Chunghwa Telecom Reports Consolidated Operating Results

for the Second Quarter and First Half of 2011

Taipei, Taiwan, R.O.C. August 26, 2011 - Chunghwa Telecom Co., Ltd. (TAIEX: 2412, NYSE: CHT) (Chunghwa or the Company) today reported its operating results for the second quarter and first half of 2011. All figures were prepared in accordance with generally accepted accounting principles of the Republic of China (ROC GAAP) on a consolidated basis.

(Comparisons, unless otherwise stated, are to the prior year period)

Second Quarter 2011 Financial Highlights

- Total consolidated revenue increased by 9.6% to NT\$54.42 billion
- Mobile communications revenue increased by 1.1% to NT\$22.35 billion; mobile value-added services (VAS) revenue increased by 42% to NT\$3.77 billion
- Internet revenue increased by 3.4% to NT\$6.25 billion; internet VAS revenue increased by 13.9% to NT\$0.67 billion
- Domestic fixed communications revenue increased by 14.1% to NT\$19.78 billion
- International fixed communications revenue increased by 3.9% to NT\$3.86 billion
- Total operating costs and expenses increased by 12.3% to NT\$39.01 billion
- Net income totaled NT\$13.30 billion, representing a 2.8% increase
- Basic earnings per share (EPS) increased by 27.6% to NT\$1.71

First Half 2011 Financial Highlights

- Total consolidated revenue increased by 7.7% to NT\$106.9 billion
- Mobile communications revenue increased by 1.9% to NT\$45.20 billion; mobile VAS revenue increased by 40.4% to NT\$7.29 billion
- Internet revenue increased by 3.5% to NT\$12.33 billion; internet VAS revenue increased by 15.4% to NT\$1.24 billion

Edgar Filing: CHUNGHWA TELECOM CO LTD - Form 6-K

- Domestic fixed communications revenue increased by 12.9% to NT\$39.0 billion
- International fixed communications revenue decreased by 0.4% to NT\$7.65 billion
- Total operating costs and expenses increased by 11.6% to NT\$77.54 billion
- Net income totaled NT\$25.13 billion, representing a 0.6% increase
- Basic EPS increased by 24.4% to NT\$3.21

Dr. Shyue-Ching Lu, Chairman and Chief Executive Officer of Chunghwa Telecom, said, "I'm pleased to report that continued business expansion enabled us to achieve revenues of NT\$54.4 billion during the second quarter 2011. Higher fixed line revenue resulting from the shift in pricing right of a fixed to mobile call from mobile to fixed network operators continued to be a key growth driver, as did mobile VAS and handset sales.

Our desire to build on this top-line growth and leverage our reputation for innovative offerings and premium customer service led to the launch of our "Digital Rainforest" initiative during the second quarter. This initiative builds on the significant traction we have already gained from our inroads into the digital business ecosystem, and represents a cohesive strategy for integrating and reinvigorating our activities within this space. Key elements of "Digital Rainforest" include a cloud computing initiative called hiCloud PaaS, a cutting edge broadband service, integrated service platforms, and domestic and international collaboration on reducing carbon emissions to promote sustainability. We are also implementing our new channel strategy by transforming our service centers to convey our new image as we embrace the cloud computing era. I am confident that this "Digital Rainforest" initiative will provide additional momentum to our growth going forward.

Revenue

Chunghwa's total consolidated revenue for the second quarter of 2011 increased by 9.6% year-over-year to NT\$54.42 billion, of which 41.1% was from the mobile business, 11.5% was from the internet business, 36.3% was from the domestic fixed business, 7.1% was from the international fixed business, and the remainder was from others. Despite the National Communications Commission (NCC) tariff reduction that came into effect on April 1, 2010, Chunghwa succeeded in maintaining its growth momentum, due mainly to an increase in fixed line revenue resulting from the shift in the pricing right of a fixed-to-mobile call from the mobile operator to fixed network operator, as well as mobile VAS and handset sales. In addition, construction revenue from the Company's property development subsidiary also contributed to Chunghwa's revenue growth.

Total revenue for the mobile business amounted to NT\$22.35 billion for the second quarter 2011, representing a year-on-year increase of 1.1%, mainly due to growth in mobile VAS revenue and handset sales relating to smartphone promotions, which offset the decline in mobile voice revenue. The decline in mobile voice revenue resulted primarily from the shift in pricing right for fixed to mobile calls from mobile to fixed operators.

Chunghwa's internet business revenue increased by 3.4% year-over-year to NT\$6.25 billion in the second quarter of 2011, mainly attributable to growth in the number of broadband subscribers and the migration of Asymmetric Digital Subscriber Line (ADSL) subscribers to fiber solutions.

For the second quarter of 2011, domestic fixed revenue totaled NT\$19.78 billion, representing an increase of 14.1% year-over-year. Local revenues increased by 33.6% year-over-year, mainly due to the shift in pricing right for fixed to mobile calls. The 13.9% decline in Domestic Long Distance (DLD) revenues was due to mobile and Voice over Internet Protocol (VOIP) substitution, as well as reflecting the mandated tariff reduction.

Broadband access revenue, including ADSL and Fiber to the x (FTTx), increased by 3% year-over-year to NT\$5.14 billion. Although ADSL access revenue decreased as more ADSL subscribers migrated to fiber solutions and because of the mandated tariff reduction, the decrease was fully offset by growth in FTTx access revenue.

International fixed line revenue increased by 3.9% to NT\$3.86 billion, primarily due to growth in international long distance service and international leased line revenue.

Other revenue grew by 369.3%, primarily due to the increase in construction revenue from our property development subsidiary.

For the first half of 2011, total revenue was NT\$106.9 billion, a 7.7% increase compared to the same period last year. Of this total, 36.5% was contributed by the domestic fixed business, 42.3% was from the mobile business, 11.5% was from the Internet business, the international fixed business accounted for 7.2%, and the remainder was from others.

Costs and Expenses

Total operating costs and expenses for the second quarter of 2011 amounted to NT\$39.0 billion, an increase of 12.3% compared to the same period of 2010. This increase was mainly due to the increase in interconnection costs and transition fees resulting from the shift in pricing right of fixed-to-mobile calls, as well as higher costs of handsets sold.

Total operating costs and expenses for the first half of 2011 increased by 11.6% year-over-year to NT\$77.54 billion, due mainly to the same reasons as for the second quarter.

Income Tax

Income tax expense for the second quarter of 2011 was NT\$2.32 billion, representing a 19.7% increase, compared to NT\$1.94 billion for the same period of 2010. The decrease is because in June 2010, the government reduced the income tax rate from 20% to 17% and the reduction of income tax expense for the first half 2010 was fully reflected in June 2010.

