Actuate Corporation

(Exact name of Registrant as specified in its charter)

Edgar Filing: ACTUATE CORP - Form 10-Q

Delaware
(State of incorporation)

94-3193197
(I.R.S. Employer Identification No.)

2207 Bridgepointe Parkway, Suite 500

San Mateo, California 94404

(650) 645-3000

(Address, including zip code, and telephone number,

including area code, of Registrant's principal executive offices)

Former name, former address and former fiscal year, if changed since last report: None

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock as of the latest practicable date.

Title of Class	Outstanding as of September 30, 2008

ACTUATE CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

1. Summary of Significant Accounting Policies

Basis of Presentation

The consolidated financial statements include the accounts of Actuate Corporation and its wholly-owned and majority-owned subsidiaries. Actuate has offices throughout North America, Europe and Asia including offices in Switzerland, the United Kingdom, France, Germany, Singapore, Japan, and China. All intercompany balances and transactions have been eliminated.

As of September 30, 2008, Actuate owns approximately 88% of the outstanding voting stock of Actuate Japan Company Ltd. (Actuate Japan). The Company has consolidated the results of Actuate Japan from the date that it became the majority shareholder, which occurred in fiscal year 2000. Accumulated losses applicable to the minority shareholders exceed their equity capital in Actuate Japan and as a result, there is no minority interest presented on the accompanying consolidated balance sheets. This excess loss applicable to the minority shareholders has been charged to Actuate, as the minority shareholders are not obligated to contribute their share of losses exceeding their equity capital.

Revenue Recognition

Actuate generates revenues from sales of software licenses and related services. The Company receives software license revenues from licensing its products directly to end-users and indirectly through resellers, system integrators and original equipment manufacturers (OEMs). The Company receives service revenues from maintenance contracts, consulting services and training that Actuate performs for customers.

Actuate recognizes revenues in accordance with AICPA Statement of Position (SOP) 97-2 (SOP 97-2), *Software Revenue Recognition*, as amended and modified by SOP 98-9, *Modification of SOP 97-2, Software Revenue Recognition, With Respect to Certain Transactions*. For sales to end-user customers, Actuate recognizes license revenues when a license agreement has been signed by both parties or a definitive agreement has been received from the customer, the product has been shipped, there are no unusual uncertainties surrounding the product acceptance, the fees are fixed or determinable, collectibility is probable and vendor-specific objective evidence of fair value exists to allocate the fee to the undelivered elements of the arrangement. Vendor-specific objective evidence of sales to end users is based on the price charged when an element is sold separately. Actuate has not established vendor-specific objective evidence of fair value for its licenses. Therefore, the Company recognizes revenues from arrangements with multiple elements involving software licenses under the residual method. If the license agreement contains payment terms that would indicate that the fee is not fixed or determinable, revenues are recognized as the payments become due and payable, assuming that all other revenue recognition criteria are met.

Actuate enters into reseller and distributor arrangements that typically give such distributors and resellers the right to distribute its products to end-users headquartered in specified territories. Actuate recognizes license revenues from arrangements with U.S. resellers and distributors when there is persuasive evidence of an arrangement with the reseller or distributor, the product has been shipped, the fees are fixed or determinable, and collectibility is probable and vendor-specific objective evidence of fair value exists to allocate the fee to the undelivered elements of the arrangement . Actuate recognizes license revenues from arrangements with international resellers and distributors upon receipt of evidence of sell-through and when all other revenue recognition criteria have been met. If it is not practical to obtain evidence of sell-through, the Company defers revenues until the end-user has been identified and cash has been received. In some instances there is a timing difference between when a reseller completes its sale to the end-user and the period in which Actuate receives the documentation required for revenue recognition. Because Actuate delays revenue recognition until the reporting period in which the required documentation is obtained, it may recognize revenue in a period subsequent to the period in which the reseller completes the sale to its end-user.

Actuate also enters into OEM arrangements that provide for license fees based on the bundling or embedding of its products with the OEM s products. These arrangements generally provide for fixed, irrevocable royalty payments. Actuate recognizes license fee revenues from U.S. and international OEM arrangements when a license agreement has been executed by both parties, the product has been shipped, there are no unusual uncertainties surrounding the product acceptance, the fees are fixed or determinable, collectibility is probable and vendor-specific objective evidence of fair value exists to allocate the fee to the undelivered elements of the arrangement.

Credit-worthiness and collectibility for end-users are assessed based on payment history and current credit profile. When a customer is not deemed credit-worthy, revenues are deferred and recognized upon cash receipt.

Edgar Filing: ACTUATE CORP - Form 10-Q

Actuate recognizes maintenance revenues, which consist of fees for ongoing support and unspecified product updates, ratably over the term of the contract, typically one year. Consulting revenues are primarily related to standard implementation and configuration. Training revenues are generated from classes offered at the Company's headquarters and customer locations. Revenues from consulting and training services are typically recognized as the services are performed. When a contract includes both license

Table of Contents

and service elements, the license fee is typically recognized on delivery of the software, assuming all other revenue recognition criteria are met, provided services do not include significant customization or modification of the product and are not otherwise essential to the functionality of the software.

Share-Based Compensation

The Company has various types of share-based compensation plans. These plans are administered by the compensation committee of the Board of Directors, which selects persons to receive awards and determines the number of shares subject to each award and the terms, conditions, performance measures and other provisions of the award. The Company amortizes its stock-based compensation expense for all awards in accordance with the method described in Financial Accounting Standards Board Interpretation 28, *Accounting for Stock Appreciation Rights and Other Variable Stock Option or Award Plans*. Readers should refer to Note 9 of the Company's consolidated financial statements in the Annual Report on Form 10-K for the fiscal year ended December 31, 2007, for additional information related to these share-based compensation plans.

Share-based compensation expense and the related income tax benefit recognized under Statement of Financial Accounting Standards, or SFAS No. 123R, *Share-Based Payment* in the Condensed Consolidated Statements of Income in connection with stock options and the Employee Stock Purchase Plan (ESPP) for the three and nine months ended September 30, 2008 and 2007 were as follows (in thousands):

	Three Months Ended		Nine months Ended	
	September 30, 2008	September 30, 2007	September 30, 2008	September 30, 2007
Stock options	\$ 1,820	\$ 2,324	\$ 6,307	\$ 6,399
ESPP	260	195	784	370
Total stock-based compensation	\$ 2,080	\$ 2,519	\$ 7,091	\$ 6,769
Income tax benefit	\$	\$ 498	\$	\$ 1,337

The fair value of each option award is estimated on the date of grant using the Black-Scholes-Merton option pricing model. We estimate the expected term of options granted by analyzing actual historical experience of exercises and cancellations under our plan. We also look at the average length of time in which our current outstanding options are expected to be exercised or cancelled based on past experience and the vesting and contractual term. We estimate the volatility of our common stock by using historical volatility over the calculated expected term. We base the risk-free interest rate that we use in the option valuation model on the published Treasury rate. We do not anticipate paying any cash dividends in the foreseeable future and therefore use an expected dividend yield of zero in the option valuation model. The assumptions we use to estimate the fair value of stock options granted and stock purchase rights granted under our ESPP program for the nine months ended September 30, 2008 and 2007 are as follows:

	Options Nine Months Ended		ESPP Nine Months Ended	
	September 30, 2008	September 30, 2007	September 30, 2008	September 30, 2007
Volatility	59.08 - 71.49%	77.06 - 80.41%	43.13 - 55.79%	35.78 - 38.66%
Expected term (years)	5.55 - 5.70	5.31 - 5.41	0.5	0.5
Risk free interest rate	2.50 - 3.50%	4.13 - 4.75%	2.05 - 2.18%	4.47 - 5.05%
Expected dividend yield	0%	0%	0%	0%
Forfeiture rate	3%	3 - 4%	N/A	N/A

Net Income Per Share

Basic net income per share has been computed using the weighted-average number of shares of common stock outstanding during the period. Diluted net income per share is computed using the weighted-average number of common and dilutive common equivalent shares outstanding during the period. Common equivalent shares consist of the shares issuable upon the exercise of stock options using the treasury stock method.

Table of Contents

The table below reconciles the weighted average common shares used to calculate basic net income per share with the weighted-average common shares used to calculate diluted net income per share (in thousands):

	Three Months Ended		Nine months Ended	
	September 30, 2008	September 30, 2007	September 30, 2008	September 30, 2007
Weighted-average common shares outstanding	60,387	60,767	60,505	60,696
Weighted-average dilutive stock options outstanding under the treasury stock method	5,010	7,943	5,570	7,863
Weighted-average common shares used in computing diluted net income per share	65,397	68,710	66,075	68,559

We generated net income for the three and nine month periods ended September 30, 2008. Under the treasury stock method, stock options with exercise prices exceeding the weighted average share price of our Company's common stock during the applicable periods are excluded from the diluted earnings per share computation. The weighted-average number of shares excluded from the calculation of diluted earnings per share was 6,593,990 and 5,883,518 in the three and nine months ended September 30, 2008, respectively. We also generated net income for the three and nine month periods ended September 30, 2007. The weighted-average number of shares excluded from the calculation of diluted earnings per share was 3,196,377 and 2,874,711 in the three and nine months ended September 30, 2007, respectively. These anti-dilutive options could be dilutive in future periods.

The weighted average exercise price of excluded stock options was \$6.08 and \$6.26 for the three and nine months ended September 30, 2008, respectively. The weighted average exercise price of excluded stock options was \$6.51 and \$6.63 for the three and nine months ended September 30, 2007, respectively.

Comprehensive Income

Other comprehensive income includes currency translation adjustments and unrealized gains and losses on short-term investments that are not included in net income, but rather are recorded directly in stockholders' equity. The following table represents changes in the components of accumulated other comprehensive income for the three and nine months ended September 30, 2008 and 2007, respectively, (in thousands):

	Three Months Ended		Nine months Ended	
	September 30, 2008	September 30, 2007	September 30, 2008	September 30, 2007
Net income	\$ 3,105	\$ 4,607	\$ 8,907	\$ 9,386
Foreign currency translation gain (loss)	(1,669)	300	(500)	379
Unrealized gain (loss) on investments	(486)	161	(1,425)	150
Total comprehensive income	\$ 950	\$ 5,068	\$ 6,982	\$ 9,915

Fair Value of Financial Instruments and Concentration of Credit Risk

The carrying value of the Company's financial instruments, including cash and cash equivalents, investments, accounts receivable and accounts payable approximates fair value. Financial instruments that subject the Company to concentrations of credit risk consist primarily of cash and cash equivalents, investments and trade accounts receivable. The Company maintains its cash, cash equivalents and investments with high quality financial institutions and limits its investment in individual securities based on the type and credit quality associated with such investments. A portion of our investment portfolio is invested in AAA rated auction rate securities (ARS). During the nine months ended September 30, 2008, \$16.5 million of the Company's ARS failed to settle in auctions and are therefore not currently liquid. In the event the Company needs to access these funds, it will not be able to do so without a loss of principal, unless a future auction on these investments is successful. The Company has reduced the carrying value of these investments by \$1.3 million as of September 30, 2008 through a charge to other comprehensive income to reflect the temporary nature of the impairment of these investments. As of September 30, 2008, we believe that these investments are not other-than-temporarily impaired; however, the Company will evaluate these investments on a quarterly basis. For additional discussion please refer to the subsequent events section (Note 12) of this Form 10-Q.

Edgar Filing: ACTUATE CORP - Form 10-Q

The Company performs ongoing credit evaluations of its customers and generally does not require collateral on accounts receivable. The Company maintains allowances for potential credit losses. There was no single customer that accounted for more than 10% of total revenues in either the three or nine months ended September 30, 2008 or 2007. A significant portion of the Company's revenues have historically been derived from customers in the financial services industry.

Table of Contents

Impairment of Goodwill

In accordance with Statement of Financial Accounting Standards No. 142, *Goodwill and Other Intangible Assets* (SFAS 142), the Company performs its annual impairment test of goodwill on October 1 of each year. SFAS 142 requires goodwill be tested at least annually using a two-step process that begins with identifying potential impairment. Potential impairment is identified if the fair value of the reporting unit to which goodwill applies is less than the recognized or book value of the related reporting entity, including such goodwill. Where the book value of a reporting entity, including related goodwill, is greater than the reporting entity's fair value, the second step of the goodwill impairment test is performed to measure the amount of impairment loss, if any. There have been no significant events or circumstances affecting the valuation of goodwill subsequent to the impairment test performed in the fourth quarter of the fiscal year ended December 31, 2007. As a result, the Company did not record any potential impairment related to its goodwill for the three months and nine months ended September 30, 2008.

Recent Accounting Pronouncements

With the exception of those discussed below, there have been no recent accounting pronouncements or changes in accounting pronouncements during the three months ended September 30, 2008, as compared to the recent accounting pronouncements described in our Annual Report on Form 10-K for the fiscal year ended December 31, 2007, that are of significance, or potential significance, to us.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities* (SFAS 161). SFAS 161 requires companies with derivative instruments to disclose information that should enable financial-statement users to understand how and why a company uses derivative instruments, how derivative instruments and related hedged items are accounted for under SFAS No. 133 *Accounting for Derivative Instruments and Hedging Activities* and how derivative instruments and related hedged items affect a company's financial position, financial performance and cash flows. SFAS 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008. We do not anticipate that SFAS 161 will have an impact on our consolidated financial statements.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of FASB Statement No. 115* (SFAS 159). SFAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value. Entities that elect the fair value option will report unrealized gains and losses in earnings at each subsequent reporting date. The fair value option may be elected on an instrument-by-instrument basis, with few exceptions. SFAS 159 also establishes presentation and disclosure requirements to facilitate comparisons between companies that choose different measurement attributes for similar assets and liabilities. The requirements of SFAS 159 are effective for our fiscal year beginning January 1, 2008. However, the Company did not elect to apply the fair value option to any of its financial instruments or other items upon adoption of SFAS 159 during the three and nine months ended September 30, 2008. Therefore, the adoption of SFAS 159 did not impact the Company's consolidated financial position, results of operations or cash flows.

In December 2007, the FASB issued SFAS No. 141 (revised), *Business Combinations* (SFAS 141(R)). The standard changes the accounting for business combinations including the measurement of acquirer shares issued in consideration for a business combination, the recognition of contingent consideration, the accounting for pre-acquisition gain and loss contingencies, the recognition of capitalized in-process research and development, the accounting for acquisition-related restructuring cost accruals, the treatment of acquisition related transaction costs and the recognition of changes in the acquirer's income tax valuation allowance. SFAS 141(R) is effective for fiscal years beginning after December 15, 2008, with early adoption prohibited. Actuate will apply the provisions of SFAS 141(R) to business combinations completed after the date that SFAS 141(R) becomes effective.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurement* (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value, and also expands disclosures about fair value measurements. SFAS 157 is effective for periods beginning after November 15, 2007. The Company adopted this standard with respect to its financial assets effective January 1, 2008. In February 2008, the FASB issued FASB Staff Position SFAS No. 157-2 *Effective Date of FASB Statement No. 157* delaying the effective date of SFAS 157 for one year for all non financial assets and non financial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). See Footnote 3 of the Notes to the Condensed Consolidated Financial Statements for further detail regarding the impact of our adoption of SFAS 157 for financial assets.

