Operating Results and Financial Conditions

2004 Third Quarter in Review

Looking back at the global economy in the third quarter of 2004, the U.S. economy displayed growth as employment conditions continued to improve, consumer spending increased modestly, and private sector capital spending continued to grow, fueled by an upturn in corporate earnings. Economic growth in Europe remained moderate through most of the third quarter of 2004 due to sluggish consumer spending resulting from listless employment conditions and a slowdown in export sales, which had been supporting an economic recovery. In Asia, China continued to achieve high economic growth, driven by strong consumer spending and increased capital investment, and other Asian economies were also in recovery mode. In Japan, the economy continued to recover gradually amid increased export sales and capital investment, along with stable consumer spending sustained by improved employment conditions.

As for the markets in which the Canon Group operates, although sales of digital cameras slowed in Japan due to a rising household penetration rate, demand overseas, especially in Europe, continued to grow significantly during the term. While demand for network digital multifunction devices (MFDs) remained strong as the office market moves toward multifunctionality and color, computer peripherals, including printers, struggled amid severe price competition and the shift in demand toward lower priced models offering improved functionality. In the field of optical equipment, capital spending for semiconductor-production equipment recovered strongly owing to such factors as the high rate of capacity utilization by semiconductor manufacturers, and the sustained high price of memory devices resulting from replacement demand for personal computers and the significant growth in demand for digital consumer electronics. Moreover, increased demand for liquid crystal display (LCD) televisions fueled growth in the market for projection aligners, which are used in the production of LCDs. The average value of the yen for the third quarter was ¥109.97 to the U.S. dollar and ¥134.37 to the euro, representing a year-on-year increase of 7% against the U.S. dollar, and a decrease of 2% against the euro.

Amid these conditions, Canon's consolidated net sales for the third quarter increased by 9.2% from the year-ago period to ¥838.3 billion (U.S.\$7,552 million), boosted by a significant rise in sales of digital cameras and color network MFDs, along with a substantial increase in sales of laser beam printers, semiconductor-production equipment and projection aligners used in the production of LCDs. Net income for the third quarter recorded an all-time high of ¥101.8 billion (U.S.\$917 million), a year-on-year increase of 39.4%. Despite ongoing production-reform efforts during the term and the timely launch of competitive new products, the gross profit ratio decreased 1.8% from the year ago period to 48.9%, mainly due to severe price competition and the appreciation of the yen against the U.S. dollar. Although R&D expenditures grew by ¥2.3 billion (U.S.\$21 million) to ¥59.4 billion (U.S.\$535 million) along with increased advertising and sales-promotion spending, selling, general and administrative expenses for the third quarter decreased 4.5% year on year, mainly due to other selling, general and administrative expenses remaining at a lower level than the year-ago period coupled with a ¥13.8 billion (U.S.\$124 million) gain realized from the return to the Japanese Government of the substitutional portion of the employees pension funds (EPF) that the company and certain of its subsidiaries in Japan had operated. Consequently, operating profit in the third quarter totaled ¥158.3 billion (U.S.\$1,426 million), a substantial year-on-year increase of 26.1%. Other income (deductions) improved by ¥12.6 billion (U.S.\$113 million), attributable to a ¥13.3 billion (U.S.\$120 million) decrease in currency exchange losses. As a result, income before income taxes and minority interests in the third quarter totaled ¥162.6 billion (U.S.\$1,465 million), a year-on-year increase of 38.6%. With an effective tax rate during the quarter of 34.4%, which was 1.4% lower compared with the year before, net income for the third quarter totaled ¥101.8 billion (U.S.\$917 million), reaching the ¥100 billion mark for the first time for a quarterly result.

Basic earnings per share for the quarter was ¥114.79 (U.S.\$1.03), a year-on-year increase of ¥31.76 (U.S.\$0.29).

