QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended October 2, 2015

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 1-3863

HARRIS CORPORATION

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

1025 West NASA Boulevard

Melbourne, Florida
(Address of principal executive offices)

(321) 727-9100

34-0276860
(I.R.S. Employer Identification No.)

32919
(Zip Code)

(Registrant's telephone number, including area code)

No changes

Edgar Filing: HARRIS CORP /DE/ - Form 10-Q

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Edgar Filing: HARRIS CORP /DE/ - Form 10-Q

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of shares outstanding of the registrant's common stock as of November 4, 2015 was 124,413,101 shares.

Table of Contents**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)****Note A Significant Accounting Policies and Recent Accounting Standards***Basis of Presentation*

The accompanying condensed consolidated financial statements include the accounts of Harris Corporation and its consolidated subsidiaries. As used in these Notes to Condensed Consolidated Financial Statements (Unaudited) (these Notes), the terms Harris, Company, we, our and us refer to Harris Corporation and its consolidated subsidiaries. Intracompany transactions and accounts have been eliminated in consolidation. The accompanying condensed consolidated financial statements have been prepared by Harris, without an audit, in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information and with the rules and regulations of the Securities and Exchange Commission (SEC). Accordingly, such interim financial statements do not include all information and footnotes necessary for a complete presentation of financial position, results of operations and cash flows in conformity with U.S. GAAP for annual financial statements. In the opinion of management, such interim financial statements reflect all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation of our financial position, results of operations and cash flows for the periods presented therein. The results for the first quarter of fiscal 2016 are not necessarily indicative of the results that may be expected for the full fiscal year or any subsequent period. The balance sheet at July 3, 2015 has been derived from our audited financial statements, but does not include all of the information and footnotes required by U.S. GAAP for annual financial statements. We provide complete, audited financial statements in our Annual Report on Form 10-K, which includes information and footnotes required by the rules and regulations of the SEC. The information included in this Quarterly Report on Form 10-Q (this Report) should be read in conjunction with the Management's Discussion and Analysis of Financial Condition and Results of Operations and the Consolidated Financial Statements and accompanying Notes to Consolidated Financial Statements included in our Annual Report on Form 10-K for the fiscal year ended July 3, 2015 (our Fiscal 2015 Form 10-K).

Use of Estimates

The preparation of financial statements in accordance with U.S. GAAP requires us to make estimates and assumptions that affect the amounts reported in the accompanying condensed consolidated financial statements and these Notes. These estimates and assumptions are based on experience and other information available prior to issuance of the accompanying condensed consolidated financial statements and these Notes. Materially different results can occur as circumstances change and additional information becomes known.

Adoption of New Accounting Standards

In the first quarter of fiscal 2016, we adopted an accounting standard issued by the Financial Accounting Standards Board (FASB) that eliminates the requirement for an acquirer in a business combination to retrospectively account for measurement-period adjustments. Instead, the new guidance requires that the cumulative impact of a measurement-period adjustment (including the impact on prior periods) be recognized in the reporting period in which the adjustment is identified. This standard is to be applied prospectively. The adoption of this standard did not have a material impact on our financial position, results of operations or cash flows.

Accounting Standards Issued But Not Yet Effective

In May 2014, the FASB issued a comprehensive new revenue recognition standard that supersedes nearly all revenue recognition guidance under U.S. GAAP and International Financial Reporting Standards and supersedes some cost guidance for construction-type and production-type contracts. The guidance in this standard is principles-based, and consequently, entities will be required to use more judgment and make more estimates than under prior guidance, including identifying contract performance obligations, estimating variable consideration to include in the contract price and allocating the transaction price to separate performance obligations. The guidance in this standard is applicable to all contracts with customers, regardless of industry-specific or transaction-specific fact patterns. Additionally, this standard provides guidance for transactions that were not previously addressed comprehensively (e.g., service revenue, contract modifications and licenses of intellectual property) and modifies guidance for multiple-element arrangements. The core principle of this standard is that entities should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods and services. To help financial statement users better understand the nature, amount, timing and potential uncertainty of the revenue that is recognized, this standard requires significantly more interim and annual disclosures. This standard allows for either full retrospective adoption (application to all periods presented) or modified retrospective adoption (application to only the most current period presented in the financial statements, as well as certain additional required footnote disclosures). In August 2015, the FASB issued an accounting standards update that defers the effective date of this standard by one year, while permitting entities to elect to adopt one year earlier on the original effective date. As a result, this standard is now effective for fiscal years, and interim reporting periods within those years, beginning after December 15, 2017, which for us is our fiscal 2019. We are currently evaluating the impact this standard will have on our

financial position, results of operations and cash flows.

Table of Contents**Note B Stock Options and Other Share-Based Compensation**

During the quarter ended October 2, 2015, we had one shareholder-approved employee stock incentive plan (SIP), the Harris Corporation 2005 Equity Incentive Plan (As Amended and Restated Effective August 27, 2010), under which options or other share-based compensation was outstanding, and we have granted the following types of share-based awards under our SIP: stock options, restricted stock awards, restricted stock unit awards, performance share awards, performance share unit awards and awards of immediately vested shares of our common stock. We believe that such awards more closely align the interests of employees with those of shareholders. Certain share-based awards provide for accelerated vesting if there is a change in control (as defined under our SIP). The compensation cost related to our share-based awards that was charged against income was \$10 million and \$8 million for the quarters ended October 2, 2015 and September 26, 2014, respectively.

Grants to employees under our SIP during the quarter ended October 2, 2015 consisted of 1,647,890 stock options, 66,670 restricted stock awards and 282,595 performance share unit awards. The fair value as of the grant date of each option award was determined using the Black-Scholes-Merton option-pricing model, which used the following assumptions: expected dividend yield of 2.50 percent; expected volatility of 23.01 percent; risk-free interest rates averaging 1.52 percent; and expected term in years of 5.05. The fair value as of the grant date of each restricted stock award was based on the closing price of our common stock on the grant date. The fair value as of the grant date of each performance share unit award was determined based on a fair value from a multifactor Monte Carlo valuation model that simulates our stock price and total shareholder return (TSR) relative to other companies in our TSR peer group, less a discount to reflect the delay in payments of cash dividend-equivalents that are made only upon vesting.

Note C Accumulated Other Comprehensive Loss

The components of accumulated other comprehensive loss are summarized below:

	October 2, 2015 (1)	July 3, 2015 (1)
	(In millions)	
Foreign currency translation, net of income taxes of \$19 million and \$15 million at October 2, 2015 and July 3, 2015, respectively	\$ (94)	\$ (62)
Net unrealized loss on hedging derivatives, net of income taxes of \$12 million at October 2, 2015 and July 3, 2015	(19)	(19)
Unrecognized postretirement obligations, net of income taxes of \$42 million at October 2, 2015 and July 3, 2015	65	65
	\$ (48)	\$ (16)

(1) Reclassifications out of accumulated other comprehensive loss to earnings were not material for the first quarter of fiscal 2016 or 2015.

Note D Receivables

Receivables are summarized below:

	October 2, 2015	July 3, 2015
	(In millions)	
Accounts receivable	\$ 770	\$ 837
Unbilled costs and accrued earnings on cost-plus contracts	320	343
	1,090	1,180
Less allowances for collection losses	(12)	(12)
	\$ 1,078	\$ 1,168

Table of Contents**Note E Inventories**

Inventories are summarized below:

	October 2, 2015	July 3, 2015
	(In millions)	
Unbilled costs and accrued earnings on fixed-price contracts	\$ 556	\$ 463
Finished products	110	100
Work in process	235	256
Raw materials and supplies	206	196
	\$ 1,107	\$ 1,015

Unbilled costs and accrued earnings on fixed-price contracts were net of progress payments of \$69 million at October 2, 2015 and \$85 million at July 3, 2015.

Note F Property, Plant and Equipment

Property, plant and equipment are summarized below:

	October 2, 2015	July 3, 2015
	(In millions)	
Land	\$ 45	\$ 45
Software capitalized for internal use	154	155
Buildings	632	587
Machinery and equipment	1,491	1,526
	2,322	2,313
Less accumulated depreciation and amortization	(1,172)	(1,148)
	\$ 1,150	\$ 1,165

Depreciation and amortization expense related to property, plant and equipment for the quarters ended October 2, 2015 and September 26, 2014 was \$50 million and \$35 million, respectively.

Note G Goodwill

As discussed in *Note O Business Segments*, we adjusted our segment reporting in the first quarter of fiscal 2016 to reflect our new organizational structure that was effective at the beginning of fiscal 2016, which resulted in changes to our operating segments, which are also our reportable segments and are referred to as our business segments. In accordance with GAAP, we have reassigned goodwill using a relative fair value approach. Because our accounting for our acquisition of Exelis Inc. and its subsidiaries (collectively, Exelis) in the fourth quarter of fiscal 2015 is still preliminary, we assigned the goodwill acquired as a result of the acquisition on a provisional basis. Immediately before and after our goodwill assignments, we completed an assessment of any potential goodwill impairment under our former and new segment reporting structure and determined that no impairment existed.

The assignment of goodwill by business segment is as follows:

Edgar Filing: HARRIS CORP /DE/ - Form 10-Q

	Communication Systems	Space and Intelligence Systems	Electronic Systems (In millions)	Critical Networks	Total
Balance at July 3, 2015	\$ 760	\$ 1,446	\$ 1,718	\$ 2,424	\$ 6,348
Currency translation adjustments	(2)	(1)		(14)	(17)
Other (including true-ups of previously estimated purchase price allocations) (1)	2	(9)	4	(7)	(10)
Balance at October 2, 2015	\$ 760	\$ 1,436	\$ 1,722	\$ 2,403	\$ 6,321

- (1) Our accounting for the Exelis acquisition is still preliminary. The fair value estimates for the assets acquired and liabilities assumed were based on preliminary calculations, and our estimates and assumptions are subject to change as we obtain additional information for our estimates during the measurement period (up to one year from the acquisition date). The primary areas of these preliminary estimates that are not yet finalized relate to certain tangible assets and liabilities acquired, identifiable intangible assets and tax-related items. During the quarter ended October 2, 2015, we recorded several purchase price adjustments which impacted goodwill, the largest of which was a \$31 million reduction in current liabilities related to unrecognized tax benefits.

Table of Contents**Note H Accrued Warranties**

Changes in our liability for standard product warranties, which is included as a component of the Other accrued items and Other long-term liabilities line items in the accompanying Condensed Consolidated Balance Sheet (Unaudited), during the first quarter of fiscal 2016 were as follows:

	(In millions)
Balance at July 3, 2015	\$ 36
Warranty provision for sales	4
Settlements	(6)
Balance at October 2, 2015	\$ 34

We also sell extended product warranties and recognize revenue from these arrangements over the warranty period. Costs of warranty services under these arrangements are recognized as incurred. Deferred revenue associated with extended product warranties at October 2, 2015 and July 3, 2015 was \$34 million and \$36 million, respectively, and is included as a component of the Advance payments and unearned income and Other long-term liabilities line items in the accompanying Condensed Consolidated Balance Sheet (Unaudited).

