FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2013.

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from \_\_\_\_\_ to \_\_\_\_\_.

COMMISSION FILE NUMBER 0-14703

NBT BANCORP INC.

(Exact Name of Registrant as Specified in its Charter)

DELAWARE

(State of Incorporation)

16-1268674

(I.R.S. Employer Identification No.)

52 SOUTH BROAD STREET, NORWICH, NEW YORK 13815

(Address of Principal Executive Offices) (Zip Code)

Registrant's Telephone Number, Including Area Code: (607) 337-2265

None

(Former Name, Former Address and Former Fiscal Year, if Changed Since Last Report)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (Section 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check One):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

Edgar Filing: NBT BANCORP INC - Form 10-Q

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).  
Yes  No

As of April 30, 2013, there were 43,795,888 shares outstanding of the Registrant's common stock, \$0.01 par value per share.

NBT BANCORP INC. and Subsidiaries

NOTES TO UNAUDITED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2013

Note 1. Description of Business

NBT Bancorp Inc. (the “Registrant”) is a registered financial holding company incorporated in the State of Delaware in 1986, with its principal headquarters located in Norwich, New York. The Registrant is the parent holding company of NBT Bank, N.A. (the “Bank”), NBT Financial Services, Inc. (“NBT Financial”), NBT Holdings, Inc. (“NBT Holdings”), CNBF Capital Trust I, NBT Statutory Trust I, NBT Statutory Trust II, Alliance Financial Capital Trust I and Alliance Financial Capital Trust II (the “Trusts”). Through the Bank, the Company is focused on community banking operations. Through NBT Financial, the Company operates EPIC Advisors, Inc. (“EPIC”), a retirement plan administrator. Through NBT Holdings, the Company operates Mang Insurance Agency, LLC (“Mang”), a full-service insurance agency. The Trusts were organized to raise additional regulatory capital and to provide funding for certain acquisitions. The Registrant’s primary business consists of providing commercial banking and financial services to customers in its market area. The principal assets of the Registrant are all of the outstanding shares of common stock of its direct subsidiaries, and its principal sources of revenue are the management fees and dividends it receives from the Bank, NBT Financial, and NBT Holdings.

The Bank is a full service commercial bank formed in 1856, which provides a broad range of financial products to individuals, corporations and municipalities throughout the central and upstate New York, northeastern Pennsylvania, northwestern Vermont, western Massachusetts, and southern New Hampshire market areas.

Note 2. Basis of Presentation

The accompanying unaudited interim consolidated financial statements include the accounts of the Registrant and its wholly owned subsidiaries, the Bank, NBT Financial and NBT Holdings. Collectively, the Registrant and its subsidiaries are referred to herein as “the Company.” The interim data includes all adjustments, consisting only of normal recurring adjustments, necessary for a fair statement of the results for the interim periods in accordance with generally accepted accounting principles (“GAAP”). These consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in our 2012 Annual Report on Form 10-K. The results of operations for the interim periods are not necessarily indicative of the results that may be expected for the full year or any other interim period. All intercompany transactions have been eliminated in consolidation. Amounts in the prior period financial statements are reclassified whenever necessary to conform to current period presentation. The Company has evaluated subsequent events for potential recognition and/or disclosure and there were none identified.

Note 3. Acquisition

Alliance Financial Corporation

On March 8, 2013, the Company acquired Alliance Financial Corporation (“Alliance”), the parent company of Alliance Bank, N.A., for total consideration of \$226 million. As part of the acquisition, Alliance was merged with and into the Company and Alliance Bank, with 26 branch locations in the central New York counties of Onondaga, Cortland, Madison, Oneida and Oswego, was merged with and into the Bank. The merger with Alliance enabled the Company to expand its footprint into demographically attractive and contiguous markets located in the aforementioned New York counties. The results of Alliance’s operations are included in the Consolidated Statements of Income from the date of acquisition.

Table of Contents

Under the terms of the merger agreement, each outstanding share of Alliance common stock was converted into the right to receive 2.1779 shares of the Company's common stock. As a result, Alliance shareholders received 10.3 million shares of Company common stock valued at \$226 million.

In connection with the merger, the consideration paid and the fair value of the assets acquired and the liabilities assumed on the date of acquisition are as summarized in the following table, in thousands:

## Consideration paid:

NBT Bancorp common stock issued to Alliance common shareholders	\$225,551
Cash in lieu of fractional shares paid to Alliance common shareholders	11
Less treasury shares	5,779
<b>Net consideration paid</b>	<b>\$219,783</b>

## Recognized Amounts of Identifiable Assets Acquired and (Liabilities Assumed) At Fair Value:

Cash and short term investments	\$81,060
Securities	320,618
Loans and Leases	904,473
Intangible assets	13,161
Other assets	71,900
Deposits	(1,113,420)
Borrowings	(126,530 )
Trust preferred debentures	(25,774 )
Other liabilities	(17,952 )
<b>Total identifiable net assets</b>	<b>\$107,536</b>
<b>Goodwill</b>	<b>\$112,247</b>

The above recognized amounts of loans, other assets and other liabilities, at fair value, are preliminary estimates and are subject to adjustment but actual amounts are not expected to differ materially from those shown.

The estimated fair value of loans acquired from Alliance was determined by utilizing a methodology wherein similar loans were aggregated into pools. Cash flows for each pool were determined by estimating future credit losses and the rate of prepayments. Projected monthly cash flows were then discounted to present value based on a current market rate for similar loans. There was no carryover of Alliance's allowance for credit losses associated with the loans acquired as loans were initially recorded at fair value.

Information about the acquired loan portfolio as of March 8, 2013 is as follows (in thousands):

Contractually required principal and interest at acquisition	\$908,614
Contractual cash flows not expected to be collected	(15,466 )
Expected cash flows at acquisition	893,148
Interest component of expected cash flows (accretable premium)	11,325
<b>Fair value of acquired loans</b>	<b>\$904,473</b>

Table of Contents

The core deposit and trust intangible assets recognized as part of the Alliance merger are being amortized over their estimated useful lives of approximately 10 and 15 years, respectively, utilizing an accelerated method. The goodwill, which is not amortized for book purposes, is not deductible for tax purposes.

The fair value of savings and transaction deposit accounts acquired from Alliance was assumed to approximate the carrying value as these accounts have no stated maturity and are payable on demand. Certificates of deposit were valued by projecting the expected cash flows based on the contractual terms of the certificates of deposit. These cash flows were discounted based on a current market rate for a certificate of deposit with a corresponding maturity.

The fair value of borrowings, which was comprised of FHLB advances, was determined by obtaining settlement quotes from the FHLB.

Direct costs related to the Alliance acquisition were expensed as incurred and amounted to \$10.7 million for the three months ended March 31, 2013.

The following table presents unaudited pro forma information as if the acquisition had occurred on January 1, 2012 under the "Pro forma" columns. This pro forma information gives the effect to certain adjustments, including purchase accounting fair value adjustments, amortization of core deposit and other intangibles and related income tax effects. Merger and acquisition integration costs related to the Alliance acquisition are excluded from the periods in which they were incurred. The pro forma information does not necessarily reflect the results of operations that would have occurred had the Company merged with Alliance at the beginning of 2012. Cost savings are also not reflected in the unaudited pro forma amounts for the three months ended March 31, 2012 and 2013.

	Pro forma	
	Three months ended March 31, 2013	2012
Net interest income	\$ 59,052	\$ 59,544
Noninterest income	29,908	27,532
Net income	16,509	16,158

Supplemental financial information regarding the former Alliance operations included in our Consolidated Statement of Income from the date of acquisition through March 31, 2013 has not been provided as it would be impracticable to do so. The operations of Alliance have been integrated into the Bank's operations and therefore financial information specific to revenues and expense associated with the Alliance operations is not accessible.

Note 4.

#### Commitments and Contingencies

The Company is a party to financial instruments in the normal course of business to meet the financing needs of its customers and to reduce its own exposure to fluctuating interest rates. These financial instruments include commitments to extend credit, unused lines of credit, and standby letters of credit. Exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to make loans and standby letters of credit is represented by the contractual amount of those instruments. The Company uses the same credit origination guidelines, portfolio maintenance and management procedures as other credit and off-balance sheet products. Commitments to extend credit and unused lines of credit totaled \$1.1 billion at March 31, 2013 and \$841.7 million at December 31, 2012. Since commitments to extend credit and unused lines of credit may expire without being fully drawn upon, this amount does not necessarily represent future cash commitments. Collateral obtained upon exercise of the commitment is determined using management's credit evaluation of the borrower and may include accounts receivable, inventory, property, land and other items.

Table of Contents

The Company guarantees the obligations or performance of customers by issuing standby letters of credit to third parties. These standby letters of credit are frequently issued in support of third party debt, such as corporate debt issuances, industrial revenue bonds and municipal securities. The credit risk involved in issuing standby letters of credit is essentially the same as the credit risk involved in extending loan facilities to customers, and they are subject to the same credit origination guidelines, portfolio maintenance and management procedures as other credit and off-balance sheet products. Typically, these instruments have terms of five years or less and expire unused; therefore, the total amounts do not necessarily represent future cash commitments. Standby letters of credit totaled \$45.0 million at March 31, 2013 and \$37.5 million at December 31, 2012. As of March 31, 2013, the fair value of standby letters of credit was not significant to the Company's consolidated financial statements.

The Company has also entered into commercial letter of credit agreements on behalf of its customers. Under these agreements, the Company, on the request of its customer, opens the letter of credit and makes a commitment to honor draws made under the agreement, whereby the beneficiary is normally the provider of goods and/or services and the Company essentially replaces the customer as the payee. The credit risk involved in issuing commercial letters of credit is essentially the same as the credit risk involved in extending loan facilities to customers, and they are subject to the same credit origination guidelines, portfolio maintenance and management procedures as other credit and off-balance sheet products. Typically, these agreements vary in terms and the total amounts do not necessarily represent future cash commitments. Commercial letters of credit totaled \$37.4 million at March 31, 2013 and \$16.6 million at December 31, 2012. As of March 31, 2013, the fair value of commercial letters of credit was not significant to the Company's consolidated financial statements.

Note 5. Allowance for Loan Losses and Credit Quality of Loans

Allowance for Loan Losses

The allowance for loan losses is maintained at a level estimated by management to provide adequately for risk of probable losses inherent in the current loan portfolio. The adequacy of the allowance for loan losses is continuously monitored. It is assessed for adequacy using a methodology designed to ensure the level of the allowance reasonably reflects the loan portfolio's risk profile. It is evaluated to ensure that it is sufficient to absorb all reasonably estimable credit losses inherent in the current loan portfolio.

