Explanatory Note

The registrant hereby amends its annual report on Form 20-F for the year ended March 31, 2005, which was filed with the Securities and Exchange Commission (the SEC) on September 26, 2005 (the original filing date). The purpose of this amendment is to reflect the revision of the disclosures concerning (1) the registrant's iron ore and coal production tonnages and (2) its iron ore and coal reserve tonnages, which are set forth under D. Property, Plants and Equipment of Item 4. Information on the Company, in response to comments raised by the SEC. Except for the amended disclosures set forth herein, this Amendment No. 1 to the annual report on Form 20-F continues to describe conditions as of the original filing date, and the registrant has not modified or updated the disclosures contained in the original annual report to reflect events, results or developments that occurred after the original filing date. Among other things, forward-looking statements contained in the original annual report on Form 20-F have not been revised to reflect events, results or developments that occurred or facts that became known to the registrant after the original filing date, and such forward-looking statements should be read in their historical context.

PART II

Item 15. Controls and Procedures.

Disclosure Controls and Procedures

In connection with the original filing of our annual report on Form 20-F for the year ended March 31, 2005, our management, with the participation of its principal executive and principal financial officers, performed an evaluation of the effectiveness of disclosure controls and procedures (as defined by Rule 13a-15(e) under the U.S. Securities Exchange Act of 1934) as of the end of the period covered by the annual report. Based upon that evaluation, our principal executive and principal financial officers concluded that the disclosure controls and procedures were effective as of the end of the period covered by the annual report. In connection with the filing of this amendment to the annual report, our management, with the participation of its principal executive and principal financial officers, performed a reevaluation of the effectiveness of disclosure controls and procedures as of the end of the period covered by the annual report. Based upon that reevaluation, which included examination of the process for gathering and summarizing the information relating to our mining activities, our principal executive and principal financial officers have concluded that the disclosure controls and procedures were effective as of the end of the period covered by the annual report.

There was no change in our internal control over financial reporting that occurred during the period covered by the annual report that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting. In November 2004, Mitsui has completed the implementation of a new enterprise resource planning system based on SAP R/3, which records contracts, controls delivery of goods, manages settlement and runs financial reporting applications.