Note I Postretirement Benefit Plans

The following table provides the components of our net periodic benefit cost for our defined benefit plans, including defined benefit pension plans and other postretirement defined benefit plans:

	Quarter Ended October 2, 2015		
	Pension	Other Benefits (In millions)	Total
Net periodic benefit cost			
Service cost	\$ 18	\$ 1	\$ 19
Interest cost	62	4	66
Expected return on plan assets	(86)	(5)	(91)
Amortization of net actuarial loss		2	2
Amortization of prior service cost		(3)	(3)
Total net periodic benefit cost	\$ (6)	\$ (1)	\$ (7)

We contributed \$61 million to our qualified defined benefit pension plans during the first quarter of fiscal 2016. We currently anticipate making additional contributions to our qualified defined benefit pension plans of approximately \$112 million during the remainder of fiscal 2016.

Table of Contents**Note J Net Income Per Common Share**

The computations of net income per common share are as follows:

	Quarter Ended	
	October 2, 2015	September 26, 2014
	(In millions, except per share amounts)	
Net income	\$ 148	\$ 125
Adjustments for participating securities outstanding		(1)
Net income used in per basic and diluted common share calculations (A)	\$ 148	\$ 124
Basic weighted average common shares outstanding (B)	123.5	104.6
Impact of dilutive share-based awards	1.2	1.2
Diluted weighted average common shares outstanding (C)	124.7	105.8
Net income per basic common share (A)/(B)	\$ 1.20	\$ 1.19
Net income per diluted common share (A)/(C)	\$ 1.18	\$ 1.18

Potential dilutive common shares primarily consist of employee stock options and performance share unit awards. Employee stock options to purchase approximately 1,003,902 and 386,531 shares of our common stock were outstanding at October 2, 2015 and September 26, 2014, respectively, but were not included as dilutive stock options in the computations of net income per diluted common share because the effect would have been antidilutive.

Note K Income Taxes

Our effective tax rate (income taxes as a percentage of income before income taxes) was 31.5 percent in the first quarter of fiscal 2016 compared with 29.0 percent in the first quarter of fiscal 2015. In the first quarter of fiscal 2016, our effective tax rate benefited from the settlement of several items for amounts that were lower than previously recorded estimates. In the first quarter of fiscal 2015, our effective tax rate benefited from the recognition of foreign tax credits resulting from a dividend paid by a foreign subsidiary during fiscal 2013 that exceeded the U.S. tax liability in respect of the dividend. This resulted in a benefit of approximately \$9 million (approximately 5 percent of income before income taxes) that was recognized in calculating our effective tax rate in the first quarter of fiscal 2015 when the issue was settled with the Internal Revenue Service.

Note L Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in the principal market (or most advantageous market, in the absence of a principal market) for the asset or liability in an orderly transaction between market participants at the measurement date. Entities are required to maximize the use of observable inputs and minimize the use of unobservable inputs in measuring fair value, and to utilize a three-level fair value hierarchy that prioritizes the inputs used to measure fair value. The three levels of inputs used to measure fair value are as follows:

Level 1 Quoted prices in active markets for identical assets or liabilities.

Level 2 Observable inputs other than quoted prices included within Level 1, including quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; and inputs other than quoted prices that are observable or are derived principally from, or corroborated by, observable market data by correlation or other means.

Edgar Filing: HARRIS CORP /DE/ - Form 10-Q

Level 3 Unobservable inputs that are supported by little or no market activity, are significant to the fair value of the assets or liabilities, and reflect our own assumptions about the assumptions market participants would use in pricing the asset or liability developed using the best information available in the circumstances.

Table of Contents

The following table presents the fair value hierarchy of our assets and liabilities measured at fair value on a recurring basis (at least annually) as of October 2, 2015:

	Level 1	Level 2	Level 3	Total
	(In millions)			
Assets				
Deferred compensation plan investments: (1)				
Corporate-owned life insurance	\$	\$ 17	\$	\$ 17
Stock fund	52			52
Equity security	34			34
Liabilities				
Deferred compensation plans (2)	36	83		119

- (1) Represents investments held in a Rabbi Trust associated with our non-qualified deferred compensation plans, which we include in the Deferred compensation plan investments and Other non-current assets line items in the accompanying Condensed Consolidated Balance Sheet (Unaudited).
- (2) Primarily represents obligations to pay benefits under certain non-qualified deferred compensation plans, which we include in the Deferred compensation plan liabilities and Other long-term liabilities line items in the accompanying Condensed Consolidated Balance Sheet (Unaudited). Under these plans, participants designate investment options (including money market, stock and fixed-income funds), which serve as the basis for measurement of the notional value of their accounts.

The following table presents the carrying amounts and estimated fair values of our significant financial instruments that were not measured at fair value (carrying amounts of other financial instruments not listed in the table below approximate fair value due to the short-term nature of those items):

	October 2, 2015		July 3, 2015	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
	(In millions)			
Financial Liabilities				
Long-term debt (including current portion) (1)	\$ 5,031	\$ 5,121	\$ 5,183	\$ 5,230

- (1) The fair value was estimated using a market approach based on quoted market prices for our debt traded in the secondary market. If our long-term debt in our balance sheet were measured at fair value, it would be categorized in Level 2 of the fair value hierarchy.

Note M Derivative Instruments and Hedging Activities

In the normal course of doing business, we are exposed to global market risks, including the effect of changes in foreign currency exchange rates. We use derivative instruments to manage our exposure to such risks and formally document all relationships between hedging instruments and hedged items, as well as the risk-management objective and strategy for undertaking hedge transactions. We recognize all derivatives in the accompanying Condensed Consolidated Balance Sheet (Unaudited) at fair value. We do not hold or issue derivatives for speculative trading purposes.

At October 2, 2015, we had open foreign currency forward contracts with an aggregate notional amount of \$72 million, of which \$70 million were classified as fair value hedges and \$2 million were classified as cash flow hedges. This compares with open foreign currency forward contracts with an aggregate notional amount of \$74 million at July 3, 2015, of which \$73 million were classified as fair value hedges and \$1 million were classified as cash flow hedges. At October 2, 2015, contract expiration dates ranged from less than 1 month to 3 months with a weighted average contract life of 1 month.

Exchange-Rate Risk Balance Sheet Hedges

To manage the exposure in our balance sheet to risks from changes in foreign currency exchange rates, we implement fair value hedges. More specifically, we use foreign currency forward contracts and options to hedge certain balance sheet items, including foreign currency denominated accounts receivable and inventory. Changes in the value of the derivatives and the related hedged items are reflected in earnings in

Edgar Filing: HARRIS CORP /DE/ - Form 10-Q

the Cost of product sales and services line item in the accompanying Condensed Consolidated Statement of Income (Unaudited). As of October 2, 2015, we had outstanding foreign currency forward contracts denominated in the British Pound, Australian Dollar, Singapore Dollar, Brazilian Real, Norwegian Krone, Canadian Dollar and Mexican Peso to hedge certain balance sheet items. The net gains or losses on foreign currency forward contracts designated as fair value hedges were not material in the quarter ended October 2, 2015 or in the quarter ended September 26, 2014. In addition, no amounts were recognized in earnings in the quarter ended October 2, 2015 or in the quarter ended September 26, 2014 related to hedged firm commitments that no longer qualify as fair value hedges.

Table of Contents*Exchange-Rate Risk Cash Flow Hedges*

To manage our exposure to currency risk and market fluctuation risk associated with anticipated cash flows that are probable of occurring in the future, we implement cash flow hedges. More specifically, we use foreign currency forward contracts and options to hedge off-balance sheet future foreign currency commitments, including purchase commitments to suppliers, future committed sales to customers and intersegment transactions. These derivatives are being used to hedge currency exposures from cash flows anticipated across our business segments. We also have hedged U.S. Dollar payments to suppliers to maintain our anticipated profit margins in our international operations. As of October 2, 2015, we had outstanding foreign currency forward contracts denominated in the Canadian Dollar to hedge certain forecasted transactions.

These derivatives have only nominal intrinsic value at the time of purchase and have a high degree of correlation to the anticipated cash flows they are designated to hedge. Hedge effectiveness is determined by the correlation of the anticipated cash flows from the hedging instruments and the anticipated cash flows from the future foreign currency commitments through the maturity dates of the derivatives used to hedge these cash flows. These financial instruments are marked-to-market using forward prices and fair value quotes with the offset to accumulated other comprehensive income, net of hedge ineffectiveness. Gains and losses from other comprehensive income are reclassified to earnings when the related hedged item is recognized in earnings. The ineffective portion of a derivative's change in fair value is immediately recognized in earnings. The cash flow impact of our derivatives is included in the same category in the accompanying Condensed Consolidated Statement of Cash Flows (Unaudited) as the cash flows of the related hedged items.

The net gains or losses from cash flow hedges recognized in earnings or recorded in other comprehensive income, including gains or losses related to hedge ineffectiveness, were not material in the quarter ended October 2, 2015 or in the quarter ended September 26, 2014. We do not expect the net gains or losses recognized in the Accumulated other comprehensive loss line item in the accompanying Condensed Consolidated Balance Sheet (Unaudited) as of October 2, 2015 that will be reclassified to earnings from other comprehensive income within the next 12 months to be material.

Credit Risk

We are exposed to the risk of credit losses from non-performance by counterparties to the financial instruments discussed above, but we do not expect any of the counterparties to fail to meet their obligations. To manage credit risks, we select counterparties based on credit ratings, limit our exposure to any single counterparty under defined guidelines and monitor the market position with each counterparty.

The amount of assets and liabilities related to foreign currency forward contracts in the accompanying Condensed Consolidated Balance Sheet (Unaudited) as of October 2, 2015 was immaterial.

Note N Changes in Estimates

Estimates and assumptions, and changes therein, are important in connection with, among others, our segments' revenue recognition policies related to development and production contracts. Revenue and profits related to development and production contracts are recognized using the percentage-of-completion method, generally based on the ratio of costs incurred to estimated total costs at completion (i.e., the cost-to-cost method) or the ratio of actual units delivered to estimated total units to be delivered under the contract (i.e., the units-of-delivery method) with consideration given for risk of performance and estimated profit. Revenue and profits on cost-reimbursable development and production contracts are recognized as allowable costs are incurred on the contract, and become billable to the customer, in an amount equal to the allowable costs plus the profit on those costs.

Development and production contracts are combined when specific aggregation criteria are met. Criteria generally include closely interrelated activities performed for a single customer within the same economic environment. Development and production contracts are generally not segmented. If development and production contracts are segmented, we have determined that they meet specific segmenting criteria. Change orders, claims or other items that may change the scope of a development and production contract are included in contract value only when the value can be reliably estimated and realization is probable. Possible incentives or penalties and award fees applicable to performance on development and production contracts are considered in estimating contract value and profit rates and are recorded when there is sufficient information to assess anticipated contract performance. Incentive provisions that increase earnings based solely on a single significant event are generally not recognized until the event occurs.

