Item 2.05 Costs Associated with Exit or Disposal Activities.

On February 1, 2010, the Company determined that it would close its ductile iron pipe manufacturing plant in North Birmingham, Alabama, eliminating approximately 260 positions. The closure is expected to be completed by March 31, 2010. Production from the North Birmingham plant will be managed using existing capacity at U.S. Pipe's Bessemer, Alabama and Union City, California facilities.

In connection with this action, the Company expects to record a restructuring charge of approximately \$15 million, most of which will be taken in the second quarter of fiscal 2010. This charge is comprised of approximately \$6 million of asset write-offs and \$9 million of cash costs, including severance and other costs associated with the closing. Incremental cash operating expenses associated with the restructuring of approximately \$2 million are expected to be incurred primarily during the second half of fiscal 2010. Savings on an annualized basis are projected to be in the range of \$20 million to \$25 million, with net savings of approximately \$6 million to \$8 million expected to be realized in fiscal 2010, including the estimated \$2 million incremental cash operating expenses.

A copy of the press release announcing the closure is attached hereto as Exhibit 99.1.
