Table of Contents**Ferro Corporation and Subsidiaries****Notes to Condensed Consolidated Financial Statements****1. Basis of Presentation**

The accompanying unaudited condensed consolidated financial statements of Ferro Corporation (Ferro, we, us or the Company) have been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) for interim financial information, the instructions to Form 10-Q, and Article 10 of Regulation S-X. These statements reflect all normal and recurring adjustments which are, in the opinion of management, necessary to present fairly the financial position, results of operations and cash flows for the periods presented. The preparation of financial statements in conformity with U.S. GAAP requires us to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. These interim condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and related notes included in our Annual Report on Form 10-K for the year ended December 31, 2012. Prior periods have been adjusted for the presentation of discontinued operations.

Operating results for the three and nine months ended September 30, 2013, are not necessarily indicative of the results expected in subsequent quarters or for the full year ending December 31, 2013.

2. Recent Accounting Pronouncements***Accounting Standards Adopted in the Nine Months Ended September 30, 2013***

On January 1, 2013, we adopted Financial Accounting Standards Board (FASB) Accounting Standards Update (ASU) 2011-11, *Disclosures about Offsetting Assets and Liabilities*, (ASU 2011-11) and ASU 2013-01, *Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities*, (ASU 2013-01). These pronouncements are codified in Accounting Standards Codification (ASC) Topic 210, Balance Sheet, and contain new disclosure requirements about a company s right of setoff and related arrangements associated with its financial and derivative instruments. Adoption of this pronouncement did not have a material effect on our consolidated financial statements.

On January 1, 2013, we adopted FASB ASU 2013-02, *Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income*, (ASU 2013-02), which is codified in ASC Topic 220, Comprehensive Income. This pronouncement adds new disclosure requirements for items reclassified out of accumulated other comprehensive income. Adoption of this pronouncement did not have a material effect on our consolidated financial statements.

3. Inventories

In the production of some of our products, we use precious metals, some of which we obtain from financial institutions under consignment agreements with terms of one year or less. The financial institutions retain ownership of the precious metals and charge us fees based on the amounts we consign. These fees were \$0.7 million and \$1.4 million for the three months ended September 30, 2013 and 2012, respectively, and were \$2.5 million and \$5.0 million for the nine months ended September 30, 2013 and 2012, respectively. We had on hand precious metals owned by participants in our precious metals consignment program of \$89.5 million at September 30, 2013, and \$112.2 million at December 31, 2012, measured at fair value based on market prices for identical assets and net of credits.

4. Property, Plant and Equipment

Property, plant and equipment is reported net of accumulated depreciation of \$686.5 million at September 30, 2013, and \$658.1 million at December 31, 2012. Unpaid capital expenditure liabilities, which are noncash investing activities, were \$6.6 million at September 30, 2013, and \$7.3 million at September 30, 2012.

Receivable Sales Programs

We have an asset securitization program for Ferro's U.S. trade accounts receivable. We sell interests in our domestic receivables to various purchasers, and we may obtain up to \$50.0 million in the form of cash or letters of credit. Advances received under this program are accounted for as borrowings secured by the receivables and included in net cash provided by financing activities. In the second quarter of 2013, we extended the maturity of this credit facility through May 2014. At September 30, 2013, advances received of \$48.0 million were secured by \$77.6 million of accounts receivable, and based on available and qualifying receivables, \$2.0 million of additional borrowings were available under the program. During the third quarter of 2013 we amended the agreement. The interest rate under the amended agreement is the sum of (A) either (1) LIBOR rates or (2) the federal funds rate plus 0.5% or the prime rate and (B) a fixed margin. At September 30, 2013, the interest rate was 0.6%.

We also have several international programs to sell with recourse trade accounts receivable to financial institutions. Advances received under these programs are accounted for as borrowings secured by the receivables and included in

net cash provided by financing activities. At September 30, 2013, the commitments supporting these programs totaled \$18.9 million, the advances received of \$5.6 million were secured by \$8.7 million of accounts receivable, and based on available and qualifying receivables, \$0.2 million of additional borrowings were available under the programs. The interest rates under these programs are based on EURIBOR rates plus 1.75%. At September 30, 2013, the weighted-average interest rate was 1.9%.

7.875% Senior Notes

The 7.875% Senior Notes (the Senior Notes) were issued in 2010 at par, bear interest at a rate of 7.875% per year, payable semi-annually in arrears on February 15th and August 15th, and mature on August 15, 2018. We may also redeem some or all of the Senior Notes prior to August 15, 2014, at a price equal to the principal amount plus a defined applicable premium. The applicable premium on any redemption date is the greater of 1% of the principal amount of the note or the excess of (1) the present value at such redemption date of the redemption price of the note at August 15, 2014, plus all required interest payments due on the note through August 15, 2014, computed using a discount rate equal to the Treasury Rate as of the redemption date plus 50 basis points; over (2) the principal amount of the note. In addition, we may redeem some or all of the Senior Notes beginning August 15, 2014, at prices ranging from 100% to 103.938% of the principal amount.

Table of Contents

The Senior Notes are unsecured obligations and rank equally in right of payment with any other unsecured, unsubordinated obligations. The Senior Notes contain certain affirmative and negative covenants customary for high-yield debt securities, including, but not limited to, restrictions on our ability to incur additional debt, create liens, pay dividends or make other distributions or repurchase our common stock and sell assets outside the ordinary course of business. At September 30, 2013, we were in compliance with the covenants under the Senior Notes indenture.

6.50% Convertible Senior Notes

The 6.50% Convertible Senior Notes (the Convertible Notes) were repaid at maturity on August 15, 2013. The principal amount outstanding at maturity was \$35.1 million.

Revolving Credit Facility

In 2010, we entered into the Third Amended and Restated Credit Agreement with a group of lenders for a five-year, \$350 million multi-currency senior revolving credit facility (the 2010 Credit Facility). In March 2013, we amended the 2010 Credit Facility (the 2013 Amended Credit Facility) to provide additional operating flexibility. The primary effects of the 2013 Amended Credit Facility were to:

Decrease the Revolving Loan Commitment Amount from \$350.0 million to \$250.0 million;

Amend the calculation of EBITDA to provide for a restructuring expense add-back attributable to the Company's restructuring programs of \$30.0 million in 2013, \$20.0 million in 2014 and \$10.0 million in 2015, with no aggregate limit on restructuring expense;

Increase the maximum permitted leverage ratio such that for (i) the first, second and third quarters of 2013, it shall increase from 3.50 to 4.25; (ii) the fourth quarter of 2013 and first quarter of 2014, it shall increase from 3.50 to 4.00; (iii) the second and third quarters of 2014, it shall increase from 3.50 to 3.75; and (iv) the fourth quarter of 2014 and thereafter, it will be 3.50; and

Amend the requirements for Permitted Acquisitions such that for the Company to consummate a Permitted Acquisition the Company must have minimum liquidity of \$100.0 million and the Company's Secured Leverage Ratio must be less than 1.50.