To develop and document a systematic methodology for determining the allowance for loan losses, the Company has divided the loan portfolio into three segments, each with different risk characteristics and methodologies for assessing risk. Those segments are further segregated between our loans accounted for under the amortized cost method (referred to as "originated" loans) and loans acquired in a business combination (referred to as "acquired" loans). Prior to 2013, separate disclosures for acquired loans were not significant and were included with originated loans in the Company's asset quality disclosures. Each portfolio segment is broken down into class segments where appropriate. Class segments contain unique measurement attributes, risk characteristics and methods for monitoring and assessing risk that are necessary to develop the allowance for loan losses. Unique characteristics such as borrower type, loan type, collateral type, and risk characteristics define each class segment. The following table illustrates the portfolio and class segments for the Company's loan portfolio:

Table of Contents

## Commercial Loans

Commercial – The Company offers a variety of loan options to meet the specific needs of our commercial customers including term loans, time notes and lines of credit. Such loans are made available to businesses for working capital needs such as inventory and receivables, business expansion and equipment purchases. Generally, a collateral lien is placed on equipment or other assets owned by the borrower. These loans carry a higher risk than commercial real estate loans due to the nature of the underlying collateral, which can be business assets such as equipment and accounts receivable and is generally less liquid than real estate. To reduce the risk, management also attempts to secure real estate as collateral and obtain personal guarantees of the borrowers.

Commercial Real Estate – The Company offers commercial real estate loans to finance real estate purchases, refinancings, expansions and improvements to commercial properties. Commercial real estate loans are made to finance the purchases of real property which generally consists of real estate with completed structures. These commercial real estate loans are secured by first liens on the real estate, which may include apartments, commercial structures, housing businesses, healthcare facilities, and other non owner-occupied facilities. These loans are typically less risky than commercial loans, since they are secured by real estate and buildings. The Company's underwriting analysis includes credit verification, independent appraisals, a review of the borrower's financial condition, and a detailed analysis of the borrower's underlying cash flows. These loans are typically originated in amounts of no more than 80% of the appraised value of the property.

Agricultural – The Company offers a variety of agricultural loans to meet the needs of our agricultural customers including term loans, time notes, and lines of credit. These loans are made to purchase livestock, purchase and modernize equipment, and finance seasonal crop expenses. Generally, a collateral lien is placed on the livestock, equipment, produce inventories, and/or receivables owned by the borrower. These loans may carry a higher risk than commercial and agricultural real estate loans due to the industry price volatility, and in some cases, the perishable nature of the underlying collateral. To reduce these risks, management may attempt to secure these loans with additional real estate collateral, obtain personal guarantees of the borrowers, or obtain government loan guarantees to provide further support.

Agricultural Real Estate – The Company offers real estate loans to our agricultural customers to finance farm related real estate purchases, refinancings, expansions, and improvements to agricultural properties such as barns, production facilities, and land. The agricultural real estate loans are secured by first liens on the farm real estate. Because they

are secured by land and buildings, these loans may be less risky than agricultural loans. The Company's underwriting analysis includes credit verification, independent appraisals, a review of the borrower's financial condition, and a detailed analysis of the borrower's underlying cash flows. These loans are typically originated in amounts of no more than 75% of the appraised value of the property. Government loan guarantees may be obtained to provide further support.

## Table of Contents

**Business Banking** - The Company offers a variety of loan options to meet the specific needs of our business banking customers including term loans, business banking mortgages and lines of credit. Such loans are generally less than \$0.5 million and are made available to businesses for working capital such as inventory and receivables, business expansion, equipment purchases, and agricultural needs. Generally, a collateral lien is placed on equipment or other assets owned by the borrower such as inventory and/or receivables. These loans carry a higher risk than commercial loans due to the smaller size of the borrower and lower levels of capital. To reduce the risk, the Company obtains personal guarantees of the owners for a majority of the loans.

### Consumer Loans

**Indirect** – The Company maintains relationships with many dealers primarily in the communities that we serve. Through these relationships, the company finances the purchases of automobiles and recreational vehicles (such as campers, boats, etc.) indirectly through dealer relationships. Approximately 70% of the indirect relationships represent automobile financing. Most of these loans carry a fixed rate of interest with principal repayment terms typically ranging from three to six years, based upon the nature of the collateral and the size of the loan. The majority of indirect consumer loans are underwritten on a secured basis using the underlying collateral being financed.

**Home Equity** – The Company offers fixed home equity loans as well as home equity lines of credit to consumers to finance home improvements, debt consolidation, education and other uses. Consumers are able to borrow up to 85% of the equity in their homes. The Company originates home equity lines of credit and second mortgage loans (loans secured by a second junior lien position on one-to-four-family residential real estate). These loans carry a higher risk than first mortgage residential loans as they are in a second position with respect to collateral. Risk is reduced through underwriting criteria, which include credit verification, appraisals, a review of the borrower's financial condition, and personal cash flows. A security interest, with title insurance when necessary, is taken in the underlying real estate.

**Direct** – The Company offers a variety of consumer installment loans to finance vehicle purchases, mobile home purchases and personal expenditures. Most of these loans carry a fixed rate of interest with principal repayment terms typically ranging from one to ten years, based upon the nature of the collateral and the size of the loan. The majority of consumer loans are underwritten on a secured basis using the underlying collateral being financed or a customer's deposit account. In addition to installment loans, the Company also offers personal lines of credit and overdraft protection. A minimal amount of loans are unsecured, which carry a higher risk of loss.

### Residential Real Estate Mortgages

Residential real estate loans consist primarily of loans secured by first or second deeds of trust on primary residences. We originate adjustable-rate and fixed-rate, one-to-four-family residential real estate loans for the construction, purchase or refinancing of a mortgage. These loans are collateralized by owner-occupied properties located in the Company's market area. Loans on one-to-four-family residential real estate are generally originated in amounts of no more than 85% of the purchase price or appraised value (whichever is lower), or have private mortgage insurance. Mortgage title insurance and hazard insurance are normally required. Construction loans have a unique risk, because they are secured by an incomplete dwelling. This risk is reduced through periodic site inspections, including one at each loan draw period.

For purposes of evaluating the adequacy of the allowance, the Company considers a number of significant factors that affect the collectability of the portfolio. For individually analyzed loans, these include estimates of loss exposure, which reflect the facts and circumstances that affect the likelihood of repayment of such loans as of the evaluation date. For homogeneous pools of loans, estimates of the Company's exposure to credit loss reflect a current assessment of a number of factors, which could affect collectability. These factors include: past loss experience; size, trend,

composition, and nature of loans; changes in lending policies and procedures, including underwriting standards and collection, charge-offs and recoveries; trends experienced in nonperforming and delinquent loans; current economic conditions in the Company's market; portfolio concentrations that may affect loss experienced across one or more components of the portfolio; the effect of external factors such as competition, legal and regulatory requirements; and the experience, ability, and depth of lending management and staff. In addition, various regulatory agencies, as an integral component of their examination process, periodically review the Company's allowance for loan losses. Such agencies may require the Company to make loan grade changes as well as recognize additions to the allowance based on their examinations.

Table of Contents

After a thorough consideration of the factors discussed above, any required additions or reductions to the allowance for loan losses are made periodically by charges or credits to the provision for loan losses. These charges or credits are necessary to maintain the allowance at a level which management believes is reasonably reflective of overall inherent risk of probable loss in the portfolio. While management uses available information to recognize losses on loans, additions and reductions of the allowance may fluctuate from one reporting period to another. These fluctuations are reflective of changes in risk associated with portfolio content and/or changes in management's assessment of any or all of the determining factors discussed above.

The following table illustrates the changes in the allowance for loan losses by our originated portfolio segments for the three months ended March 31, 2013 and 2012:

	Commercial Loans	Consumer Loans	Residential Real Estate Mortgages	Unallocated	Total
Balance as of December 31, 2012	\$ 35,624	\$27,162	\$6,252	\$296	\$69,334
Charge-offs	(3,322 )	(3,723 )	(671 )	-	(7,716 )
Recoveries	467	977	14	-	1,458
Provision	2,589	1,869	1,113	87	5,658
Ending Balance as of March 31, 2013	\$ 35,358	\$26,285	\$6,708	\$383	\$68,734
Balance as of December 31, 2011	\$ 38,831	\$26,049	\$6,249	\$205	\$71,334
Charge-offs	(1,130 )	(4,052 )	(358 )	-	(5,540 )
Recoveries	385	675	9	-	1,069
Provision	(299 )	4,118	620	32	4,471
Ending Balance as of March 31, 2012	\$ 37,787	\$26,790	\$6,520	\$237	\$71,334

For acquired loans, to the extent that we experience deterioration in borrower credit quality resulting in a decrease in our expected cash flows subsequent to acquisition of the loans, an allowance for loan losses would be established based on our estimate of future credit losses over the remaining life of the loans. As of March 31, 2013 and 2012, there was no allowance for loan losses for the acquired loan portfolio. Net charge-offs related to acquired loans totaled \$0.2 million during the three months ended March 31, 2013 and is included in the table above.

Table of Contents

Credit Quality of Loans

Loans are placed on nonaccrual status when timely collection of principal and interest in accordance with contractual terms is doubtful. Loans are transferred to nonaccrual status generally when principal or interest payments become ninety days delinquent, unless the loan is well secured and in the process of collection, or sooner when management concludes or circumstances indicate that borrowers may be unable to meet contractual principal or interest payments. When a loan is transferred to a nonaccrual status, all interest previously accrued in the current period but not collected is reversed against interest income in that period. Interest accrued in a prior period and not collected is charged-off against the allowance for loan losses. The Company's nonaccrual policies are the same for all classes of financing receivable.

If ultimate repayment of a nonaccrual loan is expected, any payments received are applied in accordance with contractual terms. If ultimate repayment of principal is not expected, any payment received on a nonaccrual loan is applied to principal until ultimate repayment becomes expected. Nonaccrual loans are returned to accrual status when they become current as to principal and interest and demonstrate a period of performance under the contractual terms and, in the opinion of management, are fully collectible as to principal and interest. When in the opinion of management the collection of principal appears unlikely, the loan balance is charged-off in total or in part. For loans in all portfolios, the principal amount is charged off in full or in part as soon as management determines, based on available facts, that the collection of principal in full is improbable. For commercial loans, management considers specific facts and circumstances relative to individual credits in making such a determination. For consumer and residential loan classes, management uses specific guidance and thresholds from the Federal Financial Institutions Examination Council's Uniform Retail Credit Classification and Account Management Policy.

There were no material commitments to extend further credit to borrowers with nonperforming loans.

**Impaired Loans**

The methodology used to establish the allowance for loan losses on impaired loans incorporates specific allocations on loans analyzed individually. Classified loans with outstanding balances of \$0.5 million or more are evaluated for impairment through the Company's quarterly status review process. In determining that we will be unable to collect all principal and interest payments due in accordance with the contractual terms of the loan agreements, we consider factors such as payment history and changes in the financial condition of individual borrowers, local economic conditions, historical loss experience and the conditions of the various markets in which the collateral may be liquidated. For loans that are impaired as defined by accounting standards, impairment is measured by one of three methods: 1) the fair value of collateral less cost to sell, 2) present value of expected future cash flows or 3) the loan's observable market price. All impaired loans are reviewed on a quarterly basis for changes in the measurement of impairment. Any change to the previously recognized impairment loss is recognized as a change to the allowance account and recorded in the consolidated statement of income as a component of the provision for credit losses.

Table of Contents

The following table provides information on impaired loans and specific reserve allocations as of March 31, 2013 and December 31, 2012:

## Credit Quality Indicators

The Company has developed an internal loan grading system to evaluate and quantify the Bank's loan portfolio with respect to quality and risk. The system focuses on, among other things, financial strength of borrowers, experience and depth of borrower's management, primary and secondary sources of repayment, payment history, nature of the business, and outlook on particular industries. The internal grading system enables the Company to monitor the quality of the entire loan portfolio on a consistent basis and provide management with an early warning system, enabling recognition and response to problem loans and potential problem loans.

