source of shares to close out the covered short position, a selling shareholder will likely consider, among other things, the price of shares of common stock available for purchase in the open market as compared to the price at which it may purchase shares of common stock pursuant to its warrants or exchange rights.

Naked short sales are any sales in excess of the number of shares subject to the short seller's warrant, exchange right or other right to acquire shares of common stock. A selling shareholder must close out any naked position by purchasing shares. A naked short position is more likely to be created if a selling shareholder is concerned that there may be downward pressure on the price of the shares of common stock in the open market.

The existence of a significant number of short sales generally causes the price of the shares of common stock to decline, in part because it indicates that a number of market participants are taking a position that will be profitable only if the price of the shares of common stock declines. Purchases to cover naked short sales may, however, increase the demand for the shares of common stock and have the effect of raising or maintaining the price of the shares of common stock.

The selling stockholders may also enter into option or other transactions with broker-dealers or other financial institutions or the creation of one or more derivative securities that require the delivery to such broker-dealer or other financial institution of shares offered by this prospectus, which shares such broker-dealer or other financial institution may resell pursuant to this prospectus (as supplemented or amended to reflect such transaction).

The selling stockholders also may resell all or a portion of the shares in open market transactions in reliance upon Rule 144 under the Securities Act, provided that they meet the criteria and conform to the requirements of that rule.

The selling stockholders and any underwriters, broker-dealers or agents that participate in the sale of the common stock or interests therein may be "underwriters" within the meaning of Section 2(11) of the Securities Act. Any discounts, commissions, concessions or profit they earn on any resale of the shares may be underwriting discounts and commissions under the Securities Act. Selling stockholders who are "underwriters" within the meaning of Section 2(11) of the Securities Act will be subject to the prospectus delivery requirements of

Edgar Filing: PENGE CORP - Form SB-2

the Securities Act.

22

To the extent required, the shares of our common stock to be sold, the names of the selling stockholders, the respective purchase prices and public offering prices, the names of any agents, dealers or underwriters, and any applicable commissions or discounts with respect to a particular offer will be set forth in an accompanying prospectus supplement or, if appropriate, a post-effective amendment to the registration statement that includes this prospectus.

DETERMINATION OF OFFERING PRICE

The offering price of the shares of common stock offered by this prospectus is being determined by each of the selling stockholders on a transaction-by-transaction basis based upon factors that the selling stockholder considers appropriate. The offering prices determined by the selling stockholders may, or may not, relate to a current market price but should not, in any case, be considered an indication of the actual value of the common stock. We do not have any influence over the price at which any selling stockholders offer or sell the common stock offered by this prospectus.

PASSIVE MARKET MAKING

We have advised the selling stockholders that while they are engaged in a distribution of the shares offered pursuant to this prospectus, they are required to comply with Regulation M promulgated under the Securities Exchange Act. With certain exceptions, Regulation M precludes the selling stockholders, any affiliate purchasers and any broker-dealer or other person who participates in the distribution from bidding for or purchasing, or attempting to induce any person to bid for or purchase, any security that is subject to the distribution until the entire distribution is complete. Regulation M also restricts bids or purchases made in order to stabilize the price of a security in connection with the distribution of that security. We do not intend to engage in any passive market making or stabilization transactions during the course of the distribution described in this prospectus. All of the foregoing may affect the marketability of the shares offered pursuant to this prospectus.

LIMITATIONS

We have advised the selling stockholders that, to the extent necessary to comply with governing state securities laws, the offered securities should be offered and sold in such jurisdictions only through registered or licensed brokers or dealers. In addition, we have advised the selling stockholders that the offered securities may not be offered or sold in any state unless they have been registered or qualified for sale in the applicable state or an exemption from the registration or qualification requirement is available with respect to such offers or sales.

Additionally, we have advised the selling stockholders that the registration statement of which this prospectus is a part may not be used in connection with share exchanges or business combination transactions.

GENERAL

We are paying the expenses incurred in connection with preparing and filing this prospectus and the registration statement to which it relates, other than selling commissions.

23

Edgar Filing: PENGE CORP - Form SB-2

We have not retained any underwriter, broker or dealer to facilitate the offer or sale of the offered shares offered pursuant to this prospectus. We will pay no underwriting commissions or discounts in connection with this offering, and we will not receive any proceeds from the sale of the offered shares.

USE OF PROCEEDS

All proceeds from any sale of offered shares, less commissions and other customary fees and expenses, will be paid directly to the selling stockholders selling the offered shares. We will not receive any proceeds from the sale of any of the offered shares.

DILUTION

Our net tangible book value (tangible assets less total liabilities) at June 30, 2004 was \$167,556 or approximately \$0.013 per each of the 12,852,331 shares of common stock then outstanding. Accordingly, new investors who purchase shares may suffer an immediate dilution of the difference between the purchase price per share and approximately \$0.013 per share.