The 2013 Amended Credit Facility matures on August 24, 2015, and is secured by substantially all of Ferro's assets. After reductions for outstanding letters of credit, we had \$225.0 million of additional borrowings available at September 30, 2013. The interest rate under the 2013 Amended Credit Facility is the sum of (A) either (1) LIBOR or (2) the higher of the Federal Funds Rate plus 0.5%, the Prime Rate, or LIBOR plus 1.0% and (B) a variable margin based on the Company's leverage. At September 30, 2013, the interest rate was 3.4%.

Under the 2013 Amended Credit Facility, we are subject to a number of financial covenants, including limitations on the payment of common stock dividends. At September 30, 2013, we were in compliance with the covenants of the 2013 Amended Credit Facility.

The fair values of cash and cash equivalents are based on the fair values of identical assets. The fair values of short-term loans payable are based on the present value of expected future cash flows and approximate their carrying amounts due to the short periods to maturity. The fair values of the Senior Notes and the Convertible Notes are based on third-party estimated bid prices. The fair values of the Revolving Credit Facility and the other long-term notes payable are based on the present value of expected future cash flows, assumptions about current interest rates and the creditworthiness of the Company that market participants would use in pricing the debt.

Foreign currency forward contracts. We manage foreign currency risks principally by entering into forward contracts to mitigate the impact of currency fluctuations on transactions, the majority of which are intercompany. These forward contracts are not designated as hedging instruments. Gains and losses on these foreign currency forward contracts are netted with gains and losses from currency fluctuations on transactions arising from international trade and reported as foreign currency losses, net in the condensed consolidated statements of operations. For the three and nine months ended September 30, 2013, net foreign currency loss was approximately \$1.3 million and \$4.0 million, respectively, which is primarily comprised of the foreign exchange impact on transactions in countries where it is not economically feasible for us to enter into hedging arrangements and hedging inefficiencies, including timing of transactions, etc. Net losses arising from the change in fair value of our financial instruments of \$2.7 million and \$6.7 million, for the three and nine months ended September 30, 2013, respectively, offset related net gains on the underlying intercompany transactions of approximately the same amounts. The fair values of these contracts are based on market prices for comparable contracts. We had foreign currency forward contracts with notional amounts of \$231.3 million at September 30, 2013, and \$250.7 million at December 31, 2012.

The following table presents the effect on our consolidated statements of operations for the three months ended September 30, 2013 and 2012, respectively, of our foreign currency forward contracts:

7. Income Taxes

Income tax expense for the nine months ended September 30, 2013, was \$4.0 million, or 16.8% of pre-tax income. In the first nine months of 2012, we recorded income tax expense of \$113.1 million, or (57.3)% of pre-tax income. The change in the effective tax rate was primarily due to the reserve for a significant portion of the Company's deferred tax assets, that was recorded in the third quarter of 2012 compared to the expected usage of tax assets in 2013.

8. Contingent Liabilities

We have recorded environmental liabilities of \$8.2 million at September 30, 2013, and \$9.6 million at December 31, 2012, for costs associated with the remediation of certain of our properties that have been contaminated, primarily a non-operating facility in Brazil. The costs include legal and consulting fees, site studies, the design and implementation of remediation plans, post-remediation monitoring and related activities. The ultimate liability could be affected by numerous uncertainties, including the extent of contamination found, the required period of monitoring and the ultimate cost of required remediation.

There are various lawsuits and claims pending against the Company and its subsidiaries. We do not currently expect the ultimate liabilities, if any, and expenses related to such lawsuits and claims to materially affect the consolidated financial position, results of operations, or cash flows of the Company.

9. Retirement Benefits

Net periodic benefit (credit) cost of our U.S. pension plans (including our unfunded nonqualified plans), non-U.S. pension plans, and postretirement health care and life insurance benefit plans for the three months ended September 30, 2013 and 2012, respectively, follow:

Net periodic benefit (credit) cost	\$ (5,067)	\$ (823)	\$ 3,041	\$ 840	\$ 768	\$ 1,091

Table of Contents

Net periodic benefit credit for our U.S. pension plans for the nine months ended September 30, 2013 increased from the effects of a lower discount rate and larger plan asset balances resulting in increased expected returns. Net periodic benefit cost for our non-U.S. pension plans increased due to the non-recurring credit recognized in the second quarter of 2012, resulting from curtailment of retirement benefit accumulations in the Netherlands. The affected employees in the Netherlands now receive benefits through a defined contribution plan.

10. Stock-Based Compensation

On May 22, 2013, our shareholders approved the 2013 Omnibus Incentive Plan (the Plan), which was adopted by the Board of Directors on February 22, 2013, subject to shareholder approval. The Plan's purpose is to promote the Company's long-term financial interests and growth by attracting, retaining and motivating high quality key employees and directors, motivating such employees and directors to achieve the Company's short- and long-range performance goals and objectives, aligning their interests with those of its shareholders. The Plan reserves 4,400,000 shares of common stock to be issued for grants of several different types of long-term incentives including stock options, stock appreciation rights, restricted shares, performance shares, other common stock based awards, and dividend equivalent rights.

The 2010 Long Term Incentive Plan (the Previous Plan) was replaced by the Plan, and no future grants may be made under the Previous Plan. However, any outstanding awards or grants made under the Previous Plan will continue until the end of their specified terms.

In 2013, our Board of Directors granted 0.6 million stock options, 0.5 million performance share units and 0.4 million deferred stock units under The Previous Plan and The Plan. The following table details the weighted-average grant-date fair values and the assumptions used for estimating the fair values of stock option grants made during the nine months ended September 30, 2013:

	Stock Options
Weighted-average grant-date fair value	\$ 4.01
Expected life, in years	6.0
Risk-free interest rate	1.2% - 1.4%
Expected volatility	83.9% - 86.4%

The weighted average grant date fair value of our performance share units was \$5.69. These shares are currently expensed at target and are evaluated each reporting period for likelihood of achieving the performance criteria.

