SECURITIES AND EXCHANGE COMMISSION**
WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934**

For the quarterly period ended June 30, 2011

OR

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934**

For the transition period from _____ to _____
Commission File Number 1-9753

GEORGIA GULF CORPORATION

(Exact name of registrant as specified in its charter)

DELAWARE
(State or other jurisdiction of
incorporation or organization)

58-1563799
(I.R.S. Employer
Identification No.)

115 Perimeter Center Place, Suite 460,
Atlanta, Georgia
(Address of principal executive offices)

30346
(Zip Code)

(Registrant's telephone number, including area code) **(770) 395-4500**

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Edgar Filing: GEORGIA GULF CORP /DE/ - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

(Do not check if a
smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Class	Outstanding as of August 2, 2011
Common Stock, \$0.01 par value	34,238,535

Notes to Unaudited Condensed Consolidated Financial Statements

1. BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. The accompanying unaudited condensed consolidated financial statements reflect all of the adjustments that, in the opinion of management, are necessary to present fairly the financial position, results of operations and cash flows for the interim periods reported. Such adjustments are of a normal, recurring nature. Our financial condition as of, and our operating results for the three and six month periods ended, June 30, 2011 are not necessarily indicative of the financial condition and results that may be expected for the full year ending December 31, 2011 or any other interim period.

On February 9, 2011, we acquired Exterior Portfolio by Crane ("Exterior Portfolio"), a leading U.S. manufacturer and marketer of siding products, for a net purchase price of \$71.6 million. The preliminary allocation of the net purchase price and results of Exterior Portfolio's operations are reflected in our condensed consolidated financial statements since that date. The purchase price allocation is preliminary and is subject to, among other things, the final valuation of assets acquired and liabilities assumed, and may be adjusted within twelve months of the closing date of the acquisition.

The accompanying unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes to audited consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2010 (the "2010 Annual Report"). There have been no material changes in the significant accounting policies followed by us during the three and six month periods ended June 30, 2011 from those disclosed in the 2010 Annual Report.

2. NEW ACCOUNTING PRONOUNCEMENTS

In December 2010, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2010-29 which amends Accounting Standards Codification ("ASC") topic 805 *Business Combination*. The amendments in this update specify that if a public entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combination that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period only. The amendments in this update also expand the supplemental pro forma disclosures under Topic 805 to include a description of the nature and amount of material, nonrecurring pro forma adjustments related directly to the business combination included in the pro forma revenue and earnings. ASU 2010-29 is effective prospectively for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2010. Early adoption is permitted. Implementation of this standard did not have a material impact on our financial statements.

In May 2011, the FASB issued ASU 2011-04, which amends ASC topic 820, *Fair Value Measurements and Disclosures*, to achieve common fair value measurement and disclosure requirements under U.S. Generally Accepted Accounting Principles ("GAAP") and International Financial Reporting Standards ("IFRS"). This standard gives clarification for the highest and best use valuation concepts. The ASU also provides guidance on fair value measurements relating to instruments classified in

Table of Contents

Georgia Gulf Corporation and Subsidiaries

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

2. NEW ACCOUNTING PRONOUNCEMENTS (Continued)

stockholders' equity and instruments managed within a portfolio. Further, ASU 2011-04 clarifies disclosures for level 3 securities that require companies to provide quantitative information about unobservable inputs used, the sensitivity of the measurement to changes in those inputs, and the valuation process used by the reporting entity. Early adoption is not permitted. Implementation of this standard will be effective in the first fiscal year beginning after December 15, 2011.

In June 2011, the FASB issued ASU 2011-05, which amends ASC topic 220, *Comprehensive Income*. This amendment gives companies the option to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. The entity is also required to present on the face of the financial statements reclassification adjustments for items that are reclassified from other comprehensive income to net income. Entities will no longer be allowed to present the components of other comprehensive income as part of the statement of changes in stockholders' equity. Early adoption is permitted. Implementation of this standard will be effective in the first fiscal year beginning after December 15, 2011. We have historically presented the components of other comprehensive income as a part of the consolidated statements of changes in stockholders' equity (deficit) or in a separate footnote. We are currently evaluating the newly prescribed disclosure and financial statement presentation options.

3. RESTRUCTURING ACTIVITIES

In the fourth quarter of 2008, we initiated a restructuring plan (the "Fourth Quarter 2008 Restructuring Plan") that included the permanent shut down of our 450 million pound polyvinyl chloride ("PVC") manufacturing facility in Sarnia, Ontario, the exit of a recycled PVC compound manufacturing facility in Woodbridge, Ontario, the consolidation of various manufacturing facilities, and elimination of certain duplicative activities in our operations. In connection with the Fourth Quarter 2008 Restructuring Plan, we incurred costs related to termination benefits, including severance, pension and postretirement benefits, operating lease termination costs, asset impairment charges, relocation and other exit costs and have recognized these costs in accordance with ASC subtopic 420-10 *Exit or Disposal Cost Obligations* and related accounting standards. For the three months and six months ended June 30, 2011, we incurred and paid nil and \$0.6 million related to the settlement of pension and postretirement benefits from our permanently shut down PVC manufacturing facility in Sarnia. For the three and six months ended June 30, 2010, we incurred \$0.5 million in restructuring expenses and a recovery of \$0.3 million, respectively, related to the Fourth Quarter 2008 Restructuring Plan primarily due to reversal of remediation costs that did not have to be incurred or reimbursed by us. This amount is noted as a reduction in the additions column in the table noted. In addition, for the three and six months ended June 30, 2010, we incurred nil and \$0.1 million in long-lived asset impairment charges, respectively. We do not expect there to be any further future costs associated with the Fourth Quarter 2008 Restructuring Plan. During the three months ended June 30, 2011, we incurred a recovery of \$1.2 million related to the sale of manufacturing equipment associated with a prior restructuring plan to shut down a PVC manufacturing facility in Oklahoma. This recovery is included in restructuring (income) expense in the condensed consolidated statements of income for the three and six months ended June 30, 2011. This recovery is included in the tables below as income in the additions column and as a receivable reclassified out of the ending balance column in the foreign exchange and other adjustments column for the periods presented.

Table of Contents**Georgia Gulf Corporation and Subsidiaries****Notes to Unaudited Condensed Consolidated Financial Statements (Continued)****3. RESTRUCTURING ACTIVITIES (Continued)**

In May 2009, we initiated plans to further consolidate plants in our window and door profiles business (included in the "Other" row in the table below). As a result we incurred restructuring costs, including fixed asset impairment charges, termination benefits and other exit costs which have been recognized in accordance with ASC subtopic 420-10 and related accounting standards. For the three and six months ended June 30, 2011, there were no additional restructuring charges. For the three and six months ended June 30, 2010, we incurred nil and \$0.4 million of additional restructuring expenses, respectively, which are included in the table below. We do not expect there to be any further future costs associated with this plan.

In May 2011, in conjunction with our integration strategy for Exterior Portfolio, we simplified some redundant selling, general & administrative functions. As part of this initiative the company completed a restructuring and consolidation plan within the siding business to optimize the organizational structure, which resulted in \$0.4 million of restructuring costs being incurred for the three and six months ended June 30, 2011, which are included in the table below in the Other row. We continue to evaluate and execute plans to integrate the Exterior Portfolio acquisition into our operations.

A summary of our restructuring activities by reportable segment for the three and six months ended June 30, 2011 and 2010 is as follows:

4. INVENTORIES

The major classes of inventories were as follows:

(In thousands)	June 30, 2011	December 31, 2010
Raw materials	\$ 160,360	\$ 98,815
Work-in-progress and supplies	6,521	5,104
Finished goods	202,262	157,316
Inventories	\$ 369,143	\$ 261,235

5. PROPERTY, PLANT AND EQUIPMENT, NET

Property, plant and equipment consisted of the following:

(In thousands)	June 30, 2011	December 31, 2010
Machinery and equipment	\$ 1,434,546	\$ 1,395,455
Land and land improvements	92,318	89,042
Buildings	210,352	201,228
Construction-in-progress	30,265	21,573
Property, plant and equipment, at cost	1,767,481	1,707,298
Accumulated depreciation	(1,103,608)	(1,054,161)

Property, plant and equipment, net	\$	663,873	\$	653,137
------------------------------------	----	----------------	----	---------

Table of Contents**Georgia Gulf Corporation and Subsidiaries****Notes to Unaudited Condensed Consolidated Financial Statements (Continued)****6. OTHER ASSETS, NET**

Other assets, net of accumulated amortization, consisted of the following:

(In thousands)	June 30, 2011	December 31, 2010
Advances for long-term purchase contracts	\$ 40,177	\$ 49,204
Investment in joint ventures	8,261	9,691
Debt issuance costs, net	22,541	21,926
Assets held for sale	14,151	14,151
Other	10,728	9,106
Total other assets, net	\$ 95,858	\$ 104,078

The decrease in Advances for long-term purchase contracts is the result of amortizing the prepayments usage over the terms of the related contracts. The amortization of these costs is reflected as other non-cash items in the accompanying unaudited condensed consolidated statement of cash flows.

7. GOODWILL AND OTHER INTANGIBLE ASSETS

In February 2011 we acquired Exterior Portfolio which is now part of our building products segment. We have performed preliminary estimates of the fair market value of the acquired assets and liabilities and a related allocation of the net purchase price to goodwill and other intangible assets as follows: \$24.1 million customer relationships, \$6.0 million technology, \$4.3 million trade names and the residual \$2.9 million was attributed to goodwill. These allocations are preliminary and are subject to, among other things, the final valuation of the assets acquired and liabilities assumed and may be adjusted within twelve months of the closing date of this acquisition.

Goodwill. The following table provides the detail of the changes made to goodwill by reportable segment during the six months ended and as of June 30, 2011 and as of December 31, 2010.

(In thousands)	Chlorovinyls	Building Products	Total
Gross goodwill at December 31, 2010	\$ 245,266	\$ 152,058	\$ 397,324

Net goodwill at June 30, 2011	\$ 193,246	\$ 22,743	\$ 215,989

Table of Contents**Georgia Gulf Corporation and Subsidiaries****Notes to Unaudited Condensed Consolidated Financial Statements (Continued)****7. GOODWILL AND OTHER INTANGIBLE ASSETS (Continued)**

Indefinite lived intangible assets. At June 30, 2011 and December 31, 2010 our indefinite-lived assets consisted of trade names. The following table provides the indefinite-lived intangible assets by reporting segment as of June 30, 2011 and December 31, 2010.