As of June 30, 2004, there were outstanding options to purchase up to 4,300,000 shares of our common stock as well as notes payable convertible into 1,202,084 shares of our common stock. The existence of those options and conversion rights may hinder future equity offerings by us, and the exercise of those options and conversion rights may have an adverse effect on the value of shares of our common stock. Furthermore, the holders of those options and conversion rights may exercise them at a time when we would otherwise be able to obtain additional equity capital on terms more favorable to us.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

OVERVIEW

OUR BUSINESS AND STRATEGY. We were incorporated in August 2002 in order to acquire and operate various businesses with between \$100,000 and \$10 million in annual revenues. We did not have an industry focus at inception. Since entering the tree farm and nursery business in late September 2002, we have become familiar with tree nurseries and nurseries in general. We have found the tree farm and nursery business to be a high-margin business that can be run with a minimum number of employees and manageable liabilities. It is a very straightforward business with good economics and localized competition. As a result, during the last 24 months, we have continued to invest all available capital into improving our existing nursery operation and into planting additional plants to prepare for the future. We have determined to initially focus our acquisition and operating activities in the tree farm and nursery industry, with a current focus on the wholesale side of the industry. Unless otherwise specified or evident from the context, "we," "us," the "Company" and similar terms refer to Penge Corp. and its consolidated subsidiaries.

We target a smaller revenue market in order to find individual owner/operators who, for one reason or another (retirement, employee headaches or personal cash flow), would like to sell their business and find a way to cash out on their years of hard work. The number of companies seeking to acquire and operate smaller businesses, particularly in our industry, are limited and, as a

Edgar Filing: PENGE CORP - Form SB-2

result, we expect to be able to negotiate favorable acquisition terms. In addition, businesses with revenue of \$10 million or less are usually small enough to integrate easily without complex infrastructure or management issues that come with acquiring larger companies. We are creating management economies of scale in finance, operations, human resources and accounting, which we believe will allow us to create greater value from these acquired assets.

We are building our business model to be the low-cost producer in the regions that we serve. We believe that by providing a high-quality product that is always the lowest price available, we will be able to steadily grow sales and market share in the regions that we service. We accomplish this with a constant, relentless focus on the cost structure of our business. In the 24 months that we have run Major Trees, Inc. ("Major Trees"), we have been able to reduce the direct cost of producing a tree on average by over 50%. This can give us a significant competitive advantage as we begin harvesting those trees.

OUR ACQUISITIONS. To date, we have acquired two farms. In September 2002, we purchased Major Trees, a 272-acre tree farm near Tucson, Arizona. This farm was, we believe, an exceptional value that included inexpensive land, unlimited water rights, moderate growing climate, access to inexpensive labor, a relationship with a major retailer dating back 15 years and many of the necessary buildings, equipment, pivots and wells to substantially expand operations. In the past 24 months, we have been able to use these advantages to expand from 61,000 trees in inventory when we bought the farm to around 178,000 trees in inventory as of June 2004 at a much lower cost than we expected. With less than \$750,000 in capital, we have planted trees that we expect to harvest over the next three years with an estimated wholesale value of approximately \$4.7 million.

In May 2004, we acquired a 17-acre tree farm near Houston, Texas (the "Sampres Farm"). The purchase of this farm is strategic to us in several ways. First, Texas is one of the largest nursery markets in the country, with over 20 million people in a localized selling area. Tree prices are high, and competition is not entrenched, giving us a great opportunity for growth in this region. Some of our best current customers, including 50% of our large retailer sales, currently come from this region, causing us to plan to further localize our sales and growing efforts in order to increase our margins and reduce our shipping expenses.

25

Second, Texas growers have exceptional experience in many of the latest state-of-the-art pot-in-pot and drip irrigation systems that we plan to use on all of our tree operations as we continue to grow. The general manager whom we hired in connection with the acquisition of the Sampres Farm brings an in-depth knowledge of established and cutting-edge farming techniques regarding a variety of trees.

We anticipate buying additional assets in the nursery industry again in 2005, with a focus on growing our core business lines and increasing our position in Texas.

GENERAL OUTLOOK. We experienced a net loss of \$(409,372) in the partial fiscal year ended June 30, 2003 ("Fiscal 2003") and a net loss of \$(430,634) in the fiscal year ended June 30, 2004 ("Fiscal 2004"). Much of the net losses experienced in Fiscal 2003 and Fiscal 2004 is a result of expenses that we do not expect to recur with the same magnitude or regularity in the future. These include such expenses as, for the two fiscal years combined, \$150,000 in non-cash expenses associated with options issued to non-employees. We expect such expenses to be reduced or eliminated in the fiscal year ended June 30, 2005 ("Fiscal 2005"). With the reduction or elimination of such expenses, a moderate

Edgar Filing: PENGE CORP - Form SB-2

increase in other expenses and a significant increase in revenue projected for Fiscal 2005, we expect a smaller net loss, and possibly net income, for Fiscal 2005.

Our business plan does, however, contemplate engaging in acquisitions, financings and other transactions. If one or more of these transactions were to occur, our net loss may continue as a result of associated expenses.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Management is basing this discussion and analysis of our financial condition and results of operations on our consolidated financial statements. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenue and expenses, and related disclosure of contingent assets and liabilities. On an ongoing basis, we evaluate our critical accounting policies and estimates, including those related to revenue recognition, valuation of accounts receivable, property, plant and equipment, long-lived assets, intangible assets and contingencies. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

We believe the following critical accounting policies affect the more significant judgments and estimates used in the preparation of our consolidated financial statements. These judgments and estimates affect the reported amounts of assets and liabilities and the reported amounts of revenues and expenses during the reporting periods. Changes to these judgments and estimates could adversely affect our future results of operations and cash flows.

