011-30-210-452-8770

(Name, Telephone, E-mail and/or Facsimile number and Address of Company Contact Person)

Securities registered or to be registered pursuant to Section 12(b) of the Act:

Title of Each Class	Name of each exchange on which registered
Common Stock, par value \$0.001 per share	The NASDAQ Capital Market
Preferred Share Purchase Rights (attached to Common Stock)	The NASDAQ Capital Market

Securities registered or to be registered pursuant to Section 12(g) of the Act.

None
(Title of Class)

Edgar Filing: FREESEAS INC. - Form 20-F/A

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act:

None
(Title of Class)

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report. 1,362,830 common shares, par value \$0.001 per share, as of December 31, 2012.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
 Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934. Yes No

Note - Checking the box above will not relieve any registrant required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 from their obligations under those Sections.

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated filer Accelerated filer Non-accelerated filer

Edgar Filing: FREESEAS INC. - Form 20-F/A

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP International Financial reporting Standards as issued by the International Accounting Standards Board Other

If "Other" has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow. Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

EXPLANATORY NOTE

FreeSeas Inc. (“FreeSeas” or the “Company”) is filing this Amendment No. 1 on Form 20-F/A (the “Amended Filing”) to the Company’s Annual Report on Form 20-F for the year ended December 31, 2012 (the “Original Filing”) filed with the Securities and Exchange Commission (“SEC”) on April 19, 2013. In connection with a comment letter received from the SEC, the Company determined that certain disclosures in the Original Filing would need to be revised.

For the convenience of the reader, this Amended Filing sets forth the Original Filing as modified and superseded where necessary to reflect the restatement. The following items have been amended as a result of, and to reflect, the restatement:

Item 16F – Change in Registrant’s Certifying Accountant, to clarify the timing of the change of accountants in January 2013 and

Item 19 – Exhibits, to include a letter from Ernst & Young (Hellas) Certified Auditors Accountants S.A. and an updated letter from Sherb & Co., LLP.

In accordance with applicable SEC rules, this Amended Filing includes certifications from our Chief Executive Officer and Chief Financial Officer dated as of the date of this filing.

Except for the items noted above, no other information included in the Original Filing is being amended by this Amended Filing. The Amended Filing continues to speak as of the date of the Original Filing and, except as set forth in the sections indicated above, we have not updated the Original Filing to reflect events occurring subsequently to the date of the Original Filing. Accordingly, this Amended Filing should be read in conjunction with our filings made with the SEC subsequent to the filing of the Original Filing.

INTRODUCTION

FreeSeas Inc. is a Republic of the Marshall Islands company that is referred to in this annual report on Form 20-F, together with its subsidiaries, as “FreeSeas Inc.,” “FreeSeas,” “the Company,” “we,” “us,” or “our.”

We use the term “deadweight tons,” or “dwt,” in describing the capacity of our drybulk carriers. Dwt, expressed in metric tons, each of which is equivalent to 1,000 kilograms, refers to the maximum weight of cargo and supplies that a vessel can carry. Drybulk carriers are generally categorized as Handysize, Handymax, Panamax and Capesize. The carrying capacity of a Handysize drybulk carrier typically ranges from 10,000 to 39,999 dwt and that of a Handymax drybulk carrier typically ranges from 40,000 to 59,999 dwt. By comparison, the carrying capacity of a Panamax drybulk carrier typically ranges from 60,000 to 79,999 dwt and the carrying capacity of a Capesize drybulk carrier typically is 80,000 dwt and above.

Unless otherwise indicated:

All references to “\$” and “dollars” in this annual report are to U.S. dollars;

Financial information presented in this annual report is derived from financial statements for the fiscal year ended December 31, 2012 appearing elsewhere in this annual report; and

All references to dollar amounts in this annual report are expressed in thousands of U.S. dollars.

All share-related and per share information in this annual report have been adjusted to give effect to the one share for five share reverse stock split that was effective on October 1, 2010 and the one share for ten share reverse stock split that was effective on February 14, 2013.

This report should be read in conjunction with our audited consolidated financial statements and the accompanying notes thereto, which are included in Item 18 to this annual report.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This annual report contains certain forward-looking statements. These forward-looking statements include information about possible or assumed future results of our operations and our performance. Our forward-looking statements include, but are not limited to, statements regarding us or our management's expectations, hopes, beliefs, intentions or strategies regarding the future and other statements other than statements of historical fact. In addition, any statements that refer to projections, forecasts or other characterizations of future events or circumstances, including any underlying assumptions, are forward-looking statements. The words "anticipates," "forecasts," "believe," "continue," "could," "estimate," "expect," "intends," "may," "might," "plan," "possible," "potential," "predicts," "project," "should," "would" and similar expressions may identify forward-looking statements, but the absence of these words does not mean that a statement is not forward-looking. Forward-looking statements in this annual report may include, for example, statements about:

· our future operating or financial results;

· our financial condition and liquidity, including our ability to comply with our loan covenants, to repay our indebtedness and to continue as a going concern;

· potential liability from future litigation and incidents involving our vessels, including seizures by pirates, and our expected recoveries of claims under our insurance policies;

· our ability to comply with the continued listing standards on the exchange or trading market on which our common stock is listed for trading;

· our ability to find employment for our vessels;

· drybulk shipping industry trends, including charter rates and factors affecting vessel supply and demand;

· business strategy, areas of possible expansion, and expected capital spending or operating expenses and general and administrative expenses;

- the useful lives and value of our vessels;
- our ability to receive in full or partially our accounts receivable and insurance claims;
- greater than anticipated levels of drybulk vessel new building orders or lower than anticipated rates of drybulk vessel scrapping;
- changes in the cost of other modes of bulk commodity transportation;
- availability of crew, number of off-hire days, dry-docking requirements and insurance costs;
- changes in condition of our vessels or applicable maintenance or regulatory standards (which may affect, among other things, our anticipated dry-docking costs);
- competition in the seaborne transportation industry;
- global and regional economic and political conditions;
- fluctuations in currencies and interest rates;
- our ability to leverage to our advantage the relationships and reputation Free Bulkers S.A., our manager (“Manager”), has in the drybulk shipping industry;
- the overall health and condition of the U.S. and global financial markets;
- changes in seaborne and other transportation patterns;
- changes in governmental rules and regulations or actions taken by regulatory authorities;
- our ability to pay dividends in the future;
- acts of terrorism and other hostilities; and

other factors discussed in the section titled “Risk Factors” in this annual report.

The forward-looking statements contained in this annual report are based on our current expectations and beliefs concerning future developments and their potential effects on us. There can be no assurance that future developments affecting us will be those that we have anticipated. These forward-looking statements involve a number of risks, uncertainties (some of which are beyond our control) or other assumptions that may cause actual results or performance to be materially different from those expressed or implied by these forward-looking statements. These risks and uncertainties include, but are not limited to, those factors described under the heading “Risk Factors.” Should one or more of these risks or uncertainties materialize, or should any of our assumptions prove incorrect, actual results may vary in material respects from those projected in these forward-looking statements. We undertake no obligation to publicly update or revise any forward-looking statements contained in this annual report, or the documents to which we refer you in this annual report, to reflect any change in our expectations with respect to such statements or any change in events, conditions or circumstances on which any statement is based.

PART I**Item 1. Identity of Directors, Senior Management and Advisers**

Not required.

Item 2. Offer Statistics and Expected Timetable

Not required.

Item 3. Key Information**A. Selected Financial Data**

The selected consolidated financial information set forth below has been derived from our audited consolidated financial statements for the years ended December 31, 2012, 2011, 2010, 2009 and 2008. The information is only a summary and should be read in conjunction with our audited consolidated financial statements for the years ended December 31, 2012, 2011 and 2010 and notes thereto contained elsewhere herein. The financial results should not be construed as indicative of financial results for subsequent periods. See “Item 4. Information on the Company” and “Item 5. Operating and Financial Review and Prospects.”

	Year Ended December 31,				
	2012	2011	2010	2009	2008
Statement of Operations Data:					
Operating revenues	\$14,260	\$29,538	\$57,650	\$57,533	\$66,689

B. Capitalization and Indebtedness

Not required.

C. Reasons for the Offer and Use of Proceeds

Not required.

D. Risk Factors

The common shares of our company are considered speculative. Investing in our common shares involves a high degree of risk and uncertainty. You should carefully consider the following risks and uncertainties in addition to other information in this annual report in evaluating our company and our business before purchasing our common shares. Our business, operating or financial condition could be harmed due to any of the following risks.

Risk Factors Relating to FreeSeas

At December 31, 2012, FreeSeas' current liabilities exceeded its current assets, which could impair its ability to successfully operate its business and could have material adverse effects on its revenues, cash flows and profitability and its ability to comply with its debt covenants and pay its debt service and other obligations.

As a result of the historically low charter rates for drybulk vessels which have been affecting the Company for over three years, and the resulting material adverse impact on the Company's results from operations, the accompanying consolidated financial statements have been prepared on a going concern basis. The Company as of December 31, 2012 has cash and cash equivalents of \$29 and based on its cash flow projections for 2013, the Company will not be able to make scheduled debt repayments as of December 31, 2012, interest payments as well as cover operating expenses and capital expenditure requirements for at least twelve months from the balance sheet date.

The Company has incurred net losses of \$30,888, \$88,196 and \$21,821 during the years ended December 31, 2012, 2011 and 2010, respectively. As of December 31, 2012 and 2011, the Company had working capital deficits of \$70,973 and \$47,186, respectively. All of the above raises substantial doubt regarding the Company's ability to continue as a going concern. Management plans to continue to provide for its capital requirements by issuing additional equity securities and debt in addition to executing their business plan. The Company's ability to continue as a going concern is dependent upon its ability to obtain the necessary financing to meet its obligations and repay its liabilities arising from normal course of business operations when they come due and to generate profitable operations in the future.

In addition, the Company has undertaken negotiations with each of its lenders to restructure its debt repayments. On May 31, 2012, the Company and Credit Suisse AG, or Credit Suisse entered into a Sixth Supplemental Agreement to its Facility Agreement with Credit Suisse, which provided for, among other things, a deferral of principal payments until March 31, 2014. On September 7, 2012, the Company entered into an amended and restated facility with Deutsche Bank Nederland N.V. or Deutsche Bank, which provides for, among other things, a reduction in and deferral of the balloon payment due on facility B from November 2012 to December 2015, a reduction in the amount of principal repayment and amendments to the financial covenants.

In February, March, April, November and December 2012 and January 2013, the Company received notifications from FBB that the Company is in default under its loan agreements as a result of the breach of certain covenants and the failure to pay principal and interest due under the loan agreements. The Company is seeking and will continue to seek similar restructured loan terms from FBB. Also the Company did not pay the monthly repayments of \$20 for each of Facility A and Facility B with Deutsche Bank along with accrued interest due in October, November and December 2012 and January, February and March 2013. As well in February, March and April 2013, the Company did not pay the interest due of \$124 and the interest rate swaps due of \$80, respectively, with the Credit Suisse facility. The Company is in discussions with both banks to reach a mutually beneficial agreement. If the Company is not able to reach agreement with FBB as to restructured loan terms, or if the Company is unable to comply with its restructured loan terms, this could lead to the acceleration of the outstanding debt under its debt agreements. The Company's failure to satisfy its covenants under its debt agreements, and any consequent acceleration and cross acceleration of its outstanding indebtedness would have a material adverse effect on the Company's business operations, financial condition and liquidity.

The Company is currently exploring several alternatives aiming to manage its working capital requirements and other commitments if current market charter hire rates remain at current low levels, including completion of the negotiations for the restructuring of its loan with FBB, offerings of common stock through structured financing agreements, disposition of certain vessels in its current fleet and additional reductions in operating and other costs.

Generally accepted accounting principles require that long-term debt be classified as a current liability when a covenant violation gives the lender the right to call the debt at the balance sheet date, absent a waiver. As a result of the cross default provisions in the Company's loan agreements, actual breaches existing under its credit facility with FBB could result in defaults under all of the Company's affected debt and the acceleration of such debt by its lender. Accordingly, as of December 31, 2012, the Company was required to reclassify its long term debt and derivative financial instrument liability (interest rate swaps) as current liabilities on its consolidated balance sheet since the Company had not received waivers in respect of the breaches discussed above at such time.

We received a report from our independent registered public accounting firm with an explanatory paragraph for the year ended December 31, 2012 with respect to our ability to continue as a going concern. The existence of such a report may adversely affect our stock price and our ability to raise capital. There is no assurance that we will not receive a similar report for our year ended December 31, 2013.

In their report dated April 19, 2013, our independent registered public accounting firm expressed substantial doubt about our ability to continue as a going concern as we have incurred recurring operating losses, have a working capital deficiency, have failed to meet scheduled payment obligations under our loan facilities and have not complied with certain covenants included in our loan agreements with banks. We have also failed to make required payments to Deutsche Bank as agreed to in our September 7, 2012 amended and restated facility agreement and received notices of default from FBB. Furthermore, if we were forced to liquidate our assets, the amount realized could be substantially lower than the carrying value of these assets. Our ability to continue as a going concern is subject to our ability to obtain necessary funding from outside sources, including obtaining additional funding from the sale of our securities, obtaining loans from various financial institutions or lenders where possible and restructuring outstanding debt obligations that are currently in default. Our continued net operating losses increase the difficulty in meeting such goals and there can be no assurances that such methods will prove successful.

We have been in breach of certain loan covenants contained in our loan agreements. Although we have entered into amendments to two of our loan facilities, if we are not successful in obtaining a waiver and amendment from our other lender with respect to covenants breached, our lenders may declare an event of default and accelerate our outstanding indebtedness under the relevant agreement, which would impair our ability to continue to conduct our business, which raises substantial doubt about our ability to continue as a going concern.

Our loan agreements require that we comply with certain financial and other covenants. As a result of the drop in our drybulk asset values we were not in compliance with the FBB facility covenants relating to vessel values as of December 31, 2012. In addition, we were in breach of interest cover ratios, leverage and minimum liquidity covenants with the FBB facility not previously waived. A violation of these covenants constitutes an event of default under our credit facility, which would, unless waived by our lender, provide our lender with the right to require us to post additional collateral, increase our interest payments and/or pay down our indebtedness to a level where we are in compliance with our loan covenants. Furthermore, our lender may accelerate our indebtedness and foreclose their liens on our vessels, in which case our vessels may be auctioned or otherwise transferred which would impair our ability to continue to conduct our business. As a result of these breaches, our total indebtedness is presented within current liabilities in the December 31, 2012 consolidated balance sheet.

Pursuant to letter agreements dated September 6, 2011 and September 19, 2011 with Credit Suisse, which resolved a default by us under the Credit Suisse facility agreement, FreeSeas agreed to execute a sale contract in respect of either of the M/V *Free Jupiter* or the M/V *Free Lady* no later than October 10, 2011. On November 8, 2011, FreeSeas sold the M/V *Free Lady* for a sale price of \$21.9 million. Pursuant to the Fifth Supplemental Agreement dated November 7, 2011 with Credit Suisse, FreeSeas agreed to enter into a period time charter of at least 12 months for all its mortgaged vessels no later than December 31, 2011, which charter would cover the vessel's debt service plus \$1.0

million. If the foregoing time charter was not entered into by the required date, FreeSeas agreed that it would sell either the M/V *Free Jupiter* or both the M/V *Free Goddess* and the M/V *Free Hero* by January 31, 2012. FreeSeas did not conclude any time charter agreement or any agreement for the sale of the above-mentioned vessels. On May 31, 2012, FreeSeas and Credit Suisse entered into a Sixth Supplemental Agreement to its Facility Agreement with Credit Suisse, which provided for, among other things, a deferral of principal payments until March 31, 2014. On September 7, 2012, FreeSeas entered into an amended and restated facility with Deutsche Bank, which provide for, among other things, a reduction in and deferral of the balloon payment due on facility B from November 2012 to December 2015, a reduction in the amount of principal repayment and amendments to the financial covenants.

In February, March, April, November and December 2012 and January 2013, FreeSeas received notifications from FBB that FreeSeas is in default under its loan agreements as a result of the breach of certain covenants and the failure to pay principal and interest due under the loan agreements. FreeSeas is seeking and will continue to seek similar restructured loan terms from FBB. Also the Company did not pay the monthly repayments of \$20 for each of Facility A and Facility B with Deutsche Bank along with accrued interest due in October, November and December 2012 and January, February and March 2013. As well in February and March and in April 2013, the Company did not pay the interest due of \$124 and the interest rate swaps due of \$80, respectively, with the Credit Suisse facility. The Company is in discussions with both banks to reach a mutually beneficial agreement.

If FreeSeas is not able to reach agreement with FBB as to restructured loan terms, or if FreeSeas is unable to comply with its restructured loan terms, as the case is with Deutsche Bank and Credit Suisse, this could lead to the acceleration of the outstanding debt under its debt agreements. FreeSeas' failure to satisfy its covenants under its debt agreements, and any consequent acceleration and cross acceleration of its outstanding indebtedness would have a material adverse effect on FreeSeas' business operations, financial condition and liquidity.

Our loan agreements contain covenants that may limit our liquidity and corporate activities.

If the drybulk market remains depressed or further declines, we may require further waivers and/or covenant amendments to our loan agreements relating to our compliance with certain covenants for certain periods of time. The waivers and/or covenant amendments may impose additional operating and financial restrictions on us and modify the terms of our existing loan agreements. Any such waivers or amendments, if needed, could contain such additional restrictions and might not be granted at all.

Our loan agreements require that we maintain certain financial and other covenants. The low drybulk charter rates and drybulk vessel values have previously affected, and may in the future affect, our ability to comply with these covenants. A violation of these covenants constitutes an event of default under our credit facilities and would provide our lenders with various remedies, including the right to require us to post additional collateral, enhance our equity and liquidity, withhold payment of dividends, increase our interest payments, pay down our indebtedness to a level where we are in compliance with our loan covenants, sell vessels in our fleet, or reclassify our indebtedness as current liabilities. Our lenders could also accelerate our indebtedness and foreclose their liens on our vessels. The exercise of any of these remedies could materially adversely impair our ability to continue to conduct our business. Moreover, our lenders may require the payment of additional fees, require prepayment of a portion of our indebtedness to them, accelerate the amortization schedule for our indebtedness and increase the interest rates they charge us on our outstanding indebtedness.

As a result of our loan covenants, our lenders have imposed operating and financial restrictions on us. These restrictions may limit our ability to:

- incur additional indebtedness;
- create liens on our assets;
- sell capital stock of our subsidiaries;
- make investments;
- engage in mergers or acquisitions;
- pay dividends;

make capital expenditures;

change the management of our vessels or terminate or materially amend our management agreements; and

sell our vessels.

The amended and restated credit agreement dated September 7, 2012 with Deutsche Bank does not allow us to pay dividends without their prior written approval, such approval not to be unreasonably withheld. In addition, the Sixth Supplemental agreement dated May 31, 2012 with Credit Suisse does allow us to pay dividends after March 31, 2014 provided: i) that at the time of such payment no default has occurred or would occur as a result of such payment; ii) at the time of such payment the market value of the aggregate fair market value of the financed vessels is not less than 135% of the outstanding loan balance at such time plus the swap exposure minus the aggregate amount, if any, standing to the credit of the operating accounts, the retention account and any bank accounts of the Company opened with the bank; iii) between May 31, 2012 and the date of such payment of dividend or distribution, a part of the loan which is not less than \$11,300 has been prepaid and a part of the commitment which is not less than \$11,300 has been permanently reduced; and iv) the amount of such dividends in respect of a financial year does not exceed 50% of the consolidated net profit of the Company for that financial year. If we need covenant waivers, our lenders may impose additional restrictions and may require the payment of additional fees, require prepayment of a portion of our indebtedness to them, accelerate the amortization schedule for our indebtedness, and increase the interest rates they charge us on our outstanding indebtedness. We may be required to use a significant portion of the net proceeds from any future capital raising to repay a portion of our outstanding indebtedness. We agreed with Credit Suisse and Deutsche Bank to raise no less than \$25.0 million by March 31, 2014, one third of which amount will be used to repay our existing debt. This provision does not apply to the proceeds from sales of our common stock under equity line facilities. These potential restrictions and requirements may limit our ability to pay dividends to you, finance our future operations, make acquisitions or pursue business opportunities.

Once the payment reductions and holidays agreed to by two of our three lenders expire, we will again be obligated to make significant payments to service our debt.

As a result of amendments to our loan facilities agreed to this year with Credit Suisse, and Deutsche Bank, we have substantially reduced our current debt repayment obligations. These amendments provide for deferred principal repayments until June 30, 2014, for the Credit Suisse facility, and reduced payments until May 31, 2013 and then a deferral of further payments until June 30, 2014 for Deutsche Bank. Following these deferral periods, however, our payment obligations increase significantly and we will have balloon payments due in December 2015 under the Credit Suisse facility and the Deutsche Bank facilities. These required payments will limit funds otherwise available for working capital, capital expenditures and other purposes. Our inability to service our debt could lead to acceleration of our debt and foreclosures of our fleet. We may not be able to generate cash flow in amounts that are sufficient for these purposes.

We depend upon a few significant customers for a large part of our revenues. The loss of one or more of these customers could adversely affect our financial performance.

We have historically derived a significant part of our revenue from a small number of charterers. During 2012, we derived approximately 42% of our gross revenue from three charterers, and during 2011, we derived approximately 53% of our gross revenues from three charterers. If we do remain dependent, in large part, on a small number of charterers, if one or more of our charterers is unable to perform under one or more charters with us, if we are not able to find appropriate replacement charterers, or if a charterer exercises certain rights to terminate its charter, we could suffer a loss of revenues that could materially adversely affect our business, financial condition and results of operations.

The international drybulk shipping industry is highly competitive, and we may not be able to compete successfully for charters with new entrants or established companies with greater resources.

We employ our vessels in a highly competitive market that is capital intensive and highly fragmented. Competition arises primarily from other vessel owners, some of which have substantially greater resources than we do. Competition for the transportation of drybulk cargo by sea is intense and depends on price, customer relationships, operating expertise, professional reputation and size, age, location and condition of the vessel. Due in part to the highly fragmented market, additional competitors with greater resources could enter the drybulk shipping industry and operate larger fleets through consolidations or acquisitions and may be able to offer lower charter rates than we are able to offer, which could have a material adverse effect on our fleet utilization and, accordingly, our profitability.

We currently rely on our Manager to manage and charter our fleet.

We currently have no employees and contract all of our financial, accounting, including our financial reporting and internal controls, and other back-office services, and the management of our fleet, including crewing, maintenance and repair, through Free Bulkers, S.A., our Manager. We rely on our Manager to provide the technical management of our fleet and to attract charterers and charter brokers. The loss of its services or failure to perform its obligations could reduce our revenues and net income and adversely affect our operations and business if we are not able to contract with other companies to provide these services or take over these aspects of our business directly. FreeSeas has no control over our Manager. Our Manager is not liable to us for any losses or damages, if any, that may result from its management of our fleet unless the same shall have resulted from willful misconduct or gross negligence of our Manager or any person to whom performance of the management services has been delegated by our Manager. Pursuant to its agreement with us, our Manager's liability for such acts, except in certain limited circumstances, may not exceed ten times the annual management fee payable by the applicable subsidiary to our Manager. Although we may have rights against our Manager, if our Manager defaults on its obligations to us, we may have no recourse against our Manager. Further, we will need approval from our lenders if we intend to replace our Manager as our fleet manager.

We and one of our executive officers have affiliations with our Manager that could create conflicts of interest detrimental to us.

Our Chairman, Chief Executive Officer and President, Ion G. Varouxakis, is also the controlling shareholder and officer of our Manager. These dual responsibilities of our officer and the relationships between the two companies could create conflicts of interest between our Manager and us. Each of our operating subsidiaries has a nonexclusive management agreement with our Manager. Although our Manager currently serves as manager for vessels owned by us, our Manager is not restricted from entering into management agreements with other competing shipping companies. Our Manager could also allocate charter and/or vessel purchase and sale opportunities to others. There can be no assurance that our Manager would resolve any conflicts of interest in a manner beneficial to us.

Management and service fees are payable to our Manager, regardless of our profitability, which could have a material adverse effect on our business, financial condition and results of operations.

The management and service fees due from us to our Manager are payable whether or not our vessels are employed, and regardless of our profitability. We have no ability to require our Manager to reduce the management fees and service fees if our profitability decreases, which could have a material adverse effect on our business, financial condition and results of operations.

Our Manager is a privately held company, and there is little or no publicly available information about it.

The ability of our Manager to continue providing services for our benefit will depend in part on its own financial strength. Circumstances beyond our control could impair our Manager's financial strength. Because our Manager is privately held, it is unlikely that information about its financial strength would become public or available to us prior to any default by our Manager under the management agreement. As a result, an investor in us might have little advance warning of problems that affect our Manager, even though those problems could have a material adverse effect on us.

As part of its services to us, our Manager must continue to upgrade its operational, accounting and financial systems, and add more staff. If our Manager cannot upgrade these systems or recruit suitable additional employees, its services to us and, therefore, our performance may suffer.

Our current operating, internal control, accounting and financial systems are provided by our Manager and may not be adequate if our Manager's efforts to improve those systems may be ineffective. If our Manager cannot continue to upgrade its operational and financial systems effectively or recruit suitable employees, its services to us and, therefore, our performance may suffer and our ability to expand our business further will be restricted.

We and our Manager may be unable to attract and retain key executive officers with experience in the shipping industry, which may reduce the effectiveness of our management and lower our results of operations.

Our success depends to a significant extent upon the abilities and efforts of our and our Manager's executive officers. The loss of any of these individuals could adversely affect our business prospects and financial condition. Our success will depend on retaining these key members of our and our Manager's management team. Difficulty in retaining our executive officers, and difficulty in our Manager retaining its executive officers, could adversely affect our results of operations and ability to pay dividends. We do not maintain "key man" life insurance on any of our officers.

We intend to continue to charter most of our vessels in the spot market, and as a result, we will be exposed to the cyclical and volatility of the spot charter market.

Since we intend to continue to charter our vessels in the spot market, we will be exposed to the cyclical and volatility of the spot charter market, and we may not have long term, fixed time charter rates to mitigate the adverse effects of downturns in the spot market. Handysize and Handymax vessels, which we currently operate, have been less volatile compared to larger vessels such as Panamax and Capesize vessels but this may discontinue in the future. We cannot assure you that we will be able to successfully charter our vessels in the future at rates sufficient to allow us to meet our obligations. The supply and demand for shipping capacity strongly influences freight rates. Because the factors affecting the supply and demand for vessels are outside of our control and are unpredictable, the nature, timing, direction and degree of changes in industry conditions are also unpredictable.

Factors that influence demand for drybulk vessel capacity include:

- demand for and production of drybulk products;
- global and regional economic and political conditions including developments in international trade, fluctuations in industrial and agricultural production and armed conflicts;
- the distance drybulk cargo is to be moved by sea;
- environmental and other regulatory developments; and
 - changes in seaborne and other transportation patterns.
- The factors that influence the supply of drybulk vessel capacity include:

- the number of newbuilding deliveries;

- port and canal congestion;

- the scrapping rate of older vessels;

- vessel casualties; and

- the number of vessels that are out of service, i.e., laid-up, drydocked, awaiting repairs or otherwise not available for hire.

In addition to the prevailing and anticipated freight rates, factors that affect the rate of newbuilding, scrapping and laying-up include newbuilding prices, secondhand vessel values in relation to scrap prices, costs of bunkers and other operating costs, costs associated with classification society surveys, normal maintenance and insurance coverage, the efficiency and age profile of the existing fleet in the market and government and industry regulation of maritime transportation practices, particularly environmental protection laws and regulations. These factors influencing the supply of and demand for shipping capacity are outside of our control, and we may not be able to correctly assess the nature, timing and degree of changes in industry conditions.

We anticipate that the future demand for our drybulk carriers will be dependent upon economic growth in the world's economies, including China, Japan and India, seasonal and regional changes in demand, changes in the capacity of the global drybulk carrier fleet and the sources and supply of drybulk cargo to be transported by sea. The capacity of the global drybulk carrier fleet seems likely to increase, and we can provide no assurance as to the timing or extent of future economic growth. Adverse economic, political, social or other developments could have a material adverse effect on our business, results of operations, cash flows and financial condition. Should the drybulk market strengthen significantly in the future, we may enter into medium to long term employment contracts for some or all of our vessels.

With the exemption of the M/V *Free Goddess*, M/V *Free Impala* and the M/V *Free Maverick*, we currently employ our vessels in the spot market, all with charters scheduled to expire within one to two months, by which time we will have to negotiate new employment for these vessels. If the rates in the charter market fall significantly throughout 2013, it will affect the charter revenue we will receive from our vessels, which would have an adverse effect on our revenues, cash flows and profitability, as well as our ability to comply with our debt covenants.

When our charters in the spot market end, we may not be able to replace them promptly, and any replacement charters could be at lower charter rates, which may materially, adversely affect our earnings and results of operations.

We will generally attempt to recharter our vessels at favorable rates with reputable charterers. All of our vessels currently operate in the spot market. If the drybulk shipping market is in a period of depression when our vessels' charters expire, it is likely that we may be forced to re-charter them at reduced rates, if such charters are available at all. In the event charter rates fall below our costs to operate a vessel or for any other strategic or operational matter, we may determine not to recharter a vessel until such time as the charter rates increase or such strategic or operational matter ceases to exist. We cannot assure you that we will be able to obtain new charters at comparable or higher rates or with comparable charterers, that we will be able to obtain new charters at all or that we may decide not to charter a vessel at all. The charterers under our charters have no obligation to renew or extend the charters. We will generally attempt to recharter our vessels at favorable rates with reputable charterers as our charters expire. Failure to obtain replacement charters at rates comparable to our existing charters and our decision not to charter vessels will reduce or eliminate our revenue and will adversely affect our ability to service our debt. Further, we may have to incur lay-up expenses or reposition our vessels without cargo or compensation to deliver them to future charterers or to move vessels to areas where we believe that future employment may be more likely or advantageous. Laying up expenses and reactivating expenses would increase our vessel operating expenses. Repositioning our vessels would increase our vessel operating costs. If any of the foregoing events were to occur, our revenues, net income and earnings may be materially adversely affected.

Further declines in charter rates and other market deterioration could cause us to incur impairment charges.

We evaluate the recoverable amounts of our vessels to determine if events have occurred that would require an impairment of their carrying amounts. The recoverable amount of vessels is reviewed based on events and changes in circumstances that would indicate that the carrying amount of the assets might not be recovered. The review for potential impairment indicators and future undiscounted net operating cash flows related to the vessels is complex and requires us to make various estimates including future charter rates and earnings from the vessels which have been historically volatile.

When our estimate of future undiscounted net operating cash flows for any vessel is lower than the vessel's carrying value, the carrying value is written down, by recording a charge to operations, to the vessel's fair market value if the fair market value is lower than the vessel's carrying value. The carrying values of our vessels may not represent their fair market value because the market prices of secondhand vessels tend to fluctuate with changes in charter rates and the cost of newbuildings. Any impairment charges incurred as a result of declines in charter rates could have a material adverse effect on our business, results of operations, cash flows and financial condition.

Our charterers may terminate or default on their charters, which could adversely affect our results of operations and cash flow.

The ability of each of our charterers to perform its obligations under a charter will depend on a number of factors that are beyond our control. These factors may include general economic conditions, the condition of the drybulk shipping industry, the charter rates received for specific types of vessels, hedging arrangements, the ability of charterers to obtain letters of credit from its customers, cash reserves, cash flow considerations and various operating expenses. Many of these factors impact the financial viability of our charterers. Charterers may not pay or may attempt to renegotiate charter rates. Should a charterer fail to honor its obligations under its agreement with us, it may be difficult for us to secure substitute employment for the affected vessel, and any new charter arrangements we secure in the spot market or on a time charter may be at lower rates.

We lose a charterer or the benefits of a charter if a charterer fails to make charter payments because of its financial inability, disagreements with us or otherwise, terminates the charter because we fail to deliver the vessel within the time specified in the charter, the vessel is lost or damaged beyond repair, there are serious deficiencies in the vessel or prolonged periods of off-hire, default under the charter or the vessel has been subject to seizure for more than a specified number of days.

The M/V *Free Jupiter* was on time charter with Korea Line Corp, or KLC, a South Korean company, from June 8, 2007 until she was re-delivered to us on February 22, 2011. KLC made several unilateral deductions from hire payments during the three-year course of the time charter, and no hire was received from KLC from February 8, 2011 until the actual redelivery of the vessel on February 22, 2011. The Company commenced arbitration proceedings against KLC, and has taken action to obtain security, including the arrest of KLC assets. As a result, the Company obtained third-party security in the amount of \$1.68 million (which includes provision for interest and legal costs) in the form of a letter of undertaking from KLC's P&I club covering KLC's unilateral deductions from the hire. The Company also obtained cash security held in escrow in the amount of \$182 from the execution of a lien on sub-hires. KLC has counterclaimed by way of set-off, alleging that KLC is entitled to retain the amount of hire that was deducted because of the Company's alleged breach of charterparty. The Company denies these allegations and continues to assert its claim to recover the full amount deducted by KLC. On January 25, 2011, KLC announced that it had filed a petition for the rehabilitation proceeding for court receivership in the Seoul Central District Court, and the court approved and confirmed a rehabilitation plan. Upon the issuance of the final award of the arbitration tribunal, and for any amount in excess of the third-party security and cash security, the Company may participate in the approved rehabilitation plan. On January 17, 2012, the Company obtained an interim award under which it was

awarded the part of the claim that KLC had admitted was undisputed, \$832, plus interest, legal costs, and the cost of the tribunal. Following the interim award, the Company received approximately \$335. The majority of the balance of \$511 that has been awarded is unsecured. The Company is considering its options if KLC does not pay the balance, including the possibility of pursuing this in the Korean rehabilitation proceedings, where the hearing of the Company's claim has been stayed pending the outcome of the London arbitration. The Company believes that, if the Korean claim succeeds, the Company should make a recovery in accordance with the rehabilitation plan, which has been approved by the Korean court. The Company intends to seek a further award (if this matter does not settle) for the disputed balance, which is adequately secured. Despite above actions, the Company wrote-off the remaining outstanding balance \$1,173 of the KLC time charter which is included in "Provision and write-offs of insurance claims and bad debts" of the accompanying consolidated financial statements for the year ended December 31, 2012.

If our charterers fail to meet their obligations to us, we would experience material adverse effects on our revenues, cash flows and profitability and our ability to comply with our debt covenants and pay our debt service and other obligations. The actual or perceived credit quality of our charterers, and any defaults by them, may materially affect our ability to obtain the additional debt financing that we will require to acquire additional vessels or may significantly increase our costs of obtaining such financing. Our inability to obtain additional financing at all, or at a higher than anticipated cost, may materially impair our ability to implement our business strategy.

Charter rates are subject to seasonal fluctuations, which may adversely affect our operating results.

Our fleet consists of Handysize and Handymax drybulk carriers that operate in markets that have historically exhibited seasonal variations in demand and, as a result, in charter rates. This seasonality may result in quarter-to-quarter volatility in our operating results. The energy markets primarily affect the demand for coal, with increases during hot summer periods when air conditioning and refrigeration require more electricity and towards the end of the calendar year in anticipation of the forthcoming winter period. Grain shipments are driven by the harvest within a climate zone. Because three of the five largest grain producers (the United States, Canada and the European Union) are located in the northern hemisphere and the other two (Argentina and Australia) are located in the southern hemisphere, harvests occur throughout the year and grains require drybulk shipping accordingly. As a result of these and other factors, the drybulk shipping industry is typically stronger in the fall and winter months. Therefore, we expect our revenues from our drybulk carriers to be typically weaker during the fiscal quarters ending June 30 and September 30 and, conversely, we expect our revenues from our drybulk carriers to be typically stronger in fiscal quarters ending December 31 and March 31. Seasonality in the drybulk industry could materially affect our operating results.

The aging of our fleet may result in increased operating costs in the future, which could adversely affect our ability to operate our vessels profitably.

The majority of our vessels were acquired second-hand, and we estimate their useful lives to be 28 years from their date of delivery from the yard, depending on various market factors and management's ability to comply with government and industry regulatory requirements. As of December 31, 2012, the average age of the vessels in our current fleet was 15 years. Part of our business strategy includes the continued acquisition of second hand vessels when we find attractive opportunities.

In general, expenditures necessary for maintaining a vessel in good operating condition increase as a vessel ages. Second hand vessels may also develop unexpected mechanical and operational problems despite adherence to regular survey schedules and proper maintenance. Cargo insurance rates also tend to increase with a vessel's age, and older vessels tend to be less fuel-efficient than newer vessels. While the difference in fuel consumption is factored into the freight rates that our older vessels earn, if the cost of bunker fuels were to increase significantly, it could disproportionately affect our vessels and significantly lower our profits. In addition, changes in governmental regulations, safety or other equipment standards may require:

- expenditures for alterations to existing equipment;

- the addition of new equipment; or

- restrictions on the type of cargo a vessel may transport.

We cannot give assurances that future market conditions will justify such expenditures or enable us to operate our vessels profitably during the remainder of their economic lives.

Although we inspect the secondhand vessels that we acquire prior to purchase, this inspection does not provide us with the same knowledge about a vessel's condition and the cost of any required (or anticipated) repairs that we would have had if this vessel had been built for and operated exclusively by us. Generally, we do not receive the benefit of warranties on secondhand vessels.

Unless we set aside reserves or are able to borrow funds for vessel replacement, at the end of a vessel's useful life our revenue will decline, which would adversely affect our business, results of operations and financial condition.

Unless we maintain reserves or are able to borrow or raise funds for vessel replacement, we may be unable to replace the vessels in our fleet upon the expiration of their useful lives, which we expect to be 28 years from their date of delivery from the yard. Our cash flows and income are dependent on the revenues earned by the chartering of our vessels to customers. If we are unable to replace the vessels in our fleet upon the expiration of their useful lives, our business, results of operations, financial condition and ability to pay dividends will be materially and adversely affected. Any reserves set aside for vessel replacement may not be available for dividends.

If any of our vessels fail to maintain their class certification and/or fail any annual survey, intermediate survey, dry-docking or special survey, that vessel would be unable to carry cargo, thereby reducing our revenues and profitability and violating certain loan covenants of our third-party indebtedness.

The hull and machinery of every commercial vessel must be classed by a classification society authorized by its country of registry. The classification society certifies that a vessel is safe and seaworthy in accordance with the applicable rules and regulations of the country of registry of the vessel and the Safety of Life at Sea Convention, or SOLAS.

A vessel must undergo annual surveys, intermediate surveys, dry-dockings and special surveys. In lieu of a special survey, a vessel's machinery may be on a continuous survey cycle, under which the machinery would be surveyed periodically over a five-year period. Our vessels are on special survey cycles for hull inspection and continuous survey cycles for machinery inspection. Every vessel is also required to be dry-docked every two to three years for inspection of the underwater parts of such vessel.

If any vessel does not maintain its class and/or fails any annual survey, intermediate survey, dry-docking or special survey, the vessel will be unable to carry cargo between ports and will be unemployable and uninsurable, thereby reducing our revenues and profitability. That could also cause us to be in violation of certain covenants in our loan agreements. In addition, the cost of maintaining our vessels' classifications may be substantial at times and could result in reduced revenues.

Our vessels may suffer damage and we may face unexpected dry-docking costs, which could affect our cash flow and financial condition.

If our vessels suffer damage, they may need to be repaired at a dry-docking facility, resulting in vessel downtime and vessel off-hire. The costs of dry-dock repairs are unpredictable and can be substantial. We may have to pay dry-docking costs that our insurance does not cover. The inactivity of these vessels while they are being repaired and repositioned, as well as the actual cost of these repairs, would decrease our earnings. In addition, space at dry-docking facilities is sometimes limited and not all dry-docking facilities are conveniently located. We may be unable to find space at a suitable dry-docking facility or we may be forced to move to a dry-docking facility that is not conveniently located to our vessels' positions. The loss of earnings while our vessels are forced to wait for space or to relocate to dry-docking facilities that are farther away from the routes on which our vessels trade would also decrease our earnings.

Our growth depends on the growth in demand for and the shipping of drybulk cargoes.

Our growth strategy focuses on the drybulk shipping sector. Accordingly, our growth depends on growth in world and regional demand for and the shipping of drybulk cargoes, which could be negatively affected by a number of factors, such as declines in prices for drybulk cargoes or general political and economic conditions.

Reduced demand for and the shipping of drybulk cargoes would have a material adverse effect on our future growth and could harm our business, results of operations and financial condition. In particular, Asian Pacific economies and India have been the main driving force behind the past increase in seaborne drybulk trade and the demand for drybulk carriers. The negative change in economic conditions in any Asian Pacific country, but particularly in China or Japan, as well as India, may have a material adverse effect on our business, financial condition and results of operations, as well as our future prospects, by further reducing demand and resultant charter rates.

If we fail to manage our growth properly, we may not be able to successfully expand our market share.