(In thousands)	Chlorovinyls	Building Products	Total
Balance at December 31, 2010	\$ 372	\$ 4,247	\$ 4,619
Additions to trade names at June 30, 2011		4,300	4,300
Foreign currency translation adjustment	12	65	77
Balance at June 30, 2011	\$ 384	\$ 8,612	\$ 8,996

Finite-lived intangible assets. At June 30, 2011 and December 31, 2010, we also had customer relationship and technology intangible assets that relate to our building products segment. As noted above, an additional \$24.1 million was attributed to customer relationships and \$6.0 million to technology and those amounts are included in the June 30, 2011 building products segment balances relating to the preliminary allocation from the Exterior Portfolio acquisition.

(In thousands)	Building Products
Gross carrying amounts at June 30, 2011:	
Customer relationships	\$ 35,522
Technology	17,867
Total	53,389
Accumulated amortization at June 30, 2011:	
Customer relationships	(5,911)
Technology	(7,370)
Total	(13,281)
Foreign currency translation adjustment and other at June 30, 2011:	
Customer relationships	(1,685)
Technology	
Total	(1,685)
Net carrying amounts at June 30, 2011:	
Customer relationships	27,926
Technology	10,497
Total	\$ 38,423

7. GOODWILL AND OTHER INTANGIBLE ASSETS (Continued)

(In thousands)	Building Products
Gross carrying amounts at December 31, 2010:	
Customer relationships	\$ 11,422
Technology	11,867
Total	23,289
Accumulated amortization at December 31, 2010:	
Customer relationships	(5,199)
Technology	(6,674)
Total	(11,873)
Foreign currency translation adjustment and other at December 31, 2010:	
Customer relationships	(1,684)
Technology	
Total	(1,684)
Net carrying amounts at December 31, 2010:	
Customer relationships	4,539
Technology	5,193
Total	\$ 9,732

The weighted average estimated useful life for the customer relationships is approximately 16 years. Technology has a weighted average estimated useful life of approximately 7 years. Amortization expense for the finite-lived intangible assets was \$0.8 million and \$0.3 million for the three months ended June 30, 2011 and June 30, 2010, respectively. For the six months ended June 30, 2011 and June 30, 2010, the amortization expense was \$1.4 million and \$0.5 million, respectively. Total finite-lived intangible assets estimated annual amortization expense for the next five fiscal years is approximately \$3.3 million per year.

8. LONG-TERM DEBT

Long-term debt consisted of the following:

(In thousands)	June 30, 2011	December 31, 2010
Senior secured ABL revolving credit facility due 2016	\$ 110,628	\$
9.0% senior secured notes due 2017	497,268	497,085
7.125% senior notes due 2013		8,965
9.5% senior notes due 2014		13,162
10.75% senior subordinated notes due 2016	41,440	41,412
Lease financing obligation	115,867	112,385

Other	16,929	16,933
Total debt	782,132	689,942
Less current portion	(37,557)	(22,132)
Long-term debt	\$ 744,575	\$ 667,810

Table of Contents

Georgia Gulf Corporation and Subsidiaries

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

8. LONG-TERM DEBT (Continued)

The senior secured asset-based revolving credit facility (the "ABL Revolver") provides for a maximum of \$300 million of revolving credit through January 2016, subject to borrowing base availability, including sub-limits for letters of credit and swing line loans. The borrowing base is equal to specified percentages of our eligible accounts receivable and inventories, less other reserves reasonably determined by the co-collateral agents. The borrowings under the ABL Revolver are generally secured by substantially all of our assets.

On January 14, 2011, we entered into an amendment to the ABL Revolver. The amendment extended the maturity date of the ABL Revolver by two years to January 13, 2016, eliminated the \$15 million availability block, reduced the unused commitment fees, reduced the applicable margins for borrowings under the ABL Revolver and amended the average excess availability amounts to which those margins apply.

The weighted average interest rate on borrowings under the ABL Revolver was 4.2 percent and 5.1 percent as of June 30, 2011 and December 31, 2010, respectively. In addition to paying interest on outstanding principal under the ABL Revolver, we are required to pay a commitment fee in respect of the unutilized commitments and we must also pay customary letter of credit fees equal to the applicable margin on London Interbank Offered Rate ("LIBOR") loans and agency fees.

The ABL Revolver requires that if excess availability is less than \$45 million, we must maintain a minimum fixed charge coverage ratio of 1.10 to 1.00. At June 30, 2011 and December 31, 2010 excess availability was \$173.2 million and \$264.8 million, respectively. In addition, the ABL Revolver includes affirmative and negative covenants that, subject to significant exceptions, limit our ability and the ability of our subsidiaries to, among other things: incur, assume or permit to exist additional indebtedness or guarantees; incur liens; make investments and loans; pay dividends, make payments or redeem or repurchase capital stock; engage in mergers, acquisitions and asset sales; prepay, redeem or purchase certain indebtedness; amend or otherwise alter terms of certain indebtedness; engage in certain transactions with affiliates; and alter the business that we conduct.

If at any time the aggregate amount of outstanding loans, unreimbursed letter of credit drawings and undrawn letters of credit under the ABL Revolver exceeds the lesser of (i) the commitment amount and (ii) the borrowing base, we will be required to repay outstanding loans and cash collateralize letters of credit in an aggregate amount equal to such excess, with no reduction of the commitment amount. If the amount available under the ABL Revolver is less than \$60.0 million for a period of three consecutive business days or certain events of default have occurred, we will be required to deposit cash from our material deposit accounts (including all concentration accounts) daily in a collection account maintained with the administrative agent under the ABL Revolver, which will be used to repay outstanding loans and cash collateralize letters of credit.

At June 30, 2011 and December 31, 2010, we had \$110.6 million and nil in outstanding principal borrowed under the ABL Revolver and had outstanding letters of credit totaling \$16.2 million and \$20.2 million, respectively. On April 4, 2011, we redeemed all of our 7.125% Senior Notes due 2013 and 9.5% Senior Notes due 2014 that remained outstanding for the aggregate principal amount of \$22.2 million. In connection with the redemption of these notes, we incurred a \$1.1 million loss during the three months ended June 30, 2011 comprised of fees and unamortized discounts. In addition, our other note payable of \$16.9 million is due in January 2012, and over the next twelve months, we expect to repay approximately \$20.6 million of borrowings under our ABL Revolver. Therefore, we have classified these debts as current in our consolidated balance sheet as of June 30, 2011.

Table of Contents**Georgia Gulf Corporation and Subsidiaries****Notes to Unaudited Condensed Consolidated Financial Statements (Continued)****8. LONG-TERM DEBT (Continued)**

On December 22, 2009, we issued \$500.0 million principal amount of 9.0 percent senior secured notes that are due in 2017. Interest on these notes is payable January 15 and July 15 of each year. On or after January 15, 2014, we may redeem the notes in whole or in part, initially at 104.5 percent of their principal amount, and thereafter at prices declining annually to 100.0 percent on or after January 15, 2016. During any twelve-month period prior to January 15, 2014 we may make optional redemptions of up to 10 percent of the aggregate principal amount of the 9.0 percent senior secured notes at a redemption price of 103.0 percent of such principal amount plus any accrued and unpaid interest. In addition, prior to January 15, 2013, we may redeem up to 35 percent of the aggregate principal amount of the 9.0 percent senior secured notes at a redemption price equal to 109.0 percent of such principal amount, plus any accrued and unpaid interest. In addition, we may redeem some or all of the 9.0 percent senior secured notes at any time prior to January 15, 2014 at a price equal to the principal amount thereof plus a make-whole premium and any accrued and unpaid interest. The 9.0 percent senior secured notes are generally secured by substantially all of our assets, and contain certain restrictive covenants including restrictions on debt incurrence, granting of liens, dividends, acquisitions and investments.

Lease Financing Obligation. The lease financing obligation is the result of the sale and concurrent leaseback of certain land and buildings in Canada in 2007. In connection with this transaction, a collateralized letter of credit was issued in favor of the buyer lessor resulting in the transaction being recorded as a financing transaction rather than a sale, and the land and building and related accounts continue to be recognized in the condensed consolidated balance sheets. The future minimum lease payments under the terms of the related lease agreements at June 30, 2011 are \$3.9 million, \$7.7 million in 2012, \$8.0 million in 2013, \$8.1 million in 2014, \$8.4 million in 2015, and \$10.5 million thereafter. The change in the future minimum lease payments from the December 31, 2010 balance is due to monthly payments and the change in the Canadian dollar exchange rate during the six months ended June 30, 2011.

9. COMMITMENTS AND CONTINGENCIES

Legal Proceedings. In August 2004 and January and February 2005, the United States Environmental Protection Agency (USEPA) conducted environmental investigations of our manufacturing facilities in Aberdeen, Mississippi and Plaquemine, Louisiana, respectively. The USEPA informed us that it identified several "areas of concern," and indicated that such areas of concern may, in its view, constitute violations of applicable requirements, thus warranting monetary penalties and possible injunctive relief. In lieu of pursuing such relief through its traditional enforcement process, the USEPA proposed that the parties enter into negotiations in an effort to reach a global settlement of the areas of concern and that such a global settlement cover our manufacturing facilities at Lake Charles, Louisiana and Oklahoma City, Oklahoma as well. During the second quarter of 2006, we were informed by the USEPA that its regional office responsible for Oklahoma and Louisiana desired to pursue resolution of these matters on a separate track from the regional office responsible for Mississippi. During the second quarter of 2007, we reached agreement with the USEPA responsible for Mississippi on the terms and conditions of a consent decree that would settle USEPA's pending enforcement action against our Aberdeen, Mississippi facility. All parties have executed a consent decree setting forth the terms and conditions of the settlement. The consent decree has been approved by the federal district court in Atlanta, Georgia. Under the consent decree, we were required to, among other things; undertake certain other environmental improvement projects. While the cost of

Table of Contents

Georgia Gulf Corporation and Subsidiaries

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

9. COMMITMENTS AND CONTINGENCIES (Continued)

such remaining projects will likely exceed \$1 million, we do not believe that these projects will have a material effect on our financial position, results of operations, or cash flows.

