**Item 3.02. Unregistered Sales of Equity Securities.**

On June 27, 2005, Ivanhoe Mines Ltd. exercised 4.6 million share purchase warrants originally acquired by it from our company in November, 2004, and received 4.6 million of our common shares at an exercise price of CDN\$1.10 per share. There were no underwriting discounts or commissions.

These common shares of our company were issued to a non-U.S. person (as that term is defined in Regulation S of the Securities Act of 1933) in an offshore transaction and we relied on the exemption from registration provided for in Regulation S, promulgated under the Securities Act of 1933, as amended.

**Item 7.01 Regulation FD Disclosure**

Under its November 2004 equity participation and earn-in agreement with our company, Ivanhoe Mines has a pre-emptive right to participate in any certain equity financings by us as will enable it to maintain its percentage shareholdings in our company. Ivanhoe Mines has advised our company that it will exercise its pre-emptive right to participate in the \$2.20 unit private placement with Kennecott Canada Exploration Inc., a wholly-owned subsidiary of Rio Tinto plc, which we previously announced on June 20, 2005.

On June 28, 2005, we issued a news release announcing that visually strong copper mineralization has been encountered in hole EGD016C. This hole is located on Copper Flats, approximately 225m northeast of holes EGD006/006A, midway between previously reported holes EGD006/006A and EGD008. These holes, in combination with several infill holes currently in progress, appear to define a continuous north-northeast trending zone of high-grade copper and gold mineralization.
