(Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

FOR THE FISCAL YEAR ENDED December 31, 2013

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

FOR THE TRANSITION PERIOD FROM _____ TO _____.

Commission File Number: 001-32270

STONEMOR PARTNERS L.P.

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

80-0103159
(I.R.S. Employer
Identification No.)

311 Veterans Highway, Suite B

Levittown, Pennsylvania
(Address of principal executive offices)

19056
(Zip Code)

Registrant's telephone number, including area code (215) 826-2800

Securities registered pursuant to Section 12(b) of the Act:

Title of each class
Common Units

Name of each exchange on which registered
New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer, and smaller reporting company in Rule 12b-2 of the Exchange Act (Check one):

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company
Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the
Act). Yes No

The aggregate market value of the common units held by non-affiliates of the registrant was approximately \$522.5 million as of June 28, 2013 based on \$25.16 per unit, the closing price of the common units as reported on the New York Stock Exchange on that date.¹

The number of the registrant's outstanding common units at March 1, 2014 was 23,690,276.

Documents incorporated by reference: None

¹ The aggregate market value of the common units set forth above equals the number of the registrant's common units outstanding, reduced by the number of common units held by executive officers, directors and persons owning 10% or more of the registrant's common units, multiplied by the last reported sale price for the registrant's common units on June 28, 2013, the last business day of the registrant's most recently completed second fiscal quarter. The information provided shall in no way be construed as an admission that any person whose holdings are excluded from this figure is an affiliate of the registrant or that any person whose holdings are included in this figure is not an affiliate of the registrant and any such admission is hereby disclaimed. The information provided herein is included solely for record keeping purposes of the Securities and Exchange Commission.

Table of Contents**PART I****Item 1. Business****Overview**

We were formed as a Delaware limited partnership in April 2004 to own and operate the assets and businesses previously owned and operated by Cornerstone Family Services, Inc., (Cornerstone), which was converted into CFSI LLC, a limited liability company, prior to our initial public offering of common units representing limited partner interests on September 20, 2004. Cornerstone had been founded in 1999 by members of our management team and a private equity investment firm, which we refer to as McCown De Leeuw, in order to acquire a group of 123 cemetery properties and 4 funeral homes. On November 30, 2010, McCown De Leeuw transferred certain of its interests to MDC IV Trust U/T/A November 30, 2010, MDC IV Associates Trust U/T/A November 30, 2010 and Delta Trust U/T/A November 30, 2010, which we collectively refer to as the MDC IV Liquidating Trusts, and McCown De Leeuw was subsequently terminated. In this Annual Report on Form 10-K, unless the context otherwise requires, references to we, us, our, StoneMor, the Company, or the Partnership are to StoneMor Partners L.P. and its subsidiaries.

We are currently the second largest owner and operator of cemeteries in the United States. As of December 31, 2013, we operated 277 cemeteries in 27 states and Puerto Rico. We own 259 of these cemeteries and we manage or operate the remaining 18 under management or operating agreements with the nonprofit cemetery corporations that own the cemeteries. As of December 31, 2013, we also owned and operated 90 funeral homes in 18 states and Puerto Rico. Forty-one of these funeral homes are located on the grounds of the cemeteries that we own.

The cemetery products and services that we sell include the following:

Interment Rights	Merchandise	Services
burial lots	burial vaults	installation of burial vaults
lawn crypts	caskets	installation of caskets
mausoleum crypts	grave markers and grave marker bases	installation of other cemetery merchandise
cremation niches	memorials	other service items

We sell these products and services both at the time of death, which we refer to as at-need, and prior to the time of death, which we refer to as pre-need. Our sales of real property, including burial lots (with and without installed vaults), lawn and mausoleum crypts and cremation niches, generate qualifying income sufficient for us to be treated as a partnership for federal income tax purposes. In 2013, we performed 45,470 burials and sold 30,543 interment rights (net of cancellations). Based on our sales of interment spaces in 2013, our cemeteries have an aggregated weighted average remaining sales life of 240 years.

Our cemetery properties are located in Alabama, California, Colorado, Delaware, Florida, Georgia, Hawaii, Illinois, Indiana, Iowa, Kansas, Kentucky, Maryland, Michigan, Mississippi, Missouri, New Jersey, North Carolina, Ohio,

Oregon, Pennsylvania, Puerto Rico, Rhode Island, South Carolina, Tennessee, Virginia, Washington and West Virginia. One cemetery in Hawaii that we acquired in December 2007 is still awaiting regulatory approval and has not yet been conveyed to us. Our cemetery operations accounted for approximately 81.8%, 85.3% and 86.7% of our revenues in 2013, 2012 and 2011, respectively.

Our primary funeral home products are caskets and related items. Our funeral home services include consultation, the removal and preparation of remains, and the use of funeral home facilities for visitation and prayer services.

Our funeral homes are located in Alabama, Arkansas, California, Florida, Illinois, Indiana, Kansas, Maryland, Mississippi, Missouri, Ohio, Oregon, Pennsylvania, Puerto Rico, South Carolina, Tennessee, Virginia, Washington and West Virginia. Our funeral home revenues accounted for approximately 18.2%, 14.7% and 13.3% of our revenues in 2013, 2012 and 2011, respectively. Our funeral home operations are conducted through various wholly-owned subsidiaries that are treated as corporations for U.S. federal income tax purposes.

Operations

Segment Reporting and Related Information

We have five distinct reportable segments which are classified as Cemetery Operations Southeast, Cemetery Operations Northeast, Cemetery Operations West, Funeral Homes, and Corporate.

Table of Contents

We have chosen this level of organization and disaggregation of reportable segments due to the fact that a) each reportable segment has unique characteristics that set it apart from other segments; b) we have organized our management personnel at these operational levels; and c) it is the level at which our chief decision makers and other senior management evaluate performance.

Our Cemetery Operations segments sell interment rights, caskets, burial vaults, cremation niches, markers and other cemetery related merchandise. The nature of our customers differs in each of our regionally based Cemetery Operations segments. Cremation rates in the West region are substantially higher than they are in the Southeast region. Rates in the Northeast region tend to be somewhere between the two. Statistics indicate that customers who select cremation services have certain attributes that differ from customers who select other methods of interment. The disaggregation of cemetery operations into the three distinct regional segments is primarily due to these differences in customer attributes along with the previously mentioned management structure and senior management analysis methodologies.

