NOTES TO FINANCIAL STATEMENTS (UNAUDITED)

1. SIGNIFICANT ACCOUNTING POLICIES

Petroleum & Resources Corporation (the Corporation) is registered under the Investment Company Act of 1940 as a non-diversified investment company. The Corporation is an internally-managed fund emphasizing petroleum and other natural resource investments. The investment objectives of the Corporation are preservation of capital, the attainment of reasonable income from investments, and an opportunity for capital appreciation.

The accompanying financial statements were prepared in accordance with accounting principles generally accepted in the United States of America, which require the use of estimates made by Corporation management. Management believes that estimates and security valuations are appropriate; however, actual results may differ from those estimates, and the security valuations reflected in the financial statements may differ from the value the Corporation ultimately realizes upon sale of the securities.

Security Transactions and Investment Income Investment transactions are accounted for on the trade date. Gain or loss on sales of securities and options is determined on the basis of identified cost. Dividend income and distributions to stockholders are recognized on the ex-dividend date, and interest income is recognized on the accrual basis.

Security Valuation Investments in securities traded on national security exchanges are valued at the last reported sale price on the day of valuation. Over-the-counter and listed securities for which a sale price is not available are valued at the last quoted bid price. Short-term investments (excluding purchased options and money market funds) are valued at amortized cost which approximates fair value. Purchased and written options are valued at the last quoted bid and asked price, respectively. Money market funds are valued at net asset value on the day of valuation.

In accordance with Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157), fair value is defined as the price that the Corporation would receive upon selling an investment in an orderly transaction to an independent buyer. FAS 157 established a three-tier hierarchy to establish classification of fair value measurements, summarized as follows:

- Level 1 fair value is determined based on market data obtained from independent sources; for example, quoted prices in active markets for identical investments,
- Level 2 fair value is determined using other assumptions obtained from independent sources; for example, quoted prices for similar investments,
- Level 3 fair value is determined using the Corporation's own assumptions, developed based on the best information available in the circumstances.

The Corporation's investments at March 31, 2009 were classified as follows:

	Investment in securities	Written options
Level 1	\$ 511,957,035	\$33,500
Level 2	1,364,847*	
Level 3		
Total	\$ 513,321,882	\$ 33,500

* Consists of short-term investments other than money market funds.

2. FEDERAL INCOME TAXES

The Corporation's policy is to distribute all of its taxable income to its stockholders in compliance with the requirements of the Internal Revenue Code applicable to regulated investment companies. Therefore, no federal income tax provision is required. For federal income tax purposes, the identified cost of securities at March 31, 2009 was \$411,525,609 and net unrealized appreciation aggregated \$101,796,273, of which the related gross unrealized appreciation and depreciation were \$198,583,219 and \$96,786,946, respectively.

Distributions are determined in accordance with income tax regulations which may differ from generally accepted accounting principles. Accordingly, annual reclassifications are made within the Corporation's capital accounts to reflect income and gains available for distribution under income tax regulations. Any income tax-related interest or penalties would be classified as income tax expense.

3. INVESTMENT TRANSACTIONS

The Corporation's investment decisions are made by a committee of management, and recommendations to that committee are made by the research staff. Purchases and sales of portfolio securities, other than options and short-term investments, during the three months ended March 31, 2009 were \$26,906,586 and \$4,802,409, respectively.

The Corporation is subject to changes in the value of equity securities held (equity price risk) in the normal course of

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

pursuing its investment objectives. The Corporation may purchase and write option contracts to increase or decrease its equity price risk exposure or may write option contracts to generate additional income. Option contracts generally entail risks associated with counterparty credit, illiquidity, and unfavorable equity price movements. The Corporation has mitigated counterparty credit and illiquidity risks by trading its options through an exchange. The risk of unfavorable equity price movements is limited for purchased options to the premium paid and for written options by writing only covered call or collateralized put option contracts, which require the Corporation to segregate certain securities or cash at its custodian when the option is written. A schedule of outstanding option contracts as of March 31, 2009 can be found on page 12.

