(1) April 1 – June 30.

(2) October 1 – June 30.

(3) Includes a positive effect of 36 million (or 0.04 per share) due to the adoption of SFAS 143, *Accounting for Asset Retirement Obligations*.

(4) Beginning December 5, 2001 Infineon is accounted for under the equity method of accounting and is no longer consolidated in the financial statements of Siemens. Therefore, in fiscal year 2002, Infineon's orders and sales are included only for the approximately two months in which Infineon was consolidated in the financial statements of Siemens.

Note: Beginning during the second quarter of fiscal 2003, Siemens replaced the term "EBIT from Operations" with "Group profit from Operations". This change and further terminology changes made in the second quarter are explained on the page "Terminology update" at the end of this document. "Group profit from Operations" is reconciled to "Income before income taxes" of Operations under "Reconciliation to financial statements" on the table "Segment information".

Munich, July 24, 2003

Siemens in the third quarter (April 1 to June 30) of fiscal 2003

Net income was 632 million, compared to 725 million in the third quarter a year earlier.

Group profit from Operations was 1.023 billion, compared to 1.098 billion in the same period a year ago. A majority of Siemens Groups increased their earnings.

Sales of 17.380 billion and orders of 17.215 billion were down 15% and 10%, respectively, from the third quarter a year earlier. Excluding currency translation and the net effect of acquisitions and dispositions, orders were down 1% and sales were down 7%.

Net cash from operating and investing activities for the first nine months of fiscal 2003 was 527 million. Net cash of 3.206 billion in the same period a year earlier benefited from 945 million in net proceeds from portfolio activities. Net cash in the current nine-month period included an acquisition payment of 505 million and approximately 850 million of increases in investments and marketable securities.

For the third quarter of fiscal 2003, Group profit from Operations was 1.023 billion, near the level a year earlier despite a 3.1 billion decline in sales. A majority of operating Groups improved both profits and earnings margins for the quarter. While Power Generation's (PG) Group profit was lower due to the end of the gas turbine boom in the U.S., it remained among Siemens' earnings leaders in the third quarter, along with Medical Solutions (Med), Automation and Drives (A&D), Siemens VDO Automotive (SV), and Osram.

Table of Contents

Third-quarter net income of 632 million came in lower than the 725 million a year earlier. Non-allocated pension expense was 189 million compared to 61 million a year earlier, and Siemens' equity share of the net loss at Infineon Technologies AG was higher in the current quarter, 43 million compared to 31 million a year earlier. In addition, the prior-year period included a 67 million gain on the sale of an investment. Earnings per share for the quarter were 0.71, compared to 0.81 a year earlier.

Net cash from operating and investing activities for the third quarter was 266 million, including an initial payment of 505 million to acquire the industrial turbine business of Alstom S.A. and 741 million in increases in investments and marketable securities. Excluding these items, net cash from operating and investing activities was 1.512 billion, compared to 1.466 billion in the same period a year earlier. For the first nine months of fiscal 2003, net cash from operating and investing activities was 527 million, including the items mentioned above as well as supplemental pension contributions totaling 442 million in the first quarter. Net cash from operating and investing activities in the first nine months a year earlier was 3.206 billion, including net cash provided from portfolio activities totaling 945 million related to transactions involving Infineon and Atecs Mannesmann.

Reflecting global macroeconomic conditions, all Siemens' operating Groups reported weak sales and orders compared to the third quarter a year earlier, resulting in aggregate declines of 15% in sales, to 17.380 billion, and 10% in orders, to 17.215 billion. Negative currency translation effects, particularly involving the U.S. dollar, affected reported sales and orders across the board. Excluding currency translation and the net effect of acquisitions and dispositions, third-quarter sales declined 7% and orders edged down 1% year-over-year.

I am satisfied with our third-quarter result, said Siemens CEO Heinrich v. Pierer. While the absence of demand growth in key markets, combined with significant currency translation effects, lowered sales and orders year-over-year, the trend is more gradual on a consecutive-quarter basis. It is even more satisfying that most of our Groups were able to move further toward their target earnings ranges for fiscal 2003. I expect a similarly positive performance in the fourth quarter. Clearly the Operation 2003 measures are taking effect, and they are being consistently applied.