Our Funeral Homes segment offers a range of funeral-related services such as family consultation, the removal of and preparation of remains and the use of funeral home facilities for visitation and prayer services. These services are distinctly different than the cemetery merchandise and services sold and provided by the Cemetery Operations segments.

Our Corporate segment includes various home office selling and administrative expenses that are not allocable to the other operating segments.

Cemetery Operations

Our cemetery operations include sales of cemetery interment rights, merchandise and services and the performance of cemetery maintenance and other services. An interment right entitles a customer to a burial space in one of our cemeteries and the perpetual care of that burial space. Burial spaces, or lots, are parcels of property that hold interred human remains. Our cemeteries require a burial vault to be placed in each burial lot. A burial vault is a rectangular container, usually made of concrete but also made of steel or plastic, which sits in the burial lot and in which the casket is placed. The top of the burial vault is buried approximately 18 to 24 inches below the surface of the ground, and the casket is placed inside the vault. Burial vaults prevent ground settling that otherwise occurs when a casket, placed directly in the ground, begins to decay creating uneven ground surface. Ground settling typically results in higher maintenance costs and increased potential liability for slip-and-fall accidents on the property. Lawn crypts are a series of closely spaced burial lots with preinstalled vaults and other improvements, such as landscaping, sprinkler systems and drainage. A mausoleum crypt is an above ground structure that may be designed for a particular customer, which we refer to as a private mausoleum, or it may be a larger building that serves multiple customers, which we refer to as a community mausoleum. Cremation niches are spaces in which the ashes remaining after cremation are stored. Cremation niches are often part of community mausoleums, although we sell a variety of cremation niches to accommodate our customers' preferences.

Grave markers, monuments and memorials are above ground products that serve as memorials by showing who is remembered, the dates of birth and death and other pertinent information. These markers, monuments and memorials include simple plates, such as those used in a community mausoleum or cremation niche, flush-to-the-ground granite or bronze markers, headstones or large stone obelisks.

One of the principal services we provide at our cemeteries is an opening and closing, which is the digging and refilling of burial spaces to install the vault and place the casket into the vault. With pre-need sales, there are usually two openings and closings. During the initial opening and closing, we install the burial vault in the burial space. We

usually perform this service shortly after the customer signs a pre-need contract. Advance installation allows us to withdraw the related funds from our merchandise trusts, making the amount in excess of our cost to purchase and install the vault available to us for other uses, and eliminates future merchandise trusting requirements for the burial vault and its installation. During the final opening and closing, we remove the dirt above the vault, open the lid of the vault, place the casket into the vault, close the vault lid and replace the ground cover. With at-need sales, we typically perform the initial opening and closing at the time we perform the final opening and closing. Our other services include the installation of other cemetery merchandise and the perpetual care related to interment rights.

As of December 31, 2013, we provided services to 18 cemeteries under management or operating agreements with the nonprofit cemetery corporations that own the cemeteries. These nonprofit cemeteries are organized as such either because state law requires cemetery properties to be owned by nonprofit entities, such as in New Jersey, or because they were originally established as nonprofit entities. We have voting rights, along with member owners of burial spaces, in the five New Jersey nonprofit cemeteries as a result of owning all of their outstanding certificates of indebtedness or interest. To obtain the benefit of professional management services, the remaining 13 nonprofit cemeteries have entered into agreements with us. The agreements under which we operate these 18 nonprofit cemeteries generally have terms ranging from 3 to 40 years (but some are subject to early termination rights and obligations) and provide us with management or operating fees that approximate what we would earn if we owned those cemeteries and held them in for-profit entities.

Table of Contents

In 2013, of the 18 cemeteries we operated under management or operating agreements, 2 cemeteries that we began operating under long-term operating agreements in 2009 did not qualify as acquisitions for accounting purposes. As a result, we did not consolidate all of the existing assets and liabilities related to these cemeteries. We have consolidated the existing assets and liabilities of each of these cemeteries – merchandise and perpetual care trusts as variable interest entities since we control and receive the benefits and absorb any losses from operating these trusts. Under these long-term operating agreements, which are subject to certain termination provisions, we are the exclusive operator of these cemeteries. We earn revenues related to sales of merchandise, services, and interment rights and incur expenses related to such sales and the maintenance and upkeep of these cemeteries. Upon termination of these contracts, we will retain all of the benefits and related contractual obligations incurred from sales generated during the contract period. We have also recognized the existing merchandise liabilities assumed as part of these agreements.

Funeral Home Operations

As of December 31, 2013, we owned, operated and/ or managed 90 funeral homes, 41 of which are located on the grounds of cemetery properties that we own. Our funeral homes offer a range of services to meet a family’s funeral needs, including family consultation, the removal and preparation of remains, provision of caskets and related funeral merchandise, the use of funeral home facilities for visitation, worship and funeral services and transportation services. Funeral home operations primarily generate revenues from at-need sales. Our funeral home segment has continued to grow and has become a larger part of our total revenues in each of the last three years.

We purchase caskets from Thacker Caskets, Inc. under a supply agreement that expires on December 31, 2015. This agreement entitles us to specified discounts on the price of caskets but gives Thacker Caskets, Inc. the right of first refusal on all of our casket purchases. We do not have minimum purchase requirements under this supply agreement.

Cremation Products and Services

We operate crematories at some of our cemeteries or funeral homes, but our primary cremation operations are sales of receptacles for cremated remains, such as urns, and the inurnment of cremated remains in niches or scattering gardens. While cremation products and services usually cost less than traditional burial products and services, they yield higher margins on a percentage basis and take up less space than burials. We sell cremation products and services on both a pre-need and at-need basis.

Seasonality

The death care business is relatively stable and predictable. Although we experience seasonal increases in deaths due to extreme weather conditions and winter flu, these increases have not historically had any significant impact on our results of operations. In addition, we perform fewer initial openings and closings in the winter when the ground is frozen.

Sales Contracts

Pre-need products and services are typically sold on an installment basis. At-need products and services are generally required to be paid for in full in cash by the customer at the time of sale. See Management’s Discussion and Analysis of Financial Condition and Results of Operations Overview Cemetery Operations Pre-need Sales and At-need Sales for a description of our pre-need and at-need products and services.

Trusts

Sales of cemetery products and services are subject to a variety of state regulations. In accordance with these regulations, we are required to establish and fund two types of trusts, merchandise trusts and perpetual care trusts, to ensure that we can meet our future obligations. Our funding obligations are generally equal to a percentage of sales proceeds of the products and services we sell. For a detailed discussion of these trusts, see Management's Discussion and Analysis of Financial Condition and Results of Operations Trusting.