2. Investment in Actuate Japan

The minority shareholders of Actuate Japan have the non-expiring option to put their equity interest (*Minority Interest*) in Actuate Japan to the Company and the Company has the option to call the *Minority Interest*. The *Minority Interest* as of September 30, 2008 was approximately 12% of the total equity interest. If the *Minority Interest* Shareholder chose to put these remaining shares to the Company, Actuate would be required to pay approximately \$498,000 to purchase these shares. The Company will record a liability, if any, at the time that the put or call is probable of

Edgar Filing: ACTUATE CORP - Form 10-Q

being exercised. Should an indicator arise that the Minority Interest has declined in value below the exercise price of the put and call option, the Company would conclude that exercise is probable at that

Table of Contents

point in time and recognize a liability for the intrinsic value of the option. The Company performs a periodic review of the value of the Minority Interest. This review may include assumptions regarding projected future cash flows and discount rates. Variances in these assumptions could have a significant impact on the Company's conclusion as to whether it is necessary to record a liability. As of September 30, 2008, the Company concluded that it was not necessary to record a liability. The Company consolidated 100% of the operating results and all investments in the subsidiary are eliminated in consolidation. As of the date of this filing, the remaining minority shareholder has not notified the Company of any intent to exercise its put option.

3. Financial Instruments and Fair Value

The Company adopted the provisions of SFAS 157 effective January 1, 2008. Under this standard, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The Company has investments that are valued in accordance with the provisions of SFAS 157. SFAS 157 establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. The hierarchy is broken down into three levels based on the reliability of inputs as follows:

Level 1 Valuations based on quoted prices in active markets for identical assets that the Company has the ability to access.

Level 2 Valuations based on quoted prices in markets that are not active or for which all significant inputs are observable, either directly or indirectly.

Level 3 Valuations based on inputs that are unobservable and significant to the overall fair value measurement.

The following table represents information about the Company's securities measured at fair value on a recurring basis (in thousands).

	Fair value of securities as of September 30, 2008			
	Total	Quoted Prices In Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Money market funds	\$ 6,159	\$ 6,159		\$
Commercial paper	15,051		15,051	
Corporate bonds	5,520		5,520	
Federal and municipal obligations	9,102		9,102	
Auction rate securities (ARS)	15,165			15,165
	\$ 50,997	\$ 6,159	\$ 29,673	\$ 15,165

Certain items in the table above are classified as Level 2 items because quoted prices in an active market are not readily accessible for those specific securities, and we may have relied on alternative pricing methods that do not rely exclusively on quoted prices to determine the fair value of the securities.

As of September 30, 2008, the Company had approximately \$16.5 million in ARS at par value. During the first nine months of fiscal 2008, substantially all auctions for ARS have failed as a result of the negative overall capital market conditions, meaning that there is not enough demand to sell the securities at auction.

At September 30, 2008, the Company has classified its entire ARS investment balance from short-term investments to non-current investments on its condensed consolidated balance sheet because of the Company's inability to determine when its investments in ARS will settle. Typically

Edgar Filing: ACTUATE CORP - Form 10-Q

the fair value of ARS investments approximates par value due to frequent interest rate resets through the auction process. While the Company continues to earn interest on its ARS investments at the maximum contractual rate, these investments are not currently trading and therefore do not currently have a readily determinable market value. Accordingly, the estimated fair value of ARS no longer approximates par value. The Company has used a discounted cash flow model to determine the estimated fair value of its investment in ARS as of September 30, 2008. The assumptions used in preparing the discounted cash flow model include estimates for interest rates, timing and amount of cash flows and expected holding periods of the ARS. Based on this assessment of fair value, as of September 30, 2008 the Company determined there was a decline in the fair value of its ARS investments of \$1.3 million. The Company considered the guidance contained in SEC Staff Accounting Bulletin No. 59, *Other Than Temporary Impairment of Certain Investments in Debt and Equity Securities* (SAB 59) and EITF 03-1 *The meaning of Other-Than-Temporary Investments and its application to Certain Investments*, and determined that 100% of this impairment was temporary. This determination was based on several factors, including the following: 1) these ARS are almost entirely backed by the Federal Government, 2) the underlying securities continue to be highly rated, 3) market developments seem to suggest that liquidity may improve in the future for these securities either through restructuring or other means, and 4) the Company does not require immediate access to the funds and has the intent and ability to hold these securities until liquidity is re-established. A temporary impairment

Table of Contents

charge results in an unrealized loss being recorded in the other comprehensive income (loss) component of stockholders' equity. Such an unrealized loss does not affect net income for the applicable accounting period. An other-than-temporary impairment charge is recorded as a realized loss in the condensed consolidated statement of income and reduces net income for the applicable accounting period. In evaluating the impairment of any of its individual ARS at September 30, 2008, the Company considered such impairment to be temporary. The differentiating factors between temporary and other-than-temporary impairment are primarily the length of the time and the extent to which the market value has been less than cost, the financial condition and near-term prospects of the issuer and the intent and ability of Actuate to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in market value.

The following table represents the reconciliation of the beginning and ending balances of the Company's ARS measured at fair value on a recurring basis using significant unobservable inputs (Level 3) during the first nine months of fiscal year 2008 (in thousands).

	Fair Value Measurements Using Significant Unobservable Inputs (Level 3) ARS
Balance at December 31, 2007	\$ 14,550
Total unrealized losses included in other comprehensive income	(1,310)
Purchases	1,925
 Balance at September 30, 2008	 \$ 15,165

The Company's cash, cash equivalents, short-term investments and non-current investments are as follows (in thousands):

	Cost	Net Unrealized gains (losses)	Estimated Fair Value
Balances at September 30, 2008			
Classified as cash and cash equivalents:			
Cash	\$ 30,308	\$	\$ 30,308
Commercial paper	9,575	(8)	9,567
Money market funds	6,159		6,159
	46,042	(8)	46,034
Classified as short-term investments:			
Commercial paper	5,491	(7)	5,484
Corporate bonds	5,609	(89)	5,520
Federal and municipal obligations	9,100	2	9,102
	20,200	(94)	20,106
Classified as non-current investments:			
Auction rate securities (ARS)	16,475	(1,310)	15,165
 Total	 \$ 82,717	 \$ (1,412)	 \$ 81,305

Any individual security in the above tables with an unrealized loss has been in a continuous unrealized loss position for less than twelve months. At this time, the Company believes that, due to the nature of the Company's investments, the financial condition of the issuer and the Company's intent and ability to hold these investments through these loss positions, such factors would not indicate that these unrealized losses should be viewed as other-than-temporary.

Edgar Filing: ACTUATE CORP - Form 10-Q

As of September 30, 2008, the stated maturities of the Company's cash equivalents and short-term investments are \$15.7 million within 90 days and \$20.1 million beyond 90 days. Short-term investments are generally classified as available-for-sale and are recorded on the balance sheet at fair market value with unrealized gains or losses reported as a separate component of accumulated other comprehensive income. At September 30, 2008, Actuate has classified all of its marketable securities (other than ARS) as short-term investments, even though the stated maturity dates may be one year or more beyond the current balance sheet date as these investments are highly liquid and available for use in current operations.

4. Restructuring Charges

During the first half of fiscal year 2007, we evaluated the consolidation of our facilities as a result of the performance software acquisition and determined that a \$297,000 facility-related restructuring charge was required. This charge was directly related to the consolidation of our three offices located in the United Kingdom into one office and was accounted for in accordance with Statement of Financial Accounting Standards (SFAS) No. 146, *Accounting for Costs Associated with Exit or Disposal Activities* (SFAS 146).

Table of Contents

During the second half of fiscal year 2007, we recorded a restructuring charge related to the relocation of our headquarters facility from South San Francisco to San Mateo, California and the closure of our service facility in Iselin, New Jersey. These charges were primarily comprised of rent and operating expenses through the end of the lease term for the fully vacated portion of the South San Francisco facility, impairment of fixed assets and leasehold improvements considered abandoned, and relocation costs to the new facility. We also recorded restructuring charges for rent and operating expenses for the Iselin, New Jersey facility. As a result of this relocation and the closure of our services facility, we recorded a total restructuring charge of approximately \$1.4 million in the second half of fiscal year 2007 in accordance with SFAS 146.

During the first nine months of fiscal year 2008, we incurred approximately \$664,000 in costs consisting of severance, benefit and related legal costs when we initiated a restructuring of our North America sales force to size the operation to meet the expected business and economic environment for our products. This restructuring resulted in workforce reductions of 23 total personnel and was concentrated mainly in North America across all levels of the sales organization. We also incurred approximately \$132,000 in legal fees related to a previous restructuring which involved the terminations of former employees in one of our European subsidiaries. During the first nine months of fiscal year 2008, we also incurred charges totaling approximately \$279,000, primarily related to lease exit costs associated with our South San Francisco facility, lease exit costs associated with the closure of one of the two floors in our Toronto, Canada facility and the consolidation of our Vienna, Virginia facilities into one location.

The following table summarizes the restructuring accrual activity during the nine months ended September 30, 2008 (in thousands):

	Severance & Benefits	Facility Related	Total
Balance at December 31, 2007	\$ 464	\$ 8,343	\$ 8,807
Restructuring charges	772	303	1,075
Cash payments, net of rents collected on sublease for Q1	(33)	(831)	(864)
Cash payments, net of rents collected on sublease for Q2	(35)	(775)	(810)
Cash payments, net of rents collected on sublease for Q3	(527)	(613)	(1,140)
Change in estimate	23	(99)	(76)
	664	6,328	6,992
Less: current portion	(664)	(2,617)	(3,281)
Long-term balance at September 30, 2008	\$	\$ 3,711	\$ 3,711

5. Income Taxes

The Company calculates its interim income tax provision in accordance with Accounting Principles Board Opinion No. 28, *Interim Financial Reporting* and FASB Interpretation No. 18, *Accounting for Income Taxes in Interim Periods* (FIN 18). At the end of each interim period, the Company estimates the annual effective tax rate and applies that rate to its quarterly operating income. The tax expense or benefit related to significant, unusual, or extraordinary items that will be separately reported or reported net of their related tax effect, are recognized in the interim period in which those items occur. In addition, the effect of changes in enacted tax laws or rates or tax status is recognized in the interim period in which the change occurs.

The computation of the annual estimated effective tax rate at each interim period requires certain estimates and significant judgment including, but not limited to, the expected operating income for the year, projections of the proportion of income earned and taxed in foreign jurisdictions, permanent and temporary differences, and the likelihood of recovering deferred tax assets generated in the current year. The accounting estimates used to compute the provision for income taxes may change as new events occur, more experience is acquired, additional information is obtained or as the tax environment changes.

The Company adopted the provisions of FASB Interpretation No. 48 *Accounting for Uncertainty in Income Taxes* (FIN 48) on January 1, 2007. FIN 48 prescribes a new recognition threshold and measurement attribute for the financial statement recognition and measurement of an income tax position taken or expected to be taken in a tax return. Under FIN 48, only income tax positions that meet the more likely than not recognition threshold may be recognized in the financial statements. An income tax position that meets the more likely than not recognition threshold shall initially and subsequently be measured as the largest amount of tax benefit that is greater than 50 percent likely of being realized upon ultimate settlement with a taxing authority that has full knowledge of all relevant information.

Edgar Filing: ACTUATE CORP - Form 10-Q

Significant judgment is required in applying the principles of FIN 48 and Statement of Financial Accounting Standards No. 109, *Accounting for Income Taxes* (SFAS 109). The calculation of our provision for income taxes involves dealing with uncertainties in the application of complex tax laws and regulations. In determining the adequacy of our provision for income taxes, we regularly

Table of Contents

assess the potential settlement outcomes resulting from income tax examinations. However, the final outcome of tax examinations, including the total amount payable or the timing of any such payments upon resolution of these issues, cannot be predicted with certainty. In addition, we cannot be certain that such amount will not be materially different than that which is reflected in our historical income tax provisions and accruals. Should the IRS or other tax authorities assess additional taxes as a result of a current or a future examination, we may be required to record charges to income in future periods that could have a material impact on the results of operations, financial position or cash flows in the applicable period or periods.

6. Geographic Information

Our primary operations are located in the United States. Revenues from international sources relate to export sales, primarily to Europe and Asia. Our revenues by geographic area were as follows (in thousands):

	Three Months Ended September 30,		Nine months Ended September 30,	
	2008	2007	2008	2007
Revenues:				
North America	\$ 24,995	\$ 24,399	\$ 69,640	\$ 74,462
Europe	7,654	9,362	24,639	24,096
Asia Pacific and others	1,032	978	3,523	2,856
	\$ 33,681	\$ 34,739	\$ 97,802	\$ 101,414

As of September 30, 2008, we operated solely in one reportable segment, which is the development, marketing and support of our Enterprise Reporting Application software. There was no single customer that accounted for more than 10% of total revenues in either the three months ended September 30, 2008 or 2007. There was no single customer that accounted for more than 10% of total revenues in either the nine months ended September 30, 2008 or 2007. A significant portion of the Company's revenues have historically been derived from customers in the financial services industry.

7. Goodwill and Other Purchased Intangible Assets*Goodwill*

In accordance with Statement of Financial Accounting Standards No. 142, *Goodwill and Other Intangible Assets* (SFAS 142), the Company performs its annual impairment test of goodwill on October 1st of each year. SFAS 142 requires that goodwill be tested at least annually using a two-step process that begins with identifying potential impairment. The potential impairment is identified if the fair value of the reporting unit to which goodwill applies is less than the recognized or book value of the related reporting entity, including such goodwill. Where the book value of a reporting entity, including related goodwill, is greater than the reporting entity's fair value, the second step of the goodwill impairment test is performed to measure the amount of impairment loss, if any. There have been no significant events or circumstances affecting the valuation of goodwill subsequent to the impairment test performed in the fourth quarter of the fiscal year ended December 31, 2007. As a result, the Company did not record any potential impairment related to its goodwill for the three months and nine months ended September 30, 2008.