We measure the fair value of deferred stock units based on the closing market price of our common stock on the date of the grant. The weighted-average fair value per unit for grants made during the nine months ended September 30, 2013, was \$5.70.

We recognized stock-based compensation expense of \$4.4 million for the nine months ended September 30, 2013, and \$5.7 million for the nine months ended September 30, 2012. At September 30, 2013, unearned compensation cost related to the unvested portion of all stock-based awards was approximately \$8.4 million and is expected to be recognized over the remaining vesting period of the respective grants, through the first quarter of 2016.

Table of Contents**11. Restructuring and Cost Reduction Programs**

In the first quarter of 2013, we developed and initiated various restructuring programs across the organization with the objectives of realigning the business and lowering our cost structure. Specifically, the programs relate to our European operations, certain corporate functions, improvement of operational efficiencies, and the exit of the solar pastes product line. As a result of the restructuring actions, the Company expects to incur charges of approximately \$40 million, the majority of which will be for severance costs and require future cash expenditures. The programs are subject to required consultations with employee representatives at the affected sites and other local legal requirements. Charges associated with these programs were \$3.8 million and \$26.7 million for the three and the nine months ended September 30, 2013, respectively. The cumulative charges incurred to date associated with these programs are \$37.0 million.

The activities and accruals related to our restructuring and cost reduction programs are summarized below:

	Employee Severance	Other Costs	Asset Impairment	Total
	(Dollars in thousands)			
Balance at December 31, 2012	\$ 4,093	\$ 6,139		\$ 10,232
Restructuring charges	19,647	7,094	(3)	26,738
Cash payments	(14,715)	(7,671)		(22,386)
Non-cash items	92	(820)	3	(725)
Balance at September 30, 2013	\$ 9,117	\$ 4,742	\$	\$ 13,859

We expect to make cash payments to settle the remaining liability for employee termination benefits and other costs over the next twelve months, except where legal or contractual restrictions prevent us from doing so.

12. Discontinued Operations

During the first quarter of 2013, we completed the sale of the stock of our pharmaceuticals business, Ferro Pfanstiehl Laboratories, Inc. (FPL), which was previously reported within the Pharmaceuticals reportable segment. Consideration was comprised of a \$16.9 million cash payment, and the transaction also included an earn-out incentive of up to \$8.0 million based on achieving certain earnings targets over a two-year period. In March 2013, prior to the sale, an impairment loss of \$8.7 million associated with the long lived assets of FPL was recorded under ASC Topic 360 Property, Plant and Equipment. The write down was determined by estimating the fair value of the assets less cost to sell of \$14.8 million using the market approach considering a bona fide purchase offer, a level three measurement within the fair value hierarchy.

The operations of FPL have been segregated from continuing operations and are included in discontinued operations in our condensed consolidated statements of operations. Interest expense has been allocated to the discontinued operation based on the ratio of net assets of FPL to consolidated net assets excluding debt.

15. Reporting for Segments

During the first quarter of 2013, the Company reorganized its operating segments to reflect the current structure under which performance is evaluated, strategic decisions are made and resources are allocated. The new structure aligns the continuing product lines of our former Electronic Materials segment with our continuing operating segments. Under the new structure, we will continue to report Specialty Plastics, Polymer Additives and Performance Coatings, which aggregates our Tile Coating Systems and Porcelain Enamel operating segments, consistent with the manner in which they have historically been reported. The Glass Systems and Performance Pigments and Colors operating segments that aggregated into the historically reported Color and Glass Performance Materials segment, now include our continuing product lines that were historically reported within the Electronic Materials segment, and as a result of such inclusion, fail to meet the aggregation criteria for continuing to report as one segment. These operating segments will now be reported as the Pigments, Powders and Oxides, and Performance Colors and Glass segments. As discussed in Note 12, our pharmaceuticals business that comprised the Pharmaceuticals segment was sold in the first quarter, and is reported as a discontinued operation.

Net sales to external customers by segment are presented in the table below. Sales between segments were not material.

Table of Contents

In the first quarter, in conjunction with the changes to operating segments, we changed the profitability metric utilized by management to evaluate segment performance. The metric that was utilized historically was segment income, and segment gross profit is the metric that is now utilized. We measure segment gross profit for internal reporting purposes by excluding certain other cost of sales, which includes costs associated with facilities that have been idled or closed. Each segment's gross profit and a reconciliation to income (loss) before income taxes from continuing operations follows:

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

During the three months ended September 30, 2013, sales were flat compared to the prior-year same period. Increases in sales excluding precious metals in Performance Colors and Glass and Performance Coatings were partially offset by lower sales in Polymer Additives due to the accelerated deselection of certain plasticizer products, and in Pigments, Powders and Oxides due to the exit of solar pastes in the first quarter of 2013. The decrease in sales of precious metals was primarily in Pigments, Powders and Oxides and driven by the exit of solar pastes. Gross profit increased approximately \$24 million in the third quarter of 2013 compared to the prior-year same period, or 550 basis points as a percentage of net sales excluding precious metals, to 21.8%. The favorability was driven by our cost reduction initiatives, increased net sales excluding precious metals and improved business mix, partially offset by lower sales in Polymer Additives and the impact of the exit of solar pastes.

We continue to execute against our cost savings plans, which has resulted in additional savings in the third quarter of 2013 compared with the prior-year same period. Further, we have announced that we now expect to achieve cost savings of greater than \$100 million by the end of 2015.

For the three months ended September 30, 2013, Ferro net income was \$13.0 million, compared with net loss of \$315.7 million in 2012, and net income attributable to common shareholders was \$12.7 million, compared with net loss attributable to common shareholders of \$316.1 million in 2012. Income from continuing operations was \$13.0 million in the three months ended September 30, 2013, compared with net loss from continuing operations of \$315.6 million in 2012. Our total segment gross profit for the third quarter of 2013 was \$84.2 million, compared with \$60.7 million in 2012. We incurred restructuring charges of \$3.8 million in the third quarter.

