

Table of Contents

We offer these services locally, regionally and globally to real estate owners, occupiers, investors and developers for a variety of property types, including:

Offices	Multi-family residential and military housing
Hotels	Critical environments and data centers
Industrial properties	Sports facilities
Retail properties	Cultural facilities
Healthcare and laboratory facilities	Transportation centers
Government facilities	Educational facilities

Individual regions and markets may focus on different property types to a greater or lesser extent depending on local requirements, market conditions and the opportunities we perceive.

We work for a broad range of clients who represent a wide variety of industries and are based in markets throughout the world. Our clients vary greatly in size. They include for-profit and not-for-profit entities of all kinds, public-private partnerships and governmental (“public sector”) entities. Increasingly, we are offering services to middle-market companies seeking to outsource real estate services. Through our LaSalle Investment Management subsidiary, we invest for clients on a global basis in both publicly traded real estate securities and private real estate assets. As an example of the breadth and significance of our client base, we provide services of one kind or another to approximately half of the Fortune 500 companies and approximately 70% of the Fortune 100 companies.

The attributes that enhance our services and distinguish our Firm include our:

- Focus on client relationship management;
- Integrated global business model;
- Industry-leading research capabilities;
- Consistent worldwide service delivery and integrity;
- Ability to deliver innovative solutions, including through applications of technology, to assist our clients in maximizing the value of their real estate portfolios;
 - Strong brand and reputation;
 - Strong financial position;
 - High staff engagement levels; and
- Strong internal governance, enterprise risk management and sustainability leadership.

We have grown our business by expanding our client base and the range of our services and products, both organically and through a series of strategic acquisitions and mergers. Our extensive global platform and in-depth knowledge of local real estate markets enable us to serve as a single-source provider of solutions for the full spectrum of real estate needs of our clients. We first began to establish this network of services across the globe through the 1999 merger of the Jones Lang Wootton companies (“JLW”, founded in England in 1783) with those of LaSalle Partners Incorporated (“LaSalle Partners”, founded in the United States in 1968).

Jones Lang LaSalle History and Acquisition Activities

Prior to our incorporation in Maryland in April 1997 and our initial public offering (the “Offering”) of 4,000,000 shares of common stock in July 1997, Jones Lang LaSalle conducted its real estate services and investment management businesses as LaSalle Partners Limited Partnership and LaSalle Partners Management Limited Partnership (collectively, “the Predecessor Partnerships”). Immediately prior to the Offering, the general and limited partners of the Predecessor Partnerships contributed all of their partnership interests in the Predecessor Partnerships in exchange for an aggregate of 12,200,000 shares of common stock.

We have designed our business model to (1) create value for our clients, our shareholders and our employees and (2) establish high-quality relationships with the suppliers we engage and the communities in which we operate. Based on our established presence in, and intimate knowledge of, local real estate and capital markets worldwide, and supported by our investments in thought leadership, technology and the use of electronic means to gather, analyze and communicate information relevant to our constituencies, we believe that we create value for clients by addressing their local, regional and global real estate needs as well as their broader business, strategic, operating and financial goals.

as an industry leader. Although we have validated our fundamental business strategies, each of our businesses continually re-evaluates how it can best serve our clients as their needs change, as technologies and the application of technologies evolve and as real estate markets, credit markets, economies and political environments exhibit changes, which in each case may be dramatic and unpredictable.

STRATEGY REVIEW PROJECT

During 2012, we engaged in a significant internal process designed to identify and begin to implement the various specific business and operational strategies that we believe will best drive the continued success of the G5 priorities over the longer-term, including:

- The use of an investment philosophy and filters focused on growth that will best meet client needs and concentrate on the most lucrative potential services, markets and cities;
- Establishing charters for internal business committees with responsibility for promoting more inter-connected global approaches, where appropriate, to client services and delivery;
- Using technology, including emerging internet and social media capabilities, to provide information to clients to help them maximize the value of their real estate portfolios and to mine and apply our knowledge in order to improve the ability of our people to provide client services;
- Deploying additional tools and metrics that will make our people as productive and efficient as possible;
- Determining how best to marshal, train, recruit, motivate and retain the human resources that will have the skill set and other abilities necessary to accomplish our strategic objectives;
- Continuing to develop our brand and reputation for high quality client service, intimate local and global market knowledge and integrity; and
- Continue to promote best-in-class governance, enterprise risk management and professional standards in order to operate a sustainable organization capable of meeting the significant challenges and risks inherent in global markets and to minimize disruptions to, and distractions from, the accomplishment of our corporate mission.

BUSINESS SEGMENTS

We report our operations as four business segments. We manage our Real Estate Services (“RES”) product offerings geographically as (1) the Americas, (2) Europe, Middle East and Africa (“EMEA”), and (3) Asia Pacific, and we manage our investment management business globally as (4) LaSalle Investment Management.

REAL ESTATE SERVICES (“RES”): AMERICAS, EMEA AND ASIA PACIFIC

To address the needs of real estate owners and occupiers, we provide a full range of integrated property, project management and transaction services locally, regionally and globally through our Americas, EMEA and Asia Pacific operating segments. We organize our RES according to five major product categories:

- Leasing;
- Capital Markets and Hotels;
- Property and Facilities Management;
- Project and Development Services; and
- Advisory, Consulting and Other Services.

Table of Contents

11

aspects of development and renovation of commercial projects for our clients, including in some cases as a general contractor. Additionally, we provide these services to public-sector clients, particularly to military and government entities and educational institutions, primarily in the United States and to a more limited but growing extent in other countries.

Consulting Services delivers innovative, results-driven real estate solutions that align strategically and tactically with clients' business objectives. We provide clients with specialized, value-added real estate consulting services in such areas as mergers and acquisitions, occupier portfolio strategy, workplace solutions, location advisory, financial optimization strategies, organizational strategy and Six Sigma process solutions. Our professionals focus on translating global best practices into local real estate solutions, creating optimal financial and operational results for our clients.

Table of Contents

The distribution of LaSalle Investment Management’s assets under management is as follows (\$ in billions):

We believe the success of our investment management business comes from our investment performance, industry-leading research capabilities, experienced investment professionals, innovative investment strategies, global presence and coordinated platform, local market knowledge and strong client focus. We maintain an extensive real estate research department whose dedicated professionals monitor real estate and capital market conditions around the world to enhance current investment decisions and identify future opportunities. In addition to drawing on public sources for information, our research department utilizes the extensive local presence of Jones Lang LaSalle professionals throughout the world to gather and share proprietary insight into local market conditions.

The investment and capital origination activities of our investment management business have grown increasingly global. We have invested in direct real estate assets in 22 countries across the globe, as well as in public real estate companies traded on all major stock exchanges. We expect that cross-border investment management activities, both fund raising and investing, will continue to grow.

Private Investments in Real Estate Properties (Separate Accounts and Fund Management). In serving our investment management clients, LaSalle Investment Management is responsible for the acquisition, management, leasing, financing and divestiture of real estate investments across a broad range of real estate property types. LaSalle Investment Management launched its first institutional investment fund in 1979 and currently has a series of commingled investment funds, including 10 funds that invest in assets in the Americas, 11 funds that invest in assets located in Europe and eight funds that invest in assets in Asia Pacific. LaSalle Investment Management also maintains separate account relationships with investors for whom we manage private real estate investments.

LaSalle Investment Management is the advisor to the Jones Lang LaSalle Income Property Trust, a non-listed real estate investment trust launched during 2012 that gives suitable individual investors access to a growing portfolio of diversified commercial real estate investments. As of December 31, 2012, LaSalle Investment Management had approximately \$36.8 billion in assets under management in commingled funds and separate accounts.

Some investors prefer to partner with investment managers willing to co-invest their own funds to more closely align the interests of the investor and the investment manager. We believe that our ability to co-invest funds alongside the investments of clients’ funds will continue to be an important factor in maintaining and continually improving our competitive position. We believe our co-investment strategy strengthens our ability to continue to raise capital for new real estate investments and real estate funds. At December 31, 2012, we had a total of \$268.1 million of investments in real estate ventures that are included in our \$47.0 billion of assets under management.

We may engage in “merchant banking” activities in appropriate circumstances. These involve making investments of the Firm’s capital to acquire properties in order to seed investment management funds before they have been offered to clients. Historically, we have done this substantially through the LaSalle Investment Company structures we describe in Note 5 Investment in Real Estate Ventures of the Notes to Consolidated Financial Statements. We may also provide investment capital directly.

Table of Contents

SUSTAINING OUR ENTERPRISE

We apply our sustainability strategy to the resources that we use in providing services to assets owned by our clients. The revenue and profits we earn from those efforts are then divided between further investment in our business, paying our employees and providing returns to our shareholders. These efforts, which among other things help our clients manage their real estate more effectively and efficiently, promote employment globally and create wealth for our shareholders, allow us to be an increasingly impactful member of, and positive force within, the communities in which we operate.

COMPETITION

As the result of our significant growth over the previous decade, we are now one of the two largest real estate services and investment management providers on a global basis. We believe that the other similar global providers are significantly smaller in terms of revenue than either of us. We believe that Jones Lang LaSalle's geographic reach, scope of services and scale of resources have become sufficient to provide substantially all of the services our clients need, wherever they need them. To most effectively serve and retain current clients, and win new clients, we strive to be the best firm in our industry.

Although there has been, and we expect will continue to be, consolidation within our industry, the totality of real estate services constituting the industry remains very large and as a whole the provision of these services remains highly diverse and fragmented. Accordingly, since we provide a broad range of commercial real estate and investment management services across many geographies, we face significant competition in many different ways on an international, regional and local level. Depending on the service, we also face competition from other real estate service providers, some of which may not traditionally be thought of as such, including institutional lenders, insurance companies, investment banking firms, investment managers, accounting firms, technology firms, firms providing outsourcing services of various types (including technology or building products) and companies that self-provide their real estate services with in-house capabilities. While these competitors may be global firms that claim to have service competencies similar to ours, many are local or regional firms which, although substantially smaller in overall size, may be larger in a specific local or regional market.

Table of Contents

COMPETITIVE DIFFERENTIATORS

We believe that the key value drivers we list below create several competitive differentiators. These form the basis of our market positioning as the leading firm of choice for sophisticated clients seeking an integrated financial and professional services firm specializing in real estate on a global basis.

Client Relationship Management. We support our ability to deliver superior service to our clients through our ongoing investments in client relationship management and account management. Our goal is to provide each client with a single point of contact at our firm, an individual who is answerable to, and accountable for, all the activities we undertake for the client. We believe that we enhance superior client service through best practices in client relationship management, the practice of seeking and acting on regular client feedback, and recognizing each client's own specific definition of excellence.

Our client-driven focus enables us to develop long-term relationships with real estate investors and occupiers. By developing these relationships, we are able to generate repeat business and create recurring revenue sources. In many cases, we establish strategic alliances with clients whose ongoing service needs mesh with our ability to deliver fully integrated real estate services across multiple business units and office locations. We support our relationship focus with an employee compensation and evaluation system designed to reward client relationship building, teamwork and quality performance, in addition to revenue development.

Integrated Global Business Model. By combining a wide range of high-quality, complementary services—and delivering them at consistently high service levels globally through wholly owned offices with directly employed personnel—we can develop and implement real estate strategies that meet the increasingly complex and far-reaching needs of our clients. We also believe that we have secured an established business presence in the world's principal real estate markets, with the result that we can grow revenue without a proportionate increase in infrastructure costs. With operations in more than 1,000 locations in 70 countries on six continents, we have in-depth knowledge of local and regional markets and can provide a full range of real estate services around the globe. This geographic coverage, combined with the ability and willingness of our people to communicate and connect with each other across a common infrastructure platform, positions us to serve the needs of our multinational clients and manage investment capital on a global basis. We anticipate that our cross-selling potential across geographies and product lines will continue to develop new revenue sources for multiple business units within Jones Lang LaSalle.

We also anticipate that over time we will continue to develop expanded service offerings that are complementary, or adjacent, to our current offerings. An example would be providing services to multi-family residential real estate that complements our current services to commercial clients seeking to develop multi-use properties that encompass office, retail and residential space.

Industry-Leading Research Capabilities. We invest in and rely on comprehensive top-down and bottom-up research to support and guide the development of real estate and investment strategy for our clients. We have approximately 330 research professionals who gather data and cover market and economic conditions around the world. Research also plays a key role in keeping colleagues throughout the organization attuned to important events and changing conditions in world markets. We facilitate the dissemination of this information to colleagues through our company-wide intranet. We are also devising new approaches through technology, including the use of the Internet and developing social media techniques, to make our research, services and property offerings more readily available to our people and our clients.

We believe that our investments in research, technology, people and thought leadership position our Firm as a leading innovator in our industry. Our various research initiatives investigate emerging trends and help us anticipate future conditions and shape new services to benefit our clients. Professionals in our Consulting Services practice identify and respond to shifting market and business trends to address changing client needs and opportunities. LaSalle Investment

Management relies on our comprehensive investigation of global real estate and capital markets to develop new investment products and services tailored to the specific investment goals and risk/return objectives of our clients. We believe that our commitment to innovation helps us secure and maintain profitable long-term relationships with the clients we target: the world’s leading real estate owners, occupiers, investors and developers.

Consistent and Innovative Service Delivery, Governance and Culture. We believe that our globally coordinated investments in research, technology, people, quality control and innovation, combined with the fact that our offices are wholly owned (rather than franchised) and our professionals are directly employed, enable us to develop, share and continually evaluate best practices across our global organization. Additionally, our overlapping and communicative senior management and Board of Directors structure promotes an environment of best practices in corporate governance, controls and overall corporate sustainability. We also believe these attributes allow us to infuse throughout the organization a culture of internal communication and connectivity and of integrity that is unparalleled in our industry. As a result, we are able to deliver the same consistently high levels of client service and operational excellence substantially wherever our clients’ real estate investment and services needs exist.

Table of Contents

We believe we hold the necessary trademarks worldwide with respect to the “Jones Lang LaSalle” and “LaSalle Investment Management” names and the related logo, which we expect to continue to renew as necessary.

In 2012, we applied for and expect to receive the right to use the top level domain names of each of “.jll” and “.lasalle” from the Internet Corporation for Assigned Names and Numbers (“ICANN”) during 2013.

Financial Strength. We focus on maintaining financial performance metrics, particularly our leverage and interest coverage ratios, that allows us to maintain investment grade financial ratings. We believe that the confidence in the financial strength of long-term service providers has become increasingly important to our clients, particularly in light of the global recession and the volatility of the capital markets in its aftermath. We believe that clients are increasingly making financial strength one of the more important criteria when they are selecting real estate service providers. Accordingly, our ability to present a superior financial condition distinguishes us as we compete for business.

We also believe that our geographic dispersion and the diversity of our service offerings across the globe provide a diversification of the sources of our revenues that reduces the overall inherent volatility of operating a real estate services business and therefore an additional measure of financial stability relative to other firms that are only local or regional and therefore must rely on the strength of fewer different markets.

We have maintained for a number of years an investment grade rating from each of Standard & Poor’s (BBB- (stable)) and Moody’s Investor Services, Inc. (Baa2 (stable)). Prior to 2012, the primary source of our credit was from an international syndicate of banks. During 2012, in order both to diversify our sources of credit and to take advantage of historically low interest rates, we issued \$275 million of Long-term senior notes with a ten-year maturity and a fixed interest rate of 4.4% per annum.

Employee Engagement. As a business whose primary asset is the expertise and capabilities of its people, it is important to periodically measure and evaluate the level of our employee engagement, their performance enablement and the effectiveness of our managers. Approximately every two years, we use an outside provider to conduct an employee survey and then assist us in evaluating the results. We conducted our most recent survey during the summer of 2012.

Using our outside provider’s definitions:

Employee engagement means the extent to which employees are motivated to contribute to organizational success and are willing to apply discretionary effort to accomplishing tasks important to the achievement of organizational goals;

Performance enablement means the extent to which an organization is committed to high levels of customer service and relies upon continuous improvement practices to achieve superior organizational results; and

Manager effectiveness means the extent to which supervisors are leaders, capable of facilitating team performance through effectively managing both the tasks and responsibilities as well as facilitating teamwork and interpersonal relationships.

Our results indicated that our people reported an overall higher level of engagement, performance enablement and manager effectiveness than the global norms our outside provider maintains from the survey results it gathers from numerous other clients. In all cases, our top quartile of most engaged employees demonstrated significantly higher results than the top quartile of the global norms. Our results generally also improved over the results from our own 2010 survey.

While we were pleased with the results, we are developing and intend to implement various actions to address those specific areas where the data indicated room for improvement or possible concerns. In any event, we believe that the quality of our people, and their commitment to our organization and providing a high level of service to our clients,

provides us with an important differentiator within the markets in which we operate.

Table of Contents

INDUSTRY TRENDS

Recovering But Still Uncertain Economic Conditions. Since 2010, commercial real estate markets have broadly recovered around the world, although at different speeds and different levels of strength. Commercial values in most markets have been rising, though at varying rates of growth. Cross-border transaction volumes were nearly back to the levels of the previous cycle by the end of 2010, and have continued to increase. However, beginning in 2011 and continuing through 2012, additional uncertainty has been injected into the markets by the political and economic challenges that arose within the European Union, particularly as they influenced the credit quality of sovereign bonds issued by various European countries and the stability and liquidity of European banks. Additionally, continued stubborn levels of unemployment and concern about the levels of public debt, tax policy, fiscal policy and areas of economic weakness in the United States continued to tamp down economic recovery, although there have been signs of gradual albeit still slow improvement. Political change and uncertainty, combined with slower than previous growth, also led to questions about the ability of certain countries in Asia, particularly China and India, to continue to develop at historical rates. Due to the continuing uncertainties, a significant weight of equity capital has been targeting the most high quality prime real estate assets across all sectors, with prime yields continuing to compress due to the low supply of high quality assets to meet investor demand. Prime capital values have been rising over the last two years, most notably in many of the world's top office markets. Leasing conditions also have broadly improved worldwide although progress continues to trail the recovery in global capital markets.

Increasing Demand for Global Services and Globalization of Capital Flows. Many corporations based in countries around the world have pursued growth opportunities in international markets. Many are striving to control costs by outsourcing or offshoring non-core business activities. Both trends have increased the demand for global real estate services, including facilities management, tenant representation and leasing, property and energy management services. We believe that these trends will favor real estate service providers with the capability to provide services—and consistently high service levels—in multiple markets around the world. The highly competitive marketplace for the services we provide, combined with financial pressures experienced by certain of our competitors have, however, negatively impacted fees within some of our service lines.

Additionally, real estate capital flows have become increasingly global, as more assets are marketed internationally and as more investors seek real estate investment opportunities beyond their own borders. This trend has created new opportunities for investment managers equipped to facilitate international real estate capital flows and execute cross-border real estate transactions.

Growth of Outsourcing. In recent years outsourcing of professional real estate services has increased substantially, as corporations have focused corporate resources on core competencies. Although some continue to unbundle and separate the sources of their real estate services, large users of commercial real estate services continue to demonstrate an overall preference for working with single-source service providers able to operate locally, regionally and globally. The ability to offer a full range of services on this scale requires significant corporate infrastructure investment, including information technology applications and personnel training. Smaller regional and local real estate service firms, with limited resources, are less able to make such investments. In addition, public and other non-corporate users of real estate, including government agencies and health and educational institutions, have begun to outsource real estate activities as a means of reducing costs. As a result, we believe there continues to be significant growth opportunities for firms like ours that can provide integrated real estate services across many geographic markets.

During an economic downturn in a given country or region generally, we would expect to experience credit-related problems at a higher level than usual with vendors and contractors due to their increased financial instability. For example, this became a reality during the global financial crisis.

Another example is that in certain countries, based upon applicable regulations and local market dynamics, we have established joint ventures or other arrangements with insurance brokers through which insurance coverage is offered to clients, tenants in buildings we manage and vendors to those buildings. In any case, although we fully disclose our arrangements and do not require anyone to use the insurance services, Jones Lang LaSalle has a financial interest in the placement of insurance with such third parties and therefore we may be deemed to have certain conflicts of interest.

statutes may also conflict with local legal requirements in a particular country, as, for example, when anonymous hotlines required under U.S. law were construed to conflict in part with French privacy laws. The jurisdictional reach of laws may be unclear as well, as when laws in one country purport to regulate the behavior of affiliated corporations within our group that are operating in other countries. There is some uncertainty, for example, in the jurisdictional reach of the U.K. Bribery Act, and the standards for illegal activity in that Act are in some ways higher than those established under the U.S. Foreign Corrupt Practices Act.

Table of Contents

Identifying the regulations with which we must comply, and then complying with them is complex. We may not be successful in complying with regulations in all situations, as a result of which we could be subject to regulatory actions and fines for non-compliance. The global economic crisis has resulted in an unusual level of related government and legislative activities, including for example the Dodd-Frank Wall Street Reform Act, which we expect will continue into the future and which exacerbates these risks. We are also seeing increasing levels of labor regulation in emerging markets, such as China, which affect our property management business.

Changes in governments or majority political parties may result in significant changes in enforcement priorities with respect to employment, health and safety, tax, securities disclosure and other regulations, which in turn could negatively affect our business.

LICENSING AND REGULATORY REQUIREMENTS.

The brokerage of real estate sales and leasing transactions, property management, construction, mobile engineering, conducting valuations, trading in securities for clients and the operation of the investment advisory business, among other business lines, requires us to maintain licenses in various jurisdictions in which we operate and to comply with particular regulations. We believe that licensing requirements have generally been increasing in recent years. If we fail to maintain our licenses or conduct regulated activities without a license or in contravention of applicable regulations, we may be required to pay fines or return commissions. We may also have a given license suspended or revoked, meaning that we would need to suspend or cease the business activities for which the license was required. Our acquisition activity increases these risks because we must successfully transfer licenses of the acquired entities and their staff, as appropriate. Licensing requirements may also preclude us from engaging in certain types of transactions or change the way in which we conduct business or the cost of doing so. In addition, because the size and scope of real estate sales transactions and the number of countries in which we operate or invest have increased significantly during the past several years, both the difficulty of ensuring compliance with the numerous licensing regimes and the possible loss resulting from noncompliance have increased. To the extent we expand our service offerings further into more heavily regulated sectors, such as healthcare, environmental, pharmaceutical, scientific and medical laboratories, airports and industrial, the regulatory framework within which we operate may get more complicated and the consequences of noncompliance more serious.

The regulatory environment facing the investment management industry has also grown significantly more complex in recent years. Countries are expanding the criteria requiring registration of investment advisors, whether based in their country or not, and expanding the rules applicable to those that are registered, all in an effort to provide more protection to investors located within their countries. In some cases, rules from different countries are applicable to more than one of our investment advisory companies and can conflict with those of their home countries. Although we believe we have good processes, policies and controls in place to address the new requirements, these additional registrations and increasingly complex rules increase the possibility that violations may occur.

Highly publicized accounting and investment management frauds that occurred in various businesses and countries during the financial crisis may result in significant changes in regulations that may affect our investment management business and our broker-dealer entities.

Furthermore, the laws and regulations applicable to our business, both in the United States and in foreign countries, also may change in ways that materially increase the costs of compliance. Particularly in emerging markets, there can be relatively less transparency around the standards and conditions under which licenses are granted, maintained or renewed. It also may be difficult to defend against the arbitrary revocation of a license in a jurisdiction where the rule of law is less well developed.

As a licensed real estate service provider and advisor in various jurisdictions, we and our licensed employees may be subject to various due diligence, disclosure, standard-of-care, anti-money laundering and other obligations in the jurisdictions in which we operate. Failure to fulfill these obligations could subject us to litigation from parties who purchased, sold or leased properties we brokered or managed or who invested in our funds. We could become subject to claims by participants in real estate sales or other services claiming that we did not fulfill our obligations as a service provider or broker. This may include claims with respect to conflicts of interest where we are acting, or are perceived to be acting, for two or more clients with potentially contrary interests.

Singapore. As long as a reasonable level of confidence remains within the markets, we believe that additional acquisition opportunities will emerge from time to time and that our industry will continue to consolidate.

We anticipate that the potential effects of climate change will increasingly impact the decisions and analysis that LaSalle Investment Management makes with respect to the properties it evaluates acquiring on behalf of clients since climate change considerations can impact the relative desirability of locations and the cost of operating and insuring acquired properties. Future legislation that requires specific performance levels for building operations could make non-compliant buildings obsolete, which could materially affect investments in properties we have made on behalf of clients, including those in which we may have co-invested.

Table of Contents

We also anticipate that the potential effects of climate change will increasingly impact our own operations and those of client properties we manage, especially when they are located in coastal cities. For example, during 2012 our own operations and properties we manage for clients in the northeastern United States and in particular New York City, were impacted by Hurricane Sandy, in some cases significantly.

ABILITY TO CONTINUE TO MAINTAIN SATISFACTORY INTERNAL FINANCIAL REPORTING CONTROLS AND PROCEDURES.

