Item 8.01. Other Events

Letter From Robert Child - Executive Assistant To The CEO

Lamperd Delivers newly Improved Products

Lamperd Less Lethal (LLLI) has delivered the first, significant quantity of its newly developed, breathable outer vest system. This system was developed so that officers on long public order assignments could function in a more comfortable environment. As well as being breathable, the vest can be fitted with any of a large variety of available pouches and can thus be customized for the exact needs of the specific force. In particular, the vest can easily accommodate LLLI's extremely light handgun - the Defender 1. The use of Defender 1 significantly lightens the load for officers compared to the much heavier rifles they often carry. The vest is 100% made in Canada at Lamperd's own plant in Sarnia, Ontario. This allows LLLI to ensure the quality of every product and its components.

At the same time LLLI is pleased to announce a new feature for officers using the Defender 1. Rounds for the Defender 1 are now available with color coding so that an officer can easily and quickly identify which rounds are loaded in the Defender 1. Lamperd is pleased to provide "everything you need to keep the situation under control."

Details of each of these new product advancements are available on the LLLI website at www.lamperdlesslethal.com. Specific design possibilities can be discussed by calling LLLI at the Sarnia facility - 519-344-4445, or questions can be sent via email to info@lamperdlesslethal.com.