We will continue exploring expansion opportunities as our financial resources permit. Our growth will depend on:

- locating and acquiring suitable vessels;
- placing newbuilding orders and taking delivery of vessels;

- identifying and consummating acquisitions or joint ventures;
- integrating any acquired vessel successfully with our existing operations;
- enhancing our customer base;
- managing our expansion; and
- obtaining the required financing.

If our financial resources permit, we could face risks in connection with growth by acquisition, such as undisclosed liabilities and obligations and difficulty experienced in obtaining additional qualified personnel, managing relationships with customers and suppliers, and integrating newly acquired operations into existing infrastructures.

We cannot give any assurance that we will be successful in executing our growth plans or that we will not incur significant expenses and losses in connection with the execution of those growth plans.

Our ability to successfully implement our business plan depends on our ability to obtain additional financing, which may affect the value of your investment in us.

We plan to continue to explore expansion opportunities. We will require substantial additional financing to fund any acquisitions of additional vessels and to implement our business plan. We cannot be certain that sufficient financing will be available on terms that are acceptable to us or at all. If we cannot raise the financing we need in a timely manner and on acceptable terms, we may not be able to acquire the vessels necessary to implement our business plans and consequently you may lose some or all of your investment in us.

While we expect that a significant portion of the financing resources needed to acquire vessels, if any, will be through long-term debt financing, we may raise additional funds through additional equity offerings. New equity investors may dilute the percentage of the ownership interest of our existing shareholders. Sales or the possibility of sales of substantial amounts of shares of our common stock in the public markets could adversely affect the market price of our common stock.

If we acquire additional drybulk carriers and those vessels are not delivered on time or are delivered with significant defects, our earnings and financial condition could suffer.

We expect to acquire additional vessels in the future. A delay in the delivery of any of these vessels to us or the failure of the contract counterparty to deliver a vessel at all could cause us to breach our obligations under a related time charter and could adversely affect our earnings, our financial condition and the amount of dividends, if any, that we pay in the future. The delivery of these vessels could be delayed or certain events may arise which could result in us not taking delivery of a vessel, such as a total loss of a vessel, a constructive loss of a vessel, or substantial damage to a vessel prior to delivery. In addition, the delivery of any of these vessels with substantial defects could have similar consequences.

The market values of our vessels have declined and may further decrease, and we may incur losses when we sell vessels or we may be required to write down their carrying value, which may adversely affect our earnings and our ability to implement our fleet renewal program.

The market values of our vessels will fluctuate depending on general economic and market conditions affecting the shipping industry and prevailing charter hire rates, competition from other shipping companies and other modes of transportation, the types, sizes and ages of our vessels, applicable governmental regulations and the cost of newbuildings.

If a determination is made that a vessel's future useful life is limited or its future earnings capacity is reduced, it could result in an impairment of its carrying amount on our financial statements that would result in a charge against our earnings and the reduction of our shareholders' equity. If for any reason we sell our vessels at a time when prices have fallen, the sale price may be less than the vessels' carrying amount on our financial statements, and we would incur a loss and a reduction in earnings. During the year ended December 31, 2012, we incurred an impairment loss of \$12,480 due to expected sales of certain vessels.

We have incurred secured debt under loan agreements for all of our vessels. The market value of our vessels is based, in part, on charter rates and the stability of charter rates over a period of time. As a result of global economic conditions, volatility in charter rates, generally declining charter rates, and other factors, we have recently experienced

a decrease in the market value of our vessels. Due to the decline of the market value of our fleet, we were not in compliance with certain covenants of our existing loan agreements that relate to maintenance of asset values and, as a result, we may not be able to refinance our debt or obtain additional financing. There can be no assurances that charter rates will stabilize or increase, that the market value of our vessels will stabilize or increase or that we will regain compliance with the financial covenants in our loan agreements or that our lenders will agree to waivers or forbearances.

On November 8, 2011, we sold the M/V *Free Lady* for a sale price of \$21.9 million. If we fail to sell our other vessels currently held for sale (the M/V *Free Hero*, the M/V *Free Jupiter*, the M/V *Free Impala*, and the M/V *Free Neptune*), or fail to sell them at prices acceptable to us, it could have a material adverse effect on our competitiveness and business operations.

Maritime claimants could arrest our vessels, which could interrupt our cash flow.

Crew members, suppliers of goods and services to a vessel, shippers of cargo and other parties may be entitled to a maritime lien against a vessel for unsatisfied debts, claims or damages. In many jurisdictions, a maritime lien holder, such as our lenders, may enforce its lien by arresting a vessel through foreclosure proceedings. The arresting or attachment of one or more of our vessels could interrupt our cash flow and require us to pay large sums of funds to have the arrest lifted.

In addition, in some jurisdictions, such as South Africa, under the “sister ship” theory of liability, a claimant may arrest both the vessel which is subject to the claimant’s maritime lien and any “associated” vessel, which is any vessel owned or controlled by the same owner or managed by the same manager. Claimants could try to assert “sister ship” liability against one of our vessels for claims relating to another of our vessels or a vessel managed by our Manager.

On November 5, 2012, the M/V *Free Maverick* was arrested in Morocco in relation to claims against the M/V *Free Maverick* and “sister ships”. As a result, the M/V *Free Maverick* is idle pending a resolution with the creditors.

Economic conditions and regulatory pressures impacting banks in Greece may cause disruptions to one of our lenders, which may cause an increase in the cost of our borrowings from that lender.

One of our lenders is FBB, located in Greece. As a result of the recent financial crisis in Greece, Greek banks have been under significant pressure from the applicable banking regulators to increase capital, increase earnings or merge with other banks. There can be no assurances that our banking relationship with FBB would continue if FBB were to merge with another bank or that FBB might not attempt to invoke provisions in our loan agreement that permits it to pass along increases in its cost of regulations. In either event, our financial condition and results of operations could be materially adversely affected.

The smuggling of drugs or other contraband onto our vessels may lead to governmental claims against us.

We expect that our vessels will call in ports in South America and other areas where smugglers are known to attempt to hide drugs and other contraband on vessels, with or without the knowledge of crew members. To the extent our vessels are found with contraband, whether inside or attached to the hull of our vessel and whether with or without the knowledge of any of our crew, we may face governmental or other regulatory claims which could have an adverse effect on our business, results of operations, cash flows and financial condition.

Rising fuel prices may adversely affect our profits.

Upon redelivery of vessels at the end of a period time or trip time charter, we may be obligated to repurchase bunkers on board at prevailing market prices, which could be materially higher than fuel prices at the inception of the charter period. In addition, although we rarely deploy our vessels on voyage charters, fuel is a significant, if not the largest, expense that we would incur with respect to vessels operating on voyage charter. As a result, an increase in the price of fuel may adversely affect our profitability. The price and supply of fuel is volatile and fluctuates based on events outside our control, including geopolitical developments, supply and demand for oil and gas, actions by OPEC and other oil and gas producers, war and unrest in oil producing countries and regions, regional production patterns and environmental concerns and regulations.

We are subject to regulation and liability under environmental laws and the failure to comply with these regulations may subject us to increased liability, may adversely affect our insurance coverage and may result in a denial of access to, or detention in, certain ports. This could require significant expenditures and reduce our cash flows and net income.

Our business and the operation of our vessels are materially affected by government regulation in the form of international conventions and national, state and local laws and regulations in force in the jurisdictions in which the vessels operate, as well as in the country or countries of their registration, including those governing the management and disposal of hazardous substances and wastes, the cleanup of oil spills and other contamination, air emissions, and water discharges and ballast water management. We are also required by various governmental and quasi-governmental agencies to obtain certain permits, licenses and certificates with respect to our operations. Because such conventions, laws, regulations and permit requirements are often revised, or the required additional measures for compliance are still under development, we cannot predict the ultimate cost of complying with such conventions, laws, regulations or permit requirements, or the impact thereof on the resale prices or useful lives of our vessels. Additional conventions, laws and regulations may be adopted which could limit our ability to do business or increase the cost of our doing business and which may materially adversely affect our business, financial condition and results of operations.

Environmental requirements can also affect the resale prices or useful lives of our vessels or require reductions in cargo capacity, ship modifications or operational changes or restrictions. Failure to comply with these requirements could lead to decreased availability of or more costly insurance coverage for environmental matters or result in the denial of access to certain jurisdictional waters or ports, or detention in certain ports. Under local, national and foreign laws, as well as international treaties and conventions, we could incur material liabilities, including cleanup obligations and claims for natural resource, personal injury and property damages in the event that there is a release of petroleum or other hazardous materials from our vessels or otherwise in connection with our operations. The 2010 explosion of the Deepwater Horizon and the subsequent release of oil into the Gulf of Mexico or similar events may result in further regulation of the shipping industry, including modifications to statutory liability schemes.

The operation of our vessels is affected by the requirements set forth in the International Safety Management, or ISM Code. The failure of a shipowner or bareboat charterer to comply with the ISM Code may subject such party to increased liability, may decrease available insurance coverage for the affected vessels, and/or may result in a denial of access to, or detention in, certain ports.

The European Union is currently considering proposals to further regulate vessel operations. Individual countries in the European Union may also have additional environmental and safety requirements. It is difficult to predict what legislation or regulation, if any, may be adopted by the European Union or any other country or authority.

The International Maritime Organization or other regulatory bodies may adopt additional regulations in the future that could adversely affect the useful lives of our vessels as well as our ability to generate income from them or resell them at attractive prices.

The United States Oil Pollution Act of 1990, or OPA, established an extensive regulatory and liability regime for the protection and clean-up of the environment from oil spills. Under OPA, vessel owners, operators and bareboat charterers are “responsible parties” and are jointly, severally and strictly liable (unless the spill results solely from the act or omission of a third party, an act of God or an act of war) for all containment and clean-up costs and other damages arising from discharges or threatened discharges of oil from their vessels, including bunkers (fuel).

Violations of, or liabilities under, environmental or other applicable laws and regulations can result in substantial penalties, fines and other sanctions, including, in certain instances, seizure or detention of our vessels. Events of this nature could have a material adverse effect on our business, financial condition and results of operations.

Technological innovation related to existing or new vessels could reduce the competitiveness of our older vessels and therefore the value of such vessels in the chartering and secondhand resale markets.

The charter hire rates and the value and operational life of a vessel are determined by a number of factors, including the vessel’s efficiency, operational flexibility and physical life. Efficiency includes speed, fuel economy and the ability to load and discharge cargo quickly. Flexibility includes the ability to enter harbors, utilize related docking facilities and pass through canals and straits. The length of a vessel’s physical life is related to its original design and construction, its maintenance and the impact of the stress of operations. If new drybulk carriers are built that are more efficient or more flexible or have longer physical lives than our older vessels, competition from these more technologically advanced vessels could adversely affect the competitiveness of our older vessels, and, in turn, the amount of charter hire payments we receive for our older vessels once their initial charters expire, and the resale value of our older vessels could significantly decrease.

Our vessels are exposed to inherent operational risks that may not be adequately covered by our insurance.

The operation of any vessel includes risks such as mechanical failure, collision, fire, contact with floating objects, cargo or property loss or damage and business interruption due to political circumstances in foreign countries, piracy, terrorist attacks, armed hostilities and labor strikes. With a drybulk carrier, the cargo itself and its interaction with the ship can be a risk factor. By their nature, drybulk cargoes are often heavy, dense, easily shifted, and react badly to water exposure. In addition, drybulk carriers are often subjected to battering treatment during unloading operations with grabs, jackhammers (to pry encrusted cargoes out of the hold), and small bulldozers. This treatment may cause damage to the vessel. Vessels damaged due to treatment during unloading procedures may be more susceptible to

breach to the sea. Hull breaches in drybulk carriers may lead to the flooding of the vessels' holds. If a drybulk carrier suffers flooding in its forward holds, the bulk cargo may become so dense and waterlogged that its pressure may buckle the vessel's bulkheads leading to the loss of a vessel. If we are unable to adequately maintain our vessels we may be unable to prevent these events. Any of these circumstances or events could negatively impact our business, financial condition and results of operations.

Further, such occurrences could result in death or injury to persons, loss of property or environmental damage, delays in the delivery of cargo, loss of revenues from or termination of charter contracts, governmental fines, penalties or restrictions on conducting business, higher insurance rates and damage to our reputation and customer relationships generally. In the past, political conflicts have also resulted in attacks on vessels, mining of waterways and other efforts to disrupt international shipping, particularly in the Arabian Gulf region. Acts of terrorism and piracy have also affected vessels trading in regions such as the South China Sea and the Gulf of Aden and Indian Ocean off the coast of Somalia and Kenya. If these attacks and other disruptions result in areas where our vessels are deployed being characterized by insurers as "war risk" zones or Joint War Committee "war, strikes, terrorism and related perils" listed areas, as the Gulf of Aden currently is, premiums payable for such coverage could increase significantly and such insurance coverage may be more difficult or impossible to obtain. In addition, there is always the possibility of a marine disaster, including oil spills and other environmental damage. Although our vessels carry a relatively small amount of the oil used for fuel ("bunkers"), a spill of oil from one of our vessels or losses as a result of fire or explosion could be catastrophic under certain circumstances.

We may not be adequately insured against all risks, and our insurers may not pay particular claims. With respect to war risks insurance, which we usually obtain for certain of our vessels making port calls in designated war zone areas, such insurance may not be obtained prior to one of our vessels entering into an actual war zone, which could result in that vessel not being insured. Even if our insurance coverage is adequate to cover our losses, we may not be able to timely obtain a replacement vessel in the event of a loss. Under the terms of our credit facilities, we will be subject to restrictions on the use of any proceeds we may receive from claims under our insurance policies. Furthermore, in the future, we may not be able to maintain or obtain adequate insurance coverage at reasonable rates for our fleet. We may also be subject to calls, or premiums, in amounts based not only on our own claim records but also the claim records of all other members of the protection and indemnity associations through which we receive indemnity insurance coverage for tort liability. Our insurance policies also contain deductibles, limitations and exclusions which, although we believe are standard in the shipping industry, may nevertheless increase our costs in the event of a claim or decrease any recovery in the event of a loss. If the damages from a catastrophic oil spill or other marine disaster exceeded our insurance coverage, the payment of those damages could have a material adverse effect on our business and could possibly result in our insolvency.

In addition, we may not carry loss of hire insurance. Loss of hire insurance covers the loss of revenue during extended vessel off-hire periods, such as those that occur during an unscheduled drydocking due to damage to the vessel from accidents. Accordingly, any loss of a vessel or any extended period of vessel off-hire, due to an accident or otherwise, could have a material adverse effect on our business, financial condition and results of operations.

We may be subject to increased premium payments because we obtain some of our insurance through protection and indemnity associations.

We may be subject to increased premium payments, or calls, in amounts based not only on our and our Manager's claim records but also the claim records of other members of the protection and indemnity associations through which we receive insurance coverage for tort liability, including pollution-related liability. Our protection and indemnity associations may not have enough resources to cover claims made against them. Our payment of these calls could result in significant expense to us, which could have a material adverse effect on our business, results of operations, cash flows and financial condition.

Our operations expose us to global political risks, such as wars and political instability that may interfere with the operation of our vessels causing a decrease in revenues from such vessels.

We are an international company and primarily conduct our operations outside the United States. Changing economic, political and governmental conditions in the countries where we are engaged in business or where our vessels are registered will affect us. In the past, political conflicts, particularly in the Middle East, resulted in attacks on vessels, mining of waterways and other efforts to disrupt shipping in the area. For example, recent political and governmental instability in Egypt, Syria and Libya may affect vessels trading in such regions. In addition, future political and governmental instability, revolutions and wars in regions where our vessels trade could affect our trade patterns and adversely affect our operations by causing delays in shipping on certain routes or making shipping impossible on such routes, thereby causing a decrease in revenues.

During a period of war or emergency, a government could requisition for title or seize our vessels. Requisition for title occurs when a government takes control of a vessel and becomes the owner. A government could also requisition our vessels for hire, when a government takes control of a vessel and effectively becomes the charterer at dictated charter rates. Government requisition of one or more of our vessels could reduce our revenues and net income.

Because our seafaring employees are covered by collective bargaining agreements, failure of industry groups to renew those agreements may disrupt our operations and adversely affect our earnings.

All of the seafarers employed on the vessels in our fleet are covered by collective bargaining agreements that set basic standards. We cannot assure you that these agreements will prevent labor interruptions. Any labor interruptions could disrupt our operations and harm our financial performance.

Crew costs are a significant expense for us under our charters. Recently, the limited supply of and increased demand for well-qualified crew, due to the increase in the size of the global shipping fleet, has created upward pressure on crewing costs, which we generally bear under our period time and spot charters. Increases in crew costs may adversely affect our profitability.

Increases in interest rates would reduce funds available to purchase vessels and service debt.

We have purchased, and may purchase in the future, vessels with loans that provide for periodic interest payments based on indices that fluctuate with changes in market interest rates. If interest rates increase significantly, it would increase our costs of financing our acquisition of vessels, which could decrease the number of additional vessels that we could acquire and adversely affect our financial condition and results of operations and may adversely affect our ability to service debt.

The derivative contracts we have entered into to hedge our exposure to fluctuations in interest rates could result in higher than market interest rates and charges against our income.

We have entered into two interest rate swaps for purposes of managing our exposure to fluctuations in interest rates applicable to indebtedness under two of our credit facilities with Credit Suisse, which provide for a floating interest rate based on LIBOR. Our hedging strategies, however, may not be effective and we may incur substantial losses if interest rates move materially differently from the fixed rates agreed to in our derivative contracts. Since our existing interest rate swaps do not, and future derivative contracts may not, qualify for treatment as hedges for accounting purposes, we recognize fluctuations in the fair value of such contracts in our income statement. In addition, our financial condition could be materially adversely affected to the extent we do not hedge our exposure to interest rate fluctuations under our financing arrangements. Any hedging activities we engage in may not effectively manage our interest rate exposure or have the desired impact on our financial conditions or results of operations.

From time to time in the future, we may take positions in derivative instruments including freight forward agreements, or FFAs. FFAs and other derivative instruments may be used to hedge a vessel owner's exposure to the charter market by providing for the sale of a contracted charter rate along a specified route and period of time. Upon settlement, if the contracted charter rate is less than the average of the rates, as reported by an identified index, for the specified route and time period, the seller of the FFAs is required to pay the buyer an amount equal to the difference between the contracted rate and the settlement rate, multiplied by the number of days in the specified period. Conversely, if the contracted rate is greater than the settlement rate, the buyer is required to pay the seller the settlement sum. If we take positions in FFAs or other derivative instruments and do not correctly anticipate charter rate movements over the specified route and time period, we could suffer losses in the settling or termination of the FFA. This could adversely affect our results of operation and cash flow. As of the date of this annual report, we had no FFAs outstanding.

Because we generate all of our revenues in U.S. dollars but will incur a portion of our expenses in other currencies, exchange rate fluctuations could have an adverse impact on our results of operations.

We generate all of our revenues in U.S. dollars, but we expect that portions of our future expenses will be incurred in currencies other than the U.S. dollar. This difference could lead to fluctuations in our net income due to changes in the value of the dollar relative to the other currencies, in particular the Euro. Expenses incurred in foreign currencies against which the dollar falls in value can increase, decreasing net income. For the years ended December 31, 2012 and 2011, the fluctuation in the value of the dollar against foreign currencies did not have a material impact on us.

We may have to pay tax on United States source income, which would reduce our earnings.

Under the laws of the countries of our and our subsidiaries incorporation and/or vessels' registration, we are not subject to tax on international shipping income; however, we are subject to registration and tonnage taxes, which have been included in "Vessel operating expenses" in our consolidated statement of operations. Pursuant to the Internal Revenue Code of the United States, or the Code, U.S. source income from the international operations of ships is generally exempt from U.S. tax if the company operating the ships meets both of the following requirements, (1) more than 50% of the value of our stock is owned, directly or indirectly, by "qualified shareholders," which includes persons (i) who are "residents" of our country of organization or of another foreign country that grants an "equivalent exemption" to corporations organized in the United States, and (ii) who comply with certain documentation requirements, which we refer to as the "Qualified Shareholder Ownership Test," or (2) our stock is primarily and regularly traded on one or more established securities markets in our country of organization, in another country that grants an "equivalent exemption" to United States corporations, or in the United States, which we refer to as the "Publicly-Traded Test;" and we are not considered "closely held," which we refer to as the "Closely-Held Test;"

To complete the exemption process, our shipowning subsidiaries must file a U.S. tax return, state the basis of their exemption and obtain and retain documentation attesting to the basis of their exemptions. Our subsidiaries will complete the filing process for 2012 on or prior to the applicable tax filing deadline.

All of our ship-operating subsidiaries currently satisfy the Publicly-Traded Test based on the trading volume and the widely-held ownership of our common stock, but no assurance can be given that this will remain so in the future, since continued compliance with this rule is subject to factors outside our control. Based on our U.S. source Shipping Income for 2010, 2011 and 2012, we would be subject to U.S. federal income tax of approximately \$34, \$93 and \$25, respectively, in the absence of an exemption under Section 883.

U.S. tax authorities could treat us as a “passive foreign investment company,” which could have adverse U.S. federal income tax consequences to U.S. holders.

A foreign corporation will be treated as a “passive foreign investment company,” or PFIC, for U.S. federal income tax purposes if either (1) at least 75% of its gross income for any taxable year consists of certain types of “passive income” or (2) at least 50% of the average value of the corporation’s assets produce or are held for the production of those types of “passive income.” For purposes of these tests, “passive income” includes dividends, interest, and gains from the sale or exchange of investment property and rents and royalties other than rents and royalties which are received from unrelated parties in connection with the active conduct of a trade or business. For purposes of these tests, income derived from the performance of services does not constitute “passive income.” U.S. shareholders of a PFIC are subject to a disadvantageous U.S. federal income tax regime with respect to the income derived by the PFIC, the distributions they receive from the PFIC and the gain, if any, they derive from the sale or other disposition of their shares in the PFIC.

Based on our currently anticipated operations, we do not believe that we will be a PFIC with respect to any taxable year. In this regard, we intend to treat the gross income we derive or are deemed to derive from our time chartering activities as services income, rather than rental income. Accordingly, we believe that our time chartering activities does not constitute “passive income,” and the assets that we own and operate in connection with the production of that income do not constitute passive assets.

There is, however, no direct legal authority under the PFIC rules addressing our proposed method of operation, and a federal court decision has characterized income received from vessel time charters as rental rather than services income for U.S. tax purposes. Accordingly, no assurance can be given that the U.S. Internal Revenue Service, or IRS, or a court of law will accept our position, and there is a risk that the IRS or a court of law could determine that we are a PFIC. Moreover, no assurance can be given that we would not constitute a PFIC for any future taxable year if there were to be changes in the nature and extent of our operations.

If the IRS were to find that we are or have been a PFIC for any taxable year, our U.S. shareholders will face adverse U.S. tax consequences. Under the PFIC rules, unless those shareholders make an election available under the Code (which election could itself have adverse consequences for such shareholders), such shareholders would be liable to pay United States federal income tax at the then prevailing income tax rates on ordinary income plus interest upon excess distributions and upon any gain from the disposition of our common stock, as if the excess distribution or gain had been recognized ratably over the shareholder’s holding period of our common stock.

Risk Factors Relating to the Drybulk Shipping Industry

The international drybulk shipping industry is cyclical and volatile and charter rates have decreased significantly and may further decrease in the future, which may adversely affect our earnings, vessel values and results of operations.

The drybulk shipping industry is cyclical with volatility in charter hire rates and profitability. The degree of charter hire rate volatility among different types of drybulk vessels has varied widely. Since the middle of the third quarter of 2008, charter hire rates for drybulk vessels have decreased substantially, they may remain volatile for the foreseeable future and could continue to decline further. Additionally, charter rates have been particularly volatile during 2012 and have substantially decreased. As a result, our charter rates could further decline significantly, resulting in a loss and a reduction in earnings.

We anticipate that the future demand for our drybulk vessels will be dependent upon existing conditions in the world’s economies, seasonal and regional changes in demand, changes in the number of drybulk vessels being ordered and constructed, particularly if there is an oversupply of vessels, changes in the capacity of the global drybulk fleet and the

sources and supply of drybulk cargo to be transported by sea. Adverse economic, political, social or other developments could have a further material adverse effect on drybulk shipping in general and on our business and operating results in particular.

Our ability to re-charter our drybulk vessels upon the expiration or termination of their current time charters, the charter rates payable under any renewal or replacement charters will depend upon, among other things, the current state of the drybulk shipping market. If the drybulk shipping market is in a period of depression when our vessels' charters expire, it is likely that we may be forced to re-charter them at reduced rates, including rates whereby we incur a loss, which may reduce our earnings or make our earnings volatile.

In addition, because the market value of our vessels may fluctuate significantly, we may incur losses when we sell vessels, which may adversely affect our earnings. If we sell vessels at a time when vessel prices have fallen and before we have recorded an impairment adjustment to our financial statements, the sale may be at less than the vessel's carrying amount on our financial statements, resulting in a loss and a reduction in earnings.

The drybulk carrier charter market remains significantly below its high in the middle of 2008 and the average rates achieved in the four prior years, which has and may continue to adversely affect our revenues, earnings and profitability and our ability to comply with our loan covenants and repay our indebtedness.

The drybulk shipping industry is cyclical with attendant volatility in charter hire rates and profitability. The degree of charter hire rate volatility among different types of dry bulk vessels has varied widely; however, the continued downturn in the drybulk charter market has severely affected the entire dry bulk shipping industry and charter hire rates for drybulk vessels have declined significantly from historically high levels. The Baltic Dry Index (the "BDI"), which is published daily by the Baltic Exchange Limited, a London-based membership organization that provides daily shipping market information to the global investing community, is a daily average of charter rates in selected shipping routes measured on a time charter and voyage basis covering Handysize, Supramax, Panamax and Capesize drybulk carriers. The BDI has long been viewed as the main benchmark to monitor the movements of the dry bulk vessel charter market and the performance of the entire drybulk shipping market. The BDI declined 94% in 2008 from a peak of 11,793 in May 2008 to a low of 663 in December 2008 and remained volatile during 2009, ranging from a low of 772 in January 2009 to a high of 4,661 in November 2009. The BDI continued its volatility in 2010, 2011 and 2012, reaching a high of 4,209 in May 2010, and a low of 1,700 in July 2010, in 2011, ranging from a low of approximately 1,043 in February 2011 and a high of approximately 2,173 in October 2011 and in 2012, reaching a high of approximately 1,738 in January 2012 and a low of approximately 647 in February 2012.

As of April 4, 2013, the BDI had risen to 866. The decline and volatility in charter rates has been due to various factors, including the lack of trade financing for purchases of commodities carried by sea, which had resulted in a significant decline in cargo shipments. The decline and volatility in charter rates in the drybulk market also affects the value of our drybulk vessels, which follows the trends of drybulk charter rates, and earnings on our charters, and similarly, affects our cash flows, our ability to repay our indebtedness and compliance with the covenants contained in our loan agreements.

Economic recession and disruptions in world financial markets and the resulting governmental action in the United States and in other parts of the world could have a further material adverse impact on our results of operations, financial condition and cash flows.

We face risks resulting from changes in economic environments, changes in interest rates and instability in the banking, energy, commodities and securities markets around the world, among other factors. Major market disruptions, the adverse changes in market conditions and the regulatory climate in the United States and worldwide may adversely affect our business, impair our ability to borrow amounts under our existing credit facility or any credit facilities we enter into. In addition, the economic environment in Greece, which is where our operations are based, may have adverse impacts on us. We cannot predict how long the current market conditions will last. However, these economic and governmental factors, together with the concurrent decline in charter rates, could have a significant effect on our results of operations and could affect the price of our common stock.

An economic slowdown in the Asia Pacific region could exacerbate the effect of recent slowdowns in the economies of the European Union and may have a material adverse effect on our business, financial condition and results of operations.

We anticipate a significant number of the port calls made by our vessels will continue to involve the loading or discharging of drybulk commodities in ports in the Asia Pacific region. As a result, any negative changes in economic conditions in any Asia Pacific country, particularly in China, may exacerbate the effect of recent slowdowns in the economies of the European Union and may have a material adverse effect on our business, financial condition and results of operations, as well as our future prospects. Before the global economic financial crisis that began in 2008, China had one of the world's fastest growing economies in terms of gross domestic product ("GDP") which had a significant impact on shipping demand. The growth rate of China's GDP decreased to approximately 7.8% for the year ended December 31, 2012, as compared to 9.3% and 10.4% for the years ended December 31, 2011 and 2010, respectively, and continues to remain below pre-2008 levels. It is possible that China and other countries in the Asia Pacific region will continue to experience slowed or even negative economic growth in the near future. Moreover, the current economic slowdown in the economies of the European Union and other Asian countries may further adversely affect economic growth in China and elsewhere. Our business, financial condition and results of operations, as well as our future prospects, will likely be materially and adversely affected by a further economic downturn in any of these countries.

Changes in the economic and political environment in China and policies adopted by the government to regulate its economy may have a material adverse effect on our business, financial condition and results of operations.

The Chinese economy differs from the economies of most countries belonging to the Organization for Economic Cooperation and Development, or OECD, in such respects as structure, government involvement, level of development, growth rate, capital reinvestment, allocation of resources, rate of inflation and balance of payments position. Since 1978, increasing emphasis has been placed on the utilization of market forces in the development of the Chinese economy. There is an increasing level of freedom and autonomy in areas such as allocation of resources, production, pricing and management and a gradual shift in emphasis to a “market economy” and enterprise reform. Although limited price reforms were undertaken, with the result that prices for certain commodities are principally determined by market forces, many of the reforms are experimental and may be subject to change or abolition. We cannot assure you that the Chinese government will continue to pursue a policy of economic reform. The level of imports to and exports from China could be adversely affected by changes to these economic reforms, as well as by changes in political, economic and social conditions or other relevant policies of the Chinese government, such as changes in laws, regulations or export and import restrictions, all of which could, adversely affect our business, financial condition and operating results.

Risks involved with operating ocean-going vessels could affect our business and reputation, which may reduce our revenues.

The operation of an ocean-going vessel has inherent risks. These risks include the possibility of:

- crew strikes and/or boycotts;
- marine disaster;

- piracy;

- environmental accidents;

- cargo and property losses or damage; and

- business interruptions caused by mechanical failure, human error, war, terrorism, political action in various countries, labor strikes or adverse weather conditions.

The involvement of any of our vessels in an environmental disaster may harm our reputation as a safe and reliable vessel operator. Any of these circumstances or events could increase our costs or lower our revenues.

On October 11, 2012, we announced that all 21 crew members of the M/V *Free Goddess* are reported safe and well after the vessel's release by her hijackers. The M/V *Free Goddess* had been hijacked by Somali pirates on February 7, 2012 while transiting the Indian Ocean eastbound. The vessel was on a time charter trip at the time she was hijacked. Under the charterparty agreement, the BIMCO Piracy clause was applied, which provided among other things, for the charterers to have the vessel covered with kidnap and ransom insurance and loss of hire insurance. The vessel was also covered by the war risk underwriters, who confirmed cover. We commenced arbitration proceedings with the charterer due to the charterer not fulfilling its obligations under the charterparty agreement. The proceedings were concluded and the award was in our favor. Thereafter, we reached a settlement with the charterer pursuant to which the charterer agreed to pay \$800. Currently, the vessel is being surveyed pending commencement of temporary repairs.

An oversupply of drybulk vessel capacity may lead to reductions in charter rates and profitability.

As of December 31, 2012, newbuilding orders had been placed for an aggregate of approximately 18% of the total DWT of the then-existing global drybulk fleet, with deliveries expected mainly during the succeeding 36 months, although available data with regard to cancellations of existing newbuilding orders or delays of new build deliveries are not always accurate. As of December 31, 2011, newbuilding orders had been placed for an aggregate of approximately 32% of the total DWT of the then-existing global drybulk fleet, with deliveries expected mainly during the succeeding 36 months, although available data with regard to cancellations of existing new build orders or delays of new build deliveries are not always accurate. An over-supply of drybulk carrier capacity may result in a reduction of charter hire rates. Because the factors affecting the supply and demand for vessels are outside of our control and are unpredictable, the nature, timing, direction and degree of changes in industry conditions are also unpredictable.

Factors that influence demand for vessel capacity include:

- supply and demand for energy resources, commodities, semi-finished and finished consumer and industrial products;
- changes in the exploration or production of energy resources, commodities, semi-finished and finished consumer and industrial products;
- the location of regional and global exploration, production and manufacturing facilities;
- the location of consuming regions for energy resources, commodities, semi-finished and finished consumer and industrial products;
 - the globalization of production and manufacturing; global and regional economic and political conditions, including armed conflicts, terrorist activities, embargoes and strikes;
- developments in international trade;
- changes in seaborne and other transportation patterns, including the distance cargo is transported by sea;
- environmental and other regulatory developments;
- currency exchange rates; and weather.

The factors that influence the supply of vessel capacity include:

- the number of newbuilding deliveries;

- port and canal congestion;
- the scrapping rate of older vessels;
- vessel casualties; and
- the number of vessels that are out of service.

We anticipate that the future demand for our drybulk carriers will be dependent upon continued economic growth in the world's economies, including China and India, seasonal and regional changes in demand, changes in the capacity of the global drybulk carrier fleet and the sources and supply of drybulk cargoes to be transported by sea. The capacity of the global drybulk carrier fleet seems likely to increase and economic growth may not continue. Adverse economic, political, social or other developments could have a material adverse effect on our business and operating results.

Increased inspection procedures and tighter import and export controls could increase costs and disrupt our business.

International shipping is subject to various security and customs inspection and related procedures in countries of origin and destination. Inspection procedures can result in the seizure of the contents of our vessels, delays in the loading, offloading or delivery and the levying of customs duties, fines or other penalties against us.

Since the terrorist attacks of September 11, 2001, there has been a variety of limitations intended to enhance vessel security.

Regulations by the U.S. Coast Guard and rules pursuant to the International Convention for the Safety of Life at Sea have imposed increased compliance costs on vessel owners and charterers. These costs include certification costs imposed by relevant agencies and bonding costs under U.S. Customs and Border Protection, as well as potential delays in transit due to increased security procedures regulating the entry into harbors or the discharge of cargo. For a further description of the various requirements, please see "Item 4. Information on the Company -Environmental and Other Regulation-Vessel Security Regulations."

It is possible that changes to inspection procedures could impose additional financial and legal obligations on us. Furthermore, changes to inspection procedures could also impose additional costs and obligations on our customers and may, in certain cases, render the shipment of certain types of cargo uneconomical or impractical. Any such

changes or developments may have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to pay dividends.

Risks Related to Our Common Stock

Our executive officers, directors and principal stockholders own a large percentage of our voting common stock and could limit our stockholders' influence on corporate decisions or could delay or prevent a change in corporate control.

As of April 2, 2013, our directors, executive officers and certain holders of more than 5% of our outstanding common stock, together with their affiliates and related persons, beneficially own, in the aggregate, approximately 22.3% of our outstanding common stock. As a result, these stockholders, if acting together, have the ability to determine the outcome of all matters submitted to our stockholders for approval, including the election and removal of directors and any merger, consolidation or sale of all or substantially all of our assets and other extraordinary transactions. The interests of this group of stockholders may not always coincide with our corporate interests or the interest of other stockholders, and they may act in a manner with which you may not agree or that may not be in the best interests of other stockholders. This concentration of ownership may have the effect of:

- delaying, deferring or preventing a change in control of our company;

- entrenching our management and/or board;

- impeding a merger, consolidation, takeover or other business combination involving our company; or

- discouraging a potential acquirer from making a tender offer or otherwise attempting to obtain control of our company.

The market price of our common stock has been and may in the future be subject to significant fluctuations.

The market price of our common stock has been and may in the future be subject to significant fluctuations as a result of many factors, some of which are beyond our control. Among the factors that have in the past and could in the future affect our stock price are:

- quarterly variations in our results of operations;
 - our lenders' willingness to extend our loan covenant waivers, if necessary;
 - changes in market valuations of similar companies and stock market price and volume fluctuations generally;
 - changes in earnings estimates or publication of research reports by analysts;
 - speculation in the press or investment community about our business or the shipping industry generally;
 - strategic actions by us or our competitors such as acquisitions or restructurings;
 - the thin trading market for our common stock, which makes it somewhat illiquid;
- the current ineligibility of our common stock to be the subject of margin loans because of its low current market price;
- regulatory developments;
 - additions or departures of key personnel;
 - general market conditions; and
 - domestic and international economic, market and currency factors unrelated to our performance.

The stock markets in general, and the markets for drybulk shipping and shipping stocks in particular, have experienced extreme volatility that has sometimes been unrelated to the operating performance of individual companies. These broad market fluctuations may adversely affect the trading price of our common stock.

As long as our stock price remains below \$5.00 per share, our shareholders will face restrictions in using our shares as collateral for margin accounts.

The closing price of our common stock on the NASDAQ Capital Market on April 3, 2013 was \$1.19 per share. If the market price of our shares of common stock remains below \$5.00 per share, under Federal Reserve regulations and account maintenance rules of many brokerages, our shareholders will face restrictions in using such shares as collateral for borrowing in margin accounts. These restrictions on the use of our common stock as collateral may lead to sales of such shares creating downward pressure on and increased volatility in, the market price of our shares of common stock. In addition, many institutional investors will not invest in stocks whose prices are below \$5.00 per share.

If our common stock is delisted from The NASDAQ Stock Market, we would be subject to the risks relating to penny stocks.

If our common stock were to be delisted from trading on The NASDAQ Stock Market and the trading price of the common stock were below \$5.00 per share on the date the common stock were delisted, trading in our common stock would also be subject to the requirements of certain rules promulgated under the Securities Exchange Act of 1934, as amended. These rules require additional disclosure by broker-dealers in connection with any trades involving a stock defined as a "penny stock" and impose various sales practice requirements on broker-dealers who sell penny stocks to persons other than established customers and accredited investors, generally institutions. These additional requirements may discourage broker-dealers from effecting transactions in securities that are classified as penny stocks, which could severely limit the market price and liquidity of such securities and the ability of purchasers to sell such securities in the secondary market. A penny stock is defined generally as any non-exchange listed equity security that has a market price of less than \$5.00 per share, subject to certain exceptions.

As a foreign private issuer whose shares are listed on the NASDAQ Capital Market, we may follow certain home country corporate governance practices instead of certain NASDAQ requirements and are not required to obtain shareholder approval for the sale of shares.

As a foreign private issuer whose shares are listed on the NASDAQ Capital Market, we are permitted to follow certain home country corporate governance practices instead of certain requirements of the NASDAQ Marketplace Rules. For example, we may follow home country practice with regard to, among other things, the composition of the board of directors, compensation of officers, director nomination process and quorum at shareholders' meetings. In addition, we may follow home country practice instead of the NASDAQ requirement to obtain shareholder approval for certain dilutive events, such as for the establishment or amendment of certain equity-based compensation plans, a stock issuance that will result in a change of control of the company, certain transactions other than a public offering involving issuances of a 20% or more interest in the company and certain acquisitions of the stock or assets of another company. In particular, we are not required to obtain shareholder approval for our sale of shares pursuant to the Investment Agreement, which may result in the issuance of shares totaling more than 20% of our outstanding shares. Accordingly, our shareholders may not be afforded the same protections as provided under NASDAQ's corporate governance rules.

Future sales or issuances of our stock could cause the market price of our common stock to decline.

Issuance of a substantial number of shares of our common stock in public or private offerings, equity lines, or shares issued as an additional compensation to executive officers, members of the Board or to the Manager, , or in payment of obligations due, or the perception that these issuances could occur, may depress the market price for our common stock. These issuances could also impair our ability to raise additional capital through the sale of our equity securities in the future. We may issue additional shares of our common stock in the future and our shareholders may elect to sell large numbers of shares held by them from time to time. Also, we may need to raise additional capital to achieve our business plans.

Because the Republic of the Marshall Islands, where we are incorporated, does not have a well-developed body of corporate law, shareholders may have fewer rights and protections than under typical United States law, such as Delaware, and shareholders may have difficulty in protecting their interest with regard to actions taken by our Board of Directors.

Our corporate affairs are governed by amended and restated articles of incorporation and by-laws and by the Marshall Islands Business Corporations Act, or BCA. The provisions of the BCA resemble provisions of the corporation laws of a number of states in the United States. However, there have been few judicial cases in the Republic of the Marshall Islands interpreting the BCA. The rights and fiduciary responsibilities of directors under the law of the Republic of the Marshall Islands are not as clearly established as the rights and fiduciary responsibilities of directors under statutes or judicial precedent in existence in certain U.S. jurisdictions. Shareholder rights may differ as well. For example, under

Marshall Islands law, a copy of the notice of any meeting of the shareholders must be given not less than 15 days before the meeting, whereas in Delaware such notice must be given not less than 10 days before the meeting. Therefore, if immediate shareholder action is required, a meeting may not be able to be convened as quickly as it can be convened under Delaware law. Also, under Marshall Islands law, any action required to be taken by a meeting of shareholders may only be taken without a meeting if consent is in writing and is signed by all of the shareholders entitled to vote, whereas under Delaware law action may be taken by consent if approved by the number of shareholders that would be required to approve such action at a meeting. Therefore, under Marshall Islands law, it may be more difficult for a company to take certain actions without a meeting even if a majority of the shareholders approve of such action. While the BCA does specifically incorporate the non-statutory law, or judicial case law, of the State of Delaware and other states with substantially similar legislative provisions, public shareholders may have more difficulty in protecting their interests in the face of actions by the management, directors or controlling shareholders than would shareholders of a corporation incorporated in a U.S. jurisdiction.