- o Inventory Valuation. We record inventories at the lower of cost or the market value of such inventory. For inventory acquired as part of a business combination, cost is the estimated selling price, less the estimated costs associated with selling such inventory. Our average production cost for inventory is generally lower than the average wholesale price for our trees, so the cost of acquired inventory is typically greater than the cost of inventory grown from seed. A majority of the inventory that was sold in Fiscal 2003 and Fiscal 2004 was inventory acquired as part of our acquisition of Major Trees.

26

- o Cost of Goods Sold. As explained in "Inventory Valuation" above, we record inventories at the lower of cost or market value of such inventory, and our average production cost for inventory is generally lower than its market value. For inventories acquired in connection with our acquisition of a business, we record inventory at the estimated selling price, less the estimated costs of selling such inventory. Because a majority of the inventory that we sold in Fiscal 2003 and Fiscal 2004 was inventory acquired as part of our acquisition of Major Trees, the cost of goods sold for Fiscal 2003 and Fiscal 2004 is a greater percent of sales than we estimate for future years. In Fiscal 2005 and thereafter, we expect our per-unit cost of goods sold to decrease as we begin selling trees and other products that we have grown from seed.

Edgar Filing: PENGE CORP - Form SB-2

- o Revenue Recognition. Our revenue comes primarily from the sale of agricultural products. We recognize revenue from the sale of agricultural products when rights and risk of ownership have passed to the customer, there is persuasive evidence of a sales arrangement, product has been shipped or delivered to the customer, the price and terms are finalized and collection of the resulting receivable is reasonably assured. We recognize revenue from business consulting services over the term of the underlying consulting agreement.

- o Property, Plant and Equipment. A significant portion of our assets consists of property and equipment, including real property, farm buildings and farming equipment. We record property and equipment at cost (and capitalize expenditures for major renewals and betterments that extend the useful life of property and equipment). The appraised value of real property and buildings in the regions in which our farms are located has increased steadily over the last decade; however, the market for agricultural property is thin, especially in areas remote from large cities. Our properties are remote from any large cities. As a result, there is no certainty that we would be able to sell any property or building at its book value, or at all. The absence of an active market for agricultural properties in the region may inhibit our ability to determine accurately the fair market value of our real property and building assets.

Penge Corp. was organized on August 6, 2002 under the laws of the state of Nevada. Penge acquired Major Trees on September 27, 2002. Our results of operations reflect the operations of Major Trees from that date. On January 27, 2003, Penge organized Anglewood Advisors, Inc., an advisory firm, which was abandoned on October 2, 2003. Our results of operations reflect the operations of Anglewood Advisors during that time period. In May 2004, Penge acquired the assets of the Sampres Farm. Our results of operations for Fiscal 2004 reflect minimal revenue from the Sampres Farm.

REVENUE. Our revenues are derived primarily from the sale of trees and other nursery products, but also include limited consulting fees. Revenues increased from \$669,721 for Fiscal 2003 to \$806,977 for Fiscal 2004, an increase of approximately 20%. This increase is primarily the result of our increasing the number of trees sold by Major Trees from approximately 22,100 trees in Fiscal 2003, generating approximately \$655,000 in revenue, to approximately 28,600 in Fiscal 2004, generating approximately \$758,000 in revenue. Most of the trees we grow can be sold within three years of being planted. During the last 24 months, we have significantly increased our tree inventory by planting or acquiring additional trees. In addition, we recently acquired the Sampres Farm. We expect annual revenue growth to accelerate in Fiscal 2005, primarily as a result of new revenue associated with the Sampres Farm, but in part because we expect to begin selling a small part of the additional inventory we planted at Major Trees.

COST OF GOODS SOLD. Cost of goods sold includes all operational expenses associated with the operation of our two farms, including all farm-related salaries, planting, maintenance and harvesting costs, equipment and any depreciation related to the foregoing. Cost of goods sold increased from \$420,561 for Fiscal 2003 to \$445,365 for Fiscal 2004, an increase of approximately 6%. This increase is primarily the result of inventory costs associated with increased sales. Costs of goods sold as a percentage of revenue decreased, from approximately 63% in Fiscal 2003 to approximately 55% in Fiscal 2004. This decrease in costs of goods sold as a percentage of revenue is a result of the spreading of certain fixed (or relatively fixed) costs across increasing revenue.

During Fiscal 2003 and Fiscal 2004, we primarily sold acquired inventory. In the coming year, we expect to decrease the percentage of acquired inventory we sell and, as a result, expect our cost of goods sold to decrease or remain flat in absolute terms, and to decrease significantly as a percentage of revenue.

28

GENERAL AND ADMINISTRATIVE. General and administrative expense consists primarily of personnel expense associated with management, consulting fees, travel expenses, professional fees, general overhead and depreciation. General and administrative expense increased from \$576,478 for Fiscal 2003 to \$656,337 for Fiscal 2004, an increase of approximately 14%. This increase is a result of increases in salaries of our management and travel expenses. General and administrative expense as a percentage of revenue decreased slightly, from approximately 86% in Fiscal 2003 to approximately 81% in Fiscal 2004. This decrease in general and administrative expense as a percentage of revenue is a result of spreading increasing costs over more rapidly increasing revenue. A factor contributing to the relatively high general and administrative expense was the \$120,000 we expensed in Fiscal 2003 and the \$30,000 we expensed in Fiscal 2004 for equity-based compensation. We expect general and administrative expense to increase in Fiscal 2005 in absolute terms but decrease as a percentage of revenue, as we experience increased legal, accounting and other costs associated with becoming a public company, but also experience increasing

Edgar Filing: PENGE CORP - Form SB-2

revenue.