Sales Personnel, Training and Marketing

As of December 31, 2013, we employed 834 full-time commissioned salespeople and 132 full-time sales support and telemarketing employees. We had eight regional sales vice presidents supporting our cemetery operations. They were supported by two Divisional Vice Presidents of Sales who report to our Chief Operating Officer. Individual salespersons are typically located at the cemeteries they serve and report directly to the cemetery sales manager. We have made a strong commitment to the ongoing education and training of our sales force and to salesperson retention in order to ensure our customers receive the highest quality customer service and to ensure compliance with all applicable requirements. Our training program includes classroom training at our headquarters, field training, continuously updated training materials that utilize media, such as the Internet, for interactive training and participation in industry seminars. We place special emphasis on training property sales managers, who are key elements to a successful pre-need sales program.

Table of Contents

We reward our salespeople with incentives for generating new customers. Sales force performance is evaluated by sales budgets, sales mix and closing ratios, which are equal to the number of contracts written, divided by the number of presentations that are made. Substantially all of our sales force is compensated based solely on performance. Commissions are augmented with various bonus and incentive packages to ensure a high quality, motivated sales force. We pay commissions to our sales personnel on pre-need contracts based upon a percentage of the value of the underlying contracts. Such commissions vary depending upon the type of merchandise and services sold. We also pay commissions on at-need contracts that are generally equal to a fixed percentage of the contract amount. In addition, cemetery managers receive an override commission that is equal to a percentage of the gross sales price of the contracts entered into by the salespeople assigned to the cemeteries they manage.

We generate sales leads through focused telemarketing, direct mail, television advertising, funeral follow-up and sales force cold calling, with the assistance of database mining and other marketing resources. We have created a marketing department to allow us to use more sophisticated marketing techniques to more effectively focus our telemarketing and direct sales efforts. Sales leads are referred to the sales force to schedule an appointment, most often at the customer's home. We believe these activities comply in all material respects with legal requirements.

Acquisitions and Long-Term Operating Agreements

Refer to Note 13 of our consolidated financial statements in Item 8 of this Form 10-K for a more detailed discussion of our acquisitions and long-term operating agreements. A summary of our acquisition activities is as follows:

2013

We completed two acquisitions during the year ended December 31, 2013 to acquire one cemetery in Virginia and six funeral homes in Florida. The aggregate fair value of the total consideration for these acquisitions was \$21.6 million. On September 26, 2013, we entered into the Lease and the Management Agreement with the Archdiocese of Philadelphia pursuant to which we will operate 13 cemeteries in Pennsylvania for a term of 60 years, subject to certain closing conditions and subject to early termination in certain circumstances. While there is no assurance, we expect to close this transaction in the first half of 2014.

2012

We completed six acquisitions during the year ended December 31, 2012 to acquire 5 cemeteries and 17 funeral homes. The acquired properties were located in Ohio, Illinois, California, Oregon and Florida. The aggregate fair value of the total consideration paid for these acquisitions was \$34.9 million. Effective March 31, 2012, we terminated a long-term operating agreement entered into in 2010 related to 3 cemeteries with the Archdiocese of Detroit, resulting in a gain of \$1.7 million.

2011

We completed six acquisitions during the year ended December 31, 2011 to acquire 17 cemeteries and 12 funeral homes. The acquired properties were located in Mississippi, Missouri, North Carolina, Puerto Rico, Tennessee and Virginia. The aggregate fair value of the total consideration paid for these acquisitions was \$16.4 million. On December 30, 2011, we sold one funeral home in West Virginia for \$0.1 million, resulting in a gain of \$0.1 million.

Competition

Our cemeteries and funeral homes generally serve customers that live within a 10 to 15-mile radius of a property's location. Within this localized area, we face competition from other cemeteries and funeral homes located in the area. Most of these cemeteries and funeral homes are independently owned and operated, and most of these owners and operators are smaller than we are and have fewer resources than we do. We generally face limited competition from the two publicly held death care companies that have U.S. operations—Service Corporation International and Carriage Services, Inc.—as they do not directly operate cemeteries in the same local geographic areas where we operate.

Within a localized area of competition, we compete primarily for at-need sales because many of the independently owned, local competitors either do not have pre-need sales programs or have pre-need programs that are not as developed as ours. Most of these competitors do not have as many of the resources that are available to us to launch and grow a substantial pre-need sales program. The number of customers that cemeteries and funeral homes are able to attract is largely a function of reputation and heritage, although competitive pricing, professional service and attractive, well maintained and conveniently located facilities are also important factors. The sale of cemetery and funeral home products and services on a pre-need basis has increasingly been used by many companies as an important marketing tool. Due to the importance of reputation and heritage, increases in customer base are usually gained over a long period of time.

Table of Contents

Competitors within a localized area have an advantage over us if a potential customer's family members are already buried in the competitor's cemetery. If either of the two publicly held death care companies identified above operated, or in the future were to operate, cemeteries within close proximity of our cemeteries, they may have a competitive advantage over us because they have greater financial resources available to them due to their size and access to the capital markets.

We believe that we currently face limited competition for cemetery acquisitions. The two publicly held death care companies identified above, as well as Stewart Enterprises, Inc., which was acquired by Service Corporation International in December 2013, have historically been the industry's primary consolidators but have largely curtailed cemetery acquisition activity since 1999. Furthermore, these companies continue to generate a majority of their revenues from funeral home operations. Based on the relative levels of cemetery operations and funeral home operations of these publicly traded death care companies, which are disclosed in their SEC filings, we believe that we are the only public death care company that focuses a significant portion of its efforts on cemetery operations.

Regulation

General

Our operations are subject to regulation, supervision and licensing under federal, state and local laws which impacts the goods and services that we may sell and the manner in which we may furnish goods and services.

Cooling-Off Legislation

Each of the states where our current cemetery and funeral home properties are located has cooling-off legislation with respect to pre-need sales of cemetery and funeral home products and services. This legislation generally requires us to refund proceeds from pre-need sales contracts if canceled by the customer for any reason within three to thirty days, or in certain states until death, from the date of the contract, depending on the state (and some states permit cancellation and require refund beyond that time). The Federal Trade Commission, or FTC, also requires a cooling-off period of three business days for door to door sales, during which time a contract may be cancelled entitling a customer to refund of the funds paid.

