If the securities being registered on this form will be offered on a delayed or continuous basis in reliance on Rule 415 under the Securities Act of 1933, other than securities offered in connection with a dividend reinvestment plan, check the following box.

It is proposed that this filing will become effective (check appropriate box)

When declared effective pursuant to section 8(c)

Immediately upon filing pursuant to no-action relief granted to Registrant on November 9, 2010.

PROSPECTUS

## 2.8 Million Common Shares

# Nuveen Floating Rate Income Opportunity Fund

---

Nuveen Floating Rate Income Opportunity Fund (the Fund) is a diversified, closed-end management investment company. The Fund's primary investment objective is to achieve a high level of current income. The Fund cannot assure you that it will achieve its investment objective.

**Investing in the Fund's Common Shares involves certain risks that are described in the Risk Factors section of this Prospectus.**

Neither the SEC nor any state securities commission has approved or disapproved of these securities or determined if this Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

You should read this Prospectus, which contains important information about the Fund, before deciding whether to invest and retain it for future reference. A Statement of Additional Information (SAI), dated November 30, 2010, containing additional information about the Fund, has been filed with the SEC and is incorporated by reference in its entirety into this Prospectus. You may request a free copy of the SAI, the table of contents of which is on the last page of this Prospectus, annual and semi-annual reports to shareholders and other information about the Fund, and make shareholder inquiries by calling (800) 257-8787, by writing to the Fund or from the Fund's website (<http://www.nuveen.com>). The information contained in, or that can be accessed through, the Fund's website is not part of this Prospectus. You also may obtain a copy of the SAI (and other information regarding the Fund) from the Securities and Exchange Commission's (SEC) web site (<http://www.sec.gov>).

The Fund's common shares do not represent a deposit or obligation of, and are not guaranteed or endorsed by, any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other governmental agency.

*Portfolio Contents.* The Fund invests at least 80% of its Managed Assets (as defined on page 4) in adjustable rate loans, primarily secured senior loans. As part of the 80% requirement, the Fund also may invest in unsecured senior loans and secured and unsecured subordinated loans. The Fund invests at least 65% of its Managed Assets in adjustable rate senior loans that are secured by specific collateral. Adjustable rate loans are made to U.S. or non-U.S. corporations, partnerships and other business entities that operate in various industries and geographical regions. Such adjustable rate loans pay interest at rates that are redetermined periodically at short-term intervals on the basis of an adjustable base lending rate plus a premium. The Fund may invest a substantial portion of its Managed Assets in adjustable rate loans and other debt instruments that are, at the time of investment, rated below investment grade or unrated but judged to be of comparable quality. Securities of below investment grade quality are regarded as having predominately speculative characteristics with respect to capacity to pay interest and repay principal and are commonly referred to as junk bonds.

## Edgar Filing: Nuveen Floating Rate Income Opportunity Fund - Form 486BPOS

*Adviser and Subadviser.* Nuveen Asset Management, the Fund's investment adviser, is responsible for determining the Fund's overall investment strategy and its implementation, including the use of leverage and hedging. Symphony Asset Management, LLC, the Fund's subadviser, is responsible for managing the Fund's Managed Assets.

Common Shares will not be sold at a price less than current net asset value per share plus the per share amount of the commission to be paid to Nuveen. The Fund and Nuveen will suspend the sale of Common Shares if the per share price of the shares is less than the minimum price. The Fund currently intends to distribute the shares offered pursuant to this Prospectus primarily through at-the-market transactions, although from time to time it may also distribute shares through an underwriting syndicate or a privately negotiated transaction. To the extent shares are distributed other than through at-the-market transactions, the Fund will file a supplement to this Prospectus describing such transactions. For more information on how Common Shares may be sold, see the Plan of Distribution section of this Prospectus.

The common shares are listed on the New York Stock Exchange. The trading or ticker symbol of the Common Shares of the Fund is JRO.

---

The date of this Prospectus is November 30, 2010.

**You should rely only on the information contained or incorporated by reference into this Prospectus. The Fund has not authorized anyone to provide you with different information. The Fund is not making an offer of these securities in any state where the offer is not permitted. You should not assume that the information contained in this Prospectus is accurate as of any date other than the date on the front of this Prospectus. The Fund will update this Prospectus to reflect any material changes to the disclosures herein.**

**PROSPECTUS SUMMARY**

*This is only a summary. You should review the more detailed information contained elsewhere in this Prospectus and in the SAI.*

**The Fund**

Nuveen Floating Rate Income Opportunity Fund (the Fund) is a diversified, closed-end management investment company. See The Fund. The Fund's common shares, \$.01 par value (Common Shares), are traded on the New York Stock Exchange (NYSE) under the symbol JRO. See Description of Shares. As of September 30, 2010, the Fund had 28,413,818 Shares outstanding and net assets applicable to Common Shares of 323,688,759.

**Investment Objective and Policies**

The Fund's primary investment objective is to achieve a high level of current income. The Fund cannot assure you that it will achieve its investment objective.

