Trend Micro Reports Record Fourth Quarter Revenue

Fourth Quarter Revenue Grows 57% to (Yen)10,838 Million under Japan GAAP

Tokyo, JAPAN - February 6, 2002 - Trend Micro Incorporated (TSE:4704, Nasdaq:TMIC), a worldwide leader in network antivirus and Internet content security solutions, today announced financial results for the fourth quarter ended December 31, 2001: consolidated net revenue was 10,838 million yen, an increase of 57% from the fourth quarter of FY2000, operating income climbed 51% to 3,916 million yen and ordinary income was up 72% to 4,239 million yen.

If the results were not adjusted in accordance with a new revenue recognition policy, net revenue, operating income and ordinary income would have grown by 77% to 12,247 million yen, 106% to 5,325 million yen and 129% to 5,648 million yen respectively.

"Given the difficult economic conditions faced by the technology sector in general, we are gratified that our innovative products and dedicated employees led to this result", said Steve Chang, CEO of Trend Micro. "We are even more excited to be leaving the year on the strongest possible note with our strongest quarter of the year."

### Summary of Results for the Fourth Quarter of the fiscal year 2001

(in million yen, unaudited)	Three Month Ended December 31,		Change
	2001	2000	
Net sales	10,838	6,903	57%
Operating Income	3,916	2,588	51%
Ordinary Income	4,239	2,461	72%
[not adjusted for the new revenue recognition policy]			
(in million yen, unaudited)	Three Month Ended December 31,		Change
	2001	2000	

Edgar Filing: TREND MICRO INC - Form 6-K

Net sales	12,247	6,903	77%
Operating Income	5,325	2,588	106%
Ordinary Income	5,648	2,461	135%

For the annual results of the fiscal year ended December 31, 2001, the company reported consolidated net revenue of 31,326 million yen, ordinary income of 9,549 million yen and net income of 2,421 million yen.

Summary of Results for the fiscal year 2001

(in million yen)	The Fiscal Year Ended December 31,		Change
	2001	2000	
Net sales	31,326	21,834	43%
Operating Income	9,481	7,443	27%
Net Income	2,421	4,722	-49%

[not adjusted for the new revenue recognition policy]

(in million yen)	The Fiscal Year Ended December 31,		Change
	2001	2000	
Net sales	33,652	21,834	54%
Operating Income	11,807	7,443	59%
Net Income	5,555	4,722	18%

Description of the change of the recognition policy

Until the end of FY 2000, the Company (Japan) and Trend Micro Incorporated (Taiwan) booked revenue for Premium Support and other post-contract customer support services at the beginning of the support period. Effective from FY 2001, the method of recognizing this revenue recognition has been changed and sales revenues from customer support are deferred over the relevant support period. Under Japanese GAAP, Trend Micro is not required to restate its financial statements because of a change in its revenue recognition policy and has chosen not to do so in this case.

Financial Outlook

Trend Micro expects consolidated net revenue for the fiscal year 2002 of 40,000 million yen, ordinary income of 13,000 million yen and net income of 7,300 million yen.

## Edgar Filing: TREND MICRO INC - Form 6-K

For the first quarter of the fiscal year 2002, the company estimates consolidated net revenue will be between 8,500 million yen and 9,100 million yen, ordinary income between 2,300 million yen and 2,700 million yen and net income between 1,300 million yen and 1,500 million yen.

### Highlights of 2001

Exceptional Growth - The IDC named Trend Micro the fastest-growing antivirus vendor and the worldwide leader in server-based antivirus software sales. Specifically, it found Trend Micro to be the global leader in the following segments of the antivirus industry in 2000:

- . #1 in overall server AV market share - 33% market share
- . #1 in Internet gateway AV market share - 63% worldwide market share
- . #1 in groupware AV market share - 31% worldwide market share

New Customers - Trend Micro boosted its Fortune 1000 client base by securing many new enterprise customers, including HSBC, IBM, BMW, Commerzbank Securities, Conoco, Fuji Bank, Mitsubishi Heavy Industries, NEC, Asahi, Sprint, Sony, Colt, Deloitte & Touche, Ogilvy & Mather, and Verizon Wireless, the European Aeronautic Defence and Space Company (EADS) and Pemex. New government and institutional accounts included the US Army, Social Security Administration, Departments of Justice and Transportation, and Census Bureau, the Australian Defence Force, Italy's Ministry of Foreign Affairs, Malaysia's Ministries of Education and Employment, the Tokyo Metro government, City of San Francisco and the National University of Singapore.