## Commercial Grading System

For commercial and agricultural loans, the Company uses a grading system that relies on quantifiable and measurable characteristics when available. This would include comparison of financial strength to available industry averages, comparison of transaction factors (loan terms and conditions) to loan policy, and comparison of credit history to stated repayment terms and industry averages. Some grading factors are necessarily more subjective such as economic and industry factors, regulatory environment, and management. Classified commercial loans consist of loans graded substandard and below. The grading system for commercial and agricultural loans is as follows:

•

## Doubtful

A doubtful loan has a high probability of total or substantial loss, but because of specific pending events that may strengthen the asset, its classification as a loss is deferred. Doubtful borrowers are usually in default, lack adequate

liquidity or capital, and lack the resources necessary to remain an operating entity. Pending events can include mergers, acquisitions, liquidations, capital injections, the perfection of liens on additional collateral, the valuation of collateral, and refinancing. Generally, pending events should be resolved within a relatively short period and the ratings will be adjusted based on the new information. Nonaccrual treatment is required for doubtful assets because of the high probability of loss.

Table of Contents

• Substandard

Substandard loans have a high probability of payment default, or they have other well-defined weaknesses. They require more intensive supervision by bank management. Substandard loans are generally characterized by current or expected unprofitable operations, inadequate debt service coverage, inadequate liquidity, or marginal capitalization. Repayment may depend on collateral or other credit risk mitigants. For some Substandard loans, the likelihood of full collection of interest and principal may be in doubt and those loans should be placed on nonaccrual. Although Substandard assets in the aggregate will have a distinct potential for loss, an individual asset's loss potential does not have to be distinct for the asset to be rated Substandard.

• Special Mention

Special Mention loans have potential weaknesses that may, if not checked or corrected, weaken the asset or inadequately protect the Company's position at some future date. These loans pose elevated risk, but their weakness does not yet justify a Substandard classification. Borrowers may be experiencing adverse operating trends (declining revenues or margins) or may be struggling with an ill-proportioned balance sheet (e.g., increasing inventory without an increase in sales, high leverage, tight liquidity). Adverse economic or market conditions, such as interest rate increases or the entry of a new competitor, may also support a Special Mention rating. Although a Special Mention loan has a higher probability of default than a pass asset, its default is not imminent.

• Pass

Loans graded as Pass encompass all loans not graded as Doubtful, Substandard, or Special Mention. Pass loans are in compliance with loan covenants, and payments are generally made as agreed. Pass loans range from superior quality to fair quality.

Business banking Grading System

Business banking loans are graded as either Classified or Non-classified:

• Classified

Classified loans are inadequately protected by the current worth and paying capacity of the obligor or, if applicable, the collateral pledged. These loans have a well-defined weakness, or weaknesses, that jeopardize the liquidation of the debt, or in some cases make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable. They are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected. Classified loans have a high probability of payment default, or a high probability of total or substantial loss. These loans require more intensive supervision by management and are generally characterized by current or expected unprofitable operations, inadequate debt service coverage, inadequate liquidity, or marginal capitalization. Repayment may depend on collateral or other credit risk mitigants. When the likelihood of full collection of interest and principal may be in doubt; classified loans are considered to have a nonaccrual status. In some cases, Classified loans are considered uncollectible and of such little value that their continuance as assets is not warranted.

• Non-classified

Loans graded as Non-classified encompass all loans not graded as Classified. Non-classified loans are in compliance with loan covenants, and payments are generally made as agreed.

Table of Contents

## Consumer and Residential Mortgage Grading System

Consumer and Residential Mortgage loans are graded as either Performing or Nonperforming. Nonperforming loans are loans that are 1) over 90 days past due and interest is still accruing, 2) on nonaccrual status or 3) restructured. All loans not meeting any of these three criteria are considered Performing.

The following tables illustrate the Company's credit quality by loan class as of March 31, 2013 and December 31, 2012:

Credit Quality Indicators  
As of March 31, 2013

## Troubled Debt Restructured Loans

The Company's loan portfolio includes certain loans that have been modified where economic concessions have been granted to borrowers who have experienced or are expected to experience financial difficulties. These concessions typically result from the Company's loss mitigation activities and could include reductions in the interest rate, payment extensions, forgiveness of principal, forbearance or other actions. Certain troubled debt restructured loans ("TDRs") are classified as nonperforming at the time of restructure and may only be returned to performing status after considering the borrower's sustained repayment performance for a reasonable period, generally six months.

When the Company modifies a loan, management evaluates any possible impairment based on the present value of the expected future cash flows, discounted at the contractual interest rate of the original loan agreement, except when the sole (remaining) source of repayment for the loan is the operation or liquidation of the collateral. In these cases, management uses the current fair value of the collateral, less selling costs, instead of discounted cash flows. If management determines that the value of the modified loan is less than the recorded investment in the loan (net of previous charge-offs, deferred loan fees or costs and unamortized premium or discount), impairment is recognized by segment or class of loan as applicable, through an allowance estimate or a charge-off to the allowance. Segment and class status is determined by the loan's classification at origination.

TDRs that occurred during the three month period ending March 31, 2013 consisted of 10 home equity loans and one residential real estate mortgage totaling \$0.6 million and \$0.1 million, respectively. For all such modifications, the pre and post outstanding recorded investment amount remained unchanged. During the three month period ending

March 31, 2013 there were no defaults on previously modified loans.

25

---

Table of Contents

There were no new TDRs made during the three month period ending March 31, 2012. During the three month period ending March 31, 2012 there were no defaults on loans modified within the previous 12 months.

Note 6. Earnings Per Share

Basic earnings per share excludes dilution and is computed by dividing income available to common stockholders by the weighted average number of common shares outstanding for the period. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock that then shared in the earnings of the entity (such as the Company's dilutive stock options and restricted stock units).

The following is a reconciliation of basic and diluted earnings per share for the periods presented in the consolidated statements of income.

Three months ended March 31, (in thousands, except per share data)	2013	2012
Basic EPS:		
Weighted average common shares outstanding	36,410	33,063
Net income available to common shareholders	\$7,649	\$13,650
Basic EPS	\$0.21	\$0.41
Diluted EPS:		
Weighted average common shares outstanding	36,410	33,063
Dilutive effect of common stock options and restricted stock	\$384	\$379
Weighted average common shares and common share equivalents	\$36,794	\$33,442
Net income available to common shareholders	7,649	13,650
Diluted EPS	\$0.21	\$0.41

There were 1,171,825 stock options for the quarter ended March 31, 2013 and 810,088 stock options for the quarter ended March 31, 2012 that were not considered in the calculation of diluted earnings per share since the stock options' exercise price was greater than the average market price during these periods.

Note 7. Defined Benefit Postretirement Plans

The Company has a qualified, noncontributory, defined benefit pension plan covering substantially all of its employees at March 31, 2013 including eligible Alliance employees. Benefits paid from the plan are based on age, years of service, compensation and social security benefits, and are determined in accordance with defined formulas. The Company's policy is to fund the pension plan in accordance with Employee Retirement Income Security Act ("ERISA") standards. Assets of the plan are invested in publicly traded stocks and bonds. Prior to January 1, 2000, the Company's plan was a traditional defined benefit plan based on final average compensation. On January 1, 2000, the plan was converted to a cash balance plan with grandfathering provisions for existing participants.

The Company assumed a noncontributory, defined benefit pension plan in the Alliance acquisition. The plan covers certain Alliance full-time employees who met eligibility requirements on October 6, 2006, at which time all benefits were frozen. Under the plan, retirement benefits are primarily a function of both the years of service and the level of compensation.

Table of Contents

In addition to the pension plans, the Company also provides supplemental employee retirement plans to certain current and former executives. These supplemental employee retirement plans and the defined benefit pension plans are collectively referred to herein as “Pension Benefits.”

Also, the Company provides certain health care benefits for retired employees. Benefits are accrued over the employees’ active service period. Only employees that were employed by the Company on or before January 1, 2000 are eligible to receive postretirement health care benefits. The plan is contributory for participating retirees, requiring participants to absorb certain deductibles and coinsurance amounts with contributions adjusted annually to reflect cost sharing provisions and benefit limitations called for in the plan. Eligibility is contingent upon the direct transition from active employment status to retirement without any break in employment from the Company. Employees also must be participants in the Company’s medical plan prior to their retirement. The Company funds the cost of postretirement health care as benefits are paid. The Company elected to recognize the transition obligation on a delayed basis over twenty years. In addition, the Company assumed post-retirement medical life insurance benefits for certain Alliance employees, retirees and their spouses, if applicable, in the Alliance acquisition. These postretirement benefits are referred to herein as “Other Benefits.”

The components of expense for Pension Benefits and Other Benefits are set forth below (in thousands):

	Pension Benefits		Other Benefits	
	Three months ended March 31,		Three months ended March 31,	
Components of net periodic benefit cost:	2013	2012	2013	2012
Service cost	\$ 604	\$ 756	\$ 6	\$ 5
Interest cost	722	774	34	39
Expected return on plan assets	(1,825 )	(1,675 )	-	-
Net amortization	603	859	223	(2 )
Total cost	\$ 104	\$ 714	\$ 263	\$ 42

The Company is not required to make contributions to the plans in 2013, and did not do so during the three months ended March 31, 2013.

Market conditions can result in an unusually high degree of volatility and increase the risks and short term liquidity associated with certain investments held by the Company’s defined benefit pension plan (“the Plan”) which could impact the value of these investments.

Note 8.

#### Trust Preferred Debentures

The Company sponsors five business trusts, CNBF Capital Trust I, NBT Statutory Trust I, NBT Statutory Trust II, Alliance Financial Capital Trust I and Alliance Financial Capital Trust II. The trusts were formed for the purpose of issuing company-obligated mandatorily redeemable preferred securities to third-party investors and investing in the proceeds from the sale of such preferred securities solely in junior subordinated debt securities of the Company. The debentures held by each trust are the sole assets of that trust. These five statutory business trusts are collectively referred herein to as “the Trusts.” The Company guarantees, on a limited basis, payments of distributions on the trust preferred securities and payments on redemption of the trust preferred securities. The Trusts are variable interest entities (“VIEs”) for which the Company is not the primary beneficiary, as defined by U.S. GAAP. In accordance with U.S. GAAP, the accounts of the Trusts are not included in the Company’s consolidated financial statements.

Table of Contents

As of March 31, 2013, the Trusts had the following issues of trust preferred debentures, all held by the Trusts, outstanding (dollars in thousands):

Description	Issuance Date	Trust Preferred Securities Outstanding	Interest Rate	Trust Preferred Debt Owed To Trust	Final Maturity Date
CNBF Capital Trust I	August-99	\$ 18,000	3-month LIBOR plus 2.75%	\$ 18,720	August-29
NBT Statutory Trust I	November-05	5,000	3-month LIBOR plus 1.40%	5,155	December-35
NBT Statutory Trust II	February-06	50,000	3-month LIBOR plus 1.40%	51,547	March-36
Alliance Financial Capital Trust I	December-03	10,000	3-month LIBOR plus 2.85%	10,310	January-34
Alliance Financial Capital Trust II	September-06	15,000	3-month LIBOR plus 1.65%	15,464	September-36

The Company owns all of the common stock of the Trusts, which have issued trust preferred securities in conjunction with the Company issuing trust preferred debentures to the Trusts. The terms of the trust preferred debentures are substantially the same as the terms of the trust preferred securities.