Trusting

Sales of cemetery interment rights and pre-need sales of cemetery and funeral home merchandise and services are generally subject to trusting requirements imposed by state laws in most of the states where we operate. See Management's Discussion and Analysis of Financial Condition and Results of Operations Trusting.

Truth in Lending Act and Regulation Z

Our pre-need installment contracts are subject to the federal Truth-in-Lending Act, or TILA, and the regulations thereunder, which are referred to as Regulation Z. TILA and Regulation Z promote the informed use of consumer credit by requiring us to disclose, among other things, the annual percentage rate, finance charges and amount financed when extending credit to consumers.

Other Consumer Credit-Related Laws and Regulations

As a provider of consumer credit and a business that generally deals with consumers, we are subject to various other state and federal laws covering matters such as credit discrimination, the use of credit reports, identity theft, the

handling of consumer information, consumer privacy, marketing and advertising, debt collection, extensions of credit to service members, and prohibitions on unfair or deceptive trade practices.

The Dodd-Frank Wall Street Reform and Consumer Protection Act, or Dodd-Frank

Dodd-Frank, signed into law by President Obama on July 21, 2010, created a new federal Bureau of Consumer Financial Protection, or the Bureau. In addition to transferring to the Bureau rule-writing authority for nearly all federal consumer finance-related laws and giving the Bureau rule-writing authority in other areas, Dodd-Frank empowers the Bureau to conduct examinations and bring enforcement actions against certain consumer credit providers and other entities offering consumer financial products or services. While not presently subject to examination by the Bureau, we potentially could be in the future in connection with our pre-need installment contracts. The Bureau also has authority to conduct investigations and bring enforcement actions against providers of consumer financial services, including providers over which it may not currently have examination authority. The Bureau may seek penalties and other relief on behalf of consumers that are substantially in excess of the remedies available under such laws prior to Dodd-Frank. On July 21, 2011, the Bureau officially assumed rule-writing and enforcement authority for most federal consumer finance laws, as well as authority to write rules to prohibit unfair, deceptive or abusive practices related to consumer financial products and services.

Table of Contents

Telemarketing Laws

We are subject to the requirements of two federal statutes governing telemarketing practices, the Telephone Consumer Protection Act, or TCPA, and the Telemarketing and Consumer Fraud and Abuse Prevention Act, or TCFAPA. These statutes impose significant penalties on those who fail to comply with their mandates. The Federal Communications Commission, or FCC, is the federal agency with authority to enforce the TCPA, and the FTC, has jurisdiction under the TCFAPA. The FTC and FCC jointly administer a national do not call registry, which consumers can join in order to prevent unwanted telemarketing calls. Primarily as a result of implementation of the do not call legislation and regulations, the percentage of our pre-need sales generated from telemarketing leads has decreased substantially in the past ten years. We are also subject to similar telemarketing consumer protection laws in all states in which we currently operate. These states' statutes similarly permit consumers to prevent unwanted telephone solicitations. In addition, in cases where telephone solicitations are permitted, there are various restrictions and requirements under state and federal law in connection with such calls.

Occupational Safety and Health Act and Environmental Law Requirements

We are subject to the requirements of the Occupational Safety and Health Act, or OSHA, and comparable state statutes. OSHA's regulatory requirement known as the Hazard Communication Standard, the Emergency Planning and Community Right-to-Know Act (EPCRA) and similar state statutes require us to report information about hazardous materials used or maintained for our operations to state, federal and local authorities. We may also be subject to Tier 1 or Tier 2 Emergency and Hazardous Chemical Inventory reporting requirements under EPCRA depending on the amount of hazardous materials maintained on-site at a particular facility. We are also subject to the federal Americans with Disabilities Act and similar laws which, among other things, may require that we modify our facilities to comply with minimum accessibility requirements for disabled persons.

Federal Trade Commission

Our funeral home operations are comprehensively regulated by the FTC under Section 5 of the Federal Trade Commission Act and a trade regulation rule for the funeral industry promulgated thereunder, referred to as the Funeral Rule. The Funeral Rule requires funeral service providers to disclose the prices for their goods and services as soon as the subject of price arises in a discussion with a potential customer (this entails presenting various itemized price lists if the consultation is in person, and readily answering all price-related questions posed over the telephone), and to offer their goods and services on an unbundled basis. The Funeral Rule also prohibits misrepresentations in connection with our sale of goods and services, and requires that the consumer receive an itemized statement of the goods and services purchased. Through these regulations, the FTC sought to give consumers the ability to compare prices among funeral service providers and to avoid buying packages containing goods or services that they did not want. The unbundling of goods from services has also opened the way for third-party, discount casket sellers to enter the market, although they currently do not possess substantial market share.

In addition, our pre-need installment contracts for sales of cemetery and funeral home merchandise and services are subject to the FTC's Holder Rule, which requires disclosure in the installment contract that any holder of the contract is subject to all claims and defenses that the consumer could assert against the seller of the goods or services, subject to certain limitations. These contracts are also subject to the FTC's Credit Practices Rule, which prohibits certain credit loan terms and practices.

Future Enactments and Regulation

Federal and state legislatures and regulatory agencies frequently propose new laws, rules and regulations and new interpretations of existing laws, rules and regulations which, if enacted or adopted, could have a material adverse effect on our operations and on the death care industry in general. A significant portion of our operations is located in California, Pennsylvania, Michigan, New Jersey, Virginia, Maryland, North Carolina, Ohio, Indiana, Florida and West Virginia and any material adverse change in the regulatory requirements of those states applicable to our operations could have a material adverse effect on our results of operations. We cannot predict the outcome of any proposed legislation or regulations or the effect that any such legislation or regulations, if enacted or adopted, might have on us.

Environmental Regulations and Liabilities

Our operations are subject to federal, state and local environmental regulations in three principal areas: (1) crematories for emissions to air that may trigger requirements under the Clean Air Act, (2) funeral homes for the management of hazardous materials and medical wastes and (3) cemeteries and funeral homes for the management of solid waste, underground and above ground storage tanks and discharges to wastewater treatment systems and/ or septic systems.

Table of Contents

Clean Air Act

The Federal Clean Air Act and similar state laws, which regulate emissions into the air, can affect crematory operations through permitting and emissions control requirements. Our cremation operations may be subject to Clean Air Act regulations under federal and state law and may be subject to enforcement actions if these operations do not conform to the requirements of these laws.

