KABUSHIKI KAISHA MITSUBISHI UFJ FINANCIAL GROUP

(Exact name of Registrant as specified in its charter)

MITSUBISHI UFJ FINANCIAL GROUP, INC.

(Translation of Registrant's name into English)

Japan

(Jurisdiction of incorporation or organization)

7-1, Marunouchi 2-chome

Chiyoda-ku, Tokyo 100-8330

Japan

(Address of principal executive offices)

Kazutaka Yoneda, +81-3-3240-8111, +81-3-3240-7073, same address as above

(Name, Telephone, Facsimile number and Address of Company Contact Person)

Securities registered or to be registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common stock, without par value	New York Stock Exchange ⁽¹⁾
American depositary shares, each of which represents one share of common stock	New York Stock Exchange

(1) The listing of the registrant's common stock on the New York Stock Exchange is for technical purposes only and without trading privileges. Securities registered or to be registered pursuant to Section 12(g) of the Act:

Restricted Share Units granting rights to common stock under the UnionBanCal Corporation Stock Bonus Plan

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act:

\$2,300,000,000 Fixed/Floating Rate Non-Cumulative Preferred Securities of MUFG Capital Finance 1 Limited, and Mitsubishi UFJ Financial Group, Inc.'s Guarantee thereof

750,000,000 Fixed/Floating Rate Non-Cumulative Preferred Securities of MUFG Capital Finance 2 Limited, and Mitsubishi UFJ Financial Group, Inc.'s Guarantee thereof

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report:

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

As of March 31, 2016, 14,168,853,820 shares of common stock (including 151,647,230 shares of common stock held by the registrant and its consolidated subsidiaries as treasury stock)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

Yes No

Note: Checking the box above will not relieve any registrant required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 from their obligations under those Sections.

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP International Financial Reporting Standards as issued Other

by the International Accounting Standards Board

If Other has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow.

Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

<u>Consolidated Financial Statements</u>	F-1

For purposes of this Annual Report, we have presented our consolidated financial statements in accordance with accounting principles generally accepted in the United States, or U.S. GAAP, except for risk-adjusted capital ratios, capital components, risk-weighted assets, business segment financial information and some other specifically identified information. Unless otherwise stated or the context otherwise requires, all amounts in our financial statements are expressed in Japanese yen.

In this Annual Report, unless otherwise indicated or the context otherwise requires, all figures are rounded to the figures shown except for the capital ratios, capital components, risk-weighted assets, leverage ratios and liquidity coverage ratios of MUFG and its domestic subsidiaries, which are rounded down and truncated to the figures shown. In some cases, figures presented in tables are adjusted to match the sum of the figures with the total amount, and such figures are also referred to in the related text.

When we refer in this Annual Report to MUFG, we, us, our and the Group, we generally mean Mitsubishi UFJ Financial Group, Inc. and its consolidated subsidiaries, but from time to time as the context requires, we mean Mitsubishi UFJ Financial Group, Inc. as an individual legal entity. Similarly, references to MTFG and UFJ Holdings are to Mitsubishi Tokyo Financial Group, Inc. and to UFJ Holdings, Inc., as single entities, respectively, as well as to MTFG and UFJ Holdings and their respective consolidated subsidiaries, as the context requires. In addition, our commercial banking subsidiaries refers to The Bank of Tokyo-Mitsubishi UFJ, Ltd., or BTMU, and, as the context requires, its consolidated subsidiaries engaged in the commercial

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

banking business. Our trust banking subsidiaries refers to Mitsubishi UFJ Trust and Banking Corporation, or MUTB, and, as the context requires, its consolidated subsidiaries engaged in the trust banking business. Our banking subsidiaries refers to BTMU and MUTB and, as the context requires, their respective consolidated

Table of Contents

subsidiaries engaged in the banking business. Our securities subsidiaries refers to Mitsubishi UFJ Securities Holdings Co., Ltd., or MUSHD, and as the context requires, its consolidated subsidiaries engaged in the securities business.

References to MUAH and MUB are to MUFG Americas Holdings Corporation and MUFG Union Bank, N.A., as single entities, respectively, as well as to MUAH and MUB and their respective consolidated subsidiaries, as the context requires.

References to Krungsri are to Bank of Ayudhya Public Company Limited, as a single entity, as well as to Krungsri and its respective consolidated subsidiaries, as the context requires.

References to the FSA are to the Financial Services Agency, an agency of the Cabinet Office of Japan.

References in this Annual Report to yen or ¥ are to Japanese yen, references to U.S. dollars, U.S. dollar, dollars, U.S.\$ or \$ are to United States dollars, and references to euro or € are to the currency of the member states of the European Monetary Union.

Our fiscal year ends on March 31 of each year. References to years not specified as being fiscal years are to calendar years.

We usually hold the annual ordinary general meeting of shareholders of Mitsubishi UFJ Financial Group, Inc. in June of each year in Tokyo.

Table of Contents

Forward-Looking Statements

We may from time to time make written or oral forward-looking statements. Written forward-looking statements may appear in documents filed with, or submitted to, the U.S. Securities and Exchange Commission, or SEC, including this Annual Report, and other reports to shareholders and other communications.

The U.S. Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking information to encourage companies to provide prospective information about themselves. We rely on this safe harbor in making these forward-looking statements.

Forward-looking statements appear in a number of places in this Annual Report and include statements regarding our current intent, business plan, targets, belief or expectations or the current belief or current expectations of our management with respect to our results of operations and financial condition, including, among other matters, our problem loans and loan losses. In many, but not all cases, we use words such as anticipate, aim, believe, estimate, expect, intend, plan, probability, risk, will, may and similar expressions, as they relate to management, to identify forward-looking statements. These statements reflect our current views with respect to future events and are subject to risks, uncertainties and assumptions. Should one or more of these risks or uncertainties materialize or should underlying assumptions prove incorrect, actual results may vary materially from those which are aimed, anticipated, believed, estimated, expected, intended or planned, or otherwise stated.

Our forward-looking statements are not guarantees of future performance and involve risks and uncertainties. Actual results may differ from those in the forward-looking statements as a result of various factors. We identify in this Annual Report in Item 3.D. Key Information Risk Factors, Item 4.B. Information on the Company Business Overview, Item 5. Operating and Financial Review and Prospects and elsewhere, some, but not necessarily all, of the important factors that could cause these differences.

We are under no obligation, and disclaim any obligation, to update or alter our forward-looking statements, whether as a result of new information, future events or otherwise.

Table of Contents

PART I

Item 1. Identity of Directors, Senior Management and Advisers.

Not applicable.

Item 2. Offer Statistics and Expected Timetable.

Not applicable.

Item 3. Key Information.

A. Selected Financial Data

The selected statement of income data and selected balance sheet data set forth below has been derived from our audited consolidated financial statements.

Except for risk-adjusted capital ratios, which are calculated in accordance with Japanese banking regulations based on information derived from our consolidated financial statements prepared in accordance with accounting principles generally accepted in Japan, or Japanese GAAP, the selected financial data set forth below are derived from our consolidated financial statements prepared in accordance with U.S. GAAP.

You should read the selected financial data set forth below in conjunction with Item 5. Operating and Financial Review and Prospects, Selected Statistical Data and our consolidated financial statements and other financial data included elsewhere in this Annual Report. These data are qualified in their entirety by reference to all of that information.

Average interest rate spread	1.02%	0.93%	0.89%	0.90%	0.85%
Risk-adjusted capital ratio calculated under Japanese GAAP ⁽⁵⁾	14.72%	16.53%	15.43%	15.62%	16.01%

Notes:

- (1) Interest income for the fiscal year ended March 31, 2012 includes a gain of ¥139,320 million on the conversion rate adjustment of Morgan Stanley's convertible preferred stock. Exclusive of the one-time gain associated with the conversion, interest income would have been lower for the fiscal year ended March 31, 2012.
- (2) Includes the common shares that were potentially issuable upon conversion of the Class 11 Preferred Stock and stock acquisition rights.
- (3) Preferred dividends were ¥57.5 per share and paid semi-annually. In April 2014, we acquired and cancelled all of the issued shares of First Series of Class 5 Preferred Stock. As a result, there is currently no issued Class 5 Preferred Stock. See Note 17 to our audited consolidated financial statements included elsewhere in this Annual Report.
- (4) Preferred dividends were ¥2.65 per share and paid semi-annually. In August 2014, we acquired all of the issued shares of Class 11 Preferred Stock in exchange for 1,245 shares of our common stock held in treasury, and cancelled the acquired shares. See Note 17 to our audited consolidated financial statements included elsewhere in this Annual Report.
- (5) Risk-adjusted capital ratios have been calculated in accordance with Japanese banking regulations as applicable on the relevant calculation date, based on information derived from our consolidated financial statements prepared in accordance with Japanese GAAP. The risk-adjusted capital ratios as of March 31, 2012, 2013, 2014 and 2015 have been revised from 14.91% to 14.72%, from 16.68% to 16.53%, from 15.53% to 15.43%, and from 15.68% to 15.62%, respectively. The revisions reflect corrections of errors in the risk weighting applied to certain assets, mostly residential mortgage loans, and certain other adjustments made under Basel I standards to obtain amounts that were used for floor adjustments in determining the amounts of risk-weighted assets under Basel III standards. Although these revisions did not affect our compliance with the applicable Japanese regulatory capital requirements, we voluntarily revised the information previously submitted to the FSA and publicly announced the revisions. For a description of the applicable capital ratio calculation and other requirements applicable, see Item 4.B. Information on the Company Business Overview Supervision and Regulation Japan Capital adequacy and Item 5.B. Operating and Financial Review and Prospects Liquidity and Capital Resources Capital Adequacy.

Table of Contents**Exchange Rate Information**

The tables below set forth, for each period indicated, certain information concerning the rate of exchange of Japanese yen per U.S. \$1.00 based on exchange rate information found on Bloomberg. On July 1, 2016, the closing exchange rate was ¥102.91 to U.S.\$1.00 and the inverse rate was U.S.\$0.97 to ¥100.00.

	Year 2016					
	February	March	April	May	June	July ⁽¹⁾
High	121.47	114.55	112.58	111.43	110.81	103.39
Low	110.98	110.65	106.27	105.52	99.08	102.40

Note:

B. Capitalization and Indebtedness

Not applicable.

C. Reasons for the Offer and Use of Proceeds

Not applicable.

D. Risk Factors

Investing in our securities involves a high degree of risk. You should carefully consider the risks described in this section, which is intended to disclose all of the risks that we consider material based on the information currently available to us, as well as all the other information in this Annual Report, including our consolidated financial statements and related notes, Item 5. Operating and Financial Review and Prospects, Item 11. Quantitative and Qualitative Disclosures about Credit, Market and Other Risk and Selected Statistical Data.

Our business, operating results and financial condition could be materially and adversely affected by any of the factors discussed below. The trading price of our securities could decline due to any of these factors. This Annual Report also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of various factors, including those described in this section and elsewhere in this Annual Report. See Forward-Looking Statements.

Risks Related to Our Business

Because a large portion of our assets as well as our business operations are in Japan, we may incur losses if economic conditions in Japan worsen.

Our performance is particularly affected by the general economic conditions of Japan where we are headquartered and conduct a significant amount of our business. As of March 31, 2016, 60.5% of our total assets were related to Japanese domestic assets, including Japanese national government and Japanese government agency bonds, which accounted for 66.2% of our total investment securities portfolio and 10.3% of our total assets, respectively. Interest and non-interest income in Japan represented 55.3% of our total interest and non-interest income for the fiscal year ended March 31, 2016. Furthermore, as of March 31, 2016, our loans in Japan accounted for 59.0% of our total loans outstanding.

There is significant uncertainty surrounding Japan's economy. For example, Japan's fiscal health and sovereign creditworthiness may deteriorate if the Japanese government's economic measures and the Bank of Japan's monetary policies prove ineffective or result in negative consequences. If the prices of Japanese government bonds decline rapidly, resulting in an unexpectedly sudden increase in interest rates, our investment

Table of Contents

securities portfolio as well as our lending, borrowing, trading and other operations may be negatively impacted. In recent periods, major credit rating agencies have downgraded the credit ratings of Japan's sovereign debt, including a downgrade by Moody's Investor Service, Inc. in December 2014, a downgrade by Fitch Ratings, Ltd. in April 2015 and downgrade by Standard and Poor's in September 2015. In addition, interest rates may suddenly increase as a result of a decision made by the Bank of Japan to end its interest rate policy, including the negative interest rate of minus 0.1% applied to certain current account amounts that financial institutions hold at the Bank of Japan, or a market expectation for such a decision. See **Risks Related to Our Business** Increases in interest rates could adversely affect the value of our bond portfolio.

Instability in the Japanese stock market and foreign currency exchange rates may also have a significant adverse impact on our asset and liability management as well as our results of operations. Various other factors, including stagnation or deterioration of economic and market conditions in other countries, and growing global competition, may also have a material negative impact on the Japanese economy. For a detailed discussion on the business environment in Japan and abroad, see **Item 5. Operating and Financial Review and Prospects** Business Environment.

Since our domestic loans in Japan accounted for a significant portion of our loan portfolio, deteriorating or stagnant economic conditions in Japan may cause adverse effects on our financial results, such as increases in credit costs, as the credit quality of some borrowers could deteriorate. For example, due to the intensifying global competition and weakening consumer spending in recent periods, some Japanese companies, including electronics manufacturers, have experienced significant financial difficulties. For a further discussion, see **Risks Related to Our Business** We may suffer additional credit-related losses in the future if our borrowers are unable to repay their loans as expected or if the measures we take in reaction to, or in anticipation of, our borrowers' deteriorating repayment abilities prove inappropriate or insufficient.

Our domestic loan portfolio may also be adversely affected by interest rate fluctuations in Japan. For example, as a result of the Bank of Japan's interest rate policy and measures to repurchase Japanese government bonds in the market, the yield on many financial instruments and other market interest rates in Japan have declined to negative levels. If the Bank of Japan's policy and measures are maintained for an extended period, or if the Bank of Japan's negative interest rate is lowered from the current level, market interest rates may decline further, and our interest rate spread on our domestic loan portfolio may narrow further, reducing our net interest income.

If the global economy deteriorates further, our credit-related losses may increase, and the value of the financial instruments we hold may decrease, resulting in losses.

Global economic conditions remain volatile, and it is uncertain how the global economy will evolve over time. Factors that could negatively impact global market, both developed and emerging, include concerns over potentially serious ramifications of the result of the U.K. referendum in June 2016, where a majority voted to leave the European Union, the shift in the monetary policy in the United States, slowing economic growth in China in the midst of a shift in the government's economic policy, weakening economic conditions in commodity-exporting countries that have been affected by declining oil and other commodity prices, and the political turmoil in various regions around world. As of March 31, 2016, based principally on the domicile of the obligors, assets related to Europe accounted for approximately 9.0% of our total assets, assets related to Asia and Oceania excluding Japan accounted for approximately 8.6% of our total assets, and assets related to the United States accounted for approximately 18.0% of our total assets. If the global economy deteriorates or the global economic recovery significantly slows down again, the availability of credit may become limited, and some of our borrowers may default on their loan obligations to us, increasing our credit losses. In addition, concerns over the sovereign debt problem in some European countries may limit liquidity in the global financial markets. Some of our credit derivative transactions may also be negatively affected, including the protection we sold through single name credit default swaps, and index and basket credit default swaps. The notional amounts of these protections sold as of March 31, 2016 were ¥2,249.5 billion and ¥775.3 billion, respectively. In addition, if credit market conditions worsen, our capital funding structure may need to be adjusted or our funding costs may increase, which could have a material adverse impact on our financial condition and results of operations.

Table of Contents

Furthermore, we have incurred losses, and may incur further losses, as a result of changes in the fair value of our financial instruments resulting from weakening market conditions. For example, declines in the fair value of our investment securities, particularly equity investment securities, resulted in our recording impairment losses of ¥6.5 billion, ¥5.9 billion and ¥37.2 billion for the fiscal years ended March 31, 2014, 2015 and 2016, respectively. As of March 31, 2016, approximately 31.6% of our total assets were financial instruments for which we measure fair value on a recurring basis, and less than 0.5% of our total assets were financial instruments for which we measure fair value on a non-recurring basis. Generally, in order to establish the fair value of these instruments, we rely on quoted prices. If the value of these financial instruments declines, a corresponding write-down may be recognized in our consolidated statements of income. In addition, because we hold a large amount of investment securities, short-term fluctuations in the value of our securities may trigger losses or exit costs for us to manage our risk. For more information on our valuation method for financial instruments, see Item 5. Operating and Financial Review and Prospects Critical Accounting Estimates.

Our business operations are exposed to risks of natural disasters, terrorism and other disruptions caused by external events.

As a major financial institution incorporated in Japan and operating in major international financial markets, our business operations, automatic teller machines, or ATMs, and other information technology systems, personnel, and facilities and other physical assets are subject to the risks of earthquakes, typhoons, floods and other natural disasters, terrorism, and other political and social conflicts, abduction, health epidemics, and other disruptions caused by external events, which are beyond our control. As a consequence of such external events, we may be required to incur significant costs and expenses for remedial measures or compensation to customers or transaction counterparties for resulting losses. We may suffer loss of facility, human and other resources. We may also suffer loss of business. In addition, such external events may have various other significant adverse effects, including deterioration in economic conditions, declines in the business performance of our borrowers and decreases in stock prices, which may result in higher credit costs or impairment or valuation losses on the financial instruments we hold. These effects could materially and adversely affect our business, operating results and financial condition.

As with other Japanese companies, we are exposed to heightened risks of large-scale natural disasters, particularly earthquakes. In particular, a large-scale earthquake occurring in the Tokyo metropolitan area could result in market disruptions or significant damage to, or losses of, tangible or human assets relating to our business and counterparties because many of our important business functions and many of the major Japanese companies and financial markets are located in the area. In addition, such an earthquake could cause a longer-term economic slowdown and a downgrade of Japan's sovereign credit rating due to increases in government spending for disaster recovery measures.

Our risk management policies and procedures may be insufficient to address the consequences of these external events, resulting in our inability to continue to operate a part or the whole of our business. In addition, our redundancy and backup measures may not be sufficient to avoid a material disruption in our operations, and our contingency and business continuity plans may not address all eventualities that may occur in the event of a material disruption caused by a large-scale natural disaster such as the March 2011 Great East Japan Earthquake, which led to tsunamis, soil liquefaction and fires, as well as electricity power supply shortages and electricity power conservation measures resulting from the suspension of the operations of the nuclear power plants.

We may suffer additional credit-related losses in the future if our borrowers are unable to repay their loans as expected or if the measures we take in reaction to, or in anticipation of, our borrowers' deteriorating repayment abilities prove inappropriate or insufficient.

When we lend money or commit to lend money, we incur credit risk, which is the risk of losses if our borrowers do not repay their loans. We may incur significant credit losses or have to provide for a significant amount of additional allowance for credit losses if:

large borrowers become insolvent or must be restructured;

domestic or global economic conditions, either generally or in particular industries in which large borrowers operate, deteriorate;

Table of Contents

the value of the collateral we hold, such as real estate or securities, declines; or

we are adversely affected by corporate credibility issues among our borrowers, to an extent that is worse than anticipated.

As a percentage of total loans, impaired loans, which primarily include nonaccrual loans and troubled debt restructurings, or TDRs, ranged from 1.40% to 2.23% as of the five most recent fiscal year-ends. As of March 31, 2016, impaired loans were ¥1,725.2 billion, representing 1.40% of our total outstanding loans. If the economic conditions in Japan or other parts of the world, in particular industries, including the energy and real estate industries, to which we have significant credit risk exposure worsen, our problem loans and credit-related expenses may increase. An increase in problem loans and credit-related expenses would adversely affect our results of operations, weaken our financial condition and erode our capital base.

We may provide additional loans, equity capital or other forms of support to troubled borrowers in order to facilitate their restructuring and revitalization efforts. We may also forbear from exercising some or all of our rights as a creditor against them, and we may forgive loans to them in conjunction with their debt restructurings. We may take these steps even when such steps might not be warranted from the perspective of our short-term or narrow economic interests or a technical analysis of our legal rights against those borrowers, in light of other factors such as our longer-term economic interests, and our commitment to support the Japanese economy. These practices may substantially increase our exposure to troubled borrowers and increase our losses. Credit losses may also increase if we elect, or are forced by economic or other considerations, to sell or write off our problem loans at a larger discount, in a larger amount or in a different time or manner, than we may otherwise want.

Although we, from time to time, enter into credit derivative transactions, including credit default swap contracts, to manage our credit risk exposure, such transactions may not provide the protection against credit defaults that we intended due to counterparty defaults or similar issues. The credit default swap contracts could also result in significant losses. As of March 31, 2016, the total notional amount of the protection we sold through single name credit default swaps and index and basket credit default swaps was ¥3.03 trillion. In addition, negative changes in financial market conditions may restrict the availability and liquidity of credit default swaps. For more information on our credit derivative transactions, see Note 24 to our consolidated financial statements included elsewhere in this Annual Report.

Our loan losses could prove to be materially different from our estimates and could materially exceed our current allowance for credit losses, in which case we may need to provide for additional allowance for credit losses and may also record credit losses beyond our allowance. Our allowance for credit losses in our loan portfolio is based on evaluations of customers' creditworthiness and the value of collateral we hold. For the fiscal year ended March 31, 2016, we recorded ¥231.9 billion of provision for credit losses. Negative changes in economic conditions, government policies or our borrowers' repayment abilities could require us to provide for additional allowance. While we try to diversify our loan portfolio to avoid concentration to any particular sector or borrower, our current credit exposure to energy and real estate sector is relatively large. For example, some companies in the Japanese electronics manufacturing industry have experienced significant declines in sales and financial difficulties due to increased global competition. Moreover, declining oil and other commodity prices have adversely affect the credit conditions of borrowers in the energy and related industries. As a result, our borrowers may incur financial and non-financial losses that exceed our estimations. In such case, we may need to provide for additional allowance for credit losses. Also, the regulatory standards or guidance on establishing allowances may also change, causing us to change some of the evaluations used in determining the allowances. As a result, we may need to provide for additional allowance for credit losses.

Our efforts to diversify our portfolio to avoid any concentration of credit risk exposures to particular industries or counterparties may prove insufficient. For example, our credit exposures to the energy and real estate industries are relatively high in comparison to other industries. The credit quality of borrowers in this sector do not necessarily correspond to general economic conditions in Japan or other part of the world, and adverse fluctuations in oil and other commodity prices or adverse developments in the real estate market may disproportionately increase our credit costs.

Table of Contents

When there is an improvement in asset quality, credit for credit losses is recorded in our consolidated statements of income to reverse the allowance for credit losses to a level management deems appropriate. For example, for the fiscal years ended March 31, 2015 and 2016, while we recorded provisions for credit losses for our entire loan portfolio, we recorded ¥30.9 billion and ¥9.5 billion, respectively, of credit for credit losses for the Residential segment of our loan portfolio. However, we have historically more often provided for credit losses rather than recording credit for credit losses, and in future periods we may need to recognize a provision for credit losses, which may have a significant negative effect on our results of operations.

For more information on our loan portfolio, see Item 5.B. Operating and Financial Review and Prospects Liquidity and Capital Resources Financial Condition Loan Portfolio.

If the Japanese stock market or other global markets decline in the future, we may incur losses on our securities portfolio and our capital ratios will be adversely affected.

A decline in Japanese stock prices could reduce the value of the Japanese domestic marketable equity securities that we hold, which accounted for 12.3% of our total investment securities portfolio, and 1.9% of our total assets, as of March 31, 2016. The Nikkei Stock Average, which is the average of 225 blue chip stocks listed on the Tokyo Stock Exchange, fluctuated throughout the fiscal year ended March 31, 2016, rising to an intra-day high of ¥20,868.03 on June 24, 2015 and declining to an intra-day low of ¥14,952.61 on February 12, 2016. As of July 1, 2016, the closing price of the Nikkei Stock Average was ¥15,682.48. Recent fluctuations in the Nikkei Stock Average have reflected the volatility in the global economy and investor sentiment as investors continue to observe the changes in economic and monetary policies mainly in Japan, the United States, the Eurozone and Asian countries. In addition, weakening or stagnant economic conditions in these and other regions may have a significant negative impact on Japanese companies, which in turn will cause their stock prices to decline. Concerns over the impact of geopolitical tensions and conflicts in various parts of the world on Japanese companies may also adversely affect stock prices in Japan. In addition, the global trend towards further reduction in risk assets could result in lower stock prices, and the recent trend in Japan towards strengthening corporate governance may subject public companies to stricter scrutiny. If stock market prices decline or do not improve, we may incur losses on our securities portfolio. Because we hold a large amount of Japanese domestic marketable equity securities, even short-term fluctuations in the value of our securities may trigger losses or exit costs for us to manage our risk. Declines in the Japanese stock market or other global markets may also materially and adversely affect our capital ratios and financial condition. For a detailed discussion of our holdings of marketable equity securities and the effect of market declines on our capital ratios, see Item 5.B. Operating and Financial Review and Prospects Liquidity and Capital Resources Capital Adequacy and Selected Statistical Data Investment Portfolio. See also Item 5. Operating and Financial Review and Prospects Business Environment.

Increases in interest rates could adversely affect the value of our bond portfolio.

The aggregate carrying amount of the Japanese government and corporate bonds and foreign bonds, including U.S. Treasury bonds, that we held as of March 31, 2016 was 11.4% of our total assets. In particular, the Japanese national government and Japanese government agency bonds accounted for 10.3% of our total assets as of March 31, 2016. For a detailed discussion of our bond portfolio, see Selected Statistical Data Investment Portfolio.

The Bank of Japan has maintained a quantitative and qualitative monetary easing with negative interest rates policy and applied a negative interest rate of minus 0.1% to the Policy-Rate Balances, which are a part of current account amounts held by financial institutions at the Bank of Japan, while purchasing Japanese government bonds to increase its aggregate holding of such bonds by approximately ¥80 trillion each year. As a result, yields on many financial instruments and other market interest rates in Japan have declined to negative levels. If the policy is maintained in Japan for an extended period, or if the Bank of Japan's negative interest rate is lowered from the current level, market interest rates may decline further, and the yield on the Japanese

Table of Contents

government bonds and other financial instruments that we hold may also decline. On the other hand, the value of our investment portfolio may decrease if interest rates increase rapidly or significantly because of heightened market expectations for tapering or cessation of the current policy in Japan. Separate from the Bank of Japan's monetary policies, interest rates could also significantly increase in the event that Japanese government bonds decline in value due to such factors as a decline in confidence in the Japanese government's fiscal administration, further issuances of Japanese government bonds in connection with emergency economic measures or in the event that interest rates on U.S. Treasury securities rise due to such factors as changes in the low interest rate policy in the United States. If relevant interest rates increase for these or other reasons, particularly if such increase is unexpected or sudden, we may incur significant losses on sales of, and valuation losses on, our bond portfolio. See Item 5. Operating and Financial Review and Prospects Business Environment.

Fluctuations in foreign currency exchange rates may result in transaction losses on translation of monetary assets and liabilities denominated in foreign currencies as well as foreign currency translation losses with respect to our foreign subsidiaries and equity method investees.

Fluctuations in foreign currency exchange rates against the Japanese yen create transaction gains or losses on the translation into Japanese yen of monetary assets and liabilities denominated in foreign currencies. To the extent that our foreign currency-denominated assets and liabilities are not matched in the same currency or appropriately hedged, we could incur losses due to future foreign exchange rate fluctuations. During the fiscal year ended March 31, 2016, the average balance of our foreign interest-earning assets was ¥99.10 trillion and the average balance of our foreign interest-bearing liabilities was ¥61.83 trillion, representing 39.2% of our average total interest-earning assets and 28.0% of our average total interest-bearing liabilities during the same period. Due to foreign currency exchange rate fluctuations, we may incur losses attributable to net transaction losses on the translation into Japanese yen of monetary assets and liabilities denominated in foreign currencies, net losses on currency derivative instruments entered into for trading purposes, and net losses on translation into Japanese yen of securities accounted for under the fair value option. In addition, we may incur foreign currency translation losses with respect to our foreign subsidiaries and equity method investees due to fluctuations in foreign currency exchange rates. The average exchange rate for the fiscal year ended March 31, 2016 was ¥120.14 per U.S.\$1.00, compared to ¥109.93 per U.S.\$1.00 for the previous fiscal year. The change in the average exchange rate of the Japanese yen against the U.S. dollar and other foreign currencies had the effect of increasing total revenue by ¥165.5 billion, increasing net interest income by ¥99.6 billion and income before income tax expense by ¥37.1 billion, respectively, for the fiscal year ended March 31, 2016. However, the exchange rate between the Japanese yen and the U.S. dollar was ¥112.57 as of March 31, 2016, compared to ¥120.13 to the U.S. dollar as of March 31, 2015. As a result, net foreign exchange losses related to the fair value option for the fiscal year ended March 31, 2016 were ¥1,058.0 billion, compared to net gains of ¥966.6 billion for the previous fiscal year. The Japanese yen further appreciated to ¥102.91 to the U.S. dollar on July 1, 2016. For more information on foreign exchange gains and losses and foreign currency translation gains and losses, see Item 5. Operating and Financial Review and Prospects Business Environment and Item 5.A. Operating and Financial Review and Prospects Operating Results.

We may become subject to regulatory actions or other legal proceedings relating to our transactions or other aspects of our operations, which could result in significant financial losses, restrictions on our operations and damage to our reputation.

We conduct our business subject to ongoing regulation and associated regulatory and legal risks. Global financial institutions, including us, currently face heightened regulatory scrutiny as a result of the concerns developing in the global financial sector, and growing public pressure to demand even greater regulatory surveillance following several high-profile scandals and risk management failures in the financial industry. In the current regulatory environment, we are subject to various regulatory inquiries or investigations from time to time in connection with various aspects of our business and operations. In addition, multiple government authorities with overlapping jurisdiction more frequently conduct investigations and take other regulatory actions in coordination with one another or separately on the same or related matters.

Table of Contents

In November 2014, BTMU entered into a consent agreement with the New York State Department of Financial Services, or DFS, to resolve issues relating to instructions given to PricewaterhouseCoopers LLP, or PwC, and the disclosures made to DFS in connection with BTMU's 2007 and 2008 voluntary investigation of BTMU's U.S. dollar clearing activity toward countries under U.S. economic sanctions. BTMU had hired PwC to conduct a historical transaction review report in connection with that investigation, and voluntarily submitted the report to DFS's predecessor entity in 2008. Under the terms of the agreement with DFS, BTMU made a payment of \$315 million to DFS, and agreed to take actions on persons involved in the matter at that time, relocate its U.S. Bank Secrecy Act/Anti-Money Laundering, or BSA/AML, and Office of Foreign Assets Control, or OFAC, sanctions compliance programs to New York, and extend, if regarded as necessary by DFS, the period during which an independent consultant is responsible for assessing BTMU's internal controls regarding compliance with applicable laws and regulations related to U.S. economic sanctions. In June 2013, BTMU reached an agreement with DFS regarding inappropriate operational processing of U.S. dollar clearing transactions with countries subject to OFAC sanctions during the period of 2002 to 2007. Under the terms of the June 2013 agreement, BTMU made a payment of \$250 million to DFS and retained an independent consultant to conduct a compliance review of the relevant controls and related matters in BTMU's current operations. In December 2012, BTMU agreed to make a payment of approximately \$8.6 million to OFAC to settle potential civil liability for apparent violations of certain U.S. sanctions regulations from 2006 to 2007. BTMU continues to cooperate closely with all relevant regulators and is undertaking necessary actions.

We have received requests and subpoenas for information from government agencies in some jurisdictions that are conducting investigations into past submissions made by panel members, including us, to the bodies that set various interbank benchmark rates as well as investigations into foreign exchange related practices of global financial institutions. We are cooperating with these investigations and have been conducting an internal investigation among other things. In connection with these matters, we and other financial institutions are involved as defendants in a number of civil lawsuits, including putative class actions, in the United States.

These developments or other similar matters may result in additional regulatory actions against us or agreements to make significant additional settlement payments. These developments or other matters to which we are subject from time to time may also expose us to substantial monetary damages, legal defense costs, criminal and civil liability, and restrictions on our business operations as well as damage to our reputation. The outcome of such matters, including the extent of the potential impact of any unfavorable outcome on our financial results, however, is inherently uncertain and difficult to predict. The extent of financial, human and other resources required to conduct any investigations or to implement any corrective or preventive measures is similarly uncertain and could be significant.

Legal and regulatory changes could have a negative impact on our business, financial condition and results of operations.

As a global financial services provider, our business is subject to ongoing changes in laws, regulations, policies, voluntary codes of practice and interpretations in Japan and other markets where we operate. Major global financial institutions currently face an increasingly stricter set of laws, regulations and standards as a result of the concerns enveloping the global financial sector. There is also growing political pressure to demand even greater internal compliance and risk management systems following several high-profile scandals and risk management failures in the financial industry. We may not be able to enhance our compliance risk management systems and programs, which, in some cases, are supported by third-party service providers, in a timely manner or as planned. Our risk management systems and programs may not be fully effective in preventing all violations of laws, regulations and rules applicable locally or on a global basis to our subsidiaries, offices and branches.

Our failure or inability to comply fully with applicable laws and regulations could lead to fines, public reprimands, damage to reputation, civil liability, enforced suspension of operations or, in extreme cases, withdrawal of authorization to operate, adversely affecting our business and results of operations. Legal or regulatory compliance failure may also adversely affect our ability to obtain regulatory approvals for future

Table of Contents

strategic initiatives. Furthermore, failure to take necessary corrective action, or the discovery of violations of laws in the process of further review of any of the matters mentioned above or in the process of implementing any corrective measures, could result in further regulatory action.

We could also be required to incur significant expenses to comply with new or revised regulations. For example, if we adopt a new information system infrastructure in the future, we may be required to incur significant additional costs for establishing and implementing effective internal controls, which may materially and adversely affect our financial condition and results of operations.

Future developments or changes in laws, regulations, policies, voluntary codes of practice and their effects are expected to require greater capital resources and significant management attention, and may require us to modify our business strategies and plans. For example, since March 31, 2013, Japanese banking institutions with international operations have become subject to stricter capital adequacy requirements adopted by the FSA based in part on the international regulatory framework generally known as Basel III. Furthermore, on March 31, 2016, the capital conservation buffer, countercyclical buffer and surcharge for global systemically important banks, or G-SIBs, became applicable to Japanese banking institutions with international operations, including us, and these additional capital adequacy requirements are expected to become stricter in phases over the next few years. For more information, see [Risks Related to Our Business](#). We may not be able to maintain our capital ratios above minimum required levels, which could result in the suspension of some or all of our operations. and [Item 4.B. Information on the Company Business Overview Supervision and Regulation Japan](#).

Furthermore, regulatory reforms recently implemented, proposed and currently being debated in the United States may also significantly affect our business operations. For example, in February 2014, the Federal Reserve Board, or FRB, approved final rules strengthening supervision and regulation of large U.S. bank holding companies and foreign banking organizations. These final rules require a large foreign banking organization with \$50 billion or more in U.S. combined assets excluding the assets held by its U.S. branches or agencies, such as us, to organize all of its U.S. bank and non-bank subsidiaries, with certain exceptions, under a U.S. intermediate holding company, or IHC, that is subject to U.S. capital requirements, capital stress testing, liquidity buffer requirements, and other enhanced prudential standards comparable to those applicable to top-tier U.S. bank holding companies of the same size. The IHC was required to have been established as of July 1, 2016. We have designated MUAH as our IHC, and are expending resources and management attention on establishing an appropriate governance structure with effective internal control systems for the IHC designed to ensure compliance with the rules on an on-going basis. See [Item 4.B. Information on the Company Business Overview Supervision and Regulation United States](#).

Global financial regulatory reform measures may also have a significant impact on our business operations. For example, various international organizations, including the Financial Stability Board and the Basel Committee on Banking Supervision, are currently considering ways to address, among other things, credit valuation adjustment, or CVA, and leverage ratio requirements as well as revisions to methods of calculating the amount of risk-weighted assets. We intend to continue to monitor developments relating to global regulatory reforms.

Any adverse changes in the business of MUFG Americas Holdings Corporation, an indirect wholly-owned subsidiary in the United States, could significantly affect our results of operations.

MUAH, which is an indirect wholly owned subsidiary in the United States formerly called UnionBanCal Corporation, or UNBC, has historically contributed to a significant portion of net income attributable to the Mitsubishi UFJ Financial Group. MUAH reported net income of \$647 million, \$816 million and \$573 million for the fiscal years ended December 31, 2013, 2014, and 2015 respectively. Any adverse developments which could arise at MUAH may have a significant negative impact on our results of operations and financial condition. The risks relating to MUAH have increased as MUAH has been expanding its business through acquisitions of

Table of Contents

community banks and other financial-related businesses in the United States. If MUAH is unable to achieve the benefits expected from its business strategies, including its business expansion strategy through acquisitions of community banks and other financial-related businesses, we may suffer an adverse financial impact. For more information, see Item 4.B. Information on the Company Business Overview Global Business Group MUFG Union Bank, N.A. (MUB).

Other factors that have negatively affected, and could continue to negatively affect, MUAH's results of operations include difficult economic conditions, such as a downturn in the real estate and housing industries in California and other states within the United States, the fiscal challenges being experienced by the U.S. federal and California state governments, substantial competition in the banking markets in California and other states within the United States and uncertainty over the U.S. economy, as well as negative trends in debt ratings and interest rate uncertainties. In recent periods, declining oil and gas prices have adversely affected the credit conditions of borrowers in the energy sector and related industries, resulting in an increase in credit costs. In addition, since the financial crisis in 2008 and 2009, the U.S. banking industry has operated in an extremely low interest rate environment as a result of the highly accommodative monetary policy of the FRB, which has placed downward pressure on the net interest margins of U.S. banks, including MUAH. Although the FRB has announced an intention to raise its policy interest rate, the pace of any actual policy interest rate increase in the United States is subject to the FRB's future decision-making.

Significant costs may arise from enterprise-wide compliance and risk management requirements, or failure to comply, with applicable laws and regulations, such as the U.S. Bank Secrecy Act and related amendments under the USA PATRIOT Act, and any adverse impact of the implementation of the Dodd-Frank Act. In addition, the FRB and other U.S. bank regulators have adopted final rules to implement the Basel III global regulatory framework for U.S. banks and bank holding companies which require higher quality of capital, as well as significantly revise the calculations for risk-weighted assets. The FRB has also adopted final rules to implement various enhanced prudential standards required by the Dodd-Frank Act for larger U.S. bank holding companies, such as MUAH. These standards require the larger bank holding companies to meet enhanced capital, liquidity and leverage standards. Further, the FRB has adopted final regulations applicable to foreign banking organizations operating in the United States, which require MUFG's and BTMU's U.S. operations to be restructured and, subject to certain exceptions, conducted under a single U.S. IHC, with its own capital and liquidity requirements. Actions management may take in response to these regulatory changes may involve the issuance of additional capital or other measures. For more information, see Item 4.B. Information on the Company Business Overview Supervision and Regulation United States.

MUB, which is the principal subsidiary of MUAH, and reportedly other financial institutions have been the targets of various denial-of-service or other cyber-attacks as part of what appears to be a coordinated effort to disrupt the operations of financial institutions and potentially test their cybersecurity in advance of future and more advanced cyber-attacks. These denial-of-service attacks may require substantial resources to defend against and affect customer satisfaction and behavior. Moreover, MUB's information security measures may not be sufficient to defend against cyber-attacks and other information security breaches, in which case the consequences could be significant in terms of financial, reputational and other losses. In addition, there have been increasing efforts to breach data security at financial institutions as well as other types of companies, such as large retailers, or with respect to financial transactions, including through the use of social engineering schemes such as phishing. Even if cyber-attacks and similar tactics are not directed specifically at MUB, such attacks on other large institutions could disrupt the overall functioning of the U.S. or global financial system and undermine consumer confidence in banks generally to the detriment of other financial institutions, including MUB.

Any adverse changes in the business of Bank of Ayudhya, an indirect subsidiary in Thailand, could significantly affect our results of operations.

Any adverse changes in the business or management of Bank of Ayudhya Public Company Limited, or Krungsri, a major subsidiary in Thailand in which we hold a 76.88% ownership interest as of March 31, 2016,

Table of Contents

may negatively affect our financial condition and results of operations. Factors that may negatively affect Krungsri's financial condition and results of operations include:

adverse economic conditions, substantial competition in the banking industry, volatile political and social conditions, natural disasters including floods, terrorism and armed conflicts, restrictions under applicable financial systems and regulations, or significant fluctuations in interest rates, foreign currency exchange rates, stock prices or commodity prices, in Southeast Asia, particularly in Thailand;

the business performance of companies making investments in and entering into markets in the Southeast Asian region, as well as the condition of economies, financial systems, laws and financial markets in the countries where such companies primarily operate;

losses from legal proceedings involving Krungsri;

credit rating downgrades and declines in stock prices of Krungsri's borrowers, and bankruptcies of Krungsri's borrowers resulting from such factors;

defaults on Krungsri's loans to individuals;

adverse changes in the cooperative relationship between us and the other major shareholder of Krungsri; and

costs incurred due to weaknesses in the internal controls and regulatory compliance systems of Krungsri or any of its subsidiaries.

In connection with our acquisition of Krungsri, we recorded ¥217.4 billion of goodwill. For the fiscal year ended March 31, 2016, we recognized ¥177.8 billion in impairment of goodwill relating to the Krungsri reporting unit, which is included in the Global Business Group segment. If the business of Krungsri further deteriorates, we may be required to record impairment losses, which could have a material adverse effect on our results of operations and financial condition. See "Risks Related to Our Business" If the goodwill recorded in connection with our acquisitions becomes impaired, we may be required to record impairment losses, which may adversely affect our financial results.

Our strategy to expand the range of our financial products and services and the geographic scope of our business globally may fail if we are unable to anticipate or manage new or expanded risks that entail such expansion.

We continue to seek opportunities to expand the range of our products and services beyond our traditional banking, trust, and securities businesses, through development and introduction of new products and services or through acquisitions of or investments in financial institutions with products and services that complement our business. For example, taking advantage of our financial holding company status which enables us to underwrite securities, we are currently seeking to expand our corporate banking operations in the United States. In addition, the sophistication of financial products and management systems has been growing significantly in recent years. As a result, we are exposed to new and increasingly complex risks, while market and regulatory expectations that we manage these risk properly continue to rise. Some of the activities that our subsidiaries are expected to engage in, such as derivatives and foreign currency trading, present substantial risks. In some cases, we have only limited experience with the risks related to the expanded range of these products and services. In addition, we may not be able to successfully develop or operate the necessary information technology systems. As a result, we may not be able to foresee the risks relating to new products and services.

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

As we expand the geographic scope of our business, we will also be exposed to risks that are unique to particular jurisdictions or markets. For example, in an effort to further develop our operations in Asia, BTMU entered into a capital and business alliance with Vietnam Joint Stock Commercial Bank for Industry and Trade in December 2012 and acquired approximately 20% of the ordinary shares of the Vietnamese bank in May 2013. In addition, BTMU purchased 72.01% of the outstanding shares of Krungsri in December 2013 and acquired

Table of Contents

additional shares in January 2015, increasing BTMU's ownership interest to 76.88%. Furthermore, in April 2016, BTMU acquired a 20.0% equity interest, on a fully diluted basis, in Security Bank Corporation in the Philippines. In some cases, we hold minority stakes in financial institutions as we seek to enter new markets or jurisdictions by collaborating with a local business partner. In such circumstances, the controlling shareholder may make or cause to be made business decisions that are inconsistent with our interests and, as a result, we may be unable to achieve the goals initially set out for the expansion strategy. In addition, we may be unable to staff our newly expanded operations with qualified individuals familiar with local legal and regulatory requirements and business practices, exposing us to legal, regulatory, operational and other risks.

Our risk management systems may prove to be inadequate and may not work in all cases or to the degree required locally and globally for all of our subsidiaries, offices and branches. The increasing market, credit, compliance and regulatory risks in relation to the expanding scope of our products, services and trading activities or expanding our business beyond our traditional markets, could result in us incurring substantial losses. In addition, our efforts to offer new products and services or penetrate new markets may not succeed if product or market opportunities develop more slowly than expected, if our new products and services are not well accepted among customers, or if the profitability of opportunities is undermined by competitive pressures. For more information on our recent acquisition transactions, see Item 5. Operating and Financial Review and Prospects Recent Developments.

Unanticipated economic changes in, and measures taken in response to such changes by, emerging market countries could result in additional losses.

We are increasingly active, through a network of branches and subsidiaries, in emerging market countries, particularly countries in Asia, Latin America, Central and Eastern Europe, and the Middle East. For example, based primarily on the domicile of the obligors, our assets in Europe, Asia and Oceania excluding Japan, and other areas excluding Japan and the United States, were ¥26.19 trillion, ¥25.02 trillion and ¥11.64 trillion, representing 9.0%, 8.6% and 4.0% of our total assets as of March 31, 2016, respectively. The economies of emerging market countries can be volatile and susceptible to adverse changes and trends in the global financial markets. For example, a decline in the value of local currencies of these countries could negatively affect the creditworthiness of some of our borrowers in these countries. The loans we have made to borrowers and banks in these countries are often denominated in U.S. dollars, euro or other foreign currencies. These borrowers often do not hedge the loans to protect against fluctuations in the values of local currencies. A devaluation of the local currency would make it more difficult for a borrower earning income in that currency to pay its debts to us and other foreign lenders. In addition, some countries in which we operate may attempt to support the value of their currencies by raising domestic interest rates. If this happens, the borrowers in these countries would have to devote more of their resources to repaying their domestic obligations, which may adversely affect their ability to repay their debts to us and other foreign lenders. The limited credit availability resulting from these conditions may adversely affect economic conditions in some countries. This could cause a further deterioration of the credit quality of borrowers and banks in those countries and cause us to incur further losses. In addition, should there be excessively rapid economic growth and increasing inflationary pressure in some of the emerging market countries, such developments could adversely affect the wider regional and global economies. Some emerging market countries may also change their monetary or other economic policies in response to economic and political instabilities or pressures, which are difficult to predict. See Item 5.B. Operating and Financial Review and Prospects Liquidity and Capital Resources Financial Condition.

If our strategic alliance with Morgan Stanley fails, we could suffer financial or reputational loss.

We have a global strategic alliance with Morgan Stanley, under which we operate two joint venture securities companies in Japan, engage in joint corporate finance operations in the United States and pursue other cooperative opportunities. We hold approximately 22.3% of the voting rights in Morgan Stanley as of March 31, 2016 and continue to hold approximately \$521.4 million of perpetual non-cumulative non-convertible preferred stock with a 10% dividend. In addition, we currently have two representatives on Morgan Stanley's board of directors.

Table of Contents

We initially entered into this strategic alliance in October 2008 with a view towards long-term cooperation with Morgan Stanley, and currently plan to deepen the strategic alliance. However, due to any unexpected changes in social, economic or financial conditions, changes in the regulatory environment, or any failure to integrate or share staff, products or services, or to operate, manage or implement the business strategy of the securities joint venture companies or other cooperative opportunities as planned, we may be unable to achieve the expected synergies from this alliance.

If our strategic alliance with Morgan Stanley is terminated, it could have a material negative impact on our business strategy, financial condition, and results of operations. For example, because we conduct our securities operations in Japan through the joint venture companies we have with Morgan Stanley, such termination may result in our inability to attain the planned growth in this line of business.

In addition, with our current investment in Morgan Stanley, we have neither a controlling interest in, nor control over the business operations of Morgan Stanley. If Morgan Stanley makes any business decisions that are inconsistent with our interests, we may be unable to achieve the goals initially set out for the strategic alliance. Furthermore, although we do not control Morgan Stanley, given the magnitude of our investment, if Morgan Stanley encounters financial or other business difficulties due to adverse changes in the economy, regulatory environment or other factors, we may suffer a financial loss on our investment or damage to our reputation. For example, we recorded an impairment loss of ¥579.5 billion on our investment in Morgan Stanley's common stock for the fiscal year ended March 31, 2012.

We apply equity method accounting to our investment in Morgan Stanley in our consolidated financial statements. As a result, Morgan Stanley's performance affects our results of operations. In addition fluctuations in Morgan Stanley's stock price or in our equity ownership interest in Morgan Stanley may cause us to recognize additional losses on our investment in Morgan Stanley.

We may incur further losses as a result of financial difficulties relating to other financial institutions, both directly and through the effect they may have on the overall banking environment and on their borrowers.

Some domestic and foreign financial institutions, including banks, non-bank lending and credit institutions, securities companies and insurance companies, have experienced declining asset quality, capital adequacy and other financial problems. This or similar future developments may lead to severe liquidity and solvency problems, which have in the past resulted in the liquidation, government control or restructuring of affected institutions. In addition, allegations or governmental prosecution of improper trading activities or inappropriate business conduct of a specific financial institution could also negatively affect the public perception of other global financial institutions individually and the global financial industry as a whole. These developments may adversely affect our financial results.

Financial difficulties relating to financial institutions could adversely affect us because we have extended loans, some of which may need to be classified as impaired loans, to banks, securities companies, insurance companies and other financial institutions that are not our consolidated subsidiaries. Our loans to banks and other financial institutions have been more than 5% of our total loans as of each year-end in the three fiscal years ended March 31, 2016, with the percentage increasing from 13.8% to 15.3% between March 31, 2015 and March 31, 2016. We may also be adversely affected because we are a shareholder of some other banks and financial institutions that are not our consolidated subsidiaries, including our shareholdings in Japanese regional banks and our 22.3% voting interest in Morgan Stanley as of March 31, 2016. If some of the financial institutions to which we have exposure experience financial difficulties, we may need to provide financial support to them even when such support might not be warranted from the perspective of our narrow economic interests because such institutions may be systematically important to the Japanese or global financial system.

We may also be adversely affected because we enter into transactions, such as derivative transactions, in the ordinary course of business, with other banks and financial institutions as counterparties. For example, we enter

Table of Contents

into credit derivatives with banks, broker-dealers, insurance companies and other financial institutions for managing credit risk exposures, for facilitating client transactions, and for proprietary trading purposes. The notional amount of the protection we sold through these instruments was ¥3.03 trillion as of March 31, 2016.

In addition, financial difficulties relating to financial institutions could indirectly have an adverse effect on us because:

we may be requested to participate in providing assistance to support distressed financial institutions that are not our consolidated subsidiaries;

the government may elect to provide regulatory, tax, funding or other benefits to those financial institutions to strengthen their capital, facilitate their sale or otherwise, which in turn may increase their competitiveness against us;

deposit insurance premiums could rise if deposit insurance funds prove to be inadequate;

bankruptcies or government support or control of financial institutions could generally undermine confidence in financial institutions or adversely affect the overall banking environment;

failures or financial difficulties experienced by other financial institutions could result in additional regulations or requirements that increase the cost of business for us; and

negative media coverage of the financial industry, regardless of its accuracy and applicability to us, could affect customer or investor sentiment, harm our reputation and have a materially adverse effect on our business or the price of our securities.

Because of our loans to consumers and our shareholdings in companies engaged in consumer lending, changes in the business or regulatory environment for consumer finance companies in Japan may further adversely affect our financial results.

We have a large loan portfolio in the consumer lending industry as well as large shareholdings in subsidiaries and equity method investees in the consumer finance industry. Our domestic loans to consumers amount to approximately one-seventh of our total outstanding loans. Of this amount, the consumer loans provided by Mitsubishi UFJ NICOS, Co., Ltd., which is our primary consumer financing subsidiary, were ¥593.9 billion as of March 31, 2016, compared to ¥564.6 billion as of March 31, 2015.

Mitsubishi UFJ NICOS's consumer loan portfolio has been adversely affected by a series of regulatory reforms recently implemented in Japan, which has affected the consumer lending industry in recent years. In December 2006, the Japanese Diet passed legislation to reform the regulations relating to the consumer lending business, including amendments to the Act Regulating the Receipt of Contributions, the Receipt of Deposits, and Interest Rates, which, effective June 18, 2010, reduced the maximum permissible interest rate from 29.2% per annum to 20% per annum. The regulatory reforms also included amendments to the Money Lending Business Act, which, effective June 18, 2010, abolished the so-called gray-zone interest. Gray-zone interest refers to interest rates exceeding the limits stipulated by the Interest Rate Restriction Act (between 15% per annum to 20% per annum depending on the amount of principal). Prior to June 18, 2010, gray-zone interest was permitted under certain conditions set forth in the Money Lending Business Act. As a result of the regulatory reforms, all interest rates are now subject to the lower limits imposed by the Interest Rate Restriction Act, compelling lending institutions, including our consumer finance subsidiaries and equity method investees, to lower the interest rates they charge borrowers. The regulations that became effective on June 18, 2010 also have had a further negative impact on the business of consumer finance companies as one of the new regulations requires, among other things, consumer

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

finance companies to limit their lending to a single customer to a maximum of one third of the customer's annual income regardless of the customer's repayment capability, significantly affecting consumer financing companies.

The regulations and regulatory reforms affecting the consumer finance business were one of the main factors that contributed to the decrease in interest income attributable to our consumer finance business. Our

Table of Contents

interest income attributable to the consumer finance business was approximately ¥190 billion and ¥160 billion for the fiscal years ended March 31, 2009 and 2010, respectively. However, following the regulatory changes in June 2010, our interest income attributable to the consumer finance business substantially decreased. For the fiscal year ended March 31, 2016, our interest income attributable to the consumer finance business was approximately ¥91 billion.

In addition, as a result of decisions by the Supreme Court of Japan prior to June 18, 2010 imposing stringent requirements under the Money Lending Business Act for charging gray-zone interest rates, consumer finance companies have experienced a significant increase in borrowers claims for reimbursement of previously collected interest payments in excess of the limits stipulated by the Interest Rate Restriction Act.

Following the various legal developments in June 2010 and other industry developments, Mitsubishi UFJ NICOS revised its estimate of allowance for repayment of excess interest by updating management's future forecast to reflect new reimbursement claims information and other data. As of March 31, 2014, 2015 and 2016, we had ¥54.1 billion, ¥36.3 billion and ¥47.2 billion of allowance for repayment of excess interest, respectively. For the same periods, one of our equity method investees engaged in consumer lending, ACOM CO., LTD., had a negative impact of ¥18.0 billion, ¥19.7 billion and ¥22.4 billion, respectively, on net equity in losses of equity method investees in our consolidated statements of income. We intend to carefully monitor future developments and trends.

These developments have adversely affected, and these and any future developments may further adversely affect, the operations and financial condition of our subsidiaries, equity method investees and borrowers which are engaged in consumer lending, which in turn may affect the value of our related shareholdings and loan portfolio.

Our business may be adversely affected by competitive pressures, which have partly increased due to regulatory changes and recent market changes in the financial industry domestically and globally.

In recent years, the Japanese financial system has been undergoing significant changes and regulatory barriers to competition have been reduced. In particular, any further reform of the Japanese postal savings system, under which the Japan Post Group companies, including Japan Post Bank Co., Ltd., were established in October 2007, could substantially increase competition within the financial services industry as Japan Post Bank, with the largest deposit base and branch network in Japan, may begin to offer financial services in competition with our business operations generating fee income. In November 2015, shares of Japan Post Holdings Co., Ltd., Japan Post Bank Co., Ltd. and Japan Post Insurance Co., Ltd. were listed on the Tokyo Stock Exchange. In the initial public offering, approximately 11% of the shares in each of the Japan Post companies were sold. The Japanese government is expected to sell additional shares in Japan Post Holdings, and Japan Post Holdings is also expected to sell additional shares in the Japan Post Bank and Japan Post Insurance in the future. Under the current postal privatization law, Japan Post Bank and Japan Post Insurance may enter into new business areas upon obtaining government approvals, and if Japan Post Holdings' equity holdings decrease to 50% or below, the two subsidiaries will be allowed to enter into new business areas upon submission of a notice to the government. In such case, the Japan Post Group companies may seek to enter into new financial businesses and increasingly compete with us. In addition, in April 2016, the limit on deposits that Japan Post Bank can accept from each depositor was raised from ¥10 million to ¥13 million pursuant to a revised government ordinance. Since Japan Post Bank is one of the world's largest holders of deposits, this change may increase Japan Post Bank's competitive position as banks rely on deposits as a cost-effective source of funding.

Competition may further increase as U.S. and European financial institutions have recently been regaining and enhancing their competitive strength and advances in information and communications technology have allowed non-financial institutions to enter the financial services industry. We also face intensifying competition in areas of our strategic expansion. For example, the Japanese mega banks, including us, and other major international banks have been expanding their operations in the Asian market, where leading local banks have recently been growing and increasing their presence. In addition, there has been significant consolidation and

Table of Contents

convergence among financial institutions domestically and globally, and this trend may continue in the future and further increase competition in the market. A number of large commercial banks and other broad-based financial services firms have merged or formed strategic alliances with, or have acquired, other financial institutions both in Japan and overseas. As a result of the strategic alliance and the joint venture companies that we formed with Morgan Stanley, we may be perceived as a competitor by some of the financial institutions with which we had a more cooperative relationship in the past. In addition, recent advances in information and communication technology have allowed non-financial institutions to enter the financial services industry with alternative services, and such new entrants could become substantial competition to us. The ongoing global financial regulatory reforms may also lead to changes in the competitive environment for financial institutions. If we are unable to compete effectively in this more competitive and deregulated business environment, our business, results of operations and financial condition will be adversely affected. For a more detailed discussion of our competition in Japan, see Item 4.B. Information on the Company Business Overview Competition.

Future changes in accounting standards or methods could have a negative impact on our business and results of operations.

Future developments or changes in accounting standards are unpredictable and beyond our control. For example, in response to the recent instabilities in global financial markets, several international organizations which set accounting standards have released proposals to revise standards on accounting for financial instruments. Accounting standards applicable to financial instruments remain subject to debate and revision by international organizations which set accounting standards. If the current accounting standards change in the future, the reported values of some of our financial instruments may need to be modified, and such modification could have a significant impact on our financial results or financial condition. In addition, the bodies that interpret the accounting standards may change their interpretations, or we may elect to modify our accounting methods to improve our financial reporting, and such change or modification may also have a significant impact on our financial results or financial condition. For more information, see Item 5. Operating and Financial Review and Prospects Critical Accounting Estimates.

We could also be required to incur significant expenses to comply with new accounting standards and regulations. For example, if we adopt a new accounting system in the future, we may be required to incur significant additional costs for establishing and implementing effective internal controls, which may materially and adversely affect our financial condition and results of operations.

Transactions with counterparties in countries designated by the U.S. Department of State as state sponsors of terrorism may lead some potential customers and investors in the United States and other countries to avoid doing business with us or investing in our shares.

We, through our subsidiaries, engage in business activities with entities in or affiliated with Iran, including transactions with counterparties owned or controlled by the Iranian government, and our commercial banking subsidiary has a representative office in Iran. The U.S. Department of State has designated Iran and other countries as state sponsors of terrorism, and U.S. law generally prohibits U.S. persons from doing business with such countries. We currently have business activities with entities in or affiliated with such countries in accordance with our policies and procedures designed to ensure compliance with regulations applicable in the jurisdictions in which we operate.

We have loan transactions with counterparties in or affiliated with Iran, the outstanding balance of which was approximately \$0.8 million, representing less than 0.0001% of our total assets, as of March 31, 2016. We do not have any loans outstanding to the financial institutions specifically listed by the U.S. government. In addition to such loan transactions, our other transactions with counterparties in or affiliated with countries designated as state sponsors of terrorism consist of receiving deposits or holding assets on behalf of individuals residing in Japan who are citizens of countries designated as state sponsors of terrorism, processing payments to or from entities in or affiliated with these countries on behalf of our customers, and issuing letters of credit and guarantees in connection with transactions with entities in or affiliated with such countries by our customers.

Table of Contents

These transactions do not have a material impact on our business or financial condition. For a further discussion of transactions required to be disclosed under the U.S. Iran Threat Reduction and Syria Human Rights Act of 2012, see Item 4.B. Information on the Company Business Overview Supervision and Regulation United States Disclosure pursuant to Section 13(r) of the Securities Exchange Act of 1934.

We are aware of initiatives by U.S. governmental entities and non-government entities, including institutional investors such as pension funds, to adopt or consider adopting laws, regulations or policies prohibiting transactions with or investment in, or requiring divestment from, entities doing business with Iran and other countries identified as state sponsors of terrorism. It is possible that such initiatives may result in our being unable to gain or retain entities subject to such prohibitions as customers, counter-parties or investors in our shares. In addition, depending on socio-political developments, our reputation may suffer due to our transactions with counterparties in or affiliated with these countries. The above circumstances could have an adverse effect on our business and financial condition.

Global financial institutions, including us, have become subject to an increasingly complex set of sanctions laws and regulations in recent years, and this regulatory environment is expected to continue. Moreover, the measures proposed or adopted vary across the major jurisdictions, increasing the cost and resources necessary to design and implement an appropriate global compliance program. The U.S. federal government and some state governments in the United States have enacted legislation designed to limit economic and financial transactions with Iran by limiting the ability of financial institutions that may have engaged in any one of a broad range of activities related to Iran to conduct various transactions in the relevant jurisdictions. The Japanese government has also implemented a series of measures under the Foreign Exchange and Foreign Trade Act, such as freezing the assets of persons involved in Iran's sensitive nuclear activities and development of nuclear weapon delivery systems, and our most recently modified policies and procedures take into account the current Japanese regulatory requirements. There remains a risk of potential U.S. regulatory action against us, however, if U.S. regulators perceive the modified policies and procedures not to be in compliance with applicable regulations.

We may not be able to maintain our capital ratios above minimum required levels, which could result in the suspension of some or all of our operations.

We, as a holding company, and our Japanese banking subsidiaries are required to maintain risk-weighted capital ratios above the levels specified in the capital adequacy guidelines of the FSA which have been revised as of March 31, 2013, as described below. As of March 31, 2016, our total risk-adjusted capital ratio was 16.01% compared to the minimum risk-adjusted capital ratio required of 8.00%, our Tier 1 capital ratio was 13.24% compared to the minimum Tier 1 capital ratio required of 6.00%, and our Common Equity Tier 1 capital ratio was 11.63% compared to the minimum Common Equity Tier 1 capital ratio required of 4.50%. Our capital ratios are calculated in accordance with Japanese banking regulations based on information derived from our financial statements prepared in accordance with Japanese GAAP. In addition, some of our subsidiaries are also subject to the capital adequacy rules of various foreign countries, including the United States where each of MUFG, BTMU, MUTB, and MUAH is a financial holding company under the U.S. Bank Holding Company Act. We or our banking subsidiaries may be unable to continue to satisfy the capital adequacy requirements because of:

increases in our and our banking subsidiaries' credit risk assets and expected losses because of fluctuations in our or our banking subsidiaries' portfolios due to deterioration in the creditworthiness of borrowers and the issuers of equity and debt securities;

difficulty in refinancing or issuing instruments upon redemption or at maturity of such instruments to raise capital under terms and conditions similar to prior financings or issuances;

declines in the value of our or our banking subsidiaries' securities portfolios;

adverse changes in foreign currency exchange rates;

adverse revisions to the capital ratio requirements;

Table of Contents

reductions in the value of our or our banking subsidiaries' deferred tax assets; and

other adverse developments.

The Group of Central Bank Governors and Heads of Supervision has made a series of announcements regarding the new global regulatory framework, which has been referred to as Basel III, to strengthen the regulation, supervision and risk management of the banking sector. Various Basel III measures are being phased in from the calendar year 2013, including those designed to raise the level of minimum capital requirements and to establish an internationally harmonized leverage ratio and a global minimum liquidity standard. In addition, the Basel Committee on Banking Supervision has proposed additional loss absorbency requirements to supplement the Common Equity Tier 1 capital requirement ranging from 1% to 3.5% for G-SIBs, depending on the bank's systemic importance. The Financial Stability Board identified us as a G-SIB in its most recent annual report published in November 2015, and indicated that, as a G-SIB, we would be required to hold an additional 1.5% of Common Equity Tier 1 capital. The group of banks identified as G-SIBs is expected to be updated annually. The stricter capital requirements are expected to be implemented in phases between January 1, 2016 and December 31, 2018 and will become fully effective on January 1, 2019. Based on the Basel III framework, the Japanese capital ratio framework has been revised to implement the more stringent requirements, which are being implemented in phases beginning on March 31, 2013. Likewise, local banking regulators outside of Japan, such as those in the United States, have begun, or are expected, to revise the capital and liquidity requirements imposed on our subsidiaries and operations in those countries to implement the more stringent requirements of Basel III as adopted in those countries.

In November 2015, the Financial Stability Board issued the final Total Loss-Absorbing Capacity, or TLAC, standard for G-SIBs, including us. The TLAC standard defines a minimum requirement for the instruments and liabilities that should be readily available to absorb losses in resolution. Under the standard, each G-SIB is required to hold TLAC debt in an amount not less than 16% of its risk-weighted assets and 6% of the applicable Basel III leverage ratio denominator by January 1, 2019, and not less than 18% of its risk-weighted assets and 6.75% of the applicable Basel III leverage ratio denominator by January 1, 2022. The Financial Stability Board's standard is subject to regulatory implementation in each jurisdiction, including Japan, and specific requirements as implemented in Japan may not be the same as the Financial Stability Board's TLAC standard. Although the FSA has not yet finalized TLAC requirements for Japanese G-SIBs, we have commenced issuing senior debt securities that are intended to qualify as TLAC debt. However, there is no assurance that our senior debt securities will qualify as such, and we may have difficulty meeting the TLAC requirements.

Under the capital adequacy guidelines of the FSA, which have been revised in connection with the adoption of Basel III, there is a transitional measure relating to the inclusion as a capital item of capital raising instruments issued in or prior to March 2013, and such instruments can be included as a capital item when calculating capital ratios to the extent permitted by the transitional measure. Such capital raising instruments may require refinancing upon the expiration of the transition period during which such instruments can be included as a capital item in the calculation of capital ratios. However, in order for newly issued capital raising instruments, other than common stock, to be included as a capital item in the calculation of capital ratios under the capital adequacy guidelines, such instruments must have a clause in their terms and conditions that requires them to be written off or converted into common stock upon the occurrence of certain events, including when the issuing financial institution is deemed non-viable or when the issuing financial institution's capital ratios decline below prescribed levels. As a result, under certain market conditions, we may be unable to refinance or issue capital raising instruments under terms and conditions similar to those of capital raising instruments issued in or prior to March 2013. If such circumstances arise, our and our banking subsidiaries' capital could be reduced, and our and our bank subsidiaries' capital ratios could decrease.

In addition, under the FSA's capital adequacy guidelines, deferred tax assets can be included as a capital item when calculating capital ratios up to a prescribed amount. However, this upper limit is expected to be reduced in phases. If, and to the extent, the amount of deferred tax assets exceeds this limit and cannot be included in Common Equity Tier 1 capital, our and our banking subsidiaries' capital ratios could decrease.

Table of Contents

If our capital ratios fall below required levels, the FSA could require us to take a variety of corrective actions, including withdrawal from all international operations or suspension of all or part of our business operations. In addition, if the capital ratios of our subsidiaries subject to capital adequacy rules of foreign jurisdictions fall below the required levels, the local regulators could also take action against them that may result in reputational damage or financial losses to us. Since maintaining our capital ratios at acceptable levels is crucial to our business, our management devotes a significant amount of attention and resources to capital ratio related issues and may also significantly alter our business strategy or operations if our capital ratios decline to unacceptable levels. For a discussion of our capital ratios and the related regulatory guidelines, see Item 4.B. Information on the Company Business Overview Supervision and Regulation and Item 5.B. Operating and Financial Review and Prospects Liquidity and Capital Resources Capital Adequacy.

If the goodwill recorded in connection with our acquisitions becomes impaired, we may be required to record impairment losses, which may adversely affect our financial results.

In accordance with U.S. GAAP, we account for our business combinations using the acquisition method of accounting. We recorded the excess of the purchase price over the fair value of the assets and liabilities of the acquired companies as goodwill. U.S. GAAP requires us to test goodwill for impairment at least annually, or more frequently if events or changes in circumstances indicate that goodwill may be impaired. As of March 31, 2016, the total balance of goodwill was ¥454.4 billion.

For the fiscal year ended March 31, 2016, we recognized ¥4.3 billion in impairment of goodwill relating to a reporting unit within the Trust Assets Business Group segment as we readjusted our future cash flow projection of the reporting unit in this segment, considering the relevant subsidiaries recent business performance. We also recognized ¥151.7 billion in impairment of goodwill relating to the reporting unit other than MUAH and Krungsri within the Global Business Group segment as our stock price decreased from ¥743.7 on March 31, 2015 to ¥521.5 on March 31, 2016. Our stock price was adversely impacted by the Bank of Japan's announcement of implementation in January 2016 of the negative interest rate on certain current account amounts that financial institutions hold at the Bank of Japan, and the appreciation of the Japanese yen against other major currencies. In addition, we recognized ¥177.8 billion in impairment of goodwill relating to the Krungsri reporting unit within the Global Business Group segment as Krungsri's stock price declined from THB44.75 on December 31, 2014 to THB29.75 on December 31, 2015. Krungsri's stock price was adversely impacted by the slowing economic growth in Thailand. Accordingly, the fair values of these reporting units were considered to have fallen below their carrying amounts. As a result, the carrying amounts of the reporting units goodwill exceeded the implied fair values of the reporting units goodwill, and the impairment losses were recognized on the related goodwill. See Item 5.B. Operating and Financial Review and Prospects Operating Results Impairment of goodwill.

We may be required to record additional impairment losses relating to goodwill in future periods if the fair value of any of our reporting units declines below the fair value of related assets net of liabilities. Any additional impairment losses will negatively affect our financial results, and the price of our securities could be adversely affected. For a detailed discussion of our periodic testing of goodwill for impairment and the goodwill recorded, see Item 5. Operating and Financial Review and Prospects Critical Accounting Estimates Accounting for Goodwill and Intangible Assets.

A downgrade of our credit ratings could adversely affect our ability to access and maintain liquidity.

Any downgrade of the credit ratings assigned to us or our debt securities by Moody's, Fitch, Standard & Poor's or any other credit rating agency could increase the cost, or decrease the availability, of our funding, particularly in U.S. dollars and other foreign currencies, adversely affect our liquidity position or net interest margin, trigger additional collateral or funding obligations, and result in losses of depositors, investors and counterparties willing or permitted to transact with us, thereby reducing our ability to generate income and weakening our financial position.

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

Rating agencies regularly evaluate us and our major subsidiaries as well as our and their respective debt securities. Their ratings are based on a number of factors, including their assessment of the relative financial strength of MUFG or of the relevant subsidiary, as well as conditions generally affecting the financial services

Table of Contents

industry in Japan or on a global basis, some of which are not entirely within our control. As a result of changes in their evaluation of these factors or in their rating methodologies, rating agencies may downgrade our, or our subsidiaries', ratings.

In December 2014, Moody's downgraded the long-term credit ratings of BTMU and MUTB by one-notch from Aa3 to A1, the long-term credit rating of MUSHD by one-notch from A2 to A3, and the short-term credit rating of MUSHD by one-notch from P-1 to P-2. These downgrades followed the downgrade of the rating assigned to the Government of Japan from Aa3 to A1. In November 2015, Standard and Poor's changed the credit rating outlook for MUFG, BTMU and MUTB from stable to negative, following S&P's revision of its view on the economic risk trend in Japan's banking sector from stable to negative. In addition, in June 2016, Fitch changed the credit rating outlook of MUFG, BTMU and MUTB from stable to negative, following Fitch's change in the credit rating outlook for the Government of Japan from stable to negative.

Assuming all of the relevant credit rating agencies downgraded the credit ratings of MUFG, BTMU, MUTB and MUSHD by one-notch on March 31, 2016, we estimate that MUFG and its three main subsidiaries would have been required to provide additional collateral under their derivative contracts as of the same date of approximately ¥7.9 billion. Assuming a two-notch downgrade by all of the relevant credit rating agencies occurred on the same date, we estimate that the additional collateral requirements for MUFG, BTMU, MUTB and MUSHD under their derivative contracts as of the same date would have been approximately ¥14.4 billion. For additional information on the impact of recent downgrades, see Item 5.B. Operating and Financial Review and Prospects Liquidity and Capital Resources Financial Condition Sources of Funding and Liquidity.

Failure to safeguard personal and other confidential information may result in liability, reputational damage or financial losses.

As our operations expand in volume, complexity and geographic scope, we are exposed to increased risk of confidential information in our possession being lost, leaked, altered or falsified as a result of human or system error, misconduct, unlawful behavior or scheme, unauthorized access or natural or human-caused disasters. Our information systems and information management policies and procedures may not be sufficient to safeguard confidential information against such risks.

As a financial institution in possession of customer information, we are required to treat personal and other confidential information as required by the Act on the Protection of Personal Information and the Act on the Use of Personal Identification Numbers in the Administration of Government Affairs, as well as the Banking Law and the Financial Instruments and Exchange Act of Japan. In the event that personal information in our possession about our customers or employees is leaked or improperly accessed and subsequently misused, we may be subject to liability and regulatory action. We may have to provide compensation for economic loss and emotional distress arising out of a failure to protect such information. In addition, such incidents could create a negative public perception of our operations, systems or brand, which may in turn decrease customer and market confidence and materially and adversely affect our business, operating results and financial condition.

Moreover, any loss, leakage, alteration or falsification of confidential information, or any malfunction or failure of our information systems, may result in significant disruptions to our business operations or plans or may require us to incur significant financial, human and other resources to implement corrective measures or enhance our information systems and information management policies and procedures.

Our operations are highly dependent on our information, communications and transaction management systems and are subject to an increasing risk of cyber-attacks and other information security threats and to changes in the business and regulatory environment.

Our information, communications and transaction management systems constitute a core infrastructure for our operations. Given our global operations with an extensive network of branches and offices, the proper functioning of our information, communications and transaction management systems is critical to our ability to efficiently and accurately process a large volume of transactions, ensure adequate internal controls, appropriately

Table of Contents

manage various risks, and otherwise service our clients and customers. Cyber-attacks and other forms of unauthorized access and computer viruses are becoming increasingly more sophisticated and more difficult to predict, detect and prevent. For instance, bank internal financial transaction systems or automatic teller machines may become the target of cyber-attacks for monetary gain, and bank internal information systems may become the target of confidential information theft. In addition, banks' websites or customer internet banking systems may become the target of cyber-attacks for political and other purposes. These cyber threats could cause disruptions to, and malfunctions of, such systems and result in unintended releases of confidential and proprietary information stored in or transmitted through the systems, interruptions in the operations of our clients, customers and counterparties, and deterioration in our ability to service our clients and customers. In addition, our banking and other transaction management systems may not meet all applicable business and regulatory requirements in an environment where such requirements are becoming increasingly sophisticated and complicated. These consequences could result in financial losses, including costs and expenses incurred in connection with countermeasures and improvements as well as compensation to affected parties, lead to regulatory actions, diminish our clients' and customers' satisfaction with and confidence in us, and harm our reputation in the market, which could in turn adversely affect our business, financial condition and results of operations.

Risks Related to Owning Our Shares

It may not be possible for investors to effect service of process within the United States upon us or our directors or management members, or to enforce against us or those persons judgments obtained in U.S. courts predicated upon the civil liability provisions of the U.S. federal or state securities laws.

We are a joint stock company incorporated under the laws of Japan. Almost all of our directors or management members reside outside the United States. Many of our assets and the assets of these persons are located in Japan and elsewhere outside the United States. It may not be possible, therefore, for U.S. investors to effect service of process within the United States upon us or these persons or to enforce, against us or these persons, judgments obtained in the U.S. courts predicated upon the civil liability provisions of the U.S. federal or state securities laws.

We believe there is doubt as to the enforceability in Japan, in original actions or in actions brought in Japanese courts to enforce judgments of U.S. courts, of claims predicated solely upon the U.S. federal or state securities laws mainly because the Civil Execution Act of Japan requires Japanese courts to deny requests for the enforcement of judgments of foreign courts if foreign judgments fail to satisfy the requirements prescribed by the Civil Execution Act, including:

the jurisdiction of the foreign court be recognized under laws, regulations, treaties or conventions;

proper service of process be made on relevant defendants, or relevant defendants be given appropriate protection if such service is not received;

the judgment and proceedings of the foreign court not be repugnant to public policy as applied in Japan; and

there exist reciprocity as to the recognition by a court of the relevant foreign jurisdiction of a final judgment of a Japanese court.

Judgments obtained in the U.S. courts predicated upon the civil liability provisions of the U.S. federal or state securities laws may not satisfy these requirements.

Risks Related to Owning Our American Depositary Shares

As a holder of American Depositary Shares, you have fewer rights than a shareholder of record in our shareholder register since you must act through the depositary to exercise these rights.

The rights of our shareholders under Japanese law to take actions such as voting, receiving dividends and distributions, bringing derivative actions, examining our accounting books and records and exercising appraisal

Table of Contents

rights are available only to shareholders of record. Because the depositary, through its custodian, is the record holder of the shares underlying the American Depositary Shares, or ADSs, only the depositary can exercise shareholder rights relating to the deposited shares. ADS holders, in their capacity, will not be able to directly bring a derivative action, examine our accounting books and records and exercise appraisal rights. We have appointed The Bank of New York Mellon as depositary, and we have the authority to replace the depositary.

Pursuant to the deposit agreement among us, the depositary and a holder of ADSs, the depositary will make efforts to exercise voting or any other rights associated with shares underlying ADSs in accordance with the instructions given by ADS holders, and to pay to ADS holders dividends and distributions collected from us. However, the depositary can exercise reasonable discretion in carrying out the instructions or making distributions, and is not liable for failure to do so as long as it has acted in good faith. Therefore, ADS holders may not be able to exercise voting or any other rights in the manner that they had intended, or may lose some or all of the value of the dividends or the distributions. Moreover, the depositary agreement that governs the obligations of the depositary may be amended or terminated by us and the depositary without ADS holders' consent, notice, or any reason. As a result, ADS holders may be prevented from having the rights in connection with the deposited shares exercised in the way ADS holders had wished or at all.

ADS holders are dependent on the depositary to receive our communications. We send to the depositary all of our communications to ADS holders, including annual reports, notices and voting materials, in Japanese. ADS holders may not receive all of our communications with shareholders of record in our shareholder register in the same manner or on an equal basis. In addition, ADS holders may not be able to exercise their rights as ADS holders due to delays in the depositary transmitting our shareholder communications to ADS holders. For a detailed discussion of the rights of ADS holders and the terms of the deposit agreement, see Item 10.B. Additional Information Memorandum and Articles of Association American Depositary Shares.

Item 4. Information on the Company.

A. History and Development of the Company

Mitsubishi UFJ Financial Group, Inc.

MUFG is a bank holding company incorporated as a joint stock company (*kabushiki kaisha*) under the Companies Act of Japan. We are the holding company for The Bank of Tokyo-Mitsubishi UFJ, Ltd., or BTMU, Mitsubishi UFJ Trust and Banking Corporation, or MUTB, Mitsubishi UFJ Securities Holdings Co., Ltd., or MUSHD, Mitsubishi UFJ Morgan Stanley Securities Co., Ltd., or MUMSS, Mitsubishi UFJ NICOS Co., Ltd., and other companies engaged in a wide range of financial businesses.

On April 2, 2001, The Bank of Tokyo-Mitsubishi, Ltd., Mitsubishi Trust and Banking Corporation, or Mitsubishi Trust Bank, and Nippon Trust and Banking Co., Ltd. established Mitsubishi Tokyo Financial Group, Inc., or MTFG, to be a holding company for the three entities. Before that, each of the banks had been a publicly traded company. On April 2, 2001, through a stock-for-stock exchange, they became wholly-owned subsidiaries of MTFG, and the former shareholders of the three banks became shareholders of MTFG. Nippon Trust and Banking was later merged into Mitsubishi Trust Bank.

On June 29, 2005, the merger agreement between MTFG and UFJ Holdings was approved at the general shareholders meetings of MTFG and UFJ Holdings. As the surviving entity, MTFG was renamed Mitsubishi UFJ Financial Group, Inc. The merger of the two bank holding companies was completed on October 1, 2005.

On September 30, 2007, MUSHD, which was then called Mitsubishi UFJ Securities Co., Ltd., or MUS, became our wholly-owned subsidiary through a share exchange transaction.

On October 13, 2008, we formed a global strategic alliance with Morgan Stanley and, as part of the alliance, made an equity investment in Morgan Stanley in the form of convertible and non-convertible preferred stock, and subsequently appointed a representative to Morgan Stanley's board of directors.

Table of Contents

On October 21, 2008, we completed a tender offer for outstanding shares of ACOM CO., LTD. common stock, raising our ownership in ACOM to approximately 40%.

On November 4, 2008, BTMU completed the acquisition of all of the shares of common stock of UnionBanCal Corporation, or UNBC, not previously owned by BTMU and, as a result, UNBC became a wholly-owned indirect subsidiary of MUFG.

On May 1, 2010, we and Morgan Stanley integrated our securities and investment banking businesses in Japan into two joint venture securities companies, one of which is MUMSS. MUMSS was created by spinning off the wholesale and retail securities businesses conducted in Japan from MUSHD and subsequently assuming certain operations in Japan from a subsidiary of Morgan Stanley.

On June 30, 2011, we converted all of our Morgan Stanley's convertible preferred stock into Morgan Stanley's common stock, resulting in our holding approximately 22.4% of the voting rights in Morgan Stanley. Further, we appointed a second representative to Morgan Stanley's board of directors on July 20, 2011. Following the conversion on June 30, 2011, Morgan Stanley became our equity-method affiliate. As of March 31, 2016, we held approximately 22.3% of the voting rights in Morgan Stanley and had two representatives appointed to Morgan Stanley's board of directors. We and Morgan Stanley continue to pursue a variety of business opportunities in Japan and abroad in accordance with the global strategic alliance.

On December 18, 2013, we acquired approximately 72.0% of the total outstanding shares of Krungsri through BTMU. As a result of the transaction, Krungsri has become a consolidated subsidiary of BTMU.

On July 1, 2014, we integrated BTMU's operations in the Americas region with UNBC's operations, and changed UNBC's corporate name to MUFG Americas Holdings Corporation, or MUAH. On the same day, Union Bank, N.A., which is MUAH's principal subsidiary and our primary operating subsidiary in the United States, was also renamed MUFG Union Bank, N.A., or MUB. MUAH currently oversees BTMU's operations in the Americas region as well as the operations of MUB.

On January 5, 2015, BTMU integrated its Bangkok branch with Krungsri through a contribution in kind of the BTMU Bangkok branch business to Krungsri, and BTMU received newly issued shares of Krungsri common stock. As a result of this transaction, BTMU's ownership interest in Krungsri increased to 76.9%.

Our registered address is 7-1, Marunouchi 2-chome, Chiyoda-ku, Tokyo 100-8330, Japan, and our telephone number is 81-3-3240-8111.

For a discussion of recent developments, see Item 5. Operating and Financial Review and Prospects Recent Developments.

The Bank of Tokyo-Mitsubishi UFJ, Ltd.

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

BTMU is a major commercial banking organization in Japan that provides a broad range of domestic and international banking services from its offices in Japan and around the world. BTMU's registered head office is located at 7-1, Marunouchi 2-chome, Chiyoda-ku, Tokyo 100-8388, Japan, and its telephone number is 81-3-3240-1111. BTMU is a joint stock company (*kabushiki kaisha*) incorporated in Japan under the Companies Act.

BTMU was formed through the merger, on January 1, 2006, of Bank of Tokyo-Mitsubishi and UFJ Bank Limited after their respective parent companies, MTFG and UFJ Holdings, merged to form MUFG on October 1, 2005.

Bank of Tokyo-Mitsubishi was formed through the merger, on April 1, 1996, of The Mitsubishi Bank, Limited and The Bank of Tokyo, Ltd.

The origins of Mitsubishi Bank can be traced to the Mitsubishi Exchange Office, a money exchange house established in 1880 by Yataro Iwasaki, the founder of the Mitsubishi industrial, commercial and financial group.

Table of Contents

In 1895, the Mitsubishi Exchange Office was succeeded by the Banking Division of the Mitsubishi Goshi Kaisha, the holding company of the Mitsubishi group of companies. Mitsubishi Bank had been a principal bank to many of the Mitsubishi group companies but broadened its relationships to cover a wide range of Japanese industries, small and medium-sized companies and individuals.

Bank of Tokyo was established in 1946 as a successor to The Yokohama Specie Bank, Ltd., a special foreign exchange bank established in 1880. When the government of Japan promulgated the Foreign Exchange Bank Law in 1954, Bank of Tokyo became the only bank licensed under that law. Because of its license, Bank of Tokyo received special consideration from the Ministry of Finance in establishing its offices abroad and in many other aspects relating to foreign exchange and international finance.

UFJ Bank was formed through the merger, on January 15, 2002, of The Sanwa Bank, Limited and The Tokai Bank, Limited.

Sanwa Bank was established in 1933 when the three Osaka-based banks, the Konoike Bank, the Yamaguchi Bank, and the Sanjyushi Bank merged. Sanwa Bank was known as a city bank having the longest history in Japan, since the foundation of Konoike Bank can be traced back to the Konoike Exchange Office established in 1656. The origin of Yamaguchi Bank was also a money exchange house, established in 1863. Sanjyushi Bank was founded by influential fiber wholesalers in 1878. The corporate philosophy of Sanwa Bank had been the creation of premier banking services especially for small and medium-sized companies and individuals.

Tokai Bank was established in 1941 when the three Nagoya-based banks, the Aichi Bank, the Ito Bank, and the Nagoya Bank merged. In 1896, Aichi Bank took over businesses of the Jyuichi Bank established by wholesalers in 1877 and the Hyakusanjyushi Bank established in 1878. Ito Bank and Nagoya Bank were established in 1881 and 1882, respectively. Tokai Bank had expanded the commercial banking business to contribute to economic growth mainly of the Chubu area in Japan, which is known for its manufacturing industries, especially automobiles.