Under the percentage-of-completion method of accounting, a single estimated total profit margin is used to recognize profit for each development and production contract over its period of performance. Recognition of profit on development and production fixed-price contracts requires estimates of the total cost at completion and the measurement of progress toward completion. The estimated profit or loss on a development and production contract is equal to the difference between the estimated contract value and the estimated total cost at completion.

Due to the long-term nature of many of our programs, developing the estimated total cost at

Table of Contents

completion often requires judgment. Factors that must be considered in estimating the cost of the work to be completed include the nature and complexity of the work to be performed, subcontractor performance, the risk and impact of delayed performance, availability and timing of funding from the customer and the recoverability of any claims outside the original development and production contract included in the estimate to complete. At the outset of each contract, we gauge its complexity and perceived risks and establish an estimated total cost at completion in line with these expectations. After establishing the estimated total cost at completion, we follow a standard estimate at completion (EAC) process in which management reviews the progress and performance on our ongoing development and production contracts at least quarterly and, in many cases, more frequently. If we successfully retire risks associated with the technical, schedule and cost aspects of a contract, we may lower our estimated total cost at completion commensurate with the retirement of these risks. Conversely, if we are not successful in retiring these risks, we may increase our estimated total cost at completion. Additionally, at the outset of a cost-reimbursable contract (for example, contracts containing award or incentive fees), we establish an estimated total contract value, or revenue, based on our expectation of performance on the contract. As the cost-reimbursable contract progresses, our estimated total contract value may increase or decrease if, for example, we receive higher or lower than expected award fees. When adjustments in estimated total costs at completion or in estimated total contract value are determined, the related impact to operating income is recognized using the cumulative catch-up method, which recognizes in the current period the cumulative effect of such adjustments for all prior periods. Anticipated losses on development and production contracts or programs in progress are charged to operating income when identified. Net EAC adjustments resulting from changes in estimates favorably impacted our operating income by \$17 million (\$0.08 per diluted share) in the first quarter of fiscal 2016 and by \$22 million (\$0.15 per diluted share) in the first quarter of 2015.

Note O Business Segments

We adjusted our segment reporting in the first quarter of fiscal 2016 to reflect our new organizational structure that was effective at the beginning of fiscal 2016. We structure our operations primarily around the products and services we sell and the markets we serve, and commencing with the first quarter of fiscal 2016, we report the financial results of our operations in the following four operating segments, which are also our reportable segments and are referred to as our business segments:

Communication Systems, serving markets in tactical and airborne radios, night vision technology, and defense and public safety networks;

Space and Intelligence Systems, providing complete earth observation, weather, geospatial, space protection, and intelligence solutions from advanced sensors and payloads, as well as ground processing and information analytics;

Electronic Systems, offering an extensive portfolio of solutions in electronic warfare, avionics, wireless technology, command, control, communications, computers and intelligence (C4I), undersea systems and aerostructures; and

Critical Networks, providing managed services supporting air traffic management, energy and maritime communications, and ground network operation and sustainment, as well as high-value information technology (IT) and engineering services.

The historical results, discussion and presentation of our business segments as set forth in this Quarterly Report on Form 10-Q reflect the impact of these adjustments for all periods presented. There is no impact on our previously reported consolidated statements of income, balance sheets or statements of cash flows resulting from these adjustments.

The accounting policies of our business segments are the same as those described in Note 1: Significant Accounting Policies in our Notes to Consolidated Financial Statements in our Fiscal 2015 Form 10-K. We evaluate each segment's performance based on its operating income or loss, which we define as profit or loss from operations before income taxes excluding interest income and expense, royalties and related intellectual property expenses, equity method investment income or loss and gains or losses from securities and other investments. Intersegment sales are generally transferred at cost to the buying segment, and the sourcing segment recognizes a profit that is eliminated. The Corporate eliminations line items in the tables below represent the elimination of intersegment sales and their related profits. The Unallocated corporate expense line item in the tables below represents the portion of corporate expenses not allocated to our business segments.

Table of Contents

Total assets by business segment are summarized below:

	October 2, 2015	July 3, 2015
	(In millions)	
Total Assets		
Communication Systems	\$ 1,853	\$ 1,906
Space and Intelligence Systems	2,139	2,096
Electronic Systems	2,517	2,513
Critical Networks	3,438	3,492
Corporate (1)	2,617	3,122
	\$ 12,564	\$ 13,129

(1) Because the acquisition of Exelis in the fourth quarter of fiscal 2015 benefited the entire Company as opposed to any individual segments, the approximately \$1.6 billion of identifiable intangible assets acquired in the Exelis acquisition was recorded as Corporate assets.

Segment revenue, segment operating income and a reconciliation of segment operating income to total income before income taxes follow:

	Quarter Ended	
	October 2, 2015	September 26, 2014
	(In millions)	
Revenue		
Communication Systems	\$ 454	\$ 389
Space and Intelligence Systems	435	253
Electronic Systems	374	109
Critical Networks	566	407
Corporate eliminations	(18)	(3)
	\$ 1,811	\$ 1,155

Income Before Income Taxes*Segment Operating Income:*

Communication Systems	\$ 138	\$ 116
Space and Intelligence Systems	68	37
Electronic Systems	69	22
Critical Networks	63	42
Unallocated corporate expense (1)	(75)	(17)
Corporate eliminations	(1)	(2)
Non-operating income (2)	1	
Net interest expense	(47)	(22)
	\$ 216	\$ 176

(1) Because the acquisition of Exelis in the fourth quarter of fiscal 2015 benefited the entire Company as opposed to any individual segments, the amortization of identifiable intangible assets acquired in the Exelis acquisition was recorded as unallocated corporate expense.

(2) Non-operating income in the quarter ended October 2, 2015 primarily consisted of income related to intellectual property matters.

Table of Contents**Note P Legal Proceedings and Contingencies**

From time to time, as a normal incident of the nature and kind of businesses in which we are, and were, engaged, various claims or charges are asserted and litigation or arbitration is commenced by or against us arising from or related to matters, including but not limited to: product liability; personal injury; patents, trademarks, trade secrets or other intellectual property; labor and employee disputes; commercial or contractual disputes; strategic acquisitions or divestitures; the prior sale or use of former products allegedly containing asbestos or other restricted materials; breach of warranty; or environmental matters. Claimed amounts against us may be substantial but may not bear any reasonable relationship to the merits of the claim or the extent of any real risk of court or arbitral awards. We record accruals for losses related to those matters against us that we consider to be probable and that can be reasonably estimated. Gain contingencies, if any, are recognized when they are realized and legal costs generally are expensed when incurred. At October 2, 2015, our accrual for the potential resolution of lawsuits, claims or proceedings that we consider probable of being decided unfavorably to us is not material. Although it is not feasible to predict the outcome of these matters with certainty, it is reasonably possible that some lawsuits, claims or proceedings may be disposed of or decided unfavorably to us and in excess of the amounts currently accrued. Based on available information, in the opinion of management, settlements, arbitration awards and final judgments, if any, which are considered probable of being rendered against us in litigation or arbitration in existence at October 2, 2015 are reserved against or would not have a material adverse effect on our financial condition, results of operations or cash flows.

Legal Proceedings

On February 4, 2013, we completed the sale of our broadcast communications operation (Broadcast Communications), which provided digital media management solutions in support of broadcast customers, to an affiliate of The Gores Group, LLC (the Buyer) pursuant to a definitive Asset Sale Agreement entered into December 5, 2012 for \$225 million, including \$160 million in cash, subject to customary adjustments (including a post-closing working capital adjustment, which is currently in arbitration), a \$15 million subordinated promissory note (which was collected in fiscal 2014) and an earnout of up to \$50 million based on future performance. In the arbitration noted above, the current range of possible outcomes is no additional adjustment to the purchase price, based on our calculation of post-closing working capital, on one hand, to an additional downward adjustment of \$67 million to the purchase price, based on the Buyer's claims in its calculation of post-closing working capital, on the other hand. We are not able to determine the likely outcome of the arbitration, but we believe the Buyer's claims in its calculation of post-closing working capital are without merit and its asserted additional downward adjustment to the purchase price is significantly overstated, and we intend to defend against the Buyer's claims and asserted additional downward adjustment to the purchase price vigorously. We expect this arbitration to be concluded in fiscal 2016.

Environmental Matters

We are subject to numerous U.S. Federal, state, local and international environmental laws and regulatory requirements and are involved from time to time in investigations or litigation of various potential environmental issues. We are responsible, or are alleged to be responsible, for ongoing environmental investigation and remediation of multiple sites, including as a result of our acquisition of Exelis. These sites are in various stages of investigation and/or remediation and in some of these proceedings our liability is considered de minimis. We have received notices from the U.S. Environmental Protection Agency (the EPA) or equivalent state or international environmental agencies that a number of sites formerly or currently owned and/or operated by us or companies we have acquired, and other properties or water supplies that may be or have been impacted from those operations, contain disposed or recycled materials or wastes and require environmental investigation and/or remediation. These sites include instances where we have been identified as a potentially responsible party under the Comprehensive Environmental Response, Compensation and Liability Act (commonly known as the Superfund Act) and/or equivalent state and international laws. For example, Exelis received notice in June 2014 from the Department of Justice, Environment and Natural Resources Division, that it may be potentially responsible for contribution to the environmental investigation and remediation of multiple locations in Alaska. In addition, the EPA issued on April 11, 2014 a proposed plan for remedial alternatives to address the cleanup of the lower eight mile stretch of the Passaic River. The EPA estimates the cost for the alternatives will range from \$0.4 billion to \$3.2 billion. The EPA's preferred alternative would involve dredging the river bank to bank and installing an engineered cap at an estimated cost of \$1.7 billion. The EPA is currently evaluating input from a public comment period that ended in August 2014 before it makes its final record of decision, which is expected in our fiscal 2016. Therefore, the ultimate remedial approach and associated costs and the parties who will participate in funding the remediation and their respective allocations have not been determined. We have found no evidence that Exelis contributed any of the primary contaminants of concern to the Passaic River. We intend to vigorously defend ourselves in this matter and we believe our ultimate costs will not be material. Although it is not feasible to predict the outcome of these environmental claims, based on available information, in the opinion of our management, any payments we may be required to make as a result of environmental claims in existence at October 2, 2015 are reserved against, covered by insurance or would not have a material adverse effect on our financial condition, results of operations or cash flows.

Table of Contents

Note Q Condensed Consolidating Financial Statements

On May 29, 2015, we acquired Exelis Inc. and its subsidiaries, and Exelis Inc. became a 100 percent directly owned subsidiary of Harris Corporation. In connection with the acquisition, Harris Corporation fully and unconditionally guaranteed all of the long-term fixed-rate debt securities issued by Exelis Inc. outstanding at the time of the acquisition, which consisted of \$250 million in aggregate principal amount of 4.25% senior notes due October 1, 2016 and \$400 million in aggregate principal amount of 5.55% senior notes due October 1, 2021 (the Exelis Notes). The Exelis Notes are included in our long-term fixed-rate debt in the accompanying Condensed Consolidated Balance Sheet (Unaudited). In addition, Exelis Inc. fully and unconditionally guaranteed all of the long-term fixed-rate debt securities issued by Harris Corporation outstanding at the time of the acquisition, which consisted of nine series of fixed-rate debt securities in an aggregate principal amount of \$3.226 billion. The Exelis Notes are guaranteed only by Harris Corporation, and the nine series of long-term fixed-rate debt securities issued by Harris Corporation are guaranteed only by Exelis Inc. None of our other subsidiaries (including the subsidiaries of Exelis Inc.) is a guarantor of the Exelis Notes or any of the nine series of fixed-rate debt securities issued by Harris Corporation.