Under normal market circumstances, the Fund invests at least 80% of its Managed Assets (as defined below) in adjustable rate loans, primarily secured senior loans. As part of the 80% requirement, the Fund also may invest in unsecured senior loans (together with secured senior loans referred to herein as Senior Loans) and secured and unsecured subordinated loans. Adjustable rate Senior Loans and adjustable rate subordinated loans are sometimes collectively referred to in this Prospectus as Adjustable Rate Loans. Adjustable Rate Loans pay interest at rates that are redetermined periodically at short-term intervals by reference to a base lending rate, primarily the London Interbank Offered Rate (LIBOR), plus a premium. The Fund may invest a substantial portion of its Managed Assets in Adjustable Rate Loans and other debt instruments that are, at the time of investment, rated below investment grade or unrated but judged to be of comparable quality. Securities (which term for purposes of this Prospectus includes Adjustable Rate Loans) of below investment grade quality are regarded as having predominately speculative characteristics with respect to capacity to pay interest and repay principal and are commonly referred to as junk bonds. Adjustable Rate Loans are made to U.S. or non-U.S. corporations, partnerships and other business entities (Borrowers) that operate in various industries and geographical regions, which may include middle-market companies. As used in the Prospectus, middle-market generally refers to companies with annual revenues of approximately \$500 million or below and subordinated loans to middle market companies are generally referred to as mezzanine loans. It is anticipated that the proceeds of the Adjustable Rate Loans in which the Fund invests will be used by Borrowers to finance leveraged buyouts, recapitalizations, mergers, acquisitions, stock repurchases, refinancings, internal growth and for other corporate purposes.

The Fund may invest up to 20% of its Managed Assets in the following adjustable or fixed rate securities: (i) other debt securities such as investment and non-investment grade debt securities, fixed rate Senior Loans or subordinated loans, convertible securities and structured notes (other than structured notes that are designed to provide returns and risks that emulate those of Adjustable Rate Loans, which may be treated as an investment in Adjustable Rate Loans for purposes of the 80% requirement set forth above); (ii) mortgage-related and other asset-backed securities (including collateralized loan obligations and collateralized debt obligations); and (iii) debt securities and other instruments issued by government, government-related or supranational issuers (commonly referred to as sovereign debt securities). No more than 5% of the Fund's Managed Assets may be invested in each of convertible securities, mortgage-related and other asset-backed securities, and sovereign debt securities. The debt securities in which the Fund may invest may have short-term, intermediate-term or long-term maturities. The Fund also may receive warrants and equity securities issued by an Issuer (as defined below) or its affiliates in connection with the Fund's other investments in such entities.

Investment grade quality securities are those securities that, at the time of investment, are (i) rated by at least one nationally recognized statistical rating organization ( NRSRO ) within the four highest grades (BBB- or Baa3 or better by Standard & Poor's Corporation, a division of The McGraw-Hill Companies ( S&P ), Moody's Investors Service, Inc. ( Moody's ) or Fitch Ratings ( Fitch )), or (ii) unrated but judged to be of comparable quality. The Fund may purchase Senior Loans and other debt securities that are rated below investment grade or that are unrated but judged by the Advisers to be of comparable quality. No more than 15% of the Fund's Managed Assets may be invested in Adjustable Rate Loans and other debt securities that are, at the time of investment, rated CCC+ or Caa or below by S&P, Moody's or Fitch or that are unrated but judged by the Advisers to be of comparable quality. See The Fund's Investments Portfolio Composition and Other Information and Risk Factors Issuer Level Risks Below Investment Grade Risk.

The Fund's net assets, including assets attributable to preferred shares, if any, that may be outstanding and the principal amount of any Borrowings (as defined below on page 8), are called Managed Assets.

Borrowers under Adjustable Rate Loans and issuers of other securities in which the Fund may invest are sometimes collectively referred to herein as Issuers.

Under normal circumstances:

The Fund invests at least 65% of its Managed Assets in Senior Loans that are secured by specific collateral.

The Fund maintains an average duration of one year or less for its portfolio investments in Adjustable Rate Loans and other debt instruments. See The Fund's Investments Investment Objective and Policies for a description of duration.

The Fund will not invest in inverse floating rate securities.

The Fund may invest up to 20% of its Managed Assets in securities of non-U.S. Issuers that are U.S. dollar or non-U.S. dollar denominated. The Fund's Managed Assets to be invested in Adjustable Rate Loans and other debt instruments of non-U.S. Issuers may include debt securities of Issuers located, or conducting their business in, emerging markets countries.

The Fund may not invest more than 20% of its Managed Assets in securities from an industry which (for the purposes of this Prospectus) generally refers to the classification of companies in the same or similar lines of business such as the automotive, textiles and apparel, hotels, media production and consumer retailing industries.

The Fund may invest more than 20% of its Managed Assets in sectors which (for the purposes of this Prospectus) generally refers to broader classifications of industries, such as the consumer discretionary sector which includes the automotive, textiles and apparel, hotels, media production and consumer retailing industries, provided the Fund's investment in a particular industry within the sector does not exceed the industry limitation.

The Fund may invest up to 50% of its Managed Assets in securities and other instruments that, at the time of investment, are illiquid (*i.e.*, securities that are not readily marketable).

In pursuing its objective of high current income, the Fund invests in Adjustable Rate Loans and other debt instruments that may involve significant credit risk. As part of its efforts to manage this risk and the potential impact of such risk on the overall value and returns of the Fund's portfolio, the Fund generally follows a credit management strategy that includes (i) a focus on Senior Loans that are secured by specific assets, (ii) rigorous and on-going bottom-up fundamental analysis of Issuers, and (iii) overall portfolio diversification. The Subadviser (as defined below) will perform its own credit and research analysis of Issuers, taking into consideration, among other things, the entity's financial resources and operating history, its sensitivity to economic conditions and trends, the ability of its management, its debt maturity schedules and borrowing requirements, its anticipated cash flow, interest and asset coverage, and its earnings prospects. Even with these efforts, because of the greater degree of credit risk within the portfolio, the Fund's net asset value could decline over time. In an effort to help preserve the Fund's overall capital, the Subadviser seeks to enhance portfolio value by investing in securities it believes to be undervalued, which, if successful, can mitigate the potential loss of value due to credit events over time.