Emergency Planning and Community Right-to-Know Act

As noted above, federal, state and local regulations apply to the storage and use of hazardous materials at our facilities. Depending on the types and quantities of materials we manage at any particular facility, we may be required to maintain and submit Material Safety Data Sheets and inventories of these materials located at our facilities to the regulatory authorities in compliance with EPCRA or similar state statutes.

Comprehensive Environmental Response, Compensation, and Liability Act

The Comprehensive Environmental Response, Compensation, and Liability Act, or CERCLA, and similar state laws affect our cemetery and funeral home operations by, among other things, imposing investigation and remediation obligations for threatened or actual releases of hazardous substances that may endanger public health or welfare or the environment. Under CERCLA and similar state laws, strict, joint and several liability may be imposed upon generators, site owners and operators, and others regardless of fault or the legality of the original disposal activity. Our operations include the use of some materials that may meet the definition of hazardous substances under CERCLA or state laws and thus may give rise to liability if released to the environment through a spill or release. Should we acquire new properties with pre-existing conditions triggering CERCLA or similar state liability, we may become liable for responding to those conditions under CERCLA or similar state laws. We may become involved in proceedings, litigation or investigations at one or more sites where releases of hazardous substances have occurred, and we cannot assure you that the associated costs and potential liabilities would not be material.

Underground and Above Ground Storage Tank Laws and Solid Waste Laws

Federal, state and local laws regulate the installation, removal, operations and closure of underground storage tanks, or USTs and above ground storage tanks, or ASTs, which are located at some of our facilities as well as the management and disposal of solid waste. Most of the USTs and ASTs contain petroleum for heating our buildings or are used for vehicle maintenance, or general operations. Depending upon the age and integrity of the USTs and ASTs, they may require upgrades, removal and/or closure, and remediation may be required if there has been a potential discharge or release of petroleum into the environment. All of the aforementioned activities may require us to incur capital costs and expenses to ensure continued compliance with environmental requirements. Should we acquire properties with existing USTs and ASTs that are not in compliance with environmental requirements, we may become liable for responding to releases to the environment or for costs associated with upgrades, removal and/or closure costs, and we cannot assure you that the costs or liabilities will not be material in that event. Solid wastes have been disposed of at some of our cemeteries, both lawfully and unlawfully. Prior to acquiring a cemetery, an environmental site assessment is usually conducted to determine, among other conditions, if a solid waste disposal area or landfill exists on the parcel which requires removal, cleaning or management. Depending upon the existence of any such solid waste disposal areas, we may be required by the applicable regulatory authority to remove the waste materials or to conduct remediation and we cannot assure you that the costs or liabilities will not be material in that event.

Employees

As of December 31, 2013, our general partner and its affiliates employed 2,946 full-time and 71 part-time employees. Five employees at one of our cemeteries located in New Jersey are represented by a union and are subject to a collective bargaining agreement which expires in September 2015. Twenty-five employees at eleven of our cemeteries located in Pennsylvania are represented by three different unions and are subject to collective bargaining agreements that expire in November 2014, June 2015 and June 2017. Four employees at one of our cemeteries located in Illinois are represented by a union and are subject to a collective bargaining agreement which expires in September 2014. Nine employees at one of our locations in California are represented by a union and are subject to a collective bargaining agreement that expires in June 2017. Eight employees at one cemetery in Ohio are represented by a union and are subject to a collective bargaining agreement that is currently being renegotiated. We believe that our relationship with our employees is good.

Financial Information

Information for each of our segments is presented in Part II, Item 8. Financial Statements and Supplementary Data in this report.

Item 1A. Risk Factors

Risk Factors Related to Our Business

Important factors that could cause actual results to differ materially from our expectations include, but are not limited to, the risks set forth below. The risks described below should not be considered comprehensive and all-inclusive. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results. If any events occur that give rise to the following risks, our business, financial condition or results of operations could be materially and adversely impacted. These risk factors should be read in conjunction with other information set forth in this Annual Report on Form 10-K, including our consolidated financial statements and the related notes. Many such factors are beyond our ability to control or predict. Investors are cautioned not to put undue reliance on forward-looking statements that involve risks and uncertainties.

We may not have sufficient cash from operations to continue paying distributions at their current level, or at all, after we have paid our expenses, including the expenses of our general partner, funded merchandise and perpetual care trusts and established necessary cash reserves.

The amount of cash we can distribute on our units principally depends upon the amount of cash we generate from operations, which fluctuates from quarter to quarter based on, among other things:

the volume of our sales;

the prices at which we sell our products and services; and

the level of our operating and general and administrative costs.

In addition, the actual amount of cash we will have available for distribution will depend on other factors, such as working capital borrowings, capital expenditures and funding requirements for trusts and our ability to withdraw amounts from trusts.

If we do not generate sufficient cash to continue paying distributions at their current level, the market price of our common units may decline materially. We expect that we will need working capital borrowings of approximately \$21.0 million during the twelve-month period ending December 31, 2014 in order to have sufficient operating surplus to pay distributions at their current level on all of our common units for that period, although the actual amount of working capital borrowings could be materially more or less. These working capital borrowings enable us to finance the build-up in our accounts receivables, and to construct mausoleums and purchase products for our pre-need sales in advance of the time of need which, in turn, allows us to generate available cash for operating surplus over time by accessing the funds held in trust for the products purchased.

Our substantial level of indebtedness could materially adversely affect our ability to generate sufficient cash for distribution to our unitholders, to fulfill our debt obligations and to operate our business.

We have a substantial amount of debt, which requires significant interest and principal payments. As of December 31, 2013, we had approximately \$114.0 million of total debt outstanding on a revolving credit facility that matures in January 2017, which would give us approximately \$26.0 million of available borrowing capacity under our credit facility. In addition, as of December 31, 2013, we had \$175.0 million aggregate principal amount of 7.875% Senior Notes due 2021 outstanding. Leverage makes us more vulnerable to economic downturns. Because we are obligated to dedicate a portion of our cash flow to service our debt obligations, our cash flow available for operations and for distribution to our unitholders will be reduced. The amount of indebtedness we have could limit our flexibility in planning for, or reacting to, changes in the markets in which we compete, limit our ability to obtain additional financing, if necessary, for working capital expenditures, acquisitions or other purposes, and require us to dedicate more cash flow to service our debt than we desire. Our ability to satisfy our indebtedness as required by the terms of our debt will be dependent on, among other things, the successful execution of our long-term strategic plan. Subject to limitations in our debt obligations, we may incur additional debt in the future, for acquisitions or otherwise, and servicing this debt could further limit our cash flow available for operations and distribution to unitholders.