We have not yet achieved a settlement with the USEPA regional office responsible for Oklahoma and Louisiana. However, on November 17, 2009, we received a unilateral administrative order (UAO) from this USEPA regional office. The UAO, issued pursuant to Section 3013(a) of the Resource Conservation and Recovery Act ("RCRA"), requires us to take certain monitoring and assessment activities in and around several of our wastewater and storm water conveyance systems.

We have also received several compliance orders and notices of potential penalties from the Louisiana Department of Environmental Quality (LDEQ). On December 17, 2009, we received a Notice of Potential Penalty (NOPP) from LDEQ containing allegations of violations of Louisiana's hazardous waste management regulations. On October 7, 2010, we received a Consolidated Compliance Order (CCO) from LDEQ addressing the same allegations as were contained in the December 17, 2009 NOPP. On October 1, 2010, we received Consolidated Compliance Orders and Notices of Potential Penalties (CCONPPs) for both the Plaquemine, and Lake Charles, Louisiana facilities. These CCONPPs allege violations of reporting, recordkeeping, and other requirements contained in Louisiana's air pollution control regulations.

Some of the allegations contained in these compliance orders and notices of potential penalties may potentially be similar to the "areas of concern" raised by USEPA that are discussed above. These compliance orders and notices of potential penalties do not identify specific penalty amounts. It is likely that any settlement, if achieved, will result in the imposition of monetary penalties, capital expenditures for installation of environmental controls and/or other relief. We are not able to forecast the total cost of any monetary penalties, environmental projects, or other relief that would be imposed in any settlement or order. While we expect that such costs will exceed \$100,000, we do not expect that such costs will have a material effect on our financial position, results of operations, or cash flows.

In addition, we are subject to other claims and legal actions that may arise in the ordinary course of business. We believe that the ultimate liability, if any, with respect to these other known claims and legal actions will not have a material effect on our financial position or on our results of operations.

Environmental Regulation. Our operations are subject to increasingly stringent federal, state and local laws and regulations relating to environmental quality. These regulations, which are enforced principally by the USEPA and comparable state agencies and Canadian federal and provincial agencies, govern the management of solid hazardous waste, emissions into the air and discharges into surface and underground waters, and the manufacture of chemical substances. In addition to the matters involving environmental regulation above, we have the following potential environmental issues.

In the first quarter of 2007, the USEPA informed us of possible noncompliance at our Aberdeen, Mississippi facility with certain provisions of the Toxic Substances Control Act. Subsequently, we discovered possible non-compliance involving our Plaquemine, Louisiana and Pasadena, Texas facilities, which were then disclosed. We expect that all of these disclosures will be resolved in one settlement agreement with USEPA. While the penalties, if any, for such noncompliance may exceed \$100,000, we do not expect that any penalties will have a material effect on our financial position, results of operations, or cash flows.

Georgia Gulf Corporation and Subsidiaries

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

9. COMMITMENTS AND CONTINGENCIES (Continued)

There are several serious environmental issues concerning the VCM facility at Lake Charles, Louisiana we acquired from CONDEA Vista Company ("CONDEA Vista" is now Sasol North America, Inc.) on November 12, 1999. Substantial investigation of the groundwater at the site has been conducted, and groundwater contamination was first identified in 1981. Groundwater remediation through the installation of groundwater recovery wells began in 1984. The site currently contains an extensive network of monitoring wells and recovery wells. Investigation to determine the full extent of the contamination is ongoing. It is possible that offsite groundwater recovery will be required, in addition to groundwater monitoring. Soil remediation could also be required.

Investigations are currently underway by federal environmental authorities concerning contamination of an estuary near the Lake Charles VCM facility we acquired known as the Calcasieu Estuary. It is likely that this estuary will be listed as a Superfund site and will be the subject of a natural resource damage recovery claim. It is estimated that there are about 200 Potentially Responsible Parties (PRPs) associated with the estuary contamination. CONDEA Vista is included among these parties with respect to its Lake Charles facilities, including the VCM facility we acquired. The estimated cost for investigation and remediation of the estuary is unknown and could be significant. Also, Superfund statutes may impose joint and several liabilities for the cost of investigations and remedial actions on any company that generated the waste, arranged for disposal of the waste, transported the waste to the disposal site, selected the disposal site, or presently or formerly owned, leased or operated the disposal site or a site otherwise contaminated by hazardous substances. Any or all of the responsible parties may be required to bear all of the costs of cleanup regardless of fault, legality of the original disposal or ownership of the disposal site. Currently, we discharge our wastewater to CONDEA Vista, which has a permit to discharge treated wastewater into the estuary.

CONDEA Vista has agreed to retain responsibility for substantially all environmental liabilities and remediation activity relating to the Chlorovinyls business we acquired from it, including the Lake Charles, Louisiana VCM facility. For all matters of environmental contamination that were known at the time of acquisition (November 1999), we may make a claim for indemnification at any time. For environmental matters that were then unknown, we must generally have made such claims for indemnification before November 12, 2009. No such material claims were made.

At our Lake Charles VCM facility, CONDEA Vista continued to conduct the ongoing remediation at its expense until November 12, 2009. We are now responsible for remediation costs up to about \$150,000 of expense per year, as well as costs in any year in excess of this annual amount up to an aggregate one-time amount of about \$2.3 million. As part of our ongoing assessment of our environmental contingencies, we determined these remediation costs to be probable and estimable and therefore maintained a \$0.7 million accrual in liabilities at June 30, 2011.

As for employee and independent contractor exposure claims, CONDEA Vista is responsible for exposures before November 12, 2009, and we are responsible for exposures after November 12, 2009, on a pro rata basis determined by years of employment or service before and after November 12, 1999, by any claimant.

In May 2008, our corporate management was informed that further efforts to remediate a spill of styrene reducer at our Royal Mouldings facility in Atkins, Virginia would be necessary. The spill was the result of a supply line rupture from an external holding tank. As a result of this spill, the facility entered into a voluntary remediation agreement with the Virginia Department of Environmental Quality ("VDEQ") in August 2003 and began implementing the terms of the voluntary agreement

Table of Contents

Georgia Gulf Corporation and Subsidiaries

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

9. COMMITMENTS AND CONTINGENCIES (Continued)

shortly thereafter. In August 2007, the facility submitted a report on the progress of the remediation to the VDEQ. Subsequently, the VDEQ responded by indicating that continued remediation of the area impacted by the spill is required. While the remaining remediation costs may exceed \$100,000, we do not expect such costs will have a material effect on our financial position, results of operations or cash flows.

We believe that we are in material compliance with all current environmental laws and regulations. We estimate that any expenses incurred in maintaining compliance with these requirements will not materially affect earnings or cause us to exceed our level of anticipated capital expenditures. However, there can be no assurance that regulatory requirements will not change, and it is not possible to accurately predict the aggregate cost of compliance resulting from any such changes.

10. EARNINGS PER SHARE

We calculate earnings per share in accordance with ASC subtopic 260-10, *Earnings per Share*, using the two-class method. The two-class method requires that share-based awards with non-forfeitable dividends be classified as participating securities. In calculating basic earnings per share, this method requires net income to be reduced by the amount of dividends declared in the current period for each participating security and by the contractual amount of dividends or other participation payments that are paid or accumulated for the current period. Undistributed earnings for the period are allocated to participating securities based on the contractual participation rights of the security to share in those current earnings assuming all earnings for the period are distributed. Recipients of certain of our restricted stock unit awards have contractual participation rights that are equivalent to those of common stockholders. Therefore, we allocate undistributed earnings to these restricted stock unit participating securities and common stock based on their respective participation percentage.

The two-class method also requires the denominator to include the weighted average number of shares of restricted stock unit participating securities when calculating basic earnings per share. For both the three and six months ended June 30, 2011, there are 0.9 million weighted average restricted stock unit participating securities. For both the three and six months ended June 30, 2010, there are 1.2 million weighted average restricted stock unit participating securities. Diluted earnings per share also include the additional share equivalents from the assumed conversion of stock based awards including options and certain restricted stock units. Conversion of the options is calculated using the treasury stock method, subject to the anti-dilution provisions of ASC subtopic 260-10.

In computing diluted earnings per share for the three and six months ended June 30, 2011, common stock equivalents of 0.2 million shares and 0.2 million shares, respectively, were not included due to their anti-dilutive effect. For the three and six months ended June 30, 2010, all common stock equivalents were excluded due to their anti-dilutive effect.

Table of Contents

Georgia Gulf Corporation and Subsidiaries

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

10. EARNINGS PER SHARE (Continued)

Computations of common stock basic and diluted earnings per share are presented in the following table:

In thousands, except per share data	Three months ended June 30,		Six months ended June 30,	
	2011	2010	2011	2010
Basic earnings per share				
Undistributed income	\$ 14,588	\$ 21,689	\$ 26,715	\$ 2,658
Deduct: Undistributed earnings Restricted stock unit participating securities	376	738	690	89
Common stockholders' interest in undistributed income	\$ 14,212	\$ 20,951	\$ 26,025	\$ 2,569
Weighted average common shares Basic	33,976	33,722	33,971	33,721
Total common stockholders' basic earnings per share	\$ 0.42	\$ 0.62	\$ 0.77	\$ 0.08
Diluted earnings per share				
Common stockholders' interest in undistributed income used in diluted earnings per share	\$ 14,212	\$ 20,951	\$ 26,025	\$ 2,569
Weighted average common shares Basic	33,976	33,722	33,971	33,721
Stock based awards	26		21	
Weighted average common shares Diluted	34,002	33,722	33,992	33,721
Total common stockholders' diluted earnings per share	\$ 0.42	\$ 0.62	\$ 0.77	\$ 0.08

11. EMPLOYEE RETIREMENT PLANS

The following table provides the components for the net periodic benefit (income) cost for all of our pension plans:

In thousands	Three months ended June 30,		Six months ended June 30,	
	2011	2010	2011	2010
Components of net periodic benefit (income) cost:				
Interest cost	\$ 1,826	\$ 1,964	\$ 3,703	\$ 3,926
Expected return on assets	(2,381)	(2,468)	(4,769)	(4,926)
Amortization of:				
Prior service credit	1		2	
Actuarial loss recognized due to settlement			591	
Actuarial loss	247	204	493	409
Total net periodic benefit (income) costs	\$ (307)	\$ (300)	\$ 20	\$ (591)

Table of Contents**Georgia Gulf Corporation and Subsidiaries****Notes to Unaudited Condensed Consolidated Financial Statements (Continued)****11. EMPLOYEE RETIREMENT PLANS (Continued)**

Our major assumptions used to determine the net periodic benefit cost (income) for our U.S. pension plans are presented as follows:

	Six months ended June 30,	
	2011	2010
Discount rate	5.55%	6.00%
Expected return on assets	8.50%	8.75%

In connection with the closure of our Sarnia, Ontario PVC resin manufacturing facility in December 2008, we decided to wind up the Canadian pension plan. All future benefit obligations for this pension plan were fully funded in February 2011 with a contribution in the amount of approximately \$0.8 million. For the three and six months ended June 30, 2010 we made contributions of \$0.4 million and \$0.5 million, respectively, to the Canadian pension trust.