Mitsubishi UFJ Trust and Banking Corporation

MUTB is a major trust bank in Japan, providing trust and banking services to meet the financing and investment needs of clients in Japan and the rest of Asia, as well as in the United States and Europe. MUTB's registered head office is located at 4-5, Marunouchi 1-chome, Chiyoda-ku, Tokyo 100-8212, Japan, and its telephone number is 81-3-3212-1211. MUTB is a joint stock company (*kabushiki kaisha*) incorporated in Japan under the Companies Act.

MUTB was formed on October 1, 2005 through the merger of Mitsubishi Trust Bank and UFJ Trust Bank Limited. As the surviving entity, Mitsubishi Trust Bank was renamed Mitsubishi UFJ Trust and Banking Corporation.

Mitsubishi Trust Bank traces its history to The Mitsubishi Trust Company, Limited, which was founded by the leading members of the Mitsubishi group companies in 1927. The Japanese banking and financial industry was reconstructed after World War II and, in 1948, Mitsubishi Trust Bank was authorized to engage in the commercial banking business, in addition to its trust business, under the new name Asahi Trust & Banking Corporation. In 1952, the bank changed its name again to The Mitsubishi Trust and Banking Corporation.

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

Nippon Trust and Banking and The Tokyo Trust Bank, Ltd., which were previously subsidiaries of Bank of Tokyo-Mitsubishi, was merged into Mitsubishi Trust Bank on October 1, 2001.

UFJ Trust Bank was founded in 1959 as The Toyo Trust & Banking Company, Limited, or Toyo Trust Bank. The Sanwa Trust & Banking Company, Limited, which was a subsidiary of Sanwa Bank, was merged into Toyo Trust Bank on October 1, 1999. The Tokai Trust & Banking Company, Limited, which was a subsidiary of Tokai Bank, was merged into Toyo Trust Bank on July 1, 2001. Toyo Trust Bank was renamed UFJ Trust Bank Limited on January 15, 2002.

Table of Contents

Mitsubishi UFJ Securities Holdings Co., Ltd.

MUSHD is a wholly-owned subsidiary of MUFG. MUSHD functions as an intermediate holding company of MUFG's global securities and investment banking businesses. MUSHD's registered head office is located at 5-2, Marunouchi 2-chome, Chiyoda-ku, Tokyo 100-0005, Japan, and its telephone number is 81-3-6213-2550. MUSHD is a joint stock company (*kabushiki kaisha*) incorporated in Japan under the Companies Act. MUSHD has major overseas subsidiaries in London, New York, Hong Kong, Singapore and Geneva.

In April 2010, MUSHD, which was previously called Mitsubishi UFJ Securities Co., Ltd., or MUS, became an intermediate holding company by spinning off its securities and investment banking business operations to a wholly-owned operating subsidiary established in December 2009, currently MUMSS. Upon the consummation of the corporate spin-off transaction, the intermediate holding company was renamed Mitsubishi UFJ Securities Holdings Co., Ltd. and the operating subsidiary was renamed Mitsubishi UFJ Securities Co., Ltd. The operating subsidiary was subsequently renamed MUMSS in May 2010 upon integration of our securities operations in Japan with those of Morgan Stanley.

MUS was formed through the merger between Mitsubishi Securities Co., Ltd. and UFJ Tsubasa Securities Co., Ltd. on October 1, 2005, with Mitsubishi Securities being the surviving entity. The surviving entity was renamed Mitsubishi UFJ Securities Co., Ltd. and, in September 2007, became our wholly-owned subsidiary through a share exchange transaction.

Mitsubishi Securities was formed in September 2002 through a merger of Bank of Tokyo-Mitsubishi's securities subsidiaries and affiliate, KOKUSAI Securities Co., Ltd., Tokyo-Mitsubishi Securities Co., Ltd. and Tokyo-Mitsubishi Personal Securities Co., Ltd., and Mitsubishi Trust Bank's securities affiliate, Issei Securities Co., Ltd. In July 2005, MTFG made Mitsubishi Securities a directly-held subsidiary by acquiring all of the shares of Mitsubishi Securities common stock held by Bank of Tokyo-Mitsubishi and Mitsubishi Trust Bank.

Mitsubishi UFJ Morgan Stanley Securities Co., Ltd.

MUMSS is our core securities and investment banking subsidiary. MUMSS was created in May 2010 as one of the two Japanese joint venture securities companies between Morgan Stanley and us as part of our global strategic alliance. MUMSS succeeded to the investment banking operations conducted in Japan by a subsidiary of Morgan Stanley and the wholesale and retail securities businesses conducted in Japan by MUS. MUFG, through MUSHD, holds 60% voting and economic interests in MUMSS. MUMSS's registered head office is located at 5-2 Marunouchi 2-chome, Chiyoda-ku, Tokyo, 100-0005 Japan, and its telephone number is 81-3-6213-8500. MUMSS is a joint stock company (*kabushiki kaisha*) incorporated in Japan under the Companies Act. For more information on our joint venture securities companies, see B. Business Overview Global Strategic Alliance with Morgan Stanley.

Mitsubishi UFJ NICOS Co., Ltd.

Mitsubishi UFJ NICOS is a major credit card company in Japan that issues credit cards, including those issued under the MUFG, NICOS, UFJ and DC brands, and provides a broad range of credit card and other related services for its card members in Japan. Mitsubishi UFJ NICOS is a consolidated subsidiary of MUFG. Mitsubishi UFJ NICOS's registered head office is located at 33-5, Hongo 3-chome, Bunkyo-ku, Tokyo 113-8411, Japan, and its telephone number is 81-3-3811-3111. Mitsubishi UFJ NICOS is a joint stock company (*kabushiki kaisha*) incorporated in Japan under the Companies Act.

On August 1, 2008, Mitsubishi UFJ NICOS became a wholly-owned subsidiary of MUFG through a share exchange transaction. On the same day, we entered into a share transfer agreement with The Norinchukin Bank, or Norinchukin, under which we sold some of our shares of Mitsubishi UFJ NICOS common stock to Norinchukin. Currently, Mitsubishi UFJ NICOS is a consolidated subsidiary of MUFG. In March 2011, we and Norinchukin made additional equity investments in Mitsubishi UFJ NICOS in proportion to our and Norinchukin's respective beneficial ownership of approximately 85% and 15%, respectively.

Table of Contents

Mitsubishi UFJ NICOS was formed through the merger, on April 1, 2007, of UFJ NICOS Co., Ltd. and DC Card Co., Ltd. As the surviving entity, UFJ NICOS Co., Ltd. was renamed Mitsubishi UFJ NICOS Co., Ltd.

UFJ NICOS was formed through the merger, on October 1, 2005, of Nippon Shinpan Co., Ltd. and UFJ Card Co., Ltd. Originally founded in 1951 and listed on the Tokyo Stock Exchange in 1961, Nippon Shinpan was a leading company in the consumer credit business in Japan. Nippon Shinpan became a subsidiary of MUFG at the time of the merger with UFJ Card.

Prior to the merger between MTFG and UFJ Holdings in October 2005, DC Card was a subsidiary of MTFG while UFJ Card was a subsidiary of UFJ Holdings.

B. Business Overview

We are one of the world's largest and most diversified financial groups with total assets of ¥292.57 trillion as of March 31, 2016. The Group is comprised of BTMU, MUTB, MUMSS (through MUSHD), Mitsubishi UFJ NICOS and other subsidiaries and affiliates, for which we are the holding company. As a bank holding company, we are regulated under the Banking Law of Japan. Our services include commercial banking, trust banking, securities, credit cards, consumer finance, asset management, leasing and many more fields of financial services. The Group has the largest overseas network among the Japanese banks, comprised of offices and subsidiaries, including MUB and Krungsri, in about 50 countries.

Since April 2004, we have adopted an integrated business group system comprising our core business areas, which serve as the Group's core sources of net operating profit. As of March 31, 2016, we had five business segments: Retail Banking Business, Corporate Banking Business, Trust Assets Business, Global Business and Global Markets Business.

MUFG's role as the holding company is to strategically manage and coordinate the activities of these business segments. Group-wide strategies are determined by the holding company and executed by the banking subsidiaries and other subsidiaries. In October 2008, each of MUFG, BTMU, MUTB and UNBC (now MUAH) became a financial holding company under the U.S. Bank Holding Company Act. For more information, see Item 3.D. Key Information Risk Factors Risks Related to Our Business We may not be able to maintain our capital ratios above minimum required levels, which could result in the suspension of some or all of our operations and B. Information on the Company Business Overview Supervision and Regulation United States.

MUFG Management Policy

MUFG Group has formulated the Group Corporate Vision to clarify the nature of the Group's overall mission and the type of group it should aspire to be, and as a shared principle to unify the hearts and minds of Group employees, while meeting the expectations of our customers and society. Throughout the Group, the people of MUFG are working under three shared values Integrity and Responsibility, Professionalism and Teamwork, and Challenging Ourselves to Grow while aiming to be the world's most trusted financial group.

Table of Contents

We have declared our message to the world as “Quality for You,” with management’s emphasis on quality. “Quality for You” means that by providing high-quality services, we aspire to help improve the quality of the lives of individual customers and the quality of each corporate customer. The “You” expresses the basic stance of MUFG that we seek to contribute not only to the development of our individual customers but also communities and society. We believe that delivering superior quality services, reliability, and global coverage will result in more profound and enduring contributions to society.

Medium- and long-term management strategy

The operating environment for financial institutions is transforming substantially amidst such trends as the changes in consumption patterns stemming from the aging of the Japanese population and its declining birthrate and the advance of information and communications technology. It is crucial to the further progress of the MUFG Group for us to maintain an accurate understanding of such changes, and undertake evolution and reformation of our business model as a preemptive response to these changes. Based on this recognition, the MUFG Group turned its eye toward expected operating environment changes over the next decade, and launched a new medium-term business plan, which outlines the strategies that we intend to implement over the first three years of this period from the fiscal year ending March 31, 2016 to the fiscal year ending March 31, 2018. The basic policy of the medium-term business plan is defined as “Evolution and reformation to achieve sustainable growth for MUFG,” and we have formulated Group business strategies and administrative practices and business foundation strategies of the plan based on three strategic focuses: “Customer perspective,” “Group-driven approach,” and “Productivity improvements.” “Customer perspective” calls on us to develop businesses based on changing customer needs. “Group-driven approach” inspires us to bolster inter-Group company unity and consider how to optimize our business on a Group-wide basis. “Productivity improvements” encapsulates our commitment to boosting competitiveness by pursuing higher levels of rationality and efficiency.

For the Group business strategies, we are seeking to enhance support for wealth accumulation and stimulation of consumption for individuals, contribute to the growth of small and medium-sized enterprises, and link contribution to the revitalization of the Japanese economy with the stable growth of MUFG in Japan. Globally, we aim to enhance and expand businesses by evolving and reforming our Corporate & Investment Banking, or CIB, model, sales and trading operation, and asset management and investor services operations. We are also working to further reinforce transaction banking operations and strengthen commercial banking platforms in Asia and the United States to construct a next-generation business base.

For the administrative practices and business foundation strategies, MUFG aims to streamline Group-wide operations and create administration practices that are appropriate for a global systemically important financial

Table of Contents

institution with maintaining a strong capital base as the first priority. This is expected to enable us continue to operate a business model that evolves and transforms on a Group-wide and global basis while taking steps to respond to the higher expectations of outside stakeholders.

Retail Banking Business Group

The Retail Banking Business Group covers all retail businesses, including commercial banking, trust banking and securities businesses, and offers a full range of banking products and services, including financial consulting services, to retail customers in Japan. This business group integrates the retail businesses of BTMU, MUTB, MUMSS and other affiliate companies of MUFG. We offer a full range of bank deposit products, including a non-interest-bearing deposit account that is redeemable on demand and intended primarily for payment and settlement functions. We also offer a variety of asset management and asset administration services, and trust products and other investment products, as well as other products and services described below.

Business Environment and Management Strategy

In Japan, the trends of decreasing birthrate and aging population continue to accelerate. We are also seeing increasing polarization of income and assets while the spread of information and communications technology is bringing further diversification of settlement methods. In this environment, we see MUFG contributing to sustained economic growth in Japan in two ways (1) by promoting a shift to investments from savings through our asset management business, and promoting the circulation of funds in the economy; and (2) by revitalizing personal consumption through our settlement and consumer finance businesses. We aim to become the top financial group in the retail business segment, chosen by a wide variety of customers with our business spanning the generations.

Service Improvement Project

BTMU has launched a project titled *Do Smart* with an aim to improve the quality of services for individual customers. In order to contribute to the lifelong wellbeing of customers and their families, this project focuses on enhancing online banking services with smartphones and other devices, and providing customized consulting to satisfy their needs.

Responding to Investment Needs

We aim to ensure that customers can adequately inform themselves of investment opportunities by providing various mediums such as appointments with representatives, seminars at branches with investment experts as lecturers, and investment consultation sessions on weekends and national holidays, and during evening hours. We have also been expanding our product lines, adding services such as investment trusts and foreign currency deposits, in order to be better able to respond to customers' various investment needs. In addition, we have been working proactively to promote the Japanese individual savings account system, generally referred to as the Nippon Individual Savings Account, or NISA, program, which offers tax exemptions on capital gains and dividend income for investments up to ¥1.2 million a year for a maximum of five years. Moreover, in January 2016, we launched a similar tax exemption program for customers who are under the age of 20 called the Junior NISA program. This program is intended to allow parents and grandparents to open and transfer their financial assets to savings accounts for the benefit of their children or grandchildren, through which investments may be made for up to ¥0.8 million a year for a maximum of five years. As of March 31, 2016, we had approximately 909,719 NISA and Junior NISA accounts.

We have focused on strengthening collaboration among group companies. For example, foreign bonds made available by MUMSS and other group securities companies are also available at BTMU and MUTB. Also, BTMU provides Retail Money Desk services at 64 branches across Japan, where investment experts seconded from MUMSS respond to customers' sophisticated investment needs. We have implemented methods that are designed to better communicate information regarding product and service options to customers. The use of tablet computers enables BTMU's sales representatives to propose products and services that match individual

Table of Contents

customers' needs by showing them the latest market information, detailed information on major products and services, and asset management and life-plan simulations. All MUTB branches now offer Private Account, an asset management account service through which each customer can consult with his or her portfolio manager in person to manage investments according to a personalized plan.

Responding to Insurance Needs

BTMU acts as a sales channel for a variety of insurance products, including annuity insurance, single premium whole life insurance, flat-rate premium whole life insurance, medical insurance, cancer insurance and nursing-care insurance. Insurance-sales specialists (insurance planners) and staff members who have taken insurance-sales and other relevant training take care of customers' various insurance needs. Individual annuity insurance, whole life insurance and medical insurance plans are available at all MUTB branches. Continued efforts will be made to further reinforce product lines and sales framework.

Responding to Needs Relating to Inheritance, Gift and Real Estate

MUTB offers a number of services including a testamentary trust service called *Ishindenshin* which helps customers prepare, maintain and execute wills, an inheritance planning service called *Shisan Shokei Planning* which helps customers manage and analyze financial assets and real estate properties comprehensively, and an inheritance procedure support service called *Wakachi Ai* which helps customers navigate the necessary procedures upon inheritance. BTMU and MUMSS also offer inheritance-related products and services, serving as sales agents of MUTB. MUTB's asset management service called *Zutto Anshin Shintaku*, which helps customers and their families protect their funds and allows them to receive funds according to their chosen plan, received the Nikkei Veritas Award in the Nikkei Excellent Products & Services Awards for 2012. In April 2013, an educational fund gift trust product called *Magoyorokobu* was launched. BTMU also sells this product as a sales agent of MUTB. In June 2014, MUTB launched a new trust product called *Okuru shiawase*, a life-time gift trust product with services to assist customers with the execution of the gift. In April 2015, MUTB also began offering a new wedding and child-rearing support trust, a gift trust product through which customers can provide their children, grandchildren and others with support in the form of funds for their financial needs in connection with marriage and child-rearing. MUTB and Mitsubishi UFJ Real Estate Services offer real estate brokerage services for both investment and business properties and residential properties, responding to customers' various real-estate-related needs.

Responding to Loan Needs

Under the Bank of Japan's negative interest rate policy, decreasing market interest rates has resulted in stronger demand for housing loans in Japan, which provides a business opportunity for us. With respect to housing loans, BTMU offers Loans with Supplemental Health Insurance for Seven Major Illnesses through a third party insurance company to help with loan payments in case of unexpected major illnesses such as cancer or heart attacks, a group credit life insurance plan which is mandatory for housing loans, with reduced qualification requirements (*Wide Danshin*) and a preferred interest rate plan (*Gunto Ureshii Housing Loan*). MUTB also offers housing loan plans incorporating *Wide Danshin* and other plans to respond to customers' needs. BTMU also offers Card Loans and Purpose-Specific Term Loans, depending on customers' needs. A card loan service called BANQUIC offers access to cash as quickly as in 40 minutes after the submission of an application through a video teller machine. Also, online applications are accepted 24 hours a day, 365 days a year, and the underwriting process can be completed as quickly as in 30 minutes. Applications are also accepted over the phone. Net DE Loan is a purpose-specific term loan, which BTMU-account-holder customers can, in most circumstances, apply for without visiting a bank branch. This loan can be used to pay for education, motor vehicle purchases and other purposes.

Responding to Internet Banking Needs

BTMU and MUTB offer Internet banking services called Mitsubishi Tokyo UFJ Direct and Mitsubishi UFJ Trust Direct, respectively, which allow customers to, among other things, transfer money, check their

Table of Contents

balance, make time deposits, make investments, apply for housing loans, and consult specialists regarding investments. In 2013, transaction screens of Mitsubishi Tokyo UFJ Direct were renewed, making the service even more user-friendly. The number of users has grown to approximately 16 million as of March 31, 2016. As a countermeasure to increasing online fraud and other crimes, in March 2015, BTMU started to distribute key cards through which customers can obtain a one-time temporary pass code to access their online banking accounts.

Jibun Bank Corporation was founded by BTMU in collaboration with KDDI Corporation in June 2008. The convenience that Jibun Bank offers by allowing users to execute transactions at any time on their cellphones has attracted customers in a wide age group. In addition to enabling users to check their balance and transfer money, Jibun Bank offers other products and services such as yen-denominated time deposits, foreign currency deposits, and, since June 2013, Jibun Bank FX (over-the-counter foreign exchange margin trading). As of March 31, 2016, Jibun Bank had approximately 2.1 million retail customer accounts with a total balance of deposits of ¥746 billion.

Payment Business

Mitsubishi UFJ NICOS offers a variety of credit cards, including MUFG Card (Gold Card), a credit card with an annual fee starting at as low as ¥2,000. With five international credit card brands (JCB, Visa, Master Card®, American Express® and China UnionPay) available, MUFG Card is designed to meet customers' various needs. BTMU's Mitsubishi Tokyo UFJ VISA offers various reward programs, such as cash-back in exchange for earned points. To accommodate the diverse needs of consumers, Mitsubishi Tokyo UFJ VISA Debit card was launched in November 2013. The number of debit cards issued was approximately 814,000 as of March 31, 2016.

Development of Branch and ATM Networks

We have an extensive network of branches in the greater Tokyo, Nagoya and Osaka areas. BTMU and MUTB have a nationwide ATM network, making use of convenience store ATMs and partnerships with other banks in addition to BTMU's and MUTB's own ATMs. In an effort to improve access to its ATMs, BTMU increased its ATM locations and extended operating hours and transaction-fee-free hours in 2013. At the same time, BTMU introduced a revised fee schedule for using partner banks' ATMs and transferring money using ATMs.

Finance Facilitation

We believe that finance facilitation for customers is one of our most important social responsibilities and strive to exemplify that standard. Although the Act Concerning Temporary Measures to Facilitate Financing for Small and Medium-sized Firms and Others has expired in Japan, our basic policy has not changed. We seek to offer consultation and otherwise deal attentively with small and medium-sized enterprise customers who wish to modify terms and conditions for repayment.

Strengthening the Compliance Framework

We have been making efforts to strengthen our frameworks for customer protection and legal compliance. BTMU has 260 compliance specialists stationed at its branches across the country. As for MUTB, branches are given guidance by compliance officers based in the Head

Office. We intend to continue to strictly monitor the legal compliance associated with selling financial products and services.

Corporate Banking Business Group

The Corporate Banking Business Group covers domestic corporate businesses, including commercial banking, investment banking, trust banking and securities businesses, as well as businesses outside of Japan assisting mainly Japanese companies in executing and expanding their operations. Through the integration of

Table of Contents

these business lines, diverse financial products and services are provided mainly to our Japanese corporate customers, from large corporations to small and medium-sized enterprises. The business group has clarified strategic domains, sales channels and methods to match the different growth stages and financial needs of our corporate customers.

Responding to Large Corporation's Needs

We offer large Japanese corporations advanced financial solutions such as derivatives, securitization, syndicated loans and structured finance. Faced with the diversified and globalized needs of our customers, we also provide sophisticated solutions and strategic proposals through collaboration between MUFG group companies and BTMU overseas offices.

Responding to Small and Medium-sized Enterprise's Needs

We provide various financial solutions, such as loans and fund management, remittance and foreign exchange services, to meet the requirements of small and medium-sized enterprise customers. We also help our customers develop business strategies, such as overseas expansions, inheritance-related business transfers and stock listings.

Transaction Banking

We support customers' capital management by focusing on their cash management systems among affiliated group companies and trade finance, while taking advantage of our global network. Our sophisticated services and commitment to quality have helped customers enhance their global manufacturing and sales networks.

Investment Banking

A large part of our investment banking business in Japan is provided by MUMSS which was formed in May 2010 through the integration of the domestic wholesale and retail securities business previously conducted by MUS and the investment banking business conducted by Morgan Stanley Japan. See "Global Strategic Alliance with Morgan Stanley" below.

Trust Banking

MUTB's experience and know-how in corporate real estate strategy consulting, real estate brokerage and appraisal services, shareholder registry management services, shareholder and investor relations consulting, and executive and employee incentive plan services also enable us to offer services tailored to the financial strategies of each client, including securitization of real estate, receivables and other assets.

Focusing on infrastructure development

We have been focusing on financing deals in the area of infrastructure development, such as electric power, renewable energy and railroads, by leveraging our experience, know-how and global network, and have built an extensive track record as a leading global project finance bank. We are determined to contribute further to the overseas business development and business opportunities enhancement of Japanese corporations by providing financial support, including leasing, to enable them to respond to the anticipated expansion and diversification of social infrastructure projects. See Item 5. Operating and Financial Review and Prospects Recent Developments.

Trust Assets Business Group

The Trust Assets Business Group covers asset management and administration services for products such as pension trusts and security trusts by integrating the trust banking expertise of MUTB and the international

Table of Contents

strengths of BTMU. The business group provides a full range of services to corporate and pension funds, including stable and secure pension fund management and administration, advice on pension schemes, and payment of benefits to scheme members.

Our Trust Assets Business Group combines MUTB's trust assets business, comprising trust assets management services, asset administration and custodial services, and the businesses of Mitsubishi UFJ Investor Services & Banking (Luxembourg) S.A., or MIBL, which was renamed from Mitsubishi UFJ Global Custody S.A. on May 1, 2016, Mitsubishi UFJ Fund Services Holdings Limited, or MFS, and Mitsubishi UFJ Kokusai Asset Management Co., Ltd., which was formed on July 1, 2015 through the merger between two of our asset management subsidiaries in Japan, Mitsubishi UFJ Asset Management Co., Ltd. and KOKUSAI Asset Management Co., Ltd.

Under the brand of MUFG Investor Services, MUTB, MIBL and MFS provide a full suite of global asset administration services, including fund administration, custody, securities lending and foreign exchange as a one-stop shop. In December 2015, MFS acquired UBS Asset Management's Alternative Fund Services business. Through this transaction, we aim to enhance our competitiveness and scale of operations in the global fund administration market, which is expected to grow significantly amid the global trend of tightening financial regulations. In April 2016, MUTB acquired Capital Analytics II LLC, Neuberger Berman Group LLC's fund management company, and renamed it MUFG Capital Analytics LLC. Through this transaction, we aim to establish a fund administration business function for private equity funds in the United States, which are expected to grow rapidly.

Mitsubishi UFJ Kokusai Asset Management provides investment trust products mainly to individual customers and corporate clients in Japan.

With an aim to further enhance its business, MUTB has entered into strategic alliances with overseas asset management companies, including Aberdeen Asset Management PLC, a U.K. asset manager, and AMP Capital Holdings Limited, an Australian asset manager.

Global Business Group

The Global Business Group is charged with the responsibility of effectively coordinating and enhancing our group-wide efforts to strengthen and expand our businesses outside Japan. The Global Business Group is designed to bring together the leadership in, and enhance the coordination for, our business strategies outside Japan on a group-wide basis.

Global business development has been an important pillar of our growth strategy. Aiming to further raise our presence in the global financial market, we have shifted our approach from one where each of our group companies individually promoted its global business to a more group-wide approach. The new approach is designed to enable us to exercise our comprehensive expertise to provide our customers with value-added solutions and services more effectively.

Global financial regulations have become increasingly stringent in major financial markets, including the United States and Europe. In addition, the economic growth in developing markets, which have increased in importance for our global business, has recently weakened due to China's economic slowdown and declining prices of natural resources. As a result, the business environment surrounding the international financial industry is becoming more complex. Furthermore, customers' financing needs are becoming more diverse and sophisticated as their activities have become more globalized.

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

Amidst this dynamic environment, the Global Business Group covers our businesses outside Japan, including corporate and commercial banking services such as loans, deposits and cash management, retail banking, trust assets, and securities businesses (with the retail banking and trust assets businesses being

Table of Contents

conducted through MUB in the United States and Krungsri in Thailand). Through a global network of more than 1,150 offices outside of Japan, we provide customers with financial products and services that meet their increasingly diverse and sophisticated financing needs.

CIB (Corporate and Investment Banking)

Our global CIB business primarily serves large corporations, financial institutions, and sovereign and multinational organizations with a comprehensive set of solutions for their financing needs. Through our global network of offices and branches, we provide a full range of services, such as project finance, export credit agency, finance, and financing through asset-backed commercial papers. We also provide investment banking services such as debt/equity issuance and M&A advisory services to help our customers develop their financial strategies and realize their goals. In order to meet customers' various financing needs, we have established a customer-oriented coverage model through which we coordinate our product experts who offer innovative financing services globally. We are one of the world's top providers of project finance, one of the core businesses of CIB. We provide professional services in arranging limited-recourse finance and offering financial advice in various sectors, including natural resources, power, and infrastructure, backed by our experience, expertise, knowledge, and global network.

Transaction Banking

We have Transaction Banking offices in eight locations around the globe through which we provide commercial banking products and services primarily for large corporations and financial institutions in managing and processing domestic and cross-border payments, mitigating risks in international trade, and providing working capital optimization. We have established the Transaction Banking Group within BTMU, which oversees its entire transaction banking operations globally, in order to enhance governance, management and quality of services in these operations. Under the Transaction Banking Group, a team of approximately 2,000 officers provides customers with support for their domestic, regional and global trade finance and cash management programs through our extensive global network.

MUFG Union Bank, N.A. (MUB)

MUB is the primary subsidiary of MUAH, which is a wholly owned subsidiary of BTMU and is a bank holding company in the United States. Effective July 1, 2014, BTMU's operations in the Americas region were integrated with MUAH's operations. MUAH oversees BTMU's operations in the Americas region and MUB is the primary operating entity of BTMU in the United States. MUB is a leading regional bank in California, ranked by the Federal Deposit Insurance Corporation, or FDIC, as the 18th largest bank in the United States in terms of total deposits as of June 2015. MUB provides a wide range of financial services to consumers, small businesses, middle-market companies and major corporations, primarily in California, Oregon, Washington, and Texas as well as nationally and internationally.

In April 2015, Stephen E. Cummings, a former UBS executive, was appointed President & CEO of MUB and Managing Executive Officer of BTMU with authority over all of BTMU's U.S. businesses. Mr. Cummings is the first non-Japanese CEO of our operations in the United States, where we aim to expand our business and strengthen our governance. Following the appointment of the new CEO, Donna Dellosso joined as CRO for the Americas and Christopher Perretta joined as CIOO for the Americas. As a result, 13 of the 15 policy-making officers of MUB are locally hired in the United States.

In October 2015, MUB reorganized its former commercial banking business into the following three groups: Regional Banking, U.S. Wholesale Banking, and Investment Banking & Markets. The new organization structure is designed to operate more efficiently and with higher

productivity.

Table of Contents

Effective July 1, 2016, MUAH was designated as MUFG's U.S. intermediate holding company, or IHC, to comply with the FRB's enhanced prudential standards. As of that date, BTMU, MUTB and MUSHD transferred to MUAH their ownership interests in their U.S. subsidiaries and affiliates, namely, BTMU Capital Corporation, BTMU Securities, Inc., MUFG Americas Capital Company, Morgan Stanley MUFG Loan Partners, LLC, MUFG Fund Services (USA) LLC, and MUFG Securities Americas Inc.

See Item 3.D. Key Information Risk Factors Risks Related to Our Business Any adverse changes in the business of MUFG Americas Holdings Corporation, an indirect wholly-owned subsidiary in the United States, could significantly affect our results of operations.

Bank of Ayudhya Public Company Limited (Krungsri)

Krungsri is a major subsidiary of BTMU in Thailand. Krungsri provides a comprehensive range of banking, consumer finance, investment, asset management, and other financial products and services to individual consumers, small and medium-sized enterprises, and large corporations mainly in Thailand. In addition, Krungsri's consolidated subsidiaries include a major credit card issuer in Thailand as well as a major automobile financing service provider, an asset management company, and a microfinance service provider in Thailand.

In January 2015, BTMU integrated its Bangkok Branch with Krungsri to comply with the Thai regulatory requirement generally referred to as the "one presence" policy, which limits financial conglomerates to a single licensed deposit taking entity in Thailand. As of March 31, 2016, BTMU holds a 76.88% ownership interest in Krungsri. By combining Krungsri's local franchise with competitive presence in the retail and SME banking markets in Thailand with BTMU's global financial expertise, we seek to offer a wider range of high-value financial services to a more diverse and larger customer base.

In January 2016, MUFG announced that Krungsri had agreed with the shareholders of Hattha Kaksekar Limited, or HKL, a financial institution in Cambodia, to acquire all of the outstanding shares of HKL. This acquisition is expected to enable MUFG and BTMU to tap into the growth of the Cambodian market by leveraging the knowhow of Ngerm Tid Lor Co., Ltd., a subsidiary of Krungsri engaged in microfinance in Thailand, with an aim to promote and develop the microfinance business.

See Item 5. Operating and Financial Review and Prospects Recent Developments and Item 3.D. Key Information Risk Factors Risks Related to Our Business Any adverse changes in the business of Bank of Ayudhya, an indirect subsidiary in Thailand, could significantly affect our results of operations.

Activities in Asia

We have been expanding our operations in Asia in an effort to further develop our businesses abroad. We have opened four overseas branches and one overseas representative office since January 2015, namely, Yangon branch in Myanmar, Colombo representative office in Sri Lanka, Kowloon branch in Hong Kong, BTMU (China) Fuzhou branch, and Kaohsiung branch in Taiwan.

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

In addition, in April 2016, BTMU acquired a 20.0% equity interest, on a fully diluted basis, in Security Bank Corporation, a leading commercial bank in the Philippines, as part of BTMU's capital and business alliance with Security Bank.

See Item 5. Operating and Financial Review and Prospects Recent Developments and Item 3.D. Key Information Risk Factors Risks Related to Our Business Our strategy to expand the range of our financial products and services and the geographic scope of our business globally may fail if we are unable to anticipate or manage new or expanded risks that entail such expansion.

Global Markets Business Group

The Global Markets Business Group covers the businesses specialized in financial markets products such as sales and trading, asset and liability management, and strategic investments globally on a group-wide basis.

Table of Contents

The establishment of the Global Markets Business Group in July 2012 resulted in the expansion of the coordination between the Global Business Group and the Global Markets Business Group at BTMU and the collaboration between the two Groups and MUSHD's foreign subsidiaries on some of those subsidiaries' sales and trading businesses. Through this collaboration, we sought to strengthen the cooperation between BTMU and MUSHD of their markets businesses and to expand our client base while improving our trading capabilities to seize interest rate and foreign exchange market opportunities for loans and corporate bond transactions. In April 2014, MUTB began to participate in the Global Markets Business Group in an effort to more fully enhance our group-wide capabilities.

Sales and Trading

We provide financing, hedging, and investing solutions to our retail, corporate, institutional, and governmental clients, through foreign exchange, bonds, equities, derivatives, and money market products. We are actively developing innovative financial products and services to offer and provide through our global network, which is designed to promptly meet diverse customer requirements.

Asset and Liability Management

We manage our interest and liquidity risks residing in our balance sheets through, among other things, transactions designed to manage profit and loss impact attributable to interest rate movements based on our balance sheet forecasts, while aiming to maximize our profit at the same time primarily by investing in highly liquid government bonds such as Japanese government bonds and U.S. treasury bonds and also by utilizing other financial products such as interest rate swaps and cross currency swaps.

Strategic Investments

We seek to enhance our profitability and diversify our portfolios by investing in financial products such as corporate bonds and funds.

Global Strategic Alliance with Morgan Stanley

As of March 31, 2016, we held approximately 432 million shares of Morgan Stanley's common stock representing approximately 22.3 % of the voting rights in Morgan Stanley and Series C Preferred Stock with a face value of approximately \$ 521.4 million and 10% dividend. As of the same date, we had two representatives appointed to Morgan Stanley's board of directors. We adopted the equity method of accounting for our investment in Morgan Stanley beginning with the fiscal year ended March 31, 2012.

In conjunction with Morgan Stanley, we formed two securities joint venture companies in May 2010 to integrate our respective Japanese securities companies. We converted the wholesale and retail securities businesses conducted in Japan by MUS into MUMSS. Morgan Stanley contributed the investment banking operations conducted in Japan by its former wholly-owned subsidiary, Morgan Stanley Japan, to MUMSS, and converted the sales and trading and capital markets businesses conducted in Japan by Morgan Stanley Japan into an entity called Morgan Stanley MUFG Securities, Co., Ltd., or MSMS. We hold a 60% economic interest in MUMSS and MSMS, and Morgan Stanley holds a 40% economic interest in MUMSS and MSMS. We hold a 60% voting interest and Morgan Stanley holds a 40% voting interest in MUMSS, and we

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

hold a 49% voting interest and Morgan Stanley holds a 51% voting interest in MSMS. Morgan Stanley's and our economic and voting interests in the securities joint venture companies are held through intermediate holding companies. We have retained control of MUMSS and we account for our interest in MSMS under the equity method due to our significant influence over MSMS. The board of directors of MUMSS has fifteen members, nine of whom are designated by us and six of whom are designated by Morgan Stanley. The board of directors of MSMS has ten members, six of whom are designated by Morgan Stanley and four of whom are designated by us. The CEO of MUMSS is designated by us and the CEO of MSMS is designated by Morgan Stanley.

Table of Contents

We have also expanded the scope of our global strategic alliance with Morgan Stanley into other geographies and businesses, including (1) a loan marketing joint venture that provides clients in the United States with access to the world-class lending and capital markets services from both companies, (2) business referral arrangements in Asia, Europe, the Middle East and Africa, covering capital markets, loans, fixed income sales and other businesses, (3) global commodities referral arrangements whereby BTMU and its affiliates refer clients in need of commodities-related hedging solutions to certain affiliates of Morgan Stanley, and (4) an employee secondment program to share best practices and expertise in a wide range of business areas.

Mitsubishi UFJ Morgan Stanley PB Securities Co., Ltd., in which MUMSS holds 75%, and BTMU holds the remaining 25%, of the voting rights, has an agreement with Morgan Stanley. Mitsubishi UFJ Morgan Stanley PB Securities leverages MUFG's broad customer base, utilizes Morgan Stanley's global and high quality insight, and further its collaborations with other group companies by strengthening its coordination with MUMSS. It aims for further development of its wealth management business, which is one of the largest in Japan.

See Item 3.D. Key Information Risk Factors Risks Related to Our Business If our strategic alliance with Morgan Stanley fails, we could suffer financial or reputational loss.

Competition

We face strong competition in all of our principal areas of operation. The structural reforms in financial industry regulations and recent developments in financial markets have resulted in some significant changes in the Japanese financial system and prompted banks to merge or reorganize their operations, thus changing the nature of competition from other financial institutions as well as from other types of businesses.

Japan

Since their formation in 2000 and 2001, the so-called Japanese mega bank groups, including us, the Mizuho Financial Group and the Sumitomo Mitsui Financial Group, have continued to expand their businesses and take measures designed to enhance their financial group capabilities. For example, in July 2013, Mizuho Bank, Ltd. and Mizuho Corporate Bank, Ltd. merged, and the merged entity presently operates under the corporate name of Mizuho Bank, Ltd. In November 2015, SMBC Trust Bank, Ltd., a subsidiary of Sumitomo Mitsui Financial Group, acquired the retail banking business of Citibank Japan, Ltd.

Heightened competition among the mega bank groups is currently expected in various financial sectors as they have recently announced plans to expand, or have expanded, their respective businesses. For example, in the securities sector, in May 2010, in conjunction with Morgan Stanley, we created two securities joint venture companies in Japan, MUMSS and MSMS, by integrating the operations of MUS and Morgan Stanley Japan. In January 2013, Mizuho Securities and Mizuho Investors Securities Co., Ltd. merged. For a discussion of the two securities joint venture companies created by us and Morgan Stanley, see B. Business Overview Global Strategic Alliance with Morgan Stanley.

In the retail business sector, customers often have needs for a broad range of financial products and services, such as investment trusts and insurance products. Recently, competition has increased due to the development of new products and distribution channels. For example, Japanese banks compete with one another by developing innovative proprietary computer technologies that allow them to deliver basic banking services in a more efficient manner and to create sophisticated new products in response to customer demand. Competition has also increased since the introduction in January 2014 of the Japanese individual savings account system, generally referred to as the NISA program, which

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

currently offers tax exemptions on capital gains and dividend income for investments up to ¥1.2 million a year for a maximum of five years. In addition, in December 2015, Sumitomo Mitsui Trust Bank, Ltd. acquired Citi Cards Japan, Inc., which previously operated the credit card business of Citigroup Inc. in Japan.

Table of Contents

In the private banking sector, competition among the mega bank groups has intensified as a result of recent corporate actions designed to strengthen their operations. We made Mitsubishi UFJ Merrill Lynch PB Securities Co., Ltd. a wholly owned subsidiary in December 2012 to enhance our private banking services for high net-worth customers, and changed its name to Mitsubishi UFJ Morgan Stanley PB Securities, Ltd. in March 2014. In October 2013, Sumitomo Mitsui Banking Corporation acquired the former Société Générale Private Banking Japan, Ltd. from Société Générale S.A. and changed its name to SMBC Trust Bank, Ltd.

In the consumer finance sector, recent regulatory reforms and legal developments have negatively impacted the business environment, resulting in failures of several consumer finance companies and intensified competition among consumer finance companies that have remained in business, particularly among those affiliated with the mega banks. In April 2012, Promise Co., Ltd. became a wholly owned subsidiary of the Sumitomo Mitsui Financial Group, and changed its name as SMBC Consumer Finance Co., Ltd. in July 2012. See Item 3.D. Key Information Risk Factors Risks Related to Our Business Because of our loans to consumers and our shareholdings in companies engaged in consumer lending, changes in the business or regulatory environment for consumer finance companies in Japan may further adversely affect our financial results.

The trust assets business is an area that is becoming increasingly competitive because of regulatory changes in the industry that have expanded the products and services that can be offered since the mid-2000s. In addition, there is growing corporate demand for changes in the trust regulatory environment, such as reforms of the pension system and related accounting regulations under Japanese GAAP. Competition may increase in the future as changes are made to respond to such corporate demand and regulatory barriers to entry are lowered. Competition is also expected to intensify as a result of recent integrations and entrants in the industry. For example, in April 2011, Sumitomo Trust and Banking and Chuo Mitsui Trust Holdings, Inc. established Sumitomo Mitsui Trust Holdings, Inc., a holding company, to integrate their operations. In April 2012, Sumitomo Trust and Banking, The Chuo Mitsui Trust and Banking Company, Limited and Chuo Mitsui Asset Trust and Banking Company, Limited, the three trust bank subsidiaries of Sumitomo Mitsui Trust Holdings, merged, and the surviving entity was renamed Sumitomo Mitsui Trust Bank. In July 2015, two of our asset management subsidiaries in Japan, Mitsubishi UFJ Asset Management Co., Ltd. and KOKUSAI Asset Management Co., Ltd. merged, and the surviving entity presently operates under the corporate name of Mitsubishi UFJ Kokusai Asset Management Co., Ltd. In August 2015, JP Asset Management Co., Ltd. was established as a joint venture with the Japan Post Group, Sumitomo Mitsui Trust Bank and Nomura Holdings, Inc. holding 50%, 30% and 20% equity interests, respectively, in the joint venture. In March 2016, the Mizuho Financial Group announced plans to integrate on October 1, 2016, Mizuho Asset Management Co., Ltd., Shinko Asset Management Co., Ltd. and the asset management business of Mizuho Trust & Banking Co., Ltd., all of which are asset management subsidiaries of the Mizuho Financial Group in Japan, and DIAM Co., Ltd., which is an asset management joint venture between the Mizuho Financial Group and Dai-ichi Life Insurance Company in Japan.

In recent years, the Japanese government has identified several governmental financial institutions as candidates to privatize. In particular, in November 2015, shares of Japan Post Holdings Co., Ltd., Japan Post Bank Co., Ltd. and Japan Post Insurance Co., Ltd. were listed on the Tokyo Stock Exchange. In the initial public offering, approximately 11% of the shares in each of the Japan Post companies were sold. The Japanese government is expected to sell additional shares in Japan Post Holdings and cause Japan Post Holdings to sell additional shares in the Japan Post Bank and Japan Post Insurance in the future. Under the current postal privatization law, Japan Post Bank and Japan Post Insurance may enter into new business areas upon obtaining government approvals, and if Japan Post Holdings' equity holdings decrease to 50% or below, the two companies will be allowed to enter into new business areas upon submission of a notice to the government. In such case, the Japan Post Group companies may seek to enter into new financial businesses and increasingly compete with us. In addition, in April 2016, the limit on deposits that Japan Post Bank can accept from each depositor was raised from ¥10 million to ¥13 million pursuant to a revised government ordinance. Since Japan Post Bank is one of the world's largest holders of deposits, this change may increase Japan Post Bank's competitive position as banks

Table of Contents

rely on deposits as a cost-effective source of funding. See Item 3.D. Key Information Risk Factors Risks Related to Our Business Our business may be adversely affected by competitive pressures, which have partly increased due to regulatory changes and recent market changes in the financial industry domestically and globally and B. Business Overview The Japanese Financial System Government Financial Institutions.

The mega bank groups face significant competition with other financial groups as well as companies that have traditionally not been engaged in banking services. For example, the Nomura Group has been a major player in the securities market in Japan. In addition, various Japanese non-bank financial institutions and non-financial companies have entered into the Japanese banking sector. For example, Orix Corporation, a non-bank financial institution, as well as the Seven & i Holdings Co., Ltd., Sony Corporation and Aeon Co., Ltd., which were non-financial companies, offer various banking services, often through non-traditional distribution channels.

Foreign

In the United States, we face substantial competition in all aspects of our business. We face competition from other large U.S. and non-U.S. money-center banks, as well as from similar institutions that provide financial services. Through MUB, we currently compete principally with U.S. and non-U.S. money-center and regional banks, thrift institutions, asset management companies, investment advisory companies, consumer finance companies, credit unions and other financial institutions.

In other international markets, we face competition from commercial banks and similar financial institutions, particularly major international banks and the leading domestic banks in the local financial markets in which we conduct business. For example, Japanese mega banks, including us, and other major international banks have been expanding their operations in the Asian market, where leading local banks also have been growing and increasing their presence recently. Furthermore, we are aiming to expand our retail and small and medium-sized enterprise businesses along with our corporate banking business in South East Asia through our acquisition of Krungsri in Thailand, and compete with leading local banks in such businesses.

In addition, we may face further competition as a result of recent investments, mergers and other business tie-ups among global financial institutions.

The Japanese Financial System

Japanese financial institutions may be categorized into three types:

the central bank, namely the Bank of Japan;

private banking institutions; and

government financial institutions.

The Bank of Japan

The Bank of Japan's role is to maintain price stability and the stability of the financial system to ensure a solid foundation for sound economic development.

Private Banking Institutions

Private banking institutions in Japan are commonly classified into two categories (the following numbers are based on information published by the FSA available as of June 9, 2016:

ordinary banks (125 ordinary banks and 54 foreign commercial banks with ordinary banking operations); and

trust banks (16 trust banks, including two Japanese subsidiaries of foreign financial institutions).

Table of Contents

Ordinary banks in turn are classified as city banks, of which there are four, including BTMU, and regional banks, of which there are 106 and other banks, of which there are 15. In general, the operations of ordinary banks correspond to commercial banking operations in the United States. City banks and regional banks are distinguished based on head office location as well as the size and scope of their operations.

The city banks are generally considered to constitute the largest and most influential group of banks in Japan. Generally, these banks are based in large cities, such as Tokyo and Osaka, and operate nationally through networks of branch offices. The city banks provide a wide variety of banking and other financial products and services to large corporate customers, including the major industrial companies in Japan, as well as small and medium-sized companies and retail customers.

With some exceptions, the regional banks tend to be much smaller in terms of total assets than the city banks. Each of the regional banks is based in one of the Japanese prefectures and extends its operations into neighboring prefectures. Their customers are mostly regional enterprises and local public utilities. The regional banks also lend to large corporations. In line with the recent trend among financial institutions toward mergers or business tie-ups, various regional banks have announced or are currently negotiating or pursuing integration transactions.

Trust banks, including MUTB, provide various trust services relating to money trusts, pension trusts and investment trusts and offer other services relating to real estate, stock transfer agency and testamentary services as well as banking services.

In recent years, almost all of the city banks have consolidated with other city banks and in some cases, integrated with trust banks. Consolidation or integration among these banks was achieved, in most cases, through the use of a bank holding company.

In addition to ordinary banks and trust banks, other private financial institutions in Japan, including banks operated by non-financial companies, shinkin banks, or credit associations, and credit cooperatives, are engaged primarily in making loans to small businesses and individuals.

Government Financial Institutions

There are a number of government financial institutions in Japan, which are corporations wholly owned or majority-owned by the government and operate under the government's supervision. Their funds are provided mainly from government sources. Certain types of operations undertaken by these institutions have been or are planned to be assumed by, or integrated with the operations of, private corporations through privatizations and other measures.

Among them are the following:

The Development Bank of Japan, which was established for the purpose of contributing to the economic development of Japan by extending long-term loans, mainly to primary and secondary sector industries, and which was reorganized as a joint stock company in October 2008 as part of its ongoing privatization process, with the government being required by law to continue to hold 50% or more of the shares in the bank until the completion of certain specified investment operations, which the bank is required to endeavor to achieve by March 2026, and more than one-third for an unspecified period thereafter;

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

Japan Finance Corporation, which was formed in October 2008, through the merger of the international financial operations of the former Japan Bank for International Cooperation, National Life Finance Corporation, Agriculture, Forestry and Fisheries Finance Corporation, and Japan Finance Corporation for Small and Medium Enterprise, for the primary purposes of supplementing and encouraging the private financing of exports, imports, overseas investments and overseas economic cooperation, and supplementing private financing to the general public, small and medium-sized enterprises and those

Table of Contents

engaged in agriculture, forestry and fishery. In April 2012, Japan Finance Corporation spun off its international operations to create Japan Bank for International Cooperation as a separate government-owned entity;

Japan Housing Finance Agency, which was originally established in June 1950 as the Government Housing Loan Corporation for the purpose of providing housing loans to the general public, and which was reorganized as an incorporated administrative agency and started to specialize in securitization of housing loans in April 2007; and

The Japan Post Group companies, a group of joint stock companies including Japan Post Bank, which were formed in October 2007 as part of the Japanese government's privatization plan for the former Japan Post, a government-run public services corporation, which had been the Postal Service Agency until March 2003. In November 2015, approximately 11% of the outstanding shares of each of Japan Post Bank, Japan Post Insurance and Japan Post Holdings were sold to the public, and these companies are currently listed on the Tokyo Stock Exchange.

Supervision and Regulation

Japan

Supervision. The FSA is responsible for supervising and overseeing financial institutions, making policy for the overall Japanese financial system and conducting insolvency proceedings with respect to financial institutions. The Bank of Japan, as the central bank for financial institutions, also has supervisory authority over banks in Japan, based primarily on its contractual agreements and transactions with the banks.

The Banking Law. Among the various laws that regulate financial institutions, the Banking Law and its subordinated orders and ordinances are regarded as the fundamental law for ordinary banks and other private financial institutions. The Banking Law addresses capital adequacy, inspections and reporting to banks and bank holding companies, as well as the scope of business activities, disclosure, accounting, limitation on granting credit and standards for arm's length transactions for them. Bank holding companies, banks and other financial institutions are required to establish an appropriate system to better cope with conflicts of interest that may arise from their business operations.

Legislation has recently been passed by, or introduced to, the Diet to amend various financial regulation related laws, including the Banking Law, which includes certain deregulations on restrictions for shareholdings by banks. For example, although a bank is generally prohibited from holding more than 5% of the outstanding shares of another company (other than certain financial institutions) under the Banking Law, the bank may be exempt from such requirement and allowed to hold more than 5% of the outstanding shares of such company under amendments to the Banking Law that became effective in April 2014, if, among other exempted cases, a bank's shareholding contributes to revitalizing a company's business or the local economy related to such company. In May 2016, the Diet passed legislation to amend the Banking Law to allow banks and bank holding companies with the FSA's approval to hold controlling interests in certain financial technology companies. The amendments to the Banking Law will become effective as of a date to be specified in a cabinet order, which is expected to be prior to June 3, 2017.

Bank holding company regulations. A bank holding company is prohibited from carrying out any business other than the management of its subsidiaries and other incidental businesses. A bank holding company may have any of the following as a subsidiary: a bank, a securities company, an insurance company, a foreign subsidiary that is engaged in the banking, securities or insurance business and any company that is engaged in a finance-related business, such as a credit card company, a leasing company or an investment advisory company. Certain companies that are designated by a ministerial ordinance as those that cultivate new business fields may also become the subsidiaries of a bank holding company.

Table of Contents

In addition, under the amendments to the Banking Law passed by the Diet in May 2016, a bank holding company (i) will be required to perform certain specified functions as a bank holding company to ensure effective management of its subsidiaries and (ii) will be allowed to engage in certain specified common operations of its subsidiaries so as to improve the efficiency of the operations of its group companies.

Capital adequacy. The capital adequacy guidelines adopted by the FSA that are applicable to Japanese bank holding companies and banks with international operations closely follow the risk-weighted approach introduced by the Basel Committee on Banking Supervision of the Bank for International Settlements.

Basel II, as adopted by the FSA, has been applied to Japanese banks since March 31, 2007. Certain provisions of Basel III have been adopted by the FSA for Japanese banking institutions with international operations conducted through their foreign offices. Basel III is based on Basel II's comprehensive regulatory framework which is built on three pillars: (1) minimum capital requirements, (2) the self-regulation of financial institutions based on supervisory review process, and (3) market discipline through the disclosure of information.

The Group of Central Bank Governors and Heads of Supervision reached an agreement on the new global regulatory framework, which has been referred to as Basel III, in July and September 2010. In December 2010, the Basel Committee agreed on the details of the Basel III rules. The agreement on Basel III includes the following: (1) raising the quality of capital to ensure banks are able to better absorb losses both on a going concern basis and on a gone concern basis, (2) increasing the risk coverage of the capital framework, in particular for trading activities, securitizations, exposures to off-balance sheet vehicles and counterparty credit exposures arising from derivatives, (3) raising the level of minimum capital requirements, including an increase in the minimum common equity requirement from 2% to 4.5%, which was phased in between January 1, 2013 and the end of the calendar year 2014, and a capital conservation buffer of 2.5%, which is expected to be phased in between January 1, 2016 and the end of the calendar year 2018, bringing the total common equity requirement to 7%, (4) introducing an internationally harmonized leverage ratio to serve as a backstop to the risk-based capital measure and to contain the build-up of excessive leverage in the system, (5) raising standards for the supervisory review process (Pillar 2) and public disclosures (Pillar 3), together with additional guidance in the areas of valuation practices, stress testing, liquidity risk management, corporate governance and compensation, (6) introducing minimum global liquidity standards consisting of both a short term liquidity coverage ratio and a longer term structural net stable funding ratio, and (7) promoting the build-up of capital buffers that can be drawn down in periods of stress, including both a capital conservation buffer and a countercyclical buffer to protect the banking sector from periods of excess credit growth.

Under Basel III, Common Equity Tier 1, Tier 1 and total capital ratios are used to assess capital adequacy, which ratios are determined by dividing applicable capital components by risk-weighted assets. Total capital is defined as the sum of Tier 1 and Tier 2 capital.

Under Basel III, Tier 1 capital is defined to include Common Equity Tier 1 and Additional Tier 1 capital. Common Equity Tier 1 capital is a new category of capital primarily consisting of:

common stock,

capital surplus,

retained earnings, and

accumulated other comprehensive income (progressively phased into the capital ratio calculation over several years).

Regulatory adjustments including certain intangible fixed assets, such as goodwill, and defined benefit pension fund net assets (prepaid pension costs) will be deducted from Common Equity Tier 1 capital. The amount of adjustments to be deducted will increase progressively over time.

Table of Contents

Additional Tier 1 capital generally consists of Basel III compliant preferred securities and, during the transition period, other capital that meets Tier I requirements under the former Basel II standards, net of regulatory adjustments. Subject to transitional measures, adjustments are made to Additional Tier 1 capital for items including intangible fixed assets, such as goodwill, and foreign currency translation adjustments, with the amounts of such adjustments to Additional Tier 1 capital progressively decreasing over time.

Tier 2 capital generally consists of:

Basel III compliant subordinated obligations,

during the transition period, capital that meets Tier II requirements under the former Basel II standards,

allowances for credit losses, and

non-controlling interests in subsidiaries Tier 2 capital instruments.

Subject to transitional measures, certain items including 45% of unrealized profit on available-for-sale securities and revaluation of land are reflected in Tier 2 capital with the amounts progressively decreasing over time.

In order to qualify as Tier 1 or Tier 2 capital under Basel III, applicable instruments such as preferred shares and subordinated debt must have a clause in their terms and conditions that requires them to be written-off or forced to be converted into common stock upon the occurrence of certain trigger events.

Risk-weighted assets are the sum of risk-weighted assets compiled for credit risk purposes, quotient of dividing the amount equivalent to market risk by 8%, and quotient of dividing the amount equivalent to operational risk by 8%, and also include any amount to be added due to transitional measures as well as floor adjustments, if necessary. Risk-weighted assets include the capital charge of the credit valuation adjustment, or CVA, the credit risk related to asset value correlation multiplier for large financial institutions, the 250% risk-weighted threshold items not deducted from Common Equity Tier 1 capital, and certain Basel II capital deductions that were converted to risk-weighted assets under Basel III, such as securitizations and significant investments in commercial entities. Certain Basel III provisions were adopted by the FSA with transitional measures and became effective March 31, 2013.

The capital ratio standards applicable to us are as follows:

a minimum total capital ratio of 8.0%,

a minimum Tier 1 capital ratio of 6.0%, and

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

a minimum Common Equity Tier 1 capital ratio of 4.5%.

These minimum capital ratios are applicable to MUFG on a consolidated basis and to BTMU and MUTB on a consolidated as well as stand-alone basis.

We have been granted an approval by the FSA to exclude the majority of our investment in Morgan Stanley from being subject to double gearing adjustments. The approval was granted for a 10-year period, but the approval amount will be phased out by 20% each year starting from March 31, 2019. As of March 31, 2016, a full application of double gearing adjustments with respect to our investment in Morgan Stanley would have reduced our Common Equity Tier 1 capital ratio by approximately 0.7%.

The Financial Stability Board identified us as a global systemically important bank, or G-SIB, in its most recent annual report published in November 2015, and is expected to update the list of G-SIB annually. In December 2015, the FSA also designated us as a G-SIB as well as a domestic systemically important bank generally referred to as a D-SIB.

Effective March 31, 2016, the FSA's capital conservation buffer, countercyclical buffer and G-SIB surcharge requirements became applicable to Japanese banking institutions with international operations

Table of Contents

conducted through foreign offices. The requirements are currently being phased in and, as of March 31, 2016, we are required to maintain a capital conservation buffer of 0.625% and a G-SIB surcharge of 0.375% in addition to the 4.50% minimum Common Equity Tier 1 capital ratio. As of the same date, no countercyclical buffer is applicable to us. When fully implemented on March 31, 2019, we will be required to maintain a capital conservation buffer of 2.5%, a countercyclical buffer of up to 2.5%, and a G-SIB surcharge of 1.5%, assuming we will be in Bucket 2 of the G-SIB list.

For a discussion on our capital ratios, see Item 5.B. Operating and Financial Review and Prospects Liquidity and Capital Resources Capital Adequacy.

In determining capital ratios under the FSA guidelines reflecting Basel III, we and our banking subsidiaries used the Advanced Internal Ratings-Based approach, or the AIRB approach, to calculate capital requirements for credit risk as of March 31, 2016. The Standardized Approach is used for some subsidiaries that are considered to be immaterial to the overall MUFG capital requirements, and MUAH has adopted a phased rollout of the internal ratings-based approach. Market risk is reflected in the risk-weighted assets by applying the Internal Models Approach to calculate general market risk and the Standardized Measurement Method to calculate specific risk. Under the Internal Models Approach, we principally use a historical simulation model to calculate value-at-risk, or VaR, amounts by estimating the profit and loss on our portfolio by applying actual fluctuations in historical market rates and prices over a fixed period. Under the FSA guidelines reflecting Basel III, we reflect operational risk in the risk-weighted assets by using the Standardized Approach and the Advanced Measurement Approach. The Basel Committee on Banking Supervision has issued proposals to revise the current market risk framework, including stricter measures relating to some of our investment securities portfolio. For more information, see Item 11. Quantitative and Qualitative Disclosures about Credit, Market and Other Risk Operational Risk Management.

Prompt corrective action system. Under the prompt corrective action system, the FSA may take corrective action, if a bank or a bank holding company fails to meet the minimum capital adequacy ratio. These actions include requiring such bank or bank holding company to formulate and implement capital improvement measures, requiring it to reduce assets or take other specific actions, and issuing an order to suspend all or part of its business operations.

Prompt warning system. Under the prompt warning system, the FSA may take precautionary measures to maintain and promote the sound operations of financial institutions, even before those financial institutions become subject to prompt corrective actions. These measures require a financial institution to enhance profitability, credit risk management, stability and cash flows.

Deposit insurance system and government measures for troubled financial institutions. The Deposit Insurance Act is intended to protect depositors if a financial institution fails to meet its obligations. The Deposit Insurance Corporation was established in accordance with the Deposit Insurance Act.

City banks, including BTMU, regional banks, trust banks, including MUTB, and various other credit institutions participate in the deposit insurance system on a compulsory basis.

Under the Deposit Insurance Act, the maximum amount of protection is ¥10 million per customer within one bank. The ¥10 million maximum applies to all deposits except for non-interest bearing deposits, which are non-interest bearing deposits redeemable on demand and maintained by depositors primarily in settlement accounts for payment and settlement purposes. Deposits in settlement accounts are fully protected without a maximum amount limitation. Certain types of deposits are not covered by the deposit insurance system, such as foreign currency deposits and negotiable certificates of deposit. As of April 1, 2016, the Deposit Insurance Corporation charged an insurance premium equal to 0.054% per

year on the deposits in the settlement accounts, and a premium equal to 0.041% per year on the deposits in other accounts.

Under the Deposit Insurance Act, a Financial Reorganization Administrator can be appointed by the Prime Minister if a bank's liabilities exceed its obligations or has suspended, or is likely to suspend, repayment of deposits.

Table of Contents

The Financial Reorganization Administrator will take control of the assets of the troubled bank, dispose of the assets and search for another institution willing to take over the troubled bank's business. The troubled bank's business may also be transferred to a bridge bank established by the Deposit Insurance Corporation to enable the troubled bank's operations to be maintained and continue temporarily, and the bridge bank will seek to transfer the troubled bank's assets to another financial institution or dissolve the troubled bank. The Deposit Insurance Corporation protects deposits, as described above, either by providing financial aid for costs incurred by the financial institution succeeding the insolvent bank or by paying insurance money directly to depositors. The financial aid provided by the Deposit Insurance Corporation may take the form of a monetary grant, loan or deposit of funds, purchase of assets, guarantee or assumption of debt, subscription for preferred stock, or loss sharing.

The Deposit Insurance Act also provides for exceptional measures to cope with systemic risk in the financial industry. Where the Prime Minister recognizes that the failure of a bank which falls into any of (i) through (iii) below may cause an extremely grave problem to the maintenance of the financial order in Japan or the region where the bank is operating, or systemic risk, if none of the measures described in (i) through (iii) below is implemented, the Prime Minister may, following deliberation by the Financial Crisis Response Council, confirm (*nintei*) the need to take any of the following measures: (i) if the bank does not fall into either of the categories described in (ii) or (iii) below, the Deposit Insurance Corporation may subscribe for shares or subordinated bonds of, or extend subordinated loans to the bank, or subscribe for shares of the bank holding company of the bank, in order to enhance the bank's regulatory capital (Item 1 measures (*dai ichigo sochi*)); (ii) if the bank has suspended, or is likely to suspend, repayment of deposits, or its liabilities exceed its assets, financial aid exceeding the pay-off cost may be made available to the bank (Item 2 measures (*dai nigo sochi*)); and (iii) if the bank has suspended, or is likely to suspend, repayment of deposits, and its liabilities exceed its assets, and the systemic risk cannot be avoided by the measures mentioned in (ii) above, the Deposit Insurance Corporation may acquire all of the bank's shares (Item 3 measures (*dai sango sochi*)). The expenses for the implementation of the above measures will be borne by the banking industry, with an exception under which the Japanese government may provide partial subsidies for such expenses.

Under the new orderly resolution regime established by amendments to the Deposit Insurance Act that were promulgated in June 2013 and became effective on March 6, 2014, financial institutions, including banks, insurance companies and securities companies and their holding companies, are subject to the regime. Further, where the Prime Minister recognizes that the failure of a financial institution which falls into either of (a) or (b) below may cause a significant disruption to the Japanese financial market or system in Japan if measures described in (a) or measures described in (b) are not taken, the Prime Minister may, following deliberation by the Financial Response Crisis Council, confirm (*nintei*) that any of the following measures need to be applied to the financial institution:

- (a) if the financial institution is not a financial institution whose liabilities exceed its assets, the financial institution shall be placed under the special supervision by the Deposit Insurance Corporation over the financial institution's business operations and management and the disposal of the financial institution's assets, and the Deposit Insurance Corporation may provide the financial institution with loans or guarantees necessary to avoid the risk of significant disruption to the financial system in Japan, or subscribe for shares or subordinated bonds of, or extend subordinated loans to, the financial institution, taking into consideration the financial condition of the financial institution (Specified Item 1 measures (*tokutei dai ichigo sochi*) under Article 126-2, Paragraph 1, Item 1 of the Deposit Insurance Act); or
- (b) if the financial institution is a financial institution whose liabilities exceed, or are likely to exceed, its assets or which has suspended, or is likely to suspend, payments on its obligations, the financial institution shall be placed under the special supervision by the Deposit Insurance Corporation over the financial institution's business operations and management and the disposal of the financial institution's assets, and the Deposit Insurance Corporation may provide financial aid necessary to assist a merger, business transfer, corporate split or other reorganization activities for the failed financial institution (Specified Item 2 measures (*tokutei dai nigo sochi*) under Article 126-2, Paragraph 1, Item 2 of the Deposit Insurance Act).

Table of Contents

If the Prime Minister confirms that any of the measures set out in (b) above needs to be applied to a failed financial institution, the Prime Minister may order that the failed financial institution's business operations and management and the disposal of the failed financial institution's assets be placed under the special control of the Deposit Insurance Corporation. The business or liabilities of the financial institution subject to the special supervision or the special control of the Deposit Insurance Corporation as set forth above may also be transferred to a bridge financial institution established by the Deposit Insurance Corporation to enable the financial institution's operations to be maintained and continue temporarily, or the financial institution's liabilities to be repaid, and the bridge financial institution will seek to transfer the financial institution's business or liabilities to another financial institution or dissolve the financial institution. The financial aid provided by the Deposit Insurance Corporation to assist a merger, business transfer, corporate split or other reorganization in respect of the failed financial institution set out in (b) above may take the form of a monetary grant, loan or deposit of funds, purchase of assets, guarantee or assumption of debts, subscription for preferred stock or subordinated bonds, subordinated loan, or loss sharing. If the Deposit Insurance Corporation has provided such financial assistance, the Prime Minister may designate the movable assets and claims of the failed financial institution as not subject to attachment under Article 126-16 of the Deposit Insurance Act, and such merger, business transfer, corporate split or other reorganization may be conducted outside of the court-administrated insolvency proceedings. If the financial institution subject to the special supervision or the special control by the Deposit Insurance Corporation as set forth above has liabilities that exceed, or are likely to exceed, its assets, or has suspended, or is likely to suspend, payments on its obligations, the financial institution may transfer all or a material portion of its business or all or a material portion of shares of its subsidiaries or implement corporate split or certain other corporate actions with court permission in lieu of any shareholder resolutions under Article 126-13 of the Deposit Insurance Act. In addition, the Deposit Insurance Corporation must request other financial institution creditors of the failed financial institution to refrain from exercising their rights against the failed financial institution until measures necessary to avoid the risk of significant disruption to the financial system in Japan have been taken, if it is recognized that exercising of their rights is likely to make the orderly resolution of the failed financial institution difficult.

The expenses for implementation of the measures under this regime will be borne by the financial industry, with an exception under which the Japanese government may provide partial subsidies for such expenses within the limit to be specified in the government budget in cases where it is likely to cause extremely serious hindrance to the maintenance of the credit system in Japan or significant turmoil in the Japanese financial market or system if such expenses are to be borne only by the financial industry.

According to the announcement made by the FSA in March 2014, (i) Additional Tier 1 instruments and Tier 2 instruments under Basel III issued by a bank must be written down or converted into common shares when the Prime Minister confirms (*nintei*) that Item 2 measures (*dai nigo sochi*), Item 3 measures (*dai sango sochi*), or Specified Item 2 measures (*tokutei dai nigo sochi*) need to be applied to the bank and (ii) Additional Tier 1 instruments and Tier 2 instruments under Basel III issued by a bank holding company must be written down or converted into common shares when the Prime Minister confirms (*nintei*) that Specified Item 2 measures (*tokutei dai nigo sochi*) need to be applied to the bank holding company.

Recovery and resolution plan. In November 2015, the Financial Stability Board published the latest list of G-SIBs, which includes us. The list is annually updated by the Financial Stability Board each November. A recovery and resolution plan must be put in place for each G-SIB, and the plans must be regularly reviewed and updated. In Japan, under the Comprehensive Guidelines for Supervision of Major Banks, etc., financial institutions identified as G-SIBs must, as part of their crisis management, prepare and submit a recovery plan, including triggers for the implementation of the recovery plan and an analysis of recovery options, to the FSA, and the FSA must prepare a resolution plan to apply to each G-SIB.

Total loss-absorbing capacity. In November 2015, the Financial Stability Board issued the final Total Loss-Absorbing Capacity, or TLAC, standard for G-SIBs, including us. The Financial Stability Board's TLAC standard is designed to ensure that if a G-SIB fails, it has sufficient loss-absorbing and recapitalization capacity available in resolution to implement an orderly resolution that minimizes impacts on financial stability, ensures

Table of Contents

the continuity of critical functions, and avoids exposing public funds to loss. The Financial Stability Board's TLAC standard defines a minimum requirement for the instruments and liabilities that should be readily available to absorb losses in resolution but allows each resolution authority's power under the applicable resolution law to expose other liabilities to loss through bail-in or the application of other resolution tools. The Financial Stability Board's TLAC standard requires a G-SIB to hold TLAC in an amount not less than 16% of its risk-weighted assets and 6% of the applicable Basel III leverage ratio denominator by January 1, 2019, and not less than 18% of its risk-weighted assets and 6.75% of the applicable Basel III leverage ratio denominator by January 1, 2022.

Following the publication of the final TLAC standards for G-SIBs by the Financial Stability Board in November 2015, the FSA published an explanatory paper outlining its approach for the introduction of the TLAC framework in Japan on April 15, 2016. According to the FSA's approach, which is subject to change based on future international discussions, the preferred resolution strategy for G-SIBs in Japan is SPE resolution, in which resolution powers are applied to the top-level entity of a banking group by a single national resolution authority. To implement this SPE resolution strategy effectively, the FSA plans to require bank holding companies of Japanese G-SIBs, which will be the resolution entities, to (i) meet the minimum external TLAC requirements provided under the Financial Stability Board's TLAC standard, and (ii) cause their material subsidiaries that are designated as systemically important by the FSA, including but not limited to certain material sub-groups as provided in the Financial Stability Board's TLAC standard, to maintain a certain level of capital and debt recognized by the FSA as having Internal TLAC. In addition, under the approach, Japanese G-SIBs would be allowed to count the Japanese Deposit Insurance Fund Reserves in an amount equivalent to 2.5% of their consolidated risk-weighted assets from 2019 and 3.5% of their consolidated risk-weighted assets from 2022 as external TLAC.

Furthermore, under the SPE resolution strategy provided for in the approach, while the actual measures to be taken will be determined on a case-by-case basis considering the actual condition of the relevant Japanese G-SIB in crisis, a possible model of Japanese G-SIB resolution will be:

- (i) Certain measures are taken with the involvement of the relevant authority with respect to the Internal TLAC obligations that the relevant material subsidiaries of the bank holding company of the relevant Japanese G-SIB owe to the bank holding company so as to cause the bank holding company to absorb the losses incurred by such material subsidiaries.
- (ii) After the bank holding company absorbs the losses of its material subsidiaries, if it fulfills the requirements for the application of Specified Item 2 measures (*tokutei dai nigo sochi*) set forth in Article 126-2, Paragraph 1, Item 2 of the Deposit Insurance Act, the Prime Minister confirms that Specified Item 2 measures (*tokutei dai nigo sochi*) need to be applied to the bank holding company and orders its operations and assets to be placed under the special control of the Deposit Insurance Corporation. At this point, Basel III-eligible Additional Tier 1 instruments and Tier 2 instruments issued by the bank holding company are written off or converted into equity under the terms of such instruments prior to the loss absorption of external TLAC-eligible senior debt liabilities issued by the bank holding company. In addition, the Prime Minister prohibits by its designation creditors of the bank holding company from attaching any of its movable assets and claims which are to be transferred to a bridge financial institution established by the Deposit Insurance Corporation pursuant to Article 126-16 of the Deposit Insurance Act.
- (iii) The bank holding company transfers its systemically important assets and liabilities (including shares of its material subsidiaries) to a bridge financial institution with court permission in lieu of any shareholder resolutions under Article 126-13 of the Deposit Insurance Act, under a decision by the Prime Minister that the bridge financial institution succeed the business of the bank holding company. It is expected that the bank holding company's obligations with respect to external TLAC-eligible senior notes would not be transferred to the bridge financial institution and would remain as the bank holding company's liabilities.
- (iv) After transferring its systemically important assets and liabilities, the Deposit Insurance Corporation files a petition for the commencement of a bankruptcy proceeding against the bank holding company

Table of Contents

through which it will be dissolved, and the creditors of the bank holding company, including the holders of external TLAC-eligible senior notes, will receive liquidation distributions out of the residual assets of the bank holding company, as a result of which they may absorb losses.

See Item 3.D. Key Information Risk Factors Risks Related to Our Business We may not be able to maintain our capital ratios above minimum required levels, which could result in the suspension of some or all of our operations.

Liquidity Coverage Ratio. Japanese banks and bank holding companies with international operations are required to disclose their LCRs calculated in accordance with the methodology prescribed in the FSA guidance that has been adopted to implement the relevant Basel III standard. The LCR is a measure to determine whether a bank has a sufficient amount of high-quality liquid assets to survive in a 30-day financial stress scenario, including sizable deposit outflows, inability to issue new bonds or access the interbank market, stoppage of the collateralized funding market, need for additional collateral in connection with derivative transactions, and significant outflows of cash under commitment lines to customers. Once a bank or bank holding company fails to meet the minimum LCR of 100%, it is required to immediately report such failure to the FSA. If the FSA deems the financial condition of the bank or bank holding company to be serious, the FSA may issue a business improvement order. A minimum LCR of 70% is required in 2016, and the required minimum ratio is expected to be raised annually by 10 percentage points to 100% by 2019.

Net Stable Funding Ratio. The NSFR is a measure to determine whether a bank has sustainable and long-term liabilities and capital for its assets and activities. The Basel Committee on Banking Supervision issued the final standard of NSFR in October 2014. The standard is expected to become applicable by January 1, 2018. In Japan, details of the NSFR requirements are currently under discussion.

Leverage Ratio. Japanese banks and bank holding companies with international operations are required to disclose their leverage ratios calculated in accordance with the methodology prescribed in the FSA guidance that has been adopted to implement the relevant Basel III standard. The leverage ratio is designed for monitoring and preventing the build-up of excessive leverage in the banking sector and is expressed as the ratio of Tier 1 capital to total balance sheet assets adjusted in accordance with the FSA guidance. The Basel Committee on Banking Supervision's currently proposed minimum leverage ratio is 3% with additional requirements for G-SIBs. The Committee is expected to make any adjustments to the minimum leverage ratio by the end of the calendar year 2017 and implement the final minimum leverage ratio requirement that reflects any such adjustments in 2018.

Other major developments relating to international bank capital regulatory standards. In July 2015, the Basel Committee on Banking Supervision published a consultation paper *Review of the Credit Valuation Adjustment Risk Framework*. Credit valuation adjustment, or CVA, is an adjustment to the fair value of derivative instruments to account for counterparty credit risk. The proposals are designed to ensure that all important factors of CVA risk and CVA hedges are covered in the Basel regulatory capital standard, align the capital standard with the fair value measurement of CVA employed under various accounting standards, and ensure consistency with the Basel Committee on Banking Supervision's proposed revisions to the market risk framework. The consultation paper proposed three approaches for CVA risk measurement: Internal Model Approach, Standardized Approach and Basic Approach. Depending on the final designs and calibrations, these revisions and reforms could change the regulatory capital calculation and the level of capital requirement for each of the banks subject to the relevant standards, including us.

In December 2015, the Basel Committee on Banking Supervision published a second consultation paper on revisions to the Standardized Approach for credit risk. The proposed revisions are designed to establish a capital framework that better balances simplicity and risk sensitivity, promote comparability by reducing variability in risk-weighted assets across banks and jurisdictions, and ensure that the Standardized Approach constitutes a suitable alternative to and complement the Internal Ratings-Based approach. The consultation paper includes, among other things, reintroduction of external ratings, a lower risk weight for small and medium-sized

Table of Contents

enterprises, and higher credit conversion factors, which are percentages used to convert off-balance sheet items to credit-equivalent risk assets, to be applied to unconditionally cancellable commitments for corporate customers.

In January 2016, the Basel Committee on Banking Supervision announced a revised capital standard for market risk. The revised market risk framework, which will become effective January 1, 2019, revises the boundary between the trading book and banking book, the Internal Models Approach for market risk and the Standardized Approach for market risk, shifts from value-at-risk to an expected shortfall measure of risk under stress, allows for supervisory approval and removal of internal models at the trading desk level, and incorporates the risk of market illiquidity. We are continuously working to enhance our market risk framework both to respond to the revised framework as well as changes in the markets where we operate.

In January 2016, the Group of Central Bank Governors and Heads of Supervision, or GHOS, agreed on the use of a Tier 1 definition of capital for the calculation of the leverage ratio and a minimum level of 3%, and discussed additional leverage ratio requirements for G-SIBs. The GHOS is expected to finalize the leverage ratio calibration within the calendar year 2016, and the final minimum leverage ratio requirement is expected to be implemented in 2018. In April 2016, the Basel Committee on Banking Supervision published a consultation paper proposing revisions to exposure measures, including the Credit Conversion Factor for off-balance sheet items, and additional requirements for G-SIBs.

In March 2016, the Basel Committee on Banking Supervision published a consultation paper Reducing variation in credit risk-weighted assets constraints on the use of internal model approaches. The proposed changes include a number of complementary measures that aim to: (i) reduce the complexity of the regulatory framework and improve comparability, and (ii) address excessive variability in the capital requirements for credit risk. The consultation paper discusses, among other things, removing the option to use the IRB approaches for certain exposures, adopting exposure-level, model-parameter floors for portfolios where the IRB approaches remain available, and clarifying and substantially expanding the definition of commitment.

In March 2016, the Basel Committee on Banking Supervision published a second consultation paper Standardized Measurement Approach for operational risk. The Committee is proposing to remove the Advanced Measurement Approach (AMA) from the regulatory framework. The revised operational risk capital framework will be based on a single non-model-based method for the estimation of operational risk capital, which is called the Standardised Measurement Approach. The Basel Committee on Banking Supervision aims to promote consistency and comparability in operational risk capital measurement by combining financial statement information and banks' internal loss experience.

In April 2016, the Basel Committee on Banking Supervision has issued standards for Interest Rate Risk in the Banking Book, or IRRBB. The standards revise the Committee's 2004 Principles for the management and supervision of interest rate risk, which set out supervisory expectations for a bank's identification, measurement, monitoring and control of IRRBB as well as their supervision. The key enhancements for a bank's IRRBB management processes are in areas such as the development of interest rate shock scenarios, as well as key behavioral and modelling assumptions to be considered by banks in their measurement of IRRBB; bank's total capital to 15% of a bank's Tier 1 capital. The revised standards are expected to be implemented by the calendar year 2018.

Inspection and reporting. By evaluating banks' systems of self-assessment, inspecting their accounts and reviewing their compliance with laws and regulations, the FSA monitors the financial soundness of banks, including the status and performance of their control systems for business activities. The FSA applies the Financial Inspection Rating System, or FIRST, to major banks. By providing inspection results in the form of graded evaluations (i.e., ratings), the FSA expects this rating system to motivate financial institutions to voluntarily improve their management and operations. Additionally, the FSA currently takes the better regulation approach in its financial regulation and supervision. This consists of four pillars: (1) optimal combination of rules-based and principles-based supervisory approaches, (2) timely recognition of priority issues

Table of Contents

and effective responses, (3) encouraging voluntary efforts by financial firms and placing greater emphasis on providing them with incentives, and (4) improving the transparency and predictability of regulatory actions, in pursuit of improvement of the quality of financial regulation and supervision.

In addition, the FSA's current policy for monitoring financial institutions places a greater emphasis on (i) ending Japan's deflation and building an economic growth cycle, and (ii) maintaining the soundness and integrity of the financial system and financial institutions so as to ensure the availability of efficient and stable financial services in Japan. Under this policy, the FSA is expected to increase monitoring of, and communication with, financial institutions, particularly large global financial institutions, including us, and enhance cooperation with financial regulatory bodies in other jurisdictions. The FSA, if necessary to secure the sound and appropriate operations of a bank's business, may request the submission of reports or materials from, or conduct an on-site inspection of, the bank or the bank holding company.

Furthermore, the Securities and Exchange Surveillance Commission of Japan inspects banks in connection with their securities business as well as financial instruments business operators, such as securities firms. The Bank of Japan also conducts inspections of banks. The Bank of Japan Law provides that the Bank of Japan and financial institutions may agree as to the form of inspection to be conducted by the Bank of Japan.

Laws limiting shareholdings of banks. The provisions of the Antimonopoly Act that generally prohibit a bank from holding more than 5% of another company's voting rights do not apply to a bank holding company. However, the Banking Law prohibits a bank holding company and its subsidiaries from holding, on an aggregated basis, more than 15% of the voting rights of companies other than those which can legally become subsidiaries of bank holding companies. There have recently been enacted and proposed legislation to amend various financial regulation related laws, including the Banking Law, which includes certain deregulations on restrictions for shareholdings by banks, as described above.

In addition, a bank is prohibited from holding shares in other companies exceeding the aggregate of its Common Equity Tier 1 capital amount and Additional Tier 1 capital amount. For a detailed discussion on the capital requirements for Japanese banks, see Item 5.B. Operating and Financial Review and Prospects—Liquidity and Capital Review—Capital Adequacy.

Restrictions on exposures to single large counterparties. The Banking Law prohibits banks and bank holding companies (on a consolidated basis with their subsidiaries and affiliates) from having exposures exceeding 25% of the sum of their Tier 1 and Tier 2 capital to a single counterparty (on a consolidated basis with its subsidiaries and specially related parties as defined in the law). The Banking Law is expected to be amended in light of the Basel Committee on Banking Supervision's final standard published in April 2014, which, among other things, (1) requires all exposures to a counterparty or a group of connected counterparties equal to or exceeding 10% of Tier 1 capital to be reported to national supervisors and (2) prohibits a large exposure exceeding 25% of Tier 1 capital.

Financial Instruments and Exchange Act. The Financial Instruments and Exchange Act provides protection for investors and also regulates sales of a wide range of financial instruments and services, requiring financial institutions to improve their sales rules and strengthen compliance frameworks and procedures. Among the instruments that the Japanese banks deal in, derivatives, foreign currency-denominated deposits, and variable insurance and annuity products are subject to regulations covered by the sales-related rules of conduct under the law.

Article 33 of the Financial Instruments and Exchange Act generally prohibits banks from engaging in securities transactions. However, bank holding companies and banks may, through a domestic or overseas securities subsidiary, conduct all types of securities businesses, with appropriate approval from the FSA. Similarly, registered banks are permitted to provide securities intermediation services and engage in certain other similar types of securities related transactions, including retail sales of investment funds and government and municipal bonds.

Table of Contents

Subsidiaries of bank holding companies engaging in the securities business are subject to the supervision of the FSA as financial instruments business operators. The Prime Minister has the authority to regulate the securities industry and securities companies, which authority is delegated to the Commissioner of the FSA under the Financial Instruments and Exchange Act. In addition, the Securities and Exchange Surveillance Commission, an external agency of the FSA, is independent from the FSA's other bureaus and is vested with the authority to conduct day-to-day monitoring of the securities markets and to investigate irregular activities that hinder fair trading of securities, including inspections of securities companies as well as banks in connection with their securities business. Furthermore, the Commissioner of the FSA delegates certain authority to the Director General of the Local Finance Bureau to inspect local securities companies and their branches. A violation of applicable laws and ordinances may result in various administrative sanctions, including revocation of registration, suspension of business or an order to discharge any director or executive officer who has failed to comply with applicable laws and ordinances. Securities companies are also subject to the rules and regulations of the Japanese stock exchanges and the Japan Securities Dealers Association, a self-regulatory organization of securities companies.

Act on Sales, etc. of Financial Instruments. The Act on Sales, etc. of Financial Instruments was enacted to protect customers from incurring unexpected losses as a result of purchasing financial instruments. Under this act, sellers of financial instruments have a duty to their potential customers to explain important matters such as the nature and magnitude of risks involved regarding the financial instruments that they intend to sell. If a seller fails to comply with the duty, there is a rebuttable presumption that the loss suffered by the customer due to the seller's failure to explain is equal to the amount of decrease in the value of the purchased financial instruments.

Anti-money laundering laws. Under the Act on Prevention of Transfer of Criminal Proceeds, specified business operators, including financial institutions, are required to verify customer identification data, preserve transaction records, and file Suspicious Transaction Reports with the FSA or other regulatory authorities in cases where any asset received through their business operations is suspected of being criminal proceeds.

Most recent amendments to the Act will become effective on October 1, 2016. Major revisions include (1) enhancement of customer due diligence including identification of beneficial owners who are natural persons controlling corporate customers through voting rights or other means, and (2) stricter requirements for the risk-based approach through assessment of money laundering and terrorist financing risks and application of adequate resources effectively to mitigate such risks.

Acts concerning trust business conducted by financial institutions. Under the Trust Business Act, joint stock companies that are licensed by the Prime Minister as trust companies, including non-financial companies, are allowed to conduct trust business. In addition, under the Act on Provision, etc. of Trust Business by Financial Institutions, banks and other financial institutions, as permitted by the Prime Minister, are able to conduct trust business. The Trust Business Act provides for a separate type of registration for trustees who conduct only administration type trust business. The Trust Business Act also provides for various duties imposed on the trustee in accordance with and in addition to the Trust Act.

Regulatory developments relating to lending to small and medium-sized firms and others. The Act Concerning Temporary Measures to Facilitate Financing for Small and Medium-sized Firms and Others required financial institutions, among other things, to make an effort to reduce their customers' burden of loan repayment by employing methods such as modifying the term of loans at the request of eligible borrowers, including small and medium-sized firms and individual home loan borrowers. This legislation also required financial institutions to internally establish a system to implement the requirements of the legislation and periodically make public disclosure of and report to the relevant authority on the status of implementation. Although this legislation expired on March 31, 2013, the FSA continues to encourage financial institutions to continue to provide support to small and medium-sized firms by revising the Inspection Manual, Supervisory Policy and Ordinance for Enforcement of the Baking Law in order to encourage financial institutions to modify the terms of loans, provide smooth financing, and take active roles in supporting operations of such firms.

Table of Contents

Act on the Protection of Personal Information. With regard to protection of personal information, the Act on the Protection of Personal Information requires, among other things, Japanese banking institutions to limit the use of personal information to the stated purposes and to properly manage the personal information in their possession, and forbids them from providing personal information to third parties without consent. If a bank violates certain provisions of the act, the FSA may advise or order the bank to take proper action. In addition, the Banking Law and the Financial Instruments and Exchange Act contain certain provisions with respect to appropriate handling of customer information.