When the Corporation writes (purchases) an option, an amount equal to the premium received (paid) by the Corporation is recorded as a liability (asset) and is subsequently marked to market daily in the Statement of Assets and Liabilities, with any related change recorded as an unrealized gain or loss in the Statement of Operations. Premiums received (paid) from unexercised options are treated as realized gains (losses) on the expiration date. Upon the exercise of written put (purchased call) option contracts, premiums received (paid) are deducted from (added to) the cost basis of the underlying securities purchased. Upon the exercise of written call (purchased put) option contracts, premiums received (paid) are added to (deducted from) the proceeds from the sale of underlying securities in determining whether there is a realized gain or loss.

Transactions in written covered call and collateralized put options during the three months ended March 31, 2009 were as follows:

	Covered Calls		Collateralized Puts	
	Contracts	Premiums	Contracts	Premiums
Options outstanding, December 31, 2008		\$		\$
Options written			700	57,900
Options terminated in closing purchase transactions				
Options expired			(100)	(10,950)
Options exercised				
Options outstanding, March 31, 2009		\$	600	\$ 46,950

4. CAPITAL STOCK

On December 27, 2008, the Corporation issued 1,557,059 shares of its Common Stock at a price of \$18.62 per share (the average market price on December 8, 2008) to stockholders of record on November 21, 2008 who elected to take stock in payment of the distribution from 2008 capital gain and investment income. During 2008, 725 shares were issued at a weighted average price of \$26.28 per share as dividend equivalents to holders of deferred stock units and restricted stock units under the 2005 Equity Incentive Compensation Plan.

5. RETIREMENT PLANS

The Corporation's non-contributory qualified defined benefit pension plan covers all employees with at least one year of service. In addition, the Corporation has a non-contributory nonqualified defined benefit plan which provides eligible employees with retirement benefits to supplement the qualified plan. Benefits are based on length of service and compensation during the last five years of employment.

The funded status of the plans is recognized as an asset (overfunded plan) or a liability (underfunded plan) in the

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

Statement of Assets and Liabilities. Changes in the prior service costs and accumulated actuarial gains and losses are recognized as accumulated other comprehensive income, a component of net assets, in the year in which the changes occur.

The Corporation's policy is to contribute annually to the plans those amounts that can be deducted for federal income tax purposes, plus additional amounts as the Corporation deems appropriate in order to provide assets sufficient to meet benefits to be paid to plan participants. During the three months ended March 31, 2009, the Corporation contributed \$10,403 to the plans and anticipates contributions of approximately \$500,000 during the remainder of 2009.

The following tables aggregate the components of the plans' net periodic pension cost and changes in accumulated other comprehensive income.

6. EQUITY-BASED COMPENSATION

Although the Stock Option Plan of 1985 (1985 Plan) has been discontinued and no further grants will be made under this plan, unexercised grants of stock options and stock appreciation rights granted in 2004 and prior years remain outstanding. The exercise price of the unexercised

Edgar Filing: PETROLEUM & RESOURCES CORP - Form N-30B-2

options and related stock appreciation rights is the fair market value on date of grant, reduced by the per share amount of capital gains paid by the Corporation during subsequent years. All options and related stock appreciation rights terminate ten years from date of grant, if not exercised.

A summary of option activity under the 1985 Plan as of March 31, 2009, and changes during the three month period then ended is presented below:

	Options	Weighted-Average Exercise Price	Weighted-Average Remaining Life (Years)
Outstanding at December 31, 2008	32,340	\$ 9.68	3.34
Exercised	(5,185)	6.62	
Outstanding at March 31, 2009	27,155	\$ 10.21	2.96
Exercisable at March 31, 2009	17,541	\$ 11.07	2.29

The options outstanding as of March 31, 2009 are set forth below:

Exercise Price	Options Outstanding	Weighted Average Exercise Price	Weighted Average Remaining Life (Years)
\$5.00-\$6.99	5,185	\$ 6.57	3.75
\$7.00-\$8.99			
\$9.00-\$10.99	9,508	9.74	2.75
\$11.00-\$12.99	12,462	12.09	2.80
Outstanding at March 31, 2009	27,155	\$ 10.21	2.96

Compensation cost resulting from stock options and stock appreciation rights granted under the 1985 Plan is based on the intrinsic value of the award, recognized over the award's vesting period, and remeasured at each reporting date through the date of settlement. The total compensation cost/(credit) recognized for the three months ended March 31, 2009 was \$(5,268).