The following condensed consolidating financial statements, consisting of condensed consolidating statements of comprehensive income, balance sheets and statements of cash flows, are provided so that separate condensed consolidated financial statements of Harris Corporation and Exelis Inc., the issuers and guarantors as described above, are not required to be filed with the Securities and Exchange Commission. The condensed consolidating financial statements provide information for Harris Corporation, Exelis Inc. and our non-guarantor subsidiaries (including the subsidiaries of Exelis Inc.) for all periods presented to reflect the cross guarantees of our outstanding long-term fixed-rate debt securities as described above. The condensed consolidating financial statements reflect investments in subsidiaries using the equity method of accounting. The consolidating adjustments primarily relate to eliminations of investments in subsidiaries and intercompany transactions and balances. The issuers and guarantors as described above and the non-guarantor subsidiaries are not consistent with our reporting segments; and consequently, this basis of presentation is not included to present our financial condition, results of operations or cash flows for any purpose other than to comply with the specific requirements for guarantor reporting.

The cross guarantees of our outstanding long-term fixed-rate debt securities as described above are subject to being released under customary circumstances, as reflected in the supplemental indentures providing for the cross guarantees filed with the Securities and Exchange Commission as exhibits to our Current Report on Form 8-K filed on June 2, 2015. Moreover, we currently expect that in the second quarter of fiscal 2016, Exelis Inc. will merge with and into Harris Corporation, with Harris Corporation being the surviving entity, and the cross guarantees of our outstanding long-term fixed-rate debt securities as described above will terminate.

Note: The above table reflects the correction of classification errors of \$194 million in goodwill between Harris Parent Co. and Non-Guarantor Subsidiaries, \$126 million in accounts payable between Exelis Parent Co. and Non-Guarantor Subsidiaries and \$25 million in income taxes payable between Harris Parent Co. and Exelis Parent Co., in each case in the Consolidated Balance Sheet for the fiscal year ended July 3, 2015 in Note 26: Condensed Consolidating Financial Statements in our Notes to Consolidated Financial Statements in our Fiscal 2015 Form 10-K. The errors impacted the Goodwill, Accounts payable, Income taxes payable, Investment in subsidiaries and Other capital line items. The errors and corrections did not impact amounts in the Consolidated Total column for any line items or the Company's consolidated financial results.

REVIEW REPORT OF INDEPENDENT REGISTERED CERTIFIED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders of Harris Corporation

We have reviewed the unaudited condensed consolidated balance sheet of Harris Corporation as of October 2, 2015, and the related unaudited condensed consolidated statements of income, comprehensive income, and cash flows for the quarters ended October 2, 2015 and September 26, 2014. These financial statements are the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the unaudited condensed consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Harris Corporation as of July 3, 2015, and the related consolidated statements of income, comprehensive income, cash flows, and equity for the year then ended (not presented herein) and expressed an unqualified opinion on those consolidated financial statements in our report dated August 31, 2015. In our opinion, the accompanying condensed consolidated balance sheet of Harris Corporation as of July 3, 2015, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

OVERVIEW

The following Management's Discussion and Analysis (this MD&A) is intended to assist in an understanding of our financial condition and results of operations. This MD&A is provided as a supplement to, should be read in conjunction with, and is qualified in its entirety by reference to, our Condensed Consolidated Financial Statements (Unaudited) and accompanying Notes appearing elsewhere in this Report. In addition, reference should be made to our audited Consolidated Financial Statements and accompanying Notes to Consolidated Financial Statements and Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations included in our Fiscal 2015 Form 10-K. Except for the historical information contained herein, the discussions in this MD&A contain forward-looking statements that involve risks and uncertainties. Our future results could differ materially from those discussed herein. Factors that could cause or contribute to such differences include, but are not limited to, those discussed below in this MD&A under Forward-Looking Statements and Factors that May Affect Future Results.

The following is a list of the sections of this MD&A, together with our perspective on their contents, which we hope will assist in reading these pages:

Results of Operations – an analysis of our consolidated results of operations and of the results in each of our four business segments, to the extent the segment operating results are helpful to an understanding of our business as a whole, for the periods presented in our Condensed Consolidated Financial Statements (Unaudited).

Liquidity and Capital Resources – an analysis of cash flows, funding of pension plans, common stock repurchases, dividends, capital structure and resources, off-balance sheet arrangements and commercial commitments and contractual obligations.

Critical Accounting Policies and Estimates – information about accounting policies that require critical judgments and estimates and about accounting standards that have been issued, but are not yet effective for us, and their potential impact on our financial position, results of operations and cash flows.

Forward-Looking Statements and Factors that May Affect Future Results – cautionary information about forward-looking statements and a description of certain risks and uncertainties that could cause our actual results to differ materially from our historical results or our current expectations or projections.

As discussed in *Note O – Business Segments* in the Notes, we adjusted our segment reporting in the first quarter of fiscal 2016 to reflect our new organizational structure that was effective at the beginning of fiscal 2016, which resulted in changes to our operating segments, which are also our reportable segments and are referred to as our business segments. As a result of these adjustments, we report the financial results of our operations in the following four business segments:

Communication Systems, serving markets in tactical and airborne radios, night vision technology, and defense and public safety networks;

Space and Intelligence Systems, providing complete earth observation, weather, geospatial, space protection, and intelligence solutions from advanced sensors and payloads, as well as ground processing and information analytics;

Electronic Systems, offering an extensive portfolio of solutions in electronic warfare, avionics, wireless technology, C4I, undersea systems and aerostructures; and

Edgar Filing: HARRIS CORP /DE/ - Form 10-Q

Critical Networks, providing managed services supporting air traffic management, energy and maritime communications, and ground network operation and sustainment, as well as high-value IT and engineering services.

The historical results, discussion and presentation of our business segments as set forth in this Quarterly Report on Form 10-Q reflect the impact of these adjustments for all periods presented. There is no impact on our previously reported consolidated statements of income, balance sheets or statements of cash flows resulting from these adjustments.

RESULTS OF OPERATIONS

Highlights

Our acquisition of Exelis on May 29, 2015 significantly impacted our operating results, as further discussed in the remaining sections of this MD&A. Operations results for the first quarter of fiscal 2016 include:

Revenue increased 56.8 percent to \$1.811 billion in the first quarter of fiscal 2016 from \$1.155 billion in the first quarter of fiscal 2015;

Net income increased 18.4 percent to \$148 million in the first quarter of fiscal 2016 compared with \$125 million in the first quarter of fiscal 2015;

Net income per diluted share was \$1.18 in the first quarter of fiscal 2016, unchanged from the first quarter of fiscal 2015;

Communication Systems revenue increased 16.7 percent to \$454 million and operating income increased 19.0 percent to \$138 million in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015;

Table of Contents

Space and Intelligence Systems revenue increased 71.9 percent to \$435 million and operating income increased 83.8 percent to \$68 million in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015;

Electronic Systems revenue increased 243.1 percent to \$374 million and operating income increased 213.6 percent to \$69 million in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015;

Critical Networks revenue increased 39.1 percent to \$566 million and operating income increased 50.0 percent to \$63 million in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015; and

Net cash provided by operating activities decreased 20.0 percent to \$64 million in the first quarter of fiscal 2016 compared with \$80 million in the first quarter of fiscal 2015.

Consolidated Results of Operations

	Quarter Ended		% Inc/ (Dec)
	October 2, 2015 (Dollars in millions, except per share amounts)	September 26, 2014	
Revenue:

* Not meaningful

Revenue

The increase in revenue in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015 was primarily due to the inclusion in our operating results of revenue from Exelis operations as a result of our acquisition of Exelis in the fourth quarter of fiscal 2015, partially offset by continuing government and energy services revenue weakness in our Critical Networks segment. See the Discussion of Business Segment Results of Operations discussion below in this MD&A for further information.

Gross Margin

The increase in gross margin in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015 was primarily due to the inclusion in our operating results of gross margin from Exelis operations as a result of our acquisition of Exelis in the fourth quarter of fiscal 2015. The decrease in gross margin as a percentage of revenue (gross margin percentage) in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015 was primarily due to a shift in the mix of contract types, toward an increased percentage of lower-margin cost-plus contracts relative to higher-margin fixed price contracts for legacy Harris programs, partially offset by the impact of a slightly higher gross margin percentage for Exelis programs. See the Discussion of Business Segment Results of Operations discussion below in this MD&A for further information.

Table of Contents**Engineering, Selling and Administrative Expenses**

The increase in engineering, selling and administrative (ESA) expenses in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015 was primarily due to the inclusion in our operating results of ESA expenses from Exelis operations as a result of our acquisition of Exelis in the fourth quarter of fiscal 2015, as well as \$23 million of integration and other costs associated with the acquisition. The increase in ESA expenses as a percentage of revenue (ESA percentage) in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015 was primarily due to the \$23 million of integration and other costs noted above associated with our acquisition of Exelis, partially offset by cost savings realized in the first quarter of fiscal 2016 after our acquisition of Exelis. ESA percentage in the first quarter of fiscal 2015 also benefited from our collection of payment on a promissory note in the first quarter of fiscal 2015 related to the sale of our Cyber Integration Center. See the Discussion of Business Segment Results of Operations discussion below in this MD&A for further information.

Net Interest Expense

The increase in net interest expense in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015 was primarily due to higher overall debt levels as a result of our issuance of \$2.4 billion of new debt securities and our borrowing of \$1.3 billion under a new term loan agreement to finance our acquisition of Exelis in the fourth quarter of fiscal 2015. Net interest expense in the first quarter of fiscal 2016 also included \$5 million of net interest expense recognized on the Exelis Notes.

Income Taxes

In the first quarter of fiscal 2016, our effective tax rate (income taxes as a percentage of income before income taxes) benefited from the settlement of several items for amounts that were lower than previously recorded estimates. In the first quarter of fiscal 2015, our effective tax rate benefited from the recognition of foreign tax credits resulting from a dividend paid by a foreign subsidiary during fiscal 2013 that exceeded the U.S. tax liability in respect of the dividend. This resulted in a benefit of approximately \$9 million (approximately 5 percent of income before income taxes) that was recognized in calculating our effective tax rate in the first quarter of fiscal 2015 when the issue was settled with the Internal Revenue Service.

Net income

The increase in net income in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015 was primarily due to an increase in operating income from the inclusion in our operating results of Exelis operations as a result of our acquisition of Exelis in the fourth quarter of fiscal 2015 (higher gross margin partially offset by higher ESA expenses, which included integration and other costs associated with the acquisition), partially offset by an increase in our net interest expense, as noted above in this MD&A.

