For the twelve months ended October 31, 2012, the total returns on common share net asset value (NAV) for NQM, NQS, NQU and NPF exceeded the return for the S&P Municipal Bond Index. NQS and NQU outperformed the average return for the Lipper General & Insured Leveraged Municipal Debt Funds Classification Average and NQM and NPF lagged this Lipper average. For the same period, NMZ and NMD outperformed the return for the S&P Municipal Bond High Yield Index as well as the average return for the Lipper High-Yield Municipal Debt Funds Classification Average.

Key management factors that influenced the Funds' returns during this period included duration and yield curve positioning, the use of derivatives in NMZ and NMD, credit exposure and sector allocation. In addition, the use of regulatory leverage was an important positive factor affecting the Funds' performance over this period. Leverage is discussed in more detail later in this report.

In an environment of declining rates and a flattening yield curve, municipal bonds with longer maturities generally outperformed those with shorter maturities during this period. Overall, credits at the longest end of the municipal yield curve posted the strongest returns, while bonds at the shortest end produced the weakest results. For this period, duration and yield curve positioning was a major positive contributor to the performance of these Funds, with the net impact varying according to each Fund's individual weightings along the yield curve. Overall, NQU, NMZ and NMD were the most advantageously positioned in terms of duration and yield curve during this period. All of the Funds benefited from their holdings of long duration bonds, many of which had zero percent coupons, which generally outperformed the market. This was especially true in NQM, NQS and NQU, all of which were overweight in zero coupon bonds. While the Funds were overweight in the longer parts of the yield curve that performed well, NPF also was overweight in bonds with shorter maturities, particularly pre-refunded bonds, which constrained its participation in the market rally.

Although both NMZ and NMD benefited from their longer durations, these Funds used interest rate swaps and forward interest rate swaps to reduce duration and moderate interest rate risk. Because the interest rate swaps were used to hedge against a potential rise in interest rates, the swaps performed poorly as interest rates fell, negatively impacting the Funds' total return performance for the period. This was offset by the Funds' overall duration and yield curve positioning and the strong performance of their municipal bond holdings.

Credit exposure was another important factor in the Funds' performance during these twelve months, as lower quality bonds generally outperformed higher quality bonds. This outperformance was due in part to the greater demand for lower rated bonds as investors looked for investment vehicles offering higher yields. As investors became more comfortable taking on additional investment risk, credit spreads, or the difference in yield spreads between U.S. Treasury securities and comparable investments such as municipal bonds, narrowed through a variety of rating categories. As a result of this spread compression, all of these Funds benefited from their holdings of lower rated

credits. Both NMZ and NMD had heavy weightings in credits rated BBB or lower as well as non-rated bonds, which also generally performed well. For the period, NPF had the heaviest weighting of bonds rated AAA and the smallest weighting of BBB bonds, which detracted from its performance.

During this period, revenue bonds as a whole outperformed the general municipal market. Holdings that generally made positive contributions to the Funds' returns included health care (together with hospitals), transportation (especially toll roads), education and water and sewer bonds. All of these Funds had strong weightings in health care, which added to their performance, although NPF's allocation to this sector was smaller than that of the other five Funds. Tobacco credits backed by the 1998 master tobacco settlement agreement also performed extremely well, helped in part by their longer effective durations. These bonds also benefited from market developments, including increased demand for higher yielding investments by investors who had become less risk averse. In addition, based on recent data showing that cigarette sales had fallen less steeply than anticipated, the 46 states participating in the agreement stand to receive increased payments from the tobacco companies. As of October 31, 2012, NQM, NPF and especially NQS and NQU were overweight in tobacco bonds, which benefited their performance as tobacco credits rallied. Although NMZ and NMD were underexposed to the tobacco sector relative to the S&P Municipal Bond High Yield index, their weightings were strong enough to make a substantial positive contribution to performance.