Following is a roll-forward of the activity that affected goodwill during the first nine months of fiscal 2008 (in thousands):

Goodwill as of December 31, 2007	\$ 35,594
Utilization of acquired tax benefits	719
Goodwill as of September 30, 2008	\$ 36,313

Table of Contents*Intangibles*

Other purchased intangible assets consist of the following (in thousands):

	September 30, 2008			December 31, 2007			
	Gross Carrying Amount	Accumulated Amortization	Adjustment to Purchase Price Allocation	Net Balance	Gross Carrying Amount	Accumulated Amortization	Net Balance
Customer lists	\$ 3,400	\$ (1,870)	\$	\$ 1,530	\$ 3,400	\$ (1,360)	\$ 2,040
Purchased technologies	4,820	(3,916)	(576)	328	4,820	(3,479)	1,341
Trademark	800	(733)		67	800	(533)	267
	\$ 9,020	\$ (6,519)	\$ (576)	\$ 1,925	\$ 9,020	\$ (5,372)	\$ 3,648

During the first quarter of 2008, the Company recorded an immaterial correction from the prior fiscal year which resulted in adjustments to goodwill and purchased technology related to the tax benefits acquired from the performancesoft acquisition and the tax affected portion of the net operating losses utilized with respect to the Nimble acquisition, respectively. These adjustments resulted in a net increase of approximately \$719,000 to the Company's goodwill, and a decrease of approximately \$576,000 to the Company's purchased intangibles balance. There was an insignificant impact on the condensed consolidated statement of income for the nine months ended September 30, 2008 as a result of this correction.

Amortization expense of purchased intangible assets was approximately \$382,000 and \$486,000 for the three months ended September 30, 2008 and 2007, respectively. Of this total, approximately \$37,000 and \$249,000 was related to the amortization of purchased technologies. Amortization expense of purchased intangible assets was approximately \$1.1 million and \$1.5 million for the nine months ended September 30, 2008 and 2007, respectively. Of this total, approximately \$437,000 and \$752,000 was related to the amortization of purchased technologies. Amortization of purchased technologies is included in cost of license fees in the accompanying condensed consolidated statements of income. The expected remaining annual amortization expense is summarized as follows (in thousands):

Fiscal Year	Purchased Technology and Intangibles
2008 (remainder of year)	\$ 273
2009	826
2010	826
	\$ 1,925

8. Contingencies*General*

We are engaged in certain legal actions arising in the ordinary course of business. Although there can be no assurance as to the outcome of such litigation, we believe we have adequate legal defenses and we believe that the ultimate outcome of any of these actions will not have a material effect on our consolidated financial position or results of operations.

Commitments & Contingencies

Our license agreements include indemnification for infringement of third party intellectual property rights and certain warranties. Historically, we have not experienced significant claims under these contractual rights. Therefore, no amounts have been accrued relating to those indemnities and warranties.

Edgar Filing: ACTUATE CORP - Form 10-Q

The Company reached the end of its lease term on its previous corporate headquarters located at 701 Gateway, in South San Francisco in February 2008. In anticipation of this event, on June 1, 2007, the Company entered into a five year sublease agreement with Oracle Corporation for approximately 83,000 square feet of office space in the Bridgepointe Campus in San Mateo, California. This lease is operating in nature; commenced on August 1, 2007 and ends on July 31, 2012. In addition, the lease provided for approximately nine months of free rent (rent holiday) and approximately \$600,000 in landlord incentives to be applied by Actuate towards construction of improvements. The incentives were applied to leasehold improvements completed during the fourth quarter of fiscal year 2007. The Company accounts for and recognizes the rent holidays in its operating lease on a straight-line basis over the lease term (including any rent holiday period) in accordance with paragraph 2 of FASB Technical Bulletin 85-3 (FTB 85-3), *Accounting for Operating Leases with Scheduled Rent Increases*. The Company accounts for the amortization of its leasehold improvements over the duration of the lease consistent with paragraph 5(f) of SFAS 13 (SFAS 13), *Accounting for Leases, as amended*. Leasehold improvements made by the Company that are funded by landlord incentives or allowances under an operating lease are recorded by the Company as leasehold improvement assets and amortized over the term of the lease consistent with the guidance in paragraph 5(f) of SFAS 13. The incentives are recorded as deferred rent and amortized as reductions to lease expense over the lease term in accordance with paragraph 15 of SFAS 13.

Table of Contents

As of September 30, 2008, Actuate pledged \$395,000 of restricted cash, as collateral for a standby letter of credit that guarantees its contractual obligations relating to its sublease agreement for its new corporate headquarter facilities located at the Bridgepointe Campus in San Mateo, California. This restricted cash is classified as Other Assets in the accompanying condensed consolidated balance sheet.

9. Stock Benefit Plans

Stock Option Plans

In March 2007, the Board of Directors amended the automatic stock option grant program for non-employee directors under the 1998 Non-Employee Directors Option Plan (the Directors Plan) to change the number of shares covered by the initial and annual awards to non-employee directors, beginning with the grants to be made at the 2007 Annual Meeting. The amendment reduced the number of option shares which will automatically be granted to each individual who first joins the Board as a non-employee director from 80,000 to 40,000 option shares and increased the number of option shares which will be automatically granted to each continuing non-employee director at each annual stockholders meeting from 10,000 option shares to 25,000 option shares. All other terms of the program, including vesting schedules for the initial grant and the annual grant, remain unchanged.

As of September 30, 2008, 230,000 shares of common stock were reserved and available for future grants under the Directors Option Plan.

All directors are eligible to receive option awards under Actuate s Amended and Restated 1998 Equity Incentive Plan (the 1998 Plan). In January 2008, the Board of Directors resolved that starting with the grant awards to be made at the 2008 Annual Meeting, all grant awards to the non-employee directors shall be made under the 1998 Plan rather than the Directors Plan. All other terms of the non-employee director program, including vesting schedules for the initial grant award and the automatic annual award remain unchanged.

Shares issued as a result of the exercise of options under any of our plans would be fulfilled through shares currently in our existing pools. Total authorized but unissued shares of common stock were 32,982,957 as of September 30, 2008.

The weighted average grant date fair value of options granted during the quarter ended September 30, 2008 was \$2.30 per option. Upon the exercise of options, the Company issues new common stock from its authorized shares. The total intrinsic value of options exercised during the quarter ended September 30, 2008 was approximately \$495,000.

The following table summarizes information about stock options outstanding as of September 30, 2008:

Range of Exercise Prices	Options Outstanding			Options Exercisable	
	Number of Shares	Weighted-Average Remaining Contractual Life	Weighted-Average Exercise Price	Number of Shares	Weighted-Average Exercise Price
\$0.78-\$1.49	4,754,793	4.21 years	\$ 1.49	4,754,793	\$ 1.49
\$1.56-\$2.99	3,241,415	5.12 years	\$ 2.64	3,062,969	\$ 2.66
\$3.00-\$3.75	4,194,453	3.93 years	\$ 3.61	3,686,140	\$ 3.62
\$3.77-\$5.11	3,637,425	6.90 years	\$ 4.78	2,068,113	\$ 4.71
\$5.17-\$31.19	3,194,224	8.07 years	\$ 7.32	723,647	\$ 10.99
\$0.78-\$31.19	19,022,310	5.47 years	\$ 3.76	14,295,662	\$ 3.24

	September 30, 2008	September 30, 2007
<u>Options Outstanding</u> Vested and Expected to Vest		
Vested and expected to vest, net of expected forfeitures	18,798,309	19,557,659
Aggregate intrinsic value (in thousands)	\$ 12,396	\$ 65,031
Weighted average exercise price per share	\$ 3.74	\$ 3.31

Edgar Filing: ACTUATE CORP - Form 10-Q

Weighted average remaining contractual term (in years)	5.43	6.11
<u>Options Exercisable</u>		
Options currently exercisable	14,295,662	14,617,669
Aggregate intrinsic value of currently exercisable options (in thousands)	\$ 12,182	\$ 54,495
Weighted average exercise price per share	\$ 3.24	\$ 2.96
Weighted average remaining contractual term (in years)	4.40	5.25

Table of Contents

As of September 30, 2008, the number of shares reserved for future grants under all option plans was 13,960,647. The number of shares available for future purchase under the Purchase Plan was 1,706,363.

10. Deferred Revenue

Deferred revenue consists of the following (in thousands):

	September 30, 2008	December 31, 2007
Maintenance and support	\$ 34,842	\$ 37,847
Other	6,360	6,004
	\$ 41,202	\$ 43,851
Less: Current portion	(38,001)	(40,352)
Long-term deferred revenue	\$ 3,201	\$ 3,499

Maintenance and support consists of first year maintenance and support services associated with the initial purchase of Actuate's software, and the renewal of annual maintenance and support services from customers who purchased Actuate's software in current and prior periods. The maintenance and support period is generally 12 months and revenues are typically recognized on a straight-line basis over the term of the maintenance and support period.

Other deferred revenue consisted of deferred license, training and consulting fees generated from arrangements, which did not meet some or all of the revenue recognition criteria of SOP 97-2 and are, therefore, deferred until all revenue recognition criteria have been met.

11. Related Party Transactions

On August 12, 2008 the Company executed an agreement to repurchase 50,000 shares of its common stock from Daniel Gaudreau, Actuate's Senior Vice President and Chief Financial Officer at the market rate. This transaction totaled \$223,000 and was valued based on Actuate's share price of \$4.46 at the close of the market on August 12, 2008. The Company has received and recorded these shares in the Company's treasury pool at September 30, 2008.

12. Subsequent Events*ARS settlements*

In October 2008, the financial institution where the Company holds approximately \$16.5 million estimated par value of auction rate securities (ARS) notified the Company of a settlement they had reached with the SEC to restore liquidity to all remaining clients who hold auction rate securities. As part of this settlement, the financial institution offered the Company rights to sell its auction rate securities back to the financial institution at par value at any time during the period from June 30, 2010, through July 2, 2012. The Company is required to notify the institution whether or not it will participate in the settlement by November 14, 2008. Should the Company decide to accept the offered settlement with the financial institution, the Company will record an other-than-temporary impairment related to its ARS in the quarter ended December 31, 2008 along with a corresponding gain contingency for the fair value to be received from the financial institution under the settlement agreement. At this time, the Company does not believe the net effect to its consolidated statement of operations will be material.

Under the proposed settlement agreement, the financial institution also offered its clients a no-cost loan up to an amount equal to the par value of the underlying auction rate securities. The loan would bear no interest and would be fully payable upon the repurchase of the ARS by the financial institution. The Company is currently evaluating whether to apply for the loan under this proposed settlement.

Tender offer

On November 3, 2008, the Company announced its intention to commence a modified Dutch auction tender offer to purchase up to \$60.0 million worth of its common stock, at a price per share not less than \$3.15 and not greater than \$3.40. The Company intends to commence the

stock tender offer in early November 2008, and expects the stock tender offer to expire twenty

Table of Contents

business days thereafter, unless extended. The maximum number of shares proposed to be purchased in the stock tender offer represents approximately 31 percent of Actuate's currently outstanding common stock. The Company plans to fund the offer from a combination of a newly secured revolving credit facility and available cash on hand.

Due to the tender offer, the Company has suspended its stock repurchase program pursuant to which the Company was authorized to repurchase shares in an amount not to exceed \$6.25 million per quarter (not to exceed \$12.4 million in the first six months of fiscal year 2008), and the cumulative amount not to exceed \$50.0 million over a two year period beginning on October 24, 2007.

Revolving credit line

In early November, the Company entered into a four year revolving line of credit agreement (*Credit Agreement*). The Credit Agreement was effective as of November 3, 2008 and allows for cash borrowings and letters of credit under a secured revolving credit facility of up to a maximum of \$50.0 million, but not to exceed 80% of the Company's trailing four quarters of maintenance revenue. Interest will be based on a floating rate plus an applicable margin based on the outstanding balance of the amount drawn down under the Credit Agreement. The floating rate is determined at the Company's election and may either be (i) London Interbank Offered Rate (*LIBOR*) or (ii) the greater of the Federal Funds Rate plus $\frac{1}{2}\%$ and the Prime Rate. If the Company's usage of the credit line exceeds 80% of its trailing four quarters of maintenance revenue, or if the sum of available funds under the Credit Agreement plus available cash is less than \$10,000,000, the Company will be required to meet certain minimum income targets and be subject to a limit on annual capital expenditures. The Company will be required to make interest payments and pay an unused commitment fee on a monthly or quarterly basis. The Credit Agreement also requires that the Company pay a closing fee based on a percentage of the overall available facility.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following information should be read in conjunction with the historical financial information and the notes thereto included in Item 1 of this Quarterly Report on Form 10-Q and the consolidated financial statements and notes thereto and the related Management's Discussion and Analysis of Financial Condition and Results of Operations contained in our Annual Report on Form 10-K for the year ended December 31, 2007 as filed with the Securities and Exchange Commission on March 17, 2008.

The statements contained in this Form 10-Q that are not purely historical are forward looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, including statements regarding Actuate's expectations, beliefs, hopes, intentions, plans or strategies regarding the future. All forward-looking statements in this Form 10-Q are based upon information available to Actuate as of the date hereof, and Actuate assumes no obligation to update any such forward-looking statements. Actual results could differ materially from Actuate's current expectations. Factors that could cause or contribute to such differences include, but are not limited to, the risks discussed in Part II, Item 1A Risk Factors of this Form 10-Q, and in other filings made by the Company with the Securities and Exchange Commission.

Overview

Actuate Corporation (We , Actuate or the Company) was incorporated in November 1993 in the State of California and reincorporated in the State of Delaware in July 1998. Actuate provides software and services to develop and deploy Rich Internet Applications (RIA) that deliver rich interactive content that improve customer loyalty and corporate performance. Applications built on Actuate's open source-based platform provide all stakeholders inside and outside the firewall, including employees, customers, partners and citizens with information that they can easily access and understand to maximize revenue, cut costs, improve customer satisfaction, streamline operations, create competitive advantage and make better decisions. Our goal is to ensure that all users can use decision-making information in their day-to-day activities, opening up completely new avenues for improving corporate performance. Actuate's principal executive offices are located at 2207 Bridgepointe Parkway, San Mateo, California. Actuate's telephone number is 650-645-3000. Actuate maintains a Web site at www.actuate.com. The information posted on the Web site is not incorporated into this Annual Report.

We began shipping our first product in January 1996. We sell software products through two primary means: (i) directly to end-user customers through our direct sales force and (ii) through indirect channel partners such as OEMs, resellers and system integrators. OEMs generally integrate our products with their applications and either provide hosting services or resell them with their products. Our other indirect channel partners resell our software products to end-user customers. Our total revenues are derived from license fees for software products and fees for services relating to such products, including software maintenance and support, consulting and training.