For the three and six months ended June 30, 2011 and 2010, we made no contributions to the U.S. pension plan trust. We made contributions in the form of direct benefit payments for the U.S. pension plans in the three months and six months ended June 30, 2011 and 2010 of approximately nil and \$0.4 million, respectively.

12. STOCK-BASED COMPENSATION

On May 17, 2011, our shareholders approved the 2011 Equity and Performance Incentive Plan (the "2011 Plan"). Under the 2011 Plan, we are authorized to grant various stock compensation awards for up to 1,800,000 shares of our common stock to officers, employees and non-employee directors. We have various types of share-based payment arrangements with our officers, employees and non-employee directors including restricted stock units and stock options. We issue previously unissued shares upon the exercise of stock options and the restricted stock units. As of June 30, 2011, there were 1,685,044 shares available for future grant to employees and non-employee directors under our 2011 Plan.

Total after-tax share-based compensation cost by type of program was as follows:

(In thousands)	Six months ended June 30,	
	2011	2010
Restricted stock units expense	\$ 4,151	\$ 1,242
Stock options expense	154	306
Before-tax share-based compensation expense	4,305	1,548
Income tax benefit	(1,388)	(621)
After-tax share-based compensation expense	\$ 2,917	\$ 927

The amount of share-based compensation cost capitalized in periods represented was not material.

As of June 30, 2011 and 2010, we had approximately \$8.6 million and \$5.9 million of total unrecognized compensation cost related to nonvested share-based compensation, which we will record

Table of Contents

Georgia Gulf Corporation and Subsidiaries

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

12. STOCK-BASED COMPENSATION (Continued)

in our statements of income over a weighted average recognition period of approximately two years. The total fair value of shares vested during the six months ended June 30, 2011 and 2010 was \$1.9 million and \$3.7 million, respectively.

Stock Options. During the six months ended June 30, 2011 and 2010, we granted no options to purchase shares. Stock option exercise prices are equal to the closing price of our common stock on the date of grant. Stock options vest over a three-year period from the date of grant and expire no more than ten years after the date of grant.

A summary of stock option activity under all plans for the six months ended June 30, 2011 is as follows:

	Shares	Six Months Ended June 30, 2011		Aggregate Intrinsic Value (In thousands)
		Weighted Average Remaining Contractual Terms (Years)	Weighted Average Exercise Price	
Outstanding on January 1, 2011	155,693		\$ 340.48	
Exercised	(1,840)		21.25	
Expired	(6,980)		422.50	
Forfeited	(220)		717.18	
Outstanding on June 30, 2011	146,653	5.8 years	\$ 340.01	\$ 153
Exercisable as of June 30, 2011	128,010	5.5 years	\$ 386.25	\$ 93
Vested or expected to vest as of June 30, 2011	146,500	5.8 years	\$ 340.35	\$ 152

Stock-based Compensation Related to Stock Options. The fair value of stock options granted has been estimated as of the date of grant using the Black-Scholes option-pricing model. The use of a valuation model requires us to make certain assumptions with respect to selected model inputs. We use the historical volatility for our stock, as we believe that historical volatility is more representative than implied volatility. The expected life of the awards is based on historical and other economic data trended into the future. The risk-free interest rate assumption is based on observed interest rates appropriate for the terms of our awards. The dividend yield assumption is based on our history and expectation of dividend payouts. The use of a different model or different assumptions may result in a materially different valuation.

Restricted Stock Units. In May 2011 we granted performance restricted stock units ("PRsUs") that are a form of restricted stock unit in which the number of shares ultimately earned depends on our stock price performance measured against specified performance targets. Following each vesting period, the number of PRsUs subject to award is determined by multiplying the target award by a percentage ranging from 0% to 150%. The percentage is based on predetermined performance metrics related to our stock price for the respective period. The PRsUs are included with all restricted stock units in all calculations.

During the six months ended June 30, 2011 and 2010, we granted 289,003 and 100,968 restricted stock units, respectively. The restricted stock units are expensed over the requisite service period for each award which generally equals the stated vesting period. The weighted average grant date fair value

Table of Contents

Georgia Gulf Corporation and Subsidiaries

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

12. STOCK-BASED COMPENSATION (Continued)

per share of restricted stock units granted during the six months ended June 30, 2011 and 2010 was \$27.55 and \$17.55, respectively, which is based on the stock price as of the date of grant or in the case of the PRSU's the fair value was estimated using a Monte Carlo simulation model. A summary of restricted stock units (including PRSU's) and related changes therein during the six months ended June 30, 2011 is as follows:

	Shares	Six Months Ended June 30, 2011		Aggregate Intrinsic Value (In thousands)
		Weighted Average Remaining Contractual Terms (Years)	Weighted Average Grant Date Fair Value	
Outstanding on January 1, 2011	909,358		\$ 10.75	
Granted	289,003		27.55	
Issued	(24,945)		37.64	
Forfeited	(7,334)		8.75	
Outstanding on June 30, 2011	1,166,082	2.1 Years	\$ 14.35	\$ 28,149
Vested or expected to vest as of June 30, 2011	1,128,085	2.1 Years	\$ 13.94	\$ 27,232

13. COMPREHENSIVE INCOME (LOSS) INFORMATION

Our comprehensive income (loss) includes foreign currency translation of assets and liabilities of foreign subsidiaries, effects of exchange rate changes on intercompany balances of a long-term nature, unrealized gains and losses on derivative financial instruments designated as cash flow hedges, and adjustments to pension liabilities as required by ASC subtopic 715-30, *Compensation Retirement Benefits Defined Benefit Plans Pensions*. The components of accumulated other comprehensive income (loss) and total comprehensive income are shown as follows:

Accumulated other comprehensive income (loss) net of tax

In thousands	June 30, 2011	December 31, 2010
Unrealized (loss) gain on derivative contracts	\$ (375)	\$ 264
Pension liability adjustment including effect of ASC topic 715	(26,498)	(27,641)
Currency translation adjustment	32,003	27,167
Total accumulated other comprehensive income (loss)	\$ 5,130	\$ (210)

Table of Contents**Georgia Gulf Corporation and Subsidiaries****Notes to Unaudited Condensed Consolidated Financial Statements (Continued)****13. COMPREHENSIVE INCOME (LOSS) INFORMATION (Continued)**

The components of total comprehensive income are as follows:

Total comprehensive income	\$ 14,953	\$ 16,392	\$ 32,055	\$ 1,591

14. INCOME TAXES

Our effective income tax rates for the three and six months ended June 30, 2011 were 15.0 percent and 27.3 percent, respectively, as compared to a benefit of 8.2 percent and 132.1 percent, as reported for the three and six months ended June 30, 2010, respectively. The difference in the rate as compared to the U.S. statutory federal income tax rate in 2011 was primarily due to the release of the valuation allowance that results from utilization of Canadian net operating losses and the resolution of certain uncertain tax positions, and for 2010 was primarily due to a tax benefit from the resolution of uncertain tax positions, offset by the valuation allowance that results from the use of net operating losses in Canada.

15. FAIR VALUE OF FINANCIAL INSTRUMENTS

Financial instruments consist primarily of cash and cash equivalents, accounts receivable, accounts payable, accrued expenses, long-term debt, and commodity forward purchase contracts. The carrying amount of cash and cash equivalents, accounts receivable, accounts payable and accrued expenses approximate their fair value because of the nature of such instruments. The fair values of our 9.0 percent senior secured notes and our natural gas forward purchase contracts are based on quoted market values. Due to limited trading activity for our 7.125 percent senior notes due 2013, our 9.5 percent senior notes due 2014, and our 10.75 percent senior subordinated notes due 2016, the fair values of those notes are estimated based on a weighted average of trading activity before and after the applicable reporting period date. Our ABL Revolver is fair valued using comparable recent third party transactions. Our natural gas forward purchase contracts are fair valued with Level 2 inputs.

The FASB ASC 820-10 establishes a fair value hierarchy that prioritizes observable and unobservable inputs to valuation techniques used to measure fair value. These levels, in order of highest to lowest priority are described below:

Level 1 Quoted prices (unadjusted) in active markets for identical assets or liabilities at the measurement date.

Level 2 Observable prices that are based on inputs not quoted on active markets, but corroborated by market data.

Table of Contents**Georgia Gulf Corporation and Subsidiaries****Notes to Unaudited Condensed Consolidated Financial Statements (Continued)****15. FAIR VALUE OF FINANCIAL INSTRUMENTS (Continued)**

Level 3 Prices that are unobservable for the asset or liability and are developed based on the best information available in the circumstances, which might include the company's own data.