Table of Contents**Results by Product Segment**

In the business machine segment, demand for network digital MFDs, which are grouped in the office imaging products sub-segment, indicates a shift from monochrome to color models, as well as a trend toward higher-end features. Additionally, the Color imageRUNNER C3200/iR C3200N, Canon's first color offering in the powerful imageRUNNER-series lineup, continued to sell well in both the domestic Japanese and overseas markets. The iR C3100 and the high-end model iR C6800, introduced in Japan in the second half of 2003, were also launched in Europe and the United States in the first half of 2004 and have also been well received in these markets. The iR C3220/iR C3220N and iR C2620/iR C2620N, which succeed the iR C3200, were just released in September and have also been well received. Among monochrome network digital MFDs, such low-end models as the iR1600/2000 series recorded considerable sales increases, while mid-level models, such as the iR2200 series, and high-end models, such as the iR5000 series, also achieved strong sales. Overall, sales of office imaging products for the third quarter realized a year-on-year increase of 2.5%. In the field of computer peripherals, laser beam printers enjoyed a year-on-year increase in unit sales of nearly 15%, with color models showing a significant increase in sales and monochrome systems, particularly personal-use models, also displaying growth. Despite the effects of the yen's appreciation against the U.S. dollar and a shift in demand toward lower priced models in the monochrome segment, laser beam printer sales substantially increased due to an increase in sales of color models. Although inkjet printers recorded an approximately 15% increase in unit sales with the i560 and i860 models selling briskly, especially in Japan and Europe, along with the MultiPASS MP360/MP370 high-speed multifunction systems, sales value decreased slightly due to price competition. As a result, despite the effect of appreciation of the yen against US dollar, sales of computer peripherals in the third quarter increased by 9.7%. Sales of business information products, including computers, micrographics and calculators, decreased by 10.1% due to the intentional curtailing of personal computer sales in the domestic market. Collectively, sales of business machines in the third quarter totaled ¥580.0 billion (U.S.\$5,225 million), a year-on-year increase of 5.2%. Despite the effects of the stronger yen, the gross profit ratio remained at the year-ago level, supported by cost reduction efforts, and the sales-to-expense ratio declined, resulting in third quarter operating profit of ¥139.6 billion (U.S.\$1,258 million) for the business machine segment, a year-on-year increase of 13.8%. In the first quarter of 2004, Canon reclassified information-systems-related sales by subsidiaries to better reflect the product relationship. These sales, which had previously been grouped with optical and other products, are now included in the office imaging products segment. Accordingly, previous-year sales for each category have been reclassified in line with the change.

Within the camera segment, amid the continued strong demand for digital models worldwide, sales of compact digital cameras showed significant growth, boosted by the launch of eight new PowerShot-series models in the first half. Among the new lineup, the PowerShot S500 Digital ELPH and PowerShot A75 in particular have achieved strong sales while new models released in September have also been well received by the market. Canon's digital SLR cameras also continued to enjoy robust growth, bolstered by the EOS Digital Rebel, launched in September of last year, and the successor to the EOS 10D, the EOS 20D, which was introduced in September, 2004. As a result, unit sales of digital cameras grew by nearly 50% compared with the year-ago period. In the field of digital video camcorders, new models such as the Optura 500/400, Elura 70/65/60 and Optura 40/30 models achieved favorable sales during the third quarter. Consequently, camera sales overall continued to enjoy growth of 5.9%, achieving total sales of ¥165.0 billion (U.S.\$1,486 million). Operating profit for the camera segment decreased 23.1% to ¥29.8 billion (U.S.\$268 million), as the gross profit ratio decreased slightly due to the effects of the stronger yen and price competition, along with increased advertising and sales-promotion spending. As a result, the operating profit ratio for the period decreased by 6.8% year-on-year.

In the optical and other products segment, sales of aligners for the production of LCDs realized notable growth as the PC monitor industry continued shifting from CRT to LCD computer displays, and the LCD television market continued to expand. Sales of steppers, used for the production of semiconductors, also increased as investment in semiconductor-production equipment showed a recovery owing to the improved conditions in the

semiconductor-device market. As a result, sales for the segment increased by 53.6% to ¥93.3 billion (U.S.\$841 million). The operating profit ratio for the segment improved substantially due to the significant growth in unit sales, enabling optical and other products to record an operating profit of ¥10.2 billion (U.S.\$92 million), compared with an operating loss of ¥2.9 billion, for the same period of the previous year.

Cash Flow

In the nine months ended September 30, 2004, Canon maintained cash flow from operating activities of ¥387.3 billion (U.S.\$3,489 million), a year-on-year increase of ¥60.9 billion (U.S.\$548 million), reflecting the

Table of Contents

substantial growth in sales and increased cash proceeds from sales, combined with a substantial increase in net income. Capital expenditure totaled ¥219.5 billion (U.S.\$1,978 million), which was used mainly to expand production capabilities in both domestic and overseas regions, as well as for development of R&D related infrastructure. Cash flow from investing activities totaled ¥175.1 billion (U.S.\$1,578 million). As a result, free cash flow, or cash flow from operating activities minus cash flow from investing activities, totaled positive ¥212.2 billion (U.S.\$1,911 million).

Cash flow from financing activities recorded an outlay of ¥90.8 billion (U.S.\$818 million), mainly resulting from active efforts to repay loans toward the goal of improving the company's financial position and an increase in the dividend payout. Consequently, cash and cash equivalents, which totaled ¥812.7 billion (U.S.\$7,322 million), representing a ¥122.4 billion (U.S.\$1,103 million) increase from the end of the previous year, remained at a high level.

Outlook

Regarding the outlook for the global economy in the fourth quarter and thereafter, although global economic prospects remain uncertain due to rising oil prices, which could adversely affect consumer spending, and exchange rate trends, the global economy is likely to continue its course toward recovery. In the businesses in which Canon is involved, the digital camera market is expected to continue enjoying rapid growth particularly in overseas markets. As for network digital MFDs and laser beam printers, while stable demand is projected for both monochrome and full-color models, severe price competition and shifting demand toward lower priced models is expected to adversely affect sales. Within the semiconductor-production equipment market, while the pace of new orders will probably slow down somewhat, the level of capital investment by semiconductor manufacturers is likely to maintain. In the market for projection aligners used in the production of LCDs, demand for LCD production equipment is also expected to show continued growth.

