NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation The accompanying unaudited interim financial statements of WesBanco, Inc. and its consolidated subsidiaries (WesBanco) have been prepared in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information and the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements and should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2013.

WesBanco s interim financial statements have been prepared following the significant accounting policies disclosed in Note 1 of the Notes to the Consolidated Financial Statements of its 2013 Annual Report on Form 10-K filed with the Securities and Exchange Commission. In the opinion of management, the accompanying interim financial information reflects all adjustments, including normal recurring adjustments, necessary to present fairly WesBanco s financial position and results of operations for each of the interim periods presented. Results of operations for interim periods are not necessarily indicative of the results of operations that may be expected for a full year.

Recent accounting pronouncements In June 2014, the Financial Accounting Standards Board (the FASB) issued an Accounting Standards Update (ASU) (ASU 2014-11) related to repurchase-to-maturity transactions, repurchase financing and disclosures. The pronouncement changes the accounting for repurchase-to-maturity transactions and linked repurchase financings to secured borrowing accounting, which is consistent with the accounting for other repurchase agreements. The pronouncement also requires two new disclosures. The first disclosure requires an entity to disclose information on transfers accounted for as sales in transactions that are economically similar to repurchase agreements. The second disclosure provides increased transparency about the types of collateral pledged in repurchase agreements and similar transactions accounted for as secured borrowings. The pronouncement is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2014. Early adoption is not permitted. The adoption of this pronouncement is not expected to have a material impact on WesBanco s Consolidated Financial Statements.

In May 2014, the FASB issued an accounting pronouncement (ASU 2014-09) related to the recognition of revenue from contracts with customers. The new revenue pronouncement creates a single source of revenue guidance for all companies in all industries and is more principles-based than current revenue guidance. The pronouncement provides a five-step model for a company to recognize revenue when it transfers control of goods or services to customers at an amount that reflects the consideration to which it expects to be entitled in exchange for those goods or services. The five steps are (1) identify the contract with the customer, (2) identify the separate performance obligations in the contract, (3) determine the transaction price, (4) allocate the transaction price to the separate performance obligations and (5) recognize revenue when each performance obligation is satisfied. The pronouncement is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2016 using either a full retrospective approach for all periods presented in the period of adoption or a modified retrospective approach. Early adoption is not permitted. WesBanco is currently evaluating the impact of the adoption of this pronouncement on its Consolidated Financial Statements.

In January 2014, the FASB issued an accounting pronouncement (ASU 2014-04) related to in-substance repossessions and foreclosures. The pronouncement clarifies when an in-substance repossession or foreclosure occurs. A creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan, upon either (1) the creditor obtaining legal title to the residential real estate property upon completion of a foreclosure or (2) the borrower conveying all interest in the residential real estate property to the creditor to satisfy that loan through completion of a deed in lieu of foreclosure or through a similar legal agreement. Additionally, the amendments require interim and annual disclosure of both (1) the amount of foreclosed residential real estate property held by the creditor and (2) the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure according to local requirements of the applicable jurisdiction. The pronouncement is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2014 and may be adopted under either a modified retrospective transition method or a prospective transition method. Early adoption is permitted. The adoption of this pronouncement is not expected to have a material impact on WesBanco s Consolidated Financial Statements.

In January 2014, the FASB issued an accounting pronouncement (ASU 2014-01) which applies to all reporting entities that invest in qualified affordable housing projects through limited liability entities. The pronouncement permits reporting entities to make an accounting policy election to account for these investments using the proportional amortization method if certain conditions exist. The pronouncement also requires disclosure that enables users of its financial statements to understand the nature of these investments. Under the proportional amortization method, an entity amortizes the initial cost of the investment in proportion to the tax credits and other tax benefits received and recognizes the net investment performance in the income statement as a component of income tax expense (benefit). The pronouncement should be applied retrospectively for all periods presented, effective for annual periods and interim reporting periods within those annual periods, beginning after December 15, 2014. Early adoption is permitted. The adoption of this pronouncement is not expected to have a material impact on WesBanco s Consolidated Financial Statements.

In July 2013, the FASB issued an accounting pronouncement (ASU 2013-11) to improve the reporting for unrecognized tax benefits when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. The pronouncement is expected to reduce diversity in practice by providing guidance on the presentation of unrecognized tax benefits and will better reflect the manner in which an entity would settle at the reporting date any additional income taxes that would result from the disallowance of a tax position when net operating loss carryforwards, similar tax losses, or tax credit carryforwards exist. The pronouncement is effective prospectively for fiscal years, and interim periods within those years, beginning after December 15, 2013. The adoption of this pronouncement did not have a material impact on WesBanco s Consolidated Financial Statements.

NOTE 2. EARNINGS PER COMMON SHARE

Earnings per common share are calculated as follows:

(unaudited, in thousands, except shares and per share amounts)	For the Three Months Ended June 30, 2014	For the Three Months Ended June 30, 2013	For the Six Months Ended June 30, 2014	For the Six Months Ended June 30, 2013
Numerator for both basic and diluted earnings per common share:				
Net income	**$ 18,875**	$ 17,017	**$ 35,296**	$ 33,037
Denominator:				
Total average basic common shares outstanding	**29,242,180**	29,245,201	**29,212,347**	29,228,355
Effect of dilutive stock options and warrant	**79,747**	63,605	**81,077**	59,663
Total diluted average common shares outstanding	**29,321,927**	29,308,806	**29,293,424**	29,288,018
Earnings per common share - basic	**$ 0.65**	$ 0.58	**$ 1.21**	$ 1.13
Earnings per common share - diluted	**$ 0.64**	$ 0.58	**$ 1.20**	$ 1.13

Stock options representing shares of 179,335 for the three months ended June 30, 2013, and shares of 180,969 for the six months ended June 30, 2013, were not included in the computation of diluted earnings per share, because to do so would have been anti-dilutive. For the three and six months ended June 30, 2014, all outstanding options were dilutive.

At June 30, 2014, and December 31, 2013, there were no holdings of any one issuer, other than the U.S. government and its agencies, in an amount greater than 10% of WesBanco s shareholders equity.

The following table presents the fair value of available-for-sale and held-to-maturity securities by contractual maturity at June 30, 2014. In some instances, the issuers may have the right to call or prepay obligations without penalty prior to the contractual maturity date.

	June 30, 2014					
(unaudited, in thousands)	One Year or less	One to Five Years	Five to Ten Years	After Ten Years	Mortgage-backed and Equity	Total
Available-for-sale						
Obligations of government agencies	**$ 313**	**$ 9,833**	**$ 26,123**	**$ 42,633**	**$**	**$ 78,902**
Residential mortgage-backed securities and collateralized mortgage obligations of government agencies [1]					**767,482**	**767,482**
Obligations of states and political subdivisions	**7,072**	**43,257**	**21,615**	**38,295**		**110,239**
Corporate debt securities	**4,018**	**15,939**	**12,044**	**4,891**		**36,892**

Equity securities [2]					12,564	12,564
Total available-for-sale securities	$ 11,403	$ 69,029	$ 59,782	$ 85,819	$ 780,046	$ 1,006,079
Held-to-maturity [3]						
Residential mortgage-backed securities and collateralized mortgage obligations of government agencies [1]	$	$	$	$	$ 92,101	$ 92,101
Obligations of states and political subdivisions	4,743	12,390	178,977	334,608		530,718
Corporate debt securities			5,721			5,721
Total held-to-maturity securities	$ 4,743	$ 12,390	$ 184,698	$ 334,608	$ 92,101	$ 628,540
Total securities	$ 16,146	$ 81,419	$ 244,480	$ 420,427	$ 872,147	$ 1,634,619

(1) Mortgage-backed and collateralized mortgage securities, which have prepayment provisions, are not assigned to maturity categories due to fluctuations in their prepayment speeds.

(2) Equity securities, which have no stated maturity, are not assigned a maturity category.

(3) The held-to-maturity portfolio is carried at an amortized cost of $607.7 million.

Table of Contents

Securities with aggregate fair values of $707.5 million and $701.7 million at June 30, 2014 and December 31, 2013, respectively, were pledged as security for public and trust funds, and securities sold under agreements to repurchase. Proceeds from the sale of available-for-sale securities were $3.5 million and $9.3 million for the six months ended June 30, 2014 and 2013, respectively. Net unrealized gains (losses) on available-for-sale securities included in accumulated other comprehensive income net of tax, as of June 30, 2014 and December 31, 2013 were $0.9 million and ($6.1) million, respectively.

The following tables provide information on unrealized losses on investment securities that have been in an unrealized loss position for less than twelve months and twelve months or more as of June 30, 2014 and December 31, 2013:

	June 30, 2014

Residential mortgage-backed securities and collateralized mortgage obligations of government agencies	513,495	(14,639)	89	37,002	(2,308)	11	550,497	(16,947)	100
Obligations of states and political subdivisions	181,667	(10,830)	277	47,793	(3,431)	76	229,460	(14,261)	353
Corporate debt securities	19,837	(560)	7	2,845	(155)	1	22,682	(715)	8
Total temporarily impaired securities	$ 769,355	$ (27,940)	388	$ 92,723	$ (5,921)	90	$ 862,078	$ (33,861)	478

Unrealized losses on debt securities in the tables represent temporary fluctuations resulting from changes in market rates in relation to fixed yields. Unrealized losses in the available-for-sale portfolio are accounted for as an adjustment to other comprehensive income in shareholders equity.

WesBanco does not believe the securities presented above are impaired due to reasons of credit quality, as there are no debt securities rated below investment grade and all are paying principal and interest according to their contractual terms. WesBanco does not intend to sell, nor is it more likely than not that it will be required to sell, loss position securities prior to recovery of their cost, and therefore, management believes the unrealized losses detailed above are temporary and no impairment loss relating to these securities has been recognized.

Securities that do not have readily determinable fair values and for which WesBanco does not exercise significant influence are carried at cost. Cost method investments consist primarily of Federal Home Loan Bank (FHLB) Pittsburgh and FHLB Cincinnati stock totaling $15.0 million and $11.6 million at June 30, 2014 and December 31, 2013, respectively, and are included in other assets in the Consolidated Balance Sheets. Cost method investments are evaluated for impairment whenever events or circumstances suggest that their carrying value may not be recoverable.

(1) Commercial loans greater than $1 million that are reported as non-accrual or as a troubled debt restructuring (TDR) are individually evaluated for impairment.

WesBanco maintains an internal loan grading system to reflect the credit quality of commercial loans. Commercial loan risk grades are determined based on an evaluation of the relevant characteristics of each loan, assigned at the inception of each loan and adjusted thereafter at any time to reflect changes in the risk profile throughout the life of each loan. The primary factors used to determine the risk grade are the reliability and sustainability of the primary source of repayment and overall financial strength of the borrower. This includes an analysis of cash flow available to repay debt, profitability, liquidity, leverage, and overall financial trends. Other factors include management, industry or property type risks, an assessment of secondary sources of repayment such as collateral or guarantees, other terms and conditions of the loan that may increase or reduce its risk, and economic conditions and other external factors that may influence repayment capacity and financial condition.

Commercial real estate land and construction consists of loans to finance investments in vacant land, land development, construction of residential housing, and construction of commercial buildings. Commercial real estate improved property consists of loans for the purchase or refinance of all types of improved owner-occupied and investment properties. Factors that are considered in assigning the risk grade vary depending on the type of property financed. The risk grade assigned to construction and development loans is based on the overall viability of the project, the experience and financial capacity of the developer or builder to successfully complete the project, project specific and market absorption rates and comparable property values, and the amount of pre-sales for residential housing construction or pre-leases for commercial investment property. The risk grade assigned to commercial investment property loans is based primarily on the adequacy of net rental income generated by the property to service the debt, the type, quality, industry and mix of tenants, and the terms of leases, but also considers the overall financial capacity of the investors and their experience in owning and managing investment property. The risk grade assigned to owner-occupied commercial real estate and commercial and industrial loans is based primarily on historical and projected earnings, the adequacy of operating cash flow to service all of the business debt, and the capital resources, liquidity and leverage of the business, but also considers the industry in which the business operates, the business specific competitive advantages or disadvantages, the quality and experience of management, and external influences on the business such as economic conditions. Other factors that are considered for commercial and industrial loans include the type, quality and marketability of non-real estate collateral and whether the structure of the loan increases or reduces its risk. The type, age, condition, location and any environmental risks associated with a property are also considered for all types of commercial real estate. The overall financial condition and repayment capacity of any guarantors is also evaluated to determine the extent to which they mitigate other risks of the loan. The following descriptions of risk grades apply to commercial real estate and commercial and industrial loans:

Excellent or minimal risk loans are fully secured by liquid or readily marketable collateral and therefore have virtually no risk of loss. Good or desirable risk loans are extended in the normal course of business to creditworthy borrowers that exhibit a history of positive financial results that are at least comparable to the average for their industry or type of real estate. These loans are expected to perform satisfactorily during most economic cycles and there are no significant external factors that are expected to adversely affect these borrowers more than others in the same industry. Any minor unfavorable characteristics of these loans are outweighed or mitigated by strong positive factors including but not limited to adequate secondary sources of repayment or guarantees.

Fair or acceptable risk loans have a somewhat higher credit risk profile due to specific weaknesses or uncertainties that could adversely impact repayment capacity. Loans in this category generally warrant additional attention or monitoring, or a more rigid loan structure. These loans represent the maximum level of risk accepted in the normal course of lending. Specific issues that may warrant this grade include financial results that are less favorable than the average for the borrower s industry or type of real estate, cyclical financial results, loans based on projections that

Table of Contents

have a reasonable probability of being achieved, start-up businesses, construction projects, and other external factors that indicate a higher level of credit risk. Loans that are underwritten primarily on the basis of the repayment capacity or financial condition of guarantors may also be assigned this grade.