Table of Contents

Operations in the third quarter of fiscal 2003

In the Information and Communications business area, Information and Communication Networks, (ICN) reported a loss of 125 million, including 72 million in charges primarily at Efficient Networks. On a consecutive quarter basis, ICN's Group Profit margin improved. Third-quarter earnings at the Enterprise Networks division were 62 million, up from the prior-year period, but revenue declined to 893 million from 955 million a year earlier due to currency translation effects. ICN's Carrier Networks and Services business also reported lower sales year-over-year, 801 million compared to 1.108 billion, and posted a loss of 128 million. The division's third-quarter loss a year earlier was 183 million. For ICN as a whole, sales dropped 23% to 1.687 billion from 2.190 billion in the prior-year period, including a 6% negative currency translation effect. Third-quarter orders declined 13% year-over-year, to 1.756 billion, with nearly half the decrease due to currency translation.

Information and Communication Mobile (ICM) recorded Group profit of 17 million in the third quarter, including a number of one-time net positive effects at the Mobile Phones and Mobile Networks divisions. In the same period a year earlier, ICM posted a loss of 9 million. The Mobile Networks division posted a profit of 36 million on sales of 968 million, compared to a loss of 21 million on sales of 1.218 billion in the third quarter of the prior year. The Mobile Phones division recorded sales of 922 million on a volume of 8.1 million handsets, similar to the level a year earlier, but posted a loss of 42 million. For comparison, Mobile Phones posted a profit of 28 million in the same quarter a year earlier. Third-quarter sales for ICM as a whole fell 14%, to 2.160 billion. Orders were down 2%, at 2.313 billion. Excluding currency translation effects, sales fell 10% and orders grew 5%.

Siemens Business Services (SBS) posted Group profit of 17 million, up from 5 million in the third quarter a year earlier. Continuing weak demand for information technology (IT) services caused third-quarter sales to decline 6%, to 1.283 billion, and orders to decline 7%, to 1.297 billion.

Table of Contents

In the Automation and Control business area, A&D continued to produce outstanding earnings in a difficult environment, raising its Group profit to 203 million and its margin to nearly 10% in the third quarter. The Group's Industrial Automation Systems and Motion Control Systems divisions again led the way. A&D also strengthened its overall market position with innovative new products across the Group that helped offset pricing pressure and weak demand in the U.S. Excluding currency translation effects, sales grew 3% and orders rose 6% year-over-year. Third-quarter sales of 2.074 billion were just 3% lower than a year ago, while orders held steady at 2.078 billion.

Industrial Solutions and Services (I&S) recorded 5 million in Group profit, compared to a loss of 32 million in the third quarter a year earlier, when the Group took charges to reduce capacity in a contracting market for industrial solutions. Market conditions remain difficult, as third-quarter sales declined 10%, to 959 million, and orders fell 8%, to 911 million. Both sales and orders included a five percentage point negative currency translation effect.

Siemens Dematic (SD) battled weak markets, project delays, and margin pressures, recording a Group loss of 64 million including 39 million in charges for capacity reduction, inventory write-downs, and increased contract loss provisions for existing project risks. Third-quarter Group profit a year earlier was 12 million. While the Electronics Assembly Systems division began to restore sales growth in its large pick-and-place business on a near-break-even basis, its smaller businesses posted losses. The Postal Automation division stayed in the black despite falling sales. The Material Handling Automation division, however, experienced volume-driven earnings declines in the U.S., took most of the charges mentioned above related to projects in Europe, and posted a significant loss compared to a profit a year earlier. SD's third-quarter sales of 640 million were down 14% year-over-year, with currency translation accounting for 11 percentage points of the decrease. Orders dropped 24%, to 571 million, including eight percentage points due to currency translation.

Group profit at Siemens Building Technologies (SBT) was 18 million, including 20 million in charges primarily to reduce capacity. Group profit was 23 million in the third quarter a year earlier. Reflecting weakening demand in the construction market, sales fell 10% year-over-year, to 1.156 billion, and orders were down 11%, at 1.137 billion.

Table of Contents

Currency translation effects cut eight percentage points from SBT's sales growth, and seven points from order growth.