For the nine months ended September 30, 2013, Ferro net income was \$11.6 million, compared with net loss of \$309.6 million in 2012, and net income attributable to common shareholders was \$11.4 million, compared with net loss attributable to common shareholders of \$310.4 million in 2012. Income from continuing operations was \$20.0 million in the nine months ended September 30, 2013, compared with net loss from continuing operations of \$310.5 million in 2012. Our total segment gross profit for the nine months ended September 30, 2013 was \$251.1 million, compared with \$232.2 million in 2012. We incurred restructuring and impairment charges of \$26.7 million in the nine months ended September 30, 2013.

Outlook

We have continued to make progress against our strategic objectives during the third quarter of 2013. We have executed against our cost reduction plans, which are expected to drive cost savings of approximately \$45 million for full year 2013. These actions, in addition to the cost savings from exiting solar pastes during the first quarter of 2013 have significantly improved the Company's cost structure.

In the fourth quarter, we expect to realize the continued benefits from our cost reduction plans, however, we also expect our normal seasonal business pattern, which is characterized by lower customer demand and reduced plant utilization due to holiday shutdowns.

Factors that could adversely affect our future performance include those described under the heading "Risk Factors" in Item 1A of Part I of our Annual Report on Form 10-K for the year ended December 31, 2012.

Results of Operations Consolidated

For the three and nine months ended September 30, 2012, amounts originally reported have been adjusted for the effects of applying retrospectively the discontinued operations of FPL as described in Note 12, Discontinued Operations and the changes in our reportable segments as described in Note 15, Reporting for Segments. Both notes are part of the condensed consolidated financial statements under Item 1 of this Quarterly Report on Form 10-Q.

Comparison of the three months ended September 30, 2013 and 2012

For the three months ended September 30, 2013, Ferro net income was \$13.0 million, compared with net loss of \$315.7 million for the three months ended September 30, 2012. For the three months ended September 30, 2013, Ferro net income attributable to common shareholders was \$12.7 million, or \$0.15 per share, compared with Ferro net loss attributable to common shareholders of \$316.1 million, or \$3.66 loss per share, for the three months ended September 30, 2012.

Gross profit	\$ 84,247	\$ 60,710	\$ 23,537	38.8%

Gross profit as a % of net sales excluding precious metals 21.8% 16.3%

Net sales decreased by 0.2% in the three months ended September 30, 2013, compared with the prior-year same period. Net sales excluding precious metals increased \$14.1 million, driven by increased sales in our Performance Coatings, Performance Colors and Glass and Specialty Plastics segments, partially offset by decreased sales in our Polymer Additives and Pigments, Powders and Oxides segments. The exit of solar pastes during the first quarter of 2013 drove the decrease in sales of precious metals compared to the prior year.

Gross Profit

Gross profit increased 38.8% in the three months ended September 30, 2013, compared to the prior-year same period. The significant drivers of the increased gross profit are strong demand and lower raw material and production costs in our Performance Coatings segment and favorable product mix in our Performance Colors and Glass segment. These increases were partially offset by unfavorable product mix in our Pigments, Powders and Oxides segment and the impact of reduced demand for certain plasticizer products in our Polymer Additives segment. Additionally, during the third quarter of 2012, inventory charges related to obsolete solar pastes impacted gross profit by approximately \$5 million.

Selling, General and Administrative Expenses

The following table presents our segments summarized into their respective operating groups, with Pigments, Powders and Oxides, Performance Colors and Glass, and Performance Coatings comprising Performance Materials, and Polymer Additives and Specialty Plastics comprising Performance Chemicals. In conjunction with the changes to segments, we also changed the profitability metric utilized by management to evaluate segment performance, as discussed in Note 15. The metric that was utilized historically was segment income, which included selling, general and administrative (SG&A) expenses that were directly incurred by each segment, as well as certain allocated costs. Segment gross profit is the metric that is now utilized. Further, we have refined our approach to managing SG&A expenses and are intensely focused on analyzing expenses at the individual site level, and also across functional areas within the Company, as opposed to the segment level, and will evaluate performance in this manner.

SG&A expenses were \$4.8 million lower in the three months ended September 30, 2013 compared with the prior-year same period. As a percentage of sales, SG&A expenses decreased 110 basis points from 15.6% in the third quarter of 2012 to 14.5% in the third quarter of 2013. The primary drivers of the change in SG&A expenses were lower bad debt expense in the third quarter of 2013 compared to the prior-year same period, and lower pension and other postretirement benefit expense resulting from a lower discount rate and higher plan assets, generating higher expected returns, compared to the prior-year same period. Personnel expenses decreased compared to the prior year driven by the exit of solar pastes and the various personnel actions taken during 2012 and into 2013, however, there was an increase in incentive compensation of approximately \$11 million compared to the prior-year same period. The change in other SG&A expenses was primarily driven by a charge taken for a reserve required in the third quarter of 2012 that did not recur in the current year, partially offset by higher professional fees.

The following table includes SG&A components with significant changes between 2013 and 2012:

NM Not meaningful

Restructuring and impairment charges decreased significantly in the third quarter of 2013 compared to the prior-year same period. The drivers of the decrease were the significant nonrecurring impairments of goodwill and property, plant and equipment in the third quarter of 2012, partially offset by additional charges related to our ongoing restructuring plans during the third quarter of 2013.

Table of Contents*Interest Expense*

Interest expense in the third quarter of 2013 was consistent with the prior-year same period. The components of interest expense are as follows:

Interest expense	\$ 6,766	\$ 6,716	\$ 50	0.7%

Income Tax Expense

During the third quarter of 2013, income tax expense was \$0.5 million compared with the income tax expense of \$105.4 million in the third quarter of 2012. Income tax expense for the current period was less than the expense recorded in the prior-year same period primarily due to the reserve that was recorded in the third quarter of 2012 on a significant portion of our deferred tax assets.

Sales in Pigments, Powders and Oxides decreased due to the exit of solar pastes during the first quarter of 2013, which comprised approximately \$4 million of the decrease in net sales excluding precious metals from the prior-year same period. The decrease in sales related to the exit of solar pastes was partially mitigated by increased sales of our metal

powders products produced in the United States compared to the prior year. The decreased sales from the exit of solar pastes were further mitigated by tolling revenue of approximately \$1 million during the third quarter of 2013 related to a supply agreement entered into with the buyer of our solar pastes assets. Sales were unfavorably impacted by product mix, including the shift away from solar pastes products, which was only partially mitigated by increased volume and pricing benefits in the third quarter. The decrease in precious metal sales was primarily driven by the exit of solar pastes. Regionally, the United States drove the decrease in sales, primarily due to the exit of solar pastes. Gross profit increased from the prior-year same period primarily due to favorable production costs and higher volume, partially offset by unfavorable mix.