Broadband and Wireless Initiatives Trend Micro unveiled GateLock(TM), an all-in-one plug-and-play device for broadband Internet connections offering security against hackers, viruses and other intruders, and released PC-cillin(R) for Wireless 2.0 supporting Palm OS, Microsoft Pocket PC, and Symbian EPOC platforms to help enable secure wireless communications.

Awards and Recognition - Trend Micro enterprise and desktop products continued to gather accolades from numerous publications. ScanMail for Microsoft Exchange and ScanMail eManager were PC Magazine's Editors' Choice for best enterprise email security solution. PC-cillin was named a "must-have" by PC World and an Editor's Choice by Australian PC Magazine; while its Japanese version, Virus Buster, picked up a Best Personal Computer Software Award from Nikkei Business. InterScan(R) VirusWall(R) and eManager were 'Highly Commended' at the Secure Computing Academy Awards 2001. Trend Micro was voted "Best Vendor" by the system integrator

community at VARVision(R) Spring 2001, and HouseCall finished first in a test of online virus scanners for PC World (German edition). Trend Micro also received a US patent for its active content security technology, used in AppletTrap to guard against harmful Java applets and ActiveX controls.

### Notice Regarding Forward Looking Statements

These forward-looking statements include statements regarding our expectations about our earnings for the fiscal year ending December 31, 2002.

Many important factors could cause our actual results to differ materially from those expressed in our forward-looking statements. These factors include:

- Customer acceptance of our new products and services
- The impact of competing products and services
- Difficulties in adapting our products and services to the Internet

## Edgar Filing: TREND MICRO INC - Form 6-K

-Difficulties in addressing new virus and other computer security problems

-The potential lack of attractive investment targets and difficulties unsuccessfully executing our investment strategy

-Declining prices for our products and services

We assume no obligation to update any forward-looking statements.

For more details regarding risk factors relating to our future performance, please refer to our filings with the SEC including our annual report on Form 20-F which was filed on June 29, 2001.

### About Trend Micro

Trend Micro Inc. is a leader in network antivirus and Internet content security software and services. The Tokyo-based Corporation has its North American headquarters in Cupertino, CA, and business units worldwide. Trend Micro products are sold directly, through corporate, value-added resellers and managed service providers. For additional information and evaluation copies of all Trend Micro products, visit [www.antivirus.com](http://www.antivirus.com) or [www.trendmicro.com](http://www.trendmicro.com).

FY 2002	40,000	13,000
Projected consolidated net income per share for the next fiscal year :		55.28 Yen

(2) Projected earnings for the next quarter (January 1, 2002 through March 31, 2002)

	Sales	Ordinary income
	Millions of yen	Millions of yen
1/st/ Qtr	8,500 to 9,100	2,300 to 2,700

(Note) Surrounding environment of Trend Micro Group may change significantly in very short period of time. Therefore, the Company has decided to disclose projected earnings range in a quarterly basis, but the actual earnings may deviate from the projection.

[Supplementary information on the results (January 1, 2001 through December 31, 2001)]

Sales revenues Trend Micro Group are mainly derived from licensing of its products, upgrading of its products and patterns files and post-contract support including customer support. Until December 31, 2000, the Company and Trend Micro Incorporated (Taiwan) had recognized sales revenues from customer support (which was included in post-contract support) at the beginning of the relevant support period. Effective January 1, 2001, the method of the revenue recognition has been changed and sales revenues from customer support are deferred and recorded as Deferred Revenue under current or non-current liabilities over the relevant support period.

## 2. Management policies and results of operations

-----

### Trend Micro Group's Basic Management Policy

Since its founding, Trend Micro has provided "peace of mind" to all users of computer networks and the Internet by offering anti-virus and Internet content security solutions. We currently have the strong impression that needs of the market to be met by Trend Micro has been changing into larger one in accordance with development of the Internet followed by rapid growth of the market scale of business. Such dramatic change tells us that we have to change our current corporate scheme to sell products through a single sales organization to new global corporate scheme to provide value-added services through the Internet and in addition, that even among the corporations to provide value-added services through the Internet while competing to a greater extent in the market, we should aim at provision of high value-added products and services which show high difficulty level for competitors to develop them to enter the market. Upholding the slogan "your Internet VirusWall," we have become a reliable

## Edgar Filing: TREND MICRO INC - Form 6-K

partner to both corporate users and individual customers, working to block computer viruses, SPAM (unwanted e-mail) and Malicious Code (harmful programs created in such programs as JAVA and Active X), as well as to protect users from offensive URLs. We continue to contribute to the development of the networked society in Japan and globally by offering network security solutions and devices. We believe that our ongoing efforts to protect users' computer systems and expand our global client base will lead to an increase in shareholders' value.