In the Power business area, PG's third-quarter Group profit of 279 million was down from the 476 million level a year earlier, near the peak of the U.S. gas turbine energy boom. The current period includes net gains of 65 million from customer cancellations, and the prior year period benefited from a 44 million gain related to revised estimates of project performance. While third-quarter sales were significantly lower than a year earlier, at 1.530 billion, orders were down just 3% year-over-year, at 1.596 billion. Excluding a 5% currency translation effect, orders rose as PG continued to expand its business with major new orders in Asia/Pacific, Europe, and the Middle East. The Group's service business grew faster than PG as a whole, and accounted for approximately one-third of Group sales and delivered robust Group profit in the third quarter. PG's acquisition of Alstom's small gas turbine business, which was consolidated as of May 1, 2003, made only a modest contribution to sales and earnings growth during the period. PG's order backlog was 14.5 billion, comparable to recent quarters.

Power Transmission and Distribution (PTD) delivered Group profit of 52 million compared to 43 million in the third quarter a year ago, and boosted its Group profit margin to 6.0% despite a decline in sales. The Group's High Voltage and Medium Voltage divisions increased their profitability year-over-year. The aggregate effects of currency translation and the divestment of PTD's Metering division between the two periods under review strongly influenced both sales and orders, by a negative 20% and 21%, respectively. Excluding these effects, PTD's sales rose 7% and orders grew 11%. Including these effects, sales fell 13%, to 869 million, and orders declined 10%, to 868 million.

In the Transportation business area, Transportation Systems (TS) improved third-quarter Group profit to 74 million from 61 million a year earlier, and raised its earnings margin more than a point to 6.7%. Third-quarter sales of 1.100 billion were unchanged from the level a year earlier, as TS continued to convert previous large orders into current business. While third-quarter orders of 732 million were down 19% year-over-year, including six percentage points due to currency translation, the Group's order backlog kept pace with recent quarters, at 11.2 billion.

Table of Contents

SV further stabilized its earnings position, achieving 111 million in Group profit and improving its earnings margin more than two full points. Diesel injection systems and onboard infotainment systems supported profitability. Both sales and orders were 2.090 billion, down 6% year-over-year, partly caused by the previously communicated transfer of SV's approximately 800 million (annualized) automotive cockpit module business to an existing joint venture with Faurecia on May 31, 2003. Excluding this transfer and a 6% negative currency translation effect, SV's sales and orders grew year-over-year.

In the Medical business area, Med led all Siemens Groups with 332 million in Group profit, including a 74 million gain related to the contribution of a portion of its electromedical systems business to its joint venture with Dräger Medical. For comparison, Group profit a year earlier was 243 million. Healthy demand for Med's innovative imaging systems contributed strongly to quarterly results. Excluding currency translation effects that cut 13 percentage points from sales growth and 12 points from order development, Med increased sales 4% and orders 1% compared to the prior-year quarter despite slower market growth, particularly in the U.S. Including currency translation, third-quarter sales of 1.721 billion were down 9% and orders of 1.702 billion declined 11% year-over-year.

In the Lighting business area, Osram raised its earnings margin above 10% and recorded Group profit of 98 million, compared to 102 million a year earlier. Higher-margin new products continued to brighten Osram's profitability picture, especially at the Opto Semiconductors division. Excluding currency translation effects that cut 12 percentage points from sales and order growth, volume grew 2% compared to the prior-year quarter. Including currency translation, third-quarter sales and orders of 968 million were down 10% year-over-year.

Other operations consist primarily of non-Group-related operating activities and centrally-held operating equity investments. For the third quarter, other operations contributed Group profit of 6 million, compared to a negative 3 million in the same period a year earlier.

Table of Contents

Corporate items, pensions and eliminations

Corporate items, pensions, and eliminations were a negative 377 million in the third quarter, compared to a negative 206 million in the same period a year earlier, which included a gain of 67 million on the sale of an investment. Corporate costs were 150 million, down from 165 million a year earlier. Non-allocated pension expense was higher in the current period, 189 million compared to 61 million a year earlier, and Siemens equity share of Infineon's net loss was also higher, at 43 million compared to 31 million a year earlier.