Act on the Use of Personal Identification Numbers in the Administration of Government Affairs. Pursuant to the Act on the Use of Personal Identification Numbers in the Administration of Government Affairs, which became effective in October 2015, the Japanese government has adopted a Social Security and Tax Number System, which is designed to (1) improve social security services, (2) enhance public convenience in obtaining government services, and (3) increase the efficiency of the administration of government affairs. Under this system, a 12-digit unique number will be assigned to each resident of Japan to identify and manage information relating to the resident for government service and tax purposes. Effective October 2015, financial institutions are required to implement measures to ensure that such customer information will be protected from inappropriate disclosure and other unauthorized use.

Act Concerning Protection of Depositors from Illegal Withdrawals Made by Counterfeit or Stolen Cards. The Act on Protection, etc. of Depositors and Postal Saving Holders from Unauthorized Automated Withdrawal, etc. Using Counterfeit Cards, etc. and Stolen Cards, etc. requires financial institutions to establish internal systems to prevent illegal withdrawals of deposits made using counterfeit or stolen bank cards. The act also requires a financial institution to compensate depositors for any amount illegally withdrawn using stolen bank cards except in certain cases, including those where the financial institution can verify that it acted in good faith without negligence and there was gross negligence on the part of the relevant depositor. In addition, the act provides that illegal withdrawals with counterfeit bank cards are invalid unless the financial institution acted in good faith without negligence and there was gross negligence on the part of the relevant account holder.

Government reforms to restrict maximum interest rates on consumer lending business. In December 2006, the Diet passed legislation to reform the regulations relating to the consumer lending business, including amendments to the Act Regulating the Receipt of Contributions, Receipt of Deposits and Interest Rates which, effective June 18, 2010, reduced the maximum permissible interest rate from 29.2% per annum to 20% per annum. The regulatory reforms also included amendments to the Law Concerning Lending Business which, effective June 18, 2010, abolished the so-called gray-zone interest. Gray-zone interest refers to interest rates exceeding the limits stipulated by the Interest Rate Restriction Act (between 15% per annum to 20% per annum depending on the amount of principal). Prior to June 18, 2010, gray-zone interests were permitted under certain conditions set forth in the Law Concerning Lending Business. As a result of the regulatory reforms, all interest rates are now subject to the lower limits imposed by the Interest Rate Restriction Act, compelling lending institutions, including our consumer finance subsidiaries and equity method investees, to lower the interest rates they charge borrowers. Furthermore, the new regulations, which became effective on June 18, 2010, require, among other things, consumer finance companies to limit their lending to a single customer to a maximum of one third of the customer's annual income regardless of the customer's repayment capability.

In addition, as a result of decisions made by the Supreme Court of Japan prior to June 18, 2010, imposing stringent requirements for charging such gray-zone interest rates, consumer finance companies have been responding to borrowers' claims for reimbursement of previously collected interest payments in excess of the limits stipulated by the Interest Rate Restriction Act. See Item 3.D. Key Information Risk Factors Risks Related to Our Business Because of our loans to consumers and our shareholdings in companies engaged in consumer lending, changes in the business or regulatory environment for consumer finance companies in Japan may further adversely affect our financial results.

Table of Contents

United States

As a result of our operations in the United States, we are subject to extensive U.S. federal and state supervision and regulation.

Overall supervision and regulation. We are subject to supervision, regulation and examination with respect to our U.S. operations by the FRB pursuant to the U.S. Bank Holding Company Act of 1956, as amended, or the BHCA, and the International Banking Act of 1978, as amended, or the IBA, because we are a bank holding company and a foreign banking organization, respectively, as defined pursuant to those statutes. The FRB functions as our umbrella supervisor under amendments to the BHCA effected by the Gramm-Leach-Bliley Act of 1999, which among other things:

prohibited further expansion of the types of activities in which bank holding companies, acting directly or through non-bank subsidiaries, may engage;

authorized qualifying bank holding companies to opt to become financial holding companies, and thereby acquire the authority to engage in an expanded list of activities; and

modified the role of the FRB by specifying new relationships between the FRB and the functional regulators of non-bank subsidiaries of both bank holding companies and financial holding companies.

The BHCA generally prohibits each of a bank holding company and a foreign banking organization that maintains branches or agencies in the United States from, directly or indirectly, acquiring more than 5% of the voting shares of any company engaged in non-banking activities in the United States unless the bank holding company or foreign banking organization has elected to become a financial holding company, as discussed above, or the FRB has determined, by order or regulation, that such activities are so closely related to banking as to be a proper incident thereto and has granted its approval to the bank holding company or foreign banking organization for such an acquisition. The BHCA also requires a bank holding company or foreign banking organization that maintains branches or agencies in the United States to obtain the prior approval of an appropriate federal banking authority before acquiring, directly or indirectly, the ownership of more than 5% of the voting shares or control of any U.S. bank or bank holding company. In addition, under the BHCA, a U.S. bank or a U.S. branch or agency of a foreign bank is prohibited from engaging in various tying arrangements involving it or its affiliates in connection with any extension of credit, sale or lease of any property or provision of any services.

On October 6, 2008, we became a financial holding company in the United States. At the same time, BTMU, MUTB, and UNBC (now MUAH), which are also bank holding companies, elected to become financial holding companies. As noted above, as a financial holding company we are authorized to engage in an expanded list of activities. These activities include those deemed to be financial in nature or incidental to such financial activity, including among other things merchant banking, insurance underwriting, and a full range of securities activities. In addition, we are permitted to engage in certain specified non-banking activities deemed to be closely related to banking, without prior notice to or approval from the FRB. To date, we have utilized this expanded authority by electing to engage in certain securities activities, including securities underwriting, indirectly through certain of our securities subsidiaries. In order to maintain our status as a financial holding company that allows us to expand our activities, we must continue to meet certain standards established by the FRB. Those standards require that we exceed the minimum standards applicable to bank holding companies that have not elected to become financial holding companies. These higher standards include meeting the well capitalized and well managed standards for financial holding companies as defined in the regulations of the FRB. In addition, as a financial holding company, we must ensure that our U.S. banking subsidiaries identified below meet certain minimum standards under the Community Reinvestment Act of 1977. At this time, we continue to comply with these standards.

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

U.S. branches and agencies of subsidiary Japanese banks. Under the authority of the IBA, our banking subsidiaries, BTMU and MUTB, operate five branches, two agencies and seven representative offices in the

Table of Contents

United States. BTMU operates branches in Los Angeles, California; Chicago, Illinois; and two branches in New York, New York; agencies in Houston and Dallas, Texas; and representative offices in Washington, D.C; San Francisco, California; Seattle, Washington; Atlanta, Georgia; Minneapolis, Minnesota; Jersey City, New Jersey; and Florence, Kentucky. MUTB operates a branch in New York, New York.

The IBA provides, among other things, that the FRB may examine U.S. branches and agencies of foreign banks, and each branch and agency shall be subject to on-site examination by the appropriate federal or state bank supervisor as frequently as would a U.S. bank. The IBA also provides that if the FRB determines that a foreign bank is not subject to comprehensive supervision or regulation on a consolidated basis by the appropriate authorities in its home country, or if there is reasonable cause to believe that the foreign bank or its affiliate has committed a violation of law or engaged in an unsafe or unsound banking practice in the United States, the FRB may order the foreign bank to terminate activities conducted at a branch or agency in the United States.

U.S. branches and agencies of foreign banks must be licensed, and are also supervised and regulated, by a state or by the Office of the Comptroller of the Currency, or the OCC, the federal regulator of U.S. national banks. All of the branches and agencies of BTMU and MUTB in the United States are state-licensed. Under U.S. federal banking laws, state-licensed branches and agencies of foreign banks may engage only in activities that would be permissible for their federally-licensed counterparts, unless the FRB determines that the additional activity is consistent with safe and sound practices. U.S. federal banking laws also subject state-licensed branches and agencies to the single-borrower lending limits that apply to federal branches and agencies, which generally are the same as the lending limits applicable to national banks, but are based on the capital of the entire foreign bank.

As an example of state supervision, the branches of BTMU and MUTB in New York are licensed by the New York State Department of Financial Services, or DFS, pursuant to the New York Banking Law. Under the New York Banking Law and the Superintendent's Regulations, each of BTMU and MUTB must maintain with banks in the State of New York eligible assets as defined and in amounts determined by the Superintendent. These New York branches must also submit written reports concerning their assets and liabilities and other matters, to the extent required by the Superintendent, and are examined at periodic intervals by the DFS. In addition, the Superintendent is authorized to take possession of the business and property of BTMU and MUTB located in New York whenever events specified in the New York Banking Law occur.

U.S. banking subsidiaries. We indirectly own and control one U.S. bank: MUFU Union Bank, N.A. or MUB (known prior to July 1, 2014 as Union Bank, N.A.), through BTMU and its subsidiary, MUAH, a registered bank holding company.

MUB is a national bank subject to the supervision, examination and regulatory authority of the OCC pursuant to the National Bank Act.

The OCC is an independent bureau of the U.S. Department of the Treasury. In regulating national banks such as MUB, the OCC has the power to examine those banks; approve or deny applications for new charters, branches, capital, or other changes in corporate or banking structure; take supervisory actions against national banks that do not comply with laws and regulations or that otherwise engage in unsound practices; remove officers and directors, negotiate agreements to change banking practices, and issue cease and desist orders as well as civil money penalties; and issue rules and regulations, legal interpretations, and corporate decisions governing investments, lending, and other practices. The OCC's staff of bank examiners conducts on-site reviews and provides sustained supervision of national banks. Examiners analyze loan and investment portfolios, funds management, capital, earnings, liquidity, and sensitivity to market risk for national banks. Examiners also review internal controls, internal and external audit, and compliance with law, and evaluate management's ability to identify and control risk.

In addition, the FDIC insures the deposits of MUB up to legally specified maximum amounts. In the event of a failure of an FDIC-insured bank, the FDIC is virtually certain to be appointed as receiver, and would resolve

Table of Contents

the failure under provisions of the Federal Deposit Insurance Act. In the liquidation or other resolution of a failed FDIC-insured depository institution, deposits in its U.S. offices and other claims for administrative expenses and employee compensation are afforded priority over other general unsecured claims, including deposits in offices outside the United States, non-deposit claims in all offices and claims of a parent company. Moreover, under longstanding FRB policy, a bank holding company is expected to act as a source of financial strength for its banking subsidiaries and to commit resources to support such banks.

Bank capital requirements and capital distributions. MUB is subject to applicable risk-based and leverage capital guidelines issued by U.S. regulators for banks and bank holding companies. In addition, BTMU and MUTB, as foreign banking organizations that have U.S. branches and agencies and that are controlled by us as a financial holding company, are subject to the FRB's requirements that they be well-capitalized based on Japan's risk based capital standards, as well as well managed. MUB, BTMU, MUTB, and MUAH are all well capitalized as defined under, and otherwise comply with, all U.S. regulatory capital requirements applicable to them. The Federal Deposit Insurance Corporation Improvement Act of 1991, or FDICIA, provides, among other things, for expanded regulation of insured depository institutions, including banks, and their parent holding companies. As required by FDICIA, the federal banking agencies have established five capital tiers ranging from well capitalized to critically undercapitalized for insured depository institutions. As an institution's capital position deteriorates, the federal banking regulators may take progressively stronger actions, such as further restricting affiliate transactions, activities, asset growth or interest payments. In addition, FDICIA generally prohibits an insured depository institution from making capital distributions, including the payment of dividends, or the payment of any management fee to its holding company, if the insured depository institution would subsequently become undercapitalized.

The availability of dividends from insured depository institutions in the United States is limited by various other statutes and regulations. The National Bank Act and other federal laws prohibit the payment of dividends by a national bank under various circumstances and limit the amount a national bank can pay without the prior approval of the OCC. In addition, state-chartered banking institutions are subject to dividend limitations imposed by applicable federal and state laws.

Other regulated U.S. subsidiaries. Our non-bank subsidiaries that engage in securities-related activities in the United States are regulated by appropriate functional regulators, such as the SEC, any self-regulatory organizations of which they are members, and the appropriate state regulatory agencies. These non-bank subsidiaries are required to meet separate minimum capital standards as imposed by those regulatory authorities.

Anti-Money Laundering Initiatives and the USA PATRIOT Act. A major focus of U.S. governmental policy relating to financial institutions in recent years has been aimed at preventing money laundering and terrorist financing. The USA PATRIOT Act of 2001 substantially broadened the scope of U.S. anti-money laundering laws and regulations by imposing significant new compliance and due diligence obligations, creating new crimes and penalties and expanding the extra-territorial jurisdiction of the United States. The U.S. Department of the Treasury has issued a number of regulations that impose obligations on financial institutions to maintain appropriate policies, procedures and controls to detect, prevent and report money laundering and terrorist financing, and to verify the identity of their customers. In addition, the bank regulatory agencies carefully scrutinize the adequacy of an institution's policies, procedures and controls. As a result, there has been an increased number of regulatory sanctions and law enforcement authorities have been taking a more active role in enforcing these laws. Failure of a financial institution to maintain and implement adequate policies, procedures and controls to prevent money laundering and terrorist financing could in some cases have serious legal and reputational consequences for the institution, including the incurrence of expenses to enhance the relevant programs, the imposition of limitations on the scope of their operations and the imposition of fines and other monetary penalties.

Foreign Corrupt Practices Act. In recent years, U.S. regulatory and enforcement agencies including the SEC and the U.S. Department of Justice have significantly increased their enforcement efforts of the Foreign

Table of Contents

Corrupt Practices Act, or the FCPA. The FCPA prohibits U.S. securities issuers, U.S. domestic entities, and parties doing substantial business within the United States (including their shareholders, directors, agents, officers, and employees) from making improper payments to non-U.S. government officials in order to obtain or retain business. The FCPA also requires U.S. securities issuers to keep their books and records in detail, accurately, and in such a way that they fairly reflect all transactions and dispositions of assets. Those enforcement efforts have targeted a wide range of U.S. and foreign-based entities and have been based on a broad variety of alleged fact patterns, and in a number of cases have resulted in the imposition of substantial criminal and civil penalties or in agreed payments in settlement of alleged violations. Failure of a financial institution doing business in the United States to maintain adequate policies, procedures, internal controls, and books and records on a global basis that address compliance with FCPA requirements could in some cases have serious legal and reputational consequences for the institution, including the incurrence of expenses to enhance the relevant programs and the imposition of fines and other monetary penalties.

Regulatory Reform Legislation. In response to the global financial crisis and the perception that lax supervision of the financial industry in the United States may have been a contributing cause, legislation designed to reform the system for supervision and regulation of financial firms doing business in the United States, the so-called Dodd-Frank Act, was signed into law on July 21, 2010. The Dodd-Frank Act is complex and extensive in its coverage and contains a wide range of provisions that would affect financial institutions operating in the United States, including our U.S. operations. Included among these provisions are sweeping reforms designed to reduce systemic risk presented by very large financial firms, promote enhanced supervision, regulation, and prudential standards for financial firms, establish comprehensive supervision of financial markets, impose new limitations on permissible financial institution activities and investments, expand regulation of the derivatives markets, protect consumers and investors from financial abuse, and provide the government with the tools needed to manage a financial crisis. Many aspects of the legislation require subsequent regulatory action by supervisory agencies for full implementation. Key provisions that impact our operations are summarized below. However certain regulatory rules under the Dodd-Frank Act are not yet finalized, require further interpretive guidance by the relevant supervisory agencies, or do not yet require us to fully implement compliance procedures. Accordingly, while the legislation has an impact on our operations, including the imposition of significant compliance costs, we are unable to assess with certainty the full degree of impact of the Dodd-Frank Act on our operations at this time.

Among the components of the Dodd-Frank Act that have impacted or may impact our operations are the provisions relating to enhanced prudential standards, including capital, liquidity and structural requirements, the Volcker Rule, derivatives regulation, credit reporting, resolution plans, incentive-based compensation, the establishment of the Consumer Financial Protection Bureau, and debit interchange fees. Although certain of the regulatory rules regarding the foregoing components are still pending, as noted above, based on information currently available to us, other than the Volcker Rule and derivatives regulations as discussed below, the impact of these components is expected to be mainly limited to our U.S. operations and not to be material to us on a consolidated basis. We intend to continue to monitor developments relating to the Dodd-Frank Act and the potential impact on our activities inside and outside of the United States.

With respect to the Dodd-Frank Act provisions related to enhanced prudential standards, in February 2014 the FRB issued final rules that established enhanced prudential standards for the U.S. operations of foreign banking organizations such as MUFG. These rules required us to organize by July 1, 2016 all of our U.S. bank and non-bank subsidiaries, with certain limited exceptions, under a U.S. IHC, that is subject to U.S. capital requirements and enhanced prudential standards comparable to those applicable to top-tier U.S. bank holding companies of the same size. Under these rules, we were required to change the structure of our U.S. operations, including the manner in which we oversee and manage those operations, and may be required to inject additional capital into our U.S. operations. We have designated MUAH as our IHC.

Our existing U.S. bank holding company subsidiary, MUAH, is subject to various U.S. prudential requirements and has become subject to others with the designation of MUAH as our IHC as of July 1, 2016.

Table of Contents

MUAH was previously subject to risk-based and leverage capital requirements, liquidity requirements, and other enhanced prudential standards applicable to large U.S. bank holding companies. MUAH was also subject to capital planning and stress testing requirements. MUAH is now subject to the capital planning and stress testing requirements and certain enhanced prudential standards applicable to IHCs. On June 23, 2016, the FRB released the results of the 2015 Dodd-Frank Act stress tests. It found that, even in the severely adverse economic stress test scenario, MUAH would maintain capital ratios well above the required minimum levels. On June 29, 2016, the FRB announced that it had no objections to the capital plan submitted by MUAH as part of the 2016 Comprehensive Capital Analysis and Review.

The FRB has the authority to examine an IHC and any of its subsidiaries. U.S. leverage requirements applicable to the IHC will take effect beginning in January 2018. The FRB has also stated that it intends, through future rulemakings, to apply the Basel III liquidity coverage ratio and net stable funding ratio to the U.S. operations of some or all large foreign banking organizations. Our combined U.S. operations, including BTMU s and MUTB s branches, are also subject to certain requirements related to liquidity and risk management.

The Volcker Rule was issued in final form by the Federal Reserve in December 2013. Under the Volcker Rule, we are required to cease conducting certain proprietary trading activities, which means trading in securities and financial instruments for our own account, subject to certain exceptions, including market-making, hedging, and underwriting activities if such activities are conducted within a rigorous compliance framework. We are also restricted from engaging in certain activities regarding hedge funds and private equity funds, or covered funds. While the Volcker Rule excludes restrictions on such activities conducted solely outside of the United States, the regulatory definition of such exempted activities is narrow and complex and in some cases requires further clarification. Our proprietary trading and covered funds activities are generally executed outside of the United States, but certain activities within the United States could potentially have fallen within the scope of the Rule. We have undertaken steps that we believe are appropriate to bring our activities and investments into compliance with the Rule. Given the limited amount of restricted activities in which we previously engaged within the United States, we do not expect the implementation of the Volcker Rule to be material to our operations.

U.S. regulators continue to issue final regulations and regulatory determinations governing swaps and derivatives markets as contemplated by the Dodd-Frank Act. To date, BTMU and Mitsubishi UFJ Securities International, plc, have registered as swap dealers with the U.S. Commodity Futures Trading Commission, or CFTC. Depending on the finalization of regulations and regulatory determinations governing swaps and derivatives markets under the Dodd-Frank Act, as well as the activities of our other subsidiaries located inside and outside of the United States, our other subsidiaries may have to register as swap dealers with, or be subject to the regulations of, the CFTC and/or SEC. Regulation of swap dealers by the CFTC and SEC imposes numerous corporate governance, business conduct, capital, margin, reporting, clearing, execution, and other regulatory requirements on our operations, which may adversely impact our derivatives businesses and make us less competitive than those competitors that are not subject to the same regulations. Although many regulations applicable to swap dealers are already in effect, it is difficult to assess the full impact of these requirements because some of the most important regulatory determinations have not yet been implemented or finalized. For example, U.S. regulators have adopted guidance and rules on the application of U.S. regulations to activities of registered swap dealers outside of the United States. The extraterritorial application of swap dealer regulatory requirements imposes significant operational and compliance burdens on our swaps activities outside of the United States.

On March 16, 2016, the FRB issued a Notice of Proposed Rulemaking regarding single counterparty credit limits (SCCL) for large banking organizations. The SCCL re-proposal is considered the last major piece of regulatory action needed to implement Section 165(e) of the Dodd-Frank Act. Specifically, Section 165(e) was a response to the concern that failure or financial distress of one large, interconnected financial institution could cascade through the U.S. financial system and impair the financial condition of that firm s counterparties, including other large, interconnected firms. Section 165(e) generally, and the SCCL re-proposal specifically,

Table of Contents

seek to mitigate this risk by limiting the aggregate exposure among such financial institutions and their counterparties. If the re-proposal is adopted in its current form as final, it is likely to have an impact on us; however, as the re-proposal is not yet finalized, we cannot fully assess that impact. We filed comments on the re-proposal in June 2016 and will continue to monitor developments as they progress.

Foreign Account Tax Compliance Act. The Hiring Incentives to Restore Employment Act was enacted in March 2010 and contains provisions commonly referred to as the Foreign Account Tax Compliance Act, or FATCA. The U.S. Treasury, acting through the Internal Revenue Service, or the IRS, issued the final regulations of FATCA in January 2013.

The FATCA framework has been expanded with the introduction of Intergovernmental Agreements between the U.S. Treasury and foreign governments, which pursue a framework for intergovernmental cooperation to facilitate the implementation of FATCA. The United States and Japan have entered into an Intergovernmental Agreement.

We have developed internal procedures and processes that we believe address the regulatory requirements under FATCA. However, doing so has required us to develop extensive systems capabilities and internal processes to identify and report U.S. account holders who are subject to FATCA requirements, which has been a complex and costly process requiring significant internal resources. If our procedures and processes are determined not to be adequate to meet the requirements of FATCA, we could potentially be subject to serious legal and reputational consequences, including the imposition of withholding taxes on certain amounts payable to us from U.S. sources, and could be required to expend additional resources to enhance our systems, procedures and processes and take other measures in response to such consequences.

Capital Adequacy. MUAH and MUB are required to maintain minimum capital ratios in accordance with rules issued by the U.S. Federal banking agencies. In July 2013, the U.S. Federal banking agencies issued final rules to implement the Basel Committee on Banking Supervision's capital guidance for U.S. banking organizations, or U.S. Basel III. These rules establish more restrictive capital definitions, create additional categories and higher risk weightings for certain asset classes and off-balance sheet exposures, higher minimum capital and leverage ratios and capital conservation buffers that will be added to the minimum capital requirements. These rules supersede the U.S. federal banking agencies' general risk-based capital rules generally referred to as Basel I, the advanced approaches rules generally referred to as Basel II, which are applicable to certain large banking organizations, and leverage rules, and are subject to certain transition provisions. MUAH became subject to the U.S. Basel III capital rules in January 2015, with certain provisions subject to a phase-in period, while MUB continues to be subject to the U.S. Basel III capital rules which became effective for advanced approaches institutions on January 1, 2014. The U.S. Basel III capital rules are scheduled to be substantially phased in by January 1, 2019.

Both MUAH and MUB are subject to the following regulatory minimum risk-based capital ratios: (1) 4.5% of Common Equity Tier 1 capital ratio, (2) 6.0% of Tier 1 capital ratio and (3) 8.0% of total capital ratio. Failure to meet minimum capital requirements can initiate certain mandatory, and possibly additional discretionary, actions by regulators that, if undertaken, could have a material effect on MUAH's consolidated financial statements.

In addition to these regulatory minimum ratio requirements, MUAH and MUB will become subject to a fully phased-in capital conservation buffer requirement of 2.5%. The phase-in period for the capital conservation buffer commenced on January 1, 2016 at 0.625% with applicable rates increasing in each successive January until its full implementation on January 1, 2019. MUAH and MUB are also subject to a Tier 1 leverage ratio regulatory minimum requirement of 4% and a well-capitalized prompt corrective action standard of 5%.

MUB has opted into the advanced approaches capital rules. As an advanced approaches opt-in bank, MUB will become subject to the supplementary leverage ratio on January 1, 2018. The supplementary leverage ratio will impose an additional minimum leverage requirement of

3%, with the expectation that this ratio will increase.

Table of Contents

MUB may also be subject to an additional counter cyclical capital buffer requirement ranging from 0.0% to 2.5% of risk-weighted assets if fully implemented. This additional capital buffer will be imposed upon the determination of the appropriate U.S. banking agency that financial markets are experiencing a period of excessive ease in credit markets associated with a material increase in credit system-wide risk, with the maximum buffer reflecting an assessment of elevated financial-system vulnerabilities. The consequences for MUAH and MUB of falling below these buffers will be the imposition of limitations on the percentage of earnings that may be paid in the subsequent financial year as capital distributions or as discretionary bonus payments to executive officers.

In October 2015, the FRB proposed long-term debt and TLAC requirements for U.S. globally systemically important bank holding companies and U.S. IHCs of non-U.S. globally systemically important banks, including MUAH. Under the proposed requirements, a covered IHC would be required to maintain a minimum amount of eligible long-term debt issued to a non-U.S. parent entity that could be cancelled or converted to equity in order to absorb losses and recapitalize the IHC's operating subsidiaries at or near the point of resolution. A covered IHC would also be required to maintain a minimum level of eligible TLAC issued to a non-U.S. parent entity consisting of regulatory capital and eligible long-term debt and maintain related buffers consisting of Common Equity Tier 1 capital. In addition, an IHC would be restricted from issuing short-term debt and certain other types of liabilities that are structurally senior to eligible long-term debt. If adopted as proposed, these requirements and restrictions would apply as of January 1, 2019, with certain stricter minimum requirements to be phased in on January 1, 2022.

Disclosure pursuant to Section 13(r) of the US Securities Exchange Act of 1934

Section 13(r) of the U.S. Securities Exchange Act of 1934 (Exchange Act) requires an issuer to disclose whether it or any of its affiliates knowingly engaged in certain activities, transactions or dealings relating to Iran or with natural persons or entities designated by the U.S. government under specified Executive Orders. The scope of activities that must be reported includes activities not prohibited by U.S. law and conducted outside the United States in compliance with applicable local law.

During the fiscal year ended March 31, 2016, one of our non-U.S. subsidiaries engaged in business activities with entities in, or affiliated with, Iran, including counterparties owned or controlled by the Iranian government. These activities were consistent with rules and regulations applicable to the non-U.S. subsidiary. Specifically, our non-U.S. banking subsidiary, BTMU, issued letters of credit and guarantees and provided remittance and other settlement services mainly in connection with customer transactions related to the purchase and exportation of Iranian crude oil to Japan, and in some cases, in connection with other petroleum-related transactions with Iran by its customers. These transactions did not involve U.S. dollars nor clearing services of U.S. banks for the settlement of payments, and were reviewed for compliance with applicable U.S. and non-U.S. laws and regulations. For the fiscal year ended March 31, 2016, the aggregate interest and fee income relating to these transactions was less than ¥130 million, representing less than 0.005% of our total interest and fee income. Some of these transactions were conducted through the use of non-U.S. dollar correspondent accounts and other similar settlement accounts maintained with BTMU outside the United States by Iranian financial institutions and other entities in, or affiliated with, Iran. In addition to such accounts, BTMU receives deposits in Japan from, and provides settlement services in Japan to, fewer than ten Iranian government-related entities and fewer than 100 Iranian government-related individuals such as Iranian diplomats, and maintains settlement accounts outside the United States for certain other financial institutions specified in Executive Order 13382, which settlement accounts were frozen in accordance with applicable laws and regulations. For the fiscal year ended March 31, 2016, the average aggregate balance of deposits held in these accounts represented less than 0.05% of the average balance of our total deposits. The fee income from the transactions attributable to these account holders was less than ¥5 million, representing less than 0.001% of our total fee income. BTMU also holds loans that were

Table of Contents

arranged prior to changes in applicable laws and regulations to borrowers in, or affiliated with, Iran, including entities owned by the Iranian government, the outstanding balance of which was less than ¥200 million, representing less than 0.001% of our total loans, as of March 31, 2016. For the fiscal year ended March 31, 2016, the aggregate gross interest and fee income relating to these loan transactions was less than ¥50 million, representing less than 0.005% of our total interest and fee income.

In addition, in accordance with the Joint Plan of Action agreed to among the P5+1 (the United States, United Kingdom, Germany, France, Russia and China) and Iran in November 2013 (which was subsequently finalized in July 2015), BTMU has been providing settlement services in connection with humanitarian trade to assist Iran in meeting its domestic needs, namely food, agricultural products, medicine and medical devices, since April 2014. The overall framework for these settlement services was based on an agreement between U.S. and Japanese authorities, and the relevant U.S. regulator has authorized the settlement services as compliant with applicable U.S. laws and regulations. The purchasers of the humanitarian goods were entities in, or affiliated with, Iran, including entities related to the Iranian government. The sellers of the humanitarian goods were entities permitted by U.S. and Japanese regulators. These transactions did not involve U.S. dollars nor clearing services of U.S. banks for the settlement of payments. These transactions were conducted through the use of special purpose yen accounts maintained with BTMU outside the United States by an Iranian financial institution which is affiliated with the Iranian government but through which these transactions were permitted to be settled. BTMU intends to continue to provide the settlement services in connection with the exports of humanitarian goods to Iran in close coordination with U.S. and Japanese authorities.

BTMU will continue to participate in these types of transactions. In addition, following Implementation Day, BTMU has begun to participate in a broader range of banking transactions involving Iran, subject to remaining Japanese and international sanctions.

Table of Contents**Introduction**

We are the holding company for The Bank of Tokyo-Mitsubishi UFJ, Ltd., or BTMU, Mitsubishi UFJ Trust and Banking Corporation, or MUTB, Mitsubishi UFJ Morgan Stanley Securities Co., Ltd., or MUMSS (through Mitsubishi UFJ Securities Holdings Co., Ltd., or MUSHD, an intermediate holding company), Mitsubishi UFJ NICOS Co., Ltd. and other subsidiaries. Through our subsidiaries and affiliated companies, we engage in a broad range of financial businesses and services, including commercial banking, investment banking, trust banking and asset management services, securities businesses, and credit card businesses, and provide related services to individuals and corporate customers in Japan and abroad.

Summary of Our Recent Financial Results

The following table presents some key figures relating to our financial results:

	Fiscal years ended March 31,		
	2014	2015	2016
	(in billions, except per share data)		
Net interest income	¥ 1,961.3	¥ 2,231.5	¥2,261.4
Provision (credit) for credit losses	(106.4)	87.0	231.9
Non-interest income	1,821.0	2,845.1	2,407.7
Non-interest expense	2,468.3	2,726.9	3,274.5
Income before income tax expense	1,420.4	2,262.7	1,162.7
Net income before attribution of noncontrolling interests	1,082.5	1,596.6	793.2
Net income attributable to Mitsubishi UFJ Financial Group	1,015.4	1,531.1	802.3
Diluted earnings per common share Earnings applicable to common shareholders of Mitsubishi UFJ Financial Group	69.98	107.50	57.51

We reported net income attributable to Mitsubishi UFJ Financial Group of ¥802.3 billion for the fiscal year ended March 31, 2016, a decrease of ¥728.8 billion from ¥1,531.1 billion for the fiscal year ended March 31, 2015. This decrease is primarily due to a decrease in non-interest income reflecting lower trading account profits, and an increase in non-interest expense reflecting an increase in impairment of goodwill and impairment of intangible assets. Domestic net income attributable to Mitsubishi UFJ Financial Group was ¥185.4 billion, and foreign net income attributable to Mitsubishi UFJ Financial Group was ¥616.9 billion, for the fiscal year ended March 31, 2016. Asia and Oceania excluding Japan, Europe, the United States, and other areas including Canada, Latin America, the Caribbean and the Middle East contributed ¥196.7 billion, ¥162.6 billion, ¥173.4 billion and ¥84.2 billion, respectively, to foreign net income attributable to Mitsubishi UFJ Financial Group.

For the fiscal year ended March 31, 2016, our domestic revenue, which consists of interest income and non-interest income attributable to our operations in Japan, was ¥2,995.6 billion, while our total foreign revenue, which consists of interest income and non-interest income attributable to our operations outside of Japan, was ¥2,417.8 billion, with revenue attributable to our operations in Asia and Oceania excluding Japan contributing ¥981.1 billion, the United States contributing ¥800.7 billion, and Europe contributing ¥326.4 billion. As a percentage of total revenue, domestic revenue increased to 55.3% for the fiscal year ended March 31, 2016 from 52.6% for the previous fiscal year.

More specifically, our net income attributable to Mitsubishi UFJ Financial Group for the fiscal year ended March 31, 2016 mainly reflected the following:

Net interest income. Net interest income for the fiscal year ended March 31, 2016 was ¥2,261.4 billion, an increase of ¥29.9 billion from ¥2,231.5 billion for the fiscal year ended March 31, 2015. Interest income increased ¥111.1 billion while interest expense increased ¥81.2 billion. The increase in interest income reflected higher interest income from foreign loans due to an increased balance of loan assets. The increase was partially offset by a decrease in interest income from domestic loans due to lower interest rates and intensified

Table of Contents

competition among lending institutions. The increase in interest expense reflected higher interest payments on foreign deposits due to an increased balance of such deposits, and larger long-term debt primarily reflecting our bond issuances.

The average interest spread decreased 0.05 percentage points to 0.85% for the fiscal year ended March 31, 2016 from 0.90% for the fiscal year ended March 31, 2015. Major factors that reduced the spread include lower interest rates on loans and short-term lending booked at domestic and foreign offices and higher interest rates on short-term U.S. dollar funding and deposits booked at domestic offices. Higher interest expense on domestic deposits was attributable to reduced net profits from trading in derivatives embedded in structured deposits.

The following table shows changes in our net interest income by changes in volume and by changes in rates for the fiscal year ended March 31, 2015 compared to the fiscal year ended March 31, 2014, and the fiscal year ended March 31, 2016 compared to the fiscal year ended March 31, 2015:

	Fiscal Year Ended March 31, 2014 versus Fiscal Year Ended March 31, 2015 Increase (decrease) due to changes in			Fiscal Year Ended March 31, 2015 versus Fiscal Year Ended March 31, 2016 Increase (decrease) due to changes in		
	Volume ⁽¹⁾	Rate ⁽¹⁾	Net change (in millions)	Volume ⁽¹⁾	Rate ⁽¹⁾	Net change
Domestic	¥ (23,228)	¥ 17,836	¥ (5,392)	¥ (44,666)	¥ (70,017)	¥ (114,683)

Net interest income as a percentage of total interest-earning assets		0.92%		0.94%		0.89%

Table of Contents

Provision (credit) for credit losses. For the fiscal year ended March 31, 2016, we recorded ¥231.9 billion of provision for credit losses, compared to ¥87.0 billion for the previous fiscal year. The provision for credit losses recorded for the fiscal year ended March 31, 2016 mainly reflected further deterioration in the business and financial performance of a large borrower in the domestic electronics manufacturing industry, and deterioration in the credit conditions of borrowers in the energy sector, which were adversely affected by declining oil and other commodity prices.

Non-interest income. The following table is a summary of our non-interest income for the fiscal years ended March 31, 2014, 2015 and 2016:

	Fiscal years ended March 31,		
	2014	2015 (in billions)	2016
Fees and commissions income	¥ 1,294.1	¥ 1,401.0	¥1,475.9
Foreign exchange gains (losses) net	(61.8)	(113.1)	192.1
Trading account profits (losses) net	(33.9)	1,148.7	276.7
Investment securities gains net	303.5	154.7	232.3
Equity in earnings of equity method investees net	110.5	172.9	176.9
Gains on sales of loans	17.7	15.0	12.2
Government grant for transfer of substitutional portion of Employees Pension Fund Plans	115.2		
Other non-interest income	75.7	65.9	41.6
Total non-interest income	¥ 1,821.0	¥ 2,845.1	¥2,407.7

Total non-interest income for the fiscal year ended March 31, 2016 was ¥2,407.7 billion, a decrease of ¥437.4 billion from ¥2,845.1 billion for the fiscal year ended March 31, 2015. The decrease was mainly due to lower trading account profits, partially offset by an increase in foreign exchange gains.

We recorded net trading account profits of ¥276.7 billion for the fiscal year ended March 31, 2016, compared to ¥1,148.7 billion for the previous fiscal year. This was mainly due to a decrease of ¥847.2 billion in net profits on trading account securities under the fair value option. This decrease reflected lower fair values of U.S. Treasury bonds. Net profits on trading account securities also decreased as trading amounts of Japanese government bonds in the market decreased. Net foreign exchange gains for the fiscal year ended March 31, 2016 were ¥192.1 billion, compared to ¥113.1 billion of net losses for the fiscal year ended March 31, 2015. As the Japanese yen appreciated against other major currencies during the fiscal year ended March 31, 2016, the translated Japanese yen value of monetary liabilities denominated in foreign currencies declined, resulting in an increase in net foreign exchange gains on other than derivative contracts. Higher trading gains on currency options and currency swaps also resulted in an increase in net foreign exchange gains on derivative contracts. These increases were partially offset by larger foreign exchange losses related to the fair value option.

Table of Contents

Non-interest expense. The following table is a summary of our non-interest expense for the fiscal years ended March 31, 2014, 2015 and 2016:

	Fiscal years ended March 31,		
	2014	2015 (in billions)	2016
Salaries and employee benefits	¥ 1,029.6	¥ 1,097.5	¥1,158.9
Occupancy expenses net	158.4	168.7	182.8
Fees and commissions expenses	222.0	248.1	285.4
Outsourcing expenses, including data processing	216.7	241.7	244.7
Depreciation of premises and equipment	103.7	108.6	99.7
Amortization of intangible assets	198.1	222.4	237.3
Impairment of intangible assets	0.3	0.7	117.7
Insurance premiums, including deposit insurance	101.1	115.5	91.9
Communications	50.9	54.7	58.3
Taxes and public charges	69.5	96.6	93.7
Impairment of goodwill	7.8	3.4	333.7
Other non-interest expenses	310.2	369.0	370.4
Total non-interest expense	¥ 2,468.3	¥ 2,726.9	¥3,274.5

Non-interest expense for the fiscal year ended March 31, 2016 was ¥3,274.5 billion, an increase of ¥547.6 billion from ¥2,726.9 billion for the fiscal year ended March 31, 2015. This increase was mainly attributable to an increase of ¥330.3 billion in impairment of goodwill relating to reporting units in the Trust Assets Business Group and Global Business Group segments, as well as an increase of ¥117.0 billion in impairment of intangible assets due to larger impairment on the core deposit intangible held by BTMU.

Core Business Groups

We operate our main businesses under an integrated business group system. This integrates the operations of BTMU, MUTB, MUMSS (through MUSHD), Mitsubishi UFJ NICOS and other subsidiaries in the following five business groups Retail Banking, Corporate Banking, Trust Assets, Global, and Global Markets, each of which is treated as a business segment. These five businesses serve as the core sources of our revenue. From April 1, 2015, Krungsri, which did not belong to any of the five business groups, started to be included as part of the Global Business Group. Operations that were not covered under these five business groups, which mainly consist of the corporate center of MUFG, BTMU, MUTB and MUMSS and the elimination of net revenues among business segments, were classified under Other. For further information, see **A. Operating Results Business Segment Analysis.**

Our business segment information is based on financial information prepared in accordance with Japanese GAAP, as adjusted in accordance with internal management accounting rules and practices and is not consistent with our consolidated financial statements included elsewhere in this Annual Report, which have been prepared in accordance with U.S. GAAP. For information on a reconciliation of operating profit under our internal management reporting system to income before income tax expense shown on the consolidated statements of income, see Note 30 to our consolidated financial statements included elsewhere in this Annual Report.

Table of Contents

Interest-earning deposits in other banks	37.36	41.02
Cash and due from banks	3.35	8.66

Total assets as of March 31, 2016 were ¥292.57 trillion, an increase of ¥11.68 trillion from ¥280.89 trillion as of March 31, 2015. As of March 31, 2016, compared to March 31, 2015, domestic assets increased ¥7.72 trillion to ¥177.00 trillion, and foreign assets increased ¥3.96 trillion to ¥115.57 trillion.

The increase in total assets is primarily due to higher volumes of both domestic and foreign loans, cash and due from banks, interest-earning deposits in other banks and interest rate derivatives, partly offset by a decrease in investment securities.

Total loans outstanding as of March 31, 2016 were ¥122.79 trillion, an increase of ¥4.52 trillion from ¥118.27 trillion as of March 31, 2015. This increase in domestic loans was mainly due to higher funding needs by national government institutions as government spending increased. The increase in foreign loans was primarily due to increased lending activity in the United States, where economic conditions continued to improve

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

at a moderate pace and lending volumes increased with respect to U.S. non-bank finance companies, including U.S. subsidiaries of Japanese manufacturing, securities and insurance companies.

Cash and due from banks increased ¥5.31 trillion to ¥8.66 trillion as of March 31, 2016 from ¥3.35 trillion as of March 31, 2015, mainly due to an increase in the volume of deposits with the Bank of Japan. Interest-earning deposits in other banks as of March 31, 2016 were ¥41.02 trillion, an increase of ¥3.66 trillion from ¥37.36 trillion as of March 31, 2015 mainly due to increased interest-earning deposits with the Bank of Japan. We increased our deposits with the Bank of Japan in response to a shift in customer preference from keeping their funds in the money markets to having their funds deposited in clearing and deposit accounts with us to avoid the impact of negative interest rates on their investments in Japan.

Table of Contents

Trading account assets as of March 31, 2016 were ¥50.83 trillion, compared to ¥46.90 trillion as of March 31, 2015. This increase is primarily due to an increase in the fair values of interest rate derivatives reflecting generally declining market interest rates.

Total investment securities as of March 31, 2016 were ¥45.65 trillion, a decrease of ¥6.56 trillion from ¥52.21 trillion as of March 31, 2015. This was mainly due to a reduction in our holding of Japanese government bonds to manage interest rate fluctuation risks particularly in light of the Bank of Japan's quantitative and qualitative monetary easing with negative interest rates and measures to purchase Japanese government bonds in the market.

The following table presents some key liability figures:

	As of March 31, 2015 2016 (in trillions)	
Total liabilities	¥ 265.61	¥277.72
Total deposits	171.99	181.44
Domestic	125.80	135.48
Overseas	46.19	45.96
Payables under repurchase agreements	20.73	22.11
Other short-term borrowings	11.55	9.36
Trading account liabilities	17.03	21.03
Long-term debt	19.97	21.97

Total liabilities as of March 31, 2016 were ¥277.72 trillion, an increase of ¥12.11 trillion from ¥265.61 trillion as of March 31, 2015. The increase was mainly due to increases in domestic deposits, trading account liabilities and long-term debt. The increase in domestic deposits reflected a shift in investor preference from money markets to deposits due to the introduction of negative interest rates in Japan. The increase in trading account liabilities was due to an increase in the fair values of interest rate derivatives. Long-term debt increased because of additional long-term borrowings and issuances of bonds.

Shareholders' Equity

The following table presents some key shareholders' equity figures:

	As of March 31, 2015 2016 (in trillions)	
Total Mitsubishi UFJ Financial Group shareholders' equity	¥ 14.68	¥14.27
Retained earnings	3.66	4.22
Accumulated other comprehensive income, net of taxes	3.07	2.30

Capital Ratios

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

The following tables present our risk-adjusted capital ratios in accordance with Basel III as of March 31, 2015 and 2016. Underlying figures are calculated in accordance with Japanese banking regulations based on information derived from our consolidated and non-consolidated financial statements prepared in accordance with Japanese GAAP, as required by the FSA. The figures in the tables below are rounded down.

Table of Contents

Common Equity Tier 1 capital ratios (minimum capital ratio required: 4.50%)

	As of March 31,	
	2015⁽²⁾⁽⁵⁾	2016
MUFG (consolidated) ⁽¹⁾	11.09%	11.63%
BTMU (consolidated)	10.77	11.08
BTMU (stand-alone)	11.76	12.30
MUTB (consolidated)	14.70	16.01
MUTB (stand-alone)	14.31	16.58

Tier 1 Capital ratios (minimum capital ratio required: 6.00%)

	As of March 31,	
	2015⁽³⁾⁽⁵⁾	2016
MUFG (consolidated)	12.58%	13.24%
BTMU (consolidated)	12.21	12.71
BTMU (stand-alone)	13.38	14.25
MUTB (consolidated)	15.26	16.82
MUTB (stand-alone)	14.86	17.45

Total Capital ratios (minimum capital ratio required: 8.00%)

	As of March 31,	
	2015⁽⁴⁾⁽⁵⁾	2016
MUFG (consolidated)	15.62%	16.01%
BTMU (consolidated)	15.45	15.66
BTMU (stand-alone)	17.03	17.51
MUTB (consolidated)	19.15	19.97
MUTB (stand-alone)	19.11	21.08

Notes:

- Effective March 31, 2016, the FSA's capital conservation buffer, countercyclical buffer and G-SIB surcharge requirements became applicable to Japanese banking institutions with international operations conducted through foreign offices. As a result, in addition to the 4.50% minimum Common Equity Tier 1 capital ratio, MUFG is required to maintain a capital conservation buffer of 0.625% and a G-SIB surcharge of 0.375% as of March 31, 2016. As of the same date, the countercyclical buffer applicable to MUFG is nil.
- Common Equity Tier 1 capital ratio for MUFG as of March 31, 2015 has been revised from 11.14% to 11.09% on a consolidated basis. Common Equity Tier 1 capital ratio for BTMU as of March 31, 2015 has been revised from 10.88% to 10.77% on a consolidated basis and 11.90% to 11.76% on a stand-alone basis. Common Equity Tier 1 capital ratio for MUTB as of March 31, 2015 has been revised from 14.35% to 14.31% on a stand-alone basis.
- Tier 1 capital ratio for MUFG as of March 31, 2015 has been revised from 12.62% to 12.58% on a consolidated basis. Tier 1 capital ratio for BTMU as of March 31, 2015 has been revised from 12.33% to 12.21% on a consolidated basis and 13.54% to 13.38% on a stand-alone basis. Tier 1 capital ratio for MUTB as of March 31, 2015 has been revised from 14.90% to 14.86% on a stand-alone basis.
- Total capital ratio for MUFG as of March 31, 2015 has been revised from 15.68% to 15.62% on a consolidated basis. Total capital ratio for BTMU as of March 31, 2015 has been revised from 15.61% to 15.45% on a consolidated basis and 17.23% to 17.03% on a stand-alone basis. Total capital ratio for MUTB as of March 31, 2015 has been revised from 19.16% to 19.11% on a stand-alone basis.
- The revisions reflect corrections of errors in the risk weighting applied to certain assets, mostly residential mortgage loans, and certain other adjustments made under Basel I standards to obtain amounts that were used for floor adjustments in determining the amounts of risk-weighted assets of MUFG, BTMU and MUTB under Basel III standards. Although these revisions did not affect our compliance with the applicable Japanese regulatory capital requirements, we voluntarily revised the information previously submitted to the FSA and publicly announced the revisions.

Our management believes that, as of March 31, 2016, we were in compliance with all capital adequacy requirements to which we were subject.

Table of Contents**Leverage Ratios**

The following table presents our leverage ratios in accordance with Basel III as of March 31, 2015 and 2016. Underlying figures are calculated in accordance with Japanese banking regulations based on information derived from our consolidated and non-consolidated financial statements prepared in accordance with Japanese GAAP, as required by the FSA. The figures in the table below are rounded down. The Basel Committee on Banking Supervision's currently proposed minimum leverage ratio is 3%.

	March 31, 2015	March 31, 2016
MUFG (consolidated)	4.72%	4.79%
BTMU (consolidated)	4.64	4.79
MUTB (consolidated)	4.72	4.28

Liquidity Coverage Ratios

The following table presents our liquidity coverage ratios in accordance with Basel III as of September 30, 2015 and March 31, 2016. Underlying figures are calculated in accordance with Japanese banking regulations based on information derived from our consolidated and non-consolidated financial statements prepared in accordance with Japanese GAAP, as required by the FSA. The percentages in the table below are rounded down. The minimum ratios required as of September 30, 2015 and March 31, 2016 were 60% and 70%, respectively.

	September 30, 2015⁽¹⁾	March 31, 2016⁽²⁾
MUFG (consolidated)	130.4%	130.0%
BTMU (consolidated)	130.8	133.9
BTMU (stand-alone)	141.3	144.2
MUTB (consolidated)	154.6	119.4
MUTB (stand-alone)	182.3	135.9

Notes:

- (1) Each of the ratios is calculated by dividing the month-end average balance of High-Quality Liquid Assets as of the end of July, August and September 2015 by the monthly average amount of total net cash outflows for the same three months.
- (2) Each of the ratios is calculated by dividing the month-end average balance of High-Quality Liquid Assets as of the end of January, February and March 2016 by the monthly average amount of total net cash outflows for the same three months.

Business Environment

Through our subsidiaries and affiliated companies, we engage in a broad range of financial businesses and services, including commercial banking, investment banking, trust banking, asset management, securities and credit card businesses, and provide related services to individuals primarily in Japan and the United States and to corporate customers around the world. Our results of operations and financial condition are exposed to changes in various external economic factors, including:

general economic conditions,

interest rates,

foreign currency exchange rates, and

stock and real estate prices.

During the fiscal year ended March 31, 2016, uncertainties surrounding the global economy grew, particularly in the latter half of the fiscal year. Although the economic conditions in developed countries remained on gradually improving trends, concerns over the prolonged slowdown of the Chinese economy and declining oil and other commodity prices adversely affected global stock markets.

Table of Contents

In Japan, under the Abenomics policy introduced in 2012 and the Bank of Japan's quantitative and qualitative monetary easing policy introduced in April 2013 and expanded in October 2014, economic conditions continued to gradually improve, but the momentum weakened as concerns grew over the effectiveness of the government's economic measures in the longer-term. In the United States, the economy remained on a recovering trend with an improving employment environment, but declining oil and other commodity prices negatively impacted the energy and related sectors. The Eurozone economy was positively affected by the depreciation of the Euro against the U.S. dollar and declining oil and other commodity prices, while concerns over the fiscal conditions in Greece and other peripheral countries still remained. Moreover, the result of the U.K. referendum in June 2016 with a majority voting to leave the European Union added further volatility and uncertainty in the financial market.

Economic Environment in Japan

During the fiscal year ended March 31, 2016, Japan's economy stayed on a moderately improving trend, although manufacturing and exports weakened mainly due to the slowdown in emerging economies. Interest rates continued to decline under the Bank of Japan's monetary policy. In January 2016, the Bank of Japan commenced a quantitative and qualitative monetary easing with negative interest rates policy and applied a negative interest rate of minus 0.1% to the Policy-Rate Balances, which are a part of current account amounts held by financial institutions at the Bank of Japan, in an effort to achieve the price stability target of 2%. The stock market experienced significant volatility during the fiscal year, with stock prices on an upward trend until August 2015 and the Nikkei Stock Average rising above ¥20,000 for the first time in 15 years, while the Japanese yen depreciated against the U.S. dollar. However, stock prices began to decline in late August 2015 and have since been on a declining trend as concerns grew over the slowdown of the Chinese economy and declining oil and other commodity prices, while the Japanese yen has been on an appreciating trend against the U.S. dollar and the Euro since late August 2015.

The following table sets forth the seasonally adjusted growth rates of Japan's real GDP and its components on a quarter-on-quarter basis for the periods indicated:

	Calendar Year												(Unit: %)
	2013				2014				2015				
	2Q	3Q	4Q	1Q	2Q	3Q	4Q	1Q	2Q	3Q	4Q	1Q

Source: Cabinet Office, Government of Japan

During the fiscal year ended March 31, 2016, Japan's GDP growth lacked strong momentum. Private consumption was stagnant without strong stimuli to increase spending. Although exports to the United States and the Eurozone generally grew, exports to China and other emerging markets, particularly countries that produce oil and gas, decreased.

Table of Contents

The following table sets forth the growth rates of Japan's nationwide consumer price indices on a year-on-year basis for the periods indicated:

	Calendar Year												(Unit: %)		
	2015					2016

Source: Ministry of Internal Affairs and Communications of Japan

Japan's Consumer Price Index, or CPI, began to decline towards the end of the fiscal year ended March 31, 2016, despite the anti-deflation monetary measures of the Bank of Japan, which are designed to achieve a price stability target of 2% in terms of the year-on-year rate of growth in the CPI.

The following table sets forth Japan's nationwide unemployment rates for the periods indicated:

	Calendar Year												(Unit: %)	
	2015					2016

Source: Ministry of Internal Affairs and Communications of Japan

As the Bank of Japan enhanced its quantitative and qualitative monetary easing policy, interest rates in Japan remained at historical low levels. After the 10-year Japanese government bond yield rose to around 0.5% in May and June 2015, with heightened expectations for an increase in U.S. policy interest rates, the yield began to decline again. In January 2016, the Bank of Japan commenced a quantitative and qualitative monetary easing with negative interest rates policy, increased the Bank of Japan's aggregate holding of Japanese government bonds by approximately ¥80 trillion each year and applied a negative interest rate of minus 0.1% to the Policy-Rate Balances, which are a part of current account amounts held by financial institutions at the Bank of Japan aiming to achieve the price stability target of 2%. Short-term interest rates declined to below zero and the 10-year Japanese government bond yield turned negative in February 2016 and has since remained below zero. Reflecting investor risk aversion in response to the result of the U.K. referendum in June 2016, the 10-year Japanese government bond yield decreased further and reached negative 0.296%, currently fluctuating around negative 0.285%.

The following chart shows the interest rate trends in Japan since April 2014:

Source: Bank of Japan

Table of Contents

The closing price of the Nikkei Stock Average, which is the average of 225 blue chip stocks listed on the Tokyo Stock Exchange, increased ¥1,661, or 8.6%, from ¥19,206.99 on March 31, 2015 to ¥20,868.03 on June 24, 2015 and remained at that level until August 2015, as the Japanese yen depreciated against other major currencies such as the U.S. dollar and the Euro. However, stock prices declined globally in August 2015 as concerns over the slowdown of the Chinese economic growth arose following the devaluation of the Chinese yuan and oil prices decreased further. After declining to ¥15,000 in February 2016, the Nikkei Stock Average rose to ¥17,000. Reflecting investor risk aversion in response to the result of the U.K. referendum held in June 2016, the Nikkei Stock Average went down again to ¥14,864.01, currently fluctuating around ¥15,500.

The following chart shows the daily closing price of the Nikkei Stock Average since April 2014:

The exchange rate between the Japanese yen and the U.S. dollar was ¥120.13 to the U.S. dollar as of March 31, 2015 and ¥112.57 to the U.S. dollar as of March 31, 2016. The exchange rate generally fluctuated between ¥120 to the U.S. dollar and ¥125 to the U.S. dollar from March 2015 to December 2015, while reaching ¥125.63 to the U.S. dollar on June 5, 2015, as expectations heightened for an increase in U.S. policy interest rates. The depreciating trend reversed in January 2016, with the Japanese yen appreciating to below ¥110 to the U.S. dollar in early April 2016, as risk-averse sentiment heightened in the financial market. Reflecting investor risk aversion in response to the result of the U.K. referendum in June 2016, the Japanese yen appreciated further against the U.S. dollar and reached ¥99.02 to the U.S. dollar, currently fluctuating around ¥100.50 to the U.S. dollar.

Table of Contents

The following chart shows the foreign exchange rates expressed in Japanese yen per U.S. dollar since April 2014:

Source: Bank of Japan

The exchange rate between the Japanese yen and the Euro was ¥128.91 to the Euro as of March 31, 2015 and ¥128.11 to the Euro as of March 31, 2016. Although the exchange rate reached the level of ¥140 in June 2016, the Euro depreciated to around ¥125 against the Japanese yen reflecting the negative interest rate policy of the European Central Bank, or ECB, maintained throughout the period. Reflecting investor risk aversion in response to the result of the U.K. referendum in June 2016, the Japanese yen appreciated further against the Euro and reached ¥109.57 to the Euro, currently fluctuating around ¥112.00 to the Euro.

According to a land price survey conducted by the Japanese government, the average residential land price in Japan declined 0.2% between January 1, 2015 and January 1, 2016. The average commercial land price in Japan increased 0.9% during the same period. In the three major metropolitan areas of Tokyo, Osaka and Nagoya, the average residential land price increased 0.6%, 0.1% and 0.8%, respectively, between January 1, 2015 and January 1, 2016, and the average commercial land price in those areas also increased 2.7%, 3.3% and 2.7%, respectively, during the same period. In the local regions of Japan, which consist of regions other than the three major metropolitan areas, the average residential land price declined 0.7% between January 1, 2015 and January 1, 2016, and the average commercial land price also declined 0.5% during the same period.

According to Teikoku Databank, a Japanese research institution, the number of companies that filed for legal bankruptcy in Japan from April 2015 to March 2016, was 8,408 bankruptcies, a decrease of 7.0% from the previous fiscal year. The number has decreased for the past seven consecutive years and fell below 9,000 for the first time in ten years. On a quarterly basis, the number declined year-on-year for fourteen consecutive quarters through the second quarter of the fiscal year ended March 31, 2016. After increasing in the third quarter, the number declined again in the fourth quarter. The total liabilities of companies that filed for legal bankruptcy in Japan in the twelve months ended March 31, 2016 was ¥1.906 billion, the second lowest since 2000. By industry, the number of companies that filed for legal bankruptcy in Japan during the same period decreased in each industry category. In particular, the number in each of the construction, manufacturing and warehousing industries was the lowest since the fiscal year ended March 31, 2001. However, the number of legal bankruptcy filings associated with the negative impact of the slowdown of the Chinese economy increased 57.4% to 96 in the fiscal year ended March 31, 2016, compared to the previous fiscal year.

Table of Contents**International Financial Markets**

During the fiscal year ended March 31, 2016, the U.S. economy generally continued its recovery with improved labor and income statistics while the energy industry and other related sectors were affected by declining oil and other commodity prices. The Eurozone economy generally continued to experience a low growth rate with continuing economic difficulties in some European peripheral countries and relatively low inflation rates. Asian economies also faced a slowdown, especially in China where GDP growth fell to below 7%.

U.S. Economy

The U.S. economy continued to improve during the fiscal year ended March 31, 2016, with positive GDP growth mainly driven by stronger personal consumption and private residential investment. The FRB raised the target range for the federal funds rate to between 0.25% and 0.5% in December 2015, marking the first interest rate increase in nearly a decade. In addition to the central bank's monetary policy, there still remain various factors that could adversely affect the U.S. economy, including fluctuations in commodity prices and geopolitical conflicts.

The following table sets forth the growth rates of U.S. real GDP and its components on a quarter-on-quarter basis for the periods indicated:

	Calendar Year												(Unit: %)
	2013				2014				2015

Source: U.S. Department of Commerce Bureau of Economic Analysis

The Consumer Price Index for All Urban Consumers, or CPI-U, rose 0.9% before seasonal adjustment over the 12 months ended March 31, 2016. CPI-U on a seasonally adjusted month-on-month basis increased 0.4% in April 2016 and 0.2% in May 2016.

The Dow Jones Industrial Average decreased \$91.03, or 0.51%, from \$17,776.12 on March 31, 2015 to \$17,685.09 on March 31, 2016. The index fluctuated around \$18,000 between April 2015 and July 2015, and declined to below \$17,000 in August 2015 as concerns over the strength of the Chinese economy arose following the devaluation of the Chinese yuan, resulting in risk-averse behavior by market participants. The index rose back to nearly \$18,000 in October 2015 as investor demand gradually recovered, and fluctuated around \$17,500 for the remainder of the calendar year 2015. However, reflecting the risk-averse behavior in reaction to concerns about the Chinese economy and declining oil prices, the index decreased to below \$16,000 again in January 2016. Subsequently, the trend reversed again as the market

expectation for the FRB's decision to raise policy interest rates waned, and the index rose to above \$18,000 in April 2016. Reflecting investor risk aversion in response to the result of the U.K. referendum in June 2016, the Dow Jones Industrial Average decreased to \$17,063.08, currently fluctuating around \$17,500.

Table of Contents

Interest rates on U.S. Treasury bonds were volatile in the fiscal year ended March 31, 2016, reflecting the uncertainty surrounding the FRB's monetary policy. The 10-year U.S. Treasury bond yield decreased from 1.92% on March 31, 2015 to 1.76% on March 31, 2016. With interest rates globally on an upward trend, influenced by interest rates increasing rapidly in European bond markets in May 2015, the yield reached nearly 2.5% in June 2015. However, as concerns over the strength of the Chinese economy arose in August 2015 and investors sought comparatively safer assets, the yield decreased to around 2.0% in late September 2015. After October 2015, the yield reflected the anticipated 0.25% policy interest rate increase by the FRB, and fluctuated around 2.2% for the remainder of the calendar year 2015. However, as risk-averse sentiment rose in the market again, the yield declined to 1.7% in February 2016 and has since fluctuated around that level. Reflecting investor risk aversion in response to the result of the U.K. referendum in June 2016, the 10-year U.S. Treasury bond yield decreased further to 1.38%, currently fluctuating around 1.40%

Housing prices showed some signs of improvement during the fiscal year ended March 31, 2016. As of March 31, 2016, the Federal Housing Finance Agency's U.S. house price index exhibited a nineteenth consecutive quarterly increase in the purchase-only, seasonally adjusted index. This also marked the seventeenth consecutive quarter where the house price index showed an increase compared to the same quarter of the previous year.

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

The Eurozone's economic growth continued at a slow rate during the fiscal year ended March 31, 2016, positively affected by the depreciation of the Euro against the U.S. dollar and declining oil and other commodity prices, while concerns over the fiscal conditions in Greece and other peripheral countries still remained.

During the fiscal year ended March 31, 2016, the ECB maintained low interest rates and a quantitative easing policy, which included a program to purchase €60 billion in bonds each month to revitalize the Eurozone economy and counter deflation. In December 2015, the ECB adjusted the interest rate on the deposit facility by 10 basis points to negative 0.30% and extended the bond purchase program by six months until at least

Table of Contents

March 2017. In March 2016, the interest rates on the main refinancing operations, the marginal lending facility and the deposit facility decreased to 0.00%, 0.25% and negative 0.40%, respectively.

Long-term interest rates in the Eurozone, including German Bunds and French Obligations Assimilables du Trésor, or OATs, fluctuated significantly during the fiscal year ended March 31, 2016. The yield on 10-year German Bunds remained at low levels of around 0.1% in April 2015 as the ECB continued to purchase such bonds. Low yields adversely affected the market demand for such bonds, and the yield on 10-year German Bunds rose to nearly 1.0% in June 2015 and remained volatile as investors sold down their holdings of such bonds for risk reduction purposes. The yield on 10-year German Bunds was on a declining trend after June 2015 as the risk tolerance of investors gradually recovered, and decreased to and remained between approximately 0.15% and 0.30% in March 2016, while the yields on German Bunds with shorter maturities fell into the negative range as the ECB adjusted the interest rate on its deposit facility down to negative rates. The yield on 10-year French OATs similarly declined to below 0.4% in April 2015, rose to around 1.3% in June 2015, and declined again to around 0.45% in June 2016. Reflecting investor risk aversion in response to the result of the U.K. referendum in June 2016, the yields on 10-year German Bund and 10-year French OATs decreased to negative 0.205% and 0.101%, respectively.

The following table sets forth Eurozone unemployment rates on a month-on-month basis for the periods indicated:

	Calendar Year														(Unit: %)
	2015					2016

Asian Economy

In Asia excluding Japan, economic growth stagnated. In particular, China's economic growth continued to decelerate, and its real GDP growth rate declined to below 7% in the calendar year 2015 mainly due to suppressed investment. In other Asian economies, while low inflation contributed to improved private consumption, weak exports negatively affected their growth. The real GDP growth rates of Thailand, Indonesia and the Philippines were around 3%, 5% and 7%, respectively, for the quarter ended March 31, 2016 compared to the immediately preceding quarter.

Recent Developments

During the fiscal year ended March 31, 2016, we continued to pursue global growth opportunities, including opportunities to expand our business in Southeast Asia and the operations of MUB in the United States. We plan to continue to selectively review and consider growth opportunities that will enhance our global competitiveness. We will monitor regulatory developments and pursue prudent transactions that will create a strong capital structure to enable us to contribute to the real economy, both domestically and globally, as a provider of a stable source of funds and high quality financial services. In order to respond to the increasingly complex market and legal risks, we continue to endeavor to enhance our compliance and internal control frameworks.

Redemption of Preferred Securities Issued by Special Purpose Company

In May 2016, we decided to redeem in full \$2.3 billion of U.S. dollar-denominated non-cumulative preferred securities issued by an overseas special purpose company in the Cayman Islands called MUFG Capital Finance 1 Limited and 750.0 million of euro-denominated non-cumulative preferred securities issued by another overseas special purpose company in the Cayman Islands called MUFG Capital Finance 2 Limited. The effective date of the planned redemption is July 25, 2016. We have decided to redeem these preferred securities because, under the Basel III standard, these preferred securities would no longer be considered Tier 1 capital after their

Table of Contents

first call date, which is July 25, 2016. Based on the Japanese GAAP information used to calculate our capital ratios as of March 31, 2016, we estimate that the planned redemption in July 2016 would result in a decline in our capital ratios by approximately 0.1 percentage point.

Issuances of Senior Debt Securities for TLAC Purposes

In March 2016, we issued to global institutional investors \$5 billion aggregate principal amount of senior notes that were intended to qualify as Total Loss Absorbing Capacity, or TLAC, debt. In April 2016, we issued an additional \$2 billion aggregate principal amount of such notes.

Under the Financial Stability Board's TLAC standard, we are required to hold TLAC debt in an amount not less than 16% of our risk-weighted assets and 6% of the applicable Basel III leverage ratio denominator by January 1, 2019. We plan to issue additional TLAC-eligible senior debt securities to meet the requirements, although TLAC requirements for Japanese financial institutions, including us, have not yet been finalized. See Item 4.B. Information on the Company Business Overview Supervision and Regulation Japan Total loss-absorbing capacity.

Issuances of Basel III-Compliant Domestic Subordinated Bonds

In March 2016, we issued in a public offering in Japan ¥300.0 billion aggregate principal amount of unsecured perpetual subordinated Additional Tier 1 notes. These notes are subject to our discretion to cease interest payments and a write-down of the principal upon the occurrence of certain events, including when our Common Equity Tier 1 capital ratio declines below 5.125%, when we are deemed to be at risk of becoming non-viable or when we become subject to bankruptcy proceedings, but, following any write-down, the principal may be reinstated to the extent permitted by the Japanese banking regulator.

In October 2015, we issued in a public offering in Japan ¥150.0 billion aggregate principal amount of unsecured perpetual subordinated Additional Tier 1 notes with similar terms. It was our first offering of Basel III-compliant subordinated bonds to the public. We expect to issue additional Basel III-compliant subordinated bonds to enhance our regulatory capital.

Implementation of Share Repurchase Programs

During May and June 2016, we repurchased 190,614,800 shares of our common stock for ¥99,999,963,346 under a share repurchase program that was adopted in May 2016 and completed in June 2016. Under the program, we were authorized by the Board of Directors to repurchase up to the lesser of an aggregate of 230,000,000 shares of our common stock and an aggregate of ¥100.0 billion between May 17, 2016 and June 30, 2016. Based on the Japanese GAAP information used to calculate our capital ratios as of March 31, 2016, we estimate that the May 2016 program would result in a decline in our capital ratios by approximately 0.1 percentage point.

During November and December 2015, we repurchased 121,703,700 shares of our common stock for ¥99,999,982,169 under a share repurchase program that was adopted in November 2015 and completed in December 2015. Under the program, we were authorized by the Board of Directors to repurchase up to the lesser of an aggregate of 140,000,000 shares of our common stock and an aggregate of ¥100.0 billion between November 16, 2015 and December 31, 2015. Based on the Japanese GAAP information used to calculate our capital ratios as of September 30,

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

2015, we estimate that the November 2015 program would result in a decline in our capital ratios by approximately 0.1 percentage point.

During May and June 2015, we repurchased 111,151,800 shares of our common stock for ¥99,999,972,728 under a share repurchase program that was adopted in May 2015 and completed in June 2015. Under the program, we were authorized by the Board of Directors to repurchase up to the lesser of an aggregate of 160,000,000 shares of our common stock and an aggregate of ¥100.0 billion between May 18, 2015 and July 31, 2015. Based on the Japanese GAAP information used to calculate our capital ratios as of March 31, 2015, the May 2015 program resulted in a decline in our capital ratios by approximately 0.1 percentage point.

Table of Contents

The purposes of the above three programs were to enhance shareholder value, to improve our capital efficiency and to allow the implementation of flexible capital policies in response to changes in the business environment.

Business and Capital Alliance with Hitachi

In May 2016, MUFG, BTMU and Mitsubishi UFJ Lease & Finance Company Limited, or MUL, agreed with Hitachi, Ltd., and Hitachi Capital Corporation, or HC, to form a business alliance to strengthen the financial operations of MUL and HC, including building an open financial platform. In addition, MUFG and MUL agreed to acquire 23.0% and 4.2% of the outstanding shares of HC, respectively, from Hitachi for ¥3,400 per share in August 2016, subject to a final share purchase agreement, regulatory approval and other conditions precedent. HC also agreed to acquire 26,678,000 shares of MUL from the market. Furthermore, each of MUFG and MUL expects to appoint a representative to HC's board of directors, and HC expects to appoint a representative to MUL's board of directors, subject to shareholder approval necessary for such appointments. The five parties to the alliance plan to engage in further discussions with an aim to agree on details of the financial platform, while MUL and HC are expected to commence a discussion at a later date, as appropriate, on ways to further strengthen their relationship, including, as an option, integrating their operations in the future.

Capital and Business Alliance with Security Bank Corporation

In April 2016, BTMU acquired a 20.0% equity interest, on a fully diluted basis, in Security Bank Corporation, a leading commercial bank in the Philippines, through a private placement of newly issued common shares and preferred shares with voting rights for 245 Philippine peso per common share and 0.1 Philippine peso per preferred share, or 36.9 billion Philippine peso, or ¥91.3 billion, in the aggregate. As part of the capital and business alliance between BTMU and Security Bank, BTMU has two directors on Security Bank's board of directors. Security Bank is listed on the Philippines Stock Exchange and is not part of any local conglomerate in the Philippines. Security Bank is expected to be treated as an equity method investee of BTMU. BTMU and Security Bank will collaborate to offer enhanced services by leveraging their expertise and customer bases.

Mitsubishi UFJ Fund Services' Acquisition of UBS Global Asset Management's Alternative Fund Services Business

In December 2015, Mitsubishi UFJ Fund Services Holdings Limited, a global asset servicing subsidiary of MUTB, acquired the alternative fund services business of UBS Global Asset Management, a global fund administrator providing professional services for hedge funds, funds of hedge funds, private equity funds and real estate structures, for ¥24.6 billion in cash and recorded ¥2.7 billion of goodwill and ¥7.6 billion of intangible assets. We provide a full suite of global asset administration services, including fund administration, custody, securities lending and foreign exchange as a one stop shop under the MUFG Investor Services brand, and through acquisitions completed in recent periods, have enhanced our competitiveness and scale of operations in the global fund administration market with the aim to be a global industry-leading fund administrator. As a result of the acquisition in December 2015, we became the seventh largest fund service provider in the world in terms of assets under administration with total assets under administration of \$266 billion across 2,300 funds. We intend to continue to seek opportunities to strengthen our operational abilities, to further improve the quality of our services, and to expand our global network through acquisitions and investments.

Implementation of Measures to Comply with U.S. Enhanced Prudential Standards

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

Effective July 1, 2016, MUAH was designated as our U.S. intermediate holding company to comply with the FRB's enhanced prudential standards. As of the same date, BTMU, MUTB and MUSHD transferred to MUAH their ownership interests in their U.S. subsidiaries and affiliates, namely, BTMU Capital Corporation, BTMU Securities, Inc., MUFG Americas Capital Company, Morgan Stanley MUFG Loan Partners, LLC, MUFG Fund Services (USA) LLC, and MUFG Securities Americas Inc. In addition, as of the same date, BTMU transferred 3.8% of its own 100% ownership interest in MUAH to MUFG. Resources and management attention are being expended to implement an appropriate governance structure with an effective internal control system for our U.S. bank and non-bank subsidiaries to comply with applicable regulatory requirements.

Table of Contents**Exposures to Selected European Countries**

Several European countries, including Italy, Spain, Portugal, Ireland and Greece, have recently been experiencing weakness in their economic and fiscal situations in varying degrees of severity. We are closely monitoring our exposures in these countries.

The following table sets forth information about our aggregate exposure to selected European countries of BTMU, MUTB and MUSHD, which were the subsidiaries holding the exposure, as of March 31, 2016. The information in the table is categorized by counterparties, consisting of sovereign, non-sovereign financial institutions and non-sovereign non-financial institutions, and by type of financial instruments, which include loans, securities, derivatives and credit default swap, or CDS, protection (sold and bought). The securities exposure includes held-to-maturity, available-for-sale and trading securities. The information included in the table below is based on information compiled for internal risk management purposes only, and not for financial accounting purposes. The exposures are determined based on the country in which the borrower's head office is located. However, in the case of a subsidiary located in a country different from that in which its parent company is located, the country exposure is determined based on the country in which the subsidiary is located.

Notes:

- (1) Securities include held-to-maturity securities, available-for-sale securities, and trading securities. Held-to-maturity securities are shown at amortized cost, and available-for-sale securities and trading securities are shown at fair value.
- (2) Derivatives amounts represent current exposures, taking into consideration legally enforceable master netting agreements.
- (3) CDS protection amounts represent notional amounts.

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

- (4) Net exposure represents gross exposure (funded and unfunded), net of CDS protection bought.
- (5) To the extent financial instruments are originally denominated in currencies other than U.S. dollars, the exposure amounts have been translated into U.S. dollars at an internal exchange rate used for our internal risk management purposes as of March 31, 2016.
- (6) Negative amounts represent short positions.

Table of Contents

Based on information collected for internal risk management purposes as of March 31, 2016, the consolidated exposure of BTMU, MUTB and MUSHD listed above to Italy, Spain, Portugal, Ireland and Greece represented less than 1.0% of our total assets.

As of March 31, 2016, other than BTMU, MUFJ group companies had limited exposures to those European countries. As of the same date, BTMU, MUTB and MUSHD held no sovereign bonds issued by those European countries.

As of March 31, 2016, we had a net exposure totalling \$10.1 billion relating to the European peripheral countries identified in the table above. These exposures mainly consisted of commercial loan exposures to corporations and structured finance transactions. Our exposures to Italy and Spain mainly related to the infrastructure sector, such as electricity, gas and telecommunications. Our loan-related exposures to financial institutions in those countries were limited and not material.

In addition to these exposures, we also have indirect exposures. Examples of indirect exposures include country risk exposures related to the collateral received on secured financing transactions. These indirect exposures are managed in the normal course of business through our credit, market and operational risk management framework.

Critical Accounting Estimates

Our consolidated financial statements included elsewhere in this Annual Report are prepared in accordance with U.S. GAAP. Many of the accounting policies require management to make difficult, complex or subjective judgments regarding the valuation of assets and liabilities. The accounting policies are fundamental to understanding our operating and financial review and prospects. The notes to our consolidated financial statements included elsewhere in this Annual Report provide a summary of our significant accounting policies. The following is a summary of the critical accounting estimates:

Allowance for Credit Losses

The allowance for credit losses represents management's best estimate of probable losses in our loan portfolio. The evaluation process, including credit-ratings and self-assessments, involves a number of estimates and judgments. The allowance is based on two principles of accounting guidance: (1) the guidance on contingencies requires that losses be accrued when they are probable of occurring and can be estimated, and (2) the guidance on accounting by creditors for impairment of a loan requires that losses be accrued based on the difference between the loan balance, on the one hand, and the present value of expected future cash flows discounted at the loan's original effective interest rate, the fair value of collateral or the loan's observable market value, on the other hand.

We divide our loan portfolio into the following segments: Commercial, Residential, Card, MUAH and Krungsri based on the segments used to determine the allowance for credit losses. We further divide the Commercial segment into classes based on initial measurement attributes, risk characteristics, and our approach to monitoring and assessing credit risk. We determine the appropriate level of the allowance for credit losses for each of our loan portfolios by evaluating various factors and assumptions, such as the borrower's credit rating, collateral value, historical loss experience, and probability of insolvency based on the number of actual delinquencies as well as existing economic conditions. We update these factors and assumptions on a regular basis and upon the occurrence of unexpected changes in the economic environment.

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

For the Commercial, MUAH and Krungsri segments, our allowance for credit losses primarily consists of allocated allowances. The allocated allowance comprises (1) an allowance for loans individually evaluated for impairment, (2) an allowance for large groups of smaller-balance homogeneous loans, and (3) a formula allowance. The allocated allowance within the Commercial segment also includes an allowance for country risk exposure. The allowance for country risk exposure within the Commercial segment covers transfer risk which is not specifically covered by other types of allowance. Both the allowance for country risk exposure and the

Table of Contents

formula allowance are provided for performing loans that are not subject to either the allowance for loans individually evaluated for impairment or the allowance for large groups of smaller-balance homogeneous loans.

The allowance for credit losses within the MUAH segment also includes an unallocated allowance which captures losses that are attributable to economic events in various industry or geographic sectors whose impact on our loan portfolio in this segment have occurred but have yet to be recognized in the allocated allowance.

For the Residential and Card segments, the loans are smaller-balance homogeneous loans that are pooled by the risk ratings based on the number of delinquencies. We principally determine the allowance for credit losses based on the probability of insolvency, the number of actual delinquencies and historical loss experience.

For all portfolio segments, key elements relating to the policies and discipline used in determining the allowance for credit losses are our credit classification and the related borrower categorization process. Each of these components is determined based on estimates subject to change when actual events occur. The categorization is based on conditions that may affect the ability of borrowers to service their debt, taking into consideration current financial information, historical payment experience, credit documentation, public information, analyses of relevant industry segments and current trends. In determining the appropriate level of allowance, we evaluate the probable loss by category of loan based on its type and characteristics.

In addition to the allowance for credit losses on our loan portfolio, we maintain an allowance for credit losses on off-balance sheet credit instruments, including commitments to extend credit, a variety of guarantees and standby letters of credit and other financial instruments. This allowance is included in other liabilities.

Determining the adequacy of the allowance for credit losses requires the exercise of considerable judgment and the use of estimates, such as those discussed above. Our actual losses could be more or less than the estimates. To the extent that actual losses differ from management's estimates, additional provisions for credit losses may be required that would adversely impact our operating results and financial condition in future periods. For further information regarding our methodologies used in establishing the allowance for credit losses by portfolio segments and allowance for credit losses policies, see Note 1 to our consolidated financial statements included elsewhere in this Annual Report and B. Liquidity and Capital Resources Financial Condition Loan Portfolio.

For more information on our credit and borrower ratings, see Item 11. Quantitative and Qualitative Disclosures about Credit, Market and Other Risk Credit Risk Management.

Impairment of Investment Securities

U.S. GAAP requires the recognition in earnings of an impairment loss on investment securities for a decline in fair value that is other than temporary. Determination of whether a decline is other than temporary often involves estimating the outcome of future events. Management judgment is required in determining whether factors exist that indicate that an impairment loss has been incurred at the balance sheet date. These judgments are based on subjective as well as objective factors. We conduct a review semi-annually to identify and evaluate investment securities that have indications of possible impairment. The assessment of other-than-temporary impairment requires judgment and therefore can have an impact on the results of operations. Impairment is evaluated considering various factors, and their significance varies from case to case.

Debt and marketable equity securities. In determining whether a decline in fair value below cost is other than temporary for a particular equity security, we generally consider factors such as the ability and positive intent to hold the investments for a period of time sufficient to allow for any anticipated recovery in fair value. In addition, an other-than-temporary impairment is recognized in earnings for marketable equity securities when one of the following criteria is met:

the fair value of investments is 20% or more below cost as of the end of the reporting period,

due to the financial condition and near-term prospects of the issuer, the issuer is categorized as Likely to become Bankrupt, Virtually Bankrupt or Bankrupt or de facto Bankrupt status under the Japanese banking regulations,

Table of Contents

the fair value of the investment has been below cost for six months or longer, or

the fair value of the securities is below cost and a decision has been made to sell the securities.

For debt securities, an other-than-temporary impairment is recognized in earnings if we have an intent to sell a debt security or if it is more likely than not we will be required to sell the debt security before recovery of its amortized cost basis. When we do not intend to sell a debt security and if it is more likely than not that we will not be required to sell the debt security before recovery of its amortized cost basis, the credit component of an other-than-temporary impairment of the debt security is recognized in earnings, but the noncredit component is recognized in accumulated other comprehensive income.

Certain securities held by BTMU, MUTB and certain other subsidiaries, which primarily consist of debt securities issued by the Japanese national government and generally considered to be of minimal credit risk, are determined not to be impaired as the respective subsidiaries do not have an intention to sell the securities, or it is more likely than not that those subsidiaries will not be required to sell before recovery of their amortized cost basis.

The determination of other-than-temporary impairment for certain debt securities held by MUAH, which primarily consist of residential mortgage-backed securities and certain asset-backed securities, is made on the basis of a cash flow analysis and monitoring of the performance of such securities, as well as whether MUAH intends to sell, or is more likely than not required to sell, the securities before recovery of their amortized cost basis.

Nonmarketable equity securities. Nonmarketable equity securities include unlisted preferred securities mainly issued by public companies as well as equity securities of companies that are not publicly traded or are thinly traded. The securities consist of cost-method investments, which are primarily carried at cost because their fair values are not readily determinable. For nonmarketable equity securities issued by public companies, such as preferred stock convertible to marketable common stock in the future, we estimate fair value using commonly accepted valuation models, such as option pricing models based on a number of factors, including the quoted market price of the underlying marketable common stock, volatility and dividend repayments as appropriate, to determine if the investment is impaired in each reporting period. If the fair value of the investment is less than the cost of the investment, we proceed to evaluate whether the impairment is other than temporary. When the decline is other than temporary, those nonmarketable equity securities issued by public companies are written down to fair value estimated by commonly accepted valuation models.

With respect to the other nonmarketable equity securities, we perform a test to determine whether any impairment indicator exists with respect to each cost-method investment in each reporting period. The primary method we use to identify impairment indicators is a comparison of our share in an investee's net assets to the carrying amount of our investment in the investee. We also consider whether significant adverse changes in the regulatory, economic or technological environment have occurred with respect to the investee. We periodically monitor the status of each investee including the credit ratings, which are generally updated once a year based on the annual financial statements of issuers. In addition, if an event that could impact the credit rating of an issuer occurs, we reassess the appropriateness of the credit rating assigned to the issuer in order to maintain an updated credit rating. If an impairment indicator exists, we estimate the fair value of the cost-method investment. If the fair value of the investment is less than the cost of the investment, we proceed to conduct the other-than-temporary impairment evaluation. When we determine that the decline is other than temporary, such remaining nonmarketable equity securities are written down to the estimated fair value, determined based on such factors as the ratio of our investment in the issuer to the issuer's net assets and the latest transaction price, if applicable.

Equity method investees. We determine whether any loss on investments is other than temporary, through consideration of various factors, such as the length of time and the extent to which the fair value has been less than cost, the financial condition and near-term prospects of the investees, and our intent and ability to retain the

Table of Contents

investment in the investees for a period of time sufficient to allow for any anticipated recovery in the fair value. We also evaluate additional factors, such as the condition and trend of the economic cycle, and trends in the general market.

Our assessment of potential impairment involves risks and uncertainties depending on market conditions that are global or regional in nature and the condition of specific issuers or industries, as well as management's subjective assessment of the estimated future performance of investments. If we later conclude that a decline is other than temporary, the impairment loss may significantly affect our operating results and financial condition in future periods.

For further information on the amount of the impairment losses and the aggregate amount of unrealized gross losses on investment securities, see Note 3 to our consolidated financial statements included elsewhere in this Annual Report.

Allowance for Repayment of Excess Interest

We maintain an allowance for repayment of excess interest based on our estimate of the potential liability exposure. Our estimate of the potential liability exposure represents the estimated amount of claims for repayment of excess interest to be received in the future. We expect that any such claim will be made on the basis of a 2006 ruling of the Japanese Supreme Court, or the Ruling. Under the Ruling, lenders are generally required to reimburse borrowers for interest payments made in excess of the limits stipulated by the Interest Rate Restriction Act upon receiving claims for reimbursement, despite the then-effective provisions of the Law Concerning Lending Business that exempted a lender from this requirement if the lender provided required notices to the borrower and met other specified requirements, and the borrower voluntarily made the interest payment.

While we have not entered into any consumer loan agreement after April 2007 that imposes an interest rate exceeding the limits stipulated by the Interest Rate Restriction Act, we need to estimate the number of possible claims for reimbursement of excess interest payments. To determine the allowance for repayment of excess interest, we analyze the historical number of repayment claims we have received, the amount of such claims, borrowers' profiles, the actual amount of reimbursements we have made, management's future forecasts, and other events that are expected to possibly affect the repayment claim trends in order to arrive at our best estimate of the potential liability. We believe that the provision for repayment of excess interest is adequate and the allowance is at the appropriate amount to absorb probable losses, so that the impact of future claims for reimbursement of excess interest will not have a material adverse effect on our financial position and results of operations. The allowance is recorded as a liability in Other liabilities.

For further information, see Note 27 to our consolidated financial statements included elsewhere in this Annual Report and Item 3.D. Key Information Risk Factors Risks Related to Our Business. Because of our loans to consumers and our shareholdings in companies engaged in consumer lending, changes in the business or regulatory environment for consumer finance companies in Japan may further adversely affect our financial results.

Income Taxes

Valuation of deferred tax assets. A valuation allowance for deferred tax assets is recognized if, based on the weight of available evidence, it is more likely than not that some portion or all of the deferred tax assets will not be realized. All available evidence, both positive and negative, is considered to determine whether, based on the weight of that evidence, a valuation allowance is needed. Future realization of the tax benefit of

existing deductible temporary differences or carryforwards ultimately depends on the existence of sufficient taxable income.