### Basic Policy on the Distribution of Profits

Although Trend Micro has steadily increased its profits in the past few years, we believe that the Internet security market has only begun its full-fledged expansion and that our market share has not stabilized in relation to our U.S. competitors. Our larger rivals may well concentrate their management resources to further enlarge their market share. Since our business areas are more concentrated on anti-virus solutions and Internet content security related solutions than other competitors with diversified Internet security solutions, we also face the possibility of larger profit fluctuations in the short term. In this business environment the most critical management challenges are to strengthen our financial structure and management foundation and aggressively develop new business operations in order to maintain our competitiveness in the market. Our priority, therefore, is to accumulate reserves, which means withholding dividends for the time being. Regarding our accumulated reserves, we would like to ask all shareholders to accept our decision to appropriate them for investment in research and development division to be further strengthened in the future by Trend Micro and for activities to improve brand awareness and corporate image.

### Medium and Long-Term Management Strategy

Corporate IT investment has plateaued with the slowdown in North American and

-----  
European economies. Chilled by this decrease in IT investment, the business climate surrounding Trend Micro is not bright. However, we expect network security solutions, including anti-virus measures, to continue gaining in importance, as more and more corporate users become dependent on using networks, and their systems' problems consequently subject them to huge losses, both in financial terms and opportunity costs. Thus the network security market is expected to grow steadily in the medium-to-long term. To take advantage of this opportunity, we are focusing on maintaining our competitive edge against major U.S. rival companies and expanding our global market share. Utilizing our global resources and networks spanning the United States, Europe and Taiwan, we will continue to strengthen our sales channels, improve brand awareness and corporate image and accelerate the development of products that meet customer needs. The IT industry is evolving rapidly in conjunction with its constantly changing technology. The next generation of Internet-related technologies, including broadband, mobile communications and open platforms such as Linux, will likely bring about dramatic changes in the network environment. We must seize the opportunities afforded by this high-paced technological evolution, in advance of our major U.S. competitors, while strengthening our management structure and further increasing our operational efficiency.

### Summary of Consolidated Financial Results for the fiscal year 2001

The fiscal year under review saw a slowdown in demand within the IT industry, primarily the result of declining corporate IT spending in Japan, Europe and the United States. The corporate spending cuts also put the damper on demand for network security solutions, which have been positioned as a high priority in IT investment. According to the survey conducted by U.S. Information Security in October 2001, it reports that due to the decline in economic environment, about one-third of companies to be surveyed freeze investment in network security related products and degree of freeze on the investment is more distinguished in North America.

Although the business environment has been harsh and we expect some ups and

## Edgar Filing: TREND MICRO INC - Form 6-K

downs in the short term, we believe the network security market will enjoy steady growth over the medium and long term, as corporations continue to increase IT investment in advanced networks and the renewal of core business systems. In addition, malicious viruses as a new type of virus expanding serious damages over networks these days and typified by "Code Red" programmed to attack the White House computer systems and "Nimda" including a lot of attack tools have increased their number incurring serious damages to users by automatically attacking users' computer systems after detection of inherent vulnerability included therein on the Internet and further, have much more infectious capacity compared with conventional viruses. To vendors who provide network security related products has been directed further increased demand for more effective products and services than ever before. According to the report by Information-technology Promotion Agency (IPA), also in Japan, the frequency with which viruses appear reported in 2001 resulted in the worst figure, i.e., over two times that of last year, indicating the degree of virus-induced damages growing more seriously, and therefore, the recognition of importance in network security has been enhanced to a large extent in the face of dramatic increase in the number of subscribers to communicate through broadband transmission.