Table of Contents

Restrictions in our existing and future debt agreements could limit our ability to make distributions to you or capitalize on acquisition and other business opportunities.

The operating and financial restrictions and covenants in our senior notes, our revolving credit facility and any future financing agreements could restrict our ability to finance future operations or capital needs or to expand or pursue our business activities. For example, our senior notes and our revolving credit facility contain covenants that restrict or limit our ability to:

enter into a new line of business;

enter into any agreement of merger or acquisition;

sell, transfer, assign or convey assets;

grant certain liens;

incur or guarantee additional indebtedness;

make certain loans, advances and investments;

declare and pay dividends and distributions;

enter into transactions with affiliates; and

make voluntary payments or modifications of indebtedness.

In addition, our revolving credit facility contains covenants requiring us to maintain certain financial ratios and tests. These restrictions may also limit our ability to obtain future financings. Our ability to comply with the covenants and restrictions contained in our senior notes and revolving credit facility agreement may be affected by events beyond our control, including prevailing economic, financial and industry conditions. If market or other economic conditions continue to deteriorate, our ability to comply with these covenants may be impaired. See Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources Long-Term Debt.

In addition, our debt obligations limit our ability to make distributions to our unitholders. Our senior notes and revolving credit facility obligations prohibit us from making such distributions if we are in default, including with regard to our revolving credit facility obligations as a result of our failure to maintain specified financial ratios. We cannot assure you that we will maintain these specified ratios and satisfy these tests for distributing available cash from operating surplus.

If we violate any of the restrictions, covenants, ratios or tests in our revolving credit facility agreement or senior notes indenture, the lenders will be able to accelerate the maturity of all borrowings thereunder, cause cross-default and demand repayment of amounts outstanding, and our lenders' commitment to make further loans to us under the revolving credit facility may terminate. We might not have, or be able to obtain, sufficient funds to make these accelerated payments. Any subsequent replacement of our debt obligations or any new indebtedness could have similar or greater restrictions.

Any reductions in the principal or the earnings of the investments held in merchandise and perpetual care trusts could adversely affect our revenues and cash flow.

A substantial portion of our revenue is generated from investment returns that we realize from merchandise and perpetual care trusts. Unstable economic conditions have, at times, caused us to experience declines in the fair value of the assets held in these trusts. Future cash flows could be negatively impacted if we are forced to liquidate assets that are in impaired positions.

We invest primarily for current income. We rely on the interest and dividends paid by the assets in our trusts to provide both revenue and cash flow. Interest income from fixed-income securities is particularly susceptible to changes in interest rates and declines in credit worthiness while dividends from equity securities are susceptible to the issuer's ability to make such payments.

Any decline in the interest rate environment or the credit worthiness of our debt issuers or any suspension or reduction of dividends could have a material adverse effect on our financial condition and results of operations.

In addition, any significant or sustained unrealized investment losses could result in merchandise trusts having insufficient funds to cover our cost of delivering products and services. In this scenario, we would be required to use our operating cash to deliver those products and perform those services, which could decrease our cash available for distribution.

Pre-need sales typically generate low or negative cash flow in the periods immediately following sales which could adversely affect our ability to make distributions to our unitholders.

When we sell cemetery merchandise and services on a pre-need basis, we pay commissions on the sale to our salespeople and are required by state law to deposit a portion of the sales proceeds into a merchandise trust. In addition, most of our customers finance

Table of Contents

their pre-need purchases under installment contracts payable over a number of years. Depending on the trusting requirements of the states in which we operate, the applicable sales commission rates and the amount of the down payment, our cash flow from sales to customers through installment contracts is typically negative until we have collected the related receivable or until we purchase the products or perform the services and are permitted to withdraw funds we have deposited in the merchandise trust. To the extent we increase pre-need sales, state trusting requirements are increased and we delay the performance of the services we sell on a pre-need basis, our cash flow immediately following pre-need sales may be further reduced, and our ability to make distributions to our unitholders could be adversely affected.

The cemetery and funeral home industry continues to be competitive.

We face competition in all of our markets. Most of our competitors are independent operations. Our ability to compete successfully depends on our management's forward vision, timely responses to changes in the business environment, our cemeteries and funeral homes' ability to maintain a good reputation and high professional standards as well as offer products and services at competitive prices. We have historically experienced price competition from independent cemetery and funeral home operators. If we are unable to successfully compete, our financial condition, results of operations and cash flows could be materially adversely affected.

Because fixed costs are inherent in our business, a decrease in our revenues can have a disproportionate effect on our cash flow and profits.

Our business requires us to incur many of the costs of operating and maintaining facilities, land and equipment regardless of the level of sales in any given period. For example, we must pay salaries, utilities, property taxes and maintenance costs on our cemetery properties and funeral homes regardless of the number of interments or funeral services we perform. If we cannot decrease these costs significantly or rapidly when we experience declines in sales, declines in sales can cause our margins, profits and cash flow to decline at a greater rate than the decline in our revenues.

Our failure to attract and retain qualified sales personnel and management could have an adverse effect on our business and financial condition.

Our ability to attract and retain a qualified sales force and other personnel is an important factor in achieving future success. Buying cemetery and funeral home products and services, especially at-need products and services, is very emotional for most customers, so our sales force must be particularly sensitive to our customers' needs. We cannot assure you that we will be successful in our efforts to attract and retain a skilled sales force. If we are unable to maintain a qualified and productive sales force, our revenues may decline and our cash available for distribution may decrease.

Our success also depends upon the services and capabilities of our management team. Management establishes the tone at the top by which an environment of ethical values, operating style and management philosophy is fostered. The inability of our senior management team to maintain a proper tone at the top or the loss of services of one or more members of senior management as well as the inability to attract qualified managers or other personnel could have a material adverse effect on our business, financial condition, and results of operations. We may not be able to locate or employ on acceptable terms qualified replacements for senior management or key employees if their services were no longer available. We do not maintain key employee insurance on any of our executive officers.

We may not be able to identify, complete, fund or successfully integrate additional cemetery acquisitions which could have an adverse effect on our results of operations.

