PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

Note 1. Basis of Presentation

We prepared the condensed consolidated financial statements following the requirements of the Securities and Exchange Commission (SEC) for interim reporting. As permitted under those rules, certain footnotes or other financial information that are normally required by accounting principles generally accepted in the United States of America (U.S. GAAP) can be condensed or omitted. Balance sheet amounts and operating results for subsidiaries operating outside the U.S. are as of and for the three-month and nine-month periods ended August 28, 2011, and August 29, 2010. We have made certain reclassification adjustments to conform prior-period amounts to the current presentation, primarily related to discontinued operations (see Note 4. Discontinued Operations) and segment reporting (see Note 15. Segment, Product and Geographic Area Information).

On January 31, 2011, we completed the tender offer for all of the outstanding shares of common stock of King Pharmaceuticals, Inc. (King) and acquired approximately 92.5% of the outstanding shares for approximately \$3.3 billion in cash. On February 28, 2011, we acquired the remaining outstanding shares of King for approximately \$300 million in cash (for additional information, see Note 3. Acquisition of King Pharmaceuticals, Inc.). Commencing from January 31, 2011, our financial statements include the assets, liabilities, operating results and cash flows of King. Therefore, in accordance with our domestic and international reporting periods, our condensed consolidated financial statements for the nine months ended October 2, 2011 reflect approximately eight months of King's U.S. operations and approximately seven months of King's international operations.

Revenues, expenses, assets and liabilities can vary during each quarter of the year. Therefore, the results and trends in these interim financial statements may not be representative of those for the full year.

We are responsible for the unaudited financial statements included in this document. The financial statements include all normal and recurring adjustments that are considered necessary for the fair presentation of our financial position and operating results.

The information included in this Quarterly Report on Form 10-Q should be read in conjunction with the consolidated financial statements and accompanying notes included in our Annual Report on Form 10-K for the year ended December 31, 2010.

Note 2. Adoption of New Accounting Standards

The provisions of the following new accounting standards were adopted as of January 1, 2011 and did not have a significant impact on our condensed consolidated financial statements:

New guidelines that address the recognition and presentation of the annual fee paid by pharmaceutical companies beginning on January 1, 2011 to the U.S. Treasury as a result of U.S. Healthcare Legislation. As a result of adopting this new standard, we are recording the annual fee ratably throughout the year in the Selling, informational and administrative expenses line item in our condensed consolidated statement of income.

An amendment to the guidelines that address the accounting for multiple-deliverable arrangements to enable companies to account for certain products or services separately rather than as a combined unit.

Note 3. Acquisition of King Pharmaceuticals, Inc.

On January 31, 2011 (the acquisition date), we completed the tender offer for all of the outstanding shares of common stock of King at a purchase price of \$14.25 per share in cash and acquired approximately 92.5% of the outstanding shares. On February 28, 2011, we acquired all of the remaining shares of King for \$14.25 per share in cash. As a result, the total fair value of consideration transferred for King was approximately \$3.6 billion in cash (\$3.2 billion, net of cash acquired).

King's principal businesses consist of a prescription pharmaceutical business focused on delivering new formulations of pain treatments designed to discourage common methods of misuse and abuse; the Meridian auto-injector business for emergency drug delivery, which develops and manufactures the EpiPen; an established products portfolio; and an animal health business that offers a variety of feed-additive products for a wide range of species.

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

The following table summarizes the provisional amounts recognized for assets acquired and liabilities assumed as of the acquisition date:

(millions of dollars)	Amounts Recognized as of Acquisition Date (Provisional)
Working capital, excluding inventories	\$ 174
Inventories	340
Property, plant and equipment	412
Identifiable intangible assets, excluding in-process research and development	1,822
In-process research and development	312
Net tax accounts	(389)
All other long-term assets and liabilities, net	101
Total identifiable net assets	2,772
Goodwill	783
Net assets acquired/total consideration transferred	\$3,555

As of the acquisition date, the fair value of accounts receivable approximated the book value acquired. The gross contractual amount receivable was \$200 million, virtually all of which was expected to be collected.

Goodwill is calculated as the excess of the consideration transferred over the net assets recognized and represents the future economic benefits arising from other assets acquired that could not be individually identified and separately recognized. Specifically, the goodwill recorded as part of the acquisition of King includes the following:

the expected synergies and other benefits that we believe will result from combining the operations of King with the operations of Pfizer;

any intangible assets that do not qualify for separate recognition, as well as future, yet unidentified projects and products; and

the value of the going-concern element of King's existing businesses (the higher rate of return on the assembled collection of net assets versus if Pfizer had acquired all of the net assets separately).

Goodwill is not amortized and is not deductible for tax purposes. While the allocation of goodwill among reporting units is not complete, we expect that substantially all of the goodwill will be related to our biopharmaceutical reporting units (see Note 11. Goodwill and Other Intangible Assets for additional information).

The assets and liabilities arising from contingencies recognized at acquisition date, some of which are subject to change, are not significant to Pfizer's condensed consolidated financial statements.

The recorded amounts are provisional and subject to change. Specifically, the following items are subject to change:

Amounts for intangibles and inventory, pending finalization of valuation efforts;

Amounts for income tax assets, receivables and liabilities pending the filing of King's pre-acquisition tax returns and the receipt of information from taxing authorities, which may change certain estimates and assumptions used; and

The allocation of goodwill among reporting units.

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

Revenues from King are included in Pfizer's condensed consolidated statements of income from the acquisition date, January 31, 2011, through Pfizer's third-quarter 2011 domestic and international quarter-ends and were \$357 million for the third quarter of 2011 and \$938 million in the first nine months of 2011. We are no longer able to provide the results of operations attributable to King as those operations have now been substantially integrated into the larger Pfizer operation.

The following table presents supplemental pro forma information as if the acquisition of King had occurred on January 1, 2010:

	Pro Forma Consolidated Results		
	Three Months	Nine Months Ended	
	Ended Oct. 3, 2010	Oct. 2, 2011	Oct. 3, 2010
(millions of dollars, except per share data)			
Revenues	\$ 16,335	\$ 50,788	\$ 50,749
Net income attributable to Pfizer Inc. common shareholders	854	8,769	5,163
Diluted earnings per share attributable to Pfizer Inc. common shareholders	0.11	1.11	0.64

The unaudited pro forma consolidated results do not purport to project the future results of operations of the combined company nor do they reflect the expected realization of any cost savings associated with the acquisition. The unaudited pro forma consolidated results reflect the historical financial information of Pfizer and King, adjusted for the following pre-tax amounts:

Elimination of King's historical intangible asset amortization expense (approximately \$18 million in the third quarter of 2010, \$6 million in the first nine months of 2011 and \$98 million in the first nine months of 2010).

Additional amortization expense (approximately \$48 million in the third quarter of 2010, \$15 million in the first nine months of 2011 and \$136 million in the first nine months of 2010) related to the fair value of identifiable intangible assets acquired.

Additional depreciation expense (approximately \$9 million in the third quarter of 2010, \$3 million in the first nine months of 2011 and \$26 million in the first nine months of 2010) related to the fair value adjustment to property, plant and equipment acquired.

Adjustment related to the fair value adjustments to acquisition-date inventory estimated to have been sold (addition of \$33 million charge in the third quarter of 2010, elimination of \$146 million charge in the first nine months of 2011 and addition of \$146 million charge in the first nine months of 2010).

Adjustment for acquisition-related costs directly attributable to the acquisition (addition of \$11 million of charges in the third quarter of 2010, elimination of \$205 million of charges in the first nine months of 2011 and addition of \$205 million of charges in the first nine months of 2010, reflecting charges incurred by both King and Pfizer).

Note 4. Discontinued Operations

We evaluate our businesses and product lines periodically for their strategic fit within our operations. In 2011, we decided to sell our Capsugel business. In connection with the decision to sell this business, for all periods presented, the operating results associated with this business have been reclassified into Discontinued operations—net of tax in the Condensed Consolidated Statements of Income, and the assets and liabilities associated with this business have been reclassified into Assets of discontinued operations and other assets held for sale and Liabilities of discontinued operations, as appropriate, in the Condensed Consolidated Balance Sheets.

On April 4, 2011, we announced that we had entered into an agreement to sell Capsugel to an affiliate of Kohlberg Kravis Roberts & Co. L.P. for approximately \$2.4 billion in cash. The transaction closed on August 1, 2011.

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

The following amounts, substantially all of which relate to our Capsugel business, have been segregated from continuing operations and included in Discontinued operations—net of tax in our Condensed Consolidated Statements of Income:

	Three Months Ended		Nine Months Ended		
(millions of dollars)	Oct. 2, 2011	Oct. 3, 2010	Oct. 2, 2011	Oct. 3, 2010	
Revenues	\$116	\$176	\$507	\$545	
Pre-tax (loss)/income from discontinued operations	\$(7) \$29	\$78	\$106	
Provision for taxes on income(a)	6	3	39	30	
(Loss)/income from discontinued operations—net of tax	(13) 26	39	76	
Pre-tax gain/(loss) on sale of discontinued operations	1,695	(12) 1,683	(9)
Provision/(benefit) for taxes on income(b)	367	(1) 367	—	
Discontinued operations—net of tax	\$1,315	\$15	\$1,355	\$67	

(a) Includes a deferred tax expense of \$13 million for the first nine months of 2011.

(b) Includes a deferred tax expense of \$162 million for the third quarter and first nine months of 2011.

The following assets and liabilities, which in 2010 include the assets and liabilities related to our Capsugel business, have been segregated and included in Assets of discontinued operations and other assets held for sale and Liabilities of discontinued operations, as appropriate, in our Condensed Consolidated Balance Sheets:

(millions of dollars)	Oct. 2, 2011	Dec. 31, 2010
Accounts receivable	\$—	\$186
Inventories	—	130
Taxes and other current assets	12	47
Property, plant and equipment	110	1,009
Goodwill	—	19
Identifiable intangible assets	—	3
Taxes and other noncurrent assets	—	45
Assets of discontinued operations and other assets held for sale	\$122	\$1,439
Current liabilities	\$—	\$124
Other liabilities	—	27
Liabilities of discontinued operations	\$—	\$151

The net cash flows of our discontinued operations for each of the categories of operating, investing and financing activities were not significant for the first nine months of 2011 or 2010.

Note 5. Costs Associated with Cost-Reduction and Productivity Initiatives and Acquisition Activity

We incur significant costs in connection with acquiring businesses and restructuring and integrating acquired businesses and in connection with our global cost-reduction and productivity initiatives. For example:

for our cost-reduction and productivity initiatives, we typically incur costs and charges associated with site closings and other facility rationalization actions, workforce reductions and the expansion of shared services, including the development of global systems; and

for our acquisition activity, we typically incur costs that can include transaction costs, integration costs (such as expenditures for consulting and the integration of systems and processes) and restructuring charges, related to employees, assets and activities that will not continue in the combined company.

On February 1, 2011, we announced a new research and productivity initiative to accelerate our strategies to improve innovation and overall productivity in R&D by prioritizing areas with the greatest scientific and commercial promise, utilizing appropriate risk/return profiles and focusing on areas with the highest potential to deliver value in the near term and over time.

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

We incurred the following costs in connection with our cost-reduction and productivity initiatives and acquisition activity, such as King (acquired in 2011) and Wyeth (acquired in 2009):

(millions of dollars)	Three Months Ended		Nine Months Ended	
	Oct. 2, 2011	Oct. 3, 2010	Oct. 2, 2011	Oct. 3, 2010
Transaction costs(a)	\$5	\$—	\$28	\$13
Integration costs(b)	187	231	567	650
Restructuring charges(c):				
Employee termination costs	770	27	1,626	603
Asset impairments	99	174	157	677
Other	40	67	96	147
Restructuring charges and certain acquisition-related costs	1,101	499	2,474	2,090
Additional depreciation—asset restructuring(d):				
Cost of sales	68	241	411	367
Selling, informational and administrative expenses	39	27	69	190
Research and development expenses	146	25	378	45
Total additional depreciation—asset restructuring	253	293	858	602
Implementation costs(e):				
Selling, informational and administrative expenses	11	—	11	—
Research and development expenses	8	—	28	—
Total implementation costs	19	—	39	—
Total costs associated with cost-reduction and productivity initiatives and acquisition activity	\$1,373	\$792	\$3,371	\$2,692

(a) Transaction costs represent external costs directly related to acquired businesses and primarily include expenditures for banking, legal, accounting and other similar services.

(b) Integration costs represent external, incremental costs directly related to integrating acquired businesses and primarily include expenditures for consulting and the integration of systems and processes.

(c) From the beginning of our cost-reduction and transformation initiatives in 2005 through October 2, 2011, Employee termination costs represent the expected reduction of the workforce by approximately 57,800 employees, mainly in manufacturing and sales and research, of which approximately 41,000 employees have been terminated as of October 2, 2011. Employee termination costs are generally recorded when the actions are probable and estimable and include accrued severance benefits, pension and postretirement benefits, many of which may be paid out during periods after termination. Asset impairments primarily include charges to write down property, plant and equipment to fair value. Other primarily includes costs to exit certain assets and activities.

The restructuring charges in 2011 are associated with the following:

For the three months ended October 2, 2011, Primary Care operating segment (\$473 million), Specialty Care and Oncology operating segment (\$186 million), Established Products and Emerging Markets operating segment (\$65 million), Animal Health and Consumer Healthcare operating segment (\$30 million), Nutrition operating segment (\$2 million), research and development operations (\$47 million income), manufacturing operations (\$47 million) and Corporate (\$153 million).

For the nine months ended October 2, 2011, Primary Care operating segment (\$606 million), Specialty Care and Oncology operating segment (\$228 million), Established Products and Emerging Markets operating segment (\$80 million), Animal Health and Consumer Healthcare operating segment (\$44 million), Nutrition operating segment (\$4 million), research and development operations (\$426 million), manufacturing operations (\$203 million) and Corporate (\$288 million).

The restructuring charges in 2010 are associated with the following:

For the three months ended October 3, 2010, Primary Care operating segment (\$14 million), Specialty Care and Oncology operating segment (\$53 million), Established Products and Emerging Markets operating segment (\$14 million), Nutrition operating segment (\$1 million), research and development operations (\$17 million), manufacturing operations (\$161 million) and Corporate (\$8 million).

For the nine months ended October 3, 2010, Primary Care operating segment (\$1 million), Specialty Care and Oncology operating segment (\$99 million), Established Products and Emerging Markets operating segment (\$23 million), Animal Health and Consumer Healthcare operating segment (\$33 million), Nutrition operating segment (\$12 million income), research and development operations (\$239 million), manufacturing operations (\$970 million) and Corporate (\$74 million).

- (d) Additional depreciation—asset restructuring represents the impact of changes in the estimated useful lives of assets involved in restructuring actions.
- (e) Implementation costs represent external, incremental costs directly related to implementing our non-acquisition-related cost-reduction and productivity initiatives.

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

The components of restructuring charges associated with all of our cost-reduction and productivity initiatives and acquisition activity follow:

	Costs Incurred	Activity Through Oct. 2, 2011(a)	Accrual As of Oct. 2, 2011(b)
(millions of dollars)	2005-2011		
Employee termination costs	\$10,437	\$7,720	\$2,717
Asset impairments	2,465	2,465	—
Other	996	889	107
Total restructuring charges	\$13,898	\$11,074	\$2,824

(a) Includes adjustments for foreign currency translation.

(b) Included in Other current liabilities (\$1.7 billion) and Other noncurrent liabilities (\$1.1 billion).

Note 6. Other (Income)/Deductions—Net

The following table sets forth details related to amounts recorded in Other deductions—net:

	Three Months Ended		Nine Months Ended	
(millions of dollars)	Oct. 2, 2011	Oct. 3, 2010	Oct. 2, 2011	Oct. 3, 2010
Interest income(a)	\$ (110)	\$ (100)	\$ (332)	\$ (297)
Interest expense(a)	423	427	1,285	1,338
Net interest expense	313	327	953	1,041
Royalty-related income	(135)	(158)	(447)	(395)
Net losses/(gains) on asset disposals	18	(13)	(8)	(243)
Certain legal matters, net(b)	132	712	619	886
Certain asset impairment charges(c)	105	1,478	585	1,710
Other, net	105	3	76	37
Other deductions—net	\$538	\$2,349	\$1,778	\$3,036

(a) Interest income increased in both periods of 2011 primarily due to higher cash balances. Interest expense decreased in both periods of 2011 due to lower long- and short-term debt balances and the conversion of some fixed-rate liabilities to floating-rate liabilities.

(b) In the first nine months of 2011, primarily relates to charges for hormone-replacement therapy litigation (see Note 14. Legal Proceedings and Contingencies). In both periods of 2010, primarily includes a charge for asbestos litigation related to our wholly owned subsidiary, Quigley Company, Inc. (See Note 14. Legal Proceedings and Contingencies).

(c) Substantially all of these asset impairment charges are related to intangible assets, including in-process research and development (IPR&D) assets, that were acquired as part of our acquisition of Wyeth. The impairment charges are determined by comparing the estimated fair value of the assets as of the date of the impairment to their carrying values as of the same date. In the first nine months of 2011, we recorded impairment charges of \$585 million, which included approximately \$440 million of IPR&D assets, primarily related to two compounds for the treatment of certain autoimmune and inflammatory diseases, and approximately \$145 million of Developed Technology Rights. These impairment charges reflect, among other things, the impact of new scientific findings and updated commercial forecasts. In the first nine months of 2010, we recorded impairment charges of \$1.7 billion, which

include (i) approximately \$900 million of IPR&D assets, primarily Prevnar/Prevenar 13 Adult, a compound for the prevention of pneumococcal disease in adults age 50 and older, and Neratinib, a compound for the treatment of breast cancer; (ii) approximately \$600 million of indefinite-lived Brands, related to Third Age, infant formulas for the first 12-36 months of age, and Robitussin, a cough suppressant; and (iii) approximately \$200 million of Developed Technology Rights, primarily Protonix, a product that treats erosive gastroesophageal reflux disease. These impairment charges, most of which occurred in the third quarter of 2010, reflect, among other things, the following: for IPR&D assets, the impact of changes to the development programs, the projected development and regulatory timeframes and the risk associated with these assets; for Brand assets, the current competitive environment and planned investment support; and, for Developed Technology Rights, an increased competitive environment.

Note 7. Taxes on Income

A. Taxes on Income

Our effective tax rate for continuing operations was 33.7% for the third quarter of 2011, compared to 39.5% for the third quarter of 2010, and in the first nine months of 2011 was 30.8%, compared to 37.3% in the first nine months of 2010. The decreases in the effective tax rate were primarily the result of:

the extension of the U.S. research and development credit, which was signed into law on December 17, 2010;

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

the decrease and jurisdictional mix of certain impairment charges related to assets acquired in connection with the Wyeth acquisition; and

the change in the jurisdictional mix of earnings.

B. Tax Contingencies

We are subject to income tax in many jurisdictions, and a certain degree of estimation is required in recording the assets and liabilities related to income taxes. All of our tax positions are subject to audit by the local taxing authorities in each tax jurisdiction. These tax audits can involve complex issues, interpretations and judgments and the resolution of matters may span multiple years, particularly if subject to negotiation or litigation. As a result, our evaluation of tax contingencies can involve a series of complex judgments about future events and can rely heavily on estimates and assumptions deemed reasonable by management. However, if our estimates and assumptions are not representative of actual outcomes, our results could be materially impacted.

The United States (U.S.) is one of our major tax jurisdictions. The U.S. Internal Revenue Service (IRS) is currently auditing the 2006, 2007 and 2008 tax years for Pfizer Inc. The 2009 through 2011 tax years are not yet under audit. The tax years 2002 through 2005 are settled and closed with the IRS. All other tax years in the U.S. for Pfizer Inc. are closed under the statute of limitations.

With respect to Wyeth, during the first quarter of 2011, we reached a settlement with the IRS regarding the audits for the tax years 2002 through 2005. The settlement resulted in an income tax benefit to Pfizer of approximately \$80 million for income tax and interest in the first quarter and first nine months of 2011. The tax years 2002 through 2005 are now settled and closed with the IRS. Tax years 2006 through the Wyeth acquisition date (October 15, 2009) are now under audit.

In addition to the open audit years in the U.S., we have open audit years in other major tax jurisdictions, such as Canada (1998-2011), Japan (2006-2011), Europe (1997-2011, primarily reflecting Ireland, the United Kingdom, France, Italy, Spain and Germany) and Puerto Rico (2006-2011).

Note 8. Comprehensive Income/(Loss)

The components of comprehensive income/(loss) follow:

(millions of dollars)	Three Months Ended		Nine Months Ended	
	Oct. 2, 2011	Oct. 3, 2010	Oct. 2, 2011	Oct. 3, 2010

Note 9. Financial Instruments

A. Selected Financial Assets and Liabilities

Information about certain of our financial assets and liabilities follows:

(millions of dollars)	Oct. 2, 2011	Dec. 31, 2010
Selected financial assets measured at fair value on a recurring basis(a) :		
Trading securities	\$ 148	\$ 173
Available-for-sale debt securities(b)	31,368	32,699
Available-for-sale money market funds	1,320	1,217
Available-for-sale equity securities, excluding money market funds(b)	317	230
Derivative financial instruments in receivable positions(c):		
Interest rate swaps	963	603
Foreign currency swaps	133	128
Foreign currency forward-exchange contracts	123	494
Total	34,372	35,544
Other selected financial assets(d):		
Held-to-maturity debt securities, carried at amortized cost(b)	1,204	1,178
Private equity securities, carried at cost or equity method	1,016	1,134
Short-term loans, carried at cost	184	467
Long-term loans, carried at cost	383	299
Total	2,787	3,078
Total selected financial assets(e)	\$37,159	\$38,622
Selected financial liabilities measured at fair value on a recurring basis(a):		
Derivative financial instruments in a liability position(f):		
Foreign currency swaps	\$1,671	\$623
Foreign currency forward-exchange contracts	426	257
Interest rate swaps	15	4
Total	2,112	884
Other selected financial liabilities:		
Short-term borrowings, carried at historical proceeds, as adjusted(d)	5,637	5,603
Long-term debt, carried at historical proceeds, as adjusted(g), (h)	35,399	38,410
Total	41,036	44,013
Total selected financial liabilities	\$43,148	\$44,897

(a) Fair values are determined based on valuation techniques categorized as follows: Level 1 means the use of quoted prices for identical instruments in active markets; Level 2 means the use of quoted prices for similar instruments in active markets or quoted prices for identical or similar instruments in markets that are not active or are directly or indirectly observable; Level 3 means the use of unobservable inputs. All of our financial assets and liabilities measured at fair value on a recurring basis use Level 2 inputs in the calculation of fair value, except that included in available-for-sale equity securities, excluding money market funds, are \$84 million as of October 2, 2011 and \$105 million as of December 31, 2010 of investments that use Level 1 inputs in the calculation of fair value and \$26 million that use Level 3 inputs as of October 2, 2011.