4

During the fiscal FY2001, Trend Micro domestic operations significantly increased contracts for its Virus Buster Corporate Edition (OfficeScan) and "ServerProtect," winning not only large companies but also medium and small companies. Sales of InterScan, our anti-virus software for Internet servers, rose steadily, in response to the more frequent virus infections spread via e-mail. In addition, by releasing a new product "Virus Buster 2002" timely at the time when malicious viruses continuously infected many systems in the second half of the FY2001, we have succeeded in selling package types of products in the retail market achieving substantial increase in sales amount over the figure planned by Trend Micro. Furthermore, for the same reason, also as for our VirusWall E-Mail Service (Internet Outsourcing Service) operations, through which we offer anti-virus solutions as a service, by forming a partnership with ISP (Internet Service Provider) we succeeded in establishing the way to offer such services via major ISPs, such as @Nifty and OCN, and thus we continue to rapidly increase the number of our contracted customers.

In the phase of deployment of our business operations in North America and Europe, anti-virus products, such as "InterScan" series and "ScanMail" series, used in higher layers of hierarchy of the network mainly contributed to the steady growth in sales of the products for relatively large-sized corporate users. As a highly specialized anti-virus solutions provider, we have pioneered post-contract support services, called "Premium Support," introducing them before our major competitors in the industry. This service is in response to the trend among large corporate users to select a vendor based not only on the performance of its anti-virus software but also on the quality of support the vendor offers during the license period to swiftly alert customers to new viruses. In addition, in response to the growing needs for anti-virus measures against attack to storage systems in the network, two products, "ServerProtect for EMC Celerra" and "ServerProtect for Network Appliance," have joined our product lineup as a new product of "ServerProtect" series.

Security appliance server business for medium and small companies, which had been handled by our subsidiary ipTrend Incorporated, did not bring about the result to be achieved in building a solid client base of medium and small companies because of the harsh economic environment surrounding medium and small companies of Japan. IpTrend's Linux and Unix hardware-related technology has played an important role in the development of our next-generation anti-virus product for consumers, GateLock, and continues to be a crucial part of our group. However, the company's ipStax security appliance server business for small- and medium-sized companies urgently needed a restructuring review. We decided to dissolve ipTrend and integrate its operations into Trend Micro, while

## Edgar Filing: TREND MICRO INC - Form 6-K

strategically reorganizing its operations and utilizing its technology in our anti-virus products. This integration and reorganization resulted in our writing off the entire goodwill of 2,000 million yen as a one-time amortization charge during the first half of FY2001. This goodwill had been recognized as a portion of the purchase price when we acquired ipTrend (formerly Nippon Unisoft).

Starting with the first quarter of FY2001, Trend Micro (Japan) and Trend Micro Incorporated (Taiwan) changed their accounting method for revenues from post-contract support services. Sales revenues for these services had been booked at the beginning of the support period; the new method defers the recognition of sales revenues from support services and recognizes as revenue over the support period. This new accounting treatment will reflect these transactions more accurately, and has been applied to all our financial filings with the Securities and Exchange Commission (SEC), including our Form 20-F filing, which was submitted on June 29, 2001. The conversion to deferred revenue recognition resulted in an extraordinary loss of 3,009 million yen for our half-year results.

During the fiscal year 2001, Trend Micro posted consolidated sales of 31,326 million yen, an increase of 43.5 percent over the last year. Consolidated ordinary income increased 30.4 percent to 9,549 million yen, while net income decreased 48.7 percent to 2,421 million yen.

(Sales in all geographical areas grew steadily during the first half of FY2001.) Sales in Japan posted an increase of 81.6 percent to 19,029 million yen, while operating income from these sales rose to 13,299 million yen, up 112.1 percent from the comparable period in FY2000. U.S. sales increased 41.3 percent to 11,107 million yen, with operating income totaling 1,070 million yen, a 58.8 percent decrease. In Europe, sales increased 61.5 percent to 6,881 million yen, and operating income decreased 65 percent to 532 million yen. Taiwan sales increased 48.1 percent to 4,184 million yen, and operating loss resulted 143 million yen from the previous period. Other areas posted combined sales of 1,979 million yen, a 54.8 percent increase, and operating income of 171 million yen, down 53.1 percent.