Gross profit as a % of segment net sales excluding precious metals	33.7%	27.7%		

Net sales excluding precious metals increased compared to the prior-year same period, primarily driven by sales of our glass products. Sales of our glass products increased over the prior-year same period by approximately \$7 million, with the remainder of the increase primarily coming from our electronic packaging materials products. Net sales excluding precious metals were impacted by favorable product mix, favorable pricing, and higher volume compared to the prior-year same period. Regionally, Europe and the United States increased approximately \$5 million and \$2 million, respectively, compared to the prior-year same period. Other regions increased by approximately \$1 million in total. Gross profit increased from the prior-year same period due to favorable volume and product mix, favorable pricing, and favorable production costs.

Segment gross profit	36,410	23,858	12,552	52.6%
Gross profit as a % of segment net sales	24.0%	17.4%		

Sales increased in Performance Coatings due to higher sales of our inks products and porcelain enamel products compared to the prior-year same period. The impact of these increases was approximately \$12 million, with the balance of the increase due to higher sales of other tile coating products. Sales were favorably impacted by higher volumes and mix, partially offset by unfavorable pricing, most significantly related to our tile products. Regionally, Europe drove the largest increase in sales, approximately \$11 million, due to increased customer demand and favorable product mix. Asia-Pacific and the United States also both increased by approximately \$2 million and \$1 million, respectively. Gross profit increased from the prior-year same period primarily due to favorable raw material and production costs and higher volume, partially offset by unfavorable pricing impacts.

Segment gross profit	6,251	8,907	(2,656)	(29.8)%
Gross profit as a % of segment net sales	8.7%	11.2%		

Sales decreased in Polymer Additives primarily due to the continued decline in sales volume of certain plasticizer products, which is being driven by changing environmental regulations. Regionally, sales declined in the United States by approximately \$8 million, comprising the majority of the decrease in the segment. Approximately \$6 million of the United States sales decline related to lower volume of the noted plasticizer products. Gross profit decreased from the prior-year same period as a result of the lower sales volume, unfavorable pricing impacts, and unfavorable manufacturing costs.

Gross profit as a % of segment net sales	16.0%	16.9%		

Sales increased in Specialty Plastics primarily due to strong demand for certain plastic colorants products and filled and reinforced plastics products. Sales were favorably impacted by higher volume, which was only partially offset by unfavorable price and mix impacts. Regionally, Europe and Latin America drove a sales increase totaling approximately \$3 million, which was partially offset by a sales decrease in the United States of approximately \$1 million. Gross profit was flat compared to the prior-year same period.

Total	\$ 408,104	\$ 408,865	\$ (761)	(0.2)%

Net sales declined slightly compared to the prior-year same period, with a decrease in the United States being partially mitigated by increased net sales in international regions. In the third quarter of 2013, sales originating in the United States were 39% of total net sales, compared with 42% of net sales in the third quarter of 2012. The decline in sales in the United States was primarily driven by the exit of solar pastes, in combination with reduced demand for certain plasticizer products that is being driven by changing environmental regulations. The increase in international regions was primarily driven by increased sales in Europe across all segments except for Polymer Additives, resulting in increased sales of approximately \$18 million compared to the prior-year same period. Further, Latin America experienced slight increases across most segments. Higher sales in Europe and Latin America were partially offset by decreased sales in Asia-Pacific of approximately \$5 million, which were primarily due to the exit of solar pastes and lower sales of metal powders products.

Gross profit as a % of net sales excluding precious metals

21.3% 19.2%

Net sales decreased by 6.2% in the nine months ended September 30, 2013, compared with the prior-year same period. Net sales excluding precious metals decreased \$30.5 million, driven by decreased sales in our Pigments, Powders and Oxides segment, primarily due to the exit of solar pastes during the first quarter of 2013, and decreased sales in our Polymer Additives segment. Partially mitigating these decreases were increased sales in our Performance Colors and Glass segment. The exit of solar pastes during the first quarter of 2013 was also the primary driver of the decrease in sales of precious metals compared to the prior year.

Gross Profit

Gross profit increased 8.1% in the nine months ended September 30, 2013, compared to the prior-year same period. The significant drivers of the increased gross profit are favorable product mix in our Performance Colors and Glass segment and strong demand and lower raw material and production costs, partially offset by unfavorable price impacts, in our Performance Coatings segment. These increases were partially offset by unfavorable mix in our Pigments, Powders and Oxides segment and the impact of reduced demand for certain plasticizer products and unfavorable production costs in our Polymer Additives segment. Additionally, in the prior year, inventory charges related to obsolete solar pastes impacted gross profit by approximately \$5 million.

Selling, General and Administrative Expenses

The following table presents our segments summarized into their respective operating groups, with Pigments, Powders and Oxides, Performance Colors and Glass, and Performance Coatings comprising Performance Materials, and Polymer Additives and Specialty Plastics comprising Performance Chemicals. In conjunction with the changes to segments, we also changed the profitability metric utilized by management to evaluate segment performance, as discussed in Note 15. The metric that was utilized historically was segment income, which included selling, general and administrative (SG&A) expenses that were directly incurred by each segment, as well as certain allocated costs. Segment gross profit is the metric that is now utilized. Further, we have refined our approach to managing SG&A expenses and are intensely focused on analyzing expenses at the individual site level, and also across functional areas within the Company, as opposed to the segment level, and will evaluate performance in this manner.

SG&A expenses were \$17.7 million lower in the nine months ended September 30, 2013 compared with the prior-year same period. As a percentage of sales, SG&A expenses decreased 40 basis points from 15.1% for the nine months ended September 30, 2012 to 14.7% for the nine months ended September 30, 2013. The primary drivers of the reduction in SG&A expenses were the various personnel actions taken during 2012 and into 2013, which drove decreases in personnel expenses and stock-based compensation expense. The decreases were partially offset by an increase in incentive compensation of approximately \$14 million in the first nine months of 2013 compared to the prior-year same period. In addition, a lower discount rate and increased expected returns on our pension plan assets has reduced pension and other postretirement benefit expense in the first nine months of 2013 compared to the prior-year same period. Our expenses related to idle sites have decreased in the current year as a result of selling the majority of our idle sites in the current year, and our bad debt expense has decreased approximately \$2 million compared to the prior-year same period.