EBITDA and Net Income

EBITDA for the second quarter of 2011 remained flat, at NT\$23.42 billion. Income from operations increased by 3.4% to NT\$15.41 billion, reflecting the higher revenue.

The EBITDA margin for the second quarter of 2011 was 43.02% compared to 47.33% in the same period of 2010, and the operating margin was 28.3%, compared to 30.0% in the previous year. Net income increased by 2.8% year-over-year to NT\$13.30 billion. Earnings per share increased by 27.6% year-over-year to NT\$1.71, primarily due to the higher net income and the capital reduction in January 2011, which reduced the total number of outstanding shares by 20%.

Capital Expenditure (Capex)

Total capex for the second quarter of 2011 amounted to NT\$5.54 billion, a 7.6% year-over-year increase. Of the NT\$5.54 billion capex figure, 59.6% was used for the domestic fixed communications business, 21.2% was for the mobile business, 9.3% was for the internet business, 6.8% was for the international fixed communications business, and the remainder was for other uses.

Cash Flow

Cash flow from operating activities for the second quarter of 2011 decreased by 5.6% year-over-year to NT\$16.28 billion, mainly due to higher performance-based bonus payout relating to increased net income for year 2010.

Business and Operational Highlights

Broadband/HiNet

As of June 30, FTTx subscribers had reached 2.2 million, accounting for 49.7% of total broadband users. This year, the Company is continuing to execute on its strategy to encourage FTTx migration. On June 22, the Company further reduced its broadband service tariffs, especially for speeds of 20Mbps and 50Mbps to stimulate the momentum of migration and subscription. The initiative has been very well received.

HiNet broadband subscribers totaled 3.63 million at the end of June 2011, a year-over-year rise of 2.2%.

Mobile

As of June 30, 2011, Chunghwa had 9.86 million mobile subscribers, an increase of 4.4% compared to 9.45 million at the end of June 2010.

As of June 30, 2011, the Company had 1.15 million mobile internet subscribers, demonstrating strong growth momentum compared to 809 thousand subscribers as of December 2010. As a result, the Company has set a new year-end mobile internet subscriber target of 1.4 million.

Mobile VAS revenue for the second quarter of 2011 rose 42% year-over-year to NT\$3.77 billion, with mobile Internet revenue increasing 87.2% year-over-year, making it the largest contributor to VAS revenue.

Domestic/International Fixed-line

As of the end of June 2011, the Company maintained its leading fixed-line market position, with fixed-line subscribers totaling 12.27 million.

As of August 26, 2011, Chunghwa's Multimedia-on-demand (MOD) subscriber number has reached over 930 thousand and continues to rise, suggesting that the enriched content is meeting customer needs.

NOTE CONCERNING FORWARD-LOOKING STATEMENTS

This press release contains forward-looking statements. These statements constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, and as defined in the U.S. Private Securities Litigation Reform Act of 1995. These forward-looking statements can be identified by terminology such as will, expects, anticipates, future, intends, plans, believes, estimates and similar statements. Statements that are not historical facts, including statements about Chunghwa's beliefs and expectations, are forward-looking statements. Forward-looking statements involve inherent risks and uncertainties that could cause actual results to differ materially from the forward-looking statements. A number of important factors could cause actual results to differ materially from those contained in any forward-looking statement. Investors are cautioned that actual events and results could differ materially from those statements as a result of a number of factors including, but not limited to the risks outlined in Chunghwa's filings with the U.S. Securities and Exchange Commission on Forms F-1, F-3, 6-K and 20-F, in each case as amended. The forward-looking statements in this press release reflect the current belief of Chunghwa as of the date of this press release and Chunghwa undertakes no obligation to update these forward-looking statements for events or circumstances that occur subsequent to such date, except as required under applicable law.

This press release is not an offer of securities for sale in the United States. Securities may not be offered or sold in the United States absent registration or an exemption from registration. Any public offering of securities to be made in the United States will be made by means of a prospectus that may be obtained from the issuer or selling security holder and that will contain detailed information about the company and management, as well as financial statements.

SPECIAL NOTE REGARDING NON-GAAP FINANCIAL MEASURES

A body of generally accepted accounting principles is commonly referred to as GAAP. A non-GAAP financial measure is generally defined by the SEC as one that purports to measure historical or future financial performance, financial position or cash flows but excludes or includes amounts that would not be so adjusted in the most comparable U.S. GAAP measure. We disclose in this report certain non-GAAP financial measures, including EBITDA. EBITDA for any period is defined as consolidated net income (loss) excluding (i) depreciation and amortization, (ii) total net comprehensive financing cost (which is comprised of net interest expense, exchange gain or loss, monetary position gain or loss and other financing costs and derivative transactions), (iii) other expenses, net, (iv) income tax, (v) cumulative effect of change in accounting principle, net of tax and (vi) (income) loss from discontinued operations.

In managing our business we rely on EBITDA as a means of assessing our operating performance. We believe that EBITDA can be useful to facilitate comparisons of operating performance between periods and with other companies because it excludes the effect of (i) depreciation and amortization, which represents a non-cash charge to earnings, (ii) certain financing costs, which are significantly affected by external factors, including interest rates, foreign currency exchange rates and inflation rates, which have little or no bearing on our operating performance, (iii) income tax (iv) other expenses or income not related to the operation of the business.

EBITDA is not a measure of financial performance under U.S. GAAP or ROC GAAP. EBITDA should not be considered as an alternate measure of net income or operating income, as determined on a consolidated basis using amounts derived from statements of operations prepared in accordance with U.S. GAAP or ROC GAAP, as an indicator of operating performance or as cash flows from operating activity or as a measure of liquidity. EBITDA has material limitations that impair its value as a measure of a company's overall profitability since it does not address certain ongoing costs of our business that could significantly affect profitability such as financial expenses and income taxes, depreciation, pension plan reserves or capital expenditures and associated charges. These non-GAAP measures are not in accordance with or an alternative for GAAP financial data, the non-GAAP results should be reviewed together with the GAAP results and are not intended to serve as a substitute for results under GAAP, and may be different from non-GAAP measures used by other companies.

INDEPENDENT AUDITORS' REPORT

To The Board of Directors and Stockholders of

Chunghwa Telecom Co., Ltd.