### Prospects for next period

-----

We expect the economies of Japan, Europe and the United States to continue their sluggish performance in 2002, further restraining corporate spending on IT. Our industry seriously suffered from expanded damages incurred by new type of viruses such as "Code Red" and "Nimda" last year, and even the company, which already had introduced and was running the network security related products, reported receiving frequent damages incurred by sophisticated polymorphic attacks by those new viruses having strong infecting power. Therefore, when selecting a network security product vendor, in addition to a quality of products, corporate users now are directing their eyes to an ability to show competitive edge against rival vendors in offering a total solution, which includes such critical elements as a quick and effective support and an effective system integration of the vendor's products and other network security products such as a firewall or an IDS (Intrusion Detection System: anti-unauthorized access system). Naturally, our competitors will likely well concentrate their management resources to provide new products and services to obtain such competitive edge. In consideration of those circumstances surrounding our company, we have decided to continuously expand and strengthen our operational resources in developing products and supporting users to meet customer needs in advance of competitors, powered by our competitive edge as a highly specialized provider to offer anti-virus content security solutions and strong partnerships with main vendors who provide network security products for other fields, such as firewall and IDS. Furthermore, we have determination to concentrate our management resources to further enlarge our share in each market by making effort to provide our products and services broader than ever

Edgar Filing: TREND MICRO INC - Form 6-K

5

before in the market for medium and small companies and the retail market, and offering more sophisticated solutions in the market for large-sized companies. As for our business development in the North American market, we have decided to newly enter the retail market and at the same time strengthen marketing activities to improve brand awareness and corporate image followed by expansion of customer base from leading medium-sized companies to small- and medium-sized companies. With respect to our business strategy for the European market, we will also strengthen marketing activities, as will be done in the North American market, to improve brand awareness and corporate image to increase our share mainly in the market for leading companies. Furthermore, we will accelerate operational efficiency and integration throughout our European business sites while strengthening our sales channels to maintain and further increase corporate growth rate.

The above-stated commitments make us forecast the following consolidated operating results for FY2002:

Projections for FY 2002 (January 1, 2002 through December 31, 2002)

-----  
 Consolidated sales: 40,000 million yen (+ 27.7 %)  
 Consolidated ordinary income: 13,000 million yen (+ 36.1 %)  
 Consolidated net income: 7,300 million yen (+ 201.5 %)

Projections for the first quarter of FY2002 (January 1, 2002 through March 31, 2002)

-----  
 Consolidated sales: 8,500 million yen to 9,100 million yen  
 Consolidated ordinary income: 2,300 million yen to 2,700 million yen  
 Consolidated net income: 1,300 million yen to 1,500 million yen

Earnings projections are calculated based on estimated major currency exchange rates of \$1 = 130 yen and 1 EUR = 110 yen.

We would be very grateful if all shareholders could accept our decision to defer distribution of profits of FY2002 following the previous fiscal year and appropriate our accumulated reserves for research/development division and marketing activities to improve brand awareness and corporate image in the North American market, and for promotion of activities to sell new product "GateLock" in Japan and North America, in order to maintain and strengthen our competitiveness against U.S. rival companies in the market.

#### 4. Accounting policies and practices

##### (1) Valuation of significant assets

##### (1) Securities

##### Other securities:

##### Other securities with fair market value:

The securities are stated at the market value method based on the value at the end of the period (valuated differences are recognized in equity directly, not to reflect to net earnings and cost of selling is determined by the weighted average method.)

##### Other securities without a market value:

The securities are stated at the weighted average cost.

##### (Additional information)

Effective January 1, 2001, the company began to apply "Accounting Standard for financial instruments" ((Argument of establishment for Accounting Standard for Financial Instruments") Business Accounting Deliberation Council, January 22, 1999)) for the financial instruments. Cumulative effect of change in this accounting principle are resulted in increase of ordinary income by 77,483 thousand yen and income before taxes by 772,483,282 thousand yen. In addition, the change of classification resulted in decrease of other securities in "Investment in securities" by 25,362 thousand yen and "Deferred tax assets" of 10,664 thousand yen was recognized. As a result, -14,697 thousand yen of "Valuated difference on other securities" is recognized under Shareholders equity (The difference from 21,735 thousand yen disclosed on the consolidated balance sheet is caused by the translation of security in foreign currencies).

Finally, the company evaluated Other securities owned for holding purposes at the beginning of fiscal year. The company changed classification of such securities included in Current assets to Investment in securities.