(In thousands)	June 30, 2011		December 31, 2010	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Level 1				
Long-term debt:				
9.0% senior secured notes due 2017	\$ 497,268	\$ 545,940	\$ 497,085	\$ 538,750
Level 2				
Long-term debt:				
10.75% senior subordinated notes due 2016	41,440	44,627	41,412	43,644
7.125% senior notes due 2013			8,965	8,885
9.5% senior notes due 2014			13,162	13,235

Derivative instruments:				
Natural gas forward purchase contracts liability (asset)	598	598	(425)	(425)

16. SEGMENT INFORMATION

We have three reportable segments through which we manage our operating activities: (i) chlorovinyls; (ii) building products; and (iii) aromatics. These three segments reflect the organization used by our management for internal reporting. The chlorovinyls segment consists of a highly integrated chain of electrovinyl products, which includes chlorine, caustic soda, VCM and vinyl resins, and our compound products consisting of compound additives and vinyl compounds. Our vinyl-based building and home improvement products, including window and door profiles and mouldings products and outdoor building products consisting of siding, pipe and pipe fittings and deck, fence and rail products are marketed under the Royal Group brand names, and are managed within the building products segment. The aromatics segment is also integrated and includes the product cumene and the co-products phenol and acetone.

Earnings of our segments exclude interest income and expense, unallocated corporate expenses and general plant services, and provision for income taxes. Transactions between operating segments are valued at market based prices. The revenues generated by these transfers are provided in the following table.

Table of Contents

Georgia Gulf Corporation and Subsidiaries

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

16. SEGMENT INFORMATION (Continued)

The accounting policies of the reportable segments are the same as those described in Note 1 of the Notes to Consolidated Financial Statements in our 2010 Annual Report on Form 10-K.

17. SUPPLEMENTAL GUARANTOR INFORMATION

Georgia Gulf Corporation is in essence a holding company for all of its wholly and majority owned subsidiaries. Our payment obligations under the indenture for our 9.0 percent senior secured notes are guaranteed by Georgia Gulf Lake Charles, LLC, Georgia Gulf Chemicals & Vinyls, LLC, Royal Mouldings Limited, Royal Plastics Group (USA) Limited, Rome Delaware Corporation, Plastic Trends, Inc., Royal Group Sales (USA) Limited, Royal Outdoor Products, Inc., Royal Window and Door Profiles Plant 13 Inc., and Royal Window and Door Profiles Plant 14 Inc., and Exterior Portfolio LLC, all of which are wholly-owned subsidiaries (the "Guarantor Subsidiaries") of Georgia Gulf Corporation. The guarantees are full, unconditional and joint and several. Investments in subsidiaries in the following tables reflect investments in wholly owned entities within Georgia Gulf Corporation. The Company's Guarantor Subsidiaries and Non-Guarantor Subsidiaries are not consistent with the Company's business groups or geographic operations; accordingly this basis of presentation is not included to present the Company's financial condition, results of operations or cash flows for any purpose other than to comply with the specific requirements for subsidiary guarantor reporting. We are required to present condensed consolidating financial information in order for the subsidiary guarantors of the Company's public debt to be exempt from reporting under the Securities Exchange Act of 1934.

Edgar Filing: GEORGIA GULF CORP /DE/ - Form 10-Q

The following condensed consolidating balance sheet information, statements of operations information and statements of cash flows information present the combined financial statements of the parent company, and the combined financial statements of our Guarantor Subsidiaries and our remaining subsidiaries (the "Non-Guarantor Subsidiaries"). Separate financial statements of the

Table of Contents**Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.**

We are a leading North American manufacturer and an international marketer of chlorovinyl and aromatics chemicals and also manufacture and market vinyl-based building and home improvement products. Our chlorovinyl and aromatic chemicals products are sold for further processing into a wide variety of end-use applications, including plastic pipe and pipe fittings, siding and window frames, bonding agents for wood products, high-quality plastics, acrylic sheeting and coatings for wire and cable. Our building products segment manufactures window and door profiles, mouldings, siding, pipe and pipe fittings and deck, fence, and rail products and markets vinyl-based building and home improvement products under the Royal Group brand names.

We have three reportable segments through which we manage our operating activities: (i) chlorovinyls; (ii) building products; and (iii) aromatics. These three segments reflect the organization used by our management for internal reporting. The chlorovinyls segment consists of a highly integrated chain of electrovinyl products, which includes chlorine, caustic soda, VCM and vinyl resins, and our compound products consisting of compound additives and vinyl compounds. Our vinyl-based building and home improvement products, including window and door profiles and mouldings products and outdoor building products consisting of siding, pipe and pipe fittings and deck, fence and rail products are marketed under the Royal Group brand names, and are managed within the building products segment. The aromatics segment is also integrated and includes the product cumene and the co-products phenol and acetone.

Acquisition

On February 9, 2011, we acquired Exterior Portfolio by Crane from the Crane Group. Exterior Portfolio, headquartered in Columbus, Ohio, is a leading U.S. manufacturer and marketer of siding products with 2010 revenues of approximately \$100.0 million. Exterior Portfolio markets siding and related accessories under the CraneBoard®, Portsmouth Shake®, Solid Core Siding® and Architectural Essentials® brand names. The aggregate cash consideration paid was \$71.6 million and was funded with cash on hand. The Exterior Portfolio financial results are reported in the building products segment.

Results of Operations

The following table sets forth our condensed consolidated statement of operations data for the three and six months ended June 30, 2011 and 2010, and the percentage of net sales of each line item for the three and six months presented.

(Dollars in Millions)	Three months ended				Six months ended			
	June 30, 2011		June 30, 2010		June 30, 2011		June 30, 2010

Unallocated corporate	(11.8)		(9.3)		(20.6)		(17.1)	
Total operating income	\$ 35.5		\$ 37.9		\$ 72.2		\$ 27.4	

Three Months Ended June 30, 2011 Compared With Three Months Ended June 30, 2010

Net Sales. For the three months ended June 30, 2011, net sales totaled \$831.7 million, an increase of 13 percent compared to \$735.7 million for the same quarter last year. The net sales increase was primarily a result of an increase in our overall sales prices of 22 percent (or 21 percent on a constant currency basis) offset by a decrease in our sales volumes of 7 percent as compared to the three months ended June 30, 2010. Our overall average sales price increase was primarily a result of increases in the sales prices of our vinyl resins and aromatics products. The sales price increases reflect higher costs for our raw materials. Our overall sales volume decrease was mainly attributable to reduced supply from lower operating rates due to scheduled and unscheduled plant outages for maintenance and logistical issues due to high water on the Mississippi River system, and weaker North American housing and construction markets offset partially by the additional sales from the Exterior Portfolio acquisition. The U.S. and Canadian housing starts decreased 5 percent and 2 percent, respectively, from the quarter ended June 2010 to the same period of this year, according to reports furnished jointly by the U.S. Census Bureau and the U.S. Department of Housing and Urban Development issued in July 2011 and Canada Mortgage and Housing Corporation issued in July 2011.

Gross Margin. Gross margin percentage remained consistent with the same prior year period at 10 percent of sales in the three months ended June 30, 2011 and June 30, 2010. The chlorovinyls, aromatics and building products segments gross margin percentages were all consistent with the same period last year. The \$7.7 million gross margin increase was primarily due to our sales price increases, additional sales from the acquisition of Exterior Portfolio and a favorable Canadian dollar currency impact, all of which more than offset an increase in our raw material costs and lower sales volumes. Our primary feedstocks and natural gas costs in our chemical segments normally track industry prices. Chemical Market Associates, Incorporated ("CMAI") reported an increase in our feedstock prices of 31 percent for ethylene, 13 percent for chlorine, 22 percent for benzene, 72 percent for propylene and 6 percent for natural gas from the second quarter of 2010 to the second quarter of 2011.

Selling, General and Administrative Expenses. Selling, general and administrative expenses totaled \$48.2 million for the three months ended June 30, 2011, a 30 percent increase from the \$37.0 million for the three months ended June 30, 2010. This selling, general and administrative expense increase of \$11.2 million is primarily due to: (i) \$4.8 million of additional selling, general and administrative expenses related to the Exterior Portfolio acquisition in our building products segment, (ii) \$1.4 million of salary and related benefits expense increase due to the company reducing previous hiring restrictions

Table of Contents

and reinstating various compensation related benefits throughout 2010, (iii) \$2.7 million of stock compensation increase related to May 2011 equity awards, and (iv) \$0.9 million in unfavorable currency impact on our costs in Canada resulting from the strengthening of the Canadian dollar against the U.S. dollar in our building products segment.

Loss on redemption of debt. During the three months ended June 30, 2011, we redeemed all of our 7.125% Senior Notes due 2013 and 9.5% Senior Notes due 2014 that remained outstanding for the aggregate principal amount of \$22.2 million, resulting in a loss primarily related to the early redemption cost.

Interest Expense, net. Interest expense, net decreased to \$16.9 million for the three months ended June 30, 2011 from \$17.4 million for the three months ended June 30, 2010. This interest expense, net decrease of \$0.5 million was primarily attributable to lower interest rates during the second quarter of 2011 compared to the same quarter last year.

Provision for (benefit from) Income Taxes. The provision for income taxes was \$2.6 million for the three months ended June 30, 2011 compared with the benefit from income taxes of \$1.6 million for the three months ended June 30, 2010. The change in the provision for income taxes results primarily from the increase in income offset by resolution of uncertain tax positions. Our effective income tax rates for the three months ended June 30, 2011 and 2010 were 15.0 percent and negative 8.2 percent, respectively. The difference in the tax rate as compared to the U.S. statutory federal income tax rate in 2011 was primarily due to the release of the valuation allowance that results from the use of Canadian net operating losses and a tax benefit from the resolution of uncertain tax positions. The difference in the tax rate as compared to the U.S. statutory federal income tax rate in 2010 was primarily due to a tax benefit from the resolution of uncertain tax positions.

Chlorovinyls Segment

Net Sales. Net sales totaled \$323.7 million for the three months ended June 30, 2011, an increase of 8 percent compared with net sales of \$300.8 million for the same quarter last year primarily from our electrovinyl products group. Our overall average sales prices increased 20 percent as compared to the three months ended June 30, 2010, while our overall sales volume decreased 11 percent. Our overall sales prices increased primarily due to vinyl resins sales price increases of 14 percent and caustic soda price increases of 58 percent. The vinyl resins sales price increase reflects higher prices for the feedstocks ethylene and chlorine. According to CMAI, the caustic soda industry sales price increased 51 percent from the second quarter of 2010 to the second quarter of this year. The caustic soda sales price increase was primarily attributable to global supply issues and an increase in industrial demand. Our overall sales volume decrease was mainly attributable to reduced operating rates from an unscheduled chloralkali plant outage for maintenance and resulting force majeure in our PVC business and our logistical issues due to the high water on the Mississippi River system. Our force majeure in the PVC business was lifted in July. Our caustic soda sales volume decreased 24 percent and our overall vinyl resin sales volumes were flat for the quarter as compared to the second quarter of 2010. According to American Chemistry Council Plastics Industry Producers Statistics Group ("PIPS") in June 2011, North American vinyl resin industry sales volume increased 5 percent as a result an increase in exports of 23 percent, offset by a decrease in domestic sales volume of 2 percent.