Criticized or marginal loans are currently protected but have weaknesses, which, if not corrected, may inadequately protect WesBanco Bank, Inc. (the Bank) at some future date. These loans represent an unwarranted credit risk and would generally not be extended in the normal course of lending. Specific issues which may warrant this grade include declining financial results, increased reliance on secondary sources of repayment or guarantor support and adverse external influences that may negatively impact the business or property.

Substandard and doubtful loans are equivalent to the classifications used by banking regulators. Substandard loans are inadequately protected by the current repayment capacity and equity of the borrower or collateral pledged, if any. Substandard loans have one or more well-defined weaknesses that jeopardize their repayment or collection in full. These loans may or may not be reported as non-accrual. Doubtful loans have all the weaknesses inherent to a substandard loan with the added characteristic that full repayment is highly questionable or improbable on the basis of currently existing facts, conditions and collateral values. However, recognition of loss may be deferred if there are reasonably specific pending factors that will reduce the risk if they occur.

The following tables summarize commercial loans by their assigned risk grade:

	Commerical Loans by Internally Assigned Risk Grade			
(unaudited, in thousands)	**Commercial Real Estate- Land and Construction**	**Commercial Real Estate- Improved Property**	**Commercial & Industrial**	**Total Commercial Loans**
As of June 30, 2014

Classified - doubtful				
Total	$ 263,117	$ 1,649,802	$ 556,249	$ 2,469,168

Residential real estate, home equity and consumer loans are not assigned internal risk grades other than as required by regulatory guidelines that are based primarily on the age of past due loans. WesBanco primarily evaluates the credit quality of residential real estate, home equity and consumer loans based on repayment performance and historical loss rates. The aggregate amount of residential real estate, home equity and consumer loans classified as substandard in accordance with regulatory guidelines were $14.7 million at June 30, 2014 and $14.4 million at December 31, 2013, of which $2.7 and $2.0 million were accruing, for each period, respectively. The aggregate amount of residential real estate, home equity and consumer loans classified as substandard are not included in the tables above.

Impaired loans included above are as follows:							
Non-accrual loans	$ 9,028	$ 588	$ 2,722	$ 24,295	$ 27,605	$ 36,633	
TDRs accruing interest (1)	13,595	171	881	214	1,266	14,861	

Total impaired	$ 22,623	$ 759	$ 3,603	$ 24,509	$ 28,871	$ 51,494

(1) Loans 90 days or more past due and accruing interest exclude TDRs 90 days or more past due and accruing interest.

Impaired Loans A loan is considered impaired, based on current information and events, if it is probable that WesBanco will be unable to collect the payments of principal and interest when due according to the contractual terms of the loan agreement. Impaired loans generally included all non-accrual loans and TDRs.

Loans are generally placed on non-accrual when they are 90 days past due unless the loan is well-secured and in the process of collection. Loans may also be placed on non-accrual when full collection of principal is in doubt even if payments on such loans remain current, or may remain on non-accrual if they were past due but subsequently brought current.

Loans are categorized as TDRs when the Bank, for economic or legal reasons related to a borrower s financial difficulties, grants a concession to the borrower that it would not otherwise consider.

Table of Contents

The following tables summarize impaired loans:

	Impaired Loans

Consumer	**468**	**295**	**763**	642	206	848
Total	**$ 13,513**	**$ 6,281**	**$ 19,794**	$ 14,861	$ 9,324	$ 24,185

As of June 30, 2014, there were no TDRs greater than $1.0 million. The concessions granted in the majority of loans reported as accruing and non-accrual TDRs are extensions of the maturity date or the amortization period, reductions in the interest rate below the prevailing market rate for loans with comparable characteristics, and/or permitting interest-only payments for longer than three months.

The following tables present details related to loans identified as TDRs during the three and six months ended June 30, 2014 and June 30, 2013, respectively:

	New TDRs [(1)] For the Three Months Ended	
	June 30, 2014	June 30, 2013

(unaudited, dollars in thousands)	Number of Modifications	Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment	Number of Modifications	Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment

Total	**18**	**$**	**530**	**$**	**509**	40	$	3,441	$	3,191

[1] Excludes loans that were either paid off or charged-off by period end. The pre-modification balance represents the balance outstanding at the beginning of the period. The post-modification balance represents the outstanding balance at period end.

The following tables summarize TDRs which defaulted (defined as past due 90 days or more) during the three and six months ended June 30, 2014 and 2013 that were restructured within the last twelve months prior to June 30, 2014 and 2013:

(unaudited, dollars in thousands)	Defaulted TDRs [1] For the Three Months Ended June 30, 2014 Number of Defaults		Recorded Investment	June 30, 2013 Number of Defaults		Recorded Investment
Commercial real estate:						
Land and construction		$			$	
Improved property						
Total commercial real estate						
Commercial and industrial						
Residential real estate				5		312
Home equity				1		21
Consumer						
Total		**$**		6	$	333

[1] Excludes loans that were either charged-off or cured by period end. The recorded investment is as of June 30, 2014 and 2013.

Defaulted TDRs [1]

	For the Six Months Ended			
	June 30, 2014		June 30, 2013	
(unaudited, dollars in thousands)	**Number of Defaults**	**Recorded Investment**	**Number of Defaults**	**Recorded Investment**
Commercial real estate:				
Land and construction		**$**		$
Improved property			2	645
Total commercial real estate			2	645
Commercial and industrial			3	313
Residential real estate	**4**	**236**	19	1,634
Home equity			6	124
Consumer			1	32
Total	**4**	**$ 236**	31	$ 2,748

(1) Excludes loans that were either charged-off or cured by period end. The recorded investment is as of June 30, 2014 and 2013.

TDRs that defaulted during the six month period that were restructured within the last twelve months represented 1.2% of the total TDR balance at June 30, 2014. These loans are placed on non-accrual status unless they are both well-secured and in the process of collection. At June 30, 2014, none of the loans in the table above were accruing interest.

Table of Contents

The following table summarizes other real estate owned and repossessed assets included in other assets:

(unaudited, in thousands)	**June 30, 2014**	December 31, 2013
Other real estate owned	**$ 4,923**	$ 4,689
Repossessed assets	**183**	171
Total other real estate owned and repossessed assets	**$ 5,106**	$ 4,860

NOTE 5. PENSION PLAN

The following table presents the net periodic pension cost for WesBanco s Defined Benefit Pension Plan (the Plan) and the related components:

	For the Three Months Ended June 30,		For the Six Months Ended June 30,	
(unaudited, in thousands)	**2014**	2013	**2014**	2013
Service cost - benefits earned during year	**$ 725**	$ 698	**$ 1,442**	$ 1,655
Interest cost on projected benefit obligation	**1,183**	982	**2,353**	2,078
Expected return on plan assets	**(1,802)**	(1,437)	**(3,585)**	(3,040)
Amortization of prior service cost	**11**	11	**22**	23
Amortization of net loss	**367**	897	**730**	1,720
Net periodic pension cost	**$ 484**	$ 1,151	**$ 962**	$ 2,436

The Plan covers all employees of WesBanco who were hired on or before August 1, 2007 who satisfy minimum age and length of service requirements, and is not available to employees hired after such date.

A minimum required contribution of $5.3 million is due for 2014 which will be partially funded by the Plan s $29.2 million available credit balance. A contribution of $2.5 million was made in June 2014 and an additional $2.5 million is expected to be funded in December.

Table of Contents

NOTE 6. FAIR VALUE MEASUREMENT

Fair value estimates are based on quoted market prices, if available, quoted market prices of similar assets or liabilities, or the present value of expected future cash flows and other valuation techniques. These valuations are significantly affected by discount rates, cash flow assumptions, and risk assumptions used. Therefore, fair value estimates may not be substantiated by comparison to independent markets and are not intended to reflect the proceeds that may be realizable in an immediate settlement of the instruments.

Fair value is determined at one point in time and is not representative of future value. These amounts do not reflect the total value of a going concern organization. Management does not have the intention to dispose of a significant portion of its assets and liabilities and therefore, the unrealized gains or losses should not be interpreted as a forecast of future earnings and cash flows.

The following is a discussion of assets and liabilities measured at fair value on a recurring basis and valuation techniques applied:

Securities available-for-sale: The fair value of securities available-for-sale which are measured on a recurring basis are determined primarily by obtaining quoted prices on nationally recognized securities exchanges or matrix pricing, which is a mathematical technique used widely in the industry to value debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on the securities relationship to other similar securities. These securities are classified within level 1 or 2 in the fair value hierarchy. Certain equity securities that are lightly traded in over-the-counter markets are classified as level 2 in the fair value hierarchy, as quoted market prices may not be available on the fair value measurement date. Positions that are not traded in active markets for which valuations are generated using assumptions not observable in the market or management s best estimate are classified within level 3 of the fair value hierarchy. This includes certain specific municipal debt issues for which the credit quality and discount rate must be estimated.

We may be required from time to time to measure certain assets at fair value on a nonrecurring basis in accordance with GAAP. These adjustments to fair value usually result from application of lower of cost or market accounting or write-downs of individual assets.

Impaired loans: Impaired loans are carried at the lower of cost or the fair value of the collateral for collateral-dependent loans. Collateral may be in the form of real estate or business assets including equipment, inventory and accounts receivable. The use of independent appraisals, discounted cash flow models and management s best judgment are significant inputs in arriving at the fair value measure of the underlying collateral and impaired loans are therefore classified within level 3 of the fair value hierarchy.

Other real estate owned and repossessed assets: Other real estate owned and repossessed assets are carried at the lower of the investment in the assets or the fair value of the assets less estimated selling costs. The use of independent appraisals and management s best judgment are significant inputs in arriving at the fair value measure of the underlying collateral, and therefore other real estate owned and repossessed assets are classified within level 3 of the fair value hierarchy.

Loans held for sale: Loans held for sale are carried, in aggregate, at the lower of cost or fair value. The use of a valuation model using quoted prices of similar instruments are significant inputs in arriving at the fair value and therefore loans held for sale are classified within level 2 of the fair value hierarchy.

Table of Contents

The following tables set forth WesBanco s financial assets and liabilities that were accounted for at fair value on a recurring and nonrecurring basis by level within the fair value hierarchy as of June 30, 2014 and December 31, 2013:

		June 30, 2014 Fair Value Measurements Using:		
(unaudited, in thousands)	**June 30, 2014**	**Quoted Prices in Active Markets for Identical Assets (level 1)**	**Significant Other Observable Inputs (level 2)**	**Significant Unobservable Inputs (level 3)**

		December 31, 2013 Fair Value Measurements Using:		
(unaudited, in thousands)	**December 31, 2013**	**Quoted Prices in Active Markets for Identical Assets (level 1)**	**Significant Other Observable Inputs (level 2)**	**Significant Unobservable Inputs (level 3)**
Recurring fair value measurements				
Securities - available-for-sale				
Obligations of government agencies	$ 73,232	$	$ 73,232	$
Residential mortgage-backed securities and collateralized mortgage obligations of government agencies	694,267		694,267	
Obligations of state and political subdivisions	116,346		116,346	
Corporate debt securities	38,481		38,481	
Equity securities	12,060	9,962	2,098	
Total securities - available-for-sale	$ 934,386	$ 9,962	$ 924,424	$

Total recurring fair value measurements	$	934,386	$	9,962	$	924,424	$	
Nonrecurring fair value measurements								
Impaired loans	$	1,543	$		$		$	1,543
Other real estate owned and repossessed assets		4,860						4,860
Loans held for sale		5,855				5,855		
Total nonrecurring fair value measurements	$	12,258	$		$	5,855	$	6,403

WesBanco s policy is to recognize transfers between levels as of the actual date of the event or change in circumstances that caused the transfer. There were no transfers between level 1, 2 or 3 for the six months ended June 30, 2014 or 2013.

Table of Contents

The following table presents additional quantitative information about assets measured at fair value on a nonrecurring basis and for which WesBanco has utilized level 3 inputs to determine fair value:

		Quantitative Information about Level 3 Fair Value Measurements		
(unaudited, in thousands)	**Fair Value Estimate**	**Valuation Techniques**	**Unobservable Input**	**Range / Weighted Average**
June 30, 2014				
Impaired loans	**$ 1,618**	Appraisal of collateral (1)	Appraisal adjustments (2)	**0% to (36.1%) / (22.7%)**
			Liquidation expenses (2)	**(1.0%) to (8.0%) / (3.7%)**
Other real estate owned and repossessed assets	**5,106**	Appraisal of collateral (1), (3)		
December 31, 2013:				
Impaired loans	$ 1,543	Appraisal of collateral (1)	Appraisal adjustments (2)	0% to (29.1%) / (15.6%)
			Liquidation expenses (2)	(3.5%) to (8.0%) / (4.7%)
Other real estate owned and repossessed assets	4,860	Appraisal of collateral (1), (3)		

(1) Fair value is generally determined through independent appraisals of the underlying collateral, which generally include various level 3 inputs which are not identifiable.

(2) Appraisals may be adjusted by management for qualitative factors such as economic conditions and estimated liquidation expenses. The range and weighted average of appraisal adjustments and liquidation expenses are presented as a percent of the appraisal.

(3) Includes estimated liquidation expenses and numerous dissimilar qualitative adjustments by management which are not identifiable.