LOSS ON UNSUCCESSFUL ACQUISITIONS. Losses on unsuccessful operations consist of non-refundable deposits or due-diligence expenses associated with acquisitions contemplated by us but abandoned after due diligence. As we continue to look for acquisition opportunities in Fiscal 2005, we may, but do not plan to, incur similar expenses.

INTEREST EXPENSE. Interest expense consists primarily of interest paid on outstanding notes payable and amortization of deferred loan costs. Interest expense increased from \$68,057 for Fiscal 2003 to \$116,163 for Fiscal 2004, an increase of approximately 71%. This increase is a result of an increase in indebtedness primarily in order to fund our expansion of inventory and our acquisition costs. Interest expense also increased as a percentage of revenue, from approximately 10% in Fiscal 2003 to approximately 14% in Fiscal 2004. We expect interest expense to increase in Fiscal 2005 as a result of additional debt incurred in order to fund operations and harvesting in early Fiscal 2005, but expect our debt to grow slower than our revenue and, as a result, to decrease as a percentage of revenue.

NET LOSS. Our net loss increased from \$353,090, for Fiscal 2003 to \$430,634 for Fiscal 2004. We believe that much of the net loss attributable to Fiscal 2003 and Fiscal 2004 is a result of expenses that we do not expect to recur with the same magnitude or regularity in the future. These include such expenses as, for the two fiscal years combined, \$150,000 in non-cash expenses associated with options issued to non-employees. However, our net loss increased from Fiscal 2003 to Fiscal 2004 because certain expenses, such as personnel expenses, travel expenses and interest expense increased faster than our revenue increased. We expect equity-based compensation expenses and per-unit cost of goods sold to be reduced in Fiscal Year 2005. With the reduction of such expenses, a moderate increase in other expenses, and a more significant increase in revenue projected for Fiscal 2005, we expect a smaller net loss, and possibly net income, for Fiscal 2005. Our business plan does, however, contemplate engaging in acquisitions, financings and other transactions. If one or more of these transactions were to occur, our net loss may actually increase as a result of associated expenses.

LIQUIDITY AND CAPITAL RESOURCES

The following table discloses aggregate information about our contractual obligations including long-term debt, operating and capital lease payments, office lease payments, contractual service agreements and the periods in which payments are due as of June 30, 2004:

The following table reflects selected balance sheet data as of June 30, 2004:

	JUNE 30, 2004

BALANCE SHEET DATA:	
Cash and cash equivalents.....	\$2,237
Working capital (deficit).....	(272,551)
Total assets.....	1,986,866
Retained deficit.....	(783,724)
Stockholders' equity.....	301,770

At June 30, 2004, we had cash and cash equivalents of \$2,237. Between June 30, 2004 and September 30, 2004, we raised an additional \$300,000 through the issuance of convertible and non-convertible notes and options. Our revenues are seasonal, with most of our revenue being recognized in November and December of each year. The amount of cash or cash equivalents on hand, plus available short-term loans from management and inventory-based financing, is expected to be sufficient to fund our basic operations until our harvest (and revenue generating) season begins. After that date, we expect our revenue from operations to equal or exceed associated costs. We will, however, require additional financing to pay off past indebtedness, fund the planned expansion of inventory in Fiscal 2005 and pay expenses of, and any cash portion of the purchase price associated with, any future acquisitions.

We expect to obtain such additional financing through the private placement of equity securities, derivative securities and convertible or non-convertible debt instruments. We do not have any specific commitments from third parties to provide such financing, and we caution that, particularly in light of the current instability in the equity markets, such financing may not be available on favorable terms, or at all.

Our consolidated financial statements have been prepared on the assumption that our Company will continue as a going concern. Our independent public accountants have issued their report dated July 9, 2004 that includes an explanatory paragraph stating that our having only recently been formed, our lack of success in establishing profitable operations and the fact that our current liabilities exceed our current assets raise substantial doubt about our ability to continue as a going concern. Our product line is limited, and it has been necessary to rely upon financing from the sale of our equity securities to sustain operations in the past. Additional financing will be required if we are to continue as a going concern. If such additional funding cannot be obtained, we may be required to scale back or discontinue our operations. Even if such additional financing is available, there can be no assurance that it will be on terms favorable to us. In any event, such financing will result in immediate and possibly substantial dilution to existing shareholders.

OUR BUSINESS

OVERVIEW

Penge Corp. was incorporated in August 2002 as a Nevada corporation and maintains its principal offices at 11231 Winter Cottage Place, Las Vegas, Nevada 89135. Our telephone number is (702) 562-3176. We are a holding company that acquires other companies or parts of other companies in the tree production and nursery industry. The target companies are small to mid-size companies with \$100,000 to \$10 million in annual revenues in such industry. We acquire these companies using a combination of cash, bank loans, common stock and seller

Edgar Filing: PENGE CORP - Form SB-2

financing. Unless otherwise specified or evident from the context, "we," "us," the "Company" and similar terms refer to Penge Corp. and its consolidated subsidiaries.