Our total revenues for the third quarter of fiscal year 2008 were \$33.7 million, a 3% decrease from levels reported in the third quarter of fiscal year 2007. Our license revenues decreased by approximately 25% or \$3.4 million, primarily due to unfavorable economic conditions that began in late fiscal 2007 and continue to adversely impact the financial services industry; a key component of Actuate's customer portfolio. This decrease in license revenue was partially offset by an 11% increase in services revenues. This increase was primarily driven by maintenance and support revenues that continue to grow as our installed base increases and the recording of two significant transactions in the third quarter of fiscal year 2008 with customers who had lapsed in renewing their maintenance agreements and accordingly paid back maintenance. Back maintenance revenue from these two customers comprised approximately 6% of total services revenue in the third quarter of fiscal 2008. Historically, in each period, we have transactions that include back maintenance. For the third quarter of fiscal year 2008, we reported net income of \$3.1 million or \$0.05 per diluted share compared to net income of \$4.6 million or \$0.07 per diluted share in the third quarter of fiscal year 2007. This decrease in net income was driven primarily by lower license revenues and higher provision for income taxes over the same period last year. Our total headcount at the end of the third quarter of fiscal year 2008 was 548 compared to 574 employees at the end of third quarter of last year.

We currently anticipate that our total revenues in fiscal year 2008 will range between \$131 million to \$135 million, with license revenues of approximately between \$38 million to \$43 million.

During the remainder of fiscal year 2008, we expect three additional trends to have significant impact on the results of our operations. We currently believe that corporate IT budgets will grow only slightly if at all in fiscal 2008 particularly among financial services companies in the United States. Second, corporations are reluctant to buy software from new vendors and we continue to witness corporations consolidating their Business Intelligence, RIA and Performance Management software purchases into fewer suppliers. Finally, we expect to experience vigorous competition in the RIA market. Several of our competitors have released products that are marketed to be directly competitive with our RIA offerings. The existence of these competitive products may require continued sales and marketing efforts to differentiate our products, which could result in extended sales cycles. We believe that competition in the RIA market will be vigorous in the near future.

Table of Contents

For the remainder of fiscal 2008, we will pursue the following strategic initiatives:

Selling to IT Management We are re-focusing our sales efforts on selling our products to IT managers who we believe generally recognize the technical advantages of our products. We hope this initiative will result in increased license revenue in the short term.

Solution Selling to Line-of-Business Management We are creating Performance Management applications and software solutions to market to line-of-business managers. These offerings are in the areas of performance management and customer self service reporting. We hope these initiatives will result in increased license revenue over the medium-to-long term.

Investing in BIRT We are continuing to make a significant investment in creating a new open source business intelligence and reporting tool, known as BIRT. We hope that BIRT will eventually become widely adopted by Java developers and will create demand for our other commercially available products. The BIRT project is a long-term initiative.

Selling to Global 9000 Corporations in the Financial Services Sector We are continuing to focus on selling our products to Global 9000 financial services companies in an effort to increase our substantive market share in this sector. We anticipate a negative impact to our operating results in fiscal 2008 as a consequence of the ongoing credit crunch on the financial services sector in 2008. However, we believe that once the short term issues in financial services are resolved, the industry will once again lead in the adoption of RIA both inside and outside the firewall.

Delivering a Highly Differentiated Performance Management Offering We intend to combine Actuate Performancesoft Performance Management applications and Actuate's RIA-ready information platform to provide capabilities for distributing accountability throughout the enterprise.

As of September 30, 2008, we held approximately \$16.5 million in auction rate securities (ARS) at par value. ARS are investments with contractual maturities of up to 40 years. Our ARS are in the form of municipal bonds, secured by a pool of student loans or collateralized debt obligations whose interest rates are subject to reset through an auction process. At the end of each reset period, investors can sell or continue to hold the securities at par. The ARS held by us are primarily backed by highly rated municipal issuers and are substantially guaranteed by the Federal Government. During the first nine months of fiscal 2008, substantially all auctions for ARS have failed as a result of the negative overall capital market conditions, meaning that there is not enough demand to sell the securities at auction. We do not believe these failures are related to a credit issue, but rather are caused by a lack of liquidity. In the event we need to access the funds associated with failed auctions, such funds are not expected to be accessible until a successful auction occurs, the issuer redeems the issue, a buyer is found outside of the auction process or the underlying securities have matured.

At September 30, 2008, our entire ARS investment balance is classified as non-current investments in our condensed consolidated balance sheet because of our inability to determine when our investments in ARS will settle. Typically the fair value of ARS investments approximates par value due to frequent interest rate resets through the auction process. While we continue to earn interest on our ARS investments at the maximum contractual rate, these investments are not currently trading and therefore do not currently have a readily determinable market value. Accordingly, the estimated fair value of ARS no longer approximates par value. We have used a discounted cash flow model to determine the estimated fair value of our investment in ARS as of September 30, 2008. The assumptions used in preparing the discounted cash flow model include estimates for interest rates, timing and amount of cash flows and expected holding periods of the ARS. Based on this assessment of fair value, as of September 30, 2008 we determined there was a decline in the fair value of our ARS investments of \$1.3 million. We determined that 100% of this impairment was temporary and therefore the loss is reflected in the other comprehensive income section of stockholders' equity. As of September 30, 2008, the estimated fair value of our investments in ARS totaled \$15.2 million. For further discussion on ARS investments please refer to Note 3 and Note 12 of the Notes to Condensed Consolidated Financial Statements.

If the global credit and financial markets continue to deteriorate, our investment portfolio may be impacted and we could record further impairment in the fair value of our ARS or other investments, or determine that additional investments are other-than-temporarily impaired. This could materially adversely impact our results of operations and financial condition.

Edgar Filing: ACTUATE CORP - Form 10-Q

We have a limited ability to forecast future revenues and expenses, thus the prediction of future operating results is difficult. In addition, historical growth rates in our revenues and earnings should not be considered indicative of future revenue or earnings growth rates or operating results. There can be no assurance that any of our business strategies will be successful or that we will be able to achieve and maintain profitability on a quarterly or annual basis. It is likely that in some future quarter our operating results will be below the expectations of public market analysts and investors, and in such event the price of our common stock could decline.

Critical Accounting Policies and Estimates

The discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with generally accepted accounting principles in the United States of America. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets and liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities at the date of our financial statements. Actual results may differ from these estimates under different assumptions or conditions.

Table of Contents

Our critical accounting policies are described under Item 7 to the annual consolidated financial statements as of and for the year ended December 31, 2007, as filed on March 17, 2008 with the SEC on Form 10-K.

In September 2006, the FASB issued SFAS No. 157 (SFAS 157), *Fair Value Measurement* . SFAS 157 defines fair value, establishes a framework for measuring fair value, and also expands disclosures about fair value measurements. SFAS 157 is effective for periods beginning after November 15, 2007. The Company adopted this standard with respect to its financial assets effective January 1, 2008. In February 2008, the FASB adopted FASB Staff Position SFAS No. 157-2 *Effective Date of FASB Statement No. 157* delaying the effective date of SFAS 157 for one year for all non financial assets and non financial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). See Footnote 3 of the Notes to the Condensed Consolidated Financial Statements for further details regarding the impact of our adoption of SFAS 157 for financial assets. During the first nine months of fiscal 2008, we changed our critical accounting policies as a result of the implementation of SFAS 157.

For further information about our critical accounting policies, see the discussion under Item 7 to the annual consolidated financial statements as of and for the year ended December 31, 2007, as filed with the SEC on Form 10-K on March 17, 2008.

Results of Operations

The following table sets forth certain condensed consolidated statement of income data as a percentage of total revenues for the periods indicated.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
Revenues:				
License fees	30%	39%	31%	39%

Total Revenues	100%	100%			100%	100%		

Our revenues are derived from software license fees and services, which include software maintenance and support, consulting and training. Our total revenues of \$33.7 million for the quarter ended September 30, 2008 were lower by approximately 3% from the corresponding quarter in the prior year. Our license revenues decreased by approximately 25% or \$3.4 million primarily due to unfavorable economic conditions that began in late fiscal 2007 and continue to adversely impact the financial services industry; a key component of Actuate's customer portfolio. Despite this decrease in license revenues, we continue to experience double digit growth in our maintenance and support revenue which increased by 19% or \$3.2 million over the same period last year. We recorded revenue on two significant transactions with customers who had lapsed in renewing their maintenance agreements and accordingly paid back maintenance during the third quarter of fiscal 2008. Back maintenance revenue from these two customers comprised approximately 6% of total services revenue in the third quarter of fiscal 2008. Historically, in each period, we have transactions that include back maintenance. This increase was partially offset by a 20% or approximately \$800,000 decrease in our consulting services revenues.

Sales outside of North America were \$8.7 million or 26% of total revenues for the third quarter of fiscal year 2008, compared to \$10.3 million, or 30% of total revenues for the third quarter of fiscal year 2007. There was minimal impact of exchange rate fluctuations on total revenues in the third quarter of fiscal 2008 compared with a favorable impact of approximately \$640,000 in the third quarter of fiscal 2007.

For the first nine months of fiscal year 2008, total revenues were \$97.8 million, a 4% or approximately \$3.6 million decrease over the same period last year. This decrease was primarily due to slowing license revenue growth in North America and Europe caused by weak macro economic conditions. This decrease in license revenues was partially offset by a 10% or \$6.0 million increase in services revenues, primarily maintenance and support revenues which increased by 13% or \$6.7 million over the same period last year. Of this increase in maintenance and support revenues, the majority was attributable to normal growth in support for our installed base. We also recorded revenue on several transactions with customers who had lapsed in renewing their maintenance agreement and accordingly paid back maintenance during the first nine months of fiscal 2008. Historically, in each period we typically have transactions that include back maintenance. However, the amount recorded in the nine months of fiscal 2008 was higher than that seen in the prior year.

Total revenues derived from international regions totaled \$28.2 million in the first nine months of fiscal year 2008 compared to approximately \$26.9 million in the first nine months of fiscal year 2007. For the first nine months of fiscal year 2008, we derived 29% of our total revenues from sales outside of North America versus 27% in the same period last year. Of these total international revenues, approximately \$800,000 or 3% were due to the favorable impact of exchange rate fluctuations, primarily on Euro-based and British Pound-based transactions compared with a \$1.8 million favorable impact or 7% reported during the same period last year. The Company's revenues from license fees resulting from sales through indirect channel partners were approximately 32% and 29% of total revenues from license fees for the first nine months of fiscal years 2008 and 2007, respectively.

There was no customer that accounted for more than of 10% of our total revenues for the quarter ended September 30, 2007.

During the first nine months of fiscal 2007, we booked an out of period adjustment related to deferred revenue that should have been recognized in the third quarter of fiscal 2006. As a result of this out of period adjustment, total revenues for the first nine months of fiscal 2007 were

Edgar Filing: ACTUATE CORP - Form 10-Q

positively impacted by approximately \$250,000 while net income was increased by approximately \$147,000. This out of period adjustment had no impact to our basic and diluted per share results for the first nine months of 2007.

Edgar Filing: ACTUATE CORP - Form 10-Q

with customers who had lapsed in renewing their maintenance agreement and accordingly paid back maintenance. Back maintenance revenue from these two customers comprised approximately 6% of total services revenue in the third quarter of fiscal 2008. Historically, in each period, we have transactions that include back maintenance. The decrease in professional services revenues was primarily the result of the increase in the adoption of BIRT-based projects by our customers which do not result in professional service

Table of Contents

revenues to the same extent as the Company's traditional designer products. As a result, we experienced a 21% decrease in our services headcount in the third quarter of fiscal 2008 versus the same period last year. The success of the Company's BIRT initiative therefore results in a downward trend in the Company's revenue from professional services, as seen during the last several fiscal quarters.

The continued growth in services revenues for the nine months ended September 30, 2008 was primarily attributed to the increase in our maintenance and support revenues driven by a continued growth in our installed base of customers under maintenance plans. This growth was also partially due to the fact that we recorded revenue on several transactions with customers who had lapsed in renewing their maintenance agreement and accordingly paid back maintenance. Historically, in each period we typically have transactions that include back maintenance. However, the amount recorded in the nine months of fiscal 2008 was higher than that seen in the prior year. Our revenue growth from professional services has slowed and has generally decreased over time as our customers have increased the adoption of BIRT-based projects which consequently has resulted in lowered demand for our professional services.

By region, Europe accounted for the highest increase in services revenues for the three and nine months ended September 30, 2008. These increases were due primarily to the growth in our installed base of customers under maintenance plans in that region.

During the nine months of fiscal 2008, exchange rate fluctuations on foreign revenue transactions positively impacted our services revenue growth by approximately \$490,000 when compared to the same period in the prior year.

The following table represents our services revenues by region (in thousands):

	Three Months Ended (In thousands)				Nine Months Ended (In thousands)			
	September 30, 2008	September 30, 2007	Variance \$ s	Variance %	September 30, 2008	September 30, 2007	Variance \$ s	Variance %
Services Revenues								
North America	\$ 16,794	\$ 15,894	\$ 900	6%	\$ 47,905	\$ 46,338	\$ 1,567	3%
Europe	6,168	4,733	1,435	30%	17,929	13,608	4,321	32%
APAC	698	674	24	4%	2,048	1,944	104	5%
Total Services	\$ 23,660	\$ 21,301	\$ 2,359	11%	\$ 67,882	\$ 61,890	\$ 5,992	10%
% of total revenue	70%	61%			69%	61%		
Operating Expenses								

Cost of license fees

	Three Months Ended (In thousands)				Nine Months Ended (In thousands)			
	September 30, 2008	September 30, 2007	Variance \$ s	Variance %	September 30, 2008	September 30, 2007	Variance \$ s	Variance %
Cost of license fees	\$ 350	\$ 423	\$ (73)	(17)%	\$ 1,066	\$ 1,359	\$ (293)	(22)%
% of license revenue	3%	3%			4%	3%		

Cost of license fees consists primarily of product packaging, documentation, production costs and the amortization of purchased technologies. The decreases in cost of license fees in absolute dollars for the third quarter and the first nine months of fiscal year 2008, compared to the corresponding periods in the prior year, was due to full amortization of purchased technologies in the first nine months of fiscal 2008 relating to our acquisition of Nimble Technologies in fiscal 2003. We expect our cost of license fees, as a percentage of revenues from license fees, to remain between 2% and 4% of revenues from license fees for the remainder of fiscal year 2008.

Table of Contents

	Three Months Ended (In thousands)				Nine Months Ended (In thousands)			
	September 30,		Variance	Variance	September 30,		Variance	Variance
	2008	2007	\$ s	%	2008	2007	\$ s	%
Cost of services	\$ 5,299	\$ 6,080	\$ (781)	(13)%	\$ 17,861	\$ 18,473	\$ (612)	(3)%
% of services revenue	22%	29%			26%	30%		

Cost of services consists primarily of personnel and related costs, stock-based compensation, facilities costs incurred in providing software maintenance and support, training and consulting services, as well as third-party costs incurred in providing training and consulting services. The decrease in cost of services for the third quarter of fiscal year 2008, compared to the corresponding period in the prior year, was directly related to the decline in professional services revenues, which resulted in a 21% decrease in our consulting headcount. This was mainly due to the increase in the adoption of BIRT-based projects by our customers which do not result in professional service revenues to the same extent as the Company's traditional designer products. Cost of service has been decreasing in almost every quarter since the first quarter of 2006, which is consistent with the decrease in our consulting revenue.