Table of Contents

The estimated fair values of WesBanco s financial instruments are summarized below:

Loans held for sale	5,855	5,855		5,855	
Accrued interest receivable	18,960	18,960	18,960		
Bank-owned life insurance	121,390	121,390	121,390		
Financial Liabilities					
Deposits	5,062,530	5,076,207	3,551,052	1,525,155	
Federal Home Loan Bank borrowings	39,508	42,314		42,314	
Other borrowings	150,536	153,015	104,196	48,819	
Junior subordinated debt	106,137	74,038		74,038	
Accrued interest payable	2,354	2,354	2,354		

The following methods and assumptions were used to measure the fair value of financial instruments recorded at cost on WesBanco s Consolidated Balance Sheets:

Cash and due from banks: The carrying amount for cash and due from banks is a reasonable estimate of fair value.

Securities held-to-maturity: Fair values for securities held-to-maturity are determined in the same manner as securities available-for-sale which is described above.

Net loans: Fair values for loans are estimated using a discounted cash flow methodology. The discount rates take into account interest rates currently being offered to customers for loans with similar terms, the credit risk associated with the loan and other market factors, including liquidity. The valuation of the loan portfolio reflects discounts that WesBanco believes are consistent with transactions occurring in the marketplace for both performing and distressed loan types. The carrying value that fair value is compared to is net of the allowance for loan losses and other associated premiums and discounts. Due to the significant judgment involved in evaluating credit quality, loans are classified within level 3 of the fair value hierarchy.

Accrued interest receivable: The carrying amount of accrued interest receivable approximates its fair value.

Bank-owned life insurance: The carrying value of bank-owned life insurance represents the net cash surrender value of the underlying insurance policies, should these policies be terminated. Management believes that the carrying value approximates its fair value.

Deposits: The carrying amount is considered a reasonable estimate of fair value for demand, savings and other variable rate deposit accounts. The fair value of fixed maturity certificates of deposit is estimated by a discounted cash flow method using rates currently offered for deposits of similar remaining maturities.

Table of Contents

Federal Home Loan Bank borrowings: The fair value of FHLB borrowings is based on rates currently available to WesBanco for borrowings with similar terms and remaining maturities.

Other borrowings: The carrying amount of federal funds purchased and overnight sweep accounts generally approximate fair value. Other repurchase agreements are based on quoted market prices if available. If market prices are not available, for certain fixed and adjustable rate repurchase agreements, then quoted market prices of similar instruments are used.

Junior subordinated debt owed to unconsolidated subsidiary trusts: Due to the pooled nature of these instruments, which are not actively traded, estimated fair value is based on recent similar transactions of single-issuer trust preferred securities.

Accrued interest payable: The carrying amount of accrued interest payable approximates its fair value.

Off-balance sheet financial instruments: Off-balance sheet financial instruments consist of commitments to extend credit including letters of credit. Fair values for commitments to extend credit are estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present credit standing of the counterparties. The estimated fair value of the commitments to extend credit and letters of credit are insignificant and therefore are not presented in the above tables.

NOTE 7. COMPREHENSIVE INCOME

The activity in accumulated other comprehensive income for the six months ended June 30, 2014 and 2013 is as follows:

	Accumulated Other Comprehensive Income [1]			
(unaudited, in thousands)	Defined Benefit Pension Plan	Unrealized Gains (Losses) on Securities Available-for-Sale	Unrealized Gains on Securities Transferred from Available-for-Sale to Held-to-Maturity	Total
Balance at December 31, 2013	$ (7,966)	$ (6,126)	$ 1,358	$ (12,734)
Other comprehensive income before reclassifications		**7,194**		**7,194**
Amounts reclassified from accumulated other comprehensive income	**475**	**(157)**	**$ (171)**	**147**
Period change	**475**	**7,037**	**$ (171)**	**7,341**
Balance at June 30, 2014	**$ (7,491)**	**$ 911**	**$ 1,187**	**$ (5,393)**
Balance at December 31, 2012	$ (21,401)	$ 13,032	$ 2,004	$ (6,365)
Other comprehensive income before reclassifications		(11,526)		(11,526)
Amounts reclassified from accumulated other comprehensive income	1,050	(82)	(406)	562
Period change	1,050	(11,608)	(406)	(10,964)
Balance at June 30, 2013	$ (20,351)	$ 1,424	$ 1,598	$ (17,329)

(1) All amounts are net of tax. Related income tax expense or benefit is calculated using a combined Federal and State income tax rate approximating 36.5%.

The following table provides details about amounts reclassified from accumulated other comprehensive income for the three and six months ended June 30, 2014 and 2013:

Details about Accumulated Other Comprehensive Income Components	For the Three Months Ended June 30,		For the Six Months Ended June 30,		Affected Line Item in the Statement of Net Income
(unaudited, in thousands)	2014	2013	2014	2013	
Securities available-for-sale [1]:					
Net securities gains reclassified into earnings	**$ (170)**	$ (113)	**$ (248)**	$ (129)	Net securities gains (Non-interest income)
Related income tax expense	**63**	42	**91**	47	Provision for income taxes

Net effect on accumulated other comprehensive income for the period	**(107)**	(71)	**(157)**	(82)	
Securities held-to-maturity [1]:					
Amortization of unrealized gain transferred from available-for-sale	**(132)**	(362)	**(270)**	(650)	Interest and dividends on securities (Interest and dividend income)
Related income tax expense	**48**	133	**99**	244	Provision for income taxes
Net effect on accumulated other comprehensive income for the period	**(84)**	(229)	**(171)**	(406)	
Defined benefit pension plan [2]:					
Amortization of net loss and prior service costs	**378**	909	**752**	1,743	Employee benefits (Non-interest expense)
Related income tax expense	**(139)**	(334)	**(277)**	(693)	Provision for income taxes
Net effect on accumulated other comprehensive income for the period	**239**	575	**475**	1,050	
Total reclassifications for the period	**$ 48**	$ 275	**147**	$ 562	

(1) For additional detail related to unrealized gains on securities and related amounts reclassified from accumulated other comprehensive income see Note 3, Securities.

(2) Included in the computation of net periodic pension cost. See Note 5, Pension Plan for additional detail.

Table of Contents

NOTE 8. COMMITMENTS AND CONTINGENT LIABILITIES

Commitments In the normal course of business, WesBanco offers off-balance sheet credit arrangements to enable its customers to meet their financing objectives. Those instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the financial statements. WesBanco s exposure to credit losses in the event of non-performance by the other parties to the financial instruments for commitments to extend credit and standby letters of credit is limited to the contractual amount of those instruments. WesBanco uses the same credit policies in making commitments and conditional obligations as for all other lending. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The allowance for credit losses associated with commitments was $0.5 million and $0.6 million as of June 30, 2014 and December 31, 2013, respectively, and is included in other liabilities on the Consolidated Balance Sheets.

Letters of credit are conditional commitments issued by banks to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support public and private borrowing arrangements, including normal business activities, bond financing and similar transactions. Letters of credit are considered guarantees. The liability associated with letters of credit was immaterial as of June 30, 2014 and December 31, 2013.

Contingent obligations to purchase loans funded by other entities include affordable housing plan guarantees and credit card guarantees. Affordable housing plan guarantees are performance guarantees for various building project loans. The guarantee amortizes as the loan balances decrease. Credit card guarantees are credit card balances not owned by WesBanco, whereby the Bank guarantees the performance of the cardholder.

The following table presents total commitments to extend credit, guarantees and various letters of credit outstanding:

(unaudited, in thousands)	**June 30, 2014**	**December 31, 2013**
Lines of credit	**$ 936,986**	$ 964,777
Loans approved but not closed	**132,542**	73,937
Overdraft limits	**88,648**	96,291
Letters of credit	**26,212**	18,686
Contingent obligations to purchase loans funded by other entities	**6,313**	6,327

Contingent Liabilities WesBanco is a party to various legal and administrative proceedings and claims. While any litigation contains an element of uncertainty, management does not believe that a material loss related to such proceedings or claims pending or known to be threatened is reasonably possible.

Table of Contents

NOTE 9. BUSINESS SEGMENTS

WesBanco operates two reportable segments: community banking as well as trust and investment services. WesBanco s community banking segment offers services traditionally offered by full-service commercial banks, including commercial demand, individual demand and time deposit accounts, as well as commercial, mortgage and individual installment loans, and certain non-traditional offerings, such as insurance and securities brokerage services. The trust and investment services segment offers trust services as well as various mutual funds. The market value of assets managed or held in custody by the trust and investment services segment was approximately $3.8 billion and $3.4 billion at June 30, 2014 and 2013, respectively. These assets are held by WesBanco in fiduciary or agency capacities for their customers and therefore are not included as assets on WesBanco s Consolidated Balance Sheets.

Condensed financial information by business segment is presented below:

(unaudited, in thousands)	Community Banking	Trust and Investment Services	Consolidated
For the Three Months ended June 30, 2014:			
Interest income	**$ 54,044**	**$**	**$ 54,044**
Interest expense	**5,737**		**5,737**
Net interest income	**48,307**		**48,307**

Non-interest income	12,901	4,823	17,724
Non-interest expense	36,620	2,879	39,499
Income before provision for income taxes	21,249	1,944	23,193
Provision for income taxes	5,399	777	6,176
Net income	$ 15,850	$ 1,167	$ 17,017
For the Six Months ended June 30, 2014:			
Interest income	**$ 107,501**	**$**	**$ 107,501**
Interest expense	**11,870**		**11,870**

Net interest income	**95,631**		**95,631**
Provision for credit losses	**3,048**		**3,048**
Net interest income after provision for credit losses	**92,583**		**92,583**
Non-interest income	**24,432**	**10,858**	**35,290**
Non-interest expense	**74,193**	**6,205**	**80,398**
Income before provision for income taxes	**42,822**	**4,653**	**47,475**
Provision for income taxes	**10,318**	**1,861**	**12,179**
Net income	**$ 32,504**	**$ 2,792**	**$ 35,296**
For the Six Months ended June 30, 2013:			
Interest income	$ 109,317	$	$ 109,317
Interest expense	17,199		17,199
Net interest income	92,118		92,118
Provision for credit losses	3,123		3,123
Net interest income after provision for credit losses	88,995		88,995
Non-interest income	25,380	9,840	35,220
Non-interest expense	74,372	5,874	80,246
Income before provision for income taxes	40,003	3,966	43,969
Provision for income taxes	9,346	1,586	10,932
Net income	$ 30,657	$ 2,380	$ 33,037

Total non-fiduciary assets of the trust and investment services segment were $3.9 million and $3.1 million at June 30, 2014 and 2013, respectively. All goodwill and other intangible assets were allocated to the community banking segment.

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Management s Discussion and Analysis (MD&A) represents an overview of the results of operations and financial condition of WesBanco for the three and six months ended June 30, 2014. This discussion and analysis should be read in conjunction with the Consolidated Financial Statements and Notes thereto.

FORWARD-LOOKING STATEMENTS

Forward-looking statements in this report relating to WesBanco s plans, strategies, objectives, expectations, intentions and adequacy of resources, are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. The information contained in this report should be read in conjunction with WesBanco s Form 10-K for the year ended December 31, 2013 and documents subsequently filed by WesBanco with the Securities and Exchange Commission (SEC), including WesBanco s Form 10-Q for the quarter ended March 31, 2014, which are available at the SEC s website, www.sec.gov or at WesBanco s website, www.wesbanco.com. Investors are cautioned that forward-looking statements, which are not historical fact, involve risks and uncertainties, including those detailed in WesBanco s most recent Annual Report on Form 10-K filed with the SEC under Risk Factors in Part I, Item 1A. Such statements are subject to important factors that could cause actual results to differ materially from those contemplated by such statements, including, without limitation, the effects of changing regional and national economic conditions; changes in interest rates, spreads on earning assets and interest-bearing liabilities, and associated interest rate sensitivity; sources of liquidity available to WesBanco and its related subsidiary operations; potential future credit losses and the credit risk of commercial, real estate, and consumer loan customers and their borrowing activities; actions of the Federal Reserve Board, the Federal Deposit Insurance Corporation, the SEC, the Financial Institution Regulatory Authority, the Municipal Securities Rulemaking Board, the Securities Investors Protection Corporation, and other regulatory bodies; potential legislative and federal and state regulatory actions and reform, including, without limitation, the impact of the implementation of the Dodd-Frank Act; adverse decisions of federal and state courts; fraud, scams and schemes of third parties; internet hacking; competitive conditions in the financial services industry; rapidly changing technology affecting financial services; marketability of debt instruments and corresponding impact on fair value adjustments; and/or other external developments materially impacting WesBanco s operational and financial performance. WesBanco does not assume any duty to update forward-looking statements.

OVERVIEW

WesBanco is a multi-state bank holding company operating through 119 branches, one loan production office and 106 ATM machines in West Virginia, Ohio and western Pennsylvania, offering retail banking, corporate banking, personal and corporate trust services, brokerage services, mortgage banking and insurance. WesBanco s businesses are significantly impacted by economic factors such as market interest rates, federal monetary and regulatory policies, local and regional economic conditions and the competitive environment s effect upon WesBanco s business volumes. WesBanco s deposit levels are affected by numerous factors including personal savings rates, personal income, and competitive rates on alternative investments, as well as competition from other financial institutions within the markets we serve and liquidity needs of WesBanco. Loan levels are also subject to various factors including construction demand, business financing needs, consumer spending and interest rates, as well as loan terms offered by competing lenders.