(b) Gross unrealized gains and losses are not significant.

(c) Designated as hedging instruments, except for certain foreign currency contracts used as offsets; namely, foreign currency forward-exchange contracts with fair values of \$68 million and foreign currency swaps with fair values of

\$27 million at October 2, 2011; and foreign currency forward-exchange contracts with fair values of \$326 million and foreign currency swaps with fair values of \$17 million at December 31, 2010.

- (d) The differences between the estimated fair values and carrying values of our financial assets and liabilities not measured at fair value on a recurring basis were not significant at October 2, 2011 or December 31, 2010.
- (e) The decrease in selected financial assets is primarily due to redemptions of investments, the proceeds from which were used to fund our acquisition of King (see Note 3. Acquisition of King Pharmaceuticals, Inc.)
- (f) Designated as hedging instruments, except for certain foreign currency contracts used as offsets; namely, foreign currency forward-exchange contracts with fair values of \$113 million and foreign currency swaps with fair values of \$82 million at October 2, 2011; and foreign currency forward-exchange contracts with fair values of \$186 million and foreign currency swaps with fair values of \$93 million at December 31, 2010.
- (g) Includes foreign currency debt with fair values of \$919 million at October 2, 2011 and \$880 million at December 31, 2010, which are used to hedge the exposure of certain foreign currency denominated net investments.
- (h) The fair value of our long-term debt is \$40.1 billion at October 2, 2011 and \$42.3 billion at December 31, 2010.

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

These selected financial assets and liabilities are presented in the Condensed Consolidated Balance Sheets as follows:

(millions of dollars)	Oct. 2, 2011	Dec. 31, 2010
Assets		
Cash and cash equivalents	\$1,031	\$906
Short-term investments	25,257	26,277
Short-term loans	184	467
Long-term investments and loans	9,468	9,747
Taxes and other current assets(a)	232	515
Taxes and other noncurrent assets(b)	987	710
Total selected financial assets	\$37,159	\$38,622
Liabilities		
Short-term borrowings, including current portion of long-term debt	\$5,637	\$5,603
Other current liabilities(c)	701	339
Long-term debt	35,399	38,410
Other noncurrent liabilities(d)	1,411	545
Total selected financial liabilities	\$43,148	\$44,897

(a) At October 2, 2011, derivative instruments at fair value include foreign currency forward-exchange contracts (\$123 million), foreign currency swaps (\$88 million) and interest rate swaps (\$21 million) and at December 31, 2010, include foreign currency forward-exchange contracts (\$494 million) and foreign currency swaps (\$21 million).

(b) At October 2, 2011, derivative instruments at fair value include interest rate swaps (\$942 million) and foreign currency swaps (\$45 million) and at December 31, 2010, include interest rate swaps (\$603 million) and foreign currency swaps (\$107 million).

(c) At October 2, 2011, derivative instruments at fair value include foreign currency forward-exchange contracts (\$426 million) and foreign currency swaps (\$275 million) and at December 31, 2010, include foreign currency forward-exchange contracts (\$257 million), foreign currency swaps (\$79 million) and interest rate swaps (\$3 million).

(d) At October 2, 2011, derivative instruments at fair value include foreign currency swaps (\$1.4 billion) and interest rate swaps (\$15 million) and at December 31, 2010, include foreign currency swaps (\$544 million) and interest rate swaps (\$1 million).

There were no significant impairments of financial assets recognized in the third quarter and first nine months of 2011 or 2010.

B. Investments in Debt Securities

The contractual maturities of the available-for-sale and held-to-maturity debt securities at October 2, 2011, follow:

(millions of dollars)	Years			Total at Oct. 2, 2011
	Within 1	Over 1 to 5	Over 10	
Available-for-sale debt securities:				
Western European, U.S., Scandinavian and other government debt	\$ 15,215	\$ 1,361	\$ —	\$ 16,576
Corporate debt	1,675	2,495	—	4,170
	3,661	253	—	3,914

Western European, Scandinavian and other government agency debt				
Federal Home Loan Mortgage Corporation and Federal National Mortgage Association asset-backed securities	—	2,240	—	2,240
Supranational debt	2,338	514		2,852
Reverse repurchase agreements	783	—	—	783
U.S. government Federal Deposit Insurance Corporation guaranteed debt	623	13	16	652
Other asset-backed securities	2	74	10	86
Certificates of deposit	95	—	—	95
Held-to-maturity debt securities:				
Certificates of deposit and other	1,198	6	—	1,204
Total debt securities	\$ 25,590	\$ 6,956	\$ 26	\$ 32,572

C. Short-Term Borrowings

Short-term borrowings include amounts for commercial paper of \$600 million as of October 2, 2011 and \$1.2 billion as of December 31, 2010.

D. Derivative Financial Instruments and Hedging Activities

Foreign Exchange Risk—As of October 2, 2011, the aggregate notional amount of foreign exchange derivative financial instruments hedging or offsetting foreign currency exposures is \$51.4 billion. The derivative financial instruments primarily hedge or offset exposures in the euro, Japanese yen and U.K. pound.

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

Interest Rate Risk—As of October 2, 2011, the aggregate notional amount of interest rate derivative financial instruments is \$13.4 billion. The derivative financial instruments hedge U.S. dollar and euro fixed-rate debt.

Information about gains/(losses) incurred to hedge or offset foreign exchange or interest rate risk is as follows:

	Amount of Gains/(Losses) Recognized in OID(a)		Amount of Gains/(Losses) Recognized in OCI (Effective Portion)(a)		Amount of Gains/(Losses) Reclassified from OCI into OID (Effective Portion)(a)

(b)Also includes gains and losses attributable to the hedged risk in fair value hedge relationships.

(c)There was no significant ineffectiveness in the third quarter and first nine months of 2011 or 2010.

(d)Amounts presented represent the effective portion of the gain or loss. For derivative financial instruments in cash flow hedge relationships, the effective portion is included in Other comprehensive income/(loss)—Net unrealized (losses)/gains on derivative financial instruments. For derivative financial instruments in net investment hedge relationships and for foreign currency debt designated as hedging instruments, the effective portion is included in Other comprehensive income/(loss)—Currency translation adjustment and other.

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

For information about the fair value of our derivative financial instruments, and the impact on our Condensed Consolidated Balance Sheets, see Note 9A. Financial Instruments: Selected Financial Assets and Liabilities. Certain of our derivative instruments are covered by associated credit-support agreements that have credit-risk-related contingent features designed to reduce our counterparties' exposure to our risk of defaulting on amounts owed. The aggregate fair value of these derivative instruments that are in a liability position is \$667 million, for which we have posted collateral of \$662 million in the normal course of business. These features include the requirement to pay additional collateral in the event of a downgrade in our debt ratings. If there had been a downgrade to below an A rating by S&P or the equivalent rating by Moody's Investors Service, on October 2, 2011, we would have been required to post an additional \$22 million of collateral to our counterparties. The collateral advanced receivables are reported in Cash and cash equivalents.

E. Credit Risk

On an ongoing basis, we review the creditworthiness of counterparties to our foreign exchange and interest rate agreements and do not expect to incur a significant loss from failure of any counterparties to perform under the agreements. There are no significant concentrations of credit risk related to our financial instruments with any individual counterparty. As of October 2, 2011, we had \$3.3 billion due from a well-diversified, highly rated group (S&P ratings of primarily A+ or better) of bank counterparties around the world. See Note 9B. Financial Instruments: Investments in Debt Securities for a distribution of our investments.

In general, there is no requirement for collateral from customers. However, derivative financial instruments are executed under master netting agreements with financial institutions. These agreements contain provisions that provide for the ability for collateral payments, depending on levels of exposure, our credit rating and the credit rating of the counterparty. As of October 2, 2011, we received cash collateral of \$647 million against various counterparties. The collateral primarily supports the approximate fair value of our derivative contracts. The collateral received obligations are reported in Short-term borrowings, including current portion of long-term debt.

Note 10. Inventories

The components of inventories follow:

(millions of dollars)	Oct. 2, 2011	Dec. 31, 2010
Finished goods	\$3,975	\$3,665
Work-in-process	3,577	3,727
Raw materials and supplies	874	883
Total inventories(a)	\$8,426	\$8,275

(a) Certain amounts of inventories are in excess of one year's supply. There are no recoverability issues associated with these amounts.

Note 11. Goodwill and Other Intangible Assets

A. Goodwill

The changes in the carrying amount of goodwill for the nine months ended October 2, 2011, follow:

(millions of dollars)	Primary Care	Specialty Care and	Established Products	Animal Health and	Nutrition	To be allocated(a)	Total
-----------------------	-----------------	-----------------------	-------------------------	----------------------	-----------	-----------------------	-------

Edgar Filing: PFIZER INC - Form 10-Q

	Oncology	and Emerging Markets	Consumer Healthcare		
	\$				\$
Balance, December 31, 2010			\$ 2,449	\$ 496	\$ 40,983
Additions(b)			—	—	825
Other(c)			15	11	630
Balance, October 2, 2011	\$		\$ 2,464	\$ 507	\$ 42,438
					\$45,409

(a) The amount to be allocated includes the former Biopharmaceutical goodwill (see below), as well as newly acquired goodwill, substantially all from our acquisition of King, for which the allocation to reporting units is pending (see Note 3. Acquisition of King Pharmaceuticals, Inc. for additional information).

(b) Substantially all of the amount relates to our acquisition of King and is subject to change until we complete the recording of the assets acquired and liabilities assumed from King (see Note 3. Acquisition of King Pharmaceuticals, Inc.). The allocation of King goodwill among our reporting units has not yet been completed, but will be completed within one year of the acquisition date.

(c) Primarily reflects the impact of foreign exchange.

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

Our company was previously managed through two operating segments (Biopharmaceutical and Diversified), and is now managed through five operating segments (see Note 15. Segment, Product and Geographic Area Information for further information). As a result of this change, the goodwill previously associated with our Biopharmaceutical operating segment is required to be allocated among the Primary Care, Specialty Care and Oncology, and Established Products and Emerging Markets operating segments. The allocation of goodwill is a complex process that requires, among other things, that we determine the fair value of each reporting unit. Therefore, we have not yet completed the allocation, but we expect that it will be completed in the current year. While all reporting units can confront events and circumstances that can lead to impairments (such as, among other things, unanticipated competition, an adverse action or assessment by a regulator, a significant adverse change in legal matters or in the business climate and/or a failure to replace the contributions of products that lose exclusivity), in general, the increased number of Biopharmaceutical reporting units significantly increases our risk of goodwill impairment charges as smaller reporting units are inherently less able to absorb negative developments that might affect certain operating assets but not others.

B. Other Intangible Assets

The components of identifiable intangible assets follow:

(millions of dollars)	Oct. 2, 2011			December 31, 2010		
	Gross Carrying Amount	Accumulated Amortization	Identifiable Intangible Assets, less Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization	Identifiable Intangible Assets, less Accumulated Amortization

Trademarks	72	—	72	72	—	72
Total indefinite-lived intangible assets	13,695	—	13,695	13,729	—	13,729
Total identifiable intangible assets(a)	\$87,823	\$ (32,226)	\$ 55,597	\$84,957	\$ (27,402)	\$ 57,555

(a) The decrease is primarily related to amortization as well as impairment charges (see Note 6. Other (Income)/Deductions—Net), partially offset by the assets acquired as part of the acquisition of King (see Note 3. Acquisition of King Pharmaceuticals, Inc.) and the impact of foreign exchange.

At October 2, 2011, our identifiable intangible assets are associated with the following, as a percentage of identifiable intangible assets, less accumulated amortization:

Edgar Filing: PFIZER INC - Form 10-Q

Developed Technology Rights: Specialty Care (62%); Established Products (18%); Primary Care (16%); Animal Health (2%); Oncology (1%); and Nutrition (1%)

Finite-Lived Brands: Consumer Healthcare (57%); Established Products (29%); and Animal Health (14%)

Indefinite-Lived Brands: Consumer Healthcare (50%); Established Products (28%); and Nutrition (22%)

IPR&D: Specialty Care (75%); Worldwide Research and Development (13%); Primary Care (6%); Established Products (3%); Oncology (2%); and Animal Health (1%)

For IPR&D assets, the risk of failure is significant and there can be no certainty that these assets ultimately will yield a successful product. The nature of the biopharmaceutical business is high-risk and requires that we invest in a large number of projects in an effort to achieve a successful portfolio of approved products. As such, we expect that many of these IPR&D assets will become impaired and be written off at some time in the future.

On October 25, 2011, the European Commission approved the Company's pneumococcal conjugate vaccine, Prevenar 13 Adult, for active immunization for the prevention of vaccine-type invasive disease caused by *Streptococcus pneumoniae* in adults age 50 years and older. As a result of this fourth-quarter 2011 approval in a major market, as of the approval date, the associated asset, with a net book value of \$1.8 billion as of October 2, 2011, will be reclassified from IPR&D to Developed Technology Rights and will begin to be amortized.

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

Amortization expense related to acquired intangible assets that contribute to our ability to sell, manufacture, research, market and distribute products, compounds and intellectual property is included in Amortization of intangible assets as it benefits multiple business functions. Amortization expense related to acquired intangible assets that are associated with a single function is included in Cost of sales, Selling, informational and administrative expenses and Research and development expenses, as appropriate. Total amortization expense for finite-lived intangible assets was \$1.4 billion for the third quarter of 2011, \$1.2 billion for the third quarter of 2010, \$4.3 billion for the first nine months of 2011 and \$4.1 billion for the first nine months of 2010.

Note 12. Pension and Postretirement Benefit Plans

The components of net periodic benefit costs of the U.S. and international pension plans and the postretirement plans, which provide medical and life insurance benefits to retirees and their eligible dependents, follow:

(millions of dollars)	Pension Plans						Postretirement Plans(d)	
	U.S. Qualified(a)		U.S. Supplemental (Non-Qualified)(b)		International(c)			
	Oct. 2, 2011	Oct. 3, 2010	Oct. 2, 2011	Oct. 3, 2010	Oct. 2, 2011	Oct. 3, 2010	Oct. 2, 2011	Oct. 3, 2010
Three Months Ended:								
Service cost	\$87	\$83	\$9	\$7	\$63	\$55	\$17	\$18
Interest cost	181	183	17	19	115	103	49	52
Expected return on plan assets	(216)	(193)	—	—	(115)	(105)	(9)	(7)
Amortization of:								
Actuarial losses	33	38	9	7	23	17	4	7
Prior service (credits)/costs	(2)	—	(1)	(1)	(2)	(1)	(13)	(15)
Curtailments and settlements—net	20	(3)	3	8	3	—	(14)	(4)
Special termination benefits	7	7	5	3	1	1	1	1
Net periodic benefit costs	\$110	\$115	\$42	\$43	\$88	\$70	\$35	\$52
Nine Months Ended:								
Service cost	\$266	\$266	\$28	\$22	\$190	\$172	\$52	\$61
Interest cost	550	562	54	59	340	319	146	160
Expected return on plan assets	(657)	(595)	—	—	(336)	(324)	(26)	(23)
Amortization of:								
Actuarial losses	103	114	27	22	66	50	12	7
Prior service (credits)/costs	(6)	1	(2)	(2)	(4)	(3)	(40)	(24)
Curtailments and settlements—net	71	(72)	21	(1)	7	(5)	(40)	(6)
Special termination benefits	17	57	18	155	4	4	2	13
Net periodic benefit costs	\$344	\$333	\$146	\$255	\$267	\$213	\$106	\$188

(a) The increase in net periodic benefit costs in the first nine months of 2011, compared to the first nine months of 2010, for our U.S. qualified plans was primarily driven by higher settlement charges and lower curtailment gains associated with restructuring initiatives partially offset by higher expected return on plan assets and special termination benefits recognized in the prior-year period for certain executives as part of restructuring initiatives.

(b) The decrease in net periodic benefit costs in the first nine months of 2011, compared to the first nine months of 2010, for our U.S. supplemental (non-qualified) pension plans was primarily driven by special termination benefits recognized in the prior-year period for certain executives as part of restructuring initiatives.

(c)

The increase in net periodic benefit costs in the first nine months of 2011, compared to the first nine months of 2010, for our international pension plans was primarily driven by the decrease in the discount rate partially offset by higher expected return on plan assets.

- (d) The decrease in net periodic benefit costs in the first nine months of 2011, compared to the first nine months of 2010, for our postretirement plans was primarily driven by the harmonization of the postretirement plans and by higher curtailment gains and lower settlement charges associated with restructuring initiatives.

For the first nine months of 2011, we contributed from our general assets \$487 million to our U.S. qualified pension plans, \$314 million to our international pension plans, \$183 million to our postretirement plans and \$162 million to our U.S. supplemental (non-qualified) pension plans.

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

During 2011, we expect to contribute from our general assets a total of \$487 million to our U.S. qualified pension plans, \$483 million to our international pension plans, \$249 million to our postretirement plans and \$188 million to our U.S. supplemental (non-qualified) pension plans. Contributions expected to be made for 2011 are inclusive of amounts contributed during the first nine months of 2011. The international pension plan, postretirement plan and U.S. supplemental (non-qualified) pension plan contributions from our general assets include direct employer benefit payments.

Note 13. Earnings Per Share Attributable to Common Shareholders

Basic and diluted earnings per share (EPS) were computed using the following data:

(in millions)	Three Months Ended		Nine Months Ended	
	Oct. 2, 2011	Oct. 3, 2010	Oct. 2, 2011	Oct. 3, 2010
EPS Numerator—Basic:				
Income from continuing operations	\$2,434	\$856	\$7,246	\$5,324
Less: net income attributable to noncontrolling interests	11	5	31	24
Income from continuing operations attributable to Pfizer Inc.	2,423	851	7,215	5,300
Less: preferred stock dividends—net of tax	—	1	1	2
Income from continuing operations attributable to Pfizer Inc. common shareholders	2,423	850	7,214	5,298
Discontinued operations—net of tax	1,315	15	1,355	67
Net income attributable to Pfizer Inc. common shareholders	\$3,738	\$865	\$8,569	\$5,365
EPS Numerator—Diluted:				
Income from continuing operations attributable to Pfizer Inc. common shareholders and assumed conversions	\$2,423	\$851	\$7,215	\$5,300
Discontinued operations—net of tax	1,315	15	1,355	67
Net income attributable to Pfizer Inc. common shareholders and assumed conversions	\$3,738	\$866	\$8,570	\$5,367
EPS Denominator:				
Weighted-average number of common shares outstanding—Basic	7,770	8,027	7,877	8,045
Common-share equivalents: stock options, stock issuable under employee compensation plans and convertible preferred stock	40	30	48	34
Weighted-average number of common shares outstanding—Diluted	7,810	8,057	7,925	8,079

Stock options that had exercise prices greater than the average market price

of our common stock issuable under employee compensation plans(a)

(a) These common stock equivalents were outstanding during the three and nine months ended October 2, 2011 and October 3, 2010, but were not included in the computation of diluted EPS for those periods because their inclusion

would have had an anti-dilutive effect.

Note 14. Legal Proceedings and Contingencies

We and certain of our subsidiaries are subject to numerous contingencies arising in the ordinary course of business. For a discussion of our tax contingencies, see Notes to Condensed Consolidated Financial Statements – Note 7. Taxes on Income. Our non-tax contingencies include, among others, the following:

Patent litigation, which typically involves challenges to the coverage and/or validity of our patents on various products or processes. We are the plaintiff in the vast majority of these actions. An adverse outcome in actions in which we are the plaintiff could result in a loss of patent protection for the drug at issue, a significant loss of revenues from that drug and impairments of any associated assets.

Product liability and other product-related litigation, which can include personal injury, consumer, off-label promotion, securities-law and breach of contract claims, among others, often involves highly complex issues relating to medical causation, label warnings and reliance on those warnings, scientific evidence and findings, actual provable injury and other matters.

Commercial and other litigation, which can include merger-related and product pricing claims and environmental claims and proceedings, can involve complexities that will vary from matter to matter.

Government investigations, which often are related to the extensive regulation of pharmaceutical companies by national, state and local government agencies in the U.S. and in other countries.

Guarantees and indemnifications, which generally arise in connection with the sale of assets and businesses and typically pertain to environmental, tax, employee and/or product-related matters and patent-infringement claims.

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

Certain of these contingencies could result in losses, including damages, fines and/or civil penalties, and/or criminal charges, which could be substantial.

We believe that our claims and defenses in these matters are substantial, but litigation is inherently unpredictable and excessive verdicts do occur. We do not believe that any of these matters will have a material adverse effect on our financial position. However, we could incur judgments, enter into settlements or revise our expectations regarding the outcome of certain matters, and such developments could have a material adverse effect on our results of operations or cash flows in the period in which the applicable amounts are paid and/or accrued.

We have accrued for losses that are both probable and reasonably estimable. Substantially all of these contingencies are subject to significant uncertainties and, therefore, determining the likelihood of a loss and/or the measurement of any loss can be complex. Consequently, we are unable to estimate the range of reasonably possible loss in excess of amounts accrued. Our assessments are based on estimates and assumptions that have been deemed reasonable by management, but the assessment process relies heavily on estimates and assumptions that may prove to be incomplete or inaccurate, and unanticipated events and circumstances may occur that might cause us to change those estimates and assumptions.