Net income per diluted common share

There was no change in net income per diluted common share in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015. The increase in net income as noted above in this MD&A was offset by an increase in our average common shares outstanding as a result of approximately 19 million shares issued in connection with our acquisition of Exelis.

Discussion of Business Segment Results of Operations**Communication Systems Segment**

	Quarter Ended		%
	October 2, 2015	September 26, 2014 (Dollars in millions)	Inc/ (Dec)
Revenue	\$ 454	\$ 389	16.7 %
Cost of product sales and services	(217)	(186)	16.7 %
Gross margin	237	203	16.7 %

Edgar Filing: HARRIS CORP /DE/ - Form 10-Q

<i>% of revenue</i>	52.2 %	52.2 %	
ESA expenses	(99)	(87)	13.8 %
<i>% of revenue</i>	21.8 %	22.4 %	
Segment operating income	\$ 138	\$ 116	19.0 %

% of revenue 30.4 % 29.8 %
 The increases in segment revenue, gross margin, ESA expenses and operating income in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015 were primarily due to the inclusion in segment operating results of Exelis operations (principally ground and airborne tactical radio and night vision operations) as a result of our acquisition of Exelis in the fourth quarter of fiscal 2015.

Table of Contents

The overall increase in segment revenue also reflected higher legacy Harris tactical communications revenue, including higher revenue from Department of Defense (DoD) customers, which was more than offset by lower revenue in the public safety and professional communications markets due to continued competitive pressures. Revenue in the first quarter of fiscal 2016 also reflected expected revenue weakness from Exelis tactical and night vision product lines. Segment gross margin percentage was unchanged in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015 as improvement in gross margin percentage from favorable mix among legacy Harris products and programs was offset by the impact of a lower gross margin percentage for Exelis programs. The decrease in segment ESA percentage in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015 was due to the impact of a lower ESA percentage for Exelis operations. The increases in segment operating income and operating margin as a percentage of revenue (operating margin percentage) in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015 reflected the items discussed above regarding this segment.

Space and Intelligence Systems Segment

	Quarter Ended		% Inc/ (Dec)
	October 2, 2015	September 26, 2014	
	(Dollars in millions)		
Revenue	\$ 435	\$ 253	71.9 %
Cost of product sales and services	(313)	(183)	71.0 %
Gross margin	122	70	74.3 %
<i>% of revenue</i>	<i>28.0 %</i>	<i>27.7 %</i>	
ESA expenses	(54)	(33)	63.6 %
<i>% of revenue</i>	<i>12.4 %</i>	<i>13.0 %</i>	
Segment operating income	\$ 68	\$ 37	83.8 %
<i>% of revenue</i>	<i>15.6 %</i>	<i>14.6 %</i>	

The increases in segment revenue, gross margin, ESA expenses and operating income in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015 were primarily due to the inclusion in segment operating results of Exelis operations (principally geospatial intelligence solutions; integrated sensing and information systems; environmental intelligence; precision instruments and position, navigation and timing; and command, control and communication systems operations) as a result of our acquisition of Exelis in the fourth quarter of fiscal 2015.

The overall increase in segment revenue also reflected lower revenue from the completion of certain classified programs and a commercial space payload program, partially offset by higher revenue from certain other classified programs, including the Foundation GEOINT Content Management (FGCM) program. The slight increase in segment gross margin percentage in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015 was due to the impact of a higher gross margin percentage for Exelis programs, partially offset by a less favorable mix among legacy Harris intelligence and space payload programs. The decrease in segment ESA percentage in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015 was primarily due to the impact of a lower ESA percentage for Exelis operations. The increases in segment operating income and operating margin percentage in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015 reflected the items discussed above regarding this segment.

Table of Contents**Electronic Systems Segment**

	Quarter Ended		% Inc/ (Dec)
	October 2, 2015	September 26, 2014 (Dollars in millions)	
Revenue	\$ 374	\$ 109	243.1 %
Cost of product sales and services	(265)	(77)	244.2 %
Gross margin	109	32	240.6 %
<i>% of revenue</i>	29.1 %	29.4 %	
ESA expenses	(40)	(10)	300.0 %
<i>% of revenue</i>	10.7 %	9.2 %	
Segment operating income	\$ 69	\$ 22	213.6 %
<i>% of revenue</i>	18.4 %	20.2 %	

The increases in segment revenue, gross margin, ESA expenses and operating income in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015 were primarily due to the inclusion in segment operating results of Exelis operations (principally integrated electronic warfare systems; radar, reconnaissance and undersea systems; electronic attack and release systems; specialty applications; and composites operations) as a result of our acquisition of Exelis in the fourth quarter of fiscal 2015.

The overall increase in segment revenue also reflected higher revenue in avionics from the continuing ramp-up of the F-35 Joint Strike Fighter program. Revenue in the first quarter of fiscal 2016 also reflected revenue softness in electronic warfare based on the mix of programs in the development phase versus the production phase. The slight decrease in segment gross margin percentage in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015 was primarily due to contract mix changes for legacy Harris programs, partially offset by the impact of a slightly higher gross margin percentage for Exelis programs. The increase in segment ESA percentage in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015 was primarily due to the impact of a higher ESA percentage for Exelis operations. The increase in segment operating income and decrease in segment operating margin percentage in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015 reflected the items discussed above regarding this segment.

Critical Networks Segment

	Quarter Ended		% Inc/ (Dec)
	October 2, 2015	September 26, 2014 (Dollars in millions)	
Revenue	\$ 566	\$ 407	39.1 %
Cost of product sales and services	(443)	(321)	38.0 %
Gross margin	123	86	43.0 %
<i>% of revenue</i>	21.7 %	21.1 %	
ESA expenses	(60)	(44)	36.4 %
<i>% of revenue</i>	10.6 %	10.8 %	
Segment operating income	\$ 63	\$ 42	50.0 %
<i>% of revenue</i>	11.1 %	10.3 %	

Edgar Filing: HARRIS CORP /DE/ - Form 10-Q

The increases in segment revenue, gross margin, ESA expenses and operating income in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015 were primarily due to the inclusion in segment operating results of Exelis operations (principally civil and aerospace systems; command, control and communication systems; and advanced information solutions operations) as a result of our acquisition of Exelis in the fourth quarter of fiscal 2015.

The overall increase in segment revenue also reflected continuing government and energy services revenue weakness. The increase in segment gross margin percentage in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015 was primarily due to the impact of a higher gross margin percentage for Exelis programs, partially offset by the impact of the ending of the higher-margin Navy/Marine Corps Intranet (NMCI) program. The slight decrease in segment ESA percentage in the first quarter of fiscal 2016 compared with

Table of Contents

the first quarter of fiscal 2015 was primarily due to cost savings driven by operational excellence initiatives. The increases in segment operating income and operating margin percentage in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015 reflected the items discussed above regarding this segment.

Unallocated Corporate Expense and Corporate Eliminations

	Quarter Ended		% Inc/ (Dec)
	October 2, 2015	September 26, 2014 (Dollars in millions)	
Unallocated corporate expense	\$ 75	\$ 17	341.2 %
Corporate eliminations	1	2	(50.0)%

The increase in unallocated corporate expense the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015 was primarily due to additional corporate expense as a result of our acquisition of Exelis in the fourth quarter of fiscal 2015, including \$33 million of amortization of intangible assets acquired and \$23 million of integration and other costs. In connection with our acquisition of Exelis, we identified approximately \$1.6 billion of intangible assets. Because the acquisition benefited our entire Company as opposed to any individual segments, we recorded these intangible assets as Corporate assets and the related amortization expense as unallocated corporate expense.

LIQUIDITY AND CAPITAL RESOURCES**Cash Flows**

	Quarter Ended	
	October 2, 2015	September 26, 2014 (In millions)
Net cash provided by operating activities	\$ 64	\$ 80
Net cash used in investing activities	(24)	(34)
Net cash used in financing activities	(192)	(150)
Effect of exchange rate changes on cash and cash equivalents	(9)	(8)
Net decrease in cash and cash equivalents	(161)	(112)
Cash and cash equivalents, beginning of year	481	561
Cash and cash equivalents, end of quarter	\$ 320	\$ 449

Cash and cash equivalents: The \$161 million decrease in cash and cash equivalents from the end of fiscal 2015 to October 2, 2015 (the end of the first quarter of fiscal 2016) was primarily due to \$173 million used for repayments of borrowings, which included \$150 million of cash used to repay principal on our term loans (\$117 million of voluntary prepayments of principal and \$33 million of scheduled principal repayments), \$64 million used to pay cash dividends, and \$24 million used for net additions of property, plant and equipment, partially offset by \$64 million of net cash provided by operating activities, \$41 million of proceeds from borrowings and \$19 million of proceeds from exercises of employee stock options. The \$112 million decrease in cash and cash equivalents from the end of fiscal 2014 to September 26, 2014 (the end of the first quarter of fiscal 2015) was primarily due to \$100 million used to repurchase shares of our common stock, \$50 million used to pay cash dividends and \$41 million used for additions of property, plant and equipment, partially offset by \$80 million of net cash provided by operating activities, \$18 million of proceeds from exercises of employee stock options and \$7 million of proceeds from our collection of payment on the note received as part of the sale of our Cyber Integration Center.

At October 2, 2015, we had cash and cash equivalents of \$320 million, and we have a senior unsecured \$1 billion revolving credit facility that expires in July 2020 (all of which was available to us as of October 2, 2015). However, we had approximately \$5 billion of long-term debt outstanding at October 2, 2015, the majority of which we incurred in connection with our acquisition of Exelis in the fourth quarter of fiscal 2015. For further information regarding our long-term debt, see Note 13: Long-Term Debt in our Notes to Consolidated Financial Statements in our Fiscal 2015 Form 10-K. Additionally, we had net unfunded pension obligations of approximately \$1.9 billion at October 2, 2015, primarily

Edgar Filing: HARRIS CORP /DE/ - Form 10-Q

as a result of the Exelis acquisition. Our \$320 million of cash and cash equivalents at October 2, 2015 included \$268 million held by our foreign subsidiaries, of which only \$87 million was considered permanently reinvested. Of the \$87 million considered permanently reinvested, \$40 million was available for use in the U.S. without incurring additional U.S. income taxes, and we would be required to recognize U.S. income taxes of \$17 million on the remaining \$47 million if we were to repatriate such funds to the U.S., but we have no current plans to repatriate such funds.

Table of Contents

Accumulated other comprehensive loss increased \$32 million, to \$48 million at the end of the first quarter of fiscal 2016 from \$16 million at the end of fiscal 2015, primarily due to the impact of exchange rate changes, reflecting the strength of the U.S. dollar relative to the Canadian Dollar, British Pound, Australian Dollar, Norwegian Krone and Brazilian Real. See *Note M – Derivative Instruments and Hedging Activities* in the Notes for further information.

Given our current cash position, outlook for funds generated from operations, credit ratings, available credit facility, cash needs and debt structure, we have not experienced, and do not expect to experience, any material issues with liquidity, although we can give no assurances concerning our future liquidity, particularly in light of our overall level of indebtedness and unfunded pension liability, U.S. Government budget uncertainties and the state of global commerce and financial uncertainty.