Table of Contents

In determining a valuation allowance, we perform a review of future reversals of existing taxable temporary differences, and future taxable income exclusive of reversing temporary differences. Future taxable income is developed from forecasted operating results, based on recent historical trends and approved business plans, the eligible carryforward periods and other relevant factors. For certain subsidiaries where strong negative evidence exists, such as cumulative losses and the expiration of unused operating loss carryforwards in recent years, a valuation allowance is recognized against the deferred tax assets to the extent that it is more likely than not that they will not be realized.

Forecasted operating results, which serve as the basis of our estimation of future taxable income, have a significant effect on the amount of the valuation allowance. In developing forecasted operating results, we assume that our operating performance is stable for certain entities where strong positive evidence exists, including core earnings based on past performance over a certain period of time. The actual results may be adversely affected by unexpected or sudden changes in interest rates as well as an increase in credit-related expenses due to the deterioration of economic conditions in Japan and material declines in the Japanese stock market to the extent that such impacts exceed our original forecast. In addition, near-term taxable income also influences the expiration of unused operating loss carryforwards since the Japanese corporate tax law permits operating losses to be deducted for a predetermined period generally no longer than seven years for losses generated prior to April 1, 2008 and nine years for losses generated in fiscal years ending after April 1, 2008. For further information on the amount of operating loss carryforwards and the expiration dates, see Note 7 to our consolidated financial statements included elsewhere in this Annual Report.

Because the establishment of the valuation allowance is an inherently uncertain process involving estimates as discussed above, the currently established valuation allowance may not be sufficient. If the estimated valuation allowance is not sufficient, we will incur additional deferred tax expenses, which could materially affect our operating results and financial condition in future periods.

Recognition and Measurement of Uncertain Tax Positions. We provide reserves for unrecognized tax benefits as required under the guidance on accounting for uncertainty in income taxes. In applying the guidance, we consider the relative risks and merits of positions taken in tax returns filed and to be filed, considering statutory, judicial, and regulatory guidance applicable to those positions. The guidance requires us to make assumptions and judgments about potential outcomes that lie outside of management's control. To the extent that the tax authorities disagree with our conclusions, and depending on the final resolution of those disagreements, our effective tax rate may be materially affected in the period of final settlement with tax authorities.

Accounting for Goodwill and Intangible Assets

Accounting for Goodwill. U.S. GAAP requires us to test goodwill for impairment at least annually, or more frequently if events or changes in circumstances indicate that goodwill may be impaired, using a two-step process that begins with an estimation of the fair value of a reporting unit of our business, which is to be compared with the carrying amount of the unit, to identify potential impairment of goodwill. A reporting unit is an operating segment or component of an operating segment that constitutes a business for which discrete financial information is available and is regularly reviewed by management. The fair value of a reporting unit is defined as the amount at which the unit as a whole could be bought or sold in a current transaction between willing parties. For a reporting unit for which an observable quoted price is not available, the fair value is determined using an income approach. In the income approach, the present value of expected future cash flows is calculated by taking the net present value based on each reporting unit's internal forecasts. A control premium factor is also considered in relation to market capitalization.

If the carrying amount of a reporting unit exceeds its estimated fair value, the second step of the goodwill impairment test is performed to measure the amount of impairment loss recorded in our consolidated statements of income. This test requires comparison of the implied fair value of the unit's goodwill with the carrying amount of that goodwill. The estimate of the implied fair value of the reporting unit's goodwill requires us to allocate the

Table of Contents

fair value of a reporting unit to all of the assets and liabilities of that reporting unit, including unrecognized intangible assets, if any, since the implied fair value is determined as the excess of the fair value of a reporting unit over the net amounts assigned to its assets and liabilities in the allocation. Accordingly, the second step of the impairment test also requires an estimate of the fair value of individual assets and liabilities, including any unrecognized intangible assets that belong to that unit. A change in the estimation could have an impact on impairment recognition since it is driven by hypothetical assumptions, such as customer behavior and interest rate forecasts. The estimation is based on information available to management at the time the estimation is made.

Accounting for Intangible Assets. Intangible assets are amortized over their estimated useful lives unless they have indefinite useful lives. Amortization for intangible assets is computed in a manner that best reflects the economic benefits of the intangible assets. Intangible assets having indefinite useful lives are subject to annual impairment tests. An impairment exists if the carrying value of an indefinite lived asset exceeds its fair value. For other intangible assets subject to amortization, an impairment is recognized if the carrying amount exceeds the fair value of the intangible asset. Each reporting period, we evaluate the remaining useful life of an intangible asset to determine whether events and circumstances warrant a revision to the remaining useful life. When the useful life of intangible assets that were previously not subject to amortization is determined to no longer be indefinite, for example, when unanticipated competition enters the market, the intangible asset becomes subject to amortization over the remaining period that it is expected to contribute to positive cash flows.

Accrued Severance Indemnities and Pension Liabilities

We have defined retirement benefit plans, including lump-sum severance indemnities and pension plans, which cover substantially all of our employees. Severance indemnities and pension costs are calculated based upon a number of actuarial assumptions, including discount rates, expected long-term rates of return on our plan assets and rates of increase in future compensation levels. In accordance with U.S. GAAP, actual results that differ from the assumptions are accumulated and amortized over future periods, and affect our recognized net periodic pension costs and accrued severance indemnities and pension obligations in future periods. Differences in actual experience or changes in assumptions may affect our financial condition and operating results in future periods.

The discount rates for the domestic plans are set to reflect the interest rates of high-quality fixed-rate instruments with maturities that correspond to the timing of future benefit payments.

In developing our assumptions for expected long-term rates of return, we refer to the historical average returns earned by the plan assets and the rates of return expected to be available for reinvestment of existing plan assets, which reflect recent changes in trends and economic conditions, including market prices. We also evaluate input from our actuaries, as well as their reviews of asset class return expectations.

Valuation of Financial Instruments

We measure certain financial assets and liabilities at fair value. The majority of such assets and liabilities are measured at fair value on a recurring basis, including trading securities, trading derivatives and investment securities. In addition, certain other assets and liabilities are measured at fair value on a non-recurring basis, including held for sale loans which are carried at the lower of cost or fair value, collateral dependent loans and nonmarketable equity securities subject to impairment.

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

We have elected the fair value option for certain foreign securities classified as available-for-sale securities, whose unrealized gains and losses are reported in income.

The guidance on the measurement of fair value defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement

Table of Contents

date. We have an established and documented process for determining fair value in accordance with the guidance. To determine fair value, we use quoted prices which include those provided from pricing vendors, where available. We generally obtain one price or quote per instrument and do not adjust it to determine fair value of the instrument. Certain asset-backed securities are valued based on non-binding quotes provided by independent broker-dealers where no or few observable inputs are available to measure fair value. We do not adjust such broker-dealer quotes to the extent that there is no evidence that would indicate that the quotes are not indicative of the fair values of the securities. We perform internal price verification procedures to ensure that the quotes provided from the independent broker-dealers are reasonable. Such verification procedures include analytical review of periodic price changes, comparison analysis between periodic price changes and changes of indices such as a credit default swap index, or inquiries regarding the underlying inputs and assumptions used by the broker-dealers such as probability of default, prepayment rate and discount margin. These verification procedures are periodically performed by independent risk management departments. For collateralized loan obligations, or CLOs, backed by general corporate loans, the fair value is determined by weighting the internal model valuation and the non-binding broker-dealer quotes. If quoted prices are not available to determine fair value of derivatives, the fair value is based upon valuation techniques that use, where possible, current market-based or independently sourced parameters, such as interest rates, yield curves, foreign exchange rates, volatilities and credit curves. The fair values of trading liabilities are determined by discounting future cash flows at a rate which incorporates our own creditworthiness. In addition, valuation adjustments may be made to ensure that the financial instruments are recorded at fair value. These adjustments include, but are not limited to, amounts that reflect counterparty credit quality, liquidity risk, and model risk. Our financial models are validated and periodically reviewed by risk management departments independent of divisions that created the models.

For a further discussion of the valuation techniques applied to the material assets or liabilities, see Note 32 to our consolidated financial statements included elsewhere in this Annual Report.

Accounting Changes and Recently Issued Accounting Pronouncements

See Accounting Changes and Recently Issued Accounting Pronouncements in Note 1 to our consolidated financial statements included elsewhere in this Annual Report.

A. Operating Results**Results of Operations**

The following table sets forth a summary of our results of operations for the fiscal years ended March 31, 2014, 2015 and 2016:

	Fiscal years ended March 31,		
	2014	2015	2016
	(in billions)		
Interest income	¥ 2,522.3	¥ 2,894.6	¥ 3,005.7
Interest expense	561.0	663.1	744.3
Net interest income	1,961.3	2,231.5	2,261.4
Provision (credit) for credit losses	(106.4)	87.0	231.9
Non-interest income	1,821.0	2,845.1	2,407.7
Non-interest expense	2,468.3	2,726.9	3,274.5

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

Income before income tax expense	1,420.4	2,262.7	1,162.7
Income tax expense	337.9	666.1	369.5
Net income before attribution of noncontrolling interests	¥ 1,082.5	¥ 1,596.6	¥ 793.2
Net income (loss) attributable to noncontrolling interests	67.1	65.5	(9.1)
Net income attributable to Mitsubishi UFJ Financial Group	¥ 1,015.4	¥ 1,531.1	¥ 802.3

Table of Contents

Major components of our net income attributable to Mitsubishi UFJ Financial Group for the fiscal years ended March 31, 2014, 2015 and 2016 are discussed in further detail below.

Net Interest Income

The following table is a summary of the interest rate spread for the fiscal years ended March 31, 2014, 2015 and 2016:

	2014		Fiscal years ended March 31, 2015		2016	
	Average balance	Average rate	Average balance	Average rate	Average balance	Average rate
(in billions, except percentages)						
Interest-earning assets:						
Domestic	¥ 135,087.3	0.87%	¥ 146,830.0	0.79%	¥ 153,612.6	0.71%
Foreign	77,089.0	1.75	90,417.7	1.92	99,103.1	1.93
Total	¥ 212,176.3	1.19%	¥ 237,247.7	1.22%	¥ 252,715.7	1.19%
Financed by:						
Interest-bearing liabilities:						
Domestic	¥ 141,878.0	0.18%	¥ 151,998.8	0.16%	¥ 159,323.2	0.19%
Foreign	47,535.3	0.64	58,102.5	0.73	61,823.8	0.72
Total	189,413.3	0.30	210,101.3	0.32	221,147.0	0.34
Non-interest-bearing liabilities	22,763.0		27,146.4		31,568.7	
Total	¥ 212,176.3	0.26%	¥ 237,247.7	0.28%	¥ 252,715.7	0.29%
Interest rate spread		0.89%		0.90%		0.85%
Net interest income as a percentage of total interest-earning assets		0.92%		0.94%		0.89%

Net interest income is a function of:

the amount of interest-earning assets,

the amount of interest-bearing liabilities,

the general level of interest rates,

the so-called spread, or the difference between the rate of interest earned on interest-earning assets and the rate of interest paid on interest-bearing liabilities, and

the proportion of interest-earning assets financed by non-interest-bearing liabilities and equity.

Our net interest income for each of the fiscal years ended March 31, 2014, 2015 and 2016 was not materially affected by gains or losses resulting from interest rate and other derivative contracts. We use such derivative instruments to manage the risks affecting the values of our financial assets and liabilities. Although these contracts are generally entered into for risk management purposes, a majority of them do not meet the specific conditions to qualify for hedge accounting under U.S. GAAP and thus are accounted for as trading assets or liabilities. Any gains or losses resulting from such derivative instruments are recorded as part of Trading account profits net. For a detailed discussion of our risk management activities, see A. Operating Results Results of Operations Non-Interest Income and Item 11. Quantitative and Qualitative Disclosures about Credit, Market and Other Risk.

Fiscal Year Ended March 31, 2016 Compared to Fiscal Year Ended March 31, 2015

Net interest income for the fiscal year ended March 31, 2016 was ¥2,261.4 billion, an increase of ¥29.9 billion from ¥2,231.5 billion for the fiscal year ended March 31, 2015. Both interest income and interest

Table of Contents

expense increased, with the increase in interest income exceeding the increase in interest expense, mainly reflecting a higher balance of our foreign loans. While the average interest rate spread (which is the average interest rate on interest-earning assets minus the average interest rate on interest-bearing liabilities) decreased, the average balance of interest-earning assets increased, primarily reflecting larger volumes of foreign loans and interest-earning deposits in other banks.

Interest income increased ¥111.1 billion to ¥3,005.7 billion for the fiscal year ended March 31, 2016 from ¥2,894.6 billion for the previous fiscal year. Of the ¥111.1 billion increase in interest income, ¥73.1 billion was attributable to interest income from loans. In particular, loans booked at foreign branches and subsidiaries improved with the average loan balance for the fiscal year ended March 31, 2016 increasing ¥6,131.9 billion, or 14.0%, compared to the previous fiscal year. The average interest rate on foreign loans for the fiscal year ended March 31, 2016 decreased 0.07 percentage points compared to the previous fiscal year, reflecting lower market interest rates. Interest income from the domestic loan business decreased ¥48.1 billion, or 5.7%, compared to the previous fiscal year due to declining interest rates and intensified competition among lending institutions in Japan. Interest income from deposits in other banks increased ¥18.4 billion, or 28.6%, mainly due to a higher balance of deposits in central banks, including the Bank of Japan. Interest income from foreign trading account assets increased ¥35.2 billion, or 10.0%, due to a higher balance of foreign currency-denominated trading securities in the commercial banking subsidiaries, partially offset by a decrease of ¥13.1 billion, or 28.5%, in interest income from domestic trading account assets.

Interest expense also increased ¥81.2 billion to ¥744.3 billion for the fiscal year ended March 31, 2016 from ¥663.1 billion for the previous fiscal year. Interest expense on interest-bearing foreign deposits increased ¥33.8 billion, or 13.7%, reflecting a ¥3,705.0 billion, or 9.9%, increase in the average balance of such deposits. Interest expense on long-term debt increased ¥32.0 billion, or 12.6%, due to higher balances of both domestic and foreign long-term debt despite lower average interest rates on such debt as we were able to finance at lower interest rates.

The average interest rate spread decreased 0.05 percentage points to 0.85% for the fiscal year ended March 31, 2016 from 0.90% for the previous fiscal year. For the fiscal year ended March 31, 2016, compared to the previous fiscal year, the average interest rate on interest-earning assets decreased 0.03 percentage points to 1.19% from 1.22%, while the average interest rate on interest-bearing liabilities increased 0.02 percentage points to 0.34% from 0.32%, which resulted in the overall decrease in the average interest rate spread. The average interest rate spread on domestic activities decreased 0.11 percentage points to 0.52% from 0.63%, while the average interest rate spread on foreign activities increased 0.02 percentage points to 1.21% from 1.19%. In Japan, while the average interest rate on interest-earning assets continued to decline, the average interest rate on interest-bearing liabilities slightly increased mainly because of higher interest rates on deposits and short-term borrowings. Interest expense on deposits includes profits and losses from derivatives embedded in structured deposits, where such interest expense is reduced by the amount of net profits and increased by the amount of net losses. For the fiscal year ended March 31, 2016, net profits from such derivatives significantly decreased compared to the previous fiscal year primarily due to lower customer demand for structured deposits as risk aversion heightened. In addition to interest expense on deposits, our cost of short-term U.S. dollar funding through funds purchased, and payables under repurchase agreements and securities lending transactions, also increased as interest rates in the United States were generally on a rising trend during the fiscal year ended March 31, 2016. The impact of these increases in interest expense on deposits and funding cost more than offset the continued downward pressure on interest rates in Japan. As for foreign interest-earning assets and foreign interest-bearing liabilities, interest rates remained, on average, relatively unchanged for the fiscal year ended March 31, 2016 compared to the previous fiscal year, as the impact of the overall increasing trend in interest rates in the United States was offset to a large extent by the overall decreasing trend in interest rates in the Eurozone, where the ECB adjusted its policy interest rates downward to negative rates.

The Bank of Japan has maintained a quantitative and qualitative monetary easing with negative interest rates policy and applied a negative interest rate of minus 0.1% to the Policy-Rate Balances, which are a part

Table of Contents

of current account amounts held by financial institutions at the Bank of Japan. As a result, the yield on many financial instruments and other market interest rates in Japan have declined to negative levels and the average interest rate on domestic assets continued to decline while the average rate on domestic liabilities reached historically low levels. If the policy is maintained in Japan for an extended period, or if the Bank of Japan's negative interest rate is lowered from the current level, market interest rates may decline further, and our interest rate spread on domestic activities will likely continue to be under severe pressure. Monetary easing policies adopted in foreign markets in Europe, Asia and other regions have placed downward pressure on short-term interest rates in recent periods. However, changes in monetary policies in the United States, declining oil and other commodity prices, concerns over potentially serious ramifications of the result of the U.K. referendum in June 2016, where a majority voted to leave the European Union, and the slowing growth in emerging economies have recently begun to add volatility in both long-term and short-term interest rates, affecting our interest spread. For further information on the Bank of Japan's monetary policy and recent interest rate fluctuations in Japan, see Business Environment Economic Environment in Japan.

The average interest-earning assets for the fiscal year ended March 31, 2016 were ¥252,715.7 billion, an increase of ¥15,468.0 billion from ¥237,247.7 billion for the fiscal year ended March 31, 2015. The average domestic interest-earning assets increased ¥6,782.6 billion to ¥153,612.6 billion mainly due to increases in interest-earning deposits in other banks, particularly the Bank of Japan. This was partially offset by a decrease in the balance of Japanese government bonds to manage interest rate fluctuation risks particularly in light of the Bank of Japan's quantitative and qualitative monetary easing with negative interest rates and measures to purchase Japanese government bonds in the market, which resulted in the yield on Japanese government bonds declining to negative levels. The average foreign interest-earning assets increased ¥8,685.4 billion to ¥99,103.1 billion mainly due to an increase in foreign loans. The increase in foreign loans was mainly due to increased lending activity in the Americas, particularly in the United States, where economic conditions continued to improve at a moderate pace.

The average interest-bearing liabilities for the fiscal year ended March 31, 2016 were ¥221,147.0 billion, an increase of ¥11,045.7 billion from ¥210,101.3 billion for the fiscal year ended March 31, 2015. The average domestic interest-bearing liabilities increased ¥7,324.4 billion to ¥159,323.2 billion mainly due to increases in interest-bearing deposits and long-term debt. The higher balance of domestic deposits was mainly due to an increase in domestic deposits in the banking subsidiaries as customer preference shifted due to the Bank of Japan's quantitative and qualitative monetary easing with negative interest rates policy. Following the implementation of the policy, the yield on various financial instruments and other market interest rates in Japan, including the yield on Japanese government bonds, declined to negative levels. Many financial institutions and money management funds reduced their investments in the money markets to avoid the impact of negative interest rates on their investments and their account amounts at the Bank of Japan. As a result, corporate customers moved their money invested in the money markets to deposit accounts. The increase in domestic long-term debt was mainly due to the issuances by MUFG of senior bonds to comply with the TLAC requirements and to maintain larger balances of foreign currency loans in the banking subsidiaries. The average foreign interest-bearing liabilities increased ¥3,721.3 billion to ¥61,823.8 billion mainly due to larger deposit balances.

Fiscal Year Ended March 31, 2015 Compared to Fiscal Year Ended March 31, 2014

Net interest income for the fiscal year ended March 31, 2015 was ¥ 2,231.5 billion, an increase of ¥270.2 billion from ¥1,961.3 billion for the fiscal year ended March 31, 2014. Both interest income and interest expense increased, with the increase in interest income exceeding the increase in interest expense, mainly reflecting higher interest rates on, and higher balance of, our foreign loans. The average interest rate spread (which is the average interest rate on interest-earning assets minus the average interest rate on interest-bearing liabilities) increased, reflecting improved interest rate spreads on foreign activities. The average balance of interest-earning assets increased, primarily reflecting larger volumes of interest-earning deposits in other banks and loans.

Table of Contents

Interest income increased ¥372.3 billion to ¥2,894.6 billion for the fiscal year ended March 31, 2015 from ¥2,522.3 billion for the previous fiscal year. Of the ¥372.3 billion of increase in interest income, ¥317.5 billion was attributable to interest income from loans. In particular, loans booked at foreign branches and subsidiaries improved with the average loan balance for the fiscal year ended March 31, 2015 increasing ¥10,718.6 billion compared to the previous fiscal year. This reflected a higher lending volume and the depreciation of the Japanese yen against the U.S. dollar. The average interest rate on such loans for the fiscal year ended March 31, 2015 increased 0.28 percentage points compared to the previous fiscal year, reflecting the impact of the consolidation of Krungsri. Interest income from the domestic loan business decreased due to downward pressure on interest rates. Interest income from deposits in other banks increased ¥17.2 billion mainly due to a higher balance of deposits in central banks including the Bank of Japan and the FRB. Interest income from investment securities increased ¥41.4 billion due to a higher balance of foreign currency-denominated investment securities as well as a higher average interest rate on domestic investment securities, which mainly reflected increased dividends on domestic equity securities. These increases were partially offset by a decrease of ¥7.4 billion in interest income from trading account assets due to a decrease in the average balance of foreign currency-denominated trading securities in the commercial banking subsidiaries.

Interest expense also increased ¥102.1 billion to ¥663.1 billion for the fiscal year ended March 31, 2015 from ¥561.0 billion for the previous fiscal year. Interest expense on interest-bearing foreign deposits increased ¥85.6 billion, reflecting a ¥6,907.4 billion increase in the balance of such deposits and a 0.13 percentage point increase in the average interest rate on such deposits. This was mainly due to the impact of the consolidation of Krungsri. Interest expense on domestic interest-bearing deposits decreased ¥11.5 billion, reflecting downward pressure on interest rates in Japan. Interest expense on long-term debt increased ¥22.8 billion, reflecting higher balances of both domestic and foreign long-term borrowings, despite lower average interest rates on such borrowings as we were able to refinance at lower interest rates.

The average interest rate spread increased 0.01 percentage points to 0.90% for the fiscal year ended March 31, 2015 from 0.89% for the previous fiscal year. For the fiscal year ended March 31, 2015, compared to the previous fiscal year, the average interest rate on assets increased 0.03 percentage points to 1.22% from 1.19%, while the average interest rate on liabilities increased 0.02 percentage points to 0.32% from 0.30%, which resulted in the overall increase in the average interest rate spread. The average interest rate spread on foreign activities increased 0.08 percentage points to 1.19% from 1.11%, while the average interest rate spread on domestic activities decreased 0.06 percentage points to 0.63% from 0.69%. The wider interest rate spread on foreign activities was mainly because interest rates on interest-earning assets such as loans increased at steeper rates than interest rates on interest-bearing liabilities such as deposits and long-term debt. Lower short-term and long-term interest rates and intensified competition resulted in the decline in interest rates on domestic assets and liabilities. As interest rates on domestic interest-bearing liabilities remained at near-zero levels in the past two fiscal years, the decreases in interest rates on domestic interest-earning assets exceeded the decreases in interest rates on domestic interest-bearing liabilities.

In Japan, the Bank of Japan sought to keep short-term interest rates low by maintaining its quantitative and qualitative monetary easing policy throughout the past two fiscal years. As a result, the average interest rate on domestic assets continued to decline, while the average interest rate on domestic liabilities reached and remained at historically low levels. If the Bank of Japan continues to maintain its current policy on its short-term policy interest rate as well as other monetary easing policies, our interest rate spread on domestic activities will likely continue to be under severe pressure. Monetary easing policies adopted in foreign markets in the Americas, Europe, Asia and other regions have placed downward pressure on short-term interest rates in recent periods. However, changes in monetary policies in the United States and geopolitical issues around the world have recently begun to add volatility in both long-term and short-term interest rates, affecting our interest spread. For further information on the Bank of Japan's monetary policy and recent interest rate fluctuations in Japan, see Business Environment Economic Environment in Japan.

Table of Contents

The average interest-earning assets for the fiscal year ended March 31, 2015 were ¥237,247.7 billion, an increase of ¥25,071.4 billion from ¥212,176.3 billion for the fiscal year ended March 31, 2014. The average domestic interest-earning assets increased ¥11,742.7 billion to ¥146,830.0 billion mainly due to increases in interest-earning deposits in other banks, particularly the Bank of Japan. This was partially offset by a decrease in the balance of Japanese government bonds held as available-for-sale securities as a result of sales of such bonds to reduce the risk of a sudden and drastic increase in short-term interest rates. The average foreign interest-earning assets increased ¥13,328.6 billion to ¥90,417.7 billion mainly due to an increase in foreign loans. The increase in foreign loans was mainly due to increased lending of MUB in the United States and the impact of the consolidation of Krungsri as well as the depreciation of the Japanese yen against the U.S. dollar.

The average interest-bearing liabilities for the fiscal year ended March 31, 2015 were ¥210,101.3 billion, an increase of ¥20,688.0 billion from ¥189,413.3 billion for the fiscal year ended March 31, 2014. The average domestic interest-bearing liabilities increased ¥10,120.8 billion to ¥151,998.8 billion mainly due to increases in interest-bearing deposits, short-term market funding and long-term debt. The higher balance of deposits was mainly due to increases in ordinary deposits in the banking subsidiaries, partially offset by decreases in term deposits in our commercial banking subsidiaries and negotiable certificates of deposit in our trust banking subsidiaries. The increase in short-term market funding was mainly due to an increase in payables under securities lending transactions in our securities subsidiaries. The increase in long-term debt is mainly due to increased long-term borrowings in our banking subsidiaries as part of their asset and liability management in light of continued low interest rates and a larger balance of loans. The average foreign interest-bearing liabilities increased ¥10,567.2 billion to ¥58,102.5 billion mainly due to increases in deposits in Krungsri, MUAH and foreign branches of our banking subsidiaries, as well as increases in other short-term borrowings and trading account liabilities as we began to switch funding sources from our group companies to third-party lenders in order to take advantage of the comparatively favorable market interest rate environment.

Provision (credit) for credit losses

Provision (credit) for credit losses is charged to operations to maintain the allowance for credit losses at a level deemed appropriate by management. For more information on our provision (credit) for credit losses and a description of the approach and methodology used to establish the allowance for credit losses, see **B. Liquidity and Capital Resources** Financial Condition Loan Portfolio Allowance policy.

Fiscal Year Ended March 31, 2016 Compared to Fiscal Year Ended March 31, 2015

We recorded ¥231.9 billion of provision for credit losses for the fiscal year ended March 31, 2016, compared to ¥87.0 billion for the previous fiscal year. By segment, for the fiscal year ended March 31, 2016, ¥117.1 billion, ¥0.9 billion, ¥47.4 billion and ¥76.0 billion of provision for credit losses were recorded in the Commercial, Card, MUAH and Krungsri segments, respectively, while ¥9.5 billion of credit for credit losses was recorded in the Residential segment. For the previous fiscal year, ¥22.6 billion, ¥2.6 billion and ¥94.6 billion of provision for credit losses were recorded in the Commercial, Card and Krungsri segments, respectively, while ¥30.9 billion and ¥1.9 billion of credit for credit losses were recorded in the Residential and MUAH segments, respectively.

The provision recorded in the Commercial segment for the fiscal year ended March 31, 2016 mainly reflected further deterioration in the business and financial performance of a large borrower in the domestic electronics manufacturing industry, and deterioration in the credit conditions of borrowers in the energy sector, which were adversely affected by declining oil and other commodity prices. The provision for credit losses in the MUAH segment for the fiscal year ended March 31, 2016 primarily reflected the deteriorated credit quality of borrowers in the oil and gas sector in MUAH's loan portfolio, particularly those that are engaged in the petroleum exploration and production business. The provision for credit losses in the Krungsri segment for the fiscal year ended March 31, 2016 mainly reflected the negative impact of the stagnant economic conditions in Thailand on the credit quality of the small and medium-sized enterprise portfolio and the retail and consumer finance portfolio.

Table of Contents

The decrease in provision for credit losses in the Card segment for the fiscal year ended March 31, 2016 compared to the previous fiscal year was primarily due to an overall improvement in the credit quality of the portfolio as we continued to apply refined borrower screening, which we had originally implemented in June 2010 under regulatory reforms in the consumer finance industry, and the stable corporate environment in recent periods has contributed to higher income for borrowers in the segment. The credit for credit losses in the Residential segment reflected an overall improvement in the credit quality of the portfolio as the stable corporate environment in recent periods has contributed to higher income for borrowers in the segment.

We recorded ¥5.3 billion of credit for credit losses for our domestic loan portfolio for the fiscal year ended March 31, 2016, compared to credit for credit losses of ¥17.5 billion for the previous fiscal year. This reflected the improved credit quality of the Residential segment. We recorded ¥237.2 billion of provision for credit losses for our foreign portfolio for the fiscal year ended March 31, 2016, compared to provision for credit losses of ¥104.5 billion for the previous fiscal year. This increase was primarily attributable to the deteriorated credit conditions of overseas borrowers in the energy sector.

For more information, see B. Liquidity and Capital Resources Financial Condition Loan Portfolio.

Fiscal Year Ended March 31, 2015 Compared to Fiscal Year Ended March 31, 2014

We recorded ¥ 87.0 billion of provision for credit losses for the fiscal year ended March 31, 2015, compared to credit for credit losses of ¥106.4 billion for the previous fiscal year. By segment, for the fiscal year ended March 31, 2015, ¥ 22.6 billion, ¥ 2.6 billion and ¥ 94.6 billion of provision for credit losses were recorded in the Commercial, Card and Krungsri segments, respectively, while ¥30.9 billion and ¥1.9 billion of credit for credit losses was recorded in the Residential and MUAH segments, respectively. For the previous fiscal year, ¥70.1 billion, ¥36.0 billion and ¥5.9 billion of credit for credit losses were recorded in the Commercial, Residential and MUAH segments, respectively, while ¥5.6 billion of provision for credit losses was recorded in the Card segment.

The provision recorded in the Commercial segment for the fiscal year ended March 31, 2015 mainly reflected significant deterioration in the operational and financial performance of a large borrower in the domestic electronics manufacturing industry. The provision recorded in the Krungsri segment primarily consisted of provisions of allowance for large groups of smaller-balance homogenous loans and formula allowance for loans that have been extended since the date of our acquisition of Krungsri, as well as provisions of allowance for loans individually evaluated for impairment particularly in the consumer and SME portfolios that were adversely affected by a slowdown in the economic growth in Thailand. The credit for credit losses recorded in the Residential segment was mainly because the stable corporate environment in recent periods contributed to higher income for borrowers in Japan.

We recorded ¥ 17.5 billion of credit for credit losses for our domestic loan portfolio for the fiscal year ended March 31, 2015, compared to credit for credit losses of ¥81.4 billion for the previous fiscal year. We recorded ¥104.5 billion of provision for credit losses for our foreign portfolio for the fiscal year ended March 31, 2015, compared to credit for credit losses of ¥25.0 billion for the previous fiscal year. The increase in provision for credit losses in our foreign portfolio was primarily attributable to the Krungsri segment.

Table of Contents**Non-Interest Income**

The following table is a summary of our non-interest income for the fiscal years ended March 31, 2014, 2015 and 2016:

	Fiscal years ended March 31,		
	2014	2015	2016
	(in billions)		
Fees and commissions income⁽¹⁾:			
Fees and commissions on deposits	¥ 46.1	¥ 57.1	¥ 58.9

Total non-interest income	¥ 1,821.0	¥ 2,845.1	¥ 2,407.7

Note:

- (1) Reflects the changes made to the components of fees and commissions in the fiscal year ended March 31, 2015. The following components were redefined in 2015 and certain reclassifications were made between the components: Fees and commissions on deposits, Fees and commissions on remittances and transfers, Fees and commissions on security-related services, Fees and commissions on administration and management services for investment funds and Other fees and commissions. The amounts for the fiscal year ended March 31, 2014 have been reclassified to conform to the presentation for the fiscal years ended March 31, 2015 and 2016.

Table of Contents

Non-interest income consists of the following:

Fees and commissions income

Fees and commissions income consist of the following:

Fees and commissions on deposits consist of fees and commissions charged for ATM transactions and other deposit and withdrawal services.

Fees and commissions on remittances and transfers consist of fees and commissions charged for settlement services such as domestic fund remittances, including those made through electronic banking.

Fees and commissions on foreign trading business consist of fees and commissions charged for fund collection and financing services related to foreign trading business activities.

Fees and commissions on credit card business consist of fees and commissions related to the credit card business such as interchange income, annual fees, royalty and other service charges from franchisees.

Fees and commissions on security-related services primarily consist of fees and commissions for sales and transfers of securities, including investment funds, underwriting, brokerage and advisory services, securitization arrangement services, and agency services for the calculation and payment of dividends.

Fees and commissions on administration and management services for investment funds primarily consist of fees and commissions earned on managing investment funds on behalf of clients.

Trust fees consist primarily of fees earned on fiduciary asset management and administration services for corporate pension plans and investment funds.

Guarantee fees consist of fees related to the guarantee business, including those charged for providing guarantees on residential mortgage loans and other loans.

Insurance commissions consist of commissions earned by acting as agent for insurance companies for the sale of insurance products.

Fees and commissions on real estate business primarily consist of fees from real estate agent services.

Other fees and commissions include various fees and commissions, such as arrangement fees and agent fees, other than the fees mentioned above.

Net foreign exchange gains (losses)

Net foreign exchange gains (losses) consist of the following:

Net foreign exchange gains (losses) on derivative contracts are net gains (losses) primarily on currency derivative instruments entered into for trading purposes. For more information on our derivative contracts, see Note 24 to our consolidated financial statements included elsewhere in this Annual Report.

Net foreign exchange gains (losses) on other than derivative contracts include foreign exchange trading gains (losses) as well as transaction gains (losses) on the translation into Japanese yen of monetary assets and liabilities denominated in foreign currencies. The transaction gains (losses) on the translation into Japanese yen fluctuate from period to period depending upon the spot rates at the end of each fiscal year. In principle, all transaction gains (losses) on translation of monetary assets and liabilities denominated in foreign currencies are included in current earnings.

Net foreign exchange gains (losses) related to the fair value option include transaction gains (losses) on the translation into Japanese yen of securities under the fair value option. For more information on the fair value option, see Note 32 to our consolidated financial statements included elsewhere in this Annual Report.

Table of Contents

Net trading account profits (losses)

Trading account assets and liabilities are carried at fair value and changes in the value of trading account assets and liabilities are recorded in net trading account profits (losses). Activities reported in our net trading account profits (losses) can generally be classified into two categories:

trading purpose activities, which are conducted mainly for the purpose of generating profits either through transaction fees or arbitrage gains and involve frequent and short-term selling and buying of securities, commodities or others; and

trading account assets relating to the application of certain accounting rules, which are generally not related to trading purpose activities, but simply classified as trading accounts due to the application of certain accounting rules.

Of the two categories, trading account assets relating to the application of certain accounting rules represent a smaller portion of our trading account profits for the fiscal year ended March 31, 2016.

We generally do not separate, for financial reporting purposes, customer originated trading activities from non-customer related, proprietary trading activities. When an order for a financial product is placed by a customer, a dealer offers a price which includes certain transaction fees, often referred to as the margin to the market price. The margin is determined by considering factors such as administrative costs, transaction amount and liquidity of the applicable financial product. Once the customer agrees to the offered price, the deal is completed and the position is recorded in our ledger as a single entry without any separation of components. To manage the risk relating to the customer side position, we often enter into an offsetting transaction with the market. Unrealized gains and losses as of the period-end for both the customer side position and the market side position are recorded within the same trading account profits and losses.

Net trading account profits (losses) consist of net profits (losses) on interest rate and other derivative contracts and net profits (losses) on trading account securities, excluding derivatives.

Net profits (losses) on interest rate and other derivative contracts are reported for net profits (losses) on derivative instruments which primarily relate to trading purpose activities and include:

Interest rate contracts: Interest rate contracts are mainly utilized to manage interest rate risks which could arise from mismatches between assets and liabilities resulting from customer originated trading activities;

Equity contracts: Equity contracts are mainly utilized to manage the risk that would arise from price fluctuations of stocks held in connection with customer transactions;

Commodity contracts: Commodity contracts are mainly utilized to meet customers demand for hedging the risks relating to their transactions, and to diversify our portfolio; and

Credit derivatives: Credit derivatives are mainly utilized as a part of our credit portfolio risk management.

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

Derivative instruments for trading purposes also include those used as hedges of net exposures rather than for specifically identified assets or liabilities, which do not meet the specific criteria for hedge accounting.

Net profits (losses) on trading account securities, excluding derivatives, consist of :

Net profits (losses) on trading account securities, which primarily consist of gains and losses on trading and valuation of trading securities which relate to trading purpose activities. Net profits (losses) on investment securities held by certain consolidated variable interest entities, or VIEs, are included in accordance with the applicable accounting rules.

Table of Contents

Net profits (losses) on trading account securities under the fair value option, which are classified into trading accounts profits (losses) in accordance with certain accounting rules. For more information on the fair value option, see Note 32 to our consolidated financial statements included elsewhere in this Annual Report.

Net investment securities gains (losses)

Net investment securities gains (losses) primarily include net gains (losses) on sales of marketable securities, particularly debt securities and marketable equity securities that are classified as available-for-sale securities. In addition, impairment losses are recognized and offset net investment securities gains when management concludes that declines in the fair value of investment securities are other than temporary.

Net equity in earnings (losses) of equity method investees

Net equity in earnings (losses) of equity method investees includes our equity interest in the earnings of our equity method investees and impairment losses on our investments in equity method investees.

Fiscal Year Ended March 31, 2016 Compared to Fiscal Year Ended March 31, 2015

Non-interest income decreased 437.4 billion to ¥2,407.7 billion for the fiscal year ended March 31, 2016 from ¥2,845.1 billion for the fiscal year ended March 31, 2015. This decrease was mainly attributable to a ¥1,343.8 billion decrease in net profits on trading account securities, excluding derivatives. This decrease was partially offset by a ¥471.8 billion increase in net profits on interest rate and other derivative contracts.

Fees and commissions income

Fees and commissions income increased ¥74.9 billion to ¥1,475.9 billion for the fiscal year ended March 31, 2016 from ¥1,401.0 billion for the fiscal year ended March 31, 2015. This increase was primarily due to an increase in fees and commissions on foreign trading business in domestic and overseas branches. Fees and commissions on credit card business also increased primarily due to an increased number of consumer finance clients and an increased volume of transactions achieved through improved cooperation between BTMU and Krungsri.

Net foreign exchange gains (losses)

The following table sets forth the details of our foreign exchange gains and losses for the fiscal years ended March 31, 2015 and 2016:

	Fiscal years ended March 31,
	2015
	2016

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

	(in billions)	
Foreign exchange gains (losses) net:		
Net foreign exchange gains (losses) on derivative contracts	¥ (217.5)	¥ 374.3
Net foreign exchange gains (losses) on other than derivative contracts	(862.2)	875.8
Net foreign exchange gains (losses) related to the fair value option	966.6	(1,058.0)
Total	¥ (113.1)	¥ 192.1

Net foreign exchange gains for the fiscal year ended March 31, 2016 were ¥192.1 billion, compared to ¥113.1 billion of net foreign exchange losses for the fiscal year ended March 31, 2015. This was mainly due to an increase of ¥1,738.0 billion in net foreign exchange gains on other than derivative contracts. As the Japanese yen appreciated against other major currencies during the fiscal year ended March 31, 2016, net foreign exchange gains on other than derivative contracts increased primarily due to the foreign exchange translation impact on the value of monetary liabilities denominated in foreign currencies in our commercial banking subsidiaries. Net

Table of Contents

foreign exchange gains on derivative contracts increased ¥591.8 billion, mainly reflecting higher trading gains on currency options and currency swaps in the banking subsidiaries. These increases were partially offset by larger losses on securities transactions due to the foreign exchange translation impact.

Net trading account profits (losses)

The following table sets forth details of our trading account profits and losses for the fiscal years ended March 31, 2015 and 2016:

	Fiscal years ended March 31, 2015 2016 (in billions)	
Trading account profits (losses) net:		
Net profits (losses) on interest rate and other derivative contracts		
Interest rate contracts	¥ 261.6	¥ 243.7
Equity contracts	(255.1)	149.2
Commodity contracts	(6.3)	1.8
Credit derivatives	5.1	12.4
Other	(42.7)	27.3
Total	¥ (37.4)	¥ 434.4
Net profits (losses) on trading account securities, excluding derivatives		
Trading account securities	¥ 496.7	¥ 0.1
Trading account securities under the fair value option	689.4	(157.8)
Total	¥ 1,186.1	¥ (157.7)
Total	¥ 1,148.7	¥ 276.7

We recorded net trading account profits of ¥276.7 billion for the fiscal year ended March 31, 2016, compared to ¥1,148.7 billion for the fiscal year ended March 31, 2015. This decrease was mainly due to ¥157.8 billion of net losses on trading account securities under the fair value option for the fiscal year ended March 31, 2016, compared to ¥689.4 billion of net gains on such securities for the previous fiscal year. This resulted mainly from lower prices of U.S. Treasury securities as interest rates in the United States increased. In addition, net profits on trading account securities decreased ¥496.6 billion because lower trading volumes in, and smaller price increases of, Japanese government bonds. The volume of trading in Japanese government bonds in the market decreased in the fiscal year ended March 31, 2016 compared to the previous fiscal year. These decreases were partially offset by an improvement of ¥471.8 billion in net profits on interest rate and other derivative contracts, mainly reflecting higher fair values of, and larger trading profits on, equity contracts.

Net investment securities gains

Net investment securities gains increased ¥77.6 billion to ¥232.3 billion for the fiscal year ended March 31, 2016 from ¥154.7 billion for the fiscal year ended March 31, 2015. This increase was mainly due to an increase of ¥83.2 billion in net gains on sales of available-for-sale marketable equity securities as we continued to sell down our equity holdings in an effort to reduce the risk of stock price fluctuations. In addition, net gains on sales of available-for-sale debt securities increased ¥39.7 billion, reflecting the higher volume of sales of Japanese

government bonds to reduce our holdings of such bonds as part of our asset and liability management and interest rate risk management measures. These increases were partially offset by larger impairment losses on available-for-sale equity securities, mainly reflecting the generally declining trend in stock prices in Japan.

Net equity in earnings of equity method investees

Net equity in earnings of equity method investees for the fiscal year ended March 31, 2016 was ¥176.9 billion, compared to ¥172.9 billion for the previous fiscal year, reflecting higher earnings of our equity method investees, including Morgan Stanley.

Table of Contents*Fiscal Year Ended March 31, 2015 Compared to Fiscal Year Ended March 31, 2014*

Non-interest income increased ¥1,024.1 billion to ¥ 2,845.1 billion for the fiscal year ended March 31, 2015 from ¥1,821.0 billion for the fiscal year ended March 31, 2014. This increase was mainly attributable to a ¥1,135.6 billion increase in net profits on trading account securities, excluding derivatives. This increase was partially offset by a ¥148.8 billion decrease in net investments securities gains.

Fees and commissions income

Fees and commissions income increased ¥106.9 billion to ¥1,401.0 billion for the fiscal year ended March 31, 2015 from ¥1,294.1 billion for the fiscal year ended March 31, 2014. This increase was primarily due to the positive impact of the consolidation of Krungsri particularly on fees and commissions on remittances and transfers, fees and commissions on credit card business, fees and commissions on administration and management services for investment funds, and insurance commissions. Fees and commissions on deposits increased due to higher fees charged for domestic retail banking transactions conducted through channels operated by third-party business partners. Other fees and commissions also increased due to advisory fees received for a large-scale structured finance project. These increases were partially offset by a decrease in fees and commissions on security-related services due to lower brokerage commissions on equity securities, reflecting the less active Japanese equity market compare to the previous fiscal year.

Net foreign exchange losses

The following table sets forth the details of our foreign exchange gains and losses for the fiscal years ended March 31, 2014 and 2015:

	Fiscal years ended March 31,	
	2014	2015
	(in billions)	
Foreign exchange losses net:		
Net foreign exchange losses on derivative contracts	¥ (52.7)	¥ (217.5)
Net foreign exchange losses on other than derivative contracts	(2,026.4)	(862.2)
Net foreign exchange gains related to the fair value option	2,017.3	966.6
Total	¥ (61.8)	¥ (113.1)

Net foreign exchange losses for the fiscal year ended March 31, 2015 were ¥113.1 billion, compared to ¥61.8 billion of net foreign exchange losses for the fiscal year ended March 31, 2014. This was mainly due to a decrease of ¥1,050.7 billion in net foreign exchange gains related to the fair value option. The Japanese yen depreciated against other major currencies in the fiscal year ended March 31, 2014, and while the Japanese yen generally remained on a depreciating trend against other major currencies in the fiscal year ended March 31, 2015, the rate of depreciation was smaller, particularly against the U.S. dollar, and the depreciating trend reversed against the euro for extended periods. This was partially offset by an improvement of ¥1,164.2 billion in net foreign exchange losses on other than derivative contracts mainly due to lower foreign exchange translation losses on monetary liabilities denominated in foreign currencies in our commercial banking subsidiaries, reflecting the gradual depreciation of the Japanese yen against other major currencies.

Table of Contents*Net trading account profits (losses)*

The following table sets forth details of our trading account profits and losses for the fiscal years ended March 31, 2014 and 2015:

	Fiscal years ended March 31, 2014 2015 (in billions)	
Trading account profits (losses) net:		
Net losses on interest rate and other derivative contracts		
Interest rate contracts	¥ 29.9	¥ 261.6
Equity contracts	(104.7)	(255.1)
Commodity contracts	2.9	(6.3)
Credit derivatives	(6.4)	5.1
Other	(6.1)	(42.7)
 Total	 ¥ (84.4)	 ¥ (37.4)
Net profits on trading account securities, excluding derivatives		
Trading account securities	¥ 276.5	¥ 496.7
Trading account securities under the fair value option	(226.0)	689.4
 Total	 ¥ 50.5	 ¥ 1,186.1
 Total	 ¥ (33.9)	 ¥ 1,148.7

We recorded net trading account profit of ¥1,148.7 billion for the fiscal year ended March 31, 2015, compared to net trading account losses of ¥33.9 billion for the fiscal year ended March 31, 2014. This was mainly due to an improvement of ¥915.4 billion in net profits on trading account securities under the fair value option, which primarily consisted of a ¥584.6 billion improvement in our commercial banking subsidiaries and a ¥332.5 billion improvement in our trust banking subsidiaries. These improvements reflected higher fair values of foreign currency denominated bonds, including U.S. Treasury bonds, as interest rates in the United States decreased. The improvements were also attributable to increases in fair values of Eurozone sovereign bonds, including German and French government bonds, as our banking subsidiaries increased their holdings of such bonds and interest rates decreased in Europe where economic conditions remained stagnant. Net profits on trading account securities also increased ¥220.2 billion primarily due to larger gains from the trading business in our securities subsidiaries taking advantage of declining long-term interest rates in Japan during the fiscal year ended March 31, 2015.

Net investment securities gains

Net investment securities gains decreased ¥148.8 billion to ¥154.7 billion for the fiscal year ended March 31, 2015 from ¥303.5 billion for the fiscal year ended March 31, 2014. This decrease was partly due to a decrease of ¥57.6 billion in net gains on sales of available-for-sale debt securities, reflecting reduced volumes of sales of Japanese government bonds, compared to the previous fiscal year when we decreased our holdings of such bonds as part of our asset and liability management and interest rate risk management measures. The decrease in net investment securities gains was also attributable to a decrease of ¥82.8 billion in net gains on sales of other investment securities as our banking subsidiaries reported comparatively higher gains on sales of preferred securities related to a specific customer in the fiscal year ended March 31, 2014.

Net equity in earnings of equity method investees

Net equity in earnings of equity method investees for the fiscal year ended March 31, 2015 was ¥172.9 billion, compared to ¥110.5 billion for the previous fiscal year, reflecting higher earnings of our equity method investees, including Morgan Stanley.

Table of Contents**Non-Interest Expense**

The following table shows a summary of our non-interest expense for the fiscal years ended March 31, 2014, 2015 and 2016:

	Fiscal years ended March 31,		
	2014	2015 (in billions)	2016
Salaries and employee benefits	¥ 1,029.6	¥ 1,097.5	¥ 1,158.9
Occupancy expenses net	158.4	168.7	182.8
Fees and commissions expenses	222.0	248.1	285.4
Outsourcing expenses, including data processing	216.7	241.7	244.7
Depreciation of premises and equipment	103.7	108.6	99.7
Amortization of intangible assets	198.1	222.4	237.3
Impairment of intangible assets	0.3	0.7	117.7
Insurance premiums, including deposit insurance	101.1	115.5	91.9
Communications	50.9	54.7	58.3
Taxes and public charges	69.5	96.6	93.7
Impairment of goodwill	7.8	3.4	333.7
Other non-interest expenses	310.2	369.0	370.4
Total non-interest expense	¥ 2,468.3	¥ 2,726.9	¥ 3,274.5

Non-interest expense consists of:

salaries and employee benefits, which include the amount of money paid as salaries and bonuses as well as the cost of fringe-benefits,

occupancy expenses net, which include the amount of money paid as rents for offices and other facilities,

fees and commissions expenses, which include the amount of money paid as fees and commissions on services received,

outsourcing expenses, including data processing, which include the amount of money paid for the outsourcing services, including IT-related services,

depreciation of premise and equipment, which includes the depreciation of the value of buildings, equipment and furniture through the passage of time,

amortization of intangible assets, which includes the amount of deductions of the cost of investments in software and other intangible assets over their estimated useful lives,

impairment of intangible assets, which includes the amount of reductions in the carrying amounts of intangible assets with indefinite useful lives in excess of their fair values,

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

insurance premiums, including deposits insurance, which include the amount of money paid as the insurance premiums including the deposit insurance premiums paid to the Deposit Insurance Corporation of Japan

communications, which include the amount of money paid for communications such as postal services and telecommunications,

taxes and public charges, which include the amount of tax payments and other public charges,

provision for repayment of excess interest, which includes the amount of money reserved for the estimated amount of repayment of excess interest payments received in our consumer finance and credit card subsidiaries,

impairment of goodwill, which includes the amount of reductions in the carrying amount of goodwill recorded in connection with the acquisition of companies in excess of their fair values, and

other non-interest expenses.

Table of Contents

Fiscal Year Ended March 31, 2016 Compared to Fiscal Year Ended March 31, 2015

Non-interest expense increased ¥547.6 billion to ¥3,274.5 billion for the fiscal year ended March 31, 2016 from ¥2,726.9 billion for the previous fiscal year. Major factors affecting this increase are discussed below.

Salaries and employee benefits

Salaries and employee benefits for the fiscal year ended March 31, 2016 were ¥1,158.9 billion, an increase of ¥61.4 billion from ¥1,097.5 billion for the previous fiscal year. This increase was primarily due to an increase in salaries largely in MUAH to increase the headcount of qualified personnel to facilitate the process for its preparation for compliance with U.S. enhanced prudential standards rules, which became applicable on July 1, 2016.

Provision for repayment of excess interest

Provision for repayment of excess interest for the fiscal year ended March 31, 2016 was ¥31.0 billion, compared to nil for the fiscal year ended March 31, 2015. The provision was recognized as we began to receive more claims from borrowers than we had anticipated during the three months ended March 31, 2016. The provision is included in other non-interest expenses in our consolidated statements of income.

Impairment of goodwill

Impairment of goodwill for the fiscal year ended March 31, 2016 was ¥333.7 billion, an increase of ¥330.3 billion from ¥3.4 billion for the fiscal year ended March 31, 2015.

For the fiscal year ended March 31, 2016, we recognized ¥4.3 billion in impairment of goodwill relating to a reporting unit within the Trust Assets Business Group segment. We readjusted the future cash flow projection of the reporting unit in this segment, considering the relevant subsidiaries' recent business performance. In light of this situation, the fair value of the reporting unit, which was based on its projected discounted future cash flow, fell below the carrying amount of the reporting unit. As a result of the required goodwill impairment test, the carrying amount of the reporting unit's goodwill exceeded the implied fair value of the reporting unit's goodwill, and the impairment loss was recognized on the related goodwill.

For the fiscal year ended March 31, 2016, we recognized ¥151.7 billion in impairment of goodwill relating to the reporting unit other than MUAH and Krungsri within the Global Business Group segment. The Bank of Japan announced implementation of the quantitative and qualitative monetary easing with negative interest rates policy in January 2016, and the benchmark yield turned and stayed negative through to the end of the fiscal year. Japanese stock prices have fallen, and the Japanese yen has appreciated against other major currencies since the start of the calendar year 2016, reflecting investors' heightened risk aversion around the globe. As a result, MUFG's stock price declined from ¥743.7 on March 31, 2015 to ¥521.5 on March 31, 2016. Since the fair value of the reporting unit other than MUAH and Krungsri within the Global Business Group segment was estimated based on MUFG's stock price, this decline led to a decrease in MUFG's market capitalization and

negatively affected the fair value of the reporting unit. In light of this situation, the fair value of the reporting unit fell below the carrying amount of the reporting unit. As a result of the required goodwill impairment test, the carrying amount of the reporting unit's goodwill exceeded the implied fair value of the reporting unit's goodwill, and the impairment loss was recognized on the related goodwill.

For the fiscal year ended March 31, 2016, we recognized ¥177.8 billion in impairment of goodwill relating to the Krungsri reporting unit within the Global Business Group segment. The economy in China continued to slow down due to weaker investment activity, while decreasing exports adversely affected other Asian economies, including Thailand. As a result of the slowdown in the Thai economic growth, Krungsri's stock price

Table of Contents

declined from THB44.75 on December 31, 2014 to THB29.75 on December 31, 2015. Since the fair value of the Krungsri reporting unit was estimated based on Krungsri's stock price, this decline led to a decrease in Krungsri's market capitalization and negatively affected the fair value of the reporting unit. In light of this situation, the fair value of the reporting unit fell below the carrying amount of the reporting unit. As a result of the required goodwill impairment test, the carrying amount of the reporting unit's goodwill exceeded the implied fair value of the reporting unit's goodwill, and the impairment loss was recognized on the related goodwill.

Impairment of intangible assets

Impairment of intangible assets for the fiscal year ended March 31, 2016 was ¥117.7 billion, compared to ¥0.7 billion for the previous fiscal year. This increase was primarily due to an increase in impairment on the core deposit intangible held by BTMU. The quantitative and qualitative monetary easing with negative interest rates policy of the Bank of Japan led to a decrease in the spread between the interest rate on BTMU's core deposit funding and alternative interest rates on BTMU's funding in the market. As a result, we reevaluated our core deposit intangible and recognized an impairment loss on BTMU's core deposit intangible. See Note 6 to our consolidated financial statements included elsewhere in this Annual Report.

Fiscal Year Ended March 31, 2015 Compared to Fiscal Year Ended March 31, 2014

Non-interest expense increased ¥258.6 billion to ¥2,726.9 billion for the fiscal year ended March 31, 2015 from ¥2,468.3 billion for the previous fiscal year. Major factors affecting this change in non-interest expense are discussed below.

Salaries and employee benefits

Salaries and employee benefits for the fiscal year ended March 31, 2015 were ¥1,097.5 billion, an increase of ¥67.9 billion from ¥1,029.6 billion for the previous fiscal year. This increase was primarily due to an increase in salaries of ¥49.4 billion as a result of the consolidation of Krungsri. Salaries also increased in our commercial banking subsidiaries' foreign offices and subsidiaries mainly due to the depreciation of the Japanese yen against the U.S. dollar.

Fees and commissions expenses

Fees and commissions expenses for the fiscal year ended March 31, 2015 was ¥248.1 billion, an increase of ¥26.1 billion from ¥222.0 billion for the fiscal year ended March 31, 2014. This increase was mainly due to the impact of the consolidation of Krungsri and large expenses relating to our consumer finance business.

Outsourcing expenses, including data processing

Outsourcing expenses, including data processing, for the fiscal year ended March 31, 2015 was ¥241.7 billion, an increase of ¥25.0 billion from ¥216.7 billion for the fiscal year ended March 31, 2014. A substantial portion of this increase was recorded in our commercial banking subsidiaries due to higher fees for upgrading system software in foreign branches and subsidiaries, including MUAH, in connection with the integration of their operations in the United States and the enhancement of their regulatory compliance system enhancement.

Amortization of intangible assets

Amortization of intangible assets for the fiscal year ended March 31, 2015 was ¥222.4 billion, an increase of ¥24.3 billion from ¥198.1 billion for the fiscal year ended March 31, 2014. This increase was mainly due to an increase in amortization of Krungsri's intangible assets such as customer relationships as Krungsri's intangible

Table of Contents

assets became subject to amortization in the fiscal year ended March 31, 2015. We recorded ¥124.3 billion of intangible assets relating to Krungsri's customer relationships as of the acquisition date of December 18, 2013. We decided to apply the fixed-installment depreciation method to these customer relationships for eight to 14-year periods, depending on the characteristics of each of the customer relationships.

Taxes and public charges

Taxes and public charges for the fiscal year ended March 31, 2015 was ¥96.6 billion, an increase of ¥27.1 billion from ¥69.5 billion for the fiscal year ended March 31, 2014. This increase was mainly due to the increase in the Japanese consumption tax rate from 5% to 8% in April 2014.

Other non-interest expenses

Other non-interest expenses for the fiscal year ended March 31, 2015 were ¥372.4 billion, an increase of ¥54.4 billion from ¥318.0 billion for the fiscal year ended March 31, 2014. This increase reflected BTMU's payment of \$315 million, or ¥34.5 billion, to the New York State Department of Financial Services in November 2014. See Recent Developments.

Income Tax Expense

The following table shows a summary of our income tax expense for the fiscal years ended March 31, 2014, 2015 and 2016:

	Fiscal years ended March 31,		
	2014	2015	2016
	(in billions, except percentages)		
Income before income tax expense	¥ 1,420.4	¥ 2,262.7	¥ 1,162.7
Income tax expense	337.9	666.0	369.4
Effective income tax rate	23.8%	29.4%	31.8%
Combined normal effective statutory tax rate	38.0%	35.6%	33.9%

Reconciling items between the combined normal effective statutory tax rates and the effective income tax rates for the fiscal years ended March 31, 2014, 2015 and 2016 are summarized as follows:

	Fiscal years ended March 31,		
	2014	2015	2016
Combined normal effective statutory tax rate	38.0%	35.6%	33.9%
Increase (decrease) in taxes resulting from:			
Nondeductible expenses	0.2	0.1	0.3
Impairment of goodwill	0.2		9.7
Foreign tax credit and payments	(0.6)	(1.0)	(1.9)
Lower tax rates applicable to income of subsidiaries	(0.4)	(0.1)	(0.2)
Change in valuation allowance	(12.4)	(1.3)	(4.0)

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

Realization of previously unrecognized tax effects of subsidiaries	(0.1)		
Nontaxable dividends received	(3.3)	(1.6)	(1.9)
Undistributed earnings of subsidiaries	0.5	0.1	0.7
Tax and interest expense for uncertainty in income taxes		(0.2)	0.0
Enacted change in tax rates	1.2	(1.7)	(4.3)
Other net	0.5	(0.5)	(0.5)
Effective income tax rate	23.8%	29.4%	31.8%

Income taxes applicable to us in Japan are imposed by the national, prefectural and municipal governments, and the aggregate of these taxes resulted in a combined normal effective statutory tax rate of 38.0%, 35.6% and 33.9% for the fiscal year ended March 31, 2014, 2015 and 2016. Foreign subsidiaries are subject to income taxes of the jurisdictions in which they operate. These taxes are reflected in the effective income tax rate.

Table of Contents

The effective income tax rate for the fiscal year ended March 31, 2016 was 31.8%, 2.1 percentage points lower than the combined normal effective statutory rate of 33.9%. The lower effective income tax rate was attributable to the effect of changes in tax law, resulting in a 4.3 percentage points decrease in the effective income tax rate. Under the 2016 Tax Reform enacted by the Japanese Diet on March 29, 2016, the effective statutory rate of corporate income tax will be reduced from approximately 33.9% to 31.5% starting in a corporation's fiscal year that begins on or after April 1, 2016. The tax reform legislation also includes changes in the limitation on the use of net operating loss carryforwards from 65% to 60% of taxable income for the period between April 1, 2016 and March 31, 2017, and from 50% to 55% for the period between April 1, 2017 and March 31, 2018, respectively, and a one-year reduction in the carryforward period of certain net operating loss carryforwards from ten years to nine years for the period between April 1, 2017 and March 31, 2018. The changes in tax laws resulted in a decrease of ¥50,081 million in income tax expense for the fiscal year ended March 31, 2016.

This lower effective income tax rate also reflected a valuation allowance release of ¥65.7 billion, which reduced our valuation allowance to ¥208.3 billion as of March 31, 2016 and resulted in a 4.0 percentage point reduction in the effective income tax rate. Generally, we reduce our valuation allowance to the extent that it is more likely than not that the deferred tax assets would be realized. For the fiscal year ended March 31, 2016, we recorded the valuation allowance release primarily because the profitability of a subsidiary improved. Management considered various factors, including the subsidiary's improved operating performance and cumulative operating results over the prior several years as well as the outlook regarding the subsidiary's prospective operating performance, and determined that sufficient positive evidence existed as of March 31, 2016 to conclude that it was more likely than not that a portion of the subsidiary's operating loss carryforwards reflected in our deferred tax assets would be realizable. As a result, our valuation allowance was reduced to the extent of that portion as of March 31, 2016.

The foregoing factors were offset by a 9.7 percentage point increase as a result of our recording an impairment of goodwill under U.S. GAAP, decreasing our income from continuing operations before income tax expense to ¥1,162.7 billion for the fiscal year ended March 31, 2016. Under Japanese tax law, such impairment was not deductible in computing our taxable income.

The effective income tax rate for the fiscal year ended March 31, 2015 was 29.4%, 6.2 percentage points lower than the combined normal effective statutory rate of 35.6%. This was partly due to our receipt of nontaxable dividends. Under Japanese tax law, a certain percentage of dividends received is regarded as nontaxable and excluded from gross revenue in computing taxable income. This creates a permanent difference between our taxable income for Japanese tax purposes and our income before income tax expense reported under U.S. GAAP. Another factor contributing to the lower effective income tax rate was a reduction in valuation allowances to the extent that it was more likely than not that the deferred tax assets would be realized mainly because certain subsidiaries were expected to remain profitable in future periods, considering the current business environment.

In addition, the lower effective income tax rate was also attributable to the effect of changes in tax law. Under the 2015 Tax Reform enacted by the Japanese Diet on March 31, 2015, the effective statutory rate of corporate income tax was reduced from approximately 35.6% to 33.9% starting in a corporation's fiscal year that begins on or after April 1, 2015. The tax reform legislation also includes changes in the limitation on the use of net operating loss carryforwards from 80% to 65% of taxable income for the two-year period between April 1, 2015 and March 31, 2017, and from 65% to 50% for the fiscal years beginning on or after April 1, 2017, respectively, and a one-year increase in the carryforward period of certain net operating loss carryforwards from nine years to ten years for the fiscal years beginning on or after April 1, 2017. The changes in tax laws resulted in a decrease of ¥39,966 million in income tax expense for the fiscal year ended March 31, 2015. Furthermore, the Tokyo Metropolitan Government Bureau of Taxation promulgated revisions to the local tax law in July 2015. The revisions reduced the combined normal effective statutory tax rate from approximately 33.9% as of March 31, 2015 to approximately 32.3% starting in a corporation's fiscal year that begins on or after April 1, 2016.

The effective income tax rate for the fiscal year ended March 31, 2014 was 23.8%, 14.2 percentage points lower than the combined normal effective statutory tax rate of 38.0%. This lower effective income tax rate

Table of Contents

primarily reflected a decrease in the valuation allowance against deferred tax assets which accounted for 12.4 percentage points of the difference between the combined normal effective statutory tax rate and the effective income tax rate. For the fiscal year ended March 31, 2014, we recorded a valuation allowance release on the basis of management's reassessment of the amount of our deferred tax assets that were more likely than not to be realized. As of March 31, 2014, management considered new evidence, both positive and negative, that could impact management's view with regard to future realization of deferred tax assets. As a result, among others,

a release of valuation allowance of ¥91.1 billion was due to the application of the consolidated corporate-tax system beginning with the fiscal year ending March 31, 2015. This is because MUFG would be able to utilize income in more profitable subsidiaries to realize the benefit of net operating loss carryforwards and existing deductible temporary differences recorded at MUFG. A consolidated basis for corporate income taxes results in the reporting of taxable income or loss based upon the combined profits or losses of the parent company and its wholly owned domestic subsidiaries. Management believes that the net operating loss carryforwards related to corporate taxes will be fully utilized by the application of the consolidated corporate-tax system; and

a release of valuation allowance of ¥45.9 billion was due to the profitability improvement of a certain subsidiary. Management considered various factors, including the improved operating performance and cumulative operating results over the prior several years of the subsidiary as well as the outlook regarding prospective operating performance of the subsidiary, and determined that sufficient positive evidence exists as of March 31, 2014, to conclude that it is more likely than not that additional deferred tax assets would be realizable.

On March 20, 2014, the Japanese Diet enacted the 2014 Tax Reform which terminated the temporary surtax levied on corporate income taxes one year earlier than the change in tax law on November 30, 2011 as described above. As a result, the effective statutory rate of corporate income tax for the fiscal year ending March 31, 2015 was set at approximately 35.6%. The change in tax law resulted in an increase of ¥16.7 billion in income tax expense for the fiscal year ended March 31, 2014.

Net income (loss) attributable to noncontrolling interests

Fiscal Year Ended March 31, 2016 Compared to Fiscal Year Ended March 31, 2015

We recorded net loss attributable to noncontrolling interests of ¥9.1 billion for the fiscal year ended March 31, 2016, compared to net income attributable to noncontrolling interests of ¥65.5 billion for the previous fiscal year. This decrease was mainly due to impairment of goodwill attributable to noncontrolling interests relating to Krungsri.

Fiscal Year Ended March 31, 2015 Compared to Fiscal Year Ended March 31, 2014

We recorded net income attributable to noncontrolling interests of ¥65.5 billion for the fiscal year ended March 31, 2015, compared to ¥67.1 billion for the previous fiscal year.

Business Segment Analysis

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

We measure the performance of each of our business segments primarily in terms of operating profit. Operating profit and other segment information in this Annual Report are based on the financial information prepared in accordance with Japanese GAAP as adjusted in accordance with internal management accounting rules and practices. Accordingly, the format and information are not consistent with our consolidated financial statements prepared on the basis of U.S. GAAP. For example, operating profit does not reflect items such as a component of the provision (credit) for credit losses (primarily equivalent to the formula allowance under U.S. GAAP), foreign exchange gains (losses) and investment securities gains (losses). For a reconciliation of operating profit under the internal management reporting system to income before income tax expense shown on the consolidated statements of income, see Note 30 to our consolidated financial statements included elsewhere

Table of Contents

in this Annual Report. We do not use information on the segments' total assets to allocate our resources and assess performance. Accordingly, business segment information on total assets is not presented.

We operate our main businesses under an integrated business group system, which integrates the operations of BTMU, MUTB, MUMSS (through MUSHD), Mitsubishi UFJ NICOS and other subsidiaries in the following five business groups: Retail Banking, Corporate Banking, Trust Assets, Global, and Global Markets, each of which is treated as a business segment. These five businesses serve as the core sources of our revenue. Operations that are not covered under these five business groups, as well as the elimination of duplicated amounts of net revenues among business segments, are classified under "Other" as further described below.

The following is a brief explanation of our business segments for the fiscal year ended March 31, 2016:

Retail Banking Business Group Covers all domestic retail businesses, including commercial banking, trust banking and securities businesses. This business group integrates the retail businesses of BTMU, MUTB, MUMSS, Mitsubishi UFJ NICOS and other subsidiaries as well as retail product development, promotion and marketing in a single management structure. At the same time, this business group has developed and implemented MUFG Plaza, a one-stop, comprehensive financial services concept that provides integrated banking, trust and securities services.

Corporate Banking Business Group Covers all domestic corporate businesses, including commercial banking, investment banking, trust banking and securities businesses. Through the integration of these business lines, diverse financial products and services are provided to our corporate clients. This business group has clarified strategic domains, sales channels and methods to match the different growth stages and financial needs of our corporate clients.

Trust Assets Business Group Covers asset management and administration services for products such as pension trusts and security trusts by integrating the trust banking expertise of MUTB and the global network of BTMU. This business group provides a full range of services to corporate and other pension funds, including stable and secure pension fund management and administration, advice on pension schemes and payment of benefits to scheme members.

Global Business Group Covers businesses outside Japan, including commercial banking such as loans, deposits and cash management services, investment banking, retail banking, trust banking and securities businesses (with the retail banking and trust assets businesses being conducted through MUB, and Krungsri), through a global network of nearly 1,200 offices outside Japan to provide customers with financial products and services that meet their increasingly diverse and sophisticated financing needs.

MUB is one of the largest commercial banks in California by both total assets and total deposits. MUB provides a wide range of financial services to consumers, small businesses, middle market companies and major corporations, primarily in California, Oregon and Washington but also nationally and internationally. MUB's parent company is MUAH, which is a bank holding company in the United States.

Krungsri is one of the major commercial banks in Thailand and provides a comprehensive range of banking, consumer finance, investment, asset management, and other financial products and services to individual consumers, small and medium enterprises, and large corporations mainly in Thailand. Krungsri's consolidated subsidiaries include a major credit card issuer, a major automobile financing service provider, an asset management company, and a microfinance service provider in Thailand. MUFG holds a 76.88% ownership interest in Krungsri through BTMU as of March 31, 2016. The amounts for this segment in the table below represent the respective amounts before taking into account the

noncontrolling interest.

Global Markets Business Group Covers asset and liability management and strategic investments of BTMU and MUTB, and sales and trading of financial products of BTMU, MUTB and MUSHD.

Other Consists mainly of the corporate centers of MUFJ, BTMU, MUTB and MUMSS. The elimination of duplicated amounts of net revenues among business segments is also reflected in Other.

Table of Contents

Effective April 1, 2015, we began to include Krungsri as part of the Global Business Group, as shown in the table below.

In addition, effective April 1, 2015, we made modifications to our management accounting rules and practices to clarify the responsibility for profits of each business segment. The modifications had the following impact:

for the fiscal year ended March 31, 2015, reducing the operating profits of the Retail Banking Business Group, the Corporate Banking Business Group and the Trust Assets Business Group by ¥6.5 billion, ¥22.3 billion and ¥1.8 billion, respectively, and increasing the operating profits of the Global Business Group, the Global Markets Business Group and Other by ¥27.7 billion, ¥39.2 billion and ¥68.3 billion, respectively;

for the fiscal year ended March 31, 2014, reducing the operating profits of the Retail Banking Business Group, the Corporate Banking Business Group, the Trust Assets Business Group and the Global Business Group by ¥3.0 billion, ¥17.6 billion, ¥1.3 billion and ¥20.4 billion, respectively, and increasing the operating profits of the Global Markets Business Group and Other by ¥33.0 billion and ¥9.6 billion, respectively.

Prior period business segment information has been restated to enable comparisons between the relevant amounts for the fiscal years ended March 31, 2014, 2015 and 2016.

Effective April 1, 2015, the Integrated Retail Banking Business Group, the Integrated Corporate Banking Business Group, the Integrated Trust Assets Business Group, the Integrated Global Business Group and the Integrated Global Markets Business Group were renamed the Retail Banking Business Group, the Corporate Banking Business Group, the Trust Assets Business Group, the Global Business Group and the Global Markets Business Group, respectively.

For further information, see Note 30 to our consolidated financial statements included elsewhere in this Annual Report.

The following table set forth our business segment information for the fiscal years ended March 31, 2014, 2015 and 2016:

	Retail Banking Business Group	Corporate Banking Business Group	Trust Assets Business Group	Other than MUAH/ Krungsri	Global Business Group			Global Markets Business Group	Other	Total
					MUAH	Krungsri	Total			
	(in billions)									
Fiscal year ended March 31, 2014:										
Net revenue:	¥ 1,283.6	¥ 912.5	¥ 159.0	¥ 540.5	¥ 375.9	¥	¥ 916.4	¥ 604.7	¥ (12.8)	¥ 3,863.4

Operating profit (loss)	¥	286.6	¥	460.3	¥	70.2	¥	213.9	¥	119.9	¥	130.4	¥	464.2	¥	426.7	¥	(157.0)	¥	1,551.0
-------------------------	---	-------	---	-------	---	------	---	-------	---	-------	---	-------	---	-------	---	-------	---	---------	---	---------

Note:

In January 2015, we integrated the former BTMU Bangkok branch with Krungsri. In the above table, the net revenue, operating expenses and operating profit of the former BTMU Bangkok branch for the fiscal year ended March 31, 2015 are included in the Global Business Group, but not in Krungsri. The net revenue, operating expenses and operating profit of the former BTMU Bangkok branch were ¥21.9 billion, ¥7.5 billion and ¥14.4 billion for the fiscal year ended March 31, 2015, respectively.

Table of Contents

Fiscal Year Ended March 31, 2016 Compared to Fiscal Year Ended March 31, 2015

Retail Banking Business Group

Net revenue of the Retail Banking Business Group decreased ¥40.2 billion to ¥1,259.2 billion for the fiscal year ended March 31, 2016 from ¥1,299.4 billion for the fiscal year ended March 31, 2015. Net revenue of the Retail Banking Business Group mainly consists of domestic revenues from commercial banking operations, such as deposits and lending operations, and fees related to sales of investment products to retail customers, as well as fees received by subsidiaries within the Retail Banking Business Group. The decrease in net revenue was mainly attributable to lower net interest income from loans, such as residential loans, as both interest rate spreads and lending volumes decreased in Japan where interest rates continued to decline and the competition in the housing loan market continued to intensify. Fee income also decreased, particularly in the commercial banking and securities subsidiaries, primarily because of lower sales in investment financial instruments such as mutual funds.

Operating expenses of the Retail Banking Business Group increased ¥13.8 billion to ¥972.6 billion for the fiscal year ended March 31, 2016 from ¥958.8 billion for the fiscal year ended March 31, 2015.

Operating profit of the Retail Banking Business Group decreased ¥54.0 billion to ¥286.6 billion for the fiscal year ended March 31, 2016 from ¥340.6 billion for the fiscal year ended March 31, 2015.

Corporate Banking Business Group

Net revenue of the Corporate Banking Business Group decreased ¥38.1 billion to ¥911.2 billion for the fiscal year ended March 31, 2016 from ¥949.3 billion for the fiscal year ended March 31, 2015. Net revenue of the Corporate Banking Business Group mainly consists of domestic revenues from corporate lending and other commercial banking operations, investment banking and trust banking businesses in relation to corporate clients, as well as fees received by subsidiaries within the Corporate Banking Business Group. The lower net revenue was mainly due to a decrease in net interest income relating to corporate lending due to reduced interest rate spreads reflecting lower market interest rates, as well as a decrease in fee income from the investment banking businesses such as structured financing in our banking subsidiaries. These decreases were offset in part by increased fee income from the primary business, such as underwriting of equity and debt securities, in our securities subsidiaries.

Operating expenses of the Corporate Banking Business Group decreased ¥3.6 billion to ¥450.9 billion for the fiscal year ended March 31, 2016 from ¥454.5 billion for the fiscal year ended March 31, 2015. This decrease was mainly due to the reduced headcount in domestic branches and the reduced administrative costs through the implementation of a new system designed to improve the efficiency of daily administrative operations through enhanced collaboration among group companies.

Operating profit of the Corporate Banking Business Group decreased ¥34.5 billion to ¥460.3 billion for the fiscal year ended March 31, 2016 from ¥494.8 billion for the fiscal year ended March 31, 2015.

Trust Assets Business Group

Net revenue of the Trust Assets Business Group increased ¥0.7 billion to ¥172.2 billion for the fiscal year ended March 31, 2016 from ¥171.5 billion for the fiscal year ended March 31, 2015. Net revenue of the Trust Assets Business Group mainly consists of fees from asset management and administration services for products such as pension trusts and investment trusts. Net revenue of Trust Assets Business Group increased mainly due to an increase in income from the fund administration and custody services globally.

Operating expenses of the Trust Assets Business Group decreased ¥1.2 billion to ¥102.0 billion for the fiscal year ended March 31, 2016 from ¥103.2 billion for the fiscal year ended March 31, 2015.

Operating profit of the Trust Assets Business Group increased ¥1.9 billion to ¥70.2 billion for the fiscal year ended March 31, 2016 from ¥68.3 billion for the fiscal year ended March 31, 2015.

Table of Contents

Global Business Group

Net revenue of the Global Business Group decreased ¥15.1 billion to ¥1,279.2 billion for the fiscal year ended March 31, 2016 from ¥1,294.3 billion for the fiscal year ended March 31, 2015. Net revenue of the Global Business Group mainly consists of revenues from commercial banking businesses outside of Japan, including loan, deposit and cash management, investment banking, retail banking, trust banking and securities businesses. Net revenue of the Global Business Group was adversely affected by decreases in revenues in China, where the economic growth decelerated, in ASEAN, where economic conditions were negatively impacted by the economic slowdown in China and declining oil and other commodity prices. Net revenue of the Global Business Group was also negatively affected by the appreciation of the Japanese yen against other major currencies. These negative effects were partially offset by increased fees from our investment banking and advisory services relating to M&A transactions in the United States and the EMEA regions. Krungsri's net revenue also increased mainly due to the expanded scope and volume of its business as a result of its integration with BTMU's Bangkok branch and lower market interest rates that enabled Krungsri to reduce its funding costs.

Operating expenses of the Global Business Group increased ¥20.3 billion to ¥815.0 billion for the fiscal year ended March 31, 2016 from ¥794.7 billion for the fiscal year ended March 31, 2015, mainly due to increases in salaries in foreign branches of our commercial banking and securities subsidiaries for global financial regulatory compliance purposes, as well as higher costs for enhancing our global financial regulatory compliance system.

Operating profit of the Global Business Group decreased ¥35.4 billion to ¥464.2 billion for the fiscal year ended March 31, 2016 from ¥499.6 billion for the fiscal year ended March 31, 2015.

Global Markets Business Group

Net revenue of the Global Markets Business Group decreased ¥27.9 billion to ¥633.8 billion for the fiscal year ended March 31, 2016 from ¥661.7 billion for the fiscal year ended March 31, 2015. This decrease was mainly attributable to higher costs of hedging our exposures relating to our foreign currency denominated bond investment portfolio.

Operating expenses of the Global Markets Business Group increased ¥2.7 billion to ¥207.1 billion for the fiscal year ended March 31, 2016 from ¥204.4 billion for the fiscal year ended March 31, 2015.

Operating profit of the Global Markets Business Group decreased ¥30.6 billion to ¥426.7 billion for the fiscal year ended March 31, 2016 from ¥457.3 billion for the fiscal year ended March 31, 2015.

Fiscal Year Ended March 31, 2015 Compared to Fiscal Year Ended March 31, 2014

Retail Banking Business Group

Net revenue of the Retail Banking Business Group increased ¥15.8 billion to ¥1,299.4 billion for the fiscal year ended March 31, 2015 from ¥1,283.6 billion for the fiscal year ended March 31, 2014. Net revenue of the Retail Banking Business Group mainly consists of domestic revenues from commercial banking operations, such as deposits and lending operations, and fees related to sales of investment products to retail customers, as well as fees received by subsidiaries within the Retail Banking Business Group. The increase in net revenue was mainly due to increases in volumes of consumer finance products and sales of financial products such as insurance products, despite the negative impact of lower interest income from loans such as residential loans due to lower interest rates and decreased volumes in the zero-interest rate and competitive housing market environment.

Operating expenses of the Retail Banking Business Group increased ¥6.6 billion to ¥958.8 billion for the fiscal year ended March 31, 2015 from ¥952.2 billion for the fiscal year ended March 31, 2014.

Operating profit of the Retail Banking Business Group increased ¥9.2 billion to ¥340.6 billion for the fiscal year ended March 31, 2015 from ¥331.4 billion for the fiscal year ended March 31, 2014.

Table of Contents

Corporate Banking Business Group

Net revenue of the Corporate Banking Business Group increased ¥36.8 billion to ¥949.3 billion for the fiscal year ended March 31, 2015 from ¥912.5 billion for the fiscal year ended March 31, 2014. Net revenue of the Corporate Banking Business Group mainly consists of domestic revenues from corporate lending and other commercial banking operations, investment banking and trust banking businesses in relation to corporate clients, as well as fees received by subsidiaries within the Corporate Banking Business Group. The increase in net revenue was mainly from the investment banking businesses such as structured financing in our banking subsidiaries and from the primary and secondary businesses in our securities subsidiaries, reflecting improved market conditions in and outside of Japan.

Operating expenses of the Corporate Banking Business Group increased ¥9.9 billion to ¥454.5 billion for the fiscal year ended March 31, 2015 from ¥444.6 billion for the fiscal year ended March 31, 2014.

Operating profit of the Corporate Banking Business Group increased ¥26.9 billion to ¥494.8 billion for the fiscal year ended March 31, 2015 from ¥467.9 billion for the fiscal year ended March 31, 2014.

Trust Assets Business Group

Net revenue of the Trust Assets Business Group increased ¥12.5 billion to ¥171.5 billion for the fiscal year ended March 31, 2015 from ¥159.0 billion for the fiscal year ended March 31, 2014. Net revenue of the Trust Assets Business Group mainly consists of fees from asset management and administration services for products such as pension trusts and investment trusts. Improvements in market conditions since the introduction of Abenomics continued to have a positive impact on the businesses of the Trust Assets Business Group.

Operating expenses of the Trust Assets Business Group increased ¥7.8 billion to ¥103.2 billion for the fiscal year ended March 31, 2015 from ¥95.4 billion for the fiscal year ended March 31, 2014.

Operating profit of the Trust Assets Business Group increased ¥4.7 billion to ¥68.3 billion for the fiscal year ended March 31, 2015 from ¥63.6 billion for the fiscal year ended March 31, 2014.

Global Business Group

Net revenue of the Global Business Group increased ¥377.9 billion to ¥1,294.3 billion for the fiscal year ended March 31, 2015 from ¥916.4 billion for the fiscal year ended March 31, 2014. Net revenue of the Global Business Group mainly consists of revenues from commercial banking businesses outside of Japan, including loan, deposit and cash management, investment banking, retail banking, trust banking and securities businesses. The increase in net revenue mainly came from increases in fees and commissions income and interest income from loans to both Japanese and non-Japanese companies in Asia and the Americas. The depreciation of the Japanese yen, mainly against the U.S. dollar, also contributed to the increase in net revenue of the Global Business Group.

Operating expenses of the Global Business Group increased ¥234.9 billion to ¥794.7 billion for the fiscal year ended March 31, 2015 from ¥559.8 billion for the fiscal year ended March 31, 2014 mainly due to increases in salaries in foreign branches of our commercial banking and securities subsidiaries, the cost for enhancing our global financial regulatory compliance system and the depreciation of the Japanese yen against other major currencies.

Operating profit of the Global Business Group increased ¥143.0 billion to ¥499.6 billion for the fiscal year ended March 31, 2015 from ¥356.6 billion for the fiscal year ended March 31, 2014.

In December 2013, BTMU acquired a controlling interest in Krungsri. Accordingly, no business segment information was stated for the fiscal year ended March 31, 2014 in the above table.

Global Markets Business Group

Net revenue of the Global Markets Business Group increased ¥57.0 billion to ¥661.7 billion for the fiscal year ended March 31, 2015 from ¥604.7 billion for the fiscal year ended March 31, 2014. This increase was

Table of Contents

mainly due to higher capital gains, in the strategic investment business in our commercial and trust banking subsidiaries, reflecting improved stock prices in major markets, and higher gains in the sales and trading business in our commercial banking and security subsidiaries, reflecting higher volatility in the financial markets.

Operating expenses of the Global Markets Business Group increased ¥19.4 billion to ¥204.4 billion for the fiscal year ended March 31, 2015 from ¥185.0 billion for the fiscal year ended March 31, 2014, primarily due to an increase in salaries, including performance-based bonuses in our overseas securities subsidiaries, reflecting increased market activities.

Operating profit of the Global Markets Business Group increased ¥37.6 billion to ¥457.3 billion for the fiscal year ended March 31, 2015 from ¥419.7 billion for the fiscal year ended March 31, 2014.

Geographic Segment Analysis

The table below sets forth our total revenue, income (loss) before income tax expense (benefit) and net income (loss) attributable to Mitsubishi UFJ Financial Group on a geographic basis for the fiscal years ended March 31, 2014, 2015 and 2016. Assets, income and expenses attributable to foreign operations are allocated to geographical areas based on the domicile of the debtors and customers. In general, the MUFG Group has allocated all direct expenses and a proportionate share of general and administrative expenses to income derived from foreign loans and other transactions by the MUFG Group's foreign operations to the relevant foreign geographical areas. Certain charges, such as most impairment charges on goodwill, are recognized as domestic expenses. For further information, see Note 31 to our consolidated financial statements included elsewhere in this Annual Report.

Table of Contents

Fiscal Year Ended March 31, 2016 Compared to Fiscal Year Ended March 31, 2015

Domestic net income attributable to Mitsubishi UFJ Financial Group decreased ¥225.3 billion to ¥185.4 billion for the fiscal year ended March 31, 2016 from ¥410.7 billion for the fiscal year ended March 31, 2015. This was mainly due to the impairment losses on goodwill relating to the Krungsri reporting unit and the reporting unit other than MUAH and Krungsri within the Global Business Group segment and a portion of the impairment loss on goodwill relating to a reporting unit within the Trust Assets Business Group segment, as well as lower interest income from the domestic loan business, and an increase in provision for credit losses during the fiscal year ended March 31, 2016.