Although uncertainty surrounds several factors that could affect currency exchange rates, significant changes in rates are not anticipated during the fourth quarter. Accordingly, for the year, the yen is expected to be 6% stronger against the U.S. dollar and 2% weaker against the euro compared with the previous year.

Upon considering the current market and currency exchange environments, the company has revised upward its forecasts for the 2004 fiscal year and now anticipates consolidated net sales of ¥3,470.0 billion (U.S.\$31,261 million), consolidated income before income taxes and minority interests of ¥548.0 billion (U.S.\$4,937 million), and consolidated net income of ¥339.0 billion (U.S.\$3,054 million). The company also projects non-consolidated net sales of ¥2,318.0 billion (U.S.\$20,883 million), non-consolidated ordinary profit of ¥384.0 billion (U.S.\$3,459 million), and non-consolidated net income of ¥243.0 billion (U.S.\$2,189 million). These forecasts assume currency exchange rates of ¥108.00 to the U.S. dollar and ¥132.00 to the euro for the remainder of 2004.

Notes: Beginning first quarter of 2004, Canon has changed classification of product categories with regards to information system business, which had been classified in Optical and other products , to Business machines (Office imaging products) in order to better reflect current relation with those products. Accordingly, information for previous fiscal years has been reclassified to conform with the current classification.

1. The primary products included in each of the product segments are as follows:
 Business machines:
 Office imaging products :
 Office network digital multifunction devices (MFDs) / Color network digital MFDs / Office copying machines / Personal-use copying machines / Full-color copying machines / etc.
 Computer peripherals :
 Laser beam printers / Single function inkjet printers / Inkjet multifunction

peripherals /
Image
scanners / etc.
Business
information
products :
Computer
information
systems /
Micrographic
equipment /
Personal
information
products / etc.

Cameras : SLR
cameras / Compact
cameras / Digital
cameras / Digital
video
camcorders / etc.
Optical and other
products :
Semiconductor
production
equipment / Mirror
projection mask
aligners for LCD
panels /
Broadcasting
equipment /
Medical
equipment /
Components / etc.

2. The principal
countries and
regions included in
each regional
category are as
follows: Americas:
United States of
America, Canada,
Latin America /
Europe: England,
Germany, France,
Netherlands / Other
Areas: Asian
regions, China,
Oceania

(2) SIGNIFICANT ACCOUNTING POLICIES

The accompanying consolidated financial statements reflect the adjustments which management believes are necessary to conform them with accounting principles generally accepted in the United States of America, except for the segment information, as required by Statement of Financial Accounting Standards No.131, Disclosures about Segments of an Enterprise and Related Information.

We have engaged Ernst & Young ShinNihon to complete a review of the consolidated financial statements as of and for nine months ended September 30, 2004, in accordance with Statement of Auditing Standards No.100, Interim Financial Information, established by the American Institute of Certified Public Accountants.

1. Employee Retirement and Severance Benefits

Canon has been adopting Statement of Financial Accounting Standards No.87, Employer's Accounting for Pensions. The Company and certain of its domestic subsidiaries obtained approvals from government for the exemption for the return of past benefits obligation through July 2004, and transferred the substitutional portion of the benefits obligations related to past service and the related portion of the plan assets of Employees Pension Funds to the

government. The Company and certain of its domestic subsidiaries recognized a gain of JPY13,769 million (U.S.\$124,045 thousand) in selling, general and administrative expenses for the year ended September 30, 2004.

This document contains forward-looking statements with respect to future results, performance and achievements that are subject to risk and uncertainties and reflect management's views and assumptions formed by available information. All statements other than statements of historical fact are statements that could be considered forward-looking statements. When used in this document, words such as anticipate, believe, estimate, expect, intend, may, or should and similar expressions, as they relate to Canon, are intended to identify forward-looking statements. Many factors could cause the actual results, performance or achievements of Canon to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, among others, changes in general economic and business conditions, changes in currency exchange rates and interest rates, introduction of competing products by other companies, lack of acceptance of new products or services by Canon's targeted customers, inability to meet efficiency and cost reduction objectives, changes in business strategy and various other factors, both referenced and not referenced in this document. A detailed description of these and other risk factors is included in Canon's annual report on Form 20-F, which is on file with the United States Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein. Canon does not intend or assume any obligation to update these forward-looking statements.

Total	108,554	102,567	+ 5,987
	<hr/>	<hr/>	<hr/>

(Note)

From the 1st quarter of 2004, Canon changed the classification of product categories with regard to its information system business, which had been classified in "Optical and other products", to "Business machines(Office imaging products)" in order to better reflect current relation with those products. Accordingly, information for the year 2003 has been reclassified to conform with the current classification.