We also currently believe that existing cash, funds generated from operations, our credit facility and access to the public and private debt and equity markets will be sufficient to provide for our anticipated working capital requirements, capital expenditures, dividend payments, repayment of our term loans and pension contributions for the next 12 months and reasonably foreseeable future thereafter. Our total capital expenditures in fiscal 2016 are expected to be approximately \$200 million. We anticipate tax payments over the next three years to be approximately equal to our tax expense for the same period. Other than those cash outlays noted in the *Commercial Commitments and Contractual Obligations* discussion below in this MD&A, capital expenditures, dividend payments, payments under our term loans and pension contributions, no other significant cash outlays are anticipated during the remainder of fiscal 2016.

There can be no assurance, however, that our business will continue to generate cash flows at current levels or that the cost or availability of future borrowings, if any, under our commercial paper program or our credit facility or in the debt markets will not be impacted by any potential future credit and capital markets disruptions. If we are unable to maintain cash balances or generate sufficient cash flow from operations to service our obligations, we may be required to sell assets, reduce capital expenditures, reduce or eliminate strategic acquisitions, reduce or terminate our share repurchases, reduce or eliminate dividends, refinance all or a portion of our existing debt or obtain additional financing. Our ability to make principal payments or pay interest on or refinance our indebtedness depends on our future performance and financial results, which, to a certain extent, are subject to general conditions in or affecting the defense, government and other markets we serve and to general economic, political, financial, competitive, legislative and regulatory factors beyond our control.

Net cash provided by operating activities: The decrease in net cash provided by operating activities in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015 was primarily due to the impact of an increase in inventory, pension contributions and a reduction in accounts payable and accrued expenses, partially offset by a decrease in accounts receivable.

Net cash used in investing activities: The decrease in net cash used in investing activities in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015 was primarily due to \$15 million less used for additions of property, plant and equipment in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015.

Net cash used in financing activities: The increase in net cash used in financing activities in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015 was primarily due to \$164 million more used for repayments of borrowings, which included \$150 million of cash used to repay principal on our term loans (\$117 million of voluntary prepayments of principal and \$33 million of scheduled principal repayments), as noted above, and \$14 million more used to pay cash dividends, partially offset by \$100 million less of repurchases of our common stock under our repurchase program (there were no repurchases of our common stock under our repurchase program in the first quarter of fiscal 2016) and \$38 million more of proceeds from borrowings.

Funding of Pension Plans

Funding requirements under applicable laws and regulations are a major consideration in making contributions to our U.S. pension plans. Although we have significant discretion in making voluntary contributions, the Employee Retirement Income Security Act of 1974, as amended by the Pension Protection Act of 2006 and further amended by the Worker, Retiree, and Employer Recovery Act of 2008, the Moving Ahead for Progress in the 21st Century Act (MAP-21) and applicable Internal Revenue Code regulations mandate minimum funding thresholds. Failure to satisfy the minimum funding thresholds could result in restrictions on our ability to amend the plan or make benefit payments. With respect to U.S. qualified pension plans, we intend to contribute annually not less than the required minimum funding thresholds.

The Highway and Transportation Funding Act of 2014 (HATFA), which was signed into law on August 8, 2014, modified the interest rate stabilization provision of MAP-21. During the first quarter of fiscal 2016, we made total contributions of \$61 million to our U.S. qualified defined benefit pension plans. We currently anticipate making additional contributions to our U.S. qualified defined benefit pension plans of approximately \$112 million during the remainder of fiscal 2016.

Table of Contents

Future required contributions will depend primarily on the actual annual return on assets and the discount rate used to measure the benefit obligation at the end of each year. Depending on these factors, and the resulting funded status of our pension plans, the level of future statutory minimum contributions could be material. See Note 14: Pension and Other Postretirement Benefits in our Notes to Consolidated Financial Statements in our Fiscal 2015 Form 10-K and *Note 1 Postretirement Benefit Plans* in the Notes for further information regarding our pension plans.

Common Stock Repurchases

During the first quarter of fiscal 2016, we did not repurchase any shares of our common stock under our repurchase program. During the first quarter of fiscal 2015, we used \$100 million to repurchase 1,432,265 shares of our common stock under our repurchase program at an average price per share of \$69.82, including commissions. Shares repurchased by us are cancelled and retired.

As of October 2, 2015, we had a remaining, unused authorization of approximately \$684 million under our repurchase program, which does not have a stated expiration date. The level of our repurchases depends on a number of factors, including our financial condition, capital requirements, cash flows, results of operations, future business prospects and other factors our Board of Directors may deem relevant. Repurchases are expected to be funded with available cash and commercial paper and may be made through open market purchases, private transactions, transactions structured through investment banking institutions or any combination thereof. The timing, volume and nature of repurchases are subject to market conditions, applicable securities laws and other factors and are at our discretion and may be suspended or discontinued at any time. Additional information regarding our repurchase program is set forth in this Report under Part II. Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Dividends

On August 28, 2015, our Board of Directors increased the quarterly cash dividend rate on our common stock from \$.47 per share to \$.50 per share, for an annualized cash dividend rate of \$2.00 per share, which was our fourteenth consecutive annual increase in our quarterly cash dividend rate. Our annualized cash dividend rate was \$1.88 per share in fiscal 2015. There can be no assurances that our annualized cash dividend rate will continue to increase. Quarterly cash dividends are typically paid in March, June, September and December. We currently expect that cash dividends will continue to be paid in the near future, but we can give no assurances concerning payment of future dividends. The declaration of dividends and the amount thereof will depend on a number of factors, including our financial condition, capital requirements, cash flows, results of operations, future business prospects and other factors that our Board of Directors may deem relevant.

Capital Structure and Resources

2015 Credit Agreement: We have a \$1 billion 5-year senior unsecured revolving credit facility (the 2015 Credit Facility) under a Revolving Credit Agreement (the 2015 Credit Agreement) entered into on July 1, 2015 with a syndicate of lenders. For a description of the 2015 Credit Facility and the 2015 Credit Agreement, see Note 11: Credit Arrangements in our Notes to Consolidated Financial Statements in our Fiscal 2015 Form 10-K.

We were in compliance with the covenants in the 2015 Credit Agreement at October 2, 2015, including the covenant requiring that we not permit our ratio of consolidated total indebtedness to total capital, each as defined in the 2015 Credit Agreement, to be greater than 0.675 to 1.00 from and including May 29, 2015 until and including February 29, 2016 and 0.65 to 1.00 thereafter. At October 2, 2015, we had no borrowings outstanding under the 2015 Credit Agreement.

Long-Term Debt: For a description of our long-term variable-rate and fixed-rate debt, see Note 13: Long-Term Debt in our Notes to Consolidated Financial Statements in our Fiscal 2015 Form 10-K.

Short-Term Debt: Our short-term debt at October 2, 2015 and July 3, 2015 was \$50 million and \$33 million, respectively, and consisted of local borrowing by international subsidiaries for working capital needs and commercial paper at October 2, 2015, and local borrowing by international subsidiaries for working capital needs at July 3, 2015. Our commercial paper program was supported at October 2, 2015 by the 2015 Credit Facility.

Other: We have an automatically effective, universal shelf registration statement, filed with the SEC on February 27, 2013, related to the potential future issuance of an indeterminate amount of securities, including debt securities, preferred stock, common stock, fractional interests in preferred stock represented by depositary shares and warrants to purchase debt securities, preferred stock or common stock.

Table of Contents

Off-Balance Sheet Arrangements

In accordance with the definition under SEC rules, any of the following qualify as off-balance sheet arrangements:

Any obligation under certain guarantee contracts;

A retained or contingent interest in assets transferred to an unconsolidated entity or similar arrangement that serves as credit, liquidity or market risk support to that entity for such assets;

Any obligation, including a contingent obligation, under certain derivative instruments; and

Any obligation, including a contingent obligation, under a material variable interest held by the registrant in an unconsolidated entity that provides financing, liquidity, market risk or credit risk support to the registrant, or engages in leasing, hedging or research and development services with the registrant.

As of October 2, 2015, we were not participating in any material transactions that generate relationships with unconsolidated entities or financial partnerships, including variable interest entities, and we did not have any material retained or contingent interest in assets as defined above. As of October 2, 2015, we did not have any such material financial guarantees or other contractual commitments that are reasonably likely to adversely affect our results of operations, financial condition or cash flows. In addition, we are not currently a party to any related party transactions that materially affect our results of operations, financial condition or cash flows.

We have, from time to time, divested certain of our businesses and assets. In connection with these divestitures, we often provide representations, warranties and/or indemnities to cover various risks and unknown liabilities, such as environmental liabilities and tax liabilities. We cannot estimate the potential liability from such representations, warranties and indemnities because they relate to unknown conditions. We do not believe, however, that the liabilities relating to these representations, warranties and indemnities will have a material adverse effect on our results of operations, financial condition or cash flows.

Due to our downsizing of certain operations pursuant to acquisitions, restructuring plans or otherwise, certain properties leased by us have been sublet to third parties. In the event any of these third parties vacates any of these premises, we would be legally obligated under master lease arrangements. We believe that the financial risk of default by such sublessees is individually and in the aggregate not material to our results of operations, financial condition or cash flows.

Commercial Commitments and Contractual Obligations

The amounts disclosed in our Fiscal 2015 Form 10-K include our contractual obligations and commercial commitments. During the first quarter of fiscal 2016, no material changes occurred in our contractual cash obligations to repay debt, to purchase goods and services and to make payments under operating leases or our commercial commitments and contingent liabilities on outstanding surety bonds, standby letters of credit and other arrangements as disclosed in our Fiscal 2015 Form 10-K.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Our Condensed Consolidated Financial Statements (Unaudited) and accompanying Notes are prepared in accordance with U.S. GAAP. Preparing financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses as well as disclosures of contingent assets and liabilities. Actual results may differ from our estimates. These estimates and assumptions are affected by the application of our accounting policies. Our significant accounting policies are described in Note 1: Significant Accounting Policies in our Notes to Consolidated Financial Statements included in our Fiscal 2015 Form 10-K. Critical accounting policies and estimates are those that require application of management's most difficult, subjective or complex judgments, often as a result of matters that are inherently uncertain and may change in subsequent periods. Critical accounting policies and estimates for us include: (i) revenue recognition on contracts and contract estimates (discussed in greater detail in the following paragraphs), (ii) postretirement benefit plans, (iii) provisions for excess and obsolete inventory losses, (iv) impairment testing of goodwill, and (v) income taxes and tax valuation allowances. For additional discussion of our critical accounting policies and estimates, see the Critical Accounting Policies and Estimates discussion in Item 7.

Management's Discussion and Analysis of Financial Condition and Results of Operations in our Fiscal 2015 Form 10-K.