A primary component of our business strategy is to grow through acquisitions of cemeteries and, to a lesser extent, funeral homes. We cannot assure you that we will be able to identify and acquire cemeteries on terms favorable to us or at all. We may face competition from other death care companies in making acquisitions. Historically, we have funded a significant portion of our acquisitions through borrowings. Our ability to make acquisitions in the future may be limited by our inability to secure adequate financing, restrictions under our existing or future debt agreements, competition from third parties or a lack of suitable properties. As of December 31, 2013, we had approximately \$26.0 million of available borrowing capacity under our revolving credit facility.

In addition, if we complete acquisitions, we may encounter various associated risks, including the possible inability to integrate an acquired business into our operations, diversion of management's attention and unanticipated problems or liabilities, some or all of which could have a material adverse effect on our operations and financial performance. Also, when we acquire cemeteries that do not have an existing pre-need sales program or a significant amount of pre-need products and services that have been sold but not yet purchased or performed, the operation of the cemetery and implementation of a pre-need sales program after acquisition may require significant amounts of working capital. This may make it more difficult for us to make acquisitions.

If the trend toward cremation in the United States continues, our revenues may decline which could have an adverse effect on our business and financial condition.

We and other death care companies that focus on traditional methods of interment face competition from the increasing number of cremations in the United States. Industry studies indicate that the percentage of cremations has steadily increased and that cremations represented approximately 43% of the United States death care market in 2012. This percentage of cremations is expected to continue to increase. Because the products and services associated with cremations, such as niches and urns, produce lower revenues than the products and services associated with traditional interments, a continuing trend toward cremations may reduce our revenues.

Table of Contents

Declines in the number of deaths in our markets can cause a decrease in revenues.

Declines in the number of deaths could cause at-need sales of cemetery and funeral home merchandise and services to decline and could cause a decline in the number of pre-need sales, both of which could decrease revenues. Changes in the number of deaths can vary among local markets and from quarter to quarter, and variations in the number of deaths in our markets or from quarter to quarter are not predictable. However, generally, the number of deaths fluctuates with the seasons with more deaths occurring during the winter months primarily resulting from pneumonia and influenza. These variations can cause revenues to fluctuate.

We rely significantly on information technology and any failure, inadequacy, interruption or security lapse of that technology, including any cybersecurity incidents, could harm our ability to operate our business effectively.

Our ability to manage and maintain our internal reports effectively and integration of new business acquisitions depends significantly on our enterprise resource planning system and other information systems. Some of our information technology systems may experience interruptions, delays or cessations of service or produce errors in connection with ongoing systems implementation work. Cybersecurity attacks in particular are evolving and include, but are not limited to, malicious software, attempts to gain unauthorized access to data and other electronic security breaches that could lead to disruptions in systems, misappropriation of our confidential or otherwise protected information and corruption of data. The failure of these systems to operate effectively or to integrate with other systems, or a breach in security or other unauthorized access of these systems, may also result in reduced efficiency of our operations and could require significant capital investments to remediate any such failure, problem or breach, all of which could adversely affect our business, financial condition and results of operations.

The financial condition of third-party insurance companies that fund our pre-need funeral contracts may impact our financial condition, results of operations, or cash flows.

Where permitted, customers may arrange their pre-need funeral contract by purchasing a life insurance or annuity policy from third-party insurance companies. The customer/policy holder assigns the policy benefits to our funeral home to pay for the pre-need funeral contract at the time of need. If the financial condition of the third-party insurance companies were to deteriorate materially because of market conditions or otherwise, there could be an adverse effect on our ability to collect all or part of the proceeds of the life insurance policy, including the annual increase in the death benefit. Failure to collect such proceeds could have a material adverse effect on our financial condition, results of operations, or cash flows.

Regulatory and Legal Risks

Our operations are subject to regulation, supervision and licensing under numerous federal, state and local laws, ordinances and regulations, including extensive regulations concerning trusts/escrows, pre-need sales, cemetery ownership, funeral home ownership, marketing practices, crematories, environmental matters and various other aspects of our business.

If state laws or interpretations of existing state laws change or if new laws are enacted, we may be required to increase trust/escrow deposits or to alter the timing of withdrawals from trusts/escrows, which may have a negative impact on our revenues and cash flow.

We are required by most state laws to deposit specified percentages of the proceeds from our pre-need and at-need sales of interment rights into perpetual care trusts and generally proceeds from our pre-need sales of cemetery and funeral home products and services into merchandise trusts/escrows. These laws also determine when we are allowed

to withdraw funds from those trusts/escrows. If those laws or the interpretations of those laws change or if new laws are enacted, we may be required to deposit more of the sales proceeds we receive from our sales into the trusts/escrows or to defer withdrawals from the trusts/escrows, thereby decreasing our cash flow until we are permitted to withdraw the deposited amounts. This could also reduce our cash available for distribution.

If state laws or their interpretations change, or new laws are enacted relating to the ownership of cemeteries and funeral homes, our business, financial condition and results of operations could be adversely affected.

Some states require cemeteries to be organized in the nonprofit form but permit those nonprofit entities to contract with for-profit companies for management services. If state laws change or new laws are enacted that prohibit us from managing cemeteries in those states, then our business, financial condition and results of operations could be adversely affected. Some state laws restrict ownership of funeral homes to licensed funeral directors. If state laws change or new laws are enacted that prohibit us from managing funeral homes in those instances, then our business, financial condition and results of operations could be adversely affected.

Table of Contents

We are subject to legal restrictions on our marketing practices that could reduce the volume of our sales which could have an adverse effect on our business, operations and financial condition.

The enactment or amendment of legislation or regulations relating to marketing activities may make it more difficult for us to sell our products and services. For example, the federal do not call legislation has adversely affected our ability to market our products and services using telephone solicitation by limiting who we may call and increasing our costs of compliance. As a result, we rely heavily on direct mail marketing and telephone follow-up with existing contacts. Additional laws or regulations limiting our ability to market through direct mail, over the telephone, through Internet and e-mail advertising or door-to-door may make it difficult to identify potential customers, which could increase our costs of marketing. Both increases in marketing costs and restrictions on our ability to market effectively could reduce our revenues and could have an adverse effect on our business, operations and financial condition, as well as our ability to make cash distributions to you.

We are subject to environmental and health and safety laws and regulations that may adversely affect our operating results.