If we are not able to continue to successfully implement the requirements of Section 404 of the United States Sarbanes-Oxley Act of 2002, or if there is a failure of one or more controls over financial reporting due to fraud, improper execution or the failure of such controls to adjust adequately as our business evolves, then our reputation, financial results and the market price of our stock could suffer. Our accounting can be complex and requires that management make judgments with respect to revenue recognition, acquisitions and other aspects of our business. While we believe that we have adequate internal financial reporting control procedures in place, we may be exposed to potential risks from this legislation, which requires companies to evaluate their internal controls and have their controls attested to by their independent auditors on an annual basis. We have evaluated our internal control systems in order to allow our management to report on, and our independent auditors to attest to, our internal controls over financial reporting as required for purposes of this Annual Report on Form 10-K for the year ended December 31, 2012. However, there can be no assurance that we will continue to receive a positive attestation in future years, particularly since standards continue to evolve and are not necessarily being applied consistently from one auditing firm to another. If we identify one or more material weaknesses in our internal controls in the future that we cannot remediate in a timely fashion, we may be unable to receive a positive attestation at some time in the future from our independent auditors with respect to our internal controls over financial reporting.

These risks also apply separately to the real estate investment trust we launched during 2012 and that is managed by LaSalle Investment Management. That entity has registered the securities it is issuing with the Securities and Exchange Commission in the United States and is subject to regulation as a public company albeit not one separately listed on a stock exchange.

ABILITY TO PROTECT INTELLECTUAL PROPERTY; INFRINGEMENT OF THIRD-PARTY INTELLECTUAL PROPERTY RIGHTS.

Our business depends, in part, on our ability to identify and protect proprietary information and other intellectual property such as our service marks, domain names, client lists and information, and business methods. Existing laws of some countries in which we provide or intend to provide services, or the extent to which their laws are actually enforced, may offer only limited protections of our intellectual property rights. We rely on a combination of trade secrets, confidentiality policies, non-disclosure and other contractual arrangements, and on patent, copyright and trademark laws to protect our intellectual property rights. Our inability to detect unauthorized use (for example, by former employees) or take appropriate or timely steps to enforce our intellectual property rights may have an adverse effect on our business.

We cannot be sure that the intellectual property that we may use in the course of operating our business or the services we offer to clients do not infringe on the rights of third parties, and we may have infringement claims asserted against us or against our clients. These claims may harm our reputation, cost us money and prevent us from offering some services.

Confidential intellectual property is increasingly stored or carried on mobile devices, such as laptop computers, which makes inadvertent disclosure more of a risk in the event the mobile devices are lost or stolen and the information has not been adequately safeguarded or encrypted. This also makes it easier for someone with access to our systems, or

someone who gains unauthorized access by “hacking” or other type of cyber attack, to steal information and use it to the disadvantage of our firm or our people. Advances in technology, which permit increasingly large amounts of information to be stored on smaller devices or on third party “cloud” servers, as well as the proliferation of social media techniques, tend to exacerbate these risks.

Table of Contents

Financial Risk Factors

WE MAY HAVE INDEBTEDNESS WITH FIXED OR VARIABLE INTEREST RATES AND CERTAIN COVENANTS WITH WHICH WE MUST COMPLY.

We currently have the ability to borrow, from a syndicate of lenders, up to \$1.1 billion on an unsecured revolving credit facility (the “Facility”), with capacity to borrow up to an additional \$45.3 million under local overdraft facilities. Borrowings under our Facility bear variable interest rates ranging from LIBOR plus 112.5 basis points to LIBOR plus 225.0 basis points. At December 31, 2012, we had \$169.0 million of unsecured borrowings outstanding on the Facility. Our average outstanding borrowings under the Facility were \$621.2 million during the twelve months ended December 31, 2012 at an effective interest rate of 1.6%. In addition to the Facility, we also have \$275.0 million of unsecured Long-term senior notes (the “Notes”) that are due in 2022. The Notes bear an annual interest rate of 4.4%, subject to adjustment if a credit rating assigned to the Notes is downgraded below an investment grade rating (or subsequently upgraded).

Our outstanding borrowings under our Facility fluctuate during the year primarily due to varying working capital requirements. For example, payment of annual incentive compensation represents a significant cash requirement commanding increased borrowings in the first half of the year, while historically the Firm’s seasonal earnings pattern provides more cash flow in the second half of the year. To the extent we continue our acquisition activities in the future, the level of our indebtedness could increase materially if we use our Facility to fund such purchases.

The terms of our Facility, and to a lesser degree our Senior Notes, contain a number of covenants that could restrict our flexibility to finance future operations or capital needs, or to engage in other business activities that may be in our best interest. The debt covenants have the effect of limiting our ability, among other things, to:

- Encumber or dispose of assets;
- Incur significant additional indebtedness;
- Make significant investments;
- Engage in significant acquisitions.

In addition, our Facility requires that we comply with various financial covenants, including with respect to minimum net worth, leverage and cash interest coverage.

If we are unable to make required payments under our Facility or required by our Senior Notes, or if we breach any of the covenants, we will be in default, which could cause acceleration of repayment of outstanding amounts as well as defaults under other existing and future debt obligations.

VOLATILITY IN LASALLE INVESTMENT MANAGEMENT INCENTIVE FEE REVENUE.

LaSalle Investment Management’s portfolio is of sufficient size to periodically generate large incentive fees and equity losses and gains that significantly influence our earnings and the changes in earnings from one year to the next. Volatility in this component of our earnings is inevitable due to the nature of this aspect of our business, and the amount of incentive fees or equity gains or losses we may recognize in future quarters is inherently unpredictable and relates to market dynamics in effect at the time. The speed with which the real estate markets worldwide turned from positive to negative starting in 2007 and continuing through 2009 is a further indication of the market volatility to which we are subject and over which we have no control. In the case of our commingled funds, underlying market conditions, particular decisions regarding the acquisition and disposition of fund assets, and the specifics of the client mandate will determine the timing and size of incentive fees from one fund to another. For separate accounts, where asset management is ongoing, we also may earn incentive fees at periodic agreed-upon measurement dates, and they

Table of Contents

Where incentive fees on a given transaction or portfolio are particularly large, certain clients have attempted to renegotiate fees even though contractually obligated to pay them, and we expect this to occur from time to time in the future. Our efforts to collect our fees in these situations may lead to significant legal fees and/or significant delays in collection due to extended negotiations, arbitration or litigation. They may also result in either negotiated reductions in fees that take into account the future value of the relationship or loss of the client.

VOLATILITY IN HOTELS AND CAPITAL MARKETS FEES.

We have business lines other than LaSalle Investment Management that also generate fees based on the timing, size and pricing of closed transactions and these fees may significantly contribute to our earnings and to changes in earnings from one quarter or year to the next. For example, in 2007 our Hotels business generated one very substantial fee from the sale of a large portfolio of hotels on behalf of a particular client. Volatility in this component of our earnings is inevitable due to the nature of these businesses and the amount of the fees we will recognize in future quarters is inherently unpredictable.

LASALLE INVESTMENT MANAGEMENT BANKING AND CLIENT RELATIONSHIPS.

Although not highly leveraged by general industry standards, the investment funds that LaSalle Investment Management operates in the ordinary course of business borrow money from a variety of institutional lenders. The loans typically are secured by liens on specific investment properties but are otherwise non-recourse. During the global financial crisis, the values of specific properties were in some cases less than the amount of the outstanding loan on the property, which gave the lender the right to foreclose on the property, in which case the equity invested by the fund would be without value. These situations were typically addressed on a case-by-case basis and, because we generally maintain good relationships with our lenders, were generally successful in renegotiations to retain the management of substantially all fund properties, which has given additional time for values to recover. A similar phenomenon could recur in connection with economic recessions or liquidity contractions that arise out of the current situation in the European Union.

Some clients of LaSalle Investment Management that had open commitments to provide additional investments and that came under stress due to the financial downturn became less able financially to honor their commitments and sought to renegotiate the terms of their commitments or the fees that they pay. These activities did not result in materially adverse consequences to LaSalle Investment Management or any of its funds. Clients adversely affected due to a recession in the European Union may react similarly.

Within a difficult economic environment, raising new funds takes longer and may be less successful as current and prospective clients may be less able or willing to commit new funds to real estate investments, which are inherently less liquid than many competing investments. Additionally, certain clients may decide to manage all or a portion of their real estate investments with internal resources rather than hiring outside investment managers.

CURRENCY RESTRICTIONS AND EXCHANGE RATE FLUCTUATIONS.

We produce positive flows of cash in various countries and currencies that can be most effectively used to fund operations in other countries or to repay our indebtedness, which is currently primarily denominated in U.S. dollars. We face restrictions in certain countries that limit or prevent the transfer of funds to other countries or the exchange of the local currency to other currencies. We also face risks associated with fluctuations in currency exchange rates that may lead to a decline in the value of the funds produced in certain jurisdictions.

Additionally, although we operate globally, we report our results in U.S. dollars, and thus our reported results may be positively or negatively impacted by the strengthening or weakening of currencies against the U.S. dollar. As an

example, the euro and the pound sterling, each a currency used in a significant portion of our operations, have fluctuated significantly in recent years. For the years ended December 31, 2012 and 2011, 45% and 44% of our revenue, respectively, was attributable to operations with U.S. dollars as their functional currency. In addition to the potential negative impact on reported earnings, fluctuations in currencies relative to the U.S. dollar may make it more difficult to perform period-to-period comparisons of the reported results of operations.

Table of Contents

We are authorized to use currency-hedging instruments, including foreign currency forward contracts, purchased currency options and borrowings in foreign currency. There can be no assurance that such hedging will be economically effective. We do not use hedging instruments for speculative purposes.

As currency forward and option contracts are generally conducted off-exchange or over-the-counter (“OTC”), many of the safeguards accorded to participants on organized exchanges, such as the performance guarantee of an exchange clearing house, are generally unavailable in connection with OTC transactions. In addition, there can be no guarantee that the counterparty will fulfill its obligations under the contractual agreement, especially in the event of a bankruptcy or insolvency of the counterparty, which would effectively leave us unhedged.

The following table sets forth the revenue derived from our most significant currencies on a revenue basis (\$ in millions):

	2012	2011
United States dollar	\$ 1,754.1	1,563.7
British pound	516.1	453.1
Euro	482.7	480.2
Australian dollar	277.2	249.9
Japanese yen	139.9	125.8
Hong Kong dollar	98.0	93.2
Singapore dollar	94.0	92.1
Other currencies	570.8	526.5
Total revenue	\$ 3,932.8	3,584.5

In 2009 and 2010, many of the most significant governments worldwide enacted economic stimulus measures of various types. In 2011 and 2012 some of these same governments, particularly within the European Union, have instituted austerity measures designed to reduce sovereign indebtedness. Additionally, certain questions have arisen about the viability of the Euro and there has been speculation that some countries within the Eurozone may elect, or may be forced, to revert to the currency they issued prior to the establishment of the Euro. Due to these variables and many other variables, it is inherently difficult to predict how and when these complicated factors will affect the relative values of currencies and in any event we anticipate significant continuing volatility in currency exchange rates.

GREATER DIFFICULTY IN COLLECTING ACCOUNTS RECEIVABLE IN CERTAIN COUNTRIES AND REGIONS.

We face challenges in our ability to efficiently and/or effectively collect accounts receivable in certain countries and regions. For example, various countries have underdeveloped insolvency laws, and clients often are slow to pay. In some countries, clients typically tend to delay payments, reflecting a different business culture over which we do not necessarily have any control. Less-developed countries may have very lengthy or difficult judicial processes that can make collections through the court system more problematic than they would otherwise be.

Additionally, weakness in the global economy can put additional financial stress on clients and landlords, who sometimes are the parties that pay our commissions where we have placed a tenant representation client into their

buildings. This in turn can negatively impact our ability to collect our receivables fully or in a timely manner. We cannot be sure that the procedures we use to identify and rectify slowly paid receivables, and to protect ourselves against the insolvencies or bankruptcies of clients, landlords and other third parties with which we do business, which may involve placing liens on properties or litigating, will be effective in all cases.

Table of Contents

INCREASING FINANCIAL RISK OF COUNTERPARTIES, INCLUDING REFINANCING RISK.

The unprecedented disruptions and dynamic changes in the financial markets, and particularly insofar as they have led to major changes in the status and creditworthiness of some of the world's largest banks, investment banks and insurance companies, among others, have generally increased the counterparty risk to us from a financial standpoint, including with respect to:

obtaining new credit commitments from lenders,
refinancing credit commitments or loans that have terminated or matured according to their terms, including funds sponsored by our investment management subsidiary which use leverage in the ordinary course of their investment activities;
placing insurance;
engaging in hedging transactions; and
maintaining cash deposits or other investments, both our own and those we hold for the benefit of clients, which are generally much larger than the maximum amount of government-sponsored deposit insurance in effect for a particular account.

While these risks remain higher than they have been historically, we believe they have moderated as the financial markets have stabilized in recent years. During 2012 we also diversified some of the counterparty risk under our Facility by issuing the Senior Notes, the proceeds of which were initially used to reduce the outstanding loans under the Facility. We believe counter party financial risks still remain elevated due mainly to the potential liquidity issues within certain European financial institutions.

We generally attempt to conduct business with only the highest quality and most well-known counterparties, but there can be no assurance (1) that our efforts to evaluate their creditworthiness will be effective in all cases (particularly as the quality of credit ratings provided by the nationally recognized rating agencies has been called into question), (2) that we will always be able to obtain the full benefit of the financial commitments made to us by lenders, insurance companies, hedging counterparties or other organizations with which we do business or (3) that we will always be able to refinance existing indebtedness (or commitments to provide indebtedness) which has matured by its terms, including funds sponsored by our investment management subsidiary.

Additionally, the ability of government regulatory authorities to adequately monitor and regulate banks, investment banks, securities firms and insurance companies has also been significantly called into question during the recent downturn (for example, in identifying and preventing "pyramid schemes," "bubbles" in different asset classes and other potential systemic failures in a timely fashion), as the result of which the overall risk of unforeseeable financial loss from engaging in business with ostensibly regulated counterparties has increased.

POTENTIALLY ADVERSE TAX CONSEQUENCES; CHANGES IN TAX LEGISLATION AND TAX RATES.

Moving funds between countries can produce adverse tax consequences in the countries from which and to which funds are transferred, as well as in other countries, such as the United States, in which we have operations. Additionally, as our operations are global, we face challenges in effectively gaining a tax benefit for costs incurred in one country that benefit our operations in other countries.

Changes in tax legislation or tax rates may occur in one or more jurisdictions in which we operate that may materially increase the cost of operating our business. This includes the potential for significant legislative policy change in the taxation objectives with respect to the income of multinational corporations, as has recently been the subject of policy debate and proposals in the United States and the United Kingdom. Although we are uncertain as to the ultimate results, or what the effects will be on our businesses in particular, it is possible that some governments will make significant changes to their tax policies as part of their responses to their weakened economies. We face tax risks both

in our own business but also in the investment funds that LaSalle Investment Management operates. Adverse or unanticipated tax consequences to the funds can negatively impact fund performance, incentive fees and the value of co-investments that we have made.

We believe that tax authorities are generally increasing the level of examination activities of major corporations, which have also generally experienced more scrutiny in the media, such as the coverage of the U.K. tax positions of various companies late in 2012, and from activist groups such as the "Occupy Wall Street" movement that took place in a number of different locations during 2011 and continued into 2012.

Table of Contents

THE CHARTER AND THE BYLAWS OF JONES LANG LASALLE, OR THE MARYLAND GENERAL CORPORATION LAW, COULD DELAY, DEFER OR PREVENT A CHANGE OF CONTROL.

The charter and bylaws of Jones Lang LaSalle include provisions that may discourage, delay, defer or prevent a takeover attempt that may be in the best interest of Jones Lang LaSalle shareholders and may adversely affect the market price of our common stock.

The charter and bylaws provide for:

The ability of the board of directors to establish one or more classes and series of capital stock including the ability to issue up to 10,000,000 shares of preferred stock, and to determine the price, rights, preferences and privileges of such capital stock without any further shareholder approval;

A requirement that any shareholder action taken without a meeting be pursuant to unanimous written consent; and

Certain advance notice procedures for Jones Lang LaSalle shareholders nominating candidates for election to the Jones Lang LaSalle board of directors.

Under the Maryland General Corporate Law (the "MGCL"), certain "Business Combinations" (including a merger, consolidation, share exchange or, in certain circumstances, an asset transfer or issuance or reclassification of equity securities) between a Maryland corporation and any person who beneficially owns 10% or more of the voting power of the corporation's shares or an affiliate of the corporation who, at any time within the two-year period prior to the date in question, was the beneficial owner of 10% or more of the voting power of the then-outstanding voting stock of the corporation (an "Interested Shareholder") or an affiliate of the Interested Shareholder are prohibited for five years after the most recent date on which the Interested Shareholder became an Interested Shareholder. Thereafter, any such Business Combination must be recommended by the board of directors of such corporation and approved by the affirmative vote of at least (1) 80% of the votes entitled to be cast by holders of outstanding voting shares of the corporation and (2) 66 2/3% of the votes entitled to be cast by holders of outstanding voting shares of the corporation other than shares held by the Interested Shareholder with whom the Business Combination is to be effected, unless, among other things, the corporation's shareholders receive a minimum price (as defined in the "MGCL") for their shares and the consideration is received in cash or in the same form as previously paid by the Interested Shareholder for its shares. Pursuant to the MGCL, these provisions also do not apply to Business Combinations approved or exempted by the board of directors of the corporation prior to the time that the Interested Shareholder becomes an Interested Shareholder.

Human Resources Risk Factors, Including From Non-Employees

DIFFICULTIES AND COSTS OF STAFFING AND MANAGING INTERNATIONAL OPERATIONS.

The coordination and management of international operations pose additional costs and difficulties. We must manage operations that are in many time zones and that involve people with language and cultural differences. Our success depends on finding and retaining people capable of dealing with these challenges effectively, who will represent the Firm with the highest levels of integrity and who will communicate and cooperate well with colleagues and clients across multiple geographies. If we are unable to attract and retain qualified personnel, or to successfully plan for succession of employees holding key management positions, our growth may not be sustainable, and our business and operating results could suffer. These risks increase as we continue to grow as an organization and increase the number of staff, which has expanded significantly over the past decade.

Among the challenges we face in retaining our people is maintaining a compensation system that rewards them consistent with local market practices and with our profitability. This can be especially difficult where competitors may be attempting to gain market share by aggressively attempting to hire our best people at rates of compensation that are well above the current market level. Another continuing challenge we have is to maintain compensation systems that align financial incentives with our strategic goals as an organization and the business and ethics behaviors we want to drive among our people, while at the same time not create incentives to engage in overly risky business pursuits or behaviors.

Table of Contents

We have committed resources to effectively coordinate our business activities around the world to meet our clients' needs, whether they are local, regional or global. We also consistently attempt to enhance the establishment, organization and communication of corporate policies, particularly where we determine that the nature of our business poses the greatest risk of noncompliance. The failure of our people to carry out their responsibilities in accordance with our client contracts, our corporate and operating policies, or our standard operating procedures, or their negligence in doing so, could result in liability to clients or other third parties, which could have a material adverse effect. This is true not only with respect to individuals we employ directly, but also individuals who work for third party vendors whom we hire on behalf of clients, especially where we are acting in a principal capacity.

We believe these risks may be higher for our company than others given that the nature of our business requires our people to be spread across numerous corporate offices and client facilities globally, which makes communications and consistency of standards more challenging. Additionally, the nature of our global outsourcing business means that we regularly must on-board significant numbers of new staff at one time as part of the transition into our firm of new global accounts, which again makes communications of our policies and driving performance consistency particularly challenging.

An employee we hire may be subject to restrictions under employment agreements with previous employers that can restrict their activities, and therefore their contribution, for a period of time after they join us. For example, they may be prohibited from soliciting business from certain clients, or from soliciting other individuals to join us as employees.

The worldwide credit crisis and economic recession caused us to restructure certain parts of our business in 2009, and to a lesser degree during 2010, in order to size them properly relative to levels of business activity we expect in the markets in which we compete. These activities, which may recur in the future, present additional risks to the business. When addressing staffing in connection with a restructuring of our organization or a downturn in economic conditions or activity, we must take into account the employment laws of the countries in which actions are contemplated. In some cases, this can result in significant costs, time delays in implementing headcount reductions and, potentially, litigation regarding allegedly improper employment practices.

NONCOMPLIANCE WITH POLICIES; COMMUNICATIONS AND ENFORCEMENT OF OUR POLICIES AND OUR CODE OF BUSINESS ETHICS.

The geographic and cultural diversity in our organization makes it more challenging to communicate the importance of adherence to our Code of Business Ethics and our Vendor Code of Conduct, to monitor and enforce compliance with its provisions on a worldwide basis, and to ensure local compliance with United States and English laws that apply globally in certain circumstances. These include the Foreign Corrupt Practices Act, the Patriot Act and the Sarbanes-Oxley Act of 2002 in the United States and the Bribery Act in the United Kingdom.

Breaches of our Code of Business Ethics, particularly by our executive management, could have a material adverse effect. Breaches of our Vendor Code of Conduct by vendors whom we retain as a principal for client engagements can also lead to significant losses to clients from financial liabilities that might result.

EMPLOYEE, VENDOR AND THIRD-PARTY MISCONDUCT.

Like any business, we run the risk that employee fraud or other misconduct could occur. In a company such as ours with over 48,000 employees, it is not always possible to deter employee misconduct, and the precautions we take to prevent and detect this activity may not be effective in all cases. Employee misconduct, including fraud and involvement in in-coming or out-going bribery situations, can cause significant financial or reputational harm to any business, from which full recovery cannot be assured. We also may not have insurance that covers any losses in full or that covers losses from particular criminal acts.

Because we often hire third-party vendors and suppliers to perform services for our own account or for clients, we are also subject to the consequences of fraud, bribery or misconduct by employees of our vendors, which also can result in significant financial or reputational harm (even if we have been adequately protected from a legal standpoint). We have instituted a Vendor Code of Conduct, which is published in multiple languages on our public Web site, and which is intended to communicate to our vendors the standards of conduct we expect them to uphold.

Anecdotally, the risk that the Company will be the victim of fraud, both from employees and third parties, is generally thought to increase during times of general economic stress such as we experienced particularly during 2008 and 2009. An example of a third-party fraud would be attempts to draw on bank accounts by way of forged checks or by corporate identity theft, both of which we have increasingly experienced in recent years as attempts but without financial loss.

Table of Contents

SCRUTINY OF EXECUTIVE COMPENSATION PROGRAMS; INFLUENCE OF SHAREHOLDER ADVOCACY GROUPS.

In recent years, there has been increasing scrutiny of the executive compensation practices of all public companies in the United States. Shareholders have been given increasing rights to vote on the acceptability of pay practices and the issuance of equity compensation. Independent shareholder advocacy groups have also had increasing influence on the decisions of institutional investors on how to vote on executive compensation matters. In the event that these emerging circumstances result in changes to our pay practices or our ability to issue equity compensation to executives or otherwise to deduct executive compensation, we may have difficulty in retaining our executives or we could experience additional tax costs with respect to our compensation programs.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Our principal corporate holding company headquarters are located at 200 East Randolph Drive, Chicago, Illinois, where we currently occupy over 165,000 square feet of office space pursuant to a lease that expires in May 2017. Our regional headquarters for our Americas, EMEA and Asia Pacific businesses are located in Chicago, London and Singapore, respectively. We have over 200 corporate offices worldwide located in most major cities and metropolitan areas as follows: 83 offices in 8 countries in the Americas (including 67 in the United States), 78 offices in 32 countries in EMEA and 63 offices in 14 countries in Asia Pacific. In addition, we have on-site property and corporate offices located throughout the world. On-site property management offices are generally located within properties that we manage and are provided to us without cost.

ITEM 3. LEGAL PROCEEDINGS

The Company has contingent liabilities from various pending claims and litigation matters arising in the ordinary course of business, some of which involve claims for damages that are substantial in amount. Many of these matters are covered by insurance (including insurance provided through a captive insurance company), although they may nevertheless be subject to large deductibles or retentions, and the amounts being claimed may exceed the available insurance. Although the ultimate liability for these matters cannot be determined, based upon information currently available, we believe the ultimate resolution of such claims and litigation will not have a material adverse effect on our financial position, results of operations or liquidity.

Table of Contents**ITEM 5. MARKET FOR REGISTRANT’S COMMON EQUITY, RELATED SHAREHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

Our common stock is listed for trading on the New York Stock Exchange under the symbol “JLL.”

As of February 11, 2013, there were 47,029 beneficial holders of our common stock.

The following table sets forth the high and low daily closing prices of our common stock as reported on the New York Stock Exchange.

