ITEM 1.01 ENTRY INTO A MATERIAL DEFINITIVE AGREEMENT

On December 12, 2005, the Board of Directors (the Board) of Evolving Systems, Inc. (the Company) accelerated the vesting of unvested and out-of-the-money stock options that have an exercise price equal to or greater than \$4.64. The acceleration of vesting will be effective for stock options outstanding as of December 12, 2005. As a result of the acceleration, approximately 603,000 stock options with a range of exercise prices of \$4.64 to \$14.15 and a weighted average exercise price of \$6.17 (including approximately 341,000 stock options held by the Company's directors and executive officers with a weighted average exercise price of \$7.12) became exercisable on December 12, 2005.

The purpose of the acceleration is to avoid recognizing future compensation expense associated with the accelerated options upon the adoption of Statement of Financial Standards No. 123R, Share-Based Payment. FAS 123R sets forth accounting requirements for share-based compensation to employees and requires companies to recognize in their income statements the grant-date fair value of stock options and other equity-based compensation. The Company has not finalized its evaluation of the FAS 123R impact on adoption. However, it estimates that future compensation expense will be reduced by approximately \$2.5 million over the remaining vesting period of the options as a result of the acceleration.

The Company also believes that because the options to be accelerated have exercise prices in excess of the current market value of the Company's common stock, the options have limited economic value and are not fully achieving their original objective of incentive compensation and employee retention.

Aside from the acceleration of the vesting date, the terms and conditions of the stock option agreements governing the underlying stock options remain unchanged.
