The following text is the English version

*of a news release issued in
Germany*

by HSBC Trinkaus & Burkhardt, a 78.6 per cent indirectly owned subsidiary of HSBC Holdings plc.

20 May 2008

**HSBC TRINKAUS & BURKHARDT
AG
FIRST QUARTER 2008 RESULTS**

- First quarter 2008 operating profit of €52.2 million
- Net profit after tax for the period of €34.6 million
- 38% increase in net interest income to €28.3 million

Overview

Despite the continuing turbulence in global capital markets, the bank reported

an operating profit of €52.2 million (Q1 2007: €61.5 million) and net profit

after tax of €34.6 million

(Q1 2007: €41.5 million) for the first quarter of 2008

These figures represent declines of 15.1 per cent and 16.6 per cent respectively, compared to the same quarter of last year,

which
was one of the best in the
bank's history.

Financial commentary

Net interest income
grew strongly, up

38.0 per cent
to €28.3 million (Q1 2007: €20.5 million). This growth was due predominantly to a higher level of customer deposits
which was
utilised to fund
an increase in loans and advances to customers.

Net loan
impairment and other credit risk
provisions of €1.2 million
(Q1 2007: €
0.4 million)
can be

attributed
mainly to an increase in collective impairment provisions. HSBC Trinkaus continues
to apply
a
conservative
default risk assessment policy

Net
fee
income

in the first quarter of 2008
at
€90.0 million

compared to €89.2 million
for the first quarter of 2007. This
includes

a €10.7 million contribution from International Transaction Services GmbH (ITS),
which is included
in the consolidated figures for the first time.

N
et trading income of €33.5 million
represent
ed

a decline of 10.7 per cent
compared to the figure of €37.5 million reported for Q1 2007. This is
mainly
due to a
fall

in
the
trading
of
interest
rate
product
s

and foreign currency. Income from equities and equity/index derivati
ves trading was 4.0 per cent
up on the Q1 2007 result
a
t €28.5 million.

Administrative expenses
in the first quarter of 2008
increased by 12.1%
compared to the same quarter in 2007
, from €88.6 million

to €99.3 million, mainly as a result of the
inclusion
of ITS
. At 65.5 per cent

,
the cost:income ratio was
14.5% higher than in the same period in 2007 (Q1 2007: 57.2%)
but
still at the lower end of the
acceptable

ran
ge for our business model of 65 per cent to 70 per cent
.

Results by business segment

The
business se

gment
s experienced
varying performance in the first quarter of 2008. The
wider
effects of the subprime crisis on the financial markets had little impact on Co
r
porate Banking
,
which improve
d
on its
previous
year result. However, the other two client se
ctors, Private and Institutional Banking,
and Global Markets were
unable
to
overcome
fully
the
difficult
market conditions
and
therefore
did
not repeat the
record
results
of
the first quarter of 2007.

In Corporate Banking, net interest income rose as a result of a considerable increase in sight deposits and lending
volumes

,
along with

an increase in deposit

margin

s

. There was also a substantial increase in net

fee

income.

Transaction revenues in the securities business declined in the Private Banking
business,

due to the

caution

shown by many investors in the adverse market environment. However, this decline was compensated by higher revenues in other areas such as Asset Management.

In Institutional Banking

, there was a slight increase in revenues as a result of increased business in securities, alternative investments and custody. Although not matching its performance in the same period in 2007

, despite the unfavourable market conditions, Global Markets

made a strong contribution to revenue in the first quarter of 2008 of

€26.1 million.

Outlook

HSBC Trinkaus performed well during the difficult first quarter of 2008

. T he

b ank's clear and consistent strategy of continuity in personnel and relationship management geared exclusively to the client

proved to be an important factor. The

b ank's financial

strength gives it every reason to be optimistic about the future and it intends to sustain its 2007 level of performance during 2008.

This aim will be supported by the bank's beneficial relationship with the wider HSBC Group

, which will be used

further

to expand market shares within the clearly-defined target groups - private clients, corporate clients and institutional clients.