	HIGH	LOW
2012		
Fourth Quarter	\$ 86.16	\$ 73.53
Third Quarter	\$ 83.81	\$ 64.67
Second Quarter	\$ 85.09	\$ 66.56
First Quarter	\$ 87.08	\$ 63.21
2011		
Fourth Quarter	\$ 69.87	\$ 47.04
Third Quarter	\$ 99.26	\$ 49.77
Second Quarter	\$ 107.72	\$ 88.25
First Quarter	\$ 102.57	\$ 84.39

Dividends

On December 14, 2012, we paid a semi-annual dividend of \$0.20 per share of our common stock to holders of record at the close of business on November 15, 2012. The Company also paid a cash dividend of \$0.20 per share of its common stock on June 15, 2012, to holders of record at the close of business on May 15, 2012. At the Company’s discretion, a dividend-equivalent in the same amount was also paid simultaneously on outstanding but unvested restricted stock units granted under the Company’s Stock Award and Incentive Plan. There can be no assurance that future dividends will be declared since the actual declaration of future dividends and the establishment of record and payment dates remains subject to final determination by the Company’s Board of Directors.

(1) EBITDA represents earnings before interest expense, net of interest income, income taxes, depreciation and amortization. Although EBITDA is a non-GAAP financial measure, it is used extensively by management and is useful to investors and lenders as one of the primary metrics for evaluating debt, to sustain potential future increases in debt and to satisfy capital requirements. EBITDA also is used in the calculations of certain covenants related to our revolving credit facility. However, EBITDA should not be considered as an alternative either to net income (loss) available to common shareholders or net cash provided by operating activities, both of which are determined in accordance with U.S. generally accepted accounting principles ("U.S. GAAP"). Because EBITDA is not calculated under U.S. GAAP, our EBITDA may not be comparable to similarly titled measures used by other companies.

Below is a reconciliation of our net income (loss) to EBITDA (\$ in thousands):

	YEAR ENDED DECEMBER 31,				
	2012	2011	2010	2009	2008
Net income (loss) available to common shareholders	\$207,556	163,997	153,524	(4,109)	83,515
Interest expense, net of interest income	35,173	35,591	45,802	55,018	30,568
Provision for income taxes	69,244	56,387	49,038	5,677	28,743
Depreciation and amortization	78,810	82,832	71,573	83,335	90,584
EBITDA	\$390,783	338,807	319,937	139,921	233,410

Below is a reconciliation of our net cash provided by operating activities, the most comparable cash flow measure on the statements of cash flows, to EBITDA (\$ in thousands):

	YEAR ENDED DECEMBER 31,				
	2012	2011	2010	2009	2008

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis should be read in conjunction with our Selected Financial Data and Consolidated Financial Statements, including the notes thereto, appearing elsewhere in this Form 10-K. The following discussion and analysis contains certain forward-looking statements generally identified by the words anticipates, believes, estimates, expects, plans, intends and other similar expressions. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause Jones Lang LaSalle's actual results, performance, achievements, plans and objectives to be materially different from any future results, performance, achievements, plans and objectives expressed or implied by such forward-looking statements. See the Cautionary Note Regarding Forward-Looking Statements after Part IV, Item 15. Exhibits and Financial Statement Schedules.

We present our Management's Discussion and Analysis in six sections, as follows:

- (1) An executive summary of our business;
- (2) A summary of our critical accounting policies and estimates;
- (3) Certain items affecting the comparability of results and certain market and other risks that we face;
- (4) The results of our operations, first on a consolidated basis and then for each of our business segments;
 - (5) Consolidated cash flows; and
 - (6) Liquidity and capital resources.

EXECUTIVE SUMMARY

Jones Lang LaSalle provides comprehensive integrated real estate and investment management expertise on a local, regional and global level to owner, occupier, investor clients and developers. We are an industry leader in property and corporate facility management services, with a portfolio of approximately 2.6 billion square feet worldwide. We deliver our array of Real Estate Services ("RES") product offerings across our three geographic business segments: (1) the Americas, (2) Europe, Middle East and Africa ("EMEA"), and (3) Asia Pacific. Our fourth business segment, LaSalle Investment Management, a member of the Jones Lang LaSalle group, is one of the world's largest and most diversified real estate investment management firms, with approximately \$47.0 billion of assets under management across the globe.

In 2012, we generated revenue of \$3.9 billion across our four business segments. In addition to U.S. dollars, we also generated revenue in euros, British pounds, Australian dollars, Japanese yen, Hong Kong dollars, Singapore dollars and a variety of other currencies.

Table of Contents

The broad range of real estate services we offer includes:

Agency leasing	Investment management
Tenant representation	Real estate investment banking / merchant banking
Property management	Corporate finance
Facilities management / outsourcing	Hotel / hospitality advisory
Project and development management / construction	Energy and sustainability services
Valuations	Value recovery and receivership services
Consulting	Logistics and supply chain management
Capital markets	

We offer these services locally, regionally and globally to real estate owners, occupiers, investors and developers for a variety of property types, including:

Offices	Multi-family residential and military housing
Hotels	Critical environments and data centers
Industrial properties	Sports facilities
Retail properties	Cultural facilities
Healthcare and laboratory facilities	Transportation centers
Government facilities	Educational facilities

Individual regions and markets may focus on different property types to a greater or lesser extent depending on local requirements, market conditions and the opportunities we perceive.

We work for a broad range of clients that represent a wide variety of industries and are based in markets throughout the world. Our clients vary greatly in size. They include for-profit and not-for-profit entities of all kinds, public-private partnerships and governmental (“public sector”) entities. Increasingly, we are offering services to smaller middle-market companies that are looking to outsource real estate services. Through our LaSalle Investment Management subsidiary, we invest for clients on a global basis in both publicly traded real estate securities and private assets.

See Item 1. Business for additional information on the services we provide, as well as our “Value Drivers for Growth and Superior Client Service,” our “Global Strategic Priorities,” our “Competitive Differentiators,” and “Industry Trends.” See also Item 1A. Risk Factors “Currency Restrictions and Exchange Rate Fluctuations” for discussion of the Eurozone crisis.

SUMMARY OF CRITICAL ACCOUNTING POLICIES AND ESTIMATES

An understanding of our accounting policies is necessary for a complete analysis of our results, financial position, liquidity and trends. The preparation of our financial statements requires management to make certain critical accounting estimates that impact (1) the stated amount of assets and liabilities, (2) disclosure of contingent assets and liabilities at the date of the financial statements, and (3) the reported amounts of revenue and expenses during the reporting periods. These accounting estimates are based on management’s judgment. We consider them to be critical because of their significance to the financial statements and the possibility that future events may differ from current judgments, or that the use of different assumptions could result in materially different estimates. We review these estimates on a periodic basis to ensure reasonableness. Although actual amounts likely differ from such estimated

amounts, we believe such differences are not likely to be material.

Revenue Recognition

The SEC's Staff Accounting Bulletin No. 101, "Revenue Recognition in Financial Statements" ("SAB 101"), as amended by SAB 104, provides guidance on the application of U.S. generally accepted accounting principles ("U.S. GAAP") to selected revenue recognition issues. Additionally, the FASB's Accounting Standards Codification ("ASC") 605-45, "Principal and Agent Considerations," provides guidance when accounting for reimbursements received from clients.

Table of Contents

We earn revenue from the following principal sources:

Transaction commissions;
Advisory and management fees;
Incentive fees;
Project and development management fees; and
Construction management fees.

For a detailed discussion on our revenue recognition policies see the Revenue Recognition section of Note 2, Summary of Significant Accounting Policies, of the Notes to Consolidated Financial Statements.

Allowance for Uncollectible Accounts Receivable

We estimate the allowance necessary to provide for uncollectible accounts receivable. This estimate includes specific accounts from which payment has become unlikely. We also base this estimate on historical experience, combined with a careful review of current developments and with a strong focus on credit quality. The process by which we calculate the allowance begins in the individual business units where specific uncertain accounts are identified and reserved as part of an overall reserve that is formulaic and driven by the age profile of the receivables and our historical experience. We then review these allowances on a quarterly basis to ensure they are appropriate. As part of this review, we develop a range of potential allowances on a consistent formulaic basis. Our allowance for uncollectible accounts receivable as determined under this methodology was \$19.5 million and \$20.6 million at December 31, 2012 and 2011, respectively.

Bad debt expense was \$6.6 million, \$10.3 million, and \$7.1 million for the years ended December 31, 2012, 2011 and 2010, respectively. We believe that we have an adequate reserve for our accounts receivables at December 31, 2012 given the current economic conditions and the credit quality of our clients. However, changes in our estimates of collectability could significantly impact our bad debt expense in the future. For additional information on our allowance for uncollectible accounts see the Accounts Receivable section of Note 2, Summary of Significant Accounting Policies, of the Notes to Consolidated Financial Statements.

Asset Impairments

The property and equipment we use in our business substantially consists of computer equipment and software; leasehold improvements; and furniture, fixtures and equipment. We have recorded goodwill and other identified intangibles from a series of acquisitions. We also invest in certain real estate ventures that own and operate commercial real estate. Typically, these are co-investments in funds that our Investment Management business establishes in the ordinary course of business for its clients. These investments include non-controlling ownership interests generally ranging from less than 1% to 15% of the respective ventures. These investments are accounted for under the equity method of accounting or at fair value in the accompanying Consolidated Financial Statements due to the nature of our non-controlling ownership.

Goodwill—Historically, we have grown, in part, through a series of acquisitions. Consistent with the services nature of the businesses we have acquired, the largest asset on our balance sheet is goodwill. We do not amortize this goodwill; instead, we evaluate goodwill for impairment at least annually. In September 2011, the FASB issued ASU 2011-08, “Testing Goodwill for Impairment.” ASU 2011-08 permits an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test.

We have used qualitative factors in accordance with the provisions of ASU 2011-08, with respect to the performance of our annual impairment test of goodwill in 2012 and 2011. We determined that no indicators of impairment existed primarily because (1) our market capitalization has consistently exceeded our carrying value by a significant margin,

(2) our overall financial performance has been solid in the face of mixed economic environments, and (3) forecasts of operating income and cash flows generated by our reporting units appear sufficient to support the carrying values of the net assets of each reporting unit. In addition to our annual impairment evaluation, we consider whether events or circumstances have occurred in the period subsequent to our annual impairment testing which indicate that it is more likely than not an impairment loss has occurred.

Table of Contents

For additional information on goodwill and intangible asset impairment testing see the Business Combinations, Goodwill and Other Intangible Assets section of Note 2 Summary of Significant Accounting Policies of the Notes to Consolidated Financial Statements.

Investments in Real Estate Ventures— We review investments in real estate ventures accounted for under the equity method on a quarterly basis for indications of whether we may not be able to recover the carrying value of the real estate assets underlying our Investments in real estate ventures and whether our equity investments are other than temporarily impaired. When events or changes in circumstances indicate that the carrying amount of a real estate asset underlying one of our investments in real estate ventures may be impaired, we review the recoverability of the carrying amount of the real estate asset in comparison to an estimate of the future undiscounted cash flows expected to be generated by the underlying asset. When the carrying amount of the real estate asset is in excess of the future undiscounted cash flows, we use a discounted cash flow approach to determine the fair value of the asset in computing the amount of the impairment. We then record the portion of the impairment loss related to our investment in the reporting period within Equity earnings (losses) from real estate ventures on our consolidated statements of comprehensive income. Additionally, we consider a number of factors, including our share of investment cash flows and the fair value of our investments, in determining whether or not our equity investment is other than temporarily impaired.

Equity earnings (losses) from real estate ventures included impairment charges of \$7.9 million, \$5.6 million and \$13.6 million for the years ended December 31, 2012, 2011 and 2010, respectively, representing our equity share of the impairment charges against individual assets held by our real estate ventures. Declines in real estate markets adversely impacted our rental income assumptions and forecasted exit capitalization rates, resulting in our determination that certain real estate investments had become impaired. It is reasonably possible that if real estate values decline, we may sustain additional impairment charges on our Investments in real estate ventures in future periods.

For investments in real estate ventures for which the fair value option has been elected, our investment is increased or decreased each reporting period by the difference between the fair value of the investment and the carrying value at the balance sheet date. These fair value adjustments are reflected as gains or losses in our consolidated statements of comprehensive income within Equity in earnings (losses) from real estate ventures. For the years ended December 31, 2012 and 2011, fair value gains of \$3.1 million and \$0.6 million, respectively, were included in Equity in earnings (losses). No fair adjustments were recognized in Equity in earnings (losses) in 2010.

Income Taxes

We account for income taxes under the asset and liability method. We recognize deferred tax assets and liabilities for the future tax consequences attributable to (1) differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases, and (2) operating loss and tax credit carryforwards. We measure deferred tax assets and liabilities using the enacted tax rates expected to apply to taxable income in the years in which we expect those temporary differences to be recovered or settled. We recognize into income the effect on deferred tax assets and liabilities of a change in tax rates in the period that includes the enactment date.

Because of the global and cross border nature of our business, our corporate tax position is complex. We generally provide for taxes in each tax jurisdiction in which we operate based on local tax regulations and rules. Such taxes are provided on net earnings and include the provision of taxes on substantively all differences between financial statement amounts and amounts used in tax returns, excluding certain non-deductible items and permanent differences.

Table of Contents

Our global effective tax rate is sensitive to the complexity of our operations as well as to changes in the mix of our geographic profitability. Local statutory tax rates range from 10% to 41% in the countries in which we have significant operations. We evaluate our estimated effective tax rate on a quarterly basis to reflect forecast changes in:

- (1) Our geographic mix of income;
- (2) Legislative actions on statutory tax rates;
- (3) The impact of tax planning to reduce losses in jurisdictions where we cannot recognize the tax benefit of those losses; and
- (4) Tax planning for jurisdictions affected by double taxation.

We reflect the benefit from tax planning when we believe it is probable that it will be successful, which usually requires that certain actions have been initiated. We provide for the effects of income taxes on interim financial statements based on our estimate of the effective tax rate for the full year.

Our effective tax rates for years ended December 31 2012, 2011 and 2010 were 24.9%, 25.4% and 24.1%, respectively, which reflected our continued disciplined management of our global tax position. Lower tax rate jurisdictions (those with effective national and local combined tax rates of 25% or lower) with meaningful contributions to our effective tax rate include; The Netherlands (25%), The People’s Republic of China (25%), Switzerland (21.1%), Russia (20%), Poland (19%), Singapore (17%), Hong Kong (16.5%), Macau (12%) and Cyprus (10%).

Based on our historical experience and future business plans, we do not expect to repatriate our foreign source earnings to the United States. As a result, we have not provided deferred taxes on such earnings or the difference between tax rates in the United States and the various international jurisdictions where we earn such amounts. Further, there are various limitations on our ability to utilize foreign tax credits on such earnings when we repatriate them. As such, we may incur taxes in the United States upon repatriation without credits for foreign taxes paid on such earnings.

We have not provided a deferred U.S. tax liability on the unremitted earnings of international subsidiaries because it is our intent to permanently reinvest such earnings outside of the United States. If repatriation of all such earnings were to occur, we estimate that our resulting U.S. tax liability would be approximately \$74 million, net of the benefits of foreign tax credits and net operating loss carryovers. We believe that our policy of permanently reinvesting earnings of foreign subsidiaries does not significantly impact our liquidity.

We have established valuation allowances against deferred tax assets where expected future taxable income does not support their realization on a more likely than not basis. We formally assess the likelihood of being able to utilize current tax losses in the future on a country-by-country basis, with the determination of each quarter’s income tax provision. We establish or increase valuation allowances upon specific indications that the carrying value of a tax asset may not be recoverable. Alternatively, we reduce valuation allowances upon (1) specific indications that the carrying value of the tax asset is more likely than not recoverable or (2) the implementation of tax planning strategies allowing an asset we previously determined not realizable to be viewed as realizable.

The table below summarizes certain information regarding the gross deferred tax assets and valuation allowance as of December 31, 2012 and 2011 (\$ in millions):

	2012	2011
Gross deferred tax assets	\$ 380.1	353.0
	53.8	38.8

Table of Contents

At December 31, 2012 the amount of unrecognized tax benefits was \$87.2 million. We believe it is reasonably possible that \$65.2 million of these gross unrecognized tax benefits will be settled within twelve months after December 31, 2012, of which \$47.3 million will be net settled against a related receivable. These settlements may occur due to the conclusion of examinations by tax authorities. We further expect that the amount of unrecognized tax benefits will continue to change as the result of ongoing operations, the outcomes of audits, and the passing of statutes of limitations. We do not expect such changes to have a significant impact on the results of operations or the financial position of the Company. We do not believe that we have material tax positions for which the ultimate deductibility is highly certain but for which there is uncertainty about the timing of such deductibility.

Self-Insurance Programs

In our Americas business we have chosen to retain certain risks regarding health insurance and workers' compensation rather than purchase third-party insurance. Estimating our exposure to such risks involves subjective judgments about future developments.

We supplement our traditional global insurance program by the use of a captive insurance company to provide professional indemnity and employment practices insurance on a "claims made" basis. Professional indemnity claims can be complex and take a number of years to resolve, and it can be difficult to accurately estimate the ultimate cost of these claims.

Health Insurance—We self-insure our health benefits for all U.S.-based employees, although we purchase stop-loss coverage on an annual basis to limit our exposure. We self-insure because we believe that on the basis of our historic claims experience, the demographics of our workforce and trends in the health insurance industry, we incur reduced expense by self-insuring our health benefits as opposed to purchasing health insurance through a third party. We estimate our likely full-year cost at the beginning of the year and expense this cost on a straight-line basis throughout the year. In the fourth quarter, we estimate the required reserve for unpaid health costs we would need at year-end. Given the nature of medical claims, it may take up to 24 months for claims to be processed and recorded. The accrual balance for the 2012 program was \$10.2 million at December 31, 2012, and the accrual balance for the 2011 program was \$11.5 million at December 31, 2011.

The table below sets out certain information related to the cost of the health insurance program for the years ended December 31, 2012, 2011 and 2010 (\$ in millions):

	2012	2011	2010
Expense to Company	\$ 26.7	23.8	21.9
Employee contributions	10.4	9.4	7.7
Adjustment to prior year reserve	(2.7)	0.4	(0.9)
Total program cost	\$ 34.4	33.6	28.7

Workers' Compensation Insurance—We are self-insured for workers' compensation insurance claims because our workforce has historically experienced fewer claims than is normal for our industry. We purchase stop-loss coverage to limit our exposure to large, individual claims. We accrue workers' compensation expense based on the applicable state's rate and job classifications. On an annual basis in the third quarter, we engage in a comprehensive analysis to develop a range of potential exposure, and considering actual experience, we reserve within that range. We accrue the estimated adjustment to income for the differences between this estimate and our reserve. There were no material adjustments recorded for the year ended December 31, 2012. The adjustments taken to income for the years ended December 31, 2011 and 2010 were credits of \$4.8 million and \$5.0 million, respectively. Our accruals for worker compensation insurance claims, which can relate to multiple years, were \$20.7 million and \$17.5 million at December 31, 2012 and 2011, respectively.

Table of Contents

The table below sets out the range and our actual reserve for the past three years (\$ in millions):

	MAXIMUM RESERVE	MINIMUM RESERVE	ACTUAL RESERVE
December 31, 2012	\$ 20.7	18.3	20.7
December 31, 2011	17.5	15.4	17.5
December 31, 2010	15.9	13.3	15.9

Given the uncertain nature of claim reporting and settlement patterns associated with workers' compensation insurance, we have accrued at the higher end of the range.

Captive Insurance Company—In order to better manage our global insurance program and support our risk management efforts, we supplement our traditional insurance program by the use of a wholly-owned captive insurance company to provide professional indemnity and employment practice liability insurance coverage on a "claims made" basis. The level of risk retained by our captive insurance company, with respect to professional indemnity claims, is up to \$2.5 million per claim. The accruals for professional indemnity claims facilitated through our captive insurance company, which relate to multiple years, were \$1.6 million and \$1.0 million, as of December 31, 2012 and 2011, respectively.

Professional indemnity insurance claims can be complex and take a number of years to resolve. Within our captive insurance company, we estimate the ultimate cost of these claims by way of specific claim accruals developed through periodic reviews of the circumstances of individual claims. When a potential loss event occurs, management estimates the ultimate cost of the claims and accrues the related cost when probable and estimable.

NEW ACCOUNTING STANDARDS

See New Accounting Standards section of Note 2 of the Notes to Consolidated Financial Statements.

ITEMS AFFECTING COMPARABILITY**Macroeconomic Conditions**

Our results of operations and the variability of these results are significantly influenced by macroeconomic trends, the geo-political environment, the global and regional real estate markets and the financial and credit markets. These macroeconomic conditions have had, and we expect to continue to have, a significant impact on the variability of our results of operations.

LaSalle Investment Management Revenue

Our Investment Management business is in part compensated through the receipt of incentive fees where performance of underlying funds' investments exceeds agreed-to benchmark levels. Depending upon performance and the contractual timing of measurement periods with clients, these fees can be significant and vary substantially from period to period.

Equity in earnings (losses) from real estate ventures also may vary substantially from period to period for a variety of reasons, including as a result of: (1) impairment charges, (2) realized gains on asset dispositions or (3) incentive fees recorded as equity earnings. The timing of recognition of these items may impact comparability between quarters, in any one year, or compared to a prior year.

The comparability of these items can be seen in Note 3 of the Notes to Consolidated Financial Statements and is discussed further in Segment Operating Results included herein.

Transactional-Based Revenue

Transactional-based fees for real estate investment banking, capital markets activities and other services within our Real Estate Services businesses increase the variability of the revenue we receive that relates to the size and timing of our clients' transactions. In 2008 and 2009, Capital Market transactions decreased sharply due to deteriorating economic conditions and the global credit crisis. Despite continued uncertainty and variable market conditions, Capital Market transactions have generally increased in number as economic conditions have generally improved over the last three years. The timing and the magnitude of these fees can vary significantly from year to year and quarter to quarter, and from region to region.

Table of Contents

Termination of Stock Ownership Program

We terminated our Stock Ownership Program (the “SOP”) in connection with incentive compensation (or “bonus”) payments for 2012 performance and beyond. Since the start of the SOP, our employee population has grown significantly and other aspects of our compensation programs have evolved, as a result of which we have determined that (1) there are other more targeted and strategic approaches we can take in order to enhance our equity incentive compensation programs, and (2) we can do so in a way that will be less dilutive to shareholders than the SOP would be if we continued this plan.

In prior years, the SOP was a mandatory element of the incentive compensation for approximately the senior-most 5% of the Company’s employees. The SOP generally required that from 10% to 20% of incentive compensation, including annual bonuses and periodic commission payments, be deferred and delivered in restricted stock units, rather than paid immediately in cash. Half of the restricted stock units granted under the SOP vested eighteen months from January 1st in the year following the year of performance, and the remaining half vested thirty months from that date. We amortized related compensation cost to expense over the service period consisting of the 12 months of the year to which payment of restricted stock relates, plus the periods over which the restricted stock units vest.

Although we have terminated the SOP, we will continue to require at least 15% of annual incentive compensation for members of the Global Executive Committee to be paid in restricted stock units, and we will continue to amortize related compensation costs to expense over the service period consisting of the 12 months of the year to which payment of restricted stock relates, plus the period over which the restricted stock units vest.

In prior years the SOP resulted in the deferral of applicable incentive compensation over the service period, whereas the termination of this program resulted in all incentive compensation expense for 2012 being recognized in 2012, with no SOP deferral as we have recognized in prior years. If the SOP had been eliminated for the years ended December 31, 2011 and 2010, the comparative impact on our operating results would have been to increase compensation expense \$12.4 million and \$9.8 million, respectively. We estimate that the termination of the SOP plan resulted in approximately \$11.2 million of accelerated compensation costs in 2012.

Foreign Currency

We conduct business using a variety of currencies but we report our results in U.S. dollars. As a result, the volatility of currencies against the U.S. dollar may positively or negatively impact our results. This volatility can make it more difficult to perform period-to-period comparisons of the reported U.S. dollar results of operations, because such results may indicate a growth or decline rate that might not have been consistent with the real underlying growth or decline rate in the local operations. Consequently, we provide information about the impact of foreign currencies in the period-to-period comparisons of the reported results of operations in our discussion and analysis of financial condition in the Results of Operations section below.

MARKET RISKS

Market Risk

The principal market risks we face due to the risk of loss arising from adverse changes in market rates and prices are:

Interest rates on our credit facilities; and
Foreign exchange risks.

In the normal course of business, we manage these risks through a variety of strategies, including hedging transactions using various derivative financial instruments such as foreign currency forward contracts. We enter into derivative instruments with high credit-quality counterparties and diversify our positions across such counterparties in order to reduce our exposure to credit losses. We do not enter into derivative transactions for trading or speculative purposes.

Interest Rates

We centrally manage our debt, considering investment opportunities and risks, tax consequences and overall financing strategies. We are primarily exposed to interest rate risk on our \$1.1 billion revolving credit facility (the "Facility"), consisting of revolving credit that is available for working capital, investments, capital expenditures and acquisitions. Our average outstanding borrowings under the Facility were \$621.2 million during 2012 with an effective interest rate of 1.6%. As of December 31, 2012, we had \$169.0 million outstanding under the Facility. The Facility bears a variable rate of interest based on market rates.