## Edgar Filing: TREND MICRO INC - Form 6-K

This change in classification resulted in decrease of Marketable securities under Current assets and in increase of Investment in securities by 1,872,475 thousand yen.

### (2) The transaction of derivatives

The market value method

(Additional information)

For the financial instruments, "Accounting Standard for financial instruments" ((Argument of establishment for Accounting Standard for Financial Instruments") Business Accounting Deliberation Council, January 22, 1999)), is applied from the current consolidated fiscal year.

This change has resulted in decrease of "Ordinary income" by 11,986 thousand yen and "Income before taxes".

### (3) Inventories

Finished goods - Raw materials - Supplies -  
Finished goods, raw materials and supplies are stated at the weighted average cost.  
In Trend Micro Incorporated (Taiwan) and Trend Micro Inc. (U.S.A), such inventories are stated at the cost being determined by the first-in-first-out method.

Work in process and Expense for Finished Goods  
Work in process and Expense for finished goods are stated at the cost being determined by accumulated production and development cost for individual projects.

13

### (2) Depreciation and amortization

#### (1) Property and equipment

Parent company and domestic consolidated subsidiaries  
Depreciation is computed by declining-balance method

Foreign consolidated subsidiaries -

Depreciation is computed by a straight-line method

#### (2) Intangibles

Parent company and domestic consolidated subsidiaries  
(Software for sale)

Straight-line method over the estimated useful life

(Software for internal use)

Straight-line method over the estimated useful life

(Other intangibles)

Straight-line method

\*Foreign consolidated subsidiaries

# Edgar Filing: TREND MICRO INC - Form 6-K

(Software for internal use)  
Straight-line method over the estimated economic

(3) Accounting for significant deferred assets      Issuing costs of stocks and bonds are changed to expense

(4) Accounting policies for significant provisions      (1) Allowance for doubtful accounts

As contingency against losses from default of notes, allowance for doubtful accounts is provided. The amount is a percentage based on own actual doubtful account loss amount, which takes into consideration the possible liabilities.

(Additional information)  
From the current consolidated fiscal year, the company adopted "Standards for financial instruments" ((Argument of "Standard for Financial Instruments") Business Accounting Standards, January 22, 1999)) for the accounting of Allowance for doubtful accounts. The adoption had no significant effect.

(2) Allowance for sales return  
In order to reserve future losses from sales return, allowance for sales return is provided based on sales return.

14

(3) Allowance for retirement benefits

In order to reserve future losses from retirement benefits for employees, allowance for retirement benefits is provided at the end of the period under the current accounting policy. The change in accounting policy is recognized as an expense under the current accounting policy.

(Additional Information)  
From the current consolidated fiscal year, the company adopted "Accounting Standards for Retirement Benefits" ((Argument of "Establishment of Retirement Benefits Obligations") Retirement Benefits Obligation Deliberation Council, June 1999). The adoption resulted in an increase in expense by 168,807 thousand yen, a decrease in income by 48,042 thousand yen, and an increase in taxes by 167,119 thousand yen. Severance costs, which was 167,119 thousand yen in the year, is included and disclosed in the consolidated financial statements.

The effect on segment information is as follows:

Edgar Filing: TREND MICRO INC - Form 6-K

information).

- (5) Translation of major foreign-currency assets and liabilities into Yen

Foreign-currency financial receivables into yen at the spot rate effective at the end of the period. Exchange differential is treated as a profit/loss adjustment under Shareholders' equity.

(Additional information)

From the current consolidated fiscal year, the Company adopted the new accounting standards for foreign currency translation, which are based on the Revision of Accounting Standards for Foreign Currency Translation issued by Business Accounting Deliberation Council. The adoption had no significant effect on the Company's financial statements.

- (6) Accounting for leased assets

Finance leases without transfer of ownership are accounted for in the same manner as operating leases.

- (7) Accounting for consumption tax

Transactions subject to consumption tax are recorded net of the related consumption tax.

15

- (8) Accounting treatment for stock warrants and stock option granted to directors and some employees under the Company's incentive plan

The parent company and its subsidiaries have adopted the accounting policy for stock warrants and stock options which warrants to purchase directors and some employees' shares. Under these plans, the parent company issued stock warrants and immediately repurchased all of the warrants. In addition, our U.S. subsidiary adopted an incentive plan for directors and employees, that were transferred to a special purpose vehicle for the benefit of shareholders, and from the current fiscal year, based on the compensation plan of stock option (subscription plan) for certain employees of the company and subsidiaries to encourage entrepreneurship on the Industrial Revitalization Special Incentive Plan for certain directors and employees (these three plans are collectively referred to as "stock option plan").