During temporary defensive periods or in order to keep the Fund's cash fully invested, the Fund may deviate from its investment objective and invest all or a portion of its assets in investment grade debt securities, including obligations issued or guaranteed by the U.S. government, its agencies and instrumentalities. In addition, upon the Subadviser's recommendation that a change would be in the best interests of the Fund and upon concurrence by Nuveen Asset Management, and subject to approval of the Board of Trustees of the Fund, the Fund may deviate from its investment guidelines noted above. For a more complete discussion of the Fund's portfolio composition, see "The Fund's Investments."

**Investment Adviser and Subadviser**

Nuveen Asset Management, the Fund's investment adviser, is responsible for determining the Fund's overall investment strategy and its implementation, including the use of leverage and hedging. Symphony Asset Management, LLC (Symphony or Subadviser) is the Fund's subadviser and is responsible for managing the Fund's Managed Assets. Nuveen Asset Management, a registered investment adviser, is a wholly-owned subsidiary of Nuveen Investments, Inc. (Nuveen Investments). Founded in 1898, Nuveen Investments and its affiliates had approximately \$162.8 billion of assets under management as of September 30, 2010.

Symphony, a registered investment adviser, is an indirect wholly-owned subsidiary of Nuveen Investments. Founded in 1994, Symphony had approximately \$8.4 billion in assets under management as of September 30, 2010. Symphony specializes in the management of market neutral equity and debt strategies and Senior Loan and other debt portfolios.

Nuveen Asset Management and Symphony will sometimes individually be referred to as an Adviser and collectively be referred to as the Advisers.

On November 13, 2007, Nuveen Investments was acquired by investors led by Madison Dearborn Partners, LLC. Madison Dearborn Partners, LLC is a private equity investment firm based in Chicago, Illinois (the MDP Acquisition). For more information, see "Investment Adviser." The investor group led by Madison Dearborn Partners, LLC includes affiliates of Merrill Lynch & Co., Inc. (Merrill Lynch), which has since been acquired by Bank of America Corporation (Bank of America). As a result of the MDP Acquisition, Merrill Lynch currently owns a 32% non-voting equity stake in Nuveen Investments, owns a \$30 million position in the \$250 million revolving loan facility of Nuveen Investments and holds two of ten seats on the board of directors of Nuveen Investments. Because these arrangements may give rise to certain conflicts of interest involving Nuveen Asset Management and Bank of America (including Merrill Lynch), Nuveen Asset Management has adopted policies and procedures intended to address these potential conflicts. For additional information regarding the MDP Acquisition, see "Management of the Fund - Nuveen Investments."

The Fund is dependent upon services and resources provided by Nuveen Asset Management, and therefore Nuveen Asset Management's parent, Nuveen Investments. Nuveen Investments significantly increased its level of debt in connection with the MDP Acquisition. As of September 30, 2010, Nuveen Investments had outstanding approximately \$3.9 billion in aggregate principal amount of indebtedness, with approximately \$286.3 million of available cash on hand. Nuveen Investments believes that monies generated from operations and cash on hand will be adequate to fund debt service requirements, capital expenditures and working capital requirements for the foreseeable future. However, Nuveen Investments' ability to continue to fund these items may be affected by general economic, financial, competitive, legislative, legal and regulatory factors and by its ability to refinance outstanding indebtedness with scheduled maturities beginning in 2013. The risks, uncertainties and other factors related to Nuveen Investments' business, the effects of which may cause its assets under management, earnings, revenues and/or profit margins to decline, are described in its filings with the Securities and Exchange Commission, which are publicly available.

The Fund pays Nuveen Asset Management an annual management fee, payable monthly, in a maximum amount equal to 0.85% of the Fund's Managed Assets. See Use of Leverage. This maximum fee is equal to the sum of a fund-level fee and a complex-level fee. The fund-level fee is a maximum of 0.65% of the Fund's average total daily Managed Assets, with lower fee levels for fund-level assets that exceed \$500 million. The complex-level fee is a maximum of 0.20% of the Fund's daily Managed Assets based on the daily managed assets of all Nuveen-branded closed-end and open-end registered investment companies organized in the U.S. (collectively, the Nuveen Funds) (as managed assets is defined in each Nuveen Fund's investment management agreement with Nuveen Asset Management, which generally includes assets attributable to financial leverage), with lower fee levels for complex-level assets that exceed \$55 billion. Based on complex-level assets of approximately \$74.1 billion as of September 30, 2010, the complex-level fee would be 0.1822% of Managed Assets and the total fee to Nuveen Asset Management would be 0.8322% of Managed Assets (assuming Managed Assets of \$500 million).

Nuveen Investments, LLC, a registered broker-dealer affiliate of Nuveen Asset Management that is involved in the offering of the Fund's Common Shares, has received notice of certain charges that may be brought against it by the Financial Industry Regulatory Authority (FINRA) in connection with the marketing of preferred shares. See Plan of Distribution Distribution Through At-the-Market Transactions.

For more information on fees and expenses, including fees attributable to Common Shares, see Management of the Fund Investment Management Agreement.

**Use of Leverage**

The Fund employs financial leverage through borrowing or issuing commercial paper or notes (collectively Borrowing). The Fund has

entered into a \$120,000,000 Revolving Credit and Security Agreement with an affiliate of Citibank. As of July 31, 2010, the Fund's outstanding balance on these Borrowings was \$117,270,000. For the fiscal year ended July 31, 2010, the average daily balance outstanding and average interest rate on these borrowings were \$107,208,411 and .34%, respectively. The Fund does not currently, but may in the future, issue preferred shares. See Risk Factors Leverage Risk.