We have audited the accompanying balance sheets of Chunghwa Telecom Co., Ltd. as of June 30, 2011 and 2010, and the related statements of income, changes in stockholders' equity and cash flows for the six months ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. We did not audit the financial statements of Viettel-CHT Co., Ltd. and Senao Networks Inc., an equity method investee of SENA0, as of and for the six months ended June 30, 2011, and Taiwan International Standard Electronics Co., Ltd., Viettel-CHT Co., Ltd. and Senao Networks Inc., an equity method investee of SENA0, as of and for the six months ended June 30, 2010. The aggregate carrying values of these equity method investees were NT\$329,744 thousand and NT\$864,047 thousand, respectively, as of June 30, 2011 and 2010 and the equity in earnings were NT\$21,237 thousand and NT\$100,723 thousand, respectively, for the six months ended June 30, 2011 and 2010, respectively. The financial statements of Viettel-CHT Co., Ltd. and Senao Networks, Inc. as of and for the six months ended June 30, 2011, and the financial statements of Taiwan International Standard Electronics Co., Ltd., Viettel-CHT Co., Ltd. and Senao Networks, Inc. as of and for the six months ended June 30, 2010, were audited by other auditors whose reports have been furnished to us, and our opinion, insofar as it relates to the amounts included for these equity method investees, is based solely on the reports of the other auditors.

We conducted our audits in accordance with the Rules Governing the Audit of Financial Statements by Certified Public Accountants and auditing standards generally accepted in the Republic of China. Those rules and standards required that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits and the financial reports of other auditors provide a reasonable basis for our opinion.

In our opinion, based on our audits and the reports of the other auditors, the financial statements referred to in the first paragraph present fairly, in all material respects, the financial position of the Company as of June 30, 2011 and 2010, and the results of their operations and cash flows for the six months then ended in conformity with the Securities and Exchange Act, the Guidelines Governing the Preparation of Financial Reports by Securities Issuers, requirements of the Business Accounting Law and Guidelines Governing Business Accounting relevant to financial accounting standards, and accounting principles generally accepted in the Republic of China.

We have also audited the consolidated financial statements of the Company and its subsidiaries as of and for the six months ended June 30, 2011 and 2010, and have expressed a modified unqualified opinion on those consolidated financial statements.

NOTES TO FINANCIAL STATEMENTS

FOR THE SIX MONTHS ENDED JUNE 30, 2011 AND 2010

(Amounts in Thousands of New Taiwan Dollars, Unless Stated Otherwise)

1. GENERAL

Chunghwa Telecom Co., Ltd. (Chunghwa) was incorporated on July 1, 1996 in the Republic of China (ROC) pursuant to the Article 30 of the Telecommunications Act. Chunghwa is a company limited by shares and, prior to August 2000, was wholly owned by the Ministry of Transportation and Communications (MOTC). Prior to July 1, 1996, the current operations of Chunghwa were carried out under the Directorate General of Telecommunications (DGT). The DGT was established by the MOTC in June 1943 to take primary responsibility in the development of telecommunications infrastructure and to formulate policies related to telecommunications. On July 1, 1996, the telecom operations of the DGT were spun-off to as Chunghwa which continues to carry out the business and the DGT continues to be the industry regulator.

As the dominate telecommunications service provider of fixed-line and Global System for Mobile Communications (GSM) in the ROC, Chunghwa is subject to additional regulations imposed by ROC.

Effective August 12, 2005, the MOTC had completed the process of privatizing Chunghwa by reducing the government ownership to below 50% in various stages. In July 2000, Chunghwa received approval from the Securities and Futures Commission (the SFC) for a domestic initial public offering and its common shares were listed and traded on the Taiwan Stock Exchange (the TSE) on October 27, 2000. Certain of Chunghwa s common shares had been sold, in connection with the foregoing privatization plan, in domestic public offerings at various dates from August 2000 to July 2003. Certain of Chunghwa s common shares had also been sold in an international offering of securities in the form of American Depository Shares (ADS) on July 17, 2003 and were listed and traded on the New York Stock Exchange (the NYSE). The MOTC sold common shares of Chunghwa by auction in the ROC on August 9, 2005 and completed the second international offering on August 10, 2005. Upon completion of the share transfers associated with these offerings on August 12, 2005, the MOTC owned less than 50% of the outstanding shares of Chunghwa and completed the privatization plan.

As of June 30, 2011 and 2010, the Company had 24,505 and 24,277 employees, respectively.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The financial statements were prepared in conformity with the Securities and Exchange Act, the Guidelines Governing the Preparation of Financial Reports by Securities Issuers, requirements of the Business Accounting Law, Guidelines Governing Business Accounting relevant to financial accounting standards, and accounting principles generally accepted in the ROC (ROC GAAP). The significant accounting policies are summarized as follows:

Foreign-currency Transactions

Foreign-currency transactions other than derivative contracts are recorded in New Taiwan dollars at the rates of exchange in effect when the transactions occur. Exchange gains or losses derived from foreign-currency transactions or monetary assets and liabilities denominated in foreign currencies are recognized in earnings. At the balance sheet date, monetary assets and liabilities denominated in foreign currencies are revalued at prevailing exchange rates with the resulting gains or losses recognized in earnings.

At the balance sheet date, foreign-currency nonmonetary assets (such as equity instruments) and liabilities that are measured at fair value are revalued using prevailing exchange rates. When a gain or loss on a nonmonetary item is recognized in stockholders' equity, any exchange component of that gain or loss shall be recognized in stockholders' equity. Conversely, when a gain or loss on a non-monetary item is recognized in earnings, any exchange component of that gain or loss shall be recognized in earnings.

Foreign-currency nonmonetary assets and liabilities that are carried at cost continue to be stated at exchange rates at trade dates.

The financial statements of foreign equity investees and consolidated subsidiaries are translated into New Taiwan dollars at the following exchange rates. Assets and liabilities - spot rates at year-end; stockholders' equity - historical rates, income and expenses - average rates during the year.

The resulting translation adjustments of financial statements shall be recorded as cumulative translation adjustments, a separate component of stockholders' equity.

Accounting Estimates

Under above guidelines, law and principles, certain estimates and assumptions have been used for the allowance for doubtful accounts, allowance for loss on inventories, depreciation of property, plant and equipment, impairment of assets, bonuses to employees, directors and supervisors, pension cost, income tax, etc. Actual results may differ from these estimates.

Classification of Current and Noncurrent Assets and Liabilities

Current assets include cash and cash equivalents, and those assets held primarily for trading purposes or to be realized, sold or consumed within one year from the balance sheet date. All other assets are classified as noncurrent. Current liabilities are obligations incurred for trading purposes or to be settled within one year from the balance sheet date. All other liabilities are classified as noncurrent.