The total compensation cost under the stock option plan is the difference between the quoted market price of the parent company's shares at the first date on which both the number of shares to receive and the exercise price are known (normal exercise price) and the exercise price and is recognized as expense over the exercise period. The warrant portion of the bonds with detachable warrants under the stock option plan is recorded as "warrant account" in current assets and eliminated upon repurchasing the warrants. The accounting policy on compensation cost is the same as that of the parent company. For the purpose of unification of accounting policies and results of operation as a group more accurately reflecting the consolidation of parent company and its subsidiaries, the financial statements have been adjusted through consolidation.

The adjustment of the parent company's financial statements in the process of consolidation, resulted in an increase in net income and income before taxes of 293,655 thousand yen each year and after tax of 170,173 thousand yen.

## Edgar Filing: TREND MICRO INC - Form 6-K

In addition, the balance of consolidated retained earnings at the end of the consolidated fiscal year is increased by 582,309 thousand yen.

(9) Change in revenue recognition method for Post Contract Customer Support Service (PCS)

Basically, The product license agreement, which the subsidiaries contract with the end-user, states the support and upgrading of products and its pattern for the period of the contract. Until previous consolidated fiscal year, whole revenue of PCS of Trend Micro Incorporated (Taiwan) applied to each product. In the current consolidated fiscal year, the revenue of PCS has changed as follows. Portion of PCS revenue is recognized as total revenue and it is deferred as Deferred revenue as Non-current liabilities based on contracted period. The revenue is recognized for the contracted period evenly.

As per the tendency of the parent company and Trend Micro, the ratio of the consideration of Post Contract Customer Support Service is higher than as before. As the result of the above, the company has changed the revenue recognition policy on PCS, in order to recognize profit more accurately. On the other hand, there is no change for subsidiaries in USA and Europe, the policy has been maintained over for those subsidiaries.

16

According to the above change, the effect on consolidated revenue (yen), which should be deferred by the subsidiary as of the beginning of the current fiscal year to the prior year's revenues, is an adjustment under Unusual losses. The effect of change in method results in an increase of ordinary income, Ordinary income 2,326,533 thousand yen, and a decrease of taxes by 5,335,545 thousand yen.

The effect on segment information (Information).

In order for the warrants to be granted or transferred to the directors and certain employees of the Company and the directors and certain employees of the affiliated company, the Company issued unsecured bonds with detachable warrants. Under section 341-8-4 of the Business Law, the redemption and retirement of these bonds are restricted when total amount of bonds is less than the total amount of issue price of the stocks from unexecuted warrants. To reduce interest costs, the Company repurchased a part of the issued bonds after warrants were detached. The purpose of the repurchase is to hold the treasury bonds until they can be retired legally and it is same as the redemption substantially.

Thus, bonds and treasury bonds are disclosed in net amount in the balance sheet as follows. The difference between the repurchased price and book value of the treasury bonds at the time of transaction are booked as loss on repurchase of treasury bonds in the unusual loss section.

(Contract or Notional amount, FMV and Valuation gain/loss of Derivatives)

1. Basic policies for derivatives transactions.

A corporate policy of Trend Micro Group does not engage in derivative transactions. However, the interest cap trading and the interest rate swap had been made by ipTrend Incorporated (Tokyo, Chuo-ku), before the company acquisition. (Due to business transfer to Trend Micro in the current fiscal year, Trend Micro Inc. has been transferred the interest cap trading and the interest rate swap.) Trend Micro Group has no intention of changing, so there will no newly derivative transactions in future. These transactions had been made to avoid risks for interest rate fluctuation. The borrowing applied to the hedge was paid completely, when ipTrend Incorporated became a consolidated subsidiary. The contractor for the interest cap trading and the interest rate swap is the financial institution, which is trustworthy institution. No expectation is required for future losses because of any defaults. In addition, these transactions have a risk related to rate changing, but there is no significant effect for the company business. The contract amount of "Fair market value of the derivative transaction" doesn't show the amount of risks on the derivative market.