For the nine months ended September 30, 2008 the decrease in cost of services compared to the corresponding period in the prior year, was primarily due to reductions in employee salaries and associated benefits totaling approximately \$900,000 driven by a 21% decrease in our consulting headcount. These reductions were partially offset by approximately \$400,000 increase in third party consulting fees as demand for Actuate's professional services engagements during the first half of fiscal 2008 exceeded the supply of its in-house consultants. We currently expect our cost of services expenses as a percentage of total services revenues to be in the range of 22% to 30% of total services revenues for the remainder of fiscal year 2008.

Sales and marketing

	Three Months Ended (In thousands)				Nine Months Ended (In thousands)			
	September 30,		Variance	Variance	September 30,		Variance	Variance
	2008	2007	\$ s	%	2008	2007	\$ s	%
Sales and marketing	\$ 13,168	\$ 13,587	\$ (419)	(3)%	\$ 39,982	\$ 40,589	\$ (607)	(1)%
% of total revenue	39%	39%			41%	41%		

Sales and marketing expenses consist primarily of salaries, commissions, stock-based compensation and bonuses earned by sales and marketing personnel, promotional expenses, travel, entertainment and facility costs. Sales and marketing expenses were lower in the third quarter of fiscal 2008 compared to the corresponding period in the prior year, due to an approximate \$1.3 million decrease in employee sales commissions and bonuses due to declining license revenues, salaries and related compensation expenses. These decreases were mainly due to an 18% headcount reduction over the same period last year, in part driven by our restructuring plan, which was implemented in the third quarter of fiscal year 2008. These reductions in headcount were primarily concentrated in North America. These decreases were partially offset by an increase of approximately \$400,000 in marketing program expenses which mainly consisted of webinars, direct marketing, and tradeshow. There were also increases of approximately \$300,000 related to advisory and research services in market development and BIRT during the third quarter of fiscal 2008.

For the nine months ended September 30, 2008, the decrease in sales and marketing expenses compared to the corresponding period in the prior year was primarily due to decreases in salaries, sales commissions and employee travel of approximately \$1.9 million due to reductions in headcount. These decreases were partially offset by increases of approximately \$950,000 in marketing expenses driven by webinars, direct marketing, tradeshow and \$300,000 in advisory and research services related to market development and BIRT.

We currently expect our sales and marketing expenses as a percentage of total revenues to be in the range of 38% to 42% of total revenues for the remainder of fiscal year 2008.

Table of Contents*Research and development*

	Three Months Ended (In thousands)				Nine Months Ended (In thousands)			
	September 30,		Variance	Variance	September 30,		Variance	Variance
	2008	2007	\$ s	%	2008	2007	\$ s	%
Research and development	\$ 5,459	\$ 5,351	\$ 108	2%	\$ 16,860	\$ 16,424	\$ 436	3%
% of total revenue	16%	15%			17%	16%		

Research and development costs consist primarily of personnel and related costs associated with the development of new products, stock-based compensation costs, enhancement of existing products, quality assurance and testing. The increase in research and development expenses in the third quarter and for the first nine months of fiscal year 2008, compared to the corresponding periods in the prior year, was attributed to employee compensation related costs due to a 6% increase in our product development headcount, from 154 at the end of the third quarter of fiscal 2007 to 163 at the end of the third quarter of fiscal 2008. This headcount increase was seen mainly in our Shanghai R&D facility. We believe that continued investments in technology and product development are essential for us to remain competitive in the markets we serve, and expect our research and development expenses as a percentage of total revenues to be in the range of 16% to 19% of total revenues for the remainder of fiscal year 2008.

General and administrative

	Three Months Ended (In thousands)				Nine Months Ended (In thousands)			
	September 30,		Variance	Variance	September 30,		Variance	Variance
	2008	2007	\$ s	%	2008	2007	\$ s	%
General and administrative	\$ 5,053	\$ 4,315	\$ 738	17%	\$ 14,457	\$ 13,117	\$ 1,340	10%
% of total revenue	15%	12%			15%	13%		

General and administrative expenses consist primarily of personnel costs, stock-based compensation costs and related costs for finance, human resources, information systems and general management, as well as legal, bad debt and accounting expenses. The increase in general and administrative expenses in absolute dollars for the third quarter of fiscal year 2008, compared to the corresponding period in the prior year, was primarily due to increased salaries and stock-based compensation and travel expenses of approximately \$430,000. These increases mainly resulted from annual merit adjustments and an 8% increase in headcount over the same period last year. We also incurred consulting and legal advisory fees totaling approximately \$460,000 related to considerations regarding strategic alternatives. These increases were partially offset by reductions of approximately \$80,000 in accounting and tax related charges due to lower compliance costs.

For the nine months ended September 30, 2008 the increase in general and administrative expenses compared to the corresponding period in the prior year, was primarily due to increased salaries and stock-based compensation expense of approximately \$950,000 due primarily to annual merit adjustments and an 8% increase in headcount over the same period last year. We also experienced increases in our bad debt expense of approximately \$360,000 as additional reserves were required on portions of our accounts receivable balances, and we also incurred legal and corporate advisory fees totaling approximately \$480,000 in fiscal 2008 related to considerations regarding strategic alternatives. These increases were offset by approximately \$500,000 in lower accounting, tax and professional consulting services driven mainly by lower compliance costs. We expect our general and administrative expenses to be in the range of 12% to 14% of total revenues for the remainder of fiscal year 2008.

Amortization of other purchased intangibles

For the three and nine months ended September 30, 2008, we recorded a charge of \$237,000 and \$711,000, respectively for the amortization of other purchased intangibles. These costs represent the amortization of the intangibles associated with the acquisition of performancesoft on a straight-line basis. These amortization amounts are consistent with those recorded during the same periods in the prior year.

Table of Contents*Restructuring charges*

	Three Months Ended (In thousands)				Nine Months Ended (In thousands)			
	September 30,		Variance	Variance	September 30,		Variance	Variance
	2008	2007	\$ s	%	2008	2007	\$ s	%
Restructuring charges	\$ 672	\$ 926	\$ (254)	(27)%	\$ 1,075	\$ 1,223	\$ (148)	(12)%
% of total revenue	2%	3%			1%	1%		

The restructuring costs for the third quarter of fiscal 2008 consist primarily of severance payments, payroll taxes and extended medical benefits. During the third quarter of fiscal 2008, we announced and began to implement restructuring actions that resulted in aggregate charges of \$672,000. As of September 30, 2008, we eliminated 23 positions worldwide, across all levels within the sales organization as a result of this restructuring.

In addition to the restructuring charges incurred in the third quarter of fiscal 2008, we incurred approximately \$132,000 in legal fees during the first half of fiscal 2008 related to a previous restructuring which involved the termination of former employees in one of our European subsidiaries. During this period, we also incurred charges totaling approximately \$271,000 primarily related to lease exit costs associated with our South San Francisco facility, lease exit costs associated with the closure of one of the two floors in our Toronto, Canada facility and the consolidation of our Vienna, Virginia facilities into one location.

The restructuring charges for the third quarter and the first nine months of fiscal 2008 were accounted for in accordance with SFAS 146, which requires the recognition of costs associated with exit or disposal activities when they are incurred rather than at the date of a commitment to an exit or disposal plan.

Interest and other income, net

	Three Months Ended (In thousands)				Nine Months Ended (In thousands)			
	September 30,		Variance	Variance	September 30,		Variance	Variance
	2008	2007	\$ s	%	2008	2007	\$ s	%
Interest and other income, net	\$ 683	\$ 761	\$ (78)	(10)%	\$ 761	\$ 2,306	\$ (1,545)	(67)%
% of total revenue	2%	2%			1%	2%		

Interest and other income, net, is comprised primarily of interest income earned by the Company on cash and short-term investments and currency exchange gains and losses. Interest income during the third quarter of fiscal 2008 decreased sharply due to lower weighted average returns on our investments. The average return on our investments during the third quarter of fiscal 2008 was approximately 3.0% compared with approximately 5.3% for the same period last year. This decrease was offset by currency exchange gains of approximately \$140,000 compared with losses totaling approximately \$200,000 in the third quarter of fiscal 2007. These exchange gains were the result of the appreciation of the British Pound, the Euro and the U.S. Dollar currencies held by our Swiss subsidiary against the Swiss Franc during the third quarter of fiscal 2008.

For the nine months ended September 30, 2008, the decrease in interest and other income, net was due primarily to a lower weighted average interest rate on our investments resulting in a decrease in interest income of approximately \$800,000. We also experienced currency exchange losses of approximately \$1.2 million compared with losses of approximately \$260,000 in the first nine months of fiscal 2007. These exchange losses were the results of sharp devaluations of the British Pound, the Euro and the U.S. Dollar currencies held by our Swiss subsidiary against the Swiss Franc mainly during the first half of fiscal 2008.

Table of Contents*Provision (benefits) for income taxes*

	Three Months Ended				Nine Months Ended			
	(In thousands)				(In thousands)			
	September 30, 2008	September 30, 2007	Variance \$ s	Variance %	September 30, 2008	September 30, 2007	Variance \$ s	Variance %
Provision (benefit) for income taxes	\$ 1,021	\$ (26)	\$ 1,047	4,027%	\$ (2,356)	\$ 2,438	\$ (4,794)	(197)%
% of total revenue	3%				(2)%		2%	

For the three months ended September 30, 2008, we recorded an income tax provision of \$1.0 million as compared to an income tax benefit of approximately \$26,000 for the three months ended September 30, 2007. The increase in the income tax provision for the third quarter of fiscal year 2008 as compared to the third quarter of fiscal year 2007 is primarily due to a \$2.4 million increase in the third quarter domestic profit before taxes from the second quarter to the third quarter of fiscal 2008 as compared to the same period in fiscal 2007.

For the nine months ended September 30, 2008, we recorded an income tax benefit of \$2.3 million, as compared to an income tax provision of \$2.4 million for the same period of fiscal year 2007. The decrease in the income tax provision for the nine months ended September 30, 2008 as compared to the nine months ended September 30, 2007 is primarily due to a discrete item booked in the first quarter of fiscal year 2008 related to the benefit derived from the deductions associated with the merger of a European subsidiary into our U.S. holding company on February 11, 2008. This action resulted in a deemed liquidation for U.S. tax purposes which provided for a \$3.7 million federal and state benefit from the tax deduction associated with the write off of equity and debt between the U.S. holding company and the European subsidiary. The difference between the tax provision through the third quarter of fiscal 2008 and the tax benefit recorded in the first quarter of fiscal 2008 is the result of the tax provision calculated based on lower projected profit before income taxes.

Liquidity and Capital Resources

	As of September 30, 2008	As of September 30, 2007	Change \$	Change %
Cash, cash equivalents and short-term investments	\$ 66,140	\$ 69,488	\$ (3,348)	(5)%
Working capital	\$ 43,882	\$ 46,170	\$ (2,288)	(5)%
Stockholders' equity	\$ 107,303	\$ 87,897	\$ 19,406	22%

Our primary source of cash is receipts from revenue. The primary uses of cash are payroll (salaries, sales commissions, bonuses, and benefits), general operating expenses (marketing, travel, office rent) and cost of revenue. Another source of cash is proceeds from the exercise of employee options and another use of cash is our stock repurchase program.

Net cash provided by operating activities in the first nine months of fiscal 2008 was \$24.4 million primarily comprised of net income, net of non-cash related expenses. The working capital sources of cash in the first nine months of fiscal 2008 were a decrease in accounts receivables due to improved collections. Days sales outstanding (DSO), calculated based on revenue for the most recent quarter and accounts receivable as of the balance sheet date, decreased by 30 days from 91 days at December 31, 2007 to 61 days at September 30, 2008. The primary working capital uses of cash were due to payments of accrued commissions and bonuses, income taxes and a reduction in accrued restructuring as a result of payments made during the first nine months of fiscal 2008.

Cash provided by investing activities was \$8.4 million for the nine months ended September 30, 2008 compared to \$11.5 million used for the same period in fiscal 2007. The increase in the cash provided by investing activities primarily relates to the timing of purchases and maturities of marketable securities and our capital expenditures to support our growth.

Cash used in financing activities was \$7.7 million for the nine months ended September 30, 2008 compared to \$6.6 million used in the same period in fiscal year 2007. This increase in cash used was primarily due to the fact that the Company did not realize any cash flows with respect to tax benefits derived from the exercise of employee stock options compared to approximately \$1.3 million received during the same period last year. The Company did not realize any cash flows with respect to these tax benefits due to an expected taxable loss for the fiscal year 2008.

We believe that our current cash balances and cash generated from operations will be sufficient to meet our working capital and capital expenditures requirements for at least the next twelve months. Thereafter, if cash generated from operations is insufficient to satisfy our liquidity requirements, we may find it necessary to sell additional equity or obtain additional credit facilities. The sale of additional equity could result in

Edgar Filing: ACTUATE CORP - Form 10-Q

additional dilution to our current stockholders. A portion of our cash may be used to acquire or invest in complementary businesses, such as the acquisition of the minority interest in our 88% owned subsidiary in Japan, or complementary products or to obtain the right to use complementary technologies.

Table of Contents

If we need to access the funds associated with the ARS but are unable to do so, our operations and financial position could be materially harmed.

Contractual Obligations and Commercial Commitments.

Our license agreements include indemnification for infringement of third party intellectual property rights and certain warranties. Historically, we have not experienced significant claims under these contractual rights. Therefore, no amounts have been accrued relating to those indemnities and warranties.

The Company reached the end of its lease term on its previous corporate headquarters located at 701 Gateway, in South San Francisco in February 2008. In anticipation of this event, on June 1, 2007, the Company entered into a five year sublease agreement with Oracle Corporation for approximately 83,000 square feet of office space in the Bridgepointe Campus in San Mateo, California. This lease is operating in nature; commenced on August 1, 2007 and ends on July 31, 2012. In addition, the lease provides for approximately nine months of free rent (rent holiday) and approximately \$600,000 in landlord incentives to be applied by Actuate towards construction of future improvements. The incentives were applied to leasehold improvements completed during the fourth quarter of fiscal year 2007. The Company accounts for and recognizes the rent holidays in its operating lease on a straight-line basis over the lease term (including any rent holiday period) in accordance with paragraph 2 of FASB Technical Bulletin 85-3 (FTB 85-3), *Accounting for Operating Leases with Scheduled Rent Increases*. The Company accounts for the amortization of its leasehold improvements over the duration of the lease consistent with paragraph 5(f) of FASB Statement 13 (SFAS 13), *Accounting for Leases*, as amended. Leasehold improvements made by the Company that are funded by landlord incentives or allowances under an operating lease are recorded by the Company as leasehold improvement assets and amortized over the term of the lease consistent with the guidance in paragraph 5(f) of SFAS 13. The incentives are recorded as deferred rent and amortized as reductions to lease expense over the lease term in accordance with paragraph 15 of SFAS 13.