Our cemetery and funeral home operations are subject to numerous federal, state and local environmental and health and safety laws and regulations. We may become subject to liability for the removal of hazardous substances and solid waste under CERCLA and other federal and state laws. Under CERCLA and similar state laws, strict, joint and several liability may be imposed on various parties, regardless of fault or the legality of the original disposal activity. Our funeral home, cemetery and crematory operations include the use of some materials that may meet the definition of hazardous substances under CERCLA or state laws and thus may give rise to liability if released to the environment through a spill or release. We cannot assure you that we will not face liability under CERCLA or state laws for any environmental conditions at our facilities, and we cannot assure you that these liabilities will not be material. Our cemetery and funeral home operations are subject to regulation of underground and above ground storage tanks and laws managing the disposal of solid waste. If new requirements under local, state or federal laws were to be adopted, and were more stringent than existing requirements, new permits or capital expenditures may be required.

Our funeral home operations are generally subject to federal and state laws and regulations regarding the disposal of medical waste, and are also subject to regulation by federal, state or local authorities under the EPCRA. We are required by EPCRA to maintain and report to the regulatory authorities, if applicable thresholds are met, a list of any hazardous chemicals and extremely hazardous substances, which are stored or used at our facilities.

Our crematory operations may be subject to regulation under the federal Clean Air Act and any analogous state laws. If new regulations applicable to our crematory operations were to be adopted, they could require permits or capital expenditures that could increase our costs of operation and compliance.

Litigation or legal proceedings could expose us to significant liabilities and damage our reputation.

From time to time, we are party to various claims and legal proceedings, including, but not limited to, employment, cemetery or burial practices, and other litigation. Adverse outcomes in the pending cases may result in monetary damages or injunctive relief against us, as litigation and other claims are subject to inherent uncertainties. For each of our outstanding legal matters, we evaluate the merits of the case, our exposure to the matter, possible legal or settlement strategies, and the likelihood of an unfavorable outcome. We base our assessments, estimates and disclosures on the information available to us at the time. Actual outcomes or losses may differ materially from assessments and estimates. Costs to defend litigation claims and legal proceedings and the cost of actual settlements, judgments or resolutions of these claims and legal proceedings may negatively affect our business and financial performance. We hold insurance policies that may reduce cash outflows with respect to an adverse outcome of certain

litigation matters, but may exclude certain claims arising under the Fair Labor Standards Act. To the extent that our management will be required to participate in or otherwise devote substantial amounts of time to the defense of these matters, such activities would result in the diversion of our management resources from our business operations and the implementation of our business strategy, which may negatively impact our financial position and results of operations. Any adverse publicity resulting from allegations made in litigation claims or legal proceedings may also adversely affect our reputation, which in turn could adversely affect our results of operations.

Risk Factors Related to an Investment in Us

Our general partner and its affiliates have conflicts of interest and limited fiduciary duties, which may permit them to favor their own interests to your detriment.

CFSI LLC owns all of the Class A units of our general partner. Conflicts of interest may arise between CFSI LLC and its affiliates, including our general partner, on the one hand, and us and our unitholders, on the other hand. As a result of these conflicts, our general partner may favor its own interests and the interests of its affiliates over the interests of the unitholders. These conflicts include, among others, the following situations:

The board of directors of our general partner is elected by the owners of our general partner. Although our general partner has a fiduciary duty to manage us in good faith, the directors of our general partner also have a fiduciary duty to manage our general partner in a manner beneficial to the owners of our general partner. By purchasing common units, unitholders will be deemed to have consented to some actions and conflicts of interest that might otherwise constitute a breach of fiduciary or other duties under applicable law.

Table of Contents

Our partnership agreement limits the liability of our general partner, reduces its fiduciary duties and restricts the remedies available to unitholders for actions that might, without the limitations, constitute breaches of fiduciary duty.

Our general partner determines the amount and timing of asset purchases and sales, capital expenditures, borrowings, issuances of additional limited partner interests and reserves, each of which can affect the amount of cash that is distributed to unitholders.

Our partnership agreement does not restrict our general partner from causing us to pay it or its affiliates for any services rendered to us or entering into additional contractual arrangements with any of these entities on our behalf.

Our general partner controls the enforcement of obligations owed to us by our general partner and its affiliates.

In some instances, our general partner may cause us to borrow funds or sell assets outside of the ordinary course of business in order to permit the payment of distributions, even if the purpose or effect of the borrowing is to make distributions in respect of incentive distribution rights.

Holders of our common units have limited voting rights and are not entitled to elect our general partner or its directors, which could reduce the price at which the common units will trade.

Unitholders have only limited voting rights on matters affecting our business and, therefore, limited ability to influence management's decisions regarding our business. Unitholders did not select our general partner or elect the board of directors of our general partner and will have no right to select our general partner or elect its board of directors in the future. We are not required to have a majority of independent directors on our board. The board of directors of our general partner, including the independent directors, is chosen entirely by the owners of our general partner and not our unitholders. As a result of these limitations, the price at which the common units will trade could be diminished because of the absence or reduction of a takeover premium in the trading price.

Our partnership agreement restricts the voting rights of unitholders owning 20% or more of our common units.

Unitholders' voting rights are further restricted by the partnership agreement provision providing that any units held by a person that owns 20% or more of any class of units then outstanding, other than the general partner, its affiliates, their transferees and persons who acquired such units with the prior approval of the board of directors of our general partner, cannot be voted on any matter. In addition, the partnership agreement contains provisions limiting the ability of unitholders to call meetings or to acquire information about our operations, as well as other provisions limiting the unitholders' ability to influence the manner or direction of management.

Our general partner can transfer its ownership interest in us without unitholder consent under certain circumstances, and the control of our general partner may be transferred to a third party without unitholder consent.

Our general partner may transfer its general partner interest to a third party in a merger or in a sale of all or substantially all of its assets without the consent of the unitholders. Furthermore, there is no restriction in the

partnership agreement on the ability of the owners of our general partner to transfer their ownership interest in the general partner to a third party. The new owner of our general partner would then be in a position to replace the board of directors and officers of the general partner with its own choices and thereby influence the decisions taken by the board of directors and officers.

We may issue additional common units without your approval, which would dilute your existing ownership interests.

We may issue an unlimited number of limited partner interests of any type without the approval of the unitholders.

The issuance of additional common units or other equity securities of equal or senior rank will have the following effects:

your proportionate ownership interest in us will decrease;

the amount of cash available for distribution on each unit may decrease;

the relative voting strength of each previously outstanding unit may be diminished;

the market price of the common units may decline; and