In addition to a focus on health care, NMZ and NMD emphasized bonds in the real estate sector, including CDDs and charter school subsectors of the high yield segment of the municipal market. During this period, these Funds were rewarded with strong performance from CDD holdings including Pine Island, Beacon Lakes and Westchester, all in Florida, as they experienced growth in assessed property valuations and debt service coverage. NMZ also benefited from improvement in its holding of bonds issued for the conference center project in downtown Vancouver, Washington. Both Funds have relatively modest exposures to American Airlines facilities in several locations. While the airline filed for bankruptcy in November 2011, these holdings were deemed to be secured interests, which are backed by security interests in property and take precedence over unsecured claims and they performed well for the Funds.

In contrast, pre-refunded bonds, which are often backed by U.S. Treasury securities, were the poorest performing market segment during this period. The underperformance of these bonds can be attributed primarily to their shorter effective maturities and higher credit quality. As of October 31, 2012, NPF held the heaviest weighting of pre-refunded bonds, which detracted from its performance during this period. As higher quality credits with shorter durations, pre-refunded bonds generally do not fit the profiles of longer term, higher yielding Funds such as NMZ and NMD, and these two Funds had negligible exposure to pre-refunded bonds. GO bonds and housing and utilities (e.g., resource recovery, public power) credits also lagged the performance of the general municipal market for this period. These Funds tended to have relatively lighter exposures to GOs, which lessened the impact of these holdings.

NMZ and NMD also were impacted by a few small, isolated credit disappointments. In NMZ, these included the Southgate Suites Hotel project in New Orleans, Northern Berkshire Community Services bonds issued by the Massachusetts Health and Educational Facilities Authority and the EnerTech Regional Biosolids project in California. NMD also held the Southgate project bonds as well as credits issued for the Roberts Hotel project in Jackson, Mississippi. We continued to own these securities because we have seen some recent improvements in performance, and we believed their further downside risk was limited. Overall, the impact of these distressed holdings was minimized by the Funds' duration and yield curve positioning, credit allocations, and the strong performance of their other holdings.

APPROVED FUND REORGANIZATION

On December 13, 2012, (subsequent to the close of this reporting period), the reorganization of NMD into NMZ was approved by each Fund's Board of Trustees. The reorganization is intended to create a single larger national Fund, which would potentially offer shareholders the following benefits:

Lower Fund expense ratios (excluding the effects of leverage), as fixed costs are spread over a larger asset base;

Enhanced secondary market trading, as larger Funds potentially make it easier for investors to buy and sell Fund shares;

Lower per share trading costs through reduced bid/ask spreads due to a larger common share float; and

Increased Fund flexibility in managing the structure and cost of leverage over time.

If shareholders approve the reorganization, and upon the closing of the reorganization, NMD will transfer its assets to NMZ in exchange for common shares of NMZ, and the assumption by NMZ of the liabilities of NMD. NMD will then be liquidated, dissolved and terminated in accordance with its Declaration of Trust. In addition, shareholders of NMD will become shareholders of NMZ. Holders of common shares will receive newly issued common shares of NMZ, the aggregate net asset value of which will be equal to the aggregate net asset value of the common shares of NMD held immediately prior to the reorganization (including for this purpose fractional NMZ shares to which shareholders would be entitled). Fractional shares will be sold on the open market and shareholders will receive cash in lieu of such fractional shares.

Fund Leverage and

Other Information

IMPACT OF THE FUNDS' LEVERAGE STRATEGIES ON PERFORMANCE

One important factor impacting the returns of all these Funds relative to the comparative indexes was the Funds' use of leverage. The Funds use leverage because their managers believe that, over time, leveraging provides opportunities for additional income and total return for common shareholders. However, use of leverage also can expose common shareholders to additional volatility. For example, as the prices of securities held by a Fund decline, the negative impact of these valuation changes on common share net asset value and common shareholder total return is magnified by the use of leverage. Conversely, leverage may enhance common share returns during periods when the prices of securities held by a Fund generally are rising. Leverage made a positive contribution to the performance of these Funds over this reporting period.

THE FUNDS' REGULATORY LEVERAGE

As of October 31, 2012, the following Funds have issued and outstanding Variable Rate Demand Preferred (VRDP) Shares as shown in the accompanying table.