We target this smaller revenue market (\$100,000 to \$10 million of revenue) in order to find individual owner/operators who, for one reason or another (retirement, employee headaches or personal cash flow), would like to sell their business and find a way to cash out on their years of hard work. In addition, businesses with revenue of \$10 million or less are usually small enough to easily integrate without complex infrastructure or management issues that come with acquiring larger companies. We are working to create management economies of scale in finance, operations, human resources, accounting, etc., which we believe will allow us to create greater value from these acquired assets.

At the end of September 2002, we purchased Major Trees, Inc. ("Major Trees"), a 272-acre tree and shrub farm near Tucson, Arizona. In May of 2004, we acquired a 17-acre tree and shrub farm near Houston, Texas. We now have approximately 215,000 trees planted on the two farms. Most of the trees we grow can be sold within three years of being planted. During the last 24 months, we have significantly increased our tree inventory by planting or acquiring additional trees. When this additional inventory becomes available for sale in the fall of 2005, we anticipate substantial revenue growth from the sale of this additional inventory. The average selling price of the approximately 28,600 trees that were sold from the Major Trees farm last year was approximately \$27 per tree.

We generated approximately \$655,000 in revenue from the sale of approximately 21,000 trees from Major Trees during the first year we owned the farm - fiscal year 2003. We generated approximately \$758,000 in revenue in fiscal year 2004 from the sale of approximately 28,600 trees from Major Trees. We expect additional revenue growth in the coming twelve months resulting from the acquisition of the Sampres Farm.

Since purchasing Major Trees in late September 2002, we have become very familiar with tree farms and nurseries in general. We have found the tree and nursery business to be a high margin business that can be run with a minimum number of employees and few liabilities and headaches. It is a very straightforward business with great economics and localized competition. As a result, during the last 24 months, we have continued to plow all available capital into improving the existing nursery operation and planting additional trees and shrubs on the Tucson farm, and purchasing an additional farm in Texas to prepare for the future.

We have continued to look for additional acquisitions across a broad range of industries, but have been unable to find anything available at a reasonable price with economics better than those of the tree business. So after looking at dozens of businesses in varied industries and different parts of the country, we have decided to focus our efforts in the tree and shrub industry and to buy additional tree and shrub farms and assets in the foreseeable future.

31

Major Trees

In September 2002, we purchased a tree and shrub farm in southern Arizona, 90 minutes southeast of Tucson, named Major Trees, Inc. Major Trees is a 25-year old tree and shrub farm on 272 acres that grows and sells trees and shrubs wholesale to retail outlets, such as Home Depot, and to retail nurseries and landscape companies primarily in Arizona, New Mexico, Texas, and Nevada.

Edgar Filing: PENGE CORP - Form SB-2

Major Trees sells a variety of trees and shrubs and is the largest supplier of Eldarica Pine trees in the Southwest United States, selling these pine trees as, among other things, living, potted Christmas trees. Major Trees sold approximately 22,100 trees in Fiscal 2003 and generated approximately \$655,000 in revenue for Fiscal 2003. Major Trees sold approximately 28,600 trees in Fiscal 2004 and generated approximately \$758,000 in revenue for Fiscal 2004.

Sampres Tree Farm

In May 2004, we acquired a 17-acre tree and shrub farm near Houston, Texas. The Sampres Farm grows a variety of landscape trees and shrubs, which we anticipate selling to retail nurseries and landscape companies in Arizona, New Mexico, Texas and Nevada. We anticipate selling between approximately 10,000 and 30,000 trees grown at the Sampres Farm each year.

INDUSTRY BACKGROUND

Nursery and Landscape

The market for landscape trees and shrubs is large and very diverse. Major customer groups include retail nurseries, major retail outlets and landscape companies. Due to the significant transportation and shipping costs as well as varying local growing conditions and landscaping needs, the markets for landscape trees and shrubs are very localized and highly specific to particular geographic and climatological regions with the majority of landscape trees grown in particular areas also ultimately being sold and planted in the same geographic area. However, due to the existence of such a wide variety of growers, growers are subject to significant price pressures.

Living Christmas Trees

The market for Christmas trees is very large and diverse. According to the National Christmas Tree Association, Christmas trees are displayed in between 80 and 90 million homes in the United States each year. Of that number, roughly 30 to 35 million are real Christmas trees, with the remainder being artificial.

We compete in a very small niche of the larger Christmas tree market - potted, living trees. In the American Southwest, unlike other regions of our country, it is warm enough in the winter that consumers can buy living, rather than cut trees, keep them indoors during the Christmas season and then plant them out of doors later that season. Our Eldarica Pine trees are uniquely suitable for sale as a potted, living tree in the Southwest because they are robust enough to withstand Christmas-season abuse, need little water and are able to withstand replanting in a warm, dry environment. Of our trees sold to Home Depot and similar retailers, we believe that many are sold and used as potted, living Christmas trees and then planted as landscaping trees.

32

TARGET MARKETS

Nurseries and Landscape Companies

In Fiscal 2004, we generated approximately 19% of our tree and shrub revenues through sales to retail nurseries and landscaping companies in Arizona,

Edgar Filing: PENGE CORP - Form SB-2

New Mexico, Nevada and Texas. We have significantly increased our planting of landscape trees in order to grow our sales in the retail nursery and landscape markets and anticipate such sales to increase in the future as a percentage of our total sales. Our purchase of the Sampres Farm in Texas added only landscape trees and should significantly increase our percentage of trees sold to the landscape market.

