Risk and capital management (continued)

Funding and liquidity risk

The objective of the Group's funding and liquidity management framework is to ensure that at all times the Group can meet its obligations as they fall due. Liquidity management within the Group specifies prudent limits and controls over risk arising from maturity mismatch across the balance sheet and exposure to undrawn commitments or contingent obligations.

The Group has a highly diversified funding structure which avoids excessive reliance on any particular source. Funding is raised through various distribution channels, from a wide range of investors and clients.

The table below shows the composition of the Group's primary funding sources, excluding repurchase agreements.

	30 September 2010		30 June 2010		31 December 2009	
	£m	%	£m	%	£m	%

	763,798	100.0	762,344	100.0	807,760	100.0

Key points

- The Group has continued to reduce reliance on wholesale funding and diversify funding sources. Debt securities in issue increased as issuance of long-term debt securities and securitisation of UK retail mortgages exceeded maturities in the period. Deposits by banks decreased by 17% in Q3 2010.
- The Group has increased the proportion of its funding from customer deposits during 2010, from 51% at 31 December 2009 to 55% at 30 September 2010.

The Group was able to reduce short-term unsecured wholesale borrowing by £20 billion to £178 billion (including £77 billion of deposits from banks) from £198 billion at 30 June 2010 (including £92 billion of deposits from banks). The successful medium-term notes, covered bond and RMBS issuances in the quarter contributed to this reduction. These programmes tapped markets in multiple currencies, geographies and maturities. The impact was to strengthen the overall liability structure of the Group.

Further, during Q3 2010, US Retail & Commercial and RBS N.V. reduced their G10 government securities as part of their respective balance sheet restructurings.
- The Group is targeting a total liquidity portfolio of £150 billion as part of its strategic plan. However, the final level will be influenced by balance sheet size, maturity profile and regulatory requirements.

Key point

- The loan to deposit ratio improved by 200 basis points in Q3 2010 to 126% and the customer funding gap narrowed by £11 billion to £107 billion at 30 September 2010, due primarily to a reduction in Non-Core customer loans.