Revenue Recognition

A significant portion of our business is derived from development and production contracts. Revenue and profits related to development and production contracts are recognized using the percentage-of-completion method, generally based on the ratio of costs incurred to estimated total costs at completion (i.e., the cost-to-cost method) or the ratio of actual units delivered to estimated total units to be delivered under the contract (i.e., the units-of-delivery method) with consideration given for risk of performance and estimated profit. The majority of the revenue in our Space and Intelligence Systems and Electronic Systems segments (and to a lesser extent, revenue in our Critical Networks and Communication Systems segments) relates to development and production contracts, and the percentage-of-completion method of revenue recognition is primarily used for these contracts. Change orders, claims or other

Table of Contents

items that may change the scope of a development and production contract are included in contract value only when the value can be reliably estimated and realization is probable. Possible incentives or penalties and award fees applicable to performance on development and production contracts are considered in estimating contract value and profit rates and are recorded when there is sufficient information to assess anticipated contract performance. Incentive provisions that increase earnings based solely on a single significant event generally are not recognized until the event occurs.

Under the percentage-of-completion method of accounting, a single estimated total profit margin is used to recognize profit for each development and production contract over its period of performance. Recognition of profit on development and production fixed-price contracts requires estimates of the total cost at completion and the measurement of progress toward completion. The estimated profit or loss on a development and production contract is equal to the difference between the estimated contract value and the estimated total cost at completion. Due to the long-term nature of many of our programs, developing the estimated total cost at completion often requires judgment. Factors that must be considered in estimating the cost of the work to be completed include the nature and complexity of the work to be performed, subcontractor performance, the risk and impact of delayed performance, availability and timing of funding from the customer and the recoverability of any claims outside the original development and production contract included in the estimate to complete. At the outset of each contract, we gauge its complexity and perceived risks and establish an estimated total cost at completion in line with these expectations. After establishing the estimated total cost at completion, we follow a standard estimate at completion process in which management reviews the progress and performance on our ongoing development and production contracts at least quarterly and, in many cases, more frequently. If we successfully retire risks associated with the technical, schedule and cost aspects of a contract, we may lower our estimated total cost at completion commensurate with the retirement of these risks. Conversely, if we are not successful in retiring these risks, we may increase our estimated total cost at completion. Additionally, at the outset of a cost-reimbursable contract (for example, contracts containing award or incentive fees), we establish an estimated total contract value, or revenue, based on our expectation of performance on the contract. As the cost-reimbursable contract progresses, our estimated total contract value may increase or decrease if, for example, we receive higher or lower than expected award fees. When adjustments in estimated total costs at completion or in estimated total contract value are determined, the related impact to operating income is recognized using the cumulative catch-up method, which recognizes in the current period the cumulative effect of such adjustments for all prior periods. Anticipated losses on development and production contracts or programs in progress are charged to operating income when identified. We have not made any material changes in the methodologies used to recognize revenue on development and production contracts or to estimate our costs related to development and production contracts in the past three fiscal years.

Estimate at completion adjustments had the following impacts to operating income for the periods presented:

	Quarter Ended	
	October 2, 2015	September 26, 2014
	(Dollars in millions)	
Favorable adjustments	\$ 47	\$ 32
Unfavorable adjustments	(30)	(10)
Net operating income adjustments	\$ 17	\$ 22

The increase in the favorable and unfavorable impacts to operating income due to estimate at completion adjustments in the first quarter of fiscal 2016 compared with the first quarter of fiscal 2015 reflected the inclusion of adjustments in respect of Exelis operations as a result of our acquisition of Exelis in the fourth quarter of fiscal 2015. There were no individual impacts to operating income due to estimate at completion adjustments in the first quarter of fiscal 2016 or 2015 that were material to our results of operations on a consolidated or segment basis for such periods.

We also recognize revenue from arrangements requiring the delivery or performance of multiple deliverables or elements under a bundled sale. In these arrangements, judgment is required to determine the appropriate accounting, including whether the individual deliverables represent separate units of accounting for revenue recognition purposes, and the timing of revenue recognition for each deliverable. If we determine that individual deliverables represent separate units of accounting, we recognize the revenue associated with each unit of accounting separately, and contract revenue is allocated among the separate units of accounting at the inception of the arrangement based on relative selling price. If options or change orders materially change the scope of work or price of the contract subsequent to inception, we reevaluate and adjust our prior conclusions regarding units of accounting and allocation of contract revenue as necessary. The allocation of selling price among the separate units of accounting may impact the timing of revenue recognition, but will not change the total revenue recognized on the arrangement. We establish the selling price used for each deliverable based on the vendor-specific objective evidence (VSOE) of selling price, or third-party evidence (TPE) of selling price if VSOE of selling price is not available, or best estimate of selling price (BESP) if neither VSOE of selling price

nor TPE of selling price is available. In determining VSOE of selling price, a substantial majority of the recent standalone sales of the deliverable

Table of Contents

must be priced within a relatively narrow range. In determining TPE of selling price, we evaluate competitor prices for similar deliverables when sold separately. Generally, comparable pricing of our products to those of our competitors with similar functionality cannot be obtained. In determining BESP, we consider both market data and entity-specific factors, including market conditions, the geographies in which our products are sold, our competitive position and strategy, and our profit objectives.

Impact of Recently Issued Accounting Standards

Accounting standards that have been recently issued, but not yet effective for us, are described in *Note A Significant Accounting Policies and Recent Accounting Standards* in the Notes, which describes the potential impact that these standards are expected to have on our financial position, results of operations and cash flows.

FORWARD-LOOKING STATEMENTS AND FACTORS THAT MAY AFFECT FUTURE RESULTS

This Report contains forward-looking statements that involve risks and uncertainties, as well as assumptions that, if they do not materialize or prove to be correct, could cause our results to differ materially from those expressed in or implied by such forward-looking statements. All statements other than statements of historical fact are statements that could be deemed forward-looking statements, including, but not limited to, statements concerning: our plans, strategies and objectives for future operations; new products, systems, technologies, services or developments; future economic conditions, performance or outlook; the outcome of contingencies; the potential level of share repurchases or dividends; potential acquisitions or divestitures; the value of our contract awards and programs; expected cash flows or capital expenditures; our beliefs or expectations; activities, events or developments that we intend, expect, project, believe or anticipate will or may occur in the future; and assumptions underlying any of the foregoing. Forward-looking statements may be identified by their use of forward-looking terminology, such as believes, expects, may, should, would, will, intends, plans, estimates, anticipates, projects and similar words or expressions. Do not place undue reliance on these forward-looking statements, which reflect our management's opinions only as of the date of the filing of this Report and are not guarantees of future performance or actual results. Forward-looking statements are made in reliance on the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended (the Securities Act), and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act). The following are some of the factors we believe could cause our actual results to differ materially from our historical results or our current expectations or projections:

We depend on U.S. Government customers for a significant portion of our revenue, and the loss of these relationships, a reduction in U.S. Government funding or a change in U.S. Government spending priorities could have an adverse impact on our business, financial condition, results of operations and cash flows.

We depend significantly on U.S. Government contracts, which often are only partially funded, subject to immediate termination, and heavily regulated and audited. The termination or failure to fund, or negative audit findings for, one or more of these contracts could have an adverse impact on our business, financial condition, results of operations and cash flows.

We could be negatively impacted by a security breach, through cyber attack, cyber intrusion or otherwise, or other significant disruption of our IT networks and related systems or of those we operate for certain of our customers.

The level of returns on defined benefit plan assets, changes in interest rates and other factors could affect our earnings and cash flows in future periods.

We enter into fixed-price contracts that could subject us to losses in the event of cost overruns or a significant increase in inflation.

We use estimates in accounting for many of our programs and changes in our estimates could adversely affect our future financial results.

Edgar Filing: HARRIS CORP /DE/ - Form 10-Q

We derive a significant portion of our revenue from international operations and are subject to the risks of doing business internationally, including fluctuations in currency exchange rates.

Our reputation and ability to do business may be impacted by the improper conduct of our employees, agents or business partners.

We may not be successful in obtaining the necessary export licenses to conduct certain operations abroad, and Congress may prevent proposed sales to certain foreign governments.

The continued effects of the general weakness in the global economy and the U.S. Government's budget deficits and national debt and sequestration could have an adverse impact on our business, financial condition, results of operations and cash flows.

Our future success will depend on our ability to develop new products, systems, services and technologies that achieve market acceptance in our current and future markets.

We participate in markets that are often subject to uncertain economic conditions, which makes it difficult to estimate growth in our markets and, as a result, future income and expenditures.

Table of Contents

We cannot predict the consequences of future geo-political events, but they may adversely affect the markets in which we operate, our ability to insure against risks, our operations or our profitability.

We have made, and may continue to make, strategic acquisitions and divestitures that involve significant risks and uncertainties.

Disputes with our subcontractors and the inability of our subcontractors to perform, or our key suppliers to timely deliver our components, parts or services, could cause our products or services to be produced or delivered in an untimely or unsatisfactory manner.

Third parties have claimed in the past and may claim in the future that we are infringing directly or indirectly upon their intellectual property rights, and third parties may infringe upon our intellectual property rights.

The outcome of litigation or arbitration in which we are involved is unpredictable and an adverse decision in any such matter could have a material adverse effect on our financial condition, results of operations and cash flows.

We face certain significant risk exposures and potential liabilities that may not be covered adequately by insurance or indemnity.

Changes in our effective tax rate may have an adverse effect on our results of operations.

Our level of indebtedness and our ability to make payments on or service our indebtedness and our unfunded pension liability may adversely affect our financial and operating activities or our ability to incur additional debt.

A downgrade in our credit ratings could materially adversely affect our business.

Unforeseen environmental issues could have a material adverse effect on our business, financial condition, results of operations and cash flows.

We have significant operations in locations that could be materially and adversely impacted in the event of a natural disaster or other significant disruption.

Changes in the regulatory framework under which our managed satellite and terrestrial communications solutions operations are operated could adversely affect our business, financial condition, results of operations and cash flows.

We rely on third parties to provide satellite bandwidth for our managed satellite and terrestrial communications solutions, and any bandwidth constraints could harm our business, financial condition, results of operations and cash flows.

Changes in future business or other market conditions could cause business investments and/or recorded goodwill or other long-term assets to become impaired, resulting in substantial losses and write-downs that would adversely affect our results of operations.

Edgar Filing: HARRIS CORP /DE/ - Form 10-Q

Some of our workforce is represented by labor unions, so our business could be harmed in the event of a prolonged work stoppage.

We must attract and retain key employees, and failure to do so could seriously harm us.

We may be responsible for U.S. Federal income tax liabilities that relate to the spin-off of Vectrus, Inc. (Vectrus) completed by Exelis.

In connection with the Vectrus spin-off, Vectrus indemnified Exelis for certain liabilities and Exelis indemnified Vectrus for certain liabilities. This indemnity may not be sufficient to insure us against the full amount of the liabilities assumed by Vectrus and Vectrus may be unable to satisfy its indemnification obligations to us in the future.

The Vectrus spin-off may expose us to potential liabilities arising out of state and Federal fraudulent conveyance laws and legal distribution requirements.

The ITT Corporation (ITT) spin-off of Exelis may expose us to potential liabilities arising out of state and Federal fraudulent conveyance laws and legal distribution requirements.