Table of Contents

In November 2012, in an underwritten public offering, we issued \$275.0 million of Long-term senior notes due November 2022 (the “Notes”). The Notes bear interest at an annual rate of 4.4%, subject to adjustment if a credit rating assigned to the Notes is downgraded below an investment grade rating (or subsequently upgraded). The issuance of these Notes at a fixed interest rate has helped to limit the Company’s exposure to future movements in interest rates.

Our overall interest rate risk management objective is to limit the impact of interest rate changes on earnings and cash flows and to lower our overall borrowing costs. To achieve this objective, in the past we have entered into derivative financial instruments such as interest rate swap agreements when appropriate and we may do so in the future. We did not enter into such agreements in the prior three years and we had no such agreements outstanding at December 31, 2012.

Foreign Exchange

Foreign exchange risk is the risk that we will incur economic losses due to adverse changes in foreign currency exchange rates. Our revenue from outside of the United States totaled 55% and 56% of our total revenue for 2012 and 2011, respectively. Operating in international markets means that we are exposed to movements in foreign exchange rates, most significantly by the euro (12% of revenue for 2012) and the British pound (13% of revenue for 2012).

We mitigate our foreign currency exchange risk principally by (1) establishing local operations in the markets we serve and (2) invoicing customers in the same currency as the source of the costs. The impact of translating expenses incurred in foreign currencies back into U.S. dollars offsets the impact of translating revenue earned in foreign currencies back into U.S. dollars. In addition, British pound and Singapore dollar expenses incurred as a result of our regional headquarters being located in London and Singapore, respectively, act as a partial operational hedge against our translation exposures to British pounds and Singapore dollars.

We enter into forward foreign currency exchange contracts to manage currency risks associated with intercompany loan balances. At December 31, 2012, we had forward exchange contracts in effect with a gross notional value of \$1.95 billion (\$886.6 million on a net basis) and a net fair value loss of \$5.7 million. This net carrying loss is offset by a carrying gain in associated intercompany loans such that the net impact to earnings is not significant.

Although we operate globally, we report our results in U.S. dollars. As a result, the strengthening or weakening of the U.S. dollar may positively or negatively impact our reported results. The following table sets forth the revenue derived from our most significant currencies on a revenue basis (\$ in millions):

	2012	2011
United States dollar	\$ 1,754.1	1,563.7
British pound	516.1	453.1
Euro	482.7	480.2
Australian dollar	277.2	249.9
Japanese yen	139.9	125.8
Hong Kong dollar	98.0	93.2
Singapore dollar	94.0	92.1
Other currencies	570.8	526.5
Total revenue	\$ 3,932.8	3,584.5

We estimate that had euro-to-U.S. dollar exchange rates been 10% higher throughout the course of 2012, our reported operating income would have increased by \$3.6 million. Had the British pound-to-U.S. dollar exchange rates been 10% higher throughout the course of 2012, our reported operating income would have decreased by \$1.1 million. These hypothetical calculations estimate the impact of translating results into U.S. dollars and do not include an estimate of the impact a 10% increase in the U.S. dollar against other currencies would have on our foreign operations.

Table of Contents

Seasonality

Our quarterly revenue and profits tend to grow progressively by quarter throughout the year. This is a result of a general focus in the real estate industry on completing or documenting transactions by calendar-year-end and the fact that certain expenses are constant through the year. Historically, we have reported an operating loss or a relatively small profit in the first quarter and then increasingly larger profits during each of the following three quarters, excluding the recognition of investment-generated performance fees and co-investment equity gains or losses (both of which can be unpredictable). Such performance fees and co-investment equity gains or losses are generally recognized when assets are sold, the timing of which is geared toward the benefit of our clients. Non-variable operating expenses, which are treated as expenses when they are incurred during the year, are relatively constant on a quarterly basis.

RESULTS OF OPERATIONS

We operate in a variety of currencies but report our results in U.S. dollars, thus the volatility of these currencies against the U.S. dollar may positively or negatively impact our reported results. This volatility may result in the reported U.S. dollar revenue and expenses showing increases or decreases between years that may not be consistent with the real underlying increases or decreases in local currency operations. In order to provide more meaningful year-to-year comparisons of our reported results, we have included detail of the movements in certain reported lines of the Consolidated Statement of Comprehensive Income in both U.S. dollars and in local currencies in the tables throughout this section.

Reclassifications

We report Equity in earnings (losses) from real estate ventures in the Consolidated Statement of Operations after Operating income. However, for segment reporting we reflect Equity in earnings (losses) from real estate ventures within Total revenue. See Note 3 of the Notes to Consolidated Financial Statements for Equity earnings (losses) reflected within segment revenue, as well as discussion of how the Chief Operating Decision Maker (as defined in Note 3) measures segment results with Equity earnings (losses) included in segment revenue.

Table of Contents

Year Ended December 31, 2012 Compared to Year Ended December 31, 2011

(\$ IN MILLIONS)	Twelve Months Ended December 31, 2012	Twelve Months Ended December 31, 2011	Change in U.S. dollars		% Change in Local Currency	
Revenue

REVENUE

In 2012, revenue grew 10%, 12% in local currency, driven by both Leasing and continued growth in Property & Facility Management. Leasing revenue grew 9% in local currency, with the largest growth in the Americas. Property & Facility Management fee revenue grew 13% in local currency, also led by the Americas, which increased 15% in local currency, followed by a 13% local currency increase in Asia Pacific. LaSalle Investment Management's advisory fees decreased from 2011 due to significant asset and portfolio sales, but have remained consistent throughout each quarter of 2012. LaSalle generated \$23 million of incentive fees and \$24 million of equity earnings during 2012.

OPERATING EXPENSES

Operating expenses, excluding gross contract costs, were \$3.2 billion for the year, an increase of 8%, 10% in local currency, compared with \$3.0 billion in 2011. This increase was driven by higher variable compensation resulting from improved Leasing revenue, as well as higher compensation resulting from increased headcount primarily to service new and expanded Property & Facility Management contracts. Compensation expense was further impacted by (1) the Firm's decision to eliminate its Stock Ownership Program ("SOP"), which resulted in approximately \$11 million of accelerated compensation expense in the current year, a timing difference rather than a permanent increase in compensation, as well as (2) a timing difference of \$5 million related to the acceleration of the final deferred payment for the Staubach acquisition and extension of employment agreements with the majority of the Staubach shareholders who are working in the Firm.

Full-year results included \$45 million of restructuring and acquisition charges, principally related to integration and retention costs for the second-quarter 2011 acquisition of King Sturge, but also including severance and lease exit costs in targeted areas of the business that are anticipated to remain economically challenged for an extended period of time.

Table of Contents

INTEREST EXPENSE

Net interest expense remained relatively unchanged at \$35 million for 2012 and \$36 million for 2011. The decrease in interest expense was due to a reduction in accretive interest on lower Deferred acquisition obligation balances, and partially off-set by higher average borrowings under our credit facility and by interest expense on our newly issued Long-term senior notes.

EQUITY EARNINGS FROM REAL ESTATE VENTURES

In 2012, we recognized equity earnings of \$24 million from our investments in real estate ventures, compared to \$6 million in 2011. This increase in equity earnings was due primarily to gains generated from assets sales in the first and third quarters of 2012.

PROVISION FOR INCOME TAXES

The provision for income taxes was \$69 million in 2012, resulting in an effective tax rate of 24.9%. See the Income Tax discussion in the Summary of Critical Accounting Policies and Estimates and Note 8 of the Notes to Consolidated Financial Statements for a further discussion of our effective tax rate.

NET INCOME

Net income available to common shareholders for 2012 was \$208 million, or \$4.63 per diluted average share, compared to a net income of \$164 million, or \$3.70 per diluted average share for 2011.

SEGMENT OPERATING RESULTS

We manage and report our operations as four business segments:

The three geographic regions of Real Estate Services (“RES”):

- (1) Americas,
 - (2) Europe, Middle East and Africa (“EMEA”), and
 - (3) Asia Pacific;
- and
- (4) Investment Management, which offers investment management services on a global basis.

Each geographic region offers our full range of Real Estate Services (“RES”), including tenant representation and agency leasing, capital markets and hotels, property management, facility management, project and development services, and advisory, consulting and valuation services. We consider “property management” to be services provided to non-occupying property investors and “facility management” to be services provided to owner-occupiers. The Investment Management segment provides investment management services to institutional investors and high-net-worth individuals.

For segment reporting, we show revenue net of gross contract costs in our RES segments. Excluding these costs from revenue and expenses in a “net” presentation of “fee revenue” and “fee-based operating expense” more accurately reflects how we manage our expense base and operating margins. See Note 2, Revenue Recognition, of the Notes to Consolidated Financial Statements for additional information on our gross and net accounting. For segment reporting we also show Equity in earnings (losses) from real estate ventures within our revenue line, since it is an integral part of our Investment Management segment. Finally, our measure of segment reporting results also excludes restructuring charges and certain acquisition related costs.

(n.m. - not meaningful)

Revenue for the Americas region in 2012 was \$1.7 billion, an increase of 15% from 2011. On a fee revenue basis, revenue increased 11% in local currency. The most significant increases were in Capital Markets & Hotels, which increased 25% in local currency, and Property & Facility Management, which increased 15% in local currency. Leasing revenue increased 9% despite overall office leasing volumes dropping 20% in the United States.

Total operating expenses were \$1.6 billion for the year, a 16% increase from 2011. Fee-based operating expenses increased 12% in local currency from last year. The year-over-year increase was due to higher fixed compensation costs associated with a larger employee base, as well as higher commission expenses related to improved Leasing and Capital Markets & Hotels revenue. The SOP elimination earlier this year added approximately \$5 million to compensation expense compared with 2011. Also impacting Americas full-year and fourth-quarter operating expenses was \$5 million of compensation expense related to acceleration of the deferred acquisition payments to those former Staubach shareholders who agreed to extend their employment agreements.

EMEA's full-year revenue was over \$1.0 billion, a 12% increase in local currency. Revenue increased on a fee revenue basis by 9% in local currency, showing strong increases across all product categories. The largest increases were in Leasing, which grew 11% in local currency, and Project & Development Services, which includes the Tetris fit-out business and grew 16% in local currency.

Total operating expenses were just under \$1.0 billion for the year, an increase of 10% in local currency from 2011. Operating expenses also include \$28 million of additional gross contract costs related to the Project & Development Services business line compared with last year. Fee-based operating expenses increased 7% in local currency from 2011. The year-over-year increase in operating expenses was primarily due to higher fixed compensation from the addition of the King Sturge business for a full year in 2012, compared with just over seven months in 2011. Operating margin calculated on a fee revenue basis was 5.7% in 2012 compared with 3.1% in 2011.

(n.m. - not meaningful)

Asia Pacific's revenue for the year increased 9% in local currency, to \$876 million. Fee revenue was \$781 million, an increase of 11% in local currency, led by 15% growth in Capital Markets & Hotels and 13% annuity growth in Property & Facility Management.

Total operating expenses were \$810 million for the year, an increase of 9% in local currency. Operating expenses included \$95 million of gross contract costs, down from \$104 million in 2011. Fee-based operating expenses rose 12% in local currency, to \$716 million, due to a larger employee base servicing new and expanded Property & Facility Management contracts and inflationary compensation pressure across the region.

LaSalle Investment Management's advisory fees were \$228 million for the year, down 6% in local currency, due to asset and portfolio sales. Although Advisory fees decreased year-over-year they remained relatively constant throughout 2012. During the year, the business recognized \$23 million of incentive fees as a result of positive performance for clients and \$24 million of equity earnings, primarily from asset sales. The operating margin was 25.2% in 2012, compared to 20.7% in 2011. Assets under management remained at \$47 billion as of December 31, 2012.

(n.m. - not meaningful)

REVENUE

In 2011, revenue grew 23% for the year, 19% in local currency, driven both by (1) double-digit growth in all three geographic RES segments and (2) the acquisition of King Sturge completed in EMEA during the second quarter of 2011. Strong conversion of the Firm's business pipelines drove growth in the transactional businesses of Leasing and Capital Markets, while Property & Facility Management revenue increased due to continued growth in corporate outsourcing. LaSalle Investment Management grew 6%, 2% in local currency.

OPERATING EXPENSES

Operating expenses were \$3.3 billion in 2011, an increase of 25% in U.S. dollars and 22% in local currencies from the prior year. Operating expenses for 2011 include \$56 million of Restructuring and acquisition charges, primarily as a result of expenses related to the King Sturge acquisition and the integration of King Sturge's operations. Charges incurred related to the King Sturge acquisition included (1) employee retention bonuses of \$16 million, (2) lease termination charges of \$9 million and (3) other transaction costs of \$18 million. Additionally, \$13 million of employee termination costs unrelated to King Sturge were recognized in 2011.

Operating expenses, excluding Restructuring and acquisition charges, increased 23%, in US dollars and 20% in local currency. The overall increase in operating expenses was primarily driven by higher variable compensation resulting from improved transactional revenue and by variable costs to support client wins and to continue building the Firm's

pipeline for 2012.

INTEREST EXPENSE

Net interest expense was \$36 million in 2011, a decrease of 22% from the \$46 million in 2010. This was primarily due to a decrease in both our effective borrowing rate and accretive interest expense recognized for our deferred business acquisitions obligations.

Table of Contents**EQUITY IN INCOME FROM REAL ESTATE VENTURES**

In 2011, we recognized Equity income of \$6 million from our investments in real estate ventures, compared to a loss of \$11 million in 2010, due primarily to a reduction in impairment charges as real estate markets generally improved in 2011. Equity income and losses included impairment charges of \$6 million in 2011 and \$14 million in 2010.

PROVISION FOR INCOME TAXES

The provision for income taxes was \$56 million in 2011, resulting in an effective tax rate of 25.4%. See the Income Tax discussion in the Summary of Critical Accounting Policies and Estimates and see Note 8 of the Notes to Consolidated Financial Statements for a further discussion of our effective tax rate.

NET INCOME

Net income available to common shareholders for 2011 was \$164 million, or \$3.70 per diluted average share, compared to a net income of \$154 million, or \$3.48 per diluted average share, for 2010.

(n.m. - not meaningful)

Full-year revenue in the Americas region was \$1.5 billion, an increase of \$264 million, or 21%, over the prior year. The growth was led by Capital Markets & Hotels and Leasing as business conditions improved and as we gained market share. Fourth-quarter revenue in the region was \$510 million, compared with \$429 million in the fourth quarter of 2010, an increase of 19%.

Total operating expenses were \$1.4 billion for the year, a 22% increase over the prior year. The increase was impacted by higher commission expense related to the higher Leasing and Capital Markets & Hotels revenue, as well as increases in gross contract vendor costs related to corporate client activities in Property & Facility Management, \$16 million of which was added in the fourth quarter.

Americas operating income improved to \$163 million for the year, from \$148 million in 2010, while operating income margin was 10.7 % in 2011 compared with 11.8 % in 2010. Operating income margin improved to 16.6% in the fourth quarter of 2011, compared to 16.2 % in the fourth of 2010.

(n.m. - not meaningful)

EMEA's revenue in 2011 was \$974 million, compared with \$729 million in 2010, an increase of 34%, 29% in local currency. This was primarily the result of strong growth in Leasing, Capital Markets & Hotels and Advisory revenue and the successful integration of King Sturge. Fourth-quarter revenue in the region was \$340 million, compared with \$237 million in 2010, an increase of 43%, 45% in local currency.

Operating expenses, which include seven months of King Sturge ongoing operating expenses and \$11 million of King Sturge intangibles amortization, were \$946 million for the year, an increase of 33% from the prior year, 29% in local currency. Gross contract vendor costs related to the PDS business line increased by more than \$34 million in the year compared with 2010. EMEA's adjusted operating income margin, which excludes \$11 million of King Sturge intangibles amortization, was 4.0% compared with 2.7% in 2010. For the fourth quarter of 2011, adjusted operating income margin, which excludes \$5 million of King Sturge intangibles amortization, was 11.4% compared with 8.5% in the fourth quarter of 2010.

(n.m. - not meaningful)

Revenue in Asia Pacific was \$816 million in 2011, compared with \$679 million in 2010, an increase of 20%, 14% in local currency. Continued expansion of the Firm's market-leading positions in Greater China and India contributed to increased revenue, as did growth in Property & Facility Management. Fourth-quarter revenue in the region was \$236 million in 2011, an increase of 6% in both U.S. dollars and local currency compared with the same period in 2010. Capital Markets & Hotels revenue decreased in the fourth quarter due to lower market investment volumes overall and fewer Hotels transactions during the quarter following a very robust start to the year.

Table of Contents

Total operating expenses for the region were \$750 million for the year, an increase of 19%, 13% in local currency, on a year-over-year basis. The increase was primarily due to staff and gross contract vendor costs that related to a higher volume of PDS work, as well as expenses relating to other corporate client activities.

Asia Pacific's operating income margin for the year increased to 8.1%, up from 7.3% a year ago. Operating income margin was 10.7% in the fourth quarter compared with 11.5% for the same period a year ago, resulting from lower Capital Markets & Hotels revenue during the quarter.

INVESTMENT MANAGEMENT

LaSalle Investment Management's full-year Advisory fees were \$245 million, compared with \$238 million in 2010. Fourth-quarter Advisory fees were \$60 million, compared with \$61 million in the fourth quarter of 2010. The business recognized higher incentive fees during the year resulting from investment performance for clients.

LaSalle Investment Management raised nearly \$5.0 billion of net equity in 2011, and assets under management were \$47.7 billion at December 31, 2011.

CONSOLIDATED CASH FLOWS

Cash Flows From Operating Activities

During 2012, cash flows provided by operating activities were \$328 million, an increase of \$117 million from the \$211 million of cash flows provided by operating activities in 2011. This year-over-year increase resulted primarily from the 26% increase in net income and a decrease in cash required to fund working capital. The lower working capital requirements were primarily due to \$100 million less in year-over-year increases in receivables resulting from improved receivables management and the collection of receivables associated with the significant revenue growth late in the fourth quarter of 2011.

During 2011, cash flows provided by operating activities were \$211 million, a decrease of \$173 million from the \$384 million of cash flows provided by operating activities in 2010. This year-over-year decrease in cash generated from operating activities resulted primarily from an increase in working capital requirements in support and in recognition of the 23% increase in revenue in 2011. The most significant change in working capital was \$136 million more in

year-over-year increases in receivables resulting primarily from significant growth in revenue late in the fourth quarter.

Table of Contents

Cash Flows From Investing Activities

In 2012, we used \$151 million for investing activities, a \$238 million decrease from the \$389 million used in 2011. This was due to a \$224 million decrease in cash used for acquisitions, due primarily to the \$174 million paid to acquired King Sturge in 2011, and a net \$17 million decrease in cash used for our investments in real estate ventures. In 2012, we used \$28 million for acquisitions, consisting of \$16 million for four new acquisitions and \$12 million for contingent earn-out consideration for acquisitions completed in prior years.

In 2011, we used \$389 million for investing activities, a \$298 million increase from 2010, due to (1) a \$228 million increase in cash used for acquisitions, (2) a \$44 million increase in capital expenditures, and (3) a net \$26 million increase in cash used for our investments in real estate ventures. In 2011 we paid \$252 million for acquisitions, consisting of (1) \$174 million for the King Sturge acquisition, (2) \$44 million for eight other new acquisitions, (3) \$22 million to acquire a portion of the minority interest in our India operations, and (4) \$12 million for contingent earn-out consideration paid for acquisitions completed in prior years.

Cash Flows From Financing Activities

In 2012, we used \$209 million of cash for financing activities, compared to \$111 million provided by financing activities in 2011. This \$320 million decrease in cash provided by financing activities was primarily due to using significantly less cash for investing activities in 2012, providing us with the ability to use cash flows from operating activities to repay debt in 2012, rather than be a net borrower as we were in 2011. In 2012, we repaid \$327 million of net borrowings under our credit facility. In November 2012, in an underwritten public offering, we issued \$275 million of Long-term senior notes, which generated net proceeds of \$272 million, which along with cash flows from operating activities were used to reduce borrowings under our credit facility. In 2012, we paid \$144 million for deferred acquisition obligations, including \$31 million for the 2011 King Sturge acquisition, and \$111 million for the 2008 Staubach acquisition.

In 2011, we generated \$111 million of cash from financing activities, a \$222 million increase from the \$111 million used for financing activities in 2010. This increase was primarily due to a \$274 million year-over-year increase in net borrowing to help fund the \$298 million increase in investing activities in 2011, compared with 2010, off-set by a \$58 million increase in cash used for deferred acquisition obligations. In 2011, we paid \$164 million for deferred business acquisition obligations, including \$150 million related to the 2008 Staubach acquisition and \$11 million related to the 2006 Spaulding and Slye acquisition.

LIQUIDITY AND CAPITAL RESOURCES

We finance our operations, co-investment activity, share repurchases and dividend payments, capital expenditures and business acquisitions with internally generated funds, borrowings under our credit facilities, and through issuance of our Long-term senior notes.

Credit Facility

We have a \$1.1 billion unsecured revolving credit facility (the "Facility") that matures in June 2016. We had \$169.0 million and \$463.0 million outstanding under the Facility, at December 31, 2012 and 2011, respectively. At December 31, 2012, we had the capacity to borrow up to an additional \$913.9 million under the Facility. The average outstanding borrowings under the Facility were \$621.2 million and \$467.2 million during the twelve months ended December 31, 2012 and 2011, respectively.

We will continue to use the Facility for working capital needs (including payment of accrued incentive compensation), co-investment activities, dividend payments, share repurchases, capital expenditures and acquisitions.

Short-Term Borrowings

In addition to our Facility, we have the capacity to borrow up to an additional \$45.3 million under local overdraft facilities. We had short-term borrowings (including capital lease obligations and local overdraft facilities) of \$32.2 million and \$65.1 million at December 30, 2012 and 2011, respectively, of which \$25.8 million and \$38.7 million at December 31, 2012 and 2011, respectively, was attributable to local overdraft facilities.

Table of Contents

Long-Term Senior Notes

In November 2012, in an underwritten public offering, we issued \$275.0 million of 4.4% Senior Notes due November 2022 (the "Notes"). The net proceeds from the Notes, net of underwriting discounts and expenses, were \$272.4 million, which we used to reduce the outstanding borrowings under our Facility. The Notes bear interest at an annual rate of 4.4%, subject to adjustment if a credit rating assigned to the Notes is downgraded below an investment grade rating (or subsequently upgraded). Interest is payable semi-annually on May 15 and November 15 of each year, beginning on May 15, 2013.

See Note 9, Debt, of the Notes to Consolidated Financial Statements for additional information on our debt.

Co-Investment Activity

As of December 31, 2012, we had total investments of \$268 million in approximately 50 separate property or fund co-investments. Funding of co-investments exceeded return of capital by \$29 million, \$46 million, and \$19 million for the years ended December 31, 2012, 2011 and 2010, respectively. We expect to continue to pursue co-investment opportunities with our investment management clients in the Americas, EMEA and Asia Pacific. Co-investment remains important to the continued growth of our Investment Management business. We anticipate that our net co-investment funding for 2013 will be between \$40 and \$50 million (planned co-investment less return of capital from liquidated co-investments).

See Note 5, Investment in Real Estate Ventures, of the Notes to Consolidated Financial Statements for additional information on our co-investment activity.

Share Repurchase and Dividend Programs

Since October 2002, our Board of Directors has approved five share repurchase programs. At December 31, 2012, we have 1,563,100 shares that we remain authorized to repurchase under the current share repurchase program. We have made no share repurchases in the last three years. Our current share repurchase program allows the Company to purchase our common stock in the open market and in privately negotiated transactions. The repurchase of shares is primarily intended to offset dilution resulting from both stock and restricted stock unit grants made under our existing stock plans.

Our Board declared and paid total annual dividends and dividend-equivalents of \$0.40, \$0.30, and \$0.20 per common share in 2012, 2011 and 2010, respectively. In December 2012, we paid a semi-annual cash dividend of \$0.20 per share. There can be no assurance that we will declare dividends in the future since the actual declaration of future dividends and the establishment of record and payment dates, remains subject to final determination by the Company's Board of Directors.

Capital Expenditures

Capital expenditures for 2012 were \$94.8 million, compared to \$91.5 million in 2011 and \$47.6 million in 2010. Our capital expenditures are primarily for information systems, computer hardware and improvements to leased office space. Included in the \$94.8 million of capital expenditures for 2012 is \$12.3 million of capital expenditures made by a joint-venture entity that we are required to consolidate under U.S. GAAP. In 2012, we received \$2.8 million of tenant improvement allowances, reimbursing us for capital expenditures we made related to leasehold improvements.

Business Acquisitions

In 2012, we paid \$27.7 million for acquisitions consisting of \$15.5 million for four new acquisitions and \$12.2 million for contingent earn-out consideration for acquisitions completed in prior years. We also paid \$143.7 million to satisfy deferred acquisition obligations, including \$30.8 million for the 2011 King Sturge acquisition, and \$111.1 million for the 2008 Staubach acquisition.