Financing and Real Estate

Income before income taxes at Siemens Financial Services (SFS) was 71 million, down from 83 million in the third quarter a year earlier, a period that included a high level of investment income. Third-quarter results for Siemens Real Estate (SRE) rose year-over-year, to 77 million from 53 million, as gains from dispositions of real estate assets and reduced financing costs from lower interest rates more than offset the effects of lower occupancy rates.

Income Statement highlights for the third quarter

Net sales for Siemens worldwide were 17.380 billion in the third quarter, compared to 20.482 billion in the same period a year earlier. Net income for Siemens worldwide was 632 million compared to 725 million in the same quarter a year ago.

In Operations, net sales were 17.249 billion, down from 20.308 billion a year earlier. Gross profit margin increased to 28.9% from 28.0%. Among the Groups, in particular Med and SV recorded significantly higher margins as SD and PG reported lower results. Research and development expense was 7.2% of sales, compared to 7.0% in the third quarter a year earlier. Marketing, selling and general administrative expense was 18.1% of sales, up from 17.4% a year ago. Other operating income (expense), net was a positive 81 million, including 65 million in net gains from customer cancellations at PG and a 74 million gain arising from Med's contribution of assets to a joint venture. Other operating income last year was 43 million, which included a 56 million gain on the sale of a business. Income from investments in other companies was a negative 3 million, down from 48 million in the prior-year period which included a 67 million gain on the sale of an investment.

Table of Contents

Sales and order trends in the first nine months

Orders for the first nine months were 56.444 billion, down 16% from 66.854 billion a year earlier, and sales fell 13% to 54.455 billion from 62.726 billion. Excluding currency and the net effect of acquisitions and dispositions, the declines in orders and sales were 8% and 5%, respectively. Orders in Germany for the first nine months of fiscal 2003 were 12.654 billion, down 7% compared to the same period a year earlier. Sales in Germany decreased 7% to 12.282 billion. International orders dropped 18% year-over-year, to 43.790 billion. Excluding currency translation and the net effects of acquisitions and dispositions, the decline in international orders was 9%. International sales of 42.173 billion declined 15% year-over-year. Excluding currency translation and the net effects of acquisitions and dispositions, international sales decreased 5%.

Orders in the U.S. for the first nine months were down 36%, to 10.786 billion. Sales in the U.S. declined 25%, to 11.517 billion, driven by expected volume declines at PG following the end of the gas turbine energy boom and by a negative 15% currency translation effect. Nine-month orders in Asia-Pacific fell 7% to 7.526 billion and sales fell 17% year-over-year, to 6.106 billion, in part due to currency translation and the net effect of acquisitions and dispositions. Sales in China fell 19% to 1.922 billion in the first nine months of the current fiscal year, due in large part to the effect of currency translation and dispositions.

Income and earnings per share in the first nine months

Net income for the first nine months of fiscal 2003 was 1.721 billion. Net income for the first nine months a year earlier was 2.544 billion, including non-taxable gains of 936 million related to the sale of shares in Infineon. On a comparable basis, net income improved year-over-year, as did Group profit from Operations, which rose to 3.193 billion from 3.049 billion a year earlier. Earnings per share for the first nine months of this year were 1.93 compared to 2.86 for the same period a year ago.

Table of Contents

Liquidity and Balance Sheet highlights for the first nine months

For Siemens worldwide, net cash from operating and investing activities for the first nine months of fiscal 2003 was \$527 million. Net cash provided by the operating activities of the Operations component for the first nine months of fiscal 2003 was \$1.532 billion after \$442 million in supplemental cash contributions to Siemens' pension trusts in Germany and the U.K. Changes in net working capital (current assets less current liabilities) within Operations used cash of \$1.897 billion due in part to a decrease in other current liabilities in particular at PG, as a result of lower advance payments resulting from order cancellations in the U.S. Changes in net working capital in the current period also reflect an increase of inventories, particularly at SD and TS.

Net cash used in investing activities within Operations was \$2.482 billion in the first nine months of this fiscal year, including PG's \$505 million initial payment for the acquisition of Alstom's industrial turbine business and the majority of the worldwide total of approximately \$850 million in increases of investments and marketable securities. Investing activities in the first nine months a year ago included transactions related to Siemens' acquisition of Atecs Mannesmann, most prominently a cash payment of \$3.7 billion to Vodafone AG, partially offset by approximately \$3.1 billion received from the disposition of Atecs businesses held for sale. The prior-year period also included sales of Infineon shares that generated proceeds totaling \$1.522 billion.