Note 11. Fair Value Measurements and Fair Value of Financial Instruments

U.S. GAAP states that fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. Fair value measurements are not adjusted for transaction costs. A fair value hierarchy exists within U.S. GAAP that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are described below:

Level 1 - Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2 - Quoted prices for similar assets or liabilities in active markets, quoted prices in markets that are not active, or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability;

Level 3 - Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i.e., supported by little or no market activity).

A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.

The types of instruments valued based on quoted market prices in active markets include most U.S. government and agency securities, many other sovereign government obligations, liquid mortgage products, active listed equities and most money market securities. Such instruments are generally classified within level 1 or level 2 of the fair value hierarchy. The Company does not adjust the quoted price for such instruments.

Table of Contents

The types of instruments valued based on quoted prices in markets that are not active, broker or dealer quotations, or alternative pricing sources with reasonable levels of price transparency include most investment-grade and high-yield corporate bonds, less liquid mortgage products, less liquid agency securities, less liquid listed equities, state, municipal and provincial obligations, and certain physical commodities. Such instruments are generally classified within level 2 of the fair value hierarchy.

Level 3 is for positions that are not traded in active markets or are subject to transfer restrictions, valuations are adjusted to reflect illiquidity and/or non-transferability, and such adjustments are generally based on available market evidence. In the absence of such evidence, management's best estimate will be used. Management's best estimate consists of both internal and external support on certain Level 3 investments. Subsequent to inception, management only changes level 3 inputs and assumptions when corroborated by evidence such as transactions in similar instruments, completed or pending third-party transactions in the underlying investment or comparable entities, subsequent rounds of financing, recapitalizations and other transactions across the capital structure, offerings in the equity or debt markets, and changes in financial ratios or cash flows.

For the three month period ending March 31, 2013, the Company has made no transfers of assets between Level 1 and Level 2, and has had no Level 3 activity.

Table of Contents

The following tables set forth the Company's financial assets and liabilities measured on a recurring basis that were accounted for at fair value. Assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement (in thousands):

March 31, 2013:

Table of Contents

Certain common equity securities are reported at fair value utilizing Level 1 inputs (exchange quoted prices). The majority of the other investment securities are reported at fair value utilizing Level 2 inputs. The prices for these instruments are obtained through an independent pricing service or dealer market participants with whom the Company has historically transacted both purchases and sales of investment securities. Prices obtained from these sources include prices derived from market quotations and matrix pricing. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond's terms and conditions, among other things. Management reviews the methodologies used in pricing the securities by its third party providers.

U.S. GAAP requires disclosure of assets and liabilities measured and recorded at fair value on a nonrecurring basis such as goodwill, loans held for sale, other real estate owned, collateral-dependent impaired loans, mortgage servicing rights, and held-to-maturity securities. The only nonrecurring fair value measurement recorded during the three month period ended March 31, 2013 and December 31, 2012 was related to impaired loans. The Company had collateral dependent impaired loans with a carrying value of approximately \$4.1 million which had specific reserves included in the allowance for loan losses of \$0.6 million at March 31, 2013. The Company had collateral dependent impaired loans with a carrying value of approximately \$8.4 million which had specific reserves included in the allowance for loan losses of \$2.8 million at December 31, 2012. The Company uses the fair value of underlying collateral, less costs to sell, to estimate the specific reserves for collateral dependent impaired loans. The appraisals may be adjusted by management for qualitative factors such as economic conditions and estimated liquidation expenses ranging from 10% to 35%. Based on the valuation techniques used, the fair value measurements for collateral dependent impaired loans are classified as Level 3.

The following table sets forth information with regard to estimated fair values of financial instruments at March 31, 2013 and December 31, 2012. This table excludes financial instruments for which the carrying amount approximates fair value. Financial instruments for which the fair value approximates carrying value include cash and cash equivalents, securities available for sale, trading securities, accrued interest receivable, non-maturity deposits, short-term borrowings, accrued interest payable, and interest rate swaps.

(In thousands)	Fair Value Heirarchy	March 31, 2013		December 31, 2012	
		Carrying amount	Estimated fair value	Carrying amount	Estimated fair value
<b>Financial assets</b>					
Securities held to maturity	2	\$ 62,474	\$ 63,361	\$ 60,563	\$ 61,535
Net loans	3	5,126,299	5,226,708	4,208,282	4,313,244
<b>Financial liabilities</b>					
Time deposits	2	\$ 1,166,480	\$ 1,178,242	\$ 983,261	\$ 994,376
Long-term debt	2	428,661	468,095	367,492	407,404
Trust preferred debentures	2	101,196	100,460	75,422	74,147

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Table of Contents

Fair value estimates are based on existing on and off balance sheet financial instruments without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments. For example, the Company has a substantial trust and investment management operation that contributes net fee income annually. The trust and investment management operation is not considered a financial instrument, and its value has not been incorporated into the fair value estimates. Other significant assets and liabilities include the benefits resulting from the low-cost funding of deposit liabilities as compared to the cost of borrowing funds in the market, and premises and equipment. In addition, the tax ramifications related to the realization of the unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in the estimate of fair value.

Securities Held to Maturity

The fair value of the Company's investment securities held to maturity is primarily measured using information from a third party pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond's terms and conditions, among other things.

Net Loans

The fair value of the Company's loans was estimated by discounting the expected future cash flows using the current interest rates at which similar loans would be made for the same remaining maturities. Loans were first segregated by type, and then further segmented into fixed and variable rate and loan quality categories. Expected future cash flows were projected based on contractual cash flows, adjusted for estimated prepayments.

Time Deposits

The fair value of time deposits was estimated using a discounted cash flow approach that applies prevailing market interest rates for similar maturity instruments. The fair values of the Company's time deposit liabilities do not take into consideration the value of the Company's long-term relationships with depositors, which may have significant value.

Long-Term Debt

The fair value of long-term debt was estimated using a discounted cash flow approach that applies prevailing market interest rates for similar maturity instruments.

Trust Preferred Debentures

The fair value of trust preferred debentures has been estimated using a discounted cash flow analysis.

Table of Contents

## Note 12. Securities

The amortized cost, estimated fair value, and unrealized gains and losses of securities available for sale are as follows:

(In thousands)	Amortized cost	Unrealized gains	Unrealized losses	Estimated fair value
March 31, 2013				
U.S. Treasury	\$ 68,557	\$ 668	\$ -	\$ 69,225
Federal Agency	296,135	1,343	105	297,373

Government-sponsored enterprises	304,955	10,130	25	315,060
U.S. government securities	28,649	1,641	2	30,288
Collateralized mortgage obligations:				
Government-sponsored enterprises	526,545	4,247	339	530,453
U.S. government securities	60,093	1,193	1	61,285
Other securities	13,425	2,492	62	15,855
Total securities available for sale	\$ 1,441,073	\$ 25,293	\$ 575	\$ 1,465,791
December 31, 2012				
U.S. Treasury	\$ 63,668	\$ 757	\$ -	\$ 64,425
Federal Agency	281,398	1,507	91	282,814
State & municipal	82,675	4,127	-	86,802
Mortgage-backed:				
Government-sponsored enterprises	221,110	11,175	-	232,285
U.S. government securities	16,351	1,645	-	17,996
Collateralized mortgage obligations:				
Government-sponsored enterprises	399,147	4,418	-	403,565
U.S. government securities	44,825	1,333	-	46,158
Other securities	11,210	2,832	88	13,954
Total securities available for sale	\$ 1,120,384	\$ 27,794	\$ 179	\$ 1,147,999

Others securities primarily represent marketable equity securities.

Proceeds from the sales of securities available for sale were \$2.6 million during the three months ended March 31, 2013, and gains on the sales were \$1.1 million. Proceeds from the sales of securities available for sale were \$1.8 million during the three months ended March 31, 2012, and gains on the sales were \$0.5 million.

Securities with amortized costs totaling \$1.5 billion at March 31, 2013 and \$1.2 billion at December 31, 2012, were pledged to secure public deposits and for other purposes required or permitted by law. Additionally, at March 31, 2013 and December 31, 2012, securities available for sale with an amortized cost of \$236.6 million and \$209.0 million, respectively, were pledged as collateral for securities sold under repurchase agreements.

Table of Contents

The amortized cost, estimated fair value, and unrealized gains and losses of securities held to maturity are as follows:

(In thousands)	Amortized cost	Unrealized gains	Unrealized losses	Estimated fair value
March 31, 2013				
Mortgage-backed	\$1,127	\$183	\$-	\$1,310
State & municipal	61,347	704	-	62,051

Total securities with unrealized losses	\$ 40,397	\$ (97 )	7	\$ 167	\$ (82 )	1	\$ 40,564	\$ (179 )	8

Declines in the fair value of held-to-maturity and available-for-sale securities below their cost that are deemed to be other than temporary are reflected in earnings as realized losses or in other comprehensive income, depending on whether the Company intends to sell the security or more likely than not will be required to sell the security before

recovery of its amortized cost basis less any current-period credit loss. If the Company intends to sell the security or more likely than not will be required to sell the security before recovery of its amortized cost basis less any current-period credit loss, the other-than-temporary impairment shall be recognized in earnings equal to the entire difference between the investment's amortized cost basis and its fair value at the balance sheet date. If the Company does not intend to sell the security and it is not more likely than not that the entity will be required to sell the security before recovery of its amortized cost basis less any current-period credit loss, the other-than-temporary impairment shall be separated into (a) the amount representing the credit loss and (b) the amount related to all other factors. The amount of the total other-than-temporary impairment related to the credit loss shall be recognized in earnings. The amount of the total other-than-temporary impairment related to other factors shall be recognized in other comprehensive income, net of applicable taxes.

Table of Contents

In estimating other-than-temporary impairment losses, management considers, among other things, (i) the length of time and the extent to which the fair value has been less than cost, (ii) the financial condition and near-term prospects of the issuer, and (iii) the historical and implied volatility of the fair value of the security.

Management has the intent to hold the securities classified as held to maturity until they mature, at which time it is believed the Company will receive full value for the securities. Furthermore, as of March 31, 2013, management also had the intent to hold, and will not be required to sell, the securities classified as available for sale for a period of time sufficient for a recovery of cost, which may be until maturity. The unrealized losses are due to increases in market interest rates over the yields available at the time the underlying securities were purchased. When necessary, the Company has performed a discounted cash flow analysis to determine whether or not it will receive the contractual principal and interest on certain securities. The fair value is expected to recover as the bonds approach their maturity date or repricing date or if market yields for such investments decline. As of March 31, 2013, management believes the impairments detailed in the table above are temporary and no other-than-temporary impairment losses have been realized in the Company's consolidated statements of income.