Cash Equivalents

Cash equivalents are commercial paper and treasury bills purchased with maturities of three months or less from the date of acquisition. The carrying amount approximates fair value.

Financial Assets and Liabilities at Fair Value Through Profit or Loss

Financial instruments classified as financial assets or financial liabilities at fair value through profit or loss (FVTPL) include financial assets or financial liabilities held for trading and are designated as at FVTPL on initial recognition. The Company recognizes a financial asset or a financial liability when the Company becomes a party to the contractual provisions of the financial instrument. A financial asset is derecognized when the Company loses control of its contractual rights over the financial asset. A financial liability is derecognized when the obligation specified in the relevant contract is discharged, cancelled or expired.

Financial instruments at FVTPL are initially measured at fair value. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at FVTPL are recognized as expenses as incurred. Financial assets or financial liabilities at FVTPL are remeasured at fair value, subsequently with changes in fair value recognized in earnings. Cash dividends received subsequently (including those received in the period of investment) are recognized as income. On derecognition of a financial asset or a financial liability, the difference between its carrying amount and the sum of the consideration received and receivable or consideration paid and payable is recognized in earnings. A regular way purchases or sales of financial assets are accounted for using trade date accounting.

Derivatives that do not meet the criteria for hedge accounting are classified as financial assets or financial liabilities held for trading. When the fair value is positive, the derivative is recognized as a financial asset; when the fair value is negative, the derivative is recognized as a financial liability.

Fair values of financial assets and financial liabilities at the balance sheet date are determined as follows: Swap contracts are estimated by valuation techniques.

Available-for-sale Financial Assets

Available-for-sale financial assets are initially recognized at fair value plus transaction costs that are directly attributable to the acquisition. Changes in fair value from subsequent remeasurement are reported as a separate component of stockholders' equity. The corresponding accumulated gains or losses are recognized in earnings when the financial asset is derecognized from the balance sheet. A regular way purchase or sale of financial assets is accounted for using trade date accounting.

The recognition and derecognition of available-for-sale financial assets are the same with those of financial assets at FVTPL.

Fair values are determined as follows: Listed stocks - at closing prices at the balance sheet date; open-end mutual funds - at net asset values at the balance sheet date; bonds - quoted at prices provided by the Taiwan GreTai Securities Market; and financial assets and financial liabilities without quoted prices in an active market - at values determined using valuation techniques.

Cash dividends are recognized in earnings on the ex-dividend date, except for the dividends declared before acquisition are treated as a reduction of investment cost. Stock dividends are recorded as an increase in the number of shares and do not affect investment income. The total number of shares subsequent to the increase of stock dividends is used for recalculate cost per share.

An impairment loss is recognized when there is objective evidence that the financial asset is impaired. If, in a subsequent period, the amount of the impairment loss decreases, for equity securities, the previously recognized impairment loss is reversed to the extent to the decrease and recorded as an adjustment to stockholders' equity; for debt securities, the amount of the decrease is recognized in earnings, provided that the decrease is clearly attributable to an event which occurred after the impairment loss was recognized.

Held-to-maturity Financial Assets

Held-to-maturity financial assets are carried at amortized cost using the effective interest method. Those financial assets are initially recognized at fair value plus transaction costs that are directly attributable to the acquisition. Gains and losses are recognized at the time of derecognition, impairment or amortization. A regular way purchase or sale of financial assets is accounted for using trade date accounting.

If there is objective evidence which indicates that a financial asset is impaired, a loss is recognized. If, in a subsequent period, the amount of the impairment loss decreases and the decrease is clearly attributable to an event which occurred after the impairment loss was recognized, the previously recognized impairment loss is reversed to the extent of the decrease. The reversal may not result in a carrying amount that exceeds the amortized cost that would have been determined as if no impairment loss had been recognized.

Financial Assets Carried at Cost

Investments in equity instruments with no quoted prices in an active market and with fair values that cannot be reliably measured, such as non-publicly traded stocks and stocks traded in the Emerging Stock Market, are measured at their original cost. The accounting treatment for dividends on financial assets carried at cost is the same with that for dividends on available-for-sale financial assets. An impairment loss is recognized when there is objective evidence that the asset is impaired. A reversal of this impairment loss is disallowed.

Impairment of Accounts Receivable

An allowance for doubtful accounts is provided on the basis of a review of the collectibility of accounts receivable before January 1, 2011. The Company assesses the probability of collections of accounts receivable by examining the aging analysis of the outstanding receivables and assessing the value of the collateral provided by customers.

On January 1, 2011, the Company adopted the third-time revised Statement of Financial Accounting Standards (SFAS) No. 34, Financial Instruments: Recognition and Measurement. One of the main revisions is that the impairment of receivables originated by the Company should be covered by SFAS No. 34. Accounts receivable are assessed for impairment at the end of each reporting period and considered to be impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the accounts receivable, the estimated future cash flows of the asset have been affected.

The amount of the impairment loss recognized is the difference between the asset carrying amount and the present value of estimated future cash flows, after taking into account the related collateral and guarantees, discounted at the receivable's original effective interest rate.

The carrying amount of the accounts receivable is reduced through the use of an allowance account.

Inventories

Inventories including merchandise and work-in-process are stated at the lower of cost (weighted-average cost) or net realizable value item by item, except for those that may be appropriate to group items of similar or related inventories. Net realizable value is the estimated selling price of inventories less all estimated costs of completion and costs necessary to make the sale. The calculation of the cost of inventory is derived using the weighted average method.

Investments Accounted for Using Equity Method

Investments in companies in which the Company exercises significant influence over the operating and financial policy decisions are accounted for by the equity method. Under the equity method, the investment is initially stated at cost and subsequently adjusted for its proportionate share in the net earnings of the investee companies. Any cash dividends received are recognized as a reduction in the carrying value of the investments.

Gains or losses on sales from the Company to equity method investees wherein the Company exercises significant influence over these equity investees are deferred in proportion to the Company's ownership percentage in the investees until such gains or losses are realized through transactions with third parties. Gains or losses on sales from equity method investees to Chunghwa are deferred in proportion to the Chunghwa's ownership percentages in the investees until they are realized through transactions with third parties.

When the Company subscribes for additional investee shares at a percentage different from its existing ownership percentage, the resulting carrying amount of the investment in the investee differs from the amount of the Company share of the investee's equity. The Company records such a difference as an adjustment to long-term investments with the corresponding amount charged or credited to additional paid-in capital to the extent available, with the balance charged to retained earnings.