Terms for our acquisitions have typically included cash paid at closing with provisions for additional consideration and earn-outs subject to certain contract provisions and performance. Deferred business acquisition obligations totaled \$213.4 million and \$299.1 million on our consolidated balance sheet at December 31, 2012 and 2011, respectively. These obligations represent the current discounted values of payments to sellers of businesses for which our acquisition has closed as of the balance sheet date and for which the only remaining condition on those payments is the passage of time. At December 31, 2012, we had the potential to make earn-out payments on 14 acquisitions that are subject to the achievement of certain performance conditions. The maximum amount of the potential earn-out payments for these acquisitions was \$42.2 million at December 31, 2012. We anticipate that the majority of these earn-outs will come due at various times over the next three years assuming the achievement of the applicable performance conditions.

Table of Contents

Our 2007 acquisition of Indian real estate services company Trammell Crow Meghraj (“TCM”) has provisions for a payment to be made in 2014 for the repurchase of the remaining shares exchanged in the merger. This payment will be based on future performance of these operations and accordingly is not quantifiable at this time. An estimate of this obligation based on the original value of shares exchanged is reflected on our balance sheet within the \$19.5 million Minority shareholder redemption liability.

We are considering, and will continue to consider, acquisitions that we believe will strengthen our market position, increase our profitability and supplement our organic growth.

Repatriation of Foreign Earnings

Based on our historical experience and future business plans, we do not expect to repatriate our foreign source earnings to the United States. We believe that our policy of permanently investing earnings of foreign subsidiaries does not significantly impact our liquidity. As of December 31, 2012 and 2011, we had total cash and cash equivalents of \$152.2 million and \$184.5 million, respectively. Approximately \$121.3 million and \$158.5 million, respectively, of this cash and cash equivalents was held by our foreign subsidiaries.

Restricted Net Assets

We face regulatory restrictions in certain countries that limit or prevent the transfer of funds to other countries or the exchange of the local currency to other currencies. The net assets of these countries in aggregate totaled 3% of our net assets at both December 31, 2012 and 2011.

Contractual Obligations

We have obligations and commitments to make future payments under contracts in the normal course of business. The following table summarizes our minimum contractual obligations as of December 31, 2012 (\$ in millions):

CONTRACTUAL OBLIGATIONS	TOTAL	PAYMENTS DUE BY PERIOD			
		LESS THAN		MORE THAN	
		1	3	5	5
		YEAR	YEARS	YEARS	YEARS
1. Debt obligations	\$ 469.8	25.8	—	169.0	275.0
2. Interest on debt obligations	130.6	15.1	29.5	25.5	60.5
3. Business acquisition obligations	222.7	107.8	73.4	41.5	—
4. Minority shareholder redemption liability	19.5	—	19.5	—	—
5. Lease obligations	591.7	121.3	201.9	140.4	128.1
6. Deferred compensation	20.3	1.8	8.5	5.8	4.2
7. Defined benefit plan obligations	84.4	7.1	15.3	16.0	46.0
8. Vendor and other purchase obligations	67.9	29.0	25.3	12.8	0.8
9. Unconsolidated joint ventures	—	—	—	—	—
Total	\$ 1,606.9	307.9	373.4	411.0	514.6

1. Debt Obligations. As of December 31, 2012, we had \$169.0 million of borrowings outstanding under our Facility and \$25.8 million under local overdraft facilities. We had the ability to borrow up to \$1.1 billion on the Facility that matures in June 2016. Additionally, we have the capacity to borrow up to an additional \$45.3 million under local overdraft facilities. In November 2012, in an underwritten public offering, we issued \$275.0 million of 4.4% Senior Notes due November 2022.

2. Interest on Debt Obligations. Our debt obligations incur interest charges at variable rates. For purposes of preparing an estimated projection of interest on debt obligations for this table, we have estimated our future interest payments based on our borrowing rates as of December 31, 2012 and assuming each of our debt obligations is held to maturity.

3. Business acquisition obligations. Our business acquisition obligations represent payments to sellers of businesses for acquisitions that were closed as of December 31, 2012, with the only condition on those payments being the passage of time. The \$222.7 million total represents \$213.4 million on a present value basis as reported in Deferred business acquisition obligations in our Consolidated Balance Sheet, and \$9.3 million of imputed interest reducing the obligations to their present value.

The contractual obligation table above does not include possible contingent earn-out payments associated with our acquisitions. At December 31, 2012 we had the potential to make earn-out payments on 14 acquisitions that are subject to the achievement of certain performance conditions. The maximum amount of the potential earn-out payments was \$42.2 million at December 31, 2012. We anticipate that the majority of these earn-out payments will come due at various times over the next three years assuming the achievement of the applicable performance conditions.

Table of Contents

4. Minority shareholder redemption liability. We estimate that the 2014 payment to purchase the remaining interest in our Indian operations held by the selling shareholders of the Trammell Crow Meghraj business we acquired in 2007 will be \$19.5 million. The purchase price of the remaining interest in our India subsidiary will be based on formulas and independent valuations, as a result of which we cannot definitively determine the amount of this future payment at this time.

5. Lease obligations. Our lease obligations primarily consist of operating leases of office space in various buildings for our own use and operating leases for equipment. The total of minimum rentals to be received in the future under noncancelable operating subleases as of December 31, 2012 was \$45.7 million.

6. Deferred compensation. Deferred compensation obligations include payments under our long-term deferred compensation plans. The contractual obligation table above does not include a provision for certain long-term compensation plans for which we cannot reliably estimate the timing and amount of certain payments; we record these plans on our consolidated balance sheet as a long-term Deferred compensation liability based on their current fair value of \$9.6 million.

7. Defined benefit plan obligations. The defined benefit plan obligations represent estimates of the expected benefits to be paid out by our defined benefit plans. These obligations will be funded from the assets held by these plans. If the assets these plans hold are not sufficient to fund these payments these obligations will be funded by the Company. We have historically funded pension costs as actuarially determined and as applicable laws and regulations require.

8. Vendor and other purchase obligations. Our other purchase obligations primarily relate to various information technology servicing agreements, telephone communications and other administrative support functions.

9. Unconsolidated joint ventures. We have made capital commitments to certain unconsolidated joint ventures that are entitled to call up to a maximum of \$143.0 million as of December 31, 2012. We are not able to predict if, when, or in what amounts such capital calls will be made, and therefore we exclude such commitments from the above table. However, in relation to this activity, we made capital contributions and advances to investments in real estate ventures of \$106.3 million, \$71.0 million and \$33.9 million in 2012, 2011 and 2010, respectively, and we anticipate that our net co-investment funding for 2013 will be between \$40 and \$50 million (planned co-investment less return of capital from liquidated co-investments).

In the Notes to Consolidated Financial Statements, see Note 9, Debt, for additional information on long-term debt obligations, see Note 10, Leases, for additional information on lease obligations, see Note 7, Retirement Plans, for additional information on defined benefit plan obligations, and see Note 5, Investments in Real Estate Ventures, for additional information on our unconsolidated joint ventures.

Off-Balance Sheet Arrangements

We have unfunded capital commitments to (1) LIC I and LIC II, which are unconsolidated joint ventures that serve as vehicles for our co-investment activity, and (2) directly to funds for future fundings of co-investments in underlying funds totaling a maximum of \$211.3 million as of December 31, 2012. See our discussion of unfunded commitments in Note 5, Investments in Real Estate Ventures, of the Notes to Consolidated Financial Statements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Information regarding market risk is included in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations under the caption "Market Risks" and is incorporated by reference herein.

Disclosure of Limitations

As the information presented above includes only those exposures that exist as of December 31, 2012, it does not consider those exposures or positions that could arise after that date. The information represented herein has limited predictive value. As a result, the ultimate realized gain or loss with respect to interest rate and foreign currency fluctuations will depend on the exposures that arise during the period, the hedging strategies at the time and interest and foreign currency rates.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
Jones Lang LaSalle Incorporated:

We have audited the accompanying consolidated balance sheets of Jones Lang LaSalle Incorporated and subsidiaries (the Company) as of December 31, 2012 and 2011, and the related consolidated statements of comprehensive income, equity and cash flows for each of the years in the three-year period ended December 31, 2012. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Jones Lang LaSalle Incorporated and subsidiaries as of December 31, 2012 and 2011, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2012, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2012, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 26, 2013 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Table of Contents

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
Jones Lang LaSalle Incorporated:

We have audited Jones Lang LaSalle Incorporated and subsidiaries (the Company) internal control over financial reporting as of December 31, 2012, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company’s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management’s Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company’s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Jones Lang LaSalle Incorporated and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2012, based on criteria established in Internal Control – Integrated Framework issued by COSO.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of the Company as of December 31, 2012 and 2011, and the related consolidated statements of comprehensive income, equity and cash flows for each of the years in the three-year period ended December 31, 2012, and our report dated February 26, 2013 expressed an unqualified opinion on those consolidated financial statements.

Notes to Consolidated Financial Statements

(1) ORGANIZATION

Jones Lang LaSalle Incorporated (“Jones Lang LaSalle,” which we may refer to as we, us, our, the Company or the Firm) was incorporated in 1997. We have over 200 corporate offices worldwide and operations in more than 1,000 locations in 70 countries. We have approximately 48,000 employees, including 28,300 employees whose costs are reimbursed by our clients. We provide comprehensive integrated real estate and investment management expertise on a local, regional and global level to owner, occupier and investor clients. We are an industry leader in property and corporate facility management services, with a portfolio of approximately 2.6 billion square feet worldwide. LaSalle Investment Management, a member of the Jones Lang LaSalle group, is one of the world’s largest and most diversified real estate investment management firms, with approximately \$47.0 billion of assets under management.

The broad range of real estate services we offer includes:

Agency leasing	Investment management
Tenant representation	Real estate investment banking / merchant banking
Property management	Corporate finance
Facilities management / outsourcing	Hotel / hospitality advisory
Project and development management / construction	Energy and sustainability services
Valuations	Value recovery and receivership services
Consulting	Logistics and supply chain management
Capital markets	

The following table shows the revenue for the major product categories into which we group these services for the years ended December 31, 2012, 2011 and 2010 (\$ in millions):

	2012	2011	2010
Real Estate Services:			
Leasing	\$1,277.8	1,189.1	999.9
Capital Markets & Hotels	512.9	459.6	306.9
Property & Facilities Management	1,012.3	864.4	715.4
Project & Development Services	486.2	441.5	337.4
Advisory, Consulting and Other	382.2	358.3	308.9
LaSalle Investment Management	261.4	271.6	257.1
Total revenue	\$3,932.8	3,584.5	2,925.6

We offer these services locally, regionally and globally to real estate owners, occupiers, investors and developers for a variety of property types, including offices, hotels, industrial, retail, multi-family residential, healthcare facilities, critical environments and data centers, sports facilities, cultural institutions and transportation centers. Individual regions and markets focus on different property types, depending on local requirements and market conditions.

We work for a broad range of clients that represent a wide variety of industries and are based in markets throughout the world. Our clients vary greatly in size and include for-profit and not-for-profit entities of all kinds, public-private partnerships and governmental (public sector) entities. Increasingly, we are offering services to smaller middle-market companies that are looking to outsource real estate services. We provide real estate investment management services on a global basis for both public and private assets through our LaSalle Investment Management subsidiary. Our integrated global business model, industry-leading research capabilities, client relationship management focus, consistent worldwide service delivery and strong brand are attributes that enhance our services.

Table of Contents

(2) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation

Our Consolidated Financial Statements include the accounts of Jones Lang LaSalle and its majority-owned and controlled subsidiaries. We have eliminated all intercompany balances and transactions in our Consolidated Financial Statements. Investments in real estate ventures over which we exercise significant influence, but not control, are accounted for either under the equity method or at fair value.

When applying principles of consolidation, we begin with Accounting Standards Update (ASU) 2009-17, “Consolidations (Topic 810): Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities,” in determining whether an investee entity is a variable interest entity (“VIE”) or a voting interest entity. ASU 2009-17 draws a distinction between voting interest entities, which are embodied by common and traditional corporate and partnership structures, and VIEs, broadly defined as entities for which control is achieved through means other than voting rights. For voting interest entities, the interest holder with control through majority ownership and majority vote consolidates. For VIEs, determination of the “primary beneficiary” drives the accounting. We identify the primary beneficiary of a VIE as the enterprise that has both of the following characteristics: (1) the power to direct the activities of the VIE that most significantly impact the entity’s economic performance; and (2) the obligation to absorb losses or receive benefits of the VIE that could potentially be significant to the entity. We perform this analysis on an ongoing basis. When we determine we are the primary beneficiary of a VIE, we consolidate our investment in the VIE; when we determine we are not the primary beneficiary of the VIE, we account for our investment in the VIE under the equity method or at fair value.

If an entity is not a VIE, but is a limited partnership or similar entity, we apply guidance from ASC Topic 810 related to investments in joint ventures, and consider rights held by limited partners which may preclude consolidation by a sole general partner. The assessment of limited partners’ rights and their impact on the presumption of control of the limited partnership by the sole general partner should be made when an investor becomes the general partner, and reassessed if (1) there is a change to the terms or in the exercisability of the rights of the limited partners, (2) the general partner increases or decreases its ownership of limited partnership interests, or (3) there is an increase or decrease in the number of outstanding limited partnership interests.

Our determination of the appropriate accounting method for all other investments is based on the level of influence we have in the underlying entity. When we have an asset advisory contract with the real estate limited partnership, the combination of our limited partner interest and the advisory agreement provides us with significant influence over such real estate limited partnership. Accordingly, we account for such investments either under the equity method or at fair value. We eliminate transactions with such subsidiaries to the extent of our ownership in the related subsidiary. We carry other investments at cost.

Use of Estimates

The preparation of consolidated financial statements in conformity with U.S. generally accepted accounting principles (“U.S. GAAP”) requires us to make estimates and assumptions about future events that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the dates of the financial statements, and the reported amounts of the revenue and expenses during the reporting periods. Such estimates include the value of purchase consideration, valuation of accounts receivable, goodwill, intangible assets, other long-lived assets, legal contingencies, assumptions used in the calculation of income taxes, incentive compensation, and retirement and other post-employment benefits, among others.

These estimates and assumptions are based on management’s best estimate and judgment. We evaluated these estimates and assumptions on an ongoing basis using historical experience and other factors, including the current economic environment, which we believe to be reasonable under the circumstances. We adjust such estimates and

assumptions when facts and circumstances dictate. Market factors, such as illiquid credit markets, volatile equity markets and foreign currency fluctuations can increase the uncertainty in such estimates and assumptions. Because future events and their effects cannot be determined with precision, actual results could differ significantly from these estimates. Changes in those estimates resulting from continuing changes in economic environment will be reflected in the financial statements in future periods. Although actual amounts likely differ from such estimated amounts, we believe such differences are not likely to be material.

Table of Contents

Reclassifications

Certain prior year amounts have been reclassified to conform to the current presentation. These reclassifications have not been material and have not affected reported net income.

Revenue Recognition

We earn revenue from the following principal sources:

Transaction commissions;
Advisory and management fees;
Incentive fees;
Project and development management fees; and
Construction management fees.

We recognize transaction commissions related to agency leasing services, capital markets services and tenant representation services as revenue when we provide the related service unless future contingencies exist. If future contingencies exist, we defer recognition of this revenue until the respective contingencies have been satisfied.

We recognize advisory and management fees related to property management services, valuation services, corporate property services, consulting services and investment management as income in the period in which we perform the related services.

We recognize incentive fees based on the performance of underlying funds' investments, contractual benchmarks and other contractual formulas.

We recognize project and development management and construction management fees by applying the percentage of completion method of accounting. We use the efforts expended method to determine the extent of progress towards completion for project and development management fees and costs incurred to total estimated costs for construction management fees.

Construction management fees, which are gross construction services revenue net of subcontract costs, were \$8.1 million, \$10.1 million and \$9.5 million for the years ended December 31, 2012, 2011 and 2010, respectively. Gross construction services revenue totaled \$132.3 million, \$143.3 million and \$165.9 million and subcontract costs totaled \$124.2 million, \$133.2 million and \$156.4 million for the years ended December 31, 2012, 2011 and 2010, respectively.

We include costs in excess of billings on uncompleted construction contracts of \$7.9 million and \$7.1 million in Trade receivables, and billings in excess of costs on uncompleted construction contracts of \$5.2 million and \$4.1 million in Deferred income, respectively, as of December 31, 2012 and 2011, respectively.

Gross and Net Accounting: We follow the guidance of ASC Topic 605-45, "Principal and Agent Considerations," when accounting for reimbursements received from clients. In certain of our businesses, primarily those involving management services, our clients reimburse us for expenses incurred on their behalf. We base the treatment of reimbursable expenses for financial reporting purposes upon the fee structure of the underlying contract. Accordingly, we report a contract that provides for fixed fees, fully inclusive of all personnel and other recoverable expenses incurred but not separately scheduled, on a gross basis. When accounting on a gross basis, our reported revenues include the full billing to our client and our reported expenses include all costs associated with the client. Certain contractual arrangements in our project and development services, including fit-out business activities, and in facility management, tend to have characteristics that result in accounting on a gross basis. In Note 3, Business Segments, we

identify vendor and subcontract costs on certain client assignments in property and facilities management, and project and development services (“gross contract costs”), and present separately their impact on both revenue and operating expense in our Real Estate Services (“RES”) segments. We exclude these costs from revenue and operating expenses in determining “fee revenue” and “fee based operating expenses” in our segment presentation.

Table of Contents

We account for a contract on a net basis when the fee structure is comprised of at least two distinct elements, namely (1) a fixed management fee and (2) a separate component that allows for scheduled reimbursable personnel costs or other expenses to be billed directly to the client. When accounting on a net basis, we include the fixed management fee in reported revenue and net the reimbursement against expenses. We base this accounting on the following factors, which define us as an agent rather than a principal:

The property owner or client, with ultimate approval rights relating to the employment and compensation of on-site personnel, and bearing all of the economic costs of such personnel, is determined to be the primary obligor in the arrangement;

Reimbursement to Jones Lang LaSalle is generally completed simultaneously with payment of payroll or soon thereafter;

Because the property owner is contractually obligated to fund all operating costs of the property from existing cash flow or direct funding from its building operating account, Jones Lang LaSalle bears little or no credit risk; and

Jones Lang LaSalle generally earns no margin in the reimbursement aspect of the arrangement, obtaining reimbursement only for actual costs incurred.

The majority of our service contracts are accounted for on a net basis. Such costs aggregated approximately \$1.5 billion, \$1.4 billion and \$1.2 billion for the years ended December 31, 2012, 2011 and 2010, respectively. The presentation of expenses pursuant to these arrangements under either a gross or net basis has no impact on operating income, net income or cash flows.

Contracts accounted for on a gross basis resulted in certain costs reflected in revenue and operating expenses of \$292.6 million, \$210.5 million, and \$139.8 million, for the years ended December 31, 2012, 2011 and 2010, respectively.

Certain of our management services which provide for fixed fees inclusive of personnel and other expenses incurred were accounted for on a net basis in 2011 and 2010. In 2011 and 2010, gross revenue and expenses for these management services would have added \$56.1 million and \$55.9 million, respectively.

Cash and Cash Equivalents

We consider all highly-liquid investments purchased with maturities of less than three months to be cash equivalents. The carrying amount of cash equivalents approximates fair value due to the short-term maturity of these investments.

Accounts Receivable

Pursuant to contractual arrangements, accounts receivable includes unbilled amounts of \$229.7 million and \$216.3 million at December 31, 2012 and 2011, respectively.

We estimate the allowance necessary to provide for uncollectible accounts receivable. The estimate includes specific accounts for which payment has become unlikely. We also base this estimate on historical experience combined with a careful review of current developments and a strong focus on credit quality. The process by which we calculate the allowance begins in the individual business units where specific uncertain accounts are identified and reserved as part of an overall reserve that is formulaic and driven by the age profile of the receivables and our historical experience. We then review these allowances on a quarterly basis to ensure they are appropriate.

Table of Contents

The following table details the changes in the allowance for uncollectible receivables for each of the three years ended December 31, 2012, 2011 and 2010 (\$ in thousands).

	2012	2011	2010
Allowance at beginning of the year	\$20,595	20,352	36,994
Charged to income	6,586	10,273	7,081
Write-off of uncollectible receivables	(7,858)	(10,901)	(22,610)
Reserves acquired from King Sturge	-	760	-
Impact of exchange rate movements and other	203	111	(1,113)
Allowance at end of the year	\$19,526	20,595	20,352

Warehouse Receivables and Facilities

In the first quarter of 2011, we acquired certain assets of Atlanta-based Primary Capital™ Advisors. This acquisition expands our capital market service offerings and allows us to better meet our clients' needs through the origination, warehousing, sale and servicing of commercial mortgages as a Federal Home Loan Mortgage Corporation (Freddie Mac) Program Plus® Seller/Servicer. We originate mortgages based on contractual purchase commitments which are received from Freddie Mac prior to originating mortgages. Loans are generally funded by our warehouse facility at prevailing market rates. Loans are generally repaid within a one-month period when Freddie Mac buys the loans, while we retain the servicing rights. Upon surrender of control over the warehouse receivables, we account for the transfer as a sale.

We carry Warehouse receivables at the lower of cost or fair value based on the commitment price, in accordance with ASC Topic 948, Financial Services—Mortgage Banking. At December 31, 2012, all Warehouse receivables included in the accompanying consolidated balance sheets were under commitment to be purchased. The commitment price is equal to our cost.

Through June 30, 2012, we maintained an open-end warehouse facility with Kemps Landing Capital Company, LLC to fund Warehouse receivables. On January 6, 2012, the Federal Housing Finance Agency announced a termination of Freddie Mac's purchase commitment agreement with Kemps Landing effective June 30, 2012.

On July 1, 2012, we entered into an uncommitted warehouse facility with a third-party lender, with a maximum capacity of \$85 million, to fund Warehouse receivables. This facility bears interest at LIBOR plus 2.5%. In November 2012 we amended the terms of the warehouse facility whereby the maximum capacity was increased to \$150 million and can be further increased to \$200 million upon establishment of a cash collateral account.

Mortgage Servicing Rights

We retain certain servicing rights in connection with the origination and sale of mortgage loans. We record mortgage servicing rights based on the fair value of these rights on the date the loans are sold. The recording of mortgage servicing rights at their fair value results in net gains, which we record as revenue in our consolidated statements of comprehensive income. At December 31, 2012 and 2011, we had \$4.5 million and \$1.4 million, respectively, of mortgage servicing rights carried at the lower of amortized cost or fair value in Identified intangibles on our consolidated balance sheets. We amortize servicing rights in proportion to and over the estimated period that net servicing income is projected to be received.

We evaluate the mortgage servicing assets for impairment on an annual basis, or more often if circumstances or events indicate a change in fair value. There have been no instances of impairment during all periods presented. Mortgage servicing rights do not actively trade in an open market with readily available observable prices; therefore we determine the fair value of these rights based on certain assumptions and judgments that are Level 3 within the fair value hierarchy, including the estimation of the present value of future cash flows to be realized from servicing the

underlying mortgages.

Property and Equipment

We record property and equipment at cost and depreciate these assets over their relevant useful lives. We capitalize certain direct costs relating to internal-use software development when incurred during the application development phase.

We review property and equipment for impairment whenever events or circumstances indicate that the carrying value of an asset group may not be recoverable. We record an impairment loss to the extent that the carrying value exceeds the estimated fair value. We did not recognize an impairment loss related to property and equipment for the years ended December 31, 2012, 2011 or 2010.

Table of Contents

We calculate depreciation and amortization on property and equipment for financial reporting purposes by using the straight-line method based on the estimated useful lives of our assets. Depreciation expense for the years ended December 31, 2012, 2011 and 2010 was \$66.2 million, \$62.6 million and \$60.6 million, respectively. The following table shows the gross value of major asset categories at December 31, 2012 and 2011 as well as the standard depreciable life for each of these asset categories (\$ in millions):

CATEGORY	2012	2011	DEPRECIABLE LIFE
Furniture, fixtures and equipment	\$91.9	105.9	2 to 10 years
Computer equipment and software	332.0	314.1	1 to 10 years
Leasehold improvements	160.7	143.7	1 to 10 years
Automobiles and other	24.6	14.1	4 to 10 years
Total	609.2	577.8	
Total accumulated depreciation	(339.9)	(336.4)	
Net property and equipment	\$269.3	241.4	

Business Combinations, Goodwill and Other Intangible Assets

We have historically grown, in part, through a series of acquisitions. Consistent with the services nature of the businesses we have acquired, two of the larger assets on our balance sheet are goodwill and intangible assets resulting from these acquisitions. These intangible assets are primarily management contracts and customer backlog that we acquired as part of these acquisitions and amortize over their estimated useful lives.

We do not amortize goodwill; instead, we evaluate goodwill for impairment at least annually. In September 2011, the FASB issued ASU 2011-08, "Testing Goodwill for Impairment." ASU 2011-08 permits an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test. We define our four reporting units as the three geographic regions of Real Estate Services ("RES"), Americas RES, EMEA RES and Asia Pacific RES, and Investment Management.