The following tables set forth information with regard to contractual maturities of debt securities at March 31, 2013:

(In thousands)	Amortized cost	Estimated fair value
Debt securities classified as available for sale		
Within one year	\$45,889	\$46,070
From one to five years	184,744	187,836
From five to ten years	382,001	388,831
After ten years	815,014	827,199
	\$1,427,648	\$1,449,936
Debt securities classified as held to maturity		
Within one year	\$24,547	\$24,598
From one to five years	28,732	29,380
From five to ten years	6,125	6,130
After ten years	3,070	3,253
	\$62,474	\$63,361

Maturities of mortgage-backed, collateralized mortgage obligations and asset-backed securities are stated based on their estimated average lives. Actual maturities may differ from estimated average lives or contractual maturities because, in certain cases, borrowers have the right to call or prepay obligations with or without call or prepayment penalties.

Except for U.S. Government securities, there were no holdings, when taken in the aggregate, of any single issuer that exceeded 10% of consolidated stockholders' equity at March 31, 2013.

NBT BANCORP INC. AND SUBSIDIARIES

Item 2 -- MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The purpose of this discussion and analysis is to provide a concise description of the financial condition and results of operations of NBT Bancorp Inc. and its wholly owned consolidated subsidiaries, NBT Bank, N.A. (the "Bank"), NBT Financial Services, Inc. ("NBT Financial"), and NBT Holdings, Inc. ("NBT Holdings") (collectively referred to herein as the "Company"). This discussion will focus on results of operations, financial condition, capital resources and asset/liability management. Reference should be made to the Company's consolidated financial statements and footnotes thereto included in this Form 10-Q as well as to the Company's Annual Report on Form 10-K for the year ended December 31, 2012 for an understanding of the following discussion and analysis. Operating results for the three month period ended March 31, 2013 are not necessarily indicative of the results of the full year ending December 31, 2013 or any future period.

Forward-looking Statements

Certain statements in this filing and future filings by the Company with the Securities and Exchange Commission, in the Company's press releases or other public or shareholder communications, contain forward-looking statements, as defined in the Private Securities Litigation Reform Act. These statements may be identified by the use of phrases such as "anticipate," "believe," "expect," "forecasts," "projects," "could," or other similar terms. There are a number of factors, many of which are beyond the Company's control, that could cause actual results to differ materially from those contemplated by the forward-looking statements. Factors that may cause actual results to differ materially from those contemplated by such forward-looking statements include, among others, the following: (1) competitive pressures among depository and other financial institutions may increase significantly; (2) revenues may be lower than expected; (3) changes in the interest rate environment may affect interest margins; (4) general economic conditions, either nationally or regionally, may be less favorable than expected, resulting in, among other things, a deterioration in credit quality and/or a reduced demand for credit; (5) legislative or regulatory changes, including changes in accounting standards or tax laws, may adversely affect the businesses in which the Company is engaged; (6) competitors may have greater financial resources and develop products that enable such competitors to compete more successfully than the Company; (7) adverse changes may occur in the securities markets or with respect to inflation; (8) acts of war or terrorism; (9) the costs and effects of litigation and of unexpected or adverse outcomes in such litigation; (10) internal control failures; (11) the successful completion and integration of acquisitions; and (12) the Company's success in managing the risks involved in the foregoing.

The Company cautions readers not to place undue reliance on any forward-looking statements, which speak only as of the date made, and advises readers that various factors, including those described above and other factors discussed in the Company's annual and quarterly reports previously filed with the Securities and Exchange Commission, could affect the Company's financial performance and could cause the Company's actual results or circumstances for future periods to differ materially from those anticipated or projected.

Unless required by law, the Company does not undertake, and specifically disclaims any obligations to publicly release any revisions to any forward-looking statements to reflect the occurrence of anticipated or unanticipated events or circumstances after the date of such statements.

Non-GAAP Measures

This Quarterly Report on Form 10-Q contains financial information determined by methods other than in accordance with accounting principles generally accepted in the United States of America (GAAP). These measures adjust GAAP measures to exclude the effects of sales of securities and certain non-recurring and merger-related expenses. Where non-GAAP disclosures are used in this Quarterly Report on Form 10-Q, the comparable GAAP measure, as well as a reconciliation to the comparable GAAP measure, is provided in the accompanying

tables. Management believes that these non-GAAP measures provided useful information that is important to an understanding of the operating results of the Company's core business due to the non-recurring nature of the excluded items. Non-GAAP measures should not be considered a substitute for financial measures determined in accordance with GAAP and investors should consider the Company's performance and financial condition as reported under GAAP and all other relevant information when assessing the performance or financial condition of the Company.

## Table of Contents

### Critical Accounting Policies

The Company has identified policies as being critical because they require management to make particularly difficult, subjective and/or complex judgments about matters that are inherently uncertain and because of the likelihood that materially different amounts would be reported under different conditions or using different assumptions. These policies relate to the allowance for loan losses, pension accounting, other-than-temporary impairment, provision for income taxes and intangible assets.

Management of the Company considers the accounting policy relating to the allowance for loan losses to be a critical accounting policy given the uncertainty in evaluating the level of the allowance required to cover credit losses inherent in the loan portfolio and the material effect that such judgments can have on the results of operations. While management's current evaluation of the allowance for loan losses indicates that the allowance is adequate, under adversely different conditions or assumptions, the allowance may need to be increased. For example, if historical loan loss experience significantly worsened or if current economic conditions significantly deteriorated, additional provision for loan losses would be required to increase the allowance. In addition, the assumptions and estimates used in the internal reviews of the Company's nonperforming loans and potential problem loans have a significant impact on the overall analysis of the adequacy of the allowance for loan losses. While management has concluded that the current evaluation of collateral values is reasonable under the circumstances, if collateral values were significantly lower, the Company's allowance for loan policy would also require additional provision for loan losses.

Management is required to make various assumptions in valuing its pension assets and liabilities. These assumptions include the expected rate of return on plan assets, the discount rate, and the rate of increase in future compensation levels. Changes to these assumptions could impact earnings in future periods. The Company takes into account the plan asset mix, funding obligations, and expert opinions in determining the various rates used to estimate pension expense. The Company also considers the Citigroup Pension Liability Index, market interest rates and discounted cash flows in setting the appropriate discount rate. In addition, the Company reviews expected inflationary and merit increases to compensation in determining the rate of increase in future compensation levels.

Management of the Company considers the accounting policy relating to other-than-temporary impairment to be a critical accounting policy. Management systematically evaluates certain assets for other-than-temporary declines in fair value, primarily investment securities. Management considers historical values and current market conditions as a part of the assessment. The amount of the total other-than-temporary impairment related to the credit loss is recognized in earnings and the amount of the total other-than-temporary impairment related to other factors is generally recognized in other comprehensive income, net of applicable taxes.

The Company is subject to examinations from various taxing authorities. Such examinations may result in challenges to the tax return treatment applied by the Company to specific transactions. Management believes that the assumptions and judgments used to record tax-related assets or liabilities have been appropriate. Should tax laws change or the taxing authorities determine that management's assumptions were inappropriate, an adjustment may be required which could have a material effect on the Company's results of operations.

Another critical accounting policy is the policy for acquired loans. Acquired loans are initially recorded at their acquisition date fair values. The carryover of allowance for loan losses is prohibited as any credit losses in the loans are included in the determination of the fair value of the loans at the acquisition date. Fair values for acquired loans are based on a discounted cash flow methodology that involves assumptions and judgments as to credit risk, prepayment risk, liquidity risk, default rates, loss severity, payment speeds, collateral values and discount rate. Subsequent to the acquisition of acquired impaired loans, applicable accounting guidance requires the continued estimation of expected cash flows to be received. This estimation involves the use of key assumptions and estimates, similar to those used in the initial estimate of fair value. Changes in expected cash flows could result in the recognition of impairment through provision for credit losses. Subsequent to the purchase date, the methods utilized to

estimate the required allowance for loan losses for the non-impaired acquired loans is similar to originated loans.

## Table of Contents

As a result of acquisitions, the Company has acquired goodwill and identifiable intangible assets. Goodwill represents the cost of acquired companies in excess of the fair value of net assets at the acquisition date. Goodwill is evaluated at least annually or when business conditions suggest that an impairment may have occurred. Goodwill will be reduced to its carrying value through a charge to earnings if impairment exists. Core deposits and other identifiable intangible assets are amortized to expense over their estimated useful lives. The determination of whether or not impairment exists is based upon discounted cash flow modeling techniques that require management to make estimates regarding the amount and timing of expected future cash flows. It also requires them to select a discount rate that reflects the current return requirements of the market in relation to present risk-free interest rates, required equity market premiums and Company-specific risk indicators, all of which are susceptible to change based on changes in economic conditions and other factors. Future events or changes in the estimates used to determine the carrying value of goodwill and identifiable intangible assets could have a material impact on the Company's results of operations.

The Company's policies on the allowance for loan losses, pension accounting, provision for income taxes and intangible assets are disclosed in Note 1 to the consolidated financial statements presented in our 2012 Annual Report on Form 10-K. All accounting policies are important, and as such, the Company encourages the reader to review each of the policies included in Note 1 to obtain a better understanding of how the Company's financial performance is reported.

### Overview

Significant factors management reviews to evaluate the Company's operating results and financial condition include, but are not limited to: net income and earnings per share, return on assets and equity, tangible common equity, net interest margin, noninterest income, operating expenses, asset quality indicators, loan and deposit growth, capital management, liquidity and interest rate sensitivity, enhancements to customer products and services, technology advancements, market share and peer comparisons. The following information should be considered in connection with the Company's results for the first three months of 2013:

- Completed the previously announced acquisition of Alliance Financial Corporation ("Alliance") on March 8, 2013, a \$1.4 billion financial holding company headquartered in Syracuse, N.Y.
- Core earnings were \$14.3 million for the three months ended March 31, 2013, up 8.5% from \$13.2 million for the same period in 2012. Core diluted earnings per share for the three months ended March 31, 2013 were \$0.39, equivalent to the same period last year. Core annualized return on average assets and return on average equity were 0.90% and 9.01%, respectively, for the three months ended March 31, 2013, compared with 0.94% and 9.76%, respectively, for the three months ended March 31, 2012.
- Reported results from the first quarter of 2013 include the impact of the acquisition of Alliance Financial Corporation ("Alliance") since March 8, 2013, including approximately \$10.7 million in merger related expenses. Reported net income for the three months ended March 31, 2013 was \$7.6 million, down from \$13.7 million for the same period in 2012. Reported earnings per diluted share for the three months ended March 31, 2013 was \$0.21 for the three months ended March 31, 2013 as compared to \$0.41 for the three months ended March 31, 2012.
- Net interest margin (on a fully taxable equivalent basis ("FTE")) was 3.68% for the three months ended March 31, 2013 as compared to 3.90% for the same period in 2012.
- Past due loans as a percentage of total loans were 0.81% at March 31, 2013, as compared with 0.71% at December 31, 2012.

- Net charge-offs were 0.56% of average loans for the first three months of 2013, compared to 0.55% for the year ended December 31, 2012.
- The provision for loan losses was \$5.7 million for the three months ended March 31, 2013, up from \$4.5 million for the same period in 2012.

Table of Contents

The following table depicts several annualized measurements of performance using Core and U.S. GAAP net income that management reviews in analyzing the Company's performance. Returns on average assets and average equity measure how effectively an entity utilizes its total resources and capital, respectively. Net interest margin, which is the net FTE interest income divided by average earning assets, is a measure of an entity's ability to utilize its earning assets in relation to the cost of funding. Interest income for tax-exempt securities and loans is adjusted to a taxable equivalent basis using the statutory Federal income tax rate of 35%.