Major Retail Market

In Fiscal 2004, we generated approximately 80% of our tree and shrub revenues through sales of Eldarica Pine trees to Home Depot and other tree retailers, which are often then re-sold as potted, living Christmas trees. We anticipate these sales of Eldarica Pine trees decreasing as a percentage of our total sales in the future as we increase our planting and sales of landscape trees and shrubs.

OUR PRODUCTS

Our farms grow dozens of trees and shrubs native to the Southwest region. These trees are primarily desert trees and shrubs that thrive in the dry and arid regions common throughout the southwestern United States and are those varieties most commonly sold by nurseries and utilized by landscape companies in that area. The primary tree grown by Major Trees is the Eldarica Pine. The Eldarica Pine is from the Middle East and Russia and is a desert tree with growth of 1-6 feet a year depending on climate, water, and fertilizer. The tree is highly disease resistant and hardy in warm climates.

The Eldarica Pine has been sold in the United States for decades and is a proven commodity in both hardiness and marketability to the Christmas, landscape and nursery markets in the southern United States and the region from Texas to California in particular. The Eldarica Pine represented approximately 97% of our Fiscal 2004 tree and shrub sales. We anticipate this decreasing as a percentage of our total sales in the future as we increase our production and sales of trees and shrubs to the retail nursery and landscape markets.

We grow our trees from seed to harvest in 1-gallon to 100-gallon plastic pots. The Eldarica Pine trees are sold at an average age of 3 years old, with heights ranging from 3 feet to 11 feet, with the best selling trees being 6-7 feet tall.

SALES AND MARKETING

In Fiscal 2004, we generated approximately 80% of our tree and shrub revenues through sales to Home Depot Centers located in Arizona, Nevada, New Mexico, and Texas, which trees are often re-sold as potted, living Christmas trees. The majority of these trees are sold during late autumn and early winter. In Fiscal 2004, we generated approximately 19% of our tree and shrub revenue through sales to nurseries and landscaping companies in Arizona, Nevada, New Mexico, and Texas.

We plan to increase our production of trees through additional acquisitions of farms such as the Sampres Farm and by planting additional landscape trees on our current properties so as to be able to increase our sales to landscape and nursery customers in order to generate additional revenues during the spring and summer months. In the long run, we anticipate most of our revenue growth to come from such sales.

COMPETITION

Edgar Filing: PENGE CORP - Form SB-2

The market for landscape, living Christmas and nursery trees is very large and diverse, and therefore, a grower must possess some form of sustainable competitive advantage in order to be successful. This could take the form of geographic proximity to a large number of purchasers, cultivation of a unique species or variety of trees or access to affordable labor, natural resources or capital. The large number of growers also results in highly competitive pricing and pressures on profitability. In order to be competitive in this market, we must effectively anticipate and respond to market demands and developments.

Our primary competitive advantage is price. We believe that we are able to produce and sell Eldarica Pine and other trees and shrubs at a price that is lower than most of our competitors. We also believe that the size of our Eldarica Pine operation, which is the largest in the Southwest, gives us a competitive advantage with larger retailers because of our perceived ability to meet their growing demand more easily than smaller growers. With respect to variety of species, geographic location, access to labor and other factors, we do not have a significant advantage or disadvantage overall, and may be perceived as having a competitive advantage or disadvantage, depending upon which competitor we are being compared with.

SUBSIDIARY

Penge owns 100% of the outstanding shares of common stock of Major Trees, Inc., an Arizona corporation.

INTELLECTUAL PROPERTY

We do not presently regard our intellectual property as critical to our success. If we acquire any proprietary intellectual property rights that we believe would benefit from patent, copyright, trademark or trade secret protection, we intend to take appropriate steps in order to protect those rights. This would likely include the filing of applications for appropriate state and federal registrations of our intellectual property rights and requiring any employees involved with the intellectual property to sign confidentiality and invention agreements.

EMPLOYEES

In addition to our four full-time management team members, we currently have a full-time foreman, two additional full-time employees and between ten and fifteen seasonal employees at each of our two farms. None of our employees is represented by a collective bargaining organization, and we consider our relationship with all our employees to be satisfactory. We plan to hire additional management and operational expertise as cash flow and business execution dictate.

PROPERTY

We own a 272-acre tree and shrub farm that is located at 14660 South Highway 191 in Elfrida, Arizona, which is an approximately 90 minute drive from Tucson, Arizona. The tree and shrub farm is flat, desert landscape and is surrounded by other agricultural land. Water for the farm is drawn from deep wells.

We also own a 17-acre tree and shrub farm that is located at 19461 Mt. Pleasant Road in Montgomery, Texas, which is an approximately 30 minute drive from Houston, Texas. The tree and shrub farm is sloped and is surrounded by rolling hills. The farm is surrounded by national forest, other agricultural

land and residential development. It is very wet and watered by both rainwater and wells.

RESEARCH AND DEVELOPMENT

We have not incurred any research and development expenses in the past and do not anticipate incurring any such expenses in the foreseeable future. All research and development seeds, seedlings and trees have generated revenues in excess of the expense of cultivating them, thus resulting in no research and development net cost.

LEGAL PROCEEDINGS

We are not engaged in any legal proceedings, nor are we aware of any pending or threatened legal proceedings that, singly or in the aggregate, will have a material adverse effect on our business, financial condition or results of operations.