Leverage involves special risks. See Risk Factors Leverage Risk. There is no assurance that the Fund's leveraging strategy will be successful. Interest on Borrowings may be at a fixed or floating rate, but generally will be based on short-term rates. The Fund will seek to invest the proceeds of any future financial leverage in a manner consistent with the Fund's investment objective and policies. See Use of Leverage.

#### **Offering Methods**

The Fund may offer shares using one or more of the following methods: (i) at-the-market transactions conducted through Stifel, Nicolaus & Company, Incorporated (Stifel Nicolaus) which has entered into an Equity Distribution Agreement (Selected Dealer Agreement) with Nuveen Investments, LLC (Nuveen), one of the Fund's underwriters; (ii) through an underwriting syndicate; and (iii) through privately negotiated transactions between the Fund and specific investors. See Plan of Distribution.

*Distribution Through At-the-Market Transactions.* The Fund from time to time may offer its Common Shares through Stifel Nicolaus, which has entered into the Selected Dealer Agreement with Nuveen pursuant to which Stifel Nicolaus will be acting as Nuveen's exclusive sub-placement agent with respect to at-the-market offerings of the Common Shares. Common Shares will only be sold on such days as shall be agreed to by the Fund, Nuveen and Stifel Nicolaus. Common Shares will be sold at market prices, which shall be determined with reference to trades on the NYSE, subject to a minimum price to be established each day by the Fund. The minimum price on any day will not be less than the current net asset value per share plus the per share amount of the commission to be paid to Nuveen. The Fund and Nuveen will suspend the sale of Common Shares if the per share price of the shares is less than the minimum price.

The Fund will compensate Nuveen with respect to sales of the Common Shares at a commission rate of up to 1% of the gross proceeds of the sale of Common Shares. Nuveen will compensate Stifel Nicolaus at a fixed rate of 0.80% of the gross proceeds of the sale of Common Shares sold by Stifel Nicolaus. Settlements of Common Share sales will occur on the third business day following the date of sale.

In connection with the sale of the Common Shares on behalf of the Fund, Nuveen may be deemed to be an underwriter within the meaning of the Securities Act of 1933 (the 1933 Act), and the

compensation of Nuveen may be deemed to be underwriting commissions or discounts. Unless otherwise indicated in a further Prospectus supplement, each of Nuveen and Stifel Nicolaus will act on a reasonable efforts basis.

The offering of Common Shares will be made pursuant to the Selected Dealer Agreement among the Fund, Nuveen and Stifel Nicolaus, which will terminate upon the earlier of (i) the sale of all Common Shares subject thereto or (ii) termination of the Selected Dealer Agreement. Each of Nuveen and Stifel Nicolaus shall have the right to terminate the Selected Dealer Agreement in its discretion at any time. See Plan of Distribution Distribution Through At-the-Market Transactions.

The Fund currently intends to distribute the shares offered pursuant to this Prospectus primarily through at-the-market transactions, although from time to time it may also distribute shares through an underwriting syndicate or a privately negotiated transaction. To the extent shares are distributed other than through at-the-market transactions, the Fund will file a supplement to this Prospectus describing such transactions.

*Distribution Through Underwriting Syndicates.* The Fund from time to time may issue additional Common Shares through a syndicated secondary offering. In order to limit the impact on the market price of the Fund's Common Shares, Underwriters will market and price the offering on an expedited basis (*e.g.*, overnight or similarly abbreviated offering period). The Fund will launch a syndicated offering on a day, and upon terms, mutually agreed upon between the Fund, Nuveen and the underwriting syndicate.

The Fund will offer its shares at a price equal to a specified discount of up to 2% from the closing market price of the Fund's Common Shares on the day prior to the offering date. The applicable discount will be negotiated by the Fund and Nuveen in consultation with the underwriting syndicate on a transaction-by-transaction basis. The Fund will compensate the underwriting syndicate out of the proceeds of the offering based upon a sales load of up to 4% of the gross proceeds of the sale of Common Shares. The minimum net proceeds per share to the Fund will not be less than the greater of (i) the Fund's latest net asset value per Common Share or (ii) 94% of the closing market price of the Fund's Common Shares on the day prior to the offering date. See Plan of Distribution Distribution Through Underwriting Syndicates.

*Distribution Through Privately Negotiated Transactions.* The Fund, through Nuveen, from time to time may sell directly to, and solicit offers from, institutional and other sophisticated investors, who may be deemed to be underwriters as defined in the 1933 Act for any resale of Common Shares. No sales commissions or other

compensation will be paid to Nuveen or any other FINRA member in connection with such transactions.

The terms of such privately negotiated transactions will be subject to the discretion of the management of the Fund. In determining whether to sell Common Shares through a privately negotiated transaction, the Fund will consider relevant factors including, but not limited to, the attractiveness of obtaining additional funds through the sale of Common Shares, the purchase price to apply to any such sale of Common Shares and the investor seeking to purchase the Common Shares.

Common Shares issued by the Fund through privately negotiated transactions will be issued at a price equal to the greater of (i) the net asset value per Common Share of the Fund's Common Shares or (ii) at a discount ranging from 0% to 5% of the average daily closing market price of the Fund's Common Shares at the close of business on the two business days preceding the date upon which Common Shares are sold pursuant to the privately negotiated transaction. The applicable discount will be determined by the Fund on a transaction-by-transaction basis. See Plan of Distribution Distribution Through Privately Negotiated Transactions.

**Special Risk Considerations**

Investment in the Fund involves special risk considerations, which are summarized below. The Fund is designed as a long-term investment and not as a trading vehicle. The Fund is not intended to be a complete investment program. See Risk Factors for a more complete discussion of the special risk considerations of an investment in the Fund.