## Reconciliation of Non-GAAP Financial Measures:

Three Months Ended March 31,	2013	2012
Reported net income (GAAP)	\$ 7,649	\$ 13,650
Adj: Gain on sale of securities, net	(1,145 )	(455 )
Adj: Prepayment penalty fee	-	(750 )
Plus: Merger related expenses	10,681	511
Total Adjustments	9,536	(694 )
Income tax effect on adjustments	2,908	(208 )
Core net income	\$ 14,277	\$ 13,164

	2013	2012
Core return on average assets	0.90 %	0.94 %
Core return on average equity	9.01 %	9.76 %
Core Return on Average Tangible Common Equity (1)	13.58 %	14.01 %

(1) Excludes amortization of intangible assets (net of tax) from net income and average tangible common equity is calculated as follows:

	2013	2012
Average stockholders' equity	\$642,693	\$542,628
Less: average goodwill and other intangibles	200,779	150,478
Average tangible common equity	\$441,914	\$392,150

## Net Interest Income

Net interest income is the difference between interest income on earning assets, primarily loans and securities, and interest expense on interest bearing liabilities, primarily deposits and borrowings. Net interest income is affected by the interest rate spread, the difference between the yield on earning assets and cost of interest bearing liabilities, as well as the volumes of such assets and liabilities. Net interest income is one of the key determining factors in a financial institution's performance as it is the principal source of earnings.

FTE net interest income increased \$2.6 million during the three months ended March 31, 2013, compared to the same period of 2012. The Company's FTE net interest margin was 3.68% for the three months ended March 31, 2013, down from 3.90% for the three months ended March 31, 2012. Average interest earning assets were \$5.8 billion for the first quarter of 2013, an increase of 12.5% compared to the same period in 2012. The growth in earning assets was due to strong organic loan growth in 2012 as well as the acquisition of Alliance in March 2013. The increase in average earning assets for the three months ended March 31, 2013 as compared to the same period of 2012 offset the decline in rates, resulting in the increase in net interest income over the same period last year.

Table of Contents

For the three months ended March 31, 2013, total FTE interest income increased \$1.6 million, or 2.6%, from the same period in 2012 as a result of the increase in average earning assets, attributed to aforementioned acquisition activity and strong organic loan growth in the previous year. The average balance of loans for the three months ended March 31, 2013 was \$4.5 billion, up approximately \$682.6 million, or 17.9%, from the three months ended March 31, 2012. The average balance of securities available for sale for the three months ended March 31, 2013 was \$1.2 billion, down slightly from the three months ended March 31, 2012. The growth in average earning assets was partially offset by a decrease in the yield earned on earning assets. The yield on securities available for sale decreased 52 bp to 2.09% for the first quarter of 2013 from 2.61% for same period in 2012. In addition, the yield on loans decreased 46 bp to 4.87% for the three months ended March 31, 2013 from 5.33% for the three months ended March 31, 2012. The decreases in the yield on securities and loans was due to the reinvestment of cash flows from loan principal payments and maturing of securities into the current low interest rate environment combined with the acquisition of Alliance interest earning assets at a lower average yield.

The reduction in yields on earning assets was partially offset by a reduction in rates paid on interest bearing liabilities. The cost of interest bearing liabilities for the three months ended March 31, 2013 was down 17 bps to 0.76%. The rate on time deposits was 1.26% for the three months ended March 31, 2013, compared with 1.63% for the three months ended March 31, 2012. The rate on money market deposit accounts was 0.14% for the three months ended March 31, 2013, compared with 0.23% for the three months ended March 31, 2012. Going forward, additional rate reductions on deposits could be more difficult as deposit rates are at or near their floors.

Average interest bearing liabilities increased approximately \$418.1 million, or 10.5%, for the three months ended March 31, 2013 as compared to the same period in 2012, which partially offset the decrease in total interest expense attributed to the decrease in the rates on interest bearing liabilities. The increase in average interest bearing liabilities is primarily due to seasonal municipal deposits and the Alliance acquisition at the end of the quarter.

Table of Contents

## Average Balances and Net Interest Income

The following tables include the condensed consolidated average balance sheet, an analysis of interest income/expense and average yield/rate for each major category of earning assets and interest bearing liabilities on a taxable equivalent basis. Interest income for tax-exempt securities and loans has been adjusted to a taxable-equivalent basis using the statutory Federal income tax rate of 35%.

Three Months ended March 31,

Change in FTE net interest income	\$ 22,756	\$ (20,149 )	\$ 2,607

#### Noninterest Income

Noninterest income is a significant source of revenue for the Company and an important factor in the Company's results of operations. The following table sets forth information by category of noninterest income for the periods indicated:

(in thousands)	Three months ended March 31,	
	2013	2012
Insurance and other financial services revenue	\$ 6,893	\$ 6,154
Service charges on deposit accounts	4,323	4,341
ATM and debit card fees	3,242	2,962
Retirement plan administration fees	2,682	2,333
Trust	2,913	2,129
Bank owned life insurance	849	971
Net securities gains	1,145	455
Other	3,182	3,711
Total noninterest income	\$ 25,229	\$ 23,056

Noninterest income for the three months ended March 31, 2013 was \$25.2 million, up 9.4% or \$2.1 million, compared with \$23.1 million for the same period in 2012. Insurance and other financial services revenue increased approximately \$0.7 million for the three months ended March 31, 2013, compared to the three months ended March

31, 2012, due primarily to an increase in insurance revenue in 2013. Trust revenue increased approximately \$0.8 million for the first quarter of 2013 as compared to the same period in 2012. This increase was due primarily to trust business obtained from the Alliance acquisition. Alliance had approximately \$1 billion in assets under management at the time of the acquisition. Securities gains totaled approximately \$1.1 million for the three months ended March 31, 2013 as compared to \$0.5 million for the same period in 2012. Retirement plan administration fees increased approximately \$0.3 million for the three months ended March 31, 2013, compared to the three months ended March 31, 2012, due primarily to the addition of two large clients during the third quarter of 2012.

Table of Contents

## Noninterest Expense

Noninterest expenses are also an important factor in the Company's results of operations. The following table sets forth the major components of noninterest expense for the periods indicated:

	Three months ended March 31,	
	2013	2012
(in thousands)		
Salaries and employee benefits	\$ 27,047	\$ 26,725
Occupancy	4,977	4,491
Data processing and communications	3,455	3,258
Professional fees and outside services	2,901	2,725
Equipment	2,582	2,380
Office supplies and postage	1,590	1,671
FDIC expenses	1,130	931
Advertising	723	802
Amortization of intangible assets	851	819
Loan collection and other real estate owned	718	638
Merger	10,681	511
Other	4,050	3,523
Total noninterest expense	\$ 60,705	\$ 48,474

Noninterest expense for the three months ended March 31, 2013 was \$60.7 million, up \$12.2 million or 25.2%, for the same period in 2012. Excluding merger expenses totaling \$10.7 million during the first quarter of 2013 and \$0.5 million during the first quarter of 2012, noninterest expense was up \$2.1 million, or 4.3%, for the first quarter of 2013 as compared to the first quarter of 2012. Occupancy expenses for the three months ended March 31, 2013 increased \$0.5 million, or 10.8%, over the same period in 2012 primarily due to 2012 acquisitions. In addition, other operating expenses increased \$0.5 million for the three months ended March 31, 2013 as compared to the same period in 2012.

## Income Taxes

Income tax expense for the three month period ended March 31, 2013 was \$3.4 million, down from \$5.9 million for the same period in 2012. The effective tax rate was 30.5% for the three months ended March 31, 2013, compared to 30.0% for the same period in 2012.

## ANALYSIS OF FINANCIAL CONDITION

## Securities

Average total earning securities decreased \$33.2 million, or 2.6%, for the three months ended March 31, 2013 when compared to the same period in 2012. The average balance of securities available for sale decreased \$15.5 million, or 1.3%, for the three months ended March 31, 2013 when compared to the same period in 2012. The average balance of securities held to maturity decreased \$17.6 million, or 25.0%, for the three months ended March 31, 2013, compared to the same period in 2012. This decrease was due primarily to the scheduled run-off of municipal securities in the held to maturity portfolio. The average total securities portfolio represents 21.4% of total average earning assets for the three months ended March 31, 2013, down from 24.7% for the same period in 2012.

Table of Contents

The following table details the composition of securities available for sale, securities held to maturity and regulatory investments for the periods indicated:

	March 31, 2013		December 31, 2012	
Mortgage-backed securities:				
With maturities 15 years or less	21	%	18	%
With maturities greater than 15 years	1	%	2	%
Collateral mortgage obligations	38	%	36	%
Municipal securities	13	%	12	%
US agency notes	24	%	28	%
Other	3	%	4	%
Total	100	%	100	%

The Company's mortgage backed securities, U.S. agency notes, and collateralized mortgage obligations are all "prime/conforming" and are guaranteed by Fannie Mae, Freddie Mac, Federal Home Loan Bank, Federal Farm Credit Banks, or Ginnie Mae ("GNMA"). GNMA securities are considered equivalent to U.S. Treasury securities, as they are backed by the full faith and credit of the U.S. government. Currently, there are no subprime mortgages in our investment portfolio.

## Loans

A summary of loans, net of deferred fees and origination costs, by category for the periods indicated follows:

(In thousands)	March 31, 2013	December 31, 2012
Residential real estate mortgages	\$ 996,925	\$ 651,107
Commercial	829,766	694,799
Commercial real estate mortgages	1,233,763	1,072,807
Real estate construction and development	136,402	123,078
Agricultural and agricultural real estate mortgages	107,023	112,687
Consumer	1,253,645	1,047,856
Home equity	637,509	575,282
Total loans	\$ 5,195,033	\$ 4,277,616

Total loans increased by \$917.4 million, or 21.4%, at March 31, 2013 from December 31, 2012, and represent approximately 68.3% of assets, as compared to 70.8% of total assets at December 31, 2012. The increase in loan is primarily due to the loans acquired in the Alliance acquisition. The following table summarizes the Alliance acquired loan balances at fair value of as of March 8, 2013 (in thousands):

Table of Contents

	Acquired Balances
Residential real estate mortgages	\$333,105
Commercial	179,672
Commercial real estate mortgages	117,752
Consumer	200,470
Home equity	73,474
Total loans	\$904,473

Table of Contents

Allowance for Loan Losses, Provision for Loan Losses, and Nonperforming Assets

The allowance for loan losses is maintained at a level estimated by management to provide adequately for risk of probable losses inherent in the current loan portfolio. The adequacy of the allowance for loan losses is continuously monitored using a methodology designed to ensure that the level of the allowance reasonably reflects the loan portfolio's risk profile. It is evaluated to ensure that it is sufficient to absorb all reasonably estimable credit losses inherent in the current loan portfolio.

Management considers the accounting policy relating to the allowance for loan losses to be a critical accounting policy given the degree of judgment exercised in evaluating the level of the allowance required to cover credit losses in the portfolio and the material effect that such judgments can have on the consolidated results of operations.