APPLICATION OF CRITICAL ACCOUNTING POLICIES AND ESTIMATES

WesBanco s critical accounting policies involving the significant judgments and assumptions used in the preparation of the Consolidated Financial Statements as of June 30, 2014 have remained unchanged from the disclosures presented in WesBanco s Annual Report on Form 10-K for the year ended December 31, 2013 within the section Management s Discussion and Analysis of Financial Condition and Results of Operations.

RESULTS OF OPERATIONS

EARNINGS SUMMARY

Net income for the three months ended June 30, 2014 was $18.9 million, compared to $17.0 million for the second quarter of 2013, representing an increase of 10.9%, while diluted earnings per share were $0.64, compared to $0.58 per share for the second quarter of 2013, representing an increase of 10.3%. For the six month period ended June 30, 2014, net income totaled $35.3 million compared to $33.0 million for the first half of last year, representing an increase of 6.8%, while diluted earnings per share totaled $1.20 as compared to $1.13 for 2013, representing an increase of 6.2%. The increase in net income improved the return on average assets to 1.15% from 1.10% in the first six months of last year. Return on assets for WesBanco remains well above first quarter 2014 peer group averages, the most recent available.

Net interest income increased $2.3 million or 5.0% in the second quarter of 2014 compared to the second quarter of 2013, due to a 2.8% increase in average earning assets through increased average loan balances and $0.5 million of other interest income related to a refund of federal income taxes. Year-to-date net interest income increased $3.5 million or 3.8% from last year. The net interest margin improved by 8 basis points to 3.64% in the second quarter of 2014 compared to 3.56% in the same quarter of 2013, while for the first six months the margin was 3.63% compared to 3.60% in 2013. The interest on the tax refund contributed 3 basis points to the margin in the second quarter and 1 basis point to the year-to-date margin in 2014. Accretion of various purchase accounting adjustments from a 2012 acquisition benefited the net interest margin throughout 2013 and the first half of 2014, but at a decreasing rate. Excluding this benefit from both years, the net interest margin increased by 13 basis points from the second quarter of 2013, from 3.48% to 3.61%, and 10 basis points from the first six months of 2013, from 3.49% to 3.59%. The improved net interest margin in the current low interest rate environment resulted partially from the aforementioned loan growth as the average rate on loans is higher than the average rate on securities. In addition, funding costs continued to decrease in the first six months of 2014 as a result of a 33.2% reduction in higher-rate average FHLB and other borrowings, primarily through maturities, and a 9.8% increase in lower-cost demand, money market and savings account deposits, while higher-cost CDs decreased by 9.2%. Overall average deposits increased by 3.6% year-to-date in 2014 compared to the same period in 2013.

Lower charge-offs and continued improvement in delinquent, non-performing and classified and criticized loans resulted in the provision for credit losses decreasing to $0.8 million for the second quarter of 2014 compared to $2.2 million in the first quarter of 2014, and $1.0 million in the second quarter of 2013. For the first half of 2014 the provision was $3.0 million compared to $3.1 million in the same period of 2013. The allowance for loan losses represented 1.16% of total portfolio loans at June 30, 2014, compared to 1.33% at the end of the 2013 second quarter.

Non-interest income increased $0.5 million or 2.9% for the second quarter compared to the second quarter of 2013. The increase was due, in part, to a $1.0 million bank-owned life insurance death benefit in the current quarter. In addition, trust fees increased 8.0% as assets under management continued to increase from customer development initiatives and overall market improvements. Total trust assets were $3.8 billion at June 30, 2014, representing an increase of 11.7% from $3.4 billion at June 30, 2013. Net securities brokerage revenues increased 22.1%, due to significant production increases from existing markets, the 2013 deployment of an advisor team in the Pittsburgh market, the addition of support and producing staff in several regions, as well as an increase in referrals and production from a licensed retail banker program. Service charges on deposits decreased 8.6% compared to the second quarter of 2013, due to lower overdraft fees that are affected by lower seasonal usage patterns, consistent increases in deposit levels and higher average deposits per account. Mortgage loan sale gains decreased 32.2% as increasing interest rates reduced refinancings resulting in lower mortgage activity, which was also impacted by the recently-adopted Qualified Mortgage and Ability-to-Repay rules, which have somewhat limited the Bank s product offerings. Net security gains decreased by $0.5 million. For the first half of 2014, non-interest income increased 0.2% from trends similar to the second quarter; however there was also a $1.1 million bank-owned life insurance death benefit in the first quarter of last year.

Non-interest expense increased $0.8 million or 2.0% for the second quarter compared to the second quarter of 2013. Salaries and wages increased 7.2%, due to routine annual adjustments to compensation, increased commissions on higher brokerage revenue and incentive and stock-related compensation granted during the quarter. Employee benefits expense decreased 4.9%, primarily from decreased pension expense. Other expense decreased 1.1% primarily due to reduced communications expense. For the first half of 2014, non-interest expense increased $0.2 million or 0.2% compared to the same period in 2013. Excluding 2013 merger-related expenses of $1.2 million incurred primarily in the first quarter of 2013, total non-interest expense would have increased $1.4 million or 1.7% for the first six months. Salaries and wages increased 5.6% and employee benefits decreased 7.6% in the year-to-date period. In addition, net occupancy and equipment expense increased due to higher weather-related expenses, the opening of two branches near the end of 2013, and investment in internal infrastructure in the second half of last year. Other expense decreased 1.2% primarily due to lower communication and other real estate owned expenses.

The provision for federal and state income taxes increased to $12.2 million in 2014 compared to $10.9 million in the first six months of 2013. The increase in income tax expense was due to an increase in pre-tax income which also caused a higher effective tax rate of 25.7% compared to 24.9% for 2013.

NET INTEREST INCOME

TABLE 1. NET INTEREST INCOME

	For the Three Months Ended June 30,		For the Six Months Ended June 30,	
(unaudited, dollars in thousands)	**2014**	**2013**	**2014**	**2013**
Net interest income	**$ 48,307**	$ 45,989	**$ 95,631**	$ 92,118
Taxable equivalent adjustments to net interest income	**1,850**	1,758	**3,673**	3,442
Net interest income, fully taxable equivalent	**$ 50,157**	$ 47,747	**$ 99,304**	$ 95,560
Net interest spread, non-taxable equivalent	**3.41%**	3.30%	**3.39%**	3.32%
Benefit of net non-interest bearing liabilities	**0.10%**	0.13%	**0.10%**	0.14%
Net interest margin	**3.51%**	3.43%	**3.49%**	3.46%
Taxable equivalent adjustment	**0.13%**	0.13%	**0.14%**	0.14%

Net interest margin, fully taxable equivalent	**3.64%**	3.56%	**3.63%**	3.60%

Net interest income, which is WesBanco s largest source of revenue, is the difference between interest income on earning assets, primarily loans and securities, and interest expense on liabilities (deposits and short and long-term borrowings). Net interest income is affected by the general level and changes in interest rates, the steepness and shape of the yield curve, changes in the amount and composition of interest earning assets and interest bearing liabilities, as well as the frequency of repricing of existing assets and liabilities. Net interest income increased $2.3 million or 5.0% in the second quarter and $3.5 million or 3.8% in the first half of 2014 compared to the same periods in 2013 due to an increase in average earning assets through increased average loan balances and $0.5 million of other interest income related to a refund of federal income taxes. Average loan balance increases of $180.0 million or 4.9% year-to-date were funded primarily by increases in deposits as total average deposits increased by $179.9 million or 3.6% from the first half of 2013. Deposit increases occurred in all major categories except for certificates of deposit, and were the result of marketing campaigns, customer incentives, wealth management and business initiatives as well as deposits from Marcellus and Utica shale gas bonus and royalty payments. In addition, the net interest margin increased 8 basis points in the second quarter to 3.64% and 3 basis points in the first six months compared to the same periods in 2013. The interest on the tax refund contributed 3 basis points to the margin in the second quarter and 1 basis point year-to-date in 2014. The cost of funds improved significantly, declining 25 basis points in both the second quarter and the first half of 2014 compared to the same periods in 2013 due to lower offered rates, declining average balances on maturing certificates of deposit, an increase in balances of lower-cost products and lower balances of FHLB and other borrowings. Accretion of various purchase accounting adjustments from a 2012 acquisition benefited the net interest margin throughout 2013 and the first half of 2014, but at a decreasing rate. Excluding this benefit from both years, the net interest margin increased by 13 basis points compared to the second quarter of 2013, from 3.48% to 3.61%, and 10 basis points compared to the first six months of 2013, from 3.49% to 3.59%.

Interest income decreased $0.4 million or 0.7% in the second quarter and $1.8 million or 1.7% in the first six months of 2014 compared to the same periods in 2013 due mostly to lower yields on loans, partially offset by increases in average balances of loans and higher yields on securities. Rates decreased 30 basis points in the second quarter on average loan balances from reduced rates on new and repriced assets due to the competitive necessity of offering lower rates on quality credits in an increasingly competitive and low interest rate environment. However, the increase in average loans helped to mitigate the effect of the lower rates, as rates earned on loans are higher than those on securities. In the second quarter of 2014, average loans represented 70.7% of average earning assets, compared to 69.8% in the same quarter of 2013. Total securities yields increased by 9 basis points in the second quarter due to a greater reinvestment of funds from investment maturities, calls and prepayments into tax-exempt securities, which provide the highest yield within securities. The average balance of tax-exempts increased 6.6% or $25.3 million over the last year, and was 25.7% of total average securities compared to 24.1% in the second quarter of 2013. Taxable securities yields increased 8 basis points in the second quarter of 2014 compared to 2013, while tax-exempt securities yields declined 7 basis points, due to the aforementioned purchases of municipals at current lower rates. The slowing of prepayment speeds in mortgage-backed and collateralized mortgage securities has contributed to the increase in taxable securities yields. Average taxable securities balances decreased over the last year from the prepayments in mortgage-backed and collateralized mortgage securities and calls of taxable municipal securities. These decreases were partially offset by continued purchases of lower-premium collateralized mortgage securities and 10-15 year residential mortgage pools. Purchases of collateralized mortgage securities and shorter-term mortgage pools reduce the average life of the portfolio, particularly for the portion accounted for as available-for-sale, positioning the Bank for possible future increases in interest rates, while maintaining required levels of pledgeable securities.

Portfolio loans increased $144.7 million in the twelve months ended June 30, 2014 as originations continued to outpace paydowns. WesBanco grew outstanding loans 3.8% as a result of $1.4 billion in loan originations over the last year. Although somewhat depressed in the first quarter of 2014 due to the challenging weather and economy, loan originations increased 28.4% in the second quarter compared to the first quarter. Loan growth was driven by increased business activity in markets impacted by Marcellus and Utica shale gas drilling, additional lending personnel, focused marketing efforts, an expanded presence in our larger urban markets and continued improvement in loan origination processes.

Interest expense decreased $2.7 million or 32.0% in the second quarter of 2014 and $5.3 million or 31.0% in the first half compared to the same periods in 2013 due to decreases in rates paid and in average interest bearing liabilities, and a continued shift in the liability mix towards less expensive sources of funding. Total average interest bearing liabilities decreased $14.2 million or 0.3% in the second quarter and $13.3 million or 0.3% in the first six months of 2014 from the same periods in 2013 due to decreases in borrowings. The average rate paid on interest bearing liabilities decreased 25 basis points in both the second quarter and the first half of 2014 compared to the same periods in 2013. Rates paid on interest bearing deposits declined by 23 basis points to 0.43% in the second quarter due to a significant decline in rates on certificates of deposit, as a result of management reducing offered rates on maturities. The average rate paid on certificates of deposit declined by 52 basis points from the second quarter of 2013, while the rates paid on other deposit types remained nearly unchanged. Improvements in the deposit funding mix also continued to lower the cost of funds, with average certificates of deposit decreasing to 27.9% of total average deposits from 32.2% in the second quarter of last year. Average interest bearing deposits increased by $60.0 million and average non-interest bearing demand deposits increased by $132.0 million from the 2013 second quarter. Average certificates of deposit decreased by 9.9% and were the only deposit category to decrease over the past year, as WesBanco continues to focus on reducing rate offerings and growing customers with multiple banking relationships, as opposed to single service certificates of deposit customers. Deposit increases were used to pay down higher-cost maturing FHLB borrowings and certain other borrowings, also contributing to the reduced cost of funds. Average total FHLB and other borrowings decreased $74.2 million or 36.5%, due to maturities and paydowns, and were 2.9% of average interest bearing liabilities in the second quarter of 2014 compared to 4.6% in the same 2013 quarter.

(1) Gross of allowance for loan losses and net of unearned income. Includes non-accrual and loans held for sale. Loan fees included in interest income on loans totaled $0.8 million and $1.0 million for the three months ended June 30, 2014 and 2013, respectively, and $1.7 million and $2.0 million for the six months ended June 30, 2014 and 2013, respectively. Additionally, loan accretion included in net interest income on loans acquired from a 2012 acquisition was $0.3 million and $0.6 million for the three months ended June 30, 2014 and 2013, respectively, and $0.7 million and $1.9 million for the six months ended June 30, 2014 and 2013, respectively, while accretion on interest bearing liabilities acquired from a 2012 acquisition was $0.2 million and $0.5 million for the three months ended June 30, 2014 and 2013, respectively, and $0.4 million and $1.0 million for the six months ended June 30, 2014 and 2013, respectively.

(2) Average yields on available-for-sale securities are calculated based on amortized cost.

(3) Taxable equivalent basis is calculated on tax-exempt securities using a tax rate of 35% for each year presented.