*Investment and Market Risk.* An investment in the Fund's Common Shares is subject to investment risk, including the possible loss of the entire principal amount that you invest. Your investment in Common Shares represents an indirect investment in the securities owned by the Fund, which generally do not trade on a national securities exchange, NASDAQ or in the over-the-counter markets. Your Common Shares at any point in time may be worth less than your original investment, even after taking into account the reinvestment of Fund dividends and distributions. See Risk Factors Investment and Market Risk.

*Market Discount from Net Asset Value.* Shares of closed-end investment companies like the Fund have during some periods traded at prices higher than net asset value and have during other periods traded at prices lower than net asset value. The Fund cannot predict whether Common Shares will trade at, above or below net asset value. This characteristic is a risk separate and distinct from the risk that the Fund's net asset value could decrease as a result of investment activities. Investors bear a risk of loss to the extent that the price at which they sell their shares is lower in relation to the Fund's net asset value than at the time of purchase, assuming a stable net asset value. Proceeds from the sale of Common Shares in this offering will be

reduced by shareholder transaction costs (if applicable, which vary depending on the offering method used). Depending on the premium of the Common Shares at the time of any offering of Common Shares hereunder, the Fund's net asset value may be reduced by an amount up to the offering costs borne by the Fund (estimated to be an additional 0.48% of the offering price assuming a Common Share offering price of \$12.22 (the Fund's closing price on the NYSE on October 29, 2010)). The net asset value per Common Share also will be reduced by costs associated with any future issuances of Common Shares or preferred shares. The Common Shares are designed primarily for long-term investors, and you should not view the Fund as a vehicle for trading purposes. See Risk Factors Market Discount from Net Asset Value.

*Issuer Level Risks.*

*Issuer Credit Risk.* Issuers of Adjustable Rate Loans and other debt securities in which the Fund may invest may default on their obligations to pay principal or interest when due. This non-payment would result in a reduction of income to the Fund, a reduction in the value of an Adjustable Rate Loan or such other debt security experiencing non-payment and, potentially, a decrease in the net asset value of the Fund. Although under normal circumstances at least 65% of the Fund's Managed Assets will be invested in Senior Loans that are secured by specific collateral, there can be no assurance that liquidation of such collateral would satisfy the Borrower's obligation in the event of non-payment of scheduled interest or principal or that such collateral could be readily liquidated. Investments by the Fund in debt securities issued by middle-market companies may subject the Fund to greater risk of Issuer default, in part because, middle-market companies may have limited financial resources and typically have shorter operating histories, narrower product lines and smaller market shares than larger businesses, which tend to render middle-market companies more vulnerable to competitors' actions and adverse market conditions. In the event of bankruptcy of an Issuer, the Fund could experience delays or limitations with respect to its ability to realize the benefits of any collateral securing an Adjustable Rate Loan or other debt instrument.

*Below Investment Grade Risk.* The Fund may purchase Adjustable Rate Loans and other debt instruments that are rated below investment grade or that are unrated but judged to be of comparable quality. Securities of below investment grade quality are regarded as having predominately speculative characteristics with respect to capacity to pay interest and repay principal, and are commonly referred to as junk bonds. Issuers of lower rated securities may be highly leveraged and may not have available to them more traditional methods of financing. The prices of these lower grade securities are typically more sensitive to negative developments, such as a decline in the Issuer's revenues or a general economic downturn, than are the prices of higher rated securities. The secondary market for lower rated

securities, including some Adjustable Rate Loans, may not be as liquid as the secondary market for more highly rated securities, a factor which may have an adverse effect on the Fund's ability to dispose of a particular security.

*Non-U.S. Issuer Risk.* The Fund may invest up to 20% of its Managed Assets in securities of non-U.S. Issuers that are U.S. dollar or non-U.S. dollar denominated. Investments in securities of non-U.S. Issuers involve special risks not presented by investments in securities of U.S. Issuers, including the following: (i) less publicly available information about non-U.S. Issuers or markets due to less rigorous disclosure or accounting standards or regulatory practices; (ii) many non-U.S. markets are smaller, less liquid and more volatile; (iii) potential adverse effects of fluctuations in currency exchange rates or controls on the value of the Fund's investments; (iv) the economies of non-U.S. countries may grow at slower rates than expected or may experience a downturn or recession; (v) the impact of economic, political, social or diplomatic events; (vi) possible seizure of a company's assets; (vii) restrictions imposed by non-U.S. countries limiting the ability of non-U.S. Issuers to make payments of principal and/or interest due to blockages of foreign currency exchanges or otherwise; and (viii) withholding and other non-U.S. taxes may decrease the Fund's return. These risks are more pronounced to the extent that the Fund invests a significant portion of its assets in companies located in one region and to the extent that the Fund invests in securities of Issuers in emerging markets countries. In addition, economic, political and social developments may significantly disrupt the financial markets or interfere with the Fund's ability to enforce its rights against non-U.S. Issuers. See Risk Factors Issuer Level Risks.

*Security Level Risks.*

*Subordinated Loans and Other Subordinated Debt Instruments.* Issuers of subordinated loans and other debt instruments in which the Fund may invest usually will have, or may be permitted to incur, other debt that ranks equally with, or senior to, such subordinated loans or other debt instruments. By their terms, such debt instruments may provide that the holders are entitled to receive payment of interest or principal on or before the dates on which the Fund is entitled to receive payments in respect of subordinated loans or other debt instruments in which it invests. Also, in the event of insolvency, liquidation, dissolution, reorganization or bankruptcy of an Issuer, holders of debt instruments ranking senior to the Fund's subordinated loans or other debt instruments would typically be entitled to receive payment in full before the Fund receives any distribution in respect of its investment. After repaying such senior creditors, the Issuer may not have any remaining assets to use for repaying its obligation to the Fund. In the case of debt ranking equally with subordinated loans or other debt instruments in which the Fund invests, the Fund would have to share on an equal basis any distributions with other creditors

holding such debt in the event of an insolvency, liquidation, dissolution, reorganization or bankruptcy of the relevant Issuer. In addition, the Fund will likely not be in a position to control any Issuer by investing in its debt securities. As a result, the Fund will be subject to the risk that an Issuer in which it invests may make business decisions with which the Fund disagrees and the management of such Issuer, as representatives of the holders of their common equity, may take risks or otherwise act in ways that do not serve the Fund's interests as debt investors.