For purposes of evaluating the adequacy of the allowance, the Company considers a number of significant factors that affect the collectability of the portfolio. For individually analyzed loans, these factors include estimates of loss exposure, which reflect the facts and circumstances that affect the likelihood of repayment of such loans as of the evaluation date. For homogeneous pools of loans, estimates of the Company's exposure to credit loss reflect a thorough current assessment of a number of factors, which could affect collectability. These factors include: past loss experience; the size, trend, composition, and nature of the loans; changes in lending policies and procedures, including underwriting standards and collection, charge-off and recovery practices; trends experienced in nonperforming and delinquent loans; current economic conditions in the Company's market; portfolio concentrations that may affect loss experienced across one or more components of the portfolio; the effect of external factors such as competition, legal and regulatory requirements; and the experience, ability, and depth of lending management and staff. In addition, various regulatory agencies, as an integral component of their examination process, periodically review the Company's allowance for loan losses. Such agencies may require the Company to recognize additions to the allowance based on their judgment about information available to them at the time of their examination, which may not be currently available to management.

After a thorough consideration and validation of the factors discussed above, required additions or reductions to the allowance for loan losses are made periodically by charges or credits to the provision for loan losses. These charges are necessary to maintain the allowance at a level which management believes is reasonably reflective of the overall inherent risk of probable loss in the portfolio. While management uses available information to recognize losses on loans, additions or reductions to the allowance may fluctuate from one reporting period to another. These fluctuations are reflective of changes in risk associated with portfolio content and/or changes in management's assessment of any or all of the determining factors discussed above. Management considers the allowance for loan losses to be adequate based on evaluation and analysis of the loan portfolio.

The following table reflects changes to the allowance for loan losses for the periods presented. The allowance is increased by provisions for losses charged to operations and is reduced by net charge-offs. Charge-offs are made when the ability to collect loan principal within a reasonable time becomes unlikely. Any recoveries of previously charged-off loans are credited directly to the allowance for loan losses.

Table of Contents

## Allowance For Loan Losses

(dollars in thousands)	Three months ended					
	March 31, 2013			March 31, 2012		
Balance, beginning of period	\$69,334			\$	71,334	
Recoveries	1,458				1,069	
Chargeoffs	(7,716)	)		(5,540)	)	
Net chargeoffs	(6,258)	)		(4,471)	)

Real estate mortgage	(657)	)	10	%	(349)	) 8 %
Consumer	(2,746)	)	44	%	(3,377)	) 75 %
Net chargeoffs	\$(6,258)	)	100	%	\$(4,471)	) 100 %
Annualized net chargeoffs to average loans	0.56		%		0.47	%

Nonperforming assets consist of nonaccrual loans, loans 90 days or more past due and still accruing, restructured loans, OREO, and nonperforming securities. Loans are generally placed on nonaccrual when principal or interest payments become ninety days past due, unless the loan is well secured and in the process of collection. Loans may also be placed on nonaccrual when circumstances indicate that the borrower may be unable to meet the contractual principal or interest payments. OREO represents property acquired through foreclosure and is valued at the lower of the carrying amount or fair value, less any estimated disposal costs. Nonperforming securities include securities which management believes are other-than-temporarily impaired, are carried at their estimated fair value and are not accruing interest.

## Nonperforming Assets

(Dollars in thousands)	March 31, 2013			December 31, 2012		
	Amount	%		Amount	%	
Nonaccrual loans						
Commercial and agricultural loans and real estate	\$ 20,462	50	%	\$ 20,923	53	%
Real estate mortgages	9,583	23	%	8,083	20	%
Consumer	8,961	21	%	8,440	21	%
Troubled debt restructured loans	2,720	7	%	2,230	6	%
Total nonaccrual loans	41,726	100	%	39,676	100	%
Loans 90 days or more past due and still accruing						
Commercial and agricultural loans and real estate	6	0	%	148	6	%
Real estate mortgages	79	5	%	330	13	%
Consumer	1,566	95	%	1,970	79	%
Total loans 90 days or more past due and still accruing	1,651	100	%	2,448	100	%
Total nonperforming loans	43,377			42,124		
Other real estate owned (OREO)	2,864			2,276		
Total nonperforming assets	\$ 46,241			\$ 44,400		
Total nonperforming loans to total loans	0.83	%		0.98	%	

Edgar Filing: NBT BANCORP INC - Form 10-Q

Total nonperforming assets to total assets	0.61	%	0.73	%
Total allowance for loan losses to nonperforming loans	158.46	%	164.60	%

Table of Contents

Past due loans as a percentage of total loans was 0.81% at March 31, 2013, up from 0.71% at December 31, 2012. In addition to nonperforming loans, the Company has also identified approximately \$83.4 million in potential problem loans at March 31, 2013 as compared to \$79.6 million at December 31, 2012. At March 31, 2013, potential problem loans primarily consisted of commercial real estate and commercial and agricultural loans. Potential problem loans are loans that are currently performing, but known information about possible credit problems of the borrowers causes management to have serious doubts as to the ability of such borrowers to comply with the present loan repayment terms and which may result in classification of such loans as nonperforming at some time in the future. Potential problem loans are typically defined as loans that are performing but are classified by the Company's loan rating system as "substandard." Management cannot predict the extent to which economic conditions may worsen or other factors which may impact borrowers and the potential problem loans. Accordingly, there can be no assurance that other loans will not become 90 days or more past due, be placed on nonaccrual, become restructured, or require increased allowance coverage and provision for loan losses.

The Company recorded a provision for loan losses of \$5.7 million for the three months ended March 31, 2013, compared with \$4.5 million for the three months ended March 31, 2012. Net charge-offs were \$6.3 million for the three months ended March 31, 2013, up from \$4.5 million for the same period in 2012, due primarily to the charge-off of one large commercial loan that was previously reserved for. Net charge-offs to average loans for the three months ended March 31, 2013 was 0.56%, compared to 0.47% for the three months ended March 31, 2012.

The allowance for loan losses totaled \$68.7 million at March 31, 2013, compared to \$69.3 million at December 31, 2012. The allowance for loan losses as a percentage of loans was 1.32% (1.69% excluding acquired loans with no related allowance recorded) at March 31, 2013, compared to 1.62% (1.72% excluding acquired loans with no related allowance recorded) at December 31, 2012.

Subprime mortgage lending, which has been the riskiest sector of the residential housing market, is not a market that the Company has ever actively pursued. The market does not apply a uniform definition of what constitutes "subprime" lending. Our reference to subprime lending relies upon the "Statement on Subprime Mortgage Lending" issued by the Office of Thrift Supervision and the other federal bank regulatory agencies, or the Agencies, on September 29, 2007, which further referenced the "Expanded Guidance for Subprime Lending Programs," or the Expanded Guidance, issued by the Agencies by press release dated January 31, 2001. In the Expanded Guidance, the Agencies indicated that subprime lending does not refer to individual subprime loans originated and managed, in the ordinary course of business, as exceptions to prime risk selection standards. The Agencies recognize that many prime loan portfolios will contain such accounts. The Agencies also excluded prime loans that develop credit problems after acquisition and community development loans from the subprime arena. According to the Expanded Guidance, subprime loans are other loans to borrowers which display one or more characteristics of reduced payment capacity. Five specific criteria, which are not intended to be exhaustive and are not meant to define specific parameters for all subprime borrowers and may not match all markets or institutions' specific subprime definitions, are set forth, including having a FICO score of 660 or below. Based upon the definition and exclusions described above, management believes that the Company is a prime lender. Within the loan portfolio, there are loans that, at the time of origination, had FICO scores of 660 or below. However, since the Company is a portfolio lender, it reviews all data contained in borrower credit reports and does not base underwriting decisions solely on FICO scores. We believe the aforementioned loans, when made, were amply collateralized and otherwise conformed to our prime lending standards. The Company has not originated Alt A loans or no interest loans.

Table of Contents

## Deposits

Total deposits were \$6.0 billion at March 31, 2013, up \$1.2 billion, or 25.7%, from December 31, 2012, due primarily to the acquisition of Alliance on March 8, 2013. Savings, NOW and money market accounts increased to \$3.3 billion as of March 31, 2013 as compared with \$2.6 billion at December 31, 2012. Time deposits increased \$183.2 million, or 18.6%, from December 31, 2012 to March 31, 2013. Demand deposits increased by \$261.1 million, or 21.0%, from December 31, 2012 to March 31, 2013.

The following table summarizes the Alliance acquired deposit balances at fair value of as of March 8, 2013 (in thousands):

	Acquired Balances
Noninterest bearing demand	\$222,843
Savings, NOW and money market	660,412
Time	230,165
Total	\$1,113,420

Total average deposits for the three months ended March 31, 2013 increased \$614.6 million, or 13.8%, from the same period in 2012, due primarily to the acquisitions of Hampshire First Bank and Alliance. Average savings accounts increased to \$770.6 million for the first quarter of 2013 from \$642.0 million for the same period in 2012. Average time deposits increased \$59.4 million, or 6.2%, for the three months ended March 31, 2013 from the same period in 2012. Average demand deposit accounts increased \$221.2 million, or 20.8%, for the three months ended March 31, 2013 as compared to the same period in 2012.

## Borrowed Funds

The Company's borrowed funds consist of short-term borrowings and long-term debt. Short-term borrowings totaled \$185.9 million at March 31, 2013 compared to \$162.9 million at December 31, 2012. Long-term debt was \$428.7 million at March 31, 2013, as compared to \$367.5 million at December 31, 2012. The increase long-term borrowed funds was due to the Alliance acquisition. The Company assumed \$21.6 million in short-term customer sweep accounts and \$100.0 million in long-term FHLB advances from Alliance on March 8, 2013. Prior to March 31, 2013, the Company paid down \$40.0 million of the FHLB advances assumed from Alliance. For more information about the Company's borrowing capacity and liquidity position, see "Liquidity Risk" below.

## Capital Resources

Stockholders' equity of \$803.3 million represented 10.55% of total assets at March 31, 2013, compared with \$582.3 million, or 9.64% as of December 31, 2012. The Company issued 10.3 million shares at a value of \$226 million for the acquisition of Alliance on March 8, 2013. The Company held a 0.8% equity interest in Alliance prior to acquisition with an acquisition date fair value of \$1.9 million. The Company realized a \$1.0 million gain as a result of measuring the equity interest to fair value in accordance with step acquisition accounting.

The Company did not repurchase any shares of its common stock under previously disclosed stock repurchase plans. At March 31, 2013, there were 748,013 shares available for repurchase under a previously disclosed repurchase plan, which expires on December 31, 2013.

The Board of Directors considers the Company's earnings position and earnings potential when making dividend decisions. The Company does not have a target dividend pay-out ratio.

Table of Contents

As the capital ratios in the following table indicate, the Company remained “well capitalized” at March 31, 2013 under applicable bank regulatory requirements. Capital measurements are well in excess of regulatory minimum guidelines and meet the requirements to be considered well capitalized for all periods presented. Tier 1 leverage, Tier 1 capital and Total risk-based capital ratios have regulatory minimum guidelines of 3%, 4% and 8% respectively, with requirements to be considered well capitalized of 5%, 6% and 10%, respectively. The Tier 1 capital ratio is calculated by dividing period end Tier 1 Capital by quarter to date average assets. The Tier 1 leverage ratio increased to 10.25% during the quarter as the issuance of stock for the Alliance acquisition increased Tier 1 Capital while the assets acquired were only included in the Company’s assets since the acquisition date which had a lesser impact on average assets for the quarter. In future reporting periods, the Tier 1 leverage ratio to be will reflect a full period of acquired assets.