(4) Interest income on other earning assets includes $0.5 million of interest on a federal income tax refund for the three and six months ended June 30, 2014.

(1) Taxable equivalent basis is calculated on tax-exempt securities using a tax rate of 35% for each year presented.

PROVISION FOR CREDIT LOSSES

The provision for credit losses is the amount to be added to the allowance for loan losses after net charge-offs have been deducted to bring the allowance to a level considered appropriate to absorb probable losses in the loan portfolio. The provision for credit losses also includes the amount to be added to the reserve for loan commitments to bring that reserve to a level considered appropriate to absorb probable losses on unfunded commitments. The provision for credit losses decreased to $0.8 million for the second quarter of 2014 compared to $1.0 million in the second quarter of 2013. For the first half of 2014 the provision was $3.0 million compared to $3.1 million in the same period of 2013. Decreases in the provision for credit losses are consistent with the continued reduction in loans with adverse characteristics. Since June 30, 2013, non-performing loans decreased 20.4%, classified and criticized loans decreased 23.6%, past due loans decreased 32.5%, and net charge-offs decreased 13.3%. (Please see the Allowance for Credit Losses section of this MD&A for additional discussion).

Non-interest income is a significant source of revenue and an important part of WesBanco s results of operations. WesBanco offers its customers a wide range of retail, commercial, investment and electronic banking services, which are viewed as a vital component of WesBanco s ability to attract and maintain customers, as well as providing additional fee income beyond normal spread-related income to WesBanco. For the second quarter of 2014, non-interest income increased $0.5 million or 2.9% compared to the second quarter of 2013. The increase was due to a $1.0 million bank-owned life insurance death benefit, increased trust fees and increased securities brokerage revenue in the second quarter of 2014, while service charges on deposits, gains on sales of loans and net securities gains decreased. For the first half of 2014, non-interest income increased 0.2% from trends similar to the second quarter; however there was also a $1.1 million bank-owned life insurance death benefit in the first quarter of last year.

Trust fees increased $0.4 million or 8.0% compared to the second quarter of 2013, and $1.0 million or 10.3% compared to the first six months of 2013 as assets under management continued to increase from customer development initiatives and overall market improvements. Total trust assets were $3.8 billion at June 30, 2014, representing an increase of 11.7% from $3.4 billion at June 30, 2013. At June 30, 2014, trust assets include managed assets of $3.0 billion and non-managed (custodial) assets of $0.8 billion. Assets managed for the WesMark Funds, a proprietary group of mutual funds that is advised by WesBanco s trust and investment services group, were $941.3 million as of June 30, 2014 and $837.1 million at June 30, 2013 and are included in trust managed assets.

Service charges on deposits decreased 8.3% in the first half of the year compared to the same period in 2013 due to lower overdraft fees that are affected by lower seasonal usage patterns, consistent increases in deposit levels and higher average deposits per account.

Electronic banking fees, which include debit card interchange fees, continued to grow, increasing 3.6% compared to the first half of 2013, due to a higher volume of debit card transactions, which have continued to grow due to marketing initiatives and as customers move more towards electronic transactions.

Net securities brokerage revenue increased $0.7 million or 22.1% from the first half of 2013 due to significant production increases from existing markets, the 2013 deployment of an advisor team in the Pittsburgh market, the addition of support and producing staff in several regions, as well as an increase in referrals and production from a licensed retail banker program.

Net gains on sales of mortgage loans decreased 75.1% compared to the first half of 2013 as increasing interest rates reduced refinancings resulting in lower mortgage activity. Total mortgage production was $120.3 million in the first half of 2014, down 45.1% from the comparable 2013 period. Mortgages sold into the secondary market represented $45.7 million or 38.0% of overall mortgage loan production in the first half of 2014 compared to $80.0 million or 36.5% in the first half of 2013. Mortgage activity was also impacted by the recently-adopted Qualified Mortgage and Ability-to-Repay rules, which have somewhat limited the Bank s product offerings.

The implementation of a company-wide modernization of the communication infrastructure resulted in a $0.2 million write-down of computer equipment in the second quarter of 2014. The successful implementation of the communication infrastructure reduced communications expense by $0.4 million.

Other	**2,772**	2,324	448	19.3%	**5,266**	4,615	651	14.1%
Total non-interest expense	**$ 40,304**	$ 39,499	$ 805	2.0%	**$ 80,398**	$ 80,246	$ 152	0.2%

Non-interest expense increased $0.8 million or 2.0% in the second quarter and $0.2 million or 0.2% year-to-date compared to the same periods in 2013. Excluding 2013 merger-related expenses of $1.2 million incurred primarily in the first quarter of 2013, total non-interest expense would have increased $1.4 million or 1.7% for the first six months. The increase in non-interest expense in the second quarter and first half of 2014 was primarily due to employee-related expenses and infrastructure improvements.

Salaries and wages increased $1.1 million from the second quarter of 2013 and $1.8 million year-to-date compared to 2013 due to routine annual adjustments to compensation, increased brokerage revenue commissions and higher incentive and stock-based compensation. Employee benefit expenses decreased 7.6% year-to-date primarily from decreased pension expense and recruiting costs, partially offset by higher healthcare costs.

Net occupancy and equipment expense increased $0.8 million or 7.3% over the first half of 2013 due to increased depreciation and other maintenance costs resulting from the opening of two branches near the end of last year, significant upgrades to our data processing and communications infrastructure, including a new mainframe computer, new disaster recovery site, new mobile banking capabilities, and other internal infrastructure placed into service during the second half of 2013. In addition, new teller cash recycling machines continued to be introduced into our branches, which have improved the speed of customer service, improved cash controls and reduced full-time equivalent employees. Weather-related expenses incurred in the first quarter also contributed to the increase in year-to-date net occupancy.

Marketing expenses increased $0.3 million over the first half of 2013 primarily due to increased free checking incentives associated with the 2014 spring campaign.

Other real estate owned and foreclosure expenses decreased $0.5 million in 2014 compared to 2013 due to lower foreclosure and liquidation activity.

Communications expense decreased 50.9% from the second quarter of 2013 and 36.8% from the first half of 2013 due to the implementation of a company-wide modernization of the communication infrastructure.

INCOME TAXES

The provision for federal and state income taxes increased to $12.2 million in 2014 compared to $10.9 million in the first six months of 2013. The increase in income tax expense was due to an increase in pre-tax income which also caused a higher effective tax rate of 25.7% compared to 24.9% for 2013.

Table of Contents

FINANCIAL CONDITION

Total assets increased 2.2% while deposits, borrowings, and stockholders equity increased 1.1%, 14.6%, and 4.3%, respectively, compared to December 31, 2013. The increase in total assets was primarily the result of an $80.9 million increase in the investment securities portfolio, coupled with a $51.2 million increase in total portfolio loans. Loan growth was driven by increased business activity in markets impacted by Marcellus and Utica shale gas drilling, expansion into the Pittsburgh market, additional lending personnel, focused marketing efforts, an expanded presence in our larger urban markets, and continued improvement in loan origination processes. Deposits increased primarily due to a 5.0% increase in savings deposits, a 4.1% increase in demand deposits, and a 2.8% increase in money markets, which more than offset the 5.7% decrease in certificates of deposit due to lower rate offerings on maturities. These increases were due to marketing, marketing incentives paid to customers, focused retail and business strategies to obtain more account relationships and customers preferences for shorter-term maturities. Deposit growth was also achieved through initial deposits from bonus and royalty payments for Marcellus and Utica shale gas payments from energy companies in WesBanco s southwestern Pennsylvania, eastern Ohio and northern West Virginia markets. However, deposits decreased 1.9% in the second quarter compared to March 31, 2014 due to reduced demand deposits and CDs. FHLB borrowings increased $99.1 million as $16.4 million in scheduled maturities were offset by $115.5 million in new short-term borrowings which were utilized to manage WesBanco s normal liquidity needs. Other short-term borrowings decreased 37.1% from December 31, 2013 as higher cost structured repurchase agreements were paid down using funding provided by the increase in lower cost deposits and other available cash flows. Total shareholders equity increased $32.0 million, or 4.3%, compared to December 31, 2013, due to net income exceeding dividends for the period by $22.4 million, coupled with $7.3 million of unrealized gains in accumulated other comprehensive income.

Weighted average life (in years)	**4.1**	4.2		
Held-to-maturity securities:				
Weighted average yield at the respective period end (2)	**4.67%**	4.65%		
As a % of total securities	**37.7%**	39.0%		
Weighted average life (in years)	**6.0**	6.7		
Total securities:				
Weighted average yield at the respective period end (2)	**3.25%**	3.26%		
As a % of total securities	**100.0%**	100.0%		
Weighted average life (in years)	**4.9**	5.2		

(1) At June 30, 2014 and December 31, 2013, there were no holdings of any one issuer, other than the U.S. government and certain federal or federally-related agencies, in an amount greater than 10% of WesBanco s shareholders equity.

(2) Weighted average yields have been calculated on a taxable-equivalent basis using the federal statutory tax rate of 35%.

Total investment securities, which are a source of liquidity for WesBanco as well as a contributor to interest income, increased by $80.9 million or 5.3% from December 31, 2013 to June 30, 2014. Through the first half of the year, the available-for-sale portfolio increased by $71.7 million or 7.7%, which was directly due to increased purchases of residential mortgage-backed securities, while the held-to-maturity portfolio increased $9.2 million or 1.4%. For the six months ended June 30, 2014, security purchases totaled $212.2 million, while security sales were $3.5 million and maturities, paydowns, and calls totaled $136.6 million.

Net unrealized gains (losses) on available-for-sale securities included in accumulated other comprehensive income, net of tax, as of June 30, 2014 and December 31, 2013 were $0.9 million and ($6.1) million, respectively. Unrealized gains on available-for-sale securities in the first half of 2014 were due to a decrease in market rates from December 31, 2013. With approximately 38% of the investment portfolio in the held-to-maturity category, the recent volatility in interest rates does not have as much impact on other comprehensive income as it would if the entire portfolio were included in the category available-for-sale.

WesBanco s municipal portfolio comprises 38.6% of the overall securities portfolio as of June 30, 2014 as compared to 40.0% as of December 31, 2013, and it carries different risks that are not as prevalent in other security types contained in the portfolio. The following table presents the allocation of the municipal bond portfolio based on the combined S&P and Moody s ratings of the individual bonds (at fair value):

Table of Contents

TABLE 7. MUNICIPAL BOND RATINGS

(unaudited, dollars in thousands)	June 30, 2014 Amount	June 30, 2014 % of Total	December 31, 2013 Amount	December 31, 2013 % of Total
Municipal bonds (at fair value) (1):				
Moody s: Aaa / S&P: AAA	**$ 48,909**	**7.6**	$ 45,898	7.5
Moody s: Aa1 ; Aa2 ; Aa3 / S&P: AA+ ; AA ; AA-	**466,538**	**72.8**	429,250	70.5

Moody s: Baa1 ; Baa2 ; Baa3 / S&P: BBB+ ; BBB ; BBB- (2)	**8,870**	**1.4**	9,013	1.5
Not rated by either agency	**6,365**	**1.0**	6,707	1.1
Total municipal bond portfolio	**$ 640,957**	**100.0**	$ 608,994	100.0

(1) The highest available rating was used when placing the bond into a category in the table.
(2) As of June 30, 2014 and December 31, 2013, there are no securities in the municipal portfolio rated below investment grade.

WesBanco s municipal bond portfolio consists of both taxable (primarily Build America Bonds) and tax-exempt general obligation and revenue bonds. The following table presents additional information regarding the municipal bond type and issuer (at fair value):

TABLE 8. COMPOSITION OF MUNICIPAL SECURITIES

(unaudited, dollars in thousands)	June 30, 2014 Amount	June 30, 2014 % of Total	December 31, 2013 Amount	December 31, 2013 % of Total
Municipal bond type:				
General Obligation	**$ 451,419**	**70.4**	$ 428,705	70.4
Revenue	**189,538**	**29.6**	180,289	29.6
Total municipal bond portfolio	**$ 640,957**	**100.0**	$ 608,994	100.0
Municipal bond issuer:				
State Issued	**$ 53,017**	**8.3**	$ 51,389	8.4
Local Issued	**587,940**	**91.7**	557,605	91.6
Total municipal bond portfolio	**$ 640,957**	**100.0**	$ 608,994	100.0

The amortized cost of the municipal bond portfolio at June 30, 2014 and December 31, 2013 was $617.6 million and $608.9 million, respectively.

WesBanco s municipal bond portfolio is broadly spread across the United States. The following table presents the top five states of municipal bond concentration based on total fair value at June 30, 2014:

TABLE 9. CONCENTRATION OF MUNICIPAL SECURITIES

(unaudited, dollars in thousands)	June 30, 2014 Fair Value	June 30, 2014 % of Total
Pennsylvania	**$ 176,385**	**27.5**
Ohio	**84,890**	**13.2**

Texas	**75,362**	**11.8**
Illinois	**35,658**	**5.6**
Michigan	**25,689**	**4.0**
All other states (1)	**242,973**	**37.9**
Total municipal bond portfolio	**$ 640,957**	**100.0**

(1) WesBanco s municipal bond portfolio contains obligations in the state of West Virginia totaling $17.7 million or 2.8% of the total municipal portfolio.