*Risks from Unsecured Adjustable Rate Loans or Insufficient Collateral Securing Adjustable Rate Loans.* Some of the Adjustable Rate Loans in which the Fund may invest will be unsecured, thereby increasing the risk of loss to the Fund in the event of Borrower default. Although the Fund invests primarily in Adjustable Rate Loans that are secured by specific collateral, including, under normal circumstances, at least 65% of the Fund's Managed Assets to be invested in secured Senior Loans, there can be no assurance the liquidation of such collateral would satisfy a Borrower's obligation to the Fund in the event of Borrower default or that such collateral could be readily liquidated under such circumstances. In the event of bankruptcy of a Borrower, the Fund could also experience delays or limitations with respect to its ability to realize the benefits of any collateral securing an Adjustable Rate Loan.

*Interest Rate Risk.* Interest rate risk is the risk that fixed rate securities will decline in value because of changes in market interest rates. When market interest rates rise, the market value of such securities generally will fall. The Fund's investment in such fixed rate securities means that the net asset value and market price of Common Shares will tend to decline if market interest rates rise. Market interest rates in the U.S. and in certain other countries in which the Fund may invest currently are near historically low levels. The Advisers expect the Fund's policy of investing at least 80% of its Managed Assets in Adjustable Rate Loans will make the Fund less volatile and its net asset value less sensitive to changes in market interest rates than if the Fund invested exclusively in fixed rate obligations. However, because interest rates on most Adjustable Rate Loans and other adjustable rate instruments typically only reset periodically (e.g., monthly or quarterly), a sudden and significant increase in market interest rates may cause a decline in the value of these investments and in the Fund's net asset value. See Risk Factors Interest Rate Risk.

*Senior Loan Participation Risks.* The Fund may purchase a participation interest in a Senior Loan and by doing so acquire some or all of the interest of a bank or other lending institution in a Senior Loan to a Borrower. A participation interest typically will result in the Fund having a contractual relationship only with the lender, not the Borrower. As a result, the Fund assumes the credit risk of the lender selling the participation interest in addition to the credit risk of the Borrower. By purchasing a participation interest, the Fund will have

the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the participation interest and only upon receipt by the lender of the payments from the Borrower. See Risk Factors Security Level Risks Senior Loan Participation Risk and Risk Factors Issuer Level Risks Below Investment Grade Risk.

*Prepayment Risk.* During periods of declining interest rates or for other purposes, Issuers may exercise their option to prepay principal earlier than scheduled, forcing the Fund to reinvest in lower yielding securities. This is known as call or prepayment risk.

*Illiquid Securities Risk.* The Fund may invest up to 50% of its Managed Assets in securities that, at the time of investment, are illiquid. Illiquid securities are not readily marketable and may include some restricted securities. Illiquid securities involve the risk that the securities will not be able to be sold at the time desired by the Fund or at prices approximating the value at which the Fund is carrying the securities on its books.

*Other Risks Associated with Adjustable Rate Loans.* Many Adjustable Rate Loans in which the Fund may invest may not be rated by an NRSRO, generally will not be registered with the Securities and Exchange Commission and generally will not be listed on a securities exchange. In addition, the amount of public information available with respect to Adjustable Rate Loans generally may be less extensive than that available for registered and exchange-listed securities. Economic and other events (whether real or perceived) can reduce the demand for certain Adjustable Rate Loans or Adjustable Rate Loans generally, which may reduce market prices and cause the Fund's net asset value per share to fall. The frequency and magnitude of such changes cannot be predicted. No active trading market currently exists for some Senior Loans and most subordinated loans in which the Fund may invest and, thus, those loans may be illiquid. As a result, such Senior Loans and subordinated loans generally are more difficult to value than more liquid securities for which a trading market exists. See Risk Factors Security Level Risks.

*Leverage Risk.* Financial leverage created through borrowing or any future issuance of preferred shares creates an opportunity for increased Common Share net income and returns, but also creates special risks for Common Shareholders. There is no assurance that the Fund's leveraging strategy will be successful. Through the use of financial leverage, the Fund seeks to enhance potential Common Share earnings over time by employing leverage based on short-term interest rates and investing at long-term interest rates which are typically, though not always, higher. Because the long-term debt securities in which the Fund invests generally pay fixed rates of interest while the Fund's costs of leverage generally fluctuate with short-term yields, the incremental earnings from leverage will vary over time. Accordingly, the Fund cannot assure you that the use of

leverage will result in a higher yield or return to Common Shareholders. The income benefit from leverage will be reduced (increase) to the extent that the difference narrows (widens) between the net earnings on the Fund's portfolio securities and its cost of leverage. If short-term rates rise, the Fund's cost of leverage could exceed the fixed rate of return on longer-term bonds held by the Fund that were acquired during periods of lower interest rates, reducing income and returns to Common Shareholders. This could occur even if both short-term and long-term interest rates rise. The Fund's cost of leverage includes interest on borrowing, or dividends paid on preferred shares, if issued in the future, as well as any one-time costs (e.g., issuance costs) and ongoing fees and expenses associated with such leverage.