Foreign net income attributable to Mitsubishi UFJ Financial Group decreased ¥503.5 billion to ¥616.9 billion for the fiscal year ended March 31, 2016 from ¥1,120.4 billion for the fiscal year ended March 31, 2015. The decrease in foreign net income was due to lower net income in Europe, Asia and other areas excluding the United States. The decrease in EMEA was mainly due to lower net trading profits from foreign bonds accounted for under the fair value option and interest rate derivatives, mainly reflecting the rapid increases in interest rates in Europe in May and June 2015. The decrease in Asia reflected the decelerated economic growth in China, and the stagnant economic conditions in ASEAN which were negatively impacted by the economic slowdown in China and declining oil and other commodity prices. The appreciation of the Japanese yen against the U.S. dollar and other major currencies also resulted in a decrease in the translated Japanese yen amount of net income. These decreases were partially offset by higher net income in the United States due to larger profits from the project finance business.

Fiscal Year Ended March 31, 2015 Compared to Fiscal Year Ended March 31, 2014

Domestic net income attributable to Mitsubishi UFJ Financial Group decreased ¥449.1 billion to ¥410.7 billion for the fiscal year ended March 31, 2015 from ¥859.8 billion for the fiscal year ended March 31, 2014. This was mainly due to lower interest income from the domestic loan business, an increase in provision for credit losses, and smaller gains on sales of available-for-sale securities during the fiscal year ended March 31, 2015.

Foreign net income attributable to Mitsubishi UFJ Financial Group increased ¥964.8 billion to ¥1,120.4 billion for the fiscal year ended March 31, 2015 from ¥155.6 billion for the fiscal year ended March 31, 2014. The increase in foreign net income was mainly due to an increase in net income in Europe, reflecting higher fair values of foreign currency denominated bonds related to the fair value option, including German and French government bonds, as our banking subsidiaries increased their holdings of such bonds and interest rates decreased in the region where economic conditions remained stagnant. The increase in foreign net income in the United States and Asia reflected increases in the loan balance of MUAH and Krungsri, and increases in lending interest rates in these regions.

Effect of Change in Exchange Rates on Foreign Currency Translation

Fiscal Year Ended March 31, 2016 Compared to Fiscal Year Ended March 31, 2015

The average exchange rate for the fiscal year ended March 31, 2016 was ¥120.14 per U.S.\$1.00, compared to the average exchange rate of ¥109.93 per U.S.\$1.00 for the previous fiscal year. The average exchange rate for the conversion of the U.S. dollar financial statements of some of our foreign subsidiaries for the fiscal year ended December 31, 2015 was ¥121.05 per U.S.\$1.00, compared to the average exchange rate for the fiscal year ended December 31, 2014 of ¥105.85 per U.S.\$1.00.

The change in the average exchange rate of the Japanese yen against the U.S. dollar and other foreign currencies had the effect of increasing total revenue by ¥165.5 billion, net interest income by ¥99.6 billion and income before income tax expense by ¥37.1 billion, respectively, for the fiscal year ended March 31, 2016.

Table of Contents***Fiscal Year Ended March 31, 2015 Compared to Fiscal Year Ended March 31, 2014***

The average exchange rate for the fiscal year ended March 31, 2015 was ¥109.93 per U.S.\$1.00, compared to the average exchange rate of ¥100.24 per U.S.\$1.00 for the previous fiscal year. The average exchange rate for the conversion of the U.S. dollar financial statements of some of our foreign subsidiaries for the fiscal year ended December 31, 2014 was ¥105.85 per U.S.\$1.00, compared to the average exchange rate for the fiscal year ended December 31, 2013 of ¥97.65 per U.S.\$1.00.

The change in the average exchange rate of the Japanese yen against the U.S. dollar and other foreign currencies had the effect of increasing total revenue by ¥202.8 billion, net interest income by ¥85.5 billion and income before income tax expense by ¥105.2 billion, respectively, for the fiscal year ended March 31, 2015.

B. Liquidity and Capital Resources**Financial Condition*****Total Assets***

Our total assets as of March 31, 2016 were ¥292.57 trillion, an increase of ¥11.68 trillion from ¥280.89 trillion as of March 31, 2015. The increase in total assets mainly reflected increases in cash and due from banks of ¥5.31 trillion, interest-earning deposits in other banks of ¥3.66 trillion, trading account assets of ¥3.93 trillion, and loans (before allowance for credit losses) of ¥4.52 trillion, which were partially offset by a decrease in total investment securities of ¥6.56 trillion.

The following table shows our total assets as of March 31, 2015 and 2016 by geographic region based principally on the domicile of the obligors:

	As of March 31, 2015 2016 (in trillions)	
Japan	¥ 169.28	¥177.00
Foreign:		
United States	46.33	52.72
Europe	27.72	26.19
Asia/Oceania excluding Japan	26.19	25.02
Other areas ⁽¹⁾	11.37	11.64
Total foreign	111.61	115.57
Total	¥ 280.89	¥292.57

Note:

(1) Other areas primarily include Canada, Latin America, the Caribbean and the Middle East.

We have allocated a substantial portion of our assets to international activities. As a result, reported amounts are affected by changes in the exchange rates of the Japanese yen against the U.S. dollar and other foreign currencies. Foreign assets are denominated primarily in U.S. dollars. The Japanese yen amount of foreign currency-denominated assets decreased as the relevant foreign exchange rates depreciated against the Japanese yen. For example, as of March 31, 2016 the exchange rate was ¥112.68 per U.S.\$1.00, as compared with ¥120.17 as of March 31, 2015. This appreciation of the Japanese yen against the U.S. dollar and other foreign currencies between March 31, 2015 and March 31, 2016 resulted in a ¥5.92 trillion decrease in the Japanese yen amount of our total assets as of March 31, 2016.

Table of Contents**Loan Portfolio**

The following table sets forth our loans outstanding, before deduction of allowance for credit losses, as of March 31, 2015 and 2016, based on the industry segment loan classifications as defined by the Bank of Japan for regulatory reporting purposes, which is not necessarily based on the use of proceeds:

	As of March 31, 2015 2016 (in billions)	
Domestic:		
Manufacturing	¥ 11,703.4	¥ 12,158.6
Construction	977.9	913.2
Real estate	10,911.2	11,175.1
Services	2,684.4	2,503.4
Wholesale and retail	8,345.5	7,891.4
Banks and other financial institutions ⁽¹⁾	4,330.0	5,146.9
Communication and information services	1,527.8	1,509.9
Other industries	12,674.0	14,739.8
Consumer	16,720.6	16,397.6
Total domestic	69,874.8	72,435.9
Foreign:		
Governments and official institutions	1,052.1	1,125.0
Banks and other financial institutions ⁽¹⁾	11,973.0	13,654.4
Commercial and industrial	29,593.2	30,056.5
Other	6,065.8	5,818.7
Total foreign	48,684.1	50,654.6
Unearned income, unamortized premium net and deferred loan fees net	(293.7)	(299.5)
Total⁽²⁾	¥ 118,265.2	¥ 122,791.0

- Notes:
- (1) Loans to so-called non-bank finance companies are generally included in the Banks and other financial institutions category. Non-bank finance companies are primarily engaged in consumer lending, factoring and credit card businesses.
- (2) The above table includes loans held for sale of ¥88.9 billion and ¥100.9 billion as of March 31, 2015 and 2016, respectively, which are carried at the lower of cost or fair value.

Loans are one of our main uses of funds. For the fiscal year ended March 31, 2016, the average balance of loans was ¥121.08 trillion, accounting for 47.9% of the average total interest-earning assets, compared to ¥114.02 trillion, representing 48.1% of the average total interest-earning assets, for the previous fiscal year. As of March 31, 2016, our total loans were ¥122.79 trillion, accounting for 42.0% of total assets, compared to ¥118.27 trillion, accounting for 42.1% of total assets as of March 31, 2015. As a percentage of total loans before unearned income, net unamortized premiums and net deferred loan fees, between March 31, 2015 and March 31, 2016, domestic loans decreased from 58.9% to 58.8%, while foreign loans increased from 41.1% to 41.2%.

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

Our domestic loan balance increased ¥2.56 trillion, or 3.7%, between March 31, 2015 and March 31, 2016. This was mainly due to an increase in loans to national government institutions, which are included in the other industries category, whose funding needs grew as government spending increased.

Our foreign loan balance increased ¥1.97 trillion, or 4.0%, between March 31, 2015 and March 31, 2016. This was mainly due to increased lending activity in the Americas, particularly in the United States, where economic conditions continued to improve at a moderate pace and lending volumes increased with respect to U.S. non-bank finance companies, including U.S. subsidiaries of Japanese manufacturing, securities and insurance companies.

Table of Contents*Changes in the allowance for credit losses and provision (credit) for credit losses*

The following table shows a summary of the changes in the allowance for credit losses by portfolio segment for the fiscal years ended March 31, 2015 and 2016:

Fiscal year ended March 31, 2015:	Commercial	Residential	Card	MUAH	Krungsri⁽²⁾	Total
	(in billions)					
Allowance for credit losses:						
Balance at beginning of fiscal year	¥ 876.9	¥ 116.9	¥ 40.6	¥ 60.0	¥	¥ 1,094.4
Provision (credit) for credit losses	22.6	(30.9)	2.6	(1.9)	94.6	87.0
Charge-offs	119.2	13.8	10.8	5.3	28.0	177.1
Recoveries	19.0	0.2	3.3	4.0		26.5
Net charge-offs	100.2	13.6	7.5	1.3	28.0	150.6
Others ⁽¹⁾	8.4			8.0	8.3	24.7
Balance at end of fiscal year	¥ 807.7	¥ 72.4	¥ 35.7	¥ 64.8	¥ 74.9	¥ 1,055.5
Fiscal year ended March 31, 2016:						
	(in billions)					
Allowance for credit losses:						
Balance at beginning of fiscal year	¥ 807.7	¥ 72.4	¥ 35.7	¥ 64.8	¥ 74.9	¥ 1,055.5
Provision (credit) for credit losses	117.1	(9.5)	0.9	47.4	76.0	231.9
Charge-offs	116.6	6.7	8.3	5.7	61.5	198.8
Recoveries	21.1	2.4	2.9	2.4	13.0	41.8
Net charge-offs	95.5	4.3	5.4	3.3	48.5	157.0
Others ⁽¹⁾	(12.7)			(0.5)	(6.1)	(19.3)
Balance at end of fiscal year	¥ 816.6	¥ 58.6	¥ 31.2	¥ 108.4	¥ 96.3	¥ 1,111.1

Notes:

- (1) Others are principally comprised of gains or losses from foreign exchange translation.
- (2) For the Krungsri segment, acquired loans were recorded at their fair values as of the acquisition date, and there were no indications that an allowance for credit losses was necessary for these loans for the fiscal year ended March 31, 2014. Therefore, no allowance for credit losses was stated at the beginning of the fiscal year ended March 31, 2015 in the above table.

We recorded ¥231.9 billion of provision for credit losses for the fiscal year ended March 31, 2016, compared to ¥87.0 billion for the previous fiscal year. Significant trends in each portfolio segment are discussed below.

Commercial segment Declining oil and other commodity prices resulted in deterioration of the credit quality of many borrowers in the energy sector. In addition, a large borrower in the domestic electronics manufacturing industry and its overseas subsidiaries experienced further deterioration in its business and financial performance. In light of these and other factors, we recorded a larger provision for credit losses compared to the previous fiscal year.

Residential segment The stable corporate environment in recent periods has contributed to higher income for borrowers in the segment. This trend resulted in an overall improvement in the credit quality of our residential loan portfolio. In light of this improvement and other factors, we continued to record credit for credit losses.

Card segment We continued to apply refined borrower screening, which we had originally implemented in June 2010 under regulatory reforms in the consumer finance industry. In addition, the stable corporate environment in recent periods has contributed to higher income for borrowers in the segment. These factors resulted in an overall improvement in the credit quality of our card loan portfolio. In light of this improvement and other factors, we recorded a smaller provision for credit losses compared to the previous fiscal year.

Table of Contents

MUAH segment Declining oil and gas prices resulted in deterioration of the credit quality of many borrowers in the oil and gas sector of MUAH's loan portfolio, particularly borrowers engaged in the petroleum exploration and production business. In light of this and other factors, we recorded a larger provision for credit losses compared to the previous fiscal year.

Krungsri segment Stagnant economic conditions in Thailand negatively impacted the credit quality of the small and medium-sized enterprise portfolio and the retail and consumer finance portfolio. In light of these factors, we recorded an additional provision for credit losses.

Charge-offs for the fiscal year ended March 31, 2016 were ¥198.8 billion, an increase of ¥21.7 billion from ¥177.1 billion for the previous fiscal year. This was primarily due to an increase in charge-offs in the small and medium-sized enterprise portfolio in the Krungsri segment.

Our total allowance for credit losses as of March 31, 2016 was ¥1,111.1 billion, an increase of ¥55.6 billion from ¥1,055.5 billion as of March 31, 2015, as we recorded a provision for credit losses of ¥231.9 billion while we had net charge-offs of ¥157.0 billion for the fiscal year ended March 31, 2016. For further information on our allowance for credit losses, see Allowance for credit losses below.

Allowance policy

We maintain an allowance for credit losses to absorb probable losses inherent in the loan portfolio. We have divided our allowance for loan losses into five portfolio segments: Commercial, Residential, Card, MUAH and Krungsri.

Effective April 1, 2015, the Krungsri segment includes BTMU's Bangkok branch, which was previously included in the foreign excluding MUAH and Krungsri category in the Commercial segment. Accordingly, the methodologies used to estimate the allowance for losses with respect to BTMU's Bangkok branch was changed from those applied to the Commercial segment to those applied to the Krungsri segment. The allowance for credit losses with respect to BTMU's Bangkok branch was not material as of March 31, 2015.

For all portfolio segments, key elements relating to the policies and discipline used in determining the allowance for credit losses are our credit classification and related borrower categorization process, which are closely linked to the risk grading standards set by the Japanese regulatory authorities for asset evaluation and assessment, and are used as a basis for establishing the allowance for credit losses and charge-offs. The categorization is based on conditions that may affect the ability of borrowers to service their debt, such as current financial condition and results of operations, historical payment experience, credit documentation, other public information and current trends.

For more information on our credit and borrower ratings, see Item 11. Quantitative and Qualitative Disclosures about Credit, Market and Other Risk: Credit Risk Management.

For the Commercial, MUAH and Krungsri segments, our allowance for credit losses primarily consists of allocated allowances. The allocated allowances consist of (1) an allowance for loans individually evaluated for impairment, (2) an allowance for large groups of smaller-balance homogeneous loans, and (3) a formula allowance. The allocated allowance within the Commercial segment also includes an allowance for country risk exposure. The allowance for country risk exposure within the Commercial segment covers transfer risk which is not specifically

covered by other types of allowances. Both the allowance for country risk exposure and the formula allowance are provided for performing loans that are not subject to either the allowance for loans individually evaluated for impairment or the allowance for large groups of smaller-balance homogeneous loans. The allowance for credit losses within the MUAH segment also includes an unallocated allowance which captures losses that are attributable to economic events in various industry or geographic sectors whose impact

Table of Contents

on our loan portfolios in these segments have occurred but have yet to be recognized in the allocated allowance. For the Residential and Card segments, the loans are smaller-balance homogeneous loans that are pooled by the risk ratings based on the number of delinquencies.

For more information on our methodologies used to estimate the allowance for each portfolio segment, see Summary of Significant Accounting Policies in Note 1 to our consolidated financial statements included elsewhere in this Annual Report, and Critical Accounting Estimates Allowance for Credit Losses above.

During the fiscal year ended March 31, 2016, we did not make any significant changes to the methodologies and policies used to determine our allowance for credit losses.

Allowance for credit losses

Allowance for credit losses and recorded investment in loans by portfolio segment as of March 31, 2015 and 2016 are shown below:

As of March 31, 2015:	Commercial	Residential	Card	MUAH	Krungsri	Total
	(in billions)					
Allowance for credit losses:						
Individually evaluated for impairment	¥ 516.1	¥ 49.3	¥ 25.7	¥ 4.2	¥ 7.5	¥ 602.8
Collectively evaluated for impairment	269.3	21.3	9.9	60.2	66.9	427.6

Note:

- (1) Total loans in the above table do not include loans held for sale, and represent balances without adjustments in relation to unearned income, unamortized premiums and deferred loan fees.

Table of Contents

Our total allowance for credit losses as of March 31, 2016 was ¥1,111.1 billion, an increase of ¥55.6 billion from ¥1,055.5 billion as of March 31, 2015. The total allowance for credit losses represented 0.90% of the total loan balance as of March 31, 2016, compared to 0.89% as of March 31, 2015. Significant trends in each portfolio segment are discussed below.

Commercial segment The total allowance for this segment increased ¥8.9 billion between March 31, 2015 and March 31, 2016. The allowance for credit losses for loans individually evaluated for impairment increased ¥126.7 billion, while the allowance for credit losses for loans collectively evaluated for impairment decreased ¥109.5 billion between March 31, 2015 and March 31, 2016. This increase and decrease mainly reflected the downgrade of the loans to a large borrower in the domestic electronics manufacturing industry that experienced further deterioration of its business and financial performance. Other than the one specific large exposure, the stable corporate environment had a positive effect on the overall credit quality of our commercial loan portfolio. The ratio of total allowance for credit losses to the total loan balance in this segment as of March 31, 2016 was 0.87%, compared to 0.90% as of March 31, 2015.

Residential segment The total allowance for this segment decreased ¥13.8 billion between March 31, 2015 and March 31, 2016. The stable corporate environment in recent periods has contributed to higher income for borrowers in the segment. As a substantial number of borrowers became current with their payments, nonaccrual loans decreased ¥15.8 billion, or 16.5%, between March 31, 2015 and 2016. This had a positive effect on the credit quality of our residential loan portfolio, resulting in ¥9.5 billion of credit for credit losses. The ratio of total allowance for credit losses to the total loan balance in this segment as of March 31, 2016 was 0.41%, compared to 0.50% as of March 31, 2015.

Card segment The total allowance for this segment decreased ¥4.5 billion between March 31, 2015 and March 31, 2016. As a substantial number of borrowers became current with their payments, nonaccrual loans decreased ¥4.4 billion, or 6.6%, between March 31, 2015 and March 31, 2016. The continued application of our refined borrower screening and higher income for borrowers in the stable corporate environment had a positive effect on the credit quality of our card loan portfolio. The ratio of total allowance for credit losses to the total loan balance in this segment as of March 31, 2016 was 5.25%, compared to 6.32% as of March 31, 2015.

MUAH segment The total allowance for this segment increased ¥43.6 billion between March 31, 2015 and March 31, 2016. The deterioration in the credit quality of the oil and gas sector, which was adversely affected by declining oil and other commodity prices, had a negative impact on this segment, with nonaccrual loans increasing ¥21.4 billion, or 47.5%, between March 31, 2015 and March 31, 2016. The ratio of total allowance for credit losses to the total loan balance in this segment as of March 31, 2016 was 1.15%, compared to 0.70% as of March 31, 2015.

Krungsri segment The total allowance for this segment increased ¥21.4 billion between March 31, 2015 and March 31, 2016. Stagnant economic conditions in Thailand negatively impacted the credit quality of the small and medium-sized enterprise portfolio and the retail and consumer finance portfolio. The ratio of total allowance for credit losses to the total loan balance in this segment as of March 31, 2016 was 2.06%, compared to 1.94% as of March 31, 2015.

Allowance for off-balance sheet credit instruments

We maintain an allowance for credit losses on off-balance sheet credit instruments, including commitments to extend credit, guarantees, standby letters of credit and other financial instruments. The allowance is included in other liabilities. We have adopted for such instruments the same methodology as that which is used in determining the allowance for credit losses on loans.

Table of Contents

The allowance for credit losses on off-balance sheet credit instruments was ¥72.6 billion as of March 31, 2016, a decrease of ¥0.7 billion from ¥73.3 billion as of March 31, 2015.

Sales of nonperforming loans

The following table presents comparative data relating to the principal amount of nonperforming loans sold and reversal of allowance for credit losses:

	Principal amount of loans ⁽¹⁾	Allowance for credit losses ⁽²⁾	Loans, net of allowance	Reversal of allowance for credit losses
	(in billions)			
For the fiscal year ended March 31, 2015	¥ 14.9	¥ 6.8	¥ 8.1	¥ (3.3)
For the fiscal year ended March 31, 2016	¥ 13.1	¥ 4.5	¥ 8.6	¥ (3.7)

Notes:

- (1) Represents principal amount after the deduction of charge-offs made before the sales of nonperforming loans.
(2) Represents allowance for credit losses at the latest balance-sheet date.

While we originate various types of loans to corporate and individual borrowers in Japan and overseas in the normal course of business, we dispose of nonperforming loans in order to improve our loan quality. Most of such nonperforming loans were disposed of by sales to third parties without any continuing involvement.

Through the sale of nonperforming loans to third parties, gains or losses may arise from factors such as a change in the credit quality of the borrowers or the value of the underlying collateral subsequent to the prior reporting date, and the risk appetite and investment policy of the purchasers.

In connection with the sale of loans, including performing loans, we recorded net gains of ¥15.3 billion and ¥12.1 billion for the fiscal years ended March 31, 2015 and 2016, respectively.

Nonaccrual loans and troubled debt restructurings

We consider a loan to be a nonaccrual loan when substantial doubt exists as to the full and timely payment of interest on, or repayment of, the principal of the loan, which is a borrower condition that generally corresponds to borrowers in categories 13 and below in our internal rating system (which corresponds to Likely to become Bankrupt, Virtually Bankrupt and Bankrupt or de facto Bankrupt status under Japanese banking regulations). Substantially all nonaccrual loans are also impaired loans. Loans are also placed in nonaccrual status when principal or interest is contractually past due one month or more with respect to loans within all classes of the Commercial segment, three months or more with respect to loans within the Card, MUAH and Krungsri segments, and six months or more with respect to loans within the Residential segment.

We modify certain loans in conjunction with our loss-mitigation activities. Through these modifications, concessions are granted to a borrower who is experiencing financial difficulty, generally in order to minimize economic loss, to avoid foreclosure or repossession of collateral, and to ultimately maximize payments received from the borrower. The concessions granted vary by portfolio segment, by program, and by borrower-specific characteristics, and may include interest rate reductions, term extensions, payment deferrals, and partial principal forgiveness. Loan modifications that represent concessions made to borrowers who are experiencing financial difficulties are identified as troubled debt restructurings, or TDRs. TDRs are also considered impaired loans, and an allowance for credit losses is separately established for each loan.

Generally, accruing loans that are modified in a TDR remain as accruing loans subsequent to the modification, and nonaccrual loans remain as nonaccrual. However, if a nonaccrual loan has been restructured as a TDR and the borrower is not delinquent under the restructured terms, and demonstrates that its financial condition has improved, we may reclassify the loan to accrual status. This determination is generally performed at least once a year through a detailed internal credit rating review process. Although we have not defined any

Table of Contents

minimum period to qualify for an upgrade, it is not common for a borrower to be able to demonstrate that its business problems have been resolved or can soon be resolved within a short period of time following a restructuring. If the borrower is upgraded to category 12 or higher in our internal rating system (which corresponds to Normal and Close Watch status under the Japanese banking regulations), a TDR would be reclassified to accrual status. Once a nonaccrual loan is deemed to be a TDR, we will continue to designate the loan as a TDR even if the loan is reclassified to accrual status.

A loan that has been modified into a TDR is considered to be impaired until it matures, is repaid, or is otherwise liquidated, regardless of whether the borrower performs under the modified terms.

For more information on our credit and borrower ratings, see Item 11. Quantitative and Qualitative Disclosures about Credit, Market and Other Risk Credit Risk Management.

For more information on our TDRs, see Note 4 to our consolidated financial statements included elsewhere in this Annual Report.

Nonaccrual loans

The following table shows information about the nonaccrual status of loans by class as of March 31, 2015 and 2016:

	As of March 31, 2015 2016 (in billions)	
Commercial		
Domestic	¥ 514.0	¥ 702.9
Manufacturing	118.9	372.8
Construction	20.1	15.2
Real estate	77.0	60.1
Services	54.2	40.5
Wholesale and retail	158.0	132.0
Banks and other financial institutions	5.7	0.7
Communication and information services	23.2	20.3
Other industries	18.6	29.2
Consumer	38.3	32.1
Foreign-excluding MUAH and Krungsri	96.9	189.8
Residential	95.6	79.8
Card	67.0	62.6
MUAH	45.2	66.6
Krungsri	68.1	85.3
Total⁽¹⁾	¥ 886.8	¥ 1,187.0

Note:

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

- (1) The above table does not include loans held for sale of ¥0.6 billion and ¥0.4 billion as of March 31, 2015 and 2016, respectively, and loans acquired with deteriorated credit quality of ¥26.2 billion and ¥12.8 billion as of March 31, 2015 and 2016, respectively.

Total nonaccrual loans increased ¥300.2 billion between March 31, 2015 and March 31, 2016. Significant trends in each portfolio segment are discussed below.

Commercial segment Nonaccrual loans in the domestic commercial category increased ¥188.9 billion between March 31, 2015 and March 31, 2016. This increase was primarily attributable to a downgrade of the internal borrower rating assigned to a large borrower in the domestic electronics manufacturing industry that experienced further deterioration in its business and financial performance, resulting in the transfer of the loans to the borrower from accrual status to nonaccrual status. Nonaccrual loans in the foreign excluding MUAH and

Table of Contents

Krungsri category increased ¥92.9 billion due to the transfer from accrual status to nonaccrual status of the loans to overseas subsidiaries of the same large borrower as well as loans to borrowers in the energy sector, which was adversely affected by declining oil and other commodity prices.

Residential segment Nonaccrual loans in the segment decreased ¥15.8 billion between March 31, 2015 and March 31, 2016 primarily due to the transfer from nonaccrual status to accrual status of loans to borrowers who became current with their payments as the stable corporate environment in recent periods has contributed to higher income for borrowers in the segment.

Card segment Nonaccrual loans in the segment decreased ¥4.4 billion between March 31, 2015 and March 31, 2016, as a substantial number of borrowers became current with their payments. The continued application of our refined borrower screening and higher income for borrowers in the stable corporate environment had a positive effect on the credit quality of our card loan portfolio.

MUAH segment Nonaccrual loans in the segment increased ¥21.4 billion between March 31, 2015 and March 31, 2016 primarily as a result of the transfer from the pass and special mention categories to the classified category of loans to borrowers in the oil and gas sector, which was negatively impacted by declining oil and other commodity prices.

Krungsri segment Nonaccrual loans in the segment increased ¥17.2 billion between March 31, 2015 and March 31, 2016 primarily because the credit quality of the small and medium-sized enterprise loan portfolio and the retail and consumer finance loan portfolio was adversely affected by the stagnant economic conditions in Thailand.

Troubled debt restructurings

The following table shows information about outstanding recorded investment balances of TDRs by class as of March 31, 2015 and 2016:

	As of March 31, 2015 2016 (in billions)	
Commercial⁽¹⁾		
Domestic	¥ 611.4	¥ 353.6
Manufacturing	348.9	133.5
Construction	12.9	10.5
Real estate	63.5	46.2
Services	45.2	43.9
Wholesale and retail	108.5	95.7
Banks and other financial institutions	0.7	0.0
Communication and information services	9.6	6.9
Other industries	9.5	7.7
Consumer	12.6	9.2
Foreign-excluding MUAH and Krungsri	97.0	103.6
Residential⁽¹⁾	71.5	60.6
Card⁽²⁾	90.7	79.3
MUAH⁽²⁾	56.3	98.9

Krungsri⁽²⁾	19.9	26.4
Total	¥ 946.8	¥ 722.4

Notes:

- (1) TDRs for the Commercial and Residential segments include accruing loans with concessions granted, and do not include nonaccrual loans with concessions granted.
- (2) TDRs for the Card, MUAH and Krungsri segments include accrual and nonaccrual loans. Included in the outstanding recorded investment balances as of March 31, 2015 and 2016 are nonaccrual TDRs as follows: ¥46.0 billion and ¥41.4 billion Card; ¥22.2 billion and ¥49.2 billion MUAH; and ¥7.1 billion and ¥13.8 billion Krungsri, respectively.

Table of Contents

Total TDRs decreased ¥224.4 billion between March 31, 2015 and March 31, 2016. Significant trends in each portfolio segment are discussed below.

Commercial segment TDRs in the domestic commercial category decreased ¥257.8 billion between March 31, 2015 and March 31, 2016. This decrease was primarily attributable to the transfer from accrual TDR status to nonaccrual TDR status of the loans to a large borrower in the domestic electronics manufacturing industry that experienced further deterioration in its business and financial performance. Moreover, this decrease was also attributable to the repayments by a number of borrowers in the domestic Manufacturing, Real estate, and Wholesale and retail categories.

Residential segment TDRs in the segment decreased ¥10.9 billion between March 31, 2015 and March 31, 2016 primarily as a result of repayments of loans classified as TDRs. The stable corporate environment contributed to higher income for borrowers in the segment.

Card segment TDRs in the segment decreased ¥11.4 billion between March 31, 2015 and March 31, 2016 mainly due to repayments of loans classified as TDRs pursuant to their respective restructured terms.

MUAH segment TDRs in the segment increased ¥42.6 billion between March 31, 2015 and March 31, 2016. The increase was primarily because we provided concessions to some borrowers in the oil and gas industry that began to experience significant deterioration in their financial performance.

Krungsri segment TDRs in the segment increased ¥6.5 billion between March 31, 2015 and March 31, 2016. The increase was primarily because we provided concessions to some borrowers in the small and medium-sized enterprise loan portfolio and the retail and consumer finance loan portfolio, which were adversely affected by the stagnant economic conditions in Thailand.

In the above table, TDRs for the Commercial and Residential segments include accruing loans with concessions granted, and do not include nonaccrual loans with concessions granted, whereas TDRs for the Card, MUAH and Krungsri segments include accrual and nonaccrual loans. In the Commercial and Residential segments, once a loan is classified as a nonaccrual loan, a modification would have little likelihood of resulting in the recovery of the loan in view of the severity of the financial difficulty of the borrower. Therefore, even if a nonaccrual loan is modified, the loan continues to be classified as a nonaccrual loan. The vast majority of modifications to nonaccrual loans are temporary extensions of the maturity dates, typically for periods up to 90 days, and continually made as the borrower is unable to repay or refinance the loan at the extended maturity. Accordingly, the impact of such TDRs on the outstanding recorded investment is immaterial, and the vast majority of nonaccrual TDRs have subsequently defaulted.

The primary type of concessions we granted to loans in the Commercial, Residential and Krungsri segments during the fiscal year ended March 31, 2016 were extensions of the stated maturity dates. During the same fiscal year, reductions in the stated rates were the primary type of concessions we granted to loans in the Card segment, and payment deferrals were the primary type of concessions we granted to loans in the MUAH segment.

Impaired loans and impairment allowance

Impaired loans primarily include nonaccrual loans and TDRs. We consider a loan to be impaired when, based on current information and events, it is probable that we will be unable to collect all of the scheduled payments of interest on, and repayment of, the principal of the loan when due according to the contractual terms of the loan agreement.

Table of Contents

The following table shows information about impaired loans by class as of March 31, 2015 and 2016:

	As of March 31, 2015

Notes:

- (1) Total loans in the above table do not include loans held for sale, and represent balances without adjustments in relation to unearned income, unamortized premiums and deferred loan fees.

Table of Contents

- (2) Total loans of MUAH do not include FDIC covered loans and small business loans which are not individually rated totaling ¥53.9 billion and ¥43.0 billion as of March 31, 2015 and 2016, respectively. We will be reimbursed for a substantial portion of any future losses on FDIC covered loans under the terms of the FDIC loss share agreements.

We classify loans into risk categories based on relevant information about the ability of borrowers to service their debt, including, but not limited to, historical and current financial information, historical and current payment experience, credit documentation, public and non-public information about borrowers and current economic trends as deemed appropriate to each segment.

The primary credit quality indicator for loans within all classes of the Commercial segment is the internal credit rating assigned to each borrower based on our internal borrower ratings of 1 through 15 with the rating of 1 assigned to a borrower with the highest quality of credit. When assigning a credit rating to a borrower, we evaluate the borrower's expected debt-service capability based on various information, including financial and operating information of the borrower as well as information on the industry in which the borrower operates, and the borrower's business profile, management and compliance system. In evaluating a borrower's debt-service capability, we also conduct an assessment of the level of earnings and an analysis of the borrower's net worth. Based on the internal borrower rating, loans within the Commercial segment are categorized as Normal (internal borrower ratings of 1 through 9), Close Watch (internal borrower ratings of 10 through 12), and Likely to become Bankrupt or Legally/Virtually Bankrupt (internal borrower ratings of 13 through 15). Loans to borrowers categorized as Normal represent those that are not deemed to have collectibility issues. Loans to borrowers categorized as Close Watch represent those that require close monitoring as the borrower has begun to exhibit elements of potential concern with respect to its business performance and financial condition, the borrower has begun to exhibit elements of serious concern with respect to its business performance and financial condition, including business problems requiring long-term solutions, or the borrower's loans are TDRs or loans contractually past due 90 days or more for special reasons. Loans to borrowers categorized as Likely to become Bankrupt or Legally/Virtually Bankrupt represent those that have a higher probability of default than those categorized as Close Watch due to serious debt repayment problems with poor progress in achieving restructuring plans, the borrower being considered virtually bankrupt with no prospects for an improvement in business operations, or the borrower being legally bankrupt with no prospects for continued business operations because of non-payment, suspension of business, voluntary liquidation or filing for legal liquidation.

For more information on our credit and borrower ratings, see Item 11. Quantitative and Qualitative Disclosures about Credit, Market and Other Risk Credit Risk Management.

The accrual status is a primary credit quality indicator for loans within the Residential segment, the Card segment, and consumer loans within the MUAH segment. The accrual status of these loans is determined based on the number of delinquent payments.

Commercial loans within the MUAH segment are categorized as either pass or criticized based on the internal credit rating assigned to each borrower. Criticized credits are those that are internally risk graded as Special Mention, Substandard or Doubtful. Special Mention credits are potentially weak, as the borrower has begun to exhibit deteriorating trends, which, if not corrected, may jeopardize repayment of the loan and result in a further downgrade. Classified credits are those that are internally risk graded as Substandard or Doubtful. Substandard credits have well-defined weaknesses, which, if not corrected, could jeopardize the full satisfaction of the debt. A credit classified as Doubtful has critical weaknesses that make full collection improbable on the basis of currently existing facts and conditions.

Loans within the Krungsri segment are categorized as Normal, Special Mention, and Substandard, which is further divided into Substandard, Doubtful and Doubtful of Loss, primarily based on their delinquency status. Loans categorized as Special Mention generally represent those that have overdue principal or interest payments for a cumulative period exceeding one month commencing from the contractual due date. Loans categorized as Substandard, Doubtful or Doubtful of Loss generally represent those that have overdue principal or interest payments for a cumulative period exceeding three months, commencing from the contractual due date.

Table of Contents

For the Commercial, Residential and Card segments, credit quality indicators are based on information as of March 31. For the MUAH and Krungsri segments, credit quality indicators are generally based on information as of December 31.

Significant trends in each portfolio segment are discussed below.

Commercial segment The ratio of loans classified as Close Watch or below to total loans in the segment decreased 0.5 percentage points to 4.4% as of March 31, 2016 from 4.9% as of March 31, 2015.

While the ratio of loans classified as Close Watch to total loans decreased to 3.4% as of March 31, 2016 from 4.2% as of March 31, 2015, the ratio of loans classified as Likely to become Bankrupt or Legally/Virtually Bankrupt to total loans increased to 1.0% as of March 31, 2016 from 0.7% as of March 31, 2015.

In the domestic manufacturing category, while the ratio of loans classified as Close Watch to total loans decreased to 5.0% as of March 31, 2016 from 9.0% as of March 31, 2015, the ratio of loans classified as Likely to become Bankrupt or Legally/Virtually Bankrupt to total loans increased to 3.1% as of March 31, 2016 from 1.0% as of March 31, 2015. Loans classified as Close Watch decreased mainly due to the transfer of the loans to a large borrower in the domestic electronics manufacturing industry that experienced further deterioration in its business and financial performance from Close Watch to Likely to become Bankrupt or Legally/Virtually Bankrupt. Other than above borrower, Loans classified as Close Watch also decreased due to the transfer from Close Watch to Normal of loans to several borrowers whose financial performance and prospects improved as well as repayments of loans.

In the foreign excluding MUAH and Krungsri category, the ratio of loans classified as Close Watch to total loans increased to 3.0% as of March 31, 2016 from 2.8% as of March 31, 2015 mainly due to the deteriorated creditworthiness of borrowers in the energy sector, which was adversely affected by declining oil and other commodity prices. In the same category, the ratio of loans classified as Likely to become Bankrupt or Legally/Virtually Bankrupt to total loans also increased to 0.5% as of March 31, 2016 from 0.3% as of March 31, 2015 resulting from the downgrade of the borrower ratings assigned to overseas subsidiaries of the large borrower in the domestic electronics manufacturing industry.

Residential segment The ratio of loans classified as Nonaccrual to total loans in the segment decreased 0.1 percentage points to 0.6% as of March 31, 2016 from 0.7% as of March 31, 2015. This was mainly due to a decrease of ¥16.7 billion in nonaccrual loans in the segment primarily as a result of the transfer to accrual status of loans to borrowers who became current with their repayments.

Card segment The ratio of loans classified as Nonaccrual to total loans in the segment decreased 1.4 percentage points to 10.6% as of March 31, 2016 from 12.0% as of March 31, 2015. This was mainly due to the transfer to accrual status of loans of borrowers who became current with their payments as well as an increase in newly made loans.

MUAH segment The ratio of loans classified as Special Mention or below and Nonaccrual to total loans in the segment increased 1.4 percentage points to 3.5% as of March 31, 2016 from 2.1% as of March 31, 2015. This was mainly due to an increase of ¥146.5 billion in loans classified as Special Mention or below in the segment primarily as a result of the significant deterioration in the business and financial performance of borrowers in the oil and gas sector.

Krungsri segment The ratio of loans classified as Special Mention or below to total loans in the segment increased 0.1 percentage points to 5.4% as of March 31, 2016 from 5.3% as of March 31, 2015. The increase was primarily due to increases in loans classified as Doubtful or Doubtful of Loss mainly because the credit quality of the small and medium-sized enterprise loan portfolio and the retail and consumer finance loan portfolio deteriorated due to the stagnant economic conditions in Thailand.

Notes:

- (1) Total loans in the above table do not include loans held for sale or loans acquired with deteriorated credit quality and represent balances without adjustments in relation to unearned income, unamortized premiums and deferred loan fees.
- (2) Total loans of MUAH do not include ¥1.1 billion and ¥0.7 billion of FDIC covered loans as of March 31, 2015 and 2016, respectively, which are not subject to the guidance on loans and debt securities acquired with deteriorated credit quality.

Table of Contents

Total past due loans as of March 31, 2016 were ¥439.9 billion, an increase of ¥26.0 billion from ¥413.9 billion as of March 31, 2015. This mainly reflected an increase in past due loans in the foreign excluding MUAH and Krungsri category of the Commercial segment where a borrower engaged in the overseas maritime trade business experienced significant financial difficulty due to weakening conditions in the shipping market as a consequence of the slowing economic growth in emerging and developed countries, including China. In addition, past due loans in the Krungsri segment increased primarily because the credit quality of the small and medium-sized enterprise loan portfolio and the retail and consumer finance loan portfolio deteriorated due to the stagnant economic conditions in Thailand.

Investment Portfolio

Our investment securities primarily consist of Japanese government bonds and marketable equity securities. Japanese government bonds are mostly classified as available-for-sale securities. Our investment in Japanese government bonds is a part of our asset and liability management policy with respect to investing the amount of yen-denominated funds exceeding our net loans. The percentage of our holding of available-for-sale Japanese government bonds to the total investment securities decreased to 63.8% as of March 31, 2016 from 67.8% as of March 31, 2015. We also hold Japanese government bonds that are classified as held-to-maturity securities, which accounted for 2.4% of the total investment securities as of March 31, 2016.

Historically, we have held equity securities of some of our customers primarily for strategic purposes, in particular, to maintain long-term relationships with these customers. We continue to focus on reducing our investment in equity securities for such purposes in order to reduce the price fluctuation risk in our equity portfolio from a risk management perspective and to respond to applicable regulatory requirements as well as increasing market expectations for us to reduce our equity portfolio. As of March 31, 2016, the aggregate book value of our marketable equity securities under Japanese GAAP satisfied the requirements of the legislation prohibiting banks from holding equity securities in excess of their Tier 1 capital. In November 2015, we announced that we would aim to reduce the balance of equity securities held for strategic purposes to approximately 10% of our Tier 1 capital over the next five years. During the fiscal year ended March 31, 2016, we sold down ¥120.0 billion of equity securities held in our strategic equity investment portfolio, resulting in the balance decreasing to 17.9% of our Tier 1 capital. However, various factors, including market conditions and changes in our Tier 1 capital ratio, may affect the amount of equity securities we should sell and may adversely affect our ability to achieve the target as planned.

Investment securities decreased ¥6.56 trillion to ¥45.65 trillion as of March 31, 2016 from ¥52.21 trillion as of March 31, 2015, primarily due to a decrease in our holding of Japanese government bonds primarily in response to the Bank of Japan's monetary policy and measure to purchase such bonds in the market to stimulate the economy by increasing liquidity and also as part of our asset and liability management and interest rate risk management measures. The decrease in our investment securities portfolio was also attributable to lower net unrealized gains on domestic marketable equity securities.

Investment securities other than available-for-sale or held-to-maturity securities, which are nonmarketable equity securities presented on our consolidated balance sheets as other investment securities, were primarily carried at cost of ¥0.55 trillion as of March 31, 2016 and ¥0.59 trillion as of March 31, 2015, respectively, because their fair values were not readily determinable.

For the fiscal year ended March 31, 2016, losses resulting from impairment of investment securities were ¥37.1 billion, compared to ¥5.9 billion for the fiscal year ended March 31, 2015.

Table of Contents

The following table shows information regarding the amortized cost, net unrealized gains (losses), and fair value of our available-for-sale and held-to-maturity securities as of March 31, 2015 and 2016.

	As of March 31,					
	2015		2016		Net unrealized gains (losses)	
	Amortized cost	Fair value	Net unrealized gains (losses)	Amortized cost	Fair value	Net unrealized gains (losses)
	(in billions)					
Available-for-sale securities:						
Debt securities:						
Japanese government and Japanese government agency bonds	¥ 35,079.9	¥ 35,405.6	¥ 325.7	¥28,427.2	¥29,127.8	¥700.6
Japanese prefectural and municipal bonds	186.9	194.4	7.5	441.7	455.0	13.3
Foreign governments and official institutions bonds	1,661.3	1,682.5	21.2	2,046.8	2,074.1	27.3
Corporate bonds	1,226.3	1,255.6	29.3	998.6	1,023.3	24.7
Mortgage-backed securities	1,149.8	1,139.4	(10.4)	1,091.0	1,076.8	(14.2)
Asset-backed securities ⁽¹⁾	1,255.9	1,246.0	(9.9)	1,669.1	1,666.8	(2.3)
Other debt securities	179.9	182.3	2.4	180.3	182.8	2.5
Marketable equity securities	2,568.3	6,384.6	3,816.3	2,660.0	5,619.6	2,959.6
Total available-for-sale securities	¥ 43,308.3	¥ 47,490.4	¥ 4,182.1	¥ 37,514.7	¥ 41,226.2	¥ 3,711.5
Held-to-maturity debt securities ⁽²⁾	¥ 4,130.5	¥ 4,184.1	¥ 53.6	¥ 3,866.7	¥ 3,931.2	¥ 64.5

Notes:

- (1) AAA and AA-rated products account for approximately three-fifths of our asset-backed securities.
(2) See Note 3 to our consolidated financial statements included elsewhere in this Annual Report for more details.

Net unrealized gains on available-for-sale securities were ¥3,711.5 billion as of March 31, 2016, a decrease of ¥470.6 billion from ¥4,182.1 billion as of March 31, 2015. This decrease primarily consisted of a ¥856.7 billion decrease in net unrealized gains on marketable equity securities, reflecting the general decrease in Japanese stock prices as the Japanese yen appreciated against other major currencies, despite a ¥374.9 billion increase in net unrealized gains on Japanese government bonds, reflecting lower interest rates in major markets, including Japan, affected by conditions in the Euro-zone market.

The amortized cost of held-to-maturity securities decreased ¥263.8 billion between March 31, 2015 and March 31, 2016. The decrease was mainly due to redemption on maturity of Japanese government bonds, early redemption of foreign asset-backed securities, and a decrease in the translated Japanese yen amount of U.S. dollar-denominated securities as a result of the appreciation of the Japanese yen against the U.S. dollar. Net unrealized gains on held-to-maturity securities increased ¥10.9 billion between March 31, 2015 and March 31, 2016, reflecting stronger investor demand for Japanese government bonds.

Table of Contents

The following table shows information relating to our investment securities other than available-for-sale or held-to-maturity securities as of March 31, 2015 and 2016:

	As of March 31, 2015 2016 (in billions)	
Other investment securities:		
Nonmarketable equity securities:		
Unlisted preferred securities ⁽¹⁾	¥ 446.0	¥ 391.4
Others ⁽²⁾	118.6	138.6
Investment securities held by investment companies and brokers and dealers ⁽³⁾	22.5	24.7
Total	¥ 587.1	¥ 554.7

Notes:

- (1) These securities are mainly issued by public companies, including preferred stocks issued by Morgan Stanley, preferred securities issued by our non-consolidated funding vehicles, and other unlisted preferred securities issued by several Japanese public companies. Those securities are primarily carried at cost. The decrease of ¥54.6 billion in unlisted preferred securities was mainly due to redemption of unlisted preferred securities issued by a capital raising vehicle of our client in the domestic steel industry, partially offset by unlisted preferred shares issued to us by our client in the domestic electronics manufacturing industry.
- (2) These securities are equity securities issued by unlisted companies other than unlisted preferred securities. Those securities are primarily carried at cost.
- (3) These investment securities are held by certain subsidiaries subject to specialized industry accounting principles for investment companies and brokers and dealers, and are measured at fair value.

Cash and Due from Banks

Cash and due from banks fluctuates significantly from day to day depending upon financial market conditions. Cash and due from banks as of March 31, 2016 were ¥8.66 trillion, an increase of ¥5.31 trillion from ¥3.35 trillion as of March 31, 2015. This was mainly due to an increase in the volume of deposits with the Bank of Japan by our banking subsidiaries in response to the shift in customer preference from keeping their funds in the money markets to having their funds deposited in clearing accounts with us to avoid the impact of negative interest rates on their investments in Japan.

Interest-earning Deposits in Other Banks

Interest-earning deposits in other banks fluctuate significantly from day to day depending upon financial market conditions. Interest-earning deposits in other banks as of March 31, 2016 were ¥41.02 trillion, an increase of ¥3.66 trillion compared to ¥37.36 trillion as of March 31, 2015, mainly due to increased interest-earning deposits with the Bank of Japan by our banking subsidiaries. The average interest-earning deposits in other banks by our domestic offices for the fiscal year ended March 31, 2016 were ¥31.91 trillion, an increase of ¥10.42 trillion compared to the previous fiscal year, while the average interest-earning deposits in other banks by our overseas offices were ¥9.26 trillion, an increase of ¥0.78 trillion compared to the previous fiscal year. The increase in interest-bearing deposits with other banks by our domestic offices was mainly due to an increase in the volume of deposits with the Bank of Japan by our banking subsidiaries in response to the shift in customer preference from keeping their funds in the money markets to having their funds deposited in deposit accounts with us to avoid the impact of negative interest rates on their investments in Japan.

Trading Account Assets

Trading account assets as of March 31, 2016 were ¥50.83 trillion, an increase of ¥3.93 trillion from ¥46.90 trillion as of March 31, 2015. Trading account assets consist of trading account securities and trading derivative assets. Trading account securities decreased ¥0.85 trillion to ¥29.33 trillion as of March 31, 2016 from ¥30.18 trillion as of March 31, 2015. This decrease was mainly due to a decrease in the volume of Japanese government bonds in our securities subsidiaries. Trading derivative assets increased ¥4.78 trillion to

Table of Contents

¥21.50 trillion as of March 31, 2016 from ¥16.72 trillion as of March 31, 2015. This increase was mainly attributable to an increase in the fair values of interest rate derivatives in our commercial banking and securities subsidiaries, reflecting the generally declining trends in the underlying interest rates.

Investment Securities

Total investment securities as of March 31, 2016 were ¥45.65 trillion, a decrease of ¥6.56 trillion from ¥52.21 trillion as of March 31, 2015. This was mainly due to a reduction in our holding of Japanese government bonds to manage interest rate fluctuation risks particularly in light of the Bank of Japan's quantitative and qualitative monetary easing with negative interest rates and measures to purchase Japanese government bonds in the market. Net unrealized gains on available-for-sale securities as of March 31, 2016 were ¥3.71 trillion, a decrease of ¥0.47 trillion from ¥4.18 trillion as of March 31, 2015, mainly due to declining domestic equity prices, resulting in a ¥0.86 trillion decrease in net unrealized gains. This decrease was partially offset by a ¥0.37 trillion increase in net unrealized gains on Japanese government bonds reflecting the decrease in the yield on Japanese government bonds to negative levels.

Deferred Tax Assets and Deferred Tax Liabilities

Deferred tax assets increased ¥0.07 trillion to ¥0.16 trillion as of March 31, 2016 from ¥0.09 trillion as of March 31, 2015. This increase primarily reflected an increase in net operating loss carryforwards and a decrease in prepaid benefit cost. In addition, valuation allowance was decreased reflecting management's reassessment of the amount of our deferred tax assets that were more likely than not to be realized mainly due to the profitability improvement of a certain subsidiary. The impact of these factors was partially offset by the impact on the temporary difference relating to allowance for credit losses of non-taxable write-offs of loans as well as the impact on the temporary difference relating to derivative financial instruments of increases in their fair values.

Deferred tax liabilities decreased ¥0.27 trillion to ¥0.64 trillion as of March 31, 2016 from ¥0.91 trillion as of March 31, 2015 primarily due to a decrease in net unrealized gains on trading securities and investment securities, partially offset by the increase in the fair value of derivative financial instruments.

For more information, see A. Operating Results Results of Operations Income Tax Expense and Note 7 to our consolidated financial statements included elsewhere in this Annual Report.

Total Liabilities

As of March 31, 2016, total liabilities were ¥277.72 trillion, an increase of ¥12.12 trillion from ¥265.60 trillion as of March 31, 2015. This was primarily due to an increase of ¥9.45 trillion in deposits, an increase of ¥2.00 trillion in long-term debt, and an increase of ¥4.00 trillion of trading account liabilities, partially offset by a decrease of ¥1.85 trillion in short term borrowings.

The appreciation of the Japanese yen against the U.S. dollar and other foreign currencies between March 31, 2015 and March 31, 2016 resulted in a decrease of ¥5.39 trillion in the Japanese yen equivalent amount of foreign currency-denominated liabilities as of March 31, 2016.

Deposits

Deposits are our primary source of funds. The balance of domestic deposits increased ¥9.68 trillion to ¥135.48 trillion as of March 31, 2016 from ¥125.80 trillion as of March 31, 2015, and the balance of foreign deposits decreased ¥0.23 trillion to ¥45.96 trillion as of March 31, 2016 from ¥46.19 trillion as of March 31, 2015. The increase in domestic deposits was mainly due to negative interest rates in Japan resulting in a shift in investor preference from money markets to deposits.

The total average balance of interest-bearing deposits increased ¥7.26 trillion to ¥151.46 trillion for the fiscal year ended March 31, 2016 from ¥144.20 trillion for the fiscal year ended March 31, 2015.

Table of Contents

Short-term Borrowings

We use short-term borrowings as a funding source and in our management of interest rate risk. For management of interest rate risk, short-term borrowings are used in asset and liability management operations to match interest rate risk exposure resulting from loans and other interest-earning assets and to manage funding costs of various financial instruments at an appropriate level, based on our forecast of future interest rate levels. Short-term borrowings consist of call money, funds purchased, payables under repurchase agreements, payables under securities lending transactions, due to trust accounts and other short-term borrowings.

Short-term borrowings decreased ¥1.85 trillion to ¥43.91 trillion as of March 31, 2016 from ¥45.76 trillion as of March 31, 2015. This decrease was primarily attributable to a ¥2.28 trillion decrease in call money and funds purchased and a ¥3.49 trillion decrease in payables under securities lending transactions as investor preference shifted from money markets to deposits. These decreases were offset to a large extent by a ¥4.73 trillion increase in due to trust account as a large portion of the excess cash funds temporarily placed in MUTB's proprietary account from trust accounts, which would in most cases be used as part of MUTB's funds in the call money market, was not invested in the call money market or any other fund management alternative but was kept in MUTB's account to avoid the impact of the Bank of Japan's negative interest rate policy on the call money market and other investment options in Japan.

Trading Account Liabilities

Trading account liabilities as of March 31, 2016 were ¥21.03 trillion, an increase of ¥4.00 trillion from ¥17.03 trillion as of March 31, 2015. Trading account liabilities mainly consist of trading derivative liabilities. The increase in trading derivative liabilities was mainly attributable to increases in the fair values of interest rate derivatives in our commercial banking and securities subsidiaries.

Long-term Debt

Long-term debt as of March 31, 2016 was ¥21.97 trillion, an increase of ¥2.00 trillion from ¥19.97 trillion as of March 31, 2015. This increase was due to increases in long-term borrowings and issuances of bonds by us to meet the TLAC requirements and by our banking subsidiaries to diversify our funding sources.

The average balance of long-term debt for the fiscal year ended March 31, 2016 was ¥20.37 trillion, an increase of ¥2.77 trillion from ¥17.60 trillion for the previous fiscal year.

The senior notes and subordinated bonds that MUFG issued for TLAC and other Basel III compliance purposes are included in long-term debt. See Recent Developments.

Other Liabilities

Other liabilities decreased ¥0.68 trillion to ¥7.19 trillion as of March 31, 2016 from ¥7.87 trillion as of March 31, 2015. This decrease was mainly due to decreases in accounts payable and deferred tax liabilities. The decrease in accounts payable was primarily due to a smaller amount of investment securities purchased towards the end of the fiscal year ended March 31, 2016 in our trust banking and securities subsidiaries.

Sources of Funding and Liquidity

Our primary source of liquidity is from a large balance of deposits, mainly ordinary deposits, certificates of deposit and time deposits. Time deposits have historically shown a high rollover rate among our corporate customers and individual depositors. The average deposit balance increased from ¥164.59 trillion for the fiscal year ended March 31, 2015 to ¥173.94 trillion for the fiscal year ended March 31, 2016. These deposits provide us with a sizable source of stable and low-cost funds. Our average deposits, combined with average total equity of ¥15.29 trillion, funded 63.2% of our average total assets of ¥299.28 trillion during the fiscal year ended March 31, 2016. Our deposits exceeded our loans before allowance for credit losses by ¥58.65 trillion as of March 31, 2016 compared to ¥53.72 trillion as of March 31, 2015. As part of our asset and liability management policy, a significant portion of the amount of yen-denominated funds exceeding our loans has been deposited with the Bank of Japan or invested in Japanese government bonds in recent periods.

Table of Contents

The remaining funding was primarily provided by short-term borrowings and long-term senior and subordinated debt. Short-term borrowings consist of call money and funds purchased, payables under repurchase agreements, payables under securities lending transactions, due to trust account, and other short-term borrowings. From time to time, we have issued long-term instruments such as straight bonds with maturities between three to ten years. The balance of our short-term borrowings as of March 31, 2016 was ¥43.91 trillion, and the average balance of short-term borrowings for the fiscal year ended March 31, 2016 was ¥46.61 trillion. The balance of our long-term debt as of March 31, 2016 was ¥21.97 trillion, and the average balance of long-term debt for the fiscal year ended March 31, 2016 was ¥20.37 trillion. Liquidity may also be provided by the sale of financial assets, including available-for-sale securities, trading account securities and loans. Additional liquidity may be provided by the maturity of loans.

We manage liquidity separately at certain of our foreign and domestic non-bank and banking subsidiaries because they are subject to separate regulatory requirements, pursue different business models and have distinctive liquidity risk profiles. We manage our group-wide liquidity on a consolidated basis based on the tests and analyses conducted at the subsidiary level. Liquidity risk management measures at the subsidiary level include the following:

Domestic banking subsidiaries Our major domestic banking subsidiaries, BTMU and MUTB, set liquidity and funding limits designed to maintain their respective requirements for funding from market sources below pre-determined levels for certain periods (e.g., one-day, two-week and one-month). The major domestic banking subsidiaries also monitor the balance of buffer assets they respectively hold, including Japanese government bonds and U.S. Treasury bonds, which can be used for cash funding even in periods of stress. In addition, the major domestic banking subsidiaries regularly perform liquidity stress testing designed to evaluate the impact of systemic market stress conditions and institution-specific stress events, including credit rating downgrades, on their liquidity positions;

Foreign banking subsidiaries Our major foreign banking subsidiaries, MUAH and Krungsri, monitors various liquidity metrics, including total available liquidity, the net non-core funding dependence ratio, and minimum liquidity assets, as a tool to maintain a sufficient amount of liquidity and diversity of funding sources to allow the major foreign banking subsidiaries to meet expected obligations in both stable and adverse conditions. In addition, the major foreign banking subsidiaries regularly conduct stress testing, which incorporates both bank-specific and systemic market scenarios that would adversely affect its liquidity position, to facilitate the identification of appropriate remedial measures to help ensure that it maintains adequate liquidity in adverse conditions;

Securities subsidiaries Our securities subsidiaries implement liquidity and funding limits designed to maintain their requirements for funding from market sources below pre-determined levels for specified periods. In addition, the securities subsidiaries regularly conduct analyses designed to assess the period for which they can continue to meet their respective liquidity requirements by selling or pledging assets they respectively hold under scenarios where they are unable to access any additional sources of financing in the market; and

Non-bank subsidiaries Our non-bank subsidiaries, including Mitsubishi UFJ NICOS, regularly conduct cash flow analyses designed to assess their ability to generate sufficient liquidity for specified periods, considering the cash and cash equivalents as well as deposits they respectively hold, and their respective operating income and expenses under scenarios where they are no longer able to obtain funding from markets through issuance of commercial paper, bonds or other instruments. The non-bank subsidiaries also conduct analyses to ensure sufficient liquidity and funding are available from our bank subsidiaries and other financial institutions outside of our group of companies.

We collect and evaluate the results of the stress tests individually performed by our major subsidiaries to ensure our ability to meet our liquidity requirements on a consolidated basis in stress scenarios.

We manage our funding sources using buffer assets, primarily Japanese government bonds, for cash funding. As of March 31, 2016, we held ¥29.13 trillion of Japanese government bonds and government agency

Table of Contents

bonds as available-for-sale securities. We also use deposits with the Bank of Japan as buffer assets. Our commercial banking subsidiaries use liquidity-supplying assets, primarily commitment lines for minor currencies funding. In addition, our commercial banking subsidiaries use a liquidity gap, or the excess of cash inflows over cash outflows, for cash funding.

In December 2014, Moody's downgraded the long-term credit ratings of BTMU and MUTB by one-notch from Aa3 to A1, the long-term credit rating of MUSHD by one-notch from A2 to A3, and the short-term credit rating of MUSHD by one-notch from P-1 to P-2. These downgrades followed the downgrade of the rating assigned to the Government of Japan from Aa3 to A1. In November 2015, Standard and Poor's changed the credit rating outlook for MUFG, BTMU and MUTB from stable to negative, following S&P's revision of its view on the economic risk trend in Japan's banking sector from stable to negative. In addition, in June 2016, Fitch changed the credit rating outlook of MUFG, BTMU and MUTB from stable to negative, following Fitch's change in the credit rating outlook for the Government of Japan from stable to negative. Although these credit rating and outlook changes have not resulted, and are not currently expected to result, in a material adverse impact on us, a further downgrade of the credit ratings assigned to us or our major subsidiaries could result in higher funding costs and other adverse consequences. See Item 3.D. Key Information Risk Factors Risks Related to Our Business A downgrade of our credit ratings could adversely affect our ability to access and maintain liquidity.

Liquidity Requirements for Banking Institutions in Japan

Starting in June 2015, banks and bank holding companies in Japan are required to disclose their LCRs calculated in accordance with the methodology prescribed in the FSA guidance that has been adopted to implement the relevant Basel III standard. A minimum LCR of 70% is required in 2016, and the required minimum ratio is expected to be raised annually by 10 percentage points to 100% by 2019. See Item 4.B. Information on the Company Business Overview Supervision and Regulation Japan Liquidity Coverage Ratio.

Total Equity

The following table presents a summary of our total equity as of March 31, 2015 and 2016:

	March 31, 2015	March 31, 2016
	(in billions, except percentages)	
Capital stock	¥ 2,090.3	¥2,090.3
Capital surplus	5,959.6	5,958.9
Retained earnings	3,664.4	4,219.9
Retained earnings appropriated for legal reserve	239.6	239.6
Unappropriated retained earnings	3,424.8	3,980.3
Net unrealized gains on investment securities, net of taxes	2,304.6	1,995.3
Accumulated other comprehensive income, net of taxes, other than net unrealized gains on investment securities	762.7	305.9
Treasury stock, at cost	(102.5)	(299.7)
Total Mitsubishi UFJ Financial Group shareholders' equity	¥ 14,679.1	¥14,270.6
Noncontrolling interests	602.2	577.7
Total equity	¥ 15,281.3	¥14,848.3
Ratio of total equity to total assets	5.44%	5.08%

Mitsubishi UFJ Financial Group shareholders' equity as of March 31, 2016 was ¥14,270.6 billion, a decrease of ¥408.5 billion from ¥14,679.1 billion as of March 31, 2015.

Table of Contents

Capital surplus as of March 31, 2016 was ¥5,958.9 billion, a decrease of ¥0.7 billion from ¥5,959.6 billion as of March 31, 2015. This decrease was mainly due to our acquisition of shares of certain subsidiaries from non-controlling interests.

Retained earnings as of March 31, 2016 were ¥4,219.9 billion, an increase of ¥555.5 billion from ¥3,664.4 billion as of March 31, 2015, reflecting the net income of our banking and securities subsidiaries for the fiscal year ended March 31, 2016. We decided to pay our year-end dividend of ¥9 per share of common stock for the six months ended March 31, 2016, resulting in an annual dividend of ¥18 per share of common stock for the fiscal year ended March 31, 2016.

Net unrealized gains on investment securities, net of taxes, as of March 31, 2016 were ¥1,995.3 billion, a decrease of ¥309.3 billion from ¥2,304.6 billion as of March 31, 2015. The decrease was mainly due to a generally downward trend in the Japanese stock market during the fiscal year ended March 31, 2016, in addition to the appreciation of Japanese yen against the U.S. dollar and other currencies.

Accumulated other comprehensive income, net of taxes, other than net unrealized gains on investment securities as of March 31, 2016 was ¥305.9 billion, a decrease of ¥456.8 billion from ¥762.7 billion as of March 31, 2015. The decrease was mainly due to ¥326.7 billion of negative net change in the balance of foreign currency translation adjustments, reflecting the appreciation of the Japanese yen against the U.S. dollars and other major currencies.

Treasury stock increased ¥197.2 billion to ¥299.7 billion as of March 31, 2016 from ¥102.5 billion as of March 31, 2015, mostly as a result of repurchases made under our stock repurchase programs. See Recent Developments.

As a result of the foregoing, total equity decreased ¥433.0 billion to ¥14,848.3 billion as of March 31, 2016 from ¥15,281.3 billion as of March 31, 2015. The ratio of total equity to total assets decreased 0.36 percentage points to 5.08% as of March 31, 2016 from 5.44% as of March 31, 2015.

Due to our holdings of a large amount of marketable equity securities and the volatility of the equity markets in Japan, changes in the fair value of marketable equity securities have significantly affected our total equity in recent years. The following table presents information relating to the accumulated net unrealized gains, net of taxes, in respect of available-for-sale investment securities as of March 31, 2015 and 2016:

	March 31, 2015	March 31, 2016
	(in billions, except percentages)	
Accumulated net unrealized gains on investment securities	¥ 2,304.6	¥ 1,995.3
Accumulated net unrealized gains to total equity	15.08%	13.44%

Capital Adequacy

We are subject to various regulatory capital requirements promulgated by the regulatory authorities of the countries in which we operate. Failure to meet minimum capital requirements can result in mandatory actions being taken by regulators that could have a direct material effect on our consolidated financial statements. Moreover, if our capital ratios are perceived to be low, our counterparties may avoid entering into transactions with us, which in turn could negatively affect our business and operations. For further information, see Item 3.D. Key Information Risk

Factors Risks Related to Our Business We may not be able to maintain our capital ratios above minimum required levels, which could result in the suspension of some or all of our operations.

We continually monitor our risk-adjusted capital ratio and leverage ratio closely, and manage our operations in consideration of the capital requirements. These ratios are affected not only by fluctuations in the value of our assets, including our credit risk assets such as loans and equity securities, the risk weights of which depend on

Table of Contents

the borrowers or issuers' internal ratings, marketable securities and deferred tax assets, but also by fluctuations in the value of the Japanese yen against the U.S. dollar and other foreign currencies and by general price levels of Japanese equity securities.

Capital Requirements for Banking Institutions in Japan

Under Japanese regulatory capital requirements, our consolidated capital components, including Common Equity Tier 1, Tier 1, and Tier 2 capital and risk-weighted assets, are calculated based on our consolidated financial statements prepared under Japanese GAAP. Each of the consolidated and stand-alone capital components and risk-weighted assets of our banking subsidiaries in Japan is also calculated based on consolidated and non-consolidated financial statements prepared under Japanese GAAP.

Certain Basel III provisions were adopted by the FSA with transitional measures and became effective March 31, 2013. Various Basel III measures are being phased in from the calendar year 2013, including those designed to raise the level of minimum capital requirements and to establish an internationally harmonized leverage ratio and a global minimum liquidity standard.

Effective March 31, 2016, the FSA's capital conservation buffer, countercyclical buffer and global systemically important bank, or G-SIB, surcharge requirements became applicable to Japanese banking institutions with international operations conducted through foreign offices. The requirements are currently being phased in and, as of March 31, 2016, we are required to maintain a capital conservation buffer of 0.625% and a G-SIB surcharge of 0.375% in addition to the 4.50% minimum Common Equity Tier 1 capital ratio. As of the same date, no countercyclical buffer is applicable to us. When fully implemented on March 31, 2019, we will be required to maintain a capital conservation buffer of 2.5%, a countercyclical buffer of up to 2.5%, and a G-SIB surcharge of 1.5%, assuming we will be in Bucket 2 of the G-SIB list. See Item 4.B. Information on the Company Business Overview Supervision and Regulation Japan Capital adequacy.

We have been granted approval by the FSA to exclude the majority of our investment in Morgan Stanley from being subject to double gearing adjustments. The approval was granted for a 10-year period, but the approval amount will be phased out by 20% each year starting from March 31, 2019. As of March 31, 2016, a full application of double gearing adjustments with respect to our investment in Morgan Stanley would have reduced our Common Equity Tier 1 capital ratio by approximately 0.7%.

Leverage Requirements for Banking Institutions in Japan

We are required to disclose our consolidated regulatory leverage ratio calculated in accordance with the methodology prescribed in the FSA guidance that has been adopted to implement the relevant Basel III standard. The leverage ratio is designed for monitoring and preventing the build-up of excessive leverage in the banking sector and is expressed as the ratio of Tier 1 capital to total balance sheet assets adjusted in accordance with the FSA guidance. The details of the leverage ratio requirements are currently under discussion by global standard-setting organizations, including the Group of Central Bank Governors and Heads of Supervision and the Basel Committee of Banking Supervision. The final leverage ratio requirements, including the currently expected minimum leverage ratio of 3% and any additional requirements for G-SIBs, are expected to be implemented in the calendar year 2018. See Item 4.B. Information on the Company Business Overview Supervision and Regulation Japan Capital adequacy.

Table of Contents**Capital Ratios and Leverage Ratios of MUFG**

The table below presents our consolidated total capital components, risk-weighted assets, risk-adjusted capital ratios and leverage ratios in accordance with Basel III as of March 31, 2015 and 2016. Underlying figures are calculated in accordance with Japanese banking regulations based on information derived from our consolidated financial statements prepared in accordance with Japanese GAAP, as required by the FSA. The figures in the table below are rounded down. For further information, see Note 22 to our consolidated financial statements included elsewhere in this Annual Report.

	As of March 31, 2015	Minimum capital ratios required (in billions, except percentages)	As of March 31, 2016	Minimum capital ratios required
Capital components:				
Common Equity Tier 1	¥ 12,466.6		¥ 13,039.8	
Additional Tier 1	1,663.7		1,799.4	
Tier 1 capital	14,130.3		14,839.2	
Tier 2 capital	3,421.9		3,102.5	
Total capital	¥ 17,552.3		¥ 17,941.8	
Risk-weighted assets ⁽¹⁾⁽³⁾	¥ 112,315.2		¥ 112,064.3	
Capital ratios⁽²⁾⁽³⁾:				
Common Equity Tier 1 capital ratio ⁽⁴⁾	11.09%	4.50%	11.63%	4.50%
Tier 1 capital	12.58	6.00	13.24	6.00
Total capital	15.62	8.00	16.01	8.00
Leverage ratio	4.72		4.79	

Notes:

- (1) Risk-weighted assets as of March 31, 2015 have been revised from ¥111,901.5 billion to ¥112,315.2 billion.
- (2) Common Equity Tier 1 capital ratio as of March 31, 2015 has been revised from 11.14% to 11.09%, Tier 1 capital ratio as of March 31, 2015 has been revised from 12.62% to 12.58%, and Total capital ratio as of March 31, 2015 has been revised from 15.68% to 15.62%.
- (3) The revisions reflect corrections of errors in the risk weighting applied to certain assets, mostly residential mortgage loans, and certain other adjustments made under Basel I standards to obtain amounts that were used for floor adjustments in determining the amounts of our risk-weighted assets under Basel III standards. Although these revisions did not affect our compliance with the applicable Japanese regulatory capital requirements, we voluntarily revised the information previously submitted to the FSA and publicly announced the revisions.
- (4) Effective March 31, 2016, the FSA's capital conservation buffer, countercyclical buffer and G-SIB surcharge requirements became applicable to Japanese banking institutions with international operations conducted through foreign offices. As a result, in addition to the 4.50% minimum Common Equity Tier 1 capital ratio, MUFG is required to maintain a capital conservation buffer of 0.625% and a G-SIB surcharge of 0.375% as of March 31, 2016. As of the same date, the countercyclical buffer applicable to MUFG is nil.

Management believes that, as of March 31, 2016, we were in compliance with all capital adequacy requirements to which we were subject.

Our Common Equity Tier 1 capital ratio as of March 31, 2016 increased from the ratio as of March 31, 2015 mainly due to an increase in our consolidated regulatory capital amounts. The increases in our consolidated regulatory capital amounts, particularly our Common Equity Tier 1 capital, were mainly due to an increase in retained earnings and other comprehensive income. Our risk-weighted assets were relatively unchanged. While our loan balance increased, the increase was mostly offset by a decrease in our equity balance and the impact of the appreciation of the Japanese yen against other major currencies.

Table of Contents**Capital Ratios and Leverage Ratios of Major Banking Subsidiaries in Japan**

The table below presents the risk-adjusted capital ratios and leverage ratios of BTMU and MUTB in accordance with Basel III as of March 31, 2015 and 2016. Underlying figures are calculated in accordance with Japanese banking regulations based on information derived from each bank's consolidated and non-consolidated financial statements prepared in accordance with Japanese GAAP, as required by the FSA. The figures in the table below are rounded down. For further information, see Note 22 to our consolidated financial statements included elsewhere in this Annual Report.

	As of March 31, 2015	Minimum capital ratios required	As of March 31, 2016	Minimum capital ratios required
Consolidated:				
BTMU⁽¹⁾				
Common Equity Tier 1 capital ratio	10.77%	4.50%	11.08%	4.50%
Tier 1 capital ratio	12.21	6.00	12.71	6.00
Total capital ratio	15.45	8.00	15.66	8.00
Leverage ratio	4.64		4.79	
MUTB				
Common Equity Tier 1 capital ratio	14.70	4.50	16.01	4.50
Tier 1 capital ratio	15.26	6.00	16.82	6.00
Total capital ratio	19.15	8.00	19.97	8.00
Leverage ratio	4.72		4.28	
Stand-alone:				
BTMU⁽¹⁾				
Common Equity Tier 1 capital ratio	11.76	4.50	12.30	4.50
Tier 1 capital ratio	13.38	6.00	14.25	6.00
Total capital ratio	17.03	8.00	17.51	8.00
MUTB⁽²⁾				
Common Equity Tier 1 capital ratio	14.31	4.50	16.58	4.50
Tier 1 capital ratio	14.86	6.00	17.45	6.00
Total capital ratio	19.11	8.00	21.08	8.00

Notes:

- (1) Common Equity Tier 1 capital ratio for BTMU as of March 31, 2015 has been revised from 10.88% to 10.77% on a consolidated basis and 11.90% to 11.76% on a stand-alone basis. Tier 1 capital ratio for BTMU as of March 31, 2015 has been revised from 12.33% to 12.21% on a consolidated basis and 13.54% to 13.38% on a stand-alone basis. Total capital ratio for BTMU as of March 31, 2015 has been revised from 15.61% to 15.45% on a consolidated basis and 17.23% to 17.03% on a stand-alone basis. The revisions reflect corrections of errors in the risk weighting applied to certain assets, mostly residential mortgage loans, and certain other adjustments made under Basel I standards to obtain amounts that were used for floor adjustments in determining the amounts of BTMU's risk-weighted assets under Basel III standards.
- (2) Common Equity Tier 1 capital ratio for MUTB as of March 31, 2015 has been revised from 14.35% to 14.31% on a stand-alone basis. Tier 1 capital ratio for MUTB as of March 31, 2015 has been revised from 14.90% to 14.86% on a stand-alone basis. Total capital ratio for MUTB as of March 31, 2015 has been revised from 19.16% to 19.11% on a stand-alone basis. The revisions reflect corrections of errors in the risk weighting applied to certain assets, mostly residential mortgage loans, and certain other adjustments made under Basel I standards to obtain amounts that were used for floor adjustments in determining the amounts of MUTB's risk-weighted assets under Basel III standards.

Management believes that, as of March 31, 2016, our banking subsidiaries were in compliance with all capital adequacy requirements to which they were subject.

Table of Contents***Liquidity Coverage Ratios of MUFG and Major Banking Subsidiaries in Japan***

The following table presents the LCRs of MUFG, BTMU and MUTB in accordance with Basel III as of September 30, 2015 and March 31, 2016. Underlying figures are calculated in accordance with Japanese banking regulations based on information derived from our consolidated and non-consolidated financial statements prepared in accordance with Japanese GAAP, as required by the FSA. The percentages in the table below are rounded down. The minimum ratios required as of September 30, 2015 and March 31, 2016 were 60% and 70%, respectively.

	September 30, 2015 ⁽¹⁾	March 31, 2016 ⁽²⁾
MUFG (consolidated)	130.4%	130.0%
BTMU (consolidated)	130.8	133.9
BTMU (stand-alone)	141.3	144.2
MUTB (consolidated)	154.6	119.4
MUTB (stand-alone)	182.3	135.9

Notes:

- (1) Each of the ratios is calculated by dividing the month-end average balance of High-Quality Liquid Assets as of the end of July, August and September 2015 by the monthly average amount of total net cash outflows for the same three months.
- (2) Each of the ratios is calculated by dividing the month-end average balance of High-Quality Liquid Assets as of the end of January, February, and March 2016 by the monthly average amount of total net cash outflows for the same three months.

See B. Liquidity and Capital Resources Sources of Funding and Liquidity.

Capital Requirements for Banking Institutions in the United States

In the United States, MUAH and MUB are subject to various regulatory capital requirements administered by the U.S. Federal banking agencies. Failure to meet the applicable minimum capital requirements can initiate certain mandatory, and possibly additional discretionary, actions by regulators that, if undertaken, could have a material effect on MUAH's consolidated financial statements.

For a more detailed discussion of the applicable capital requirements, see Item 4.B. Information on the Company Business Overview Supervision and Regulation United States. See also Note 22 to our consolidated financial statements included elsewhere in this Annual Report.

In addition, as foreign banking organizations that have U.S. branches and agencies and also as entities that are controlled by MUFG, which is a financial holding company, BTMU and MUTB are subject to the FRB's requirements.

Table of Contents**Capital Ratios of Banking Subsidiaries in the United States**

The table below presents the risk-adjusted capital ratios of MUAH and MUB, both subsidiaries of BTMU, calculated in accordance with applicable U.S. banking regulations as of December 31, 2014 and 2015:

	As of December 31,		Minimum capital ratios required as of December 2015	Ratio OCC requires to be well capitalized as of December 2015
	2014	2015		
MUAH:				
Tier I capital (to risk-weighted assets)	12.79%	13.64%	6.00%	
Tier I capital (to quarterly average assets) ⁽¹⁾	11.25	11.40	4.00	
Total capital (to risk-weighted assets)	14.74	15.56	8.00	
Common Equity Tier I Capital (to risk-weighted assets)		13.63	4.50	
MUB:				
Tier I capital (to risk-weighted assets)	13.09%	13.18%	6.00%	8.00%
Tier I capital (to quarterly average assets) ⁽¹⁾	11.09	11.03	4.00	5.00
Total capital (to risk-weighted assets)	14.78	14.91	8.00	10.00
Common Equity Tier I Capital (to risk-weighted assets)	13.09	13.18	4.50	6.50

Note:

(1) Excludes certain intangible assets.

Management believes that, as of December 31, 2015, MUAH and MUB were in compliance with all capital adequacy requirements to which they were subject.

As of December 31, 2014 and 2015, the OCC categorized MUB as well-capitalized. To be categorized as well-capitalized, MUB must maintain minimum ratios of Total and Tier I capital to risk-weighted assets and of Tier I capital to quarterly average assets (leverage ratio) as set forth in the table. There have been no conditions or events since December 31, 2015 that would cause management to believe that MUB's category has changed.

For further information, see Note 22 to our consolidated financial statements included elsewhere in this Annual Report.

Capital Requirements for Securities Firms in Japan and Overseas

We have securities subsidiaries in Japan and overseas, which are also subject to regulatory capital requirements. In Japan, the Financial Instruments and Exchange Act of Japan and related ordinances require financial instruments firms to maintain a minimum capital ratio of 120% calculated as a percentage of capital accounts less certain fixed assets, as determined in accordance with Japanese GAAP, against amounts equivalent to market, counterparty credit and operations risks. Specific guidelines are issued as a ministerial ordinance which details the

definition of essential components of the capital ratios, including capital, deductible fixed asset items and risks, and related measures. Failure to maintain a minimum capital ratio will trigger mandatory regulatory actions. A capital ratio of less than 140% will call for additional regulatory reporting, a capital ratio of less than 120% may result in an order to change the method of business, and a capital ratio of less than 100% may lead to a suspension of all or part of the business for a period of time and cancellation of a registration. Overseas securities subsidiaries are subject to the relevant regulatory capital requirements of the countries or jurisdictions in which they operate.

Capital Adequacy Ratio of MUMSS

As of March 31, 2016, MUMSS capital accounts less certain fixed assets of ¥416.1 billion on a stand-alone basis and ¥441.1 billion on a consolidated basis represented 278.1% and 279.3% of the total amounts equivalent

Table of Contents

to market, counterparty credit and operations risks, respectively, as calculated pursuant to the Financial Instruments and Exchange Act of Japan. As of March 31, 2015, MUMSS capital accounts less certain fixed assets of ¥398.2 billion on a stand-alone basis and ¥426.1 billion on a consolidated basis represented 299.9% and 302.0% of the total amount equivalent to market, counterparty credit and operations risks, respectively, as calculated pursuant to the Financial Instruments and Exchange Act of Japan.

For further information, see Note 22 to our consolidated financial statements included elsewhere in this Annual Report.

Non-exchange Traded Contracts Accounted for at Fair Value

The use of non-exchange traded or over-the-counter contracts provides us with the ability to adapt to the varied requirements of a wide customer base while mitigating market risks. Non-exchange traded contracts are accounted for at fair value, which is generally based on pricing models or quoted prices for instruments with similar characteristics. Gains or losses on non-exchange traded contracts are included in Trading account profits (losses) net in our consolidated statements of income included elsewhere in this Annual Report. The following table summarizes the changes in the fair value of non-exchange traded contracts for the fiscal years ended March 31, 2015 and 2016:

	Fiscal years ended March 31, 2015 2016 (in millions)	
Net fair value of contracts outstanding at beginning of fiscal year	¥ 16,739	¥ 1,573
Changes attributable to contracts realized or otherwise settled during the fiscal year	(12,637)	4,578
Fair value of new contracts entered into during the fiscal year	(883)	
Other changes in fair value, principally revaluation at end of fiscal year	(1,646)	(1,361)
Net fair value of contracts outstanding at end of fiscal year	¥ 1,573	¥ 4,790

The following table summarizes the maturities of non-exchange traded contracts as of March 31, 2016:

	Prices provided by other external sources	Net fair value of contracts (in millions)	unrealized gains Prices based on models and other valuation methods
Maturity less than 1 year	¥ 748		¥
Maturity less than 3 years	2,352		
Maturity less than 5 years	1,672		
Maturity 5 years or more			18
Total fair value	¥ 4,772		¥ 18

C. Research and Development, Patents and Licenses, etc.

Not applicable.

D. Trend Information

See the discussions in Business Environment, Recent Developments, A. Operating Results and B. Liquidity and Capital Resources.

Table of Contents**E. Off-Balance Sheet Arrangements**

In the normal course of business, we engage in several types of off-balance sheet arrangements to meet the financing needs of customers, including various types of guarantees, credit commitments and commercial letters of credit. The following table summarizes these commitments as of March 31, 2016:

	Amount of commitment by expiration period			Total
	1 year or less	1-5 years	Over 5 years	
(in billions)				
Guarantees:				
Standby letters of credit and financial guarantees	¥ 2,230	¥ 1,198	¥ 446	¥ 3,874
Performance guarantees	1,937	886	86	2,909
Derivative instruments	17,421	22,989	5,484	45,894
Liabilities of trust accounts	6,384	721	1,531	8,636
Total guarantees	27,972	25,794	7,547	61,313
Other off-balance sheet instruments:				
Commitments to extend credit	54,322	25,869	2,030	82,221
Commercial letters of credit	569	437	12	1,018
Commitments to make investments	12	29	56	97
Others		6	7	13
Total other off-balance sheet instruments	54,903	26,341	2,105	83,349

See Note 25 to our consolidated financial statements included elsewhere in this Annual Report for a description of the nature of our guarantees and other off-balance sheet instruments.

The contractual amounts of these guarantees and other off-balance sheet instruments represent the amounts at risk if the contracts were to be fully drawn upon as a result of a subsequent default by our customer and a decline in the value of the underlying collateral. Since many of these commitments expire without being drawn upon, the total contractual or notional amounts of these commitments do not necessarily represent our future cash requirements. As of March 31, 2016, approximately 57% of these commitments have an expiration date within one year, 36% have an expiration date from one year to five years, and 7% have an expiration date after five years. Risks relating to off-balance sheet instruments are monitored and managed as a part of our risk management system as set forth in Item 11. Quantitative and Qualitative Disclosures about Credit, Market and Other Risk. We evaluate off-balance sheet arrangements in the manner described in Note 1 to our consolidated financial statements included elsewhere in this Annual Report.

The fees generated specifically from off-balance sheet arrangements are not a dominant source of our overall fees and commissions.

Some of our off-balance sheet arrangements are related to activities of special purpose entities, most of which are VIEs. For further information, see Note 26 to our consolidated financial statements included elsewhere in this Annual Report.

Table of Contents**F. Tabular Disclosure of Contractual Obligations**

The following table shows a summary of our contractual obligations outstanding as of March 31, 2016:

	Less than 1 year	Payments due by period			Total
		1-3 years	3-5 years (in billions)	Over 5 years	
Contractual obligations:					
Time deposit obligations	¥ 59,574	¥ 9,774	¥ 2,161	¥ 853	¥ 72,362
Estimated interest expense on time deposit obligations ⁽¹⁾	121	21	5	0	147
Long-term debt obligations	3,330	7,325	4,504	6,798	21,957
Capital lease obligations	4	5	2	4	15
Operating lease obligations	93	142	112	366	713
Purchase obligations	31	38	30	38	137
Total⁽²⁾⁽³⁾	¥ 63,153	¥ 17,305	¥ 6,814	¥ 8,059	¥ 95,331

Notes:

- (1) Contractual obligations related to estimated interest expense on time deposit obligations are calculated by applying the March 31, 2016 weighted-average interest rate on outstanding time deposits.
- (2) The total amount of expected future pension payments is not included in the above table or the total amount of commitments outstanding as of March 31, 2016. We expect to contribute approximately ¥76.9 billion for pension and other benefits for our employees for the fiscal year ending March 31, 2017. For further information, see Note 13 to our consolidated financial statements included elsewhere in this Annual Report.
- (3) The above table does not include unrecognized tax benefits and interest and penalties related to income tax associated with the guidance on accounting for uncertainty in income taxes as we cannot estimate reasonably the timing of cash settlement of the liabilities for unrecognized tax benefit. The total amount of the liabilities for unrecognized tax benefits is ¥10.0 billion as of March 31, 2016. Among the liabilities for unrecognized tax benefits, it is reasonably possible that the unrecognized tax benefits will decrease by approximately ¥2.6 billion during the next twelve months. For further information, see Note 7 to our consolidated financial statements included elsewhere in this Annual Report.

Purchase obligations include any legally binding contractual obligations that require us to spend more than ¥100 million annually under the contract. Purchase obligations in the table primarily include commitments to make investments into corporate recovery or private equity investment funds.