Property, Plant and Equipment

Property, plant and equipment are stated at cost plus a revaluation increment, if any, less accumulated depreciation and accumulated impairment loss. The interest costs that are directly attributable to the acquisition, construction of a qualifying asset are capitalized as property, plant and equipment. Major renewals and betterments are capitalized, while maintenance and repairs are expensed as incurred.

When an indication of impairment is identified, any excess of the carrying amount of an asset over its recoverable amount is recognized as a loss. If the recoverable amount increases in a subsequent period, the amount previously recognized as impairment would be reversed and recognized as a gain. However, the adjusted amount may not exceed the carrying amount that would have been determined, net of depreciation, as if no impairment loss had been recognized.

An impairment loss on a revalued asset is charged to unrealized revaluation increment under equity to the extent available, with the balance is recognized as a loss in earnings. If the recoverable amount increases in a subsequent period, the amount previously recognized as impairment loss could be reversed and recognized as a gain, with the remaining credited to unrealized revaluation increment .

Depreciation expense is computed using the straight-line method over the following estimated service lives: land improvements - 10 to 30 years; buildings - 10 to 60 years; computer equipment - 2 to 10 years; telecommunications equipment - 6 to 15 years; transportation equipment - 5 to 10 years; and miscellaneous equipment - 3 to 12 years.

Upon sale or disposal of property, plant and equipment, the related cost, accumulated depreciation, accumulated impairment losses and any unrealized revaluation increment are deducted from the corresponding accounts, and any gain or loss is recorded as non-operating gains or losses in the period of sale or disposal.

Intangible Assets

Intangible assets mainly include 3G Concession, computer software and patents.

The 3G Concession is valid through December 31, 2018. The 3G Concession is amortized on a straight-line basis from the date operations commence through the date the license expires. Computer software costs and patents are amortized using the straight-line method over the estimated useful lives of 2-20 years.

Expenditure on research shall be expensed as incurred. Development Costs are capitalized when those costs meet relative criteria and are amortized using the straight-line method over estimated useful lives. Development costs do not meet relative criteria shall be expensed as incurred.

When an indication of impairment is identified for intangible assets, any excess of the carrying amount of an asset over its recoverable amount is recognized as a loss. If the recoverable amount increases in a subsequent period, the amount previously recognized as impairment would be reversed and recognized as a gain. However, the adjusted amount may not exceed the carrying amount that would have been determined, as if no impairment loss had been recognized.

Idle Assets

Idle assets are carried at the lower of recoverable amount or carrying amount.

Pension Costs

For defined benefit pension plans, net periodic pension benefit cost is recorded in the statement of income and includes service cost, interest cost, expected return on plan assets, amortization of prior service costs, amortization of pension gains (losses) and curtailment or settlement gains (losses).

The Company recognizes into income, any unrecognized actuarial net gains or losses that exceed 10% of the larger of projected benefit obligations or plan assets, defined as the corridor. Amounts inside this 10% corridor are amortized over the average remaining service life of active plan participants. Actuarial net gains and losses occur when actual experience differs from any of the many assumptions used to value the plans. Differences between the expected and actual returns on plan assets and changes in interest rate, which affect the discount rate used to value projected plan obligations, can have a significant impact on the calculation of pension net gains and losses from year to year.

The curtailments and settlement gains (losses) resulted from Chunghwa's early retirement programs. Curtailment/settlement gains or losses are equal to the changes of underfunded status plus a pro rata portion of the unrecognized prior service cost, unrecognized net gains (losses), and unrecognized transition obligations/assets, before the settlement/curtailment event multiplied by the percentage reduction in projected benefit obligation.

The projected benefit obligation represents the actuarial present value of benefits expected to be paid upon retirement based on estimated future compensation levels.

The carrying amount of accrued pension liability should be the sum of the following amounts when the calculation is positive: (a) projected benefit obligation as of balance sheet date, (b) minus (plus) unamortized actuarial loss (gain), (c) minus unamortized prior service cost, and (d) minus the fair value of plan assets. If the amount determined by above calculation is negative, it is viewed as prepaid pension cost. The prepaid pension cost is measured at the lower of: (a) the amount determined above, and (b) the sum of the following amounts: (i) unamortized actuarial loss, (ii) unamortized prior service cost, and (iii) the present value of refunds from the plan or reductions in future contributions to the plan.

The measurement of benefit obligations and net periodic cost (income) is based on estimates and assumptions approved by the Company's management such as compensation, age and seniority, as well as certain assumptions, including estimates of discount rates, expected return on plan assets and rate of compensation increases.

For employees under defined contribution pension plans, pension costs are recorded based on the actual contributions made to employees individual pension accounts during their service periods.

Income Tax

The Company applies inter-period allocations for its income tax, whereby deferred income tax assets and liabilities are recognized for the tax effects of temporary differences and unused tax credits. Valuation allowances are provided to the extent, if any, that it is more likely than not that deferred income tax assets will not be realized. A deferred tax asset or liability is classified as current or noncurrent in accordance with the classification of its related asset or liability. However, if a deferred tax asset or liability does not relate to an asset or liability in the financial statements, then it is classified as either current or noncurrent based on the expected length of time before it is realized or settled.

Any tax credits arising from, research and development are recognized using the flow-through method.

Adjustments of prior years' tax liabilities are added to or deducted from the current year's tax provision.

Income taxes (10%) on undistributed earnings is recorded in the year of stockholders approval which is the year subsequent to the year the earnings are generated.

Revenue Recognition

Revenues are recognized when they are realized or realizable and earned. Revenues are realized or realizable and earned when the Company has persuasive evidence of an arrangement, the goods have been delivered or the services have been rendered to the customer, the sales price is fixed or determinable and collectibility is reasonably assured.

Revenue is measured at the fair value of the consideration received or receivable and represents amounts agreed between the Company and the customers for goods sold in the normal course of business, net of sales discounts and volume rebates. For trade receivables due within one year from the balance sheet date, as the nominal value of the consideration to be received approximates its fair value and transactions are frequent, fair value of the consideration is not determined by discounting all future receipts using an imputed rate of interest.

Usage revenues from fixed-line services (including local, domestic long distance and international long distance), cellular services, internet and data services, and interconnection and call transfer fees from other telecommunications companies and carriers are billed in arrears and are recognized based upon minutes of traffic processed when the services are provided in accordance with contract terms.

Other revenues are recognized as follows: (a) one-time subscriber connection fees (on fixed-line services) are deferred and recognized over the average expected customer service periods, (b) monthly fees (on fixed-line services, wireless and Internet and data services) are accrued every month, and (c) prepaid services (fixed-line, cellular and Internet) are recognized as income based upon actual usage by customers or when the right to use those services expires.