We have used qualitative factors per the provisions of ASU 2011-08, with respect to the performance of our annual impairment test of goodwill in 2012 and 2011, and determined that no indicators of impairment exist primarily because (1) our market capitalization has consistently exceeded our carrying value by a significant margin, (2) our overall financial performance has been solid in the face of mixed economic environments, and (3) forecasts of operating income and cash flows generated by our reporting units appear sufficient to support the carrying values of net assets of the reporting units.

In addition to our annual impairment evaluation, we evaluate whether events or circumstances have occurred in the period subsequent to our annual impairment testing that indicate it is more likely than not an impairment loss has occurred. For example, we updated the annual evaluation in the fourth quarter of 2012, noting that our market capitalization exceeded our carrying value by a significant margin as of December 31, 2012 and that our forecasts of EBITDA and cash flows to be generated by each of our reporting units appeared sufficient to support the carrying values of the net assets of each of our reporting units. As a result, we did not change our conclusion that goodwill is not impaired. However, it is possible our determination that goodwill for a reporting unit is not impaired could change in the future if current economic conditions deteriorate or remain difficult for an extended period of time. We will continue to monitor the relationship between the Company's market capitalization and carrying value, as well as the ability of our reporting units to deliver current and projected EBITDA and cash flows sufficient to support the carrying values of the net assets of their respective businesses.

We evaluate our Identified intangibles for impairment annually or if other events or circumstances indicate that the carrying value may be impaired.

See Note 4 for additional information on goodwill and other intangible assets.

Table of Contents

Investments in Real Estate Ventures

We invest in certain real estate ventures that own and operate commercial real estate. Typically, these are co-investments in funds that our Investment Management business establishes in the ordinary course of business for its clients. These investments take the form of ownership interests generally ranging from less than 1% to 15% of the respective ventures; we typically account for these investments under the equity method. Starting in 2011, we elected the fair value option for certain of our investments. Pursuant to ASC Topic 825, this election is made on an investment-by-investment basis. We believe the fair value accounting method more accurately represents the value and performance of these investments. See “Principles of Consolidation” above for additional discussion of the accounting for our co-investments.

For real estate limited partnerships in which the Company is a general partner the entities are generally well-capitalized and grant the limited partners substantive rights, such as the right to replace the general partner without cause, to dissolve or liquidate the partnership, to approve the sale or refinancing of the principal partnership assets, or to approve the acquisition of principal partnership assets. We generally account for such general partner interests under the equity method.

For real estate limited partnerships in which the Company is a limited partner, the Company is a co-investment partner, and has concluded that it does not have a controlling interest in these limited partnerships. When we have an asset advisory contract with the real estate limited partnership, the combination of our limited partner interest and the advisory agreement provides us with significant influence over the real estate limited partnership venture. Accordingly, we account for such investments under the equity method or at fair value.

For investments in real estate ventures accounted for under the equity method, we maintain an investment account, that is (1) increased by contributions made and by our share of net income of the real estate ventures, and (2) decreased by distributions received and by our share of net losses of the real estate ventures. Our share of each real estate venture’s net income or loss, including gains and losses from capital transactions, is reflected in our consolidated statements of comprehensive income as Equity in earnings (losses) from real estate ventures.

We review investments in real estate ventures accounted for under the equity method on a quarterly basis for indications of whether we may not be able to recover the carrying value of the real estate assets underlying our investments in real estate ventures and whether our investments are other than temporarily impaired. When events or changes in circumstances indicate that the carrying amount of a real estate asset underlying one of our investments in real estate ventures may be impaired, we review the recoverability of the carrying amount of the real estate asset in comparison to an estimate of the future undiscounted cash flows expected to be generated by the underlying asset. When the carrying amount of the real estate asset is in excess of the future undiscounted cash flows, we use a discounted cash flow approach to determine the fair value of the asset in computing the amount of the impairment. We then record the portion of the impairment loss related to our investment in the reporting period, within Equity earnings (losses) from real estate ventures on our consolidated statements of comprehensive income. Additionally, we consider a number of factors, including our share of co-investment cash flows and the fair value of our co-investments, in determining whether or not our investment is other than temporarily impaired.

For investments in real estate ventures for which the fair value option has been elected, we maintain an investment account that is increased or decreased each reporting period by the difference between the fair value of the investment and the carrying value at the balance sheet date. These fair value adjustments are reflected as gains or losses in our consolidated statements of comprehensive income within Equity in earnings (losses) from real estate ventures. For the years ended December 31, 2012 and 2011, fair value gains of \$3.1 million and \$0.6 million, respectively, were included in Equity in earnings (losses), and no fair adjustments were recognized in Equity in earnings (losses) in 2010. The fair value of the investment at the balance sheet date is determined using discounted cash flow models and other Level 3 inputs.

We report Equity in earnings (losses) from real estate ventures in the consolidated statements of comprehensive income after Operating income. However, for segment reporting we reflect Equity in earnings (losses) from real estate ventures within Revenue. See Note 3 for Equity in earnings (losses) reflected within segment revenue, as well as discussion of how the Chief Operating Decision Maker (as defined in Note 3) measures segment results with Equity in earnings (losses) included in segment revenue.

See Note 5 for additional information on investments in real estate ventures.

Table of Contents

Stock-Based Compensation

Stock-based compensation in the form of restricted stock units is a significant element of our compensation programs. We determine the fair value of restricted stock units based on the market price of the Company's common stock on the grant date and amortized it on a straight-line basis over the associated vesting period for each separately vesting portion of an award. We reduce stock-based compensation expense for estimated forfeitures each period and adjust expense accordingly upon vesting or actual forfeitures.

We also have a "noncompensatory" Stock Purchase Plan ("ESPP") for U.S. employees and a Jones Lang LaSalle Savings Related Share Option Plan ("Save As You Earn" or "SAYE") for U.K. and Irish employees. The fair value of options granted under the SAYE plan are determined on the grant date and amortized over the associated vesting period.

See Note 6 for additional information on our stock compensation plans.

Income Taxes

We account for income taxes under the asset and liability method. We recognize deferred tax assets and liabilities for the expected future tax consequences of events that have been included in our financial statements or tax returns. Under this method, we determine deferred tax assets and liabilities based on the differences between the financial reporting and tax bases of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse.

An increase or decrease in the deferred tax liability that results from a change in circumstances, and that causes a change in our judgment about expected future tax consequences of events, would be included in the tax provision when the changes in circumstances and our judgment occurs. Deferred income taxes also reflect the impact of operating loss and tax credit carryforwards. A valuation allowance is established if we believe it is more likely than not that all or some portion of the deferred tax asset will not be realized. An increase or decrease in the valuation allowance that results from a change in circumstances, and that causes a change in our judgment about the ability to realize the related deferred tax asset, would be included in the tax provision when the changes in circumstances and our judgment occurs.

See Note 8 for additional information on income taxes.

Self-Insurance Programs

In our Americas business we have retained certain risks regarding health insurance and workers' compensation rather than purchase third-party insurance. Estimating our exposure to such risks involves subjective judgments about future developments. We supplement our traditional global insurance program by the use of a captive insurance company to provide professional indemnity and employment practices insurance on a "claims made" basis. Professional indemnity claims can be complex and take a number of years to resolve, making it difficult to estimate the ultimate cost of these claims.

Health Insurance—We self-insure our health benefits for all U.S.-based employees, although we purchase stop loss coverage on an annual basis to limit our exposure. We self-insure because we believe that, on the basis of our historic claims experience, the demographics of our workforce and trends in the health insurance industry, we incur reduced expense by self-insuring our health benefits as opposed to purchasing health insurance through a third party. We estimate our likely full-year cost at the beginning of the year and expense this cost on a straight-line basis throughout the year. In the fourth quarter, we estimate the required reserve for unpaid health costs we would need at year-end. Given the nature of medical claims, it may take up to 24 months for claims to be processed and recorded. The accrual balance for the 2012 program was \$10.2 million at December 31, 2012, and the accrual balance for the 2011 program was \$11.5 million at December 31, 2011.

Table of Contents

Workers' Compensation Insurance— We are self-insured for workers' compensation insurance claims because our workforce has historically experienced fewer claims than is normal for our industry. We purchase stop loss coverage to limit our exposure to large, individual claims. We accrue workers' compensation expense based on the applicable state's rate and job classifications. On an annual basis in the third quarter, we engage in a comprehensive analysis to develop a range of potential exposure, and considering actual experience, we reserve within that range. We accrue the estimated adjustment to income for the differences between this estimate and our reserve. There were no material adjustments recorded for the year ended December 31, 2012, and the adjustments taken to income for the years ended December 31, 2011 and 2010 were credits of \$4.8 million and \$5.0 million, respectively. Our accruals for worker compensation insurance claims, which can relate to multiple years, were \$20.7 million and \$17.5 million at December 31, 2012 and 2011, respectively.

Captive Insurance Company—In order to better manage our global insurance program and support our risk management efforts, we supplement our traditional insurance coverage for certain types of claims by using a wholly-owned captive insurance company. The level of risk retained by our captive insurance company, with respect to professional indemnity claims, is up to \$2.5 million per claim. The accruals for professional indemnity claims facilitated through our captive insurance company which relate to multiple years were \$1.6 million and \$1.0 million as of December 31, 2012 and 2011, respectively.

Professional indemnity insurance claims can be complex and take a number of years to resolve. Within our captive insurance company, we estimate the ultimate cost of these claims by way of specific claim accruals developed through periodic reviews of the circumstances of individual claims. When a potential loss event occurs, management estimates the ultimate cost of the claims and accrues the related cost when probable and estimable.

Fair Value of Financial Instruments

Fair value is a market-based measurement, not an entity-specific measurement, and should be determined based on the assumptions that market participants would use in pricing the asset or liability. As a basis for considering market participant assumptions in fair value measurements, FASB guidance establishes a fair value hierarchy that distinguishes between market participant assumptions based on market data obtained from sources independent of the reporting entity (observable inputs that are classified within levels one and two of the hierarchy) and the reporting entity's own assumptions about market participant assumptions (unobservable inputs classified within level three of the hierarchy):

Level 1. Observable inputs such as quoted prices in active markets;

Level 2. Inputs, other than the quoted prices in active markets, that are observable either directly or indirectly; and

Level 3. Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

Our financial instruments include Cash and cash equivalents, Trade receivables, Accounts payable, Warehouse receivables, Short-term borrowings, Warehouse facility, Credit facility, Long-term senior notes and foreign currency exchange contracts. The estimated fair value of Cash and cash equivalents, Trade receivables, Notes and other receivables and Accounts payables approximates their carrying amounts due to the short maturity of these instruments. The estimated fair value of our revolving credit facility and short-term borrowings approximates their carrying value due to their variable interest rate terms.

We carry Warehouse receivables at the lower of cost or fair value based on the commitment price, in accordance with ASC Topic 948, Financial Services—Mortgage Banking. The fair values of our Warehouse receivables and Warehouse facility are based on the committed purchased price. At December 31, 2012, all of the Warehouse receivables were under commitment to be purchased by Freddie Mac. The valuation inputs for these assets and liabilities are Level 2 inputs in the fair value hierarchy as they are readily observable. See, Warehouse Receivables and Facilities above in

Note 2.

We estimate that the fair value of our Long-term senior notes, issued in the fourth quarter of 2012, is \$280.5 million at December 31, 2012 using dealer quotes that are Level 2 inputs in the fair value hierarchy. Their actual carrying value was \$275.0 million at December 31, 2012.

We regularly use foreign currency forward contracts to manage our currency exchange rate risk related to intercompany lending and cash management practices. We determined the fair value of these contracts based on current market rates. The inputs for this valuation are Level 2 inputs in the fair value hierarchy. At December 31, 2012, we had forward exchange contracts in effect recorded as a current asset of \$4.4 million and a current liability of \$10.1 million. At December 31, 2011, we had forward exchange contracts in effect recorded as a current asset of \$4.2 million and a current liability of \$5.6 million.

Table of Contents

We maintain a deferred compensation plan for certain of our U.S. employees that allows them to defer portions of their compensation. We invest directly in insurance contracts which yield returns to fund these deferred compensation obligations. We recognize an asset for the amount that could be realized under these insurance contracts at the balance sheet date and the deferred compensation obligation is adjusted to reflect the changes in the fair value of the amount owed to the employees. The inputs for this valuation are Level 2 inputs in the fair value hierarchy. This plan is recorded on our consolidated balance sheet at December 31, 2012 as Other long-term assets of \$60.5 million, as a long-term liability in Deferred compensation of \$62.1 million, and as a component of equity, Shares held in trust of (\$7.6 million). At December 31, 2011 this plan was recorded as Other long-term assets of \$39.1 million, as a long-term liability in Deferred compensation of \$46.7 million, and as a component of equity, Shares held in trust of (\$7.8 million).

Starting in 2011, we have elected the fair value option for certain investments in real estate ventures. At December 31, 2012 and 2011, we had \$112.7 million and \$35.9 million, respectively, of investments that were accounted for under the fair value method. For these fair value investments in real estate ventures we increase or decrease our investment each reporting period by the change in the fair value of these investments. These fair value adjustments are reflected as gains or losses in our consolidated statements of comprehensive income within Equity in earnings (losses) from real estate ventures. We determine the fair value of these investments based on discounted cash flow models and other Level 3 assumptions that reflect our outlook for the commercial real estate market relative to these real estate assets. See Note 5, Investments in Real Estate Ventures.

We review our investments in real estate ventures accounted for under the equity method on a quarterly basis for indications of whether we may not be able to recover the carrying value of the real estate assets underlying our investments in real estate ventures and whether our investment in these co-investments is other than temporarily impaired. When the carrying amount of the real estate asset is in excess of the future undiscounted cash flows, we use a discounted cash flow approach to determine the fair value of the asset in computing the amount of the impairment. Our determination of fair value is based on a discounted cash flow approach using primarily Level 3 inputs. See Note 5, Investments in Real Estate Ventures.

There were no transfers between Level 1 and Level 2 valuations during the years ended December 31, 2012, 2011 or 2010.

Derivatives and Hedging Activities

As a Firm, we do not enter into derivative financial instruments for trading or speculative purposes. However, in the normal course of business we do use derivative financial instruments in the form of forward foreign currency exchange contracts to manage selected foreign currency risks. At December 31, 2012, we had forward exchange contracts in effect with a gross notional value of \$1.95 billion (\$886.6 million on a net basis) with a net fair value loss of \$5.7 million. At December 31, 2011, we had forward exchange contracts in effect with a gross notional value of \$1.67 billion (\$758.2 million on a net basis) with a net fair value loss of \$1.4 million.

We currently do not use hedge accounting for these contracts, which are marked-to-market each period with changes in unrealized gains or losses recognized in earnings and offset by foreign currency gains and losses on associated intercompany loans. We include the gains and losses on these forward foreign currency exchange contracts as a component of our overall net foreign currency gains and losses that are included in Operating, administrative and other expense.

We have considered the counterparty credit risk related to these forward foreign currency exchange contracts and do not deem any counterparty credit risk to be material at December 31, 2012.

Table of Contents

Foreign Currency Translation

We prepare the financial statements of our subsidiaries located outside the United States using local currency as the functional currency. The assets and liabilities of these subsidiaries are translated to U.S. dollars at the rates of exchange at the balance sheet date with the resulting translation adjustments included in a separate component of equity (Other comprehensive income (loss)) and in the consolidated statements of comprehensive income (Other comprehensive income—foreign currency translation adjustments). The \$8.9 million of Accumulated other comprehensive income on our consolidated balance sheet at December 31, 2012, consists of \$54.4 million of net foreign currency translation gains and \$45.5 million of unrecognized losses on pension plans recorded net of tax. The \$33.8 million of Accumulated other comprehensive loss on our consolidated balance sheet at December 31, 2011, consists of \$13.4 million of net foreign currency translation gains and \$47.2 million of unrecognized losses on pension plans recorded net of tax.

Income and expenses are translated at the average monthly rates of exchange. We include gains and losses from foreign currency transactions in net earnings as a component of Operating, administrative and other expense. Net foreign currency losses were \$4.3 million, \$1.6 million, and \$4.1 million for the years ending December 31, 2012, 2011 and 2010, respectively.

The effects of foreign currency translation on cash and cash equivalents are reflected in cash flows from operating activities on the consolidated statements of cash flows.

Cash Held for Others

We manage significant amounts of cash and cash equivalents in our role as agent for our investment and property management clients. We do not include such amounts in our consolidated balance sheets.

Taxes Collected from Clients and Remitted to Governmental Authorities

We account for tax assessed by a governmental authority that is based on a revenue or transaction value (i.e., sales, use, and value added taxes) on a net basis, excluded from revenue, and recorded as current liabilities until paid.

Commitments and Contingencies

We are subject to various claims and contingencies related to lawsuits and taxes as well as commitments under contractual obligations. Many of these claims are covered under our current insurance programs, subject to deductibles. We recognize the liability associated with a loss contingency when a loss is probable and estimable. Our contractual obligations generally relate to the provision of services by us in the normal course of our business.

See Note 12 for additional information on commitments and contingencies.

Table of Contents

Earnings Per Share; Net Income Available to Common Shareholders

The difference between basic weighted average shares outstanding and diluted weighted average shares outstanding represents the dilutive impact of our common stock equivalents. Common stock equivalents consist primarily of shares to be issued under employee stock compensation programs and outstanding stock options whose exercise price was less than the average market price of our stock during these periods.

We calculate net income available to common shareholders by subtracting dividend-equivalents paid on outstanding but unvested shares of restricted stock units, net of tax, from net income attributable to the Company.

The following table details the calculations of basic and diluted earnings per common share (\$ in thousands, except share and per share data) for each of the three years ended December 31, 2012, 2011 and 2010.

	2012	2011	2010
Net income attributable to the Company	\$208,050	164,384	153,902
Dividends on unvested common stock, net of tax	494	387	378
Net income available to common shareholders	\$207,556	163,997	153,524
Basic income per common share before dividends on unvested common stock	4.74	3.81	3.64
Dividends on unvested common stock, net of tax	(0.01)	(0.01)	(0.01)
Basic earnings per common share	\$4.73	3.80	3.63
Basic weighted average shares outstanding	43,848,737	43,170,383	42,295,526
Dilutive impact of common stock equivalents:			
Outstanding stock options	3,926	10,474	28,160
Unvested stock compensation programs	946,774	1,186,502	1,760,468
Diluted weighted average shares outstanding	44,799,437	44,367,359	44,084,154
Diluted income per common share before dividends on unvested common stock	\$4.64	3.71	3.49
Dividends on unvested common stock, net of tax	(0.01)	(0.01)	(0.01)
Diluted earnings per common share	\$4.63	3.70	3.48

New Accounting Standards

In June 2011, the Financial Accounting Standards Board (“FASB”) issued ASU 2011-05, “Presentation of Comprehensive Income.” ASU 2011-05 eliminates the option to report other comprehensive income and its components in the statement of changes in stockholders’ equity and requires an entity to present the components of net income and other comprehensive income either in a single continuous statement or in two consecutive statements. To meet the requirements of ASU 2011-05, we have presented other comprehensive income and its components in our consolidated statements of comprehensive income.

In February 2013, the FASB issued ASU 2013-02, “Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income.” ASU 2013-02 requires an entity to report the effect of significant reclassifications out of accumulated other comprehensive income by the respective line item in net income. To meet this requirement, an entity shall provide such information together, in one location, either on the face of the statement of comprehensive income or as a separate disclosure in the notes to the financial statements. Upon adoption, we will be required to apply these requirements for all periods presented, including interim reporting periods, beginning January 1, 2013.

Table of Contents

(3) BUSINESS SEGMENTS

We manage and report our operations as four business segments:

The three geographic regions of Real Estate Services (“RES”):

- (1) Americas,
 (2) Europe, Middle East and Africa (“EMEA”),
 (3) Asia Pacific;
 and
 (4) Investment Management, which offers investment management services on a global basis.

Each geographic region offers the full range of our Real Estate Services including agency leasing and tenant representation, capital markets and hotels, property management, facilities management, project and development management, energy management and sustainability, construction management, and advisory, consulting and valuation services.

The Investment Management segment provides investment management services to institutional investors and high-net-worth individuals.

Operating income represents total revenue less direct and indirect allocable expenses. We allocate all expenses, other than interest and income taxes, as nearly all expenses incurred benefit one or more of the segments. Allocated expenses primarily consist of corporate global overhead. We allocate these corporate global overhead expenses to the business segments based on the budgeted operating expenses of each segment.

For segment reporting, we show revenue net of gross contract costs in our RES segments. Excluding these costs from revenue and expenses in a “net” presentation of “fee revenue” and “fee-based operating expense” more accurately reflects how we manage our expense base and operating margins. See Revenue Recognition in Note 2 for additional information on our gross and net accounting. For segment reporting we also show equity earnings (losses) from real estate ventures within our revenue line, since it is an integral part of our Investment Management segment.

Our measure of segment operating results excludes restructuring charges. The Chief Operating Decision Maker of Jones Lang LaSalle measures the segment results with equity in earnings (losses) from real estate ventures, and without restructuring charges. We define the Chief Operating Decision Maker collectively as our Global Executive Committee, which is comprised of our Global Chief Executive Officer, Global Chief Operating and Financial Officer and the Chief Executive Officers of each of our reporting segments.

Summarized financial information by business segment for 2012, 2011 and 2010 are as follows (\$ in thousands):

(4) BUSINESS COMBINATIONS, GOODWILL AND OTHER INTANGIBLE ASSETS

2012 Business Combinations Activity

In 2012, we paid \$27.7 million for acquisitions consisting of \$15.5 million for four new acquisitions and \$12.2 million for contingent earn-out consideration for acquisitions completed in prior years. We also paid \$143.8 million to satisfy deferred acquisition obligations, including (1) \$30.8 million for the 2011 King Sturge acquisition, and (2) \$111.1 million for the 2008 Staubach acquisition. The Staubach payment also included \$3.9 million that we recorded as compensation expense for a total payment of \$115.0 million, representing an acceleration of the majority of the \$156.0 million deferred acquisition payment previously scheduled to be paid in August 2013.

In 2012, we completed four new acquisitions: (1) MPS, an Australian tenant advisory firm, (2) 360 Commercial Partners, an Orange County, California based real estate services firm that specializes in industrial sales and leasing, (3) Credo Real Estate, a Singapore-based real estate advisory firm specializing in collective and residential sales, valuations, auctions, research and consultancy, and (4) The Apartment Group Ltd., a multifamily brokerage firm in Dallas, Texas.

Terms of these acquisitions included (1) cash paid at closing, net of cash acquired, of \$15.5 million, (2) consideration subject only to the passage of time recorded as Deferred business acquisition obligations at a current fair value of \$5.6 million, and (3) additional consideration subject to earn-out provisions that will be paid only if certain conditions are achieved, recorded as current and long-term liabilities, at their estimated fair value of \$7.4 million. These acquisitions resulted in goodwill of \$29.0 million and identifiable intangibles of \$1.8 million.

During the six months ended June 30, 2012, we finalized the purchase price allocation of the net assets acquired in the 2011 King Sturge acquisition, resulting in \$3.5 million of additional goodwill.

In the fourth quarter of 2012, we increased goodwill by \$30.7 million for the final earn-out payment for the 2008 Staubach acquisition. We anticipate making this payment in first quarter of 2013.

2011 Business Combinations Activity

In 2011, we paid \$251.8 million in total for (1) nine new acquisitions, (2) contingent earn-out consideration for acquisitions completed in prior years, and (3) an increase in ownership in our Indian operation from 80% to 90%. We also paid \$164.2 million to satisfy deferred business acquisition obligations, including \$150.0 million related to the 2008 Staubach acquisition and \$10.7 million related to the 2006 Spaulding and Slye acquisition.

In the first quarter of 2011, we completed two acquisitions in the Americas and one acquisition in EMEA. In the United States, we acquired Keystone Partners, a North Carolina-based integrated real estate services firm whose services include agency leasing, investment sales, project management, tenant representation, consulting and property management. We also acquired certain assets of Atlanta-based Primary Capital™ Advisors, which gives us the ability to operate as a Freddie Mac Program Plus® Seller/Service and allows us to originate, sell and service commercial mortgages. In Switzerland, we acquired a Zurich-based business that focuses on capital market transactions and valuations and serves many of our existing clients.

In the second quarter of 2011, we completed two acquisitions in EMEA and we increased the ownership of our Indian operation from 80% to 90%. In April, we completed the acquisition of Bradford McCormack & Associates, one of South Africa's leading corporate property service providers, increasing our capabilities across service lines in South Africa and neighboring countries. Effective May 31, 2011, we completed the acquisition of United Kingdom-based international property consultancy King Sturge. The King Sturge acquisition greatly enhances the strength and depth of our service capabilities and added approximately 1,400 employees in the United Kingdom and across Europe.

In the third quarter of 2011, we completed two acquisitions. In August 2011, our Investment Management segment acquired Trinity Funds Management, an Australian property fund management business based in Brisbane, Australia, with approximately \$690 million of assets under management. Also in August, we acquired Procon, an Indonesian real estate services firm. The combination of Procon's operations with our Indonesian operations creates the largest real estate services company in Indonesia, with over 300 employees and offices in Jakarta, Bali and Surabaya.