VRDP Shares

Fund	VRDP Shares Issued at Liquidation Value
NQM	\$ 211,800,000
NQS	\$ 252,500,000
NQU	\$ 388,400,000
NPF	\$ 127,700,000

(Refer to Notes to Financial Statements, Footnote 1 - General Information and Significant Accounting Policies for further details on VRDP Shares.)

Bank Borrowings

NMZ and NMD employ regulatory leverage through the use of bank borrowings. (Refer to Notes to Financial Statements, Footnote 8 - Borrowings Arrangements for further details on each Fund's bank borrowings.)

SUBSEQUENT LEVERAGING EVENTS

On December 21, 2012, subsequent to the close of this reporting period, both NMZ and NMD terminated their borrowings with the custodian bank and paid the full outstanding balance, including accrued interest and fees.

In conjunction with terminating these borrowings, NMZ and NMD issued \$51 million and \$36 million (\$100,000 liquidation value per share) of Variable Rate MuniFund Term Preferred (VMTP) Shares, respectively, as a new form of leverage. Proceeds from the issuance of VMTP Shares were used to pay each Fund's outstanding balance on its borrowings as described above. VMTP Shares were offered only to qualified institutional buyers, pursuant to Rule 144A under the Securities Act of 1933. VMTP Shares pay dividends weekly and will be set at a fixed spread to the Securities Industry and Financial Markets Association Municipal Swap Index (SIFMA).

RISK CONSIDERATIONS

Fund shares are not guaranteed or endorsed by any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation. Past performance is no guarantee of future results. Fund common shares are subject to a variety of risks, including:

Investment and Market Risk. An investment in common shares is subject to investment risk, including the possible loss of the entire principal amount that you invest. Your investment in common shares represents an indirect investment in the municipal securities owned by the Fund, which generally trade in the over-the-counter markets. Your common shares at any point in time may be worth less than your original investment, even after taking into account the reinvestment of Fund dividends and distributions.

Price Risk. Shares of closed-end investment companies like these Funds frequently trade at a discount to their NAV. Your common shares at any point in time may be worth less than your original investment, even after taking into account the reinvestment of Fund dividends and distributions.

Leverage Risk. Each Fund's use of leverage creates the possibility of higher volatility for the Fund's per share NAV, market price, distributions and returns. There is no assurance that a Fund's leveraging strategy will be successful.

Issuer Credit Risk. This is the risk that a security in a Fund's portfolio will fail to make dividend or interest payments when due.

Credit Risk. An issuer of a bond held by a Fund may be unable to make interest and principal payments when due. A failure by the issuer to make such payments is called a default. A default can cause the price of the issuer's bonds to plummet. Even if the issuer does not default, the prices of its bonds can fall if the market perceives that the risk of default is increasing.

Low-Quality Bond Risk. NMZ and NMD concentrate a large portion of their investments in low-quality municipal bonds (sometimes called junk bonds), which have greater credit risk and generally are less liquid and have more volatile prices than higher quality securities.

Interest Rate Risk. Fixed-income securities such as bonds, preferred, convertible and other debt securities will decline in value if market interest rates rise.

Derivatives Risk. The Funds may use derivative instruments which involve a high degree of financial risk, including the risk that the loss on a derivative may be greater than the principal amount invested.

Inverse Floater Risk. The Funds may invest in inverse floaters. Due to their leveraged nature, these investments can greatly increase a Fund's exposure to interest rate risk and credit risk. In addition, investments in inverse floaters involve the risk that the Fund could lose more than its original principal investment.

Reinvestment Risk. If market interest rates decline, income earned from a Fund's portfolio may be reinvested at rates below that of the original bond that generated the income.

Call Risk or Prepayment Risk. Issuers may exercise their option to prepay principal earlier than scheduled, forcing a Fund to reinvest in lower-yielding securities.

Tax Risk. The tax treatment of Fund distributions may be affected by new IRS interpretations of the Internal Revenue Code and future changes in tax laws and regulations.