BOARD COMMITTEES

Our entire Board of Directors presently serves as our audit committee. None of the members of the audit committee satisfy the independence requirements applicable to audit committees of listed companies. In addition, the Board of Directors has determined that the audit committee does not have a member qualifying as an audit committee financial expert, as defined in Item 401(h) of Regulation S-B. To save limited capital over the last several years, we have chosen not to expand the size of our Board of Directors or offer cash compensation to our directors. The absence of cash compensation makes recruiting persons who are not otherwise interested in our company more difficult. For these reasons, we do not have on our Board of Directors a person who would qualify as an audit committee financial expert.

We do not presently have a standing nominating committee or compensation committee, and we do not have a nominating committee charter or a compensation committee charter.

Our bylaws provide that we shall indemnify any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative, except an action by or in the right of our company, by reason of the fact that he or she is or was a director, officer, employee or agent of our company, or is or was serving at the request of our company as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, against expenses, including attorneys' fees, judgments, fines and amounts paid in settlement actually and reasonably incurred by him or her in connection with the action, suit or proceeding if he or she acted in good faith and in a manner that he or she reasonably believed to be in or not opposed to the best interests of our company and, with respect to any criminal action or proceeding, had no reasonable cause to believe his or her conduct was unlawful.

With respect to derivative actions, our bylaws provide that we shall indemnify any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action or suit by or in the right of our company to procure a judgment in its favor by reason of the fact that he or she is or was a director, officer, employee or agent of our company, or is or was serving at the request of our company as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise against expenses, including amounts paid in settlement and attorneys' fees actually and reasonably incurred by him or her in connection with the defense or settlement of the action or suit if he or she acted in good faith and in a manner which he or she reasonably believed to be in or not opposed to the best interests of our company. We may not indemnify any such person for any claim, issue or matter as to which such person has been adjudged by a court of competent jurisdiction, after exhaustion of all appeals therefrom, to be liable to our company or for amounts paid in settlement to our company, unless and only to the extent that the court in which the action or suit was brought or other

Edgar Filing: PENGE CORP - Form SB-2

court of competent jurisdiction determines upon application that in view of all the circumstances of the case, the person is fairly and reasonably entitled to indemnity for such expenses as the court deems proper.

Any indemnification under the provisions described above, unless ordered by a court, may be made by our company only as authorized in the specific case upon a determination that indemnification of the director, officer, employee or agent is proper in the circumstances. The determination must be made:

- o By the stockholders;
- o By the board of directors by majority vote of a quorum consisting of directors who were not parties to the act, suit or proceeding;
- o If a majority vote of a quorum consisting of directors who were not parties to the act, suit or proceeding so orders, by independent legal counsel in a written opinion; or
- o If a quorum consisting of directors who were not parties to the act, suit or proceeding cannot be obtained, by independent legal counsel in a written opinion.

Our bylaws further provide that the expenses of officers and directors incurred in defending a civil or criminal action, suit or proceeding must be paid by our company as they are incurred and in advance of the final disposition of the action, suit or proceeding, upon receipt of an undertaking by or on behalf of the director or officer to repay the amount if it is ultimately determined by a court of competent jurisdiction that he or she is not entitled to be indemnified by our company.

Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers and controlling persons of the Company pursuant to the foregoing provisions or otherwise, we have been informed that in the opinion of the SEC such indemnification is contrary to public policy as expressed in the Securities Act and is, therefore, unenforceable.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors
PENGE CORP. AND SUBSIDIARY
Las Vegas, Nevada

We have audited the accompanying consolidated balance sheets of Penge Corp. and Subsidiary as of June 30, 2004 and 2003 and the related consolidated statements of operations, stockholders' equity and cash flows for the year ended June 30, 2004 and for the period from inception on August 6, 2002 through June 30, 2003. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as

Edgar Filing: PENGE CORP - Form SB-2

evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Penge Corp. and Subsidiary as of June 30, 2004 and 2003 and the consolidated results of their operations and their cash flows for the year ended June 30, 2004 and for the period from inception on August 6, 2002 through June 30, 2003, in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming the Company will continue as a going concern. As discussed in Note 15 to the financial statements, the Company was only recently formed and has not yet been successful in establishing profitable operations. Further, the Company has current liabilities in excess of current assets. These factors raise substantial doubt about the ability of the Company to continue as a going concern. Management's plans in regards to these matters are also described in Note 15. The financial statements do not include any adjustments that might result from the outcome of these uncertainties.

NOTE 13 - INCOME TAXES

The Company accounts for income taxes in accordance with Statement of Financial Accounting Standards No. 109, "Accounting for Income Taxes". SFAS No. 109 requires the Company to provide a net deferred tax asset or liability equal to the expected future tax benefit or expense of temporary reporting differences between book and tax accounting methods and any available operating loss or tax credit carryforwards. At June 30, 2004 and 2003, the Company has available unused net operating loss carryforwards of approximately \$638,000 and \$222,000, respectively, which may be applied against future taxable income and which expire in various years through 2024.