As of September 30, 2008, Actuate pledged \$395,000 of restricted cash as collateral for a standby letter of credit that guarantees its contractual obligations relating to its sublease agreement for its new corporate headquarter facilities located at the Bridgepointe Campus in San Mateo, California. This restricted cash is classified as Other Assets in the accompanying condensed consolidated balance sheet.

The following table summarizes our contractual obligations as of September 30, 2008 (in thousands):

	Total	Less than 1 year	1 3 years	3 5 years	Thereafter
Obligations:					
Operating leases (1)	\$ 16,783	\$ 5,011	\$ 8,125	\$ 2,835	\$ 812
Purchase obligations (2)	3,493	3,355	120	13	5
FIN 48 (3)	471		471		
Total	\$ 20,747	\$ 8,366	\$ 8,716	\$ 2,848	\$ 817

- (1) Our future contractual obligations include minimum lease payments under operating leases at September 30, 2008, net of contractual sublease proceeds. Of the remaining net future minimum lease payments, approximately \$6.3 million is included in restructuring liabilities in the Company's consolidated balance sheet as of September 30, 2008.
- (2) Purchase obligations represent an estimate of all open purchase orders and contractual obligations in the ordinary course of business for which we have not received the goods or services as of September 30, 2008. Although open purchase orders are considered enforceable and legally binding, the terms generally allow us the option to cancel, reschedule and adjust our requirements based on our business needs prior to the delivery of goods or performance of services.
- (3) The obligations under FIN 48 represent the tax liability associated with the calculation of uncertain tax positions.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market Risk. Market risk represents the risk of loss that may impact our financial position due to adverse changes in financial market prices and rates. Our market risk exposure is primarily a result of credit risk, fluctuations in interest rates and foreign exchange rates.

Foreign Currency Exchange Risk. During the first nine months of fiscal years 2008 and 2007 we derived 29% and 27%, respectively, of our total revenues from sales outside of North America. We face exposure to market risk on the related receivables with respect to fluctuations in the relative value of currencies. Our international revenues and expenses are denominated in foreign currencies, principally the Euro and the British Pound Sterling. The functional currency of each of our foreign subsidiaries is the local

Table of Contents

currency. We are also exposed to foreign exchange rate fluctuations as the financial results of foreign subsidiaries are translated into U.S. dollars in consolidation. As exchange rates vary, transaction gains and losses may vary from expectations and adversely impact overall expected profitability. Our realized loss due to foreign exchange rate fluctuations was approximately \$1.2 million for the first nine months of fiscal 2008 compared to losses of approximately \$260,000 during the same period last year. During the first nine months of fiscal 2008, exchange rate fluctuations on foreign revenue transactions positively impacted our total revenue growth by approximately \$800,000 when compared to the same period in the prior year.

Interest Rate Risk. The primary objective of our investment activities is to preserve principal while at the same time maximizing yields without significantly increasing risk. To achieve this objective, we typically invest in high quality debt securities. Due to the nature of our investments, we believe that there is no material risk exposure.

Credit Risk. Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, investments in marketable securities, and trade accounts receivable. We have policies that limit investments in investment grade securities and the amount of credit exposure to any one issuer. We perform ongoing credit evaluations of our customers and maintain an allowance for potential credit losses. We do not require collateral or other security to support client receivables. Our credit risk is also mitigated because our customer base is diversified by geography and no single customer has accounted for more than 10% of our consolidated revenue on an annual basis. We generally do not use foreign exchange contracts to hedge the risk in receivables denominated in foreign currencies. We do not hold or issue derivative financial instruments for trading or speculative purposes.

We hold a variety of interest bearing auction rate securities, or ARS. These ARS investments are intended to provide liquidity via an auction process that resets the applicable interest rate at predetermined calendar intervals, allowing investors to either roll over their holdings or gain immediate liquidity by selling such interests at par. The recent uncertainties in the credit markets have affected all of our holdings in ARS investments and auctions for our investments in these securities have failed to settle on their respective settlement dates. Consequently, the investments are not currently liquid and we will not be able to access these funds until a future auction of these investments is successful or a buyer is found outside of the auction process. Maturity dates for these ARS investments range from 2034 to 2047. As of September 30, 2008, all ARS investments are classified as non-current assets on our condensed consolidated balance sheet because of our inability to determine when these investments will settle. During the first nine months of fiscal year 2008, we determined that there were declines in the fair value of our ARS investments of approximately \$1.3 million, of which all were deemed to be temporary. All of the ARS investments were investment grade quality and were in compliance with the Company's investment policy at the time of acquisition. The Company currently has the ability and intent to hold these ARS investments until a third party purchases the securities, a recovery of the auction process or until maturity. For further discussion on recent developments regarding these ARS investments, please refer to the Subsequent Events Section of this Form 10-Q in Note 12.

Item 4. Controls and Procedures

As of the end of the period covered by this report (the Evaluation Date), the Company carried out an evaluation under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)). There are inherent limitations to the effectiveness of any system of disclosure controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable, not absolute, assurance of achieving their control. Subject to these limitations, and based on the evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that, as of the Evaluation Date, the disclosure controls are not effective as to the material weakness discussed in our Form 10-K for the year ended December 31, 2007. However, the Company is in the process of remediating, by the end of fiscal 2008, the material weakness identified in fiscal year 2007 by ensuring a detailed review of the supporting tax schedules by someone other than the preparer.

Changes in Internal Controls

During the nine months ended September 30, 2008, in response to the material weakness identified in Form 10-K as filed with the Securities and Exchange Commission on March 17, 2008, we implemented the following control measure:

We engaged a third party tax service provider to assist with the preparation of the Company's tax provision, which was reviewed by our Tax Director.

Edgar Filing: ACTUATE CORP - Form 10-Q

There were no other significant changes in our internal control over financial reporting that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Part II. Other Information

Item 1. Legal Proceedings

The Company is engaged in certain legal actions arising in the ordinary course of business, including international employment litigation arising out of restructuring activities. Although there can be no assurance as to the outcome of such litigation, the Company believes that it has adequate legal defenses and that the ultimate outcome of any of these actions will not have a material effect on the Company's financial position or results of operations.

Table of Contents

Item 1A. Risk Factors

Investors should carefully consider the following risk factors and warnings before making an investment decision. The risks described below are not the only ones facing Actuate. Additional risks that we do not yet know of or that we currently think are immaterial may also materially impair our business operations. If any of the following risks, currently unknown risks, or currently known risks that are mistakenly believed to be immaterial, actually occur, our business, operating results or financial condition could be materially harmed. In such case, the trading price of our common stock could decline and you may lose all or part of your investment. Investors should also refer to the other information set forth in this Quarterly Report on Form 10-Q, including the financial statements and the notes thereto.

THE COMPANY'S OPERATING RESULTS MAY BE VOLATILE AND DIFFICULT TO PREDICT. IF IT FAILS TO MEET ITS ESTIMATES OF FUTURE OPERATING RESULTS OR IT FAILS TO MEET THE EXPECTATIONS OF PUBLIC MARKET ANALYSTS AND INVESTORS, THE MARKET PRICE OF ITS STOCK MAY DECREASE SIGNIFICANTLY.

The susceptibility of the Company's operating results to significant fluctuations makes any prediction, including the Company's estimates of future operating results, difficult. In addition, the Company believes that period-to-period comparisons of its operating results are not necessarily meaningful and investors should not rely on them as indications of the Company's future performance. The Company's operating results have in the past varied, and may in the future vary significantly due to factors such as the following:

Demand for its products;

The size and timing of significant orders for its products;

A slowdown or a decrease in spending on information technology by its current and/or prospective customers;

Competition from products that are directly competitive with its products;

Lost revenue from introduction or market acceptance of open source products that are directly competitive with its products;

The management, performance and expansion of its international operations;

Foreign currency exchange rate fluctuations;

Customers' desire to consolidate their purchases of RIA, Performance Management and Business Intelligence software to one or a very small number of vendors from which a customer has already purchased software;

General domestic and international economic and political conditions, including war, terrorism, and the threat of war or terrorism;

Sales cycles and sales performance of its indirect channel partners;

Changes in the way it and its competitors price their respective products and services, including maintenance and transfer fees;

Edgar Filing: ACTUATE CORP - Form 10-Q

Continued successful relationships and the establishment of new relationships with OEMs;

Changes in its level of operating expenses and its ability to control costs;

The outcome or publicity surrounding any pending or threatened lawsuits;

Ability to make new products and product enhancements commercially available in a timely manner;

Ability to effectively launch new or enhanced products, including the timely education of the Company's sales, marketing and consulting personnel with respect to such new or enhanced products.;

Customers delaying purchasing decisions in anticipation of new products or product enhancements;

Budgeting cycles of its customers;

Failure to successfully manage its acquisitions;

Defects in its products and other product quality problems;

Failure to successfully meet hiring needs including for qualified professional services employees and unexpected personnel changes;

Changes in the market segments and types of customers at which it focuses its sales and marketing efforts;

Changes in perpetual licensing models to term- or subscription-based models with respect to which license revenue is not fully recognizable at the time of initial sale; and

Table of Contents

Changes in service models with respect to which consulting services are performed on a fixed-fee, rather than variable fee, basis;

Potential impairments of ARS, goodwill, intangibles and other investments.

Because the Company's software products are typically shipped shortly after orders are received, total revenues in any quarter are substantially dependent on orders booked and shipped throughout that quarter. Furthermore, several factors may require the Company, in accordance with accounting principles generally accepted in the United States, to defer recognition of license fee revenue for a significant period of time after entering into a license agreement, including:

Whether the license agreement includes both software products that are then currently available and software products or other enhancements that are still under development;

Whether the license agreement relates entirely or partly to software products that are currently not available;

Whether the license agreement requires the performance of services that may preclude revenue recognition until successful completion of such services;

Whether the license agreement includes acceptance criteria that may preclude revenue recognition prior to customer acceptance;

Whether the license agreement includes undelivered elements (including limited terms or durations) that may preclude revenue recognition prior to customer acceptance; and

Whether the license agreement includes extended payment terms that may delay revenue recognition until the payment becomes due. In addition, the Company may in the future experience fluctuations in its gross and operating margins due to changes in the mix of its domestic and international revenues, changes in the mix of its direct sales and indirect sales and changes in the mix of license revenues and service revenues, as well as changes in the mix among the indirect channels through which its products are offered.

A significant portion of the Company's total revenues in any given quarter is derived from existing customers. The Company's ability to achieve future revenue growth, if any, will be substantially dependent upon its ability to increase revenues from license fees and services from existing customers, to expand its customer base and to increase the average size of its orders. To the extent that such increases do not occur in a timely manner, the Company's business, operating results and financial condition would be harmed.

The Company's expense levels and any plans for expansion are based in significant part on its expectations of future revenues and are relatively fixed in the short-term. If revenues fall below its expectations and it is unable to reduce its spending in response quickly, the Company's business, operating results, and financial condition could be harmed.

The Company often implements changes to its license pricing structure for all of its products including increased prices and modified licensing parameters. If these changes are not accepted by the Company's current customers or future customers, its business, operating results, and financial condition could be harmed.

Based upon all of the factors described above, the Company has a limited ability to forecast the amount and mix of future revenues and expenses and it is likely that at some time, the Company's operating results will be below its estimates or the expectations of public market analysts and investors. In the event that operating results are below its estimates or other expectations, the price of the Company's common stock is likely to decline.

THE COMPANY HAS MADE, AND MAY IN THE FUTURE MAKE, ACQUISITIONS, WHICH INVOLVE NUMEROUS RISKS.

Edgar Filing: ACTUATE CORP - Form 10-Q

The Company's business is highly competitive, and as such, its growth is dependent upon market growth and its ability to enhance its existing products, introduce new products on a timely basis and expand its distribution channels and professional services organization. One of the ways the Company has addressed and will continue to address these issues is through acquisitions of other companies.

Generally, acquisitions (including that of performance soft) involve numerous risks, including the following:

The benefits of the acquisition not materializing as planned or not materializing within the time periods or to the extent anticipated;

The Company's ability to manage acquired entities' people and processes that are headquartered in separate geographical locations from the Company's headquarters;

The possibility that the Company will pay more than the value it derives from the acquisition;

Difficulties in integration of the operations, technologies, and products of the acquired companies;

The assumption of certain known and unknown liabilities of the acquired companies;

Table of Contents

Difficulties in retaining key relationships with customers, partners and suppliers of the acquired company;

The risk of diverting management's attention from normal daily operations of the business;

The Company's ability to issue new releases of the acquired company's products on existing or other platforms;

Negative impact to the Company's financial condition and results of operations and the potential write down of impaired goodwill and intangible assets resulting from combining the acquired company's financial condition and results of operations with its financial statements;

Risks of entering markets in which the Company has no or limited direct prior experience; and

The potential loss of key employees of the acquired company.

Mergers and acquisitions of high-technology companies are inherently risky, and the Company cannot be certain that any acquisition will be successful and will not materially harm the Company's business, operating results or financial condition.

INTELLECTUAL PROPERTY CLAIMS AGAINST THE COMPANY CAN BE COSTLY AND COULD RESULT IN THE LOSS OF SIGNIFICANT RIGHTS.

Third parties may claim that the Company's current or future products infringe their intellectual property rights. The Company has been subject to infringement claims in the past and it expects that companies in the Business Intelligence, RIA or Performance Management software market will increasingly be subject to infringement claims as the number of products and/or competitors in its industry segment grows and the functionality of products in different industry segments overlaps. Any such claims, with or without merit, could be time-consuming to defend, result in costly litigation and expenses, divert management's attention and resources, cause product shipment delays or require the Company to enter into royalty or licensing agreements. Such royalty or licensing agreements, if required, may not be available on terms acceptable to the Company or at all. A successful claim of product infringement against the Company and its failure or inability to license the infringed or similar technology could materially harm the Company's business, operating results and financial condition.

THE COMPANY MAY NOT BE ABLE TO PROTECT ITS SOURCE CODE FROM COPYING.

Source code, the detailed program commands for our operating systems and other software programs, is critical to our business. Although we take significant measures to protect the secrecy of large portions of our source code, unauthorized disclosure or reverse engineering of a significant portion of our source code could make it easier for third parties to compete with our products by copying functionality, which could adversely affect our revenue and operating margins.

IF THE COMPANY FAILS TO GROW REVENUE FROM INTERNATIONAL OPERATIONS AND EXPAND ITS INTERNATIONAL OPERATIONS ITS BUSINESS WOULD BE SERIOUSLY HARMED.