The principal pending matters to which we are a party are discussed below. In determining whether a pending matter is a principal matter, we consider both quantitative and qualitative factors in order to assess materiality, such as, among other things, the amount of damages and the nature of any other relief sought in the proceeding, if such damages and other relief are specified; our view of the merits of the claims and of the strength of our defenses; whether the action purports to be a class action and our view of the likelihood that a class will be certified by the court; the jurisdiction in which the proceeding is pending; any experience that we or, to our knowledge, other companies have had in similar proceedings; whether disclosure of the action would be important to a reader of our financial statements, including whether disclosure might change a reader's judgment about our financial statements in light of all of the information about the Company that is available to the reader; the potential impact of the proceeding on our reputation; and the extent of public interest in the matter. In addition, with respect to patent matters, we consider, among other things, the financial significance of the product protected by the patent. As a result of considering qualitative factors in our determination of principal matters, there are some matters discussed below with respect to which management believes that the likelihood of possible loss in excess of amounts accrued is remote.

A. Patent Litigation

Like other pharmaceutical companies, we are involved in numerous suits relating to our patents, including but not limited to those discussed below. Most of the suits involve claims by generic drug manufacturers that patents covering our products, processes or dosage forms are invalid and/or do not cover the product of the generic manufacturer. Also, counterclaims as well as various independent actions have been filed claiming that our assertions of, or attempts to enforce, our patent rights with respect to certain products constitute unfair competition and/or violations of the antitrust laws. In addition to the challenges to the U.S. patents on a number of our products that are discussed below, we note that the patent rights to certain of our products, including without limitation Lipitor, are being challenged in various other countries.

Actions in Which We Are the Plaintiff and Certain Related Actions

Lipitor (atorvastatin)

In November 2008, Apotex Inc. notified us that it had filed an abbreviated new drug application with the FDA seeking approval to market a generic version of Lipitor. In December 2008, we filed patent-infringement suits against Apotex Inc. in the U.S. District Court for the District of Delaware and the U.S. District Court for the Northern District of Illinois. In August 2009, our action in the District of Delaware was transferred to the Northern District of Illinois and consolidated with our pending action there. Apotex Inc. asserts the invalidity of our patent covering the crystalline form of atorvastatin, which (including the pediatric exclusivity period) expires in 2017. We assert the infringement of our crystalline patent and are defending against the allegations of invalidity.

In October 2009, Dr. Reddy's Laboratories Ltd. and Dr. Reddy's Laboratories, Inc. (collectively, Dr. Reddy's) and KUDCO Ireland, Ltd. and Kremers Urban LLC (collectively, KUDCO) notified us that they had filed abbreviated new drug applications with the FDA seeking approval to market generic versions of Lipitor. Both of the abbreviated new drug applications cover the 10mg, 20mg and 40mg dosage strengths, and KUDCO's abbreviated new drug application also covers the 80mg dosage strength. Dr. Reddy's and KUDCO assert the invalidity and/or non-infringement of our patent covering the crystalline form of atorvastatin and two other Lipitor patents. In December 2009, we filed actions against Dr. Reddy's and KUDCO in the U.S. District Court for the District of Delaware asserting the infringement of our crystalline patent. In addition, in December 2010, we filed an action against Dr. Reddy's in the same court asserting the infringement of the same patent in connection with Dr. Reddy's additional abbreviated new drug application seeking approval to market a generic version of the 80mg dosage strength. In August 2011, we settled our patent-infringement actions against Dr. Reddy's on terms that are not material to Pfizer.

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

In July 2010, Actavis, Inc. and Actavis Pharma Manufacturing Pvt. Ltd. (collectively, Actavis) notified us that they had filed an abbreviated new drug application with the FDA seeking approval to market a generic version of Lipitor. Actavis asserts the non-infringement of our patent covering the crystalline form of atorvastatin and two other Lipitor patents. In August 2010, we filed an action against Actavis in the U.S. District Court for the District of Delaware asserting the infringement of our crystalline patent. In September 2011, this action was settled on terms that are not material to Pfizer.

In May 2011, Aurobindo Pharma Ltd. (Aurobindo) notified us that it had filed an abbreviated new drug application with the FDA seeking approval to market a generic version of Lipitor. Aurobindo asserts the non-infringement of our patent covering the crystalline form of atorvastatin as well as two formulation patents, all of which (including the six-month pediatric exclusivity period) expire in 2017. In June 2011, we filed an action against Aurobindo in the U.S. District Court for the District of Delaware asserting the validity and infringement of the challenged patents.

Our basic U.K. patent for Lipitor, including the supplementary protection certificate (SPC) and pediatric extension period, expires in May 2012. In the U.K., on June 20, 2011, certain wholesalers and certain of their pharmacy customers began selling generic atorvastatin that had been supplied to the wholesalers by Teva UK Limited (Teva UK). On the same day, we obtained a preliminary injunction from the High Court of Justice prohibiting Teva UK and the wholesalers from further sales of generic atorvastatin. On July 11, 2011, Teva UK and the wholesalers consented to the continuation of the preliminary injunction during the pendency of the case. On October 5, 2011, a consent judgment was filed with the court in which Teva UK and the other defendants admitted the validity and infringement of our basic U.K. patent and submitted to an injunction prohibiting the sale of Teva UK's generic atorvastatin product in the U.K. before our patent (including the SPC and pediatric extension period) expires in May 2012. Separately, in September 2011, Dr. Reddy's Laboratories (UK) Limited filed an action in the High Court of Justice seeking revocation of the six-month pediatric extension, which extended exclusivity for Lipitor in the U.K. from November 2011 to May 2012. We are defending this action, which is based upon the interpretation of the EU Pediatric Medicines Regulation.

Caduet (atorvastatin/amlodipine combination)

In August 2009, Sandoz Inc., a division of Novartis AG (Sandoz), notified us that it had filed an abbreviated new drug application with the FDA seeking approval to market a generic version of Caduet. In that filing and in a declaratory judgment action brought by Sandoz in October 2009 in the U.S. District Court for the District of Colorado, collectively, Sandoz asserts the invalidity of our patent covering the atorvastatin/amlodipine combination, which expires in 2018, and the invalidity and non-infringement of three patents for Lipitor which (including the six-month pediatric exclusivity period) expire between 2013 and 2017. In October 2009, we filed suit against Sandoz in the U.S. District Court for the District of Delaware and the U.S. District Court for the District of Colorado asserting the infringement of the atorvastatin/amlodipine combination patent. In February 2010, our action and Sandoz's action in the District of Colorado were transferred to the District of Delaware and consolidated with our pending action there.

Viagra (sildenafil)

In March 2010, we brought a patent-infringement action in the U.S. District Court for the Eastern District of Virginia against Teva Pharmaceuticals USA, Inc. (Teva USA) and Teva Pharmaceutical Industries Ltd. (Teva Pharmaceutical Industries), which had filed an abbreviated new drug application with the FDA seeking approval to market a generic version of Viagra. Teva USA and Teva Pharmaceutical Industries assert the invalidity and non-infringement of the Viagra use patent, which expires in 2019, but have not challenged the basic patent, which expires in 2012. In August 2011, the court ruled that our Viagra use patent is valid and infringed, thereby preventing Teva USA and Teva Pharmaceutical Industries from receiving approval for a generic version of Viagra before October 2019. In September

2011, Teva USA and Teva Pharmaceutical Industries appealed the decision to the U.S. Court of Appeals for the Federal Circuit.

In October 2010, we filed a patent-infringement action with respect to Viagra in the U.S. District Court for the Southern District of New York against Apotex Inc. and Apotex Corp., Mylan Pharmaceuticals Inc. and Mylan Inc., Actavis and Amneal Pharmaceuticals LLC. These generic manufacturers have filed abbreviated new drug applications with the FDA seeking approval to market their generic versions of Viagra. They assert the invalidity and non-infringement of the Viagra use patent, but have not challenged the basic patent.

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

In May and June 2011, respectively, Watson Laboratories Inc. (Watson) and Hetero Labs Limited (Hetero) notified us that they had filed abbreviated new drug applications with the FDA seeking approval to market their generic versions of Viagra. Each asserts the invalidity and non-infringement of the Viagra use patent. Neither has challenged the basic patent. In June and July 2011, respectively, we filed actions against Watson and Hetero in the U.S. District Court for the Southern District of New York asserting the validity and infringement of the use patent.

Sutent (sunitinib malate)

In May 2010, Mylan Pharmaceuticals Inc. notified us that it had filed an abbreviated new drug application with the FDA seeking approval to market a generic version of Sutent and challenging on various grounds the Sutent basic patent, which expires in 2021, and two other patents, which expire in 2020 and 2021. In June 2010, we filed suit against Mylan Pharmaceuticals Inc. in the U.S. District Court for the District of Delaware asserting the infringement of those three patents.

Detrol and Detrol LA (tolterodine)

In January 2008, Impax Laboratories, Inc. (Impax) notified us that it had filed an abbreviated new drug application with the FDA seeking approval to market a generic version of Detrol LA. Impax is challenging on various grounds the basic patent, which (including the six-month pediatric exclusivity period) expires in 2012, and three formulation patents, which (including the six-month pediatric exclusivity period) expire in 2020. We filed an action against Impax in the U.S. District Court for the Southern District of New York asserting the infringement of the basic patent and two of the formulation patents. This action subsequently was transferred to the U.S. District Court for the District of New Jersey.

In March 2008 and May 2010, respectively, Sandoz and Mylan Pharmaceuticals Inc. notified us that they had filed abbreviated new drug applications with the FDA seeking approval to market generic versions of Detrol LA. They assert the invalidity and/or non-infringement of three formulation patents for Detrol LA. They have not challenged the basic patent. In June 2010, we filed actions against Sandoz and Mylan Pharmaceuticals Inc. in the U.S. District Court for the District of New Jersey asserting the infringement of two of the formulation patents.

In April 2011, Impax notified us that it had filed an abbreviated new drug application with the FDA seeking approval to market a generic version of Detrol. Impax asserts the non-infringement of the basic patent, which (including the six-month pediatric exclusivity period) expires in 2012. In June 2011, we filed an action against Impax in the U.S. District Court for the District of New Jersey asserting infringement of the basic patent.

In June 2011, Torrent Pharmaceuticals Ltd. (Torrent) notified us that it had filed an abbreviated new drug application with the FDA seeking approval to market a generic version of Detrol LA. Torrent asserts the invalidity and non-infringement of three formulation patents. Torrent has not challenged the basic patent. In July 2011, we filed an action against Torrent in the U.S. District Court for the District of New Jersey asserting the validity and infringement of the challenged patents.

Lyrica (pregabalin)

Beginning in March 2009, several generic manufacturers notified us that they had filed abbreviated new drug applications with the FDA seeking approval to market generic versions of Lyrica capsules. Each of the generic manufacturers is challenging one or more of three patents for Lyrica: the basic patent, which expires in 2018, and two other patents, which expire in 2013 and 2018. Each of the generic manufacturers asserts the invalidity and/or the non-infringement of the patents subject to challenge. Beginning in April 2009, we filed actions against these generic manufacturers in the U.S. District Court for the District of Delaware asserting the infringement and validity of our

patents for Lyrica. All of these cases have been consolidated in the District of Delaware.

In August and November 2010, respectively, Lupin Limited (Lupin) and Novel Laboratories, Inc. (Novel) notified us that they had filed abbreviated new drug applications with the FDA seeking approval to market generic versions of Lyrica oral solution and asserting the invalidity and/or infringement of our three patents for Lyrica referred to above. In October 2010 and January 2011, respectively, we filed actions against Lupin and Novel in the U.S. District Court for the District of Delaware asserting the validity and infringement of all three patents.

Apotex Inc. notified us, in May and June 2011, respectively, that it had filed abbreviated new drug applications with the FDA seeking approval to market generic versions of Lyrica oral solution and Lyrica capsules. Apotex Inc. asserts the invalidity and non-infringement of the basic patent, as well as the seizure patent that expires in 2013. In July 2011, we filed an action against Apotex Inc. in the U.S. District Court for the District of Delaware asserting the validity and infringement of the challenged patents in connection with both of the abbreviated new drug applications.

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

We also have filed patent-infringement actions in Canada against certain generic manufacturers who are seeking approval to market generic versions of Lyrica capsules in that country.

Zyvox (linezolid)

In December 2009, Teva Parenteral Medicines Inc. (Teva Parenteral) notified us that it had filed an abbreviated new drug application with the FDA seeking approval to market a generic version of Zyvox. Teva Parenteral asserts the invalidity and non-infringement of the basic Zyvox patent, which (including the six-month pediatric exclusivity period) expires in 2015, and another patent that expires in 2021. In January 2010, we filed suit against Teva Parenteral in the U.S. District Court for the District of Delaware asserting the infringement of the basic patent.

Relpax (eletriptan)

In June 2010, we received notices from Apotex Inc. and Apotex Corp. and from Teva USA that they had filed abbreviated new drug applications with the FDA seeking approval to market generic versions of Relpax. They assert the non-infringement of our patent covering the crystalline form of eletriptan, which expires in 2017. They have not challenged the basic patent, which expires in 2016. In July 2010, we filed actions against Apotex Inc. and Apotex Corp. and against Teva USA in the U.S. District Court for the Southern District of New York asserting the infringement of the crystalline patent.

Protonix (pantoprazole sodium)

Wyeth has a license to market Protonix in the U.S. from Nycomed GmbH (Nycomed), which owns the patents relating to Protonix. The basic patent (including the six-month pediatric exclusivity period) for Protonix expired in January 2011.

Following their respective filings of abbreviated new drug applications with the FDA, Teva USA and Teva Pharmaceutical Industries, Sun Pharmaceutical Advanced Research Centre Ltd. and Sun Pharmaceutical Industries Ltd. (collectively, Sun) and KUDCO Ireland, Ltd. (KUDCO Ireland) received final FDA approval to market their generic versions of Protonix 20mg and 40mg delayed-release tablets. Wyeth and Nycomed filed actions against those generic manufacturers in the U.S. District Court for the District of New Jersey, which subsequently were consolidated into a single proceeding, alleging infringement of the basic patent and seeking declaratory and injunctive relief. Following the court's denial of a preliminary injunction sought by Wyeth and Nycomed, Teva USA and Teva Pharmaceutical Industries and Sun launched their generic versions of Protonix tablets at risk in December 2007 and January 2008, respectively. Wyeth launched its own generic version of Protonix tablets in January 2008, and Wyeth and Nycomed filed amended complaints in the pending patent-infringement action seeking compensation for damages resulting from Teva USA's, Teva Pharmaceutical Industries' and Sun's at-risk launches.

In April 2010, the jury in the pending patent-infringement action upheld the validity of the basic patent for Protonix. In July 2010, the court upheld the jury verdict, but it did not issue a judgment against Teva USA, Teva Pharmaceutical Industries or Sun because of their other claims relating to the patent that still are pending. Wyeth and Nycomed will continue to pursue all available legal remedies against those generic manufacturers, including compensation for damages resulting from their at-risk launches.

Separately, Wyeth and Nycomed are defendants in purported class actions brought by direct and indirect purchasers of Protonix in the U.S. District Court for the District of New Jersey. Plaintiffs seek damages, on behalf of the respective putative classes, for the alleged violation of antitrust laws in connection with the procurement and enforcement of the patents for Protonix. These purported class actions have been stayed pending resolution of the underlying patent litigation in the U.S. District Court for the District of New Jersey.

Rapamune (sirolimus)

In March 2010, Watson and Ranbaxy Laboratories Limited (Ranbaxy) notified us that they had filed abbreviated new drug applications with the FDA seeking approval to market generic versions of Rapamune. Watson and Ranbaxy assert the invalidity and non-infringement of a method-of-use patent which (including the six-month pediatric exclusivity period) expires in 2014 and a solid-dosage formulation patent which (including the six-month pediatric exclusivity period) expires in 2018. In April 2010, we filed actions against Watson and Ranbaxy in the U.S. District Court for the District of Delaware and against Watson in the U.S. District Court for the Southern District of Florida asserting the infringement of the method-of-use patent. In June 2010, our action in the Southern District of Florida was transferred to the District of Delaware and consolidated with our pending action there.

Tygacil (tigecycline)

In October 2009, Sandoz notified Wyeth that it had filed an abbreviated new drug application with the FDA seeking approval to market a generic version of Tygacil. Sandoz asserts the invalidity and non-infringement of two of Wyeth's patents relating to Tygacil, including the basic patent, which expires in 2016. In December 2009, Wyeth filed suit against Sandoz in the U.S. District Court for the District of Delaware asserting infringement of the basic patent.

Avinza (morphine sulfate)

King Pharmaceuticals, Inc. (King) and Elan Pharma International LTD (EPI) brought a patent-infringement action in the U.S. District Court for the District of New Jersey against Sandoz in July 2009 as the result of its abbreviated new drug application with the FDA seeking approval to a market generic version of Avinza. Sandoz is challenging a formulation patent for Avinza, which is owned by EPI that expires in 2017.

EpiPen

King brought patent-infringement actions against Sandoz in the U.S District Court for the District of New Jersey in July 2010 and against Teva Pharmaceutical Industries and Intelliject, Inc. (Intelliject) in the U.S. District Court for the District of Delaware in August 2009 and January 2011, respectively, as the result of their abbreviated new drug applications with the FDA seeking approval to market epinephrine injectable products. The two actions in Delaware subsequently were consolidated. Sandoz, Teva Pharmaceutical Industries and Intelliject are challenging two patents, which expire in 2025, covering the next-generation autoinjector for use with epinephrine that is sold under the EpiPen brand name.

Embeda (morphine sulfate/naltrexone hydrochloride extended-release capsules)

In August 2011, Watson Laboratories Inc. – Florida (Watson Florida) notified us that it had filed an abbreviated new drug application with the FDA seeking approval to market a generic version of Embeda extended-release capsules. Watson Florida asserts the invalidity and non-infringement of three formulation patents that expire in 2027. In October 2011, we filed an action against Watson Florida in the U.S. District Court for the District of Delaware asserting the infringement of, and defending against the allegations of the invalidity of, the three formulation patents.

Action in Which We Are the Defendant and a Related Action

ReFacto and Xyntha

In February 2008, Novartis Vaccines and Diagnostics, Inc. (Novartis) filed suit against Wyeth and a subsidiary of Wyeth in the U.S. District Court for the Eastern District of Texas alleging that Wyeth's ReFacto and Xyntha products infringe two Novartis patents. Novartis's complaint seeks damages, including treble damages, for alleged willful infringement. Wyeth and its subsidiary assert, among other things, the invalidity and non-infringement of the Novartis patents. In November 2009, Novartis added a third patent to its infringement claim against Wyeth and its subsidiary. In August 2010, Novartis granted Wyeth and its subsidiary a covenant not to sue on the third patent and withdrew that patent from its pending action.

In May 2008, a subsidiary of Wyeth filed suit in the U.S. District Court for the District of Delaware against Novartis seeking a declaration that the two Novartis patents initially asserted against Wyeth and its subsidiary in the action referred to in the preceding paragraph are invalid on the ground that the Wyeth subsidiary was the first to invent the subject matter. In February 2010, the District of Delaware declined to invalidate those two Novartis patents. In March 2010, the Wyeth subsidiary appealed the decision to the U.S. Court of Appeals for the Federal Circuit. In August 2011, the Federal Circuit affirmed the District Court's decision. In September 2011, the Wyeth subsidiary filed a petition for a rehearing with the Federal Circuit. The Federal Circuit's decision does not address the defenses that Wyeth and its subsidiary are asserting in the action referred to in the previous paragraph.

B. Product Litigation

Like other pharmaceutical companies, we are defendants in numerous cases, including but not limited to those discussed below, related to our pharmaceutical and other products. Plaintiffs in these cases seek damages and other

relief on various grounds for alleged personal injury and economic loss.

Asbestos

Quigley

Quigley Company, Inc. (Quigley), a wholly owned subsidiary, was acquired by Pfizer in 1968 and sold products containing small amounts of asbestos until the early 1970s. In September 2004, Pfizer and Quigley took steps that were intended to resolve all pending and future claims against Pfizer and Quigley in which the claimants allege personal injury from exposure to Quigley products containing asbestos, silica or mixed dust. We recorded a charge of \$369 million pre-tax (\$229 million after-tax) in the third quarter of 2004 in connection with these matters.

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

In September 2004, Quigley filed a petition in the U.S. Bankruptcy Court for the Southern District of New York seeking reorganization under Chapter 11 of the U.S. Bankruptcy Code. In March 2005, Quigley filed a reorganization plan in the Bankruptcy Court that needed the approval of 75% of the voting claimants as well as the Bankruptcy Court and the U.S. District Court for the Southern District of New York. In connection with that filing, Pfizer entered into settlement agreements with lawyers representing more than 80% of the individuals with claims related to Quigley products against Quigley and Pfizer. The agreements provide for a total of \$430 million in payments, of which \$215 million became due in December 2005 and has been and is being paid to claimants upon receipt by the Company of certain required documentation from each of the claimants. The reorganization plan provided for the establishment of a Trust (the Trust) for the evaluation and, as appropriate, payment of all unsettled pending claims as well as any future claims alleging injury from exposure to Quigley products.

In February 2008, the Bankruptcy Court authorized Quigley to solicit an amended reorganization plan for acceptance by claimants. According to the official report filed with the court by the balloting agent in July 2008, the requisite votes were cast in favor of the amended plan of reorganization.

The Bankruptcy Court held a confirmation hearing with respect to Quigley's amended plan of reorganization that concluded in December 2009. In September 2010, the Bankruptcy Court declined to confirm the amended reorganization plan. As a result of the foregoing, Pfizer recorded additional charges for this matter of approximately \$1.3 billion pre-tax (approximately \$800 million after-tax) in 2010. Further, in order to preserve its right to address certain legal issues raised in the court's opinion, in October 2010, Pfizer filed a notice of appeal and motion for leave to appeal the Bankruptcy Court's decision denying confirmation.