The Fund has issued preferred shares in the past, but as of September 30, 2010 no preferred shares were outstanding. The Fund may again in the future issue certain types of preferred securities to increase the Fund's leverage.

The Fund's use of financial leverage also creates incremental Common Share net asset value risk because the full impact of price changes in the Fund's investment portfolio, including assets attributable to leverage, is borne by Common Shareholders. This can lead to a greater increase in net asset values in rising markets than if the Fund were not leveraged, but also can result in a greater decrease in net asset values in declining markets. The Fund's use of financial leverage similarly can magnify the impact of changing market conditions on Common Share market prices. See Risk Factors Leverage Risk.

The Fund may invest in the securities of other investment companies, which may themselves be leveraged and therefore present similar risks to those described above. See Risk Factors Leverage Risk and Use of Leverage.

*Currency Risk.* The Fund may invest up to 20% of its Managed Assets in securities of non-U.S. Issuers that are non-U.S. dollar denominated. Investments by the Fund in non-U.S.-dollar denominated securities will be subject to currency risk. Currency risk is the risk that fluctuations in the exchange rates between the U.S. dollar and non-U.S. currencies may negatively affect an investment. The value of securities denominated in non-U.S. currencies may fluctuate based on changes in the value of those currencies relative to the U.S. dollar, and a decline in applicable foreign exchange rates could reduce the value of such securities held by the Fund.

*Regulatory Risk.* To the extent that legislation or state or federal regulators that regulate certain financial institutions impose additional requirements or restrictions with respect to the ability of such institutions to make loans, particularly in connection with highly leveraged transactions, the availability of Adjustable Rate Loans for

investment may be adversely affected. Further, such legislation or regulation could depress the market value of Adjustable Rate Loans.

*Market Disruption Risk.* Certain events have a disruptive effect on the securities markets, such as terrorist attacks (including the terrorist attacks in the U.S. on September 11, 2001), war and other geopolitical events. The Fund cannot predict the effects of similar events in the future on the U.S. economy. Lower rated securities and securities of Issuers with smaller market capitalizations tend to be more volatile than higher rated securities and securities of Issuers with larger market capitalizations so that these events and any actions resulting from them may have a greater impact on the prices and volatility of lower rated securities and securities of Issuers with smaller market capitalizations than on higher rated securities and securities of Issuers with larger market capitalizations.

*Inflation Risk.* Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Common Shares and distributions can decline. See Risk Factors Inflation Risk.

*Deflation Risk.* Deflation risk is the risk that prices throughout the economy decline over time, which may have an adverse effect on the market valuation of companies, their assets and revenues. In addition, deflation may have an adverse effect on the creditworthiness of Issuers and may make Issuer default more likely, which may result in a decline in the value of the Fund's portfolio. See Risk Factors Deflation Risk.

*Derivatives Risk, Including the Risk of Swaps.* The Fund's use of derivatives involves risks different from, and possibly greater than, the risks associated with investing directly in the investments underlying the derivatives. Whether the Fund's use of derivatives is successful will depend on, among other things, if Nuveen Asset Management correctly forecasts market values, interest rates and other applicable factors. If Nuveen Asset Management incorrectly forecasts these and other factors, the investment performance of the Fund will be unfavorably affected. In addition, the derivatives market is largely unregulated. It is possible that developments in the derivatives market could adversely affect the Fund's ability to successfully use derivative instruments.

The Fund may enter into debt-related derivatives instruments including credit swap default contracts and interest rate swaps. Like most derivative instruments, the use of swaps is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. In addition, the use of swaps requires an understanding by Nuveen Asset Management not only of the referenced asset, rate or index, but also of the swap itself. See Risk Factors Derivatives Risk, Including the Risk of Swaps, Risk Factors Counterparty Risk, Hedging Transactions and the Statement of Additional Information.

*Counterparty Risk.* The Fund may be subject to credit risk with respect to the counterparties to certain derivative agreements entered into by the Fund. If a counterparty becomes bankrupt or otherwise fails to perform its obligations under a derivative contract due to financial difficulties, the Fund may experience significant delays in obtaining any recovery under the derivative contract in a bankruptcy or other reorganization proceeding. The Fund may obtain only a limited recovery or may obtain no recovery in such circumstances. See *Risk Factors Counterparty Risk.*

*Reliance on Investment Adviser.* The Fund is dependent upon services and resources provided by its investment adviser, Nuveen Asset Management, and therefore the investment adviser's parent, Nuveen Investments. Nuveen Investments has a substantial amount of indebtedness. Nuveen Investments, through its own business or the financial support of its affiliates, may not be able to generate sufficient cash flow from operations or ensure that future borrowings will be available in an amount sufficient to enable it to pay its indebtedness with scheduled maturities beginning in 2013 or to fund its other liquidity needs. Nuveen Investments' failure to satisfy the terms of its indebtedness, including covenants therein, may generally have an adverse effect on the financial condition of Nuveen Investments. For additional information on Nuveen Asset Management and Nuveen Investments, including the financial condition of Nuveen Investments, see *Management of the Fund Additional Information Related to the Investment Adviser and Nuveen Investments.*

*Anti-Takeover Provisions.* The Fund's Declaration of Trust (the *Declaration*) and the Fund's By-laws (the *By-laws*) include provisions that could limit the ability of other entities or persons to acquire control of the Fund or convert the Fund to open-end status. These provisions could have the effect of depriving the Common Shareholders of opportunities to sell their Common Shares at a premium over the then current market price of the Common Shares. See *Certain Provisions in the Declaration of Trust* and *Risk Factors Anti-Takeover Provisions.*