It may not be possible for investors to enforce U.S. judgments against us.

We, and all our subsidiaries, are or will be incorporated in jurisdictions outside the U.S. and substantially all of our assets and those of our subsidiaries will be located outside the U.S. In addition, most of our directors and officers are or will be non-residents of the U.S., and all or a substantial portion of the assets of these non-residents are or will be located outside the U.S. As a result, it may be difficult or impossible for U.S. investors to serve process within the U.S. upon us, our subsidiaries, or our directors and officers, or to enforce a judgment against us for civil liabilities in U.S. courts. In addition, you should not assume that courts in the countries in which we or our subsidiaries are incorporated or where our or the assets of our subsidiaries are located would enforce judgments of U.S. courts obtained in actions against us or our subsidiaries based upon the civil liability provisions of applicable U.S. federal and state securities laws or would enforce, in original actions, liabilities against us or our subsidiaries based on those laws.

We can issue shares of preferred stock without shareholder approval, which could adversely affect the rights of common shareholders.

Our articles of incorporation permit us to establish the rights, privileges, preferences and restrictions, including voting rights, of future series of our preferred stock and to issue such stock without approval from our stockholders. The rights of holders of our common stock may suffer as a result of the rights granted to holders of preferred stock that we may issue in the future. In addition, we could issue preferred stock to prevent a change in control of our company, depriving common shareholders of an opportunity to sell their stock at a price in excess of the prevailing market price.

Our stockholder rights plan may discourage a takeover.

In January 2009, our Board of Directors authorized shares of Series A Participating Preferred Stock in connection with its adoption of a stockholder rights plan, under which we issued rights to purchase Series A Preferred Stock to holders of our common stock. Upon certain triggering events, each Right entitles the registered holder to purchase from us one one-thousandth of a share of Preferred Stock at an exercise price of \$90.00, subject to adjustment. Our stockholder rights plan may generally discourage a merger or tender offer involving our securities that is not approved by our Board of Directors by increasing the cost of effecting any such transaction and, accordingly, could have an adverse impact on stockholders who might want to vote in favor of such merger or participate in such tender offer. Our stockholder rights plan expires in January 2019.

Provisions in our organizational documents, our management agreement and under Marshall Islands corporate law could make it difficult for our shareholders to replace or remove our current Board of Directors or have the effect of discouraging, delaying or preventing a merger or acquisition, which could adversely affect the market price of our common stock.

Several provisions of our amended and restated articles of incorporation and by-laws, and certain provisions of the Marshall Islands corporate law, could make it difficult for our shareholders to change the composition of our Board of Directors in any one year, preventing them from changing the composition of management. In addition, these provisions may discourage, delay or prevent a merger or acquisition that shareholders may consider favorable. These provisions include:

- authorizing our Board of Directors to issue “blank check” preferred stock without shareholder approval;
- providing for a classified Board of Directors with staggered, three year terms;
- prohibiting cumulative voting in the election of directors;
- authorizing the removal of directors only for cause and only upon the affirmative vote of the holders of a two-thirds majority of the outstanding shares of our common shares, voting as a single class, entitled to vote for the directors;
- limiting the persons who may call special meetings of shareholders;
- establishing advance notice requirements for election to our Board of Directors or proposing matters that can be acted on by shareholders at shareholder meetings; and
- limiting our ability to enter into business combination transactions with certain shareholders.

Pursuant to the terms of our management agreement, our Manager is entitled to a termination fee if such agreement is terminated upon a “change of control,” which term includes, but is not limited to, the election of a director not recommended by the then-current Board of Directors, any person or entity or group of affiliated persons or entities that becomes a beneficial owner of 15% or more of our voting securities, a merger of FreeSeas where less than a majority of the shares of the resulting entity are held by the FreeSeas shareholders or the sale of all or substantially all of FreeSeas’ assets. The termination fee as of December 31, 2012 would have been approximately \$89 million. In addition, we have implemented a shareholder rights plan pursuant to which the holders of our common stock receive one right to purchase one one-thousandth of a share of our Series A Participating Preferred Stock at an exercise price of \$90.00 per share, subject to adjustment. The rights become exercisable upon the occurrence of certain change in control events. These provisions and our shareholder rights plan could substantially impede the ability of public shareholders to benefit from a change in control and, as a result, may adversely affect the market price of our common shares and your ability to realize any potential change of control premium.

Item 4. Information on the Company

Our Organization and Corporate Structure

We were incorporated on April 23, 2004 under the name “Adventure Holdings S.A.” pursuant to the laws of the Republic of the Marshall Islands to serve as the parent holding company of our ship-owning entities. On April 27, 2005, we changed our name to “FreeSeas Inc.”

We became a public reporting company on December 15, 2005, when we completed a merger with Trinity Partners Acquisition Company Inc., or Trinity, a blank check company formed to serve as a vehicle to complete a business combination with an operating business, in which we were the surviving corporation. At the time of the merger we owned three drybulk carriers. We currently own seven vessels, each of which is owned through a separate wholly owned subsidiary.

Our common stock currently trades on the NASDAQ Capital Market under the trading symbol “FREE”.

Our principal executive offices are located at 10, Eleftheriou Venizelou Street (Panepistimiou Ave.), 10671, Athens, Greece and our telephone number is 011-30-210-452-8770.

Capital Expenditures and Divestitures

During the last three fiscal years, our capital expenditures and divestitures related to our efforts to renew and expand our fleet were as follows:

- On July 30, 2010, we entered into an agreement to sell the *M/V Free Destiny* for a price of \$3,213. The vessel was delivered to the buyers on August 27, 2010 and we recognized a gain of \$807.

- On August 17, 2010, two of the Company’s wholly owned subsidiaries entered into shipbuilding contracts with a Chinese yard for the construction of two drybulk vessels of approximately 33,600 dwt each for an aggregate purchase price of \$49,880 including extra costs of approximately \$1,080 in total. On December 31, 2011, the Company impaired the advances and the capitalized expenses relating to the shipbuilding contracts due to lack of financing

after the cancelation of ABN AMRO financing commitment and delayed scheduled payment to the yard resulting in a default situation as per the construction contract.

On May 13, 2011, the Company sold the M/V *Free Envoy*, a 1984 built 26,318 dwt Handysize dry bulk vessel for a sale price of \$4.2 million and recognized a gain of \$1,561 as a result of the sale. From the net proceeds of the sale, the Company paid on May 13, 2011 an amount of \$3.7 million constituting prepayment towards the Deutsche Bank loan facility B.

On November 8, 2011, the Company sold the M/V *Free Lady*, a 2003-built, 50,246 dwt Handymax dry bulk vessel, for a sale price of \$21.9 million. From the net proceeds of the sale, the Company paid on November 8, 2011 the amount of \$19.8 million constituting prepayment towards the Credit Suisse loan facility.

Our Fleet

We are an international drybulk shipping company incorporated under the laws of the Republic of the Marshall Islands with principal executive offices in Athens, Greece. Our fleet currently consists of six Handysize vessels and one Handymax vessel that carry a variety of drybulk commodities, including iron ore, grain and coal, which are referred to as “major bulks,” as well as bauxite, phosphate, fertilizers, steel products, cement, sugar and rice, or “minor bulks.” As of April 2, 2013, the aggregate dwt of our operational fleet is approximately 197,200 dwt and the average age of our fleet is 15.5 years.

Our investment and operational focus is in the Handysize sector, which is generally defined as less than 40,000 dwt of carrying capacity. Handysize vessels are, we believe, more versatile in the types of cargoes that they can carry and trade routes they can follow, and offer less volatile returns than larger vessel classes. We believe this segment also offers better demand and supply demographics than other drybulk asset classes.

We have contracted the management of our fleet to our Manager, Free Bulkiers S.A., an entity controlled by Ion G. Varouxakis, our Chairman, President and Chief Executive Officer, and one of our principal shareholders. Our Manager provides technical management of our fleet, commercial management of our fleet, financial reporting and accounting services and office space. While the Manager is responsible for finding and arranging charters for our vessels, the final decision to charter our vessels remains with us.

All of our vessels are currently being chartered in the spot market. The following table details the vessels in our fleet as of April 10, 2013:

Vessel Name	Type	Built	Dwt	Employment
M/V Free Jupiter	Handymax	2002	47,777	About 20-25 day time charter trip at \$4,700 per day through May 2013
M/V Free Knight	Handysize	1998	24,111	About 70-80 day time charter trip at \$4,500 per day through April 2013
M/V Free Maverick	Handysize	1998	23,994	Idle pending resolution in connection with dispute with creditors
M/V Free Impala	Handysize	1997	24,111	Laid-up
M/V Free Neptune	Handysize	1996	30,838	About 65 day time charter trip at \$6,500 per day through April 2013
M/V Free Hero	Handysize	1995	24,318	About 20-25 day time charter trip at \$5,400 per day through April 2013
M/V Free Goddess	Handysize	1995	22,051	Being surveyed pending commencement of repairs after pirate seizure

On October 11, 2012, we announced that all 21 crew members of the M/V *Free Goddess* are reported safe and well after the vessel's release by her hijackers. The M/V *Free Goddess* had been hijacked by Somali pirates on February 7, 2012 while transiting the Indian Ocean eastbound. The vessel was on a time charter trip at the time she was hijacked. Under the charterparty agreement, the BIMCO Piracy clause was applied, which provided among other things, for the charterers to have the vessel covered with kidnap and ransom insurance and loss of hire insurance. The vessel was also covered by the war risk underwriters, who confirmed cover. We commenced arbitration proceedings with the charterer due to the charterer not fulfilling its obligations under the charterparty agreement. The proceedings were concluded and the award was in our favor. Thereafter, we reached a settlement with the charterer pursuant to which the charterer agreed to pay \$800. Since then, the vessel is being surveyed pending commencement of temporary repairs at the port of refuge.

Competitive Strengths

We believe that we possess a number of strengths that provide us with a competitive advantage in the drybulk shipping industry, including:

- **Positive macro environment.** The broader shipping sector is currently at a cyclical low and poised for a significant upswing in a positive macroeconomic environment. Several key market indicators support increased seaborne dry trade, including growing Chinese and Japanese iron ore and coal imports as well as strengthening Indian demand for thermal coal imports. Industrial production in emerging and developing economies constitutes a major driving force

and is expected to generate enhanced demand for dry bulk commodities in the near term. The rising world population and economic recovery in the importing regions are also expected to contribute to the overall growth of the seaborne dry bulk trade.

Solid Handysize fundamentals. We are strategically well positioned to take advantage of the growing Handysize fleet shortage. Approximately 34% of the worldwide Handysize fleet is over 20 years old, and nearing the end of its useful life, making it considerably older than any other fleet type. In addition, Handysize fleet growth is expected to be less than half the growth of any other vessel type. Operationally, Handysize vessels are more versatile than other drybulk vessels. Their shallow draft allows for access to smaller ports unserviceable by larger Panamax and Capesize vessels, and they are equipped with on-board cranes, enabling entry into ports with inadequate loading and discharging facilities.

Experienced management team. We have benefited from the expertise of our executive officers, including that of Ion G. Varouxakis, our Chairman, President and Chief Executive Officer, and that of our Manager's personnel, which consists of seasoned shipping professionals with long-standing experience in the industry. We believe that our management team has a proven track record of strong performance throughout a challenging economic climate, as we have actively and decisively renewed our fleet while reducing operating costs without sacrificing quality or safety in the process.

Business Strategy

Our primary objectives are to profitably grow our business and maximize value to our shareholders by pursuing the following strategies:

Optimize our fleet. Our fleet of drybulk carriers consists of Handysize and Handymax vessels. Given the relatively low number of Handysize drybulk vessels on order, and a relatively great number of Handysize drybulk vessels at an age of 20 years or older, we believe there will be continued demand for such vessels. Handysize vessels are typically shallow-drafted and equipped with onboard cranes. This makes them more versatile and able to access a wider range of loading and discharging ports than larger ships that are unable to service many ports due to their size or the lack of local port infrastructure. Many countries in the Asia Pacific region, including China, as well as countries in Africa and South America, have shallow ports. We believe that our vessels, and any Handysize that we may acquire, should enable us to transport a wider variety of cargoes and to pursue a greater number of chartering opportunities than if we owned larger drybulk vessels. Handysize vessels have also historically achieved greater charter rate stability than larger drybulk vessels.

Build upon strategic relationships. We intend to continue to build upon our extensive experience and relationships with ship brokers, financial institutions, industrial partners and commodity traders. We use these relationships to identify chartering and acquisition opportunities and gain access to sources of additional financing, industry contacts and market intelligence. Our current specialization in a single asset class allows us to not only monitor markets with a single measure, but also makes us a partner of choice for businesses that have a need or requirement for a Handysize specialist.

Vessel Employment

We have employed and continue to employ our vessels in the spot charter market, under trip time charters and period time charters. We have laid up the M/V *Free Impala* and two of the remaining vessels, the M/V *Free Goddess* and the M/V *Free Maverick*, currently do not earn income.

A trip time charter is a short-term time charter for a voyage between load port(s) and discharge port(s) under which the charterer pays fixed daily hire rate on a semi-monthly basis for use of the vessel. A period time charter is charter for a vessel for a fixed period of time at a set daily rate. Under trip time charters and time charters, the charterer pays voyage expenses. Under all three types of charters, the vessel owners pay for vessel operating expenses, which include crew costs, provisions, deck and engine stores, lubricating oil, insurance, maintenance and repairs. The vessel owners are also responsible for each vessel's dry-docking and intermediate and special survey costs. Lastly, vessels can be chartered under "bareboat" contracts whereby the charterer is responsible for the vessel's maintenance and operations, as well as all voyage expenses.

Vessels operating on period time charter provide more predictable cash flows, but can yield lower profit margins than vessels operating in the spot market during periods characterized by favorable market conditions. Vessels operating in the spot market generate revenues that are less predictable but may enable us to increase profit margins during periods of increasing drybulk charter rates. However, we would then be exposed to the risk of declining drybulk charter rates, which may be higher or lower than the rates at which we chartered our vessels. We are constantly evaluating opportunities for period time charters, but only expect to enter into additional period time charters if we can obtain contract terms that satisfy our criteria.

Although we have not previously done so, we may from time to time utilize forward freight agreements that enable us to enter into contractual obligations to sell the spot charter forward and thereby reduce our exposure to a potential deterioration of the charter market.

Customers

During 2012, we derived approximately 42% of our gross revenues from three charterers, and during 2011, we derived approximately 53% of our gross revenues from three charterers. We believe that our customer base is composed of established charterers.

Management of Operations and Fleet

Pursuant to our amended and restated services agreement with our Manager, our operations are executed and supervised by our Manager, based on the strategy devised by the board of directors and subject to the approval of our board of directors as described below. We pay a monthly fee of \$136.275 (on the basis that the dollar/Euro exchange rate is 1.35 or lower; if on the last business day of each month the dollar/Euro exchange rate exceeds 1.35 then the service fee payable will be adjusted for the following month in question, so that the amount payable in dollars will be the equivalent in Euro based on 1.35 dollar/Euro exchange rate) as compensation for services (described below) related to accounting, financial reporting, implementation of Sarbanes-Oxley internal control over financial reporting procedures and general administrative and management services. Our Manager is also entitled to a termination fee if the agreement is terminated upon a “change of control” as defined in the services agreement. The termination fee as of December 31, 2012 would have been \$89,020.

Our Manager provides us with the following services:

General Administration. Our Manager provides us with general administrative, office and support services necessary for our operations and our fleet, including technical and clerical personnel, communication, accounting, and data processing services.

Financial Accounting Services. Our Manager maintains our books, records and accounts and provides all services as are necessary for the preparation and maintenance of the our accounting records in accordance with U.S. GAAP, preparing and filing financial statements with the SEC and NASDAQ in accordance with applicable financial reporting requirements, and developing, implementing, monitoring and assessing our internal controls;

Sale and Purchase of Vessels. Our Manager advises our board of directors when opportunities arise to purchase, including through newbuildings, or to sell any vessels. All decisions to purchase or sell vessels require the approval of our board of directors. Any purchases or sales of vessels approved by our board of directors are arranged and completed by our Manager. This involves the appointment of superintendents to inspect and take delivery of vessels and to monitor compliance with the terms and conditions of the purchase contracts.

We also contract the technical and commercial management of our vessels to our Manager. Our Manager has a separate management contract with each of our ship-owning subsidiaries and provides a wide range of services on a fixed fee per vessel basis, as described below. These services include vessel operations, maintenance, regulatory compliance, crewing, supervising dry-docking and repairs, arranging insurance for vessels, vessel supplying, advising on the purchase and sale of vessels, and performing certain accounting and other administrative services, including financial reporting and internal controls requirements. Pursuant to our amended management agreement with our Manager, we pay our Manager a monthly technical management fee of \$18.975 (on the basis that the dollar/Euro

exchange rate is 1.30 or lower; if on the first business day of each month the dollar/Euro exchange rate exceeds 1.30 then the management fee payable will be increased for the month in question, so that the amount payable in dollars will be the equivalent in Euro based on 1.30 dollar/Euro exchange rate) plus a fee of \$0.4 per day for superintendant attendance and other direct expenses.

We also pay our Manager a fee equal to 1.25% of the gross freight or hire from the employment of FreeSeas' vessels and a 1% commission on the gross purchase price of any new vessel acquired or the gross sale price of any vessel sold by FreeSeas with the assistance of our Manager. Additionally, we pay our Manager a monthly fee of \$136.275 as compensation for services related to accounting, financial reporting, implementation of Sarbanes-Oxley internal control over financial reporting procedures and general administrative and management services plus expenses.

Our Manager currently manages all of our vessels and we anticipate that our Manager will manage any additional vessels we may acquire in the future.

We believe that we pay our Manager industry-standard fees for these services.

Crewing and Employees

We currently have no employees, our Manager is responsible for employing all of the executive officers and staff to execute and supervise the operations. In addition, our Manager is responsible for recruiting, either directly or through a crewing agent, the senior officers and all other crew members for our vessels.

Long-Term Debt

We and our subsidiaries are parties to various loan facilities secured by our vessels. Please see "Item 5. Operating and Financial Review and Prospects – Long-Term Debt" for a description of these facilities, our current non-compliance with our obligations and covenants under the facility agreements, and the status of our efforts to restructure the terms of these agreements.

All the Company's credit facilities bear interest at LIBOR plus a margin, ranging from 1% to 4%, and are secured by mortgages on the financed vessels and assignments of vessels' earnings and insurance coverage proceeds. They also include affirmative and negative financial covenants of the borrowers, including maintenance of operating accounts, minimum cash deposits, average cash balances to be maintained with the lending banks and minimum ratios for the fair values of the collateral vessels compared to the outstanding loan balances. Each borrower is restricted under its respective loan agreement from incurring additional indebtedness, changing the vessels' flag without the lender's consent or distributing earnings. The weighted average interest rate for the year ended December 31, 2012 and 2011 was 2.7% and 2.9%, respectively. Interest expense incurred under the above loan agreements amounted to \$2,415, 3,173 (net of capitalized interest \$282) and \$3,932 for the years ended December 31, 2012, 2011 and 2010, respectively, and is included in "Interest and Finance Costs" in the consolidated statements of operations.

Charter Hire Rates

Charter hire rates fluctuate by varying degrees among drybulk carrier size categories. The volume and pattern of trade in a small number of commodities (major bulks) affect demand for larger vessels. Therefore, charter rates and vessel values of larger vessels often show greater volatility. Conversely, trade in a greater number of commodities (minor bulks) drives demand for smaller drybulk carriers. Accordingly, charter rates and vessel values for those vessels are subject to less volatility.

Charter hire rates paid for drybulk carriers are primarily a function of the underlying balance between vessel supply and demand, although at times other factors may play a role. Furthermore, the pattern seen in charter rates is broadly mirrored across the different charter types and the different drybulk carrier categories. However, because demand for larger drybulk vessels is affected by the volume and pattern of trade in a relatively small number of commodities, charter hire rates (and vessel values) of larger ships tend to be more volatile than those for smaller vessels.

In the time charter market, rates vary depending on the length of the charter period and vessel specific factors such as age, speed and fuel consumption.

In the voyage charter market, rates are influenced by cargo size, commodity, port dues and canal transit fees, as well as commencement and termination regions. In general, a larger cargo size is quoted at a lower rate per ton than a smaller cargo size. Routes with costly ports or canals generally command higher rates than routes with low port dues and no canals to transit. Voyages with a load port within a region that includes ports where vessels usually discharge cargo or a discharge port within a region with ports where vessels load cargo also are generally quoted at lower rates, because such voyages generally increase vessel utilization by reducing the unloaded portion (or ballast leg) that is included in the calculation of the return charter to a loading area.

Within the drybulk shipping industry, the charter hire rate references most likely to be monitored are the freight rate indices issued by the Baltic Exchange. These references are based on actual charter hire rates under charters entered into by market participants as well as daily assessments provided to the Baltic Exchange by a panel of major shipbrokers.

Property

In June 2011, we relocated our principal offices to Athens, Greece and we reimbursed the Manager in an amount equal to \$144 (equivalent of Euro 100) for the expenses incurred in relation to this relocation and early termination cost for previous lease agreement. In addition, we entered into an agreement with our Manager pursuant to which we agreed to pay our Manager 65% of the rents due from our Manager to the lessor of our rented office space, commencing in June 2011, and 65% of the apportioned common expenses and maintenance expenses.

Competition

We operate in markets that are highly competitive and based primarily on supply and demand. Ownership of drybulk carriers is highly fragmented and is divided among approximately 1,200 drybulk carrier owners. We compete for charters on the basis of price, vessel location, size, age and condition of the vessel, as well as on our reputation. There are many drybulk shipping companies which are publicly traded on the U.S. stock markets, such as DryShips Inc., Diana Shipping Inc., Eagle Bulk Shipping Inc., Euroseas Ltd., Excel Maritime Carriers Ltd. and Baltic Trading Limited, which are significantly larger than we are and have substantially more capital, more and larger vessels, personnel, revenue and profits and which are in competition with us. There is no assurance that we can successfully compete with such companies for charters or other business.

Our Manager arranges our charters (whether spot charters, period time charters, bareboat charters or pools) through the use of brokers, who negotiate the terms of the charters based on market conditions. We compete with other owners of drybulk carriers in the, Handysize and Handymax sectors. Charters for our vessels are negotiated by our Manager utilizing a worldwide network of shipbrokers. These shipbrokers advise our Manager on a continuous basis of the availability of cargo for any particular vessel. There may be several shipbrokers involved in any one charter. The negotiation for a charter typically begins prior to the completion of the previous charter in order to avoid any idle time. The terms of the charter are based on industry standards.

Seasonality

Coal, iron ore and grains, which are the major bulks of the drybulk shipping industry, are somewhat seasonal in nature. The energy markets primarily affect the demand for coal, with increases during hot summer periods when air conditioning and refrigeration require more electricity and towards the end of the calendar year in anticipation of the forthcoming winter period. The demand for iron ore tends to decline in the summer months because many of the major steel users, such as automobile makers, reduce their level of production significantly during the summer holidays. Grains are completely seasonal as they are driven by the harvest within a climate zone. Because three of the five largest grain producers (the United States of America, Canada and the European Union) are located in the northern hemisphere and the other two (Argentina and Australia) are located in the southern hemisphere, harvests occur throughout the year and grains required drybulk shipping accordingly.

Environmental and Other Regulations

Government regulation and laws significantly affects the ownership and operation of our vessels. The vessels are subject to international conventions and treaties, national, state and local laws and regulations in force in the countries in which our vessels may operate or are registered, including those governing the management and disposal of hazardous substances and wastes, the cleanup of oil spills and other contamination, air emissions, and water discharges and ballast water management.

A variety of governmental and private entities subject our vessels to both scheduled and unscheduled inspections. These entities include the local port authorities (United States Coast Guard, harbor master or equivalent), classification societies, flag state administration (country of registry) and charterers. Certain of these entities require us to obtain permits, licenses, financial assurances and certificates for the operation of our vessels. Failure to maintain necessary permits or approvals could require us to incur substantial costs or result in the temporary suspension of operation of one or more of our vessels.

We believe that the heightened level of environmental and quality concerns among insurance underwriters, regulators and charterers is leading to greater inspection and safety requirements on all vessels and may accelerate the scrapping of older vessels throughout the industry. Increasing environmental concerns have created a demand for vessels that conform to the stricter environmental standards. We are required to maintain operating standards for all of our vessels that will emphasize operational safety, quality maintenance, continuous training of its officers and crews and compliance with U.S. and international regulations. We believe that the operation of our vessels is in substantial compliance with applicable environmental laws and regulations; however, because such laws and regulations are frequently changed and may impose increasingly stricter requirements, such future requirements may limit our ability to do business, increase our operating costs, force the early retirement of our vessels, and/or affect their resale value, all of which could have a material adverse effect on our financial condition and results of operations.

International Maritime Organization

The International Maritime Organization, or IMO, the United Nations agency for maritime safety and the prevention of pollution by ships, has adopted the International Convention for the Prevention of Marine Pollution, 1973, as modified by the related Protocol of 1978, or the MARPOL Convention, which has been updated through various amendments. The MARPOL Convention establishes environmental standards relating to oil leakage or spilling, garbage management, sewage, air emissions, handling and disposal of noxious liquids and handling of harmful substances in packaged forms. The IMO adopted regulations that set forth pollution prevention requirements applicable to drybulk carriers. These regulations have been adopted by over 150 nations, including many of the jurisdictions in which our vessels operate.

In September 1997, the IMO adopted Annex VI to the International Convention for the Prevention of Pollution from Ships to address air pollution from vessels. Annex VI, which came into effect on May 19, 2005, set limits on sulfur oxide ("SOx") and NOx emissions from vessels and prohibited deliberate emissions of ozone depleting substances, such as chlorofluorocarbons. Annex VI also included a global cap on the sulfur content of fuel oil and allowed for special areas to be established with more stringent controls on sulfur emissions. Annex VI has been ratified by some, but not all IMO member states, including the Marshall Islands. Pursuant to a Marine Notice issued by the Marshall Islands Maritime Administrator as revised in March 2005, vessels flagged by the Marshall Islands that are subject to Annex VI must, if built before the effective date, obtain an International Air Pollution Prevention Certificate evidencing compliance with Annex VI by the first dry docking after May 19, 2005, but no later than May 19, 2008. All vessels subject to Annex VI and built after May 19, 2005 must also have this Certificate. We have obtained International Air Pollution Prevention certificates for all of our vessels. Amendments to Annex VI regarding particulate matter, NOx and SOx emission standards entered into force in July 2010. The amendments provide for a progressive reduction in SOx emissions from ships, with the global sulfur cap reduced initially to 3.50% (from the current 4.50%), effective from 1 January 2012; then progressively to 0.50%, effective from 1 January 2020, subject to a feasibility review to be completed no later than 2018. The Annex VI amendments also establish tiers of stringent NOx emissions standards for new marine engines, depending on their dates of installation. The United States ratified the amendments, and all vessels subject to Annex VI must comply with the amended requirements when entering U.S. ports or operating in U.S. waters. Additionally, more stringent emission standards apply in coastal areas designated by MEPC as Emission Control Areas (ECAs). The North American ECA, which includes the area extending 200 nautical miles from the Atlantic/Gulf and Pacific Coasts of the United States and Canada, the Hawaiian Islands, and the French territories of St. Pierre and Miquelon, has been enforceable since August 1, 2012. Fuel used by vessels operating in the ECA cannot exceed a 1.0% sulfur content, dropping to a 0.1% sulfur content in 2015. NOx after-treatment requirements will apply in 2016. The U.S. Caribbean ECA, which includes the waters of Puerto Rico and the Virgin Islands, will become enforceable on January 1, 2014. We may incur costs to install control equipment on our engines in order to comply with the new requirements. Other ECAs may be designated, and the jurisdictions in which our vessels operate may adopt more stringent emission standards independent of IMO.

The operation of our vessels is also affected by the requirements set forth in the IMO's Management Code for the Safe Operation of Ships and Pollution Prevention, or the ISM Code. The ISM Code requires shipowners and bareboat charterers to develop and maintain an extensive "Safety Management System" that includes the adoption of a safety and environmental protection policy setting forth instructions and procedures for safe operation and describing procedures for dealing with emergencies. The failure of a shipowner or management company to comply with the ISM Code may subject such party to increased liability, may decrease available insurance coverage for the affected vessels, and may result in a denial of access to, or detention in, certain ports. Currently, each of our vessels is ISM Code-certified. However, there can be no assurance that such certification will be maintained indefinitely.

Additional or new conventions, laws and regulations may also be adopted that could adversely affect our ability to operate our vessels.

The U.S. Oil Pollution Act of 1990

The United States Oil Pollution Act of 1990, or OPA, established an extensive regulatory and liability regime for the protection and clean up of the environment from oil spills. OPA affects all owners and operators whose vessels trade in the United States, its territories and possessions or whose vessels operate in waters of the United States, which includes the United States' territorial sea and its 200 nautical mile exclusive economic zone. The United States has also enacted the Comprehensive Environmental Response, Compensation and Liability Act, or CERCLA, which applies to the discharge of hazardous substances other than oil, whether on land or at sea. Both OPA and CERCLA affect our operations.

Under OPA, vessel owners, operators, charterers and management companies are "responsible parties" and are jointly, severally and strictly liable (unless the spill results solely from the act or omission of a third party, an act of God or an act of war) for all containment and removal costs and other damages arising from discharges or threatened discharges of oil from their vessels, including bunkers (fuel). Effective July 31, 2009, the U.S. Coast Guard adjusted the limits of OPA liability for drybulk vessels to the greater of \$1,000 per gross ton or \$854,400 and established a procedure for adjusting the limits for inflation every three years. CERCLA contains a liability scheme that is similar to that under the OPA, and liability under CERCLA is limited to the greater of \$300 per gross ton or \$5 million for vessels carrying a hazardous substance as cargo and the greater of \$300 per gross ton or \$0.5 million for any other vessel. These limits of liability do not apply if an incident was directly caused by violation of applicable U.S. federal safety, construction or operating regulations or by a responsible party's gross negligence or willful misconduct, or if the responsible party fails or refuses to report the incident or to cooperate and assist in connection with oil removal activities. In response to the 2010 oil spill in the Gulf of Mexico resulting from the explosion of the *Deepwater Horizon* drilling rig, bills have been introduced in the U.S. Congress to increase the limits of OPA liability for all vessels.

OPA requires owners and operators of vessels to establish and maintain with the United States Coast Guard evidence of financial responsibility sufficient to meet their potential liabilities under OPA. Under the regulations, vessel owners

and operators may evidence their financial responsibility by showing proof of insurance, surety bond, self-insurance, or guaranty. Upon satisfactory demonstration of financial responsibility, a Certificate of Financial Responsibility, or COFR, is issued by the United States Coast Guard. This certificate must be carried aboard the vessel to comply with these financial responsibility regulations. We have complied with these financial responsibility regulations by obtaining and carrying COFRs for each of our vessels that operate in U.S. waters, currently the M/V *Free Hero*, the M/V *Free Jupiter* and the M/V *Free Maverick*. We may incur additional costs to obtain COFRs for additional vessels, if required, and to comply with increased limits of liability in the future.

OPA specifically permits individual states to impose their own liability regimes with regard to oil pollution incidents occurring within their boundaries, and some states have enacted legislation providing for unlimited liability for oil spills. In some cases, states, which have enacted such legislation, have not yet issued implementing regulations defining vessels owners' responsibilities under these laws. We currently comply, and intend to continue to comply in the future, with all applicable state regulations in the ports where our vessels call. We currently maintain pollution liability coverage as part of our protection and indemnity insurance for each of our vessels in the amount of \$1 billion per incident. If the damages from a catastrophic pollution liability incident exceed our insurance coverage, the payment of those damages may materially decrease our net income.

The United States Clean Water Act

The United States Clean Water Act, or CWA, prohibits the discharge of oil or hazardous substances in navigable waters and imposes strict liability in the form of penalties for any unauthorized discharges. The CWA also imposes substantial liability for the costs of removal, remediation and damages and complements the remedies available under the OPA and CERCLA. Under U.S. Environmental Protection Agency, or EPA, regulations we are required to obtain a CWA permit regulating and authorizing any discharges of ballast water or other wastewaters incidental to our normal vessel operations if we operate within the three-mile territorial waters or inland waters of the United States. The permit, which EPA has designated as the Vessel General Permit for Discharges Incidental to the Normal Operation of Vessels, or VGP, incorporated the then-current U.S. Coast Guard requirements for ballast water management, as well as supplemental ballast water requirements and limits for 26 other specific discharges. Regulated vessels cannot operate in U.S. waters unless they are covered by the VGP. To do so, vessel owners must submit a Notice of Intent, or NOI, at least 30 days before the vessel operates in U.S. waters. To comply with the VGP vessel owners and operators may have to install equipment on their vessels to treat ballast water before it is discharged or implement port facility disposal arrangements or procedures at potentially substantial cost. The VGP also requires states to certify the permit, and certain states have imposed more stringent discharge standards as a condition of their certification. Many of the VGP requirements have already been addressed in our vessels' current ISM Code SMS Plan. We have submitted NOIs for all of our vessels that operate in U.S. waters. As part of a settlement of a lawsuit challenging the VGP, EPA has proposed a new VGP with numerical restrictions on organisms in ballast water discharges. EPA expects to issue the new VGP by March 15, 2013, and it will become effective on December 19, 2013.

Other Environmental Initiatives

The EU has also adopted legislation that: requires member states to impose criminal sanctions for certain pollution events, such as the unauthorized discharge of tank washings. The European Parliament recently endorsed a European Commission proposal to criminalize certain pollution discharges from ships. If the proposal becomes formal EU law, it will affect the operation of vessels and the liability of owners for oil and other pollutional discharges. It is difficult to predict what legislation, if any, may be promulgated by the European Union or any other country or authority.

The Paris Memorandum of Understanding on Port State Control (Paris MoU) to which 27 nations are party adopted the "New Inspection Regime" (NIR) to replace the existing Port State Control system, effective January 1, 2011. The NIR is a significant departure from the previous system, as it is a risk based targeting mechanism that will reward quality vessels with a smaller inspection burden and subject high-risk ships to more in-depth and frequent inspections. The inspection record of a vessel, its age and type, the Voluntary IMO Member State Audit Scheme, and the performance of the flag State and recognized organizations are used to develop the risk profile of a vessel.

The U.S. National Invasive Species Act, or NISA, was enacted in 1996 in response to growing reports of harmful organisms being released into U.S. ports through ballast water taken on by ships in foreign ports. Under NISA, the USCG adopted regulations in July 2004 imposing mandatory ballast water management practices for all vessels equipped with ballast water tanks entering U.S. waters. These requirements can be met by performing mid-ocean ballast exchange, by retaining ballast water on board the ship, or by using environmentally sound alternative ballast water management methods approved by the USCG. (However, mid-ocean ballast exchange is mandatory for ships heading to the Great Lakes or Hudson Bay, or vessels engaged in the foreign export of Alaskan North Slope crude oil.) Mid-ocean ballast exchange is the primary method for compliance with the USCG regulations, since holding ballast water can prevent ships from performing cargo operations upon arrival in the United States, and alternative methods are still under development. Vessels that are unable to conduct mid-ocean ballast exchange due to voyage or safety concerns may discharge minimum amounts of ballast water (in areas other than the Great Lakes and the Hudson River), provided that they comply with record keeping requirements and document the reasons they could not follow the required ballast water management requirements. On March 23, 2012 the USCG adopted ballast water discharge standards that set maximum acceptable discharge limits for living organisms and established standards for ballast water management systems. The regulations became effective on June 21, 2012 and will be phased in between January 1, 2014 and January 1, 2016 for existing vessels, depending on the size of their ballast water tanks and their next drydocking date. Although the USCG ballast water management requirements are consistent with the requirements in EPA's proposed VGP, the USCG intends to review the practicability of implementing even more stringent ballast water discharge standards and publish the results of that review no later than January 1, 2016. In the past absence of federal standards, states enacted legislation or regulations to address invasive species through ballast water and hull cleaning management and permitting requirements. Michigan's ballast water management legislation was upheld by the Sixth Circuit Court of Appeals and California enacted legislation extending its ballast water management program to regulate the management of "hull fouling" organisms attached to vessels and adopted regulations limiting the number of organisms in ballast water discharges. Other states may proceed with the enactment of requirements similar to those of California and Michigan or the adoption of requirements that are more stringent than the EPA and USCG requirements. We could incur additional costs to comply with the new VGP and additional USCG or state ballast water management requirements.

At the international level, the IMO adopted the International Convention for the Control and Management of Ships' Ballast Water and Sediments, or the BWM Convention, in February 2004. The Convention's implementing regulations call for a phased introduction of mandatory ballast water exchange requirements, to be replaced in time with mandatory concentration limits. The BWM Convention will not enter into force until 12 months after it has been adopted by 30 states, the combined merchant fleets of which represent not less than 35% of the gross tonnage of the world's merchant shipping. The Convention has not yet entered into force because a sufficient number of states have failed to adopt it. However, in March 2010, MEPC passed a resolution urging the ratification of the Convention and calling upon those countries that have already ratified it to encourage the installation of ballast water management systems.

If the mid-ocean ballast exchange is made mandatory throughout the United States or at the international level, or if water treatment requirements or options are instituted, the cost of compliance could increase for ocean carriers. Although we do not believe that the costs of compliance with a mandatory mid-ocean ballast exchange would be material, it is difficult to predict the overall impact of such a requirement on our business.

Greenhouse Gas Regulation

The 2005 Kyoto Protocol to the United Nations Framework Convention on Climate Change required adopting countries to implement national programs to reduce emissions of certain greenhouse gases, but emissions from international shipping are not subject to the soon to expire Kyoto Protocol. International negotiations regarding a successor to the Kyoto Protocol are on-going. The IMO's MEPC adopted two new sets of mandatory requirements to address greenhouse gas emissions from vessels at its July 2011 meeting. The EEDI establishes a minimum energy efficiency level per capacity mile and will be applicable to new vessels. The Ship Energy Efficiency Management Plan will be applicable to currently operating vessels of 400 metric tons and above. These requirements entered into force in January 2013 and could cause us to incur additional compliance costs. The IMO is also considering the development of market based mechanisms to reduce greenhouse gas emissions from vessels, as well as sustainable development goals for marine transportation, but it is impossible to predict the likelihood that such measures might be adopted or their potential impacts on our operations at this time. The EU is considering measures including an expansion of the existing EU emissions trading scheme to greenhouse gas emissions from marine vessels, The U.S. EPA Administrator issued a finding that greenhouse gases threaten the public health and safety and has adopted regulations relating to the control of greenhouse gas emissions from certain mobile and stationary sources. Although the EPA findings and regulations do not extend to vessels and vessel engines, the EPA is separately considering a petition from the California Attorney General and environmental groups to regulate greenhouse gas emissions from ocean-going vessels under the CAA. Any passage of climate control legislation or other regulatory initiatives by the IMO, the EU or individual countries in which we operate or any international treaty adopted to succeed the Kyoto Protocol could require us to make significant financial expenditures or otherwise limit our operations that we cannot predict with certainty at this time.

Vessel Security Regulation

Since the terrorist attacks of September 11, 2001, there have been a variety of initiatives intended to enhance vessel security. On November 25, 2002, the Maritime Transportation Security Act of 2002, or MTSA, came into effect. To implement certain portions of the MTSA, in July 2003, the United States Coast Guard issued regulations requiring the implementation of certain security requirements aboard vessels operating in waters subject to the jurisdiction of the United States of America. Similarly, in December 2002, amendments to SOLAS created a new chapter of the convention dealing specifically with maritime security. The new chapter went into effect in July 2004, and imposes various detailed security obligations on vessels and port authorities, most of which are contained in the newly created ISPS Code.

Among the various requirements are:

- on-board installation of automatic information systems, to enhance vessel-to-vessel and vessel-to-shore communications;

- on-board installation of ship security alert systems;
- the development of vessel security plans; and
- compliance with flag state security certification requirements.

The United States Coast Guard regulations, intended to align with international maritime security standards, exempt non-U.S. vessels from MTSA vessel security measures provided such vessels have on board, by July 1, 2004, a valid International Ship Security Certificate that attests to the vessel's compliance with SOLAS security requirements and the ISPS Code. Our vessels are in compliance with the various security measures addressed by the MTSA, SOLAS and the ISPS Code. We do not believe these additional requirements will have a material financial impact on our operations.

Inspection by Classification Societies

The hull and machinery of every commercial vessel must be classed by a classification society authorized by its country of registry. The classification society certifies that a vessel is safe and seaworthy in accordance with the applicable rules and regulations of the country of registry of the vessel and SOLAS.

A vessel must undergo annual surveys, intermediate surveys, dry-dockings and special surveys. In lieu of a special survey, a vessel's machinery may be on a continuous survey cycle, under which the machinery would be surveyed periodically over a five-year period. Our vessels are on special survey cycles for hull inspection and continuous survey cycles for machinery inspection. Every vessel is also required to be dry-docked every two to three years for inspection of the underwater parts of such vessel. If any vessel does not maintain its class and/or fails any annual survey, intermediate survey, dry-docking or special survey, the vessel will be unable to carry cargo between ports and will be unemployable and uninsurable. That could cause us to be in violation of certain covenants in our loan agreements.

At an owner's application, the surveys required for class renewal may be split according to an agreed schedule to extend over the entire period of class. This process is referred to as continuous class renewal.

All areas subject to survey as defined by the classification society are required to be surveyed at least once per class period, unless shorter intervals between surveys are prescribed elsewhere. The period between two subsequent surveys of each area must not exceed five years.

Most insurance underwriters make it a condition for insurance coverage and lending that a vessel be certified as "in class" by a classification society which is a member of the International Association of Classification Societies. Our vessels are certified as being "in class" by their respective classification societies all of which are members of the International Association of Classification Societies.

The table below lists the next dry-docking and special surveys scheduled for our each vessel in our fleet, to the extent such dates are known as of the date of this annual report:

Vessel	Next Intermediate Dry-docking	Next Special Survey Dry-docking
<i>M/V Free Goddess</i>	Third quarter 2013	Third quarter 2015
<i>M/V Free Hero</i>	Third quarter 2013	Third quarter 2015

M/V <i>Free Impala</i>	Fourth quarter 2015	Fourth quarter 2012*
M/V <i>Free Jupiter</i>	Third quarter 2015	Second quarter 2017
M/V <i>Free Knight</i>	Second quarter 2016	Second quarter 2013
M/V <i>Free Maverick</i>	First quarter 2016	First quarter 2013*
M/V <i>Free Neptune</i>	Fourth quarter 2014	Third quarter 2016

* The M/V *Free Impala* and the M/V *Free Maverick* have not yet passed their special survey drydocking and no assurances can be made that the drydockings will be completed.

ISM and ISPS certifications have been awarded to all of our vessels and to the Manager by either the vessel's flag country or a member of the International Association of Classification Societies.

Risk of Loss and Liability Insurance

General

The operation of any cargo vessel includes risks such as mechanical failure, physical damage, collision, property loss, cargo loss or damage and business interruption due to political circumstances in foreign countries, hostilities and labor strikes. In addition, there is always an inherent possibility of marine disaster, including oil spills and other environmental mishaps, and the liabilities arising from owning and operating vessels in international trade. OPA, which imposes virtually unlimited liability upon owners, operators and bareboat charterers of any vessel trading in the exclusive economic zone of the United States of America for certain oil pollution accidents in the United States of America, has made liability insurance more expensive for ship owners and operators trading in the United States of America market. While we believe that our present insurance coverage is adequate, not all risks can be insured, and there can be no guarantee that any specific claim will be paid, or that we will always be able to obtain adequate insurance coverage at reasonable rates.

Hull and Machinery Insurance

We have obtained marine hull and machinery and war risk insurance, which include the risk of actual or constructive total loss, for all of our vessels. The vessels are each covered up to at least their fair market values or such higher amounts as may be required to meet the requirements of any outstanding indebtedness on a particular vessel, with deductibles in amounts of approximately \$250.

Protection and Indemnity Insurance

Protection and indemnity insurance is provided by mutual protection and indemnity associations, or P&I associations, which covers our third-party liabilities in connection with our shipping activities. This includes third-party liability and other related expenses of injury or death of crew, passengers and other third parties, loss or damage to cargo, claims arising from collisions with other vessels, damage to other third-party property, pollution arising from oil or other substances, and salvage, towing and other related costs, including wreck removal. Protection and indemnity insurance is a form of mutual indemnity insurance, extended by protection and indemnity mutual associations, or “clubs.”

Our current protection and indemnity insurance coverage for pollution is \$1 billion per vessel per incident. The 14 P&I associations that comprise the International Group insure approximately 90% of the world’s commercial tonnage and have entered into a pooling agreement to reinsure each association’s liabilities. Each P&I association has capped its exposure to this pooling agreement at \$5.4 billion. As a member of a P&I association, which is a member of the International Group, we are subject to calls payable to the associations based on its claim records as well as the claim records of all other members of the individual associations and members of the pool of P&I associations comprising the International Group.

Loss of Hire Insurance

With the exception of kidnap and ransom insurance and its loss of hire extension (described below), we have not obtained loss of hire insurance for any of our vessels. Loss of hire insurance generally provides coverage against loss of charter hire that result from the loss of use of a vessel. We will review annually whether obtaining and/or maintaining this insurance is cost effective. Our ability to obtain loss of hire insurance is subject to market conditions and general availability.

Kidnap and Ransom

We have kidnap and ransom insurance on a case by case basis, generally when one of our vessels is transitioning in an area where acts of piracy are known to take place. Kidnap and ransom insurance generally provides coverage of ransom paid, including interest if ransom money are through financing products and including delivery expense of ransom, fees of negotiators and crisis management personnel and the cost of reinstatement of replacement crew. The loss of hire extension covers the insured for any hire lost during seizure for a certain number of days that have been agreed on at the inception of the coverage, typically either 90, 120 or 180 days.

Procedures in the Event of an Insured Event

Marine casualties are an inherent risk in the shipping industry. If one of our vessels undergoes a marine casualty, we intend to take prompt action in consultation with the appropriate insurers, as described above, to ascertain the extent of any damage to our vessel, its cargo, the crew, the vessel's ability to complete its charter and any environmental impact and the appropriate steps to try to mitigate the impact of the casualty on our financial condition and results of operations.

Legal Proceedings

Except as disclosed below, we are not and have not been involved in any legal proceedings that have, or have had, a significant effect on our business, financial position, results of operations or liquidity, nor are we aware of any proceedings that are pending or threatened that may have significant effect on our business, financial position, results of operations or liquidity. From time to time, we may be subject to legal proceedings and claims in the ordinary course of business, principally personal injury and property casualty claims. We expect that these claims would be covered by insurance, subject to customary deductibles. Those claims, even if lacking in merit, could result in the expenditure of significant financial and managerial resources.

M/V Free Maverick

On November 5, 2012, the *M/V Free Maverick* was arrested in Morocco in relation to claims against the *M/V Free Maverick* and “sister ships”. Since then, the *M/V Free Maverick* is idle pending resolution in connection with creditors. The owners’ legal counsels were involved and instructed to dispute the arrest orders that had been issued based on invoices for other vessels under the Manager’s management on the basis that were owned by different entities. The appeal was heard in December 2012. The ruling issued in February 2013 was against us and the arrest orders were deemed to be standing. The Company has reached an agreement with the largest creditor and the arrest was subsequently lifted for this specific amount. The Company is also in discussions with the remaining creditors to settle the outstanding balance.

Exchange Controls

Under Marshall Islands law, there are currently no restrictions on the export or import of capital, including foreign exchange controls or restrictions that affect the remittance of dividends, interest or other payments to non-resident holders of our common stock.

Item 4A. Unresolved Staff Comments

None.

Item 5. Operating and Financial Review and Prospects

The following management’s discussion and analysis should be read in conjunction with our historical consolidated financial statements and accompanying notes included elsewhere in this report. This discussion contains forward-looking statements that reflect our current views with respect to future events and financial performance. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of various factors, such as those set forth in the section entitled “Risk Factors” and elsewhere in this report.

The historical consolidated financial results of FreeSeas described below are presented, unless otherwise stated, in thousands of United States dollars.

Overview

We are an international drybulk shipping company incorporated under the laws of the Republic of the Marshall Islands with principal executive offices in Athens, Greece. Our fleet currently consists of six Handysize vessels and one Handymax vessel that carry a variety of drybulk commodities, including iron ore, grain and coal, which are referred to as “major bulks,” as well as bauxite, phosphate, fertilizers, steel products, cement, sugar and rice, or “minor bulks.” As of April 2, 2013, the aggregate dwt of our operational fleet is approximately 197,200 dwt and the average age of our fleet is 15.5 years.

Our investment and operational focus is in the Handysize sector, which is generally defined as less than 40,000 dwt of carrying capacity. Handysize vessels are, we believe, more versatile in the types of cargoes that they can carry and trade routes they can follow, and offer less volatile returns than larger vessel classes. We believe this segment also offers better demand and supply demographics than other drybulk asset classes.

We have contracted the management of our fleet to Free Bulkers S.A., referred to as our Manager, an entity controlled by Ion G. Varouxakis, our Chairman, President and Chief Executive Officer, and one of our principal shareholders. Our Manager provides technical management of our fleet, commercial management of our fleet, financial reporting and accounting services and office space. While the Manager is responsible for finding and arranging charters for our vessels, the final decision to charter our vessels remains with us.

Recent Developments

Effective January 1, 2013, Sherb & Co., LLP, or Sherb, combined its practice with RBSM LLP (“RBSM”), and going forward, RBSM will be the Company’s new independent registered public accounting firm.

As of January 9, 2013, the Company has sold the remaining 142,362 shares of its common stock to Dutchess, under the Dutchess Agreement for aggregate proceeds of \$106.

On January 15, 2013, the Company issued 137,500 shares of its common stock (the "Settlement Shares") to Hanover Holdings I, LLC ("Hanover") in connection with a stipulation of settlement (the "Settlement Agreement") of an outstanding litigation claim. The Settlement Agreement provides that the Settlement Shares will be subject to adjustment on the 36th trading day following the date on which the Settlement Shares were initially issued to reflect the intention of the parties that the total number of shares of Common Stock to be issued to Hanover pursuant to the Settlement Agreement be based upon a specified discount to the trading volume weighted average price (the "VWAP") of the Common Stock for a specified period of time. Specifically, the total number of shares of Common Stock to be issued to Hanover pursuant to the Settlement Agreement shall be equal to the quotient obtained by dividing (i) \$305,485.59 by (ii) 70% of the VWAP of the Common Stock over the 35-trading day period following the date of issuance of the Settlement Shares (the "True-Up Period"), rounded up to the nearest whole share (the "VWAP Shares"). The Settlement Agreement further provides that if, at any time and from time to time during the True-Up Period, Hanover reasonably believes that the total number of Settlement Shares previously issued to Hanover shall be less than the total number of VWAP Shares to be issued to Hanover or its designee in connection with the Settlement Agreement, Hanover may, in its sole discretion, deliver one or more written notices to the Company, at any time and from time to time during the True-Up Period, requesting that a specified number of additional shares of Common Stock promptly be issued and delivered to Hanover or its designee and the Company will upon such request reserve and issue the number of additional shares of Common Stock requested to be so issued and delivered in the notice (all of which additional shares shall be considered "Settlement Shares" for purposes of the Settlement Agreement). On January 18 and 29, 2013 the Company delivered additional 40,000 and 8,284 shares, respectively, to Hanover.

On January 18, 2013, the Company's Board of Directors approved the issuance of an additional 641,639 shares of the Company's common stock to the Manager in payment of \$809 in unpaid fees due to the Manager for November and December 2012 and January 2013 under the management and services agreements with the Company. The number of shares to be issued to the Manager was based on the closing prices of the Company's common stock on the first day of each month, which are the dates the management and services fees were due and payable. The Board also approved the issuance of an aggregate of 53,020 shares of the Company's common stock to its non-executive directors in payment of \$48 in unpaid Board fees for the fourth quarter of 2012. The aggregate number of shares to be issued to the directors was based on the closing price of the Company's common stock on the last day of the fourth quarter of 2012, which is the date that the Board fees were due and payable. All of the foregoing shares will be restricted shares under applicable U.S. securities laws.

On January 24, 2013, the Company entered into an Investment Agreement with Granite, pursuant to which, for a 36-month period, the Company has the right to sell up to 395,791 shares of its common stock, which equals approximately 24% of its 1,682,693 shares outstanding as of January 24, 2013. The Investment Agreement entitles the Company to sell and obligates Granite to purchase, from time to time over a period of 36 months (the "Open Period"), 395,791 shares of the Company's common stock, subject to conditions the Company must satisfy as set forth in the Investment Agreement. For each share of common stock purchased under the Investment Agreement, Granite will pay 98% of the lowest daily volume weighted average price during the pricing period, which is the five consecutive trading days commencing on the day the Company delivers a put notice to Granite. Each such put may be for an amount not to exceed the greater of \$500 or 200% of the average daily trading volume of our common stock for the three consecutive trading days prior to the put notice date, multiplied by the average of the three daily closing prices immediately preceding the put notice date. In no event, however, shall the number of shares of common stock issuable to Granite pursuant to a put cause the aggregate number of shares of common stock beneficially owned by Granite and its affiliates to exceed 9.99% of the outstanding common stock at the time. If the Company was to sell all 395,791 shares at a purchase price determined as described above, based on a put notice date of January 23, 2013, the Company would receive an aggregate of approximately \$767 in proceeds from the sale of those shares.

On January 24, 2013, the Company received notice from FBB, according to which failure to (i) pay the \$4,188 repayment installment due in December 2012, (ii) pay accrued interest and (iii) failure to pay default interest constitute an event of default. The Company is in discussions to permanently amend the amortization schedule and reach an agreement on the unpaid principal and interest

On February 13, 2013, we issued 185,000 shares of our common stock (the “Second Settlement Shares”) to Hanover in connection with a second stipulation of settlement (the “Second Settlement Agreement”) of an outstanding litigation claim. The Second Settlement Agreement provides that the Second Settlement Shares will be subject to adjustment on the 36th trading day following the date on which the Second Settlement Shares were initially issued to reflect the intention of the parties that the total number of shares of Common Stock to be issued to Hanover pursuant to the Second Settlement Agreement be based upon a specified discount to the trading volume weighted average price (the “VWAP”) of the Common Stock for a specified period of time. Specifically, the total number of shares of Common Stock to be issued to Hanover pursuant to the Second Settlement Agreement shall be equal to the quotient obtained by dividing (i) \$740,651.57 by (ii) 75% of the VWAP of the Common Stock over the 35-trading day period following the date of issuance of the Second Settlement Shares (the “Second True-Up Period”), rounded up to the nearest whole share (the “Second VWAP Shares”). The Second Settlement Agreement further provides that if, at any time and from time to time during the Second True-Up Period, Hanover reasonably believes that the total number of Second Settlement Shares previously issued to Hanover shall be less than the total number of Second VWAP Shares to be issued to Hanover or its designee in connection with the Second Settlement Agreement, Hanover may, in its sole discretion, deliver one or more written notices to the Company, at any time and from time to time during the Second True-Up Period, requesting that a specified number of additional shares of Common Stock promptly be issued and delivered to Hanover or its designee, and the Company will upon such request reserve and issue the number of additional shares of Common Stock requested to be so issued and delivered in the notice (all of which additional shares shall be considered “Second Settlement Shares” for purposes of the Second Settlement Agreement). On February 19, 2013, the Company issued and delivered to Hanover 90,000 additional Second Settlement Shares, on February 25, 2013, the Company issued and delivered to Hanover another 90,000 additional Second Settlement Shares, on February 26, 2013 the Company issued and delivered to Hanover another 90,000 additional Second Settlement Shares, on February 27, 2013, the Company issued and delivered to Hanover another 100,000 additional Second Settlement Shares, on February 28, 2013, the Company issued and delivered to Hanover another 100,000 additional Second Settlement Shares and on March 4, 2013, the Company issued and delivered to Hanover another 100,000 additional Second Settlement Shares. At the end of the Second True-Up Period, the Company issued and delivered 31,755 additional Second Settlement Shares to Hanover on March 6, 2013.

On January 22, 2013, the Company's Board of Directors authorized a reverse stock split at a ratio of 1 for 10, which was effective at 8:00 am on February 14, 2013, New York time. The reverse stock split consolidates 10 shares of common stock into one share of common stock at a par value of \$0.001 per share. As a result of the reverse stock split, the number of outstanding common shares has been reduced from 18,759,778 to 1,875,978 subject to adjustment for fractional shares. The reverse stock split did not affect any shareholder's ownership percentage of the Company's common shares, except to the limited extent that the reverse stock split resulted in any shareholder owning a fractional share. Fractional shares of common stock were rounded up to the nearest whole share.

On January 31, 2013, the Company entered into a convertible promissory note of \$153.5 with Asher Enterprises, Inc. at the rate of eight percent per annum and with maturity date November 1, 2013. One hundred eighty days following the date of this note, the holder has the right to convert all or any part of the outstanding and unpaid principal amount of the note into Company's common shares at a 35% discount rate.

On February 13, 2013, the Company received notification from NASDAQ that effective February 19, 2013, the Company's common stock would be transferred from the NASDAQ Global Market to the NASDAQ Capital Market. Thus, on February 14, 2013, the Company received notification from NASDAQ that the appeals hearing, scheduled for February 21, 2013, was cancelled. In accordance with Marketplace Rule 5810(c)(3)(A), the Company has until June 17, 2013, which is 180 calendar days from the date the initial compliance period ended, to regain compliance with the minimum bid price rule. To regain compliance, the closing bid price of the Company's common stock must be at or above \$1.00 per share for a minimum of 10 consecutive business days. NASDAQ may, in its discretion, require the Company to maintain a bid price of at least \$1.00 per share for a period in excess of 10 consecutive business days, but generally no more than 20 consecutive business days, before determining that the Company has demonstrated an ability to maintain long-term compliance. If the Company does not regain compliance by June 17, 2013, NASDAQ will provide written notification to the Company that the Company's common stock may be delisted. At that time, the Company may then appeal the delisting determination to a hearings panel. There can be no assurances that the Company will be able to regain compliance with the NASDAQ minimum bid price rule and thereby maintain the listing of its common stock.

On February 15, 2013, the Company entered into a termination agreement of the Standby Equity Distribution Agreement, or SEDA with YA Global. As a result, the outstanding fees of \$10 owed to YA Global under the SEDA were written off.

On February 19, 2013, the Company issued the press release announcing the approval of the transfer of the listing of the Company's common stock to the NASDAQ Capital Market, the granting of the additional extension to comply with the minimum bid price requirement and the cancellation of the NASDAQ appeal hearing.

On February 28, 2013, pursuant to the approval of the Company's Board of Directors at its January 18, 2013 meeting, the Company issued 641,639 shares of its common stock to the Manager in payment of \$809 in unpaid fees due to the Manager for November and December 2012 and January 2013 and 41,909 shares of its common stock to its non-executive directors in payment of \$48 in unpaid Board fees for the fourth quarter of 2012.

In January, February and March 2013, the Company did not pay the monthly repayments of \$20 for each of Facility A and Facility B with Deutsche Bank, totaling \$120 along with accrued interest due. The Company is in discussions with Deutsche Bank to reach a mutually beneficial agreement.

In February and March and in April 2013, the Company did not pay the interest due of \$124 and the interest rate swaps due of \$80, respectively, with the Credit Suisse facility. The Company is in discussions with the bank to arrange a settlement of these.

On March 20, 2013, the Company issued and delivered to Hanover 350,000 shares (the "Settlement Shares") of the Company's common stock, \$0.001 par value. Giving effect to such issuance, the Settlement Shares represent approximately 9.77% of the total number of shares of Common Stock presently outstanding. The Settlement Agreement provides that the Settlement Shares will be subject to adjustment on the trading day immediately following the Calculation Period (as defined below) to reflect the intention of the parties that the total number of shares of Common Stock to be issued to Hanover pursuant to the Settlement Agreement be based upon a specified discount to the trading volume weighted average price (the "VWAP") of the Common Stock for a specified period of time subsequent to the Court's entry of the Order. Specifically, the total number of shares of Common Stock to be issued to Hanover pursuant to the Settlement Agreement shall be equal to the quotient obtained by dividing (i) \$1,264,656.12 by (ii) 70% of the VWAP of the Common Stock over the 35-consecutive trading day period immediately following the date of issuance of the initial Settlement Shares (or such shorter trading-day period as may be determined by Hanover in its sole discretion by delivery of written notice to the Company) (the "Calculation Period"), rounded up to the nearest whole share (the "VWAP Shares"). As a result, the Company ultimately may be required to issue to Hanover substantially more shares of Common Stock than the number of Settlement Shares initially issued (subject to the limitations described below). The Settlement Agreement further provides that if, at any time and from time to time during the Calculation Period, Hanover reasonably believes that the total number of Settlement Shares previously issued to Hanover shall be less than the total number of VWAP Shares to be issued to Hanover or its designee in connection with the Settlement Agreement, Hanover may, in its sole discretion, deliver one or more written notices to the Company, at any time and from time to time during the Calculation Period, requesting that a specified number of additional shares of Common Stock promptly be issued and delivered to Hanover or its designee (subject to the limitations described below), and the Company will upon such request reserve and issue the number of additional shares of Common Stock requested to be so issued and delivered in the notice (all of which additional shares shall be considered "Settlement Shares" for purposes of the Settlement Agreement). At the end of the Calculation Period, (i) if the number of VWAP Shares exceeds the number of Settlement Shares issued, then the Company will issue to Hanover or its designee additional shares of Common Stock equal to the difference between the number of VWAP Shares and the number of Settlement Shares, and (ii) if the number of VWAP Shares is less than the number of Settlement Shares, then Hanover or its designee will return to the Company for cancellation that number of shares of Common Stock equal to the difference between the number of VWAP Shares and the number of Settlement Shares. Hanover may sell the shares of Common Stock issued to it or its designee in connection with the Settlement Agreement at any time without restriction, even during the Calculation Period. On March 21, 2013, the Company issued and delivered to Hanover 390,000 additional Settlement Shares, on March 22, 2013, the Company issued and delivered to Hanover another 420,000 additional Settlement Shares and on March 26, 2013 the Company issued and delivered to Hanover another 300,000 additional Settlement Shares. At the end of the True-Up Period, the Company issued and delivered 12,894 additional Settlement Shares to Hanover on March 26, 2013.

As of April 2, 2013, the Company has sold all the 395,791 shares of its common stock to Granite under the Investment Agreement for aggregate proceeds of \$458.

On April 4, 2013, the Company received notification from NASDAQ that it has regained compliance with the NASDAQ Listing Rule 5450(a)(1) (the "Minimum Bid Price Rule") requirement for continued listing on NASDAQ, as the bid price of the Company's common stock closed at or above \$1.00 per share for a minimum of 10 consecutive business days.

On April 8, 2013, the Company entered into a convertible promissory note of \$103.5 with Asher Enterprises, Inc. at the rate of eight percent per annum and with maturity date nine months after issuance. One hundred eighty days following the date of this note, the holder has the right to convert all or any part of the outstanding and unpaid principal amount of the note into Company's common shares at a 35% discount rate.

Employment and Charter Rates

All of our vessels are currently being chartered in the spot market. The following table details the vessels in our fleet as of April 10, 2013:

Vessel Name	Type	Built	Dwt	Employment
M/V Free Jupiter	Handymax	2002	47,777	About 20-25 day time charter trip at \$4,700 per day through May 2013
M/V Free Knight	Handysize	1998	24,111	About 70-80 day time charter trip at \$4,500 per day through April 2013
M/V Free Maverick	Handysize	1998	23,994	Idle pending resolution in connection with dispute with creditors
M/V Free Impala	Handysize	1997	24,111	Laid-up
M/V Free Neptune	Handysize	1996	30,838	About 65 day time charter trip at \$6,500 per day through April 2013
M/V Free Hero	Handysize	1995	24,318	About 20-25 day time charter trip at \$5,400 per day through April 2013
M/V Free Goddess	Handysize	1995	22,051	Being surveyed pending commencement of repairs after pirate seizure

On October 11, 2012, we announced that all 21 crew members of the M/V *Free Goddess* are reported safe and well after the vessel's release by her hijackers. The M/V *Free Goddess* had been hijacked by Somali pirates on February 7, 2012 while transiting the Indian Ocean eastbound. The vessel was on a time charter trip at the time she was hijacked. Under the charterparty agreement, the BIMCO Piracy clause was applied, which provided among other things, for the charterers to have the vessel covered with kidnap and ransom insurance and loss of hire insurance. The vessel was also covered by the war risk underwriters, who confirmed cover. We commenced arbitration proceedings with the charterer due to the charterer not fulfilling its obligations under the charterparty agreement. The proceedings were concluded and the award was in our favor. Thereafter, we reached a settlement with the charterer pursuant to which the charterer agreed to pay \$800. Since then, the vessel is being surveyed pending commencement of temporary repairs at the port of refuge.

Acquisition of Vessels

From time to time, as opportunities arise and depending on the availability of financing, we intend to acquire additional secondhand drybulk carriers. When a vessel is acquired free of charter, we enter into a new charter contract. The shipping industry uses income days (also referred to as "voyage" or "operating" days) to measure the number of days in a period during which vessels actually generate revenues.

Consistent with shipping industry practice, we treat the acquisition of a vessel (whether acquired with or without a charter) as the acquisition of an asset rather than a business. When we acquire a vessel, we conduct, also consistent with shipping industry practice, an inspection of the physical condition of the vessel, unless practical considerations do not allow such an inspection. We also examine the vessel's classification society records. We do not obtain any historical operating data for the vessel from the seller. We do not consider that information material to our decision on acquiring the vessel.

Prior to the delivery of a purchased vessel, the seller typically removes from the vessel all records and log books, including past financial records and accounts related to the vessel. Upon the change in ownership, the technical management agreement between the seller's technical manager and the seller is automatically terminated and the vessel's trading certificates are revoked by its flag state, in the event the buyer determines to change the vessel's flag state.

When a vessel has been under a voyage charter, the seller delivers the vessel free of charter to the buyer. When a vessel is under time charter and the buyer wishes to assume that charter, the buyer cannot acquire the vessel without the charterer's consent and an agreement between the buyer and the charterer for the buyer to assume the charter. The purchase of a vessel does not in itself transfer the charter because the charter is a separate service agreement between the former vessel owner and the charterer.

When we acquire a vessel and want to assume or renegotiate a related time charter, we must take the following steps:

- Obtain the charterer's consent to us as the new owner;
- Obtain the charterer's consent to a new technical manager;
- Obtain the charterer's consent to a new flag for the vessel, if applicable;
- Arrange for a new crew for the vessel;
- Replace all hired equipment on board the vessel, such as gas cylinders and communication equipment;
- Negotiate and enter into new insurance contracts for the vessel through our own insurance brokers;

Register the vessel under a flag state and perform the related inspections in order to obtain new trading certificates from the flag state, if we change the flag state;

Implement a new planned maintenance program for the vessel; and

Ensure that the new technical manager obtains new certificates of compliance with the safety and vessel security regulations of the flag state.

Business Components and Activities

Our business comprises the following primary components:

Employment and operation of our drybulk carriers; and

Management of the financial, general and administrative elements involved in the ownership and operation of our drybulk vessels.

The employment and operation of our vessels involve the following activities:

Vessel maintenance and repair;

Planning and undergoing dry-docking, special surveys and other major repairs;

Organizing and undergoing regular classification society surveys;

Crew selection and training;

Vessel spares and stores supply;

Vessel bunkering;

Contingency response planning;

Onboard safety procedures auditing;

Accounting;

Vessel insurance arrangements;

Vessel chartering;

Vessel hire management; and

Vessel performance monitoring.

Our Fleet—Illustrative Comparison of Possible Excess of Carrying Value Over Estimated Charter-Free Market Value of Certain Vessels

In “—Critical Accounting Policies—Impairment of Long Lived Assets,” we discuss our policy for impairing the carrying values of our vessels. Historically, the market values of vessels have experienced volatility, which from time to time may be substantial. As a result, the charter-free market value, or basic market value, of certain of our vessels may have declined below those vessels’ carrying value, even though we would not impair those vessels’ carrying value under our accounting impairment policy, due to our belief that future undiscounted cash flows expected to be earned by such vessels over their operating lives would exceed such vessels’ carrying amounts. Based on: (i) the carrying value of each of our vessels as of December 31, 2012 and (ii) what we believe the charter free market value of each of our vessels was as of December 31, 2012, the aggregate carrying value of three of the vessels in our fleet as of December 31, 2012 exceeded their aggregate charter-free market value by approximately \$55.8 million, as noted in the table below. This aggregate difference represents the approximate analysis of the amount by which we believe we would have to reduce our net income if we sold all of such vessels at December 31, 2012, on industry standard terms, in cash transactions, and to a willing buyer where we were not under any compulsion to sell, and where the buyer was not under any compulsion to buy. For purposes of this calculation, we have assumed that these vessels would be sold at a price that reflects our estimate of their charter-free market values as of December 31, 2012. However, as of December 31, 2012 and as of the date of this report, we were not and are not holding any of these vessels for sale.

Our estimates of charter-free market value assume that our vessels are all in good and seaworthy condition without need for repair and if inspected would be certified in class without notations of any kind. Our estimates are based on information available from various industry sources, including:

reports by industry analysts and data providers that focus on our industry and related dynamics affecting vessel values;

- news and industry reports of similar vessel sales;

news and industry reports of sales of vessels that are not similar to our vessels where we have made certain adjustments in an attempt to derive information that can be used as part of our estimates;

approximate market values for our vessels or similar vessels that we have received from shipbrokers, whether solicited or unsolicited, or that shipbrokers have generally disseminated;

- offers that we may have received from potential purchasers of our vessels; and

vessel sale prices and values of which we are aware through both formal and informal communications with shipowners, shipbrokers, industry analysts and various other shipping industry participants and observers.

As we obtain information from various industry and other sources, our estimates of basic market value are inherently uncertain. In addition, vessel values are highly volatile; as such, our estimates may not be indicative of the current or future charter-free market value of our vessels or prices that we could achieve if we were to sell them. We also refer you to the risk factor in “Item 3. Key Information—D. Risk Factors— The market values of our vessels have declined and may further decrease, and we may incur losses when we sell vessels or we may be required to write down their carrying value, which may adversely affect our earnings”.

Drybulk Vessels	DWT	Year Built	Carrying Value as of 12/31/2012 (in million USD)
<i>Free Hero*</i>	24,318	1995	\$ 6.0
<i>Free Jupiter*</i>	47,777	2002	\$ 14.0
<i>Free Goddess</i>	22,051	1995	\$ 17.4 **
<i>Free Impala*</i>	24,111	1997	\$ 6.5
<i>Free Knight</i>	24,111	1998	\$ 29.5 **
<i>Free Maverick</i>	23,994	1998	\$ 28.6 **

<i>Free Neptune*</i>	30,838	1996	\$ 8.0
Total	197,200		\$ 110.0

* Vessels classified as held for sale.

Indicates drybulk carriers for which we believe, as of December 31, 2012, the basic charter-free market value is **lower than the vessel's carrying value. We believe that the aggregate carrying value of these vessels exceeds their aggregate basic charter-free market value by approximately \$55.8 million.

Critical Accounting Policies

The discussion and analysis of our financial condition and results of operations is based upon our consolidated financial statements, which have been prepared in accordance with U.S. GAAP. The preparation of those financial statements requires us to make estimates and judgments that affect the reported amounts of assets and liabilities, revenues and expenses and related disclosure at the date of our financial statements. Actual results may differ from these estimates under different assumptions and conditions. Critical accounting policies are those that reflect significant judgments of uncertainties and potentially result in materially different results under different assumptions and conditions. We have described below what we believe are our most critical accounting policies, because they generally involve a comparatively higher degree of judgment in their application. For a description of all our significant accounting policies, see Note 2 to our consolidated financial statements.

Impairment of Long-lived Assets: The Company follows the guidance under ASC 360, “Property, Plant and Equipment,” which addresses financial accounting and reporting for the impairment or disposal of long-lived assets. The standard requires that, long-lived assets and certain identifiable intangibles held and used or disposed of by an entity be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. When the estimate of undiscounted cash flows, excluding interest charges, expected to be generated by the use of the asset is less than its carrying amount, the Company should evaluate the asset for an impairment loss. Measurement of the impairment loss is based on the fair value of the asset which is determined based on management estimates and assumptions and by making use of available market data. The fair values are determined through Level 2 inputs of the fair value hierarchy as defined in ASC 820 “Fair value measurements and disclosures” and are derived principally from or by corroborated or observable market data. Inputs, considered by management in determining the fair value, include independent broker’s valuations, FFA indices, average charter hire rates and other market observable data that allow value to be determined. The Company evaluates the carrying amounts and periods over which long-lived assets are depreciated to determine if events have occurred which would require modification to their carrying values or useful lives. In evaluating useful lives and carrying values of long-lived assets, management reviews certain indicators of potential impairment, such as future undiscounted net operating cash flows, vessel sales and purchases, business plans and overall market conditions. In performing the recoverability tests the Company determines future undiscounted net operating cash flows for each vessel and compares it to the vessel’s carrying value. The future undiscounted net operating cash flows are determined by considering the Company’s alternative courses of action, estimated vessel’s utilization, its scrap value, the charter revenues from existing time charters for the fixed fleet days and an estimated daily time charter equivalent for the unfixed days over the remaining estimated useful life of the vessel, net of vessel operating expenses adjusted for inflation, and cost of scheduled major maintenance. When the Company’s estimate of future undiscounted net operating cash flows for any vessel is lower than the vessel’s carrying value, the carrying value is written down, by recording a charge to operations, to the vessel’s fair market value.

As of December 31, 2012, the Company performed an impairment assessment of its long-lived assets by comparing the undiscounted net operating cash flows for each vessel to its respective carrying value. The significant factors and assumptions the Company used in each future undiscounted net operating cash flow analysis included, among others, operating revenues, commissions, off-hire days, dry-docking costs, operating expenses and management fee estimates. Revenue assumptions were based on contracted time charter rates up to the end of life of the current contract of each vessel as well as Forward Freight Agreements (FFAs) and market historical average time charter rates for the remaining life of the vessel after the completion of the current contracts. In addition, the Company used an annual operating expenses escalation factor and an estimate of off hire days. All estimates used and assumptions made were in accordance with the Company’s internal budgets and historical experience of the shipping industry. The Company’s assessment concluded that for vessels that are intended to be held and used no impairment existed as of December 31, 2012, as the future undiscounted net operating cash flows per vessel exceeded the carrying value of each vessel. For the vessels for which alternative courses of action (including their sale) are under consideration, an impairment charge of \$12,480 was recognized in 2012 and reflected in the accompanying consolidated statement of operations.

Vessels’ Depreciation: The cost of the Company’s vessels is depreciated on a straight-line basis over the vessels’ remaining economic useful lives from the acquisition date, after considering the estimated residual value (vessel’s residual value is equal to the product of its lightweight tonnage and estimated scrap rate). Effective April 1, 2009, and following management’s reassessment of the useful lives of the Company’s assets, the fleet useful life was increased from 27 to 28 years since the date of initial delivery from the shipyard. Management’s estimate was based on the

current vessels' operating condition, as well as the conditions prevailing in the market for the same type of vessels.

Accounting for Special Survey and Dry-docking Costs: The Company follows the deferral method of accounting for special survey and dry-docking costs, whereby actual costs incurred are deferred and are amortized over periods of five and two and a half years, respectively. If special survey or dry-docking is performed prior to the scheduled date, the remaining un-amortized balances are immediately written-off. In the accompanying financial statements, costs deferred are presented on a consistent basis and are limited to actual costs incurred at the yard, paints, class renewal expenses, and parts used in the dry docking or special survey. Indirect costs and/or costs related to ordinary maintenance, carried out while at dry dock, are expensed when incurred as they do not provide any future economic benefit. Unamortized dry-docking and special survey costs of vessels that are sold are written off at the time of the respective vessels' sale and are included in the calculation of the resulting gain or loss from such sale.

Accounting for Revenue and Expenses: Revenue is recorded when services are rendered, the Company has a signed charter agreement or other evidence of an arrangement, the price is fixed or determinable, and collection is reasonably assured. A voyage charter involves the carriage of a specific amount and type of cargo from specific load port(s) to specific discharge port(s), subject to various cargo handling terms, in return for payment of an agreed upon freight rate per ton of cargo. A time charter involves placing a vessel at the charterers' disposal for a period of time during which the charterer uses the vessel in return for the payment of a specified daily hire rate. Short period charters for less than three months are referred to as spot charters. Time charters extending three months to a year are generally referred to as medium term charters. All other time charters are considered long term. Voyage revenues for the transportation of cargo are recognized ratably over the estimated relative transit time of each voyage. A voyage is deemed to commence when a vessel is available for loading of its next fixed cargo and is deemed to end upon the completion of the discharge of the current cargo. Revenues from time chartering of vessels are accounted for as operating leases and are thus recognized on a straight line basis as the average revenue over the rental periods of such charter agreements, as service is provided. Voyage expenses, primarily consisting of port, canal and bunker expenses that are unique to a particular charter, are paid for by the charterer under time charter arrangements or by the Company under voyage charter arrangements, except for commissions, which are always paid for by the Company, regardless of charter type. All voyage and vessel operating expenses are expensed as incurred, except for commissions. Commissions are deferred over the related voyage charter period to the extent revenue has been deferred since commissions are earned as the Company's revenues are earned. Probable losses on voyages in progress are provided for in full at the time such losses can be estimated.

Important Measures for Analyzing Results of Operations

We believe that the important measures for analyzing trends in the results of our operations consist of the following:

Ownership days. We define ownership days as the total number of calendar days in a period during which each vessel in the fleet was owned by us. Ownership days are an indicator of the size of the fleet over a period and affect both the amount of revenues earned and the amount of expenses that we incur during that period.

Available days. We define available days as the number of ownership days less the aggregate number of days that our vessels are offhire due to major repairs, dry-dockings or special or intermediate surveys. The shipping industry uses available days to measure the number of ownership days in a period during which vessels are actually capable of generating revenues.

Operating days. We define operating days as the number of available days in a period less the aggregate number of days that vessels are off-hire due to any reason, including unforeseen circumstances. The shipping industry uses operating days to measure the aggregate number of days in a period during which vessels could actually generate revenues.

•

Fleet utilization. We calculate fleet utilization by dividing the number of operating days during a period by the number of available days during that period. The shipping industry uses fleet utilization to measure a company's efficiency properly operating its vessels and minimizing the amount of days that its vessels are off-hire for any unforeseen reason.

Off-hire. The period a vessel is unable to perform the services for which it is required under a charter. Off-hire periods typically include days spent undergoing repairs and dry-docking, whether or not scheduled.

Time charter. A time charter is a contract for the use of a vessel for a specific period of time during which the charterer pays substantially all of the voyage expenses, including port costs, canal charges and bunkers expenses. The vessel owner pays the vessel operating expenses, which include crew wages, insurance, technical maintenance costs, spares, stores and supplies and commissions on gross voyage revenues. Time charter rates are usually fixed during the term of the charter. Prevailing time charter rates do fluctuate on a seasonal and year-to-year basis and may be substantially higher or lower from a prior time charter agreement when the subject vessel is seeking to renew the time charter agreement with the existing charterer or enter into a new time charter agreement with another charterer. Fluctuations in time charter rates are influenced by changes in spot charter rates.

Voyage charter. A voyage charter is an agreement to charter the vessel for an agreed per-ton amount of freight from specified loading port(s) to specified discharge port(s). In contrast to a time charter, the vessel owner is required to pay substantially all of the voyage expenses, including port costs, canal charges and bunkers expenses, in addition to the vessel operating expenses.

Time charter equivalent (TCE). The time charter equivalent, or TCE, equals voyage revenues minus voyage expenses divided by the number of operating days during the relevant time period, including the trip to the loading port. TCE is a non-GAAP, standard seaborne transportation industry performance measure used primarily to compare period-to-period changes in a seaborne transportation company's performance despite changes in the mix of charter types (i.e., spot charters, time charters and bareboat charters) under which the vessels may be employed during a specific period.

Adjusted EBITDA represents net earnings before taxes, depreciation and amortization, amortization of deferred revenue, (gain)/loss on derivative instruments, stock-based compensation expense, vessel impairment loss, write-off of advances for vessels under construction, interest and finance cost net, provision and write-offs of insurance claims and bad debts and (gain)/loss on sale of vessel. Under the laws of the Marshall Islands, we are not subject to tax on international shipping income. However, we are subject to registration and tonnage taxes, which have been included in vessel operating expenses. Accordingly, no adjustment for taxes has been made for purposes of calculating Adjusted EBITDA. Adjusted EBITDA is a non-GAAP measure and does not represent and should not be considered as an alternative to net income or cash flow from operations, as determined by U.S. GAAP, and our calculation of Adjusted EBITDA may not be comparable to that reported by other companies. The shipping industry is capital intensive and may involve significant financing costs. The Company uses Adjusted EBITDA because it presents useful information to management regarding the Company's ability to service and/or incur indebtedness by excluding items that we do not believe are indicative of our core operating performance, and therefore is an alternative measure of our performance. The Company also believes that Adjusted EBITDA is useful to investors because it is frequently used by securities analysts, investors and other interested parties in the evaluation of companies in our industry. Adjusted EBITDA has limitations as an analytical tool, however, and should not be considered in isolation or as a substitute for analysis of the Company's results as reported under U.S. GAAP. Some of these limitations are: (i) Adjusted EBITDA does not reflect changes in, or cash requirements for, working capital needs; and (ii) although depreciation and amortization are non-cash charges, the assets being depreciated and amortized may have to be replaced in the future, and Adjusted EBITDA does not reflect any cash requirements for such capital expenditures.

Revenues

Our revenues were driven primarily by the number of vessels we operate, the number of operating days during which our vessels generate revenues, and the amount of daily charter hire that our vessels earn under charters. These, in turn, are affected by a number of factors, including the following:

The nature and duration of our charters;

The amount of time that we spent repositioning its vessels;

The amount of time that our vessels spent in dry-dock undergoing repairs;

Maintenance and upgrade work;

The age, condition and specifications of our vessels;

The levels of supply and demand in the drybulk carrier transportation market; and

Other factors affecting charter rates for drybulk carriers under voyage charters.

A voyage charter is generally a contract to carry a specific cargo from a load port to a discharge port for an agreed-upon total amount. Under voyage charters, voyage expenses such as port, canal and fuel costs are paid by the vessel owner. A trip time charter is a short-term time charter for a voyage between load port(s) and discharge port(s) under which the charterer pays fixed daily hire rate on a semi-monthly basis for use of the vessel. A period time charter is charter for a vessel for a fixed period of time at a set daily rate. Under trip time charters and time charters, the charterer pays voyage expenses. Under all three types of charters, the vessel owners pay for vessel operating expenses, which include crew costs, provisions, deck and engine stores, lubricating oil, insurance, maintenance and repairs. The vessel owners are also responsible for each vessel's dry-docking and intermediate and special survey costs.

Vessels operating on period time charters provide more predictable cash flows, but can yield lower profit margins than vessels operating in the spot charter market for single trips during periods characterized by favorable market conditions.

Vessels operating in the spot charter market generate revenues that are less predictable, but can yield increased profit margins during periods of improvements in drybulk rates. Spot charters also expose vessel owners to the risk of declining drybulk rates and rising fuel costs. Our vessels were chartered in the spot market during the year ended December 31, 2012.

A standard maritime industry performance measure is the TCE. TCE rates are defined as our time charter revenues less voyage expenses during a period divided by the number of our operating days during the period, which is consistent with industry standards. Voyage expenses include port charges, bunker (fuel oil and diesel oil) expenses, canal charges and commissions. Our average TCE rate for financial year 2010, 2011 and 2012 was \$15,742, \$9,408 and \$4,515 respectively.

Vessel Operating Expenses

Vessel operating expenses include crew wages and related costs, the cost of insurance, expenses relating to repairs and maintenance, the costs of spares and consumable stores, tonnage taxes and other miscellaneous expenses. Vessel operating expenses generally represent costs of a fixed nature.

Principal Factors Affecting Our Business

The principal factors that affected our financial position, results of operations and cash flows include the following:

Number of vessels owned and operated;

Charter market rates and periods of charter hire;

Vessel operating expenses and direct voyage costs, which are incurred in both U.S. dollars and other currencies, primarily Euros;

Management fees and service fees;

Depreciation and amortization expenses, which are a function of vessel cost, any significant post-acquisition improvements, estimated useful lives, estimated residual scrap values, and fluctuations in the carrying value of our vessels, as well as, drydocking and special survey costs;

Financing costs related to indebtedness associated with the vessels; and

Fluctuations in foreign exchange rates.

Performance Indicators

(All amounts in tables in thousands of U.S. dollars except for fleet data and average daily results)

The following performance measures were derived from our audited consolidated financial statements for the year ended December 31, 2012, 2011 and 2010 included elsewhere in this report. The historical data included below is not necessarily indicative of our future performance.

	For the year ended December 31,		
	2012	2011	2010
Adjusted EBITDA (1)	\$ (6,055)	\$ 5,833	\$ 26,834

Fleet Data:

Average number of vessels (2)	7.02	8.21	9.65
Ownership days (3)	2,562	2,998	3,523
Available days (4)	2,529	2,960	3,430
Operating days (5)	2,337	2,865	3,329
Fleet utilization (6)	92.4 %	96.8 %	97.1 %

Average Daily Results:

Average TCE rate (7)	\$ 4,515	\$ 9,408	\$ 15,742
Vessel operating expenses (8)	4,242	4,858	5,282
Management fees (9)	726	634	561
General and administrative expenses(10)	1,494	1,538	1,117
Total vessel operating expenses (11)	\$ 4,968	5,492	5,843

Adjusted EBITDA represents net earnings before taxes, depreciation and amortization, amortization of deferred revenue, (gain)/loss on derivative instruments, stock-based compensation expense and stock-based compensation recognized for the issuance of shares to the Manager in payment of unpaid management, services and boars fees, vessel impairment loss, write-off of advances for vessels under construction, interest and finance cost net, provision and write-offs of insurance claims and bad debts and (gain)/loss on sale of vessel. Under the laws of the Marshall Islands, we are not subject to tax on international shipping income. However, we are subject to registration and tonnage taxes, which have been included in vessel operating expenses. Accordingly, no adjustment for taxes has been made for purposes of calculating Adjusted EBITDA. Adjusted EBITDA is a non-GAAP measure and does not represent and should not be considered as an alternative to net income or cash flow from operations, as determined by U.S. GAAP, and our calculation of Adjusted EBITDA may not be comparable to that (1) reported by other companies. The shipping industry is capital intensive and may involve significant financing costs. The Company uses Adjusted EBITDA because it presents useful information to management regarding the Company's ability to service and/or incur indebtedness by excluding items that we do not believe are indicative of our core operating performance, and therefore is an alternative measure of our performance. The Company also believes that Adjusted EBITDA is useful to investors because it is frequently used by securities analysts, investors and other interested parties in the evaluation of companies in our industry. Adjusted EBITDA has limitations as an analytical tool, however, and should not be considered in isolation or as a substitute for analysis of the Company's results as reported under U.S. GAAP. Some of these limitations are: (i) Adjusted EBITDA does not reflect changes in, or cash requirements for, working capital needs; and (ii) although depreciation and amortization are non-cash charges, the assets being depreciated and amortized may have to be replaced in the future, and Adjusted EBITDA does not reflect any cash requirements for such capital expenditures.

	For the year ended December 31,		
	2012	2011	2010
Net loss	\$(30,888)	\$(88,196)	\$(21,821)
Depreciation and amortization	6,717	9,579	17,253
Amortization of deferred revenue	—	(136)	(1,034)
Stock-based compensation expense	1,159	122	559
Vessel impairment loss	12,480	69,998	26,631
Impairment of advances for vessels under construction	—	11,717	—
Loss on derivative instruments	85	178	465
Interest and finance cost, net of interest income	2,717	3,999	4,338
(Gain) on sale of vessel	—	(1,561)	(807)
Provision and write-offs of insurance claims and bad debts	1,675	133	1,250
Adjusted EBITDA	\$(6,055)	\$5,833	\$26,834

Average number of vessels is the number of vessels that constituted our fleet for the relevant period, as measured (2) by the sum of the number of days each vessel was a part of our fleet during the period divided by the number of calendar days in the period.

Ownership days are the total number of days in a period during which the vessels in our fleet have been owned by (3) us. Ownership days are an indicator of the size of our fleet over a period and affect both the amount of revenues and the amount of expenses that we record during a period.

Available days are the number of ownership days less the aggregate number of days that our vessels are off-hire (4) due to major repairs, dry dockings or special or intermediate surveys. The shipping industry uses available days to measure the number of ownership days in a period during which vessels should be capable of generating revenues.

Operating days are the number of available days less the aggregate number of days that our vessels are off-hire due (5) to any reason, including unforeseen circumstances. The shipping industry uses operating days to measure the aggregate number of days in a period during which vessels could actually generate revenues.

We calculate fleet utilization by dividing the number of our fleet's operating days during a period by the number of (6) available days during the period. The shipping industry uses fleet utilization to measure a company's efficiency in properly operating its vessels and minimizing the amount of days that its vessels are off-hire for any unforeseen reasons.

TCE is a non-GAAP measure of the average daily revenue performance of a vessel on a per voyage basis. Our method of calculating TCE is consistent with industry standards and is determined by dividing operating revenues (net of voyage expenses and commissions) by operating days for the relevant time period. Voyage expenses (7) primarily consist of port, canal and fuel costs that are unique to a particular voyage, which would otherwise be paid by the charterer under a time charter contract. TCE is a standard shipping industry performance measure used primarily to compare period-to-period changes in a shipping company's performance despite changes in the mix of charter types (i.e., spot charters, time charters and bareboat charters) under which the vessels may be employed between the periods:

	For the year ended December 31,		
	2012	2011	2010
Operating revenues	\$ 14,260	\$ 29,538	\$ 57,650
Voyage expenses and commissions	\$(3,709)	\$(2,584)	\$(5,244)
Net operating revenues	\$ 10,551	\$ 26,954	\$ 52,406
Operating days	2,337	2,865	3,329
Time charter equivalent daily rate	\$ 4,515	\$ 9,408	\$ 15,742

Average daily vessel operating expenses, which includes crew costs, provisions, deck and engine stores, lubricating (8)oil, insurance, maintenance and repairs, is calculated by dividing vessel operating expenses by ownership days for the relevant time periods:

	For the year ended December 31,		
	2012	2011	2010
Vessel operating expenses	\$ 10,868	\$ 14,563	\$ 18,607
Ownership days	2,562	2,998	3,523
Daily vessel operating expense	\$ 4,242	\$ 4,858	\$ 5,282

Daily management fees are calculated by dividing total management fees paid (excluding stock-based (9)compensation expense recognized for the issuance of shares to the Manager in payment of unpaid management fees) on ships owned by ownership days for the relevant time period.

Average daily general and administrative expenses are calculated by dividing general and administrative expenses (10)(excluding stock-based compensation expense and stock-based compensation expense recognized for the issuance of shares to the Manager in payment of unpaid services and Board fees) by ownership days for the relevant period.

Total vessel operating expenses, or TVOE, is a measurement of our total expenses associated with operating our (11)vessels. TVOE is the sum of vessel operating expenses and management fees. Daily TVOE is calculated by dividing TVOE by fleet ownership days for the relevant time period.

Results of Operations

Year Ended December 31, 2012 as Compared to Year Ended December 31, 2011

REVENUES — Operating revenues for the year ended December 31, 2012 were \$14,260 compared to \$29,538 for the year ended December 31, 2011. The decrease of \$15,278 is mainly attributable to the lower average daily TCE rate of \$4,515 in the year ended December 31, 2012 compared to an average daily TCE rate of \$9,408 in the year ended December 31, 2011 on the back of the very weak spot charter rates and to a lesser degree to the decrease of the average number of vessels in our fleet to 7.02 vessels for the year ended December 31, 2012 compared to 8.21 vessels for the year ended December 31, 2011 and to a lower fleet utilization of 93% for the year ended December 31, 2012 compared to 96.8% for the year ended December 31, 2011.

VOYAGE EXPENSES AND COMMISSIONS — Voyage expenses, which include bunkers, cargo expenses, port expenses, port agency fees, tugs, extra insurance and various expenses, were \$2,835 for the year ended December 31, 2012, as compared to \$807 for the year ended December 31, 2011. The variance in voyage expenses reflects mainly the increased replenishment of bunkers to the owners' account and the increased idle time of the vessels during 2012.

For the year ended December 31, 2012, commissions charged amounted to \$874, as compared to \$1,777 for the year ended December 31, 2011. The decrease in commissions is mainly due to the large decrease of operating revenues for the year ended December 31, 2012 compared to the year ended December 31, 2011. The commission fees represent commissions paid to the Manager, other affiliated companies associated with family members of our CEO, and unaffiliated third parties relating to vessels chartered during the relevant periods.

OPERATING EXPENSES Vessel operating expenses, which include crew cost, provisions, deck and engine stores, lubricating oil, insurance, maintenance and repairs, totaled \$10,868 in the year ended December 31, 2012, as compared to \$14,563 in the year ended December 31, 2011. The decrease of \$3,695, which is translated to daily operating expenses of \$4,242 for the year ended December 31, 2012 versus \$4,858 for the year ended December 31, 2011 is primarily due to the intensification of the cost cutting initiatives initiated in the fourth quarter of 2010 and continued throughout 2012 and the ownership of 7.02 vessels versus 8.21 during the prior year.

DEPRECIATION AND AMORTIZATION — For the year ended December 31, 2012, depreciation expense totaled \$5,729 as compared to \$8,664 for the year ended December 31, 2011. The decrease of \$2,935 in depreciation expense resulted mainly from the ownership of 7.02 vessels for the year ended December 31, 2012 compared to 8.21 vessels for the year ended December 31, 2011. For the year ended December 31, 2012, amortization of dry-dockings and special survey costs totaled \$988, a slight increase of \$73 over the \$915 expenses reported in the year ended December 31, 2011. The main reason for the slight increase is the amortization, commenced in August 2012, of the M/V *Free Jupiter* scheduled dry-docking and special survey costs.

MANAGEMENT FEES — Management fees for the year ended December 31, 2012 totaled \$2,404, as compared to \$1,900 in the year ended December 31, 2011. The \$504 increase in management fees mainly resulted from the recognition of \$543 as stock-based compensation expense for the issuance of: i) 201,037 shares of the Company's common stock to the Manager in payment of \$916 in unpaid management fees due to the Manager for the first and third quarter of 2012 and ii) 149,561 shares on February 28, 2013 of its common stock to the Manager in payment of \$266 in unpaid management fees due to the Manager for November and December 2012 under the management agreement with the Company.

GENERAL AND ADMINISTRATIVE EXPENSES — General and administrative expenses, which include, among other things, legal, audit, audit-related expenses, travel expenses, communications expenses, and services fees and expenses charged by the Manager, totaled \$4,443 (including \$616 stock-based compensation expense) for the year ended December 31, 2012, as compared to \$4,734 (including \$122 stock-based compensation expense) for the year ended December 31, 2011. The decrease of \$291 due to the cost cutting policy applied throughout 2012, was counterbalanced by the amount of \$494 recognized as stock-based compensation expense for the issuance of: i) 237,326 shares of the Company's common stock to the Manager in payment of \$818 in unpaid services fees due to the Manager for the first and third quarter of 2012, in payment of \$155 in unpaid Board fees for the last three quarters of 2011 and in payment of \$152 in unpaid Board fees for the first, second and third quarter of 2012 and ii) 195,219 shares on February 28, 2013 of its common stock to the Manager in payment of \$272 in unpaid services fees due to the Manager for November and December 2012 and in payment of \$48 in unpaid Board fees for the fourth quarter of

2012, under the services agreement with the Company.

PROVISION AND WRITE-OFFS OF INSURANCE CLAIMS AND BAD DEBTS — For the year ended December 31, 2012, the amount of \$1,675 reflected the write-off of various long outstanding accounts receivable. The amount of \$1,173 relates to the remaining outstanding balance of the KLC time charter, which the Company wrote-off. Despite the write-off, the Company is considering its options if KLC does not pay the balance, including the possibility of pursuing this in the Korean rehabilitation proceedings, where the hearing of the Company's claim has been stayed pending the outcome of the London arbitration. The Company believes that, if the Korean claim succeeds, the Company should make a recovery in accordance with the rehabilitation plan, which has been approved by the Korean court. The Company intends to seek a further award (if this matter does not settle) for the disputed balance, which is adequately secured. For the year ended December 31, 2011, the provision totaled \$133, which reflected the write-off of various long outstanding accounts receivable.

GAIN/LOSS ON SALE OF VESSEL — During the year ended December 31, 2012, there were no vessel disposals. For the year ended December 31, 2011, the Company recognized a gain of \$1,561 on the sale of the M/V *Free Envoy*.

VESSEL IMPAIRMENT LOSS — The Company according to the provisions of ASC 360, has classified the M/V *Free Hero*, the M/V *Free Jupiter*, the M/V *Free Impala* and the M/V *Free Neptune* as “held for sale” for the year ended December 31, 2012 at their estimated market values less costs to sell, as all criteria required for the classification as “Held for Sale” were met at the balance sheet date. As of December 31, 2012, the Company compared the carrying values of vessels classified as held for sale with their estimated market values less costs to sell and recognized an impairment loss of \$12,480 in the consolidated statements of operations, of which \$2,880 relates to the M/V *Free Hero*, \$3,360 to the M/V *Free Jupiter*, \$3,360 to the M/V *Free Impala* and \$2,880 to the M/V *Free Neptune*.

The Company according to the provisions of ASC 360, has classified the M/V *Free Hero*, the M/V *Free Jupiter*, the M/V *Free Impala* and the M/V *Free Neptune* as “held for sale” in the consolidated balance sheet for the year ended December 31, 2011 at their estimated market values less costs to sell, as all criteria required for the classification as “Held for Sale” were met at the balance sheet date. On February 28, 2011, after obtaining the respective lenders consent (FBB), the Company’s Board of Directors, approved a plan of sale of the vessels M/V *Free Impala* and M/V *Free Neptune* within the context of its plans to fund its working capital requirements. On July 15, 2011, the Company’s Board of Directors approved a plan of sale of the vessels M/V *Free Jupiter* and M/V *Free Lady* (which was sold on November 8, 2011) as a result of the fourth supplemental agreement the Company entered into with Credit Suisse. Drydocking costs consists of the unamortized dry docking and special survey costs of the M/V *Free Neptune* which were included in “Vessels held for sale” following the vessel’s classification as held for sale in February 2011 as well as \$373 relating to the cost of the drydocking and special survey performed on this vessel in November 2011. As of December 31, 2011, the Company compared the carrying values of vessels classified as held for sale with their estimated market values less costs to sell and recognized an impairment loss of \$23,483 in the consolidated statements of operations.

IMPAIRMENT OF ADVANCES FOR VESSELS UNDER CONSTRUCTION — As of December 31, 2011, the Company has impaired the advances and the capitalized expenses relating to the vessels under construction after the cancelation of ABN AMRO financing commitment on December 30, 2011. There were no advances and capitalized expenses relating to the vessels under construction, since their cancelation in 2011, to be impaired for the year ended December 31, 2012.

FINANCING COSTS — Financing costs amounted to \$2,717 for the year ended December 31, 2012 and \$4,003 for the year ended December 31, 2011. The decrease of the interest and financing costs incurred for the year ended December 31, 2012 as compared to the same period in 2011 was attributed to:

the write-off of the commitment fees that ABN AMRO Bank had charged the Company for pre-delivery and post delivery debt financing for the purchase of the two newbuilding Handysize vessels which were canceled (the bank agreed to return them to the Company, pursuant to a settlement agreement entered into on April 13, 2012);

the lower weighted average interest rate as a result of the amended and restated facilities the Company entered with Credit Suisse and Deutsche Bank, on May 31, 2012 and September 7, 2012, respectively; and

the write-off of the unamortized deferred financing fees of \$191 related to the prior Credit Suisse and Deutsche Bank loan facilities consequently;

alleviated by the quarterly amortization of the amendment and restructuring fees incurred, due to the amendment of Credit Suisse and Deutsche Bank loan facilities in May and September 2012, respectively.

GAIN/(LOSS) ON INTEREST RATE SWAPS — The Company is a party to two interest rate swap agreements that do not qualify for hedge accounting and as such, the changes in their fair values are recognized in the statement of operations. The Company makes quarterly payments to the counterparty based on decreasing notional amounts, standing at \$4,340 and \$2,323, respectively as of December 31, 2012 at fixed rates of 5.07% and 5.55% respectively, and the counterparty makes quarterly floating-rate payments at LIBOR to the Company based on the same decreasing notional amounts. The swaps mature in September 2015 and July 2015, respectively.

The change in the fair value of the Company's two interest rate swaps for the year ended December 31, 2012, 2011 and 2010 resulted in unrealized gains of \$314, \$361 and \$129, respectively. The settlements on the interest rate swaps for the year ended December 31, 2012, 2011 and 2010 resulted in realized losses of \$399, \$539 and \$594, respectively. The total of the change in fair value and settlements for the year ended December 31, 2012, 2011 and 2010 aggregate to losses of \$85, \$178 and \$465, respectively, which is separately reflected in "Loss on derivative instruments" in the consolidated statements of operations.

NET LOSS — Net loss for the year ended December 31, 2012 was \$30,888 as compared to net loss of \$88,196 for the year ended December 31, 2011. The decrease of the net loss for the year ended December 31, 2012 resulted primarily from

the higher amount of impairment loss the Company recognized in the consolidated statements of operations in the year ended December 31, 2011, compared to an impairment loss of \$12,480 the Company recognized in the year ended December 31, 2012 and

the write off of \$11,717 regarding the advances of vessels under construction the Company recognized in the year ended December 31, 2011.

Year Ended December 31, 2011 as Compared to Year Ended December 31, 2010

REVENUES — Operating revenues for the year ended December 31, 2011 were \$29,538 compared to \$57,650 for the year ended December 31, 2010. The decrease of \$28,112 is mainly attributable to the lower average daily TCE rate of \$9,408 in the year ended December 31, 2011 compared to an average daily TCE rate of \$15,742 in the year ended December 31, 2010 on the back of weak spot charter market rates and to a lesser degree to the decrease of the average number of vessels in our fleet to 8.21 vessels for the year ended December 31, 2011 compared to 9.65 vessels for the year ended December 31, 2010.

VOYAGE EXPENSES AND COMMISSIONS — Voyage expenses, which include bunkers, cargo expenses, port expenses, port agency fees, tugs, extra insurance and various expenses, were \$807 for the year ended December 31, 2011, as compared to \$1,887 for the year ended December 31, 2010. The variance in voyage expenses reflects mainly the bunkers delivery – redelivery transactions which expired during 2011 and the reduced average number of vessels to 8.21 in the year ended December 31, 2011 from 9.65 in the year ended December 31, 2010.

For the year ended December 31, 2011, commissions charged amounted to \$1,777, as compared to \$3,357 for the year ended December 31, 2010. The decrease in commissions is mainly due to the decrease of operating revenues for the year ended December 31, 2011 compared to the year ended December 31, 2010. The commission fees represent commissions paid to the Manager, other affiliated companies associated with family members of our CEO, and unaffiliated third parties relating to vessels chartered during the relevant periods.

OPERATING EXPENSES — Vessel operating expenses, which include crew cost, provisions, deck and engine stores, lubricating oil, insurance, maintenance and repairs, totaled \$14,563 in the year ended December 31, 2011, as compared to \$18,607 in the year ended December 31, 2010. The decrease of \$4,044, which is translated to daily operating expenses of \$4,858 for the year ended December 31, 2011 versus \$5,282 for the year ended December 31, 2010 is primarily due to the intensification of the cost cutting initiatives initiated in the fourth quarter of 2010 and continued throughout 2011 and the ownership of 8.21 vessels versus 9.65 during the prior year.

DEPRECIATION AND AMORTIZATION — For the year ended December 31, 2011, depreciation expense totaled \$8,664 as compared to \$15,365 for the year ended December 31, 2010. The decrease of \$6,701 in depreciation expense resulted from the classification of the M/V *Free Hero*, the M/V *Free Jupiter*, the M/V *Free Lady* (which was sold on November 8, 2011), the M/V *Free Impala* and the M/V *Free Neptune*, as “held for sale” in our consolidated balance sheet for the year ended December 31, 2011, the sale of M/V *Free Destiny* on August 27, 2010, the sale of M/V *Free Envoy* on May 13, 2011 and the sale of M/V *Free Lady* on November 8, 2011. For the year ended December 31, 2011, amortization of dry-dockings and special survey costs totaled \$915, a decrease of \$973 over the \$1,888 expenses reported in the year ended December 31, 2010. The main reason for the decrease is the write-off of certain dry-docking costs due to the classification of the M/V *Free Hero*, the M/V *Free Jupiter*, the M/V *Free Lady*, the M/V *Free Impala* and the M/V *Free Neptune* as “held for sale,” for the year ended December 31, 2011.

MANAGEMENT FEES — Management fees for the year ended December 31, 2011 totaled \$1,900, as compared to \$1,978 in the year ended December 31, 2010. The \$78 decrease in management fees mainly resulted from the reduced average number of vessels under the technical management of the Manager to 8.21 in the year ended December 31, 2011 from 9.65 in the year ended December 31, 2010 counterbalanced by the increase of the monthly management fee per vessel to \$19.0 from \$16.5, effective June 1, 2011.

GENERAL AND ADMINISTRATIVE EXPENSES — General and administrative expenses, which include, among other things, legal, audit, audit related expenses, travel expenses, communications expenses, and services fees and expenses charged by the Manager, totaled \$4,734 (including \$122 stock-based compensation expense) for the year ended December 31, 2011, as compared to \$4,494 (including \$559 stock-based compensation expense) for the year ended December 31, 2010. The difference was primarily due to \$662 expenses related to the Company's abandoned capital raising efforts.

PROVISION AND WRITE-OFFS OF INSURANCE CLAIMS AND BAD DEBTS — For the year ended December 31, 2011, the amount of \$133 refers to write-offs of various long outstanding accounts receivable, which is significantly below the \$1,250 of provisions and write-offs reported in the previous year that was mainly affected by the \$986 claim of the M/V *Free Jupiter*.

GAIN/LOSS ON SALE OF VESSEL — For the year ended December 31, 2011, the Company recognized a gain of \$1,561 on the sale of the M/V *Free Envoy*. For the year ended December 31, 2010, the Company recognized a gain of \$807 on the sale of the M/V *Free Destiny*.

VESSEL IMPAIRMENT LOSS — For the year ended December 31, 2011, the Company according to the provisions of ASC 360, has classified the M/V *Free Hero*, the M/V *Free Jupiter*, the M/V *Free Impala* and the M/V *Free Neptune* as "held for sale" at their estimated market values less costs to sell, as all criteria required for the classification as "Held for Sale" were met at the balance sheet date. On November 8, 2011, the Company sold the M/V *Free Lady* for a sale price of \$21,900. Due to the planned sale of the vessel, the Company for the purposes of preparing its interim financial statements performed an impairment exercise and recognized an impairment loss of \$36,415.

As of December 31, 2011, the Company compared the carrying values of the vessels classified as held for sale with their estimated market values less costs to sell and recognized an impairment loss of \$33,583 in the consolidated statements of operations.

For the year ended December 31, 2010, the M/V *Free Hero*, the M/V *Free Impala* and the M/V *Free Neptune*, according to the provisions of ASC 360, were classified as asset “held for sale”. The Company has individually assessed for recoverability the carrying values of each of the above vessels, including unamortized deferred dry docking costs of \$631. In performing its assessment, the Company compared the carrying values of these vessels with their estimated fair values at December 31, 2010. As a result of this assessment the Company has recognized an impairment loss of \$26,631 of which \$17,253 relates to the M/V *Free Impala* and \$9,378 to the M/V *Free Hero*. No impairment loss was recognized for the M/V *Free Neptune* as its fair value exceeded its carrying value.

IMPAIRMENT OF ADVANCES FOR VESSELS UNDER CONSTRUCTION — As of December 31, 2011, the Company has impaired the advances and the capitalized expenses relating to the vessels under construction after the cancelation of ABN AMRO financing commitment on December 30, 2011.

FINANCING COSTS — Financing costs amounted to \$4,003 in the year ended December 31, 2011 and \$4,375 for the year ended December 31, 2010. The decrease of the interest and financing costs incurred in the year ended December 31, 2011 as compared to 2010 was mainly attributed to a lower debt balance, lower weighted average interest rate and increased capitalized interest as compared to 2010 counterbalanced by increased financing fees due to the amendment of certain agreements in 2010.

GAIN/(LOSS) ON INTEREST RATE SWAPS — Under the terms of the two swap agreements, we make quarterly payments to the counterparty based on decreasing notional amounts, standing at \$5,993 and \$3,208 as of December 31, 2011 at fixed rates of 5.07% and 5.55% respectively, and the counterparty makes quarterly floating-rate payments of 3-month LIBOR to us based on the same decreasing notional amounts. The swaps mature in September 2015 and July 2015, respectively.

The change in fair value on the Company’s two interest rate swaps for the year ended December 31, 2011 and 2010 resulted in unrealized gains of \$361 and \$129, respectively. The settlements on the interest rate swaps for the year ended December 31, 2011 and 2010 resulted in realized losses of \$539 and \$594, respectively. The total change in fair value and settlements for the year ended December 31, 2011 and 2010 aggregate to losses of \$178 and \$465, respectively, which is separately reflected in “Loss on derivative instruments” in our consolidated statements of operations.

The change is attributable to the interest rate differential between floating and fixed interest rates in the year ended December 31, 2011 compared to the same period in 2010.

NET LOSS — Net loss for the year ended December 31, 2011 was \$88,196, as compared to net loss of \$21,821 for the year ended December 31, 2010. The increase of the net loss for the year ended December 31, 2011 resulted primarily from the impairment of vessels and vessels under construction and the weaker freight market during the year ended December 31, 2011 as compared to 2010.

Liquidity and Capital Resources

We have historically financed our capital requirements from sales of equity securities, operating cash flows and long-term borrowings. As of December 31, 2012, our long-term borrowings totaled \$89,169. We have primarily used our funds for capital expenditures to maintain our fleet, comply with international shipping standards and environmental laws and regulations, and fund working capital requirements.

As a result of the historically low charter rates for drybulk vessels which have been affecting the Company for over two years, and the resulting material adverse impact on the Company's results from operations, the Company has undertaken negotiations with each of its lenders to restructure the Company's debt repayments. On May 31, 2012, the Company and Credit Suisse entered into a Sixth Supplemental Agreement to its Facility Agreement with Credit Suisse, which provided for, among other things, a deferral of principal payments until March 31, 2014. On September 7, 2012, the Company entered into an amended and restated facility with Deutsche Bank, which provides for, among other things, a reduction in and deferral of the balloon payment due on facility B from November 2012 to December 2015, a reduction in the amount of principal repayment and amendments to the financial covenants.

In February, March, April, November and December 2012 and January 2013, the Company received notifications from FBB that the Company is in default under its loan agreements as a result of the breach of certain covenants and the failure to pay principal and interest due under the loan agreements. The Company is seeking and will continue to seek similar restructured loan terms from FBB. Also the Company did not pay the monthly repayments of \$20 for each of Facility A and Facility B with Deutsche Bank along with accrued interest due in October, November and December 2012 and January, February and March 2013. As well in February, March and April 2013, the Company did not pay the interest due of \$124 and the interest rate swaps due of \$80, respectively, with the Credit Suisse facility. The Company is in discussions with both banks to reach a mutually beneficial agreement.

If the Company is not able to reach agreement with FBB as to restructured loan terms, or if the Company is unable to comply with its restructured loan terms, this could lead to the acceleration of the outstanding debt under its debt agreements. The Company's failure to satisfy its covenants under its debt agreements, and any consequent acceleration and cross acceleration of its outstanding indebtedness would have a material adverse effect on the Company's business operations, financial condition and liquidity.

All of the above raises doubt regarding the Company's ability to continue as a going concern. The Company is currently exploring several alternatives aiming to manage its working capital requirements and other commitments if current market charter hire rates remain at current low levels, including completion of the negotiations for the restructuring of its loan with FBB, offerings of common stock through equity line financings, disposition of certain vessels in its current fleet and additional reductions in operating and other costs.

Generally accepted accounting principles require that long-term debt be classified as a current liability when a covenant violation gives the lender the right to call the debt at the balance sheet date, absent a waiver. As a result of the cross default provisions in the Company's loan agreements, actual breaches existing under its credit facility with FBB could result in defaults under all of the Company's affected debt and the acceleration of such debt by its lender. Accordingly, as of December 31, 2012, the Company was required to reclassify its long term debt and derivative financial instrument liability (interest rate swaps) as current liabilities on its consolidated balance sheet since the Company had not received waivers in respect of the breaches discussed above at such time.

Cash Flows

Year Ended December 31, 2012 as Compared to Year Ended December 31, 2011

OPERATING ACTIVITIES — Net cash from operating activities decreased by \$6,495 to \$(2,025) for the year ended December 31, 2012, as compared to net cash from operating activities of \$4,470 for the year ended December 31, 2011. The decrease resulted from the weak freight market in the year ended December 31, 2012 compared to the same period in 2011 and the reduced average number of vessels to 7.02 in the year ended December 31, 2012 from 8.21 in the year ended December 31, 2011.

INVESTING ACTIVITIES — Net cash provided by (used in) investing activities during the year ended December 31, 2012 was \$nil, as compared to \$18,422 provided by investing activities for the year ended December 31, 2011. The variation reflected the cancelation of the two Handysize newbuildings and the fact that no vessel disposals incurred during the year ended December 31, 2012.

FINANCING ACTIVITIES — The cash from financing activities for the year ended December 31, 2012 was \$1,723, as compared to \$(26,255) used in for the year ended December 31, 2011. The increase in cash was mainly due to:

the decrease of \$1,125 in restricted cash;

the payment of the unpaid management and services fees of \$2,271 due to the Manager in 2012 through the issuance of common shares to the Manager;

the equity raising of \$629 through the equity line from YA Global and Dutchess; and

the raise of \$250 from the sale of a promissory note, in August 2012, pursuant to the Note Purchase Agreement dated May 11, 2012 between the Company and YA Global.

Year Ended December 31, 2011 as Compared to Year Ended December 31, 2010

OPERATING ACTIVITIES — Net cash from operating activities decreased by \$16,332 to \$4,470 for the year ended December 31, 2011, as compared to \$20,802 of net cash from operating activities for the year ended December 31, 2010. The decrease resulted from the weak freight market in the year ended December 31, 2011 compared to 2010 and the reduced average number of vessels to 8.21 in the year ended December 31, 2011 from 9.65 in the year ended December 31, 2010.

INVESTING ACTIVITIES — Net cash from investing activities during the year ended December 31, 2011 was \$18,422, as compared to \$2,819 used in investing activities for the year ended December 31, 2010. This increase mainly reflected the net proceeds of \$24,474, the Company received from the sale of M/V *Free Envoy* and M/V *Free Lady* during the year ended December 31, 2011 as compared to net proceeds of \$2,846, the Company received from the sale of M/V *Free Destiny* during the year ended December 31, 2010.

FINANCING ACTIVITIES — The cash used in financing activities for the year ended December 31, 2011 was \$26,255, as compared to \$20,630 used in for the year ended December 31, 2010. The increase in cash used in financing activities was mainly due to the prepayment of \$19,800 made on November 8, 2011 towards the Credit Suisse loan facility as a result of the sale of M/V *Free Lady*, counterbalanced by the deferral of scheduled payments due in 2011 relating to Deutsche Bank and FBB facilities amounting to \$750 and \$838, respectively, the inability to pay scheduled loan repayments due in 2011 relating to Deutsche Bank facility amounting to \$750, the decrease in restricted cash of \$5,255 during the year ended December 31, 2011, attributed to the release of the pledged deposit to ABN AMRO Bank in respect of the guarantee provided for the second installments of Hull 1 and Hull 2, which the Company advanced to the shipyard in March and May 2011, respectively, and the release of \$375 deposit held in Credit Suisse as minimum cash requirement, as a result of the sale of M/V *Free Lady*, compared to the increase in restricted cash of \$3,130 during 2010.

Long-Term Debt

All the Company's credit facilities bear interest at LIBOR plus a margin, ranging from 1.00% to 4%, and are secured by mortgages on the financed vessels and assignments of vessels' earnings and insurance coverage proceeds. They also include affirmative and negative financial covenants of the borrowers, including maintenance of operating accounts, minimum cash deposits, average cash balances to be maintained with the lending banks and minimum ratios for the fair values of the collateral vessels compared to the outstanding loan balances. Each borrower is restricted under its respective loan agreement from incurring additional indebtedness, changing the vessels' flag without the lender's consent or distributing earnings.

The weighted average interest rate for the year ended December 31, 2012 and 2011 was 2.7% and 2.9%, respectively. Interest expense incurred under the above loan agreements amounted to \$2,415, \$ 3,173 (net of capitalized interest \$282) and \$3,932 or the years ended December 31, 2012, 2011 and 2010, respectively, and is included in "Interest and Finance Costs" in the accompanying consolidated statements of operations.

Deutsche Bank Facility

On September 2, 2011, the Company instructed the Deutsche Bank in accordance with relevant provision of the facility agreement to postpone the repayment installment of \$750 due on September 18, 2011, which will be paid on the termination date in December 2015.

In October 2011, the Company following negotiations with Deutsche Bank deferred the payment of an additional fee equal to \$360, due on November 1, 2011, to January 2012 (Note 15).

In December 2011, the Company did not pay the \$750 repayment installment along with accrued interest with Deutsche Bank and held discussions to permanently amend the amortization schedule including refinancing of the balloon due in November 2012.

On February 15, 2012, the Company received notice from Deutsche Bank, or Deutsche Bank, according to which Company's failure to (i) repay the installment due in December 2011, (ii) pay regular interest on the loan, (iii) pay default interest on the loan, (iv) pay the success fee due in November 2011, (v) set new financial covenants and (vi) comply with the loan to value covenant, are considered events of default. Deutsche Bank requested that the Company fulfill its obligations by March 15, 2012. The Company has not paid the aforementioned amounts or the \$750 repayment installment along with accrued interest due in March 2012. On April 26, 2012, the Company was advised by Deutsche Bank that it would approve the request to permanently amend the amortization schedule including refinancing of the balloon due in November 2012.

On September 7, 2012, the Company and certain of its subsidiaries entered into an amended and restated facility agreement with Deutsche Bank. As amended and restated, the facility agreement:

- Defers and reduces the balloon payment of \$16,009 due on Facility B from November 2012 to December 2015;

Provides for monthly repayments of \$20 for each of Facility A and Facility B commencing September 30, 2012 through April 30, 2013 and a monthly repayment of \$11.5 for each of Facility A and Facility B on May 31, 2013;

- Suspends principal repayments from June 1, 2013 through June 30, 2014 on each of Facility A and Facility B;

Provides for quarterly repayments of \$337 for Facility A commencing June 30, 2014, which quarterly repayments have been reduced from \$750;

- Provides for quarterly repayments of \$337 for Facility B commencing June 30, 2014;

Bears interest at the rate of LIBOR plus 1% through March 31, 2014 and LIBOR plus 3.25% from April 1, 2014 through maturity, which were reduced from LIBOR plus 2.25% for Facility A and LIBOR plus 4.25% for Facility B;

Establishes certain financial covenants, including an interest coverage ratio that must be complied with starting January 1, 2013, a consolidated leverage ratio that must be complied with starting January 1, 2014, and a minimum liquidity ratio that must be complied with starting July 1, 2014;

Removes permanently the loan to value ratio;

Requires the amount of any "Excess Cash," as determined in accordance with the amended and restated facility agreement at each fiscal quarter end beginning June 30, 2012, to be applied to pay the amendment and restructuring fee described below and prepay the outstanding loan balance; and

Removes the success fee originally due under the previous agreement and provides for an amendment and restructuring fee of \$1,480 payable on the earlier of March 31, 2014, the date of a voluntary prepayment, or the date the loan facility becomes due or is repaid in full.

In October, November and December 2012 and in January, February and March 2013, the Company did not pay the monthly repayments of \$20 for each of Facility A and Facility B with Deutsche Bank, totaling \$240 along with accrued interest due. The Company is in discussions with Deutsche Bank to reach a mutually beneficial agreement.

Credit Suisse Facility

On July 15, 2011, the Company entered into a Fourth Supplemental Agreement with Credit Suisse, which amended its existing credit facility to, among other things, defer its payments totaling \$2,000, originally due in July 2011 until September 2011. The Fourth Supplemental Agreement, as originally entered into, contemplated that the Company would complete a proposed debt financing with an unrelated party, and that if the debt financing did not occur by September 5, 2011, the Company would sell one or two of the four vessels collateralizing the credit facility. This debt financing did not occur. Therefore, the Company initiated the sale of the M/V Free Jupiter and the M/V Free Lady. On October 3, 2011, the Company entered an agreement to sell the M/V Free Lady. The net proceeds of this sale amounting to \$19,800 were applied to pay down the amount outstanding on this facility.

In light of the successful sale of the M/V *Free Lady*, the Company entered into a Fifth Supplemental Agreement dated November 7, 2011 with Credit Suisse, which amended the Fourth Supplemental Agreement to, among other things, reduce the next five loan repayment installments starting from the third quarter of 2011. Pursuant to this agreement, the Company agreed to enter into a period time charter of at least twelve months for all mortgaged vessels not later than December 31, 2011, which charter would cover the vessels' debt service plus \$1.0 million. If the foregoing time

charters were not entered into by the date required, the Company agreed that will sell, not later than January 31, 2012, either the M/V *Free Jupiter* or both the M/V *Free Goddess* and the M/V *Free Hero* . In addition, under the Fifth Supplemental Agreement, the margin on this facility increased to 3.25% during the period until either the period employment or the sale procedure has been completed, after which time the margin will be reduced to 2.75%. According to the terms of the agreement, failure to comply with the above would constitute an event of default. The Company did not conclude any time charter agreement and any agreement for the sale of the above mentioned vessels.

On February 2, 2012, the Company agreed by letter with Credit Suisse to defer its payments totaling \$700 originally due on January 31, 2012 until the next repayment date April 30, 2012, which was further deferred to May 31, 2012 as per letter dated April 25, 2012. The interest payment of \$348 originally due on February 8, 2012, has been agreed to be paid in two installments as follows: \$147 paid on February 8, 2012 and \$201 to be paid on April 30, 2012, which was further deferred to May 31, 2012 as per letter dated April 25, 2012. In addition the interest payment of \$348 originally due on May 10, 2012, has been agreed to be paid in two installments as follows: \$147 to be paid on May 10, 2012 and \$201 on May 31, 2012.

On February 15 2012, the Company received a proposal from Credit Suisse containing restructuring head terms for the full payment holiday of the principal and partial interest payment holiday until March 31, 2014, conditioned on approval from the Company's other lenders. The Company has been advised that the proposal has been approved by Deutsche Bank. The Company is continuing discussions with FBB.

On May 31, 2012, the Company entered into a Sixth Supplemental Agreement with Credit Suisse, which amends and restates the Facility Agreement dated December 24, 2007, as amended, between the Company and Credit Suisse. The Sixth Supplemental Agreement, among other things, modifies the Facility Agreement to:

Defer further principal repayments until March 31, 2014;

· Reduce the interest rate on the facility to LIBOR plus 1% until March 31, 2014 from a current interest margin of 3.25

· Release restricted cash of \$1,125;

· Waive compliance through March 31, 2014 with the requirement to maintain a minimum ratio of aggregate fair market value of the financed vessels to loan balance, after which date the required minimum ratio will be 115% beginning April 1, 2014, 120% beginning October 1, 2014, and 135% beginning April 1, 2015;

· Establish certain financial covenants, including an interest coverage ratio, which must be complied with starting January 1, 2013, a consolidated leverage ratio, which must be complied with starting January 1, 2014, and a minimum liquidity ratio, which must be complied with starting July 1, 2014; and

· Require the amount of any "Excess Cash," as determined in accordance with the Facility Agreement at each fiscal quarter end beginning June 30, 2012, to be applied to pay the amendment and restructuring fee described below and prepay the outstanding loan balance, depending on the Company's compliance at the time with the vessel market value to loan ratio and the outstanding balance of the loan.

As of December 31, 2012, the outstanding balance under the Facility Agreement totaled \$36,450. An amendment and restructuring fee equal to 5% of the current outstanding indebtedness, \$1,823, will be due and payable on the earlier of March 31, 2014, the date of a voluntary prepayment, or the date the loan facility becomes due or is repaid in full. The Company is also no longer required to sell additional vessels, as it had been under the terms of the Facility Agreement as previously in effect.

In February, March and April 2013, the Company did not pay the interest due of \$124 and the interest rate swaps due of \$80, respectively, with the Credit Suisse facility. The Company is in discussions with the bank to arrange a settlement of these.

FBB Facility

On January 27, 2012, the Company entered into a First Supplemental Agreement with FBB, which amends its existing credit facility to defer the repayment installment of \$837.5 and the interest payment of \$197 both due on December 16, 2011 until the next repayment date on March 16, 2012. In addition, FBB granted a waiver to the security value covenant and the financial covenants, whose testing was waived until March 16, 2012. On March 23, 2012, the Company received a notice from FBB according to which failure to (i) pay the \$1,675 repayment installment due in March 2012, (ii) pay accrued interest and (iii) pay default interest constitute an event of default. On April 12, 2012, the Company received notice from FBB according to which along with the previously mentioned events, failure to make periodic monthly installments into the retention account since September 2011 and violation of the loan to value covenant constituted events of default, and that if all of the above events are not remedied on or

before April 20, 2012, FBB will take whatever action is available to it. The Company has not either paid the installment of \$837.5 which was due on June 18, 2012 or the accrued interest. On July 11, August 22, November 28, December 19, 2012 and on January 24, 2013, the Company received notices from FBB, according to which failure to (i) pay the \$4,188 repayment installment due in December 2012, (ii) pay accrued interest and (iii) failure to pay default interest constitute an event of default. The Company is in discussions to permanently amend the amortization schedule and reach an agreement on the unpaid principal and interest.

ABN AMRO Bank Facility

On September 10, 2010, the Company signed an offer letter with ABN AMRO Bank securing, subject to customary legal documentation and payment of an arrangement fee, commitments for pre-delivery and post-delivery debt financing up to an amount of \$32,400 for the purchase of two newbuilding Handysize vessels. The facility, which would be available for drawdown until December 31, 2012, is repayable in 20 quarterly installments plus a balloon payment, commencing three months after the delivery of the vessels. The vessels will be used as collateral for the facility. According to the agreed terms, the facility would bear interest at LIBOR plus margin and would include customary financial covenants.

By letter dated December 30, 2011, the Company received notice from ABN AMRO Bank that the Bank's commitment for pre-delivery and post delivery debt financing up to the amount of \$32,400 for the purchase of the two newbuilding Handysize vessels has been canceled due to the Company's failure to pay commitment fees as prescribed in the offer letter, that were considered as events of default, and the occurrence of various material adverse changes as considered by ABN AMRO Bank.

Pursuant to a settlement agreement entered into on April 13, 2012, ABN AMRO Bank returned to the Company all commitment fees paid to date less expenses and all further obligations of the parties were terminated.

Loan Covenants

As of December 31, 2012, the Company was in breach of certain of its financial covenants for its loan agreement with FBB, including the loan-to-value ratio, interest cover ratio, minimum liquidity requirements and leverage ratio. Thus, in accordance with guidance related to classification of obligations that are callable by the creditor, the Company has classified all of the related long-term debt amounting to \$89,169 as current at December 31, 2012.

Deutsche Bank amended and restated facility agreement

Consolidated leverage ratio: at the end of each accounting period falling between January 1, 2014 and December 31, 2015 (both inclusive), the ratio of funded debt to shareholders' equity shall not be greater than 2.5:1.0;

Liquidity: it maintains (on a consolidated basis) on each day falling after June 30, 2014, cash in an amount equal to the higher of \$2,500 and \$500 per vessel;

Interest coverage ratio: the ratio of EBITDA to Interest Expense at the end of each accounting period falling between January 1, 2013 and December 31, 2013 (both inclusive), shall not be less than 2.0:1.0; falling between January 1, 2014 and December 31, 2014 (both inclusive), shall not be less than 3.5:1.0; and falling between January 1, 2015 and December 31, 2015 (both inclusive), shall not be less than 4.5:1.0;

Credit Suisse Sixth Supplemental Agreement

Value to loan ratio:

(a) during the period commencing on April 1, 2014 and ending on September 30, 2014, the aggregate fair market value of the financed vessels must not be less than 115% of the outstanding loan balance at such time plus the swap exposure minus the aggregate amount, if any, standing to the credit of the operating accounts, the retention account and any bank accounts of the Company opened with the bank;

(b) during the period commencing on October 1, 2014 and ending on March 31, 2015, the aggregate fair market value of the financed vessels must not be less than 120% of the outstanding loan balance at such time plus the swap exposure minus the aggregate amount, if any, standing to the credit of the operating accounts, the retention account and any bank accounts of the Company opened with the bank;

after March 31, 2015, the aggregate fair market value of the financed vessels must not be less than 135% of the outstanding loan balance at such time plus the swap exposure minus the aggregate amount, if any, standing to the credit of the operating accounts, the retention account and any bank accounts of the Company opened with the bank;

Consolidated leverage ratio: at the end of each accounting period falling between January 1, 2014 and December 31, 2015 (both inclusive), the ratio of funded debt to shareholders' equity shall not be greater than 2.5:1.0;

Liquidity: it maintains (on a consolidated basis) on each day falling after June 30, 2014, cash in an amount equal to the higher of \$2,500 and \$500 per vessel; and

Interest coverage ratio: the ratio of EBITDA to Interest Expense at the end of each accounting period falling between January 1, 2013 and December 31, 2013 (both inclusive), shall not be less than 2.0:1.0; falling between January 1, 2014 and December 31, 2014 (both inclusive), shall not be less than 3.5:1.0; and falling between January 1, 2015 and December 31, 2015 (both inclusive), shall not be less than 4.5:1.0.

FBB loan agreement

Average corporate liquidity: the Company is required to maintain an average corporate liquidity of at least \$3,000;

Leverage ratio: the corporate guarantor's leverage ratio shall not at any time exceed 55%;

Ratio of EBITDA to net interest expense shall not be less than 3; and

Value to loan ratio: the fair market value of the financed vessels shall be at least (a) 115% for the period July 1, 2010 to June 30, 2011 and (b) 125% thereafter.

The covenants described above are tested annually on December 31st.

Off-Balance Sheet Arrangements

As of December 31, 2012, we did not have any off-balance sheet arrangements as defined in Item 303(a)(4)(ii) of Regulation S-K promulgated by the SEC.

Summary of Contractual Obligations

The following table summarizes our contractual obligations and their maturity dates as of December 31, 2012:

(Dollars in thousands)	Payments Due by Period						
	Total	Less than 1 year	2- year	3- year	4- year	5- year	More than 5 years
	(U.S. dollars in thousands)						
Debt	\$89,169	\$89,169	\$—	\$—	\$—	\$—	\$—
Interest on variable-rate debt	1,501	1,501	—	—	—	—	—
Services fees to the Manager	9,403	1,635	1,635	1,635	1,635	1,635	1,228
Management fees to the Manager	9,696	1,822	683	683	683	683	5,142
Total obligations	\$109,769	\$94,127	\$2,318	\$2,318	\$2,318	\$2,318	\$6,370

The above table does not include our share of the monthly rental expenses for our offices of approximately 8.7 Euro (in thousands)

Item 6. Directors, Senior Management and Employees

A. Directors and Senior Management

The following sets forth the names of the members of our board of directors and our senior management. Generally, each member of the board of directors serves for a three-year term. Additionally, the directors are divided among three classes, so the term of office of a certain number of directors expires each year. Consequently, the number of directors who stand for re-election each year may vary. Our executive officers are appointed by, and serve at the pleasure of, the board of directors. The primary business address of each of our executive officers and directors is 10, Eleftheriou Venizelou Street (Panepistimiou Ave.), 106 71, Athens, Greece.

Name	Age	Position	Term Expires
Ion G. Varouxakis	42	Chairman of the Board of Directors, Chief Executive Officer and President	2014
Alexandros Mylonas	39	Chief Financial Officer and Treasurer	—
Focko H. Nauta	55	Director	2013
Dimitrios Panagiotopoulos	52	Director	2014
Keith Bloomfield	42	Director	2013
Xenophon Galinas	56	Director	2015
Maria Badekas	41	Secretary	—

Ion G. Varouxakis is one of our founders and is the Chairman of our Board of Directors. He also serves as our President and Chief Executive Officer. In 2003, Mr. Varouxakis founded Free Bulkers, the beginning of a single-vessel, self-financed entrepreneurial venture that led to FreeSeas' founding and NASDAQ listing in 2005. Prior to founding Free Bulkers, Mr. Varouxakis held since 1997 management positions in private shipping companies operating in the drybulk sector. Mr. Varouxakis holds a candidature degree in law from the Catholic University of Saint Louis in Brussels and a Bachelor of Science degree in economics from the London School of Economics and Political Science. Mr. Varouxakis is a member of the Hellenic Committee of the Korean Register of Shipping, a member of the Hellenic and Black Sea Committee of Bureau Veritas and an officer of the reserves of the Hellenic Army.

Alexandros Mylonas is our Chief Financial Officer and joined us in October 2009. In addition, he has served as our Treasurer since December 2010. Prior to joining FreeSeas, Mr. Mylonas was the Banking Executive of Cardiff Marine Inc., a ship management company managing a fleet of tankers and drybulk carriers including the fleet of DryShips Inc. a company listed on the NASDAQ Global Select Market. From 2005 to 2008, Mr. Mylonas was an Account Manager with the Global Shipping Group of Fortis Bank, an international shipping bank. From 2002 to 2005, Mr. Mylonas was an Investment Associate with NBG Venture Capital, a private equity firm investing in Southeast Europe. Mr. Mylonas holds an MBA in Finance and Supply Chain Management from Michigan State University and a Bachelor of Business Administration from University of Macedonia in Thessaloniki.

Focko H. Nauta joined our Board of Directors in 2005. Since September 2000, he has also been a director of FinShip SA, a ship financing company. From 1997 through 1999, Mr. Nauta served as a managing director of Van Ommeren Shipbroking, a London-based ship brokering company. Prior to 1997, he was a general manager of a Fortis Bank branch. Mr. Nauta holds a degree in law from Leiden University in the Netherlands.

Dimitrios Panagiotopoulos joined our Board of Directors in 2007. He is the head of shipping and corporate banking of Proton Bank, a Greek private bank, where he has served since April 2004. From January 1997 to March 2004, he served as deputy head of the Greek shipping desk of BNP Paribas and before that for four years as senior officer of the shipping department of Credit Lyonnais Greece. From 1990 to 1993, he worked as chief accountant in Ionia Management, a Greek shipping company. He holds a degree in economics from Athens University and a master's of science in shipping, trade and finance from City University of London. He was an officer of the Greek Special Forces and today is a captain of the reserves of Hellenic Army.

Keith Bloomfield joined our Board of Directors in 2010. He has over 13 years of experience in mergers and acquisitions, corporate law, and wealth management. He is currently the President and Chief Executive Officer of Forbes Family Trust, a private wealth management firm which he founded in September 2009. From October 2006 to September 2009, he was a Senior Managing Director and Corporate Counsel at Third Avenue Management, a global asset management firm with approximately \$16 billion in assets under management. At Third Avenue, he was responsible for mergers and acquisitions, corporate transactions and business development. Prior to joining Third Avenue, he was a corporate attorney with Simpson Thacher & Bartlett LLP. Mr. Bloomfield earned an LL.M. (Master of Law) in Taxation from New York University School of Law and a J.D. with honors from Hofstra University School

of Law, and graduated summa cum laude with a B.A. in History from Tulane University.

Xenophon Galinas joined our Board of Directors in 2012. From July 2011 to July 2012, Mr. Galinas served as a managing director of Rodman & Renshaw LLC, an investment banking firm. Prior to joining Rodman & Renshaw, Mr. Galinas was a Managing Director and Head of Shipping at the investment banking firm of Morgan Joseph TriArtisan LLC, from September 2009 to June 2011. From February 2007 to August 2009, he served as a non-Executive Chairman of Manhattan Group Partners LLC, a New York-based merchant banking firm focused exclusively on shipping and transportation. From November 1986 to December 1998, he served as President of Olympic Tower Associates, Executive Vice President of Central American Steamship, Inc., and was a member of the Board of Directors of Williston S.A., all of which were management and business operating arms of the Alexander S. Onassis Public Benefit Foundation. Mr. Galinas served for 12 years as head of the Onassis Group's business activities in the U.S. Mr. Galinas received a M.S. in Marine Engineering from the University of Michigan at Ann Arbor, and an MBA in finance from New York University.

Maria Badekas holds a Master of Law from University of Cambridge (UK) and a Bachelor in English and European Laws from Essex University (UK). From 2001 to 2003 she was a political expert to the European Commission, DG Development. From 2003 to 2005, she was a special advisor to the Mayor of Athens and participated in the preparation of the Athens 2004 Olympic Games (international affairs and public relations). Between 2005 and 2006, she was a special advisor to the Minister of the Hellenic Ministry of Foreign Affairs, and from 2006 to 2009, she was a special advisor to the General Secretary for European Affairs of the Hellenic Ministry of Foreign Affairs.

B. Compensation

The total gross cash compensation paid for 2011 and for the year ended December 31, 2012 to our directors was \$52 and \$nil, respectively. We have agreed to pay each of our non-executive directors a fee of \$40 per year, except that if the U.S. Dollar/Euro exchange rate exceeds 1.35 on the last business day of each quarter, then the amount of the directors' fees payable for that quarter will be increased so that the amount payable in U.S. Dollars will be the equivalent in Euros based on a 1.35 U.S. Dollar/Euro exchange rate. Our directors were not paid any cash directors' fees for the last three quarters of 2011 and for 2012.

On April 23, 2012, the Company's Board of Directors approved the issuance of 166,069 shares of the Company's common stock to the Manager in payment of the \$926 in unpaid fees due to the Manager for the first quarter of 2012 under the management and services agreements with the Company. The number of shares issued to the Manager was based on the closing prices of the Company's common stock on the first day of each month during the quarter, which are the dates the management and services fees were due and payable. The Board also approved the issuance of an aggregate of 19,964 shares of the Company's common stock to the non-executive members of its Board of Directors in payment of \$31 per person in unpaid Board fees for the last three quarters of 2011. The aggregate number of shares issued to the directors was based on the closing prices of the Company's common stock on the last day of each of the last three quarters of 2011, which are the dates that the Board fees were due and payable.

On October 3, 2012, the Company's Board of Directors approved the issuance of 219,650 shares of the Company's common stock to the Manager in payment of the \$807 in unpaid fees due to the Manager for the third quarter of 2012 under the management and services agreements with the Company. The number of shares issued to the Manager was based on the closing prices of the Company's common stock on the first day of each month during the quarter, which are the dates the management and services fees were due and payable. The Board also approved the issuance of an aggregate of 32,679 shares of the Company's common stock to the non-executive members of its Board of Directors in payment of \$152 in unpaid Board fees for the first, second and third quarter of 2012. The aggregate number of shares issued to the directors was based on the closing prices of the Company's common stock on the last day of each of the three quarters of 2012, which are the dates that the Board fees were due and payable.

On January 18, 2013, the Company's Board of Directors approved the issuance of an additional 641,639 shares of the Company's common stock to the Manager in payment of \$809 in unpaid fees due to the Manager for November and December 2012 and January 2013 under the management and services agreements with the Company. The number of shares to be issued to the Manager was based on the closing prices of the Company's common stock on the first day of each month, which are the dates the management and services fees were due and payable. The Board also approved the issuance of an aggregate of 53,020 shares of the Company's common stock to its non-executive directors in payment of \$48 in unpaid Board fees for the fourth quarter of 2012. The aggregate number of shares to be issued to the directors was based on the closing price of the Company's common stock on the last day of the fourth quarter of 2012, which is the date that the Board fees were due and payable.

Our Manager receives a monthly management fee from us to provide overall executive and commercial management of our affairs. See “Principal Shareholders” and “Certain Relationships and Related Transactions.”

There are no agreements between us and any director that provide for benefits upon termination or retirement.

Other than through stock options, pursuant to our Amended and Restated 2005 Stock Incentive Plan and as determined by our Board of Directors, our executive officers do not receive any compensation, including any cash compensation, from us.

C. Board Practices

The term of our Class A directors expires in 2015, the term of our Class B directors expires in 2013 and the term of our Class C directors expires in 2014. There are no agreements between us and any director that provide for benefits upon termination or retirement.

Board Committees

Our board of directors has an audit committee, a compensation committee, a nominating committee and a corporate governance committee. Our board of directors has adopted a charter for each of these committees.

Audit Committee

Our audit committee consists of Messrs. Nauta, Panagiotopoulos and Galinas, each of whom is an independent director. Mr. Nauta has been designated the “Audit Committee Financial Expert” under the SEC rules and the current listing standards of the NASDAQ Marketplace Rules.

The audit committee has powers and performs the functions customarily performed by such a committee (including those required of such a committee under the NASDAQ Marketplace Rules and the SEC). The audit committee is responsible for selecting and meeting with our independent registered public accounting firm regarding, among other matters, audits and the adequacy of our accounting and control systems.

Compensation Committee

Our compensation committee consists of Messrs. Bloomfield and Panagiotopoulos, each of whom is an independent director. The compensation committee reviews and approves the compensation of our executive officers.

Nominating Committee

Our nominating committee consists of Messrs. Bloomfield and Galinas, each of whom is an independent director. The nominating committee is responsible for overseeing the selection of persons to be nominated to serve on our board of directors.

Corporate Governance Committee

Our corporate governance committee consists of Messrs. Bloomfield and Nauta, each of whom is an independent director. The corporate governance committee ensures that we have and follow appropriate governance standards.

Director Independence

Our securities are listed on the NASDAQ Stock Market and we are exempt from certain NASDAQ listing requirements including the requirement that our board be composed of a majority of independent directors. The Board of Directors has evaluated whether each of Messrs. Nauta, Panagiotopoulos, Bloomfield and Galinas is an “independent director” within the meaning of the listing requirements of NASDAQ. The NASDAQ independence definition includes a series of objective tests, such as that the director is not our employee and has not engaged in various types of business dealings with us. In addition, as further required by the NASDAQ requirements, the Board of Directors made a subjective determination as to each of Messrs. Nauta, Panagiotopoulos, Bloomfield and Galinas that no relationships exist which, in the opinion of the Board of Directors, would interfere with the exercise of his independent judgment in carrying out the responsibilities of a director. In making this determination, the Board of

Directors reviewed and discussed information provided by each of Messrs. Nauta, Panagiotopoulos, Bloomfield and Galinas with regard to his business and personal activities as they may relate to us and our management. After reviewing the information presented to it, our Board of Directors has determined that each of Messrs. Nauta, Panagiotopoulos, Bloomfield and Galinas is “independent” within the meaning of such rules. Our independent directors will meet in executive session as often as necessary to fulfill their duties, but no less frequently than annually.

Code of Conduct and Ethics

We have adopted a code of conduct and ethics applicable to our directors, officers and employees in accordance with applicable federal securities laws and the NASDAQ Marketplace Rules.

D. Employees

We currently have no employees. Our Manager is responsible for employing all of the executive officers and staff to execute and supervise our operations based on the strategy devised by the Board of Directors and subject to the approval of our Board of Directors and for recruiting, and employing, either directly or through a crewing agent, the senior officers and all other crew members for our vessels.

Amended and Restated 2005 Stock Incentive Plan

Our Amended and Restated 2005 Stock Incentive Plan was implemented for the purpose of furthering our long-term stability, continuing growth and financial success by retaining and attracting key employees, officers and directors through the use of stock incentives. Our shareholders approved the plan on December 19, 2006. Awards may be granted under the plan in the form of incentive stock options, nonqualified stock options, stock appreciation rights, dividend equivalent rights, restricted stock, unrestricted stock, restricted stock units and performance shares. Pursuant to the plan, we have reserved 300,000 shares of our common stock for awards, of which 204,000 remain available for grant as of the date of this annual report.

In December 2007, the Company’s Board of Directors granted 900 options to directors and 2,500 options to executive officers of which 2,800 would vest in one year, 300 would vest in two years and 300 in three years from the grant, all at an exercise price of \$412.50 per share. Effective December 18, 2009, certain of the Company’s officers and directors have forfeited 2,200 of the stock options granted to them, leaving 1,200 stock options unexercised, which expired on December 24, 2012.

On December 31, 2009, the Company's Board of Directors awarded 25,500 restricted shares to its non-executive directors, executive officers and certain of Manager's employees. Of the unvested restricted shares amounted to 13,400 as of December 31, 2010, 1,000 and 400 restricted shares with an original vesting date on December 31, 2012 have been forfeited in June 2011 and October 2011, respectively. Of the remaining unvested restricted shares amounted to 12,000 as of December 30, 2012, 7,000 restricted shares vested on December 31 2012 and 5,000 restricted shares will vest on December 31, 2013.

Item 7. Major Shareholders and Related Party Transactions

A. Major Shareholders

The following table sets out certain information regarding the beneficial ownership of our common stock as of April 2, 2013 by each of our officers and directors, all of our officers and directors as a group, and each person or group of affiliated persons who is currently known to us to be the beneficial owner of 5% or more of the shares of our common stock.

Unless otherwise indicated, we believe that all persons named in the table have sole voting and investment power with respect to all shares of beneficially owned by them. As beneficial owners of shares of common stock, the persons named in the table do not have different voting rights than any other holder of common stock.

Name	Number of Shares of Common Stock Beneficially Owned	Shares of Common Stock Beneficially Owned (1)	
Ion G. Varouxakis (2)	1,081,652	21.2	%
All directors and executive officers as a group (six persons)	1,139,297	22.3	%

- For purposes of computing the percentage of outstanding shares of common stock held by each person named above, any shares that the named person has the right to acquire within 60 days under warrants or options are
- (1) deemed to be outstanding for that person, but are not deemed to be outstanding when computing the percentage ownership of any other person. Based on 5,100,763 shares of common stock outstanding as of April 2, 2013. Reflects 50,294 shares owned by The Mida's Touch S.A., a Marshall Islands corporation wholly owned by Mr. Varouxakis, 4,000 shares held directly by Mr. Ion Varouxakis and 1,027,358 shares owned by Free Bulkers
- (2) S.A. Does not include 800 shares owned of record by V Estates S.A., which is controlled by his father, or 612 shares owned of record by his mother, as to which shares he disclaims beneficial ownership.

B. Related Party Transactions

Manager

All vessels (except M/V *Free Fighter*, M/V *Free Destiny*, M/V *Free Envoy* and M/V *Free Lady*, which were sold in April 2007, August 2010, May 2011 and November 2011, respectively) receive management services from the Manager, pursuant to ship management agreements between each of the ship-owning companies and the Manager.

In June 2011, each of the ship-owning subsidiaries entered into an amended and restated management agreement and the Company entered into a services agreement with the Manager pursuant to which the monthly technical management fee increased from \$16.5 to \$18.975 and the monthly services fee increased from \$118.5 to \$136.275, effective June 1, 2011. In addition, in connection with the relocation of the Company's offices in June 2011, the Company entered into an agreement with the Manager pursuant to which the Company agreed to pay the Manager 65% of the rental due for the office space, commencing June 2011, and 65% of the apportioned common expenses and maintenance expenses.

In addition, based on the amended services agreement the Company reimbursed the Manager with the lump sum of \$144 (equivalent of Euro 100) for the expenses incurred in relation to the relocation of the Manager's offices and early termination cost for previous lease agreement. This compensation is included in "General and Administrative Expenses" in the accompanying consolidated statement of operations.

Each of the Company's ship-owning subsidiaries pays, as per its management agreement with the Manager, monthly technical management fee of \$18.975 (on the basis that the \$/Euro exchange rate is 1.30 or lower; if on the first business day of each month the \$/Euro exchange rate exceeds 1.30 then the management fee payable will be increased for the month in question, so that the amount payable in \$ will be the equivalent in Euro based on 1.30 \$/Euro exchange rate) plus a fee of \$0.4 per day for superintendent attendance and other direct expenses.

The Company also pays the Manager a fee equal to 1.25% of the gross freight or hire from the employment of FreeSeas' vessels. In addition, the Company pays a 1% commission on the gross purchase price of any new vessel acquired or the gross sale price of any vessel sold by the Company with the assistance of the Manager. During the year ended December 31, 2012, there were no vessel disposals. During the year ended December 31, 2011, the Company paid the Manager \$261 relating to the sale of the M/V *Free Envoy* and M/V *Free Lady* (Note 5). In addition, the Company has incurred commission expenses relating to its commercial agreement with the Manager amounting to \$174, \$371 and \$728 for the years ended December 31, 2012, 2011 and 2010 respectively, included in "Commissions" in the accompanying consolidated statements of operations.

The Company also pays, as per its services agreement with the Manager, a monthly fee of \$136.275, (on the basis that the \$/Euro exchange rate is 1.35 or lower; if on the last business day of each month the \$/Euro exchange rate exceeds 1.35 then the service fee payable will be adjusted for the following month in question, so that the amount payable in dollars will be the equivalent in Euro based on 1.35 \$/Euro exchange rate) as compensation for services related to accounting, financial reporting, implementation of Sarbanes-Oxley internal control over financial reporting procedures and general administrative and management services plus expenses. The Manager is entitled to a termination fee if the agreement is terminated upon a "change of control" as defined in its services agreement with the Manager. The termination fee as of December 31, 2012 would be approximately \$89,020. In connection with the shares to be issued to the Manager in payment of unpaid management and services fees, described below, the Manager has waived its right to terminate the services agreement and receive such termination fee.

On April 23, 2012, the Company's Board of Directors approved the issuance of 166,069 shares of the Company's common stock to the Manager in payment of the \$926 in unpaid fees due to the Manager for the first quarter of 2012 under the management and services agreements with the Company. The number of shares issued to the Manager was based on the closing prices of the Company's common stock on the first day of each month during the quarter, which are the dates the management and services fees were due and payable. The Board also approved the issuance of an aggregate of 19,964 shares of the Company's common stock to the non-executive members of its Board of Directors in payment of \$31 per person in unpaid Board fees for the last three quarters of 2011. The aggregate number of shares issued to the directors was based on the closing prices of the Company's common stock on the last day of each of the last three quarters of 2011, which are the dates that the Board fees were due and payable. On August 10, 2012, pursuant to the above approval of the Company's Board of Directors, the Company issued 166,069 shares of its common stock to the Manager in payment of the \$926 in unpaid fees due to the Manager for the first quarter of 2012 and 19,964 shares of its common stock to its non-executive directors in payment of \$155 in unpaid Board fees for the last three quarters of 2011. All of the foregoing shares will be restricted shares under applicable U.S. securities laws.

On October 3, 2012, the Company's Board of Directors approved the issuance of 219,650 shares of the Company's common stock to the Manager in payment of the \$807 in unpaid fees due to the Manager for the third quarter of 2012 under the management and services agreements with the Company. The number of shares issued to the Manager was based on the closing prices of the Company's common stock on the first day of each month during the quarter, which are the dates the management and services fees were due and payable. The Board also approved the issuance of an aggregate of 32,679 shares of the Company's common stock to the non-executive members of its Board of Directors in payment of \$152 in unpaid Board fees for the first, second and third quarter of 2012. The aggregate number of shares issued to the directors was based on the closing prices of the Company's common stock on the last day of each of the three quarters of 2012, which are the dates that the Board fees were due and payable. On October 11, 2012, pursuant to the above approval of the Company's Board of Directors, the Company issued 219,650 shares of its common stock to the Manager in payment of the \$807 in unpaid fees due to the Manager for the third quarter of 2012 and 32,679 shares of its common stock to its non-executive directors in payment of \$152 in unpaid Board fees for the first, second and third quarter of 2012. All of the foregoing shares will be restricted shares under applicable U.S. securities laws.

On January 18, 2013, the Company's Board of Directors approved the issuance of an additional 641,639 shares of the Company's common stock to the Manager in payment of \$809 in unpaid fees due to the Manager for November and December 2012 and January 2013 under the management and services agreements with the Company. The number of shares issued to the Manager was based on the closing prices of the Company's common stock on the first day of each month, which are the dates the management and services fees were due and payable. The Board also approved the issuance of an aggregate of 53,020 shares of the Company's common stock to its non-executive directors in payment of \$48 in unpaid Board fees for the fourth quarter of 2012. The aggregate number of shares issued to the directors was based on the closing price of the Company's common stock on the last day of the fourth quarter of 2012, which is the date that the Board fees were due and payable. On February 28, 2013, pursuant to the above approval of the Company's Board of Directors, the Company issued 641,639 shares of its common stock to the Manager in payment of \$809 in unpaid fees due to the Manager for November and December 2012 and January 2013 and 41,909 shares of its common stock to its non-executive directors in payment of \$48 in unpaid Board fees for the fourth quarter of 2012. All of the foregoing shares will be restricted shares under applicable U.S. securities laws.

Fees and expenses charged by the Manager are included in the consolidated financial statements in “Management and other fees to a related party,” “General and administrative expenses,” “Operating expenses,” “Gain on sale of vessel,” “Vessel impairment loss,” “Advances for vessels under construction” and “Write-off of advances for vessels under construction”. The total amounts charged for the year ended December 31, 2012, 2011 and 2010 amounted to \$4,560 (\$2,404 of management fees, \$1,985 of services fees, \$134 of superintendent fees and \$37 for other expenses), \$4,451 (\$1,900 of management fees, \$1,609 of services fees, \$146 of superintendent fees, \$144 for compensation of relocation expenses, \$179 for other expenses and \$473 for management fees and supervision expenses for vessels under construction), and \$3,826 (\$1,978 of management fees, \$1,439 of services fees, \$178 of superintendent fees, \$117 for other expenses and \$114 for management fees and supervision expenses for vessels under construction), respectively.

The “Management and other fees to a related party” and the “General and administrative expenses” for the year ended December 31, 2012 include the net amount of \$1,037 recognized as stock-based compensation expense (the amount of \$1,442 recognized as stock-based compensation expense netted by the amount of \$405 recognized as gain) for the issuance of the aggregate 385,719 shares of the Company's common stock to the Manager and the issuance of the aggregate 52,643 shares of the Company's common stock to the non-executive members of its Board of Directors. As well, the above mentioned stock-based compensation expense includes the compensation recognized for the approved issuance (on January 18, 2013) of 355,890 additional common shares to the Manager in payment of \$538 in unpaid fees due to the Manager for November and December 2012 and in payment of \$48 in unpaid Board fees for the fourth quarter of 2012.

On December 31, 2009, the Company's Board of Directors awarded 25,500 restricted shares to its non-executive directors, executive officers and certain of Manager's employees. Of the remaining 12,000 unvested restricted shares, 7,000 vested on December 31, 2012 and 5,000 will vest on December 31, 2013 pursuant to the Company's equity incentive plan. The cost of these shares is amortized over their vesting period and is included in “General and administrative expenses” in the consolidated statements of operations.

The balance due from the Manager as of December 31, 2012 and December 31, 2011 was \$346 and \$563 respectively. The amount paid to the Manager for office space during the year ended December 31, 2012, 2011 and 2010 was \$143, \$178 and \$204, respectively and is included in “General and administrative expenses” in the consolidated statements of operations.

First Business Bank (FBB)

The Company received from FBB, in which the Company's Chairman, Chief Executive Officer and President owns a minority interest, a loan of \$27,750 in December 2009, to refinance its then existing loan balance of \$21,750 with FBB and to receive additional liquidity of up to \$6,000 with a first priority mortgage over the M/V *Free Impala* and the M/V *Free Neptune*. The outstanding balance of the loan as of December 31, 2012 was \$23,237. Interest charged under the loan facility for the year ended December 31, 2012, 2011 and 2010 amounts to \$1,115, \$812 and \$893,

respectively, and is included in "Interest and finance costs" in the consolidated statements of operations.

On December 23, 2011 the Company agreed by letter with FBB to defer the repayment installment of \$837.5 and the interest payment of \$197 both due on December 16, 2011 until the next repayment date March 16, 2012. In addition, the bank granted a waiver to the security value covenant and the financial covenants and their testing has been waived until March 16, 2012. On March 23, 2012, the Company received a notice from FBB according to which failure to (i) pay the \$1,675 repayment installment due in March 2012 (ii) pay accrued interest and (iii) failure to pay default interest constitute an event of default. On April 12, 2012, the Company received notice from FBB according to which along with the previously mentioned events, failure to make periodic monthly installments into the retention account since September 2011 and violation of loan to value covenant constitute events of default and notifies the Company that if remedy of all of the above is not made up to April 20, 2012, FBB will take whatever action is open to them. The Company has not either paid the installment of \$837.5 which was due on June 18, 2012 or the accrued interest. On July 11, August 22, November 28, December 19, 2012, and January 24, 2013 the Company received notices from FBB, according to which failure to (i) pay the \$4,188 repayment installment due in December 2012, (ii) pay accrued interest and (iii) failure to pay default interest constitute an event of default. The Company is in discussions to permanently amend the amortization schedule and reach an agreement on the unpaid principal and interest.

Other Related Parties

The Company, through the Manager, uses from time to time a ship-broking firm associated with family members of the Company's Chairman, Chief Executive Officer and President for certain of the charters of the Company's fleet. During the years ended December 31, 2012, 2011 and 2010, such ship-broking firm charged the Company commissions of \$43, \$56 and \$175, respectively, which are included in "Commissions" in the consolidated statements of operations. The balance due to the ship-broking firm as of December 31, 2012 and December 31, 2011 was \$94 and \$84, respectively.

C. Interest of Experts and Counsel

Not required.

Item 8. Financial Information

A. Consolidated Statements and Other Financial Information.

Please see “Item 18. Financial Statements” for a list of the financial statements filed as part of this annual report.

B. Significant Changes

Except as described in this annual report, since the date of the annual financial statements included in this annual report, no significant changes have occurred to our financial condition.

Item 9. The Offer and Listing

A. Offer and Listing Details

The closing high and low sales prices of our common stock as reported by the NASDAQ Stock Market, for the years, quarters and months indicated, are as follows (adjusted to give effect of our one share for five share reverse stock split that was effective on October 1, 2010 and our one share for ten share reverse split that was effective on February 14, 2013):

For the Years Ended:	Common Stock	
	High	Low
December 31, 2008	\$398.50	45.00
December 31, 2009	174.50	58.50
December 31, 2010	79.50	36.10

B. Plan of Distribution

Not applicable.

C. Markets

Our common stock began trading on the NASDAQ Capital Market on February 26, 2013 under the trading symbol "FREE." Prior to that time, our common stock traded on the NASDAQ Global Market between November 8, 2007 and February 25, 2013 under the trading symbol "FREE." Prior to that time, our common stock was traded on the NASDAQ Capital Market under the symbol "FREE."

D. Selling Shareholders

Not required.

E. Dilution

Not required.

F. Expenses of the Issue

Not required.

Item 10. Additional Information

A. Share Capital

Not required.

B. Memorandum and Articles of Association

The information required herein was provided in the Registration Statement on Form F-1 (File No. 333-145203), the report on Form 6-K dated October 22, 2009, both previously filed by us with the Securities and Exchange Commission and incorporated herein by reference, and filed herewith as Exhibit 1.5.

One million shares of our preferred stock have been designated Series A Participating Preferred Stock in connection with our adoption of a shareholder rights plan as described below.

Shareholder Rights Plan

General

Each share of our common stock includes a right that entitles the holder to purchase from us a unit consisting of one-thousandth of a share of our Series A participating preferred stock at a purchase price of \$90.00 per unit, subject to specified adjustments. The rights are issued pursuant to a rights agreement between us and American Stock Transfer & Trust Company, LLC, as rights agent. Until a right is exercised, the holder of a right will have no rights to vote or receive dividends or any other shareholder rights.

The rights may have anti-takeover effects. The rights will cause substantial dilution to any person or group that attempts to acquire us without the approval of our board of directors. As a result, the overall effect of the rights may be to render more difficult or discourage any attempt to acquire us. Because our board of directors can approve a redemption of the rights or a permitted offer, the rights should not interfere with a merger or other business combination approved by our board of directors.

We have summarized the material terms and conditions of the rights agreement and the rights below. For a complete description of the rights, we encourage you to read the rights agreement, which we have filed as an exhibit to this annual report.

Detachment of the Rights

The rights are attached to all certificates representing our outstanding common stock and will attach to all common stock certificates we issue prior to the rights distribution date that we describe below. The rights are not exercisable until after the rights distribution date and will expire at the close of business on the tenth anniversary date of the adoption of the rights plan, unless we redeem or exchange them earlier as described below. The rights will separate from the common stock and a rights distribution date will occur, subject to specified exceptions, on the earlier of the following two dates:

10 days following a public announcement that a person or group of affiliated or associated persons or an “acquiring person” has acquired or obtained the right to acquire beneficial ownership of 15% or more of our outstanding common stock; or

10 business days following the start of a tender or exchange offer that would result, if closed, in a person becoming an “acquiring person.”

Existing shareholders and their affiliates are excluded from the definition of “acquiring person” for purposes of the rights, and therefore their ownership or future share acquisitions cannot trigger the rights. Specified “inadvertent” owners that would otherwise become an acquiring person, including those who would have this designation as a result of repurchases of common stock by us, will not become acquiring persons as a result of those transactions.

Our board of directors may defer the rights distribution date in some circumstances, and some inadvertent acquisitions will not result in a person becoming an acquiring person if the person promptly divests itself of a sufficient number of shares of common stock.

Until the rights distribution date:

our common stock certificates will evidence the rights, and the rights will be transferable only with those certificates; and

any new shares of common stock will be issued with rights and new certificates will contain a notation incorporating the rights agreement by reference.

As soon as practicable after the rights distribution date, the rights agent will mail certificates representing the rights to holders of record of common stock at the close of business on that date. After the rights distribution date, only separate rights certificates will represent the rights.

We will not issue rights with any shares of common stock we issue after the rights distribution date, except as our board of directors may otherwise determine.

Flip-In Event

A “flip-in event” will occur under the rights agreement when a person becomes an acquiring person. If a flip-in event occurs and we do not redeem the rights as described under the heading “—Redemption of Rights” below, each right, other than any right that has become void, as described below, will become exercisable at the time it is no longer redeemable for the number of shares of common stock, or, in some cases, cash, property or other of our securities,

having a current market price equal to two times the exercise price of such right.

If a flip-in event occurs, all rights that then are, or in some circumstances that were, beneficially owned by or transferred to an acquiring person or specified related parties will become void in the circumstances the rights agreement specifies.

Flip-Over Event

A “flip-over event” will occur under the rights agreement when, at any time after a person has become an acquiring person:

• we are acquired in a merger or other business combination transaction; or

• 50% or more of our assets, cash flows or earning power is sold or transferred.

If a flip-over event occurs, each holder of a right, other than any right that has become void as we describe under the heading “—Flip-In Event” above, will have the right to receive the number of shares of common stock of the acquiring company having a current market price equal to two times the exercise price of such right.

Antidilution

The number of outstanding rights associated with our common stock is subject to adjustment for any stock split, stock dividend or subdivision, combination or reclassification of our common stock occurring prior to the rights distribution date. With some exceptions, the rights agreement does not require us to adjust the exercise price of the rights until cumulative adjustments amount to at least 1% of the exercise price. It also does not require us to issue fractional shares of our preferred stock that are not integral multiples of one one-hundredth of a share, and, instead we may make a cash adjustment based on the market price of the common stock on the last trading date prior to the date of exercise. The rights agreement reserves us the right to require, prior to the occurrence of any flip-in event or flip-over event that, on any exercise of rights, that a number of rights must be exercised so that we will issue only whole shares of stock.

Redemption of Rights

At any time until 10 days after the date on which the occurrence of a flip-in event is first publicly announced, we may redeem the rights in whole, but not in part, at a redemption price of \$0.01 per right. The redemption price is subject to adjustment for any stock split, stock dividend or similar transaction occurring before the date of redemption. At our option, we may pay that redemption price in cash, shares of common stock or any other consideration our board of directors may select. The rights are not exercisable after a flip-in event until they are no longer redeemable. If our board of directors timely orders the redemption of the rights, the rights will terminate on the effectiveness of that action.

Exchange of Rights

We may, at our option, exchange the rights (other than rights owned by an acquiring person or an affiliate or an associate of an acquiring person, which have become void), in whole or in part. The exchange must be at an exchange ratio of one share of common stock per right, subject to specified adjustments at any time after the occurrence of a flip-in event and prior to:

any person other than our existing shareholders becoming the beneficial owner of common stock with voting power equal to 50% or more of the total voting power of all shares of common stock entitled to vote in the election of directors; or

the occurrence of a flip-over event.

Amendment of Terms of Rights

While the rights are outstanding, we may amend the provisions of the rights agreement only as follows:

to cure any ambiguity, omission, defect or inconsistency;

to make changes that do not adversely affect the interests of holders of rights, excluding the interests of any acquiring person; or

to shorten or lengthen any time period under the rights agreement, except that we cannot change the time period when rights may be redeemed or lengthen any time period, unless such lengthening protects, enhances or clarifies the benefits of holders of rights other than an acquiring person.

At any time when no rights are outstanding, we may amend any of the provisions of the rights agreement, other than decreasing the redemption price.

C. Material Contracts

The following is a summary of the agreements considered material to the Company and should be read together with the full text of such agreements.

On May 31, 2012, the Company entered into a Sixth Supplemental Agreement with Credit Suisse, which amends and restates the Facility Agreement dated December 24, 2007, as amended, between the Company and Credit Suisse. See "Management's Discussion and Analysis of Financial Condition and Results of Operations — Long Term Debt".

On September 7, 2012, the Company and certain of its subsidiaries entered into an amended and restated facility agreement with Deutsche Bank. See "Management's Discussion and Analysis of Financial Condition and Results of Operations — Long Term Debt".

D. Exchange Controls.

Under Marshall Islands law, there are currently no restrictions on the export or import of capital, including foreign exchange controls or restrictions that affect the remittance of dividends, interest or other payments to non-resident holders of our shares.

E. Taxation.

The following is a discussion of the material Marshall Islands and United States federal income tax consequences relevant to a U.S. Holder, as defined below, of our common stock. This discussion does not purport to deal with the tax consequences of owning common stock to all categories of investors, some of which, such as dealers in securities, investors whose functional currency is not the United States dollar, and investors that own, actually or under applicable constructive ownership rules, 10% or more of the voting power of our stock, may be subject to special rules. This discussion deals only with U.S. Holders that hold the common stock as a capital asset. You are encouraged to consult your own tax advisors concerning the overall tax consequences arising in your own particular situation under United States federal, state, local or foreign law of the ownership of common stock. **The discussion is not intended, and should not be construed, as legal or professional tax advice and does not exhaust all possible tax considerations.**

Marshall Islands Tax Consequences

We are incorporated in the Marshall Islands. Under current Marshall Islands law, we are not subject to tax on income or capital gains, and no Marshall Islands withholding tax will be imposed upon payments of dividends by us to our stockholders provided such stockholders are not residents of the Marshall Islands. Holders of our common stock who are not residents of, domiciled in, or carrying on any commercial activity in the Marshall Islands will not be subject to Marshall Islands tax on the sale or other disposition of our common stock.

United States Federal Income Tax Consequences

The following are the material United States federal income tax consequences to us of our activities and to U.S. Holders and Non-U.S. Holders, each as defined below, of the ownership and disposition of our common stock. The following discussion of United States federal income tax matters is based on the United States Internal Revenue Code of 1986, as amended, or the Code, judicial decisions, administrative pronouncements, and existing and proposed regulations issued by the United States Department of the Treasury, all of which are subject to change, possibly with retroactive effect. This discussion below is based, in part, upon Treasury Regulations promulgated under Section 883 of the Code, and in part, on the description of our business as described in “About Our Company” above and assumes that we conduct our business as described in that section.

TO ENSURE COMPLIANCE WITH TREASURY DEPARTMENT CIRCULAR 230, HOLDERS OF OUR COMMON STOCK ARE HEREBY NOTIFIED THAT: (A) ANY DISCUSSION OF FEDERAL TAX ISSUES IN THIS ANNUAL REPORT IS NOT INTENDED OR WRITTEN TO BE RELIED UPON, AND CANNOT BE RELIED UPON, BY HOLDERS FOR THE PURPOSE OF AVOIDING PENALTIES THAT MAY BE IMPOSED ON HOLDERS UNDER THE INTERNAL REVENUE CODE; (B) SUCH DISCUSSION IS BEING

USED IN CONNECTION WITH THE PROMOTION OR MARKETING (WITHIN THE MEANING OF CIRCULAR 230) BY THE ISSUERS OF THE TRANSACTIONS OR MATTERS ADDRESSED HEREIN; AND (C) HOLDERS SHOULD SEEK ADVICE BASED ON THEIR PARTICULAR CIRCUMSTANCES FROM AN INDEPENDENT TAX ADVISOR.

Taxation of Operating Income: In General

Unless exempt from United States federal income taxation under the rules discussed below, a foreign corporation is subject to United States federal income taxation in respect of any income that is derived from the use of vessels, from the hiring or leasing of vessels for use on a time, voyage or bareboat charter basis, from the participation in a shipping pool, partnership, strategic alliance, joint operating agreement, code sharing arrangements or other joint venture it directly or indirectly owns or participates in that generates such income, or from the performance of services directly related to those uses, which we refer to as “shipping income,” to the extent that the shipping income is derived from sources within the United States. For these purposes, 50% of shipping income that is attributable to transportation that begins or ends, but that does not both begin and end, in the United States, exclusive of certain U.S. territories and possessions, constitutes income from sources within the United States, which we refer to as “U.S.-Source Gross Transportation Income” or “USSGTI.”

Shipping income attributable to transportation that both begins and ends in the United States is considered to be 100% from sources within the United States. U.S. law prohibits us from engaging in transportation that produces income considered to be 100% from sources within the United States.

Shipping income attributable to transportation exclusively between non-U.S. ports will be considered to be 100% derived from sources outside the United States. Shipping income derived from sources outside the United States will not be subject to any United States federal income tax.

In the absence of exemption from tax under Section 883, our USSGTI would be subject to a 4% tax imposed without allowance for deductions as described below.

we are organized in a foreign country (our “country of organization”) that grants an “equivalent exemption” to corporations organized in the United States;

we satisfy one of the following ownership tests (discussed in more detail below): (1) more than 50% of the value of our stock is owned, directly or indirectly, by “qualified shareholders,” which includes persons (i) who are “residents” of our country of organization or of another foreign country that grants an “equivalent exemption” to corporations organized in the United States, and (ii) who comply with certain documentation requirements, which we refer to as the “Qualified Shareholder Ownership Test,” or (2) our stock is primarily and regularly traded on one or more established securities markets in our country of organization, in another country that grants an “equivalent exemption” to United States corporations, or in the United States, which we refer to as the “Publicly-Traded Test;” and we are not considered “closely held,” which we refer to as the “Closely-Held Test;” and

we meet certain substantiation, reporting and other requirements.

Exemption of Operating Income from United States Federal Income Taxation

Under Section 883 of the Code, we will be exempt from United States federal income taxation on our U.S.-source shipping income if:

The Republic of the Marshall Islands, the jurisdiction where we and our shipowning subsidiaries are incorporated, grants “equivalent exemptions” to United States corporations. Therefore, we should meet the first requirement for the Section 883 exemption. Additionally, we intend to comply with the substantiation, reporting and other requirements that are applicable under Section 883 of the Code. As a result, qualification for the Section 883 exemption will turn primarily on our ability to satisfy the second requirement enumerated above.

Since the 2007 tax year, we have claimed the benefits of the Section 883 tax exemption for our ship-owning subsidiaries on the basis of the Publicly-Traded Test. For 2012 and subsequent tax years, we anticipate that we will need to satisfy the Publicly-Traded Test in order to qualify for benefits under Section 883. While we expect to satisfy the Publicly-Traded Test for such years, there can be no assurance in this regard. Our ability to satisfy the Publicly-Traded Test is discussed below.

The regulations provide, in pertinent part, that the stock of a foreign corporation will be considered to be “primarily traded” on an established securities market in a country if the number of shares of each class of stock that are traded during the tax year on all established securities markets in that country exceeds the number of shares in each such class that are traded during that year on established securities markets in any other single country. Our common stock, our sole class of our issued and outstanding stock, is “primarily traded” on the NASDAQ Capital Market.

Under the regulations, our stock will be considered to be “regularly traded” if one or more classes of our stock representing 50% or more of our outstanding shares, by total combined voting power of all classes of stock entitled to

vote and by total combined value of all classes of stock, are listed on one or more established securities markets, which we refer to as the “listing threshold.” Our common stock, our sole class of issued and outstanding stock, is listed on the NASDAQ Capital Market, and accordingly, we will satisfy this listing requirement.

The regulations further require that with respect to each class of stock relied upon to meet the listing requirement: (i) such class of the stock is traded on the market, other than in minimal quantities, on at least 60 days during the tax year or 1/6 of the days in a short tax year; and (ii) the aggregate number of shares of such class of stock traded on such market is at least 10% of the average number of shares of such class of stock outstanding during such year or as appropriately adjusted in the case of a short tax year. We believe we will satisfy the trading frequency and trading volume tests. Even if this were not the case, the regulations provide that the trading frequency and trading volume tests will be deemed satisfied by a class of stock if, as we expect to be the case with our common stock, such class of stock is traded on an established market in the United States, and such class of stock is regularly quoted by dealers making a market in such stock. While we anticipate that we will satisfy the trading frequency and trading volume tests, satisfaction of these requirements is outside of our control and hence, no assurances can be provided that we will satisfy the Publicly-Traded Test each year.

In addition, even if the “primarily traded” and “regularly traded” portions of the Publicly-Traded Test described above are satisfied, the Closely-Held Test provides, in pertinent part, that a class of stock will not be considered to be “regularly traded” on an established securities market for any tax year in which 50% or more of the vote and value of the outstanding shares of such class of stock are owned, actually or constructively under specified stock attribution rules, on more than half the days during the tax year by persons who each own directly or indirectly 5% or more of the vote and value of such class of stock, who we refer to as “5% Shareholders.” For purposes of being able to determine our 5% Shareholders under the Closely-Held Test, the regulations permit us to rely on Schedule 13G and Schedule 13D filings with the Securities and Exchange Commission. The regulations further provide that an investment company that is registered under the Investment Company Act of 1940, as amended, will not be treated as a 5% Shareholder for purposes of the Closely-Held Test.

In the event the Closely-Held Test is triggered, the regulations provide that the Closely-Held Test will nevertheless not apply if we can establish that among the closely-held group of 5% Shareholders, sufficient shares are owned by our 5% Shareholders that are considered to be “qualified shareholders,” to preclude non-qualified 5% Shareholders in the closely-held group from owning 50% or more of the value of such class of stock for more than half of the days during the tax year, which we refer to as the exception to the Closely-Held Test. Establishing such qualification and ownership by our direct and indirect 5% Shareholders will depend on their meeting the requirements of one of the qualified shareholder tests set out under the regulations applicable to 5% Shareholders and compliance with certain ownership certification procedures by each intermediary or other person in the chain of ownership between us and such qualified 5% Shareholders. Further, the regulations require, and we must certify, that no person in the chain of qualified ownership of shares relied on by us to qualify for exemption holds those shares in bearer form.

The ability to avoid application of the Closely-Held Test will be outside our control, and, as a result, there can be no assurance regarding whether we will satisfy the Publicly Traded Test for any year. For this and other reasons, there can be no assurance that we or any of our subsidiaries will qualify for the benefits of Section 883 of the Code for any year.

Taxation in Absence of Exemption

To the extent the benefits of Section 883 are unavailable, our USSGTI, to the extent not considered to be “effectively connected” with the conduct of a U.S. trade or business, as described below, would be subject to a 4% tax imposed by Section 887 of the Code on a gross basis, without the benefit of deductions, otherwise referred to as the “4% Tax.” Since under the sourcing rules described above, no more than 50% of our shipping income would be treated as being derived from U.S. sources, the maximum effective rate of U.S. federal income tax on our shipping income would never exceed 2% under the 4% gross basis tax regime.

To the extent the benefits of the Section 883 exemption are unavailable, and our USSGTI is considered to be “effectively connected” with the conduct of a U.S. trade or business, as described below, any such “effectively connected” U.S.-source shipping income, net of applicable deductions, would be subject to the U.S. federal corporate income tax currently imposed at rates of up to 35%. In addition, we may be subject to the 30% “branch profits” taxes on earnings effectively connected with the conduct of such trade or business, as determined after allowance for certain adjustments, and on certain interest paid or deemed paid attributable to the conduct of its U.S. trade or business.

Our U.S.-source shipping income would be considered “effectively connected” with the conduct of a U.S. trade or business only if:

We have, or are considered to have, a fixed place of business in the United States involved in the earning of shipping income; and

substantially all of our U.S.-source shipping income is attributable to regularly scheduled transportation, such as the operation of a vessel that follows a published schedule with repeated sailings at regular intervals between the same points for voyages that begin or end in the United States.

We do not intend to have, or permit circumstances that would result in having any vessel operating to the United States on a regularly scheduled basis. Based on the foregoing and on the expected mode of our shipping operations and other activities, we believe that none of our U.S.-source shipping income will be “effectively connected” with the conduct of a U.S. trade or business.

United States Taxation of Gain on Sale of Vessels

If we qualify for the Section 883 exemption, then gain from the sale of any vessel may be exempt from tax under Section 883. Even if such gain is not exempt from tax under Section 883, we will not be subject to United States federal income taxation with respect to gain realized on a sale of a vessel, assuming that we are not, and have never been, engaged in a U.S. trade or business. Under certain circumstances, if we are so engaged, gain on the sale of vessels could be subject to U.S. federal income tax.

United States Federal Income Taxation of U.S. Holders

As used herein, the term “U.S. Holder” means a beneficial owner of common stock that is a United States citizen or resident, United States corporation or other United States entity taxable as a corporation, an estate the income of which is subject to United States federal income taxation regardless of its source, or a trust if a court within the United States is able to exercise primary jurisdiction over the administration of the trust and one or more United States persons have the authority to control all substantial decisions of the trust.

If a partnership holds our common stock, the tax treatment of a partner will generally depend upon the status of the partner and upon the activities of the partnership. If you are a partner in a partnership holding our common stock, you are encouraged to consult your tax advisor.

Distributions. Subject to the discussion of passive foreign investment companies (or “PFICs”) below, any distributions made by us with respect to our common stock will generally be taxable as dividend income to the extent of our current or accumulated earnings and profits, as determined under United States federal income tax principles. Distributions in excess of our earnings and profits will be treated first as a nontaxable return of capital to the extent of the U.S. Holder’s tax basis in his or her common stock on a dollar-for-dollar basis and thereafter as capital gain. Because we are not a United States corporation, U.S. Holders that are corporations will not be entitled to claim a dividends received deduction with respect to any distributions they receive from us. Dividends paid with respect to our common stock will generally be treated as passive category income or, in the case of certain types of U.S. Holders, general category income for purposes of computing allowable foreign tax credits for United States foreign tax credit purposes.

For tax years beginning before January 1, 2013, dividends paid on our common stock to a U.S. Holder who is an individual, trust or estate, which we refer to as a “U.S. Individual Holder,” will generally be treated as “qualified dividend income” that is taxable to such a U.S. Individual Holder at preferential tax rates provided that (1) we are not a passive foreign investment company for the tax year during which the dividend is paid or the immediately preceding tax year (which we do not believe we are, have been or will be), (2) our common stock is readily tradable on an established securities market in the United States (such as the NASDAQ Capital Market), and (3) the U.S. Individual Holder has owned the common stock for more than 60 days in the 121-day period beginning 60 days before the date on which the common stock becomes ex-dividend. There is no assurance that any dividends paid on our common stock will be eligible for these preferential rates in the hands of a U.S. Individual Holder. Any distributions treated as dividends paid by us that are not eligible for these preferential rates will be taxed as ordinary income to a U.S. Individual Holder.

Special rules may apply to any “extraordinary dividend” generally, a dividend in an amount which is equal to or exceeds ten percent of a stockholder’s adjusted basis (or fair market value in certain circumstances) in a share of our stock paid by us. If we pay an “extraordinary dividend” on our stock that is treated as “qualified dividend income,” then any loss derived by a U.S. Individual Holder from the sale or exchange of such stock will be treated as long-term capital loss to the extent of such dividend.

Sale, Exchange or Other Disposition of Common Stock. Assuming we do not constitute a passive foreign investment company for any tax year, a U.S. Holder generally will recognize taxable gain or loss upon a sale, exchange or other disposition of our common stock in an amount equal to the difference between the amount realized by the U.S. Holder from such sale, exchange or other disposition and the U.S. Holder’s tax basis in such stock. Such gain or loss will be treated as long-term capital gain or loss if the U.S. Holder’s holding period is greater than one year at the time of the sale, exchange or other disposition. Such capital gain or loss will generally be treated as U.S.-source income or loss, as applicable, for U.S. foreign tax credit purposes. A U.S. Holder’s ability to deduct capital losses is subject to certain limitations.

Passive Foreign Investment Company Status and Significant Tax Consequences. Special United States federal income tax rules apply to a U.S. Holder that holds stock in a foreign corporation classified as a passive foreign investment company for United States federal income tax purposes. In general, we will be treated as a passive foreign investment company with respect to a U.S. Holder if, for any tax year in which such holder held our common stock, either:

at least 75% of our gross income for such tax year consists of passive income (e.g., dividends, interest, capital gains and rents derived other than in the active conduct of a rental business); or

at least 50% of the average value of the assets held by the corporation during such tax year produce, or are held for the production of, passive income.

For purposes of determining whether we are a passive foreign investment company, we will be treated as earning and owning our proportionate share of the income and assets, respectively, of any of our subsidiary corporations in which we own at least 25% of the value of the subsidiary's stock. Income earned, or deemed earned, by us in connection with the performance of services would not constitute passive income. By contrast, rental income would generally constitute "passive income" unless we were treated under specific rules as deriving our rental income in the active conduct of a U.S. trade or business. We may own, directly or indirectly, interests in other entities that are passive foreign investment companies, or subsidiary PFICs. If we are a passive foreign investment company, each U.S. Holder will be treated as owning its pro rata share by value of the stock of any such subsidiary PFICs.

Based on our current operations and future projections, we do not believe that we are, nor do we expect to become, a passive foreign investment company with respect to any tax year. Although we are not relying upon an opinion of counsel on this issue, our belief is based principally on the position that, for purposes of determining whether we are a passive foreign investment company, the gross income we derive or are deemed to derive from the time chartering and voyage chartering activities of our wholly owned subsidiaries should constitute services income, rather than rental income. Correspondingly, such income should not constitute passive income, and the assets that we or our wholly-owned subsidiaries own and operate in connection with the production of such income, in particular, the vessels, should not constitute passive assets for purposes of determining whether we are a passive foreign investment company. Internal Revenue Service pronouncements concerning the characterization of income derived from time charters and voyage charters as services income for other tax purposes support this position. However, a recent case reviewing the deductibility of commissions by a foreign sales corporation decided that time charter income constituted rental income under the law. While the IRS asserted in such case that the time charter income should be considered services income, in the absence of any legal authority specifically relating to the statutory provisions governing PFICs and time charter income, the IRS or a court could disagree with our position. In addition, although we intend to conduct our affairs in a manner to avoid being classified as a PFIC with respect to any tax year, we cannot assure you that the nature of our operations will not change in the future.

If we are determined to be a PFIC for any tax year (or portion thereof) that is included in the holding period of a U.S. Holder of our common stock, and the U.S. Holder did not make a timely qualified electing fund (“QEF”) election for our first tax year as a PFIC in which the U.S. Holder held (or was deemed to hold) common stock, as described below, such holder generally will be subject to special rules with respect to:

- any gain recognized by the U.S. Holder on the sale or other disposition of its common stock; and

any “excess distribution” made to the U.S. Holder (generally, any distributions to such U.S. Holder during a tax year of the U.S. Holder that are greater than 125% of the average annual distributions received by such U.S. Holder in respect of the common stock during the three preceding tax years of such U.S. Holder or, if shorter, such U.S. Holder’s holding period for the common stock).

Under these rules,

the U.S. Holder’s gain or excess distribution will be allocated ratably over the U.S. Holder’s holding period for the common stock;

the amount allocated to the U.S. Holder’s current tax year and any tax years in the U.S. Holder’s holding period before the first day of our first tax year in which we are a PFIC, will be taxable as ordinary income;

the amount allocated to other tax years (or portions thereof) of the U.S. Holder and included in its holding period will be taxed at the highest tax rate in effect for that year and applicable to the U.S. Holder; and

the interest charge generally applicable to underpayments of tax will be imposed in respect of the tax attributable to each such other tax year of the U.S. Holder.

In general, if we are determined to be a PFIC, a U.S. Holder will avoid the PFIC tax consequences described above in respect to our common stock by making a timely QEF election to include in income its pro rata share of our net capital gains (as long-term capital gain) and other earnings and profits (as ordinary income), on a current basis, in each case whether or not distributed, in the tax year of the U.S. Holder in which or with which our tax year ends. A U.S. Holder may make a separate election to defer the payment of taxes on undistributed income inclusions under the QEF rules, but if deferred, any such taxes will be subject to an interest charge.

Although a determination as to our PFIC status will be made annually, an initial determination that our company is a PFIC will generally apply for subsequent years to a U.S. Holder who held our common stock while we were a PFIC, whether or not we meet the test for PFIC status in those subsequent years. A U.S. Holder who makes the QEF election discussed above for our first tax year as a PFIC in which the U.S. Holder owns (or is deemed to own) our common stock, however, will not be subject to the PFIC tax and interest charge rules discussed above in respect to such shares. In addition, such U.S. Holder will not be subject to the QEF inclusion regime with respect to such shares for any tax year of ours that ends within or with a tax year of the U.S. Holder and in which we are not a PFIC. On the other hand, if the QEF election is not effective for each of our tax years in which we are a PFIC, and the U.S. Holder owns (or is deemed to hold) our common stock, the PFIC rules discussed below will continue to apply to such shares unless the holder makes a purging election, as described below, and pays the tax and interest charge with respect to the gain inherent in such shares attributable to the pre-QEF election period.

If a U.S. Holder has made a QEF election with respect to our common stock, and the special tax and interest charge rules do not apply to such shares (because of a timely QEF election for our first tax year as a PFIC in which the U.S. Holder owns (or is deemed to own) such shares or a purge of the PFIC taint pursuant to a purging election, as described below), any gain recognized on the sale of our common stock generally will be taxable as capital gain, and no interest charge will be imposed. As discussed above, U.S. Holders of a QEF are currently taxed on their pro rata shares of its earnings and profits, whether or not distributed. In such case, a subsequent distribution of such earnings and profits that were previously included in income generally should not be taxable as a dividend to such U.S. Holders. The tax basis of a U.S. Holder's shares in a QEF will be increased by amounts that are included in income, and decreased by amounts distributed but not taxed as dividends, under the above rules. Similar basis adjustments apply to property if by reason of holding such property the U.S. Holder is treated under the applicable attribution rules as owning shares in a QEF.

The QEF election is made on a shareholder-by-shareholder basis and, once made, can be revoked only with the consent of the IRS. A U.S. Holder generally makes a QEF election by attaching a completed IRS Form 8621 (Return by a Shareholder of a Passive Foreign Investment Company or Qualified Electing Fund), including the information provided in a PFIC annual information statement, to a timely filed U.S. federal income tax return for the tax year to which the election relates. Retroactive QEF elections generally may be made only by filing a protective statement with such return and if certain other conditions are met or with the consent of the IRS. U.S. Holders should consult with their tax advisors regarding the availability and tax consequences of a retroactive QEF election under their particular circumstances. In order to comply with the requirements of a QEF election, a U.S. Holder must receive a PFIC annual information statement from us. If we determine we are a PFIC for any tax year, we will endeavor to provide to a U.S. Holder such information as the IRS may require, including a PFIC annual information statement, in order to enable the U.S. Holder to make and maintain a QEF election. However, there is no assurance that we will have timely knowledge of our status as a PFIC in the future or of the required information to be provided.

If a U.S. Holder, at the close of its tax year, owns shares in a PFIC that are treated as “marketable stock”, the U.S. Holder may make a mark-to-market election with respect to such shares for such tax year. If the U.S. Holder makes a valid mark-to-market election for the first tax year of the U.S. Holder in which the U.S. Holder owns (or is deemed to hold) common stock in us and for which we are determined to be a PFIC, such holder generally will not be subject to the PFIC rules described above in respect to its common stock. Instead, in general, the U.S. Holder will include as ordinary income each year the excess, if any, of the fair market value of its common stock at the end of its tax year over the adjusted basis in its common stock. The U.S. Holder also will be allowed to take an ordinary loss in respect of the excess, if any, of the adjusted basis of its common stock over the fair market value of its common stock at the end of its tax year (but only to the extent of the net amount of previously included income as a result of the mark-to-market election). The U.S. Holder’s basis in its common stock will be adjusted to reflect any such income or loss amounts, and any further gain recognized on a sale or other taxable disposition of the common stock will be treated as ordinary income. The mark-to-market election is available only if our common stock is treated as marketable stock. If our common stock is listed on the NASDAQ Capital Market and is regularly traded on such market in accordance with applicable Treasury Regulations, our common stock will be treated as “marketable stock” for this purpose. U.S. Holders are advised to consult with their tax advisors regarding the availability and tax consequences of a mark-to-market election in respect to our common stock under their particular circumstances.

If we are a PFIC and, at any time, have a foreign subsidiary that is classified as a PFIC, U.S. Holders generally would be deemed to own a portion of the shares of such lower-tier PFIC, and generally could incur liability for the deferred tax and interest charge described above if we receive a distribution from, or dispose of all or part of our interest in, the lower-tier PFIC or the U.S. Holders otherwise were deemed to have disposed of an interest in the lower-tier PFIC. We will endeavor to cause any lower-tier PFIC to provide to a U.S. Holder the information that may be required to make or maintain a QEF election with respect to the lower-tier PFIC. However, there is no assurance that we will have timely knowledge of the status of any such lower-tier PFIC. In addition, we may not hold a controlling interest in any such lower-tier PFIC and thus there can be no assurance we will be able to cause the lower-tier PFIC to provide the required information. U.S. Holders are advised to consult with their tax advisors regarding the tax issues raised by lower-tier PFICs.

A U.S. Holder that owns (or is deemed to own) shares in a PFIC during any tax year of the U.S. Holder, may have to file an IRS Form 8621 (whether or not a QEF or mark-to-market election is made) and such other information as may be required by the U.S. Treasury Department.

The rules dealing with PFICs and with the QEF and mark-to-market elections are very complex and are affected by various factors in addition to those described above. Accordingly, U.S. Holders are advised to consult with their tax advisors concerning the application of the PFIC rules (and the QEF and mark-to-market elections) to our common stock under their particular circumstances.

United States Federal Income Taxation of “Non-U.S. Holders”

A beneficial owner of common stock that is not a U.S. Holder is referred to herein as a “Non-U.S. Holder.”

Dividends on Common Stock. Non-U.S. Holders generally will not be subject to United States federal income tax or withholding tax on dividends received from us with respect to our common stock, unless that income is effectively connected with the Non-U.S. Holder’s conduct of a trade or business in the United States. If the Non-U.S. Holder is entitled to the benefits of a United States income tax treaty with respect to those dividends, that income is taxable only if it is attributable to a permanent establishment maintained by the Non-U.S. Holder in the United States.

Sale, Exchange or Other Disposition of Common Stock. Non-U.S. Holders generally will not be subject to United States federal income tax or withholding tax on any gain realized upon the sale, exchange or other disposition of our common stock, unless:

the gain is effectively connected with the Non-U.S. Holder's conduct of a trade or business in the United States. If the Non-U.S. Holder is entitled to the benefits of an income tax treaty with respect to that gain, that gain is taxable only if it is attributable to a permanent establishment maintained by the Non-U.S. Holder in the United States; or

the Non-U.S. Holder is an individual who is present in the United States for 183 days or more during the tax year of disposition and other conditions are met.

If the Non-U.S. Holder is engaged in a United States trade or business for United States federal income tax purposes, the income from the common stock, including dividends and the gain from the sale, exchange or other disposition of the stock that is effectively connected with the conduct of that trade or business will generally be subject to regular United States federal income tax in the same manner as discussed in the previous section relating to the taxation of U.S. Holders. In addition, if you are a corporate Non-U.S. Holder, your earnings and profits that are attributable to the effectively connected income, which are subject to certain adjustments, may be subject to an additional branch profits tax at a rate of 30%, or at a lower rate as may be specified by an applicable income tax treaty.

Backup Withholding and Information Reporting

In general, dividend payments, or other taxable distributions, made within the United States to you will be subject to information reporting requirements. Such payments will also be subject to backup withholding tax if you are a non-corporate U.S. Holder and you:

fail to provide an accurate taxpayer identification number;

are notified by the Internal Revenue Service that you have failed to report all interest or dividends required to be shown on your federal income tax returns; or

in certain circumstances, fail to comply with applicable certification requirements.

Non-U.S. Holders may be required to establish their exemption from information reporting and backup withholding by certifying their status on Internal Revenue Service Form W-8BEN, W-8ECI or W-8IMY, as applicable.

If you sell your stock to or through a United States office or broker, the payment of the proceeds is subject to both United States backup withholding and information reporting unless you certify that you are a non-U.S. person, under penalties of perjury, or you otherwise establish an exemption. If you sell your stock through a non-United States office of a non-United States broker and the sales proceeds are paid to you outside the United States, then information reporting and backup withholding generally will not apply to that payment. However, United States information reporting requirements, but not backup withholding, will apply to a payment of sales proceeds, even if that payment is made to you outside the United States, if you sell your stock through a non-United States office of a broker that is a United States person or has some other contacts with the United States.

Backup withholding tax is not an additional tax. Rather, you generally may obtain a refund of any amounts withheld under backup withholding rules that exceed your income tax liability by filing a refund claim with the Internal Revenue Service.

We encourage each stockholder to consult with his, her or its own tax advisor as to particular tax consequences to it of holding and disposing of our shares, including the applicability of any state, local or foreign tax laws and any proposed changes in applicable law.

H. Documents on display

This annual report and the exhibits thereto and any other document we file pursuant to the Exchange Act may be inspected without charge and copied at prescribed rates at the following Securities and Exchange Commission public reference rooms: 100 F Street, N.E., Room 1580, Washington, D.C. 20549. You may obtain information on the operation of the Securities and Exchange Commission's public reference room in Washington, D.C. by calling the Securities and Exchange Commission at 1-800-SEC-0330 or by visiting the Securities and Exchange Commission's website at <http://www.sec.gov>, and may obtain copies of our filings from the public reference room by calling 1-800-SEC-0330. The Exchange Act file number for our Securities and Exchange Commission filings is 000-49760.

The Securities and Exchange Commission maintains a website at www.sec.gov that contains reports, proxy and information statements, and other information regarding registrants that make electronic filings with the Securities and Exchange Commission using its EDGAR (Electronic Data Gathering, Analysis, and Retrieval) system. Certain of our material documents or filings can also be viewed on SEDAR (the System for Electronic Document Analysis and Retrieval of the Canadian securities regulatory authorities) at www.sedar.com.

We will also provide without charge to each person, including any beneficial owner, upon written or oral request of that person, a copy of any and all of the information that has been incorporated by reference in this annual report. Please direct such requests to Alexandros Mylonas, Chief Financial Officer, FreeSeas Inc., 10, Eleftheriou Venizelou Street (Panepistimiou Ave.) 106 71, Athens, Greece, telephone number +30-210-4528770 or facsimile number +30-210-4291010.

I. Subsidiary Information

Not applicable.

Item 11. Quantitative and Qualitative Disclosure About Market Risk

Interest Rate Fluctuation

The international drybulk industry is a capital-intensive industry, requiring significant amounts of investment. Much of this investment is provided in the form of long-term debt. Our debt usually contains interest rates that fluctuate with LIBOR. Increasing interest rates could adversely impact future earnings. To mitigate this risk, we have entered into

two interest rate swap contracts.

Our interest expense is affected by changes in the general level of interest rates. As an indication of the extent of our sensitivity to interest rate changes, an increase of 100 basis points would have increased our net loss and use of our cash flows in the 2012 fiscal year by approximately \$639 based upon our debt level during the period in 2012 during which we had debt outstanding.

The following table sets forth for a period of five years the sensitivity of the loans on each of the vessels owned by us during fiscal 2012 in U.S. dollars to a 100-basis-point increase in LIBOR.

(In thousands of U.S. Dollars)

Vessel Name	2013	2014	2015	2016	2017
Free Hero / Free Goddess / Free Jupiter	\$370	\$362	\$327	\$-	\$ -
Free Impala / Free Neptune	\$214	\$221	\$187	\$148	\$ -
Free Knight	\$149	\$146	\$133	\$-	\$ -
Free Maverick	\$149	\$146	\$133	\$-	\$ -

Please see “Management’s Discussion and Analysis of Financial Condition and Results of Operations — Long Term Debt” for a full description of each of these loans.

Interest Rate Risk

We are exposed to interest rate risk associated with its variable rate borrowings, and its objective is to manage the impact of such fluctuations on earnings and cash flows of its borrowings. In this respect, we use interest rate swaps to manage net exposure to interest rate fluctuations related to its borrowings and to lower its overall borrowing costs. We have two interest rate swaps outstanding with a total notional amount of \$6,663 as of December 31, 2012. These interest rate swap agreements do not qualify for hedge accounting, and changes in their fair values are reflected in our earnings.

Our derivative financial instruments are valued using pricing models that are used to value similar instruments by market participants. Where possible, we verify the values produced by our pricing models to market prices. Valuation models require a variety of inputs, including contractual terms, market prices, yield curves, credit spreads, measures of volatility and correlations of such inputs. Model inputs can generally be verified and do not involve significant management judgment. Such instruments are typically classified within Level 2 of the fair value hierarchy.

Foreign Exchange Rate Risk

We generate all of our revenues in U.S. dollars, but incur a portion of our expenses in currencies other than U.S. dollars. For accounting purposes, expenses incurred in Euros are converted into U.S. dollars at the exchange rate prevailing on the date of each transaction. At December 31, 2012, 2011 and 2010, approximately 29%, 32% and 55%, respectively, of our outstanding accounts payable was denominated in currencies other than the U.S. dollar (mainly in the Euro). As an indication of the extent of our sensitivity to foreign exchange rate changes, an increase of an additional 10% in the value of other currencies against the dollar would have decreased our net income and cash flows in 2012 by approximately \$374 based upon the accounts payable we had denominated in currencies other than the U.S. dollar as of December 31, 2012.

Credit Risk

Financial instruments, which potentially subject us to significant concentrations of credit risk, consist principally of cash and cash equivalents, trade accounts receivable, insurance claims and derivative contracts (interest rate swaps). We place our cash and cash equivalents, consisting mostly of deposits, with high credit qualified financial institutions.

We monitor the credit risk regarding charterer's turnover in order to review its reliance on individual charterers. We do not obtain rights to collateral to reduce its credit risk. We are exposed to credit risk in the event of non-performance by counter parties to derivative instruments; however, we limit our exposure by diversifying among counter parties with high credit ratings. In addition, the counterparty to the derivative financial instrument is a major financial institution in order to manage exposure to non-performance counterparties.

Charter Market Risk

Our revenues, earnings and profitability are affected by the prevailing charter market rates. During 2012, the BDI remained volatile. In 2012, the BDI reached a high of 1,738 in January 2012 and a low of 647 in February 2012. Furthermore, charter rates have been particularly volatile during the first three months of 2013. On, March 25, 2013,

the BDI was 935, increasing from a low of 698 on January 2, 2013. Such chartering market volatility is expected to adversely impact our financial performance for the relevant quarter including its net income and cash flow.

The M/V *Free Jupiter* was on time charter with Korea Line Corp, or KLC, a South Korean company, from June 8, 2007 until she was re-delivered to us on February 22, 2011. KLC made several unilateral deductions from hire payments during the three-year course of the time charter, and no hire was received from KLC from February 8, 2011 until the actual redelivery of the vessel on February 22, 2011. The Company commenced arbitration proceedings against KLC, and has taken action to obtain security, including the arrest of KLC assets. As a result, the Company obtained third-party security in the amount of \$1.68 million (which includes provision for interest and legal costs) in the form of a letter of undertaking from KLC's P&I club covering KLC's unilateral deductions from the hire. The Company also obtained cash security held in escrow in the amount of \$182 from the execution of a lien on sub-hires. KLC has counterclaimed by way of set-off, alleging that KLC is entitled to retain the amount of hire that was deducted because of the Company's alleged breach of charterparty. The Company denies these allegations and continues to assert its claim to recover the full amount deducted by KLC. On January 25, 2011, KLC announced that it had filed a petition for the rehabilitation proceeding for court receivership in the Seoul Central District Court, and the court approved and confirmed a rehabilitation plan. Upon the issuance of the final award of the arbitration tribunal, and for any amount in excess of the third-party security and cash security, the Company may participate in the approved rehabilitation plan. On January 17, 2012, the Company obtained an interim award under which it was awarded the part of the claim that KLC had admitted was undisputed, \$832, plus interest, legal costs, and the cost of the tribunal. Following the interim award, the Company received approximately \$335. The majority of the balance of \$511 that has been awarded is unsecured. The Company is considering its options if KLC does not pay the balance, including the possibility of pursuing this in the Korean rehabilitation proceedings, where the hearing of the Company's claim has been stayed pending the outcome of the London arbitration. The Company believes that, if the Korean claim succeeds, the Company should make a recovery in accordance with the rehabilitation plan, which has been approved by the Korean court. The Company intends to seek a further award (if this matter does not settle) for the disputed balance, which is adequately secured. Despite above actions, the Company wrote-off the remaining outstanding balance \$1,173 of the KLC time charter, which is included in "Provision and write-offs of insurance claims and bad debts" in the consolidated statements of operations for the year ended December 31, 2012.

Item 12. Description of Securities Other than Equity Securities

Not applicable.

81

PART II

Item 13. Defaults, Dividend Arrearages and Delinquencies

Please see “Item 5. Operating and Financial Review and Prospects - Recent Developments” and “- Long-Term Debt” for a full description of loan defaults.

Item 14. Material Modifications to the Rights of Security Holders and Use of Proceeds

Except as described elsewhere in this document, there have been no changes to the instruments defining the rights of the holders of any class of registered securities, and the rights of holders of the registered securities have not been altered by the issuance or modification of any other class of securities in 2012 (see “Item 10. Additional Information — B. Memorandum and Articles of Incorporation”) for a description of this plan). There are no restrictions on working capital and no removal or substitution of assets securing any class of our registered securities.

Item 15. Controls and Procedures.

Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including our chief executive officer and chief financial officer, we conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”) as of December 31, 2012. Disclosure controls and procedures are defined under SEC rules as controls and other procedures that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within required time periods. Disclosure controls and procedures include controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Exchange Act is accumulated and communicated to the issuer’s management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate, to allow timely decisions regarding required disclosure. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention of overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives.

Based on our evaluation, our chief executive officer and our chief financial officer have concluded that our disclosure controls and procedures were effective as of December 31, 2012.

Management's Annual Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as required under applicable United States securities regulatory requirements. Internal control over financial reporting is defined in Rule 13a-15(f) or 15d-15(f) promulgated under the Exchange Act as a process designed by, or under the supervision of, the company's chief executive and chief financial officers and effected by the company's board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

- pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the company;

provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and

provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect all misstatements. A system of internal controls can provide only reasonable, not absolute, assurance that the objectives of the control system are met, no matter how well the system is conceived or operated. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management assessed the effectiveness of our internal control over financial reporting as of December 31, 2012. In making this assessment, our management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control Integrated Framework. Based on that evaluation under this framework, our management concluded that as of December 31, 2012, our internal control over financial reporting was effective.

Attestation Report of the Registered Public Accounting Firm

This annual report does not include an attestation report by our independent registered public accounting firm regarding internal control over financial reporting. As we are neither a large accelerated filer nor an accelerated filer, our management's report was not subject to attestation by our registered public accounting firm pursuant to rules of the Securities and Exchange Commission that permit us to provide only management's report in this annual report.

Changes to Internal Controls and Procedures for Financial Reporting

There were no changes in our internal control over financial reporting that occurred during the quarter ended December 31, 2012 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 16. [Reserved]

Item 16A. Audit Committee Financial Expert.

Our board has determined that Mr. Mr. Focko Nauta, an independent director, qualifies as an “audit committee financial expert” as defined by rules of the Securities and Exchange Commission. For a brief listing of Mr. Nauta’s relevant experience, see Item 6.A. “Directors, Senior Management and Employees - Directors and Senior Management.”

Item 16B. Code of Ethics.

We have adopted a code of ethics that applies to our chief executive officer and all senior financial officers of our company, including the chief financial officer, chief accounting officer or controller, or persons performing similar functions. Our code of ethics has been filed as an exhibit to this annual report and is available on the Corporate Governance section of our website at www.freeseas.gr. We will also provide a paper copy of our Code of Business

Conduct and Ethics free of charge upon written request of a shareholder. Shareholders may direct their requests to the attention of Alexandros Mylonas, Chief Financial Officer.

Item 16C. Principal Accountant Fees and Services.

Independent Public Accountants Fees

The aggregate fees billed for the last two fiscal years for professional services rendered by our auditor are as follows:

	2012	2011
Audit fees (1)	\$193	\$550
Audit-related fees	—	—
Tax fees	—	—
Other fees	—	—
Total	\$193	\$550

Audit fees represent fees for professional services related to the audit of our financial statements for the years (1) ended December 31, 2012 and 2011, as well as fees for services related to the Company's additional filings relating to possible capital raises.

Audit Committee Pre-Approved Policies and Procedures

Our audit committee pre-approves all audit, audit-related and non-audit services not prohibited by law to be performed by our independent auditors and associated fees prior to the engagement of the independent auditor with respect to such services.

Item 16D. Exemptions from the Listing Standards for Audit Committees.

Not applicable.

Item 16E. Purchases of Equity Securities by the Issuer and Affiliated Purchasers.

There were no purchases of our common shares made by us or on our behalf or by any affiliated purchaser during the fiscal year ended December 31, 2012.

Item 16F. Change in Registrant's Certifying Accountant.

Ernst & Young (Hellas) Certified Auditors Accountants S.A. ("E&Y") was previously the principal accountants for the Company. On September 11, 2012, our Audit Committee approved the retention of Sherb as our independent registered public accounting firm for the fiscal year ending December 31, 2012, and dismissed E&Y.

During the two fiscal years ended December 31, 2011, and the subsequent interim period through September 11, 2012, there were no: (1) disagreements with E&Y on any matter of accounting principles or practices, financial statement disclosure, or auditing scope or procedures, which disagreements if not resolved to their satisfaction would have caused them to make reference in connection with their opinion to the subject matter of the disagreement, or (2) reportable events. The audit reports of E&Y on the consolidated financial statements of the Company and subsidiaries as of and for the years ended December 31, 2011 and 2010, did not contain any adverse opinion or disclaimer of opinion, nor were they qualified or modified as to uncertainty, audit scope, or accounting principles, except as follows:

E&Y 's report on the consolidated financial statements of the Company and subsidiaries as of and for the years ended December 31, 2011 and 2010, contained a separate paragraph stating that "The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As more fully described in Note 3 to the consolidated financial statements, the Company has incurred recurring operating losses and has a working capital deficiency. In addition, the Company has failed to meet scheduled payment obligations under its loan facilities and has not complied with certain covenants included in its loan agreements with banks. These conditions raise substantial doubt about the Company's ability to continue as a going concern. Management's plans in regard to these matters also are described in Note 3. The 2011 consolidated financial statements do not include any adjustments to reflect the possible future effects on the recoverability and classification of assets or the amounts and classification of liabilities that may result from the outcome of this uncertainty."

During the two years ended December 31, 2011 and any subsequent interim period prior to engaging Sherb, neither we nor anyone on our behalf consulted Sherb regarding (i) either: the application of accounting principles to a specified transaction, either completed or proposed; or the type of audit opinion that might be rendered on our financial statements, and neither a written report nor oral advice was provided to us that Sherb concluded was an important factor considered by us in reaching a decision as to the accounting, auditing or financial reporting issue; or (ii) any matter that was either the subject of a disagreement or a reportable event.

Effective January 1, 2013, Sherb combined its practice with RBSM. Effective January 30, 2013, the Company's audit committee approved the new engagement with RBSM and the transition engagement letter was executed; as a result, at that time, Sherb was dismissed and RBSM was engaged as the Company's new independent registered public accounting firm.

Item 16G. Corporate Governance.

As a foreign private issuer, we can elect to be exempt from many of the corporate governance requirements of The NASDAQ Stock Market other than the requirements regarding the disclosure of a going concern audit opinion, notification of material non-compliance with NASDAQ corporate governance practices, the establishment and composition of an audit committee that complies with SEC Rule 10A-3 and a formal audit committee charter. The practices followed by us in lieu of NASDAQ's corporate governance rules are described below:

Our board is composed of a majority of independent directors, consistent with NASDAQ corporate governance requirements; we are not required under Marshall Islands law, however, to maintain a majority independent directors and we cannot guarantee that we will always in the future maintain a board with a majority of independent members.

In lieu of obtaining shareholder approval prior to the issuance of designated securities, we comply with provisions of Marshall Islands law, requiring that the board of directors approves share issuances.

In lieu of holding regular meetings at which only independent directors are present, our entire board of directors, a majority of whom are independent, hold regular meetings as is consistent with Marshall Islands law.

As a foreign private issuer, we are not required to solicit proxies or provide proxy statements to NASDAQ pursuant to NASDAQ corporate governance rules or Marshall Islands law. Consistent with Marshall Islands law and as provided in our bylaws, we will notify our shareholders of meetings between 15 and 60 days before the meeting. This notification will contain, among other things, information regarding business to be transacted at the meeting. In addition, our bylaws provide that shareholders must give us between 150 and 180 days advance notice to properly introduce any business at a meeting of shareholders.

Other than as noted above, we are in compliance with all other applicable NASDAQ corporate governance standards. Additionally, we believe that our established practices in the area of corporate governance are in line with the spirit of the NASDAQ standards and provide adequate protection to our stockholders.

Item 16H. Mine Safety Disclosure.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of FreeSeas Inc.

We have audited the accompanying consolidated balance sheets of FreeSeas Inc. (the “Company”) as of December 31, 2012 and 2011, and the related consolidated statements of operations, shareholders’ equity, and cash flows for each of the three years ended December 31, 2012. These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of the Company’s internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of FreeSeas Inc. at December 31, 2012 and 2011, and the consolidated results of its operations and its cash flows for each of the three years ended December 31, 2012, in conformity with U.S. generally accepted accounting principles.

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. As more fully described in Note 3 to the consolidated financial statements, the Company has incurred recurring operating losses and has a working capital deficiency. In addition, the Company has failed to meet scheduled payment obligations under its loan facilities and has not complied with certain covenants included in its loan agreements. It has also failed to make required payments to Deutsche Bank Nederland as agreed to in its September 7, 2012 amended and restated facility agreement and received notices of default from First Business Bank as describe in Note 10. Furthermore, the vast majority of the Company’s assets are considered to be highly illiquid and if the Company were forced to liquidate, the amount realized by the Company could be substantially lower than the carrying value of these assets. These conditions among others raise substantial doubt about the Company’s ability to continue as a going concern. Management’s plans in regard to these matters also are described in Note 3. The 2012 consolidated financial statements do not include any adjustments to reflect the possible future effects on the recoverability and classification of assets or the amounts and classification of liabilities that may result from the

outcome of this uncertainty.

FREESEAS INC.**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

(All amounts in thousands of United States Dollars, except for share and per share data)

1. Basis of Presentation and General Information

The accompanying consolidated financial statements include the accounts of FreeSeas Inc. and its wholly owned subsidiaries (collectively, the “Company” or “FreeSeas”). FreeSeas, formerly known as Adventure Holdings S.A., was incorporated in the Marshall Islands on April 23, 2004 for the purpose of being the ultimate holding company of ship-owning companies. The management of FreeSeas’ vessels is performed by Free Bulkiers S.A. (the “Manager”), a Marshall Islands company that is controlled by the Chief Executive Officer of FreeSeas (see Note 4).

All share-related and per share information in the notes have been adjusted to give effect to the one share for five share reverse stock split that was effective on October 1, 2010 and the one share for ten share reverse stock split that was effective on February 14, 2013.

During the year ended December 31, 2012, the Company owned and operated six Handysize dry bulk carriers and one Handymax dry bulk carrier. As of December 31, 2012, FreeSeas is the sole owner of all outstanding shares of the following subsidiaries:

Company	% Owned	M/V	Type	Dwt	Year Built/ Expected Year of Delivery	Date of Acquisition	Date of Disposal	Date of Contract Termination
Adventure Two S.A.	100	% Free Destiny	Handysize	25,240	1982	08/04/04	08/27/10	N/A
Adventure Three S.A.	100	% Free Envoy	Handysize	26,318	1984	09/29/04	05/13/11	N/A
Adventure Four S.A.	100	% Free Fighter	Handysize	38,905	1982	06/14/05	04/27/07	N/A

2. Significant Accounting Policies

a) Principles of Consolidation: The accompanying consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles (or “U.S. GAAP”) and include in each of the three years in the period ended December 31, 2012 the accounts and operating results of the Company and its wholly-owned subsidiaries referred to in Note 1 above. All inter-company balances and transactions have been eliminated upon consolidation. FreeSeas as the holding company determines whether it has a controlling financial interest in an entity by first evaluating whether the entity is a voting interest entity or a variable interest entity. Under ASC 810 “Consolidation” a voting interest entity is an entity in which the total equity investment at risk is sufficient to enable the entity to finance itself independently and provides the equity holders with the obligation to absorb losses, the right to receive residual returns and the right to make financial and operating decisions. The holding company consolidates voting interest entities in which it owns all, or at least a majority (generally, greater than 50%) of the voting interest. Variable interest entities (“VIE”) are entities as defined under ASC 810 that in general either do not have equity investors with voting rights or that have equity investors that do not provide sufficient financial resources for the entity to support its activities. The determination of whether a reporting entity is required to consolidate another entity is based on, among other things, the other entity’s design and purpose and the reporting entity’s power, through voting or similar rights, to direct the activities of the other entity that most significantly impact the other entity’s economic performance. A controlling financial interest in a VIE is present when a company has the obligation to absorb losses or the right to receive benefits that could potentially be significant to the VIE, or both. Only one reporting entity, known as the primary beneficiary, is expected to be identified as having a controlling financial interest and thus is required to consolidate the VIE. The Company evaluates all arrangements that may include a variable interest in an entity to determine if it may be the primary beneficiary, and would be required to include assets, liabilities and

operations of a VIE in its consolidated financial statements. As of December 31, 2012 and 2011, no such interest existed.

F-7

FREESEAS INC.**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

(All amounts in thousands of United States Dollars, except for share and per share data)

b) Use of Estimates: The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

c) Concentration of Credit Risk: Financial instruments, which potentially subject the Company to significant concentrations of credit risk, consist principally of cash and cash equivalents, trade accounts receivable, insurance claims, prepayments and advances, and derivative contracts (interest rate swaps). The Company places its cash and cash equivalents, consisting mostly of deposits, with high credit qualified financial institutions. The Company monitors the credit risk regarding charterer's turnover in order to review its reliance on individual charterers. The Company does not obtain rights to collateral to reduce its credit risk. The Company is exposed to credit risk in the event of non-performance by counter parties to derivative instruments; however, the Company limits its exposure by diversifying among counter parties with high credit ratings. Credit risk with respect to trade account receivable is considered high due to the fact that the Company's total income is derived from a few charterers. For the year ended December 31, 2012, one charterer individually accounted for more than 10% of the Company's voyage revenues, one charterer individually accounted for more than 10% of the Company's voyage revenues for the year ended December 31, 2011, and three charterers individually accounted for more than 10% of the Company's voyage revenues for the year ended December 31, 2010 as follows:

Charterer	2012	2011	2010
A	22 %	33 %	12 %
B	Less than 10 %	Less than 10 %	14 %
C	Less than 10 %	Less than 10 %	16 %

d) Foreign Currency Translation: The functional currency of the Company is the U.S. Dollar because the Company's vessels operate in international shipping markets, and therefore primarily transact business in U.S. Dollars. The Company's accounting records are maintained in U.S. Dollars. Transactions involving other currencies during the year are converted into U.S. Dollars using the exchange rates in effect at the time of the transactions. At the balance sheet date, monetary assets and liabilities, which are denominated in other currencies, are translated into U.S. Dollars at the year-end exchange rates. Resulting gains or losses are included in other income/loss in the accompanying consolidated statements of operations.

e) Cash and Cash Equivalents: The Company considers highly liquid investments such as time deposits and certificates of deposit with an original maturity of three months or less to be cash equivalents.

f) Restricted Cash: Restricted cash includes bank deposits that are required under the Company's borrowing arrangements to be kept as part of the security required under the respective loan agreements.

g) Trade Receivables, net: The amount shown as Trade Receivables at each balance sheet date includes receivables from charterers for hire, freight and demurrage billings, net of an allowance for doubtful debts. An estimate is made of the allowance for doubtful debts based on a review of all outstanding amounts at year end, and an allowance is made for any accounts which management believes are not recoverable.

h) Insurance Claims: Insurance claims comprise claims submitted and/or claims in the process of compilation for submission (claims pending) relating to hull and machinery or protection and indemnity insurance coverage. They are recorded as incurred on the accrual basis and represent the claimable expenses incurred, net of deductibles, the recovery of which is probable under the related insurance policies and the Company can make an estimate of the amount to be reimbursed. Any non-recoverable amounts are included in accrued liabilities and depending on their nature, are classified as operating expenses or voyage expenses in the statement of operations. The classification of insurance claims (if any) into current and non-current assets is based on management's expectations as to their collection dates.

i) Inventories: Inventories, which are comprised of bunkers and lubricants remaining on board of the vessels at year end, are valued at the lower of cost, as determined on a first-in, first-out basis, or market.

FREESEAS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(All amounts in thousands of United States Dollars, except for share and per share data)

j) Advances for vessels under construction: This account includes milestone payments relating to the shipbuilding contracts with the shipyard, and various pre-purchase costs and expenses for which the recognition criteria are met.

k) Vessels' Cost: Vessels are stated at cost, which consists of the contract purchase price and any material expenses incurred upon acquisition (initial repairs, improvements, delivery expenses and other expenditures to prepare the vessel for her initial voyage). Subsequent expenditures for conversions and major improvements are also capitalized when they appreciably extend the life, increase the earning capacity or improve the efficiency or safety of the vessels. Otherwise, these expenditures are charged to expense as incurred.

l) Vessels' Depreciation: The cost of the Company's vessels is depreciated on a straight-line basis over the vessels' remaining economic useful lives from the acquisition date, after considering the estimated residual value (vessel's residual value is equal to the product of its lightweight tonnage and estimated scrap rate). Effective April 1, 2009, and following management's reassessment of the useful lives of the Company's assets, the fleets useful life was increased from 27 to 28 years since the date of initial delivery from the shipyard. Management's estimate was based on the current vessels' operating condition, as well as the conditions prevailing in the market for the same type of vessels.

m) Vessels held for sale: It is the Company's policy to dispose of vessels when suitable opportunities arise and not necessarily to keep them until the end of their useful life. The Company classifies assets and disposal groups of assets as being held for sale in accordance with ASC 360, "Property, Plant and Equipment," when the following criteria are met: (i) management possessing the necessary authority has committed to a plan to sell the asset; (ii) the asset is immediately available for sale on an "as is" basis; (iii) an active program to find the buyer and other actions required to execute the plan to sell the asset have been initiated; (iv) the sale of the asset is probable, and transfer of the asset is expected to qualify for recognition as a completed sale within one year; (v) the asset is being actively marketed for sale at a price that is reasonable in relation to its current fair value and (vi) actions required to complete the plan indicate that it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn. Long-lived assets or disposal groups classified as held for sale are measured at the lower of their carrying amount or fair value less cost to sell. These assets are not depreciated once they meet the criteria to be held for sale and are classified in current assets on the consolidated balance sheet.

n) Impairment of Long-lived Assets: The Company follows the guidance under ASC 360, "Property, Plant and Equipment," which addresses financial accounting and reporting for the impairment or disposal of long-lived assets. The standard requires that, long-lived assets and certain identifiable intangibles held and used or disposed of by an

entity be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. When the estimate of undiscounted cash flows, excluding interest charges, expected to be generated by the use of the asset is less than its carrying amount, the Company should evaluate the asset for an impairment loss. Measurement of the impairment loss is based on the fair value of the asset which is determined based on management estimates and assumptions and by making use of available market data. The fair values are determined through Level 2 inputs of the fair value hierarchy as defined in ASC 820 "Fair value measurements and disclosures" and are derived principally from or by corroborated or observable market data. Inputs, considered by management in determining the fair value, include independent broker's valuations, FFA indices, average charter hire rates and other market observable data that allow value to be determined. The Company evaluates the carrying amounts and periods over which long-lived assets are depreciated to determine if events have occurred which would require modification to their carrying values or useful lives. In evaluating useful lives and carrying values of long-lived assets, management reviews certain indicators of potential impairment, such as future undiscounted net operating cash flows, vessel sales and purchases, business plans and overall market conditions. In performing the recoverability tests the Company determines future undiscounted net operating cash flows for each vessel and compares it to the vessel's carrying value. The future undiscounted net operating cash flows are determined by considering the Company's alternative courses of action, estimated vessel's utilization, its scrap value, the charter revenues from existing time charters for the fixed fleet days and an estimated daily time charter equivalent for the unfixed days over the remaining estimated useful life of the vessel, net of vessel operating expenses adjusted for inflation, and cost of scheduled major maintenance. When the Company's estimate of future undiscounted net operating cash flows for any vessel is lower than the vessel's carrying value, the carrying value is written down, by recording a charge to operations, to the vessel's fair market value.

As of December 31, 2012, the Company performed an impairment assessment of its long-lived assets by comparing the undiscounted net operating cash flows for each vessel to its respective carrying value. The significant factors and assumptions the Company used in each future undiscounted net operating cash flow analysis included, among others, operating revenues, commissions, off-hire days, dry-docking costs, operating expenses and management fee estimates. Revenue assumptions were based on contracted time charter rates up to the end of life of the current contract of each vessel as well as Forward Freight Agreements (FFAs) and market historical average time charter rates for the remaining life of the vessel after the completion of the current contracts. In addition, the Company used an annual operating expenses escalation factor and an estimate of off hire days. All estimates used and assumptions made were in accordance with the Company's internal budgets and historical experience of the shipping industry. The Company's assessment concluded that for vessels that are intended to be held and used no impairment existed as of December 31, 2012, as the future undiscounted net operating cash flows per vessel exceeded the carrying value of each vessel. For the vessels for which alternative courses of action (including their sale) are under consideration, an impairment charge of \$12,480 was recognized in 2012 and reflected in the accompanying consolidated statement of operations. (see Notes 5 and 6)

FREESEAS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(All amounts in thousands of United States Dollars, except for share and per share data)

o) Accounting for Special Survey and Dry-docking Costs: The Company follows the deferral method of accounting for special survey and dry-docking costs, whereby actual costs incurred are deferred and are amortized over periods of five and two and a half years, respectively. If special survey or dry-docking is performed prior to the scheduled date, the remaining unamortized balances are immediately written-off. In the accompanying financial statements, costs deferred are presented on a consistent basis and are limited to actual costs incurred at the yard, paints, class renewal expenses, and parts used in the dry docking or special survey. Indirect costs and/or costs related to ordinary maintenance, carried out while at dry dock, are expensed when incurred as they do not provide any future economic benefit. Unamortized dry-docking and special survey costs of vessels that are sold are written off at the time of the respective vessels' sale and are included in the calculation of the resulting gain or loss from such sale.

p) Financing Costs: Fees incurred for obtaining new loans are deferred and amortized over the loans' respective repayment periods, using the effective interest rate method. These charges are included in the balance sheet line item Deferred Charges. Any unamortized balance of costs relating to loans repaid or refinanced is expensed in the period the repayment or refinancing is made, if the refinancing is deemed to be a debt extinguishment under the provision of ASC 470-50 "Debt: Modifications and Extinguishments."

q) Unearned Revenue: Unearned revenue includes cash received prior to the balance sheet date and is related to revenue earned after such date. These amounts are recognized as revenue over the voyage or charter period.

r) Interest Rate Swaps: The Company uses interest rate swaps to manage net exposure to interest rate changes related to its borrowings. Such swap agreements, designated as "economic hedges" are recorded at fair value with changes in the derivatives' fair value recognized in earnings unless specific hedge accounting criteria are met. During the years ended December 31, 2010, 2011 and 2012, there was no derivative transaction meeting such hedge accounting criteria; therefore the change in their fair value is recognized in earnings.

s) Financial Instruments: The principal financial assets of the Company consist of cash and cash equivalents and restricted cash, trade receivables (net of allowance), insurance claims, prepayments and advances. The principal financial liabilities of the Company consist of accounts payable, accrued liabilities, deferred revenue, long-term debt, and interest-rate swaps. The carrying amounts reflected in the accompanying consolidated balance sheets of financial assets and liabilities, approximate their respective fair values.

t) Fair Value Measurements: The Company follows the provisions of ASC 820, “Fair Value Measurements and Disclosures” which defines, and provides guidance as to the measurement of, fair value. ASC 820 creates a hierarchy of measurement and indicates that, when possible, fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. The fair value hierarchy gives the highest priority (Level 1) to quoted prices in active markets and the lowest priority (Level 3) to unobservable data, for example, the reporting entity’s own data. Under the standard, fair value measurements are separately disclosed by level within the fair value hierarchy. ASC 820 applies when assets or liabilities in the financial statements are to be measured at fair value, but does not require additional use of fair value beyond the requirements in other accounting principles.

u) Fair value option: In February, 2007, the FASB issued ASC 825, “Financial Instruments,” which permits companies to report certain financial assets and financial liabilities at fair value. ASC 825 was effective for the Company as of January 1, 2008 at which time the Company could elect to apply the standard prospectively and measure certain financial instruments at fair value. The Company evaluated the guidance contained in ASC 825 and elected not to report any existing financial assets or liabilities at fair value that are not already reported at fair value, therefore the adoption of the statement had no impact on its financial position and results of operations. The Company retains the ability to elect the fair value option for certain future assets and liabilities acquired under this pronouncement.

FREESEAS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(All amounts in thousands of United States Dollars, except for share and per share data)

v) Accounting for Revenue and Expenses: Revenue is recorded when services are rendered, the Company has a signed charter agreement or other evidence of an arrangement, the price is fixed or determinable, and collection is reasonably assured. A voyage charter involves the carriage of a specific amount and type of cargo from specific load port(s) to specific discharge port(s), subject to various cargo handling terms, in return for payment of an agreed upon freight rate per ton of cargo. A time charter involves placing a vessel at the charterers' disposal for a period of time during which the charterer uses the vessel in return for the payment of a specified daily hire rate. Short period charters for less than three months are referred to as spot charters. Time charters extending three months to a year are generally referred to as medium term charters. All other time charters are considered long term. Voyage revenues for the transportation of cargo are recognized ratably over the estimated relative transit time of each voyage. A voyage is deemed to commence when a vessel is available for loading of its next fixed cargo and is deemed to end upon the completion of the discharge of the current cargo. Revenues from time chartering of vessels are accounted for as operating leases and are thus recognized on a straight line basis as the average revenue over the rental periods of such charter agreements, as service is provided. Voyage expenses, primarily consisting of port, canal and bunker expenses that are unique to a particular charter, are paid for by the charterer under time charter arrangements or by the Company under voyage charter arrangements, except for commissions, which are always paid for by the Company, regardless of charter type. All voyage and vessel operating expenses are expensed as incurred, except for commissions. Commissions are deferred over the related voyage charter period to the extent revenue has been deferred since commissions are earned as the Company's revenues are earned. Probable losses on voyages in progress are provided for in full at the time such losses can be estimated.

w) Profit Sharing Arrangements: From time to time, the Company has entered into profit sharing arrangements with its charterers, whereby the Company may have received additional income at an agreed percentage of net earnings earned by such charterer, where those earnings are over the base rate of hire and settled periodically during the term of the charter agreement. Revenues generated from the profit sharing arrangements are recorded in the period they are earned.

x) Repairs and Maintenance: All repair and maintenance expenses, including major overhauling and underwater inspection expenses, are charged against income as incurred and are included in vessel operating expenses in the accompanying consolidated statements of operations.

y) Stock-Based Compensation: Following the provisions of ASC 718, "Compensation- Stock Compensation" the Company recognizes all share-based payments to employees, including grants of employee stock options, in the consolidated statements of operations based on their fair values on the grant date. Compensation cost on stock based awards with graded vesting is recognized on an accelerated basis as though each separately vesting portion of the

award was in substance, a separate award.

z) Earnings/(Losses) per Share: Basic earnings/(losses) per share are computed by dividing net income (loss) by the weighted average number of common shares outstanding during the periods presented. Diluted earnings per share reflect the potential dilution that would occur if securities or other contracts to issue common stock were exercised. Dilution has been computed by the treasury stock method whereby all of the Company's dilutive securities (warrants, options and restricted shares) are assumed to be exercised and the proceeds used to repurchase common shares at the weighted average market price of the Company's common stock during the relevant periods. The incremental shares (the difference between the number of shares assumed issued and the number of shares assumed purchased) are included in the denominator of the diluted earnings/(losses) per share computation unless such inclusion would be anti-dilutive.

aa) Segment Reporting: The Company reports financial information and evaluates its operations by total charter revenues. The Company does not have discrete financial information to evaluate the operating results for each type of charter. Although revenue can be identified for these types of charters, management does not identify expenses, profitability or other financial information for these charters. As a result, management, including the chief operating decision makers, review operating results solely by revenue per day and operating results of the fleet and thus the Company has determined that it operates under one reportable segment. Furthermore, when the Company charters a vessel to a charterer, the charterer is free to trade the vessel worldwide and, as a result, the disclosure of geographic information is impracticable.

bb) Subsequent Events: The Company evaluates subsequent events or transactions up to the date in which the financial statements are issued according to the requirements of ASC 855.

cc) Recent Accounting Pronouncements:

Fair Value

In May 2011, the FASB issued new guidance for fair value measurements intended to achieve common fair value measurement and disclosure requirements in U.S. GAAP and International Financial Reporting Standards. The amended guidance provides a consistent definition of fair value to ensure that the fair value measurement and disclosure requirements are similar between U.S. GAAP and International Financial Reporting Standards. The amended guidance changes certain fair value measurement principles and enhances the disclosure requirements, particularly for Level 3 fair value measurements. The amended guidance was effective for the Company beginning January 1, 2012. The adoption of the new guidance for fair value measurements had no effect on the Company's consolidated financial statements.

Comprehensive Income

In June 2011, the FASB issued ASU 2011-05 Comprehensive Income (Topic 220): Presentation of Comprehensive Income. Under the amendments to Topic 220, Comprehensive Income, in this Update, an entity has the option to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In both choices, an entity is required to present each component of net income along with total net income, each component of other comprehensive income along with a total for other comprehensive income, and a total amount for comprehensive income. This update eliminates the option to present the components of other comprehensive income as part of the statement of changes in stockholders' equity. The amendments in this update do not change the items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income. ASU is effective for the fiscal years beginning after December 15, 2011. The Company follows the provisions of ASC 220, "Comprehensive Income," which requires separate presentation of certain transactions, which are recorded directly as components of stockholders' equity. The provisions of ASU 2011-05 had no effect on the Company's consolidated financial statements. In December 2011, the FASB issued ASU 2011-11, "Balance Sheet (Topic 210): Disclosures about offsetting Assets and Liabilities". The objective of this update is to provide enhanced disclosures that will enable financial statements' users to evaluate the effect or potential effect of netting arrangements on an entity's financial position. This includes the effect or potential effect of rights of setoff associated with an entity's recognized assets and recognized liabilities within the scope of this ASU. The amendments require enhanced disclosures by requiring improved information about financial instruments and derivative instruments that are either (1) offset in accordance with either Section 210-20-45 or Section 815-10-45 or (2) subject to an enforceable master netting arrangement or similar agreement, irrespective of whether they are offset in accordance with either Section 210-20-45 or Section 815-10-45. The amendments in this update are effective for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods. An entity should provide the disclosures required by those amendments retrospectively for all comparative periods presented. The provisions of ASU 2011-11 are not expected to have a material impact on the Company's consolidated financial statements.

In December 2011, FASB issued an Accounting Standards Update for balance sheet, which contains new disclosure requirements regarding the nature of an entity's rights of offset and related arrangements associated with its financial instruments and derivative instruments. Under U.S. GAAP, certain derivative and repurchase agreement arrangements are granted exceptions from the general off-setting model. The new disclosure requirement will provide financial statement users information regarding both gross and net exposures. This guidance is effective for annual and interim financial statements beginning on or after January 1, 2013. Retrospective application is required. The Company does not expect a material impact on the Company's consolidated financial statements as a result of the adoption of this standard.

In July 2012, the FASB released an Accounting Standards Update for Intangibles-Goodwill and Other, Testing Indefinite-Lived Intangible Assets for Impairment. The ASU gives companies the option to perform a qualitative assessment before calculating the fair value of the indefinite-lived intangible asset. Under the guidance, if this option is selected, a company is not required to calculate the fair value of the indefinite-lived intangible unless the entity determines it is more likely than not that its fair value is less than its carrying amount. The provisions are effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012, but early adoption is permitted. The Company's adoption of this guidance did not have a material impact on the Company's consolidated financial statements.

In February 2013, the FASB issued new accounting guidance that improves the reporting of reclassifications out of accumulated other comprehensive income. This new guidance requires entities to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income when applicable or to cross-reference the reclassifications with other disclosures that provide additional detail about the reclassifications made when the reclassifications are not made to net income. The new standard is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2012. The Company does not expect this guidance to have a material impact on the Company's consolidated financial statements.

3. Going Concern

As a result of the historically low charter rates for drybulk vessels which have been affecting the Company for over three years, and the resulting material adverse impact on Company's results from operations, the accompanying consolidated financial statements have been prepared on a going concern basis. Based on the Company's cash flow projections for 2013, cash on hand will not be sufficient to cover scheduled debt repayments as of December 31, 2012 and operating expenses and capital expenditure requirements for at least twelve months from the balance sheet date. The Company has incurred net losses of \$30,888, \$88,196 and \$21,821 during the years ended December 31, 2012, 2011 and 2010, respectively. As of December 31, 2012 and 2011, the Company had working capital deficits of \$70,973 and \$47,186, respectively. All of the above raises substantial doubt regarding the Company's ability to continue as a going concern. Management plans to continue to provide for its capital requirements by issuing additional equity securities and debt in addition to executing their business plan. The Company's ability to continue as a going concern is dependent upon its ability to obtain the necessary financing to meet its obligations and repay its liabilities arising from the normal course of business operations when they come due and to generate profitable operations in the future.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(All amounts in thousands of United States Dollars, except for share and per share data)

In addition, the Company has undertaken negotiations with each of its lenders to restructure its debt repayments. On May 31, 2012, the Company and Credit Suisse entered into a Sixth Supplemental Agreement to its Facility Agreement with Credit Suisse, which provided for, among other things, a deferral of principal payments until March 31, 2014 (Note 10). On September 7, 2012, the Company entered into an amended and restated facility with Deutsche Bank, which provides for, among other things, a reduction in and deferral of the balloon payment due on facility B from November 2012 to December 2015, a reduction in the amount of principal repayment and amendments to the financial covenants (Note 10).

In February, March, April, November and December 2012, the Company received notifications from First Business Bank S.A. (FBB) that the Company is in default under its loan agreement as a result of the breach of certain covenants and the failure to pay principal and interest due under the loan agreement. Although the Company is seeking and will continue to seek waivers to certain covenants from FBB, and continues negotiations to restructure its debt, it is uncertain that it will be able to succeed as this is currently subject to the agreement of the bank. The Company is in discussions with the bank to permanently amend the amortization schedule and resolve the foregoing defaults. Also the Company did not pay the monthly repayments of \$20 for each of Facility A and Facility B with Deutsche Bank along with accrued interest due in October, November and December 2012. The Company is in discussions with Deutsche Bank to reach a mutually beneficial agreement.

The Company is currently exploring several alternatives aiming to manage its working capital requirements and other commitments if current market charter hire rates remain at current low levels, including completion of the negotiations for the restructuring of its loan with FBB, offerings of common stock through a Standby Equity Distribution Agreement and an Equity Line Facility, (please see Note 17 "Subsequent events" for recent developments), disposition of certain vessels in its current fleet and additional reductions in operating and other costs.

Generally accepted accounting principles require that long-term debt be classified as a current liability when a covenant violation gives the lender the right to call the debt at the balance sheet date, absent a waiver. As a result of the cross default provisions in the Company's loan agreements, actual breaches existing under its credit facility with FBB could result in defaults under all of the Company's affected debt and the acceleration of such debt by its lender. Accordingly, as of December 31, 2012, the Company was required to reclassify its long term debt and derivative financial instrument liability (interest rate swaps) as current liabilities on its consolidated balance sheet since the Company had not received waivers in respect of the breaches discussed above at such time.

The consolidated financial statements as of December 31, 2012, were prepared assuming that the Company would continue as a going concern. Accordingly, the financial statements did not include any adjustments relating to the recoverability and classification of recorded asset amounts, the amounts and classification of liabilities, or any other adjustments that might result in the event the Company is unable to continue as a going concern, except for the current classification of debt and derivative financial instrument liability.

4. Related Party Transactions

Manager

All vessels owned by the Company receive management services from the Manager, pursuant to ship management agreements between each of the ship-owning companies and the Manager.

In June 2011, each of the ship-owning subsidiaries entered into an amended and restated management agreement and the Company entered into a services agreement with the Manager pursuant to which the monthly technical management fee increased from \$16.5 to \$18.975 and the monthly services fee increased from \$118.5 to \$136.275, respectively, effective June 1, 2011. In addition, in connection with the relocation of the Company's offices in June 2011, the Company entered into an agreement with the Manager pursuant to which the Company agreed to pay the Manager 65% of the rental due for the office space, commencing June 2011, and 65% of the apportioned common expenses and maintenance expenses.

FREESEAS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(All amounts in thousands of United States Dollars, except for share and per share data)

In addition, based on the amended services agreement the Company reimbursed the Manager with the lump sum of \$144 (equivalent of Euro 100) for the expenses incurred in relation to the relocation of the Manager's offices and early termination cost for previous lease agreement. This compensation is included in "General and Administrative Expenses" in the accompanying consolidated statement of operations.

Each of the Company's ship-owning subsidiaries pays, as per its management agreement with the Manager, monthly technical management fee of \$18.975 (on the basis that the \$/Euro exchange rate is 1.30 or lower; if on the first business day of each month the \$/Euro exchange rate exceeds 1.30 then the management fee payable will be increased for the month in question, so that the amount payable in \$ will be the equivalent in Euro based on 1.30 \$/Euro exchange rate) plus a fee of \$0.4 per day for superintendant attendance and other direct expenses.

The Company also pays the Manager a fee equal to 1.25% of the gross freight or hire from the employment of FreeSeas' vessels. The Manager has subcontracted the charter and post charter management of the Company's vessels and pays the 1.25% of the gross freight or hire from the employment of the vessels to Safbulk Pty Ltd ("Safbulk"), an entity affiliated with one of the Company's shareholders. Such sub-management agreement was terminated in March 2012 and the Manager has commenced the provision of the commercial management of the Company's fleet. In addition, the Company pays a 1% commission on the gross purchase price of any new vessel acquired or the gross sale price of any vessel sold by the Company with the assistance of the Manager. During the year ended December 31, 2012, there were no vessel disposals. During the year ended December 31, 2011, the Company paid the Manager \$261 relating to the sale of the M/V *Free Envoy* and M/V *Free Lady* (Note 5). In addition, the Company has incurred commission expenses relating to its commercial agreement with the Manager amounting to \$174, \$371 and \$728 for the years ended December 31, 2012, 2011 and 2010 respectively, included in "Commissions" in the accompanying consolidated statements of operations.

The Company also pays, as per its services agreement with the Manager, a monthly fee of \$136.275, (on the basis that the \$/Euro exchange rate is 1.35 or lower; if on the last business day of each month the \$/Euro exchange rate exceeds 1.35 then the service fee payable will be adjusted for the following month in question, so that the amount payable in dollars will be the equivalent in Euro based on 1.35 \$/Euro exchange rate) as compensation for services related to accounting, financial reporting and general administrative and management services plus expenses. The Manager is entitled to a termination fee if the agreement is terminated upon a "change of control" as defined in its services agreement with the Manager. The termination fee as of December 31, 2012 would be approximately \$89,020. In connection with the shares to be issued to the Manager in payment of unpaid management and services fees, described below, the Manager has waived its right to terminate the services agreement and receive such termination fee.

On April 23, 2012, the Company's Board of Directors approved the issuance of 166,069 shares of the Company's common stock to the Manager in payment of the \$926 in unpaid fees due to the Manager for the first quarter of 2012 under the management and services agreements with the Company. The number of shares issued to the Manager was based on the closing prices of the Company's common stock on the first day of each month during the quarter, which are the dates the management and services fees were due and payable. The Board also approved the issuance of an aggregate of 19,964 shares of the Company's common stock to the non-executive members of its Board of Directors in payment of \$31 per person in unpaid Board fees for the last three quarters of 2011. The aggregate number of shares issued to the directors was based on the closing prices of the Company's common stock on the last day of each of the last three quarters of 2011, which are the dates that the Board fees were due and payable. All of the foregoing shares will be restricted shares under applicable U.S. securities laws.

On October 3, 2012, the Company's Board of Directors approved the issuance of 219,650 shares of the Company's common stock to the Manager in payment of the \$807 in unpaid fees due to the Manager for the third quarter of 2012 under the management and services agreements with the Company. The number of shares issued to the Manager was based on the closing prices of the Company's common stock on the first day of each month during the quarter, which are the dates the management and services fees were due and payable. The Board also approved the issuance of an aggregate of 32,679 shares of the Company's common stock to the non-executive members of its Board of Directors in payment of \$152 in unpaid Board fees for the first, second and third quarter of 2012. The aggregate number of shares issued to the directors was based on the closing prices of the Company's common stock on the last day of each of the three quarters of 2012, which are the dates that the Board fees were due and payable. All of the foregoing shares will be restricted shares under applicable U.S. securities laws.

On January 18, 2013, the Company's Board of Directors approved the issuance of an additional 641,639 shares of the Company's common stock to the Manager in payment of \$809 in unpaid fees due to the Manager for November and December 2012 and January 2013 under the management and services agreements with the Company. The number of shares to be issued to the Manager was based on the closing prices of the Company's common stock on the first day of each month, which are the dates the management and services fees were due and payable. The Board also approved the issuance of an aggregate of 53,020 shares of the Company's common stock to its non-executive directors in payment of \$48 in unpaid Board fees for the fourth quarter of 2012. The aggregate number of shares to be issued to the directors was based on the closing price of the Company's common stock on the last day of the fourth quarter of 2012, which is the date that the Board fees were due and payable. All of the foregoing shares will be restricted shares under applicable U.S. securities laws (Note 17).

FREESEAS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(All amounts in thousands of United States Dollars, except for share and per share data)

Fees and expenses charged by the Manager are included in the accompanying consolidated financial statements in “Management and other fees to a related party,” “General and administrative expenses,” “Operating expenses,” “Gain on sale of vessel”, “Vessel impairment loss”, “Advances for vessels under construction” and “Write-off of advances for vessels under construction”. The total amounts charged for the year ended December 31, 2012, 2011 and 2010 amounted to \$4,560 (\$2,404 of management fees, \$1,985 of services fees, \$134 of superintendent fees and \$37 for other expenses), \$4,451 (\$1,900 of management fees, \$1,609 of services fees, \$146 of superintendent fee