In March 2011, Pfizer entered into a settlement agreement with a committee (the Ad Hoc Committee) representing approximately 40,000 claimants in the Quigley bankruptcy proceeding (the Ad Hoc Committee claimants). Consistent with the additional charges recorded in 2010 referred to above, the principal provisions of the settlement agreement provide for a settlement payment in two installments and other consideration, as follows:

the payment to the Ad Hoc Committee, for the benefit of the Ad Hoc Committee claimants, of a first installment of \$500 million upon receipt by Pfizer of releases of asbestos-related claims against Pfizer Inc. from Ad Hoc Committee claimants holding \$500 million in the aggregate of claims (Pfizer began paying this first installment in June 2011);

the payment to the Ad Hoc Committee, for the benefit of the Ad Hoc Committee claimants, of a second installment of \$300 million upon Pfizer's receipt of releases of asbestos-related claims against Pfizer Inc. from Ad Hoc Committee claimants holding an additional \$300 million in the aggregate of claims following the earlier of the effective date of a revised plan of reorganization and April 6, 2013;

the payment of the Ad Hoc Committee's legal fees and expenses incurred in this matter up to a maximum of \$19 million (Pfizer began paying these legal fees and expenses in May 2011); and

the procurement by Pfizer of insurance for the benefit of certain Ad Hoc Committee claimants to the extent such claimants with non-malignant diseases have a future disease progression to a malignant disease (Pfizer procured this insurance in August 2011).

Following the execution of the settlement agreement with the Ad Hoc Committee, Quigley filed a revised plan of reorganization and accompanying disclosure statement with the Bankruptcy Court in April 2011. Under the revised

plan, and consistent with the additional charges recorded in 2010 referred to above, we expect to contribute an additional amount to the Trust, if and when the Bankruptcy Court confirms the plan, of cash and non-cash assets (including insurance proceeds) with a value in excess of \$550 million. The Bankruptcy Court must find that the revised plan meets the requisite standards of the U.S. Bankruptcy Code before it confirms the plan. We expect that, if approved by claimants, confirmed by the Bankruptcy Court and the District Court and upheld on any subsequent appeal, the revised reorganization plan will result in the District Court entering a permanent injunction directing pending claims as well as future claims alleging personal injury from exposure to Quigley products to the Trust. There is no assurance that the plan will be confirmed by the courts.

In a separately negotiated transaction with an insurance company in August 2004, we agreed to a settlement related to certain insurance coverage which provides for payments to an insurance proceeds trust established by Pfizer and Quigley over a ten-year period of amounts totaling \$405 million. Most of these insurance proceeds, as well as other payments from insurers that issued policies covering Pfizer and Quigley, would be paid, following confirmation, to the Trust for the benefit of present unsettled and future claimants with claims arising from exposure to Quigley products.

(UNAUDITED)

Other Matters

Between 1967 and 1982, Warner-Lambert owned American Optical Corporation, which manufactured and sold respiratory protective devices and asbestos safety clothing. In connection with the sale of American Optical in 1982, Warner-Lambert agreed to indemnify the purchaser for certain liabilities, including certain asbestos-related and other claims. As of September 30, 2011, approximately 68,000 claims naming American Optical and numerous other defendants were pending in various federal and state courts seeking damages for alleged personal injury from exposure to asbestos and other allegedly hazardous materials. Warner-Lambert is actively engaged in the defense of, and will continue to explore various means to resolve, these claims.

Warner-Lambert and American Optical brought suit in state court in New Jersey against the insurance carriers that provided coverage for the asbestos and other allegedly hazardous materials claims related to American Optical. A majority of the carriers subsequently agreed to pay for a portion of the costs of defending and resolving those claims. The litigation continues against the carriers who have disputed coverage or how costs should be allocated to their policies, and the court held that Warner-Lambert and American Optical are entitled to payment from each of those carriers of a proportionate share of the costs associated with those claims. Under New Jersey law, a special allocation master was appointed to implement certain aspects of the court's rulings.

Numerous lawsuits are pending against Pfizer in various federal and state courts seeking damages for alleged personal injury from exposure to products containing asbestos and other allegedly hazardous materials sold by Gibsonburg Lime Products Company (Gibsonburg). Gibsonburg was acquired by Pfizer in the 1960s and sold products containing small amounts of asbestos until the early 1970s.

There also is a small number of lawsuits pending in various federal and state courts seeking damages for alleged exposure to asbestos in facilities owned or formerly owned by Pfizer or its subsidiaries.

Celebrex and Bextra

Securities and ERISA Actions

Beginning in late 2004, actions, including purported class actions, were filed in various federal and state courts against Pfizer, Pharmacia Corporation (Pharmacia) and certain current and former officers, directors and employees of Pfizer and Pharmacia. These actions include (i) purported class actions alleging that Pfizer and certain current and former officers of Pfizer violated federal securities laws by misrepresenting the safety of Celebrex and Bextra, and (ii) purported class actions filed by persons who claim to be participants in the Pfizer or Pharmacia Savings Plan alleging that Pfizer and certain current and former officers, directors and employees of Pfizer or, where applicable, Pharmacia and certain former officers, directors and employees of Pharmacia, violated certain provisions of the Employee Retirement Income Security Act of 1974 (ERISA) by selecting and maintaining Pfizer stock or Pharmacia stock as an investment alternative when it allegedly no longer was a suitable or prudent investment option. In June 2005, the federal securities and ERISA actions were transferred for consolidated pre-trial proceedings to a Multi-District Litigation (In re Pfizer Inc. Securities, Derivative and "ERISA" Litigation MDL--1688) in the U.S. District Court for the Southern District of New York.

Securities Action in New Jersey

In 2003, several purported class action complaints were filed in the U.S. District Court for the District of New Jersey against Pharmacia, Pfizer and certain former officers of Pharmacia. The plaintiffs seek damages, alleging that the defendants violated federal securities laws by misrepresenting the data from a study concerning the gastrointestinal effects of Celebrex. These cases were consolidated for pre-trial proceedings in the District of New Jersey (Alaska Electrical Pension Fund et al. v. Pharmacia Corporation et al.). In January 2007, the court certified a class consisting of all persons who purchased Pharmacia securities from April 17, 2000 through February 6, 2001 and were damaged as a result of the decline in the price of Pharmacia's securities allegedly attributable to the misrepresentations.

In October 2007, the court granted defendants' motion for summary judgment and dismissed the plaintiffs' claims. In November 2007, the plaintiffs appealed the decision to the U.S. Court of Appeals for the Third Circuit. In January 2009, the Third Circuit vacated the District Court's grant of summary judgment in favor of defendants and remanded the case to the District Court for further proceedings. The Third Circuit also held that the District Court erred in determining that the class period ended on February 6, 2001, and directed that the class period end on August 5, 2001. In June 2009, the District Court stayed proceedings in the case pending a determination by the U.S. Supreme Court with regard to defendants' petition for certiorari seeking reversal of the Third Circuit's decision. In May 2010, the U.S. Supreme Court denied defendants' petition for certiorari, and the case was remanded to the District Court for further proceedings.

PFIZER INC. AND SUBSIDIARY COMPANIES

(UNAUDITED)

Other

Pfizer and several predecessor and affiliated companies, including Monsanto Company (Monsanto), are defendants in an action brought by Brigham Young University (BYU) and a BYU professor in the U.S. District Court for the District of Utah alleging, among other things, breach by Monsanto of a 1991 research agreement with BYU. Plaintiffs claim that research under that agreement led to the discovery of Celebrex and that, as a result, they are entitled to a share of the profits from Celebrex sales. Plaintiffs seek, among other things, compensatory and punitive damages.

Various Drugs: Off-Label Promotion Actions

Securities Action

In May 2010, a purported class action was filed in the U.S. District Court for the Southern District of New York against Pfizer and several of our current and former officers. The complaint alleges that the defendants violated federal securities laws by failing to disclose that Pfizer was engaged in off-label marketing of certain drugs. Plaintiffs seek damages in an unspecified amount.

Actions by Health Care Service Corporation

In June 2010, Health Care Service Corporation (HCSC), for itself and its affiliates, Blue Cross and Blue Shield plans in Illinois, New Mexico, Oklahoma and Texas, filed an action against us in the U.S. District Court for the Eastern District of Texas. In July 2010, HCSC amended its complaint. The complaint, as amended, alleges that we engaged in deceptive marketing activities, including off-label promotion, and the payment of improper remuneration to health care professionals with respect to Bextra and Celebrex in violation of, among other things, the federal Racketeer Influenced and Corrupt Organizations (RICO) Act and the Illinois Consumer Fraud Act. In December 2010, this action was transferred to a Multi-District Litigation (In re Celebrex and Bextra Marketing, Sales Practices and Product Liability Litigation MDL-1699) in the U.S. District Court for the Northern District of California. In July 2010, HCSC also filed a separate lawsuit against us in the U.S. District Court for the Eastern District of Texas including substantially similar allegations regarding Geodon, Lyrica and Zyvox. In this latter action, in October 2011, HCSC filed an amended complaint that is substantially similar to the original complaint except that it no longer includes allegations regarding Lyrica or claims under the Illinois Consumer Fraud Act. In both actions, HCSC seeks to recover the amounts that it paid for the specified drugs on behalf of its members in Illinois, New Mexico, Oklahoma, and Texas, as well as treble damages and punitive damages.

Hormone-Replacement Therapy

Pfizer and certain wholly owned subsidiaries and limited liability companies, including Wyeth and King, along with several other pharmaceutical manufacturers, have been named as defendants in approximately 10,000 actions in various federal and state courts alleging personal injury or economic loss related the use or purchase of certain estrogen and progestin medications prescribed for women to treat the symptoms of menopause. Although new actions are occasionally filed, the number of new actions was not significant in the third quarter of 2011, and we do not expect a substantial change in the rate of new actions being filed. Plaintiffs in these suits allege a variety of personal injuries, including breast cancer, ovarian cancer, stroke and heart disease. Certain co-defendants in some of these actions have asserted indemnification rights against Pfizer and its affiliated companies. The cases against Pfizer and its affiliated companies involve one or more of the following products, all of which remain approved by the FDA: femhrt (which Pfizer divested in 2003); Activella and Vagifem (which are Novo Nordisk products that were marketed by a Pfizer affiliate from 2000 to 2004); Premarin, Prempro, Aygestin, Cycrin and Premphase (which are legacy Wyeth

products); and Provera, Ogen, Depo-Estradiol, Estring and generic MPA (which are legacy Pharmacia & Upjohn products). The federal cases have been transferred for consolidated pre-trial proceedings to a Multi--District Litigation (In re Prempro Products Liability Litigation MDL-1507) in the U.S. District Court for the Eastern District of Arkansas. Certain of the federal cases have been remanded to their respective District Courts for further proceedings including, if necessary, trial.

This litigation consists of individual actions, a few purported statewide class actions and a purported provincewide class action in Quebec, Canada, a statewide class action in California and a nationwide class action in Canada. In March 2011, in an action against Wyeth seeking the refund of the purchase price paid for Wyeth's hormone-replacement therapy products by individuals in the State of California during the period from January 1995 to January 2003, the U.S. District Court for the Southern District of California certified a class consisting of all individual purchasers of such products in California who actually heard or read Wyeth's alleged misrepresentations regarding such products. This is the only hormone-replacement therapy action to date against Pfizer and its affiliated companies in the U.S. in which a class has been certified. In addition, in August 2011, in an action against Wyeth seeking damages for personal injury, the Supreme Court of British Columbia certified a class consisting of all women who were prescribed Premplus and/or Premarin in combination with progestin in Canada between January 1, 1997 and December 1, 2003 and who thereafter were diagnosed with breast cancer.

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

Pfizer and its affiliated companies have prevailed in many of the hormone-replacement therapy actions that have been resolved to date, whether by voluntary dismissal by the plaintiffs, summary judgment, defense verdict or judgment notwithstanding the verdict; a number of these cases have been appealed by the plaintiffs. Certain other hormone-replacement therapy actions have resulted in verdicts for the plaintiffs and have included the award of compensatory and, in some instances, punitive damages; each of these cases has been appealed by Pfizer and/or its affiliated companies. The decisions in a few of the cases that had been appealed by Pfizer and/or its affiliated companies or by the plaintiffs have been upheld by the appellate courts, while several other cases that had been appealed by Pfizer and/or its affiliated companies or by the plaintiffs have been remanded by the appellate courts to their respective trial courts for further proceedings. Trials of additional hormone-replacement therapy actions are underway or scheduled for 2011.

As of October 2, 2011, Pfizer and its affiliated companies had settled, or entered into definitive agreements or agreements-in-principle to settle, approximately 46% of the hormone-replacement therapy actions pending against us and our affiliated companies. We have recorded aggregate charges with respect to those actions, as well as with respect to the actions that have resulted in verdicts against us or our affiliated companies, of \$280 million in the first nine months of 2011 and \$300 million in prior years. In addition, we have recorded a charge of \$260 million in the first nine months of 2011 that provides for the minimum expected costs to resolve all remaining hormone-replacement therapy actions against Pfizer and its affiliated companies, consistent with our current ability to quantify such future costs. The \$260 million charge is an estimate and, while we cannot reasonably estimate the range of reasonably possible loss in excess of the amount accrued for these contingencies given the uncertainties inherent in this product liability litigation, as described below, additional charges may be required in the future.

Most of the unresolved actions against Pfizer and/or its affiliated companies have been outstanding for more than five years and could take many more years to resolve. However, opportunistic settlements could occur at any time. The litigation process is time-consuming, as every hormone-replacement action being litigated involves contested issues of medical causation and knowledge of risk. Even though the vast majority of hormone-replacement therapy actions concern breast cancer, the underlying facts (e.g., medical causation, family history, reliance on warnings, physician/patient interaction, analysis of labels, actual provable injury and other critical factors) can differ significantly from action to action, and the process of discovery has not yet begun for a majority of the unresolved actions. Our ability to estimate the range of possible loss in excess of amounts accrued is complicated by these factors.

In addition, the hormone-replacement therapy litigation involves fundamental issues of science and medicine that often are uncertain and continue to evolve. Key scientific court rulings may have a significant impact on the litigation as a whole. An integral part of the litigation process involves understanding the evolving science as well as seeking key scientific rulings. Equally important, the discovery process is lengthy and complex and has not yet begun for a majority of the unresolved actions. Therefore, we may not have sufficient information to determine the percentage of unresolved actions that could be impacted by scientific developments and/or key scientific rulings. Our ability to estimate the range of possible loss in excess of amounts accrued is complicated by these fundamental issues of science and medicine, because we do not know how the science may evolve, how the courts will rule on key motions or which unresolved actions will be impacted by these scientific matters.

Accordingly, we cannot reasonably estimate the range of possible loss in excess of amounts accrued for these contingencies.

Government Inquiries; Action by State of Nevada

Pfizer and/or its affiliated companies also have received inquiries from various federal and state agencies and officials relating to the marketing of their hormone-replacement products. In November 2008, the State of Nevada filed an action against Pfizer, Pharmacia & Upjohn Company and Wyeth in state court in Nevada alleging that they had engaged in deceptive marketing of their respective hormone-replacement therapy medications in Nevada in violation of the Nevada Deceptive Trade Practices Act. The action seeks monetary relief, including civil penalties and treble damages. In February 2010, the action was dismissed by the court on the grounds that the statute of limitations had expired. In July 2011, the Nevada Supreme Court reversed the dismissal and remanded the case to the district court for further proceedings.

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

Zoloft and Effexor

A number of individual lawsuits, as well as a multi-plaintiff lawsuit with respect to Effexor, have been filed against us and/or our subsidiaries in various federal and state courts alleging personal injury as a result of the purported ingesting of Zoloft or Effexor.

Neurontin

A number of lawsuits, including purported class actions, have been filed against us in various federal and state courts alleging claims arising from the promotion and sale of Neurontin. The plaintiffs in the purported class actions seek to represent nationwide and certain statewide classes consisting of persons, including individuals, health insurers, employee benefit plans and other third-party payers, who purchased or reimbursed patients for the purchase of Neurontin that allegedly was used for indications other than those included in the product labeling approved by the FDA. In 2004, many of the suits pending in federal courts, including individual actions as well as purported class actions, were transferred for consolidated pre-trial proceedings to a Multi-District Litigation (In re Neurontin Marketing, Sales Practices and Product Liability Litigation MDL-1629) in the U.S. District Court for the District of Massachusetts.

In the Multi-District Litigation, in 2009, the court denied the plaintiffs' renewed motion for certification of a nationwide class of all consumers and third-party payers who allegedly purchased or reimbursed patients for the purchase of Neurontin for off-label uses from 1994 through 2004. In May 2011, the court denied a motion to reconsider its class certification ruling.

In 2010, the Multi-District Litigation court partially granted the Company's motion for summary judgment, dismissing the claims of all of the proposed class representatives for third-party payers and four of the six proposed class representatives for individual consumers. In June 2011, the plaintiffs whose claims were dismissed appealed both the dismissal and the denial of class certification to the U.S. Court of Appeals for the First Circuit.

Also in the Multi-District Litigation, in February 2011, a third-party payer who was not included in the proposed class action appealed a dismissal order to the U.S. Court of Appeals for the First Circuit.

Plaintiffs are seeking certification of statewide classes of Neurontin purchasers in actions pending in California, Illinois and Oklahoma. State courts in New York, Pennsylvania, Missouri and New Mexico have declined to certify statewide classes of Neurontin purchasers.

In January 2011, the U.S. District Court for the District of Massachusetts entered an order trebling a jury verdict against us in an action by a third-party payer seeking damages for the alleged off-label promotion of Neurontin in violation of the federal Racketeer Influenced and Corrupt Organizations (RICO) Act. The verdict was for \$47.4 million, which was subject to automatic trebling to \$142.1 million under the RICO Act. In November 2010, the court had entered a separate verdict against us in the amount of \$65.4 million, together with prejudgment interest, under California's Unfair Trade Practices law relating to the same alleged conduct, which amount is included within and is not additional to the \$142.1 million trebled amount of the jury verdict. In August 2011, we appealed the District Court's judgment to the U.S. Court of Appeals for the First Circuit.

A number of individual lawsuits have been filed against us in various U.S. federal and state courts and in certain other countries alleging suicide, attempted suicide and other personal injuries as a result of the purported ingesting of Neurontin. Certain of the U.S. federal actions have been transferred for consolidated pre-trial proceedings to the same Multi--District Litigation referred to in the first paragraph of this section.

In addition, purported class actions have been filed against us in various Canadian provincial courts alleging claims arising from the promotion, sale and labeling of Neurontin and generic gabapentin. In February 2010, in a proceeding pending in Ontario, Canada, the court certified a class consisting of all persons in Canada, except in Quebec, who purchased and ingested Neurontin prior to August 2004. The plaintiffs claim that Pfizer failed to provide adequate warning of the alleged risks of personal injury associated with Neurontin. Two purported provincewide class actions pending in Quebec that include substantially similar allegations will be included in that national class action by agreement of the parties and order of the Quebec court, subject to approval by the Ontario court.

In January 2011, in a Multi-District Litigation (In re Neurontin Antitrust Litigation MDL-1479) that consolidates four actions, the U.S. District Court for the District of New Jersey certified a nationwide class consisting of wholesalers and other entities who purchased Neurontin directly from Pfizer and Warner-Lambert during the period from December 11, 2002 to August 31, 2008 and who also purchased generic gabapentin after it became available. The complaints allege that Pfizer and Warner-Lambert engaged in anticompetitive conduct in violation of the Sherman Act that included, among other things, submitting patents for listing in the Orange Book and prosecuting and enforcing certain patents relating to Neurontin, as well as engaging in off-label marketing of Neurontin. Plaintiffs seek compensatory damages, which may be subject to trebling.

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

Lipitor

In 2004, a former employee filed a “whistleblower” action against us in the U.S. District Court for the Eastern District of New York. The complaint remained under seal until September 2007, at which time the U.S. Attorney for the Eastern District of New York declined to intervene in the case. We were served with the complaint in December 2007. Plaintiff alleges that, through patient and medical education programs, written materials and other actions aimed at doctors, consumers, payers and investors, the Company promoted Lipitor for use by certain patients contrary to national cholesterol guidelines that plaintiff claims are a part of the labeled indications for the product. Plaintiff alleges violations of the Federal Civil False Claims Act and the false claims acts of certain states and seeks treble damages and civil penalties on behalf of the federal government and the specified states as the result their purchase, or reimbursement of patients for the purchase, of Lipitor allegedly for such off-label uses. Plaintiff also seeks compensation as a whistleblower under those federal and state statutes. In addition, plaintiff alleges that he was wrongfully terminated, in violation of the anti-retaliation provisions of the Federal Civil False Claims Act, the Civil Rights Act of 1964 and applicable New York law, for raising concerns about the alleged off-label promotion of Lipitor and about alleged instances of sexual harassment in the workplace, and he seeks damages and the reinstatement of his employment. In 2009, the court dismissed without prejudice the claims alleging violations of the Federal Civil False Claims Act and the false claims acts of certain states. In 2010, plaintiff filed an amended complaint containing allegations concerning violations of the Federal Civil False Claims Act and the false claims acts of certain states that are substantially similar to the allegations in the original complaint.

On November 8, 2011, 11 California pharmacies filed suit in the U.S. District Court for the Northern District of California against Pfizer and Ranbaxy Laboratories Ltd. Plaintiffs allege antitrust violations in connection with the 2008 agreement pursuant to which Pfizer and Ranbaxy settled certain patent litigation involving Lipitor and Pfizer granted Ranbaxy a license to sell a generic version of Lipitor in various markets beginning on varying dates. The plaintiffs allege that the settlement agreement constituted a conspiracy to delay the launch of generic Lipitor in the U.S. The suit seeks to recover damages for alleged price overcharges for Lipitor from March 24, 2010 to the present that plaintiffs claim were attributable to the delay in the launch of generic Lipitor in the U.S. Plaintiffs also seek injunctive relief, invalidating the settlement agreement and Pfizer’s remaining Lipitor patents, as well as treble damages.

On November 9, 2011, a purported class action was filed in the U.S. District Court for the Eastern District of Pennsylvania against Pfizer and certain affiliates of Pfizer, including Warner-Lambert Company. The plaintiffs seek to represent a class consisting of all persons in the U.S. who purchased and/or paid for Lipitor directly from any of the defendants between March 25, 2010 and the present. The plaintiffs allege fraud in connection with Warner-Lambert Company’s application to the U.S. Patent and Trademark Office for the enantiomer patent for Lipitor, which (including the six-month pediatric exclusivity period) expired in June 2011, as well as antitrust violations in connection with the enforcement of that patent. The suit seeks to recover treble damages on behalf of the putative class for alleged price overcharges for Lipitor in the U.S. from March 25, 2010 to the present that plaintiffs claim resulted from the delay in the launch of generic Lipitor in the U.S. attributable to the enantiomer patent.