Restructuring and impairment charges decreased significantly in the first nine months of 2013 compared to the prior-year same period. The drivers of the decrease were the significant nonrecurring impairments of goodwill and property, plant and equipment in the third quarter of 2012, partially offset by charges related to our ongoing restructuring plans during the first nine months of 2013.

Table of Contents*Interest Expense*

Interest expense in the first nine months of 2013 increased compared to the prior-year same period, primarily due to the write-off of deferred financing fees resulting from amending our revolving credit facility and the commitment amount being reduced from \$350.0 million to \$250.0 million, and reduced capitalization of interest costs resulting from an information systems tools project that did not recur in the current year. The components of interest expense are as follows:

	Nine months ended September 30,		\$ Change	% Change
	2013	2012

Income Tax Expense

Income tax expense for the nine months ended September 30, 2013 was \$4.0 million, or 16.8% of pre-tax income. In the prior-year same period, we recorded income tax expense of \$113.1 million, or (57.3)% of pre-tax income. The change in the effective tax rate was primarily due to the reserve for a significant portion of the Company's deferred tax assets, which was recorded in the third quarter of 2012.

Sales in Pigments, Powders and Oxides decreased primarily due to the exit of solar pastes during the first quarter of 2013, which comprised approximately \$19 million of the decrease in net sales excluding precious metals from the prior-year same period. The decreased sales from the exit of solar pastes were partially mitigated by tolling revenue of approximately \$3 million during the period related to a supply agreement entered into with the buyer of our solar pastes assets. Net sales excluding precious metals were unfavorably impacted by product mix, including the shift away from solar pastes products, and unfavorable pricing impacts, which was only partially mitigated by higher volume. The decrease in precious metal sales was driven by the exit of solar pastes. Regionally, the United States drove the decrease in sales, due to the exit of solar pastes. Net sales excluding precious metals increased compared to the prior-year same period, primarily driven by sales of our glass products. Sales of our glass products increased over the prior-year same period by approximately \$12 million, partially offset by decreased sales of our colors products of approximately \$4 million. Net sales excluding precious metals were favorably impacted by pricing and product mix, partially offset by lower volume. Regionally, Latin America, Europe and the United States increased over the prior-year same period, and Asia Pacific was flat. Gross profit increased from the prior-year same period as a result of favorable pricing and production costs, partially offset by unfavorable volume and mix.

Sales decreased in Performance Coatings primarily due to lower sales of our tile colors products of approximately \$16 million, which was partially mitigated by increased sales of inks of approximately \$11 million and other tile coating products and porcelain enamel products of approximately \$3 million compared to the prior-year same period. Sales were unfavorably impacted by price, partially mitigated by higher volume and mix. Regionally, Latin America was the most significant decrease, approximately \$12 million, due to reduced customer demand and the impact of selling our borate mine in Argentina that contributed to Performance Coatings sales in the prior-year same period. Sales in the United States also decreased approximately \$1 million compared to the prior-year same period. The decreased sales were partially mitigated by increased sales in Europe, driven by increased sales of both tile and porcelain enamel products, and Asia-Pacific, driven by increased sales of porcelain enamel products. Gross profit increased from the prior-year same period primarily due to favorable raw material and production costs and higher volume, partially offset by unfavorable pricing impacts.

Sales decreased in Polymer Additives primarily due to the continued decline in sales volume of certain plasticizer products that is being driven by changing environmental regulations. Regionally, this drove a decrease in United States sales of approximately \$18 million and Europe sales of approximately \$5 million, which were partially mitigated by increased sales in Latin America of approximately \$2 million. Gross profit decreased from the prior-year same period as a result of the reduced sales volume, partially offset by favorable pricing impacts, primarily in Europe.

In the first nine months of 2013, sales originating in the United States were 40% of total net sales, compared with 44% of net sales in the first nine months of 2012. Approximately \$55 million of the decline in sales in the United States was driven by the exit of solar pastes, including sales of precious metals, and approximately \$18 million was due to reduced demand for certain plasticizer products, which is being driven by changing environmental regulations. International sales decreased approximately \$12 million, primarily due to reduced sales of our Performance Coatings products in Latin America, continued reduction in demand for certain plasticizer products in Europe totaling approximately \$5 million, and the impact of the exit of solar pastes on Asia-Pacific, totaling approximately \$9 million. The declines in international regions were partially mitigated by increased sales of our Performance Coatings and Specialty Plastics products in Europe, totaling approximately \$12 million, container glass products sales in Latin America of approximately \$6 million, and Performance Coatings products sales in Asia-Pacific of approximately \$2 million.

Cash flows from operating activities. Cash flows from operating activities decreased by \$16.5 million in the first nine months of 2013 compared with the prior-year same period. The decrease in cash flows was primarily the result of increased cash outflows related to our restructuring activities of \$22.4 million during the first nine months of 2013. Reconciling net income to cash flows from operating activities included approximately \$4.4 million of non-cash restructuring charges, depreciation and amortization, as well as the net financial statement impact of the sale of solar assets and Ferro Pfansteihl Laboratories, Inc. (FPL). Approximately \$25.5 million in interest was paid during the current year compared to \$25.3 million in the first nine months of 2012. Interest payments were primarily comprised of semiannual interest on our outstanding senior notes. Inventories increased from year end, but less than the increase in the prior-year same period, which is primarily the result of decreased sales compared to the prior-year, as well as stronger inventory management. The increase in accounts receivables from year end is consistent with that seen in the first nine months of 2012.

Cash flows from investing activities. Cash flows from investing activities increased \$56.6 million in the first nine months of 2013 compared with the prior-year same period. Cash received for the sale of solar assets and FPL, totaling \$27.7 million, comprised the majority of the increase. Capital expenditures decreased to \$21.2 million in the first nine months of 2013 from \$46.2 million in the prior-year for the comparable period.

Cash flows from financing activities. Cash flows from financing activities decreased \$35.7 million in the first nine months of 2013 compared with the prior-year same period. In the first nine months of 2013, we increased borrowings under our domestic accounts receivable asset securitization program by \$8 million and increased borrowings through our revolving credit facility by \$16.9 million. The additional borrowings from the credit facility were used primarily to fund the extinguishment of our 6.50% convertible senior notes which matured during the third quarter. In the first nine months of 2012, we borrowed \$20.0 million through our domestic accounts receivable asset securitization program and \$3.2 million through our revolving credit facility.