The Company's total revenues derived from sales outside North America were 29%, 27% and 23% for the first nine months of fiscal years 2008, 2007 and 2006, respectively. Its ability to achieve revenue growth in the future will depend in large part on its success in increasing revenues from international sales. The Company intends to continue to invest significant resources to expand its sales and support operations outside North America and to potentially enter additional international markets. In order to expand international sales, the Company must establish additional foreign operations, expand its international channel management and support organizations, hire additional personnel, recruit additional international resellers and increase the productivity of existing international resellers. The Company intends to continue to move from a focus on direct sales to a focus on indirect sales in certain of its international markets in 2008. If it is not successful in expanding international operations in a timely and cost-effective manner, the Company's business, operating results and financial condition could be materially harmed.

IF THE COMPANY DOES NOT SUCCESSFULLY EXPAND ITS DISTRIBUTION CHANNELS AND DEVELOP AND MAINTAIN RELATIONSHIPS WITH OEMs, ITS BUSINESS WOULD BE SERIOUSLY HARMED.

Edgar Filing: ACTUATE CORP - Form 10-Q

To date, the Company has sold its products principally through its direct sales force, as well as through indirect sales channels, such as its OEMs, resellers and systems integrators. The Company's revenues from license fees resulting from sales through indirect channel partners were approximately 32%, 29%, and 33% of total revenues from license fees for the first nine months of fiscal years 2008, 2007 and 2006, respectively. The Company's ability to achieve significant revenue growth in the future will depend in large part on the success of its sales force in further establishing and maintaining relationships with indirect channel partners. In particular, a significant element of the Company's strategy is to embed its technology in products offered by OEMs for resale or as a hosted application to such OEMs' customers and end-users. The Company also intends to establish and expand its relationships with resellers and systems integrators so that such resellers and systems integrators will increasingly recommend its products to their clients. The Company's future success will depend on the ability of its indirect channel partners to sell and support its products. If the sales and implementation cycles of its indirect channel partners are lengthy or variable or its OEMs experience difficulties embedding its technology into their products or it fails to train the sales and customer support personnel of such indirect channel partners in a timely or effective fashion, the Company's business, operating results and financial condition would be materially harmed.

Table of Contents

Although the Company is currently investing, and plans to continue to invest, significant resources to expand and develop relationships with OEMs, it has at times experienced and continues to experience difficulty in establishing and maintaining these relationships. If the Company is unable to successfully expand this distribution channel and secure license agreements with additional OEMs on commercially reasonable terms, including significant up-front payments of minimum license fees, and extend existing license agreements with existing OEMs on commercially reasonable terms, the Company's operating results would be adversely affected. Any inability by the Company to maintain existing or establish new relationships with indirect channel partners, including systems integrators and resellers, or, if such efforts are successful, a failure of the Company's revenues to increase correspondingly with expenses incurred in pursuing such relationships, would materially harm the Company's business, operating results and financial condition.

THE COMPANY MAY NOT BE ABLE TO COMPETE SUCCESSFULLY AGAINST ITS CURRENT AND FUTURE COMPETITORS.

The Company's market is intensely competitive and characterized by rapidly changing technology, evolving standards and product releases by the Company's competitors that are marketed to compete directly with the Company's products. The Company's competition comes in four principal forms:

Competition from current or future Business Intelligence software vendors such as Information Builders and MicroStrategy, each of which offers reporting products.

Competition from other large software vendors such as IBM, Microsoft, Oracle and SAP, to the extent they sell as separate products or include RIA and Performance Management functionality with their applications or databases;

Competition from other software vendors and software development tool vendors including providers of open-source software products; and

Competition from the IT departments of current or potential customers that may develop scalable Business Intelligence, Performance Management and RIA products internally, which may be cheaper and more customized than the Company's products.

Competition from BIRT. The Company expects that BIRT, which is free, may in the short term cannibalize some smaller sales of its Business Intelligence and RIA products.

Most of the Company's current and potential competitors have significantly greater financial, technical, marketing and other resources than it does. These competitors may be able to respond more quickly to new or emerging technologies and changes in customer requirements or devote greater resources to the development, promotion and sales of their products than the Company. Also, most current and potential competitors have greater name recognition and the ability to leverage a significant installed customer base. These companies have released and can continue to release competing Business Intelligence, Performance Management and RIA software products or significantly increase the functionality of their existing software products, either of which could result in a loss of market share for the Company. The Company expects additional competition as other established and emerging companies enter the Business Intelligence, Performance Management and RIA software market and new products and technologies are introduced. Increased competition could result in price reductions, fewer customer orders, reduced gross margins, longer sales cycles and loss of market share, any of which would harm the Company's business, operating results and financial condition.

Current and potential competitors may make strategic acquisitions or establish cooperative relationships among themselves or with third parties, thereby increasing their ability to address the needs of the Company's customers. Also, the Company's current or future channel partners may have established in the past, or may in the future, establish cooperative relationships with the Company's current or potential competitors, thereby limiting the Company's ability to sell its products through particular distribution channels. It is possible that new competitors or alliances among current and new competitors may emerge and rapidly gain significant market share. Such competition could reduce the Company's revenues from license fees and services from new or existing customers on terms favorable to us. If the Company is unable to compete successfully against current and future competitors, the Company's business, operating results and financial condition would be materially harmed.

IF THE MARKET FOR RIA AND PERFORMANCE MANAGEMENT SOFTWARE DOES NOT GROW AS THE COMPANY EXPECTS, ITS BUSINESS WOULD BE SERIOUSLY HARMED.

The market for Business Intelligence and RIA and Performance Management software products is still emerging and the Company cannot be certain that such market will continue to grow or that, even if the market does grow, businesses will purchase the Company's products. If the market for Business Intelligence and RIA and Performance Management software products fails to grow or grows more slowly than the Company expects, its business, operating results and financial condition would be harmed. To date, all of the Company's revenues have been derived from licenses for its Business Intelligence and RIA and software and Performance Management related products and services, and it expects this to continue for the foreseeable future. The Company has spent, and intends to continue to spend, considerable resources educating potential customers and indirect channel partners about Business Intelligence and RIA and Performance Management software and its products. However, if such expenditures do not enable its products to achieve any significant degree of market acceptance, the Company's business, operating results and financial condition would be materially harmed.

Table of Contents

BECAUSE THE SALES CYCLES OF THE COMPANY'S PRODUCTS ARE LENGTHY AND VARIABLE, ITS QUARTERLY RESULTS MAY FLUCTUATE.

The purchase of the Company's products by its end-user customers for deployment within the customer's organization typically involves a significant commitment of capital and other resources, and is therefore subject to delays that are beyond the Company's control. These delays can arise from a customer's internal procedures to approve large capital expenditures, budgetary constraints, the testing and acceptance of new technologies that affect key operations and general economic and political events. The sales cycle for initial orders and larger follow-on orders for the Company's products can be lengthy and variable. Additionally, sales cycles for sales of the Company's products to OEMs tend to be longer, ranging from 6 to 24 months or more, and may involve convincing the OEMs' entire organization that the Company's products are the appropriate software for their applications. This time period does not include the sales and implementation cycles of such OEMs' own products, which can be longer than the Company's sales and implementation cycles. Certain of the Company's customers have in the past, or may in the future, experience difficulty completing the initial implementation of Actuate's products. Any difficulties or delays in the initial implementation by the Company's end-user customers or indirect channel partners could cause such customers to reject the Company's software or lead to the delay or non-receipt of future orders for the large-scale deployment of its products, in which case the Company's business, operating results and financial condition would be materially harmed.

ADVANCES IN HARDWARE AND SOFTWARE TECHNOLOGY MAY CAUSE OUR SOFTWARE REVENUE TO DECLINE.

In the past, the Company has licensed software for a certain number of processors or CPUs to many of its customers. Advances in hardware technology, including, but not limited to, greater CPU clock speeds, multiple-core processors and virtualization, have afforded software performance gains to some customers, causing them to defer additional software purchases from the Company. The occurrence of any of these events, and other future advances, could seriously harm the Company's business, operating results and financial condition. Use of the Company's software on more advanced hardware than the hardware on which the software was originally installed, without payment of a transfer fee is prohibited by the terms of applicable license agreements or Company policies. The Company intends to require compliance with such terms. As a result of its enforcement efforts, customers may defer or cease purchasing additional software or maintenance and support. The occurrence of any of these events could materially harm the Company's business, operating results and financial condition.

IF THE COMPANY IS UNABLE TO FAVORABLY ASSESS THE EFFECTIVENESS OF ITS INTERNAL CONTROL OVER FINANCIAL REPORTING, IN FUTURE PERIODS, OR IF THE COMPANY'S INDEPENDENT AUDITORS ARE UNABLE TO PROVIDE AN UNQUALIFIED ATTESTATION REPORT ON SUCH ASSESSMENT, THE COMPANY'S STOCK PRICE COULD BE ADVERSELY AFFECTED.

Pursuant to Section 404 of the Sarbanes-Oxley Act of 2002 (Section 404), the Company's management is required to report on, and its independent auditors are required to attest to, the effectiveness of the Company's internal controls over financial reporting on an ongoing basis. The Company's assessment, testing and evaluation of the design and operating effectiveness of its internal control over financial reporting are ongoing. Management assessed the effectiveness of our internal control over financial reporting as of December 31, 2007, and this assessment identified a material weakness in our internal control over financial reporting related to our income tax provision. Specifically, we did not maintain effective controls over the review of the income tax provision calculation by someone other than the preparer. The Company plans to remediate the aforementioned material weakness by ensuring a detailed review of the supporting tax schedules by someone other than the preparer. This material weakness is disclosed in Item 4 of this report. The Company cannot predict the outcome of its testing in future periods. If in future periods the Company concludes that its internal control over financial reporting is not effective, it may be required to change its internal control over financial reporting to remediate deficiencies, and investors may lose confidence in the reliability of its financial statements, causing the Company's stock price to decline significantly.

SECTION 404 AND REGULATORY CHANGES HAVE CAUSED THE COMPANY TO INCUR INCREASED COSTS AND OPERATING EXPENSES AND MAY MAKE IT MORE DIFFICULT FOR THE COMPANY TO ATTRACT AND RETAIN QUALIFIED OFFICERS AND DIRECTORS.

The Sarbanes-Oxley Act of 2002 and regulatory changes by the SEC and Nasdaq have caused the Company to incur significant increased costs. In particular, the rules governing the standards that must be met for management to assess its internal controls over financial reporting under Section 404 are complex, and require significant documentation, testing and possible remediation. This ongoing process of reviewing, documenting and testing the Company's internal controls over financial reporting has resulted in, and will likely continue to result in ongoing cost to the Company. Furthermore, achieving and maintaining compliance with Sarbanes-Oxley and other new rules and regulations has and will continue to require the Company to hire additional personnel and to use additional outside legal, accounting and advisory services.

Table of Contents

Any acquisitions made by the Company will also put a significant strain on its management, information systems and resources. In addition, any expansion of the Company's international operations will lead to increased financial and administrative demands associated with managing its international operations and managing an increasing number of relationships with foreign partners and customers and expanded treasury functions to manage foreign currency risks, all of which will require implementation of any changes necessary to maintain effective internal controls over financial reporting.

Any failure to satisfy these new rules could make it more difficult for the Company to obtain certain types of insurance, including director and officer liability insurance, and it may be forced to accept reduced policy limits and coverage or incur substantially higher costs to obtain the same or similar coverage. Alternatively, the Company may determine that it should reduce its director and officer liability insurance policy limits. The impact of any of these events could also make it more difficult for the Company to attract and retain qualified persons to serve on its Board of Directors, or as executive officers.

IF THE COMPANY DOES NOT RESPOND TO RAPID TECHNOLOGICAL CHANGES, ITS PRODUCTS COULD BECOME OBSOLETE.

The market for the Company's products is characterized by rapid technological changes, frequent new product introductions and enhancements, changing customer demands, and evolving industry standards. Any of these factors can render existing products obsolete and unmarketable. The Company believes that its future success will depend in large part on its ability to support current and future releases of popular operating systems and computer programming languages, databases and software applications, to timely develop new products that achieve market acceptance and to meet an expanding range of customer requirements. If the announcement or introduction of new products by the Company or its competitors or any change in industry standards causes customers to defer or cancel purchases of existing products, the Company's business, operating results and financial condition would be harmed.

As a result of the complexities inherent in Business Intelligence, RIA and Performance Management software, major new products and product enhancements can require long development and testing periods. In addition, customers may delay their purchasing decisions in anticipation of the general availability of new or enhanced versions of the Company's products. As a result, significant delays in the general availability of such new releases or significant problems in the installation or implementation of such new releases could harm the Company's business, operating results and financial condition. If the Company fails to successfully develop, on a timely and cost effective basis, product enhancements or new products that respond to technological change, evolving industry standards or customer requirements or such new products and product enhancements fail to achieve market acceptance, the Company's business, operating results and financial condition would be harmed.

IF THE COMPANY DOES NOT RELEASE NEW PRODUCTS AND ENHANCEMENTS TO EXISTING PRODUCTS IN A TIMELY MANNER OR IF SUCH NEW PRODUCTS AND ENHANCEMENTS, INCLUDING THE COMPANY'S OPEN SOURCE PROJECT, FAIL TO ACHIEVE MARKET ACCEPTANCE, THE COMPANY'S BUSINESS COULD BE SERIOUSLY HARMED.

The Company believes that its future success will depend in large part on the success of new products and enhancements to its products that it makes generally available. Prior to the release of any new products or enhancements, the products must undergo a long development and testing period. To date, the development and testing of new products and enhancements have taken longer than expected. In the event the development and testing of new products and enhancements continue to take longer than expected, the release of new products and enhancements will be delayed. If the Company fails to release new products and enhancements in a timely manner, its business, operating results and financial condition would be harmed. In addition, if such new products and enhancements do not achieve market acceptance, the Company's business, operating results and financial condition would be harmed.

The Company has developed a BIRT open source code project as part of the Eclipse open source code foundation. The Company hopes that BIRT and a commercialized version of BIRT will be widely adopted by Java developers and will result in such developers recommending to their companies that they license the Company's commercially available products. If BIRT does not achieve market acceptance and result in promoting sales of commercially available products, the Company's business, operating results and financial condition may be harmed.

THE SUCCESS OF THE COMPANY'S OPEN-SOURCE BIRT INITIATIVE IS DEPENDENT ON BUILDING A DEVELOPER COMMUNITY AROUND BIRT.

The success of the Company's BIRT initiative is dependent on the open source contributions of third-party programmers and corporations, and if they cease to make these contributions to the Eclipse open source project, the BIRT project, or the general open source movement, the Company's BIRT product strategy could be adversely affected. If key members, or a significant percentage, of this group of developers or corporations decides to cease development of Eclipse, BIRT or other open source applications, the Company would have to either rely on another party (or parties) to develop these technologies, develop them itself or adapt its open source product strategy accordingly. This could

Edgar Filing: ACTUATE CORP - Form 10-Q

increase the Company's development expenses, delay its product releases and upgrades or adversely impact customer acceptance of open source offerings.

Table of Contents

THE COMPANY'S INTERNATIONAL OPERATIONS ARE SUBJECT TO SIGNIFICANT RISKS.