Chantix/Champix

A number of individual lawsuits have been filed against us in various federal and state courts alleging suicide, attempted suicide and other personal injuries as a result of the purported ingesting of Chantix, as well as economic loss. Plaintiffs in these actions seek compensatory and punitive damages and the disgorgement of profits resulting from the sale of Chantix. In October 2009, the federal cases were transferred for consolidated pre-trial proceedings to a Multi-District Litigation (In re Chantix (Varenicline) Products Liability Litigation MDL-2092) in the U.S. District Court for the Northern District of Alabama.

Beginning in December 2008, purported class actions were filed against us in the Ontario Superior Court of Justice (Toronto Region), the Superior Court of Quebec (District of Montreal), the Court of Queen's Bench of Alberta, Judicial District of Calgary, and the Superior Court of British Columbia (Vancouver Registry) on behalf of all individuals and third-party payers in Canada who have purchased and ingested Champix or reimbursed patients for the purchase of Champix. Each of these actions asserts claims under Canadian product liability law, including with respect to the safety and efficacy of Champix, and, on behalf of the putative class, seeks monetary relief, including punitive damages. The actions in Quebec, Alberta and British Columbia have been stayed pending the decision regarding class certification in the Ontario action.

Bapineuzumab

In June 2010, a purported class action was filed in the U.S. District Court for the District of New Jersey against Pfizer, as successor to Wyeth, and several former officers of Wyeth. The complaint alleges that Wyeth and the individual defendants violated federal securities laws by making or causing Wyeth to make false and misleading statements, and by failing to disclose or causing Wyeth to fail to disclose material information, concerning the results of a clinical trial involving bapineuzumab, a product in development for the treatment of Alzheimer's disease. The plaintiff seeks to represent a class consisting of all persons who purchased Wyeth securities from May 21, 2007 through July 2008 and seeks damages in an unspecified amount on behalf of the purported class.

In July 2010, a related action was filed in the U.S. District Court for the Southern District of New York against Elan Corporation (Elan), certain directors and officers of Elan, and Pfizer, as successor to Wyeth. Elan participated in the development of bapineuzumab until September 2009. The complaint alleges that Elan, Wyeth and the individual defendants violated federal securities laws by making or causing Elan to make false and misleading statements, and by failing to disclose or causing Elan to fail to disclose material information, concerning the results of a clinical trial involving bapineuzumab. The plaintiff seeks to represent a class consisting of all persons who purchased Elan call options from June 17, 2008 through July 29, 2008 and seeks damages in an unspecified amount on behalf of the purported class. In June 2011, the court granted Pfizer's and Elan's motions to dismiss the complaint. In July 2011, the plaintiff filed a supplemental memorandum setting forth the bases that the plaintiff believed supported amendment of the complaint. In August 2011, the court dismissed the complaint with prejudice. In September 2011, the plaintiff appealed the District Court's decision to the U.S. Court of Appeals for the Second Circuit.

(UNAUDITED)

Thimerosal

Wyeth is a defendant in a number of suits by or on behalf of vaccine recipients alleging that exposure through vaccines to cumulative doses of thimerosal, a preservative used in certain childhood vaccines formerly manufactured and distributed by Wyeth and other vaccine manufacturers, caused severe neurological damage and/or autism in children. While several suits were filed as purported nationwide or statewide class actions, all of the purported class actions have been dismissed, either by the courts or voluntarily by the plaintiffs. In addition to the suits alleging injury from exposure to thimerosal, certain of the cases were brought by parents in their individual capacities for, among other things, loss of services and loss of consortium of the injured child.

The National Childhood Vaccine Injury Act (the Vaccine Act) requires that persons alleging injury from childhood vaccines first file a petition in the U.S. Court of Federal Claims asserting a vaccine-related injury. At the conclusion of that proceeding, petitioners may bring a lawsuit against the manufacturer in federal or state court, provided that they have satisfied certain procedural requirements. Also under the terms of the Vaccine Act, if a petition has not been adjudicated by the U.S. Court of Federal Claims within a specified time period after filing, the petitioner may opt out of the proceeding and pursue a lawsuit against the manufacturer by following certain procedures. Some of the vaccine recipients who have sued Wyeth to date may not have satisfied the conditions to filing a lawsuit that are mandated by the Vaccine Act. The claims brought by parents for, among other things, loss of services and loss of consortium of the injured child are not covered by the Vaccine Act.

In 2002, the Office of Special Masters of the U.S. Court of Federal Claims established an Omnibus Autism Proceeding with jurisdiction over petitions in which vaccine recipients claim to suffer from autism or autism spectrum disorder as a result of receiving thimerosal-containing childhood vaccines and/or the measles, mumps and rubella (MMR) vaccine. There currently are several thousand petitions pending in the Omnibus Autism Proceeding. Special masters of the court have heard six test cases on petitioners' theories that either thimerosal-containing vaccines in combination with the MMR vaccine or thimerosal-containing vaccines alone can cause autism or autism spectrum disorder.

In February 2009, special masters of the U.S. Court of Federal Claims rejected the three cases brought on the theory that a combination of MMR and thimerosal-containing vaccines caused petitioners' conditions. After these rulings were affirmed by the U.S. Court of Federal Claims, two of them were appealed by petitioners to the U.S. Court of Appeals for the Federal Circuit. In 2010, the Federal Circuit affirmed the decisions of the special masters in both of these cases.

In March 2010, special masters of the U.S. Court of Federal Claims rejected the three additional test cases brought on the theory that thimerosal-containing vaccines alone caused petitioners' conditions. Petitioners did not seek review by the U.S. Court of Federal Claims of the decisions of the special masters in these latter three test cases, and judgments were entered dismissing the cases in April 2010.

Petitioners in each of the six test cases have filed an election to bring a civil action.

Pristiq

In late 2007 and early 2008, the following actions were filed in various federal courts: (i) a purported class action alleging that Wyeth and certain former officers of Wyeth violated federal securities laws by misrepresenting the safety of Pristiq during the period before the FDA's issuance in July 2007 of an "approvable letter" for Pristiq for the treatment of vasomotor symptoms, which allegedly caused a decline in the price of Wyeth stock; (ii) a shareholder derivative action alleging that certain former officers of Wyeth and certain former directors of Wyeth, two of whom are now

directors of Pfizer, breached fiduciary duties and violated federal securities laws by virtue of the aforementioned alleged misrepresentation; and (iii) a purported class action against Wyeth, the Wyeth Savings Plan Committee, the Wyeth Savings Plan-Puerto Rico Committee, the Wyeth Retirement Committee and certain former Wyeth officers and committee members alleging that they violated certain provisions of ERISA by maintaining Wyeth stock as an investment alternative under certain Wyeth plans notwithstanding their alleged knowledge of the aforementioned alleged misrepresentation.

The U.S. District Court for the Southern District of New York dismissed the ERISA action and denied the plaintiff's motion to amend the complaint in March and August 2010, respectively. In September 2010, the plaintiff appealed both of those rulings to the U.S. Court of Appeals for the Second Circuit. In November 2010, the plaintiff withdrew the appeal, but reserved the right to reinstate the appeal by December 2011. In addition, in January 2011, the shareholder derivative action was voluntarily dismissed by the plaintiff. The purported securities class action remains pending.

Rebif

We have an exclusive collaboration agreement with EMD Serono, Inc. (Serono) to co-promote Rebif, a treatment for multiple sclerosis, in the U.S. In August 2011, Serono filed a complaint in the Philadelphia Court of Common Pleas seeking a declaratory judgment that we are not entitled to a 24-month extension of the Rebif co-promotion agreement, which otherwise would terminate at the end of 2013. We disagree with Serono's interpretation of the agreement and believe that we have the right to extend the agreement to the end of 2015. In October 2011, the court sustained our preliminary objections and dismissed the complaint, and Serono appealed the decision to the Superior Court of Pennsylvania.

C. Commercial and Other Matters

Acquisition of Wyeth

In 2009, a number of retail pharmacies in California brought an action against Pfizer and Wyeth in the U.S. District Court for the Northern District of California. The plaintiffs allege, among other things, that our acquisition of Wyeth violated various federal antitrust laws by creating a monopoly in the manufacture, distribution and sale of prescription drugs in the U.S. In April 2010, the District Court granted our motion to dismiss the second amended complaint. In May 2011, the U.S. Court of Appeals for the Ninth Circuit affirmed the dismissal by the District Court and, in June 2011, it denied plaintiffs' petition for a rehearing. In October 2011, the plaintiffs filed a petition for certiorari with the U.S. Supreme Court seeking reversal of the Ninth Circuit's decision.

Acquisition of King Pharmaceuticals, Inc.

In October 2010, several purported class action complaints were filed in federal and state court in Tennessee by shareholders of King challenging Pfizer's acquisition of King. King and the individuals who served as the members of King's Board of Directors at the time of the execution of the merger agreement are named as defendants in all of these actions. Pfizer and Parker Tennessee Corp., a subsidiary of Pfizer, also are named as defendants in most of these actions.

In November 2010, all of the actions filed in state court were consolidated in the Chancery Court for Sullivan County, Tennessee Second Judicial District, at Bristol. The parties to the consolidated state court action have reached an agreement-in-principle to resolve that action as a result of certain disclosures regarding the transaction made by King in its amended Schedule 14D-9 recommendation statement for the tender offer dated January 21, 2011. The proposed settlement is subject to, among other things, court approval.

In September 2011, the court granted defendants' unopposed motion to dismiss the federal action.

Average Wholesale Price Litigation

A number of states as well as most counties in New York have sued Pharmacia, Pfizer and other pharmaceutical manufacturers alleging that they provided average wholesale price (AWP) information for certain of their products that was higher than the actual prices at which those products were sold. The AWP is used to determine reimbursement levels under Medicare Part B and Medicaid and in many private-sector insurance policies and medical plans. The plaintiffs claim that the alleged spread between the AWP's at which purchasers were reimbursed and the actual sale prices was promoted by the defendants as an incentive to purchase certain of their products. In addition to suing on their own behalf, many of the plaintiff states seek to recover on behalf of individual Medicare Part B co-payers and private-sector insurance companies and medical plans in their states. These various actions generally assert fraud claims as well as claims under state deceptive trade practice laws, and seek monetary and other relief, including civil penalties and treble damages. Several of the suits also allege that Pharmacia and/or Pfizer did not report to the states their best price for certain products under the Medicaid program.

In addition, Pharmacia, Pfizer and other pharmaceutical manufacturers are defendants in a number of purported class action suits in various federal and state courts brought by employee benefit plans and other third-party payers that assert claims similar to those in the state and county actions. These suits allege, among other things, fraud, unfair competition and unfair trade practices and seek monetary and other relief, including civil penalties and treble damages.

All of these state, county and purported class action suits were transferred for consolidated pre-trial proceedings to a Multi-District Litigation (In re Pharmaceutical Industry Average Wholesale Price Litigation MDL-1456) in the U.S. District Court for the District of Massachusetts. Certain of the state and private suits have been remanded to their respective state courts. In 2006, the claims against Pfizer in the Multi-District Litigation were dismissed with prejudice; the claims against Pharmacia are still pending.

In 2008, the court in the Multi-District Litigation granted preliminary approval with respect to the fairness of a proposed settlement of the claims against 11 defendants, including Pharmacia, for a total of \$125 million. It is expected that the court will consider final approval of the settlement later this year. If the settlement is approved, Pharmacia's contribution would not be material.

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

In addition, Wyeth is a defendant in AWP actions brought by certain states, which are not included in the Multi-District Litigation, as well as AWP actions brought by most counties in New York, almost all of which are included in the Multi-District Litigation. Wyeth also is a defendant in a purported class action in state court in New Jersey brought by two union health and welfare plans on behalf of a putative class consisting of third-party payers, certain consumers and Medicare beneficiaries. In addition, King and/or certain of its subsidiaries are defendants in AWP actions brought by certain states, which are not included in the Multi-District Litigation. These actions against Wyeth and King would not be included in the proposed settlement referred to in the previous paragraph.

Monsanto-Related Matters

In 1997, Monsanto Company (Former Monsanto) contributed certain chemical manufacturing operations and facilities to a newly formed corporation, Solutia Inc. (Solutia), and spun off the shares of Solutia. In 2000, Former Monsanto merged with Pharmacia & Upjohn Company to form Pharmacia Corporation (Pharmacia). Pharmacia then transferred its agricultural operations to a newly created subsidiary, named Monsanto Company (New Monsanto), which it spun off in a two-stage process that was completed in 2002. Pharmacia was acquired by Pfizer in 2003 and is now a wholly owned subsidiary of Pfizer.

In connection with its spin-off that was completed in 2002, New Monsanto assumed, and agreed to indemnify Pharmacia for, any liabilities related to Pharmacia's former agricultural business. New Monsanto is defending and indemnifying Pharmacia for various claims and litigation arising out of, or related to, the agricultural business.

In connection with its spin-off in 1997, Solutia assumed, and agreed to indemnify Pharmacia for, liabilities related to Former Monsanto's chemical businesses. As the result of its reorganization under Chapter 11 of the U.S. Bankruptcy Code, Solutia's indemnification obligations related to Former Monsanto's chemical businesses are limited to sites that Solutia has owned or operated. In addition, in connection with its spin-off that was completed in 2002, New Monsanto assumed, and agreed to indemnify Pharmacia for, any liabilities primarily related to Former Monsanto's chemical businesses, including, but not limited to, any such liabilities that Solutia assumed. Solutia's and New Monsanto's assumption of and agreement to indemnify Pharmacia for these liabilities apply to pending actions and any future actions related to Former Monsanto's chemical businesses in which Pharmacia is named as a defendant, including, without limitation, actions asserting environmental claims, including alleged exposure to polychlorinated biphenyls.

Trade Secrets Action in California

In 2004, Ischemia Research and Education Foundation (IREF) and its chief executive officer brought an action in California Superior Court, Santa Clara County, against a former IREF employee and Pfizer. Plaintiffs allege that defendants conspired to misappropriate certain information from IREF's allegedly proprietary database in order to assist Pfizer in designing and executing a clinical study of a Pfizer drug. In 2008, the jury returned a verdict for compensatory damages of approximately \$38.7 million. In March 2009, the court awarded prejudgment interest, but declined to award punitive damages. In July 2009, the court granted our motion for a new trial and vacated the jury verdict.

Trimegestone

Aventis filed a breach of contract action against Wyeth in the Commercial Court of Nanterre in France arising out of the December 2003 termination by Wyeth of an October 2000 agreement between Wyeth and Aventis relating to the development of hormone-therapy drugs utilizing Aventis's trimegestone (TMG) progestin. Aventis alleges that the termination was improper and seeks monetary damages. In 2009, a three-judge tribunal rendered its decision in favor of Wyeth. In May 2010, the Versailles Court of Appeals reversed the Commercial Court's decision and appointed experts to hear evidence and make a recommendation to the Court of Appeals concerning damages. In August 2010,

Wyeth filed a notice of appeal of the Court of Appeals' decision with the Supreme Court of France. Notwithstanding the appeal, the damage proceeding by the experts appointed by the Court of Appeals is continuing.

Environmental Matters

In 2009, we submitted to the U.S. Environmental Protection Agency (EPA) a corrective measures study report with regard to Pharmacia Corporation's discontinued industrial chemical facility in North Haven, Connecticut and a revised site-wide feasibility study with regard to Wyeth's discontinued industrial chemical facility in Bound Brook, New Jersey. In September 2010, our corrective measures study report with regard to the North Haven facility was approved by the EPA. In July 2011, we finalized an Administrative Settlement Agreement and Order on Consent for Removal Action with the EPA with regard to the Bound Brook facility to address the discharge of impacted groundwater from that facility.

We are a party to a number of other proceedings brought under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended (CERCLA or Superfund), and other state, local or foreign laws in which the primary relief sought is the cost of past and/or future remediation.

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

In February 2011, King received notice from the U.S. Department of Justice (DOJ) advising that the EPA has requested that DOJ initiate enforcement action seeking injunctive relief and penalties against King for alleged non-compliance with certain provisions of the federal Clean Air Act at its Bristol, Tennessee manufacturing facility. King has executed a tolling agreement with the DOJ in order to facilitate the possible resolution of this matter.

In October 2011, we voluntarily disclosed to the EPA potential non-compliance with certain provisions of the federal Clean Air Act at our Barceloneta, Puerto Rico manufacturing facility. We do not expect that any penalties that may result from this matter will be material to the Company.

D. Government Investigations

Like other pharmaceutical companies, we are subject to extensive regulation by national, state and local government agencies in the U.S. and in the other countries in which we operate. As a result, we have interactions with government agencies on an ongoing basis. Among the investigations by government agencies are those discussed below. It is possible that criminal charges and substantial fines and/or civil penalties could result from government investigations, including but not limited to those discussed below.

The Company has voluntarily provided the DOJ and the U.S. Securities and Exchange Commission (SEC) with information concerning potentially improper payments made by certain Pfizer and Wyeth subsidiaries in connection with certain sales activities outside the U.S. In recent discussions, we have reached agreements-in-principle with the SEC staff and with the DOJ for the resolution of these matters. We anticipate entering into and announcing final agreements in the fourth quarter. In addition, certain potentially improper payments and other matters are the subject of investigations by government authorities in certain foreign countries, including a civil and criminal investigation in Germany with respect to certain tax matters relating to a wholly owned subsidiary of Pfizer.

The DOJ is conducting civil and criminal investigations regarding Wyeth's promotional practices with respect to Protonix and its practices relating to the pricing for Protonix for Medicaid rebate purposes. In connection with the pricing investigation, in 2009, the DOJ filed a civil complaint in intervention in two qui tam actions that had been filed under seal in the U.S. District Court for the District of Massachusetts. The complaint alleges that Wyeth's practices relating to the pricing for Protonix for Medicaid rebate purposes between 2001 and 2006 violated the Federal Civil False Claims Act and federal common law. The two qui tam actions have been unsealed and the complaints include substantially similar allegations. In addition, in 2009, several states and the District of Columbia filed a complaint under the same docket number asserting violations of various state laws based on allegations substantially similar to those set forth in the civil complaint filed by the DOJ. We are exploring with the DOJ various ways to resolve its civil and criminal investigations relating to Protonix.

The U.S. Attorney's Office for the Western District of Oklahoma is conducting a civil and criminal investigation with respect to Wyeth's promotional practices relating to Rapamune. In addition, in October 2010, the federal government was permitted to intervene in a qui tam action, which alleges off-label promotion of Rapamune that was pending in the U.S. District Court for the Eastern District of Pennsylvania. In December 2010, the qui tam action was transferred to the Western District of Oklahoma, where it was consolidated with the proceedings under way there. We are exploring with the U.S. Attorney's Office various ways to resolve this matter.

We have received civil investigative demands and informal inquiries from the consumer protection divisions of several states seeking information and documents concerning the promotion of Lyrica and Zyvox. These requests appear to relate to the same past promotional practices concerning these products that were the subject of previously

reported settlements in September 2009 with the DOJ and the Medicaid fraud control units of various states. We are exploring with the coalition of states various ways to resolve this matter.

E. Guarantees and Indemnifications

In the ordinary course of business and in connection with the sale of assets and businesses, we often indemnify our counterparties against certain liabilities that may arise in connection with the transaction or are related to activities prior to the transaction. These indemnifications typically pertain to environmental, tax, employee and/or product-related matters and patent-infringement claims. If the indemnified party were to make a successful claim pursuant to the terms of the indemnification, we would be required to reimburse the loss. These indemnifications are generally subject to threshold amounts, specified claim periods and other restrictions and limitations. Historically, we have not paid significant amounts under these provisions and, as of October 2, 2011, recorded amounts for the estimated fair value of these indemnifications were not significant.

PFIZER INC. AND SUBSIDIARY COMPANIES

Note 15. Segment, Product and Geographic Area Information

A. Segment Information

We manage our operations through five operating segments—Primary Care (PC), Specialty Care and Oncology (SC&O), Established Products and Emerging Markets (EP&EM), Animal Health and Consumer Healthcare (AH&CH) and Nutrition. Each operating segment has responsibility for its commercial activities and for certain research and development activities related to in-line products and IPR&D projects that generally have achieved proof-of-concept. Previously, we managed our operations through two operating segments—Biopharmaceutical and Diversified.

We regularly review our segments and the approach used by management to evaluate performance and allocate resources.

A description of each of our five operating segments follows:

Primary Care operating segment (PC)—includes revenues and earnings, as defined by management, from human pharmaceutical products primarily prescribed by primary-care physicians, and may include products in the following therapeutic and disease areas: Alzheimer’s disease, diabetes, cardiovascular (excluding pulmonary arterial hypertension), erectile dysfunction, major depressive disorder, genitourinary, pain, respiratory and smoking cessation. Examples of products in this unit include Celebrex, Chantix/Champix, Lipitor, Lyrica, Premarin, Pristiq and Viagra. All revenues and earnings for such products are allocated to the Primary Care unit, except those generated in emerging markets and those that are managed by the Established Products unit.

Specialty Care and Oncology operating segment (SC&O)—comprises the Specialty Care business unit and the Oncology business unit.

Specialty Care—includes revenues and earnings, as defined by management, from most human pharmaceutical products primarily prescribed by physicians who are specialists, and may include products in the following therapeutic and disease areas: anti-infectives, endocrine disorders, hemophilia, inflammation, multiple sclerosis, ophthalmology, pulmonary arterial hypertension, specialty neuroscience and vaccines. Examples of products in this unit include BeneFIX, Enbrel, Genotropin, Geodon, the Prevnar/Prevenar franchise, Rebif, ReFacto, Revatio, Xalatan, Xyntha and Zyvox. All revenues and earnings for such products are allocated to the Specialty Care unit, except those generated in emerging markets and those that are managed by the Established Products unit.

Oncology—includes revenues and earnings, as defined by management, from human pharmaceutical products addressing oncology and oncology-related illnesses. Examples of products in this unit include Aromasin, Sutent, Torisel and Xalkori. All revenues and earnings for such products are allocated to the Oncology unit, except those generated in emerging markets and those that are managed by the Established Products unit.