WesBanco uses prices from independent pricing services and, to a lesser extent, indicative (non-binding) quotes from independent brokers, to measure the fair value of its securities. WesBanco validates prices received from pricing services or brokers using a variety of methods, including, but not limited to, comparison to secondary pricing services, corroboration of pricing by reference to other independent market data such as secondary broker quotes and relevant benchmark indices, review of pricing by personnel familiar with market liquidity and other market-related conditions, review of pricing service methodologies, review of independent auditor reports received from the pricing service regarding its internal controls, and through review of inputs and assumptions used in pricing certain securities thinly traded or with limited observable data points. The procedures in place provide management with a sufficient understanding of the valuation models, assumptions, inputs and pricing to reasonably measure the fair value of WesBanco s securities. For additional disclosure relating to fair value measurements, refer to Note 6, Fair Value Measurement in the Consolidated Financial Statements.

Table of Contents

LOANS AND CREDIT RISK

Loans represent WesBanco s single largest balance sheet asset classification and the largest source of interest income. Business purpose loans consist of commercial real estate (CRE) loans and other commercial and industrial (C&I) loans that are not secured by real estate. CRE loans are further segmented into land and construction loans, and loans for improved property. Consumer purpose loans consist of residential real estate loans, home equity lines of credit and other consumer loans. Loans held for sale generally consist of residential real estate loans originated for sale in the secondary market, but at times may also include other types of loans. The outstanding balance of each major category of the loan portfolio is summarized in Table 10.

The risk that borrowers will be unable or unwilling to repay their obligations and default on loans is inherent in all lending activities. Credit risk arises from many sources including general economic conditions, external events that impact businesses or industries, isolated events that impact a major employer, individual loss of employment or other personal hardships as well as changes in interest rates or the value of collateral. Credit risk is also impacted by a concentration of exposure within a geographic market or to one or more borrowers, industries or collateral types. The primary goal in managing credit risk is to minimize the impact of default by an individual borrower or group of borrowers. Credit risk is managed through the initial underwriting process as well as through ongoing monitoring and administration of the portfolio that varies by the type of loan. The Bank s credit policies establish standard underwriting guidelines for each type of loan and require an appropriate evaluation of the credit characteristics of each borrower. This evaluation includes the borrower s primary source of repayment capacity; the adequacy of collateral, if any, to secure the loan; the potential value of personal guarantees as secondary sources of repayment; and other factors unique to each loan that may increase or mitigate its risk. Credit bureau scores are also considered when evaluating consumer purpose loans as well as guarantors of business purpose loans. However, the Bank does not periodically update credit bureau scores subsequent to when loans are made to determine changes in credit history.

Credit risk is mitigated for all types of loans by continuously monitoring delinquency levels and pursuing collection efforts at the earliest stage of delinquency. The Bank also monitors general economic conditions, including employment, housing activity and real estate values in its market. The Bank also periodically evaluates and changes its underwriting standards when warranted based on market conditions, the historical performance of a category of the portfolio, or other external factors. Credit risk is also regularly evaluated for the impact of adverse economic and other events that increase the risk of default and the potential loss in the event of default to understand their impact on the Bank s earnings and capital.

TABLE 10. COMPOSITION OF LOANS (1)

	June 30, 2014		**December 31, 2013**	
(unaudited, dollars in thousands)	**Amount**	**% of Loans**	**Amount**	**% of Loans**
Commercial real estate:				
Land and construction	**$ 255,499**	**6.5**	$ 263,117	6.7
Improved property	**1,685,373**	**42.6**	1,649,802	42.3
Total commercial real estate	**1,940,872**	**49.1**	1,912,919	49.0
Commercial and industrial	**578,665**	**14.6**	556,249	14.3

Loans held for sale	**10,641**	**0.3**	5,855	0.2
Total loans	**$ 3,956,759**	**100.0**	$ 3,900,772	100.0

(1) Loans are presented gross of the allowance for loan losses and net of unearned income, credit valuation adjustments, and unamortized net deferred loan fee income and loan origination costs.

Total loans increased $56.0 million or 1.4% from December 31, 2013 as loan growth was achieved through $625 million in loan originations over the last six months. Although somewhat depressed in the first quarter due to the challenging weather and economy, loan originations increased 28.4% in the second quarter compared to the first quarter. Loan growth was driven by increased business activity in markets impacted by Marcellus and Utica shale gas drilling, additional lending personnel, focused marketing efforts, an expanded presence in our larger urban markets, and continued improvement in loan origination processes. CRE land and construction loans decreased $7.6 million or 2.9% as several completed projects were transferred to CRE improved property loans. CRE improved property loans increased $35.6 million or 2.2% due to the migration of CRE land and construction loans into the category and new loan originations. C&I loans increased $22.4 million or 4.0% due to focused business development efforts and an increase in the usage of lines of credit. Residential real estate loans increased $7.6 million or 0.9% as mortgage originations increased 60.5% over the first quarter and more loans were retained for the portfolio. Home equity lines of credit increased $10.4 million or 3.7% due to new loan campaigns and increased usage, while consumer loans decreased $17.2 million or 6.9% as paydowns outpaced new loan originations. Loans held for sale increased $4.8 million due to the increased mortgage applications. All loan categories were also impacted by a continued focus on improving the overall profitability and quality of the loan portfolio while also maintaining WesBanco s disciplined underwriting and pricing practices in a highly competitive lending market for high quality borrowers. Total loan commitments, including loans approved but not closed increased 79.3% from December 31, 2013 due primarily to increases in CRE land and construction and home equity lines of credit originations in the second quarter of 2014.

Table of Contents

NON-PERFORMING ASSETS, IMPAIRED LOANS AND LOANS PAST DUE 90 DAYS OR MORE

Non-performing assets consist of non-accrual loans and TDRs, other real estate acquired through or in lieu of foreclosure, bank premises held for sale, and repossessed automobiles acquired to satisfy defaulted consumer loans.

TABLE 11. NON-PERFORMING ASSETS

(unaudited, dollars in thousands)	**June 30, 2014**	**December 31, 2013**
Non-accrual loans:		
Commercial real estate - land and construction	**$ 1,950**	$ 2,564
Commercial real estate - improved property	**15,946**	17,305
Commercial and industrial	**6,167**	4,380
Residential real estate	**10,137**	10,240
Home equity	**1,283**	1,604
Consumer	**635**	540
Total non-accrual loans (1)	**36,118**	36,633
TDRs accruing interest:		
Commercial real estate - land and construction		
Commercial real estate - improved property	**3,234**	3,052
Commercial and industrial	**222**	415
Residential real estate	**8,754**	9,850
Home equity	**835**	902
Consumer	**468**	642
Total TDRs accruing interest (1)	**13,513**	14,861
Total non-performing loans	**$ 49,631**	$ 51,494
Other real estate owned and repossessed assets	**5,106**	4,860
Total non-performing assets	**$ 54,737**	$ 56,354
Non-performing loans/total portfolio loans	**1.26%**	1.32%
Non-performing assets/total assets	**0.87%**	0.92%
Non-performing assets/total portfolio loans, other real estate and repossessed assets	**1.39%**	1.45%

(1) TDRs on nonaccrual of $6.3 million and $9.3 million at June 30, 2014 and December 31, 2013, respectively, are included in total nonaccrual loans.

Non-performing loans, which consist of non-accrual loans and TDRs, decreased $1.9 million or 3.6% from December 31, 2013 to June 30, 2014. Non-performing loans decreased primarily due to reductions in CRE improved property loans on non-accrual and residential real estate TDRs offset by a $1.6 million C&I loan that was placed on non-accrual in the second quarter. Another C&I loan that was placed on non-accrual and partially charged off in the first quarter of 2014 that had a remaining balance of $1.6 million at March 31, 2014 was paid in full from the sale of the collateral in the second quarter that resulted in a $0.3 million recovery of the amount previously charged-off. (Please see the Notes to the Consolidated Financial Statements for additional discussion.)

38

Table of Contents

The following table presents past due and accruing loans excluding non-accrual and TDRs:

TABLE 12. PAST DUE AND ACCRUING LOANS EXCLUDING NON-ACCRUAL AND TDRs

(unaudited, dollars in thousands)	**June 30, 2014**	**December 31, 2013**
Loans past due 90 days or more:		
Commercial real estate - land and construction	**$ 248**	$ 248
Commercial real estate - improved property		318
Commercial and industrial	**6**	
Residential real estate	**1,843**	1,289
Home equity	**628**	411
Consumer	**222**	325
Total loans past due 90 days or more	**2,947**	2,591
Loans past due 30 to 89 days:		
Commercial real estate - land and construction	**235**	2
Commercial real estate - improved property	**907**	2,897
Commercial and industrial	**272**	1,310
Residential real estate	**3,339**	4,894
Home equity	**2,469**	1,934
Consumer	**2,916**	3,794
Total loans past due 30 to 89 days	**10,138**	14,831
Total 30 days or more	**$ 13,085**	$ 17,422
Loans past due 90 days or more and accruing to total portfolio loans	**0.07%**	0.07%
Loans past due 30-89 days to total portfolio loans	**0.26%**	0.38%

Loans past due 90 days or more and accruing interest excluding TDRs increased $0.4 million or 13.7% from December 31, 2013. These loans continue to accrue interest because they are both well-secured and in the process of collection. Loans past due 30-89 days decreased $4.7 million or 31.6% between December 31, 2013 and June 30, 2014. The reduction in total delinquency is the result of improved economic conditions as well as management s continued focus on controlling early stage delinquency.

Table of Contents

ALLOWANCE FOR CREDIT LOSSES

The allowance for loan losses decreased $1.6 million from December 31, 2013 to June 30, 2014 as a result of a lower provision expense than net charge-offs and represented 1.16% of total portfolio loans at June 30, 2014, compared to 1.22% at December 31, 2013. The decrease in the allowance is supported by reductions in all categories of loans with adverse characteristics and continued improvement in economic conditions. The allowance for loans individually evaluated increased $0.3 million to $1.1 million from December 31, 2013 for one C&I loan that was placed on non-accrual in the second quarter. The allowance for loans collectively evaluated decreased $2.0 million to $44.7 million due to lower accruing delinquency and reduced levels of non-performing, classified and criticized loans.

Net charge-offs for the second quarter of 2014 were 0.06% of average portfolio loans, compared to 0.26% for the second quarter of 2013. Year-to-date, net charge-offs were 0.25% of average portfolio loans compared to 0.30% in the same period of 2013. Gross charge-offs for the second quarter of 2014 were 0.20% of average portfolio loans compared to 0.36% for the same quarter last year.

The allowance for loan commitments from December 31, 2013 to June 30, 2014 was relatively unchanged.

The allowance for credit losses by loan category, presented in Note 4 Loans and the Allowance for Credit Losses to the Consolidated Financial Statements, summarizes the impact of changes in various factors that affect the allowance for loan losses in each segment of the portfolio. The allowance for all segments is impacted by changes in loan balances, as well as changes in historical loss rates adjusted for qualitative factors such as economic conditions. The CRE and C&I segments of the portfolio are also impacted by changes in the risk grading distribution of the portfolio as well as the migration of CRE loans from land and construction to improved property upon the completion of construction.

The internal risk rating is the primary factor for establishing the allowance for all commercial loans, and portfolio segment loss history is the primary factor for establishing the allowance for residential real estate, home equity and consumer loans. The categorization of loans as non-performing is not as significant a factor as is the internal risk grade of the loan, although certain non-performing loans carry established specific reserves and are also typically considered classified under the Bank s risk grading system. Criticized and classified loans decreased 10.4% from December 31, 2013 to $121.5 million, or 3.08% of total loans at June 30, 2014. This represents a decrease of 23.6% over the last twelve months from $159.1 million or 4.18% of total loans as of last June 30, 2013.

Table 13 summarizes the allocation of the allowance for credit losses to each category of the loan portfolio. The allocation of the allowance was relatively unchanged from December 31, 2013. Decreases in the allowance for CRE land and construction, CRE improved property and residential real estate loans were primarily the result of lower historical loss rates. The decrease in the allowance for consumer loans is attributed to decreases in loans in that category. The allowance for C&I loans was relatively unchanged as a result of loan growth and the addition of a specific reserve during the quarter for one loan while the increase in the allowance for home equity lines of credit primarily reflects recent growth in that category. The allocation of the allowance for deposit account overdrafts increased due to increased activity.

TABLE 13. ALLOCATION OF THE ALLOWANCE FOR CREDIT LOSSES

(unaudited, dollars in thousands)	**June 30, 2014**	**% of Total**	**December 31, 2013**	**% of Total**
Allowance for loan losses:				
Commercial real estate - land and construction	**$ 5,651**	**12.2**	$ 6,056	12.6
Commercial real estate - improved property	**17,308**	**37.4**	18,157	37.8
Commercial and industrial	**9,954**	**21.5**	9,925	20.7
Residential real estate	**5,289**	**11.4**	5,673	11.8
Home equity	**2,132**	**4.6**	2,017	4.2
Consumer	**4,564**	**9.9**	5,020	10.5
Deposit account overdrafts	**843**	**1.8**	520	1.1
Total allowance for loan losses	**$ 45,741**	**98.8**	$ 47,368	98.7
Allowance for loan commitments:				
Commercial real estate - land and construction	**$ 281**	**0.6**	$ 301	0.6
Commercial real estate - improved property	**10**	**0.0**	62	0.1
Commercial and industrial	**131**	**0.4**	130	0.3

Residential real estate	**5**	**0.0**	5	0.0
Home equity	**90**	**0.2**	85	0.2
Consumer	**19**	**0.0**	19	0.1
Total allowance for loan commitments	**536**	**1.2**	602	1.3
Total allowance for credit losses	**$ 46,277**	**100.0**	$ 47,970	100.0

Although the allowance for credit losses is allocated as described in Table 13, the total allowance is available to absorb actual losses in any category of the loan portfolio. However, differences between management s estimation of probable losses and actual incurred losses in subsequent periods for any category may necessitate future adjustments to the provision for loan losses applicable to the category. Management believes the allowance for credit losses is appropriate to absorb probable losses at June 30, 2014.