Capital Resources and Liquidity

7.875% Senior Notes

The 7.875% Senior Notes (the Senior Notes) were issued in 2010 at par, bear interest at a rate of 7.875% per year, payable semi-annually in arrears on February 15th and August 15th, and mature on August 15, 2018. The principal amount outstanding was \$250.0 million at September 30, 2013, and December 31, 2012. We may also redeem some or all of the Senior Notes prior to August 15, 2014, at a price equal to the principal amount plus a defined applicable premium. The applicable premium on any redemption date is the greater of 1% of the principal amount of the note or the excess of (1) the present value at such redemption date of the redemption price of the note at August 15, 2014, plus all required interest payments due on the note through August 15, 2014, computed using a discount rate equal to the Treasury Rate as of the redemption date plus 50 basis points; over (2) the principal amount of the note. In addition, we may redeem some or all of the Senior Notes beginning August 15, 2014, at prices ranging from 100% to 103.938% of the principal amount.

Table of Contents

The Senior Notes are unsecured obligations and rank equally in right of payment with any other unsecured, unsubordinated obligations. The Senior Notes contain certain affirmative and negative covenants customary for high-yield debt securities, including, but not limited to, restrictions on our ability to incur additional debt, create liens, pay dividends or make other distributions or repurchase our common stock and sell assets outside the ordinary course of business. At September 30, 2013, we were in compliance with the covenants under the Senior Notes indenture.

6.50% Convertible Senior Notes

The 6.50% Convertible Senior Notes (the Convertible Notes) were repaid at maturity on August 15, 2013. The principal amount outstanding at maturity was \$35.1 million.

Revolving Credit Facility

In 2010, we entered into the Third Amended and Restated Credit Agreement with a group of lenders for a five-year, \$350 million multi-currency senior revolving credit facility (the 2010 Credit Facility). In March 2013, we amended the 2010 Credit Facility (the 2013 Amended Credit Facility) to provide additional operating flexibility. The primary effects of the 2013 Amended Credit Facility were to:

Decrease the Revolving Loan Commitment Amount from \$350.0 million to \$250.0 million;

Amend the calculation of EBITDA to provide for a restructuring expense add-back attributable to the Company's restructuring programs of \$30.0 million in 2013, \$20.0 million in 2014 and \$10.0 million in 2015, with no aggregate limit on restructuring expense;

Increase the maximum permitted leverage ratio such that for (i) the first, second and third quarters of 2013, it shall increase from 3.50 to 4.25; (ii) the fourth quarter of 2013 and first quarter of 2014, it shall increase from 3.50 to 4.00; (iii) the second and third quarters of 2014, it shall increase from 3.50 to 3.75; and (iv) the fourth quarter of 2014 and thereafter, it will be 3.50; and

Amend the requirements for Permitted Acquisitions such that for the Company to consummate a Permitted Acquisition the Company must have minimum liquidity of \$100.0 million and the Company's Secured Leverage Ratio must be less than 1.50.

The 2013 Amended Credit Facility matures on August 24, 2015, and is secured by substantially all of Ferro's assets. After reductions for outstanding letters of credit, we had \$225.0 million of additional borrowings available at September 30, 2013. The interest rate under the 2013 Amended Credit Facility is the sum of (A) either (1) LIBOR or (2) the higher of the Federal Funds Rate plus 0.5%, the Prime Rate, or LIBOR plus 1.0% and (B) a variable margin based on the Company's leverage. At September 30, 2013, the interest rate was 3.4%.

Under the 2013 Amended Credit Facility, we are subject to a number of financial covenants, including limitations on the payment of common stock dividends. At September 30, 2013, we were in compliance with the covenants of the 2013 Amended Credit Facility.

Domestic Receivable Sales Programs

We have an asset securitization program for Ferro's U.S. trade accounts receivable. We sell interests in our domestic receivables to various purchasers, and we may obtain up to \$50.0 million in the form of cash or letters of credit. Advances received under this program are accounted for as borrowings secured by the receivables and included in net cash provided by financing activities. In the second quarter of 2013, we extended the maturity of this credit facility through May 2014. At September 30, 2013, advances received of \$48.0 million were secured by \$77.6 million of accounts receivable, and based on available and qualifying receivables, \$2.0 million of additional borrowings were available under the program. At December 31, 2012, we had borrowed \$40.0 million under this facility. During the third quarter of 2013 we amended the agreement. The interest rate under the amended agreement is the sum of (A) either (1) LIBOR rates or (2) the federal funds rate plus 0.5% or the prime rate and (B) a fixed margin. At September 30, 2013, the interest rate was 0.6%.

International Receivable Sales Programs

We have several international programs to sell with recourse trade accounts receivable to financial institutions. Advances received under these programs are accounted for as borrowings secured by the receivables and included in net cash provided by financing activities. At September 30, 2013, commitments supporting these programs totaled \$18.9 million, advances received of \$5.6 million were secured by \$8.7 million of accounts receivable, and based on available and qualifying receivables, \$0.2 million of additional borrowings were available under the programs. At December 31, 2012, we had borrowed \$6.1 million under this facility. The interest rates under these programs are based on EURIBOR rates plus 1.75%. At September 30, 2013, the weighted-average interest rate was 1.9%.

Table of Contents*Off Balance Sheet Arrangements*

Consignment Arrangements for Precious Metals. In the production of some of our products, we use precious metals, some of which we obtain from financial institutions under consignment agreements with terms of one year or less. The financial institutions retain ownership of the precious metals and charge us fees based on the amounts we consign. We had on hand precious metals owned by participants in our precious metals program of \$89.5 million at September 30, 2013, and \$112.2 million at December 31, 2012, measured at fair value based on market prices for identical assets and net of credits. On occasion, we have been required to deliver cash collateral. While no deposits were outstanding at September 30, 2013, or December 31, 2012, we may be required to furnish cash collateral in the future based on the quantity and market value of the precious metals under consignment and the amount of collateral-free lines provided by the financial institutions. The amount of cash collateral required is subject to review by the financial institutions and can be changed at any time at their discretion, based in part on their assessment of our creditworthiness.