	March 31,		December 31,	
	2013		2012	
Capital Measurements				
Tier 1 leverage ratio	10.25	%	8.54	%
Tier 1 capital ratio	11.33	%	11.00	%
Total risk-based capital ratio	12.58	%	12.25	%
Cash dividends as a percentage of net income	88.35	%	48.96	%
Per common share:				
Book value	\$ 18.36		\$ 17.24	
Tangible book value (1)	\$ 11.67		\$ 12.23	

(1) Stockholders' equity less goodwill and intangible assets divided by common shares outstanding

## Liquidity and Interest Rate Sensitivity Management

## Market Risk

Interest rate risk is the primary market risk affecting the Company. Other types of market risk, such as foreign currency exchange rate risk and commodity price risk, do not arise in the normal course of the Company’s business activities. Interest rate risk is defined as an exposure to a movement in interest rates that could have an adverse effect on the Company’s net interest income. Net interest income is susceptible to interest rate risk to the degree that interest bearing liabilities mature or reprice on a different basis than earning assets. When interest bearing liabilities mature or reprice more quickly than earning assets in a given period, a significant increase in market rates of interest could adversely affect net interest income. Similarly, when earning assets mature or reprice more quickly than interest bearing liabilities, falling interest rates could result in a decrease in net interest income.

In an attempt to manage the Company's exposure to changes in interest rates, management monitors the Company’s interest rate risk. Management’s Asset Liability Committee (“ALCO”) meets monthly to review the Company’s interest rate risk position and profitability, and to recommend strategies for consideration by the Board of Directors. Management also reviews loan and deposit pricing and the Company’s securities portfolio, formulates investment and funding strategies, and oversees the timing and implementation of transactions to assure attainment of the Board’s objectives in the most effective manner. Notwithstanding the Company’s interest rate risk management activities, the potential for changing interest rates is an uncertainty that can have an adverse effect on net income.

In adjusting the Company’s asset/liability position, the Board and management attempt to manage the Company’s interest rate risk while minimizing net interest margin compression. At times, depending on the level of general interest rates, the relationship between long- and short-term interest rates, market conditions and competitive factors, the Board and management may determine to increase the Company’s interest rate risk position somewhat in order to increase its net interest margin. The Company’s results of operations and net portfolio values remain vulnerable to changes in interest rates and fluctuations in the difference between long- and short-term interest rates. Assuming

interest rates remain at or near current historical lows, net interest margin will continue to experience compression. Additional rate reductions on deposits are becoming more difficult as deposit rates are at or near their floors, and with asset yields continuing to reprice at lower rates, this could result in additional margin pressure as well as a decrease in net interest income.

Table of Contents

The primary tool utilized by ALCO to manage interest rate risk is a balance sheet/income statement simulation model (interest rate sensitivity analysis). Information such as principal balance, interest rate, maturity date, cash flows, next repricing date (if needed), and current rates is uploaded into the model to create an ending balance sheet. In addition, ALCO makes certain assumptions regarding prepayment speeds for loans and mortgage related investment securities along with any optionality within the deposits and borrowings.

The model is first run under an assumption of a flat rate scenario (i.e. no change in current interest rates) with a static balance sheet over a 12-month period. Two additional models are run with static balance sheets: (1) a gradual increase of 200 bp, and (2) a gradual decrease of 100 bp taking place over a 12-month period. Under these scenarios, assets subject to prepayments are adjusted to account for faster or slower prepayment assumptions. Any investment securities or borrowings that have callable options embedded into them are handled accordingly based on the interest rate scenario. The resulting changes in net interest income are then measured against the flat rate scenario.

In the declining rate scenario, net interest income is projected to decrease when compared to the forecasted net interest income in the flat rate scenario through the simulation period. The decrease in net interest income is a result of earning assets repricing downward at a faster rate than interest bearing liabilities. The inability to effectively lower deposit rates will likely reduce or eliminate the benefit of lower interest rates. In the rising rate scenarios, net interest income is projected to experience a decline from the flat rate scenario. Net interest income is projected to remain at lower levels than in a flat rate scenario through the simulation period primarily due to a lag in assets repricing while funding costs increase. The potential impact on earnings is dependent on the ability to lag deposit repricing. If short-term rates continue to increase, the Company expects competitive pressures will likely lead to core deposit pricing increases, which will likely continue compression of the net interest margin.

Net interest income for the next 12 months in the + 200/- 100 bp scenarios, as described above, is within the internal policy risk limits of not more than a 7.5% change in net interest income. The following table summarizes the percentage change in net interest income in the rising and declining rate scenarios over a 12-month period from the forecasted net interest income in the flat rate scenario using the March 31, 2013 balance sheet position:

## Interest Rate Sensitivity Analysis

Change in interest rates (in bp points)	Percent change in net interest income
+200	(2.23%)
-100	(1.41%)

## Liquidity Risk

Liquidity involves the ability to meet the cash flow requirements of customers who may be depositors wanting to withdraw funds or borrowers needing assurance that sufficient funds will be available to meet their credit needs. The ALCO is responsible for liquidity management and has developed guidelines which cover all assets and liabilities, as well as off balance sheet items that are potential sources or uses of liquidity. Liquidity policies must also provide the flexibility to implement appropriate strategies and tactical actions. Requirements change as loans grow, deposits and securities mature, and payments on borrowings are made. Liquidity management includes a focus on interest rate sensitivity management with a goal of avoiding widely fluctuating net interest margins through periods of changing economic conditions.

## Table of Contents

The primary liquidity measurement the Company utilizes is called the Basic Surplus, which captures the adequacy of its access to reliable sources of cash relative to the stability of its funding mix of average liabilities. Basic Surplus is calculated by subtracting short-term liabilities from liquid assets. This approach recognizes the importance of balancing levels of cash flow liquidity from short- and long-term securities with the availability of dependable borrowing sources which can be accessed when necessary. At March 31, 2013, the Company's Basic Surplus measurement was 10.5% of total assets or \$793 million as compared to the December 31, 2012 Basic Surplus of 9.0% or \$540 million, and was above the Company's minimum of 5% or \$379 million set forth in its liquidity policies.

This Basic Surplus approach enables the Company to adequately manage liquidity from both operational and contingency perspectives. By tempering the need for cash flow liquidity with reliable borrowing facilities, the Company is able to operate with a more fully invested and, therefore, higher interest income generating securities portfolio. The makeup and term structure of the securities portfolio is, in part, impacted by the overall interest rate sensitivity of the balance sheet. Investment decisions and deposit pricing strategies are impacted by the liquidity position.

The Company's primary source of funds is the Bank. Certain restrictions exist regarding the ability of the Bank to transfer funds to the Company in the form of cash dividends. The approval of the Office of Comptroller of the Currency (OCC) is required to pay dividends when a bank fails to meet certain minimum regulatory capital standards or when such dividends are in excess of a subsidiary bank's earnings retained in the current year plus retained net profits for the preceding two years (as defined in the regulations). At March 31, 2013, approximately \$10.5 million of the total stockholders' equity of the Bank was available for payment of dividends to the Company without approval by the OCC. The Bank's ability to pay dividends is also subject to the Bank being in compliance with regulatory capital requirements. The Bank is currently in compliance with these requirements. Under the General Corporation Law of the State of Delaware, the Company may declare and pay dividends either out of its surplus or, in case there is no surplus, out of its net profits for the fiscal year in which the dividend is declared and/or the preceding fiscal year.

At March 31, 2013 and December 31, 2012, FHLB advances outstanding totaled \$475 million and \$339 million, respectively. The Bank is a member of the FHLB system and had additional borrowing capacity from the FHLB of approximately \$602 million at March 31, 2013 and \$418 million at December 31, 2012. In addition, unpledged securities could have been used to increase borrowing capacity at the FHLB by an additional \$232 million at March 31, 2013, or used to collateralize other borrowings, such as repurchase agreements. At March 31, 2013 the Bank also had additional borrowing capacity from unused collateral at the Federal Reserve of \$687 million.

### Recent Accounting Pronouncements

Accounting Standards Update ("ASU") 2011-11, "Balance Sheet" (Topic 210) - Disclosures about Offsetting Assets and Liabilities" amends Topic 210, "Balance Sheet," to require an entity to disclose both gross and net information about financial instruments, such as sales and repurchase agreements and reverse sale and repurchase agreements and securities borrowing/lending arrangements, and derivative instruments that are eligible for offset in the statement of financial position and/or subject to a master netting arrangement or similar agreement. In October 2012, the FASB limited the scope to derivatives, repurchase and reverse purchase agreements, and securities borrowing and lending agreements subject to master netting arrangements or similar agreements. ASU 2011-11 was effective for annual and interim periods beginning on January 1, 2013, and did not have a significant impact on the Company's financial statements.

Table of Contents

ASU 2012-02 “Intangibles – Goodwill and Other (Topic 350) – Testing Indefinite-Lived Intangible Assets for Impairment” gives entities the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that an indefinite-lived intangible asset is impaired. If, after assessing the totality of events or circumstances, an entity determines it is more likely than not that an indefinite-lived intangible asset is impaired, then the entity must perform the quantitative impairment test. If, under the quantitative impairment test, the carrying amount of the intangible asset exceeds its fair value, an entity should recognize an impairment loss in the amount of that excess. Permitting an entity to assess qualitative factors when testing indefinite-lived intangible assets for impairment results in guidance that is similar to the goodwill impairment testing guidance in ASU 2011-08. ASU 2012-02 was effective for the Company beginning January 1, 2013 (early adoption permitted) and did not have an impact on the Company’s financial statements.

ASU 2013-01 “Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities” was issued in January 2013 and clarifies that the scope of ASU 2011-11 would apply to derivatives including bifurcated embedded derivatives, repurchase agreements and reverse repurchase agreements, and securities borrowing and securities lending transactions that are either offset in accordance with Section 210-20-45 or Section 815-10-45 or are subject to a master netting arrangement or similar agreement. ASU 2013-01 was effective for annual and interim periods beginning on January 1, 2013, and did not have a significant impact on the Company’s financial statements.

ASU 2013-02 “Reporting of Amounts Reclassified Out of Other Comprehensive Income” was issued in February 2013 and amends, supersedes and replaces the presentation requirements for reclassifications out of accumulated other comprehensive income in ASUs 2011-05 (issued in June 2011) and 2011-12 (issued in December 2011) for all public and private organizations. The amendments would require an entity to provide additional information about reclassifications out of accumulated other comprehensive income. ASU 2013-02 was effective for the Company beginning January 1, 2013 and did not have a significant impact on the Company’s financial statements.

**Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

Information called for by Item 3 is contained in the Liquidity and Interest Rate Sensitivity Management section of the Management’s Discussion and Analysis of Financial Condition and Results of Operations.

**Item 4. CONTROLS AND PROCEDURES**

The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of March 31, 2013, the Company's disclosure controls and procedures were effective.

There were no changes made in the Company's internal control over financial reporting that occurred during the Company's most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.