Table of Contents

DEPOSITS

TABLE 14. DEPOSITS

(unaudited, dollars in thousands)	June 30, 2014	December 31, 2013	$ Change	% Change
Deposits				
Non-interest bearing demand	**$ 1,021,414**	$ 960,814	$ 60,600	6.3
Interest bearing demand	**871,487**	857,761	13,726	1.6
Money market	**969,518**	942,768	26,750	2.8
Savings deposits	**829,155**	789,709	39,446	5.0
Certificates of deposit	**1,425,829**	1,511,478	(85,649)	(5.7)
Total deposits	**$ 5,117,403**	$ 5,062,530	$ 54,873	1.1

Deposits, which represent WesBanco s primary source of funds, are offered in various account forms at various rates through WesBanco s 119 branches. The FDIC insures deposits up to $250,000 per account.

Total deposits increased by $54.9 million or 1.1% during the first six months of 2014 due to increases in all deposit categories other than CDs. However, deposits decreased 1.9% in the second quarter compared to March 31, 2014 due to reduced demand deposits and CDs. During the first six months of 2014 interest bearing demand and savings deposits increased 6.3% and 5.0%, respectively, while money market deposits and interest bearing demand deposits increased 2.8% and 1.6%, respectively. These increases were due to marketing, marketing incentives paid to customers, focused retail and business strategies to obtain more account relationships and customers preferences for shorter-term maturities. Deposit growth was also achieved through initial deposits from bonus and royalty payments for Marcellus and Utica shale gas payments from energy companies in WesBanco s southwestern Pennsylvania, eastern Ohio and northern West Virginia markets. WesBanco does not generally solicit brokered or other deposits out-of-market or over the internet, but does participate in the Certificate of Deposit Account Registry Services (CDARS®) program and the Insured Cash Sweep (ICS®) money market deposit program. WesBanco had $124.4 million in total outstanding ICS® balances at June 30, 2014 compared to $107.3 million at December 31, 2013.

The 5.7% decline in certificates of deposit is due to the effects of an overall corporate strategy designed to increase and remix retail deposit relationships with a focus on overall products that can be offered at a lower cost to the Bank. The decline is also impacted by lowered offered rates on maturing certificates of deposit and customer preferences for other non-maturity deposit types. WesBanco had $325.5 million in total outstanding CDARS® balances at June 30, 2014, of which $210.5 million represented one-way buys, compared to $344.7 million in total outstanding CDARS® balances at December 31, 2013, of which $234.1 million represented one-way buys. Certificates of deposit greater than $250,000 were approximately $168.1 million at June 30, 2014 compared to $164.8 million at December 31, 2013. Certificates of deposit of $100,000 or more were approximately $777.5 million at June 30, 2014 compared to $809.7 million at December 31, 2013. Certificates of deposit totaling approximately $837.2 million at June 30, 2014 with a cost of 0.94% are scheduled to mature within the next 12 months. WesBanco will continue to focus on its core deposit strategies and improving its overall mix of transaction accounts to total deposits. From time to time the Bank may offer special promotions on certain certificates of deposit maturities and savings products based on competition, sales strategies, liquidity needs and wholesale borrowing costs, although in the current interest rate environment, CD rate offerings are generally equal to or lower for comparable term maturities and types compared to rates paid on existing CDs.

BORROWINGS

TABLE 15. BORROWINGS

(unaudited, dollars in thousands)	June 30, 2014	December 31, 2013	$ Change	% Change
Federal Home Loan Bank Borrowings	**$ 138,596**	$ 39,508	$ 99,088	250.8
Other short-term borrowings	**94,745**	150,536	(55,791)	(37.1)
Junior subordinated debt owed to unconsolidated subsidiary trusts	**106,156**	106,137	19	0.0

Total	**$ 339,497**	$ 296,181	$ 43,316	14.6

In the first quarter of 2014, WesBanco paid down $16.4 million in FHLB borrowings scheduled to mature utilizing funds provided by lower cost deposits or other available cash flows for their payoff. In the second quarter, WesBanco utilized $115.5 million in new FHLB short-term borrowings. These borrowings were used to manage WesBanco s normal liquidity needs, including loan and investment funding, as well as for CD runoff.

Other short-term borrowings, which consist of securities sold under agreements to repurchase and federal funds purchased, were $94.7 million at June 30, 2014 compared to $150.5 million at December 31, 2013. The decrease in these borrowings has occurred primarily as a result of a $35.8 million decrease in securities sold under agreements to repurchase and a $20.0 million decrease in federal funds purchased. A revolving line of credit at the parent company from another bank matures July 31, 2014. The revolving line of credit, which accrues interest at an adjusted LIBOR rate, provides for aggregate borrowings secured by a pledge of the Bank s common stock of up to $25.0 million. There were no outstanding balances as of June 30, 2014 or December 31, 2013. WesBanco is negotiating a similar line with another bank, as management has been informed by the existing correspondent bank that they are unable to provide such facility at its expiration due to BASEL III regulatory constraints.

Table of Contents

OFF-BALANCE SHEET ARRANGEMENTS

WesBanco enters into financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit, letters of credit, loans approved but not closed, overdraft limits and contingent obligations to purchase loans funded by other entities. Since many of these commitments expire unused or partially used, these commitments may not reflect future cash requirements. Please refer to Note 8, Commitments and Contingent Liabilities, of the Consolidated Financial Statements and the Loans and Credit Risk section of this MD&A for additional information.

CAPITAL RESOURCES

Shareholders equity was $778.6 million at June 30, 2014 compared to $746.6 million at December 31, 2013. Total equity increased due to net income during the current six month period of $35.3 million and a $7.3 million increase in other comprehensive income, which were partially offset by the declaration of common shareholder dividends totaling $12.9 million for the six months ended June 30, 2014. WesBanco also increased its quarterly dividend rate to $0.22 per share in February, representing a 10% increase over the prior quarter rate and a cumulative 57% increase over approximately the last four years.

On May, 21 2014, WesBanco granted 83,800 stock options to selected officers at an exercise price of $28.79. These options are service-based and vest 50% at December 31, 2014 and 50% at December 31, 2015. On the same date, WesBanco also granted 40,500 shares of restricted stock to selected officers. The restricted shares are service-based and vest 36 months from the date of grant.

Regulatory guidelines require bank holding companies and commercial banks to maintain certain minimum capital ratios and define companies as well capitalized that sufficiently exceed the minimum ratios. At June 30, 2014, regulatory capital levels for both the Bank and WesBanco were substantially greater than the minimum amounts needed to be considered well capitalized under the regulations. There are various legal limitations under federal and state laws that limit the payment of dividends from the Bank to WesBanco. As of June 30, 2014, under FDIC and State of West Virginia regulations, WesBanco could receive, without prior regulatory approval, a dividend of approximately $45.0 million from the Bank, of which it intends to declare a $12.0 million dividend to the parent in July. WesBanco will continue to improve its consolidated and Bank capital ratios primarily from retaining a majority of its increasing earnings.

The following table summarizes risk-based capital amounts and ratios for WesBanco and the Bank for the periods indicated:

TABLE 16. CAPITAL RESOURCES

			June 30, 2014			December 31, 2013		
(unaudited, dollars in thousands)	**Minimum Value (1)**	**Well Capitalized (2)**	**Amount**	**Ratio**	**Minimum Amount (1)**	**Amount**	**Ratio**	**Minimum Amount (1)**
WesBanco, Inc.								
Tier 1 leverage	4.00%(3)	N/A	**$ 569,417**	**9.64%**	**$ 236,384**	$ 544,083	9.27%	$ 234,863
Tier 1 capital to risk-weighted assets	4.00%	6.00%	**569,417**	**13.46%**	**169,185**	544,083	13.06%	166,691
Total capital to risk-weighted assets	8.00%	10.00%	**615,740**	**14.56%**	**338,369**	591,451	14.19%	333,382
WesBanco Bank, Inc.								
Tier 1 leverage	4.00%	5.00%	**$ 516,449**	**8.76%**	**$ 235,740**	$ 502,165	8.58%	$ 234,109
Tier 1 capital to risk-weighted assets	4.00%	6.00%	**516,449**	**12.27%**	**168,387**	502,165	12.11%	165,828
Total capital to risk-weighted assets	8.00%	10.00%	**562,213**	**13.36%**	**336,773**	549,533	13.25%	331,656

(1) Minimum to remain adequately capitalized.
(2) Well-capitalized under prompt corrective action regulations.
(3) Minimum requirement is 3% for certain highly-rated bank holding companies.

In July 2013, the U.S. federal banking agencies issued a joint final rule that implements the Basel III capital standards effective January 1, 2015 with a phase-in period ending January 1, 2019. The final capital rule establishes the minimum capital levels required under the Dodd-Frank Act, permanently grandfathers trust preferred securities issued before May 19, 2010, and increases the capital required for certain categories of assets. WesBanco has evaluated the impact of the Basel III final capital rule on its regulatory capital ratios and anticipates that the capital ratios, on a fully-phased in Basel III basis, will continue to exceed the well-capitalized minimum requirements.

Table of Contents

LIQUIDITY RISK

Liquidity is defined as a financial institution s capacity to meet its cash and collateral obligations at a reasonable cost. Liquidity risk is the risk that an institution s financial condition or overall safety and soundness is adversely affected by an inability, or perceived inability, to meet its obligations. An institution s obligations, and the funding sources to meet them, depend significantly on its business mix, balance sheet structure, and the cash flows of its on- and off-balance sheet obligations. Institutions confront various internal and external situations that can give rise to increased liquidity risk including funding mismatches, market constraints on funding sources, contingent liquidity events, changes in economic conditions, and exposure to credit, market, operation, legal and reputation risk. WesBanco actively manages liquidity risk through its ability to provide adequate funds to meet changes in loan demand, unexpected outflows in deposits and other borrowings as well as to take advantage of market opportunities and meet operating cash needs. This is accomplished by maintaining liquid assets in the form of securities, sufficient borrowing capacity and a stable core deposit base. Liquidity is centrally monitored by WesBanco s Asset/Liability Committee (ALCO).

WesBanco determines the degree of required liquidity by the relationship of total holdings of liquid assets to the possible need for funds to meet unexpected deposit losses and/or loan demands. The ability to quickly convert assets to cash at a minimal loss is a primary function of WesBanco s investment portfolio management. WesBanco believes its cash flow from the loan portfolio, the investment portfolio, and other sources, adequately meet its liquidity requirements. WesBanco s net loans to assets ratio was 62.1% at June 30, 2014 and deposit balances funded 81.5% of assets.

The following table lists the sources of liquidity from assets at June 30, 2014 expected within the next year:

TABLE 17. LIQUIDITY

(in thousands)	
Cash and cash equivalents	**$ 94,488**
Securities with a maturity date within the next year	**17,996**
Projected payments and prepayments on mortgage-backed securities and collateralized mortgage obligations (1)	**146,444**
Callable securities	**93,489**
Loans held for sale	**10,641**
Accruing loans scheduled to mature	**580,809**
Normal loan repayments	**390,764**
Total sources of liquidity expected within the next year	**$ 1,334,631**

(1) Projected prepayments are based on current prepayment speeds.

Deposit flows are another principal factor affecting overall WesBanco liquidity. Deposits totaled $5.1 billion at June 30, 2014. Deposit flows are impacted by current interest rates, products and rates offered by WesBanco versus various forms of competition, as well as customer behavior. Certificates of deposit scheduled to mature within one year totaled $837.2 million at June 30, 2014, which includes jumbo regular certificates of deposit totaling $278.4 million with a weighted-average cost of 1.32%, and jumbo CDARS® deposits of $181.1 million with a cost of 0.50%.

WesBanco maintains a line of credit with the FHLB as an additional funding source. Available credit with the FHLB was approximately $1.5 billion and $1.6 billion at June 30, 2014 and December 31, 2013, respectively. At June 30, 2014, the Bank had unpledged available-for-sale securities with an amortized cost of $377.2 million, a portion of which is an available liquidity source, or such securities could be pledged to secure additional FHLB borrowings. The FHLB requires securities to be specifically pledged to the FHLB and maintained in a FHLB-approved custodial arrangement if the member wishes to include such securities in the maximum borrowing capacity calculation. WesBanco has elected not to specifically pledge to the FHLB otherwise unpledged securities.

WesBanco participates in the Federal Reserve Bank s Borrower-in-Custody Program (BIC) whereby WesBanco pledges certain consumer loans as collateral for borrowings. At June 30, 2014, WesBanco had a BIC line of credit totaling $129.9 million, none of which was outstanding. Alternative funding sources may include the utilization of existing overnight lines of credit with third party banks totaling $155.0 million, none of which was outstanding at June 30, 2014, along with seeking other lines of credit, borrowings under repurchase agreement lines, increasing deposit rates to attract additional funds, accessing brokered deposits, or selling securities available-for-sale or certain types of loans.

Other short-term borrowings of $94.7 million at June 30, 2014 consisted of callable repurchase agreements and overnight sweep checking accounts for large commercial customers. There has not been a significant fluctuation in the average deposit balance of the overnight sweep checking accounts during the first six months of 2014. The term repurchase agreements totaling $22.6 million require securities to be pledged equal to or greater than the instrument s purchase price and may be called at any time by the purchaser. Such accounts were mostly issued in prior, higher interest rate periods, therefore early redemptions are relatively unlikely. The overnight sweep checking accounts require securities to be pledged equal to or greater than the average deposit balance in the related customer accounts. Federal funds purchased, used to manage WesBanco s normal liquidity needs, including loan funding, may also be included in other short-term borrowings, and while utilized during the second quarter, their balance was paid off with short-term FHLB borrowings prior to June 30, 2014.