Established Products and Emerging Markets operating segment (EP&EM)—comprises the Established Products business unit and the Emerging Markets business unit.

Established Products—generally includes revenues and earnings, as defined by management, from most human pharmaceutical products that have lost patent protection or marketing exclusivity in certain countries and/or regions. Typically, products are transferred to this unit in the beginning of the fiscal year following losing patent

protection or marketing exclusivity. In certain situations, products may be transferred to this unit at a different point than the beginning of the fiscal year following losing patent protection or marketing exclusivity in order to maximize their value. This unit also excludes revenues and earnings generated in emerging markets. Examples of products in this unit include Arthrotec, Effexor XR, Medrol, Norvasc, Protonix, Relpax and Zosyn/Tazocin.

Emerging Markets—includes revenues and earnings, as defined by management, from all human pharmaceutical products sold in emerging markets, including, but not limited to, Asia (excluding Japan and South Korea), Latin America, Middle East, Africa, Central and Eastern Europe and Turkey.

Animal Health and Consumer Healthcare operating segment (AH&CH)—comprises the Animal Health business unit and the Consumer Healthcare business unit.

Animal Health—includes worldwide revenues and earnings, as defined by management, from products and services to prevent and treat disease in livestock and companion animals, including vaccines, paraciticides and anti-infectives.

Consumer Healthcare—generally includes worldwide revenues and earnings, as defined by management, from non-prescription medicines and vitamins, including products in the following therapeutic categories: GI-topicals, nutritionals, pain management and respiratory. Examples of products in Consumer Healthcare are Advil, Caltrate, Centrum, ChapStick and Robitussin.

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

Nutrition operating segment—generally includes revenues and earnings, as defined by management, from a full line of infant and toddler nutritional products sold outside the U.S. and Canada.

Our chief operating decision maker uses the revenues and earnings of the five operating segments, among other factors, for performance evaluation and resource allocation. For the operating segments that comprise more than one business unit, a single segment manager is responsible for target setting, performance evaluation and resource allocation among those business units.

Certain costs are not allocated to our operating segment results, such as costs associated with the following:

Worldwide Research and Development (WRD), which is generally responsible for human health research projects until proof-of-concept is achieved and then for transitioning those projects to the appropriate business unit for possible clinical and commercial development. R&D spending may include upfront and milestone payments for intellectual property rights. This organization also has responsibility for certain science-based platform services, which provide technical expertise and other services to the various research and development projects.

Pfizer Medical, which is responsible for all human-health-related regulatory submissions and interactions with regulatory agencies. This organization is also responsible for the collection, evaluation and reporting of all safety event information related to our human health products and for conducting clinical trial audits and readiness reviews and for providing Pfizer-related medical information to healthcare providers.

Corporate, which is responsible for platform functions such as finance, global real estate operations, human resources, legal, worldwide procurement, worldwide public affairs and policy and worldwide technology. These costs include payroll charges and associated operating expenses, as well as interest income and expense.

Certain transactions and events such as (1) purchase accounting adjustments, where we incur expenses associated with the amortization of fair value adjustments to inventory, intangible assets and property, plant and equipment; (2) acquisition-related activities, where we incur costs for restructuring, integration and executing the transaction; and (3) certain significant items, which include non-acquisition-related restructuring costs, as well as costs incurred for legal settlements, asset impairments and sales of assets or businesses.

We manage our assets on a total company basis, not by operating segment, as many of our operating assets are shared (such as our plant network assets) or commingled (such as accounts receivable, as many of our customers are served by multiple operating segments). Therefore, our chief operating decision maker does not regularly review any asset information by operating segment and, accordingly, we do not report asset information by operating segment. Total assets were approximately \$196 billion at October 2, 2011 and approximately \$195 billion at December 31, 2010.

(a) Income from continuing operations before provision for taxes on income.

(b) Other business activities includes the revenues and operating results of Pfizer CentreSource, our contract manufacturing and bulk pharmaceutical chemical sales operation, and the research and development costs managed by our Worldwide Research and Development organization and our Pfizer Medical organization.

(c) Corporate for R&D expenses includes, among other things, administration expenses and share-based compensation expenses associated with our research and development activities and for Earnings includes, among other things, administration expenses, interest income/(expense), certain performance-based and all share-based compensation expenses.

- (d) Purchase accounting adjustments include charges related to the fair value adjustments to inventory, intangible assets and property, plant and equipment.
- (e) Acquisition-related costs can include costs associated with acquiring businesses and integrating and restructuring acquired businesses, such as transaction costs, integration costs, restructuring charges and additional depreciation associated with asset restructuring (see Note 5. Costs Associated with Cost-Reduction and Productivity Initiatives and Acquisition Activity for additional information).
- (f) Certain significant items are substantive, unusual items that, either as a result of their nature or size, we would not expect to occur as part of our normal business on a regular basis. Such items primarily include restructuring charges and implementation costs associated with our cost-reduction and productivity initiatives that are not associated with an acquisition, the impact of certain tax and/or legal settlements and certain asset impairments.

For the third quarter of 2011, certain significant items for R&D expenses includes implementation costs and additional depreciation - asset restructuring associated with our cost-reduction and productivity initiatives that are not associated with an acquisition, and for Earnings includes (i) restructuring charges and implementation costs of \$1.1 billion associated with our cost-reduction and productivity initiatives that are not associated with an acquisition, (ii) charges for certain legal matters of \$132 million and (iii) certain asset impairment charges of \$105 million (see Note 5. Costs Associated with Cost-Reduction and Productivity Initiatives and Acquisition Activity and Note 6. Other (Income)/Deductions—Net for additional information).

For the third quarter of 2010, certain significant items for Earnings includes (i) asset impairment charges of \$1.5 billion (ii) charges for certain legal matters of \$701 million and (iii) Wyeth-related inventory write-off of \$212 million (which included a purchase accounting fair value adjustment of \$104 million), primarily related to biopharmaceutical inventory.

For the first nine months of 2011, certain significant items for R&D expenses includes implementation costs and additional depreciation - asset restructuring associated with our cost-reduction and productivity initiatives that are not associated with an acquisition, and for Earnings includes (i) restructuring charges and implementation costs of \$1.9 billion associated with our cost-reduction and productivity initiatives that are not associated with an acquisition, (ii) charges for certain legal matters of \$657 million and (iii) certain asset impairment charges of \$582 million (see Note 5. Costs Associated with Cost-Reduction and Productivity Initiatives and Acquisition Activity and Note 6. Other (Income)/Deductions—Net for additional information).

For the first nine months of 2010, certain significant items for Earnings includes (i) asset impairment charges of \$1.7 billion, (ii) charges for certain legal matters of \$843 million and (iii) Wyeth-related inventory write-off of \$212 million (which included a purchase accounting fair value adjustment of \$104 million), primarily related to biopharmaceutical inventory.

- (g) Includes overhead expenses associated with our manufacturing and commercial operations not directly attributable to an operating segment.

REVIEW REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and Board of Directors of Pfizer Inc.:

We have reviewed the condensed consolidated balance sheet of Pfizer Inc. and Subsidiary Companies as of October 2, 2011, the related condensed consolidated statements of income for the three-month and nine-month periods ended October 2, 2011, and October 3, 2010, and the related condensed consolidated statements of cash flows for the nine-month periods ended October 2, 2011, and October 3, 2010. These condensed consolidated financial statements are the responsibility of the Company's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Pfizer Inc. and Subsidiary Companies as of December 31, 2010, and the related consolidated statements of income, shareholders' equity, and cash flows for the year then ended (not presented herein); and in our report dated February 28, 2011, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2010, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

KPMG LLP

New York, New York
November 10, 2011

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A)

Introduction

Our MD&A is provided in addition to the accompanying condensed consolidated financial statements and footnotes to assist readers in understanding Pfizer's results of operations, financial condition and cash flows. The MD&A is organized as follows:

Overview of Our Performance, Operating Environment and Outlook. This section, beginning on page 43, provides information about the following: our business; our performance during the third quarter and first nine months of 2011; our operating environment; our business development initiatives; our financial guidance for 2011; and our financial targets for 2012.

Analysis of Our Condensed Consolidated Statements of Income. This section begins on page 50, and consists of the following sub-sections:

- o **Revenues.** This sub-section, beginning on page 50, provides an analysis of our products and revenues for the third quarter and first nine months of 2011 and 2010, as well as an overview of research and development expenses and important biopharmaceutical product developments.
- o **Costs and Expenses.** This sub-section, beginning on page 65, provides a discussion about our costs and expenses.
- o **Provision for Taxes on Income.** This sub-section, on page 68, provides a discussion of items impacting our tax provision for the periods presented.
- o **Discontinued Operations.** This sub-section, beginning on page 69, provides an analysis of the financial statement impact of our discontinued operations during the periods presented.
- o **Adjusted Income.** This sub-section, beginning on page 69, provides a discussion of an alternative view of performance used by management.

Analysis of Our Condensed Consolidated Balance Sheets. This section, on page 73, provides a discussion of changes in certain balance sheet accounts.

Analysis of Our Condensed Consolidated Statements of Cash Flows. This section, beginning on page 73, provides an analysis of our cash flows for the first nine months of 2011 and 2010.

Financial Condition, Liquidity and Capital Resources. This section, beginning on page 74, provides an analysis of our financial assets and liabilities as of October 2, 2011 and December 31, 2010 and a discussion of our outstanding debt and commitments that existed as of October 2, 2011 and December 31, 2010. Included in the discussion of outstanding debt is a discussion of the amount of financial capacity available to help fund Pfizer's future activities.

New Accounting Standards. This section, beginning on page 76, discusses recently adopted and recently issued accounting standards.

Forward-Looking Information and Factors That May Affect Future Results. This section, beginning on page 77, provides a description of the risks and uncertainties that could cause actual results to differ materially from those discussed in forward-looking statements set forth in this MD&A relating to our financial and operating performance,

business plans and prospects, in-line products and product candidates, and share-repurchase and dividend-rate plans. Such forward-looking statements are inherently susceptible to uncertainty and changes in circumstances.

OVERVIEW OF OUR PERFORMANCE, OPERATING ENVIRONMENT and OUTLOOK

Our Business

Our mission is to apply science and our global resources to improve health and well-being at every stage of life. We strive to set the standard for quality, safety and value in the discovery, development and manufacturing of medicines for people and animals. Our diversified global healthcare portfolio includes human and animal biologic and small molecule medicines and vaccines, as well as nutritional products and many of the world's best-known consumer products. Every day, we work across developed and emerging markets to advance wellness, prevention, treatments and cures that challenge the most feared diseases of our time. We also collaborate with other biopharmaceutical companies, healthcare providers, governments and local communities to support and expand access to reliable, affordable healthcare around the world. Our revenues are derived from the sale of our products, as well as through alliance agreements, under which we co-promote products discovered by other companies.

On January 31, 2011, we completed the tender offer for all of the outstanding shares of common stock of King Pharmaceuticals, Inc. (King) and acquired approximately 92.5% of the outstanding shares for approximately \$3.3 billion in cash. On February 28, 2011, we acquired the remaining outstanding shares of King for approximately \$300 million in cash (for additional information, see Notes to Condensed Consolidated Financial Statements—Note 3. Acquisition of King Pharmaceuticals, Inc.). Commencing from January 31, 2011, our financial statements include the assets, liabilities, operating results and cash flows of King. Therefore, in accordance with our domestic and international reporting periods, our condensed consolidated financial statements for the nine months ended October 2, 2011 reflect approximately eight months of King's U.S. operations and approximately seven months of King's international operations.

In July 2011, we announced our decision to explore strategic alternatives for our Animal Health and Nutrition businesses, which may include, among other things, a full or partial separation of each of these businesses from Pfizer through a spin-off, sale or other transaction (see the "Our Business Development Initiatives" section of this MD&A).

Our 2011 Performance

Revenues in the third quarter of 2011 were \$17.2 billion, compared to \$16.0 billion in the same period in 2010. The increase of 7% was due to:

- growth in certain key biopharmaceutical products, such as Lipitor in the U.S. as well as Lyrica, the Prevenar franchise and Enbrel, and growth in our Animal Health, Consumer Healthcare and Nutrition businesses;

- the favorable impact of foreign exchange, which increased revenues by approximately \$951 million, or 6%; and

- the inclusion of revenues from legacy King products of \$357 million, which favorably impacted revenues by 2%,

partially offset by:

- lower revenues of approximately \$950 million, or 6%, due to the impact of the loss of exclusivity for several biopharmaceutical products in certain geographies; and

- a reduction in revenues of \$151 million, or 1%, due to U.S. healthcare reform.

Revenues in the first nine months of 2011 were \$50.7 billion, compared to \$49.7 billion in the same period in 2010. The increase of 2% was due to:

growth in certain key biopharmaceutical products, such as Lipitor in the U.S. as well as Lyrica, the Prevenar franchise and Enbrel, and growth in our Animal Health, Consumer Healthcare and Nutrition businesses;

the favorable impact of foreign exchange, which increased revenues by approximately \$1.8 billion, or 4%; and

the inclusion of revenues from legacy King products of \$938 million, which favorably impacted revenues by 2%,

partially offset by:

lower revenues of \$3.8 billion, or 8%, due to the impact of the loss of exclusivity for several biopharmaceutical products in certain geographies; and

a reduction in revenues of \$357 million, or 1%, due to U.S. healthcare reform.

Edgar Filing: PFIZER INC - Form 10-Q

The significant impacts on revenues for the third quarter and first nine months of 2011, compared to the same periods in 2010, are as follows:

	Oct. 2, 2011 vs. Oct. 3, 2010

Animal Health products	479	18	20	18
Consumer Healthcare products	226	11	7	16
Nutrition products	165	12	-	12

(a) Third quarter and first nine months of 2011 reflect the inclusion of revenues from legacy King products.

(b) Aromasin lost exclusivity in the U.S. in April 2011. Xalatan lost exclusivity in the U.S. in March 2011. The basic U.S. patent (including the six-month pediatric exclusivity period) for Protonix expired in January 2011. Lipitor lost exclusivity in Canada in May 2010, Spain in July 2010, Brazil in August 2010 and Mexico in December 2010. Effexor XR lost exclusivity in the U.S. in July 2010. We lost exclusivity for Aricept 5mg and 10mg tablets, which are included in Alliance revenues, in November 2010.

(c) Relates to “All other biopharmaceutical products” category included in the “Selected Revenues from Biopharmaceutical Products” table presented in this MD&A.

* Calculation not meaningful.

Income from continuing operations for the third quarter of 2011 was \$2.4 billion, compared to \$856 million in the third quarter of 2010, and \$7.2 billion in the first nine months of 2011, compared to \$5.3 billion in the first nine months of 2010, reflecting, in addition to the factors discussed above relating to Revenues:

higher impairment charges of \$1.5 billion (pre-tax) in the third quarter of 2010, and \$1.7 billion (pre-tax) in the first nine months of 2010 related to certain intangible assets acquired as part of the Wyeth acquisition, and a \$701 million (pre-tax) charge in the third quarter and first nine months of 2010 for asbestos litigation related to our wholly owned subsidiary, Quigley Company, Inc. (see further discussion in Notes to Condensed Consolidated Financial Statements—Note 6. Other(Income)/Deductions—Net); and

a decrease in the effective tax rate to 33.7% in the third quarter of 2011 from 39.5% in the third quarter of 2010 and to 30.8% in first nine months of 2011 from 37.3% in the first nine months of 2010 (see discussion in the “Provision for Taxes on Income” section of this MD&A),

partially offset by:

higher charges related to our non-acquisition related cost-reduction and productivity initiatives in the third quarter and first nine months of 2011 compared to the same periods in 2010.

Our Operating Environment

U.S. Healthcare Legislation

In March 2010, the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act (together, the U.S. Healthcare Legislation), was enacted in the U.S. As explained more fully in Pfizer’s 2010 Annual Report on Form 10-K, this legislation has both current and longer-term impacts on us.

We recorded the following amounts as a result of the U.S. Healthcare Legislation:

approximately \$215 million in the third quarter of 2011 and approximately \$539 million in the first nine months of 2011, recorded as a reduction to Revenues; and

approximately \$45 million in the third quarter of 2011 and approximately \$183 million in the first nine months of 2011, recorded in Selling, informational and administrative expenses, related to the annual fee payable to the federal government (which is not deductible for U.S. income tax purposes) based on our prior-calendar-year share relative to other companies of branded prescription drug sales to specified government programs (the total fee to be paid each year by the pharmaceutical industry will increase annually through 2018). We are recording the annual fee ratably throughout the year.

Our 2011 financial guidance and 2012 financial targets (see the “Our Financial Guidance for 2011” and “Our Financial Targets for 2012” sections of this MD&A for additional information) reflect the expected full-year impact of the U.S. Healthcare Legislation.

Industry-Specific Challenges

The majority of our revenues come from the manufacture and sale of biopharmaceutical products. As explained more fully in Pfizer’s 2010 Annual Report on Form 10-K, the biopharmaceutical industry is highly competitive and we face a number of industry-specific challenges, which can significantly impact our results. These factors include, among others: the loss or expiration of intellectual property rights, the regulatory environment and pipeline productivity,

pricing and access pressures and increasing competition among branded products.

In the U.S., we lost exclusivity for Effexor XR in July 2010, for Aricept 5mg and 10mg tablets in November 2010, for Vfend tablets in February 2011 and for Xalatan in March 2011. The basic U.S. patent (including the six-month pediatric exclusivity period) for Protonix expired in January 2011. We lost exclusivity for Lipitor in Canada in May 2010, Spain in July 2010, Brazil in August 2010 and Mexico in December 2010. In addition, the basic patent for Vfend tablets in Brazil expired in January 2011. We also lost exclusivity for Aromasin in the U.S. in April 2011 and in the European Union (EU) in July 2011, and the patent for Aromasin in Japan expired in July 2011.

In addition, we expect to lose exclusivity for various other products in various markets over the next few years, including the following through the end of 2012:

Lipitor and Caduet in the U.S. on November 30, 2011 (see additional Lipitor discussion below);

Xalatan and Xalacom in 15 major European markets in January 2012. The exclusivity period in these markets was extended from July 2011 to January 2012 as a result of pediatric extensions;

Geodon in the U.S. in March 2012;

Revatio (tablet) in the U.S. in March 2012. We are pursuing a pediatric extension for Revatio in the U.S. If we are successful, the exclusivity period for Revaio (tablet) in the U.S. will be extended by six months to September 2012; and

Detrol IR in the U.S. in September 2012.

As a result of these anticipated losses of exclusivity, we will lose the substantial portion of our revenues from the aforementioned products in two specified markets shortly thereafter.

Pfizer announced in June 2008 that we entered into an agreement providing a license to Ranbaxy to sell generic versions of Lipitor and Caduet in the U.S effective November 30, 2011. In addition, the agreement provides a license for Ranbaxy to sell a generic version of Lipitor beginning on varying dates in several additional countries. (See Notes to Condensed Consolidated Financial Statements — Note 14. Legal Proceedings and Contingencies of this Form 10-Q for discussion of certain litigation relating to this agreement.) We have also granted Watson Laboratories, Inc. (Watson) the exclusive right to sell the authorized generic version of Lipitor in the U.S. for a period of five years, which is expected to commence on November 30, 2011. As Watson's exclusive supplier, we will manufacture and sell generic atorvastatin tablets to Watson. In markets outside the U.S., Lipitor has lost exclusivity in certain countries and will lose exclusivity at various times in certain other countries. We expect to maintain a significant portion of the Lipitor revenues overall in developed markets outside the U.S. through 2011. In addition, the exclusivity period for Lipitor in the majority of major European markets has been extended by six months to May 2012 as a result of pediatric extensions. Although the loss of exclusivity for Lipitor in Brazil and Mexico in 2010 is adversely impacting Lipitor revenues in emerging markets in 2011, we do not expect that Lipitor revenues in emerging markets will be materially impacted by the loss of exclusivity over the next several years. In full-year 2010, revenues from Lipitor were approximately \$5.3 billion in the U.S. (approximately 18% of our total full-year 2010 U.S. revenues) and approximately \$5.4 billion in markets outside the U.S. (approximately 14% of our total full-year 2010 international revenues, of which approximately \$900 million was attributable to emerging markets).

Our financial guidance for 2011 and our financial targets for 2012 reflect the anticipated impact in those years of the loss of exclusivity of various products (see the "Our Financial Guidance for 2011" and "Our Financial Targets for 2012" sections of this MD&A).

We will continue to aggressively defend our patent rights against increasing incidents of infringement whenever we deem appropriate. For more detailed information about our significant products, see the discussion in the "Revenues—Selected Revenues from Biopharmaceutical Products" section of this MD&A. See Part II—Other Information; Item 1. Legal Proceedings, of this Form 10-Q for a discussion of certain recent developments with respect to patent litigation.

In August 2011, the federal Budget Control Act of 2011 (the Act) was enacted in the U.S. The Act includes provisions to raise the U.S. Treasury Department's borrowing limit, known as the debt ceiling, and provisions to reduce the federal deficit by \$2.4 trillion between 2012 and 2021. Deficit-reduction targets include \$900 billion of discretionary spending reductions associated with the Department of Health and Human Services and various agencies charged with national security, but those discretionary spending reductions do not include programs such as Medicare and Medicaid or direct changes to pharmaceutical pricing, rebates or discounts. A Joint Select Committee of Congress (the Committee) has been appointed to identify the remaining \$1.5 trillion of deficit reductions by November 23, 2011. The Committee may consider all elements of discretionary and non-discretionary spending, and its recommendations could result in reduced spending under Medicare and Medicaid for prescription drugs. In addition, the Committee may determine to recommend the imposition of additional taxes. If the Committee's recommendations identifying at least

\$1.2 trillion of deficit reductions are not enacted into law by January 15, 2012, then the Office of Management and Budget (OMB) will be responsible for identifying the remaining deficit reductions, which would be divided evenly between defense and non-defense spending. Under the OMB fallback review process, Social Security, Medicaid, Veteran Benefits and certain other spending categories are excluded from consideration, but reductions in payments to Medicare providers may be made, although any such reductions are prohibited by law from exceeding 2%. Additionally, certain payments to Medicare Part D plans, such as low-income subsidy payments, are exempt from reduction. At this time, we do not know what federal programs will be impacted by the spending reductions or what additional taxes, if any, will be imposed pursuant to the Act. Accordingly, at this time we are not able to determine the impact of such actions on our business. However, any significant spending reductions affecting Medicare, Medicaid or other publicly funded or subsidized health programs and/or any significant additional taxes imposed on us pursuant to the Act could have an adverse impact on our results of operations starting in 2012.