Operating Income. Operating income increased by \$1.6 million to operating income of \$37.8 million for the three months ended June 30, 2011 from \$36.2 million for the three months ended June 30, 2010. This increase in operating income was due to an increase in vinyl resins and caustic soda sales prices partially offset by an increase in raw material costs and reduced operating rates. Our overall feedstocks and natural gas costs in the second quarter of 2011 increased 23 percent compared to the second quarter of 2010. CMAI reported industry price increases for our primary feedstocks of 31 percent for ethylene and 13 percent for chlorine as compared to the second quarter of 2010. Our

Table of Contents

chlorovinyls operating rate decreased from about 87 percent for the second quarter of 2010 to about 77 percent for the second quarter of 2011 due to the unscheduled chloralkali plant outage for maintenance and resulting force majeure in our PVC business and our logistical issues due to the high water on the Mississippi River system.

Building Products Segment

Net Sales. Net sales totaled \$274.2 million for the three months ended June 30, 2011, an increase of 13 percent (or 9 percent on a constant currency basis), compared to \$243.2 million for the same quarter last year. The net sales increase was driven primarily by the benefit of the acquisition of Exterior Portfolio in February of 2011. After adjusting for the impact of the acquisition, volume grew 3 percent in the quarter as U.S. demand improved across a number of our outdoor building products lines. According to PIPS industry data for our products, North America extruded vinyl resin volumes declined 2 percent during the second quarter of 2011. For the second quarter of 2011 our building products segment geographical sales were Canadian sales of 54 percent compared to the U.S. sales of 45 percent.

Operating Income. Operating income of \$16.9 million, for the three months ended June 30, 2011, declined by \$1.9 million from an operating income of \$18.8 million for the three months ended June 30, 2010. The second quarter of 2011 includes \$0.4 million restructuring expense related to the Exterior Portfolio acquisition in February 2011. The decline in operating income was due to changes in the geographic sales mix, higher raw material costs, a second quarter 2010 non-income tax benefit that did not re-occur in the second quarter 2011, and higher selling costs, in part, to support new product introductions and acquisition costs. Gross margin increased and improved as a result of higher volumes, driven primarily by the addition of Exterior Portfolio and better conversion performance partially offset by higher raw material costs.

Aromatics Segment

Net Sales. Net sales were \$233.9 million for the three months ended June 30, 2011, an increase of 22 percent compared to \$191.7 million for the same quarter last year. The net sales increase was primarily a result of an increase in our overall sales prices of 37 percent offset partially by a sales volume decrease of 11 percent as compared to the three months ended June 30, 2010. Our overall average sales prices increased as a result of an increase in the prices of cumene of 41 percent, phenol and acetone of 29 percent. The sales price increases reflect higher costs for the feedstocks benzene and propylene. Our overall aromatics sales volumes decreased as a result of decreases in the sales volumes of cumene of 22 percent offset partially by an increase in the sales volume of phenol and acetone of 10 percent. Our overall sales volume decrease was mainly attributable to reduced operating rates from two scheduled plant turnarounds for maintenance and our logistical issues due to high water on the Mississippi River system during the second quarter of 2011. During the same period in 2010 we only had one scheduled plant turnaround for maintenance. Our phenol and acetone sales volume increases were due to strong phenol demand in both North America and Asia as well as a tighter supply due to operating issues in the U.S.

Operating Loss. Operating loss decreased by \$0.4 million to \$7.4 million for the three months ended June 30, 2011 from \$7.8 million for the three months ended June 30, 2010. This decrease in operating loss was due primarily to increases in our sales prices which more than offset increases in our feedstock costs, lower cumene sales volumes and lower operating rates. Overall raw material costs increased 42 percent from the second quarter of 2010 to the same period of this year, primarily as a result of increases in benzene and propylene costs. CMAI reported that industry prices of our primary feedstocks, benzene and propylene, increased 22 percent, and 72 percent, respectively from the same period of last year. Our aromatics operating rate decreased from about 69 percent for the second quarter of 2010 to about 61 percent for the second quarter of 2011 due to two scheduled plant turnarounds for maintenance during the second quarter of 2011 compared to one during the three months ended June 30, 2010, and due to logistical issues caused by high water on the Mississippi River System.

Table of Contents**Six Months Ended June 30, 2011 Compared With Six Months Ended June 30, 2010**

Net Sales. For the six months ended June 30, 2011, net sales totaled \$1,619.6 million, an increase of 18 percent compared to \$1,367.2 million for the same period last year. The net sales increase was primarily a result of an increase in our overall sales volumes of 3 percent and sales prices of 15 percent on a constant currency basis. Our overall sales volume increase was mainly attributable to an increase in domestic contract sales, additional sales from the Exterior Portfolio acquisition in February 2011, opportunistic export spot sales and strong phenol and acetone products sales more than offsetting weaker North American housing and construction markets and logistical issues during the second quarter of 2011 due to high water on the Mississippi River system. The U.S. and Canadian housing starts decreased 5 percent and 3 percent, respectively, from the six months ended June 30, 2010 to the same period this year, according to reports furnished jointly by the U.S. Census Bureau and the U.S. Department of Housing and Urban Development issued in July 2011 and Canada Mortgage and Housing Corporation issued in July 2011. Our overall sales price increase was primarily a result of increases in the prices of all of our electrovinyl products and aromatics products and a favorable Canadian dollar currency impact. The sales price increases reflect higher cost for all of our raw materials and tighter supply as a result of global industry operating issues.

Gross Margin. Total gross margin percentage increased to 10 percent of sales for the six months ended June 30, 2011 from 8 percent of sales for the six months ended June 30, 2010. This increase in gross margin percentage was primarily due to a margin expansion in our chlorovinyls and aromatics segments from higher sales prices due to strong demand caused by industry operating issues in the U.S. and Asia. The \$56.3 million gross margin increase was primarily due to our chlorovinyls and aromatics segments margin expansion, an increase in sales volumes for vinyl resin, phenol and acetone products and a favorable Canadian dollar currency impact. Our sales price increases more than offset an increase in our raw material costs. Our primary raw materials and natural gas costs in our chlorovinyls and aromatics segments normally track industry prices. CMAI reported a price increase of 20 percent for benzene, 48 percent for propylene, 11 percent for ethylene and 7 percent for chlorine from the first six months of 2010 compared to the first six months of this year while natural gas prices decreased 10 percent for the same time period.

Selling, General and Administrative Expenses. Selling, general and administrative expenses totaled \$86.7 million for the six months ended June 30, 2011, a 16 percent increase from the \$74.8 million for the six months ended June 30, 2010. This selling, general and administrative expense increase of \$11.9 million is primarily due to: (i) \$7.3 million of additional selling, general and administrative expenses related to the Exterior Portfolio acquisition in our building products segment, (ii) \$3.7 million salary and related benefits expense increase due to the company reducing previous hiring restrictions and reinstating various compensation related benefits throughout 2010, (iii) \$2.8 million of stock compensation increase related to May 2011 equity awards, and (iv) \$1.5 million in unfavorable currency impact on our costs in Canada resulting from the strengthening of the Canadian dollar against the U.S. dollar in our building products segment, offset by the favorable impact of a \$4.4 million non-income tax reserve returned to income primarily in our building products segment during the first quarter of 2011 as the exposure was no longer probable.

Loss on redemption of debt. During the six months ended June 30, 2011, we redeemed all of our 7.125% Senior Notes due 2013 and 9.5% Senior Notes due 2014 that remained outstanding for the aggregate principal amount of \$22.2 million, resulting in a loss primarily related to the early redemption cost.

Interest Expense, net. Interest expense, net decreased to \$33.4 million for the six months ended June 30, 2011 from \$35.3 million for the six months ended June 30, 2010. This decrease in interest expense, net of \$1.9 million was primarily attributable to lower interest rates during the six months ended June 30, 2011 compared to the same period in 2010.

Table of Contents

Provision for Income Taxes. The provision for income taxes was \$10.0 million for the six months ended June 30, 2011 compared with the benefit from income taxes of \$10.9 million for the six months ended June 30, 2010. The change for income taxes results primarily from the increase in income offset by the resolution of uncertain tax positions. Our effective income tax rates for the six months ended June 30, 2011 and 2010 were 27.3 percent and 132.1 percent, respectively. The difference in the tax rate as compared to the U.S. statutory federal income tax rate in 2011 was primarily due to the release of the valuation allowance that results from use of Canadian net operating losses and tax benefit from the resolution of uncertain tax positions. The difference in the tax rate as compared to the U.S. statutory federal income tax rate in 2010 was primarily due to a tax benefit from the resolution of uncertain tax positions offset by the release of the valuation allowance that results from the use of Canadian net operating losses.

Chlorovinyls Segment

Net Sales. Net sales totaled \$650.0 million for the six months ended June 30, 2011, an increase of 10 percent compared with net sales of \$588.5 million for the same period last year primarily from our electrovinyl products group. The net sales increase was a result of an increase in our overall sales prices of 14 percent offset partially by a decrease in sales volume of 3 percent as compared to the six months ended June 30, 2010. Our overall sales price increases were primarily due to the increase in the price of caustic soda, vinyl resin and vinyl compound. According to CMAI, the caustic soda industry sales price increased 60 percent from the first six months of 2010 to the first six months of this year. The caustic soda sales price increase was primarily attributable to global supply issues and to an increase in industrial demand. Our overall chlorovinyls sales volume decrease of 3 percent was due to a decrease in opportunistic spot export sales. Our domestic vinyl resin and vinyl compounds sales volume increased 6 percent and 4 percent, respectively. North American vinyl resin industry sales volume increased 6 percent as a result of an increase in exports of 27 percent offset by a decrease in domestic sales volume of 3 percent, according to statistics from the PIPS issued in July 2011.