If we are required to indemnify ITT or Xylem, Inc. (Xylem) in connection with the ITT spin-off of Exelis, we may need to divert cash to meet those obligations and our financial results could be negatively impacted.

Additional details and discussions concerning some of the factors that could affect our forward-looking statements or future results are set forth in our Fiscal 2015 Form 10-K under Item 1A. Risk Factors and in Part II. Item 1A Risk Factors in this Report. The foregoing list of factors and the factors set forth in Item 1A. Risk Factors included in our Fiscal 2015 Form 10-K and in Part II. Item 1A. Risk Factors in this Report are not exhaustive. Additional risks and uncertainties not known to us or that we currently believe not to be material also may adversely impact our business, financial condition, results of operations and cash flows. Should any risks or uncertainties develop into actual events, these developments could have a material adverse effect on our business,

Table of Contents

financial condition, results of operations and cash flows. The forward-looking statements contained in this Report are made as of the date hereof and we disclaim any intention or obligation, other than imposed by law, to update or revise any forward-looking statements or to update the reasons actual results could differ materially from those projected in the forward-looking statements, whether as a result of new information, future events or developments or otherwise.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

In the normal course of doing business, we are exposed to risks associated with foreign currency exchange rates and changes in interest rates. We employ established policies and procedures governing the use of financial instruments to manage our exposure to such risks.

Foreign Exchange and Currency: We use foreign currency forward contracts and options to hedge both balance sheet and off-balance sheet future foreign currency commitments. Factors that could impact the effectiveness of our hedging programs for foreign currency include accuracy of sales estimates, volatility of currency markets and the cost and availability of hedging instruments. A 10 percent change in currency exchange rates for our foreign currency derivatives held at October 2, 2015 would not have had a material impact on the fair value of such instruments or our results of operations or cash flows. This quantification of exposure to the market risk associated with foreign currency financial instruments does not take into account the offsetting impact of changes in the fair value of our foreign denominated assets, liabilities and firm commitments. See *Note M Derivative Instruments and Hedging Activities* in the Notes for additional information.

Interest Rates: As of October 2, 2015, we had long-term fixed-rate debt obligations. The fair value of these obligations is impacted by changes in interest rates; however, a 10 percent change in interest rates for our long-term fixed-rate debt obligations at October 2, 2015 would not have had a material impact on the fair value of these obligations. Additionally, there is no interest-rate risk associated with these obligations on our results of operations and cash flows, because the interest rates are fixed, and because our long-term fixed-rate debt is not putable to us (required to be redeemed by us prior to maturity). We can give no assurances, however, that interest rates will not change significantly or have a material effect on the fair value of our long-term debt obligations over the next twelve months.

As of October 2, 2015, we also had long-term variable-rate debt obligations of \$1.12 billion under our senior unsecured term loan facility in connection with our acquisition of Exelis, comprised of term loans of \$500 million in a 3-year tranche and \$617 million in a 5-year tranche. These term loans bear interest that is variable based on certain short-term indices, thus exposing us to interest-rate risk; however, a 10 percent change in interest rates for these term loans would not have had a material impact on our results of operations or cash flows. For each tranche of term loans, we are required to make quarterly principal amortization payments equal to 2.50 percent of the \$650 million initial principal amount of such tranche of the term loans. We have the ability at any time or from time to time, to voluntarily prepay term loans of either tranche in whole or in part without premium or penalty. We made \$117 million of voluntary repayments of principal on the 3-year tranche term loan during the first quarter of fiscal 2016.

Item 4. Controls and Procedures.

(a) *Evaluation of Disclosure Controls and Procedures:* We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms. Our disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in our reports filed or submitted under the Exchange Act is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can provide only reasonable assurance of achieving their control objectives, and management necessarily is required to use its judgment in evaluating the cost-benefit relationship of possible controls and procedures. As required by Rule 13a-15 under the Exchange Act, as of the end of the first quarter of fiscal 2016, we carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures. This evaluation was carried out under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer. Based on this work and other evaluation procedures, our management, including our Chief Executive Officer and our Chief Financial Officer, has concluded that as of the end of the first quarter of fiscal 2016 our disclosure controls and procedures were effective.

(b) *Changes in Internal Control:* We periodically review our internal control over financial reporting as part of our efforts to ensure compliance with the requirements of Section 404 of the Sarbanes-Oxley Act of 2002. In addition, we routinely review our system of internal control over financial reporting to identify potential changes to our processes and systems that may improve controls and increase efficiency, while ensuring that we maintain an effective internal control environment. Changes may include such activities as implementing new, more efficient systems, consolidating the activities of business units, migrating certain processes to

Table of Contents

our shared services organizations, formalizing policies and procedures, improving segregation of duties and increasing monitoring controls. In addition, when we acquire new businesses, we incorporate our controls and procedures into the acquired business as part of our integration activities. As part of our integration of Exelis, we are in the process of incorporating our controls and procedures with respect to Exelis operations, and we will include internal controls with respect to Exelis operations in our assessment of the effectiveness of our internal control over financial reporting as of the end of fiscal 2016. Other than incorporating our controls and procedures with respect to Exelis operations, there have been no changes in our internal control over financial reporting that occurred during the first quarter of fiscal 2016 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION**Item 1. Legal Proceedings.**

General. From time to time, as a normal incident of the nature and kind of business in which we are, and were, engaged, various claims or charges are asserted and litigation or arbitration is commenced by or against us arising from or related to matters, including but not limited to: product liability; personal injury; patents, trademarks, trade secrets or other intellectual property; labor and employee disputes; commercial or contractual disputes; strategic acquisitions or divestitures; the prior sale or use of former products allegedly containing asbestos or other restricted materials; breach of warranty; or environmental matters. Claimed amounts against us may be substantial, but may not bear any reasonable relationship to the merits of the claim or the extent of any real risk of court or arbitral awards. We record accruals for losses related to those matters against us that we consider to be probable and that can be reasonably estimated. Gain contingencies, if any, are recognized when they are realized and legal costs generally are expensed when incurred. Although it is not feasible to predict the outcome of these matters with certainty, it is reasonably possible that some lawsuits, claims or proceedings may be disposed of or decided unfavorably to us and in excess of the amounts currently accrued. Based on available information, in the opinion of management, settlements, arbitration awards and final judgments, if any, which are considered probable of being rendered against us in litigation or arbitration in existence at October 2, 2015 are reserved against or would not have a material adverse effect on our financial condition, results of operations or cash flows.

As discussed in *Note P – Legal Proceedings and Contingencies* in the Notes, in connection with our sale of Broadcast Communications, we currently are in arbitration with the Buyer regarding a possible additional amount for the post-closing working capital adjustment to the purchase price. In such arbitration, the current range of possible outcomes is no additional adjustment to the purchase price, based on our calculation of post-closing working capital, on one hand, to an additional downward adjustment of \$67 million to the purchase price, based on the Buyer's claims in its calculation of post-closing working capital, on the other hand. We are not able to determine the likely outcome of the arbitration, but we believe the Buyer's claims in its calculation of post-closing working capital are without merit and its asserted additional downward adjustment to the purchase price is significantly overstated, and we intend to defend against the Buyer's claims and asserted additional downward adjustment to the purchase price vigorously. We expect this arbitration to be concluded in fiscal 2016.

Tax Audits. Our tax filings are subject to audit by taxing authorities in jurisdictions where we conduct business. These audits may result in assessments of additional taxes that are subsequently resolved with the authorities or ultimately through legal proceedings. We believe we have adequately accrued for any ultimate amounts that are likely to result from these audits; however, final assessments, if any, could be different from the amounts recorded in our Condensed Consolidated Financial Statements (Unaudited).

Item 1A. Risk Factors.

Investors should carefully review and consider the information regarding certain factors which could materially affect our business, results of operations, financial condition and cash flows as set forth under Item 1A. *Risk Factors* in our Fiscal 2015 Form 10-K. We do not believe that there have been any material changes to the risk factors previously disclosed in our Fiscal 2015 Form 10-K. We may disclose changes to such risk factors or disclose additional risk factors from time to time in our future filings with the SEC. Additional risks and uncertainties not presently known to us or that we currently believe not to be material may also adversely impact our business, results of operations, financial position and cash flows.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.*Issuer Purchases of Equity Securities*

During the first quarter of fiscal 2016, we did not repurchase any shares of our common stock under our repurchase program. During the first quarter of fiscal 2015, we repurchased 1,432,265 shares of our common stock under our repurchase program at an average price per share of \$69.80, excluding commissions. The level of our repurchases depends on a number of factors, including our financial condition, capital requirements, cash flows, results of operations, future business prospects and other factors our Board of Directors may deem relevant. The

Edgar Filing: HARRIS CORP /DE/ - Form 10-Q

timing, volume and nature of repurchases are subject to market conditions, applicable securities laws and other factors and are at our discretion and may be suspended or discontinued at any time. Shares repurchased by us are cancelled and retired.

Table of Contents

The following table sets forth information with respect to repurchases by us of our common stock during the first quarter of fiscal 2016:

Period*	Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of publicly announced plans or programs (1)	Maximum approximate dollar value of shares that may yet be purchased under the plans or programs (1)
Month No. 1 (July 4, 2015-July 31, 2015)				
Repurchase Programs (1)				\$ 683,544,295
Employee Transactions (2)	2,608	\$ 77.22		
Month No. 2 (August 1, 2015-August 28, 2015)				
Repurchase Programs (1)				\$ 683,544,295
Employee Transactions (2)	184,768	\$ 77.19		
Month No. 3 (August 29, 2015-October 2, 2015)				
Repurchase Programs (1)				\$ 683,544,295
Employee Transactions (2)	443	\$ 74.30		
Total	187,819	\$ 77.19		\$ 683,544,295

* Periods represent our fiscal months.

(1) On August 26, 2013, we announced that on August 23, 2013, our Board of Directors approved a new share repurchase program (our 2013 Repurchase Program) authorizing us to repurchase up to \$1 billion in shares of our common stock through open-market transactions, private transactions, transactions structured through investment banking institutions or any combination thereof. As of October 2, 2015, \$683,544,295 (as reflected in the table above) was the approximate dollar amount of our common stock that may yet be purchased under our 2013 Repurchase Program, which does not have a stated expiration date. The level of our repurchases depends on a number of factors, including our financial condition, capital requirements, cash flows, results of operations, future business prospects and other factors our Board of Directors may deem relevant. The timing, volume and nature of repurchases are subject to market conditions, applicable securities laws and other factors and are at our discretion and may be suspended or discontinued at any time.

(2) Represents shares of our common stock delivered to us in satisfaction of the tax withholding obligation of holders of performance share units, restricted stock units or restricted shares that vested during the quarter. Our equity incentive plans provide that the value of shares delivered to us to pay the exercise price of options or to cover tax withholding obligations shall be the closing price of our common stock on the date the relevant transaction occurs.

Sales of Unregistered Equity Securities

During the first quarter of fiscal 2016, we did not issue or sell any unregistered equity securities.