2. Fair market value of the derivative transaction

- (Note) 1. The amount of option premium is stated in [ ] and the fair market value of it and Appraisal gain (loss) are stated on the above.  
 2. Fair market value is determined based on the price, which is provided by the contractor of the financial institute.

27

(Employee Benefit Plans)

1. Basic policy of employee benefit plans

The company and consolidated subsidiaries adopt retirement benefit plan, as defined-benefit plan. Also, the company has been a member of Tokyo Small Computer Software Industry Welfare pension plan.

2. Projected Benefit Obligation information (as of December 31, 2001)

	(Thousands of yen)
(1) Projected Benefit Obligation	420,118
(2) Plan assets	(57,843)
-----	
(3) Funded status (1) + (2)	362,274
(4) Unrecognized prior service cost	(23,999)
(5) Unrecognized net actuarial gain/loss	(25,192)
-----	
(6) Accrued benefit cost (3) + (4) + (5)	313,082
=====	

- (Note) 1. Tokyo Small Computer Software Industry Welfare pension plan that the company has joined is a synthetic-type, so it is impossible to calculate efficiently for an amount of plan asset compared to a contribution.

Therefore, the amount of contribution of pension fund in the amount of 53,237 thousand yen is recognized as retirement benefit cost. The plan assets for the contribution of pension fund in the amount of 325,791 thousand yen is calculated based on the ratio of members for the organization concerned.

2. For calculation of projected benefit obligation, the company adopts simplified method to subsidiaries that have no significant effect.

3. Component of net periodic benefit cost (From January 1, 2001 to December 31, 2001)

	(Thousands of yen)
(1) Service cost	108,162
(2) Interest cost	11,114
(3) Expected return on plan assets	(2,705)

Edgar Filing: TREND MICRO INC - Form 6-K

(4) Amortization of unrecognized transition obligation	119,077
(5) Amortization of prior service cost	1,142
(6) Recognized actuarial loss	789
-----	
(7) Net periodic benefit cost	237,579
=====	

(Note 1) The company deducts employees' contribution to welfare pension plan.

(Note 2) Service cost includes pension costs of subsidiaries under simplified method.

4. Basis of projected benefit obligation calculation

Basis of projected benefit obligation calculation of the company and Taiwan subsidiary that adopt principle method are as follows. Subsidiaries, except Taiwan, do not recognize transition obligation.

(1) Method of allocation of estimated pension cost	Straight line method
(2) Discount rate	3.0 - 6.0%
(3) Expected long-term return rate on plan assets	6.0%
(4) Estimated life of actuarial loss	1 - 23 years
(5) Estimated life of transition obligation	one year
(6) Estimated life of prior service cost	24 years

(Significant Subsequent events)

None

2,631 shares (FY 2000)

[Supplementary information on the results (January 1, 2001 through December 31, 2001)]

The Company's sales revenues are mainly derived from licensing of its products, upgrading of its products and patterns files and post-contract support including customer support. Until December 31, 2000, the Company had recognized sales revenues from customer support (which was included in post-contract support) at the beginning of the relevant support period. Effective from January 1, 2001, the method of the revenue recognition has been changed and sales revenues from customer support are deferred and recorded as Deferred Revenue under current liabilities or non-current liabilities over the relevant support period.

For convenience of comparison, actual current fiscal year result, assumed result based on the old accounting policies and their differentials are stated in the below.

(Millions of yen except for per share information)

Result of the FY2001	Assumed result of FY2001 (based on Accounting policies applied until previous fiscal year)
----------------------	--

Edgar Filing: TREND MICRO INC - Form 6-K

	Millions of yen	Millions of yen

\*5 Treasury bonds

In order for the warrants to be granted or transferred to the directors and certain employees of the Company and the directors and certain employees of the affiliated company, the Company issued unsecured bonds with detachable warrants. Under section 341-8-4 of the Business Law, the redemption and retirement of these bonds are restricted when total amount of bonds is less than the total amount of issue price of the stocks from unexecuted warrants. To reduce interest costs, the Company repurchased a part of the issued bonds after warrants were detached. The purpose of the repurchase is to hold the treasury bonds until they can be retired legally and it is same as the redemption substantially. Thus, bonds and treasury bonds are disclosed in net amount in the balance sheet as follows. The difference between the repurchased price and book value of the treasury bonds at the time of transaction are booked as loss on repurchase of treasury bonds in the unusual loss section.