In the fourth quarter of 2011, we completed the acquisitions of Pacific Real Estate Partners ("PREP") and DST International Property Services ("DST"). The PREP acquisition increases significantly our market presence in the U.S. Pacific Northwest, particularly in capital markets, agency leasing and tenant representation. In Singapore we acquired DST, an agency specializing in the sale of properties in London, with extensive experience in selling international properties in the U.S., Australia and U.K.

Table of Contents

Terms for the acquisitions completed in 2011 included (1) cash paid at closing of approximately \$239.7 million, (2) consideration subject only to the passage of time, which we recorded as deferred business acquisition obligations on our consolidated balance sheet at a current fair value of \$149.5 million, and (3) additional consideration subject to earn-out provisions that will be paid only if certain financial performance conditions are achieved, which we recorded in other short-term and long-term liabilities at their current estimated fair value of \$6.6 million.

We determined the fair value of deferred payments in the King Sturge acquisition based on a discount rate of 3.75%, an estimate of our borrowing rate over the five year deferred payment period.

The King Sturge acquisition resulted in \$268.4 million of goodwill, including a final \$3.5 million adjustment recorded in 2012, and \$32.2 million of identifiable intangible assets, primarily the King Sturge trade name, customer relationships and acquired backlog that we anticipate we will amortize over periods ranging from seven months to ten years, with a weighted average life of six years.

The following table shows total consideration for acquisition activity completed in 2012 and 2011 and the allocation of this consideration (\$ in thousands):

	2012	2011
Cash paid for new acquisitions	\$ 15,455	239,657
Cash paid for earn-outs on acquisitions completed in prior years	12,251	12,130
Deferred acquisition obligations (including Staubach earn-out accrual)	36,281	149,521
Earn-out liabilities	7,373	6,598
Total consideration	\$ 71,360	407,906
Goodwill	\$ 75,876	327,651
Identifiable intangibles	1,764	46,121
Reduction in minority shareholder redemption liability	-	17,058
Assets acquired, including adjustments to provisional balances	(6,280)	17,076
Allocation of consideration	\$ 71,360	407,906

Earn-out Payments

At December 31, 2012, we had the potential to make earn-out payments on 14 acquisitions that are subject to the achievement of certain performance conditions. The maximum amount of the potential earn-out payments for these acquisitions was \$42.2 million at December 31, 2012. Assuming the achievement of the applicable performance conditions, we anticipate that most of these earn-out payments will come due over the next three years.

Approximately \$19.6 million of these potential earn-out payments are the result of acquisitions completed prior to the adoption of the fair value requirements for contingent consideration under ASC Topic 805, "Business Combinations," and thus will be recorded as additional purchase consideration if and when these contingencies are met. Changes in the estimated fair value of the remaining \$22.6 million of potential earn-out payments will result in increases or decreases in Operating, administration and other expenses in our consolidated statements of comprehensive income. The fair value of these contingent payments is based on discounted cash flow models that reflect our projections of operating results of each respective acquisition and are based on Level 3 inputs in the fair value hierarchy.

Goodwill and Other Intangible Assets

We have \$1.9 billion of unamortized goodwill and identifiable intangibles as of December 31, 2012. A significant portion of these unamortized intangibles and goodwill are denominated in currencies other than U.S. dollars, which means that a portion of the movements in the reported carrying value of these balances is attributable to movements in foreign currency exchange rates. The tables below detail the foreign exchange impact on our intangible and goodwill balances. Included in the \$1.9 billion of unamortized intangibles and goodwill are: (1) goodwill of \$1.85 billion with indefinite useful lives which is not amortized, (2) identifiable intangibles of \$37.0 million that will be amortized over their remaining finite useful lives, and (3) \$8.9 million of identifiable intangibles with indefinite useful lives which is not amortized.

Table of Contents

The following table details, by reporting segment, the movements in goodwill with indefinite useful lives (\$ in thousands):

	REAL ESTATE SERVICES				
	AMERICAS	EMEA	ASIA/PACIFIC	INVESTMENT MANAGEMENT	CONSOLIDATED
Balance as of January 1, 2011	\$ 897,299	336,099	193,142	18,168	1,444,708

----------------------------------	----------	--------	-------	-------	--------

Table of Contents

We amortize our identifiable intangible assets with finite lives on a straight-line basis over their useful lives. The remaining weighted average amortization period of these intangible assets is 3.3 years and the remaining estimated future amortization expense for our identifiable intangibles with finite useful lives is as follows at December 31, 2012 (\$ in thousands):

FUTURE AMORTIZATION	
2013	\$ 9,161
2014	7,785
2015	6,678
2016	3,233
2017	2,713
Thereafter	7,473
Total	\$ 37,043

(5) INVESTMENTS IN REAL ESTATE VENTURES

As of December 31, 2012 and 2011, we had total investments in real estate ventures of \$268.1 million and \$224.9 million, respectively. We account for the majority of our funds under the equity method of accounting; however, starting in 2011, we have elected the fair value option for certain of our investments. Our investments are primarily co-investments in approximately 50 separate property or co-mingled funds for which we also have an advisory agreement. Our ownership percentages in these investments generally range from less than 1% to 15%.

We utilize two investment vehicles to facilitate the majority of our co-investment activity when we do not invest directly into a real estate venture. LaSalle Investment Company I (“LIC I”) is our investment vehicle for substantially all co-investment commitments made through December 31, 2005. LIC I is fully committed to underlying real estate ventures. At December 31, 2012, our maximum potential unfunded commitment to LIC I is \$5.0 million (€3.7 million).

LaSalle Investment Company II (“LIC II”) is our investment vehicle for substantially all co-investment commitments made after December 31, 2005. At December 31, 2012, LIC II has unfunded capital commitments to the underlying funds of \$174.8 million, of which our 48.78% share is \$85.3 million. The \$85.3 million commitment is part of our maximum potential unfunded total commitment to LIC II at December 31, 2012 of \$151.6 million.

LIC I and LIC II invest in certain real estate ventures that own and operate commercial real estate. We have an effective 47.85% ownership interest in LIC I, and an effective 48.78% ownership interest in LIC II; primarily institutional investors hold the remaining 52.15% and 51.22% interests in LIC I and LIC II, respectively. Additionally, a non-executive Director of Jones Lang LaSalle is an investor in LIC I on equivalent terms to other investors.

LIC I’s and LIC II’s exposures to liabilities and losses of the ventures are limited to their existing capital contributions and remaining capital commitments. We anticipate that LIC I will draw down on our remaining commitment by the end of 2013 to satisfy its existing commitments to underlying funds, and we expect that LIC II will draw down on our commitment over the next four to six years as it enters into new commitments. Our Board of Directors has approved the use of our co-investment capital in particular situations to control existing real estate assets or portfolios or to seed future investments within LIC II.

As of December 31, 2012, LIC II maintains a \$60.0 million revolving credit facility (the “LIC II Facility”), principally for working capital needs. The LIC II Facility contains a credit rating trigger and a material adverse condition clause. If either of the credit rating trigger or the material adverse condition clause becomes triggered, the facility would be in default and outstanding borrowings would need to be repaid. Such a condition would require us to fund our pro-rata share of the then outstanding balance on the LIC II Facility, which is the limit of our liability. The maximum exposure to Jones Lang LaSalle, assuming that the LIC II Facility was fully drawn, would be \$29.3 million. The exposure is

included within and cannot exceed our maximum potential unfunded commitment to LIC II of \$151.6 million. As of December 31, 2012, LIC II had \$53.6 million of outstanding borrowings on the facility.

Table of Contents

The following table summarizes the discussion above relative to LIC I and LIC II at December 31, 2012 (\$ in millions):

	LIC I	LIC II
Our effective ownership interest in co-investment vehicle	47.85%	48.78%
Our maximum potential unfunded commitments	\$ 5.0	\$ 151.6
Our share of unfunded capital commitments to underlying funds	3.0	85.3
Our maximum exposure assuming facilities are fully drawn	N/A	29.3
Our share of exposure on outstanding borrowings	N/A	26.1

Exclusive of our LIC I and LIC II commitment structures, we have potential obligations related to unfunded commitments to other real estate ventures, the maximum of which is \$54.7 million as of December 31, 2012.

Our investments in real estate ventures include investments in entities classified as variable interest entities (“VIEs”) that we analyze for potential consolidation. We had investments, either directly or indirectly, of \$6.7 million and \$22.3 million at December 31, 2012 and December 31, 2011, respectively, in entities classified as VIEs. We evaluate each of these VIEs to determine whether we might have the power to direct the activities that most significantly impact the entity’s economic performance. In each case, we determined that we either (1) did not have the power to direct the key activities or (2) shared power with investors, lenders, or other actively-involved third parties. Additionally, our exposure to loss in these VIEs is limited to the amount of our investment in the entities. Therefore, we concluded that we would not be deemed to (1) have a controlling financial interest in or (2) be the primary beneficiary of these VIEs. Accordingly, we do not consolidate these VIEs in our Consolidated Financial Statements.

The following table summarizes the combined financial information for the unconsolidated ventures (including those held via LIC I and LIC II) accounted for under either the equity method of accounting or at fair value (\$ in millions):

	2012	2011	2010
Balance Sheet:			
Investments in real estate, net of depreciation	\$ 14,042.7	15,611.7	15,333.9
Total assets	16,942.5	18,672.6	17,800.2
Mortgage indebtedness	9,173.3	10,106.5	10,366.0
Other borrowings	346.8	242.7	525.5
Total liabilities	9,449.6	11,698.5	12,192.1
Total equity	\$ 7,492.9	6,974.1	5,608.1
Statements of Operations:			
Revenue	\$ 1,871.9	1,693.7	1,691.0
Net income (loss)	776.0	73.5	(361.8)

Impairment

We review our investments in real estate ventures that we accounted for under the equity method of accounting on a quarterly basis for indications of (1) whether the carrying value of the real estate assets underlying our investments in real estate ventures may not be recoverable and (2) whether our equity in these investments is other than temporarily impaired. When events or changes in circumstances indicate that the carrying amount of a real estate asset underlying one of our investments in real estate ventures may be impaired, we review the recoverability of the carrying amount of the real estate asset in comparison to an estimate of the future undiscounted cash flows expected to be generated by the underlying asset. When the carrying amount of the real estate asset is in excess of the future undiscounted cash flows, we use a discounted cash flow approach to determine the fair value of the asset in computing the amount of the

impairment.

Equity earnings (losses) from real estate ventures included impairment charges of \$7.9 million, \$5.6 million, and \$13.6 million for the years ended December 31, 2012, 2011 and 2010, respectively, representing our share of the impairment charges against individual assets held by our real estate ventures.

103

Table of Contents

Fair Value

Starting in the third quarter of 2011, we elected the fair value option, in the ordinary course of business at the time of the initial investment, for certain investments in real estate ventures because we believe the fair value accounting method more accurately represents the value and performance of these investments. At December 31, 2012 and 2011, we had \$112.7 million and \$35.9 million, respectively, of investments that were accounted for under the fair value method. For investments in real estate ventures for which the fair value option has been elected, we increase or decrease our investment each reporting period by the change in the fair value of these investments. We reflect these fair value adjustments as gains or losses in our consolidated statements of comprehensive income within Equity in earnings (losses) from real estate ventures. For the years ended December 31, 2012 and 2011, we recognized fair value gains of \$3.1 million and \$0.6 million, respectively. The fair value of these investments is based on discounted cash flow models and other assumptions that reflect our outlook for the commercial real estate market relative to these real estate assets and is primarily based on inputs that are Level 3 inputs in the fair value hierarchy.

The following table shows the movements in our investments in real estate ventures that are accounted for under the fair value accounting method (\$ in thousands):

	2012	2011
Fair value investments as of January 1,	\$ 35,872	-
Investments	102,445	36,513
Distributions	(29,085)	-
Net fair value gain	3,064	640
Foreign currency translation adjustments, net	436	(1,281)
Fair value investments as of December 31,	\$ 112,732	35,872

(6) STOCK COMPENSATION PLANS

The Jones Lang LaSalle Amended and Restated Stock Award and Incentive Plan (“SAIP”) provides for the granting of various stock awards to eligible employees of Jones Lang LaSalle. Such awards include restricted stock units and options to purchase a specified number of shares of common stock, although we have not granted stock options since 2003. There were approximately 1.3 million shares available for grant under the SAIP at December 31, 2012. We also have a stock-based compensation plan for our United Kingdom and Ireland based employees, the Jones Lang LaSalle Savings Related Share Option Plan (“Save As You Earn” or “SAYE” plan), that allows for the purchase of stock at a 15% discount from the market price at the beginning of the plan’s three and five year vesting periods.

Share-based compensation expense is included within Compensation and benefits expense in our consolidated statements of comprehensive income. Share-based compensation expense for the years ended December 31, 2012, 2011 and 2010 consisted of the following (\$ in thousands):

	2012	2011	2010
Restricted stock unit awards	\$ 31,553	33,915	41,166
UK SAYE	938	726	768
	\$ 32,491	34,641	41,934

We amortize the fair value of share-based compensation on a straight-line basis over the associated vesting periods for each separately vesting portion of an award. Employees age 55 or older, with a sum of age plus years of service with the Company which meets or exceeds 65, are eligible to be considered for receipt of retirement benefits upon departure from the Company. These criteria trigger application of certain provisions of ASC Topic 718, “Compensation – Stock Compensation,” whereby compensation expense for restricted stock unit awards granted to employees meeting this criteria are accelerated such that all expense is recognized by the time that these employees meet the criteria to be considered for retirement eligibility.

Table of Contents

Restricted Stock Unit Awards

Historically a significant portion of restricted stock units granted each year have been granted in the first quarter of the year under our Stock Ownership Program (the “SOP”). The SOP generally required that from 10% to 20% of incentive compensation (or “bonus”) of our senior-most 5% of employees be deferred and delivered in restricted stock units. Under the SOP plan we have granted approximately 365,000, 212,000 and 297,000 shares of restricted stock in 2012, 2011 and 2010, respectively. In the second quarter of 2012, we terminated the SOP in connection with incentive compensation payments for 2012 performance, such that no additional restricted stock units will be issued under the SOP in the first quarter of 2013 or thereafter. Since the start of the SOP, our employee population has grown significantly and other aspects of our compensation programs have evolved, as a result of which we have determined that (1) there are other more targeted and strategic approaches we can take in order to enhance our equity incentive compensation programs, and (2) we can do so in a way that will be less dilutive to shareholders than the SOP would be if we continued this plan.

Restricted stock activity in 2012 and 2011 was as follows:

	SHARES (THOUSANDS)	WEIGHTED AVERAGE GRANT DATE FAIR VALUE	WEIGHTED AVERAGE REMAINING VESTING PERIOD
Unvested at January 1, 2011	2,086.0	\$ 50.49	
Granted	425.0	88.25	
Vested	(1,102.3)	45.10	
Forfeited	(46.4)	60.01	
Unvested at December 31, 2011	1,362.3	\$ 66.29	1.88 years
Granted	606.3	67.34	
Vested	(577.7)	62.24	
Forfeited	(30.6)	68.85	
Unvested at December 31, 2012	1,360.3	\$ 68.42	2.00 years
Unvested shares expected to vest	1,319.1	\$ 68.45	2.01 years

We determine the fair value of restricted stock units based on the market price of the Company’s common stock on the grant date. As of December 31, 2012, there was \$31.4 million of remaining unamortized deferred compensation related to unvested restricted stock units. The remaining cost of unvested restricted stock units granted through December 31, 2012 will be recognized over varying periods through 2017.

Shares vested during the years ended December 31, 2012, 2011 and 2010 had grant date fair values of \$36.0 million, \$49.7 million and \$53.9 million, respectively. Shares granted during the years ended December 31, 2012, 2011 and 2010 had weighted average grant date fair values of \$40.8 million, \$37.5 million and \$35.5 million, respectively.

Other Stock Compensation Programs

The SAYE plan is for eligible employees of our United Kingdom and Ireland based operations. Under this plan, employees make an annual election to contribute to the plan to purchase stock at a 15% discount from the market price at the beginning of the plan’s three and five year vesting periods. There were approximately 608,000 shares available for grant under the SAYE plan at December 31, 2012.

Table of Contents

Options activity under the SAYE plan for the years ended December 31, 2012 and 2011 are as follows:

	2012	2011
Options granted	127,400	17,000
Exercise price – options granted	\$ 59.26	\$ 83.72
Options exercised	172,980	13,393
Weighted average exercise price	\$ 19.78	\$ 55.43

The fair values of options granted under the SAYE plan are amortized over their respective vesting periods. There were 237,377 and 310,349 options outstanding under the SAYE plan at December 31, 2012 and 2011, respectively.

(7) RETIREMENT PLANS**Defined Contribution Plans**

We have a qualified profit sharing plan that incorporates United States Internal Revenue Code Section 401(k) for our eligible U.S. employees. We make employer match contributions under this qualified profit sharing plan that are included in the accompanying consolidated statements of comprehensive income. For the years ended December 31, 2012, 2011 and 2010 our employer contributions were \$13.5 million, \$12.3 million and \$11.4 million, respectively. Related trust assets of the Plan are managed by trustees and are excluded from the accompanying Consolidated Financial Statements.

We maintain several defined contribution retirement plans for our eligible non-U.S. employees. Our contributions to these plans were approximately \$22.1 million, \$15.0 million and \$14.0 million for the years ended December 31, 2012, 2011 and 2010, respectively.

Defined Benefit Plans

We maintain five contributory defined benefit pension plans in the United Kingdom (U.K.), Ireland and the Netherlands to provide retirement benefits to eligible employees. With the 2011 acquisition of King Sturge we acquired another defined benefit plan in the United Kingdom. It is our policy to fund the minimum annual contributions required by applicable regulations. We use a December 31 measurement date for our plans.

Net periodic pension cost for the years ended December 31, 2012, 2011 and 2010 consisted of the following (\$ in thousands):

	2012	2011	2010
Employer service cost—benefits earned during the year	\$ 3,978	3,853	2,653
Interest cost on projected benefit obligation	14,202	13,590	10,196
Expected return on plan assets	(17,332)	(16,826)	(11,738)
Net amortization/deferrals	2,070	1,450	1,409
Recognized actuarial loss	157	584	153
Net periodic pension cost	\$ 3,075	2,651	2,673

Table of Contents

The following tables provide reconciliations of projected benefit obligations and plan assets (the net of which is our funded status), as well as the funded status and accumulated benefit obligations, of our defined benefit pension plans as of December 31, 2012 and 2011 (\$ in thousands):

Change in benefit obligation:	2012	2011
Projected benefit obligation, beginning of year	\$ 294,245	199,604
Service cost	3,978	3,853
Interest cost	14,202	13,590
Plan participants' contributions	796	828
Benefits paid	(6,718)	(5,294)
Actuarial loss	21,080	5,214
King Sturge acquisition	-	83,439
Changes in currency translation rates	13,896	(5,946)
Other	(2,264)	(1,043)
Projected benefit obligation, end of year	\$ 339,215	294,245
Change in plan assets:	2012	2011
Fair value of plan assets, beginning of year	\$ 277,012	195,583
Actual return on plan assets	38,726	(653)
Plan contributions	13,797	20,619
Benefits paid	(6,718)	(5,294)
King Sturge acquisition	-	73,339
Changes in currency translation rates	13,381	(5,242)
Other	(2,264)	(1,340)
Fair value of plan assets, end of year	\$ 333,934	277,012
Funded status and net amount recognized	\$ (5,281)	(17,233)
Accumulated benefit obligation, end of year	\$ 335,202	290,344

The accumulated benefit obligation was calculated based on the actuarial present value of the vested benefits to which employees are entitled if they terminate their employment immediately.

Defined benefit pension plan amounts recognized in the accompanying consolidated balance sheets as of December 31, 2012 and 2011 include the following (\$ in thousands):

	2012	2011
Pension liabilities	\$ (5,281)	(17,233)
Accumulated other comprehensive loss	58,748	58,710
Net amount recognized	\$ 53,467	41,477

Amounts in accumulated other comprehensive income yet to be recognized as components of net periodic pension cost are comprised of \$57.6 million of actuarial losses and \$1.1 million of prior service cost as of December 31, 2012. We anticipate that \$2.4 million of this accumulated other comprehensive loss will be recognized as net periodic pension cost in 2013.

Table of Contents

The ranges of assumptions we used in developing the projected benefit obligation as of December 31 and in determining net periodic benefit cost for the years ended December 31 were as follows:

	2012	2011	2010
Discount rate used in determining present values	3.50% to 4.70%	4.70% to 5.70%	5.35% to 6.00%
Annual increase in future compensation levels	0.00% to 3.40%	2.00% to 3.40%	2.00% to 4.85%
Expected long-term rate of return on assets	4.70% to 6.64%	5.40% to 7.00%	3.30% to 7.00%

The discount rate assumptions used for these pension plans were based on the yield of investment grade bonds with durations consistent with the liabilities of these plans.

Plan assets consist of diversified portfolios principally comprised of equity and debt securities. The investments and investment policies of these defined benefit plans are controlled by trusts. The investment objective of these trusts is to invest plan assets in such a manner that members' benefit entitlements can be paid when they come due. Plan assets are invested with a long-term focus to achieve a return on investment that is based on levels of liquidity and investment risk that the trustees, in consultation with the Company's management, believe are prudent and reasonable. These trusts set investment target allocations, but generally are not prohibited by the Company from investing in certain types of assets. The pension plan assets held no derivative instruments at December 31, 2012.

The fair value of plan assets of the U.K. and Irish plans was determined using quoted market prices, Level 1 inputs, and significantly observable inputs, Level 2 inputs. The fair value of plan assets at December 31, 2012, determined using Level 1 inputs was \$267.5 million, and using Level 2 inputs was \$42.7 million. The expected long-term rate of return on these assets is based on historical trends for similar asset classes, as well as current economic conditions.

The Company's defined benefit plan in the Netherlands has its assets invested with a third party insurance company that guarantees the payments of benefits earned under this plan. The fair values of the plan assets for this plan were \$23.7 million and \$16.6 million at December 31, 2012 and 2011, respectively. The valuation of these assets was determined by the third party insurance company and is a Level 3 valuation.

The allocation of pension plan assets at December 31, 2012 and 2011 is as follows:

	2012		2011	
Equity securities				
U.K. equities	17	%	16	%
Non-U.K. equities	30	%	30	%
Debt securities				
Corporate bonds	39	%	39	%
Government and other	5	%	5	%
Cash and other	9	%	10	%
	100	%	100	%

The actual asset allocation at December 31, 2012 approximates the plan's target asset allocation percentages.

108

Table of Contents

Future contributions and payments — We expect to contribute \$12.6 million to our defined benefit pension plans in 2013. Additionally, the following pension benefit payments, which reflect expected future service, as appropriate, are expected to be paid (\$ in thousands):

PENSION BENEFIT PAYMENTS		
2013	\$	7,122
2014		7,475
2015		7,841
2016		7,890
2017		8,141
2018 to 2022		45,951
Total	\$	84,420

(8) INCOME TAXES

For the years ended December 31, 2012, 2011 and 2010, our provision for income taxes consisted of the following (\$ in thousands):

	2012	2011	2010
U.S. Federal:			
Current	\$ 11,108	2,702	3,255
Deferred	705	22,598	(1,143)
	11,813	25,300	2,112
State and Local:			
Current	3,687	643	775
Deferred	168	5,380	(272)
	3,855	6,023	503
International:			
Current	62,650	64,554	59,114
Deferred	(9,074)	(39,490)	(12,691)
	53,576	25,064	46,423
Total	\$ 69,244	56,387	49,038

In 2012, our current tax expense was increased by \$20.6 million due to the generation of additional net operating loss carryovers. In 2011 and 2010, our current tax expense was reduced by \$22.7 million and \$35.8 million, respectively, due to the utilization of prior years' net operating loss carryovers.

Table of Contents

Income tax expense for 2012, 2011, and 2010 differed from the amounts computed by applying the U.S. federal income tax rate of 35% to earnings before provision for income taxes as a result of the following (\$ in thousands):

	2012		2011		2010	
Computed "expected" tax expense	\$97,331	35.0 %	\$ 77,699	35.0 %	\$ 71,217	35.0 %
Increase (reduction) in income taxes resulting from:						
State and local income taxes, net of federal income tax benefit	2,753	1.0 %	4,089	1.8 %	1,659	0.8 %
Amortization of goodwill and other intangibles	(7,685)	(2.8 %)	(1,131)	(0.5 %)	(1,183)	(0.6 %)
Nondeductible expenses	1,169	0.4 %	680	0.3 %	898	0.4 %
International earnings taxed at varying rates	(33,540)	(12.1 %)	(29,174)	(13.1 %)	(32,779)	(16.1 %)
Valuation allowances	13,588	5.0 %	3,152	1.4 %	5,722	2.8 %
Return to provision adjustment	(5,861)	(2.1 %)	(2,946)	(1.3 %)	(75)	0.0 %
Other, net	1,489	0.5 %	4,018	1.8 %	3,579	1.8 %
Total	\$69,244	24.9 %	\$ 56,387	25.4 %	\$ 49,038	24.1 %

With respect to international earnings taxed at varying rates, we have operations which constitute a taxable income tax presence in 74 countries or other taxable jurisdictions outside of the United States which are treated as such by the United States Internal Revenue Code. All of those countries except one had income tax rates lower than the combined United States federal and state income tax rate in 2012.