Where the Company enters into transactions which involve both the provision of air time bundled with products such as 3G data card and handset, total consideration received from handsets in these arrangements are allocated and measured using units of accounting within the arrangement based on relative fair values limited to the amount that is not contingent upon the delivery of other items or services.

Where the Company sells products to third party cellular phone stores the Company records the direct sale of the products, typically handsets, as gross revenue when the Company is the primary obligor in the arrangement and when title is passed and the products are accepted by the stores.

Expense Recognition

The costs of providing services are recognized as incurred. The cost includes incentives to third party dealers for inducing business which are payable when the end user enters into an airtime contract.

3. EFFECT OF CHANGES IN ACCOUNTING PRINCIPLE

The Company adopted the newly-revised Statements of Financial Accounting Standards No. 34, Financial Instruments, (SFAS No. 34) beginning from January 1, 2011. When an enterprise adopts the revised provisions, the initial recognition of loans and receivables shall be accounted for under SFAS No. 34. There is no effect on the net income and after-tax basic earnings per share for the six months ended June 30, 2011.

18. STOCKHOLDERS' EQUITY

Under Chunghwa's Articles of Incorporation, Chunghwa's authorized capital is \$120,000,000,000 which is divided into 12,000,000,000 common shares (at \$10 par value per share), among which 7,757,447 shares are issued and outstanding as of June 30, 2011.

For the purpose of privatizing Chunghwa, the MOTC sold 1,109,750 thousand common shares of Chunghwa in an international offering of securities in the form of American Depositary Shares (ADS) amounting to 110,975 thousand units (one ADS represents ten common shares) on the New York Stock Exchange on July 17, 2003. Afterwards, the MOTC sold 1,350,682 thousand common shares in the form of ADS amounting to 135,068 thousand units on August 10, 2005. Subsequently, the MOTC and Taiwan Mobile Co., Ltd. sold 505,389 thousand and 58,959 thousand common shares of Chunghwa, respectively, in the form of ADS totally amounting to 56,435 thousand units on September 29, 2006. The MOTC and Taiwan Mobile Co., Ltd. have sold 3,024,780 thousand common shares in the form of ADS amounting to 302,478 thousand units. As of June 30, 2011, the outstanding ADSs were 527,503 thousand common shares, which equaled approximately 52,750 thousand units and represented 6.80 % of Chunghwa's total outstanding common shares.

The ADS holders generally have the same rights and obligations as other common stockholders, subject to the provision of relevant laws. The exercise of such rights and obligations shall comply with the related regulations and deposit agreement, which stipulate, among other things, that ADS holders can, through deposit agents:

- a. Exercise their voting rights,

- b. Sell their ADSs, and

- 24 -

c. Receive dividends declared and subscribe to the issuance of new shares.

Under the ROC Company Law, additional paid-in capital may only be utilized to offset deficits. For those companies having no deficits, additional paid-in capital arising from capital surplus can be used to increase capital stock and distribute to stockholders in proportion to their ownership at the ex-dividend date. Also, such amounts can only be declared as a stock dividend by Chunghwa at an amount calculated in accordance with the provisions of existing regulations. The combined amount of any portions capitalized each year may not exceed 10 percent of common stock issued. However, where a company undergoes an organizational change (such as a merger, acquisition, or reorganization) that results in the capitalization of undistributed earnings after the organizational change, the above restriction does not apply.

In addition, before distributing a dividend or making any other distribution to stockholders, Chunghwa must pay all outstanding taxes, recover any past losses and set aside a legal reserve equal to 10% of its net income, and depending on its business needs or requirements, may also set aside a special reserve. In accordance with the Articles of Incorporation, no less than 50% of the remaining earnings comprising remaining balance of net income, if any, plus cumulative undistributed earnings shall be distributed in the following order: (a) from 2% to 5% of distributable earnings shall be distributed to employees as employee bonus; (b) no more than 0.2% of distributable earnings shall be distributed to board of directors and supervisors as remuneration; and (c) cash dividends to be distributed shall not be less than 50% of the total amount of dividends to be distributed. If cash dividends to be distributed is less than NT\$0.10 per share, such cash dividend shall be distributed in the form of common shares.

For the six months ended June 30, 2011 and 2010, the accrual amounts for bonuses to employees and remuneration to directors and supervisors is based on management estimates including past experience and probable amount to be paid in accordance with Chunghwa's Articles of Incorporation and Implementation Guidance for the Employee's Bonus Distribution of Chunghwa Telecom Co., Ltd.

If the initial accrual amounts of the aforementioned bonus are significantly different from the amounts proposed by the board of directors, the difference is charged to the earnings of the year making the initial estimate. Otherwise, the difference between initial accrual amounts and the amounts resolved in the shareholders' meeting is charged to the earnings of the following year as a result of change of accounting estimate.

Under the ROC Company Law, the appropriation for legal reserve shall be made until the accumulated reserve equals the aggregate par value of the outstanding capital stock of Chunghwa. This reserve can only be used to offset a deficit, or when reaching 50% of the aggregate par value of the outstanding capital stock of Chunghwa, up to 50% of the reserve may, at the option of Chunghwa, be declared as a stock dividend and transferred to capital.

The appropriations and distributions of the 2010 and 2009 earnings of Chunghwa have been approved by the stockholders on June 24, 2011 and June 18, 2010 as follows:

	Appropriation of Earnings		Dividend Per Share

In May 2010, the Legislative Yuan passed the amendment of Article 5 of the Income Tax Law, which reduces the income tax rate of profit-seeking enterprises from 20% to 17%, effective January 1, 2010. After the Legislative Yuan passed the amendment of Article 5 of the Income Tax Law, Chunghwa recalculated its deferred income tax assets and liabilities in accordance with the amended Article and recorded the resulting difference as an income tax expense or benefit.

Under Article 10 of the Statute for Industrial Innovation (SII) passed by the Legislative Yuan in April 2010, a profit-seeking enterprise may deduct up to 15% of its research and development expenditures from its income tax payable for the fiscal year in which these expenditures are incurred, but this deduction should not exceed 30% of the income tax payable for that fiscal year. This incentive took effect from January 1, 2010 and is effective till December 31, 2019.