G. Safe Harbor

See the discussion under Forward-Looking Statements.

Table of Contents**Item 6. Directors, Senior Management and Employees.****A. Directors and Senior Management****Directors**

The following table sets forth the members of our board of directors as of July 1, 2016, together with their respective dates of birth, positions and experience:

Name	Position in MUFG	Business Experience	
(Date of Birth) Kiyoshi Sono (April 18, 1953)	Director	April 1976	
	Chairman	May 2004	
	(Representative Corporate Executive Officer)	January 2006	Joined The Sanwa Bank, Limited Executive Officer of UFJ Bank Limited Executive Officer of BTMU
		May 2006	Managing Executive Officer of BTMU
		May 2010	Senior Managing Executive Officer of BTMU
		May 2012	Managing Officer of MUFG
		June 2012	Deputy President of BTMU
		May 2014	Deputy Chairman of BTMU (incumbent)
		June 2014	Retired from Managing Officer of MUFG Chairman of MUFG

The board of directors and corporate executive officers may be contacted through our headquarters at Mitsubishi UFJ Financial Group, Inc., 7-1, Marunouchi 2-chome, Chiyoda-ku, Tokyo 100-8330, Japan.

No family relationship exists among any of our directors or corporate executive officers.

B. Compensation

The aggregate amount of compensation paid, including benefits in kind granted and any contingent and deferred compensation, by MUFG and its subsidiaries during the fiscal year ended March 31, 2016 to our directors (excluding outside directors), to corporate auditors (excluding outside corporate auditors), to corporate executive officers and to outside directors and corporate auditors, was ¥382 million, ¥39 million, ¥1,139 million and ¥114 million, respectively.

The compensation paid by MUFG and its subsidiaries during the fiscal year ended March 31, 2016 to our directors, corporate auditors and corporate executive officers consisted of annual base salaries, stock acquisition rights, bonuses and other benefits. On June 25, 2015, our previous governance framework with the board of directors and a separate board of corporate auditors was replaced with our current governance framework with the board of directors and board committees. Under our current governance framework, the compensation committee determines the compensation paid to our directors and corporate executive officers. Under our

Table of Contents

previous governance framework, the maximum aggregate amount of each type of compensation for our directors and corporate auditors was approved at a general meeting of our shareholders. The amount and allocation of compensation for each director were then proposed to, and voted upon by, the board of directors. The amount and allocation of compensation for each corporate auditor were determined through discussions and agreement among the corporate auditors. The nomination and compensation committee deliberated and made proposals to the board of directors regarding matters relating to, among other things, the compensation of our directors. For information regarding our governance framework, see C. Board Practices.

The following table sets forth details of the aggregate compensation paid by MUFG and its subsidiaries during the fiscal year ended March 31, 2016 to our directors (excluding outside directors), corporate auditors (excluding outside corporate auditors) and corporate executive officers:

Number of Directors, Corporate Auditors and Corporate Executive Officers ⁽¹⁾	Non-Adjustable Compensation					Other
	Aggregate Compensation	Base Salary	Stock Acquisition Rights	Adjustable Compensation (Cash Bonuses)	Retirement Allowances ⁽²⁾	
	(in millions)					
25	¥ 1,560	¥ 1,091	¥ 229	¥ 240		

Notes:

- (1) Includes the current directors, corporate auditors and corporate executive officers as well as those who retired during the fiscal year ended March 31, 2015 but excludes the outside directors and outside corporate auditors.
- (2) Represents the aggregate amount of retirement allowances paid in cash during the fiscal year ended March 31, 2015, pursuant to a one-time shareholders approval in June 2007 for the retirement allowances to be paid to the directors and corporate auditors who were elected prior to that date at the time of their retirement. A reserve in the total amount of such retirement allowances was set aside as of September 30, 2007. For more information, see Retirement Allowances below.

The following table sets forth the details of individual compensation paid, including benefits in kind granted but excluding retirement allowances paid, by MUFG and its subsidiaries in an amount equal to or exceeding ¥100 million during the fiscal year ended March 31, 2016:

Directors	Aggregate amount	Paid by	Compensation paid		
			Annual salary (in millions)	Stock options	Bonus
Kiyoshi Sono	¥ 128	MUFG	¥ 41	¥ 8	¥ 14
		BTMU	41	7	17
Tatsuo Wakabayashi	¥ 109	MUFG	¥ 31	¥ 5	¥ 9
		MUTB	40	7	17
Nobuyuki Hirano	¥ 133	MUFG	¥ 42	¥ 9	¥ 14
		BTMU	42	8	18

Annual Base Salary

Annual base salaries were paid to our directors (including outside directors), corporate auditors (including outside corporate auditors) and corporate executive officers in the form of monthly cash installment payments. The aggregate annual base salary paid to our directors (excluding outside directors), corporate auditors (excluding outside corporate auditors) and corporate executive officers for the fiscal year ended March 31,

2016 was ¥1,091 million. The aggregate annual base salary paid to our outside directors and outside corporate auditors for the same period was ¥114 million.

Stock-based Compensation Plans

We have issued stock acquisition rights to further motivate our directors (excluding outside directors) and certain of our officers to contribute to the improvement of our stock prices and profits. The number of options granted to each director and officer was determined by comprehensively taking into account each grantee's

Table of Contents

seniority of the position held at MUFG or its subsidiaries, experience and contribution to our performance throughout the period of the grantee's service. On June 27, 2013, our shareholders approved modifications to the previous shareholder authorization for granting stock acquisition rights to our directors, corporate auditors and certain of our officers so that no outside directors or corporate auditors (including outside corporate auditors) would be eligible for any stock-based compensation plan adopted by the board of directors on or after that date.

As part of our compensation structure, on June 28, 2007, our shareholders approved the creation of a stock-based compensation plan for our directors, corporate auditors and certain of our officers. On November 21, 2007, the board of directors adopted a plan entitled "First Series of Stock Acquisition Rights of Mitsubishi UFJ Financial Group, Inc." for our directors, corporate auditors and certain of our officers. Under the stock-based compensation plan, on December 6, 2007, we allotted an aggregate of 3,224 stock acquisition rights to our directors and an aggregate of 493 stock acquisition rights to our corporate auditors for their respective services to MUFG and its subsidiaries. Each stock acquisition right represents a right to purchase 100 shares of MUFG common stock at ¥1 per share of common stock. The stock acquisition rights were subject to a one-year vesting period. The rights are exercisable until December 5, 2037, but only after the date on which a grantee's service as a director and an officer or as a corporate auditor of each of MUFG and the relevant subsidiaries terminates. The fair value of each stock acquisition right was ¥103,200.

As part of our compensation structure, on June 27, 2008, the board of directors adopted another stock-based compensation plan entitled "Second Series of Stock Acquisition Rights of Mitsubishi UFJ Financial Group, Inc." for our directors, corporate auditors and certain of our officers. Under the stock-based compensation plan, on July 15, 2008, we allotted an aggregate of 4,690 stock acquisition rights to our directors and an aggregate of 495 stock acquisition rights to our corporate auditors for their respective services to MUFG and its subsidiaries. Each stock acquisition right represents a right to purchase 100 shares of MUFG common stock at ¥1 per share of common stock. The stock acquisition rights were subject to a one-year vesting period. The rights are exercisable until July 14, 2038, but only after the date on which a grantee's service as a director and an officer or as a corporate auditor of each of MUFG and the relevant subsidiaries terminates. The fair value of each stock acquisition right was ¥92,300.

As part of our compensation structure, on June 26, 2009, the board of directors adopted another stock-based compensation plan entitled "Third Series of Stock Acquisition Rights of Mitsubishi UFJ Financial Group, Inc." for our directors, corporate auditors and certain of our officers. Under the stock-based compensation plan, on July 14, 2009, we allotted an aggregate of 6,466 stock acquisition rights to our directors and an aggregate of 872 stock acquisition rights to our corporate auditors for their respective services to MUFG and its subsidiaries. Each stock acquisition right represents a right to purchase 100 shares of MUFG common stock at ¥1 per share of common stock. The stock acquisition rights were subject to a one-year vesting period. The rights are exercisable until July 13, 2039, but only after the date on which a grantee's service as a director and an officer or as a corporate auditor of each of MUFG and the relevant subsidiaries terminates. The fair value of each stock acquisition right was ¥48,700.

As part of our compensation structure, on June 29, 2010, the board of directors adopted another stock-based compensation plan entitled "Fourth Series of Stock Acquisition Rights of Mitsubishi UFJ Financial Group, Inc." for our directors, corporate auditors and certain of our officers. Under the stock-based compensation plan, on July 16, 2010, we allotted an aggregate of 8,014 stock acquisition rights to our directors and an aggregate of 1,149 stock acquisition rights to our corporate auditors for their respective services to MUFG and its subsidiaries. Each stock acquisition right represents a right to purchase 100 shares of MUFG common stock at ¥1 per share of common stock. The stock acquisition rights are subject to a one-year vesting period. The rights are exercisable until July 15, 2040, but only after the date on which a grantee's service as a director and an officer or as a corporate auditor of each of MUFG and the relevant subsidiaries terminates. The fair value of each stock acquisition right was ¥36,600.

As part of our compensation structure, on June 29, 2011, the board of directors adopted another stock-based compensation plan entitled "Fifth Series of Stock Acquisition Rights of Mitsubishi UFJ Financial Group, Inc."

Table of Contents

for our directors, corporate auditors and certain of our officers. Under the stock-based compensation plan, on July 20, 2011, we allotted an aggregate of 7,740 stock acquisition rights to our directors and an aggregate of 1,160 stock acquisition rights to our corporate auditors for their respective services to MUFG and its subsidiaries. Each stock acquisition right represents a right to purchase 100 shares of MUFG common stock at ¥1 per share of common stock. The stock acquisition rights are subject to a one-year vesting period. The rights are exercisable until July 19, 2041, but only after the date on which a grantee's service as a director and an officer or as a corporate auditor of each of MUFG and the relevant subsidiaries terminates. The fair value of each stock acquisition right was ¥33,700.

As part of our compensation structure, on June 28, 2012, the board of directors adopted another stock-based compensation plan entitled Sixth Series of Stock Acquisition Rights of Mitsubishi UFJ Financial Group, Inc. for our directors, corporate auditors and certain of our officers. Under the stock-based compensation plan, on July 18, 2012, we allotted an aggregate of 10,002 stock acquisition rights to our directors and an aggregate of 1,161 stock acquisition rights to our corporate auditors for their respective services to MUFG and its subsidiaries. Each stock acquisition right represents a right to purchase 100 shares of MUFG common stock at ¥1 per share of common stock. The stock acquisition rights are subject to a one-year vesting period. The rights are exercisable until July 17, 2042, but only after the date on which a grantee's service as a director and an officer or as a corporate auditor of each of MUFG and the relevant subsidiaries terminates. The fair value of each stock acquisition right was ¥33,100.

As part of our compensation structure, on June 27, 2013, the board of directors adopted a stock-based compensation plan entitled Seventh Series of Stock Acquisition Rights of Mitsubishi UFJ Financial Group, Inc. for our directors (excluding outside directors) and certain of our officers. Under the stock-based compensation plan, on July 17, 2013, we allotted an aggregate of 4,103 stock acquisition rights to our directors (excluding outside directors) for their respective services to MUFG and its subsidiaries. Each stock acquisition right represents a right to purchase 100 shares of MUFG common stock at ¥1 per share of common stock. The stock acquisition rights are subject to a one-year vesting period. The rights are exercisable until July 16, 2043, but only after the date on which a grantee's service as a director and an officer of each of MUFG and the relevant subsidiaries terminates. The fair value of each stock acquisition right was ¥61,100.

As part of our compensation structure, on June 27, 2014, the board of directors adopted a stock-based compensation plan entitled Eighth Series of Stock Acquisition Rights of Mitsubishi UFJ Financial Group, Inc. for our directors (excluding outside directors) and certain of our officers. Under the stock-based compensation plan, on July 15, 2014, we allotted an aggregate of 3,315 stock acquisition rights to our directors (excluding outside directors) for their respective services to MUFG and its subsidiaries. Each stock acquisition right represents a right to purchase 100 shares of MUFG common stock at ¥1 per share of common stock. The stock acquisition rights are subject to a one-year vesting period. The rights are exercisable until July 14, 2044, but only after the date on which a grantee's service as a director and an officer of each of MUFG and the relevant subsidiaries terminates. The fair value of each stock acquisition right was ¥53,900.

As part of our compensation structure, on June 25, 2015, the board of directors adopted a stock-based compensation plan entitled Ninth Series of Stock Acquisition Rights of Mitsubishi UFJ Financial Group, Inc. for our directors (excluding outside directors) and certain of our officers. Under the stock-based compensation plan, on July 14, 2015, we allotted an aggregate of 3,096 stock acquisition rights to our directors (excluding outside directors) and our corporate executive officers for their respective services to MUFG and its subsidiaries. Each stock acquisition right represents a right to purchase 100 shares of MUFG common stock at ¥1 per share of common stock. The stock acquisition rights are subject to a one-year vesting period. The rights are exercisable until July 13, 2045, but only after the date on which a grantee's service as a director and an officer of each of MUFG and the relevant subsidiaries terminates. The fair value of each stock acquisition right was ¥80,200.

Table of Contents

Performance-based Stock Compensation Plan

On May 16, 2016, MUFG's compensation committee decided to cease to provide any additional stock-based compensation plan and to introduce a new performance-based stock compensation plan. Under the performance-based stock compensation plan, qualified directors and officers (excluding outside directors and directors serving as audit committee members) of MUFG and its major domestic subsidiaries are assigned, on a monthly basis, (1) points based on their job responsibilities, or non-adjustable points, and (2) additional points based on their job responsibilities which are adjusted at the end of each fiscal year and at the end of each plan period to reflect the extent to which a financial performance target determined by the compensation committee is attained, or adjustable points. Each plan period is expected to correspond to the period covered by the three-year medium-term business plan of MUFG. Each accumulated point represents a right to receive one share of MUFG common stock from a trust established in Japan to administer the plan grants as determined by the compensation committee.

The right to receive shares of MUFG common stock in exchange for non-adjustable points becomes vested and nonforfeitable, and the shares are delivered, upon the grantee's departure from his or her job responsibilities as a director or officer. The right to receive shares of MUFG common stock in exchange for adjustable points becomes vested and nonforfeitable, and the shares are delivered, at the end of each plan period. The vesting in either case is subject to conditions imposed by the compensation committee, including non-engagement in misconduct. A portion of the shares subject to a grantee's vested right may be delivered in cash.

The grantees are entitled to dividend equivalent credits on their granted but unvested rights under the plan when MUFG pays dividends to its shareholders. The credit is equal to the dividends that the grantees would have received on the shares had the shares been issued to the grantees in exchange for their granted but unvested rights under the plan, less expenses relating to the administration of the plan. Accumulated dividend equivalents are paid to grantees at the time of the delivery of the shares.

The shares to be delivered to grantees will be purchased on the open market by the trustee of the trust pursuant to a trust agreement among MUFG, the trustee and the independent caretaker of the trust. Each plan will be funded in cash up to a maximum aggregate amount of ¥15.8 billion.

For the initial plan, the start date was July 1, 2016. The plan is tied to MUFG's current medium-term business plan for the three-year period ending March 31, 2018. The plan was funded with ¥10.2 billion in cash, and 18,785,400 shares of MUFG common stock were purchased by the trustee of the trust for the plan in May 2016.

Bonuses

We from time to time paid cash bonuses to our directors and corporate executive officers to further motivate them to contribute to the improvement of our stock prices and profits if such bonuses were deemed appropriate based on a balanced scorecard approach taking into account the results of operations of the MUFG Group and each director's individual performance of his or her duties as a director in light of both quantitative and qualitative criteria, including our medium-term strategy for improving our corporate value. None of the outside directors and corporate auditors (including outside corporate auditors) is eligible to receive a cash bonus. Under our previous governance framework, the nomination and compensation committee evaluated the amount of cash bonuses annually to determine the reasonableness of the amount in proportion to the aggregate compensation approved by our shareholders. Under our current governance framework, the compensation committee determines the cash bonus for each director and officer based on our financial results and his or her job performance for the preceding fiscal year as well as his or her seniority and experience. The aggregate cash bonus paid to our directors and corporate executive officers for the fiscal year ended March 31, 2016 was ¥240 million.

Retirement Allowances

Prior to June 28, 2007, in accordance with customary Japanese practice, when a director or corporate auditor retired, a proposal to pay a retirement allowance was submitted at the annual ordinary general meeting of

Table of Contents

shareholders for approval. The retirement allowance consisted of a one-time payment of a portion of the allowance paid at the time of retirement and periodic payments of the remaining amount for a prescribed number of years. After the shareholders' approval was obtained, the retirement allowance for a director or corporate auditor was fixed by the board of directors or by consultation among the corporate auditors in accordance with our internal regulations and practice and generally reflected the position of the director or corporate auditor at the time of retirement, the length of his service as a director or corporate auditor and his contribution to our performance. Historically, MUFG did not set aside reserves for any retirement payments for directors and corporate auditors made under this practice.

Pursuant to a one-time shareholders' approval in June 2007, retirement allowances are paid in cash to the directors and corporate auditors who were elected prior to that date at the time of their retirement. A reserve in the total amount of such retirement allowances was set aside as of September 30, 2007. No retirement allowance was paid in cash by MUFG and its subsidiaries pursuant to the one-time shareholder approval during the fiscal year ended March 31, 2016 to our directors (excluding outside directors), to corporate auditors (excluding outside corporate auditors) and to outside directors and corporate auditors, who have retired from their respective positions held at MUFG or, if such directors and corporate auditors concurrently held positions at MUFG's subsidiaries, who have retired from such positions.

MUFG Americas Holdings Corporation Stock Bonus Plan

Upon the integration of the U.S. branch banking operations of BTMU with MUB's operations on July 1, 2014, MUAH assumed the obligations under the BTMU Headquarters for the Americas, or HQA, Stock Bonus Plan described below. Effective June 8, 2015, MUAH amended and restated the BTMU HQA Stock Bonus Plan as the MUFG Americas Holdings Corporation Stock Bonus Plan, or the MUAH Stock Bonus Plan.

Under the MUAH Stock Bonus Plan, qualified key employees of MUAH are granted Restricted Share Units, or RSUs, representing a right to receive American Depositary Receipts, or ADRs, evidencing ADSs, each exchangeable for one share of MUFG common stock, from an independent trust established to administer the plan grants, upon the satisfaction of vesting conditions, to be determined pursuant to the plan as well as a Restricted Share Unit Agreement between MUAH and the grantees.

Unless otherwise provided in the relevant Restricted Share Unit Agreement, RSUs become vested and nonforfeitable as follows: one-third (33 1/3%) of a grantee's RSUs vests on each one year anniversary of the date of the grant such that all of the RSUs become fully vested after three years from the grant date so long as the grantee satisfies the specified continuous service requirements and any other conditions under the applicable plan documents, subject to certain clawback and notice period provisions.

Under the MUAH Stock Bonus Plan, the grantees are entitled to dividend equivalent credits on their granted but unvested RSUs when MUFG pays dividends to its shareholders. The credit is equal to the dividends that the grantees would have received on the shares had the shares been issued to the grantees in exchange for their granted but unvested RSUs. Accumulated dividend equivalents are paid to grantees in shares on an annual basis.

The ADSs to be delivered to grantees will be purchased on the open market by the trustee of the independent trust pursuant to a trust agreement between MUAH and the trustee. As of July 11, 2016, 30,012,816 RSUs have been granted under the MUAH Stock Bonus Plan.

BTMU Headquarters for the Americas Stock Bonus Plan

As described above, the BTMU HQA Stock Bonus Plan was amended and restated as the MUAH Stock Bonus Plan as of June 8, 2015.

Under the BTMU HQA Stock Bonus Plan, qualified key employees of BTMU HQA were granted RSUs, representing a right to receive ADRs, evidencing ADSs, each exchangeable for one share of MUFG common

Table of Contents

stock, from an independent trust established to administer the plan grants, upon the satisfaction of vesting conditions. The RSUs vest pro-rata on each anniversary of the grant date and become fully vested three years from the grant date so long as the grantee satisfies the specified continuous service requirements and any other conditions under the plan documents as well as a Restricted Share Unit Agreement between BTMU HQA and the grantees.

Grants previously made under the BTMU HQA Plan were not entitled to any dividend rights, voting rights or other stockholder rights.

The ADSs to be delivered to grantees are purchased on the open market by the trustee of the independent trust pursuant to a trust agreement between BTMU HQA and the trustee. Through June 7, 2015, 5,367,466 RSUs were granted under the previous BTMU HQA Plan, of which 633,757 RSUs were outstanding as of July 11, 2016. No further RSUs will be granted under the previous BTMU HQA Stock Bonus Plan.

For more information on the BTMU HQA Stock Bonus Plan, see Note 33 to our consolidated financial statements included elsewhere in this Annual Report. See also Item 16E. Purchases of Equity Securities by the Issuer and Affiliated Purchasers.

UNBC Stock Bonus Plan

Under the UNBC Stock Bonus Plan, selected employees of Union BanCal Corporation, or UNBC, and its subsidiaries were paid some or a portion of annual bonuses in the form of RSUs representing a right to receive ADRs, evidencing ADSs, each exchangeable for one share of MUFG common stock, from an independent trust established to administer the plan grants upon the satisfaction of vesting conditions as determined pursuant to the plan as well as a Restricted Share Unit Agreement between UNBC and the grantees.

Unless otherwise provided in the relevant Restricted Share Unit Agreement, RSUs become vested and nonforfeitable as follows: one-third ($33\frac{1}{3}\%$) of a grantee's RSUs vests on each one year anniversary of the date of the grant such that all of the RSUs become fully vested after three years from the grant date so long as the grantee remains an employee of UNBC or its subsidiaries.

Under the UNBC Plan, the grantees were not entitled to any dividend rights, voting rights or other stockholder rights.

The ADSs to be delivered to grantees are purchased on the open market by the trustee of the independent trust pursuant to a trust agreement between UNBC and the trustee. As of July 11, 2016, 26,734,407 RSUs have been granted under the plan, of which 2,163,966 RSUs were outstanding. No further RSUs will be granted under the UNBC Stock Bonus Plan.

For more information on the UNBC Stock Bonus Plan, see Note 33 to our consolidated financial statements included elsewhere in this Annual Report. See also Item 16E. Purchases of Equity Securities by the Issuer and Affiliated Purchasers.

None of the shares of our common stock held by our directors and corporate executive officers have voting rights that are different from shares of our common stock held by any other shareholder.

For information on the stock-based compensation and performance-based stock compensation plans for our directors and corporate executive officers, see [Stock-based Compensation Plans](#).

C. Board Practices

Our articles of incorporation provide for a board of directors with statutorily mandated nominating and governance committee, audit committee and compensation committee, each consisting of members of the board of directors. We have also elected, though not statutorily mandated under

the Companies Act of Japan, to establish a risk committee consisting of directors and outside professionals. In May 2016, we established a U.S. risk committee pursuant to the U.S. enhanced prudential standards for foreign banking organizations. Our corporate executive officers are responsible for executing and managing our business operations based on a delegation of authority by the board of directors, and our directors set our key management policies and oversee the execution of duties by these corporate executive officers.

Table of Contents

In June 2015, our shareholders approved an amendment to our articles of incorporation to adopt our current governance framework with a board of directors and board committees. We previously had a governance

framework with a board of directors and a board of corporate auditors. The Companies Act permits three types of governance system for large companies such as MUFG: (1) a company with a nominating committee, an audit committee and a compensation committee, (2) a company with a board of corporate auditors, and (3) a company with an audit and supervisory committee. Our previous governance framework was based on the second system, and our newly adopted governance system is based on the first system.

With respect to companies adopting the first system, including MUFG, each of the nominating, audit and compensation committees must consist of members of the board of directors, and the majority of each committee must be outside directors as defined by the Companies Act. In addition, the board of directors must appoint corporate executive officers (*shikkoyaku*) to execute and manage the business operations of the company under the authority delegated by the board of directors. Based on this system, our current governance framework is designed to facilitate more flexible and swifter decision-making and increase transparency in our management processes.

An outside director is defined by the Companies Act as a person who meets all of the following conditions:

the person is not currently, and has not been in the ten years prior to his or her assumption of office as outside director, an executive director, who is a director concurrently performing an executive role (*gyomu shikko torishimariyaku*), a corporate executive officer, a manager (*shihainin*), or any other type of employee of the company or any of its subsidiaries;

if the person has been a non-executive director, a corporate auditor, or an accounting adviser (*kaikai sanyo*) of the company or any of its subsidiaries within the ten years prior to his or her assumption of office as outside director, the person was not an executive director, a corporate executive officer, a manager or any other type of employee of the company or any of its subsidiary in the ten years prior to his or her assumption of office as such;

the person is not a director, a corporate executive officer, a manager or any other type of employee of the company's parent company, or a person who controls the company;

the person is not an executive director, a corporate executive officer, a manager or any other type of employee of another subsidiary of the company's parent company; and

the person is not the spouse or a family member within the second degree of kinship of a director, a corporate executive officer, a manager, or any other type of important employee of the company or a person who controls the company.

Board of Directors

Our board of directors consists of directors who are elected at a general meeting of shareholders. Under our articles of incorporation, the number of directors may not exceed 20. We currently have 17 directors, seven of whom are outside directors and two of whom are internal non-executive directors.

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

The regular term of office of a director is one year from the date of election, and directors may serve their terms until the close of the annual general meeting of shareholders held for the following year after their election. Directors may serve any number of consecutive terms.

Under the Companies Act, the board of directors has the authority to determine our basic management policy, make decisions on the execution and management of our business operations, and oversee the execution by the corporate executive officers of their duties. The board of directors may delegate, to the extent permitted by the Companies Act, the authority to make decisions on the execution and management of our business operations. Our board of directors has delegated most of this authority to the corporate executive officers.

Table of Contents

The board of directors elects the Chairman and the Deputy Chairman from among its members and appoints key management members based on recommendations submitted to it by the nominating committee.

Under the Companies Act, a resolution of the board of directors is required if any director wishes to engage in any business that is in competition with us or any transaction with us. Additionally, no director may vote on a proposal, arrangement or contract in which that director is deemed to be particularly interested.

Neither the Companies Act nor our articles of incorporation contain special provisions as to the borrowing power exercisable by a director, the retirement age of our directors, or a requirement of our directors to hold any shares of our capital stock.

Under the Companies Act and our articles of incorporation, we may exempt, by resolution of the board of directors, our directors from liabilities to MUFG arising in connection with their failure to execute their duties in good faith and without gross negligence within the limits stipulated by applicable laws and regulations. In addition, we have entered into a liability limitation agreement with each outside director and non-executive director which limits the maximum amount of their liability to MUFG arising in connection with a failure to execute their duties in good faith and without gross negligence to the greater of either ¥10 million or the aggregate sum of the amounts prescribed in Paragraph 1 of Article 425 of the Companies Act and Articles 113 and 114 of the Companies Act Enforcement Regulations.

None of our directors is party to a service contract with MUFG or any of its subsidiaries that provides for benefits upon end of their director term.

Nominating Committee

Our nominating committee, which we call the nominating and governance committee, determines the contents of proposals regarding the election and removal of director candidates to be submitted to general meetings of shareholders. The committee also considers and makes recommendations to the board of directors regarding the appointment and removal of the Chairman and the Deputy Chairman of the board of directors and the President & Group CEO of MUFG as well as the chairman and the deputy chairman of the board of directors, the president and others of each of our major subsidiaries. In addition, the committee discusses and makes recommendations to the board of directors on matters pertaining to our governance policy and framework.

Under the Companies Act, the nominating committee must consist of at least three directors, and the majority of its members must be outside directors. Our nominating and governance committee currently consists of six directors. The chairman of the committee is Tsutomu Okuda, an outside director. The other members of this committee are Yuko Kawamoto, Haruka Matsuyama, Kunie Okamoto and Hiroshi Kawakami, who are outside directors, and Nobuyuki Hirano, Director, President & Group CEO. Between June 2015 and March 2016, the nominating and governance committee met 11 times.

Audit Committee

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

The audit committee determines the contents of proposals pertaining to the election, removal and non-reappointment of our auditor to be submitted to general meetings of shareholders. The committee also monitors and audits the execution by the directors and the corporate executive officers of their duties and prepares audit reports to the board of directors. In order to effectively perform its duties, the committee reviews, inspects and investigates, as necessary, the management of the operations of MUFG and its subsidiaries, including financial reporting and internal controls. In addition, the committee has the power to consent to decisions on the compensation to be paid to our auditor.

Under the Companies Act, the audit committee must consist of at least three non-executive directors, and the majority of its members must be outside directors. Our audit committee currently has five members. The

Table of Contents

chairman of the committee is Akira Yamate, an outside director. The other members of this committee are Hiroshi Kawakami and Yukihiro Sato, who are outside directors, and Takashi Mikumo and Takehiko Shimamoto, who are non-executive directors. Between June 2015 and March 2016, the audit committee met 14 times.

Compensation Committee

The compensation committee establishes our policy regarding the determination of the compensation of MUFG's directors, corporate executive officers, executive officers (*shikko yakuin*) and others and also determines the details of individual compensation based on the policy. The committee discusses and makes recommendations to the board of directors regarding the establishment, revision and abolition of compensation systems for the chairman, the deputy chairman, the president and others of each of our major subsidiaries.

Under the Companies Act, the compensation committee must consist of at least three directors, and the majority of its members must be outside directors. Our compensation committee currently consist of six directors. The chairman of the committee is Kunie Okamoto, an outside director. The other members of this committee are Yuko Kawamoto, Haruka Matsuyama, Tsutomu Okuda and Hiroshi Kawakami, who are outside directors, and Nobuyuki Hirano, Director, President & Group CEO. Between June 2015 and March 2016, the compensation committee met six times.

Risk Committee

In addition to the foregoing three committees, which are mandated by the Companies Act, we have a risk committee, which was initially established under our previous governance framework and which we continue to have under our current governance framework on a voluntary basis. The risk committee deliberates and makes recommendations to the board of directors on matters regarding group-wide risk management as well as top risk matters including significant compliance issues.

MUFG Corporate Governance Policies provide that the committee shall consist of outside directors and outside professionals, who are professionals with no prior employment relationship with any of the MUFG group companies. The committee currently has five members. The chairperson of the committee is Yuko Kawamoto, an outside director. The other members of this committee are Tsutomu Okuda, an outside director, Tadashi Kuroda, Director, a Senior Managing Executive Officer and Group CSO & Group CHRO, and Akira Ariyoshi and Kenzo Yamamoto, who are outside professionals. Between April 2015 and March 2016, the risk committee met four times.

U.S. Risk Committee

The U.S. risk committee oversees the risk management function for our combined U.S. operations. Its oversight role includes, but is not limited to, all roles and responsibilities required under the FRB's final rules for Enhanced Prudential Standards for foreign banking organizations. The committee monitors liquidity and all other types of risk exposures, reviews the risk management policies and procedures, and oversees compliance with such policies and procedures for our combined U.S. operations. The committee is a subcommittee of the board of directors of MUFG, and reports and makes recommendations to MUFG's board of directors and MUFG's risk committee.

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

The members of the U.S. risk committee are appointed by MUFG's board of directors after consideration of member candidates reviewed and recommended by MUFG's risk committee and nominating and governance committee. We have decided that the U.S. risk committee will consist of members of MUAH's risk committee, delegates from MUFG, MUFG's Regional Executive for the Americas, or the REA, and MUAH's CEO. The chairperson of the committee will be an outside director of MUAH. The committee currently has six members, consisting of three outside directors of MUAH, Managing Executive Officer and Group CRO of MUFG, the REA and MUAH's CEO.

Table of Contents

Corporate Executive Officers

Our corporate executive officers are responsible for executing and managing our business operations within the scope of the authority delegated to them by the board of directors.

Under the Companies Act, at least one corporate executive officer must be appointed by a resolution of the board of directors. We currently have 16 corporate executive officers. Under our articles of incorporation, the board of directors shall appoint a president and a deputy president, who, as representative executive officers, may represent us severally. The term of office of each corporate executive officer expires at the conclusion of the first meeting of the board of directors convened after the ordinary general meeting of shareholders for the last fiscal year that ends within one year following the corporate executive officer's assumption of office.

Under the Companies Act of Japan, a resolution of the board of directors is required if any executive officer wishes to engage in any business that is in competition with us or any transaction with us.

Under the Companies Act and our articles of incorporation, we may exempt, by resolution of the board of directors, our corporate executive officers from liabilities to MUFG arising in connection with their failure to execute their duties in good faith and without gross negligence within the limits stipulated by applicable laws and regulations. We, however, currently have no such arrangements with any of our executive directors.

Committees Established on a Voluntary Basis under Our Previous Governance Framework

Under our previous governance framework, we had a nomination and compensation committee, an internal audit and compliance committee, and a governance committee, each voluntarily established to support our board of directors. These committees have discontinued their services following the establishment of the three statutorily mandated committees under our newly adopted governance framework. Between April 2015 and June 2015, the nomination and compensation committee met seven times, the internal audit and compliance committee met four times, and the governance committee met six times.

For additional information on our board of directors and corporate executive officers, see A. Directors and Senior Management, B. Compensation and Item 10.B. Additional Information Memorandum and Articles of Incorporation.

For a summary of significant differences in corporate governance practices between MUFG and U.S. companies listed on the New York Stock Exchange, see Item 16G. Corporate Governance.

D. Employees

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

As of March 31, 2016, we had approximately 104,900 employees, an increase of approximately 2,600 employees compared with the number of employees as of March 31, 2015. In addition, as of March 31, 2016, we had approximately 35,000 part-time and temporary employees. Japan Trustee Services Bank, Ltd. (Trust account 6) ⁽¹⁾	162,325,700	1.14
Total	2,842,781,940	20.06%

Notes:

- (1) Includes the shares held in trust accounts, which do not disclose the names of beneficiaries.
- (2) An owner of record for our ADSs.
- (3) These shares are those held in a pension trust account with The Master Trust Bank of Japan, Ltd. for the benefit of retirement plans with voting rights retained by Meiji Yasuda Life Insurance Company.
- (4) Numbers are truncated after two decimal points.

As of March 31, 2016, 1,859,456 shares, representing approximately 0.01% of our outstanding common stock, were held by our directors and corporate auditors. Our major shareholders do not have different voting rights.

As of March 31, 2016, 2,281,936,995 shares, representing 16.10% of our outstanding common stock, were owned by 369 U.S. shareholders of record who are resident in the United States, one of whom is the ADR depository's nominee holding 184,158,625 shares, or 1.29%, of our issued common stock.

B. Related Party Transactions

As of March 31, 2016, we held approximately 22.3% of the voting rights in Morgan Stanley and Series C Preferred Stock with a face value of approximately \$521.4 million and 10% dividend. We also have two representatives appointed to Morgan Stanley's board of directors. We adopted the equity method of accounting for our investment in Morgan Stanley beginning with the fiscal year ended March 31, 2012.

We and Morgan Stanley have two securities joint venture companies, namely, MUMSS and MSMS, in Japan. We hold a 60% economic interest in MUMSS and MSMS, and Morgan Stanley holds a 40% economic interest in MUMSS and MSMS. We hold a 60% voting interest and Morgan Stanley holds a 40% voting interest in MUMSS, and we hold a 49% voting interest and Morgan Stanley holds a 51% voting interest in MSMS.

We and Morgan Stanley continue to pursue a variety of business opportunities in Japan and abroad in accordance with the global strategic alliance. For a detailed discussion of our global alliance with Morgan Stanley, see Item 4.B. Information on the Company Business Overview Global Strategic Alliance with Morgan Stanley.

Table of Contents

We and our banking subsidiaries had, and expect to have in the future, banking transactions and other transactions in the ordinary course of business with our related parties. Although for the fiscal year ended March 31, 2016, such transactions included, but were not limited to, call money, loans, electronic data processing, leases and management of properties, those transactions were immaterial and were made at prevailing market rates, terms and conditions and do not involve more than the normal risk of collectibility or present other unfavorable features.

None of our directors, corporate executive officers or corporate auditors, nor any of the close members of their respective families, has had any transactions or has any presently proposed transactions that are material or any transactions that are unusual in their nature or conditions, involving goods, services or tangible or intangible assets, to which we were, are or will be a party.

No loans have been made to our directors, corporate executive officers or corporate auditors other than in the normal course of business, on normal commercial terms and conditions, involving the normal risk of collectibility, and presenting normal features. In addition, no loans have been made to our directors, corporate executive officers or corporate auditors other than as permitted under Section 13(k) of the U.S. Securities Exchange Act and Rule 13k-1 promulgated thereunder.

No family relationship exists among any of our directors or corporate executive officers. No arrangement or understanding exists between any of our directors or corporate executive officers and any other person pursuant to which any director or corporate executive officer was elected to their position at MUFG.

As part of our compensation structure, we have granted stock acquisition rights to our directors and corporate executive officers. For a detailed discussion of the stock acquisition rights, see Item 6.B. Directors, Senior Management and Employees Compensation.

C. Interests of Experts and Counsel

Not applicable.

Item 8. Financial Information.

A. Consolidated Statements and Other Financial Information

The information required by this item is set forth in our consolidated financial statements starting on page F-1 of this Annual Report and in Selected Statistical Data starting on page A-1 of this Annual Report.

Legal Proceedings

From time to time, we are involved in various litigation matters and other legal proceedings, including regulatory actions. Although the final resolution of any such matters and proceedings could have a material effect on our consolidated operating results for a particular reporting

period, based on our current knowledge and consultation with legal counsel, we believe the current litigation matters and other legal proceedings, when ultimately determined, will not materially affect our results of operations or financial position. For more information, see

Item 3.D. Key Information Risk Factors Risks Related to Our Business We may become subject to regulatory actions or other legal proceedings relating to our transactions or other aspects of our operations, which could result in significant financial losses, restrictions on our operations and damage to our reputation. and Note 27 to our consolidated financial statements included elsewhere in this Annual Report.

Distributions

Our board of directors submits a recommendation for a year-end dividend for our shareholders approval at the ordinary general meeting of shareholders customarily held in June of each year. The year-end dividend is

Table of Contents

usually distributed immediately following shareholders' approval to holders of record at the end of the preceding fiscal year. In addition to year-end dividends, we may make cash distributions by way of interim dividends to shareholders of record as of September 30 of each year as distribution of surplus by resolution of our board of directors. Year-end dividends in the amount of ¥18 per share of our common stock for the fiscal year ended March 31, 2016 were approved by shareholders at the ordinary general meeting of shareholders held on June 29, 2016.

See Item 10.B. Additional Information - Memorandum and Articles of Association for additional information on our dividends policy.

Under the Japanese foreign exchange regulations currently in effect, dividends paid on shares held by non-residents of Japan may be converted into any foreign currency and repatriated abroad. Under the terms of the deposit agreement pursuant to which ADSs are issued, the depository is required, to the extent that in its judgment it can convert Japanese yen on a reasonable basis into U.S. dollars and transfer the resulting U.S. dollars to the United States, to convert all cash dividends that it receives in respect of deposited shares into U.S. dollars and to distribute the amount received, after deduction of any applicable withholding taxes, to the holders of ADSs. See Item 10.D. Additional Information - Exchange Controls and Item 12.D. Description of Securities Other than Equity Securities - American Depositary Shares.

B. Significant Changes

Other than as described in this Annual Report, no significant changes have occurred since the date of our consolidated financial statements included in this Annual Report.

Table of Contents**Item 9. The Offer and Listing.****A. Offer and Listing Details****Market Price Information**

Item 10. Additional Information.

A. Share Capital

Not applicable.

B. Memorandum and Articles of Association

Our Corporate Purpose

Article 2 of our Articles of Incorporation provides that our corporate purpose is to carry on the following businesses:

administration of management of banks, trust banks, specialized securities companies, insurance companies or other companies which we may own as our subsidiaries under the Banking Law;

any businesses incidental to the foregoing businesses mentioned in the preceding item; and

any other businesses in which bank holding companies are permitted to engage under the Banking Law in addition to the foregoing businesses mentioned in the preceding two items.

Board of Directors

For discussion of the provisions of our Articles of Incorporation as they apply to our directors, see Item 6.C. Directors, Senior Management and Employees Board Practices.

Common Stock

We summarize below the material provisions of our Articles of Incorporation, our share handling regulations and the Companies Act as they relate to a type of joint stock company known as *kabushiki kaisha*, within which we fall. Because it is a summary, this discussion should be read together with our Articles of Incorporation and share handling regulations, which have been filed as exhibits to this Annual Report.

General

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

A joint stock company is a legal entity incorporated under the Companies Act. The investment and rights of the shareholders of a joint stock company are represented by shares of stock in the company and shareholders' liability is limited to the amount of the subscription for the shares.

As of June 29, 2016, our authorized common share capital was comprised of 33,000,000,000 shares of common stock with no par value.

As of March 31, 2016, a total of 14,168,853,820 shares of common stock (including 380,944,204 shares of common stock held by us and our consolidated subsidiaries as treasury stock) had been issued. Each of the shares issued and outstanding was fully paid and non-assessable.

As of June 25, 2015, we were authorized to issue 800,000,000 shares of preferred stock, including 400,000,000 shares of each of the second to fourth series of class 5 preferred stock (provided the aggregate number of shares authorized to be issued with respect to the four series of class 5 preferred stock does not exceed 400,000,000 shares), 200,000,000 shares of each of the first to fourth series of class 6 preferred stock (provided the aggregate number of shares authorized to be issued with respect to the four series of class 6 preferred stock does not exceed 200,000,000 shares), 200,000,000 shares of each of the first to fourth series of class 7 preferred stock (provided the aggregate number of shares authorized to be issued with respect to the four series of class 7 preferred stock does not exceed 200,000,000 shares).

Table of Contents

We may issue shares from our authorized but unissued share capital following a resolution to that effect by our board of directors. An increase in our authorized share capital is only possible by amendment of our Articles of Incorporation, which generally requires shareholders' special approval.

In order to assert shareholder rights against us, a shareholder must have its name and address registered on our register of shareholders, in accordance with the Companies Act and our share handling regulations. The registered holder of deposited shares underlying the ADSs is the depositary for the ADSs, or its nominee. Accordingly, holders of ADSs will not be able to assert shareholder rights other than as provided in the agreement among us, the depositary and the holders of the ADSs.

Under the Act on Book-Entry Transfer of Company Bonds, Shares, etc., the shares of all Japanese companies listed on any Japanese stock exchange, including our shares, are traded without share certificates through entry in the books maintained under a central clearing system.

Dividends

Dividends are distributed in proportion to the number of shares owned by each shareholder on the record date for the dividend. Dividends for each financial period may be distributed following shareholders' approval at a general meeting of shareholders.

Payment of dividends on common stock is subject to the preferential dividend rights of holders of preferred stock.

Under the Banking Law and our Articles of Incorporation, our financial accounts are closed on March 31 of each year, and dividends, if any, are paid to shareholders of record as of March 31 following shareholders' approval at a general meeting of shareholders. In addition to year-end dividends, our board of directors may by resolution declare an interim cash dividend to shareholders of record as of September 30 of each year. Under the Companies Act, distribution of dividends will take the form of distribution of surplus (as defined below). We will be permitted to make distributions of surplus to our shareholders any number of times per fiscal year pursuant to resolutions of our general meetings of shareholders, subject to certain limitations described below. Distributions of surplus are in principle required to be authorized by a resolution of a general meeting of shareholders. Distributions of surplus would, however, be permitted to be made pursuant to a resolution of our board of directors if:

- (a) our Articles of Incorporation so provide (our Articles of Incorporation currently contain no such provisions);
- (b) the normal term of office of our directors is one year; and
- (c) certain conditions concerning our non-consolidated annual financial statements and certain documents for the latest fiscal year as required by an ordinance of the Ministry of Justice are satisfied.

In an exception to the above rule, even if the requirements described in (a) through (c) are not met, we are permitted to make distributions of surplus in cash to our shareholders by resolutions of the board of directors once per fiscal year as mentioned above concerning interim cash dividend.

Under the Companies Act, distributions of surplus may be made in cash or in kind in proportion to the number of shares of common stock held by each shareholder. A resolution of a general meeting of shareholders or our board of directors authorizing a distribution of surplus must specify the kind and aggregate book value of the assets to be distributed, the manner of allocation of such assets to shareholders, and the effective date of the distribution. If a distribution of surplus is to be made in kind, we may, pursuant to a resolution of a general meeting of shareholders or (as the case may be) our board of directors, grant to our shareholders the right to require us to make such distribution in cash instead of in kind. If no such right is granted to shareholders, the relevant distribution of surplus must be approved by a special resolution of a general meeting of shareholders. See B. Memorandum and Articles of Association Common Stock Voting Rights.

Table of Contents

Under the Companies Act, we may make distributions of surplus to the extent that the aggregate book value of the assets to be distributed to shareholders does not exceed the distributable amount (as defined below) as of the effective date of such distributions of surplus. The amount of surplus (the surplus) at any given time shall be the amount of our assets and the book value of our treasury stock after subtracting the amounts of items (1) through (5) below as they appear on our non-consolidated balance sheet as of the end of our last fiscal year, and after reflecting the changes in our surplus after the end of our last fiscal year, by adding the amounts of items (6), (7) and (8) below and/or subtracting the amounts of items (9), (10) and (11) below:

- (1) our liabilities;
- (2) our stated capital;
- (3) our additional paid-in capital;
- (4) our accumulated legal reserve;
- (5) other amounts as are set out in an ordinance of the Ministry of Justice;
- (6) (if we transferred our treasury stock after the end of the last fiscal year) the transfer price of our treasury stock after subtracting the book value thereof;
- (7) (if we decreased our stated capital after the end of the last fiscal year) the amount of decrease in our stated capital (excluding the amount transferred to additional paid-in capital or legal reserve);
- (8) (if we decreased our additional paid-in capital or legal reserve after the end of the last fiscal year) the amount of decrease in our additional paid-in capital or legal reserve (excluding the amount transferred to stated capital);
- (9) (if we cancelled our treasury stock after the end of the last fiscal year) the book value of the cancelled treasury stock;
- (10) (if we distributed surplus to shareholders after the end of the last fiscal year) the amount of the assets distributed to shareholders by way of such distribution of surplus; and
- (11) other amounts as are set out in an ordinance of the Ministry of Justice.

A distributable amount (the distributable amount) at any given time shall be the aggregate amount of (a) the surplus, (b) the amount of profit as recorded for the period after the end of our last fiscal year until the date of an extraordinary settlement of account (if any) as is set out in an ordinance of the Ministry of Justice and (c) the transfer price of our treasury stock in the same period, after subtracting the amounts of the following items:

- (1) the book value of our treasury stock;

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

- (2) (if we transferred our treasury stock after the end of the last fiscal year) the transfer price of our treasury stock;
- (3) the losses recorded for the period after the end of our last fiscal year until the date of an extraordinary settlement of account (if any) as set out in an ordinance of the Ministry of Justice; and
- (4) other amounts as set out in an ordinance of the Ministry of Justice.

In Japan, the ex-dividend date and the record date for any dividends precede the date of determination of the amount of the dividend to be paid. The market price of shares generally becomes ex-dividend on the third business day prior to the record date. Under our Articles of Incorporation, we are not obligated to pay any dividends which are left unclaimed for a period of five years after the date on which they first became payable.

Table of Contents

Capital and Reserves

Under the Companies Act, we may reduce our additional paid-in capital or legal reserve (without limitation as to the amount of such reduction) as mentioned previously, generally by resolution of a general meeting of shareholders and, if so resolved in the same resolution, may account for the whole or any part of the amount of such reduction as stated capital. We may also reduce our stated capital generally by special resolution of a general meeting of shareholders and, if so resolved in the same resolution, such reduction may account for the whole or any part of the amount of such reduction as additional paid-in capital or legal reserve. Conversely, we may reduce our surplus and increase either (i) stated capital or (ii) additional paid-in capital and/or legal reserve by the same amount, in either case by resolution of a general meeting of shareholders.

Stock Splits

Stock splits of our outstanding stock may be effected at any time by resolution of the board of directors. When a stock split is to be effected, we may increase the authorized share capital to cover the number of shares to be increased by the stock split by amending our Articles of Incorporation by resolution of the board of directors without approval by special resolution of the general meeting of shareholders, unless more than one class of stock is issued and outstanding. We must give public notice of the stock split, specifying a record date at least two weeks prior to the record date.

We conducted a stock split pursuant to which each of our shares of common and preferred stock were split into 1,000 shares of the respective classes of securities, effective as of September 30, 2007. Our Articles of Incorporation were amended to increase the authorized share capital to cover the number of shares increased by the stock split, which amendment became effective simultaneously with the effectiveness of the stock split.

Unit Share (tan-gen kabu) System

We have adopted a unit share system, where 100 shares of either common or preferred stock shall each constitute a unit, as the amendment of our Articles of Incorporation to provide for such system was approved at the shareholders' meetings on June 27 and 28, 2007.

Under the unit share system, each unit is entitled to one voting right. A holder of less than one unit has no voting right. Our Articles of Incorporation provide that the holders of shares constituting less than a full unit will not have shareholder rights except for those specified in the Companies Act or an ordinance of the Ministry of Justice, including rights (i) to receive dividends, (ii) to receive cash or other assets in case of consolidation or split of shares, stock-for-stock exchange or stock-for-stock transfer, corporate split or merger or (iii) to be allotted rights to subscribe for free for new shares and stock acquisition rights when such rights are granted to shareholders. Shareholders may require us to purchase shares constituting less than a unit at the current market price. In addition, holders of shares constituting less than a unit may require us to sell them such number of shares, which, when combined with the number of shares already held by such holder, shall constitute a whole unit of share; provided that we will be obliged to comply with such request only when we own a sufficient number of shares to accommodate the desired sale and purchase. The board of directors may reduce the number of shares constituting a unit or cease to use the unit share system by amendments to the Articles of Incorporation without shareholders' approval even though amendments to the Articles of Incorporation generally require a special resolution of the general meeting of shareholders.

General Meeting of Shareholders

The ordinary general meeting of our shareholders is usually held in June of each year in Tokyo. In addition, we may hold an extraordinary general meeting of shareholders whenever necessary by giving at least two weeks advance notice to shareholders who are entitled to vote at the relevant general meeting of shareholders. The record date for ordinary general meetings of our shareholders is March 31.

Table of Contents

Any shareholder holding at least 300 voting rights or 1% of the total number of voting rights for six consecutive months or longer may propose a matter to be considered at a general meeting of shareholders by submitting a written request to a director at least eight weeks prior to the date of the meeting. The number of minimum voting rights, minimum percentage and time period necessary for exercising the minority shareholder rights described above may be decreased or shortened if our Articles of Incorporation so provide. Our Articles of Incorporation currently contain no such provisions.

Voting Rights

A holder of shares of our common stock is generally entitled to one voting right for each unit of common stock held. The following shares of common stock are not entitled to voting rights even when such shares constitute a whole unit, and such shares of common stock are not considered when determining whether a quorum exists for a shareholders' meeting:

treasury stock;

shares held by a company in which we and/or our subsidiaries own 25% or more of the total voting rights; and

shares issued after the record date as a result of conversion of convertible stock, exercise of stock acquisition rights, and fractional shareholders becoming a shareholder of a whole unit share.

On the other hand, holders of certain class of preferred stock shall be entitled to a voting right for each unit of preferred stock held under certain conditions provided for by relevant laws or regulations and our Articles of Incorporation, for example, when a proposal to pay the full amount of preferential dividends on any class of preferred stock in compliance with the terms of such preferred stock is not included in the agenda of the relevant shareholders' meeting. See Preferred Stock.

Under our Articles of Incorporation, except as otherwise provided by law or by other provisions of our Articles of Incorporation, a resolution can be adopted at a shareholders' meeting by the holders of a majority of the voting rights represented at the meeting. The Companies Act and our Articles of Incorporation require a quorum of not less than one-third of the total number of voting rights for election of our directors and corporate auditors.

The Companies Act and our Articles of Incorporation provide that a quorum of not less than one-third of outstanding voting rights, excluding those owned by our subsidiaries and affiliates of which we own, directly or indirectly, 25 percent or more, must be present at a shareholders' meeting to approve specified corporate actions, such as:

the amendment of our Articles of Incorporation, except in some limited cases;

the repurchase of our own stock from a specific shareholder other than our subsidiary;

the consolidation of shares;

the offering to persons other than shareholders of stock at a specially favorable price, or of stock acquisition rights or bonds or notes with stock acquisition rights with specially favorable conditions;

the removal of a corporate auditor;

the exemption from liability of a director or corporate auditor, with certain exceptions;

a reduction in stated capital with certain exceptions in which a shareholders' resolution is not required;

a distribution of in-kind dividends which meets certain requirements;

the transfer of the whole or an important part of our business, except in some limited circumstances;

the acquisition of the whole business of another company, except in some limited circumstances;

Table of Contents

a dissolution, merger or consolidation, except for certain types of mergers;

a stock-for-stock exchange (*kabushiki-kokan*) or stock-for-stock transfer (*kabushiki-iten*), except in some limited circumstances; and

a corporate split, except in some limited circumstances.

A special resolution representing at least two-thirds of the voting rights represented at the meeting is required to approve these actions.

Our Articles of Incorporation do not include any provision that grants shareholders cumulative voting rights at elections of directors or corporate auditors.

Subscription Rights

Holders of our shares have no preemptive rights under our Articles of Incorporation. Under the Companies Act, however, our board of directors may determine that shareholders be given subscription rights in connection with a particular issue of new shares. In this case, these subscription rights must be given on uniform terms to all shareholders, and if a specified record date is set, it must be announced in a public notice at least two weeks prior to the record date. A notification to each individual shareholder must also be given at least two weeks prior to the subscription date.

Under the Companies Act, rights to subscribe for new shares may not be transferred; however, we may allot stock acquisition rights to shareholders without consideration, and such rights will be transferable.

Stock Acquisition Rights

We may issue stock acquisition rights (*shinkabu yoyakuken*), which in the United States are often in the form of warrants, or bonds with stock acquisition rights that cannot be detached (*shinkabu yoyakuken-tsuki shasai*), which in the United States are often in the form of convertible bonds or bonds with non-detachable warrants. Except where the issuance would be on specially favorable conditions, the issuance of stock acquisition rights or bonds with stock acquisition rights may be authorized by a resolution of our board of directors. Upon exercise of the stock acquisition rights, the holder of such rights may acquire shares by paying the applicable exercise price or, if so determined by a resolution of our board of directors, by making a substitute payment, such as having the convertible bonds redeemed for no cash in lieu of the exercise price.

Liquidation Rights

Upon our liquidation, the assets remaining after payment of all debts, liquidation expenses, taxes and preferred distributions to holders of shares of our preferred stock will be distributed among the holders of shares of our common stock in proportion to the number of shares they own.

Transfer Agent

MUTB is the transfer agent for our common stock. The office of MUTB for this purpose is located at 4-5, Marunouchi 1-chome, Chiyoda-ku, Tokyo 100-8212, Japan. MUTB maintains our register of shareholders.

Reports to Shareholders

We furnish to our shareholders notices, in Japanese, of shareholders meetings, annual business reports, including our financial statements, and notices of resolutions adopted at our shareholders meetings.

Table of Contents

Record Dates

As stated above, March 31 is the record date for the payment of annual dividends (if any), the determination of shareholders entitled to vote at ordinary general meetings of our shareholders, and the determination of class shareholders entitled to vote at meetings of our class shareholders if any matter to be resolved at an ordinary general meeting of our shareholders requires a resolution by our class shareholders in addition to a resolution by our shareholders. September 30 is the record date for the payment of interim dividends, if any. In addition, by a resolution of our board of directors and after giving at least two weeks' prior public notice, we may at any time set a record date in order to determine the shareholders who are entitled to the rights pertaining to our shares.

Repurchase of Our Shares

We may repurchase our own shares:

through the Tokyo Stock Exchange or other stock exchanges on which our shares are listed, if authorized by a resolution of a general meeting of shareholders or our board of directors;

by way of a tender offer, if authorized by a resolution of a general meeting of shareholders or our board of directors;

from a specific party, if authorized by a special resolution of a general meeting of shareholders and we give notice thereof to shareholders prior to such general meeting, in general;

from all shareholders of a specific class of shares offering to sell their shares, if authorized by a resolution of a general meeting of shareholders or our board of directors and we give a public notice or notice thereof to all of the shareholders (if we repurchase any class of preferred stock, notices to all shareholders of the relevant class of preferred stock); or

from our subsidiaries, if authorized by a resolution of the board of directors.

When the repurchase is made by us from a specific party, as authorized by a special resolution of a general meeting of shareholders, any shareholder may make a demand to a director, five days or more prior to the relevant shareholders' meeting, that we also repurchase the shares held by that shareholder. However, no such right will be available if the shares have a market price, and if the purchase price does not exceed the then market price calculated in a manner set forth in an ordinance of the Ministry of Justice.

Repurchase of our own shares described above must satisfy various specified requirements. In general, the same restrictions on the distributable amount as described in the seventh paragraph under "Common Stock Dividends" are applicable to the repurchase of our own shares, so the total amount of the repurchase price may not exceed the distributable amount.

We may hold our own shares so repurchased without restrictions. In addition, we may cancel or dispose of our repurchased shares by a resolution of our board of directors. As of March 31, 2016, we (excluding our subsidiaries) owned 378,088,933 shares of treasury stock.

Preferred Stock

The following is a summary of information concerning the shares of our preferred stock, including brief summaries of the relevant provisions of our Articles of Incorporation, the share handling regulations and the Companies Act as currently in effect. The detailed rights of our preferred stock are set out in our Articles of Incorporation and the resolutions of our board of directors relating to the issuance of the relevant stock.

General

As of March 31, 2015, we were authorized under our Articles of Incorporation to issue four classes of preferred stock totaling 800,001,000 shares of preferred stock, including 400,000,000 shares of each of the

Table of Contents

second to fourth series of class 5 preferred stock (provided the aggregate number of shares authorized to be issued with respect to the three series of class 5 preferred stock does not exceed 400,000,000 shares), 200,000,000 shares of each of the first to fourth series of class 6 preferred stock (provided the aggregate number of shares authorized to be issued with respect to the four series of class 6 preferred stock does not exceed 200,000,000 shares), and 200,000,000 shares of each of the first to fourth series of class 7 preferred stock (provided the aggregate number of shares authorized to be issued with respect to the four series of class 7 preferred stock does not exceed 200,000,000 shares) Our preferred stock has equal preference over our shares of common stock with respect to dividend entitlements and distribution of assets upon our liquidation. However, holders of shares of our preferred stock are not entitled to vote at general meetings of shareholders, subject to the exceptions provided under our Articles of Incorporation.

We may acquire shares of second to fourth series of class 5 and first to fourth series of class 6 preferred stock at our discretion pursuant to the terms and conditions provided by our Articles of Incorporation and the resolution of our board of directors. The provisions for acquisition of shares of second to fourth series of class 5 and first to fourth series of class 6 preferred stock will be determined by the board of directors at the time of issuance of such preferred stock. When issued, any holder of shares of first to fourth series of class 6 preferred stock or first to fourth series of class 7 preferred stock may request acquisition of shares of such preferred stock in exchange for shares of our common stock during the period determined by resolution of the board of directors adopted at the time of issuance of such shares of preferred stock. Any shares of first to fourth series of class 6 preferred stock or first to fourth series of class 7 preferred stock for which no request for acquisition in exchange for shares of our common stock is made during such period will be mandatorily acquired on the day immediately following the last day of such period (the *Mandatory Acquisition Date*) in the number obtained by dividing an amount equivalent to the subscription price per each relevant share of preferred stock by the average daily closing price of our common stock as reported by the Tokyo Stock Exchange for the 30 trading days commencing on the 45th trading day prior to the *Mandatory Acquisition Date*.

Additionally, in order to enable the relevant preferred stock to meet the criteria for Additional Tier 1 capital under Basel III requirements as adopted by the FSA and became effective on March 31, 2013, the terms of the second to fourth series of class 5 as well as all the series of class 6 and class 7 preferred stock were amended in June 2013 to have mandatory acquisition provisions. When newly issuing these preferred stock, the board of directors will determine events that will require us to acquire the relevant preferred stock pursuant to the capital adequacy requirements applicable to us. Upon the occurrence of such events, we will acquire all the relevant preferred stock on an acquisition date, which is a date determined by the board of directors either at the time of the issuance or after the occurrence of such event. We shall acquire the relevant preferred stock in exchange for common stock or for no consideration as determined by the board of directors at the time of the issuance, considering certain factors including the market conditions. The formula to be used in exchanging the preferred stock for common stock will also be determined by the board of directors at the time of the issuance. For more information, see *Item 4.B. Information on the Company Business Overview Supervision and Regulation Japan Capital adequacy*.

Preferred Dividends

In priority to the payment of dividends to holders of our common stock, the amount of preferred dividends payable each fiscal year for each class of our preferred stock is set forth below:

second to fourth series of class 5 preferred stock: to be set by resolution of our board of directors at the time of issuance, up to a maximum of ¥250.00 per share;

first to fourth series of class 6 preferred stock: to be set by resolution of our board of directors at the time of issuance, up to a maximum of ¥125.00 per share; and

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

first to fourth series of class 7 preferred stock: to be set by resolution of our board of directors at the time of issuance, up to a maximum of ¥125.00 per share.

Table of Contents

In the event that our board of directors decides to pay an interim dividend to holders of record of our common stock as of September 30 of any year, we will, in priority to the payment of that interim dividend, pay a preferred interim dividend in the amount specified in our Articles of Incorporation to holders of record of our preferred stock as of September 30 of the same year. The amount of any preferred interim dividend will be deducted from the preferred dividend payable on the relevant class of our preferred stock for the same fiscal year.

No preferred dividend will be paid on any of our preferred stock converted into our common stock for the period from the date following the record date for the preferred dividend or preferred interim dividend last preceding the relevant conversion date to the relevant conversion date, but the common stock issued upon conversion will be entitled to receive any dividend payable to holders of record of common stock upon the next succeeding record date for common stock dividends.

No payment of dividends on our preferred stock or any other shares can be made unless we have a sufficient distributable amount and a resolution to distribute such distributable amount is obtained at the relevant ordinary general meeting of shareholders, in the case of annual preferred dividends, or at the board of directors, in the case of preferred interim dividends.

Dividends on our preferred stock are non-cumulative. If the full amount of any dividend is not declared on our preferred stock in respect of any fiscal year, holders of our preferred stock do not have any right to receive dividends in respect of the deficiency in any subsequent fiscal year, and we will have no obligation to pay the deficiency or to pay any interest regardless of whether or not dividends are paid in respect of any subsequent fiscal year. The holders of our preferred stock are not entitled to any further dividends or other participation in or distribution of our profits.

Liquidation Rights

In the event of our voluntary or involuntary liquidation, record holders of our preferred stock are entitled, equally in rank as among themselves, to receive before any distribution out of our residual assets is made to holders of our common stock, a distribution out of our residual assets of:

¥2,500 per share of second to fourth series of class 5 preferred stock;

¥2,500 per share of first to fourth series of class 6 preferred stock; and

¥2,500 per share of first to fourth series of class 7 preferred stock.

The holders of our preferred stock are not entitled to any further dividends or other participation in or distribution of our residual assets upon our liquidation.

Voting Rights

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

No holder of our preferred stock has the right to receive notice of, or to vote at, a general meeting of shareholders, except as otherwise specifically provided under our Articles of Incorporation or other applicable law. Under our Articles of Incorporation, holders of our preferred stock will be entitled to receive notice of, and have one voting right per unit of preferred stock at, our general meetings of shareholders:

from the commencement of our ordinary general meeting of shareholders if an agenda for approval to declare a preferred dividend is not submitted to such meeting; or

from the close of any ordinary general meeting of shareholders if a proposed resolution to declare a preferred dividend is not approved at such meeting.

In each case, holders of our preferred stock will be entitled to receive notice of and vote at the relevant general meetings of shareholders unless and until such time as a resolution of an ordinary general meeting of shareholders declaring a preferred dividend is passed.

Table of Contents

American Depositary Shares

The Bank of New York Mellon will issue ADRs. Each ADR will represent ownership interests in ADSs. Each ADS represents one share of our common stock. Each ADS is held by BTMU, acting as custodian, at its principal office in Tokyo, on behalf of The Bank of New York Mellon, acting as depository. Each ADS will also represent securities, cash or other property deposited with The Bank of New York Mellon but not distributed to

ADS holders. The Bank of New York Mellon's corporate trust office is located at 101 Barclay Street, New York, New York 10286 and its principal executive office is located at One Wall Street, New York, New York 10286.

You may hold ADSs either directly or indirectly through your broker or other financial institution. If you hold ADSs directly, you are an ADS holder. This description assumes you hold your ADSs directly. If you hold the ADSs indirectly, you must rely on the procedures of your broker or other financial institution to assert the rights of ADS holders described in this section. You should consult with your broker or financial institution to find out what those procedures are.

The Bank of New York Mellon will actually be the registered holder of the common stock, so you will have to rely on it to exercise your rights as a shareholder. Our obligations and the obligations of The Bank of New York Mellon are set out in a deposit agreement among us, The Bank of New York Mellon and you, as an ADS holder. The deposit agreement and the ADSs are governed by New York law.

The following is a summary of the material terms of the deposit agreement. Because it is a summary, it does not contain all the information that may be important to you. For more complete information, you should read the entire deposit agreement and the form of ADR.

Share Dividends and Other Distributions

The Bank of New York Mellon has agreed to pay to you the cash dividends or other distributions it or the custodian receives on shares of common stock or other deposited securities, after deducting its fees and expenses. You will receive these distributions in proportion to the number of shares your ADSs represent.

Cash. The Bank of New York Mellon will convert any cash dividend or other cash distribution we pay on our common stock into U.S. dollars, if it can do so on a reasonable basis and can transfer the U.S. dollars to the United States. If that is not possible or if any approval from the Japanese government is needed and cannot be obtained, the deposit agreement allows The Bank of New York Mellon to distribute the Japanese yen only to those ADS holders to whom it is possible to do so. The Bank of New York Mellon will hold the Japanese yen it cannot convert for the account of the ADS holders who have not been paid. It will not invest the Japanese yen and it will not be liable for any interest.

Before making a distribution, any withholding taxes that must be paid under Japanese law will be deducted. See E. Taxation Japanese Taxation. The Bank of New York Mellon will distribute only whole U.S. dollars and cents and will round fractional cents to the nearest whole cent. If the relevant exchange rates fluctuate during a time when The Bank of New York Mellon cannot convert the Japanese currency, you may lose some or all of the value of the distribution.

Shares. The Bank of New York Mellon may distribute new ADSs representing any shares we may distribute as a dividend or free distribution, if we furnish The Bank of New York Mellon promptly with satisfactory evidence that it is legal to do so. The Bank of New York Mellon will only distribute whole ADSs. It will sell shares which would require it to issue a fractional ADS and distribute the net proceeds in the same way as it distributes cash dividends. If The Bank of New York Mellon does not distribute additional ADSs, each ADS will also represent the new shares.

Rights to receive additional shares. If we offer holders of our common stock any rights to subscribe for additional shares of common stock or any other rights, The Bank of New York Mellon may, after consultation

Table of Contents

with us, make those rights available to you. We must first instruct The Bank of New York Mellon to do so and furnish it with satisfactory evidence that it is legal to do so. If we do not furnish this evidence and/or do not give these instructions, and The Bank of New York Mellon decides that it is practical to sell the rights, The Bank of New York Mellon will sell the rights and distribute the proceeds in the same way as it distributes cash dividends. The Bank of New York Mellon may allow rights that are not distributed or sold to lapse. In that case, you will receive no value for them.

If The Bank of New York Mellon makes rights available to you, upon instruction from you it will exercise the rights and purchase the shares on your behalf. The Bank of New York Mellon will then deposit the shares and issue ADSs to you. It will only exercise the rights if you pay it the exercise price and any other charges the rights require you to pay.

U.S. securities laws may restrict the sale, deposit, cancellation and transfer of the ADSs issued after the exercise of the rights. For example, you may not be able to trade the ADSs freely in the United States. In this case, The Bank of New York Mellon may issue the ADSs under a separate restricted deposit agreement which will contain the same provisions as the deposit agreement, except for changes needed to put the restrictions in place. The Bank of New York Mellon will not offer you rights unless those rights and the securities to which the rights relate are either exempt from registration or have been registered under the U.S. Securities Act with respect to a distribution to you. We will have no obligation to register under the Securities Act those rights or the securities to which they relate.

Other distributions. The Bank of New York Mellon will send to you anything else we distribute on deposited securities by any means it thinks is legal, fair and practical. If it cannot make the distribution in that way, The Bank of New York Mellon has a choice. It may decide to sell what we distributed and distribute the net proceeds, in the same way as it does with cash. Or, it may decide to hold what we distributed, in which case ADSs will also represent the newly distributed property.

The Bank of New York Mellon is not responsible if it decides that it is unlawful or impractical to make a distribution available to any ADS holders. We have no obligation to register ADSs, shares, rights or other securities under the Securities Act. We also have no obligation to take any other action to permit the distribution of ADSs, shares, rights or anything else to ADS holders. This means that you may not receive the distributions we make on our shares or any value for them if it is illegal or impractical for us or The Bank of New York Mellon to make them available to you.

Deposit, Withdrawal and Cancellation

The Bank of New York Mellon will issue ADSs if you or your broker deposits shares or evidence of rights to receive shares with the custodian. Upon payment of its fees and expenses and of any taxes or charges, such as stamp taxes or stock transfer taxes or fees, The Bank of New York Mellon will register the appropriate number of ADSs in the names you request and will deliver the ADSs at its corporate trust office to the persons you request.

In certain circumstances, subject to the provisions of the deposit agreement, The Bank of New York Mellon may issue ADSs before the deposit of the underlying shares. This is called a pre-release of ADSs. A pre-release is closed out as soon as the underlying shares are delivered to the depository. The depository may receive ADSs instead of the shares to close out a pre-release. The depository may pre-release ADSs only under the following conditions:

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

Before or at the time of the pre-release, the person to whom the pre-release is made must represent to the depositary in writing that it or its customer, as the case may be, owns the shares to be deposited;

The pre-release must be fully collateralized with cash or collateral that the depositary considers appropriate; and

The depositary must be able to close out the pre-release on not more than five business days' notice.

Table of Contents

The pre-release will be subject to whatever indemnities and credit regulations that the depository considers appropriate. In addition, the depository will limit the number of ADSs that may be outstanding at any time as a result of a pre-release.

You may turn in your ADSs at the Corporate Trust Office of The Bank of New York Mellon's office. Upon payment of its fees and expenses and of any taxes or charges, such as stamp taxes or stock transfer taxes or fees, The Bank of New York Mellon will deliver (1) the underlying shares to an account designated by you and (2) any other deposited securities underlying the ADS at the office of the custodian. Or, at your request, risk and expense, The Bank of New York Mellon will deliver the deposited securities at its Corporate Trust Office.

The ADSs may only be presented for cancellation and release of the underlying shares of common stock or other deposited securities in multiples of 100 ADSs. Holders of ADRs evidencing less than 100 ADSs are not entitled to delivery of any underlying shares or other deposited securities unless ADRs, together with other ADRs presented by the same holder at the same time, represent in the aggregate at least 100 ADSs. If any ADSs are surrendered but not cancelled pursuant to the preceding sentence, The Bank of New York Mellon will execute and deliver an ADR or ADRs evidencing the balance of ADSs not so cancelled to the person or persons surrendering the same.

Voting Rights

If you are an ADS holder on a record date fixed by The Bank of New York Mellon, you may instruct The Bank of New York Mellon to vote the shares underlying your ADSs at a meeting of our shareholders in accordance with the procedures set forth in the deposit agreement.

The Bank of New York Mellon will notify you of the upcoming meeting and arrange to deliver our voting materials to you. The notice shall contain (a) such information as is contained in such notice of meeting, (b) a statement that as of the close of business on a specified record date you will be entitled, subject to any applicable provision of Japanese law and our Articles of Incorporation, to instruct The Bank of New York Mellon as to the exercise of the voting rights, if any, pertaining to the amount of shares or other deposited securities represented by your ADSs, and (c) a brief statement as to the manner in which such instructions may be given, including an express indication that instructions may be given to The Bank of New York Mellon to give a discretionary proxy to a person designated by us. Upon your written request, received on or before the date established by The Bank of New York Mellon for such purpose, The Bank of New York Mellon shall endeavor in so far as practicable to vote or cause to be voted the amount of shares or other deposited securities represented by your ADSs in accordance with the instructions set forth in your request. So long as Japanese law provides that votes may only be cast with respect to one or more whole shares or other deposited securities, The Bank of New York Mellon will aggregate voting instructions to the extent such instructions are the same and vote such whole shares or other deposited securities in accordance with your instructions. If, after aggregation of all instructions to vote received by The Bank of New York Mellon, any portion of the aggregated instructions constitutes instructions with respect to less than a whole share or other deposited securities, The Bank of New York Mellon will not vote or cause to be voted the shares or other deposited securities to which such portion of the instructions apply. The Bank of New York Mellon will not vote or attempt to exercise the right to vote that attaches to the shares or other deposited securities, other than in accordance with the instructions of the ADS holders. If no instructions are received by The Bank of New York Mellon from you with respect to any of the deposited securities represented by your ADSs on or before the date established by The Bank of New York Mellon for such purpose, The Bank of New York Mellon shall deem you to have instructed The Bank of New York Mellon to give a discretionary proxy to a person designated by us with respect to such deposited securities and The Bank of New York Mellon shall give a discretionary proxy to a person designated by us to vote such deposited securities, provided that no such instruction shall be given with respect to any matter as to which we inform The Bank of New York Mellon (and we have agreed to provide such information as promptly as practicable in writing) that (1) we do not wish such proxy given, (2) substantial opposition exists or (3) such matter materially and adversely affects the rights of holders of shares.

Table of Contents

We cannot assure you that you will receive the voting materials in time to ensure that you can instruct The Bank of New York Mellon to vote your shares. In addition, The Bank of New York Mellon is not responsible for failing to carry out voting instructions or for the manner of carrying out voting instructions as long as it has acted in good faith. This means that you may not be able to exercise your right to vote and there may be nothing you can do if your shares are not voted as you requested.

Fees and Expenses

See Item 12.D. Description of Securities Other than Equity Securities American Depositary Shares.

Payment of Taxes

You will be responsible for any taxes or other governmental charges payable on your ADSs or on the deposited securities underlying your ADSs. The Bank of New York Mellon may refuse to transfer your ADSs or allow you to withdraw the deposited securities underlying your ADSs until those taxes or other charges are paid. It may apply payments owed to you or sell deposited securities underlying your ADSs to pay any taxes owed and you will remain liable for any deficiency. If it sells deposited securities, it will, if appropriate, reduce the number of ADSs to reflect the sale and pay to you any property remaining after it has paid the taxes.

Reclassifications, Recapitalizations and Mergers

If we:

reclassify, split up or consolidate any of our shares or the deposited securities;

recapitalize, reorganize, merge, liquidate, consolidate or sell all or substantially all of our assets or take any similar action; or

distribute securities on the shares that are not distributed to you, then,

- (1) the cash, shares or other securities received by The Bank of New York Mellon will become deposited securities and each ADS will automatically represent its equal share of the new deposited securities unless additional ADSs are issued; and
- (2) The Bank of New York Mellon may, and will if we request, issue new ADSs or ask you to surrender your outstanding ADSs in exchange for new ADSs, identifying the new deposited securities.

Amendment and Termination

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

We may agree with The Bank of New York Mellon to amend the deposit agreement and the ADSs without your consent for any reason. If the amendment adds or increases fees or charges, except for taxes and other governmental charges, registration fees, cable, telex or facsimile transmission costs, delivery costs or other such expenses, or prejudices an important right of ADS holders, it will only become effective three months after The Bank of New York Mellon notifies you of the amendment. At the time an amendment becomes effective, you are considered, by continuing to hold your ADS, to agree to the amendment and to be bound by the ADSs and the deposit agreement as amended. However, no amendment will impair your right to receive the deposited securities in exchange for your ADSs.

The Bank of New York Mellon will terminate the deposit agreement if we ask it to do so, in which case it must notify you at least 30 days before termination. The Bank of New York Mellon may also terminate the deposit agreement if The Bank of New York Mellon has told us that it would like to resign and we have not appointed a new depository bank within 60 days.

Table of Contents

If any ADSs remain outstanding after termination, The Bank of New York Mellon will stop registering the transfers of ADSs, will stop distributing dividends to ADS holders and will not give any further notices or do anything else under the deposit agreement other than:

- (1) collect dividends and distributions on the deposited securities;
- (2) sell rights and other property offered to holders of deposited securities; and
- (3) deliver shares and other deposited securities in exchange for ADSs surrendered to The Bank of New York Mellon.

At any time after one year following termination, The Bank of New York Mellon may sell any remaining deposited securities. After that, The Bank of New York Mellon will hold the money it received on the sale, as well as any other cash it is holding under the deposit agreement for the pro rata benefit of the ADS holders that have not surrendered their ADSs. It will not invest the money and has no liability for interest. The Bank of New York Mellon's only obligations will be to account for the money and other cash and with respect to indemnification and to retain depositary documents. After termination, our only obligations will be with respect to indemnification and to pay certain amounts to The Bank of New York Mellon.

Limitations on Obligations and Liability to ADS Holders

The deposit agreement expressly limits our obligations and the obligations of The Bank of New York Mellon. It also limits our liability and the liability of The Bank of New York Mellon. We and The Bank of New York Mellon:

are only obligated to take the actions specifically set forth in the deposit agreement without negligence or bad faith;

are not liable if either is prevented or delayed by law, any provision of our Articles of Incorporation or circumstances beyond their control from performing their obligations under the deposit agreement;

are not liable if either exercises or fails to exercise discretion permitted under the deposit agreement;

have no obligation to become involved in a lawsuit or other proceeding related to the ADSs or the deposit agreement on your behalf or on behalf of any other party unless indemnified to their satisfaction; and

may rely upon any advice of or information from legal counsel, accountants, any person depositing shares, any ADS holder or any other person believed in good faith to be competent to give them that advice or information.

In the deposit agreement, we and The Bank of New York Mellon agree to indemnify each other for liabilities arising out of acts performed or omitted by the other party in accordance with the deposit agreement.

Requirements for Depositary Actions

Before The Bank of New York Mellon will issue or register transfer of an ADS, make a distribution on an ADS, or permit withdrawal of shares, it may require:

payment of stock transfer or other taxes or other governmental charges and transfer or registration fees charged by third parties for the transfer of any shares or other deposited securities;

production of satisfactory proof of the identity and genuineness of any signature or other information it deems necessary; and

compliance with regulations it may establish, from time to time, consistent with the deposit agreement, including presentation of transfer documents.

Table of Contents

The Bank of New York Mellon may refuse to deliver, transfer, or register transfers of ADSs generally when its transfer books are closed, when our transfer books are closed or at any time if it or we think it advisable to do so.

You have the right to cancel your ADSs and withdraw the underlying shares at any time except:

when temporary delays arise because: (1) The Bank of New York Mellon has closed its transfer books or we have closed our transfer books; (2) the transfer of shares is blocked to permit voting at a shareholders' meeting; or (3) we are paying a dividend on the shares;

when you or other ADS holders seeking to withdraw shares owe money to pay fees, taxes and similar charges; or

when it is necessary to prohibit withdrawals in order to comply with any laws or governmental regulations that apply to ADSs or to the withdrawal of shares or other deposited securities.

This right of withdrawal may not be limited by any other provision of the deposit agreement.

Reports and Other Communications

The Bank of New York Mellon will make available for your inspection at its corporate trust office any reports and communications, including any proxy soliciting material, that it receives from us, if those reports and communications are both (a) received by The Bank of New York Mellon as the holder of the deposited securities and (b) made generally available by us to the holders of the deposited securities. If we ask it to, The Bank of New York Mellon will also send you copies of those reports it receives from us.

Inspection of Transfer Books

The Bank of New York Mellon will keep books for the registration and transfer of ADSs, which will be open for your inspection at all reasonable times. You will only have the right to inspect those books if the inspection is for the purpose of communicating with other owners of ADSs in connection with our business or a matter related to the deposit agreement or the ADSs.

C. Material Contracts

Except as described elsewhere in this Annual Report, all material contracts entered into by us in the past two years preceding the filing of this Annual Report were entered into in the ordinary course of business.

D. Exchange Controls

Foreign Exchange and Foreign Trade Law

The Foreign Exchange and Foreign Trade Law of Japan and the cabinet orders and ministerial ordinances incidental thereto, collectively known as the Foreign Exchange Law, set forth, among other matters, regulations relating to the receipt by non-residents of Japan of payment with respect to shares to be issued by us and the acquisition and holding of shares by non-residents of Japan and foreign investors, both as defined below. It also applies in some cases to the acquisition and holding of ADSs representing such shares acquired and held by non-residents of Japan and by foreign investors. Generally, the Foreign Exchange Law currently in effect does not affect the right of a non-resident of Japan to purchase or sell an ADS outside Japan for non-Japanese currency.

Non-residents of Japan are defined as individuals who are not resident in Japan and corporations whose principal offices are located outside Japan. Generally, the branches and offices of non-resident corporations which are located in Japan are regarded as residents of Japan while the branches and offices of Japanese corporations located outside Japan are regarded as non-residents of Japan.

Table of Contents

Foreign investors are defined as:

non resident individuals;

corporations which are organized under the laws of foreign countries or whose principal offices are located outside Japan;

corporations of which 50% or more of the shares are directly or indirectly held by individuals not resident of Japan and corporations which are organized under the laws of foreign countries or whose principal offices are located outside Japan; and

corporations, a majority of officers (or a majority of officers having the power of representation) of which are non-resident individuals.

Dividends and Proceeds of Sales

Under the Foreign Exchange Law, dividends paid on, and the proceeds of sales in Japan of, shares held by non-residents of Japan may in general be converted into any foreign currency and repatriated abroad. The acquisition of our shares by non-residents by way of a stock split is not subject to any notification or reporting requirements.

Acquisition of Shares

In general, a non-resident who acquires shares from a resident of Japan is not subject to any prior filing requirement, although the Foreign Exchange Law empowers the Minister of Finance of Japan to require a prior approval for any such acquisition in certain limited circumstances.

If a foreign investor acquires our shares, and, together with parties who have a special relationship with that foreign investor, holds 10% or more of our issued shares as a result of such acquisition, the foreign investor must file a report of such acquisition with the Minister of Finance and any other competent Minister by the fifteenth day of the month immediately following the month to which the date of such acquisition belongs. In certain limited circumstances, however, a prior notification of such acquisition must be filed with the Minister of Finance and any other competent Minister, who may modify or prohibit the proposed acquisition.

Deposit and Withdrawal under American Depositary Facility

The deposit of shares with us, in our capacity as custodian and agent for the depositary, in Tokyo, the issuance of ADSs by the depositary to a non-resident of Japan in respect of the deposit and the withdrawal of the underlying shares upon the surrender of the ADSs are not subject to any of the formalities or restrictions referred to above. However, where as a result of a deposit or withdrawal the aggregate number of shares held by the depositary, including shares deposited with us as custodian for the depositary, or the holder surrendering ADSs, as the case may be, would be 10% or more of the total outstanding shares, a report will be required, and in specified circumstances, a prior notification may be required, as noted above.

Reporting of Substantial Shareholdings

The Financial Instruments and Exchange Act of Japan requires any person who has become, beneficially and solely or jointly, a holder of more than 5% of the total issued shares of capital stock of a company listed on any Japanese financial instruments exchange or whose shares are traded on the over-the-counter market in Japan to file with the director of a competent finance bureau within 5 business days a report concerning such shareholdings.

A similar report must also be filed in respect of any subsequent change of 1% or more in any such holding ratio or any change in material matters set out in reports previously filed, with certain exceptions. For this

Table of Contents

purpose, shares issuable to such person upon exchange of exchangeable securities, conversion of convertible securities or exercise of share subscription warrants or stock acquisition rights (including those incorporated in bonds with stock acquisition rights) are taken into account in determining both the number of shares held by such holder and the issuer's total issued shares of capital stock. Copies of such report must also be furnished to the issuer of such shares and all Japanese financial instruments exchanges on which the shares are listed or (in the case of shares traded over-the-counter) the Japan Securities Dealers Association.

E. Taxation**Japanese Taxation**

The following sets forth the material Japanese tax consequences to owners of shares of our common stock or ADSs who are non-resident individuals or non-Japanese corporations without a permanent establishment in Japan to which the relevant income is attributable, which we refer to as non-resident holders in this section. The statements regarding Japanese tax laws below are based on the laws in force and as interpreted by the Japanese taxation authorities as at the date of this Annual Report and are subject to changes in the applicable Japanese laws, double taxation treaties, conventions or agreements or interpretations thereof occurring after that date. This summary is not exhaustive of all possible tax considerations that may apply to a particular investor, and potential investors are advised to satisfy themselves as to the overall tax consequences of the acquisition, ownership and disposition of shares of our common stock or ADSs, including specifically the tax consequences under Japanese law, the laws of the jurisdiction of which they are resident and any tax treaty between Japan and their country of residence, by consulting their own tax advisers.

For the purpose of Japanese tax law and the Convention between the Government of the United States of America and Japan for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with Respect to Taxes on Income, or the Tax Convention, a U.S. holder of ADSs will be treated as the owner of the shares of our common stock underlying the ADSs evidenced by the ADRs.

Generally, a non-resident holder of shares of our common stock or ADSs is subject to Japanese withholding tax on dividends paid by us. In the absence of any applicable tax treaty, convention or agreement reducing the rate of withholding tax, the rate of Japanese withholding tax applicable to dividends paid by us to non-resident holders is (i) 15.315% for dividends to be paid on or before December 31, 2037 and (ii) 15% for dividends to be paid thereafter, except for dividends paid to any individual non-resident holder who holds 3% or more of our issued shares for which the applicable rate is (a) 20.42% for dividends to be paid on or before December 31, 2037 and (b) 20% for dividends to be paid thereafter, pursuant to Japanese tax law.