The Overall Economic Environment

In addition to industry-specific factors, we, like other businesses, continue to face the effects of the challenging economic environment, which have impacted our biopharmaceutical operations in the U.S. and Europe, affecting the performance of products such as Lipitor, Celebrex and Lyrica. We believe that patients, experiencing the effects of the challenging economic environment, including high unemployment levels, and increases in co-pays, sometimes are switching to generics, delaying treatments, skipping doses or using less effective treatments to reduce their costs. Challenging economic conditions in the U.S. also have increased the number of patients in the Medicaid program, under which sales of pharmaceuticals are subject to substantial rebates and, in many states, to formulary restrictions limiting access to brand-name drugs, including ours. In addition, during the first nine months of 2011, we continued to experience pricing pressure as a result of the economic environment in Europe and in a number of emerging markets, with government-mandated reductions in prices for certain biopharmaceutical products in certain European and emerging market countries.

Despite the challenging financial markets, Pfizer maintains a strong financial position. Due to our significant operating cash flows, financial assets, access to capital markets and available lines of credit and revolving credit agreements, we continue to believe that we have the ability to meet our liquidity needs for the foreseeable future. Our long-term debt is rated high quality by both Standard & Poor's and Moody's Investors Service. As market conditions change, we continue to monitor our liquidity position. We have taken and will continue to take a conservative approach to our financial investments. Both short-term and long-term investments consist primarily of high-quality, highly liquid, well-diversified, available-for-sale debt securities. For further discussion of our financial condition, see the "Financial Condition, Liquidity and Capital Resources" section of this MD&A.

A significant portion of our revenues and earnings are exposed to changes in foreign exchange rates. We seek to manage our foreign exchange risk in part through operational means, including managing same-currency revenues in relation to same-currency costs and same-currency assets in relation to same-currency liabilities. Depending on market conditions, foreign exchange risk also is managed through the use of derivative financial instruments and foreign currency debt. As we operate in multiple foreign currencies, including the euro, the U.K. pound, the Japanese yen, the Canadian dollar and approximately 100 other currencies, changes in those currencies relative to the U.S. dollar will impact our revenues and expenses. If the U.S. dollar weakens against a specific foreign currency, our revenues will increase, having a positive impact, and our overall expenses will increase, having a negative impact, on net income. Likewise, if the U.S. dollar strengthens against a specific foreign currency, our revenues will decrease, having a negative impact, and our overall expenses will decrease, having a positive impact on net income. Therefore, significant shifts in currencies can impact our short-term results, as well as our long-term forecasts and targets.

On March 11, 2011, Japan experienced a significant earthquake, followed by a tsunami and serious issues at the Fukushima nuclear facility, resulting in extensive loss of life and destruction of property. Our financial position and results of operations have not been materially impacted by these events and, notwithstanding the uncertainty caused by these events, we do not expect any such impact in the future. Accordingly, we have not revised our 2011 financial guidance or 2012 financial targets as a result of these events (see the "Our Financial Guidance for 2011" and "Our Financial Targets for 2012" sections of this MD&A). However, we will continue to evaluate the impact of these events on our operations.

These and other industry-wide factors that may affect our businesses should be considered along with information presented in the "Forward-Looking Information and Factors That May Affect Future Results" section of this MD&A; in Part II, Item 1A., "Risk Factors", of this Form 10-Q; and in Part I, Item 1A, "Risk Factors," of our 2010 Annual Report on Form 10-K.

Our Business Development Initiatives

We are committed to capitalizing on growth opportunities by advancing our own pipeline and maximizing the value of our in-line products, as well as through various forms of business development, which can include alliances, licenses, joint ventures, dispositions and acquisitions. We view our business development activity as an enabler of our strategies, and we seek to generate profitable revenue growth and enhance shareholder value by pursuing a disciplined, strategic and financial approach to evaluating business development opportunities. We are especially interested in opportunities in our high-priority therapeutic areas—immunology and inflammation, oncology, cardiovascular and metabolic diseases, neuroscience and pain, and vaccines. The most significant recent transactions are described below.

On September 20, 2011, we completed our cash tender offer for all of the outstanding shares of Icagen, Inc. (Icagen), resulting in an approximately 70% ownership of the outstanding shares of Icagen, a biopharmaceutical company focused on discovery, development and commercialization of novel orally-administered small molecule drugs that modulate ion channel targets. On October 27, 2011, we acquired all of the remaining shares of Icagen,

which is now a wholly-owned subsidiary of Pfizer, Inc. The allocation of the consideration transferred has not been finalized.

On April 4, 2011, we announced that we entered into an agreement to sell our Capsugel business for approximately \$2.4 billion in cash. The transaction closed on August 1, 2011. For additional information, see Notes to Condensed Consolidated Financial Statements—Note 4. Discontinued Operations.

Earlier this year, we announced that we were conducting a strategic review of all of our other businesses and assets. On July 7, 2011, we announced our decisions to explore strategic alternatives for our Animal Health and Nutrition businesses that may include, among other things, a full or partial separation of each of these businesses through a spin-off, sale, or other transaction.

Based on the review that we undertook, we believe these potential actions may create shareholder value, enable us to become a more focused organization and optimize capital allocation. Given the separate and distinct nature of Animal Health and Nutrition, we may pursue a different strategic alternative for each of these businesses. Although the timeline for each evaluation may differ, we expect to complete any transactions that may result from these evaluations in 12 to 24 months from the announcement date of July 7, 2011, and we do not anticipate making any further announcements regarding strategic alternatives for Animal Health and Nutrition until sometime in 2012.

We will continue to assess our businesses and assets as part of our regular, ongoing portfolio review process and also continue to consider business development activities for our businesses.

On February 7, 2011, we announced that we entered into an agreement to purchase the Ferrosan consumer healthcare business, which is principally comprised of dietary supplement products, including multivitamins, probiotics and Omega-3 fish oils. Ferrosan markets its products in the Nordic region, as well as in Russia and many countries in Central and Eastern Europe. The transaction, which is subject to customary closing conditions, including regulatory approval in certain jurisdictions, is expected to close in December 2011 (which falls in our first fiscal quarter of 2012 for our international operations).

On January 31, 2011 (the acquisition date), we completed our tender offer for all of the outstanding shares of common stock of King at a purchase price of \$14.25 per share in cash and acquired approximately 92.5% of the outstanding shares. On February 28, 2011, we acquired all of the remaining shares of King for \$14.25 per share in cash. As a result, the total fair value of consideration transferred for King was approximately \$3.6 billion in cash (\$3.2 billion, net of cash acquired). For additional information on our acquisition of King, see Notes to Condensed Consolidated Financial Statements—Note 3. Acquisition of King Pharmaceuticals, Inc.

King's principal businesses consist of a prescription pharmaceutical business focused on delivering new formulations of pain treatments designed to discourage common methods of misuse and abuse; the Meridian auto-injector business for emergency drug delivery, which develops and manufactures the EpiPen; an established products portfolio; and an animal health business that offers a variety of feed-additive products for a wide range of species.

As a result of our acquisition of King, we recorded Inventories of \$340 million, Property, plant and equipment (PP&E) of \$412 million, Identifiable intangible assets of \$2.1 billion and Goodwill of \$783 million. For additional information related to the provisional recording of assets acquired and liabilities assumed, see Notes to Condensed Consolidated Financial Statements—Note 3. Acquisition of King Pharmaceuticals, Inc.

As of the acquisition date, Identifiable intangible assets included the following:

- o Developed technology rights of approximately \$1.8 billion, which includes EpiPen, Thrombin, Levoxyl, Bicillin, Skelaxin and Flector Patch, among others.
- o IPR&D of approximately \$300 million, which includes Embeda, Vanquix and Remoxy, among others.

The recorded amounts are provisional and subject to change. Specifically, the following items are subject to change:

- o Amounts for intangibles and inventory, pending finalization of valuation efforts.
- o Amounts for income tax assets, receivables and liabilities, pending the filing of King's pre-acquisition tax returns and the receipt of information from taxing authorities, which may change certain estimates and assumptions used.
- o The allocation of goodwill among reporting units.

Our Financial Guidance for 2011

We forecast 2011 revenues of \$66.2 billion to \$67.2 billion, Reported diluted earnings per common share (EPS) of \$1.20 to \$1.30 and Adjusted diluted EPS of \$2.24 to \$2.29. The current exchange rates assumed in connection with the 2011 financial guidance are a blend of the actual exchange rates in effect during the first nine months of 2011 and the mid-October 2011 exchange rates for the remainder of the year. For an understanding of Adjusted income, see the “Adjusted Income” section of this MD&A.

A reconciliation of 2011 Adjusted income and Adjusted diluted EPS guidance to 2011 Reported Net income attributable to Pfizer Inc. and Reported diluted EPS attributable to Pfizer Inc. common shareholders guidance follows:

(\$ billions, except per share amounts)	Full-Year 2011 Guidance	
	Net Income(a)	Diluted EPS(a)
Adjusted income/diluted EPS(b) guidance	~\$17.7-\$18.1	~\$2.24-\$2.29
Purchase accounting impacts of transactions completed as of 10/2/11	(4.8)	(0.62)
Acquisition-related costs	(1.5-1.7)	(0.19-0.21)
Non-acquisition-related restructuring costs(c)	(2.0-2.2)	(0.25-0.28)
Gain on sale of and income from Capsugel discontinued operations(d)	1.3	0.17
Other Certain Significant Items	(0.8)	(0.10)
Reported Net income attributable to Pfizer Inc./diluted EPS guidance	~\$9.5-\$10.3	~\$1.20-\$1.30

(a) Does not assume the completion of any business-development transactions not completed as of October 2, 2011, including any one-time upfront payments associated with such transactions. Also excludes the potential effects of the resolution of litigation-related matters not substantially resolved as of October 2, 2011.

(b) For an understanding of Adjusted income, see the “Adjusted Income” section of this MD&A.

(c) Includes amounts related to our initiatives to reduce R&D spending, including our realigned R&D footprint, and amounts related to other cost-reduction and productivity initiatives. In our reconciliation between Net income attributable to Pfizer Inc., as reported under accounting principles generally accepted in the United States of America (U.S. GAAP), and Adjusted income, and in our reconciliation between diluted EPS, as reported under U.S. GAAP, and Adjusted diluted EPS, these amounts are categorized as Certain Significant Items (see the “Adjusted Income—Reconciliation” section of this MD&A).

(d) Includes revenues and expenses related to the Capsugel business as a discontinued operation through July 31, 2011.

For a description of our anticipated costs and savings associated with our cost-reduction initiatives, see the “Costs and Expenses—Costs Associated with Cost-Reduction and Productivity Initiatives and Acquisition Activity” section of this MD&A.

Our 2011 financial guidance is subject to a number of factors and uncertainties—as described in the “Our Operating Environment” and “Forward-Looking Information and Factors That May Affect Future Results” sections of this MD&A; Part II, Item 1A., “Risk Factors,” of this Form 10-Q; the “Our Operating Environment” and “Our Strategy” sections of our 2010 Financial Report, which is filed as Exhibit 13 to our 2010 Annual Report on Form 10-K; and Part I, Item 1A, “Risk Factors,” of our 2010 Annual Report on Form 10-K.

Our Financial Targets for 2012

We are targeting 2012 revenues of \$62.2 billion to \$64.7 billion, Reported diluted EPS between \$1.58 and \$1.73 and Adjusted diluted EPS between \$2.25 and \$2.35. The current exchange rates assumed in connection with the 2012 financial targets are the mid-October 2011 exchange rates. For an understanding of Adjusted income, see the “Adjusted Income” section of this MD&A.

A reconciliation of 2012 Adjusted income and Adjusted diluted EPS targets to 2012 Reported Net income attributable to Pfizer Inc. and Reported diluted EPS attributable to Pfizer Inc. common shareholders targets follows:

(\$ billions, except per share amounts)	Full-Year 2012 Targets	
	Net Income (a)	Diluted EPS (a)
Adjusted income/diluted EPS(b) targets	~\$17.2-\$17.9	~\$2.25-\$2.35
Purchase accounting impacts of transactions completed as of 10/2/11	(3.8)	(0.50)
Acquisition-related costs	(0.7-1.0)	(0.09-0.12)
Non-acquisition-related restructuring costs(c)	(0.3-0.4)	(0.03-0.05)

Reported Net income attributable to Pfizer Inc./diluted EPS targets ~\$12.0-\$13.1 ~\$1.58-\$1.73

- (a) Does not assume the completion of any business-development transactions not completed as of October 2, 2011, including any one-time upfront payments associated with such transactions. Also excludes the potential effects of the resolution of litigation-related matters not substantially resolved as of October 2, 2011.
- (b) For an understanding of Adjusted income, see the “Adjusted Income” section of this MD&A.
- (c) Includes amounts related to our initiatives to reduce R&D spending, including our realigned R&D footprint, and amounts related to other cost- reduction and productivity initiatives. In our reconciliation between Net income attributable to Pfizer Inc., as reported under U.S. GAAP, and Adjusted income, and in our reconciliation between diluted EPS, as reported under U.S. GAAP, and Adjusted diluted EPS, these amounts are categorized as Certain Significant Items (see the “Adjusted Income—Reconciliation” section of this MD&A).

For a description of our anticipated costs and savings associated with our cost-reduction initiatives, see the “Costs and Expenses—Costs Associated with Cost-Reduction and Productivity Initiatives and Acquisition Activity” section of this MD&A.

Our 2012 financial targets are subject to a number of factors and uncertainties—as described in the “Our Operating Environment” and “Forward-Looking Information and Factors That May Affect Future Results” sections of this MD&A; Part II, Item 1A., “Risk Factors,” of this Form 10-Q; the “Our Operating Environment” and “Our Strategy” sections of our 2010 Financial Report, which is filed as Exhibit 13 to our 2010 Annual Report on Form 10-K; and Part I, Item 1A, “Risk Factors,” of our 2010 Annual Report on Form 10-K.

Biopharmaceutical Revenues

Worldwide revenues from biopharmaceutical products for the third quarter of 2011 were \$14.7 billion, an increase of 6% compared to the third quarter of 2010, primarily due to:

the solid performance from Lipitor in the U.S. and from the Prevenar franchise, Lyrica and Enbrel;

revenues from legacy King biopharmaceutical products of approximately \$263 million; and

the favorable impact of foreign exchange of 6%,

partially offset by:

lower revenues from Lipitor in international markets and from Effexor XR, Protonix, Xalatan/Xalacom and Zosyn and lower Alliance revenues for Aricept, all due to loss of exclusivity in certain markets; and

a reduction in revenues of \$151 million due to the U.S. Healthcare Legislation.

Worldwide revenue from biopharmaceutical products for the first nine months of 2011 were \$43.6 billion, relatively flat compared to the first nine months of 2010, primarily due to:

lower revenues from Lipitor in international markets and from Effexor XR, Protonix, Xalatan/Xalacom and Zosyn and lower Alliance revenues for Aricept, all due to loss of exclusivity in certain markets; and

a reduction in revenues of \$357 million due to the U.S. Healthcare Legislation;

offset by:

the solid performance from Lipitor in the U.S. and from the Prevnar/Prevenar franchise, Lyrica and Enbrel;

revenues from legacy King biopharmaceutical products of approximately \$707 million; and

the favorable impact of foreign exchange of 3%.

Geographically,

in the U.S., revenues from biopharmaceutical products decreased 4% in the third quarter of 2011 and 7% in the first nine months of 2011, compared to the same periods in 2010.

The decreases in U.S. revenues from biopharmaceutical products in the third quarter and first nine months of 2011 reflect lower revenues from Protonix, Effexor XR, Zosyn, Xalatan, Vfend and Aromasin, all due to loss of exclusivity, lower Alliance revenues due to loss of exclusivity of Aricept 5mg and 10mg tablets in November 2010 and lower revenues from Detrol/Detrol LA, as well as the reduction in revenues of \$151 million in the third quarter of 2011 and \$357 million in the first nine months of 2011 due to the U.S. Healthcare Legislation. Also, Prevnar 13 revenues in the U.S. were lower in the third quarter of 2011 than in the third quarter of 2010 as fewer patients received the Prevnar 13 catch-up dose as the timeframe for eligibility has nearly expired. The impact of these adverse factors was partially offset by the strong performance of certain other biopharmaceutical products and the addition of U.S. revenues from legacy King products of approximately \$250 million in the third quarter and approximately \$677 million in the first nine months of 2011.

- in our international markets, revenues from biopharmaceutical products increased 14% in the third quarter of 2011 and 6% in the first nine months of 2011, compared to the same periods in 2010.

- oThe increases in international revenues from biopharmaceutical products in the third quarter and first nine months of 2011 reflect the favorable impact of foreign exchange of 11% in the third quarter of 2011 and 6% in the first nine months of 2011, as well as an operational increase of 3% in the third quarter of 2011. Operational revenues were flat in the first nine months of 2011. Operationally, revenues were favorably impacted by increases in the Prevenar franchise, Enbrel, Celebrex, Alliance revenues and, in the first nine months of 2011, Lyrica, and unfavorably impacted by declines in Lipitor and Effexor XR and, in the first nine months of 2011, Norvasc and Xalatan/Xalacom. International revenues from legacy King products were not significant to our international revenues in the third quarter or first nine months of 2011.

- oDuring the third quarter of 2011, revenues from international biopharmaceutical products represented 59% of total revenues from biopharmaceutical products, compared to 55% in the third quarter of 2010. During the first nine months of 2011, revenues from international biopharmaceutical products represented 58% of total revenues from biopharmaceutical products, compared to 55% in the first nine months of 2010.

Primary Care unit revenues increased 5% in the third quarter of 2011, compared to the same period last year, due to the favorable impact of foreign exchange of 5%. Primary Care unit revenues decreased 1% in the first nine months of 2011, compared to the same period last year, due to lower operational revenues of 4%, partially offset by the favorable impact of foreign exchange of 3%. Primary Care unit revenues in both periods were favorably impacted by higher revenues from certain patent-protected products, including Lipitor in the U.S., Celebrex, Lyrica, Pristiq and Spiriva (in Alliance revenues), among others, as well as the addition of revenues from legacy King products of \$119 million, or 2%, in the third quarter of 2011 and \$311 million, or 2%, in the first nine months of 2011. Operational revenues in both periods were negatively impacted by the loss of exclusivity of Lipitor in Canada in May 2010 and Spain in July 2010, as well as the loss of exclusivity of Aricept 5mg and 10mg tablets in the U.S. in November 2010. Taken together, the loss of exclusivity for these products in those markets reduced Primary Care unit revenues by approximately \$415 million, or 7%, in comparison with the third quarter of 2010 and by \$1.6 billion, or 9%, in comparison to the first nine months of 2010.

Specialty Care unit revenues increased 2% in the third quarter of 2011, compared to the same period last year, due to the favorable impact of foreign exchange of 7%, partially offset by lower operational revenues of 5%. For the first nine months of 2011, Specialty Care unit revenues increased 4%, compared to the same period last year, due to the favorable impact of foreign exchange of 4%. Operational revenues were favorably impacted by strong growth in Enbrel in both periods, the Prevenar franchise in international markets in the third quarter of 2011 and the Prevnar/Prevenar franchise in U.S. and international markets in the first nine months of 2011, and unfavorably impacted by a decline in Prevnar 13 revenues in the U.S. in the third quarter of 2011, as fewer patients received the Prevnar 13 catch-up dose as the timeframe for eligibility has nearly expired, as well as the loss of exclusivity of Vfend and Xalatan in the U.S. in February and March 2011, respectively. Collectively, the loss of exclusivity for these products reduced Specialty Care unit revenues by \$214 million, or 6%, in comparison with the third quarter of 2010 and by \$420 million, or 4% in comparison with the first nine months of 2010.

Emerging Markets unit revenues increased 18% in the third quarter of 2011, compared to the same period last year, due to higher operational revenues of 12%, as well as a 6% favorable impact of foreign exchange. For the first nine months of 2011, Emerging Markets unit revenues increased 12%, compared to the same period last year, due to higher operational revenues of 8%, as well as a 4% favorable impact of foreign exchange. The increases in Emerging Markets unit operational revenues in the third quarter and first nine months of 2011 was due to growth in certain key innovative brands, primarily the Prevenar franchise, Celebrex, Enbrel, Lyrica, Vfend and Zyvox. These increases were partially offset by lower revenues from Lipitor, which lost exclusivity in Brazil in August 2010 and Mexico in December 2010, and Viagra, which lost exclusivity in Brazil in June 2010, as well as the impact of price reductions for certain products in certain emerging market countries. The losses of exclusivity reduced Emerging Market unit revenues by \$30 million, or 1%, in comparison with third-quarter 2010 and by \$105 million, or 2%, in comparison with the first nine months of 2011.

Established Products unit revenues:

increased 3% in the third quarter of 2011, compared to the same period last year, due to the favorable impact of foreign exchange of 7%, partially offset by lower operational revenues of 4%. For the third quarter of 2011, Established Product unit revenues were mainly impacted by the loss of exclusivity of Protonix and Zosyn in the U.S., which taken together reduced Established Products unit revenues by \$242 million, or 11%, in comparison with third-quarter 2010. This decline was more than offset by the favorable impact of foreign exchange and by \$144 million, or 7%, from the addition of legacy King products.

decreased 10% in the first nine months of 2011, compared to the same period last year, due to lower operational revenues of 14%, partially offset by a 4% favorable impact of foreign exchange. The decrease in Established Products unit operational revenues in the first nine months of 2011 was mainly due to the U.S. loss of exclusivity of

Effexor XR, Protonix and Zosyn. Taken together, the loss of exclusivity for these products decreased Established Products unit revenues by \$1.5 billion, or 20%, in comparison with the first nine months of 2010. These declines were partially offset by the addition of revenues from legacy King products of \$396 million, or 5%, in the first nine months of 2011.