In March 2007, the ARDF issued an Interpretation 96-052 that requires companies to recognize bonuses paid to employees, directors and supervisors as an expense rather than an appropriation of earnings beginning from January 1, 2008. According to the Interpretation 97-169 issued by ARDF in May 2008, Chunghwa presumed that the employees bonuses to be paid will be settled in shares and takes those shares into consideration when calculating the weighted average number of outstanding shares used in the calculation of diluted EPS if the shares have a dilutive effect for the six months ended June 30, 2011 and 2010. The number of shares is calculated by dividing the amount of bonuses by the closing price of the Chunghwa's shares of the balance sheet date. The dilutive effect of the shares needs to be considered until the stockholders resolve the number of shares to be distributed to employees in their meeting in the following year.

The diluted earnings per share for the six months ended June 30, 2011 and 2010 was due to the effect of potential common stock related to stock options granted by SENAO.

22. PENSION PLAN

Chunghwa completed privatization plans on August 12, 2005. Chunghwa is required to pay all accrued pension obligations including service clearance payment, lump sum payment under civil service plan, additional separation payments, etc. upon the completion of the privatization in accordance with the Statute Governing Privatization of Stated-owned Enterprises. After paying all pension obligations for privatization, the plan assets of Chunghwa should be transferred to the Fund for Privatization of Government-owned Enterprises (the Privatization Fund) under the Executive Yuan. On August 7, 2006, Chunghwa transferred the remaining balance of fund to the Privatization Fund. However, according to the instructions of MOTC, Chunghwa would, on behalf of the MOTC to pay all accrued pension obligations including service clearance payment, lump sum payment under civil service plan, additional separation payments, etc. upon the completion of the privatization.

The pension plan under the Labor Pension Act of ROC (the LPA) is effective beginning July 1, 2005 and this pension mechanism is considered as a defined contribution plan. Based on the LPA, Chunghwa makes monthly contributions to employees' individual pension accounts at 6% of monthly salaries and wages.

Chunghwa's pension plan is considered as a defined benefit plan under the Labor Standards Law that provide benefits based on an employee's length of service and average six-month salary prior to retirement. Chunghwa contributes an amount at 15% or less of salaries paid each month to their respective pension funds (the Funds), which are administered by the Labor Pension Fund Supervisory Committee (the Committee) and deposited in the names of the Committees in the Bank of Taiwan.

The balance of Chunghwa's plan assets subject to defined benefit plan were \$14,187,100 thousand and \$11,746,275 thousand as of June 30, 2011 and 2010, respectively.

Pension costs of Chunghwa were \$1,473,781 thousand (\$1,401,794 thousand subject to defined benefit plan and \$71,987 thousand subject to defined contribution plan) and \$1,431,803 thousand (\$1,372,432 thousand subject to defined benefit plan and \$59,371 thousand subject to defined contribution plan) for the six months ended June 30, 2011 and 2010, respectively.

23. TRANSACTIONS WITH RELATED PARTIES

The ROC Government, one of Chunghwa's customers held significant equity interest in Chunghwa. Chunghwa provides fixed-line services, wireless services, Internet and data and other services to the various departments and institutions of the ROC Government and other state-owned enterprises in the normal course of business and at arm's-length prices. The information on service revenues from government bodies and related organizations have not been provided because details of the type of transactions were not summarized by Chunghwa. Chunghwa believes that all costs of doing business are reflected in the financial statements.

Chunghwa has entered into a contract with ST-2 Satellite Ventures Pte., Ltd. on March 12, 2010 to lease capacity on the ST-2 satellite. This lease term is 15 years which will start from the official operation of ST-2 satellite and the total contract value is approximately \$6,000,000 thousand (SG\$260,723 thousand). ST-2 satellite has launched in May 2011 and will begin its official operation in August 2011. The Company has prepaid \$3,155,764 thousand which has classified as other assets - others as of June 30, 2011.

Chunghwa has leased property to LED since April 2010. The lease term is 15 years and the rent is charged monthly. Based on the agreement of both parties, the lease contract was terminated on April 1, 2011.

Chunghwa sold the land with a carrying value of \$936,016 thousand to LED at the price of \$2,421,932 thousand in 2008. However, since the gain on disposal of land amounting to \$1,485,916 thousand is unrealized, the gain was recognized as deferred credit - profit on intercompany transactions. Gain on disposal of land \$473,422 thousand was recognized for the six months ended June 30, 2011.

Chunghwa sold the land with a carrying value of \$378,927 thousand to LED at price of \$207,030 thousand in 2008 and resulted in a disposal loss amounting to \$171,897 thousand. The disposal loss on land is unrealized and the unrealized loss is included in other assets - others. The unrealized loss is not recognized in earnings until it is sold to the third party and realized in the future.

The foregoing transactions with related parties were determined in accordance with mutual agreements.

24. SIGNIFICANT COMMITMENTS AND CONTINGENCIES

As of June 30, 2011, in addition to those disclosed in other notes, Chunghwa's remaining commitments under non-cancellable contracts with various parties were as follows:

- a. Acquisition of land and buildings of \$96,258 thousand.
- b. Acquisition of telecommunications equipment of \$21,045,886 thousand.
- c. Contracts to print billing, envelopes and telephone directories of \$30,116 thousand.
- d. Chunghwa also has non-cancellable operating leases covering certain buildings, computers, computer peripheral equipment and operating system software under contracts that expire in various years. Future lease payments were as follows:

Year	Amount
2011 (from July 1, 2011 to December 31, 2011)	\$ 1,089,657
2012	1,566,827
2013	1,080,217
2014	867,905
2015 and thereafter	1,002,221

- e. A commitment to contribute \$2,000,000 thousand to a Piping Fund administered by the Taipei City Government, of which \$1,000,000 thousand was contributed by Chunghwa on August 15, 1996 (classified as long-term investment - other monetary assets). If the fund is not sufficient, Chunghwa will contribute the remaining \$1,000,000 thousand upon notification from the Taipei City Government. Based on Chunghwa's understanding of the Piping Fund terms, if the project is considered to be no longer necessary by the ROC government, Chunghwa will receive back its proportionate share of the net equity of the Piping Fund upon its dissolution. Chunghwa does not know when its contribution to the Piping Fund will be returned; therefore, Chunghwa did not discount the face amount of its contribution on the Piping Fund.