The Tax Convention establishes the maximum rate of Japanese withholding tax which may be imposed on dividends paid to a U.S. resident not having a permanent establishment in Japan. Under the Tax Convention, the maximum withholding rate for U.S. holders (as defined below) is generally set at 10% of the gross amount distributed. However, the maximum rate is 5% of the gross amount distributed if the recipient is a corporation and owns directly or indirectly, on the date on which entitlement to the dividends is determined, at least 10% of the voting shares of the paying corporation. Furthermore, the amount distributed shall not be taxed if the recipient is (i) a pension fund which is a U.S. resident, provided that such dividends are not derived from the carrying on of a business, directly or indirectly, by such pension fund or (ii) a parent company with a controlling interest in the paying company and satisfies certain other requirements. U.S. holders (as defined below) are urged to consult their own tax advisors with respect to their eligibility for benefits under the Tax Convention.

Japanese tax law provides in general that if the Japanese statutory rate is lower than the maximum rate applicable under tax treaties, conventions or agreements, the Japanese statutory rate as stated above shall be applicable.

Non-resident holders of shares who are entitled to a reduced rate of Japanese withholding tax on payments of dividends on the shares of our common stock or ADSs by us are required to submit an Application Form for

Table of Contents

the Income Tax Convention regarding Relief from Japanese Income Tax on Dividends, or an Application Form for the Income Tax Convention, in advance through a paying handling agent to the relevant tax authority before the payment of dividends. A standing proxy for non-resident holders may provide this application service for the non-resident holders. In this regard, a certain simplified special filing procedure is available for non-resident holders to claim treaty benefits of exemption from or reduction of Japanese withholding tax with respect to dividends to be paid on or after January 1, 2014, by submitting a Special Application Form for Income Tax Convention regarding Relief from Japanese Income Tax and Special Income Tax for Reconstruction on Dividends of Listed Stocks (together with any other required forms and documents). With respect to ADSs, this reduced rate or exemption will be applicable to non-resident holders of ADSs if the depository or its agent submits two Application Forms (one before payment of dividends and the other within eight months after the record date concerning such payment of dividends), together with certain other documents. To claim this reduced rate or exemption, non-resident holders of ADSs will be required to file a proof of taxpayer status, residence and beneficial ownership, as applicable, and to provide other information or documents as may be required by the depository. Non-resident holders who are entitled, under any applicable tax treaty, to a reduced rate of Japanese withholding tax below the rate otherwise applicable under Japanese tax law, or exemption therefrom, as the case may be, but fail to submit the required application in advance may nevertheless be entitled to claim a refund from the relevant Japanese tax authority of withholding taxes withheld in excess of the rate under an applicable tax treaty (if such non-resident holders are entitled to a reduced treaty rate under the applicable tax treaty) or the full amount of tax withheld (if such non-resident holders are entitled to an exemption under the applicable tax treaty), as the case may be, by complying with a certain subsequent filing procedure. We do not assume any responsibility to ensure withholding at the reduced rate, or exemption therefrom, for non-resident holders who would be so eligible under an applicable tax treaty but where the required procedures as stated above are not followed.

Gains derived from the sale or other disposition of shares of our common stock or ADSs by a non-resident holder are not, in general, subject to Japanese income or corporation taxes or other Japanese taxes.

Any deposits or withdrawals of shares of our common stock by a non-resident holder in exchange for ADSs are not subject to Japanese income or corporation tax.

Japanese inheritance and gift taxes, at progressive rates, may be payable by an individual who has acquired shares of our common stock or ADSs as legatee, heir or donee, even if none of the individual, the decedent or the donor is a Japanese resident.

U.S. Taxation

The following sets forth the material U.S. federal income tax consequences of the ownership of shares and ADSs by a U.S. holder, as defined below. This summary is based on U.S. federal income tax laws, including the U.S. Internal Revenue Code of 1986, or the Code, its legislative history, existing and proposed Treasury regulations thereunder, published rulings and court decisions, and the Tax Convention (as defined above), all of which are subject to change, possibly with retroactive effect.

The following summary is not a complete analysis or description of all potential U.S. federal income tax consequences to a particular U.S. holder. It does not address all U.S. federal income tax considerations that may be relevant to all categories of potential purchasers, certain of which (such as banks or other financial institutions, insurance companies, dealers in securities, tax-exempt entities, non-U.S. persons, persons holding a share or an ADS as part of a straddle, hedge, conversion or integrated transaction, holders whose functional currency is not the U.S. dollar, holders liable for alternative minimum tax and holders of 10% or more of our voting shares) are subject to special tax treatment. This summary does not address any foreign, state, local or other tax consequences of investments in our shares or ADSs.

This summary addresses only shares or ADSs that are held as capital assets within the meaning of Section 1221 of the Code.

Table of Contents

As used herein, a "U.S. holder" is a beneficial owner of shares or ADSs, as the case may be, that is:

a citizen or resident of the United States as determined for U.S. federal income tax purposes;

a corporation or other entity taxable as a corporation created or organized under the laws of the United States, any state thereof or the District of Columbia;

an estate, the income of which is subject to U.S. federal income tax regardless of its source; or

a trust

the administration of which is subject to (1) the supervision of a court within the United States and (2) the control of one or more U.S. persons as described in Section 7701(a)(30) of the Code; or

that has a valid election in effect under applicable U.S. Treasury regulations to be treated as a U.S. person.

A "Non-U.S. holder" is any beneficial holder of shares or ADSs that is not a U.S. holder.

If a partnership holds shares or ADSs, the tax treatment of a partner will generally depend on the status of the partner and the activities of the partnership. If you are a partner of a partnership holding shares or ADSs, you should consult your tax advisor.

We urge U.S. holders to consult their own tax advisors concerning the U.S. federal, state and local and other tax consequences to them of the purchase, ownership and disposition of shares or ADSs.

This summary is based in part on the assumption that each obligation under the deposit agreement and any related agreement will be performed in accordance with its respective terms. Subject to the discussion in the next paragraph, for U.S. federal income tax purposes, holders of ADSs will be treated as the owners of the shares represented by the ADSs. Accordingly, withdrawals or deposits of shares in exchange for ADSs generally will not be subject to U.S. federal income tax.

The U.S. Treasury has expressed concerns that intermediaries in the chain of ownership between the holder of an ADS and the issuer of the security underlying the ADS may be taking actions that are inconsistent with the beneficial ownership of the underlying shares (for example, pre-releasing ADSs to persons who do not have beneficial ownership of the securities underlying the ADSs). Accordingly, the discussion on the creditability of Japanese taxes and the availability of the reduced rate of tax for dividends received by certain non-corporate U.S. holders, each as described below, could be affected by actions taken by intermediaries in the chain of ownership between the holder of ADSs and us if, as a result of such actions, the holders of ADSs are not properly treated as beneficial owners of the underlying shares. We are not aware of any intention to take any such actions, and accordingly, the remainder of this discussion assumes that holders of ADSs will be properly treated as beneficial owners of the underlying shares.

Special adverse U.S. federal income tax rules apply if a U.S. holder holds shares or ADSs of a company that is treated as a passive foreign investment company (a PFIC) for any taxable year during which the U.S. holder held shares or ADSs, as discussed in more detail below. U.S. holders should consult their own tax advisors as to the potential application of the PFIC rules to their ownership and disposition of shares or ADSs.

Taxation of Dividends

Subject to the application of the PFIC rules discussed below, U.S. holders will include the gross amount of any distribution received with respect to shares or ADSs (before reduction for Japanese withholding taxes), to the extent paid out of our current or accumulated earnings and profits (as determined for U.S. federal income tax purposes), as ordinary income in their gross income. As discussed below, for certain U.S. holders, dividends may

Table of Contents

be eligible for a reduced rate of taxation. The amount of distribution of property other than cash will be the fair market value of such property on the date of the distribution. Dividends received by a U.S. holder will not be eligible for the dividends-received deduction allowed to U.S. corporations in respect of dividends received from other U.S. corporations. To the extent that an amount received by a U.S. holder exceeds such holder's allocable share of our current earnings and profits, such excess will be applied first to reduce such holder's tax basis in its shares or ADSs, thereby increasing the amount of gain or decreasing the amount of loss recognized on a subsequent disposition of the shares or ADSs. Then, to the extent such distribution exceeds such U.S. holder's tax basis, such excess will be treated as capital gain. However, we do not maintain calculations of our earnings and profits in accordance with U.S. federal income tax principles, and U.S. holders should therefore assume that any distribution by us with respect to shares or ADSs will constitute ordinary dividend income. The amount of the dividend will be the U.S. dollar value of the Japanese yen payments received. This value will be determined at the spot Japanese yen/U.S. dollar rate on the date the dividend is received by the depository in the case of U.S. holders of ADSs, or by the shareholder in the case of U.S. holders of shares, regardless of whether the dividend payment is in fact converted into U.S. dollars at that time. If the Japanese yen received as a dividend are not converted into U.S. dollars on the date of receipt, a U.S. holder will have basis in such Japanese yen equal to their U.S. dollar value on the date of receipt, and any foreign currency gains or losses resulting from the conversion of the Japanese yen will generally be treated as U.S. source ordinary income or loss. If the Japanese yen received as a dividend are converted into U.S. dollars on the date of receipt, a U.S. holder will generally not be required to recognize foreign currency gain or loss in respect of the dividend income.

If a U.S. holder is eligible for benefits under the Tax Convention, the holder may be able to claim a reduced rate of Japanese withholding tax. All U.S. holders should consult their tax advisors about their eligibility for reduction of Japanese withholding tax. A U.S. holder may claim a deduction or a foreign tax credit, subject to other applicable limitations, only for tax withheld at the appropriate rate. A U.S. holder would be allowed a foreign tax credit for withholding tax for any portion of the tax that could have been avoided by claiming benefits under the Tax Convention. For foreign tax credit limitation purposes, the dividend will be income from sources outside the United States. The limitation on foreign taxes eligible for credit is calculated separately with respect to specific classes of income. For this purpose, dividends we pay will constitute passive income or, in the case of certain U.S. holders, financial services income. The rules governing U.S. foreign tax credits are very complex and U.S. holders should consult their tax advisors regarding the availability of foreign tax credits under their particular circumstances.

Subject to applicable exceptions with respect to short-term and hedged positions, qualified dividends received by non-corporate U.S. holders from a qualified corporation may be eligible for reduced rates of taxation. Qualified corporations include those foreign corporations eligible for the benefits of a comprehensive income tax treaty with the United States that the U.S. Treasury Department determines to be satisfactory for these purposes and that includes an exchange of information provision. The Tax Convention meets these requirements. We believe that we are a qualified foreign corporation and that dividends received by U.S. investors with respect to our shares or ADSs will be qualified dividends. Dividends received by U.S. investors from a foreign corporation that was a PFIC in either the taxable year of the distribution or the preceding taxable year are not qualified dividends.

Passive Foreign Investment Company Considerations

Special adverse U.S. federal income tax rules apply if a U.S. holder holds shares or ADSs of a company that is treated as a PFIC, for any taxable year during which the U.S. holder held shares or ADSs. A foreign corporation will be considered a PFIC for any taxable year in which (i) 75% or more of its gross income is passive income (the income test), or (ii) 50% or more of the average fair market value of its assets (determined quarterly) is attributable to assets that produce or are held for the production of passive income (the asset test). For this purpose, passive income generally includes dividends, interest, royalties, rents and certain gains from the sale of stock and securities. If a foreign corporation owns at least 25% (by value) of the stock of another corporation, the corporation will be treated, for purposes of the PFIC tests, as owning a proportionate share of the

Table of Contents

other corporation's assets and receiving its proportionate share of the other corporation's income. The determination of whether a foreign corporation is a PFIC is made annually.

Proposed Treasury regulations convert what would otherwise be passive income into non-passive income when such income is banking income earned by an active bank. Based upon these proposed Treasury regulations and certain IRS guidance relating to the treatment of certain qualifying government bonds, and upon certain management estimates and assumptions, we do not believe that we were a PFIC for the year ended March 31, 2016 because we did not meet either the income test or the asset test. The determination of whether we are a PFIC must be made annually and involves a fact-intensive analysis based upon, among other things, the composition of our income and assets and the value of our assets from time to time. It is possible that we may become a PFIC in the fiscal year ending March 31, 2017 or any future taxable year due to changes in our income or asset composition. In addition, a decrease in the price of our shares may also result in our becoming a PFIC. Furthermore, there can be no assurance that the above-described proposed Treasury regulations will be finalized in their current form or that the above IRS guidance which is scheduled to expire for taxable years beginning after 2016 will continue to apply. Moreover, the application of the proposed Treasury regulations is not clear. If we were classified as a PFIC in any year during which a U.S. holder owns shares or ADSs and the U.S. holder does not make a mark-to-market election, as discussed below, we generally would continue to be treated as a PFIC as to such U.S. holder in all succeeding years, regardless of whether we continue to meet the income or asset test discussed above. U.S. Holders are urged to consult their own tax advisors with respect to the tax consequences to them if we were to become a PFIC for any taxable year in which they own our shares or ADSs.

If we were classified as a PFIC for any taxable year during which a U.S. holder holds our shares or ADSs, the U.S. holder would generally not receive capital gains treatment upon the sale of the shares or ADSs and would be subject to increased tax liability (generally including an interest charge) upon the sale or other disposition of the shares or ADSs or upon the receipt of certain distributions treated as excess distributions, unless the U.S. holder makes the mark-to-market election described below. An excess distribution generally would be any distribution to a U.S. holder with respect to shares or ADSs during a single taxable year that is greater than 125% of the average annual distributions received by a U.S. holder with respect to shares or ADSs during the three preceding taxable years or, if shorter, during the U.S. holder's holding period for the shares or ADSs.

Mark-to-Market Election. If the shares or ADSs are regularly traded on a registered national securities exchange or certain other exchanges or markets, then such shares or ADSs would constitute marketable stock for purposes of the PFIC rules, and a U.S. holder would not be subject to the foregoing PFIC rules if such holder made a mark-to-market election. After making such an election, the U.S. holder generally would include as ordinary income each year during which the election is in effect and during which we are a PFIC the excess, if any, of the fair market value of our shares or ADSs at the end of the taxable year over such holder's adjusted basis in such shares or ADSs. These amounts of ordinary income would not be eligible for the favorable tax rates applicable to qualified dividend income or long-term capital gains. A U.S. holder also would be allowed to take an ordinary loss in respect of the excess, if any, of the holder's adjusted basis in our shares or ADSs over their fair market value at the end of the taxable year (but only to the extent of the net amount of income that was previously included as a result of the mark-to-market election). A U.S. holder's tax basis in our shares or ADSs would be adjusted to reflect any income or loss amounts resulting from a mark-to-market election. If made, a mark-to-market election would be effective for the taxable year for which the election was made and for all subsequent taxable years unless the shares or ADSs cease to qualify as marketable stock for purposes of the PFIC rules or the IRS consented to the revocation of the election. In the event that we are classified as a PFIC, U.S. holders are urged to consult their tax advisors regarding the availability of the mark-to-market election, and whether the election would be advisable in the holder's particular circumstances.

QEF Election. The PFIC rules outlined above also would not apply to a U.S. holder if such holder alternatively elected to treat us as a qualified electing fund or QEF. An election to treat us as a QEF will not be available, however, if we do not provide the information necessary to make such an election. We will not provide U.S. holders with the information necessary to make a QEF election, and thus, the QEF election will not be available with respect to our shares.

Table of Contents

Notwithstanding any election made with respect to our shares, dividends received with respect to our shares will not constitute qualified dividend income if we are a PFIC in either the year of the distribution or the preceding taxable year. Dividends that do not constitute qualified dividend income are not eligible for taxation at the reduced tax rate described above in Taxation of Dividends. Instead, such dividends would be subject to tax at ordinary income rates.

If a U.S. holder owns shares or ADSs during any year in which we are a PFIC, the U.S. holder must also file IRS Form 8621 regarding distributions received on the shares or ADSs, any gain realized on the shares or ADSs, and any reportable election in accordance with the instructions to such form. In addition, each U.S. holder is required to file a separate IRS Form 8621 if such U.S. holder owns shares or ADSs during any year in which we are a PFIC whether or not such U.S. holder received distributions on the shares or ADSs, realized a gain on the shares or ADSs or made a reportable election during such year. U.S. holders are urged to consult their own tax advisors concerning the U.S. federal income tax consequences of holding shares or ADSs if the Company were considered a PFIC in any taxable year.

Taxation of Capital Gains

Subject to the application of the PFIC rules discussed above, upon a sale or other disposition of shares or ADSs, a U.S. holder will recognize a gain or loss in an amount equal to the difference between the U.S. dollar value of the amount realized and the U.S. holder's tax basis, determined in U.S. dollars, in such shares or ADSs. Such gains or losses will be capital gains or losses and will be long-term capital gains or losses if the U.S. holder's holding period for such shares or ADSs exceeds one year. Long-term capital gains of non-corporate U.S. holders (including individuals) are generally eligible for reduced rates of taxation. A U.S. holder's adjusted tax basis in its shares or ADSs will generally be the cost to the holder of such shares or ADSs. Any such gains or losses realized by a U.S. holder upon disposal of the shares or ADSs will generally be income or loss from sources within the United States for foreign tax credit limitation purposes. The deductibility of capital losses is subject to limitations under the Code.

Information Reporting and Backup Withholding

Dividends paid on shares or ADSs to a U.S. holder, or proceeds from a U.S. holder's sale or other disposition of shares or ADSs, may be subject to information reporting requirements. Those dividends or proceeds from sale or disposition may also be subject to backup withholding unless the U.S. holder:

is a corporation or other exempt recipient, and, when required, demonstrates this fact; or

provides a correct taxpayer identification number on a properly completed U.S. IRS Form W-9 or other appropriate form which certifies that the U.S. holder is not subject to backup withholding and otherwise complies with applicable requirements of the backup withholding rules.

Backup withholding is not an additional tax. Any amount withheld under these rules will be creditable against the U.S. holder's U.S. federal income tax liability or refundable to the extent that it exceeds such liability if the U.S. holder provides the required information to the IRS. If a U.S. holder is required to and does not provide a correct taxpayer identification number, the U.S. holder may be subject to penalties imposed by the IRS. All holders should consult their tax advisors as to their qualification for the exemption from backup withholding and the procedure for obtaining an exemption.

In addition, certain U.S. holders who are individuals that hold certain foreign financial assets (which may include our shares or ADSs) are required to report information relating to such assets, subject to certain exceptions. U.S. Holders should consult their tax advisors regarding the effect, if any, of this requirement on their ownership and disposition of our shares and ADSs.

Table of Contents

Additional Tax on Investment Income

U.S. Holders that are individuals, estates or trusts and whose income exceeds certain thresholds will be subject to an additional 3.8% tax on unearned income, including, among other things, dividends on, and capital gains from the sale or other taxable disposition of, shares or ADSs, subject to certain limitations and exceptions.

F. Dividends and Paying Agents

Not applicable.

G. Statement by Experts

Not applicable.

H. Documents on Display

We file periodic reports and other information with the SEC. You may read and copy any document that we file with the SEC at the SEC's public reference room at 100 F Street, NE, Washington, DC 20549. Please call the SEC at 1-800-SEC-0330 for further information on the operation of its public reference room. The SEC also maintains a web site that contains reports, proxy and information statements and other information regarding registrants that file electronically with the SEC (<http://www.sec.gov>).

I. Subsidiary Information

Please refer to discussion under Item 4.C. Information on the Company Organizational Structure.

Item 11. Quantitative and Qualitative Disclosures about Credit, Market and Other Risk.

Since the financial crisis in 2008, financial groups such as us have been expected to ensure increasingly more sophisticated and comprehensive risk management. Risk management plays an increasingly important role in our operations as a financial group operating globally through various subsidiaries.

We identify various risks arising from businesses based on uniform criteria, and implement integrated risk management to ensure a stronger financial condition and to maximize shareholder value. Based on this approach, we identify, measure, control and monitor a wide variety of risks so as to achieve a stable balance between earnings and risks. We undertake risk management to create an appropriate capital structure and to achieve optimal allocation of resources.

Table of Contents**Risk Classification**

At the holding company level, we broadly classify and define risk categories faced by the Group, including those that are summarized below. Group companies perform more detailed risk management based on their respective operations.

Type of Risk	Definition
Credit Risk	The risk of financial loss in credit assets (including off-balance sheet instruments) caused by deterioration in the credit conditions of counterparties. This category includes country risk.
Market Risk	The risk of financial loss where the value of our assets and liabilities could be adversely affected by changes in market variables such as interest rates, securities prices and foreign exchange rates. Market liquidity risk is the risk of financial loss caused by the inability to secure market transactions at the required volume or price levels as a result of market turbulence or lack of trading liquidity.
Liquidity Risk	The risk of incurring loss if a poor financial position at a group company hampers the ability to meet funding requirements or necessitates fund procurement at interest rates markedly higher than normal.
Operational Risk	The risk of loss resulting from inadequate or failed internal processes, people or systems, or from external events.
Operations Risk	The risk of incurring loss that might be caused by negligence of correct operational processing, or by incidents or misconduct by either officers or staff, as well as other similar risks.
Information Asset Risk	The risk of loss caused by loss, alteration, falsification or leakage of information, or by destruction, disruption, errors or misuse of information systems, as well as other similar risks.
Tangible Asset Risk	The risk of loss due to damage to tangible assets or deterioration in the operational environment caused by disasters or inadequate asset maintenance, as well as risks similar to this risk.
Personnel Risk	The risk of loss due to an outflow or loss of human resources or deterioration in employee morale, as well as risks similar to this risk.
Legal Risk	The risk of loss due to failure to comply with applicable laws and regulations, adequately evaluate contractual rights and obligations, or appropriately deal with disputes, as well as other similar risks.
Reputation Risk	The risk of loss due to deterioration in reputation as a consequence of the spread of rumors among customers or in the market, or as a consequence of inadequate response to a particular circumstance by MUFG, as well as other similar risks.

Risk Management System

We have adopted an integrated risk management system to promote close cooperation among the holding company and group companies. The holding company and the major subsidiaries (which include BTMU, MUTB and MUSHD) each appoint a chief risk officer and establish an independent risk management division. The board of directors of the holding company determines risk management policies for various types of risk based on the discussions at, and reports and recommendations from, committees established specially for risk management purposes. The holding company has established committees to assist management in managing risks relevant to the Group. Following the fundamental risk management policies determined by the board of directors, each group company establishes its own systems and procedures for identifying, analyzing and managing various types of risks from both quantitative and qualitative perspectives. The holding company seeks to enhance group wide risk identification, to integrate and improve the Group's risk management system and related methods, to maintain asset quality, and to eliminate concentrations of specific risks.

Table of Contents

The following diagram summarizes our integrated risk management framework:

Risk Management System

Crisis Management Framework

In order to have a clear critical response rationale and associated decision-making criteria, we have developed systems designed to ensure that our operations are not interrupted or can be restored to normal quickly in the event of a natural disaster or system failure so as to minimize any disruption to customers and markets. A crisis management team within the holding company is the central coordinating body in the event of any emergency. Based on information collected from crisis management personnel at the major subsidiaries, this central body would assess the overall impact of a crisis on the Group's business and establish task forces that could implement all countermeasures to restore full operations. We have business continuity plans to maintain continuous operational viability in the event of natural disasters, system failures and other types of emergencies. Regular training drills are conducted to upgrade the practical effectiveness of these systems.

Table of Contents

Recognizing that our operations, particularly in Japan, are subject to the risk of earthquakes and other natural disasters as well as accidents resulting from such disasters, including a sudden massive blackout in major metropolitan areas in Japan, and that our contingency plans may not address all eventualities that may occur in the event of a material disruption to our operations, we continue to conduct a comprehensive review of our existing business continuity plan to more effectively respond to such extreme scenarios, and to contemplate and implement measures to augment our current business continuity management framework, including enhancing our off-site back-up data storage and other information technology systems.

Implementation of Basel Standards

In determining capital ratios under the FSA guidelines implementing Basel III, we and our banking subsidiaries used the Advanced Internal Ratings-Based approach, or the AIRB approach, to calculate capital requirements for credit risk as of March 31, 2016. The Standardized Approach is used for some subsidiaries that are considered to be immaterial to the overall MUFG capital requirements, and MUAH has adopted a phased rollout of the Internal Ratings-Based Approach. We reflect market risk in our risk-weighted assets by applying the Internal Models Approach to calculate general market risk and the Standardized Measurement Method to calculate specific risk. Under the Internal Models Approach, we principally use a historical simulation model to calculate value-at-risk, or VaR, amounts by estimating the profit and loss on our portfolio by applying actual fluctuations in historical market rates and prices over a fixed period. Under the FSA guidelines implementing Basel III, we reflect operational risk in our risk-weighted assets by using the Standardized Approach and the Advanced Measurement Approach. The Basel Committee on Banking Supervision has issued proposals to revise the current market risk framework, including stricter measures applicable to some of our investment securities portfolio. For more information, see [Operational Risk Management](#).

Based on the Basel III framework, the Japanese capital ratio framework has been revised to implement the more stringent requirements, which are being implemented in phases beginning on March 31, 2013. Likewise, local banking regulators outside of Japan, such as those in the United States, have begun, or are expected, to revise the capital and liquidity requirements imposed on our subsidiaries and operations in those countries to implement the more stringent requirements of Basel III as adopted in those countries. We intend to carefully monitor further developments with an aim to enhance our corporate value and maximize shareholder value by integrating the various strengths within the MUFG Group. For more information on the Basel regulatory framework and requirements, see [Item 4.B. Information on the Company Business Overview Supervision and Regulation](#).

Credit Risk Management

Credit risk is the risk of losses due to deterioration in the financial condition of a borrower. We have established risk management systems to maintain asset quality, manage credit risk exposure and achieve earnings commensurate with risk.

Our major banking subsidiaries (which include BTMU and MUTB) apply a uniform credit rating system for asset evaluation and assessment, loan pricing, and quantitative measurement of credit risk. This system also underpins the calculation of capital requirements and management of credit portfolios. We continually seek to upgrade credit portfolio management, or CPM, expertise to achieve an improved risk-adjusted return based on the Group's credit portfolio status and flexible response capability to economic and other external changes.

Credit Risk Management System

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

The credit portfolios of our major banking subsidiaries are monitored and assessed on a regular basis by the holding company to maintain and improve asset quality. A uniform credit rating and asset evaluation and assessment system is used to ensure timely and proper evaluation of all credit risks.

Table of Contents

Under our credit risk management system, each of our subsidiaries in the banking, securities, consumer finance, and leasing businesses, manages its respective credit risk on a consolidated basis based on the attributes of the risk, while the holding company oversees and manages credit risk on an overall group-wide basis. The holding company also convenes regular committee meetings to monitor credit risk management at banking subsidiaries and to issue guidance where necessary.

Each major banking subsidiary has in place a system of checks and balances in which a credit administration section that is independent of the business promotion sections screens individual transactions and manages the extension of credit. At the management level, regular meetings of the Credit & Investment Management Committee and related deliberative bodies ensure full discussion of important matters related to credit risk management. Besides such checks and balances and internal oversight systems, credit examination sections also undertake credit testing and evaluation to ensure appropriate credit risk management.

The following diagram summarizes the credit risk management framework for our major banking subsidiaries:

Credit Rating System

MUFG and its major banking subsidiaries use an integrated credit rating system to evaluate credit risk. The credit rating system consists primarily of borrower rating, facility risk rating, structured finance rating and asset securitization rating.

Country risk is also rated on a uniform group-wide basis. Our country risk rating is reviewed periodically to take into account relevant political and economic factors, including foreign currency availability.

Risk exposure for small retail loans, such as residential mortgage loans, is managed by grouping loans into various pools and assigning ratings at the pool level.

Borrower rating

Our borrower rating classifies borrowers into 15 grades based on evaluations of their expected debt-service capability over the next three to five years.

Table of Contents

The following table sets forth our borrower grades:

Definition of MUFG Borrower Rating

MUFG	
Borrower Rating	MUFG Borrower Rating Definition
1	The capacity to meet financial commitments is extremely certain, and the borrower has the highest level of creditworthiness.
2	The capacity to meet financial commitments is highly certain, but there are some elements that may result in lower creditworthiness in the future.
3	The capacity to meet financial commitments is sufficiently certain, but there is the possibility that creditworthiness may fall in the long run.
4	There are no problems concerning the capacity to meet financial commitments, but there is the possibility that creditworthiness may fall in the long run.
5	There are no problems concerning the capacity to meet financial commitments, and creditworthiness is in the middle range.
6	There are no problems concerning the capacity to meet financial commitments presently, but there are elements that require attention if the situation changes.
7	There are no problems concerning the capacity to meet financial commitments presently, but long-term stability is poor.
8	There are no problems concerning the capacity to meet financial commitments presently, but long-term stability is poor, and creditworthiness is relatively low.
9	The capacity to meet financial commitments is somewhat poor, and creditworthiness is the lowest among Normal customers.
10 through 12	Borrowers who must be closely monitored because of the following business performance and financial conditions: (1) Borrowers who have problematic business performance, such as virtually delinquent principal repayment or interest payment; (2) Borrowers whose business performance is unsteady, or who have unfavorable financial conditions; (3) Borrowers who have problems with loan conditions, for whom interest rates have been reduced or shelved.
10	Although business problems are not serious or their improvement is seen to be remarkable, there are elements of potential concern with respect to the borrower's management, and close monitoring is required.
11	Business problems are serious, or require long-term solutions. Serious elements concerning business administration of the borrower have emerged, and subsequent debt repayment needs to be monitored closely.
12	Borrowers who fall under the criteria of Rating 10 or 11 and have a loan concession granted. Borrowers who have Loans contractually past due 90 days or more. (As a rule, delinquent borrowers are categorized as Likely to Become Bankrupt, but the definition here applies to borrowers delinquent for 90 days or more because of inheritance and other special reasons.)
13	Borrowers who pose a serious risk with respect to debt repayment, loss is likely to occur in the course of transactions. While still not bankrupt, these borrowers are in financial difficulty, with poor progress in achieving restructuring plans, and are likely to become bankrupt in the future.
14	While not legally bankrupt, borrowers who are considered to be virtually bankrupt because they are in serious financial difficulty and have no prospects for an improvement in their business operations.
15	Borrowers who are legally bankrupt (i.e., who have no prospects for continued business operations because of non-payment, suspension of business, voluntary liquidation, or filing for legal liquidation).

The Japanese regulatory authorities require Japanese banks to categorize borrowers as follows:

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

Normal borrowers (generally corresponding to borrowers in categories 1 through 9 in our ratings), which are borrowers that are performing well, with no significant financial concerns,

Borrowers requiring close watch (generally corresponding to borrowers in categories 10 through 12 in our ratings), which include loans that have been amended to allow for delays or forgiveness of interest payments, borrowers experiencing difficulty in complying with loan terms and conditions and borrowers that are recording losses or performing badly,

Table of Contents

Borrowers likely to become bankrupt (generally corresponding to borrowers in category 13 in our ratings), which relate to borrowers who pose a serious risk with respect to debt repayment, loss is likely to occur in the course of transactions. While still not bankrupt, these borrowers are in financial difficulty, with poor progress in achieving restructuring plans, and are likely to become bankrupt in the future,

Virtually bankrupt borrowers (generally corresponding to borrowers in category 14 in our ratings), which are not legally bankrupt, but borrowers who are considered to be virtually bankrupt because they are in serious financial difficulty and have no prospects for an improvement in their business operations, and

Bankrupt borrowers or de facto bankrupt borrowers (generally corresponding to borrowers in category 15 in our ratings), which are borrowers who are legally bankrupt (i.e., who have no prospects for continued business operations because of non-payment, suspension of business, voluntary liquidation, or filing for legal liquidation) proceedings.

The primary data utilized in our assessment of borrowers include the borrower's financial statements and notes thereto as well as other public disclosure made by the borrower. In addition, when appropriate and possible, we obtain non-public financial and operating information from borrowers, such as the borrower's business plan, borrower's self-evaluation of its operating assets and other borrower information about its business and products.

Based on the borrower and industry information, we assign borrower ratings mainly by applying financial scoring models either developed internally or by third party vendors, depending on the borrower's attributes, whether the borrower is domestic or foreign, whether the borrower is a large corporation or a small and medium-sized corporation, and whether the borrower is a corporate entity or another type of legal entity (such as a school, hospital or fund).

For example, for domestic small and medium-sized corporations, which constitute the largest borrower attribute in our current loan portfolio in terms of number of borrowers, we have adopted an internally developed financial scoring model, exclusively designed and developed for such attribute. We have selected various financial ratios that we believe to be useful and meaningful to quantitatively measure and assess the borrowers' financial standing and repayment capability. Such financial ratios represent, among other things, borrowers' growth, profitability, stability, cash flow, company size and capital efficiency. The model is periodically tested against historical results. The following is an illustration of some of the financial ratios we utilize as part of our financial scoring model:

To measure growth: Sales growth, and growth in total assets,

To measure profitability: Current profit to sales, and profit before tax to sales, and

To measure stability: Equity ratio and current ratio.

The financial score obtained through the models is reviewed and, when necessary, adjusted downward to reflect our qualitative assessment of the borrower's financial strength and other factors that could affect the borrower's ability to service the debt. For example, we take into account: capability of turning around the business (in case of borrowers with losses) or recovering positive net worth (in case of borrowers with negative net worth), industry risk, management risk, legal risk, as well as our assessment of the probability of receiving support from parent companies (if the borrower is a subsidiary of a large listed company).

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

When adjusting the results of primary financial scoring assigned to borrowers with losses, we consider the severity of losses and the possibility of improving operating results. We analyze and assess whether the loss is temporary, the trend in operating results is improving, or the loss is expected to continue for an extended period. When adjusting the results of primary financial scoring assigned to borrowers with losses or borrowers with negative net worth, we also analyze whether the borrower can return to a positive net worth, and the time period needed to achieve such recovery (one to two years, three to five years, or five years or more).

Table of Contents

In addition, adjustments based on industry risk are based on future prospects, applicable laws and regulations, and other factors surrounding the industry. Adjustments for management risk reflect our assessment of management's track record, the composition of the management team including the board of directors, any management succession plan as well as the risk management and compliance framework of the borrower. Adjustments for legal risk are made when the borrower is facing a lawsuit and when there is a possibility of a significant claim payment related to product liability, intellectual property, environmental problems, building standard law, and other legal issues.

When assessing the probability of receiving support from parent companies, various factors are examined, such as the parent company's credit standings, whether key management personnel are sent by the parent, whether the borrower is consolidated by the parent, and the proportion of the borrower in consolidated sales and profits of the parent.

In addition, we consider outside ratings, and our internal borrower ratings may be adjusted when deemed appropriate.

Facility risk rating

Facility risk rating is used to evaluate and classify the quality of individual credit facilities, including guarantees and collateral. Ratings are assigned by quantitatively measuring the estimated loss rate of a facility in the event of a default.

Structured finance rating and asset securitization rating

Structured finance rating and asset securitization rating are used to evaluate and classify the quality of individual credit facilities, including guarantees and collateral, and focus on the structure, including the applicable credit period, of each credit facility. In evaluating the debt service potential of a credit facility, we scrutinize its underlying structure to determine the likelihood of the planned future cash flows being achieved.

Pool assignment

Each major banking subsidiary has its own system for pooling and rating small retail loans designed to reflect the risk profile of its loan portfolios.

Asset evaluation and assessment system

The asset evaluation and assessment system is used to classify assets held by us according to the probability of collection and the risk of any impairment in value based on borrower classifications consistent with the borrower ratings and the status of collateral, guarantees, and other factors.

The system is used to conduct write-offs and allocate allowances against credit risk in a timely and adequate manner.

Quantitative Analysis of Credit Risk

MUFG and its major banking subsidiaries manage credit risk by monitoring credit amount and expected losses, and run simulations based on internal models to estimate the maximum amount of credit risk. These models are used for internal management purposes, including loan pricing and measuring economic capital.

When quantifying credit risk amounts using the internal models, MUFG and its major banking subsidiaries consider various parameters, including probability of default, loss given default, and exposure at default used in their borrower ratings, facility risk ratings and pool assignments as well as any credit concentration risk in particular borrower groups or industry sectors. MUFG and its major banking subsidiaries also share credit portfolio data in appropriate cases.

Table of Contents

Loan Portfolio Management

We aim to achieve and maintain levels of earnings commensurate with credit risk exposure. Products are priced to take into account expected losses, based on the internal credit ratings.

We assess and monitor loan amounts and credit exposure by credit rating, industry and region. Portfolios are managed to limit concentrations of risk in specific categories in accordance with our Large Credit Guidelines.

To manage country risk, we have established specific credit ceilings by country. These ceilings are reviewed when there is a material change in a country's credit standing, in addition to being subject to a regular periodic review.

Continuous CPM Improvement

With the prevalence of securitized products and credit derivatives in global markets, we seek to supplement conventional CPM techniques with advanced methods based on the use of such market-based instruments.

Through credit risk quantification and portfolio management, we aim to improve the risk return profile of the Group's credit portfolio, using financial markets to rebalance credit portfolios in a dynamic and active manner based on an accurate assessment of credit risk. The following diagram summarizes our CPM framework:

Credit Portfolio Management (CPM) Framework

Risk Management of Strategic Equity Portfolio

Strategic equity investment risk is the risk of loss caused by a decline in the prices of our equity investments.

We hold shares of various corporate clients for strategic purposes, in particular to maintain long-term relationships with these clients. These investments have the potential to increase business revenue and appreciate in value. At the same time, we are exposed to the risk of price fluctuation in the Japanese stock market. For that reason, in recent years, it has been a high priority for us to reduce our equity portfolio to limit the risks associated with holding a large equity portfolio, but also to respond to applicable regulatory requirements as well as increasing market expectations and demands for us to reduce our equity portfolio. We are required to comply with a regulatory framework that prohibits Japanese

banks from holding an amount of shares in excess of their adjusted Tier 1 capital.

Table of Contents

We use quantitative analysis to manage the risks associated with the portfolio of equities held for strategic purposes. According to internal calculations, the market value of our strategically held (Tokyo Stock Exchange-listed) stocks (excluding foreign stock exchange-listed stocks) as of March 31, 2016 was subject to a variation of approximately ¥3.65 billion when TOPIX index moves one point in either direction.

We seek to manage and reduce strategic equity portfolio risk based on quantitative analysis such as the sensitivity analysis described above. The aim is to keep this risk at appropriate levels compared with Tier 1 capital while generating returns commensurate with the degree of risk exposure.

Market Risk Management

Market risk is the risk that the value of our assets and liabilities could be adversely affected by changes in market variables such as interest rates, securities prices, or foreign exchange rates.

Management of market risk at MUFG aims to control related risk exposure across the Group while ensuring that earnings are commensurate with levels of risk.

Market Risk Management System

We have adopted an integrated system to manage market risk from our trading and non-trading activities. The holding company monitors group-wide market risk, while each of the major subsidiaries manages its market risks on a consolidated and global basis.

At each of the major subsidiaries, checks and balances are maintained through a system in which back and middle offices operate independently from front offices. In addition, separate Asset-Liability Management, or ALM, Committee, ALM Council and Risk Management Meetings are held at each of the major subsidiaries every month to deliberate important matters related to market risk and control.

The holding company and the major subsidiaries allocate economic capital commensurate with levels of market risk and determined within the scope of their capital bases. The major subsidiaries have established quantitative limits relating to market risk based on their allocated economic capital. In addition, in order to keep losses within predetermined limits, the major subsidiaries have also set limits for the maximum amount of losses arising from market activities. The following diagram summarizes the market risk management system of each major subsidiary:

Market Risk Management System of Our Major Subsidiaries

Table of Contents***Market Risk Management and Control***

At the holding company and the major subsidiaries, market risk exposure is reported to the Chief Risk Management Officers on a daily basis. At the holding company, the Chief Risk Management Officer monitors market risk exposure across the Group as well as the major subsidiaries control over their quantitative limits for market risk and losses. Meanwhile, the Chief Risk Management Officers at the major subsidiaries monitor their own market risk exposure and their control over their quantitative limits for market risk and losses. In addition, various analyses on risk profiles, including stress testing, are conducted and reported to the Executive Committees and the Corporate Risk Management Committees on a regular basis. At the business unit levels in the major subsidiaries, the market risks on their marketable assets and liabilities, such as interest rate risk and foreign exchange rate risk, are controlled by entering into various hedging transactions using marketable securities and derivatives.

As part of our market risk management activities, we use certain derivative financial instruments to manage our interest rate and currency exposures. We maintain an overall interest rate risk management strategy that incorporates the use of interest rate contracts to minimize significant unplanned fluctuations in earnings that are caused by interest rate volatility. We enter into interest rate swaps and other contracts as part of our interest rate risk management strategy primarily to alter the interest rate sensitivity of our loans, investment securities and deposit liabilities. Our principal objectives in risk management include asset and liability management. Asset and liability management is viewed as one of the methods for us to manage our interest rate exposures on interest-earning assets and interest-bearing liabilities. Interest rate contracts, which are generally non-leveraged generic interest rate and basis swaps, options and futures, allow us to effectively manage our interest rate risk position. Option contracts primarily consist of caps, floors, swaptions and options on index futures. Futures contracts used for asset and liability management activities are primarily index futures providing for cash payments based upon the movement of an underlying rate index. We enter into forward exchange contracts, currency swaps and other contracts in response to currency exposures resulting from on-balance sheet assets and liabilities denominated in foreign currencies in order to limit the net foreign exchange position by currency to an appropriate level.

These market risk management activities are performed in accordance with the predetermined rules and procedures. The internal auditors regularly verify the appropriateness of the management controls over these activities and the risk evaluation models adopted.

Market Risk Measurement Model

Market risks consist of general risks and specific risks. General market risks result from changes in entire markets, while specific risks relate to changes in the prices of individual stocks and bonds which are independent of the overall direction of the market.

To measure market risks, MUFG uses the VaR method which estimates changes in the market value of portfolios within a certain period by statistically analyzing past market data. Since the daily variation in market risk is significantly greater than that in other types of risk, MUFG measures and manages market risk using VaR on a daily basis.

Market risk for trading and non-trading activities is measured using a uniform market risk measurement model. The principal model used for these activities is a historical simulation, or HS, model (holding period, 10 business days; confidence interval, 99%; and observation period, 701 business days). The HS model calculates VaR amounts by estimating the profit and loss on the current portfolio by applying actual fluctuations in market rates and prices over a fixed period in the past. This method is designed to capture certain statistically infrequent movements, such as a fat tail, and accounts for the characteristics of financial instruments with non-linear behavior. The holding company and banking subsidiaries also use the HS model to calculate as part of the calculation of their Basel III regulatory capital adequacy ratios.

In calculating VaR using the HS method, we have implemented an integrated market risk measurement system throughout the Group. Our major subsidiaries calculate their VaR based on the risk and market data

Table of Contents

prepared by the information systems of their front offices and other departments. The major subsidiaries provide this risk data to the holding company, which calculates overall VaR, taking into account the diversification effect among all portfolios of the major subsidiaries.

For the purpose of internally evaluating capital adequacy on an economic capital basis in terms of market risk, we use this market risk measurement model to calculate risk amounts based on a holding period of one year and a confidence interval of 99.9%.

Monitoring and managing our sensitivity to interest rate fluctuations is the key to managing market risk in MUFG's non-trading activities. The major banking subsidiaries take the following approach to measuring risks concerning core deposits, loan prepayments and early deposit withdrawals.

To measure interest rate risk relating to deposits without contract-based fixed maturities, the amount of core deposits is calculated through a statistical analysis based on deposit balance trend data and the outlook for interest rates on deposits, business decisions, and other factors. The amount of core deposit is categorized into various groups of maturity terms of up to ten years to recognize interest rate risk. The calculation assumptions and methods to determine the amount of core deposits and maturity term categorization are regularly reviewed.

Meanwhile, deposits and loans with contract-based maturities are sometimes cancelled or repaid before their maturity dates. To measure interest rate risk for these deposits and loans, we reflect these early termination events mainly by applying early termination rates calculated based on a statistical analysis of historical repayment and cancellation data together with historical market interest rate data.

Summaries of Market Risks (Fiscal Year Ended March 31, 2016)

Trading activities

The aggregate VaR for our total trading activities as of March 31, 2016 was ¥21.17 billion, comprising interest rate risk exposure of ¥22.93 billion, foreign exchange risk exposure of ¥13.37 billion, and equity-related risk exposure of ¥1.74 billion. Compared with the VaR as of March 31, 2015, we experienced an increase in market risk during the fiscal year ended March 31, 2016, primarily due to an increase in foreign exchange risk and interest rate risk.

Our average daily VaR for the fiscal year ended March 31, 2016 was ¥15.76 billion. Based on a simple sum of figures across market risk categories, interest rate risk accounted for approximately 65%, foreign exchange risk for approximately 25% and equity-related risk for approximately 8%, of our total trading activity market risks.

Due to the nature of trading operations which involves frequent changes in trading positions, market risk varied substantially during the fiscal year, depending on our trading positions.

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

The following tables set forth the VaR related to our trading activities by risk category for the periods indicated:

April 1, 2014	March 31, 2015	Average	Maximum ⁽¹⁾	Minimum ⁽¹⁾	March 31, 2015
		(in billions)			
MUFG		¥ 20.51	¥ 25.01	¥ 16.02	¥ 21.86
Interest rate		18.25	23.79	14.74	17.63
Yen		7.65	12.95	4.87	9.50
U.S. Dollars		6.39	10.56	4.33	7.41
Foreign exchange		4.91	10.78	1.88	8.80
Equities		2.23	3.75	0.89	0.99
Commodities		0.26	1.27	0.00	0.05
Less diversification effect		(5.14)			(5.61)

Table of Contents

April 1, 2015	March 31, 2016	Average	Maximum ⁽¹⁾	Minimum ⁽¹⁾	March 31, 2016
		(in billions)			
MUFG		¥ 15.76	¥ 25.02	¥ 9.70	¥ 21.17
Interest rate		15.43	26.22	9.62	22.93
Yen		10.01	22.17	5.30	18.24
U.S. Dollars		6.24	15.67	2.96	10.04
Foreign exchange		5.91	15.30	2.71	13.37
Equities		2.05	18.30	0.49	1.74
Commodities		0.04	0.19	0.00	0.00
Less diversification effect		(7.67)			(16.87)

Assumptions for VaR calculations:

Historical simulation method

Holding period: 10 business days

Confidence interval: 99%

Observation period: 701 business days

Note:

(1) The maximum and minimum VaR overall and for various risk categories were taken from different days. A simple summation of VaR by risk category is not equal to total VaR due to the effect of diversification.

The average daily VaR by quarter in the fiscal year ended March 31, 2016 was as follows:

Quarter	Daily average VaR (in billions)
April June 2015	¥ 17.45
July September 2015	14.10
October December 2015	14.12
January March 2016	17.46

The quantitative market risk figures from trading activities tend to fluctuate widely due to the market sensitive nature of the trading business. During the fiscal year ended March 31, 2016, the revenue from our trading activities has been relatively stable, keeping positive numbers in 241 days out of 261 trading days in the period. During the same period, there were 119 days with positive revenue exceeding ¥1 billion and 3 days with negative revenue exceeding minus ¥1 billion.

Non-trading Activities

The aggregate VaR for our total non-trading activities as of March 31, 2016, excluding market risks related to our strategic equity portfolio and measured using the same standards as trading activities, was ¥539.0 billion. Market risk related to interest rates equaled ¥498.4 billion and equities-related risk equaled ¥218.9 billion. Compared with the VaR as of March 31, 2015, we experienced an increase in market risk during the fiscal year ended March 31, 2016, primarily due to an increase in interest rate risk.

Based on a simple sum of figures across market risk categories, interest rate risks accounted for approximately 66% of our total non-trading activity market risks. Looking at a breakdown of interest rate related risk by currency, as of March 31, 2016, the yen accounted for approximately 46% while the U.S. dollar accounted for approximately 38%, and the euro approximately 16%.

Table of Contents

The following table shows the VaR related to our non-trading activities by risk category for the fiscal year ended March 31, 2016:

April 1, 2015	March 31, 2016	Average	Maximum ⁽¹⁾	Minimum ⁽¹⁾	March 31, 2016
		(in billions)			
Interest rate		¥ 398.4	¥ 588.6	¥ 264.6	¥ 498.4
Yen		269.7	335.8	120.5	323.0
U.S. Dollars		188.9	267.8	102.1	267.7
Foreign exchange		1.4	1.9	1.1	1.2
Equities ⁽²⁾		194.8	223.4	155.2	218.9
Less diversification effect		(168.5)			(179.5)
Total		426.2	610.8	278.0	539.0

Assumptions for VaR calculations:

Historical simulation method

Holding period: 10 business days

Confidence interval: 99%

Observation period: 701 business days

Notes:

- (1) The maximum and minimum VaR overall for each category and in total were taken from different days. A simple summation of VaR by risk category is not equal to total VaR due to the effect of diversification.
- (2) The equities-related risk figures do not include market risk exposure from our strategic equity portfolio.

The average daily interest rate VaR by quarter in the fiscal year ended March 31, 2016 was as follows.

Quarter	Daily average VaR (in billions)
April June 2015	¥ 423.9
July September 2015	382.1
October December 2015	435.7
January March 2016	464.3

Comparing the proportion of each currency's interest rate VaR to the total interest rate VaR as of March 31, 2016 against that as of March 31, 2015, there was a three percentage point decrease in the Japanese yen from 49% to 46%, a 14 percentage point increase in the U.S. dollar from 24% to 38%, and a 11 percentage point decrease in the euro from 27% to 16%.

Backtesting

We conduct backtesting in which a VaR is compared with hypothetical profits and losses on a daily basis to verify the accuracy of our VaR measurement model. We also conduct additional backtesting using other methods, including testing VaR against actual realized and unrealized losses and testing VaR by various changing parameters such as confidence intervals and observation periods used in the model.

Hypothetical losses never exceeded VaR in the fiscal year ended March 31, 2016. This means that our VaR model provided reasonably accurate measurements of market risk during the fiscal year.

Table of Contents

The following graph shows daily VaR of trading activities and the distribution of corresponding hypothetical profits and losses for the fiscal year ended March 31, 2016:

The following graph shows VaR of trading activities and hypothetical profits and losses on a daily basis for the fiscal year ended March 31, 2016:

Stress Testing

We use the HS-VaR model, which calculates potential changes in the market value of our portfolio as a statistically possible amount of losses that could be incurred due to market fluctuations within a certain period (or holding period, of 10 business days) based on historical market volatility for a certain period (or observation period, of 701 business days, or approximately three years). Actual losses may exceed the value at risk obtained by the application of the model in the event, for example, that the market fluctuates to a degree not accounted for in the observation period, or that the correlations among various risk factors, including interest rates and foreign currency exchange rates, deviate from those assumed in the model.

In order to complement these weaknesses of the HS-VaR model and measure potential losses that the model is not designed to capture, we conduct stress testing. For example, we measure on a quarterly basis potential losses that could be incurred in our portfolio by applying various stress scenarios, including the 10-year most

Table of Contents

extreme movement in each of the risk factors as well as actual past market movement observed beyond the 10 year historical observation period. In addition, the holding company and major subsidiaries conduct stress testing, as appropriate, by applying various stress scenarios, including those which take into account estimates regarding future market volatility, in order to better identify risks and manage our portfolio in a more stable and appropriate manner. Since October 2011, the holding company and major subsidiaries have also been measuring stressed VaR relating to their trading activities based on a one-year observation period with the highest VaR at least in the immediately preceding ten years.

Liquidity Risk Management

Liquidity risk is the risk of incurring losses if a poor financial position hampers the ability to meet funding requirements, or necessitates fund procurement at interest rates markedly higher than normal.

Our major subsidiaries maintain appropriate liquidity in both Japanese yen and foreign currencies by managing their funding sources and mechanisms, such as liquidity gap, liquidity-supplying products such as commitment lines, and buffer assets.

We have established a group-wide system for managing liquidity risk by categorizing the risk in the following three stages: normal, concern and crisis. The front offices and risk management offices of the major subsidiaries and the holding company exchange information and data on liquidity risk even at the normal stage. At higher alert stages, we centralize information about liquidity risk and discuss issues relating to group-wide liquidity control actions among group companies, if necessary. We have also established a system for liaison and consultation on funding in preparation for contingency, such as natural disasters, wars and terrorist attacks. The holding company and the major subsidiaries conduct group-wide contingency preparedness drills on a regular basis to ensure smooth implementation in the event of an emergency.

In addition, we have established a group-wide system for ensuring compliance with the minimum regulatory liquidity coverage ratio requirements by categorizing the risk in the following three stages: sufficient, concern and insufficient. The holding company and the major subsidiaries exchange information and data on LCR even at the sufficient stage. At higher alert stages, we hold group-wide LCR liaison meetings to discuss issues relating to LCR and, based on the discussion as well as the information and data that have been shared, take countermeasures to improve LCR as necessary.

For more information, see [Item 5.B. Operating and Financial Review and Prospects](#) [Liquidity and Capital Resources](#) [Financial Condition](#) [Sources of Funding and Liquidity](#).

Operational Risk Management

Operational risk refers to the risk of loss caused by either internal control issues such as inadequate operational processes or misconduct, system failures, or external factors such as serious political instability, major terrorist activity, health epidemics or natural disasters. The term includes a broad range of risks that could lead to losses, including operations risk, information asset risk, tangible asset risk, personnel risk, legal risk and reputation risk. These risks that comprise operational risk are referred to as sub-category risks.

The holding company has established, based on its Executive Committee's determination, the MUFG Operational Risk Management Policy as a group-wide policy for managing operational risk. This policy sets forth the core principles regarding operational risk management, including the definition of operational risk, and the risk management system and processes. The policy also requires the board of directors and the Executive Committee to formulate fundamental principles of operational risk management and establish and maintain an appropriate risk management system. The Chief Risk Management Officer is responsible for recognizing, evaluating, and appropriately managing operational risk in accordance with the fundamental principles formulated by the board of directors and the Executive Committee. A division in charge of operational risk management has been established that is independent of business promotion sections to manage overall operational risk in a comprehensive manner.

Table of Contents

These fundamental principles have also been approved by the boards of directors of the major subsidiaries, providing a consistent framework for operational risk management of the Group. The diagram below sets forth the operational risk management system of each major banking subsidiary:

Operational Risk Management System of Our Major Banking Subsidiaries

As set forth in the following diagram, we have established a risk management framework for loss data collection, control self assessment, and measurement of operational risk in order to appropriately identify, recognize, evaluate, measure, control, monitor and report operational risk.

We have also established group-wide reporting guidelines with respect to loss data collection and its monitoring. We focus our efforts on ensuring accurate assessment of the status of operational risk losses and the implementation of appropriate countermeasures, while maintaining databases of internal and external loss events.

The following diagram summarizes our operational risk management framework:

Operational Risk Management Framework

Table of Contents

Operations Risk Management

Operations risk refers to the risk of loss that is attributable to the actions of executives or employees, whether accidental or the result of neglect or deliberate misconduct. The Group companies offer a wide range of financial services, ranging from commercial banking products such as deposits, exchange services and loans to trust and related services covering pensions, securities, real estate and securitization, as well as transfer agent services. Cognizant of the potentially significant impact that operations risk-related events could have in terms of both economic losses and damage to our reputation, our banking subsidiaries continue to improve their management systems to create and apply appropriate operations risk-related controls.

Specific ongoing measures to reduce operations risk include the development of databases to manage, analyze and prevent the recurrence of related loss events; efforts to tighten controls over administrative procedures and related operating authority, while striving to improve human resources management; investments in systems to improve the efficiency of administrative operations; and programs to expand and upgrade internal auditing and operational guidance systems.

Senior management receives regular reports on the status of our businesses from an operations risk management perspective. We work to promote the sharing within the Group of information and expertise concerning any operational incidents and the measures implemented to prevent any recurrence.

Efforts to upgrade the management of operations risk continue with the aim of providing our customers with a variety of high-quality services.

Information Asset Risk Management

Information asset risk refers to the risk of loss caused by loss, alteration, falsification or leakage of information, or by destruction, disruption, errors or misuse of information systems, as well as risks similar to this risk. In order to ensure proper handling of information and prevent loss or leakage of information, our major banking subsidiaries strive to better manage and reduce such risks through the appointment of managers with specific responsibilities for information security issues, the establishment of internal procedures, training courses designed for all staff, and the implementation of measures to ensure stable IT systems control. We have also formulated the Personal Information Protection Policy as the basis for ongoing programs to protect the confidentiality of personal information.

Systems planning, development and operations include appropriate design and extensive testing phases to ensure that systems are designed to help prevent failures while providing sufficient safeguards for the security of personal information. The status of the development of any mission-critical IT systems is reported regularly to senior management. We have developed disaster countermeasures systems and have also been investing in duplication of the Group's IT infrastructure to minimize damage in the event of any system failure. Emergency drills are conducted to help increase staff preparedness.

With the aim of preventing any recurrence, we also work to promote sharing of information within the Group related to the causes of any loss or leakage of information, or system failure.

Tangible Asset Risk Management

Tangible asset risk refers to the risk of loss due to damage to tangible assets or deterioration in the operational environment caused by disasters or inadequate asset maintenance, as well as risks similar to this risk. Tangible assets include movable physical properties and immovable properties, owned or leased, such as land, buildings, equipment attached to buildings, fixtures and furniture. We recognize the potentially significant impact tangible asset risk-related events can have on the management and execution of the Group's businesses, which in turn can result in economic losses to, or diminished market confidence in, the Group. Accordingly, we continue to improve our risk control framework designed to appropriately manage such risk.

Table of Contents

Personnel Risk Management

Personnel risk refers to the risk of loss due to an outflow or loss of human resources or deterioration in employee morale, as well as risks similar to this risk. We recognize the potentially significant impact personnel risk-related events can have on the management and execution of the Group's businesses, which in turn can result in economic losses to, or diminished market confidence in, the Group. Accordingly, we continue to improve our risk control framework designed to appropriately manage such risk.

Legal Risk Management

Legal risk refers to the risk of loss due to failure to comply with applicable laws and regulations, adequately evaluate contractual rights and obligations, or appropriately deal with disputes, as well as other similar risks. We recognize the potentially significant impact legal risk-related events can have on the management and execution of the Group's businesses, which in turn can result in economic, reputation and other losses to, or diminished market confidence in, the Group. Accordingly, we continue to improve our risk control framework designed to appropriately manage such risk.

Specifically, in order to promote compliance, we have established our Principles of Ethics and Conduct as the basic legal compliance policy for the Group's directors and employees. In addition, a compliance management division has been established at each of the holding company and the major subsidiaries. See [Compliance](#) below. Moreover, the legal division at each of the holding company and the major subsidiaries centrally and uniformly evaluates legal issues prior to entering into contracts, deals with disputes and manages other legal matters. Through these and other measures, we endeavor to effectively manage our legal risk.

Reputation Risk Management

Reputation risk refers to the risk of loss due to deterioration in reputation as a consequence of the spread of rumors among customers or in the market, or as a consequence of our inadequate response to particular situations, as well as risks similar to this risk. We recognize the potentially significant impact reputation risk-related events can have on the management and execution of the Group's businesses, which in turn can result in economic losses to, or diminished market confidence in, the Group. Accordingly, we continue to improve our risk control framework designed to appropriately manage such risk.

Specifically, in order to manage our reputation risk effectively on a group-wide basis, we have established a risk management system designed to ensure mutual consultation and reporting if a reputation risk-related event occurs or is anticipated and, through this system, share relevant information within the Group.

Through the risk control framework and risk management system, we seek to minimize damage to the reputation and credibility of, and the market confidence in, the Group by promptly obtaining an accurate understanding of relevant facts relating to reputation risk-related events and disclosing information concerning the events and the measures we take in response to such events in an appropriate and timely manner.

Regulatory Capital Requirements for Operational Risk

(1) Adoption of the Advanced Measurement Approach (AMA)

We have employed the AMA since March 31, 2012, in place of the Standardized Approach that we had been using previously, for calculation of the operational risk equivalent amount in connection with measuring capital adequacy ratios based on the Basel Standards. On the other hand, we use the Basic Indicator Approach, or BIA, for entities that are deemed to be less important in the calculation of the operational risk equivalent amount and for entities that are still preparing to implement the AMA.

Table of Contents**(2) Outline of AMA**

We have established a measurement model designed to account for four data elements—internal loss data, external loss data, scenario analysis, and business environment and internal control factors, or BEICFs—and calculate the operational risk equivalent amount by estimating the maximum loss using a 99.9th percentile one-tailed confidence interval and a one-year holding period.

In calculating the operational risk equivalent amount, we exclude expected losses relating to the amount of allowance for repayment of excess interest associated with the consumer finance business of a subsidiary. We do not exclude any other expected losses and do not reflect the risk mitigating impact of insurance. In addition, we take into account credit risk-related events that are not reflected in the measurement of the credit risk equivalent amount.

(3) Outline of Measurement Model

Our operational risk equivalent amount measured under the AMA is a simple sum of the amounts calculated separately for (1) BTMU on a consolidated basis, (2) MUTB on a consolidated basis, and (3) the holding company and other principal consolidated subsidiaries, in accordance with applicable FSA rules. For each of BTMU and MUTB on consolidated basis, the operational risk equivalent amount is a simple sum of the amounts calculated based on the seven loss event types defined by the Basel Standards. For other Group companies, the operational risk equivalent amount is a simple sum of the amounts calculated based on eight loss event types consisting of the seven loss event types defined by the Basel Standards and an additional loss event type representing losses relating to repayment of excess interest associated with the consumer finance business of a subsidiary. We do not reflect the correlation effects among the loss event types in the calculation of our operational risk equivalent amount.

Outline of Measurement Model

The risk equivalent amount for each loss event type represents the amount of maximum loss estimated with a 99.9th percentile one-tailed confidence interval and a one-year holding period based on the distribution of losses arising from all relevant risk events for a one-year period (Loss Distribution). A Loss Distribution combines a Frequency Distribution (through which the frequency of occurrence of risk events is expressed) and a Loss Severity Distribution (through which the amounts of losses resulting from risk events are expressed) through Monte Carlo simulations. The data used for this purpose include internal loss data and scenario data. Scenario data are generated through a scenario analysis. External data and BEICFs are taken into account in the scenario analysis and reflected in scenario data. The Frequency Distribution is derived from the occurrence frequency information in internal loss data and scenario data expressed through a Poisson Distribution. The Loss Severity Distribution is derived from the amount information in internal loss data and scenario data expressed in a non-parametric manner (where no underlying distribution is assumed).

Table of Contents

With respect to the risk of losses relating to repayment of excess interest associated with the consumer finance business of a subsidiary, the risk equivalent amount represents the amount of maximum loss estimated with a 99.9th percentile one tailed confidence interval and a one-year holding period based on a normal distribution assumed by applying data on losses that arose in a given period, excluding any related expected losses.

We confirm the appropriateness of the measurement models by periodic verification and back testing.

(4) Outline of Scenario Analysis

As an initial step of our scenario analysis, we identify potential severe loss events that we have not experienced but may potentially experience in the future. In this identification process, we seek to ensure exhaustive coverage of potential severe loss events by comprehensively examining our experience relating to loss events and legal proceedings, external loss data, the control self-assessment results and other relevant information.

In the next step, we prepare scenario data for each identified severe loss event by quantifying the values depending on its occurrence frequency and loss severity, taking into account relevant transaction amounts and restructuring costs as well as BEICFs. In preparing scenario data, we apply an analysis method we deem appropriate for the type and nature of the operational risk involved.

In order to obtain an operational risk equivalent amount that is commensurate with, and appropriate for, our risk profile, we assess the need for an additional scenario or modification to our existing scenarios semi-annually.

We then reflect, as necessary, new risks arising as a result of changes in the business environment and the results of the implementation of measures to enhance our internal controls in response to newly identified risks in our scenario data.

Compliance

Basic Policy

We have clarified our mission, our vision and our values in the Corporate Vision and have expressed our commitment to meeting the expectations of customers and society as a whole. Furthermore, we have established Principles of Ethics and Conduct as the guidelines for how the Group's directors and employees act to realize the Corporate Vision, in which we have expressed our commitment to complying with laws and regulations, to acting with honesty and integrity, and to behaving in a manner that supports and strengthens the trust and confidence of society.

In addition, as we expand the geographic scope of our business globally, we are committed to keeping abreast with developments in laws and regulations of the jurisdictions in which we operate including anti-money laundering and anti-bribery, as well as paying attention to trends in

financial crimes.

See Item 3.D. Key Information Risk Factors Risks Related to Our Business Legal and regulatory changes could have a negative impact on our business, financial condition and results of operations. and Item 3.D. Key Information Risk Factors Risks Related to Our Business We may become subject to regulatory actions or other legal proceedings relating to our transactions or other aspects of our operations, which could result in significant financial losses, restrictions on our operations and damage to our reputation. See also Item 4.B. Information on the Company Business Overview Supervision and Regulation.

Table of Contents

Principles of Ethics and Conduct

Introduction

These Principles of Ethics and Conduct establish clear and consistent standards for all MUFG employees to guide decisions and actions. They reflect and support the MUFG Corporate Vision. The principles are organized in three sections. Chapter 1 presents the attitude that we adopt with our customers, to act with honesty and integrity and pursue their best interests, which is a core component of our business practices. Chapter 2 presents a set of standards to help us fulfill our responsibilities as a good corporate citizen. MUFG's reputation depends upon the trust and confidence of our customers and other stakeholders, including local communities, and we are responsible to society on a global level. Chapter 3 describes the actions and mindset that will create a stimulating and supportive working environment as MUFG continues to grow. Our success depends on building and maintaining a dynamic workplace where all employees can reach their full potential in ways that support our customers and contribute to society as a whole.

Outline / Overview

Chapter 1 Customer Focus

We place our diverse customers at the center of all our activities and always act in their best interests. MUFG is able to thrive today because of the trust and confidence that customers have placed in us—the result of years of fair, transparent, and honorable dealings. Our business culture is not driven by the prospect of short-term, immediate gains. Instead, we place a premium on supporting long-term, sustainable relationships with our customers to help them meet their goals.

1-1. Acting with Honesty and Integrity

We always place our diverse customers at the center of all activities and act with honesty and integrity in all of our dealings with them. We protect customer assets, including their personal information, and strive at all times not to damage their interests.

1-2. Controlling Quality

In order to earn the lasting trust and confidence of our customers, we maintain thorough quality control of our products and services in all aspects from product design and development to delivery, and continually improve our processes to provide accurate and secure transactions.

1-3. Exceeding Customer Expectations

We strive to satisfy the diverse needs of our customers worldwide and to exceed their expectations through the highest standards of professionalism and by effectively leveraging our global network and consolidated strength.

Chapter 2 Responsibility as a Corporate Citizen

As a member of MUFG with global operations, we act honorably, with honesty and integrity, and comply at all times with laws, regulations, rules, and internal policies globally. We strive to maintain stability and confidence in the global financial system and to contribute to the sound growth and development of society. We behave in a manner that supports and strengthens the trust and confidence that MUFG has built up over the years.

2-1. Adherence to Laws and Regulations

We always judge and act with honesty and integrity, do what is right, and comply with both the letter and the spirit of the laws, regulations, and rules that apply to us. We avoid insider trading, do not engage in anti-competitive conduct or any form of corrupt activity, and publicly disclose corporate information in an appropriate manner.

Table of Contents

2-2. Combating Criminal Activity

We do not conduct business with criminal elements. We do not allow our financial products and services to be used for illegal or improper activities such as money laundering, fraud, or financing terrorist activities.

2-3. Commitment to Social Sustainability

We respect the history, culture, and customs of local communities and strive to contribute to their development and the protection of the environment through our corporate activities and employee volunteer efforts.

Chapter 3 Ethical and Dynamic Workplace

We are committed to creating a working environment that fosters mutual respect among MUFG employees, supports the full expression of our individuality as professionals, promotes the power of teamwork, honors diversity, transcends differences, and embraces new challenges.

3-1. Stimulating Workplace

We strive to enhance our knowledge and expertise, focus on maximizing the value of teamwork, and view changes in the business environment as opportunities to launch new initiatives.

3-2. Ethical Workplace

We respect the diversity and human rights of all MUFG employees. We do not engage in or tolerate discrimination, harassment, intimidation, or any other behavior or activity that is inconsistent with these core beliefs. We report any violations of laws and rules, and we manage corporate assets appropriately.

Compliance Framework

Management and coordination of compliance-related matters are the responsibility of separate compliance management divisions established at the holding company and the major subsidiaries. Each compliance management division formulates compliance programs and organizes training courses to promote compliance, and regularly reports to each company's board of directors and Executive Committee on the status of compliance activities.

The holding company has established a Group Compliance Committee and each major subsidiary has established a Compliance Committee for deliberating key issues related to compliance. Additionally, the holding company has a Group Chief Compliance Officer, or CCO, Committee, which consists of the CCO of the holding company acting as committee chairman and the CCOs of the major subsidiaries. The Group CCO Committee deliberates important matters related to compliance and compliance-related issues for which the Group should share a common understanding.

Table of Contents

The following diagram summarizes our compliance framework:

Compliance Framework

Internal Reporting System and Accounting Auditing Hotline

The major subsidiaries have established internal reporting systems that aim to identify compliance issues early so that any problems can be quickly rectified. This system includes an independent external compliance hotline. Furthermore, the holding company has set up an MUFG Group Compliance Helpline that acts in parallel with group-company internal reporting systems and provides a reporting channel for directors and employees of group companies. In the holding company, the contents of the reported cases as well as the result of surveys is reported to the audit committee on a regular basis or whenever necessary.

In addition to these internal reporting systems, the holding company has also established an accounting auditing hotline that provides a means to report any problems related to MUFG accounting.

MUFG Accounting Auditing Hotline

MUFG has set up an accounting auditing hotline to be used to make reports related to instances of improper practices (violations of laws and regulations) and inappropriate practices, or of practices raising questions about such impropriety or inappropriateness, regarding accounting and internal control or audits related to accounting in Group companies. The reporting process works as follows, and may be carried out via letter or e-mail:

Hokusei Law Office, P.C.

Address: Kojimachi 4-3-4, Chiyoda-ku, Tokyo

e-mail: MUFG-accounting-audit-hotline@hokusei-law.com

Table of Contents

When reporting information please pay attention to the following:

Matters subject to reporting are limited to instances regarding MUFG Group companies.

Please provide detailed information with respect to the matter. Without detailed factual information there is a limit to how much our investigations can achieve.

Anonymous information will be accepted.

No information regarding the identity of the informant will be passed on to third parties without the approval of the informant him- or herself. However, this excludes instances where disclosure is legally mandated, or to the extent that the information is necessary for surveys or reports, when data may be passed on following the removal of the informant's name.

Please submit reports in either Japanese or English.

If the informant wishes, we will endeavor to report back to the informant on the response taken within a reasonable period of time following the receipt of specific information, but cannot promise to do so in all instances.

Internal Audit

Role of Internal Audit

Internal audit functions within MUFG seek to verify the adequacy and effectiveness of internal control systems from a standpoint independent of the operating functions. This includes monitoring the status of risk management and compliance systems, which are critical to the maintenance of sound and appropriate business operations. Internal audit results are reported to senior management. An additional role of internal audit is to make suggestions to help improve or rectify any issues or specific problems that are identified.

Group Internal Audit Framework

The holding company has instituted MUFG's internal audit policy to define the policy, function and organizational position of internal audits. Separate internal audit divisions have been created within the holding company and certain subsidiaries. Through close cooperation and collaboration among the internal audit divisions of the holding company and these subsidiaries, these internal audit divisions provide coverage for the Group and also support the board of directors of the holding company in monitoring and overseeing all MUFG operations.

In addition to having primary responsibility for initiating and preparing plans and proposals related to internal audits of the Group, the internal audit division at the holding company monitors and, as necessary, guides, advises and administers the internal audit divisions of subsidiaries and affiliated companies. The internal audit divisions within the major subsidiaries conduct audits of the respective head office and branch

operations of these companies. In addition, each of these internal audit divisions undertakes direct audits of their respective subsidiaries, and monitors and oversees the separate internal audit functions established within them. This helps to evaluate and verify the adequacy and effectiveness of internal controls within MUFG on a consolidated basis.

Implementing Effective and Efficient Internal Audits

To ensure that internal audit processes use available resources with optimal effectiveness and efficiency, the internal audit divisions implement risk-focused internal audits in which the nature and magnitude of the associated risks are considered in determining audit priorities and the frequency and depth of internal audit activities. The internal audit divisions ensure that audit personnel attend key meetings, collect important internal control documents and access databases to facilitate efficient off-site monitoring.

Table of Contents

Reports to the Audit Committee

The holding company has an audit committee within its board of directors as required by the Companies Act of Japan, and each of the major subsidiaries has established an audit and supervisory committee or an internal audit and compliance committee. Within each of the holding company and the major subsidiaries, the internal audit division reports to the committee on important matters, including the results of the internal audits and basic policies for planning internal audits.

Item 12. Description of Securities Other than Equity Securities.

A. Debt Securities

Not applicable.

B. Warrants and Rights

Not applicable.

C. Other Securities

Not applicable.

Table of Contents**D. American Depositary Shares*****Fees, charges and other payments relating to ADSs***

As a holder of our ADSs, you will be required to pay to The Bank of New York Mellon, as depositary for the ADRs, or the Depositary, either directly or indirectly, the following fees or charges. The Depositary collects its fees for delivery and surrender of ADRs directly from investors depositing shares or surrendering ADRs for the purpose of withdrawal or from intermediaries acting for them. The Depositary collects fees for making distributions to investors by deducting those fees from the amounts distributed or by selling a portion of distributable property to pay the fees.

ADS holders must pay: \$5.00 (or less) per 100 ADSs (or portion thereof)	For: Each issuance of an ADR, including as a result of a distribution of shares or rights or other property
\$0.02 (or less) per ADS	Each cancellation of an ADR, including if the agreement terminates Any cash distribution, to the extent permitted by any securities exchange on which the ADSs may be listed for trading
A fee equivalent to the fee that would be payable if securities distributed to the ADS holder had been shares and the shares had been deposited for issuance of ADRs	Distribution of securities distributed to holders of deposited securities which are distributed by the Depositary to ADS registered holders
Registration or transfer fees	Transfer and registration of shares on the share register from your name to the name of The Bank of New York Mellon or its agent and vice versa when you deposit or withdraw shares
Expenses of The Bank of New York Mellon	Conversion of foreign currency to U.S. dollars, as well as cable, telex and facsimile transmission expenses
Taxes and other governmental charges The Bank of New York Mellon or BTMU, as custodian, have to pay on any ADS or share underlying an ADS, for example, stock transfer taxes, stamp duty or withholding taxes	As necessary

Fees Waived or Paid by the Depositary

The Depositary has agreed to waive the standard out-of-pocket administrative, maintenance and other expenses for providing services to the registered holders of our ADSs, which consisted of the expenses of postage and envelopes for mailing annual reports, printing and distributing dividend checks, stationery, postage, facsimile, and telephone calls. For the fiscal year ended March 31, 2016, the Depositary waived \$132,246.06 of standard out-of-pocket expenses.

The Depositary has also agreed to reimburse us for expenses related to the administration and maintenance of the ADS program, including investor relations expenses, the annual New York Stock Exchange listing fees and other program-related expenses. There is a limit on the amount of expenses for which the Depositary will reimburse us based on the number of outstanding ADSs. For the fiscal year ended March 31, 2016, the Depositary reimbursed us \$1.0 million for such expenses.

PART II

Item 13. Defaults, Dividend Arrearages and Delinquencies.

None.

Item 14. Material Modifications to the Rights of Security Holders and Use of Proceeds.

None.

Item 15. Controls and Procedures.

Disclosure Controls and Procedures

An evaluation was carried out under the supervision and with the participation of our management, including the Chief Executive Officer, or CEO, and the Chief Financial Officer, or CFO, of the effectiveness of our disclosure controls and procedures, as defined in Rule 13a-15(e) under the U.S. Securities Exchange Act of 1934, as of the end of the period covered by this Annual Report.

Based on that evaluation, our CEO and CFO concluded that our disclosure controls and procedures were effective as of March 31, 2016.

Management's Annual Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Rule 13a-15(f) under the U.S. Securities Exchange Act of 1934. Our internal control over financial reporting is a process designed by, or under the supervision of, MUFG's principal executive and principal financial officers, and effected by MUFG's board of directors, management, and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. GAAP and includes those policies and procedures that:

- (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of MUFG,
- (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of MUFG are being made only in accordance with authorizations of management and directors of MUFG, and

- (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of MUFG's assets that could have a material effect on the financial statements.

Because of inherent limitations, internal control over financial reporting, no matter how well designed, may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management evaluated the effectiveness of our internal control over financial reporting as of March 31, 2016 based on the criteria established in Internal Control Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on the evaluation, management has concluded that MUFG maintained effective internal control over financial reporting as of March 31, 2016.

The effectiveness of our internal control over financial reporting as of March 31, 2016 has been audited by Deloitte Touche Tohmatsu LLC, an independent registered public accounting firm, as stated in its report, presented on page 229.

Table of Contents

Changes in Internal Control Over Financial Reporting

During the period covered by this Annual Report, there has been no change in our internal control over financial reporting that has materially affected or is reasonably likely to materially affect our internal control over financial reporting.

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of

Mitsubishi UFJ Financial Group, Inc.

(Kabushiki Kaisha Mitsubishi UFJ Financial Group)

We have audited the internal control over financial reporting of Mitsubishi UFJ Financial Group, Inc. (Kabushiki Kaisha Mitsubishi UFJ Financial Group) (MUFG) and subsidiaries (together, the MUFG Group) as of March 31, 2016, based on the criteria established in *Internal Control Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The MUFG Group s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management s Annual Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the MUFG Group s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company s internal control over financial reporting is a process designed by, or under the supervision of, the company s principal executive and principal financial officers, or persons performing similar functions, and effected by the company s board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company s assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the MUFG Group maintained, in all material respects, effective internal control over financial reporting as of March 31, 2016, based on the criteria established in *Internal Control Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Table of Contents

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements as of and for the year ended March 31, 2016 of the MUFG Group and our report dated July 15, 2016 expressed an unqualified opinion on those consolidated financial statements.

/s/ Deloitte Touche Tohmatsu LLC

Tokyo, Japan

July 15, 2016

Table of Contents**Item 16A. Audit Committee Financial Expert.**

Our board of directors has determined that Mr. Akira Yamate, an outside director, is an audit committee financial expert as defined in Item 16A of Form 20-F and is independent as defined in the listing standards of the New York Stock Exchange. Mr. Yamate has spent most of his professional career as a certified public accountant in Japan, auditing Japanese corporations, including those registered with the U.S. Securities and Exchange Commission. Mr. Yamate is also the chair of our audit committee.

Item 16B. Code of Ethics.

We have adopted a code of ethics, which consists of internal rules named Principles of Ethics and Conduct, compliance rules, compliance manual and rules of employment. Each of these rules applies to our principal executive officer, principal financial officer, principal accounting officer and persons performing similar functions. Our internal compliance rules were most recently amended on May 16, 2016. The amendments were intended to reflect organizational changes relating to our corporate governance framework and enhancements in our compliance framework. A copy of the Principles of Ethics and Conduct and the sections of our compliance rules, compliance manual and rules of employment relating to the code of ethics (as defined in paragraph (b) of Item 16B of Form 20-F) is attached as Exhibit 11 to this Annual Report.

No waivers of the Principles of Ethics and Conduct or the ethical framework and code of conduct, as applicable, or the relevant sections of our compliance rules, compliance manual and rules of employment were granted to our principal executive officer, principal financial officer, principal accounting officer, directors or corporate auditors during the fiscal year ended March 31, 2016.

Item 16C. Principal Accountant Fees and Services.***Fees and Services of Deloitte Touche Tohmatsu LLC***

The aggregate fees billed by Deloitte Touche Tohmatsu LLC, our independent registered public accounting firm and its affiliates, for the fiscal years ended March 31, 2015 and 2016 are presented in the following table:

	2015	2016
	(in millions)	
Audit fees	¥ 6,753	¥ 7,143
Audit-related fees	537	549
Tax fees	304	477
All other fees	201	65
Total	¥ 7,795	¥ 8,234

The description of our fees billed for each category described above is as follows:

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

Audit fees Audit fees are primarily for annual audit of our financial statements, review of our semi-annual condensed financial statements, statutory audit of our financial statements and audits of our subsidiary financial statements and attestation services relating to the internal controls over financial reporting under Section 404 of the U.S. Sarbanes-Oxley Act of 2002.

Audit-related fees Audit-related fees primarily include accounting consultations, agreed upon procedures on internal controls, employee benefit plan audit, and advisory services relating to internal control reviews.

Tax fees Tax fees relate primarily to tax compliance, including assistance with preparation of tax return filings, tax advisory and tax planning services.

All other fees All other fees primarily include fees for risk management and compliance advisory services.

Table of Contents

Pre-Approval Policies and Procedures for Services by Deloitte Touche Tohmatsu LLC

Our audit committee performs the pre-approval function required by applicable SEC rules and regulations. Our audit committee has established pre-approval policies and procedures that MUFG and its subsidiaries must follow before engaging Deloitte Touche Tohmatsu LLC to perform audit and permitted non-audit services.

When MUFG or a subsidiary intends to engage Deloitte Touche Tohmatsu LLC to perform audit and permitted non-audit services, it must make an application for pre-approval on either a periodic or case-by-case basis.

Periodic application is an application for pre-approval made each fiscal year for services that are expected to be provided by Deloitte Touche Tohmatsu LLC during the next fiscal year.

Case-by-case application is an application for pre-approval made on a case-by-case basis for services to be provided by Deloitte Touche Tohmatsu LLC that are not covered by the periodic application.

Pre-approval is resolved in principle by our audit committee prior to engagement, although if necessary a full-time member of our audit committee may consider any case-by-case application for pre-approval on behalf of the audit committee prior to the next scheduled audit committee meeting. Such decisions made individually by a full-time member of our audit committee are reported to and ratified by the audit committee as appropriate at the next scheduled audit committee meeting.

Fees approved pursuant to the procedures described in paragraph 2-01(c)(7)(i)(C) of Regulation S-X, which provides for an exception to the general requirement for pre-approval in certain circumstances, were approximately 0.6% for the fiscal year ended March 31, 2015 and approximately 0.2% for the fiscal year ended March 31, 2016.

Review of Deloitte Touche Tohmatsu LLC's Independence

On July 14, 2015, Deloitte Touche Tohmatsu LLC (Tohmatsu) advised MUFG's Audit Committee that a senior partner who at the time served in an executive management role at Tohmatsu and was in the Chain of Command of Tohmatsu's audit engagement of MUFG's financial statements (Partner in Senior Management or PISM) had a savings account balance at BTMU that was not in compliance with SEC independence rules. Among other things, these rules prohibit certain audit firm personnel and their immediate family members from holding deposit accounts with audit clients with a balance in excess of deposit insurance limits. The PISM's account balance, from time to time and for extended periods of time during the fiscal periods covered by audited financial statements included in this Annual Report through November 2014 exceeded the deposit insurance limit in Japan for interest-accruing accounts, which is ¥10 million. Tohmatsu also advised that the PISM's account with BTMU was subsequently closed, and the PISM has since resigned from Tohmatsu. Tohmatsu also informed MUFG's Audit Committee in July 2015 that three partners and five staff members on Tohmatsu's audit team for MUFG's subsidiaries or affiliates had bank account balances in excess of the Japanese deposit insurance limits.

In connection with its remedial efforts, Tohmatsu identified additional violations of SEC independence rules, including violations by a partner in the Chain of Command, partners and other members of Tohmatsu's audit engagement teams for MUFG and its subsidiaries and affiliates, other persons covered by SEC independence rules, and their spouses. According to reports by Tohmatsu to MUFG's Audit Committee, subsequent to

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

the filing in July 2015 of MUFG's annual report on Form 20-F for the fiscal year ended March 31, 2015 through July 13, 2016, there were 70 such additional violations involving 62 individuals. In addition to violations resulting from bank accounts that were not protected by, or with balances in excess of, deposit insurance limits, which comprised the substantial majority of violations, other violations were outstanding credit card balances in excess of the SEC's permitted balance amount, bonds and loans prohibited by the SEC rules, and mutual fund, money fund, or money trust account holdings managed by MUFG's subsidiaries and affiliates prohibited by the SEC rules.

During various meetings subsequent to the filing in July 2015 of our annual report on Form 20-F for the fiscal year ended March 31, 2015, Tohmatsu reported these additional violations to MUFG's Audit Committee

Table of Contents

and stated in communications to the Audit Committee, as required by Public Company Accounting Oversight Board Rule 3526, that Tohmatsu had: (a) conducted an internal investigation of the relevant facts and circumstances and (b) concluded that Tohmatsu's objectivity, impartiality and integrity with respect to its audit of MUFG's financial statements were unaffected. Among other things, as reported and represented to the Audit Committee, Tohmatsu's internal investigation found that the audit work performed was neither compromised nor influenced by the identified violations, and that:

Neither the Lead Client Service Partner, lead engagement partner, nor any other member of the engagement team management in a position to influence the US GAAP audit as of and for the fiscal year ended March 31, 2016 was or is in violation of the SEC independence rules;

Most of the partners and members of the audit engagement teams who had violated SEC independence rules did not substantively participate in the audit of MUFG or its subsidiaries or affiliates, did not conduct performance evaluations of members of the audit engagement team, and did not otherwise affect the results of the audit;

Most of the bank account balances and other financial interests at issue were small in amount relative to the level of income for those individuals, and the risk of loss was not material to them; and

An Audit Partner or supervisor who was not in violation of the SEC independence rules re-reviewed the work of all members of the audit engagement team who had violated the SEC independence rules and confirmed that their work did not compromise the integrity of the audit.

Further, Tohmatsu reported to the Audit Committee that corrective action to address each violation was taken, and that there are no continuing violations. Tohmatsu also reported that it had reported all identified violations, and represented its good faith belief that there should not be any unidentified violations.