Below-Investment Grade Risk. Investments in securities below investment grade quality are predominantly speculative and subject to greater volatility and risk of default.

Common Share Dividend and Price Information

DIVIDEND INFORMATION

During the twelve-month reporting period ended October 31, 2012, the monthly dividends of NQM, NMZ and NMD remained stable throughout the period, while the dividends of NQS, NQU and NPF were each reduced once during the period.

Due to normal portfolio activity, common shareholders of the following Funds received capital gains or net ordinary income distributions in December 2011 as follows:

Fund	Long-Term Capital Gains	Short-Term Capital Gains and/or Ordinary Income
	(per share)	(per share)
NQS	\$ 0.0759	
NQU	\$ 0.0335	
NMZ		\$ 0.0231
NMD		\$ 0.0035

All of the Funds in this report seek to pay stable dividends at rates that reflect each Fund's past results and projected future performance. During certain periods, each Fund may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Fund during the period. If a Fund has cumulatively earned more than it has paid in dividends, it holds the excess in reserve as undistributed net investment income (UNII) as part of the Fund's NAV. Conversely, if a Fund has cumulatively paid dividends in excess of its earnings, the excess constitutes negative UNII that is likewise reflected in the Fund's NAV. Each Fund will, over time, pay all of its net investment income as dividends to shareholders. As of October 31, 2012, all of the Funds in this report had positive UNII balances for both tax and financial reporting purposes.

COMMON SHARE REPURCHASES AND PRICE INFORMATION

As of October 31, 2012, and since the inception of the Funds' repurchase programs, NPF has cumulatively repurchased and retired its outstanding common shares as shown in the accompanying table. Since the inception of the Funds' repurchase programs, NQM, NQS, NQU, NMZ and NMD have not repurchased any of their outstanding common shares.

Fund	Common Shares Repurchased and Retired	% of Outstanding Common Shares
NPF	202,500	1.0%

During the twelve-month reporting period, NPF did not repurchase any of its outstanding common shares.

As of October 31, 2012, and during the twelve-month reporting period, the Funds' common share prices were trading at (+) premiums and/or (-) discounts to their common share NAVs as shown in the accompanying table.

Fund	10/31/12 (+)Premium/(-)Discount	Twelve-Month Average (+)Premium/(-)Discount
NQM	(+)0.24%	(+)0.04%
NQS	(+)2.89%	(+)1.90%

SHELF EQUITY PROGRAMS

NQS, NMZ and NMD have each filed registration statements with the Securities and Exchange Commission (SEC) authorizing the Funds to issue additional common shares, through an equity shelf offering program. Under these equity shelf programs, the Funds, subject to market conditions, may raise additional capital from time to time in varying amounts and offering methods at a net price at or above each Fund's NAV per common share.

As of October 31, 2012, NQS, NMZ and NMD had cumulatively sold 490,341, 5,953,081 and 2,302,664 common shares, respectively, through their shelf equity programs.

During the twelve-month reporting period, NQS, NMZ and NMD sold common shares through their shelf equity programs at a weighted average premium to NAV per common share as shown in the accompanying table.

Fund	Common Shares Sold through Shelf Offering	Weighted Average Premium to NAV Per Share Sold
NQS	490,341	1.71%
NMZ	2,004,701	4.05%
NMD	702,445	1.81%

On October 29, 2012, NQM filed a preliminary prospectus with the SEC for an equity shelf offering, pursuant to which the Fund may issue additional common shares. New common shares of NQM will not be sold until the registration statement is effective.

(Refer to Notes to Financial Statements, Footnote 1 - General Information and Significant Accounting Policies for further details on the Funds Shelf Equity Programs.)

(a) The amounts shown are based on Common share equivalents.

(b) Total Return Based on Market Value is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period may take place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.

Total Return Based on Common Share Net Asset Value is the combination of changes in Common share net asset value, reinvested dividend income at net asset value and reinvested capital gains distributions at net asset value, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending net asset value. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its net asset value), and therefore may be different from the price used in the calculation. Total returns are not annualized.