- f. A portion of the land used by Chunghwa during the period July 1, 1996 to December 31, 2004 was co-owned by Chunghwa and Taiwan Post Co., Ltd. (the former Chunghwa Post Co., Ltd. directorate General of Postal Service). In accordance with the claims process in Taiwan, on July 12, 2005, the Taiwan Taipei District Court sent a claim notice to Chunghwa to reimburse Chunghwa Post Co., Ltd. in the amount of \$767,852 thousand for land usage compensation due to the portion of land usage area in excess of Chunghwa's ownership and along with interest calculated at 5% interest rate from June 30, 2005 to the payment date. Chunghwa stated that both parties have the right to use co-management land without consideration. Chunghwa Post Co., Ltd. can not request payment for land compensation. Furthermore, Chunghwa believes that the computation used to derive the land usage compensation amount is inaccurate because most of the compensation amount has expired as result of the expiration clause. Therefore, Chunghwa filed an appeal at the Taiwan Taipei District Court. On March 30, 2009, the Taiwan Taipei District Court rendered its judgment that Chunghwa only need to pay \$16,870 thousand along with interest calculated at 4% per annum from July 23, 2005 and 4% of the court fees as the court judgment compensation. However, Chunghwa Post Co., Ltd. did not accept the judgment and filed an appeal at Taiwan High Court. Chunghwa also filed an appeal at the Taiwan High Court within the statutory period. On April 7, 2010, the Taiwan High Court rendered its judgment, ruling that Chunghwa was required to pay \$23,284 thousand as compensation in addition to the \$16,870 thousand from the Taiwan Taipei District Court judgment, along with interest calculated at 5% per annum from July 23, 2005 to the payment date and 12.5% of Chunghwa Post Co., Ltd.'s court fees from its original suit and subsequent appeal as compensation. Chunghwa has filed an appeal to the Supreme Court of the Republic of China within the statutory period. On June 9, 2011, the Supreme Court of the Republic of China remanded the aforementioned judgment from Taiwan High Court and the case was remanded back to the Taiwan High Court.

b. Methods and assumptions used in the estimation of fair values of financial instruments:

- 1) The fair values of certain financial instruments recognized in the balance sheet generally correspond to the market prices of the financial assets. Because of the short maturities of these instruments, the carrying value represents a reasonable basis to estimate fair values. This method does not apply to the financial instruments discussed in Notes 2 and 3 below.
- 2) If the financial instruments have quoted market prices in an active market, the quoted market prices are viewed as fair values. If the market prices of the available-for-sale financial assets are not readily available, valuation techniques are used incorporating estimates and assumptions that are consistent with prevailing market conditions.
- 3) Financial assets carried at cost are investments in nonlisted shares, which have no quoted prices in an active market and entail an unreasonably high cost to obtain verifiable fair values. Therefore, no fair value is presented.

c. Fair values of financial assets and liabilities using quoted market prices or valuation techniques were as follows:

	Amount Based on Quoted Market Price		Amount Determined Using Valuation Techniques	
	June 30		June 30	
	2011	2010	2011	2010
Assets				
Financial assets at fair value through profit or loss	\$	\$	\$ 8,615	\$
Available-for-sale financial assets	1,884,513	5,599,108		
Liabilities				
Financial liabilities at fair value through profit or loss			974	23,656

d. Information about financial risks

1) Market risk

The foreign exchange rate fluctuations would result in Chunghwa's foreign-currency-dominated assets and liabilities, outstanding currency swap contracts exposed to rate risk.

The financial instruments categorized as available-for-sale financial assets are mainly listed stocks and open-end mutual funds. Therefore, the market risk is the fluctuations of market price. In order to manage this risk, Chunghwa would assess the risk before investing; therefore, no material market risk is anticipated.

2) Credit risk

Credit risk represents the potential loss that would be incurred by Chunghwa if the counter-parties or third-parties breached contracts. Financial instruments with positive fair values at the balance sheet date are evaluated for credit risk. The counter-parties or third-parties of the aforementioned financial instruments are reputable financial institutions and corporations. Management does not expect Chunghwa's exposure to default by those parties to be material. The Company held a variety of financial instruments, the maximum credit exposed amount is the same as their carrying amounts.

3) Liquidation risk

Chunghwa has sufficient operating capital to meet cash needs upon settlement of derivative financial instruments. Therefore, the liquidation risk is low.

The financial instruments of Chunghwa categorized as available-for-sale financial assets are publicly-traded, easily converted to cash. Therefore, no material liquidation risk is anticipated. The financial instruments categorized as financial assets carried at cost are investments that do not have a quoted market price in an active market. Therefore, material liquidation risk is anticipated.

4) Cash flow interest rate risk

Chunghwa engages in investments in fixed-interest-rate debt securities. Therefore, cash flows from such securities are not expected to fluctuate significantly due to changes in market interest rates.

According to the regulations of Securities and Futures Bureau, Chunghwa should disclose the derivative transactions of Chunghwa's investees, SENA0 and CHI, which was as follows:

a. Holding period and contract amounts

SENA0 and CHI entered into forward exchange contracts and index future contracts to reduce the exposure to foreign currency risk and price risk. The financial risk management objective of SENA0 and CHI are to minimize risks due to market risk.

The outstanding forward exchange contracts of SENA0 as of June 30, 2011 and 2010 were as follows:

	Currency	Maturity Period	Contract Amount (In Thousands)
June 30, 2011			
Buy	NT\$/US\$	2011.07	NT\$ 236,986/US\$8,200
June 30, 2010			
Buy	NT\$/US\$	2010.07	NT\$ 76,956/US\$2,400

There was no outstanding index future contracts of June 30, 2011. Outstanding index future contracts of CHI on June 30, 2010 was as follows:

	Maturity Period	Units	Contract Amount (In Thousands)
June 30, 2010			
TAIEX futures	2010.07	12	NT\$ 17,198

Net gain of SANE0 arising from derivative financial products for the six months ended June 30, 2011 and 2010 were \$3,789 thousand and \$5,068 thousand, respectively.

Net gain (loss) of CHI arising from derivative financial products for the six months ended June 30, 2011 and 2010 were \$(2,795) thousand and \$222 thousand, respectively.

b. Market risk

The foreign exchange rate fluctuations would result in SENAO's foreign-currency-dominated assets and liabilities and open forward exchange contracts exposed to rate risk.

The fluctuations of market price would result in CHI's index future contracts exposed to price risk.

c. Credit risk

Credit risk represents the potential loss that would be incurred by SENAO and CHI if the counter-parties or third-parties breached contracts. Financial instruments with positive fair values at the balance sheet date are evaluated for credit risk. The counter-parties or third-parties to the aforementioned financial instruments are reputable financial institutions. Management does not expect SENAO's and CHI's exposure to default by those parties to be material. The largest amount of exposure to default by those parties of the financial instruments of SENAO and CHI is the same as carrying value.

d. Liquidation risk

SENAO and CHI have sufficient operating capital to meet cash needs upon settlement of derivative financial instruments. Therefore, the liquidation risk is low.