In addition, an investment in the Fund's Common Shares raises other risks, which are more fully disclosed in the *Risk Factors* section of this Prospectus, including: reinvestment risk, special risks relating to certain illiquid securities, market disruption risk, impact of offering methods risk, risks relating to certain affiliations, and risks that provisions in the Fund's Declaration of Trust could affect the opportunities of Common Shareholders to sell their Common Shares. See *Risk Factors.*

**Distributions**

The Fund pays monthly cash distributions to Common Shareholders at a level rate (stated in terms of a fixed cents per Common Share dividend rate) based on the projected performance of the Fund. The Fund's ability to maintain a level Common Share dividend rate will depend on a number of factors. As portfolio and market conditions change, the rate of dividends on the Common Shares and the Fund's

dividend policy could change. Over time, the Fund will distribute all of its net investment income. In addition, the Fund intends to effectively distribute, at least annually, the net capital gain and taxable ordinary income, if any, to Common Shareholders so long as the net capital gain and taxable ordinary income are not necessary to pay accrued dividends on, or redeem or liquidate, any preferred shares then outstanding or pay any interest and required principal payments on borrowings. You may elect to reinvest automatically some or all of your distributions in additional Common Shares under the Fund's Dividend Reinvestment Plan.

As explained more fully below in Tax Matters, at least annually, the Fund may elect to retain rather than distribute all or a portion of any net capital gain (which is the excess of net long-term capital gain over net short-term capital loss) otherwise allocable to Common Shareholders and pay federal income tax on the retained gain. As provided under federal tax law, Common Shareholders of record as of the end of the Fund's taxable year will include their attributable share of the retained gain in their income for the year as a long-term capital gain, and will be entitled to an income tax credit or refund for the tax deemed paid on their behalf by the Fund. The Fund will treat the retained capital gain amount as a substitute for equivalent cash distributions. See Distributions and Dividend Reinvestment Plan.

The Fund reserves the right to change its distribution policy and the basis for establishing the rate of its monthly distributions at any time.

**Custodian and Transfer Agent**

State Street Bank and Trust Company serves as custodian and transfer agent of the Fund's assets. See Custodian and Transfer Agent.

**Special Tax Considerations**

Dividends with respect to the Common Shares generally will not constitute qualified dividend income for federal income tax purposes and thus generally will not be eligible for taxation at long-term capital gain tax rates (except in the case of capital gain dividends). See Tax Matters.

**Voting Rights**

The Fund has issued preferred shares in the past, but as of September 30, 2010 no preferred shares were outstanding. The Fund may again in the future issue certain types of preferred securities to increase the Fund's leverage. In that event, such preferred securities, voting as a separate class, would have the right to elect at least two trustees at all times and to elect a majority of the trustees in the event two full years' dividends on the preferred shares are unpaid. In each case, the remaining trustees would be elected by holders of Common Shares and preferred shares, voting together as a single class. The holders of preferred shares would vote as a separate class or classes on certain other matters as required under the Declaration, the Investment Company Act of 1940, as amended (the 1940 Act) and Massachusetts law. See Description of Shares Preferred Shares Voting Rights and Certain Provisions in the Declaration of Trust.

**SUMMARY OF FUND EXPENSES**

The purpose of the table below is to help you understand all fees and expenses that you, as a Common Shareholder, would bear directly or indirectly. The table shows the expenses of the Fund as a percentage of the average net assets applicable to Common Shares, and not as a percentage of total assets or Managed Assets.

<b>Shareholder Transaction Expenses</b> (as a percentage of offering price)		
Maximum Sales Charge		4.00%
Offering Costs Borne by the Fund <sup>(1)</sup>		0.48%
		<b>As a Percentage of Net Assets Attributable to Common Shares<sup>(2)</sup></b>
<b>Annual Expenses</b>		
Management Fees:		
Fund-Level Fees		0.88%
Complex-Level Fees		0.26%
Interest Expense and Other Borrowing Costs		0.86%
Other Expenses		0.14%
Total Annual Expenses		2.14%
Fees and Expense Reimbursement <sup>(3)</sup>		(0.19)%
Total Net Annual Expenses		1.95%

- (1) Assuming a Common Share offering price of \$12.22 (the Fund's closing price on the NYSE on October 29, 2010).
- (2) Stated as a percentage of average net assets attributable to Common Shares for the fiscal year ended July 31, 2010, adjusted to reflect the Fee and Expense Reimbursement currently in effect.
- (3) The Adviser has contractually agreed to reimburse the Fund as a percentage of average daily net assets (including net assets attributable to borrowings), for fees and expenses in the following amounts:

<b>Year Ending July 31,</b>	
2011	0.14%
2012	0.07%

Nuveen Asset Management has not agreed to reimburse the Fund for any portion of its fees and expenses beyond July 31, 2012.

The purpose of the table above is to help you understand all fees and expenses that you, as a Common Shareholder, would bear directly or indirectly. See Management of the Fund Investment Adviser and Subadviser.

**Examples**

## Edgar Filing: Nuveen Floating Rate Income Opportunity Fund - Form 486BPOS

The following examples illustrate the expenses (including the applicable transaction fees, if any, and estimated offering costs of \$4.80) that a shareholder would pay on a \$1,000 investment that is held for the time periods provided in the table. Each example assumes that all dividends and other distributions are reinvested in the Fund and that the Fund's Total Net Annual Expenses, with the applicable expense limitations, as provided above, remain in effect for the applicable years. The examples also assume a 5% annual return.<sup>(1)</sup>

**Example # 1 (At-the-Market Transaction)**

The following example assumes a transaction fee of 1.00%, as a percentage of the offering price.

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$35	\$ 79	\$ 126	\$ 257

**Example # 2 (Underwriting Syndicate Transaction)**

The following example assumes a transaction fee of 4.00%, as a percentage of the offering price.

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