A substantial portion of the Company's revenues is derived from international sales. International operations are subject to a number of risks, any of which could harm the Company's business, operating results and financial conditions. These risks include the following:

Economic and political instability, including war and terrorism or the threat of war and terrorism;

Difficulty of managing an organization spread across many countries;

Multiple and conflicting tax laws and regulations;

Costs of localizing products for foreign countries;

Difficulty in hiring employees and difficulties and high costs associated with terminating employees and restructuring operations in foreign countries;

Trade laws and business practices favoring local competition;

Dependence on local vendors;

Increasing dependence on resellers in certain geographies;

Compliance with multiple, conflicting and changing government laws and regulations;

Weaker intellectual property protection in foreign countries and potential loss of proprietary information due to piracy or misappropriation;

Longer sales cycles;

Import and export restrictions and tariffs;

Difficulties in staffing and managing foreign operations;

The significant presence of some of our competitors in certain international markets;

Greater difficulty or delay in accounts receivable collection; and

Foreign currency exchange rate fluctuations.

The Company believes that, over time, an increasing portion of its revenues and costs will be denominated in foreign currencies. To the extent such denomination in foreign currencies does occur, gains and losses on the conversion to U.S. dollars of accounts receivable, accounts payable and other monetary assets and liabilities arising from international operations may contribute to fluctuations in the Company's results of operations. Although the Company may in the future decide to undertake foreign exchange hedging transactions to cover a portion of its foreign currency transaction exposure, it currently does not attempt to cover any foreign currency exposure. If it is not effective in any future foreign exchange hedging transactions in which it engages, the Company's business, operating results and financial condition could be materially harmed.

THE COMPANY'S EXECUTIVE OFFICERS AND CERTAIN KEY PERSONNEL ARE CRITICAL TO ITS BUSINESS AND IT MAY NOT BE ABLE TO RECRUIT AND RETAIN THE PERSONNEL IT NEEDS.

The Company's future success depends upon the continued service of its executive officers and other key engineering, sales, marketing and customer support personnel. None of its officers or key employees is bound by an employment agreement for any specific term. If the Company loses the service of one or more of its key employees, or if one or more of its executive officers or key employees decide to join a competitor or otherwise compete directly or indirectly with it, this could have a significant adverse effect on the Company's business.

In addition, because experienced personnel in the Company's industry are in high demand and competition for their talents is intense, the Company has relied on its ability to grant stock options as one mechanism for recruiting and retaining this highly skilled talent. Accounting regulations that have recently taken effect require the expensing of stock options, which will impair the Company's future ability to provide these incentives without incurring significant compensation costs. There can be no assurance that the Company will continue to successfully attract and retain key personnel in the future.

CHANGES IN, OR INTERPRETATIONS OF, ACCOUNTING RULES AND REGULATIONS COULD RESULT IN UNFAVORABLE ACCOUNTING CHARGES.

The Company prepares its consolidated financial statements in conformity with accounting principles generally accepted in the United States of America. These principles are subject to interpretation by the SEC and various bodies formed to interpret and create appropriate accounting policies. A change in these policies can have a significant effect on the Company's reported results and may even retroactively affect previously reported transactions. The Company's accounting policies that recently have been or may be affected by changes in the accounting rules are as follows:

Software revenue recognition;

Accounting for income taxes;

Table of Contents

Accounting for business combinations and related goodwill;

Accounting for stock issued to employees; and

Assessing fair value of financial and non-financial assets.

THE COMPANY MAY BE UNABLE TO SUSTAIN OR INCREASE ITS PROFITABILITY.

While the Company was profitable in its last four fiscal years, it incurred net losses during fiscal year 2003 and 2002. Its ability to sustain or increase profitability on a quarterly or annual basis will be affected by changes in its business. It expects its operating expenses to increase as its business grows, and it anticipates that it will make investments in its business. Therefore, the Company's results of operations will be harmed if its revenues do not increase at a rate equal to or greater than increases in its expenses or are insufficient for it to sustain profitability.

IF THE COMPANY OVERESTIMATES REVENUES, IT MAY BE UNABLE TO REDUCE ITS EXPENSES TO AVOID OR MINIMIZE A NEGATIVE IMPACT ON ITS RESULTS OF OPERATIONS.

The Company's revenues are difficult to forecast and are likely to fluctuate significantly from period to period. The Company bases its operating expense budgets on expected revenue trends. The Company's estimates of sales trends may not correlate with actual revenues in a particular quarter or over a longer period of time. Variations in the rate and timing of conversion of the Company's sales prospects into actual licensing revenues could cause it to plan or budget inaccurately and those variations could adversely affect the Company's financial results. In particular, delays, reductions in amount or cancellation of customers' purchases would adversely affect the overall level and timing of the Company's revenues and its business, results of operations and financial condition could be harmed. In addition, many of its expenses, such as office and equipment leases and certain personnel costs, are relatively fixed. It may be unable to adjust spending quickly enough to offset any unexpected revenue shortfall. Accordingly, any shortfall in revenue may cause a material variation in operating results in any period.

IF THE COMPANY'S PRODUCTS CONTAIN MATERIAL DEFECTS, ITS REVENUES MAY DECLINE.

Software products as complex as those offered by the Company often contain errors or defects, particularly when first introduced, when new versions or enhancements are released and when configured to individual customer computing systems. The Company currently has known errors and defects in its products. Despite testing conducted by the Company, if additional defects and errors are found in current versions, new versions or enhancements of its products after commencement of commercial shipment, this could result in the loss of revenues or a delay in market acceptance or an increase in the rate of return of the Company's products. The occurrence of any of these events could materially harm the Company's business, operating results and financial condition.

THE COMPANY MAY BE SUBJECT TO PRODUCT LIABILITY CLAIMS.

Although license agreements with its customers typically contain provisions designed to limit the Company's exposure to potential product liability claims, it is possible that such limitation of liability provisions may not be effective as a result of existing or future laws or unfavorable judicial decisions. The sale and support of the Company's products may entail the risk of such claims, which are likely to be substantial in light of the use of its products in business-critical applications. A product liability claim brought against the Company could materially harm its business, operating results and financial condition.

THE PROTECTION OF OUR PROPRIETARY RIGHTS MAY BE INADEQUATE.

The Company has a small number of issued and pending U.S. patents expiring at varying times ranging from 2015 to 2020. The Company relies primarily on a combination of copyright and trademark laws, trade secrets, confidentiality procedures and contractual provisions to protect its proprietary technology. For example, the Company licenses its software pursuant to shrink- or click-wrap or signed license agreements that impose certain restrictions on licensees' ability to utilize the software. In addition, the Company seeks to avoid disclosure of its intellectual property, including by requiring those persons with access to its proprietary information to execute confidentiality agreements with the Company and by restricting access to its source code. The Company takes precautions to protect our software, certain documentation, and other written materials under trade secret and copyright laws, which afford only limited protection.

Despite the Company's efforts to protect its proprietary rights, unauthorized parties may attempt to copy aspects of its products or to obtain and use information that the Company regards as proprietary. Policing unauthorized use of the Company's products is difficult, and while it is unable

Edgar Filing: ACTUATE CORP - Form 10-Q

to determine the extent to which piracy of its software products exists, software piracy can be expected to be a persistent problem. In addition, the laws of many countries do not protect the Company's proprietary rights to as great an extent as do the laws of the United States. If the Company's means of protecting its proprietary rights is not adequate or its competitors independently develop similar technology, the Company's business could be materially harmed.

Table of Contents

THE COMPANY'S COMMON STOCK PRICE MAY BE VOLATILE, WHICH COULD RESULT IN SUBSTANTIAL LOSSES FOR STOCKHOLDERS.

The market price of shares of the Company's common stock has been and is likely to continue to be highly volatile and may be significantly affected by factors such as the following:

Actual or anticipated fluctuations in its operating results;

Changes in the economic and political conditions in the United States and abroad;

Terrorist attacks, war or the threat of terrorist attacks and war;

The announcement of mergers or acquisitions by the Company or its competitors;

Developments in ongoing or threatened litigation;

Announcements of technological innovations;

Failure to comply with the requirements of Section 404 of the Sarbanes-Oxley Act;

New products, including open source products, or new contracts announced by it or its competitors;

Developments with respect to copyrights or proprietary rights;

Price and volume fluctuations in the stock market;

Changes in corporate purchasing of Business Intelligence, RIA and Performance Management software;

Adoption of new accounting standards affecting the software industry; and

Changes in financial estimates by securities analysts.

In addition, following periods of volatility in the market price of a particular company's securities, securities class action litigation has often been brought against such companies. If the Company is involved in such litigation, it could result in substantial costs and a diversion of management's attention and resources and could materially harm the Company's business, operating results and financial condition.

CHANGES IN TAX RATES OR NEGATIVE TAX RULINGS COULD ADVERSELY IMPACT THE COMPANY'S FINANCIAL RESULTS.

Edgar Filing: ACTUATE CORP - Form 10-Q

The Company is taxable principally in the United States and certain jurisdictions in Europe and Asia/Pacific. All of these jurisdictions have in the past and may in the future make changes to their corporate income tax rates and other income tax laws, which could increase the Company's future income tax provision. While the Company believes that all material income tax liabilities are reflected properly in its consolidated balance sheet, it has no assurance that it will prevail in all cases in the event the taxing authorities disagree with its interpretations of the tax law. Future levels of research and development spending, and employment of a required minimum of employees in Switzerland, will impact the Company's entitlement to related tax credits, which generally lower its effective income tax rate. Future effective income tax rates could be adversely affected if earnings are lower than anticipated in jurisdictions where the Company has statutory tax rates lower than in the United States.

CERTAIN OF THE COMPANY'S CHARTER PROVISIONS AND DELAWARE LAW MAY PREVENT OR DETER A CHANGE IN CONTROL OF ACTUATE.

The Company's Certificate of Incorporation, as amended and restated (the "Certificate of Incorporation"), and Bylaws, as amended and restated ("Bylaws"), contain certain provisions that may have the effect of discouraging, delaying or preventing a change in control of the Company or unsolicited acquisition proposals that a stockholder might consider favorable, including provisions authorizing the issuance of blank check preferred stock and eliminating the ability of stockholders to act by written consent. In addition, certain provisions of Delaware law and the Company's stock option plans may also have the effect of discouraging, delaying or preventing a change in control or unsolicited acquisition proposals. The anti-takeover effect of these provisions may also have an adverse effect on the public trading price of the Company's common stock.

DEPENDENCE ON THE FINANCIAL SERVICES INDUSTRY.

A significant portion of the Company's revenues are derived from customers in the financial services industry and the Company expects it will continue to derive a significant portion of its revenues from these customers for the foreseeable future. Accordingly, unfavorable economic conditions adversely impacting the financial services industry has had a material adverse effect on the Company's business, financial condition and results of operations. For example, the financial services industry has experienced and may continue to experience cyclical fluctuations in profitability, which may affect timing of, or actual purchases of, the Company's products which would have a material adverse effect on the Company's business, financial condition and results of operations.

Table of Contents**IF THE RECENT WORSENING OF CREDIT MARKET CONDITIONS CONTINUES OR INCREASES, IT COULD HAVE A MATERIAL ADVERSE IMPACT ON OUR INVESTMENT PORTFOLIO.**

Recent U.S. sub-prime mortgage defaults have had a significant impact across various sectors of the financial markets, causing global credit and liquidity issues. The short-term funding markets experienced credit issues throughout the first quarter of fiscal 2008. This led to liquidity disruption in asset-backed commercial paper and failed auctions in the auction rate market. If the global credit market continues to deteriorate, our investment portfolio may be impacted and we could determine that some of our investments are other than temporarily impaired. This could have a material adverse impact on our results of operations and financial condition.

Our investment portfolio includes ARS which are investments with contractual maturities. They are usually found in the form of municipal bonds, a pool of student loans or collateralized debt obligations whose interest rates are subject to reset through an auction process. At the end of each reset period, investors can sell or continue to hold the securities at par. The ARS held by us are primarily backed by highly rated municipal issuers. As of September 30, 2008, we had \$16.5 million invested in ARS.

All ARS are classified as long-term investments at September 30, 2008 regardless of the underlying reset date. The ARS are investments with long-term contractual maturities. These ARS investments are intended to provide liquidity via an auction process that resets the applicable interest rate at predetermined calendar intervals, allowing investors to either roll over their holdings or gain immediate liquidity by selling such interests at par. The recent uncertainties in the credit markets have affected all of the Company's holdings in ARS investments and auctions for the Company's investments in these securities have failed to settle on their respective settlement dates. Consequently, the investments are not currently liquid and the Company will not be able to access these funds until a future auction of these investments is successful or a buyer is found outside of the auction process. All of the ARS investments were investment grade quality and were in compliance with the Company's investment policy at the time of acquisition. The Company currently has the ability and intent to hold these ARS investments until a recovery of the auction process or until maturity.

We determined that no other-than-temporary impairment losses existed as of September 30, 2008. However, if the issuer of the ARS is unable to successfully close future auctions or does not redeem the ARS, we may be required to adjust the carrying value of the ARS and record other-than-temporary impairment charges in future periods, which could materially affect our results of operations and financial condition.

If we need to access the funds associated with ARS but are unable to do so, our operations and financial position could be materially harmed.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The table below sets forth information regarding repurchases of Actuate common stock by Actuate during the three months ended September 30, 2008.

Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased	Average price paid per share	Total number of shares purchased as part of publicly announced programs (1)	Maximum dollar value of shares that may yet be purchased under the program (1)
<u>Month #1</u> July 1, 2008 through July 31, 2008				
<u>Month #2</u> August 1, 2008 through August 31, 2008	50,000	\$ 4.46	50,000	
<u>Month #3</u> September 1, 2008 through September 30, 2008				
Total	50,000	\$ 4.46	50,000	

Edgar Filing: ACTUATE CORP - Form 10-Q

- (1) On October 24, 2007, our Board of Directors authorized an acceleration of our existing stock repurchase program. As of October 24, 2007, the Company is authorized to repurchase shares in an amount not to exceed \$6.3 million per quarter, and the cumulative amount not to exceed \$50.0 million over a two year period. On February 4, 2008, our Board of Directors authorized a further acceleration of our existing stock repurchase program which allowed for the repurchase of approximately \$12.7 million of shares in the first nine months of fiscal year 2008.

On November 3, 2008, the Company announced its intention to commence a modified Dutch auction tender offer to purchase \$60.0 million worth of its common stock, at a price per share not less than \$3.15 and not greater than \$3.40. The Company has suspended its stock repurchase program pursuant to which the Company was authorized to repurchase shares in an amount not to exceed \$6.25 million per quarter (not to exceed \$12.4 million in the first six months of fiscal year 2008), and the cumulative amount not to exceed \$50.0 million over a two year period beginning on October 24, 2007.