The principal sources of parent company liquidity are dividends from the Bank and $40.0 million in cash and investments on hand. In addition, the parent company has a $25.0 million revolving line of credit with another bank with a zero balance outstanding. The loan matures July 31, 2014, but it is anticipated that a new line of credit facility will be in place by that time. WesBanco was in compliance with all loan covenants at June 30, 2014. There are various legal limitations under federal and state laws that limit the payment of dividends from the Bank to the parent company. As of June 30, 2014, under FDIC and State of West Virginia regulations, WesBanco could receive, without prior regulatory approval, dividends of approximately $45.0 million from the Bank. Management believes these are appropriate levels of cash for the parent company given the current

Table of Contents

environment. Management continuously monitors the adequacy of parent company cash levels and sources of liquidity through the use of metrics that relate current cash levels to historical and forecasted cash inflows and outflows.

WesBanco had outstanding commitments to extend credit in the ordinary course of business approximating $1.2 billion at June 30, 2014 and December 31, 2013. On a historical basis, only a small portion of these commitments will result in an outflow of funds. Please refer to Note 8, Commitments and Contingent Liabilities, of the Consolidated Financial Statements and the Loans and Credit Risk section of this MD&A for additional information.

Federal financial regulatory agencies previously have issued guidance to provide for sound practices for managing funding and liquidity risk and strengthening liquidity risk management practices. WesBanco maintains a comprehensive management process for identifying, measuring, monitoring, and controlling liquidity risk which is fully integrated into its risk management process. Management believes WesBanco has sufficient current liquidity to meet current obligations to borrowers, depositors and others as of June 30, 2014 and that WesBanco s current liquidity risk management policies and procedures adequately address this guidance.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The disclosures set forth in this item are qualified by the section captioned Forward-Looking Statements included in Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations of this report.

MARKET RISK

The primary objective of WesBanco s ALCO is to maximize net interest income within established policy parameters. This objective is accomplished through the management of balance sheet composition, market risk exposures arising from changing economic conditions and liquidity risk.

Market risk is defined as the risk of loss due to adverse changes in the fair value of financial instruments resulting from fluctuations in interest rates and equity prices. Management considers interest rate risk to be WesBanco s most significant market risk. Interest rate risk is the exposure to adverse changes in net interest income due to changes in interest rates. The relative consistency of WesBanco s net interest income is largely dependent on effective management of interest rate risk. As interest rates change in the market, rates earned on interest rate sensitive assets and rates paid on interest rate sensitive liabilities do not necessarily move concurrently. Differing rate sensitivities may arise because fixed rate assets and liabilities may not have the same maturities, or because variable rate assets and liabilities differ in the timing and/or the percentage of rate changes.

WesBanco s ALCO, comprised of senior management from various functional areas, monitors and manages interest rate risk within Board approved policy limits. Interest rate risk is monitored primarily through the use of an earnings simulation model. The model is highly dependent on various assumptions, which change regularly as the balance sheet and market interest rates change. The key assumptions and strategies employed are analyzed bi-monthly and reviewed and documented by the ALCO.

The earnings simulation model projects changes in net interest income resulting from the effect of changes in interest rates. Forecasting changes in net interest income requires management to make certain assumptions regarding loan and security prepayment rates, bond call dates, and adjustments to non-maturing deposit rates, which may not necessarily reflect the manner in which actual yields and costs respond to changes in market interest rates. Assumptions used are based primarily on historical experience and current market rates. Security portfolio maturities and prepayments are assumed to be reinvested in similar instruments and callable bond forecasts are adjusted at varying levels of interest rates. While management believes such assumptions to be reasonable, there can be no assurance that assumed prepayment rates, callable bond forecasts and non-maturing deposit rates will approximate actual future results. Moreover, the net interest income sensitivity chart presented in Table 1, Net Interest Income Sensitivity, assumes the composition of interest sensitive assets and liabilities existing at the end of the period remains constant over the period being measured and also assumes that a particular change in interest rates is reflected uniformly across the yield curve, regardless of the duration of the maturity or re-pricing of specific assets and liabilities. Since the assumptions used in the model relative to changes in interest rates are uncertain, the simulation analysis may not be indicative of actual results. In addition, the analysis may not consider all actions that management could employ in response to changes in interest rates and various earning asset and costing liability balances.

Management is aware of the significant effect inflation or deflation has upon interest rates and ultimately upon financial performance. WesBanco s ability to cope with inflation or deflation is best determined by analyzing its capability to respond to changing market interest rates, as well as its ability to manage the various elements of non-interest income and expense during periods of increasing or decreasing inflation or deflation. WesBanco monitors the level and mix of interest-rate sensitive assets and liabilities through ALCO in order to reduce the impact of inflation or deflation on net interest income. Management also controls the effects of inflation or deflation by conducting periodic reviews of the prices and terms of its various products and services, both in terms of the costs to offer the services as well as outside market influences upon such pricing, by introducing new products and services or reducing the availability of existing products and services, and by controlling overhead expenses.

Interest rate risk policy limits are determined by measuring the anticipated change in net interest income over a twelve month period assuming an immediate and sustained 100, 200 and 300 basis point increase or decrease in market interest rates compared to a stable rate environment or base model. WesBanco s current policy limits this exposure to a reduction of 5.0%, 12.5% and 25% or less, respectively, of net interest income from the base model over a twelve month period. The table below shows WesBanco s interest rate sensitivity at June 30, 2014 and December 31, 2013 assuming a 100, 200 and 300 basis point interest rate increase, compared to a base model. Due to the current low interest rate environment, particularly for short-term rates, the 200 and 300 basis point decreasing change is not calculated.

TABLE 1. NET INTEREST INCOME SENSITIVITY

Immediate Change in Interest Rates (basis points)	Percentage Change in Net Interest Income from Base over One Year June 30, 2014	December 31, 2013	ALCO Guidelines
+300	0.6%	0.2%	(25.0%)
+200	1.9%	1.7%	(12.5%)
+100	1.6%	1.6%	(5.0%)
-100	(2.3%)	(2.0%)	(5.0%)

As per the table above, the earnings simulation model at June 30, 2014 currently projects that net interest income for the next twelve month period would decrease by 2.3% if interest rates were to fall immediately by 100 basis points, compared to a decrease of 2.0% for the same scenario as of December 31, 2013.

For rising rate scenarios, net interest income would increase by 1.6%, 1.9%, and 0.6% if rates increased by 100, 200 and 300 basis points, respectively, as of June 30, 2014 compared to increases of 1.6%, 1.7% and 0.2%, respectively, for the same increasing rate environments as of December 31, 2013.

The balance sheet continues to be asset sensitive as of June 30, 2014, similar to December 31, 2013, as changes have occurred in the mix of various earning assets and costing liabilities along with loan and transaction deposit account growth. Should rates rise more rapidly and by a higher amount than currently anticipated in the short to intermediate term, overall asset sensitivity may be somewhat neutralized due to slower anticipated prepayment speeds and extension risk associated with residential mortgages and mortgage-backed securities. In addition, variable rate commercial loans with rate floors approximated $1.1 billion at June 30, 2014, which represented approximately 43% of commercial loans, with an average floor of 4.31%. In a 100 basis point rising rate environment, these loans would not significantly reprice from their current level, since many such loans are priced above contract floors. In the current base case model, WesBanco believes that the net interest margin will slightly increase over the next twelve months. A short term rate increase or steeper yield curve should result in the margin improving by a greater amount assuming no earning asset or costing liability changes, although short term interest rates are not currently anticipated to increase until mid-2015. However, offsetting those negative factors are maturities of higher-rate certificates of deposit scheduled over the next year totaling $837.2 million at an average cost of 0.94%, which should mitigate potential compression from lower loan spreads in a more competitive loan environment, as well as anticipated loan growth. The Bank continues to experience significant pricing competition for new loans, particularly for new commercial real estate and construction loans, which may result in reduced loan spreads which would be potentially mitigated by growth in overall balances.

The Bank has significant additional borrowing capacity with FHLB Pittsburgh, the Federal Reserve Bank of Cleveland, and various correspondent banks, and may utilize these funding sources as necessary to mitigate the impact on our balance sheet of embedded options in commercial and residential loans and to lengthen liabilities to help offset mismatches in various asset maturities, as well as to manage short-term cash needs. CDARS® deposits also continue to be used to lengthen maturities in certificates of deposit, and for customers seeking to maintain deposit balances below insured limits.

Current balance sheet strategies approved by the ALM committee include:

- increasing total loans; primarily commercial and residential with fixed rate periods of between 3-15 years, or variable to a published index;
- investing available short-term liquidity mostly in short final pay CMOs, step-up notes or corporate bonds;
- implementing marketing programs to increase consumer loan balances and transaction deposit accounts versus certificates of deposit;
- reinvesting securities cash flows into new loans or securities;
- paying down remaining term borrowings with available cash, or borrowing at lower rates if necessary to fund higher than anticipated loan growth; and
- extending a portion of CD maturities through the CDARS® program and continuing to decrease offered rates on maturing CDs.

As an alternative to the immediate rate shock analysis, the ALCO monitors interest rate risk by ramping or increasing interest rates 200 basis points gradually over a twelve month period. WesBanco s current policy limits this exposure to 5.0% of net interest income from the base model for a twelve month period. Management believes that the ramping analysis reflects a more realistic movement of interest rates, whereas the immediate rate shock reflects a less likely scenario. The simulation model at June 30, 2014, using the 200 basis point increasing rate ramp analysis, projects that net interest income would increase 0.8% over the next twelve months, compared to a 1.1% increase at December 31, 2013.

WesBanco also periodically measures the economic value of equity, which is defined as the market value of tangible equity in various increasing and decreasing rate scenarios. At June 30, 2014, the market value of tangible equity as a percent of base in a 200 basis point rising rate environment indicates an increase of 8.3%, compared to a decrease of 2.8% at December 31, 2013. In a 100 basis point falling rate environment, the model indicates a decrease of 3.0%, compared to a decrease of 5.3% as of December 31, 2013. WesBanco s policy is to limit such change to minus 20% for a 200 basis point change in interest rates, as long as the Tier 1 leverage capital ratio is not forecasted to decrease below 5.0% as a result of the change. Balance sheet changes in loan and securities portfolios, continued maturities of borrowings and certificates of deposit, and adding certain transaction-type deposits, as well as certain other modeling assumptions, have resulted in the change in equity market value from year end.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES WesBanco s Chief Executive Officer (CEO) and Chief Financial Officer (CFO) have concluded that WesBanco s disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended), based on their evaluation of these controls and procedures as of the end of the period covered by this Form 10-Q, are effective at the reasonable assurance level as discussed below to ensure that information required to be disclosed by WesBanco in the reports it files under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC and that such information is accumulated and communicated to WesBanco s management, including its principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

LIMITATIONS ON THE EFFECTIVENESS OF CONTROLS WesBanco s management, including the CEO and CFO, does not expect that WesBanco s disclosure controls and internal controls will prevent all errors and all fraud. While WesBanco s disclosure controls and procedures are designed to provide reasonable assurance of achieving their objective, no control system, no matter how well conceived and operated, can provide absolute assurance that the objectives of the control system are met. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls.

CHANGES IN INTERNAL CONTROLS There were no changes in WesBanco s internal control over financial reporting that occurred during our fiscal quarter ended June 30, 2014 as required to be reported by paragraph (d) of Rules 13a-15 and 15d-15 under the Securities Exchange Act of 1934, that materially affected, or are reasonably likely to materially affect, WesBanco s internal control over financial reporting.

Table of Contents

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

WesBanco is involved in lawsuits, claims, investigations and proceedings which arise in the ordinary course of business. While any litigation contains an element of uncertainty, WesBanco does not believe that a material loss related to such proceedings or claims pending or known to be threatened is reasonably possible.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

As of June 30, 2014, WesBanco had a current stock repurchase plan in which up to one million shares can be acquired. The plan was originally approved by the Board of Directors on March 21, 2007 and provides for shares to be repurchased for general corporate purposes, which may include a subsequent resource for potential acquisitions, shareholder dividend reinvestment and employee benefit plans. The timing, price and quantity of purchases are at the discretion of WesBanco, and the plan may be discontinued or suspended at any time. There were no repurchases during the second quarter of 2014, other than those for KSOP and dividend reinvestment plans.

The following table presents the monthly share purchase activity during the quarter ended June 30, 2014:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans	Maximum Number of Shares that May Yet Be Purchased Under the Plans
Balance at March 31, 2014				378,286
April 1, 2014 to April 30, 2014				
Open market repurchases				378,286
Other transactions (1)	16,065	$ 32.04	N/A	N/A
May 1, 2014 to May 31, 2014				
Open market repurchases				378,286
Other transactions (1)	1,206	29.32	N/A	N/A
June 1, 2014 to June 30, 2014				
Open market repurchases				378,286
Other transactions (1)	1,986	30.24	N/A	N/A
Second Quarter 2014				
Open market repurchases				378,286
Other transactions (1)	19,257	$ 31.68	N/A	N/A
Total	19,257	$ 31.68		378,286

(1) Consists of open market purchases transacted in the KSOP and dividend reinvestment plans.