Total revenues from established products in both the Established Products and Emerging Markets units were \$3.2 billion, with \$996 million generated in emerging markets, in the third quarter of 2011, and were \$9.8 billion, with \$2.9 billion generated in emerging markets, in the first nine months of 2011.

Oncology unit revenues decreased 1% in the third quarter of 2011, compared to the same period last year, due to lower operational revenues of 9%, partially offset by the favorable impact of foreign exchange of 8%. For the first nine months of 2011, Oncology unit revenues decreased 6%, compared to the same period last year, due to lower operational revenues of 10%, partially offset by the favorable impact of foreign exchange of 4%. The decreases in the Oncology unit operational revenues in the third quarter and first nine months of 2011 were primarily due to the transfer of Aromasin's U.S. business to the Established Products unit effective January 1, 2011 as a result of its loss of exclusivity in April 2011.

Effective January 1, 2011 and July 1, 2011, we increased the published prices for certain U.S. biopharmaceutical products. These price increases had no material effect on wholesaler inventory levels in comparison to the prior year.

Other Product Revenues

Animal Health

Animal Health unit revenues increased 21% in the third quarter of 2011, compared to the same period in 2010, reflecting higher operational revenues of 15% and the favorable impact of foreign exchange of 6%. Operational revenues from Animal Health products were favorably impacted by approximately \$90 million, or 10%, due to the addition of revenues from legacy King animal health products. The other 5% operational growth primarily resulted from improving economic conditions and resulting increased demand for products across the livestock business, as well as deeper market penetration in emerging markets.

Animal Health unit revenues increased 18% in the first nine months of 2011, compared to the same period in 2010, reflecting higher operational revenues of 14% and the favorable impact of foreign exchange of 4%. Operational revenues from Animal Health products were favorably impacted by approximately \$225 million, or 9%, due to the addition of revenues from legacy King animal health products. The other 5% operational growth primarily resulted from the aforementioned factors that impacted third-quarter 2011 revenues.

Consumer Healthcare

Consumer Healthcare unit revenues increased 15% in the third quarter of 2011, compared to the same period in 2010, reflecting higher operational revenues of 11% and the favorable impact of foreign exchange of 4%. The operational revenue increase was primarily driven by the non-recurrence of a third quarter 2010 provision for returns associated with the voluntary withdrawal of Centrum in Europe pertaining to a labeling issue, and the U.S. launch of new dietary supplements in the third quarter of 2011. Consumer Healthcare unit revenues increased 11% in the first nine months of 2011, compared to the same period in 2010, reflecting higher operational revenues of 8% and the favorable impact of foreign exchange of 3%. The operational revenue increase was primarily driven by the aforementioned factors that impacted third-quarter 2011 results as well as respiratory products benefitting from a strong cough/cold season in comparison to the same period in 2010 and Advil Congestion Relief, which launched in the third quarter of 2010.

Nutrition

Nutrition unit revenues increased 31% in the third quarter of 2011, compared to the same period in 2010, reflecting higher operational revenues of 24% and the favorable impact of foreign exchange of 7%. The operational revenue increase was primarily in China and the Middle East, from increased demand for premium products and launches of new products.

Nutrition unit revenues increased 12% in the first nine months of 2011, compared to the same period in 2010, reflecting higher operational revenues of 7% and the favorable impact of foreign exchange of 5%. The operational growth primarily resulted from the aforementioned factors that impacted third-quarter 2011 revenues.

Rebates and Chargebacks

As is typical in the pharmaceutical industry, our gross product sales are subject to a variety of deductions, which are generally estimated and recorded in the same period that the revenues are recognized, and primarily represent rebates and discounts to government agencies, wholesalers, distributors and managed care organizations for our pharmaceutical products. These deductions represent estimates of the related obligations and, as such, judgment and knowledge of market conditions and practice are required when estimating the impact of these sales deductions on gross sales for a reporting period. Historically, our adjustments to actual results have not been material to our overall business. On a quarterly basis, our adjustments to actual results generally have been less than 1% of

biopharmaceutical product net sales and can result in either a net increase or a net decrease in revenues and income. Product-specific rebate charges, however, can have a significant impact on year-over-year individual product growth trends.

Rebates and chargebacks reduced revenues as follows:

(millions of dollars)	Three Months Ended		Nine Months Ended	
	Oct. 2, 2011	Oct. 3, 2010	Oct. 2, 2011	Oct. 3, 2010
Medicaid and related state program rebates(a)	\$307	\$314	\$1,081	\$955
Medicare rebates(a)	372	343	1,099	912
Performance-based contract rebates(a), (b)	723	597	2,227	1,891
Chargebacks(c)	813	744	2,416	2,224
Total	\$2,215	\$1,998	\$6,823	\$5,982

(a) Rebates are product-specific and, therefore, for any given year are impacted by the mix of products sold as well as the loss of exclusivity of branded products.

(b) Performance-based contracts are with managed care customers, including health maintenance organizations and pharmacy benefit managers, who receive rebates based on the achievement of contracted performance terms for products.

(c) Chargebacks primarily represent reimbursements to wholesalers for honoring contracted prices to third parties.

The total rebates and chargebacks for the third quarter and first nine months of 2011 were higher than the same periods last year, primarily as a result of:

the impact of increased Medicaid rebate rates due to the U.S. Healthcare Legislation, in addition to higher rates for certain products that are subject to rebates;

the impact of increased Medicare rebates under the U.S. Healthcare Legislation due to discounts to Medicare Part D participants who are in the Medicare "Coverage Gap"; and

an increase in chargebacks for our branded products as a result of increasing competitive pressures and increasing sales for certain branded products and certain generic products sold by our Greenstone unit that are subject to chargebacks,

partially offset by:

changes in product mix;

the impact of decreased Medicare rebates for certain products that have lost exclusivity; and

the impact on chargebacks of decreased sales for products that have lost exclusivity, among other factors.

Our accruals for Medicaid rebates, Medicare rebates, performance-based contract rebates and chargebacks totaled \$3.3 billion as of October 2, 2011, an increase from \$3.0 billion as of December 31, 2010, and primarily are included in Other current liabilities in our Condensed Consolidated Balance Sheets.

Selected Revenues from Biopharmaceutical Products

Revenue information for several of our major biopharmaceutical products follows:

		Three Months Ended		Nine Months Ended

Biopharmaceutical—Selected Product Descriptions

Lipitor, for the treatment of elevated LDL cholesterol levels in the blood, is the most widely used branded prescription treatment for lowering cholesterol. Lipitor recorded worldwide revenues of \$2.6 billion, or an increase of 3%, in the third quarter of 2011 compared to the same period in 2010 due to:

o the favorable impact of foreign exchange, which increased revenues by \$124 million in the third quarter of 2011; and

o continued brand promotion in the U.S. to maximize opportunities both pre- and post-loss of exclusivity,

partially offset by:

o the impact of loss of exclusivity in Canada in May 2010, Spain in July 2010, Brazil in August 2010 and Mexico in December 2010;

o the continuing impact of an intensely competitive lipid-lowering market, with competition from generics and branded products worldwide; and

o increased payer pressure worldwide, including the need for flexible rebate policies.

In the first nine months of 2011, Lipitor recorded worldwide revenues of \$7.6 billion, or a decrease of 6%, compared to the same period in 2010, due to the same factors discussed above, including the favorable impact of foreign exchange of \$229 million.

Geographically,

o in the U.S., Lipitor revenues were \$1.5 billion, or an increase of 13%, in the third quarter of 2011, and \$4.2 billion, or an increase of 7%, in the first nine months of 2011, compared to the same periods in 2010. These increases were driven by price increases on January 1 and July 1, 2011; and

o in our international markets, Lipitor revenues were \$1.1 billion, or a decrease of 8%, in the third quarter of 2011, and \$3.4 billion, or a decrease of 19%, in the first nine months of 2011, compared to the same periods in 2010. The decreases were primarily due to the loss of exclusivity in several markets in 2010 referred to above. The impact of foreign exchange increased international revenues by 10% in the third quarter of 2011 and 5% in the first nine months of 2011, compared to the same periods in 2010.

See the “Our Operating Environment” section of this MD&A for a discussion concerning the expected loss of exclusivity for Lipitor in various markets.

Prevnar/Prevenar 13 Pediatric is our 13-valent pneumococcal conjugate vaccine for preventing invasive pneumococcal disease in infants and young children. Prevnar/Prevenar 13 recorded increases in worldwide revenues of 37% in the third quarter of 2011 and 78% in the first nine months of 2011, compared to the same periods in 2010. In the U.S., Prevnar 13 revenues declined 16% in the third quarter of 2011 compared to the year-ago quarter as fewer patients received the Prevnar 13 catch-up dose as the timeframe for eligibility has nearly expired. To date, Prevnar/Prevenar 13 has been approved in over 110 countries and launched in over 100 of those countries. The launch of Prevnar/Prevenar 13 has resulted in a reduction of our Prevnar/Prevenar (7-valent) revenues (see discussion below). We expect this trend to continue.

Enbrel, for the treatment of moderate-to-severe rheumatoid arthritis, polyarticular juvenile rheumatoid arthritis, psoriatic arthritis, plaque psoriasis and ankylosing spondylitis, a type of arthritis affecting the spine, recorded increases in worldwide revenues, excluding the U.S. and Canada, of 20% in the third quarter of 2011 and 14% in the first nine months of 2011, compared to the same periods in 2010, primarily due to increased penetration of Enbrel in developed Europe and developed Asia. Enbrel revenues from the U.S. and Canada are included in Alliance revenues.

Under our co-promotion agreement with Amgen Inc. (Amgen), we co-promote Enbrel in the U.S. and Canada and share in the profits from Enbrel sales in those countries, recorded as Alliance revenues. The co-promotion term is scheduled to end in October 2013, and, subject to the terms of the agreement, we are entitled to a royalty stream for 36 months thereafter, which will be significantly less than our current share of Enbrel profits from U.S. and Canadian sales. Following the end of the royalty period, we will not be entitled to any further Alliance revenues from Enbrel sales in the U.S. and Canada. Our exclusive rights to Enbrel outside the U.S. and Canada will not be affected by the expiration of the co-promotion agreement with Amgen.

Lyrica, indicated for the management of post-herpetic neuralgia (PHN), diabetic peripheral neuropathy (DPN), fibromyalgia, and as adjunctive therapy for adult patients with partial onset seizures in the U.S., and for peripheral and dental neuropathic pain, adjunctive treatment of epilepsy and general anxiety disorder (GAD) in certain countries outside the U.S., recorded increases in worldwide revenues of 27% in the third quarter of 2011 and 20% in the first nine months of 2011, compared to the same periods in 2010. Lyrica had a strong operational performance in international markets in the third quarter of 2011, including Japan, where Lyrica was launched in 2010 as the first product approved for the peripheral neuropathic pain indication. In the U.S., revenues increased 6% in the third quarter of 2011 and 4% in the first nine months of 2011, compared to the same periods in 2010. Notwithstanding these increases, U.S. revenues continue to be affected by increased competition from generic versions of competitive medicines, as well as managed care pricing and formulary pressures.

Celebrex, indicated for the treatment of the signs and symptoms of osteoarthritis and rheumatoid arthritis worldwide and for the management of acute pain in adults in the U.S. and certain markets in the EU, recorded increases in worldwide revenues of 11% in the third quarter of 2011 and 6% in the first nine months of 2011, compared to the same periods in 2010. In the U.S., revenues were up 4% in the third quarter of 2011 and were flat in the first nine months of 2011, compared to the same periods in 2010, reflecting increased competition from generic versions of competitive medicines and managed care formulary pressures. Celebrex is supported by continued educational and promotional efforts highlighting its efficacy and safety profile for appropriate patients.

Viagra remains the leading treatment for erectile dysfunction. Viagra worldwide revenues increased 7% in the third quarter of 2011 and 2% in the first nine months of 2011, compared to the same periods in 2010. In the U.S., Viagra revenues increased 1% in the third quarter of 2011 and were relatively flat in the first nine months of 2011, compared to the same periods in 2010. Internationally, Viagra revenues increased 15% in the third quarter of 2011, primarily due to the favorable impact of foreign exchange, and 4% in the first nine months of 2011, due to the favorable impact of foreign exchange, compared to the same periods in 2010.

Norvasc, for treating hypertension, lost exclusivity in the U.S. and other major markets a few years ago. Norvasc worldwide revenues increased 6% in the third quarter of 2011, due to the favorable impact of foreign exchange, and decreased 3% in the first nine months of 2011, compared to the same periods in 2010.

Zyvox is the world's best-selling branded agent for the treatment of certain serious Gram-positive pathogens, including Methicillin-Resistant Staphylococcus-Aureus (MRSA). Zyvox worldwide revenues increased 13% in the third quarter and 10% in the first nine months of 2011, compared to the same periods in 2010, primarily due to growth in emerging markets as well as growth in certain other markets driven by secondary bacterial infections arising from the stronger flu season in 2011.

Xalabrand consists of Xalatan, a prostaglandin, the world's leading branded agent to reduce elevated eye pressure in patients with open-angle glaucoma or ocular hypertension, and Xalacom, a fixed combination prostaglandin (Xalatan) and beta blocker (timolol) that is available outside the U.S. Xalatan/Xalacom worldwide revenues decreased 33% in the third quarter of 2011 and 25% in the first nine months of 2011, compared to the same periods in 2010. Lower revenues in the U.S. are due to the loss of exclusivity in March 2011. Lower operational revenues internationally are due to the launch of generic latanoprost (generic Xalatan) in Japan in May 2010 and in Italy in July 2010. As a result of pediatric extensions, the exclusivity period for Xalatan and Xalacom has been extended from July 2011 to January 2012 in 15 major European markets.

Sutent is for the treatment of advanced renal cell carcinoma and gastrointestinal stromal tumors after disease progression on, or intolerance to, imatinib mesylate, and advanced pancreatic neuroendocrine tumor. Sutent worldwide revenues increased 16% in the third quarter of 2011 and 13% in the first nine months of 2011, compared to the same periods in 2010, due to strong operational performance and the favorable impact of foreign exchange. We continue to drive total revenue and prescription growth, supported by cost-effectiveness data and efficacy data in first-line metastatic renal cell carcinoma (mRCC)—including two-year survival data, which represent the first time that overall survival of two years has been seen in the treatment of advanced kidney cancer, as well as through increasing access and healthcare coverage. As of October 2, 2011, Sutent was the best-selling medicine in the world for the treatment of first-line mRCC.

Our Premarin family of products remains the leading therapy to help women address moderate-to-severe menopausal symptoms. It recorded an increase in worldwide revenues of 2% in the third quarter of 2011 and a decrease of 3% in the first nine months of 2011, compared to the same periods in 2010.

Geodon/Zeldox, an atypical antipsychotic, is indicated for the treatment of schizophrenia, as monotherapy for the acute treatment of bipolar manic or mixed episodes, and as an adjunct to lithium or valproate for the maintenance treatment of bipolar disorder. Geodon worldwide revenues were relatively flat in the third quarter of 2011 and decreased 1% in the first nine months of 2011, compared to the same periods in 2010, which reflects higher rebates in the first nine months of 2011 due to the impact of the U.S. Healthcare Legislation and moderate growth in the U.S. antipsychotic market.

Detrol/Detrol LA, a muscarinic receptor antagonist, is the most prescribed branded medicine worldwide for overactive bladder. Detrol LA is an extended-release formulation taken once a day. Detrol/Detrol LA worldwide revenues declined 10% in the third quarter of 2011 and 12% in the first nine months of 2011, compared to the same periods in 2010, primarily due to increased competition from other branded medicines and a shift in promotional focus to our Toviaz product in most major markets.

Genotropin, the world's leading human growth hormone, is used in children for the treatment of short stature with growth hormone deficiency, Prader-Willi Syndrome, Turner Syndrome, Small for Gestational Age Syndrome, Idiopathic Short Stature (in the U.S. only) and Chronic Renal Insufficiency (outside the U.S. only), as well as in adults with growth hormone deficiency. Genotropin is supported by a broad platform of innovative injection-delivery devices. Genotropin worldwide revenues increased 2% in the third quarter of 2011 and 1% in the first nine months of 2011, compared to the same periods in 2010, due to the favorable impact of foreign exchange.

Vfend is the only branded antifungal agent available in intravenous and oral forms. Vfend worldwide revenues decreased 15% in the third quarter of 2011 and 6% in the first nine months of 2011, compared to the same periods in 2010. While international revenues of Vfend continued to be driven in 2011 by its acceptance as an excellent broad-spectrum agent for treating yeast and molds, revenues in the U.S. declined primarily due to a loss of exclusivity of Vfend tablets and the launch of generic voriconazole (generic Vfend) in February 2011.

Chantix/Champix is a treatment for smoking cessation in adults. Chantix/Champix worldwide revenues decreased 4% in the third quarter of 2011 and increased 4% in the first nine months of 2011, compared to the same periods in 2010. Revenues in the first nine months of 2011 were favorably impacted by strong operational performance in international markets, and revenues in the third quarter and first nine months of 2011 were favorably impacted by foreign exchange, partially offset by the impact of changes to the product's label and other factors, especially in the U.S. We are continuing our educational and promotional efforts, which are focused on the Chantix benefit-risk proposition, the significant health consequences of smoking and the importance of the physician-patient dialogue in helping patients quit smoking.

In July 2011, the U.S. prescribing information was revised to include clinical data showing that Chantix is an effective aid to smoking cessation treatment for smokers with stable cardiovascular disease (CVD) and mild-to-moderate chronic obstructive pulmonary disease. The revised label now also includes a warning/precaution advising smokers with CVD to inform their physician of any new or worsening symptoms of cardiovascular disease, and to seek emergency medical help if they experience any symptoms of a heart attack. This safety information was added at the FDA's request following an observation of a small numeric increase in certain cardiovascular events in patients treated with Chantix versus those taking a placebo in a study of 700 smokers with stable cardiovascular disease. Approval of the EU labeling, revised at the European Medicines Agency's request to include a similar cardiovascular-related warning/precaution, is expected by December 2011, and approval of the Japan labeling, which includes a similar precaution, occurred in late October 2011.

Effexor XR (extended release capsules), an antidepressant for treating adult patients with major depressive disorder, GAD, social anxiety disorder and panic disorder, recorded decreases in worldwide revenues of 6% in the third quarter of 2011 and 64% in the first nine months of 2011, compared to the same periods in 2010. Effexor XR faces generic competition outside the U.S., and it has faced generic competition in the U.S. since July 1, 2010. This generic competition had a negative impact in the third quarter and first nine months of 2011, and will continue to have a significant adverse impact on our revenues for Effexor XR.

BeneFIX and ReFacto AF/Xyntha are hemophilia products that use state-of-the-art manufacturing to assist patients with this lifelong bleeding disorder. BeneFIX is the only available recombinant factor IX product for the treatment of hemophilia B, while ReFacto AF/Xyntha are recombinant factor VIII products for the treatment of hemophilia A. Both products are indicated for the control and prevention of bleeding in patients with these disorders and in some countries also are indicated for prophylaxis in certain situations, such as surgery. BeneFIX recorded increases in worldwide revenues of 14% in the third quarter and 9% in the first nine months of 2011, compared to the same periods in 2010. ReFacto AF/Xyntha recorded increases in worldwide revenue of 37% in the third quarter of 2011 and 31% in the first nine months of 2011, compared to the same periods in 2010. The increases for all of these

products were due to strong operational performance and the favorable impact of foreign exchange.

Zosyn/Tazocin, our broad-spectrum intravenous antibiotic, faces generic competition in the U.S. and certain other markets. It recorded decreases in worldwide revenues of 42% in the third quarter of 2011 and 35% in the first nine months of 2011, compared to the same periods in 2010.

Caduet is a single-pill therapy combining Norvasc and Lipitor. Caduet worldwide revenues increased 18% in the third quarter of 2011 and 12% in the first nine months of 2011, compared to the same periods in 2010, due to strong operational performance in international markets and the favorable impact of foreign exchange, partially offset by increased generic competition, as well as an overall decline in U.S. hypertension market volume. We expect that Caduet will lose exclusivity in the U.S. on November 30, 2011.

Pristiq was approved for the treatment of major depressive disorder in the U.S. in February 2008 and subsequently was approved for that indication in 29 other countries. Pristiq has also been approved for treatment of moderate-to-severe vasomotor symptoms (VMS) associated with menopause in Thailand, Mexico, Ecuador and the Philippines. Pristiq recorded increases in worldwide revenues of 24% in the third quarter and in the first nine months of 2011, compared to the same periods in 2010. These increases were driven by promotional activities in the U.S., and targeted international markets where Pristiq was recently launched. The activities are designed to educate physicians and pharmacists about the benefit-risk profile of Pristiq.

Prevnar/Prevenar (7-valent), our 7-valent pneumococcal conjugate vaccine for preventing invasive pneumococcal disease in infants and young children, recorded decreases in worldwide revenues of 45% in the third quarter of 2011 and 61% in the first nine months of 2011, compared to the same periods in 2010. Many markets have transitioned from the use of Prevnar/Prevenar (7-valent) to Prevnar/Prevenar 13 (see discussion above), resulting in lower revenues for Prevnar/Prevenar (7-valent). We expect this trend to continue.

Revatio, for the treatment of PAH, had increases in worldwide revenues of 21% in the third quarter and 12% in the first nine months of 2011, compared to the same periods in 2010, due in part to increased PAH awareness driving earlier diagnosis in the U.S. and EU and the favorable impact of foreign exchange.

Protonix, our proton pump inhibitor for erosive gastroesophageal reflux disease, recorded decreases in revenues of 68% in the third quarter of 2011 and 69% in the first nine months of 2011, compared to the same periods in 2010. We have an exclusive license from Nycomed GmbH to sell Protonix in the U.S., where it faces generic competition as the result of at-risk launches by certain generic manufacturers that began in December 2007 and the expiration of the basic U.S. patent (including the six-month pediatric exclusivity period) in January 2011.

Alliance revenues worldwide decreased 12% in the third quarter of 2011 and 14% in the first nine months of 2011, compared to the same periods in 2010, mainly due to the loss of exclusivity for Aricept 5mg and 10mg tablets in the U.S. in November 2010, partially offset by the strong performance of Spiriva and Enbrel in the U.S. and Canada. We expect that the Aricept 23mg tablet will have exclusivity