With respect to jurisdictions in which the Company operates with very low tax rates, income from The Netherlands (25%), Singapore (17%) and Hong Kong (16.5%) represent the most significant components of the international earnings line item in our effective tax rate reconciliation. Other very low rate tax jurisdictions with meaningful contributions to the international earnings line item in our effective tax rate reconciliation include; The People's Republic of China (25%), Switzerland (21.1%), Russia (20%), Poland (19%), Macau (12%) and Cyprus (10%). In the aggregate, these very low rate jurisdictions contributed over half of the difference between the actual income tax provision for international earnings and the equivalent provision at the United States statutory rate in 2012. The remaining difference was contributed by earnings in jurisdictions with effective tax rates above 25% and by earnings of insignificant amounts in very low tax rate jurisdictions other than those noted above.

In defining very low tax rate jurisdictions, we consider effective tax rates that applied in 2012 based upon income levels and national and local taxes, which may cause those effective rates to differ from the maximum national statutory rates for these jurisdictions. We apply a threshold of 25% or lower, which represents a difference of 10% or more from the United States federal statutory income tax rate and which is approximately equal to our reported effective tax rate.

For the years ended December 31, 2012, 2011, and 2010 our income before taxes from domestic (U.S.) and international sources is as follows (\$ in thousands):

	2012	2011	2010
Domestic	\$ 100,117	97,469	36,836
International	177,970	124,530	166,641
Total	\$ 278,087	221,999	203,477

Table of Contents

The tax effects of temporary differences that give rise to significant portions of the deferred tax assets and deferred tax liabilities are presented below (\$ in thousands):

	2012	2011
Deferred tax assets attributable to:		
Accrued expenses	\$ 89,962	84,575
U.S. federal and state loss and credit carryovers	82,632	84,716
Allowances for uncollectible accounts	6,236	6,225
International loss carryovers	147,390	125,121
Investments in real estate ventures	39,112	32,588
Pension liabilities	14,811	19,399
Other	—	330
Deferred tax assets	\$ 380,143	352,954
Less valuation allowances		
	(53,810)	(38,797)
Net deferred tax assets	\$ 326,333	314,157
Deferred tax liabilities attributable to:		
Property and equipment	\$ 4,675	9,873
Intangible assets	82,142	74,836
Income deferred for tax purposes	2,055	2,980
Other	1,957	—
Deferred tax liabilities	\$ 90,829	87,689

We have not provided a deferred tax liability on the unremitted foreign earnings of international subsidiaries because it is our intent to permanently reinvest such earnings outside of the United States. If repatriation of all such earnings were to occur, we estimate that our resulting U.S. federal and state tax liability would be approximately \$74 million, net of the benefits of utilization of foreign tax credits and net operating loss carryovers.

As of December 31, 2012, we had an available U.S. net operating loss carryover of \$171.8 million which will begin to expire in 2029; U.S. state net operating loss carryovers with a tax effect of \$20.2 million that expire at various dates through 2027; and international net operating loss carryovers of \$551.1 million, that begin to expire in 2013. The change in deferred tax balances for net operating loss carryovers from 2011 to 2012 includes increases from return-to-provision adjustments and current year losses, and decreases from 2012 estimated utilization.

As of December 31, 2012, we believe it is more likely than not that the net deferred tax assets of \$235.5 million will be realized based upon our estimates of future income and the consideration of net operating losses, earnings trends and tax planning strategies. Valuation allowances have been provided with regard to the tax benefit of certain international net operating loss carryovers, for which we have concluded that recognition is not yet appropriate under ASC Topic 740, "Income Taxes." In 2012, we reduced valuation allowances by \$7.8 million on some jurisdictions' net operating losses due to the utilization or expiration of those losses, and we increased valuation allowances by \$21.4 million for other jurisdictions based upon circumstances that caused us to establish or continue to provide valuation allowances on current or prior year losses in addition to those provided in prior years.

As of December 31, 2012, our net current liability for income tax was \$83.7 million.

The Company or one or more of its subsidiaries files income tax returns in the United States (including 46 states and 21 cities and the District of Columbia and Puerto Rico), the United Kingdom (including England and Scotland), Australia, Germany, The People's Republic of China (including Hong Kong and Macau), France, Japan, Singapore,

India, The Netherlands, and Spain as well as 59 other countries. Generally, the Company's open tax years include those from 2008 to the present, although reviews of taxing authorities for more recent years have been completed or are in process in a number of jurisdictions.

Table of Contents

As of December 31, 2012, the Company is under examination in the United Kingdom, Germany, Belgium, Thailand, Indonesia, Hong Kong, China, Singapore, India, and the United States. We are also under examination in the states of Illinois, New York and Texas.

A reconciliation of the beginning and ending amount of unrecognized tax benefits for the years ended 2012 and 2011 is as follows (\$ in thousands):

	2012	2011
Balance at January 1	\$93,365	93,365
Additions based on tax positions related to the current year	5,689	9,647
Decrease for tax positions of prior years	(5,031)	(1,595)
Reductions for use of reserves	(2,287)	(3,356)
Settlements	-	(4,007)
Lapse of statute of limitations	(4,510)	(689)
Balance at December 31	\$87,226	93,365

We believe it is reasonably possible that \$65.2 million of these gross unrecognized tax benefits will be settled within twelve months after December 31, 2012, of which \$47.3 million will be net settled against a related receivable. These settlements may occur due to the conclusion of examinations by tax authorities. We further expect that the amount of unrecognized tax benefits will continue to change as the result of ongoing operations, the outcomes of audits, and the passing of statutes of limitations. We do not expect such changes to have a significant impact on the results of operations or the financial position of the Company. We do not believe that we have material tax positions for which the ultimate deductibility is highly certain, but there is uncertainty about the timing of such deductibility.

We recognize interest accrued and penalties, if any, related to income taxes as a component of income tax expense. During the years ended December 31, 2012, 2011, and 2010, the We recognized approximately \$(0.1) million, \$1.9 million, and \$2.0 million, respectively, in interest and no penalties. We had approximately \$10.1 million and \$10.2 million of accrued interest at December 31, 2012 and 2011, respectively.

(9) DEBT**Credit Facility**

We have a \$1.1 billion unsecured revolving credit facility (the "Facility") that matures in June 2016. We had \$169.0 million and \$463.0 million outstanding under the Facility, at December 31, 2012 and 2011, respectively. At December 31, 2012, we had the capacity to borrow up to an additional \$913.9 million under the Facility. The average outstanding borrowings under the Facility were \$621.2 million and \$467.2 million during the twelve months ended December 31, 2012 and 2011, respectively.

The pricing on the Facility ranges from LIBOR plus 112.5 basis points to LIBOR plus 225.0 basis points. As of December 31, 2012, pricing on the Facility was LIBOR plus 137.5 basis points. The effective interest rate on our debt was 1.6% in 2012, compared with 1.8% in 2011.

We remain in compliance with all covenants under our Facility as of December 31, 2012. The Facility requires us to maintain a leverage ratio that does not exceed 3.50 to 1 through September 2013 and 3.25 to 1 thereafter, and a minimum cash interest coverage ratio of 3.00 to 1.

Included in debt for the calculation of the leverage ratio is the present value of deferred business acquisition obligations and included in Adjusted EBITDA (as defined in the Facility) are, among other things, (1) an add-back for stock compensation expense, (2) the addition of the EBITDA of acquired companies earned prior to acquisition, and (3) add-backs for certain impairment and non-recurring charges. In addition, we are restricted from, among other

things, incurring certain levels of indebtedness to lenders outside of the Facility and disposing of a significant portion of our assets. Lender approval or waiver is required for certain levels of cash acquisitions and co-investment. The deferred business acquisition obligation provisions of the Staubach Merger Agreement also contain certain conditions which are considerably less restrictive than those we have under our Facility. We remain in compliance with all covenants as of December 31, 2012.

Table of Contents

We will continue to use the Facility for working capital needs (including payment of accrued incentive compensation), co-investment activities, dividend payments, share repurchases, capital expenditures and acquisitions.

Short-Term Borrowings

In addition to our Facility, we have the capacity to borrow up to an additional \$45.3 million under local overdraft facilities. We had short-term borrowings (including capital lease obligations and local overdraft facilities) of \$32.2 million and \$65.1 million at December 30, 2012 and 2011, respectively, of which \$25.8 million and \$38.7 million at December 31, 2012 and 2011, respectively, was attributable to local overdraft facilities.

Long-Term Senior Notes

In November 2012, in an underwritten public offering, we issued \$275.0 million of 4.4% Senior Notes due November 2022 (the "Notes"). The net proceeds from the Notes, net of underwriting discounts and expenses, were \$272.4 million, and were used to reduce the outstanding borrowings under our Facility. The Notes bear interest at an annual rate of 4.4%, subject to adjustment if a credit rating assigned to the Notes is downgraded below an investment grade rating (or subsequently upgraded). Interest will be payable semi-annually on May 15 and November 15 of each year, beginning on May 15, 2013.

The Notes are our unsecured obligations and rank equally in right of payment with all of our existing and future unsubordinated indebtedness, including our guarantee under the Facility. The indenture contains covenants that limit our and our subsidiaries' abilities to, among other things, (1) incur liens, (2) enter into sale and leaseback transactions and (3) consolidate, merge or sell or transfer all or substantially all of our assets. We remain in compliance with all covenants under the Notes as of December 31, 2012.

We may redeem the Notes, at any time in whole or from time to time in part, prior to August 15, 2022, at a redemption price as defined in the indenture, plus accrued and unpaid interest. The Notes may be redeemed after August 15, 2022, at a redemption price equal to 100% of the principal amount of the notes to be redeemed plus accrued and unpaid interest. We are required to offer to repurchase the Notes for cash at a price of 101% of principal plus accrued and unpaid interest upon the occurrence of a change of control triggering event, as defined in the indenture.

(10) LEASES

We lease office space in various buildings for our own use. The terms of these non-cancelable operating leases provide for us to pay base rent and a share of operating expenses and real estate taxes in excess of defined amounts. We also lease equipment under both operating and capital lease arrangements.

Minimum future lease payments (e.g., base rent for leases of office space) due in each of the next five years ending December 31 and thereafter are as follows (\$ in thousands):

	OPERATING LEASES	
2013	\$	121,273
2014		104,944
2015		96,919
2016		83,960
2017		56,462
Thereafter		128,106
Minimum lease payments	\$	591,664

As of December 31, 2012, we have accrued liabilities related to excess lease space of \$16.4 million, including \$12.0 million related to excess lease space as a result of combining King Sturge's offices with our offices. The total of minimum rentals to be received under noncancelable operating subleases as of December 31, 2012 was \$45.7 million.

Total rent expense, including office space and other rentals, was \$131.5 million, \$124.4 million and \$110.5 million for the years ended December 31, 2012, 2011 and 2010, respectively.

Table of Contents**(11) TRANSACTIONS WITH AFFILIATES**

As part of our co-investment strategy, we have equity interests in real estate ventures, some of which have certain of our officers as trustees or board of director members, and from which we earn advisory and management fees. Included in the accompanying Consolidated Financial Statements are revenue of \$147.7 million, \$132.3 million and \$163.2 million for 2012, 2011 and 2010, respectively, as well as receivables of \$13.9 million and \$11.2 million at December 31, 2012 and 2011, respectively, related to transactions with affiliates that are primarily a result of transactions with the real estate ventures in which we have equity interests.

The outstanding balance of loans to employees at December 31, 2012 and 2011 are shown in the following table (\$ in millions): (1)

	2012	2011
Loans related to co-investments (2)	\$3.3	4.0
Advances, travel and other (3)	53.1	55.6
	\$56.4	59.6

(1)The Company does not extend credit or provide personal loans to any director or executive officer of the Company.

(2)These nonrecourse loans have been made to allow employees the ability to participate in investment fund opportunities.

(3) Consists primarily of commissions and other compensation advances to employees that are amortized over required service periods.

(12) COMMITMENTS AND CONTINGENCIES

We are a defendant in various litigation matters arising in the ordinary course of business, some of which involve claims for damages that are substantial in amount. Many of these litigation matters are covered by insurance (including insurance provided through a captive insurance company), although they may nevertheless be subject to large deductibles and the amounts being claimed may exceed the available insurance. Although the ultimate liability for these matters cannot be determined, based upon information currently available, we believe the ultimate resolution of such claims and litigation will not have a material adverse effect on our financial position, results of operations or liquidity.

In order to better manage our global insurance program and support our risk management efforts, we supplement our traditional insurance coverage for certain types of claims by using a wholly-owned captive insurance company. The level of risk retained by our captive insurance company, with respect to professional indemnity claims, is up to \$2.5 million per claim, after our deductible.

When a potential loss event occurs, management estimates the ultimate cost of the claim and accrues the related cost when probable and estimable. The accruals for professional indemnity insurance claims facilitated through our captive insurance company which relate to multiple years were \$1.6 million and \$1.0 million, net of receivables, as of December 31, 2012 and 2011, respectively.

(13) RESTRUCTURING AND ACQUISITION CHARGES

In 2012, we recognized \$45.4 million of restructuring and acquisition integration costs consisting of (1) severance of \$12.4 million, (2) King Sturge employee retention bonuses of \$8.2 million, (3) lease exit charges of \$8.4 million, and (4) other acquisition and information technology integration costs of \$16.5 million.

In 2011, we recognized \$56.1 million of restructuring and acquisition integration costs. These costs were mainly associated with the King Sturge acquisition and consisted of (1) employee retention bonuses of \$15.7 million, (2) lease exit charges of \$9.1 million and (3) other transaction costs of \$17.9 million. Additionally, \$13.4 million of severance costs unrelated to King Sturge were recognized in 2011.

In 2010, we recognized \$6.4 million of restructuring charges, net, consisting of (1) \$5.0 million of severance costs, (2) \$1.6 million of integration-related costs incurred as a result of the Staubach acquisition, and (3) a \$0.2 million reduction in a lease exit reserve we accrued in 2009.

Table of Contents

The following table shows the restructuring charges and the related payment activity for the years ending December 31, 2012, 2011 and 2010 (\$ in thousands):

	SEVERANCE	RETENTION BONUSES	LEASE EXIT	INTEGRATION AND ACQUISITION COSTS	TOTAL
December 31, 2009	\$ 11,475	-	1,845	-	13,320
Accruals	5,005	-	(249)	1,630	6,386
Payments made	(12,213)	-	(1,050)	(1,630)	(14,893)
December 31, 2010	\$ 4,267	-	546	-	4,813
Accruals	13,415	15,727	9,058	17,927	56,127
Payments made	(5,970)	(8,172)	(1,692)	(13,149)	(28,983)
December 31, 2011	\$ 11,712	7,555	7,912	4,778	31,957
Accruals	12,422	8,151	8,374	16,474	45,421
Fixed asset disposals	-	-	-	(2,660)	(2,660)
Payments made	(14,143)	(10,518)	(4,323)	(14,357)	(43,341)
December 31, 2012	\$ 9,991	5,188	11,963	4,235	31,377

We expect that accrued severance and other accrued acquisition costs will be paid during the first half of 2013. Payments relating to accrued retention bonuses will be made periodically through the second quarter of 2014. Lease exit payments are dependent on the terms of various leases, which extend as far out as 2017.

Table of Contents

QUARTERLY RESULTS OF OPERATIONS (UNAUDITED)

The tables on the following pages set forth certain unaudited consolidated statements of operations data for each of our past eight quarters. In our opinion, this information has been presented on the same basis as the audited Consolidated Financial Statements appearing elsewhere in this report, and includes all adjustments, consisting only of normal recurring adjustments and accruals, that we consider necessary for a fair presentation. The unaudited consolidated quarterly information should be read in conjunction with our Consolidated Financial Statements and the notes thereto as well as the “Summary of Critical Accounting Policies and Estimates” section within “Management’s Discussion and Analysis of Financial Condition and Results of Operations.” The operating results for any quarter are not necessarily indicative of the results for any future period.

We note the following points regarding how we prepare and present our financial statements on a periodic basis.

Periodic Accounting for Incentive Compensation

An important part of our overall compensation package is incentive compensation, which we typically pay to employees in the year after it is earned. In our interim financial statements, we have accrued for incentive compensation based on the percentage of compensation costs and adjusted operating income relative to forecasted compensation costs and adjusted operating income for the full year, as substantially all incentive compensation pools are based upon full year results. The impact of this incentive compensation accrual methodology is that we accrue less compensation in the first six months of the year, with the majority of our incentive compensation accrued in the second half of the year, particularly in the fourth quarter. We exclude from the standard accrual methodology incentive compensation pools that are not subject to the normal performance criteria. These pools are generally accrued for on a straight-line basis.

Income Taxes

We provide for the effects of income taxes on interim financial statements based on our estimate of the effective tax rate for the full year. We assess our effective tax rate on a quarterly basis and reflect the benefit from tax planning actions when we believe it is probable they will be successful. We account for the cumulative catch-up impact of any change in estimated effective tax rate in the quarter that a change is made.

Seasonality

Our quarterly revenue and profits tend to grow progressively by quarter throughout the year. This is a result of a general focus in the real estate industry on completing or documenting transactions by calendar-year-end and the fact that certain expenses are constant through the year. Historically, we have reported an operating loss or a relatively small profit in the first quarter and then increasingly larger profits during each of the following three quarters, excluding the recognition of investment-generated performance fees and co-investment equity gains (both of which can be particularly unpredictable). Such performance fees and co-investment equity gains are generally earned when assets are sold, the timing of which is geared toward the benefit of our clients. Non-variable operating expenses, which are treated as expenses when they are incurred during the year, are relatively constant on a quarterly basis.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

Jones Lang LaSalle (the Company) has established disclosure controls and procedures to ensure that material information relating to the Company, including its consolidated subsidiaries, is made known to the officers who certify the Company's financial reports and to the members of senior management and the Board of Directors.

Based on management's evaluation as of December 31, 2012, the principal executive officer and principal financial officer of the Company have concluded that the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) are effective.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f) and 15d-15(f). Under the supervision and with the participation of our management, including our principal executive officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on our evaluation under the framework in Internal Control—Integrated Framework, our management concluded that our internal control over financial reporting was effective as of December 31, 2012.

KPMG LLP, the Independent Registered Public Accounting Firm that audited the Consolidated Financial Statements included in this Annual Report on Form 10-K, issued an audit report on the Company's internal control over financial reporting. That Report of Independent Registered Public Accounting Firm is included in Item 8. Financial Statements and Supplementary Data.

CHANGES IN INTERNAL CONTROLS OVER FINANCIAL REPORTING

There were no changes to the Company's internal controls over financial reporting during the quarter ended December 31, 2012 that have materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting.

ITEM 9B. OTHER INFORMATION

Not applicable.

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE REGISTRANT

The information required by this item is incorporated by reference to the material in Jones Lang LaSalle's Proxy Statement for the 2013 Annual Meeting of Shareholders (the "Proxy Statement") under the captions "Directors and Executive Officers," and "Section 16(a) Beneficial Ownership Reporting Compliance" and in Item 1 of this Annual Report on Form 10-K.

ITEM 11. EXECUTIVE COMPENSATION

The information required by this item is incorporated by reference to the material in the Proxy Statement under the caption "Executive Compensation."

Table of Contents

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED SHAREHOLDER MATTERS

The information required by this item is incorporated by reference to the material in the Proxy Statement under the caption “Common Stock Security Ownership of Certain Beneficial Owners and Management.”

The following table provides information as of December 31, 2012 with respect to Jones Lang LaSalle’s common shares issuable under our equity compensation plans (in thousands, except exercise price):

PLAN CATEGORY	NUMBER OF SECURITIES TO BE ISSUED UPON EXERCISE OF OUTSTANDING OPTIONS, WARRANTS AND RIGHTS (A)	AVERAGE EXERCISE PRICE OF OUTSTANDING OPTIONS AND WARRANTS (B)	NUMBER OF SECURITIES REMAINING AVAILABLE FOR FUTURE ISSUANCE UNDER EQUITY COMPENSATION PLANS INCLUDING SECURITIES REFLECTED AND IN COLUMN (A) (C)
Equity compensation plans approved by security holders			
SAIP (1)	1,325	\$68.19	1,298
ESPP (2)	n/a	n/a	113
Subtotal	1,325		1,411
Equity compensation plans not approved by security holders			
SAYE (3)	223	\$46.86	608
Subtotal	223		608
Total	1,548		2,019

Notes:

- (1) In 1997, we adopted the 1997 Stock Award and Incentive Plan (“SAIP”), which provides for the granting of options to purchase a specified number of shares of common stock and other stock awards to eligible participants of Jones Lang LaSalle.
- (2) In 1998, we adopted an Employee Stock Purchase Plan (“ESPP”) for eligible U.S. based employees. Under this plan, employee contributions for stock purchases are enhanced through an additional contribution of a 5% discount on the purchase price. Effective April 1, 2009, the 5% discount has been discontinued and purchases are broker-assisted on the open market.
- (3) In November 2001, we adopted the Jones Lang LaSalle Savings Related Share Option (U.K.) Plan (“Save As You Earn” or “SAYE”) for eligible employees of our U.K. based operations. In November 2006, the SAYE plan was extended to employees in our Ireland operations. Under this plan, employee contributions for stock purchases are enhanced by us through an additional contribution of a 15% discount on the purchase price. Options granted under

the SAYE plan vest over a period of three to five years. The original SAYE plan was not approved by shareholders since such approval was not required under applicable rules at the time of the adoption of this plan. In 2006, our shareholders approved an amendment to the SAYE plan that increased the number of shares reserved for issuance by 500,000.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

The information required by this item is incorporated by reference to the material appearing in the Proxy Statement under the caption “Certain Relationships and Related Transactions.”

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The information required by this item is incorporated by reference to the material appearing in the Proxy Statement under the caption “Information about the Independent Registered Public Accounting Firm.”

ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

The following documents are filed as part of this report:

1. Financial Statements. See Index to Consolidated Financial Statements in Item 8 of this report.
2. Financial Statement Schedules. No financial statement schedules are included because they are not required or are not applicable, or the required information is set forth in the applicable statements or related notes.
3. Exhibits. A list of exhibits is set forth in the Exhibit Index, which immediately precedes the exhibits and is incorporated by reference herein.

Cautionary Note Regarding Forward-Looking Statements

Certain statements in this filing and elsewhere (such as in reports, other filings with the United States Securities and Exchange Commission, press releases, presentations and communications by Jones Lang LaSalle or its management and written and oral statements) regarding, among other things, future financial results and performance, achievements, plans and objectives, dividend payments and share repurchases may constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause Jones Lang LaSalle’s actual results, performance, achievements, plans and objectives to be materially different from any of the future results, performance, achievements, plans and objectives expressed or implied by such forward-looking statements.

We discuss those risks, uncertainties and other factors in this report in (1) Item 1A. Risk Factors; Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations; Item 7A. Quantitative and Qualitative Disclosures About Market Risk; Item 8. Financial Statements and Supplementary Data—Notes to Consolidated Financial Statements; and elsewhere, and (2) the other reports we file with the United States Securities and Exchange Commission. Important factors that could cause actual results to differ from those in our forward-looking statements include (without limitation):

- The effect of political, economic and market conditions and geopolitical events;
- The logistical and other challenges inherent in operating in numerous different countries;
- The actions and initiatives of current and potential competitors;
- The level and volatility of real estate prices, interest rates, currency values and other market indices;
- The outcome of pending litigation; and
- The impact of current, pending and future legislation and regulation.

Moreover, there can be no assurance that future dividends will be declared since the actual declaration of future dividends, and the establishment of record and payment dates, remains subject to final determination by the Company’s Board of Directors.

Accordingly, we caution our readers not to place undue reliance on forward-looking statements, which speak only as of the date on which they are made. Jones Lang LaSalle expressly disclaims any obligation or undertaking to update or revise any forward-looking statements to reflect any changes in events or circumstances or in its expectations or results.

Power of Attorney

KNOW ALL MEN BY THESE PRESENTS, that each of Jones Lang LaSalle Incorporated, a Maryland corporation, and the undersigned Directors and officers of Jones Lang LaSalle Incorporated, hereby constitutes and appoints Colin Dyer, Lauralee E. Martin and Mark K. Engel its, his or her true and lawful attorneys-in-fact and agents, for it, him or her and in its, his or her name, place and stead, in any and all capacities, with full power to act alone, to sign any and all amendments to this report, and to file each such amendment to this report, with all exhibits thereto, and any and all documents in connection therewith, with the Securities and Exchange Commission, hereby granting unto said attorneys-in-fact and agents, and each of them, full power and authority to do and perform any and all acts and things requisite and necessary to be done in and about the premises, as fully to all intents and purposes as it, he or she might or could do in person, hereby ratifying and confirming all that said attorneys-in-fact and agents, or any of them, may lawfully do or cause to be done by virtue hereof.