Cash and Cash Equivalents

As of September 30, 2013, we had \$35.9 million of cash and cash equivalents, of which \$35.6 million was held in foreign countries. Cash generated in the U.S. is generally used to pay down amounts outstanding under our revolving credit facility. If needed, we could repatriate the majority of foreign cash without the need to accrue and pay U.S. income taxes. We do not anticipate a liquidity need requiring such repatriation of these funds to the U.S.

Liquidity Requirements

Our liquidity requirements primarily include debt service, purchase commitments, labor costs, working capital requirements, restructuring expenditures, capital investments, precious metals cash collateral requirements, and postretirement obligations. We expect to meet these requirements in the long term through cash provided by operating activities and availability under existing credit facilities or other financing arrangements. Cash flows from operating activities are primarily driven by earnings before noncash charges and changes in working capital needs. We had additional borrowing capacity of \$238.5 million at September 30, 2013, and \$361.5 million at December 31, 2012, available under various credit facilities, primarily our revolving credit facility. We have taken a variety of actions to enhance liquidity and to ensure short-term covenant compliance, including ongoing restructuring activities, suspension of dividend payments on our common stock in 2009, and the sale of assets related to our solar pastes product line in 2013.

Our credit facilities and the indenture governing our senior notes contain a number of restrictive covenants, including those described in more detail in Note 6 to the consolidated financial statements under Item 8 of our Annual Report on Form 10-K for the year ended December 31, 2012. These covenants include customary operating restrictions that limit our ability to engage in certain activities, including additional loans and investments; prepayments, redemptions and repurchases of debt; and mergers, acquisitions and asset sales. We are also subject to customary financial covenants under our credit facilities, including a leverage ratio and an interest coverage ratio. These covenants under our credit facilities restrict the amount of our borrowings, reducing our flexibility to fund ongoing operations and strategic initiatives. These facilities and our senior notes are described in more detail in Capital Resources and Liquidity under Item 7 and in Note 6 to the consolidated financial statements under Item 8 of our Annual Report on Form 10-K for the year ended December 31, 2012.

We may from time to time seek to retire or repurchase our outstanding debt through open market purchases, privately negotiated transactions, or otherwise. Such repurchases, if any, will depend on prevailing market conditions, our liquidity requirements, contractual restrictions, and other factors. The amounts involved may be material.

Difficulties experienced in global capital markets could affect the ability or willingness of counterparties to perform under our various lines of credit, receivable sales programs, forward contracts, and precious metals program. These counterparties are major, reputable, multinational institutions, all having investment-grade credit ratings, except for one, which is not rated. Accordingly, we do not anticipate counterparty default. However, an interruption in access to external financing could adversely affect our business prospects and financial condition.

We assess on an ongoing basis our portfolio of businesses, as well as our financial and capital structure, to ensure that we have sufficient capital and liquidity to meet our strategic objectives. As part of this process, from time to time we evaluate the possible divestiture of businesses that are not critical to our core strategic objectives and, where appropriate, pursue the sale of such businesses. A reduced forecast for our solar pastes sales and a diminished outlook for our future opportunities in the solar market led to our decision to sell assets related to our solar pastes product line in 2013. We also evaluate and pursue acquisition opportunities that we believe will enhance our strategic position. Generally, we publicly announce divestiture and acquisition transactions only when we have entered into definitive agreements relating to those transactions.

Risk Factors

Certain statements contained here and in future filings with the SEC reflect the Company's expectations with respect to future performance and constitute *forward-looking statements* within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These statements are subject to a variety of uncertainties, unknown risks and other factors concerning the Company's operations and business environment, which are difficult to predict and are beyond the control of the Company. Factors that could adversely affect our future financial performance include those described under the heading *Risk Factors* in Item 1A of Part I of our Annual Report on Form 10-K for the year ended December 31, 2012.

Table of Contents**Item 3. Quantitative and Qualitative Disclosures About Market Risk**

The primary objective of the following information is to provide forward-looking quantitative and qualitative information about our exposure to instruments that are sensitive to fluctuations in interest rates and foreign currency exchange rates.

Our exposure to interest rate risk arises from our debt portfolio. We manage this risk by controlling the mix of fixed-rate versus variable-rate debt after considering the interest rate environment and expected future cash flows. Our objective is to limit variability in earnings, cash flows and overall borrowing costs caused by changes in interest rates, while preserving operating flexibility.

We operate internationally and enter into transactions denominated in foreign currencies. These transactions expose us to gains and losses arising from exchange rate movements between the dates foreign currencies are recorded and the dates they are settled. We manage this risk by entering into forward currency contracts that offset these gains and losses.

The notional amounts, net carrying amounts of assets (liabilities), and fair values associated with our exposure to these market risks and sensitivity analyses about potential gains (losses) resulting from hypothetical changes in market rates are presented below:

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Ferro is committed to maintaining disclosure controls and procedures that are designed to ensure that information required to be disclosed in its Exchange Act reports is recorded, processed, summarized, and reported within the time periods specified in the U.S. Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to its management, including its Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

As required by Rule 13a-15(b) of the Exchange Act, Ferro has carried out an evaluation, under the supervision and with the participation of its management, including its Chief Executive Officer and its Chief Financial Officer, of the effectiveness of the design and operation of its disclosure controls and procedures. The evaluation examined those disclosure controls and procedures as of September 30, 2013, the end of the period covered by this report. Based on that evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that the disclosure controls and procedures were effective as of September 30, 2013.

Changes in Internal Control over Financial Reporting

During the third quarter of 2013, there were no changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**PART II OTHER INFORMATION****Item 1. Legal Proceedings**

There are various lawsuits and claims pending against the Company and its consolidated subsidiaries. We do not currently expect the ultimate liabilities, if any, and expenses related to such lawsuits and claims to materially affect the consolidated financial position, results of operations, or cash flows of the Company.

Item 1A. Risk Factors

There were no material changes to the risk factors disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2012.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Our ability to pay common stock dividends is limited by certain covenants in our 2010 Credit Facility, as amended, and the bond indenture governing the Senior Notes. The covenant in our 2010 Credit Facility, as amended, is the more limiting of the two covenants and is described under the Revolving Credit Facility in Note 6 within Item 8 of the Company's Annual Report on Form 10-K for the year ended December 31, 2012.

The following table summarizes purchases of our common stock by the Company and affiliated purchasers during the three months ended September 30, 2013:
