Start of New Business Line

Delta Technology Holdings Limited (the “**Company**”, “**we**”, or “**us**”) is a fine and specialty chemical manufacturer, primarily engaged in manufacturing and selling of organic compound including para-chlorotoluene (“**PCT**”), ortho-chlorotoluene (“**OCT**”), PCT/OCT downstream products, and other by-product chemicals and distributing fine and specialty chemicals to end application markets including automotive, pharmaceutical, agrochemical, dye & pigments, aerospace, ceramics, coating-printing, clean energy and food additives.

Since the second half of 2017, management has noticed that the national and local Chinese government agencies have continuously strengthened their environmental protection policies for industrial companies, especially for companies in the chemicals industry. The strict regulation and restrictions on companies in the chemical industry has significantly hampered our production capabilities. The same applies to production and operations of downstream customers, which has caused a production shortage in the entire industry. The demand for the Company’s products has also reduced, and this has resulted in a significant reduction in our sales revenue during this fiscal year.

Our revenue dramatically decreased approximately 74% for the fiscal year ended June 30, 2016 (approximately \$53 million) comparing to that for the fiscal year ended June 30, 2015 (approximately \$202 million). Such decrease was mainly due to the low demand as result of the slowdown in China’s economic growth. Also, the Company exited the Supply Chain Management segment due to its low margins during fiscal year ended June 30, 2016. For the year ended June 30, 2016, we incurred a net loss of approximately \$6.8 million comparing with net income of approximately \$1.4 million for the fiscal year ended June 30, 2015. The decrease was mainly due to the decrease of revenue and the provision made.

Although our revenue for the fiscal years ended June 30, 2017 slightly increased to approximately \$56 million from \$53 million for the fiscal years ended June 30, 2016, our loss before tax increased to \$28.4 million from \$7.6 million. The increase in net loss in the fiscal year ended June 30, 2017 was mainly due to the decrease of gross profits and the doubtful debts provision being made.

In the fiscal year ended June 30, 2018, our revenue decreased by 31.69% year over year and we incurred net loss of approximately US\$82.89 million due to significant bad debts provision of approximately US\$77.81 million. Our gross profit margin was driven down from 6.97% to 5.11% due to the high competition for our PCT/OCT products for the fiscal year ended June 30, 2018.

Our profits have kept decreasing due to increased expenditures on complying with the new environmental protection regulations. Under the current situation, the Company is unable to accurately predict the future policies and market

direction of the chemical industry.

The Company began exploring the possibility of engaging in a new business as a result of the uncertainties surrounding the chemicals industry, and discovered that tea beverages and light foods are currently very popular in the consumer market. Upon further research and investigation, management is optimistic about the future of the tea beverages and light foods industry and has decided to pursue this as a new line of business.

Planned Business

This business will be conducted via the Company's newly formed subsidiary, Shanghai Ming Yun Tang Tea Limited ("**Shanghai MYT**") which controls Hunan Mingyuntang Brand Management Company ("**Hunan MYT**") via a series of contractual agreements. Management expects to provide high-quality tea beverages via a tea shop chain under the brand Mingyuntang (). The products to be offered include trendy tea drinks, baked breads, cakes and deserts, etc., targeting China's new urban generation. The tea drinks will be developed based on a variety of teas, which are used in beverages such as fresh milk tea, fruit tea and milk cap tea. All of the Mingyuntang products will be focused on not only their taste but also their aesthetic presentation and health benefits.

Management expects Mingyuntang to gradually open stores in small and medium-sized cities in China, where more and more consumers are seeking satisfaction through better taste in blended tea beverages. By offering tea beverages, baked goods and tea-related gifts in a pleasant and comfortable environment, we aim to attract China's younger generation aged between 20 to 40 who tend to pay more attention to their quality of life. This group historically were not the target consumer group for traditional Chinese tea products.

The stores we plan to open include flagship stores and general stores. Flagship stores are designed to offer both drinks and snacks which we envision to cover a floor area of 80-150 square meters (about 860-1,615 square feet) each. Our general stores will mainly offer drinks and we expect coverage of a smaller floor area of 40-80 square meters (about 430-860 square feet) each. In addition to physical stores, we plan to team up with China's online food delivery operators to allow consumers to order drinks and snacks through the Internet.

We have identified the necessary resources for our new business, including raw materials suppliers. We also identified the potential store spaces for renting. We plan to establish a robust personnel management system including recruitment, training and competitive compensation. We expect everything ranging from the stores' decoration and accessories to its product exhibitions will be standardized to ensure the best consumer experience.