Operating Income. Operating income increased by \$48.1 million to \$75.6 million for the six months ended June 30, 2011 from \$27.5 million for the six months ended June 30, 2010. This operating income increase was due to an increase in caustic soda, vinyl resin and vinyl compound sales prices, increased North American vinyl resins sales volumes, lower natural gas costs, all of which offset partially by increased raw material costs. Overall raw material costs increased 12 percent from the first six months of 2010 to the same period of this year, primarily as a result of increases in ethylene and chlorine costs. CMAI reported that industry prices of our primary feedstocks ethylene and chlorine increased 11 percent and 7 percent, respectively, from the same 2010 period. Our chlorovinyls operating rate was 80 percent for the first six months of 2010 and 2011. During the six months ended June 30, 2011, we had one unscheduled plant outage for maintenance compared to three during the six months ended June 30, 2010.

Building Products Segment

Net Sales. Net sales totaled \$431.7 million for the six months ended June 30, 2011, an increase of 9 percent (or 6 percent on a constant currency basis), compared to \$396.4 million for the six months ended June 30, 2010. The net sales increase was driven by the benefit of the acquisition of Exterior Portfolio in February 2011. After adjusting for the impact of the acquisition, sales volume declined less than 1% for the first six months of 2011 compared to the same period in 2010, as improved demand in the outdoor building products line in the U.S. was more than offset by softer demand in Canada, which has been negatively impacted, in part, by the elimination of 2010 tax incentives. According to PIPS industry data for our products, North America extruded vinyl resin volumes declined 6 percent during the first six months of 2011. For the first six months of 2011 our building products segment geographical sales were Canadian sales of 52 percent compared to the U.S. of 47 percent.

Table of Contents

Operating Income. Operating income of \$4.8 million for the six months ended June 30, 2011 declined by \$10.3 million from an operating income of \$15.1 million for the six months ended June 30, 2010. The decline in operating income was due to the geographic sales mix, higher raw materials, selling and acquisition costs. The first six months of 2011 includes net income of \$0.7 million relating to a \$3.6 million net reversal of a non-income tax reserve as the exposure is no longer probable, partially offset by acquisition costs and the fair value amortization of inventory of \$2.9 million, acquired in the acquisition of Exterior Portfolio. The first six months of 2010 includes income of \$2.1 million relating to a non-income tax benefit.

Aromatics Segment

Net Sales. Net sales were \$538.0 million for the six months ended June 30, 2011, an increase of 41 percent compared to \$382.3 million for the same period last year. The net sales increase was primarily a result of an increase in our overall sales prices of 26 percent and sales volume of 12 percent as compared to the six months ended June 30, 2010. Our overall average sales prices increased as a result of an increase in the prices of cumene of 30 percent, and phenol and acetone of 19 percent. The sales price increases reflect higher costs for the feedstocks benzene and propylene. Our overall aromatics sales volumes increased as a result of increases in the sales volumes of phenol and acetone of about 48 percent which were offset partially by a decrease in cumene sales volume of 6 percent. Our aromatics sales volume increases were due to strong phenol demand in both North America and Asia as well as a tighter supply due to operating issues in the U.S.

Operating Income. Operating income increased by \$10.4 million to \$12.3 million for the six months ended June 30, 2011 from \$1.9 million for the six months ended June 30, 2010. This increase in operating income was due primarily to an increase in aromatics sales prices and operating rates more than offsetting higher raw material prices and increased sales volumes due to strong phenol demand in both North America and Asia as well as cumene industry operating issues in the U.S. Our aromatics operating rate increased from 65 percent for the first six months of 2010 to about 73 percent for the same period of this year. In addition, our operating income for the same period last year was negatively impacted by raw material prices decreasing during the first six months of 2010 and our inability to recover previously purchased raw materials costs in a decreasing sales price environment due to the time lag between the purchase of raw materials and the sale of the related finished goods. Overall raw material costs increased 31 percent from the first six months of 2010 to the same period of this year, primarily as a result of increases in benzene and propylene costs. CMAI reported that industry prices of our primary feedstocks, benzene and propylene, increased 20 percent, and 48 percent, respectively from the same period of last year. We also had two scheduled plant turnarounds for maintenance during the first six months of 2011 compared to only one last year.

Liquidity and Capital Resources

Operating Activities. For the six months ended June 30, 2011, we used \$72.4 million of cash in operating activities as compared with cash provided by operations of \$5.9 million for the six months ended June 30, 2010, primarily due to the increase in the amount of net working capital of \$110.4 million. Total working capital used in operations for the three and six months ended June 30, 2011 was \$44.3 million and \$160.2 million, respectively. The use of cash for working capital included the increase of \$141.3 million due to receivables, \$90.4 million due to inventory, \$17.5 million due to net payments towards accrued compensation, and is partly offset by the increase in cash flow provided by accounts payable of \$87.6 million. As of June 30, 2011, net working capital was \$481.9 million.

The significant source of cash in the first six months of 2010 was an increase in accounts payable of \$70.7 million. Significant uses of cash in the first six months of 2010 were an increase in accounts receivable of \$103.7 million and an increase in inventories of \$44.8 million. Net working capital at June 30, 2010 was a surplus of \$391.0 million.

Table of Contents

Investing Activities. Net cash used in investing activities was \$95.2 million and \$19.2 million for the six months ended June 30, 2011 and 2010, respectively. The significant change in the current year reflects the \$71.6 million acquisition of Exterior Portfolio.

Financing Activities. Cash provided by financing activities was \$86.3 million for the six months ended June 30, 2011 compared with \$10.0 million for the six months ended June 30, 2010. During the six months ended June 30, 2011, we drew a net of \$110.6 million under our ABL Revolver primarily to fund the increased working capital demands. During the three months ended June 30, 2011, we redeemed all of our 7.125% Senior Notes due 2013 and 9.5% Senior Notes due 2014 that remained outstanding for the aggregate principal amount of \$22.2 million. Our other note payable of \$16.9 million is due in January 2012, and over the next twelve months, we expect to repay approximately \$20.6 million of borrowings under our ABL Revolver. Therefore, we have classified these debts as current in our consolidated balance sheet as of June 30, 2011.

Short-Term Borrowings from Banks. At June 30, 2011, under our ABL Revolver, we had a maximum borrowing capacity of \$300.0 million, and net of outstanding letters of credit of \$16.2 million and current borrowings of \$110.6 million, resulting in remaining availability of \$173.2 million. The maturity date of our ABL Revolver is January 13, 2016.

(\$ in millions)	As of and for the quarter ended June 30, 2011
Short-Term Borrowings from Banks:	
Outstanding amount at period end	\$ 110.6
Weighted average interest rate at period end	4.2%
Average daily amount outstanding for the period	\$ 83.1
Weighted average daily interest rate for the period	4.3%
Maximum month end amount outstanding during the period	\$ 110.6

Management believes based on current and projected levels of operations and conditions in our markets and cash flow from operations, together with our cash and cash equivalents on hand of \$41.7 million and the availability to borrow an additional \$173.2 million under our ABL Revolver as of June 30, 2011, the company has adequate funding for the foreseeable future to make required payments of principal and interest on our debt and fund our working capital and capital expenditure requirements and comply with the financial ratios of the ABL Revolver and covenants under our indenture for the 9.0 percent senior secured notes. To the extent our cash flow and liquidity exceeds the levels necessary for us to make our required debt payments, fund our working capital and capital expenditure requirements and comply with our ABL Revolver and the indenture for the 9.0 percent senior secured notes, we may use that excess liquidity to further grow our business through investments or acquisitions, payment of dividends and/or to further reduce our debt through optional prepayments or redemptions of our outstanding debt securities.

Contractual Obligations. Information related to our contractual obligations at December 31, 2010 can be found in our 2010 Annual Report on Form 10-K in Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations." Our contractual obligations at June 30, 2011, have increased by approximately \$32.6 million or 1 percent since December 31, 2010. The increase from December 31, 2010 is primarily related to us drawing on the ABL Revolver during the first half of 2011 to fund seasonal working capital demands.

Table of Contents

Outlook

We based our 2011 operating plans on conservative macro economic assumptions regarding the main drivers of our businesses. We continue to assume a slight recovery in U.S. housing starts and a slight weakening in Canadian housing starts, gross domestic product ("GDP") growth in both the U.S. and Canada greater than 2 percent over 2010, strong global demand for our chemical products, and natural gas costs similar to 2010.

We expect we will invest \$75 million to \$85 million of capital expenditures in our businesses in 2011. In our Chlorovinyls and Aromatics segments, we expect we will make the productivity and reliability investments that are required to run the higher operating rates we expect in the coming years. In our Building Products segment, we expect to invest in productivity improvements as well as accelerating our new product development efforts ahead of the expected eventual recovery in these markets.

Forward-Looking Statements

This Form 10-Q contains "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 and other federal securities laws. These forward-looking statements are based on the beliefs of management as well as assumptions made based upon the information currently available to us. When used in this Form 10-Q, the words "anticipate," "believe," "plan," "estimate," "expect," and similar expressions, as they relate to us or our management, are intended to identify forward-looking statements. These statements relate to, among other things, our outlook for future periods, supply and demand, pricing trends and market forces within the chemical and building industries, cost reduction strategies and their results, planned capital expenditures, long-term objectives of management and other statements of expectations concerning matters that are not historical facts. Predictions of future results contain a measure of uncertainty. Actual results could differ materially due to various factors. Factors that could impact our actual financial condition or results of operations as compared to that discussed in any forward-looking statements are, among others:

changes in demand for our products or increases in overall industry capacity that could affect production volumes and/or pricing;

the impacts of the current, and any potential future economic uncertainties in the housing and construction markets;

continued compliance with the covenants in our ABL Revolver and in the indenture related to our senior secured notes;

our substantial amount of leverage and significant debt service obligations;

availability and pricing of raw materials;

changes in the general economy;

our ability to penetrate new geographic markets and introduce new products;

changes and/or cyclicity in the industries to which our products are sold;

risks associated with any potential failures of our joint venture partners to fulfill their obligations;

risks associated with plant closures, consolidations and other cost-cutting actions;

changes in foreign currency exchange rates;

technological changes affecting production;

Table of Contents

difficulty in plant operations and product transportation;

changes in governmental and environmental regulations that may make it more difficult or expensive to operate our business or produce our products;

complications resulting from our multiple ERP systems and the implementation of new ERP systems;

difficulty in integrating acquisitions;

the timing and our ability to remediate our material weakness;

changes from the preliminary to the final purchase price allocation from our acquisition of Exterior Portfolio; and

other unforeseen circumstances.