Net cash provided by operating activities within the Financing and Real Estate component for the first nine months of fiscal 2003 was \$388 million supported by strong earnings, in particular from SFS. Investing activities for the Financing and Real Estate component provided \$15 million in net cash during the current nine-month period.

Net cash provided by operating activities of Siemens worldwide was \$3.310 billion for the first nine months of fiscal 2003. In addition to the factors noted above, net cash includes a decrease in other current assets of \$823 million, primarily from financial instruments related to our international business activities. Net cash used in investing activities of Siemens worldwide was \$2.783 billion, influenced primarily by the investing activities of Operations, as noted above. Total assets decreased to \$77.220 billion from \$77.939 billion at September 30, 2002.

Table of Contents

Funding Status of Pension Plans

During the nine-month period ended June 30, 2003, the funding status of Siemens' principal pension plans improved by approximately 500 million compared to their status on September 30, 2002. The improvement is due primarily to a contribution of 377 million in real estate plus supplemental cash contributions totaling 442 million in the first quarter of fiscal 2003, combined with an increase in the market value of pension plan assets, whose asset allocation was modified during the current fiscal year, reduced by service and interest costs during the nine-month period.

Economic Value Added

Siemens worldwide EVA for the first nine months of fiscal 2003 was positive but lower compared to the same period a year ago, due primarily to nontaxable gains of 936 million on sales of shares in Infineon which occurred in the first two quarters a year earlier. Excluding these gains, EVA increased compared to the prior-year period.

Note: Foreign currency translation, particularly related to the U.S. dollar, can have a significant impact on reported orders and sales. Attached to this Earnings Release is a presentation of the additional impacts of currency translation and transaction exposure on Siemens resulting from the U.S. dollar.

Note: Siemens CEO Heinrich v. Pierer and CFO Heinz-Joachim Neubürger will hold an English-language telephone conference with analysts on July 24, 2003 at 12:00 p.m. CET. You can follow this conference live on the Internet by going to www.siemens.com/analytscall. A recording of the telephone conference will be available later at the same location.

This press release report contains forward-looking statements based on beliefs of Siemens' management. The words anticipate, believe, estimate, forecast, expect, intend, plan, should and project are used to identify forward-looking statements. Such statements reflect the company's views with respect to future events and are subject to risks and uncertainties. Many factors could cause the actual results to be materially different, including, among others, changes in general economic and business conditions, changes in currency exchange rates and interest rates, introduction of competing products, lack of acceptance of new products or services and changes in business strategy. Actual results may vary materially from those projected here. Siemens does not intend or assume any obligation to update these forward-looking statements.

- (1) Group profit of the Operations Groups is earnings before financing interest, certain pension costs, income taxes and certain one-time items, which in management's view do not relate to the business performance of the Groups.
- (2) Net capital employed of the Operations Groups represents total assets less tax assets, certain accruals and non-interest bearing liabilities other than tax liabilities.
- (3) Intangible assets, property, plant and equipment, acquisitions, and investments.
- (4) Includes amortization and impairments of intangible assets, depreciation of property, plant and equipment, and write-downs of investments.
- (5) Other operations primarily refer to certain centrally-held equity investments and other operating activities not associated with a Group.
- (6) Includes (for Eliminations within Financing and Real Estate consists of) cash paid for income taxes according to the allocation of income taxes to Operations, Financing and Real Estate, and Eliminations, reclassifications and Corporate Treasury in the Consolidated Statements of Income.

-
- (1) The income taxes of Eliminations, reclassifications and Corporate Treasury, Operations, and Financing and Real Estate are based on the consolidated effective corporate tax rate applied to income before income taxes.
- (2) As of December 5, 2001, Siemens deconsolidated Infineon. The results of operations from Infineon for the first two months of the fiscal year 2002 period are included in Eliminations, reclassifications and Corporate Treasury. As of December 5, 2001, the share in earnings (loss) from Infineon is included in Income (loss) from investments in other companies, net in Operations.