At June 30, 2004 and 2003, respectively, the total of all deferred tax assets is approximately \$127,000 and \$47,000 and the total of all deferred tax liabilities is \$49,000, and \$49,000. The amount of and ultimate realization of the benefits from the deferred tax assets for income tax purposes is dependent, in part, upon the tax laws in effect, the future earnings of the Company, and other future events, the effects of which cannot be determined. Because of the uncertainty surrounding the realization of the loss carryforwards, the Company has established a valuation allowance of approximately \$79,000 and \$0 at June 30, 2004 and 2003, respectively. The change in the valuation allowance for the year ended June 30, 2004 and for the period from inception on August 6, 2002 through June 30, 2003 is approximately \$79,000 and \$0, respectively.

The temporary differences, tax credits and carryforwards gave rise to the following deferred tax asset (liability) at:

	June 30,

NOTE 14 - LOSS PER SHARE

The following data shows the amounts used in computing loss per share:

Edgar Filing: PENGE CORP - Form SB-2

	For the Year Ended June 30, 2004	From Inception on August 6, 2002 Through June 30, 2003
	-----	-----

	-----	-----
Weighted average number of common shares outstanding used in loss per share for the period (denominator)	12,179,860	9,653,338
	-----	-----

At June 30, 2004, the Company had outstanding options to purchase 4,300,000 shares and notes payable convertible into 1,202,084 shares which were not used in the computation of loss per share because their effect would be anti-dilutive. At June 30, 2003, the Company had outstanding options to purchase 4,200,000 shares which were not used in the computation of loss per share because their effect would be anti-dilutive. Dilutive loss per share was not presented, as the Company had no common stock equivalent shares for all periods presented that would affect the computation of diluted loss per share.

NOTE 15 - GOING CONCERN

The accompanying financial statements have been prepared in conformity with generally accepted accounting principles in the United States of America, which contemplate continuation of the Company as a going concern. However, the Company was only recently formed and has not yet been successful in establishing profitable operations. Further, the Company has current liabilities in excess of current assets. These factors raise substantial doubt about the ability of the Company to continue as a going concern. In this regard, management is proposing to raise any necessary additional funds not provided by operations through loans or through additional sales of their common stock or through possible business combinations. There is no assurance that the Company will be successful in raising this additional capital or in achieving profitable operations. The financial statements do not include any adjustments that might result from the outcome of these uncertainties.

INFORMATION NOT REQUIRED IN THE PROSPECTUS

ITEM 24. INDEMNIFICATION OF DIRECTORS AND OFFICERS

Our articles of incorporation provide that we shall indemnify and advance expenses to our directors, officers, employees, fiduciaries or agents and to any person who is or was serving at our request as a director, officer, partner, trustee, employee, fiduciary or agent of another domestic or foreign corporation or other person or of an employee benefit plan (and their respective estates or personal representatives) to the fullest extent as from time to time permitted by Nevada law.

Our bylaws provide that we shall indemnify any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative, except an action by or in the right of our company, by reason of the fact that he or she is or was a director, officer, employee or agent of our company, or is or was serving at the request of our company as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, against expenses, including attorneys' fees, judgments, fines and amounts paid in settlement actually and reasonably incurred by him or her in connection with the action, suit or proceeding if he or she acted in good faith and in a manner that he or she reasonably believed to be in or not opposed to the best interests of our company and, with respect to any criminal action or proceeding, had no reasonable cause to believe his or her conduct was unlawful.

With respect to derivative actions, our bylaws provide that we shall indemnify any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action or suit by or in the right of our company to procure a judgment in its favor by reason of the fact that he or she is or was a director, officer, employee or agent of our company, or is or was serving at the request of our company as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise against expenses, including amounts paid in settlement and attorneys' fees actually and reasonably incurred by him or her in connection with the defense or settlement of the action or suit if he or she acted in good faith and in a manner which he or she reasonably believed to be in or not opposed to the best interests of our company. We may not indemnify any such person for any claim, issue or matter as to which such person has been adjudged by a court of competent jurisdiction, after exhaustion of all appeals therefrom, to be liable to our company or for amounts paid in settlement to our company, unless and only to the extent that the court in which the action or suit was brought or other court of competent jurisdiction determines upon application that in view of all the circumstances of the case, the person is fairly and reasonably entitled to indemnity for such expenses as the court deems proper.

Edgar Filing: PENGE CORP - Form SB-2

Any indemnification under the provisions described above, unless ordered by a court, may be made by our company only as authorized in the specific case upon a determination that indemnification of the director, officer, employee or agent is proper in the circumstances. The determination must be made:

- o By the stockholders;
- o By the board of directors by majority vote of a quorum consisting of directors who were not parties to the act, suit or proceeding;
- o If a majority vote of a quorum consisting of directors who were not parties to the act, suit or proceeding so orders, by independent legal counsel in a written opinion; or
- o If a quorum consisting of directors who were not parties to the act, suit or proceeding cannot be obtained, by independent legal counsel in a written opinion.

II-1

Our bylaws further provide that the expenses of officers and directors incurred in defending a civil or criminal action, suit or proceeding must be paid by our company as they are incurred and in advance of the final disposition of the action, suit or proceeding, upon receipt of an undertaking by or on behalf of the director or officer to repay the amount if it is ultimately determined by a court of competent jurisdiction that he or she is not entitled to be indemnified by our company.

Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers and controlling persons of the Company pursuant to the foregoing provisions or otherwise, we have been informed that in the opinion of the SEC such indemnification is contrary to public policy as expressed in the Securities Act and is, therefore, unenforceable.