A number of these factors are discussed in this Form 10-Q and in our other periodic filings with the Securities and Exchange Commission ("SEC"), including our Annual Report on Form 10-K for the year ended December 31, 2010 (the "2010 Annual Report").

Critical Accounting Policies

During the six months ended June 30, 2011, we did not have any material changes to our critical accounting policies listed in Part II, Item 7. "Management's Discussion and Analysis of Financial Conditions and Results of Operations" in our 2010 Annual Report.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

For a discussion of certain market risks related to Georgia Gulf, see Part II, Item 7A. "Quantitative and Qualitative Disclosures About Market Risk," in our Annual Report on Form 10-K for the year ended December 31, 2010. There have been no material changes with respect to our exposure to market risks from those set out in such report.

Item 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures. We carried out an evaluation, under the supervision and with the participation of Georgia Gulf management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act") as of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that, due to the continued existence of a previously disclosed material weakness in internal control over financial reporting in the area of accounting for income taxes, the company's disclosure controls and procedures were not effective as of that date.

For additional information regarding this material weakness, see "Item 9A. Controls and Procedures" contained in the company's Annual Report on Form 10-K for the year ended December 31, 2010.

Changes in Internal Control.

Other than as described below, there were no changes in the company's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the three months ended June 30, 2011 (the "Second Quarter"), that have materially affected, or are reasonably likely to materially affect, the company's internal control over financial reporting.

Table of Contents

As a result of the continued existence of a previously disclosed material weakness in internal control over financial reporting in the area of accounting for income taxes, the company has implemented, and continued to implement during the Second Quarter, a number of remediation steps to address that material weakness and has made significant progress to improve the company's internal control over financial reporting. Specifically, the following remediation steps were taken in the Second Quarter:

we continued the process of hiring additional qualified personnel in our tax department;

we continued to require the involvement of two third party subject matter experts to review our accounting for any material and complex tax transactions;

we continued to require an expanded scope of work to be performed by third party tax professionals, and to increase the level of review and validation of that work by management, in the preparation of our provision for income taxes, and we continued to evaluate the coordination and management with a substantial level of third-party assistance; and

we continue to develop and implement additional procedures to increase the level of review, evaluation and validation of underlying supporting data of our provision for income taxes, reconciliations of tax accounts and uncertain tax positions.

Subsequent to June 30, 2011, the Company has continued to undertake similar changes to its historical internal control over financial reporting in order to further address and remediate the existing material weakness in internal control over financial reporting in the area of accounting for income taxes. The company anticipates that it will complete its implementation and testing of these remediation steps in 2011; however additional measures may be required, which may require additional implementation time. We will continue to assess the effectiveness of our remediation efforts in connection with management's future evaluations of internal control over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS.

The first five paragraphs of Note 9 to the accompanying unaudited condensed consolidated financial statements are incorporated by reference herein.

We are involved in certain legal proceedings that are described in Part I. Item 3. "Legal Proceedings" in our 2010 Annual Report. During the quarter ended June 30, 2011, there were no material developments in the status of those proceedings. We are subject to other claims and legal actions that may arise in the ordinary course of business. We believe that the ultimate liability, if any, with respect to these other claims and legal actions will not have a material effect on our financial position or on our results of operations.

Item 1A. RISK FACTORS.

The risks set out under Part I. Item 1A. "Risk Factors" in our 2010 Annual Report include the following risk factor: "*Extensive environmental, health and safety laws and regulations impact our operations and assets; compliance with these regulations could adversely affect our results of operations.*" This particular risk factor is being amended and restated as set forth below. The risk factor is not being amended in any other manner.

Our operations on and ownership of real property are subject to extensive environmental, health and safety regulation, including laws and regulations related to air emissions, water discharges, waste disposal and remediation of contaminated sites, at both the national and local levels in the U.S. We are also subject to similar regulations in Canada. The nature of the chemical and building products industries exposes us to risks of liability under these laws and regulations due to the production, storage, use, transportation and sale of materials that can cause contamination or personal injury, including potential releases of regulated materials into the environment. Environmental laws may have a significant effect on the costs of use, transportation and storage of raw materials and finished products, as well as the costs of the storage and disposal of wastes. We have and must continue to incur operating and capital costs to comply with environmental laws and regulations. In addition, we may incur substantial costs, including fines, damages, criminal or civil sanctions and remediation costs, or experience interruptions in our operations for violations arising under these laws.

Also, some environmental laws, such as the federal Superfund statute, may impose joint and several liability for the cost of investigations and remedial actions to address contamination on any company that generated the waste, arranged for disposal of the waste, transported the waste to the disposal site, selected the disposal site, or presently or formerly owned, leased or operated the disposal site or a site otherwise contaminated by regulated materials. Any or all of the responsible parties may be required to bear all of the costs of cleanup, regardless of fault, legality of the original disposal or ownership of the disposal site. A number of environmental liabilities have been associated with the facilities at Lake Charles, Louisiana that we acquired as part of the acquisition of the vinyls business of CONDEA Vista Company ("CONDEA Vista," which is now known as Sasol North America, Inc.) and which may be designated as Superfund sites. Although CONDEA Vista retained financial responsibility for certain environmental liabilities that relate to the facilities that we acquired from it and that arose before the closing of our acquisition in November 1999, there can be no assurance that CONDEA Vista will be able to satisfy its obligations in this regard. If CONDEA Vista fails to fulfill its obligation regarding these environmental liabilities, then we could be held responsible. Furthermore, we severally are responsible for, and do not have indemnification for, any environmental liabilities relating to other acquisitions, including several liabilities resulting from Royal Group's operations prior to our acquisition of the company.

Table of Contents

Our policy is to accrue costs relating to environmental matters when it is probable that these costs will be required and can be reasonably estimated. However, estimated costs for future environmental compliance and remediation may be too low or we may not be able to quantify the potential costs. We expect to be continually subjected to increasingly stringent environmental and health and safety laws and regulations. It is difficult to predict the future interpretation and development of these laws and regulations or their impact on our future earnings and operations. We anticipate continued compliance will require increased capital expenditures and increased operating costs. Any increase in these costs could adversely affect our financial condition and performance.

Concerns related to climate change are continuing to grow leading to efforts to limit greenhouse gas ("GHG") emissions. The EPA has issued rules pursuant to the Clean Air Act requiring specified facilities to report GHG emissions and to obtain permits to control GHG emissions commencing in 2010. In addition, proposals are being considered by the United States Congress which may require companies such as Georgia Gulf to restrict or control GHG emissions. Also, the United States has recently engaged in discussions under the United Nations Framework Convention on Climate Change at Copenhagen. Such discussions may result in international treaties requiring additional controls on GHG emissions. Our non-U.S. manufacturing facilities are all in Canada, which is implementing measures to reduce GHG emissions. The cost impact of complying with such legislation, regulation or international negotiations would depend on the specific requirements enacted and cannot be determined at this time. For example, the impact of certain proposed legislation relating to GHG emissions would depend on factors such as the specific GHG limits imposed and the timing of the implementation of these requirements. The EPA regulatory requirement to report GHG emissions may result in the need to install or modify monitoring equipment at certain of our U.S. manufacturing facilities to monitor GHG emissions.

The potential impact of these and related future international, legislative or regulatory actions on our operations cannot be predicted at this time but could be significant. Such impacts would include the potential for significant compliance costs, including capital expenditures, and could result in operating restrictions. Any increase in the costs related to these initiatives could adversely affect our financial condition and performance.

The heightened interest in climate change issues could have the potential to affect business operations. There is a potential for indirect consequences of climate change regulation on business trends. In addition, some have alleged an association between climate change and changes in weather patterns. The Company may, in the future, be required to expend money to defend claims based on the alleged association of climate change with changes in weather patterns.

In addition, on May 20, 2011, notice was published in the Federal Register of the U.S. Environmental Protection Agency's proposed rule for National Emission Standards for Hazardous Air Pollutants for Polyvinyl Chloride and Copolymers Production. The proposed rule, if adopted, would establish emissions standards for certain regulated "hazardous air pollutants," including vinyl chloride monomer, that are consistent with "maximum achievable control technology" (MACT). The proposed rule, if adopted, would establish certain working practices, as well as monitoring, reporting and recordkeeping requirements. Existing sources that become subject to these requirements would have three years from the effectiveness of the rule to come into compliance. Publication of the proposed rule in the Federal Register begins a period of public comment. The timing of the implementation of any final rule remains uncertain and is subject to a variety of factors, including the possibility of extensions to the time allowed for public comment, changes which may result from input from the public, or the possibility of legal challenges to any final rule. In light of the foregoing, the Company is still evaluating the potential impact of this proposed rule, and is unable to determine the ultimate expected impact on the Company. Such impacts could include the potential for significant compliance costs, including significant capital expenditures, and could result in operating restrictions. Any increase

Table of Contents

in costs related to these regulations, or restrictions on our operations, could adversely affect our financial condition and performance.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

The table below sets forth information regarding repurchases by Georgia Gulf Corporation of shares of its common stock on a monthly basis during the quarter ended June 30, 2011:

Period	Total Number of Shares Purchased	Average Price Paid per Share
April 1 - April 30, 2011		\$
May 1 - May 31, 2011	4,650	27.88
June 1 - June 30, 2011		
Total	4,650	\$ 27.88

(1)

Georgia Gulf did not repurchase any of its equity securities during the period covered by this report pursuant to any publicly announced plan or program, and no such plan or program is presently in effect. All purchases reflected in the table above reflect purchases of common stock by Georgia Gulf in connection with tax withholding obligations of Georgia Gulf employees upon vesting of such employees' restricted stock awards.