The 2005 Equity Incentive Compensation Plan (2005 Plan), adopted at the 2005 Annual Meeting, permits the grant of stock options, restricted stock awards and other stock incentives to key employees and all non-employee directors. The 2005 Plan provides for the issuance of up to 872,639 shares of the Corporation's Common Stock, including both performance and nonperformance-based restricted stock. Performance-based restricted stock awards vest at the end of a specified three year period, with the ultimate number of shares earned contingent on achievement of certain performance targets. If performance targets are not achieved, all or a portion of the performance-based awards are forfeited and become available for future grants. Nonperformance-based restricted stock awards vest ratably over a three year period and nonperformance-based restricted stock units (granted to non-employee directors) vest over a one year period. Payments of awards may be deferred if elected. It is the current intention that employee grants will be performance-based. The 2005 Plan provides for accelerated vesting in the event of death or retirement. Non-employee directors also may elect to defer a portion of their cash compensation, with such deferred amount to be

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

paid by delivery of deferred stock units. Outstanding awards are granted at fair market value on grant date. The number of shares of Common Stock which remain available for future grants under the 2005 Plan at March 31, 2009 is 801,018 shares.

A summary of the status of the Corporation's awards granted under the 2005 Plan as of March 31, 2009, and changes during the three month period then ended is presented below:

Awards	Shares/ Units	Weighted Average Grant-Date Fair Value
Balance at December 31, 2008	43,103	\$ 31.83
Granted:		
Restricted stock	13,865	20.98
Restricted stock units	3,600	18.65
Deferred stock units	229	19.56
Vested & issued	(11,430)	34.82
Forfeited	(3,569)	20.98
Balance at March 31, 2009 (includes 33,600 performance-based awards and 12,198 nonperformance-based awards)	45,798	\$ 28.89

Compensation costs resulting from awards granted under the 2005 Plan are based on the fair value of the award on grant date (determined by the average of the high and low price on grant date) and recognized on a straight-line basis over the requisite service period. For those awards with performance conditions, compensation costs are based on the most probable outcome and, if such goals are not met, compensation cost is not recognized and any previously recognized compensation cost is reversed. The total compensation costs for the period ended March 31, 2009 for restricted stock granted to employees were \$7,225. The total compensation costs for the period ended March 31, 2009 for restricted stock units granted to non-employee directors were \$27,659. As of March 31, 2009, there were total unrecognized compensation costs of \$558,663, a component of additional capital surplus, related to nonvested equity-based compensation arrangements granted under the 2005 Plan. Those costs are expected to be recognized over a weighted average period of 1.94 years. The total fair value of shares and units vested during the three month period ended March 31, 2009 was \$273,538.

7. OFFICER AND DIRECTOR COMPENSATION

The aggregate remuneration paid during the three months ended March 31, 2009 to officers and directors amounted to \$908,489, of which \$136,174 was paid as fees and compensation to directors who were not officers. These amounts represent the taxable income to the Corporation's officers and directors and therefore differ from the amounts reported in the accompanying Statement of Operations that are recorded and expensed in accordance with generally accepted accounting principles.

8. PORTFOLIO SECURITIES LOANED

Edgar Filing: PETROLEUM & RESOURCES CORP - Form N-30B-2

The Corporation makes loans of securities to approved brokers to earn additional income. It receives as collateral cash deposits, U.S. Government securities, or bank letters of credit valued at 102% of the value of the securities on loan. The market value of the loaned securities is calculated based upon the most recent closing prices and any additional required collateral is delivered to the Corporation on the next business day. Cash deposits are placed in a registered money market fund. The Corporation accounts for securities lending transactions as secured financing and receives compensation in the form of fees or retains a portion of interest on the investment of any cash received as collateral. The Corporation also continues to receive interest or dividends on the securities loaned. Gain or loss in the fair value of securities loaned that may occur during the term of the loan will be for the account of the Corporation. At March 31, 2009, the Corporation had securities on loan of \$22,345,392 and held cash collateral of \$23,277,208. The Corporation is indemnified by the Custodian, serving as lending agent, for loss of loaned securities and has the right under the lending agreement to recover the securities from the borrower on demand.