Foreign Exchange Rate Impacts (USD) on Siemens (Q3/2003)

Currency Translation Exposure

Translation exposure arises from translating the currencies which affect our balance sheet and income statement amounts into the Euro, our reporting currency. In relation to the U.S. dollar (USD), the impact of currency translation on worldwide Group Profit margins has been negligible, or slightly positive, with the exception of PG. This results from the fact that the Group Profit margins of our U.S. businesses have generally been lower than the overall Group Profit margin for the Groups on a worldwide basis.

Transaction Exposure

Transaction exposure relates to the actual impact on our operations resulting from fluctuations in currencies other than the local currency of an individual operation. In relation to the USD, this effect has also typically been negligible in that USD denominated sales are largely offset by production and worldwide procurement activities also denominated in USD, creating a so-called natural hedge. In addition to the natural hedge, we enter into foreign exchange contracts to cover at least 75% of total foreign currency exposure.

Foreign Currency Management

In addition to operating cash flows, financing of our U.S. activities typically occurs in Euros. The foreign currency exposure resulting from this financing is covered by forward exchange contracts and does not materially affect consolidated earnings. However, future cash flows vary (up to now, the effect has been positive due to the falling U.S. dollar) but may balance out over the longer term as they reflect currency exchange rate development.

Economic Risk

Competitors which operate primarily on a USD basis may use this currency-related advantage in establishing pricing levels in their markets. This risk cannot be managed through financial instruments and results in a vulnerability for certain of our divisions which currently do not have a completely diversified business structure.

Value added refers to all production activities and services, including selling and R&D activities. For the purposes of this analysis, these activities have a value measured by the cost of production or services in terms of wages, salaries, other costs and expenses.

1) *A change of 0.10 Cent in the USD exchange rate has a maximum effect on Group Profit margin of 0.5% points*

2) *Sales minus value added and purchased goods & services (the maximum difference amounted to 10%-points at ICN, A&D, PG and Med)*

0 *negligible*

slightly negative

+ *slightly positive*

~ *Sales equals value added and purchased goods & services (+/- equal value)*

< *Sales less than value added and purchased goods & services*

> *Sales greater than value added and purchased goods & services*

Terminology update

As a result of the implementation of the new rule *Conditions for Use of Non-GAAP Financial Measures* of the U.S. Securities and Exchange Commission (SEC), beginning in the second quarter Siemens changed the terminology and definition of certain terms used in its financial reporting especially relating to its Groups.

Summarized information specifying the changes is provided in the table below:

New terminology/definition

Group

Designates a reportable segment.

Group profit

Measure of individual segment profit or loss.

Definition remains unchanged: Earnings before financing interest, certain pension costs, income taxes and certain one-time items, which do not relate to the business performance of the Groups.

Other operations

New line item within the Segment information table which primarily refers to certain centrally-held equity investments (such as BSH Bosch und Siemens Hausgeräte) and other operating activities not associated with a Group.

Group profit from Operations

Total of the individual Groups profit including Other operations .

Definition changed. The former line item Corporate, eliminations is now separated into Other operations which is included in Group profit from Operations, and

Corporate items, pensions and eliminations which is included in Reconciliation to financial statements .

Corporate items, pensions and eliminations

New element of the line item Reconciliation to financial statements within the Segment information table.

Includes all other items of the former Corporate, eliminations which refer to centrally managed items unrelated to operating activities. These comprise, among others, corporate charges such as personnel cost, corporate projects, certain non-allocated pension costs and corporate-related derivative activities. Also included are certain centrally-held investments, primarily the equity investment in Infineon which is not considered under an operating perspective since Siemens intends to divest its

Previous terminology/definition

Segment/group

Previously both terms were used.

EBIT

No comparable previous line item. Other operations was part of the former line item Corporate, eliminations .

EBIT from Operations

No longer acceptable Non-GAAP Siemens measure under new SEC rules.

EBIT from Operations had been the total of the segments EBIT and Corporate, eliminations .

EBIT from Operations can be calculated as total of Group profit from Operations plus Corporate items, pensions and eliminations ⁽¹⁾.

No comparable previous line item. Corporate items, pensions and eliminations was part of the former line item Corporate, eliminations ⁽²⁾.