The Audit Committee engaged counsel to review the circumstances relating to the PISM and the other reported violations by Tohmatsu. Based on discussions with Tohmatsu following Tohmatsu's internal investigation, and after undertaking its own work to review the situation with the assistance of the Internal Audit Division of MUFG, the Audit Committee concluded that Tohmatsu's ability to exercise objective and impartial judgment on issues within the scope of its audit of MUFG's financial statements has not been impaired. Based on this determination, the Audit Committee concluded that the audited financial statements may be included in MUFG's Annual Report on Form 20-F for the fiscal year ended March 31, 2016.

The Audit Committee is continuing its discussions with Tohmatsu about the corrective measures Tohmatsu has taken, and will continue to take in the future, to enhance its policies and procedures to prevent violations of SEC independence rules by Tohmatsu personnel.

Item 16D. Exemptions from the Listing Standards for Audit Committees.

Not applicable.

Notes:

- (1) All of the purchased shares were shares constituting less than one unit (100 shares) purchased from registered holders of such shares at the current market price of those shares.
- (2) During May and June 2015, we repurchased 111,151,800 shares of our common stock for ¥99,999,972,728 under a share repurchase program that was adopted on May 15, 2015 and completed in June 2015. Under the program, we were authorized by the Board of Directors to repurchase up to the lesser of an aggregate of 160,000,000 shares of our common stock and an aggregate of ¥100.0 billion between May 18, 2015 and July 31, 2015. During November and December 2015, we repurchased 121,703,700 shares of our common stock for ¥99,999,982,169 under a share repurchase program that was adopted on November 13, 2015 and completed in December 2015. Under the program, we were authorized by the Board of Directors to repurchase up to the lesser of an aggregate of 140,000,000 shares of our common stock and an aggregate of ¥100.0 billion between November 16, 2015 and December 31, 2015.

We did not make any purchases of shares of our common stock other than as shown in the above table for the fiscal year ended March 31, 2016.

During May and June 2016, we repurchased 190,614,800 shares of our common stock for ¥99,999,963,346 under a share repurchase program that was adopted on May 16, 2016 and completed in June 2016. Under the program, we were authorized by the Board of Directors to repurchase up to the lesser of an aggregate of 230,000,000 shares of our common stock and an aggregate of ¥100.0 billion between May 17, 2016 and June 30, 2016.

In connection with the BTMU Headquarters for the Americas Stock Bonus Plan, 2,029,779 ADSs were purchased by the trustee of the independent trust between April 1, 2015 and March 31, 2016. In the same period, 3,746,590 ADSs were purchased by the trustee of the independent trust in connection with the UNBC Stock Bonus Plan. In the same time period, 514,815 ADSs were purchased by the trustee of the independent trust in connection with the MUAH Stock Bonus Plan. In May 2016, 18,785,400 shares of MUFG common stock were purchased

by the trustee of the trust for the new performance-based stock compensation plan. For descriptions of our stock bonus plans, see Item 6.B. Directors, Senior Management and Employees Compensation.

Item 16F. Change in Registrant's Certifying Accountant.

Item 16G. Corporate Governance.

The NYSE allows NYSE-listed companies that are foreign private issuers, such as MUFG, with certain exceptions, to follow home-country practices in lieu of the corporate governance practices followed by U.S. companies pursuant to the NYSE's Listed Company Manual. The following is a summary of the significant differences between MUFG's corporate governance practices and those followed by U.S. listed companies under the NYSE's Listed Company Manual.

1. A NYSE-listed U.S. company must have a majority of directors that meet the independence requirements under Section 303A of the NYSE's Listed Company Manual.

As of June 30, 2016, we have seven outside directors as members of our board of directors, which consists of a total of seventeen members. Under our newly adopted governance system, we are required to have a majority of outside directors on each of our nominating, audit and compensation committees. For a description of an outside director, see Item 6.C. Directors and Senior Management Board Practices.

The Tokyo Stock Exchange rules require listed companies, including us, to identify at least one individual who the company believes is unlikely to have a conflict of interest with general shareholders and have such individual serve as an independent director or outside corporate auditor.

Further, a listed company with fewer than two outside directors who are considered independent based on such internal standards as the company establishes pursuant to the Tokyo Stock Exchange requirements must publicly disclose the reason for not having at least two such directors on its board of directors. In addition, if a listed company determines that at least one-third of the members of its board of directors should be independent outside directors, the listed company must disclose its policy relating to the determination. We have adopted and made public our corporate governance policy providing, among other things, that, in general cases, at least one-third of the members of our board of directors will be independent outside directors, and that, in general cases, the majority of the members of our board of directors will be non-executive directors.

2. A NYSE-listed U.S. company must have an audit committee composed entirely of independent directors.

Under the Companies Act, we are required to have an audit committee consisting of at least three non-executive directors, and the majority of its members must be outside directors. Currently, our audit committee consists of three outside directors and two non-executive directors. Our audit committee satisfies the requirements of Rule 10A-3 under the U.S. Securities Exchange Act of 1934, including the independence requirements thereunder.

3. A NYSE-listed U.S. company must have a compensation committee composed entirely of independent directors.

Under the Companies Act, we are required to have a compensation committee consisting of at least three directors, and the majority of its members must be outside directors. Currently, our compensation committee consists of six directors, five of whom are outside directors.

4. A NYSE-listed U.S. company must have a nominating or corporate governance committee composed entirely of independent directors.

Under the Companies Act, we are required to have a nominating committee consisting of at least three directors, and the majority of its members must be outside directors. Currently, our nominating committee, which we call the nominating and governance committee, consists of six directors, five of whom are outside directors.

Table of Contents

5. A NYSE-listed U.S. company must obtain shareholder approval with respect to any equity compensation plan.

Under the Companies Act, an equity compensation plan for directors and corporate executive officers is deemed to be compensation for the services performed by the company's directors and corporate executive officers. Our compensation committee establishes the policy with respect to the determination of the individual compensation of our directors and corporate executive officers, including equity compensation in the form of performance-based stock compensation plan, and determines individual compensation in accordance with the policy. Under the Companies Act, a public company with board audit, compensation and nominating committees seeking to introduce a performance-based stock compensation plan must obtain the approval of its compensation committee, not its shareholders.

6. A NYSE-listed U.S. company must adopt and disclose Corporate Governance Guidelines and a Code of Business Conduct and Ethics, and it must also disclose any exemptions granted to directors or executives.

Our corporate governance policies, which are called the MUFG Corporate Governance Policies, are based on applicable home-country rules, particularly the Tokyo Stock Exchange rules, which require listed companies, such as us, to adopt a corporate governance code setting forth fundamental principles designed to establish an effective corporate governance system or explain in their corporate governance reports the reasons for not adopting such a code. We disclose these policies on our website.

We have adopted a code of ethics, compliance rules and a compliance manual, which meet the definition of "code of ethics" in Item 16B. Code of Ethics.

7. A NYSE-listed U.S. company must hold regularly scheduled executive sessions where participants are limited to non-management directors.

Under the Companies Act, Japanese corporations are not obliged to hold executive sessions where participants are limited to non-management directors. Such executive sessions are also not required under our internal corporate governance rules.

Item 16H. Mine Safety Disclosure.

Not Applicable.

SELECTED STATISTICAL DATA

Due to close integration of our foreign and domestic activities, it is difficult to make a precise determination of the assets, liabilities, income and expenses of our foreign operations. The foreign operations as presented include the business conducted by overseas subsidiaries and branches, and the international business principally conducted by the international banking-related divisions headquartered in Japan. Our management believes that the results appropriately represent our domestic and foreign activities.

Notes:

- (1) Tax-exempt income of tax-exempt investment securities has not been calculated on a tax equivalent basis because the effect of such calculation would not be material.
- (2) Average balances on loans outstanding include all nonaccrual and restructured loans. See III. Loan Portfolio. The amortized portion of net loan origination fees (costs) is included in interest income on loans, which accounts for an insignificant amount of an adjustment to the yields.

Nonmarketable equity securities presented in Other investment securities in the accompanying consolidated financial statements were primarily carried at cost of ¥711,416 million, ¥564,582 million and ¥530,026 million, at March 31, 2014, 2015 and 2016, respectively. The corresponding fair values at those dates were not readily determinable. Investment securities held by certain subsidiaries subject to specialized industry accounting principles for investment companies and brokers and dealers presented in Other investment securities were carried at fair value of ¥26,201 million, ¥22,537 million and ¥24,689 million, at March 31, 2014, 2015 and 2016, respectively.

Table of Contents

The following table presents the book values, maturities and weighted average yields of Available-for-sale securities and Held-to-maturity securities, excluding equity securities, at March 31, 2016. Weighted average yields are calculated based on amortized cost. Yields on tax-exempt obligations have not been calculated on a tax equivalent basis because the effect of such calculation would not be material:

	Maturities within one year		Maturities after one year but within five years		Maturities after five years but within ten years		Maturities after ten years		Total	
	Amount	Yield	Amount	Yield	Amount	Yield	Amount	Yield	Amount	Yield
(in millions, except percentages)

Table of Contents**III. Loan Portfolio**

The following table shows our loans outstanding, before deduction of allowance for credit losses, by domicile and industry of the borrower at March 31 of each of the five fiscal years ended March 31, 2016. Classification of loans by industry is based on the industry segment loan classification as defined by the Bank of Japan for regulatory reporting purposes and is not necessarily based on the use of proceeds:

	2012	2013	At March 31, 2014 (in millions)	2015	2016
Domestic:

Total	¥52,180,160	¥ 39,854,671	¥ 31,055,694	¥ 123,090,525

The above loans due after one year which had predetermined interest rates and floating or adjustable interest rates at March 31, 2016 are shown below:

	Domestic	Foreign	Total
	(in millions)		
Predetermined rate	¥ 12,870,258	¥ 3,289,018	¥ 16,159,276
Floating or adjustable rate	26,036,448	28,714,641	54,751,089
Total	¥ 38,906,706	¥ 32,003,659	¥ 70,910,365

Nonaccrual, Past Due and Restructured Loans

We generally discontinue the accrual of interest income on loans when substantial doubt exists as to the full and timely collection of either principal or interest, when principal or interest is contractually past due one month or more with respect to loans within all classes of the Commercial segment, three months or more with respect to loans within the Card, MUAH, and Krungsri segments, and six months or more with respect to loans within the Residential segment.

Generally, accruing loans that are modified in a troubled debt restructuring (TDR) remain as accruing loans subsequent to the modification, and nonaccrual loans remain as nonaccrual. However, if a nonaccrual loan has been restructured as a TDR, the borrower is not delinquent under the restructured terms, and demonstrates that its financial condition has improved, we may reclassify the loan to accrual status. This determination is generally performed at least once a year through a detailed internal credit rating review process. Once a nonaccrual loan is deemed to be a TDR, we will continue to designate the loan as a TDR even if the loan is reclassified to accrual status.

Table of Contents

The following table shows the distribution of our nonaccrual loans, restructured loans and accruing loans which are contractually past due 90 days or more as to principal or interest payments at March 31 of each of the five fiscal years ended March 31, 2016, based on the domicile and type of industry of the borrowers:

	2012	2013	At March 31, 2014 (in millions)	2015	2016
Nonaccrual loans:

Domestic	¥ 65,446	¥ 41,216	¥ 47,759	¥ 48,050	¥ 47,919
Foreign ⁽¹⁾	131	328	961	360	314
Total	¥ 65,577	¥ 41,544	¥ 48,720	¥ 48,410	¥ 48,233
Total⁽²⁾	¥ 2,178,541	¥ 2,322,504	¥ 2,035,397	¥ 1,841,544	¥ 1,873,934

Notes:

- (1) Foreign accruing loans contractually past due 90 days or more do not include ¥12,827 million, ¥10,736 million, ¥13,068 million, ¥5,666 million and ¥1,930 million of Federal Deposit Insurance Corporation (FDIC) covered loans held by MUAH which are subject to the guidance on loans and debt securities acquired with deteriorated credit quality at March 31, 2012, 2013, 2014, 2015 and 2016, respectively.
- (2) The sum of nonaccrual loans, restructured loans and accruing loans contractually past due 90 days or more includes large groups of smaller-balance homogenous loans that have not been modified and are collectively evaluated for impairment, and accruing loans contractually past due 90 days or more. However, these loans are excluded from the impaired loan balances of ¥1,686,806 million and ¥1,725,150 million, at March 31, 2015 and 2016, respectively, disclosed in Note 4 to our consolidated financial statements included elsewhere in this Annual Report.

Gross interest income which would have been accrued at the original terms on domestic nonaccrual and restructured loans outstanding during the fiscal year ended March 31, 2016 was approximately ¥49.3 billion, of which ¥23.9 billion was included in the results of operations for the fiscal year. Gross interest income which would have been accrued at the original terms on foreign nonaccrual and restructured loans outstanding for the fiscal year ended March 31, 2016 was approximately ¥28.2 billion, of which ¥15.7 billion was included in the results of operations for the fiscal year.

Table of Contents

Potential Problem Loans

We do not have potential problem loans where known information about possible credit problems of borrowers causes management to have serious doubts as to the borrowers' ability to comply with the present loan repayment terms that are not disclosed as nonaccrual loans, restructured loans and accruing loans past due 90 days or more.

Foreign Loans Outstanding

We had no cross-border outstandings to borrowers domiciled in a foreign country which in total exceeded 0.75% of consolidated total assets at March 31, 2014, 2015 and 2016. Cross-border outstandings are defined, for this purpose, as loans (including accrued interest), acceptances, interest-earning deposits with other banks, other interest-earning investments and any other monetary assets denominated in Japanese yen or other non-local currencies. Material local currency loans outstanding which are neither hedged nor funded by local currency borrowings are included in cross-border outstandings.

Guarantees of outstandings to borrowers domiciled in other countries are considered to be outstandings of the guarantor. Loans made to, or deposits placed with, a branch of a foreign bank located outside the foreign bank's home country are considered to be loans to, or deposits with, the foreign bank. Outstandings of a country do not include principal or interest amounts which are supported by written, legally enforceable guarantees by guarantors of other countries or the amounts of outstandings to the extent that they are secured by tangible, liquid collateral held and realizable by BTMU, MUTB and their subsidiaries outside the country in which they operate.

In addition to credit risk, cross-border outstandings are subject to country risk that as a result of political or economic conditions in a country, borrowers may be unable or unwilling to pay principal and interest according to contractual terms. Other risks related to cross-border outstandings include the possibility of insufficient foreign exchange and restrictions on its availability.

In order to manage country risk, we establish various risk management measures internally. Among other things, we regularly monitor economic conditions and other factors globally and assess country risk in each country where we have cross-border exposure. For the purposes of monitoring and controlling the amount of credit exposed to country risk, we set a country limit, the maximum amount of credit exposure for an individual country, in consideration of the level of country risk and our ability to bear such potential risk. We also determine our credit policy for each country in accordance with our country risk level and our business plan with regard to the country. The assessment of country risk, establishment of country limits, and determination of country credit policies are subject to review and approval by our senior management and are updated periodically.

Loan Concentrations

At March 31, 2016, there were no concentrations of loans to a single industry group of borrowers, as defined by the Bank of Japan industry segment loan classifications, which exceeded 10% of our consolidated total loans, except for loans in a category disclosed in the table of loans outstanding above.

Credit Risk Management

We have a credit rating system, under which borrowers and transactions are graded on a worldwide basis. We calculate probability of default by statistical means and manage our credit portfolio based on this credit rating system. For a detailed description of this system and other elements of our risk management structure, see Item 11. Quantitative and Qualitative Disclosures about Credit, Market and Other Risk - Credit Risk Management.

While the allowance for credit losses contains amounts allocated to components of specifically identified loans as well as a group on a portfolio of loans, the allowance for credit losses covers the credit losses of the entire loan portfolio and the allocations shown above are not intended to be restricted to the specific loan category. Accordingly, as the evaluation of credit risks changes, allocations of the allowance will be adjusted to reflect current conditions and various other factors.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of

Mitsubishi UFJ Financial Group, Inc.

(Kabushiki Kaisha Mitsubishi UFJ Financial Group)

We have audited the accompanying consolidated balance sheets of Mitsubishi UFJ Financial Group, Inc. (Kabushiki Kaisha Mitsubishi UFJ Financial Group) (MUFG) and subsidiaries (together, the MUFG Group) as of March 31, 2015 and 2016, and the related consolidated statements of income, comprehensive income, equity and cash flows for each of the three years in the period ended March 31, 2016 (all expressed in Japanese Yen). These consolidated financial statements are the responsibility of the MUFG Group s management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of MUFG and subsidiaries as of March 31, 2015 and 2016, and the results of their operations and their cash flows for each of the three years in the period ended March 31, 2016, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the MUFG Group s internal control over financial reporting as of March 31, 2016, based on the criteria established in *Internal Control Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated July 15, 2016 expressed an unqualified opinion on the MUFG Group s internal control over financial reporting.

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****1. BASIS OF FINANCIAL STATEMENTS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES*****Description of Business***

Mitsubishi UFJ Financial Group, Inc. (MUFG) is a holding company for The Bank of Tokyo-Mitsubishi UFJ, Ltd. (BTMU), Mitsubishi UFJ Trust and Banking Corporation (MUTB), Mitsubishi UFJ Securities Holdings Co., Ltd. (MUSHD), Mitsubishi UFJ NICOS Co., Ltd. (Mitsubishi UFJ NICOS), and other subsidiaries. MUSHD is an intermediate holding company for Mitsubishi UFJ Morgan Stanley Securities Co., Ltd. (MUMSS). Through its subsidiaries and affiliated companies, MUFG engages in a broad range of financial operations, including commercial banking, investment banking, trust banking and asset management services, securities businesses, and credit card businesses, and it provides related services to individual and corporate customers. See Note 30 for more information by business segment.

Basis of Financial Statements

The accompanying consolidated financial statements are presented in Japanese yen, the currency of the country in which MUFG is incorporated and principally operates. The accompanying consolidated financial statements have been prepared on the basis of accounting principles generally accepted in the United States of America (U.S. GAAP). In certain respects, the accompanying consolidated financial statements reflect adjustments which are not included in the consolidated financial statements issued by MUFG and certain of its subsidiaries in accordance with applicable statutory requirements and accounting practices in their respective countries of incorporation. The major adjustments include those relating to (1) investment securities, (2) derivative financial instruments, (3) allowance for credit losses, (4) income taxes, (5) consolidation, (6) premises and equipment, (7) transfer of financial assets, (8) accrued severance indemnities and pension liabilities, (9) goodwill and other intangible assets and (10) lease transactions.

Fiscal years of certain subsidiaries, which end on December 31, and MUFG's fiscal year, which ends on March 31, have been treated as coterminous. For the fiscal years ended March 31, 2014, 2015 and 2016, the effect of recording intervening events for the three-month periods ended March 31 on MUFG's proportionate equity in net income of subsidiaries with fiscal years ended on December 31, would have resulted in an increase of ¥6.79 billion, an increase of ¥6.15 billion, and an increase of ¥1.34 billion to net income attributable to Mitsubishi UFJ Financial Group, respectively. No intervening events occurred during each of the three-month periods ended March 31, 2014, 2015 and 2016 which, if recorded, would have had material effects on consolidated total assets, loans, total liabilities, deposits or total equity as of March 31, 2014, 2015 and 2016.

Use of Estimates

The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to management judgment primarily relate to the allowance for credit losses, the valuation allowance for deferred tax assets, recognition and measurement of uncertain tax positions, the valuation of financial instruments, the

accounting for goodwill and intangible assets, impairment of investment securities, the allowances for repayment of excess interest and accrued severance indemnities and pension liabilities.

MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Summary of Significant Accounting Policies

Significant accounting policies applied in the accompanying consolidated financial statements are summarized below:

Consolidation The accompanying consolidated financial statements include the accounts of MUFG, its subsidiaries and certain variable interest entities (VIE s) (together, the MUFG Group). In situations in which the MUFG Group has a controlling financial interest in other entities, including certain VIEs, such entities are consolidated and noncontrolling interests, if any, are recorded in Total equity. Intercompany transactions and balances have been eliminated. Investments in affiliated companies (companies over which the MUFG Group has the ability to exercise significant influence) are accounted for by the equity method of accounting and are reported in Other assets. The MUFG Group s equity interest in the earnings of these equity investees and other-than-temporary impairment (OTTI) are reported in Equity in earnings of equity method investees-net. The MUFG Group recognizes an impairment loss on investments in equity method investees that is other-than-temporary. The MUFG Group determines whether loss on investments is other-than-temporary, through consideration of various factors, such as inability to recover the carrying amount of the investment, the inability of the investee to sustain an earnings capacity that would justify the carrying amount of the investment, the length of time and the extent to which the fair value has been less than cost, the financial condition and near-term prospects of the investees, and the intent and ability to retain its investment in the investees for a period of time sufficient to allow for any anticipated recovery in the fair value. The MUFG Group also evaluates additional factors, such as the condition and trend of the economic cycle, and trends in the general market.

The MUFG Group consolidates VIEs if it has the power to direct the activities of a VIE which most significantly impact the VIE s economic performance and has the obligation to absorb losses or the right to receive benefits that could potentially be significant to the entity, except certain VIEs that are deemed as investment companies. To assess whether a VIE should be consolidated or not, the MUFG Group considers all factors, such as the purpose and design of the VIE, contractual arrangements, and the MUFG Group s involvement in both the establishment of the VIE and day-to-day activities of the VIE. The MUFG Group considers a right to make the most significant decisions affecting a VIE to determine whether it is deemed to have the power to direct the activities of the VIE. Furthermore, the MUFG Group considers its economic interests in the VIE, including investments in debt or equity instruments issued by the VIE, liquidity and credit enhancement, and guarantees to determine whether such interests are potentially significant to the VIE or not. For VIEs that are considered investment companies, the MUFG Group determines whether it is the primary beneficiary by evaluation of whether it absorbs a majority of expected losses, receives a majority of expected residual returns or both.

Assets that the MUFG Group holds in an agency, fiduciary or trust capacity are not assets of the MUFG Group and, accordingly, are not included in the accompanying consolidated balance sheets.

Cash Flows For the purposes of reporting cash flows, cash and cash equivalents are defined as those amounts included in the accompanying consolidated balance sheets under the caption Cash and due from banks with original maturities of 90 days or less. Cash flows from qualified hedging activities are classified in the same category as the items being hedged.

Translation of Foreign Currency Financial Statements and Foreign Currency Transactions Financial statements of overseas entities are translated into Japanese yen using the respective fiscal year-end exchange rates for assets and liabilities. Income and expense items are translated at average rates of exchange for the respective fiscal years.

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Foreign currency translation gains and losses related to the financial statements of overseas entities of the MUFG Group, net of related income tax effects, are credited or charged directly to Foreign currency translation adjustments, a component of Accumulated other comprehensive income (Accumulated OCI). Tax effects of gains and losses on foreign currency translation of the financial statements of overseas entities are not recognized unless it is apparent that the temporary differences will reverse in the foreseeable future.

Foreign currency-denominated assets and liabilities are translated into the functional currencies of the individual entities included in consolidation at the respective fiscal year-end foreign exchange rates. Foreign currency-denominated income and expenses are translated using average rates of exchange for the respective fiscal years. Gains and losses from such translation are included in Foreign exchange gains (losses) net, as appropriate.

Repurchase Agreements, Securities Lending and Other Secured Financing Transactions Securities sold with agreements to repurchase (repurchase agreements), securities purchased with agreements to resell (resale agreements) and securities lending and borrowing transactions are accounted for as secured financing or lending transactions, if the transferor has not surrendered control over the securities. Repurchase agreements and resale agreements are generally carried at the amounts at which the securities will be subsequently sold or repurchased, and securities lending and borrowing transactions are generally carried at the amount of cash collateral advanced or received. If they meet the relevant conditions for the surrender of control, they are accounted for as sales of securities with related off-balance sheet forward repurchase commitments or purchases of securities with related off-balance sheet forward resale commitments. For the fiscal years ended March 31, 2014, 2015 and 2016, there were no such transactions accounted for as sales or purchases.

Collateral For secured lending transactions, including resale agreements, securities borrowing transactions, commercial lending and derivative transactions, the MUFG Group, as a secured party, generally has the right to require the counterparties to provide collateral, including letters of credit, cash, securities and other financial assets. For most secured lending transactions, the MUFG Group maintains strict levels of collateralization governed by a daily mark-to-market analysis. Financial assets pledged as collateral are generally negotiable financial instruments and are permitted to be sold or repledged by secured parties. If the MUFG Group sells these financial assets received as collateral, it recognizes the proceeds from the sale and its obligation to return the collateral. For secured borrowing transactions, principally repurchase agreements and securities lending transactions and derivative transactions, where the secured party has the right to sell or repledge financial assets pledged as collateral, the MUFG Group separately discloses those financial assets pledged as collateral in the accompanying consolidated balance sheets.

Trading Account Securities Securities and money market instruments held in anticipation of short-term market movements and for resale to customers are included in Trading account assets, and short trading positions of these instruments are included in Trading account liabilities. Trading positions are carried at fair value in the accompanying consolidated balance sheets and recorded on a trade date basis. Changes in the fair value of trading positions are recognized in Trading account profits (losses). The MUFG Group has elected the fair value option for certain foreign securities. See Note 32 for a further discussion of fair value option.

Investment Securities Debt securities for which the MUFG Group has both the ability and positive intent to hold to maturity are classified as Held-to-maturity securities and are carried at amortized cost. Debt securities that the MUFG

Group may not hold to maturity and marketable equity securities, other than those classified as Trading account securities, are classified as Available-for-sale securities, and are carried at their fair values, with unrealized gains and losses reported on a net-of-tax basis within Accumulated OCI, net of taxes, which is a component of equity. Other investment securities include nonmarketable equity securities carried at their acquisition cost and investment securities held by subsidiaries that are investment companies or brokers and

F-15

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

dealers. Such securities held by those subsidiaries are subject to the specialized industry accounting principles for investment companies and brokers and dealers applicable for those subsidiaries. Securities of those subsidiaries are carried at their fair values.

For marketable equity securities, an OTTI is recognized in earnings when a decline in fair value below the cost is deemed other-than-temporary. For debt securities, an OTTI is recognized in earnings for a security if the MUFG Group has intent to sell such a debt security or if it is more likely than not the MUFG Group will be required to sell such a debt security before recovery of its amortized cost basis. If not, the credit component of an OTTI is recognized in earnings, but the noncredit component is recognized in Accumulated OCI. In determining other-than-temporary declines in fair value to be recognized as an impairment loss on investment securities, the MUFG Group generally considers factors such as the ability and positive intent to hold the investments for a period of time sufficient to allow for anticipated recovery in fair value, the financial condition of the issuer, the extent of decline in fair value, and the length of time that the decline in fair value below cost has existed. Interest and dividends on investment securities are reported in Interest income. Dividends are recognized when the shareholder right to receive the dividend is established. Gains and losses on disposition of investment securities are computed using the average cost method and are recognized on the trade date.

Derivative Financial Instruments The MUFG Group engages in derivative activities involving swaps, forwards, futures, options, and other types of derivative contracts. Derivatives are used in trading activities to generate trading revenues and fee income for its own account and to respond to customers' financial needs. Derivatives are also used to manage counterparty credit risk and market risk exposures to fluctuations in interest and foreign exchange rates, equity and commodity prices.

Derivatives entered into for trading purposes are carried at fair value and are reported as Trading account assets or Trading account liabilities, as appropriate. The fair values of derivative contracts executed with the same counterparty under legally enforceable master netting agreements are presented on a gross basis. Changes in the fair value of such contracts are recognized currently in Foreign exchange gains (losses) net with respect to foreign exchange contracts and in Trading account profits (losses) net with respect to interest rate contracts and other types of contracts.

Embedded features that are not clearly and closely related to the host contracts and meet the definition of derivatives are separated from the host contracts and measured at fair value unless the contracts embedding the derivatives are measured at fair value in their entirety.

Derivatives are also used to manage exposures to fluctuations in interest and foreign exchange rates arising from mismatches of asset and liability positions. Certain of those derivatives are designated as hedging instruments and qualify for hedge accounting. The MUFG Group designates a derivative as a hedging instrument at the inception of each such hedge relationship, and it documents, for such individual hedging relationships, the risk management objective and strategy, including the item being hedged, the specific risk being hedged and the method used to assess the hedge effectiveness. In order for a hedging relationship to qualify for hedge accounting, the changes in the fair value of the derivative instruments must be highly effective in achieving offsetting changes in fair values or variable cash flows of the hedged items attributable to the risk being hedged. Any ineffectiveness, which arises during the hedging relationship, is recognized in Non-interest income or expense in the period in which it arises. All qualifying

hedging derivatives are valued at fair value and included in Other assets or Other liabilities, as appropriate. For cash flow hedges, the unrealized changes in fair value to the extent effective are recognized in Accumulated OCI. Amounts realized on cash flow hedges related to variable rate loans are recognized in Net interest income in the period when the cash flow from the hedged item is realized. The fair value of cash flow hedges related to forecasted transactions, if any, is recognized in Non-interest income or expense in the period when the forecasted transaction occurs. Any difference that arises

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

from gains or losses on hedging derivatives offsetting corresponding gains or losses on the hedged items, and gains and losses on derivatives attributable to the risks excluded from the assessment of hedge effectiveness are recognized in Non-interest income or expense.

Loans Loans originated by the MUFG Group (originated loans) are carried at the principal amount outstanding, adjusted for unearned income and deferred net nonrefundable loan fees and costs. Originated loans held and intended for dispositions or sale in secondary markets are transferred to the held-for-sale classification and carried at the lower of cost or estimated fair value generally on an individual loan basis. Loan origination fees, net of certain direct origination costs, are deferred and recognized over the contractual life of the loan as an adjustment to yield using a method that approximates the interest method. Interest income on loans that are not impaired is accrued and credited to interest income as it is earned. Unearned income and discounts or premiums on purchased loans are deferred and recognized over the remaining contractual terms of the loans using a method that approximates the interest method when such purchased loans are outside the scope of the guidance on loans and debt securities acquired with deteriorated credit quality as described below.

The MUFG Group classifies its loan portfolio into the following portfolio segments Commercial, Residential, Card, MUFG Americas Holdings Corporation (MUAH), and Bank of Ayudhya Public Company Limited (Krungsri) based on the grouping used by the MUFG Group to determine the allowance for credit losses. The MUFG Group further classifies the Commercial segment into classes based on initial measurement attributes, risk characteristics, and its method of monitoring and assessing credit risk.

Originated loans are considered impaired when, based on current information and events, it is probable that the MUFG Group will be unable to collect all the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Past due status is determined based on the contractual terms of the loan and the actual number of days since the last payment date, and is considered in determining impairment. Originated loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is generally evaluated on a loan-by-loan basis by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's observable market price, or the fair value of the collateral if the loan is collateral dependent.

Originated loans are generally placed on nonaccrual status when substantial doubt exists as to the full and timely collection of either principal or interest, specifically when principal or interest is contractually past due one month or more with respect to loans within all classes of the Commercial segment, three months or more with respect to loans within the Card, MUAH, and Krungsri segments, and six months or more with respect to loans within the Residential segment. A nonaccrual loan may be restored to an accrual status when interest and principal payments become current and management expects that the borrower will make future contractual payments as scheduled. When a loan is placed on nonaccrual status, interest accrued but not received is generally reversed against interest income. Cash receipts on nonaccrual loans, for which the ultimate collectibility of principal is uncertain, are applied as principal reductions; otherwise, such collections are credited to income.

The MUFG Group modifies certain loans in conjunction with its loss-mitigation activities. Through these modifications, concessions are granted to a borrower who is experiencing financial difficulty, generally in order to minimize economic loss, to avoid foreclosure or repossession of collateral, and to ultimately maximize payments received from the borrower. The concessions granted vary by portfolio segment, by program, and by borrower-specific characteristics, and may include interest rate reductions, term extensions, payment deferrals,

F-17

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

and partial principal forgiveness. Loan modifications that represent concessions made to borrowers who are experiencing financial difficulties are identified as troubled debt restructurings (TDRs).

Generally, accruing loans that are modified in a TDR remain as accruing loans subsequent to the modification, and nonaccrual loans remain as nonaccrual. However, if a nonaccrual loan has been modified as a TDR, the borrower is not delinquent under the modified terms, and demonstrates that its financial condition has improved, the MUFG Group may reclassify the loan to accrual status. This determination is generally performed at least once a year through a detailed internal credit rating review process. Once a nonaccrual loan is deemed to be a TDR, the MUFG Group will continue to designate the loan as a TDR even if the loan is reclassified to accrual status.

A loan that has been modified into a TDR is considered to be impaired until it matures, is repaid, or is otherwise liquidated, regardless of whether the borrower performs under the modified terms. Because loans modified in TDRs are considered to be impaired, these loans are measured for impairment using the MUFG Group's established asset-specific allowance methodology, which considers the expected default rates for the modified loans. See *Allowance for Credit Losses* for a discussion for each portfolio segment.

In accordance with the guidance on loans and debt securities acquired with deteriorated credit quality, impaired loans acquired for which it is probable that the MUFG Group will be unable to collect all contractual receivables are initially recorded at the present value of amounts expected to be received. For these impaired loans, the related valuation allowances are not carried over or created initially. Accretable yield is limited to the excess of the investor's estimate of undiscounted cash flows over the investor's initial investment in the loan. Subsequent increases in cash flows expected to be collected are recognized prospectively through adjustment of the loan's yield over its remaining life after reduction of any remaining allowance for credit losses for the loan established after its acquisition, if any, while any decrease in such cash flows below those initially expected at acquisition plus additional cash flows expected to be collected arising from changes in estimate after acquisition is recognized as an impairment.

Loan Securitization The MUFG Group securitizes and services commercial, industrial, and residential loans in the normal course of business. The MUFG Group accounts for a transfer of loans in a securitization transaction as a sale if it meets relevant conditions for the surrender of control. Otherwise, the transfer is accounted for as a collateralized borrowing transaction. When a securitization is accounted for as a sale, the proceeds from a sale of financial assets consist of the cash and any other assets obtained, including beneficial interests and separately recognized servicing assets, in the transfer less any liabilities incurred, including separately recognized servicing liabilities. All proceeds and reductions of proceeds from a sale shall be initially measured at fair value.

Allowance for Credit Losses The MUFG Group maintains an allowance for credit losses to absorb probable losses inherent in the loan portfolio. Actual credit losses (amounts deemed uncollectible, in whole or in part), net of recoveries, are generally determined based on detailed loan reviews and a credit assessment by management at each balance sheet date, and are deducted from the allowance for credit losses as net charge-offs. The MUFG Group generally applies its charge-off policy to all loans in its portfolio regardless of the type of borrower. Management believes that the provision for credit losses is adequate and the allowance is at the appropriate amount to absorb probable losses inherent in the loan portfolio. During the fiscal year ended March 31, 2016, the MUFG Group did not make any significant changes to the methodologies or policies used to determine its allowance for credit losses.

Table of Contents

MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Key elements relating to the policies and discipline used in determining the allowance for credit losses are credit classification and the related borrower categorization process. The categorization is based on conditions that may affect the ability of borrowers to service their debt, taking into consideration current financial information, historical payment experience, credit documentation, public information, analyses of relevant industry segments or existing economic conditions. In determining the appropriate level of the allowance, the MUFG Group evaluates the probable loss by collateral value, historical loss experience, probability of insolvency and category of loan based on its type and characteristics. The MUFG Group updates these conditions and probable loss on a regular basis and upon the occurrence of unexpected change in the economic environment.

The methodologies used to estimate the allowance and the charge-off policy for each portfolio segment are as follows:

Commercial segment

In the Commercial segment, the methodology for assessing the appropriateness of the allowance consists of several key elements, which include the allocated allowance for loans individually evaluated for impairment, the formula allowance, the allocated allowance for country risk exposure, and the allocated allowance for large groups of smaller-balance homogeneous loans.

The allocated allowance for loans individually evaluated for impairment represents the impairment allowance determined in accordance with the guidance on accounting by creditors for the impairment of a loan. The factors considered by management in determining impairment are the internal credit rating assigned to each borrower which represents the borrower's creditworthiness determined based on payment status, the number of delinquencies, and the probability of collecting principal and interest payments when due. The impairment of a loan is measured based on the present value of expected future cash flows discounted at the loan's effective interest rate, or the loan's observable market price, or the fair value of the collateral if the loan is collateral dependent.

The formula allowance is applied to loans that are categorized as Normal or Close Watch, excluding loans identified as a TDR, based on the internal credit rating and historical loss factors which are based on the loss experience. See Note 4 for the information on loans to borrowers categorized based on the internal borrower rating. Estimated losses inherent in the loans at the balance sheet date are calculated by multiplying the default ratio by the nonrecoverable ratio (determined as a complement of the recovery ratio). The default ratio is determined by each internal credit rating, taking into account the historical number of defaults of borrowers within each internal credit rating divided by the total number of borrowers. The recovery ratio is mainly determined by the historical experience of collections against loans in default. The default ratio, the recovery ratio and other indicators are continually reviewed to determine the appropriate level of the allowance. Because the evaluation of inherent loss for these loans involves a high degree of uncertainty, subjectivity and judgment, the estimation of the formula allowance is back-tested by comparing the allowance with the actual results subsequent to the balance sheet date. The results of such back-testing are evaluated by management to determine whether the manner and level of the formula allowance needs to be changed in subsequent years.

The allocated allowance for country risk exposure is a country-specific allowance for Normal and Close Watch loans, excluding loans identified as a TDR. The allowance is established to supplement the formula allowance for these

loans, based on an estimate of probable losses relating to the exposure to countries that are identified by management to have a high degree of transfer risk. The measurement is based on a function of default probability and the recovery ratio with reference to external credit ratings. For the allowance for cross-border loans individually evaluated for impairment, the MUFG Group incorporates transfer risk in its determination of the related allowance.

Table of Contents

MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The allocated allowance for large groups of smaller-balance homogeneous loans is established through a process that begins with estimates of probable losses inherent in the portfolio. These estimates are based upon various analyses, including historical delinquency and historical loss experience.

Loans that have been modified into a TDR are treated as impaired loans. For nonaccrual TDRs, the allowance for credit losses is provided for these loans using the discounted cash flow method, or based on the fair value of the collateral. For TDRs accounted for as accruing loans, the allowance for credit losses is determined by discounting the estimated future cash flows using the effective interest rate of the loans prior to modification.

In relation to loans categorized as Legally/Virtually Bankrupt, the carrying amount of loans less estimated value of the collateral and guaranteed amount is generally considered uncollectible, and is charged off.

Residential segment

In the Residential segment, the loans are comprised of smaller-balance homogeneous loans that are pooled by their internal credit ratings-based on the number of delinquencies. The loans in this segment are generally secured by collateral. Collateral values are based on internal valuation sources, and the allowance is determined for unsecured amounts. The allowance for the nondelinquent group of loans is determined based on historical loss experience. For delinquent groups of loans, the MUFG Group determines the allowance based on the probability of insolvency by the number of actual delinquencies and historical loss experience.

Loans that have been modified into a TDR are treated as impaired loans. For nonaccrual TDRs, the allowance for credit losses is provided for these loans using the discounted cash flow method, or based on the fair value of the collateral. For TDRs accounted for as accruing loans, the allowance for credit losses is determined by discounting the estimated future cash flows using the effective interest rate of the loans prior to modification.

In relation to loans that are in past due status over a certain period of time and deemed uncollectible, the carrying amount of loans less estimated value of the collateral and guaranteed amount is generally considered uncollectible and charged off.

Card segment

In the Card segment, the loans are smaller-balance homogeneous loans that are pooled by their internal credit rating based on the number of delinquencies. The allowance for loans in this segment is generally determined based on the probability of insolvency by the number of actual delinquencies and historical loss experience. For calculating the allocated allowance for loans specifically identified for evaluation, impaired loans are aggregated for the purpose of measuring impairment using historical loss factors.

Loans that have been modified into a TDR are treated as impaired loans, and the allowance for credit losses is determined using the discounted cash flow method whereby the estimated future cash flows are discounted using the effective interest rate of the loans prior to modification.

In relation to loans that are in past due status over a certain period of time and deemed uncollectible, the amount of loans is generally fully charged off.

MUAH segment

In the MUAH segment, the methodology for assessing the appropriateness of the allowance consists of several key elements, which include the allocated allowance for loans individually evaluated for impairment, the formula allowance, the allocated allowance for large groups of smaller-balance homogeneous loans, and the unallocated allowance.

Table of Contents

MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The allocated allowance for loans individually evaluated for impairment is established for loans when management determines that the MUFG Group will be unable to collect all amounts due according to the contractual terms of the loan agreement, including interest payments. Impaired loans are carried at the lower of the recorded investment in the loan, the present value of expected future cash flows discounted at the loan's effective rate, the loan's observable market price, or the fair value of the collateral, if the loan is collateral dependent.

The formula allowance is calculated by applying historical loss factors to outstanding loans. Historical loss factors are based on the historical loss experience and may be adjusted for significant factors that, in management's judgment, affect the collectibility of the portfolio as of the balance sheet date.

The allocated allowance for large groups of smaller-balance homogeneous loans is established for consumer loans as well as for smaller balance commercial loans. These loans are managed on a pool basis, and loss factors are based on expected net charge-off ranges.

The unallocated allowance represents an estimate of additional losses inherent in the loan portfolio and is composed of attribution factors, which are based upon management's evaluation of various conditions that are not directly measured in the determination of the allocated allowance. The conditions used for consideration of the unallocated allowance at each balance sheet date include factors, such as existing general economic and business conditions affecting the key lending areas and products of the MUFG Group, credit quality trends and risk identification, collateral values, loan volumes, underwriting standards and concentrations, specific industry conditions, recent loss experience and the duration of the current business cycle. The MUFG Group reviews these conditions and has an internal discussion with senior credit officers on a quarterly basis.

Loans that have been modified into a TDR are treated as impaired loans. For nonaccrual TDRs, the allowance for credit losses is provided for these loans using the discounted cash flow method, or based on the fair value of the collateral. For TDRs accounted for as accruing loans, the allowance for credit losses is determined by using the discounted cash flow method whereby the estimated future cash flows are discounted using the effective interest rate of the loans prior to modification.

Commercial loans are generally considered uncollectible based on an evaluation of the financial condition of a borrower as well as the value of any collateral and, when considered to be uncollectible, loans are charged off in whole or in part. Consumer loans are generally considered uncollectible based on past due status and the value of any collateral and, when considered to be uncollectible, loans are charged off in whole or in part.

Krungsri segment

In the Krungsri segment, the methodology for assessing the appropriateness of the allowance consists of several key elements, which include the allocated allowance for loans individually evaluated for impairment, the formula allowance, and the allocated allowance for large groups of smaller-balance homogeneous loans.

The allocated allowance for loans individually evaluated for impairment is established for loans when management determines that the MUFG Group will be unable to collect all amounts due according to the contractual terms of the

loan agreement, including interest payments. Impaired loans are carried at the lower of the recorded investment in the loan, the present value of expected future cash flows discounted at the loan's effective rate, the loan's observable market price, or the fair value of the collateral, if the loan is collateral dependent.

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The formula allowance is calculated by applying historical loss factors to outstanding loans. Historical loss factors are based on the historical loss experience and may be adjusted for significant factors that, in management's judgment, affect the collectibility of the portfolio as of the balance sheet date.

The allocated allowance for large groups of smaller-balance homogeneous loans is established for smaller balance loans such as housing loans, credit card loans, and personal loans. These loans are managed on a pool basis, and loss factors are based on expected net charge-off ranges.

Loans that have been modified into a TDR are treated as impaired loans. For nonaccrual TDRs, the allowance for credit losses is provided for these loans using the discounted cash flow method, or based on the fair value of the collateral. For TDRs accounted for as accruing loans, the allowance for credit losses is determined by using the discounted cash flow method whereby the estimated future cash flows are discounted using the effective interest rate of the loans prior to modification.

Loans to customers are charged off when they are determined to be uncollectible considering the financial condition of a borrower.

Allowance for Off-Balance Sheet Credit Instruments The MUFG Group maintains an allowance for credit losses on off-balance sheet credit instruments, including commitments to extend credit, guarantees, standby letters of credit and other financial instruments. The allowance is recorded as a liability in Other liabilities. The MUFG Group adopts the same methodology used in determining the allowance for credit losses on loans. Potential credit losses related to derivatives are considered in the fair value of the derivatives.

Net changes in the allowance for off-balance sheet credit instruments are accounted for as Other non-interest expenses.

Premises and Equipment Premises and equipment are stated at cost less accumulated depreciation and amortization. Depreciation is charged to operations over the estimated useful lives of the related assets. Leasehold improvements are depreciated over the terms of the respective leases or the estimated useful lives of the improvements, whichever is shorter. MUFG, BTMU and MUTB apply the declining-balance method in depreciating their premises and equipment, while other subsidiaries mainly apply the straight-line method, at rates principally based on the following estimated useful lives:

	Years
Buildings	15 to 50
Equipment and furniture	2 to 20
Leasehold improvements	5 to 39

Maintenance, repairs and minor improvements are charged to operations as incurred. Major improvements are capitalized. Net gains or losses on dispositions of premises and equipment are included in Other non-interest income or expense, as appropriate.

Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of an asset to be held and used is measured by a comparison of the carrying amount to future undiscounted net cash flows expected to be generated by the asset. If an asset is considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the asset exceeds the fair value. For purposes of recognition and measurement of an impairment loss, a long-lived asset or assets are grouped with other assets and liabilities at the lowest level with independent and identifiable cash flows. Assets to be disposed of by sale are reported at the lower of the carrying amount or fair value less estimated cost to sell.

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Asset retirement obligations related to restoration of certain leased properties upon lease termination are recorded in Other liabilities with a corresponding increase in leasehold improvements. The amounts represent the present value of expected future cash flows associated with returning such leased properties to their original condition. The difference between the gross and present value of expected future cash flows is accreted over the life of the related leases as a non-interest expense.

Goodwill The MUFG Group recognizes goodwill, as of the acquisition date, measured as the excess of the purchase price over the fair value of the net assets acquired. Goodwill related to investments in equity method investees is included in Other assets as a part of the carrying amount of investments in equity method investees.

Goodwill arising from a business combination is not amortized but is tested at least annually for impairment. Goodwill is recorded at a designated reporting unit level for the purpose of assessing impairment. A reporting unit is an operating segment, or an identified business unit one level below an operating segment. An impairment loss is recognized to the extent that the carrying amount of goodwill exceeds its implied fair value.

Intangible assets Intangible assets consist of software, core deposit intangibles, customer relationships, trade names and other intangible assets. These are amortized over their estimated useful lives unless they have indefinite useful lives. Amortization of intangible assets is computed in a manner that best reflects the economic benefits of the intangible assets as follows:

	Useful lives (years)	Amortization method
Software	2 to 10	Straight-line
Core deposit intangibles	10 to 16	Straight-line
Customer relationships	7 to 27	Straight-line, Declining-balance
Trade names	7 to 40	Straight-line

Intangible assets having indefinite useful lives are not amortized but are subject to annual impairment tests. An impairment exists if the carrying value of an indefinite-lived intangible asset exceeds its fair value. For other intangible assets subject to amortization, an impairment is recognized if the carrying amount is not recoverable and the carrying amount exceeds the fair value of the intangible asset.

The MUFG Group capitalizes certain costs associated with the acquisition or development of internal-use software. Costs subject to capitalization are salaries and employee benefits for employees who are directly associated with and who devote time to the internal-use computer software project, to the extent of time spent directly on the project. Once the software is ready for its intended use, the MUFG Group begins to amortize capitalized costs on a straight-line basis.

Accrued Severance and Pension Liabilities The MUFG Group has defined benefit pension plans and other postretirement benefit plans, including severance indemnities plans (SIPs). The liabilities related to these plans are computed and recognized based on actuarial computations. Net actuarial gains and losses that arise from differences

between actual experience and assumptions are generally amortized over the average remaining service period of participating employees if it exceeds the corridor, which is defined as the greater of 10% of plan assets or the projected benefit obligation. Under the guidance related to employers' accounting for defined benefit pension and other postretirement plans, the MUFG Group recognizes a net liability or asset to report the funded status of its defined benefit pension and other postretirement plans in the accompanying consolidated balance sheets and mainly recognizes changes in the funded status of defined benefit pension and other postretirement plans in the year in which the changes occur in Accumulated OCI. The costs of the plans, based on actuarial computations of current and future employee benefits, are charged to Salaries and employee benefits. The MUFG Group measures plan assets and benefit obligations as of the date of the consolidated balance sheets.

F-23

Table of Contents

MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Long-Term Debt Premiums, discounts and issuance costs of long-term debt are amortized based on the method that approximates the interest method over the term of the long-term debt.

Obligations under Guarantees The MUFG Group provides customers with a variety of guarantees and similar arrangements, including standby letters of credit, financial and performance guarantees, credit protection, and liquidity facilities. The MUFG Group recognizes guarantee fee income over the guarantee period based on the contractual terms of the guarantee contracts. It is the MUFG Group's business practice to receive a guarantee fee at the inception of the guarantee, which approximates market value of the guarantee and is initially recorded as a liability, which is then recognized as guarantee fee income over the guarantee period.

Allowance for Repayment of Excess Interest The MUFG Group maintains an allowance for repayment of excess interest based on an analysis of past experience of reimbursement of excess interest, borrowers' profile, recent trend of borrowers' claims for reimbursement, and management's future forecasts. The allowance is recorded as a liability in Other liabilities.

Fees and Commissions Revenue recognition of major components of fees and commissions is as follows:

Fees and commissions on deposits, fees and commissions on remittances and transfers, fees and commissions on foreign trading business, fees and commissions on security-related services, fees and commissions on administration and management service for investment funds, insurance commissions, fees and commissions on real estate business and fees and commissions from other services are generally recognized as revenue when the related services are performed or recognized over the period that the service is provided.

Fees from trade-related financing services are recognized over the period of the financing.

Trust fees are recognized on an accrual basis, generally based on the volume of trust assets under management and/or the operating performance for the accounting period of each trust account. With respect to the trust accounts with guarantee of trust principal, trust fees are determined based on the profits earned by individual trust accounts during the trust accounting period, less deductions, including provision for reserve, impairment for individual investments and dividends paid to beneficiary certificate holders. The trust fees for these trust accounts are accrued based on the amounts expected to be earned during the accounting period of each trust account.

Annual fees and royalty and other service charges related to credit card business are recorded on a straight-line basis as services are provided.

Interchange income from the credit card business is recognized as billed.

Guarantee fees are generally recognized over the contractual periods of the respective guarantees. Amounts initially recorded as a liability corresponding to the obligations at fair value are generally recognized as revenue over the terms of the guarantees as the MUFG Group is deemed to be released from the risk under guarantees.

Income Taxes The MUFG Group accounts for income taxes under the asset and liability method, which requires the recognition of deferred tax assets and deferred tax liabilities for the expected future tax consequences of events that have been included in the accompanying consolidated financial statements. Under this method, deferred tax assets and deferred tax liabilities are determined based on the differences between the financial statements and tax basis of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse. The effect of a change in tax rates on deferred tax assets and deferred tax liabilities is recognized in income in the period that includes the enactment date.

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The MUFG Group records net deferred tax assets to the extent these assets will more likely than not be realized. In making such determination, all available positive and negative evidence is considered, including future reversals of existing taxable temporary differences, projected future taxable income, tax planning strategies and recent financial operations. In the event the MUFG Group were to determine that it would be able to realize deferred tax assets in the future in excess of their net recorded amount, the MUFG Group would make an adjustment to the valuation allowance, which would reduce the provision for income taxes.

Uncertain tax positions are recorded on the basis of a two-step process whereby (1) it is determined whether it is more likely than not that the tax position will be sustained on the basis of its technical merits, and (2) for those tax positions that meet the more-likely-than-not recognition threshold, the MUFG Group recognizes the largest amount of tax benefit that is more than 50% likely to be realized upon ultimate settlement with the related tax authority. The MUFG Group recognizes interest and penalties related to unrecognized tax benefits within income tax expense. Accrued interest and penalties are included within Other liabilities.

Free Distributions of Common Shares As permitted by the Companies Act of Japan (the Companies Act), Japanese companies, upon approval by the Board of Directors, may make a free distribution of shares, in the form of a stock split as defined, to shareholders. In accordance with generally accepted accounting practice in Japan, such distribution does not give rise to any change in capital stock or capital surplus accounts. Common shares distributed are recorded as shares issued on the distribution date. See Note 18 for further information.

Earnings per Common Share Basic earnings per share (EPS) excludes dilutive effects of potential common shares and is computed by dividing earnings applicable to common stock shareholders by the weighted average number of common shares outstanding for the period, while diluted EPS gives effect to all dilutive potential common shares that were outstanding during the period. See Note 23 for the computation of basic and diluted EPS.

Treasury Stock The MUFG Group presents its treasury stock, including shares of MUFG owned by its subsidiaries and affiliated companies, as a reduction of equity on the accompanying consolidated balance sheets at cost and accounts for treasury stock transactions under an average cost method. Gains (losses) on sales of treasury stock are charged to capital surplus and unappropriated retained earnings.

Comprehensive Income Comprehensive income includes net income before attribution to noncontrolling interests and other comprehensive income (OCI). All changes in unrealized gains and losses on investment securities, unrealized gains and losses on derivatives qualifying for cash flow hedges, defined benefit plans and foreign currency translation adjustments constitute OCI and are presented, with related income tax effects, in the accompanying consolidated statements of comprehensive income. OCI also includes changes in the instrument-specific credit risk on financial liabilities (debt valuation adjustments or DVA) accounted for under the fair value option of a foreign affiliated company. See Note 14 for information about the DVA.

Stock-Based Compensation MUFG and certain of its subsidiaries have stock-based compensation plans. Stock-based compensation expenses are recognized based on the grant date fair value of stock-based compensation over the period during which an employee is required to provide service in accordance with the terms of the plans. See Note 33 for further discussion of stock-based compensation plans.

Reclassifications

Certain reclassifications and format changes have been made to the consolidated financial statements for the fiscal year ended March 31, 2014 and 2015 to conform to the presentation for the fiscal year ended March 31, 2016. These reclassifications and format changes include 1) the presentation of Impairment of goodwill as a separate line item which had previously been presented as Other non-interest expenses in the consolidated

F-25

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

statements of income, 2) the presentation of Impairment of goodwill as a separate line item which had previously been presented as Other net in cash flows from operating activities, and 3) the combined presentation of proceeds from redemption of Other investment securities which had previously been included in Other net in cash flows from investing activities and Proceeds from sales of Other investment securities into Proceeds from sales and redemption of Other investment securities in the consolidated statements of cash flows for the fiscal year ended March 31, 2014 and 2015. These reclassifications and format changes did not result in a change to previously reported financial positions, results of operations and cash flows.

Accounting Changes

Accounting for Investments in Qualified Affordable Housing Projects In January 2014, the Financial Accounting Standards Board (FASB) issued guidance on accounting for investments by a reporting entity in flow-through limited liability entities that manage or invest in affordable housing projects that qualify for the low-income housing tax credit. The guidance permits reporting entities to make an accounting policy election to account for their investments in qualified affordable housing projects using the proportional amortization method if certain conditions are met. Under the proportional amortization method, an entity amortizes the initial cost of the investment in proportion to the tax credits and other tax benefits received and recognizes the net investment performance in the income statement as a component of income tax expense (benefit). For those investments in qualified affordable housing projects not accounted for using the proportional amortization method, the investment should be accounted for as an equity method investment or a cost-method investment. This guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2014 and should be applied retrospectively to all periods presented. The MUFG Group adopted this guidance on April 1, 2015, and there was no material impact on its financial position and results of operations.

Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure In January 2014, the FASB issued guidance that clarifies that an in substance repossession or foreclosure occurs, and a creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan, upon either (1) the creditor obtaining legal title to the residential real estate property upon completion of a foreclosure or (2) the borrower conveying all interest in the residential real estate property to the creditor to satisfy that loan through completion of a deed in lieu of foreclosure or through a similar legal agreement. Additionally, the amendments require interim and annual disclosures of both the amount of foreclosed residential real estate property held by the creditor and the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure according to local requirements of the applicable jurisdiction. This guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2014. Early adoption of this guidance is permitted. The MUFG Group adopted this guidance on April 1, 2015, and there was no material impact on its financial position and results of operations.

Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity In April 2014, the FASB issued new guidance that changes the requirements for reporting discontinued operations. A disposal of a component of an entity or a group of components of an entity is required to be reported in discontinued operations if the disposal represents a strategic shift that has (or will have) a major effect on an entity's operations and financial results when the component of an entity or group of components of an entity meets certain criteria to be classified as held for sale or is

disposed of. This guidance requires an entity to present, for each comparative period, the assets and liabilities of a disposal group that includes a discontinued operation separately in the asset and liability sections, respectively, of the statement of financial position and additional disclosures about discontinued operations. Also, this guidance requires an entity to provide disclosures about a disposal of an individually significant component of an entity that does not qualify for discontinued operations presentation in the financial statements. This guidance is effective for all disposals (or classifications as held for sale) of components of an entity that occur within annual periods beginning on or after December 15, 2014, and

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

interim periods within those years and all businesses that, on acquisition, are classified as held for sale that occur within annual periods beginning on or after December 15, 2014, and interim periods within those years. The MUFG Group adopted this guidance on April 1, 2015, and there was no material impact on its financial position and results of operations.

Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures In June 2014, the FASB issued new guidance which changes the accounting for both repurchase-to-maturity transactions and repurchase financing arrangements. The guidance also requires an entity to disclose information about certain transactions accounted for as a sale in which the transferor retains substantially all of the exposure to the economic return on the transferred financial assets through an agreement with the same counterparty, and information about repurchase agreements, securities lending transactions, and repurchase-to-maturity transactions that are accounted for as secured borrowings. This guidance is effective for interim and annual periods beginning after December 15, 2014, except for the disclosure requirement about repurchase agreements, securities lending transactions, and repurchase-to-maturity transactions accounted for as secured borrowings, that is effective for annual periods beginning after December 15, 2014, and for interim periods beginning after March 15, 2015. The MUFG Group adopted this guidance on April 1, 2015, and there was no material impact on its financial position and results of operations. See Note 16 for further details of the disclosures required by this guidance.

Classification of Certain Government-Guaranteed Mortgage Loans upon Foreclosure In August 2014, the FASB issued new guidance which requires that a mortgage loan be derecognized and that a separate other receivable be recognized upon foreclosure if the following conditions are met: (1) The loan has a government guarantee that is not separable from the loan before foreclosure, (2) at the time of foreclosure, the creditor has the intent to convey the real estate property to the guarantor and make a claim on the guarantee, and the creditor has the ability to recover under that claim and (3) at the time of foreclosure, any amount of the claim that is determined on the basis of the fair value of the real estate is fixed. Upon foreclosure, the separate other receivable should be measured based on the amount of the loan balance (principal and interest) expected to be recovered from the guarantor. This guidance is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2014. The MUFG Group adopted this guidance on April 1, 2015, and there was no material impact on its financial position and results of operations.

Recently Issued Accounting Pronouncements

Revenue from Contracts with Customers In May 2014, the FASB issued new guidance which supersedes the current revenue recognition requirements, including most industry-specific guidance. The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The guidance also requires additional disclosures about the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers, including significant judgments and changes in judgments, and assets recognized from the costs incurred to obtain or fulfill a contract. This guidance is effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. In August 2015,

the FASB issued new guidance which defers the effective date of the new revenue standard by one year. Early adoption is permitted, but not before the original effective date. In March 2016, the FASB issued further guidance related to the principal-versus-agent assessment which requires an entity to determine the nature of the promise to the customer by identifying each specified good or service to be provided and assessing whether an entity controls each specified good or service before that good or service is transferred to the customer. In addition, in April 2016, the FASB issued guidance clarifying certain aspects of identification of promised goods or services and provides implementation guidance on licensing of intellectual property. Furthermore, in May 2016, the FASB issued guidance which amends the guidance on assessing collectibility, presentation of sales taxes, noncash consideration, and contract modifications and completed

F-27

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

contracts at transition, and on disclosure around transition. The effective date and early adoption of these guidances will be the same as the effective date and early adoption of the new revenue standard, which is not yet effective. The MUFG Group is currently evaluating what effect all of the guidance above will have on its financial position and results of operations.

Measuring the Financial Assets and the Financial Liabilities of a Consolidated Collateralized Financing Entity In August 2014, the FASB issued new guidance that clarifies the measurement of the financial assets and financial liabilities of a consolidated collateralized financing entity. A reporting entity that consolidates a collateralized financing entity within the scope of this guidance may elect to measure the financial assets and the financial liabilities of that collateralized financing entity using either the measurement alternative included in this guidance or existing guidance on fair value measurement. When a reporting entity elects the measurement alternative included in this guidance for a collateralized financing entity, the reporting entity should measure both the financial assets and the financial liabilities of that collateralized financing entity in its consolidated financial statements using the more observable of the fair value of the financial assets and the fair value of the financial liabilities. This guidance is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2015. Early adoption of this guidance is permitted as of the beginning of an annual period. The MUFG Group does not expect that the adoption of this guidance will have a material impact on its financial position and results of operations.

Determining Whether the Host Contract in a Hybrid Financial Instrument Issued in the Form of a Share Is More Akin to Debt or to Equity In November 2014, the FASB issued new guidance which clarifies that an entity should consider all relevant terms and features including the embedded derivative feature being evaluated for bifurcation when evaluating the nature of a host contract in a hybrid financial instrument that is issued in the form of a share, and no single term or feature would necessarily determine the economic characteristics and risks of the host contract. The guidance also clarifies that, in evaluating the nature of a host contract, an entity should assess the substance of the relevant terms and features (that is, the relative strength of the debt-like or equity-like terms and features given the facts and circumstances) when considering how to weight those terms and features. This guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. The MUFG Group does not expect that the adoption of the guidance will have a material impact on its financial position and results of operations.

Amendments to the Consolidation Analysis In February 2015, the FASB issued new guidance which amends the consolidation analysis under the current consolidation guidance. The amendments change the VIE analysis for limited partnerships and similar legal entities, the criteria for evaluating whether fees paid to a decision maker or a service provider are a variable interest, the effect of fee arrangements and related parties on the primary beneficiary determination, and the consolidation evaluation for certain investment funds. This guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. Early application is permitted. The adoption of this new accounting guidance on April 1, 2016 resulted in the consolidation and deconsolidation of certain variable interest entities. The net increase of the MUFG Group's consolidated assets, liabilities and Noncontrolling interests on a preliminary basis, were approximately ¥628 billion, ¥32 billion and ¥596 billion, respectively, as of April 1, 2016.

Simplifying the Presentation of Debt Issuance Costs In April 2015, the FASB issued new guidance which simplifies the presentation of debt issuance costs by requiring that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs are not affected by the amendments. This guidance is effective for financial statements issued for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. Early adoption is permitted. In August 2015, the FASB issued further guidance which permits an entity to defer and present debt issuance costs related to a line-of-credit arrangement as an asset and subsequently amortize the deferred debt issuance costs

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

ratably over the term of the line-of-credit arrangement, regardless of whether there are any outstanding borrowings on the line-of-credit arrangement. The MUFG Group does not expect that the adoption of all of the guidance above on the presentation and subsequent measurement of debt issuance costs will have a material impact on its financial position and results of operations.

Customer's Accounting for Fees Paid in a Cloud Computing Arrangement In April 2015, the FASB issued new guidance which simplifies the accounting for cloud computing arrangements by requiring that if a cloud computing arrangement includes a software license, then the customer should account for the software license element of the arrangement consistent with the acquisition of other software licenses. If a cloud computing arrangement does not include a software license, the customer should account for the arrangement as a service contract. This guidance does not change customer's accounting for service contracts. This guidance is effective for annual periods, including interim periods within those annual periods, beginning after December 15, 2015. Early adoption of this guidance is permitted. The MUFG Group is currently evaluating what effect this guidance will have on its financial position and results of operations.

Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent) In May 2015, the FASB issued new guidance which removes the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value per share practical expedient. Instead, a reporting entity is required to provide the amount measured using that practical expedient to permit reconciliation of the fair value of investments included in the fair value hierarchy to the line items presented in the balance sheet. The amendments also remove the requirement to make certain disclosures for all investments that are eligible to be measured at fair value using the net asset value per share practical expedient. Rather, those disclosures are limited to investments for which the entity has elected to measure the fair value using that practical expedient. This guidance is effective for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. Earlier application is permitted. This new guidance will only affect the MUFG Group's fair value hierarchy disclosures, and will not affect the MUFG Group's financial position and results of operations.

Simplifying the Accounting for Measurement-Period Adjustments In September 2015, the FASB issued new guidance which requires that an acquirer recognize adjustments to provisional amounts that are identified during the measurement period, including the related prior period impact on depreciation, amortization, and other income statement items, in the reporting period in which the adjustment amounts are determined. This guidance also requires an entity to present separately on the face of the income statement or disclose in the notes the portion of the amount recorded in current-period earnings by line item that would have been recorded in previous reporting periods if the adjustment to the provisional amounts had been recognized as of the acquisition date. This guidance is effective for fiscal years beginning after December 15, 2015, including interim periods within those fiscal years. Early application is permitted for financial statements that have not been issued. The MUFG Group does not expect that the adoption of this guidance will have a material impact on its financial position and results of operations.

Recognition and Measurement of Financial Assets and Financial Liabilities In January 2016, the FASB issued new guidance which requires equity investment, except those accounted for under the equity method of accounting or those that result in consolidation of the investee, to be measured at fair value with changes in fair value recognized in net income. However, for equity investments that do not have readily determinable fair values, the fair value may be

measured at cost minus impairment, if any, plus or minus changes resulting from observable price changes in orderly transactions for the identical or a similar investment of the same issuer, and the impairment assessment is simplified by performing a qualitative assessment to identify impairments. For financial liabilities which were elected to measure at fair value in accordance with the fair value option, this guidance also requires an entity to present separately in other comprehensive income the position of the changes in the fair value of financial liabilities resulting from a change in the instrument-specific credit risk. In addition,

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

this guidance eliminates the requirement to disclose the methods and significant assumptions used to estimate the fair value for financial instruments measured at amortized cost, and clarifies to require, for disclosure purposes, the use of an exit price notion in the determination of the fair value of financial instruments measured at amortized cost. This guidance also clarifies that an entity must evaluate the need for a valuation allowance on a deferred tax asset related to available-for-sale securities in combination with the entity's other deferred tax assets. This guidance is effective for annual reporting periods beginning after December 15, 2017, including interim periods within that reporting period. Early adoption is not permitted except for the provision that the amendments to the accounting for financial liabilities under the fair value option. The MUFG Group is currently evaluating what effect this guidance will have on its financial position and results of operations.

Leases In February 2016, the FASB issued new guidance which requires that lessees recognize in the statement of financial position a liability to make lease payments (the lease liability) and a right-of-use asset representing its right to use the underlying asset for the lease term. The accounting applied by lessors is largely unchanged, but the accounting model for leveraged leases is not retained for leases that commence after the effective date of this guidance. This guidance also requires entities to provide qualitative and quantitative disclosures about the amount, timing and uncertainty of cash flows arising from leases. This guidance is effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early application is permitted. The MUFG Group is currently evaluating what effect this guidance will have on its financial position and results of operations.

Recognition of Breakage for Certain Prepaid Stored-Value Products In March 2016, the FASB issued new guidance which clarifies that liabilities related to the sale of certain prepaid stored-value products are financial liabilities and provides a narrow scope exception to the guidance on extinguishments of liabilities to require that breakage for those liabilities be accounted for consistent with the breakage model required by the guidance on revenue from contracts with customers for non-financial liabilities. This guidance is effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Earlier application is permitted, including adoption in an interim period. The MUFG Group is currently evaluating what effect this guidance will have on its financial position and results of operations.

Effect of Derivative Contract Novations on Existing Hedge Accounting Relationships In March 2016, the FASB issued new guidance which clarifies that a change in the counterparty to a derivative instrument that has been designated as the hedging instrument does not, in and of itself, require dedesignation of that hedging relationship provided that all other hedge accounting criteria continue to be met. This guidance is effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. Early adoption is permitted, including adoption in an interim period. The MUFG Group does not expect that the adoption of this guidance will have a material impact on its financial position and results of operations.

Contingent Put and Call Options in Debt Instruments In March 2016, the FASB issued new guidance which clarifies the requirements for assessing whether contingent call (put) options that can accelerate the payment of principal on debt instruments are clearly and closely related to their debt hosts. An entity performing the assessment under this guidance is required to assess the embedded call (put) options solely in accordance with the four-step decision sequence, and does not have to assess whether the event that triggers the ability to exercise a call (put) option is related to interest rates or credit risks. This guidance is effective for fiscal years beginning after December 15, 2016,

including interim periods within those fiscal years. Early adoption is permitted, including adoption in an interim period. The MUFG Group is currently evaluating what effect this guidance will have on its financial position and results of operations.

Simplifying the Transition to the Equity Method of Accounting In March 2016, the FASB issued new guidance which eliminates the requirement for retrospective application of the equity method and instead requires investors to apply the equity method prospectively from the date on which significant influence is

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

obtained. This guidance also requires the equity method investor to add the cost of acquiring the additional interest in the investee to the current basis of the investor's previously held interest, and recognize through earnings the unrealized holding gain or loss of an available-for-sale equity security at the date on which that equity security becomes qualified for use of the equity method, if applicable. This guidance is effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. Earlier application is permitted. The MUFG Group does not expect that the adoption of this guidance will have a material impact on its financial position and results of operations.

Improvements to Employee Share-Based Payment Accounting In March 2016, the FASB issued new guidance which amends several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. Under this guidance, an entity can make an entity-wide accounting policy election to either estimate the number of awards that are expected to vest or account for forfeitures when they occur. This guidance is effective for annual periods beginning after December 15, 2016, and interim periods within those annual periods. Early adoption is permitted in any interim or annual period. The MUFG Group is currently evaluating what effect this guidance will have on its financial position and results of operations.

Measurement of Credit Losses on Financial Instruments In June 2016, the FASB issued new guidance which replaces the incurred loss impairment methodology in current U.S. GAAP with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to estimate credit losses. Under this guidance, the measurement of expected credit losses is based on relevant information about past events, including historical experience, current conditions, and reasonable and supportable forecasts that affect the collectibility of the reported amount of the financial asset (or a group of financial assets) measured at amortized cost basis. For available-for-sale debt securities, a credit loss is recorded through an allowance for credit losses and the amount of the allowance is limited to the amount by which fair value is below amortized cost. For purchased financial assets with a more-than-insignificant amount of credit deterioration since origination that are measured at amortized cost basis, the initial allowance for credit losses is added to the purchase price rather than being reported as a credit loss expense, only subsequent changes in the allowance are recorded as a credit loss expense, and interest income is recognized based on the effective interest rate, excluding the discount embedded in the purchase price that is attributable to the acquirer's assessment of credit losses at acquisition. This guidance also expands the disclosure requirements regarding an entity's assumptions, models, and methods for estimating the allowance, and requires the entity to disclose the amortized cost balance for each class of financial asset by credit quality indicator, disaggregated by the year of origination. This guidance is effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. Early adoption is permitted for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. The MUFG Group is currently evaluating what effect all of the guidance above will have on its financial position and results of operations.

2. BUSINESS DEVELOPMENTS***MUAH***

On June 24, 2013, MUFG Union Bank, N.A. (MUB) acquired PB Capital Corporation's institutional commercial real estate (CRE) lending division for ¥358,040 million in cash. The purpose of this transaction was to expand MUB's CRE presence in the U.S., and provide both geographic and asset class diversification. The assets acquired and liabilities assumed were recorded at their estimated fair values on the acquisition date. Measurement period adjustments were applied to the acquisition date fair values, which resulted in recording goodwill of ¥23,115 million as of March 31, 2014. During the fiscal years ended March 31, 2015 and 2016, no measurement period adjustments were applied to the acquisition date fair values, resulting in no change in goodwill.

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****Reorganization of Mitsubishi UFJ Morgan Stanley PB Securities Co., Ltd.***

On March 20, 2014, MUMSS acquired 75% ownership of Mitsubishi UFJ Merrill Lynch PB Securities Co., Ltd., of which 51% and 24% of ownership was acquired from MUSHD and BTMU, respectively, resulting in BTMU holding the remaining 25% ownership. 40% of the difference between the cash paid by MUMSS and the cost basis of assets and liabilities was ¥13,839 million, which was allocated as a reduction in Noncontrolling interests with a corresponding increase in Capital surplus. The purpose of the reorganization is to leverage MUFG's broad customer base, utilize Morgan Stanley's global and high-quality insight, and further its collaborations with other group companies by strengthening its coordination with MUMSS. In connection with the reorganization, Mitsubishi UFJ Merrill Lynch PB Securities Co., Ltd. entered into a new service agreement with Morgan Stanley, and changed its name to Mitsubishi UFJ Morgan Stanley PB Securities Co., Ltd.

MUTB's Acquisition of Butterfield Fulcrum Group

On September 20, 2013, MUTB acquired 100% ownership of FGL Lux Holdings, S.a r.l., a holding company of Butterfield Fulcrum Group, a global alternative fund administrator, headquartered in Bermuda for ¥30,191 million in cash. MUTB has focused on strengthening its global trust banking business based on its medium-term management plan, and conducted several strategic investments in overseas asset managers. The purpose of this transaction, through the investment in a fund administration company, was to expand MUTB's overseas asset administration capabilities. The assets acquired and liabilities assumed were recorded at their estimated fair values on the acquisition date, and measurement period adjustments were applied to the acquisition date fair values, which resulted in recording goodwill of ¥14,443 million and intangible assets of ¥21,646 million as of March 31, 2014. During the fiscal years ended March 31, 2015 and 2016, no measurement period adjustments were applied to the acquisition date fair values. Upon conclusion of the acquisition, Butterfield Fulcrum Group was renamed Mitsubishi UFJ Fund Services Holdings Limited.

BTMU's Acquisition of Vietnam Joint Stock Commercial Bank for Industry and Trade

In May 2013, BTMU acquired approximately 20% of the ordinary shares of Vietnam Joint Stock Commercial Bank for Industry and Trade (VietinBank) for ¥75,136 million. VietinBank is one of the major Vietnamese state-owned commercial banks in terms of assets. Considering both BTMU's ownership of the common stock and representation on the board of directors, the MUFG Group has determined that BTMU has the ability to exercise significant influence over the operating and financial policies of VietinBank and applied the equity method of accounting for its investment.

BTMU's Acquisition of Bank of Ayudhya Public Company Limited

On December 18, 2013, BTMU completed a Voluntary Tender Offer (VTO) for Krungsri shares at Thai baht 39 per share. Upon the completion of the VTO, BTMU purchased 72.01% of Krungsri's total outstanding shares for ¥545,840 million in cash. As a result of the acquisition of a majority stake in Krungsri by BTMU, Krungsri became a subsidiary of BTMU. The MUFG Group recorded goodwill of ¥217,386 million and intangible assets of ¥214,607 million at the acquisition date. The MUFG Group also recorded noncontrolling interests of ¥202,223 million

at fair value determined by the quoted market price as of the acquisition date.

Krungsri is a commercial bank with deep market knowledge in Thailand offering diversified financial services to a wide ranging client base. Hence, the investment in Krungsri is part of BTMU's strategy to establish a full-fledged commercial banking platform in Asia. The purpose of the acquisition is to strengthen the business foundation in Asia, providing comprehensive financial services to various local and multinational corporate customers.

Table of Contents

MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Integration of Bank of Ayudhya Public Company Limited and BTMU Bangkok Branch

On January 5, 2015, BTMU integrated the former BTMU Bangkok Branch with Krungsri through the contribution in kind of the former BTMU Bangkok Branch business to Krungsri, which was treated as a common control transaction. In exchange for the contribution in kind, Krungsri issued 1,281,618,026 common shares at Thai baht 40.49 per share to BTMU. After the integration, BTMU holds 5,655,332,146 common shares in Krungsri, and the percentage of Krungsri's shares held by BTMU is 76.88%.

The change in noncontrolling ownership interests of Krungsri including the contribution in kind of the former BTMU Bangkok Branch was ¥15,269 million, resulting in a corresponding increase in Noncontrolling interests and a decrease in Capital surplus.

Mitsubishi UFJ Fund Services's Acquisition of UBS Global Asset Management's Alternative Fund Services Business

On December 11, 2015, Mitsubishi UFJ Fund Services Holdings Limited (Mitsubishi UFJ Fund Services), a global asset servicing subsidiary of MUTB, acquired the alternative fund services business of UBS Global Asset Management for ¥24,601 million in cash, and thereby recorded goodwill of ¥2,732 million and intangible assets of ¥7,622 million. UBS Global Asset Management is a global fund administrator providing professional services for hedge funds, funds of hedge funds, private equity funds and real estate structures. Mitsubishi UFJ Fund Services has focused on strengthening its operational abilities, to further improve the quality of services, and to expand its global network through acquisitions and investments. The purpose of this transaction is to enhance the MUFG Group's competitiveness and scale of operations in the global fund administration market with the aim to be a global industry-leading fund administrator. The assets acquired and liabilities assumed were recorded at their estimated fair values on the acquisition date.

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****3. INVESTMENT SECURITIES**

The following tables present the amortized cost, gross unrealized gains and losses and fair value of Available-for-sale securities and Held-to-maturity securities at March 31, 2015 and 2016:

At March 31, 2015:	Amortized cost	Gross unrealized gains	Gross unrealized losses	Fair value
		(in millions)		
Available-for-sale securities:				
Debt securities:				
Japanese national government and Japanese government agency bonds	¥ 35,079,893	¥ 327,023	¥ 1,284	¥ 35,405,632
Japanese prefectural and municipal bonds	186,872	7,610	67	194,415

Notes:

- (1) Other debt securities in the table above include ¥168,678 million of private placement debt conduit bonds.
- (2) The MUFG Group reclassified residential mortgage-backed securities from Available-for-sale securities to Held-to-maturity securities during the fiscal year ended March 31, 2013. As a result of the reclassification of residential mortgage-backed securities, the unrealized gains before taxes at the date of reclassification remaining in Accumulated OCI in the accompanying consolidated balance sheets were ¥229 million at March 31, 2016 and are not included in the table above.
- (3)

MUAH reclassified residential mortgage-backed securities and commercial mortgage-backed securities from Available-for-sale securities to Held-to-maturity securities during the fiscal year ended March 31, 2014. As a result of the reclassification of residential mortgage-backed securities and commercial mortgage-backed securities, the unrealized losses before taxes at the date of reclassification remaining in Accumulated OCI in the accompanying consolidated balance sheets were ¥6,183 million and ¥8,748 million, respectively, at March 31, 2016 and are not included in the table above.

Other Securities

Investment securities other than Available-for-sale securities or Held-to-maturity securities (i.e., nonmarketable equity securities presented in Other investment securities) were primarily carried at cost of ¥564,582 million and ¥530,026 million at March 31, 2015 and 2016, respectively, because their fair values were not readily determinable.

The remaining balances were investment securities held by certain subsidiaries subject to specialized industry accounting principles for investment companies and broker-dealers and carried at fair value of ¥22,537 million and ¥24,689 million at March 31, 2015 and 2016, respectively. See Note 32 for the valuation techniques and inputs used to estimate the fair values.

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

With respect to cost-method investments of ¥152,350 million and ¥97,774 million at March 31, 2015 and 2016, respectively, the MUFG Group estimated a fair value using commonly accepted valuation techniques to determine whether the investments were impaired in each reporting period. See Note 32 for the details of these commonly accepted valuation techniques. If the fair value of the investment is less than the cost of the investment, the MUFG Group proceeds to evaluate whether the impairment is other-than-temporary.

With respect to cost-method investments of ¥412,232 million and ¥432,252 million at March 31, 2015 and 2016, respectively, the MUFG Group performed a test to determine whether any impairment indicators existed for each investment in each reporting period. If an impairment indicator exists, the MUFG Group estimates the fair value of the cost-method investment. If the fair value of the investment is less than the cost of the investment, the MUFG Group performs an evaluation of whether the impairment is other-than-temporary. The primary method the MUFG Group uses to identify impairment indicators is a comparison of the MUFG Group's share of an investee's net assets to the cost of the MUFG Group's investment in the investee. The MUFG Group also considers whether significant adverse changes in the regulatory, economic or technological environment have occurred with respect to the investee. The MUFG Group periodically monitors the status of each investee including the credit rating, which is generally updated once a year based on the annual financial statements of the issuer. In addition, if an event that could impact the credit rating of an investee occurs, the MUFG Group reassesses the appropriateness of the credit rating assigned to the issuer in order to maintain an updated credit rating. The MUFG Group did not estimate the fair value of cost-method investments, which had aggregated costs of ¥409,892 million and ¥431,705 million at March 31, 2015 and 2016, respectively, since it was not practical and the MUFG Group identified no impairment indicators.

Based on the procedures described above, the MUFG Group recognized other-than-temporary impairment losses on the cost-method investments of ¥3,628 million and ¥1,821 million for the fiscal years ended March 31, 2014 and 2015, respectively. For the fiscal year ended March 31, 2016, the MUFG Group also recognized impairment losses on the cost-method investments of ¥14,242 million mainly derived from a limited number of companies categorized in the manufacturing industry. Each impairment loss was recognized based on the specific circumstances of each individual company.

Contractual Maturities

The amortized cost and fair values of Held-to-maturity debt securities and the fair values of Available-for-sale debt securities at March 31, 2016 by contractual maturity are shown below. Expected maturities may be shorter than contractual maturities because issuers of debt securities may have the right to call or prepay obligations with or without penalties. Debt securities not due at a single maturity date and securities embedded with call or prepayment options, such as mortgage-backed securities, are included in the table below based on their contractual maturities.

	Held-to-maturity debt securities		Available-for-sale debt securities
	Amortized cost	Fair value	Fair value

	(in millions)		
Due in one year or less	¥ 263	¥ 263	¥ 12,092,371
Due from one year to five years	131,416	134,442	11,025,203

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Realized Gains and Losses and Transfers of Investment Securities

For the fiscal years ended March 31, 2014, 2015 and 2016, gross realized gains on sales of Available-for-sale securities were ¥261,384 million, ¥195,272 million and ¥317,454 million, respectively, and gross realized losses on sales of Available-for-sale securities were ¥54,921 million, ¥53,628 million and ¥52,904 million, respectively.

For the fiscal year ended March 31, 2014, MUAH transferred certain residential mortgage-backed securities and commercial mortgage-backed securities of ¥411,535 million from Available-for-sale securities to Held-to-maturity securities to reduce the impact of price volatility on Accumulated OCI and in consideration of changes to regulatory capital requirements under U.S. Basel III rules.

Other-than-temporary Impairments of Investment Securities

For the fiscal years ended March 31, 2014, 2015 and 2016, losses resulting from impairment of investment securities to reflect the decline in value considered to be other-than-temporary were ¥6,534 million, ¥5,919 million and ¥37,153 million, respectively, which were included in Investment securities gains net in the accompanying consolidated statements of income. The losses of ¥6,534 million for the fiscal year ended March 31, 2014 included losses of ¥2,605 million from Available-for-sale debt securities which mainly comprised of corporate bonds, and ¥3,628 million from nonmarketable equity securities. The losses of ¥5,919 million for the fiscal year ended March 31, 2015 included losses of ¥3,513 million from Available-for-sale debt securities which mainly comprised of corporate bonds, and ¥1,821 million from nonmarketable equity securities. The losses of ¥37,153 million for the fiscal year ended March 31, 2016 included losses of ¥21,948 million from marketable equity securities, ¥963 million from Available-for-sale debt securities which mainly comprised of corporate bonds, and ¥14,242 million from nonmarketable equity securities.

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****Gross Unrealized Losses and Fair Value***

The following tables show the gross unrealized losses and fair value of Available-for-sale securities and Held-to-maturity securities at March 31, 2015 and 2016 by length of time that individual securities in each category have been in a continuous loss position:

Evaluating Investment Securities for Other-than-temporary Impairments

The following describes the nature of the MUFG Group's investments and the conclusions reached in determining whether the unrealized losses were temporary or other-than-temporary.

Japanese national government and Japanese government agency bonds, and Foreign governments and official institutions bonds

As of March 31, 2016, unrealized losses associated with these securities were deemed to be attributable to changes in market interest rates rather than a deterioration in the creditworthiness of the underlying obligor. Based on a consideration of factors, including cash flow analysis, the MUFG Group expects to recover the entire amortized cost basis of these securities. Accordingly, such changes are considered to be temporary and no impairment loss has been recorded.

Residential and commercial mortgage-backed securities

As of March 31, 2016, unrealized losses associated with these securities were deemed to be attributable to changes in market interest rates rather than a deterioration in the creditworthiness of the underlying obligor.

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Based on a consideration of factors, including cash flow analysis, the MUFG Group expects to recover the entire amortized cost basis of these securities. Accordingly, such changes are considered to be temporary and no impairment loss has been recorded.

Asset-backed securities

As of March 31, 2016, unrealized losses on these securities were primarily driven by certain collateralized loan obligations (CLOs), highly illiquid securities for which fair values are difficult to determine. Unrealized losses arise from widening credit spreads, deterioration of the credit quality of the underlying collateral, uncertainty regarding the valuation of such securities and the market's view of the performance of the fund managers. When the fair value of a security is lower than its amortized cost or when any security is subject to a deterioration in credit rating, the MUFG Group undertakes a cash flow analysis of the underlying collateral to estimate the OTTI and confirms the intent and ability to hold these securities until recovery. Based on the analysis performed, no OTTI was identified as of March 31, 2016 and no impairment loss has been recorded.

Corporate bonds

As of March 31, 2016, unrealized losses associated with corporate bonds were primarily related to private placement bonds issued by Japanese non-public companies. The credit loss component recognized in earnings is identified as the amount of principal cash flows not expected to be received over the remaining terms of the bonds as estimated using the MUFG Group's cash flow projections. The key assumptions include probability of default based on credit ratings of the bond issuers and loss given default.

The following table presents a roll-forward of the credit loss component recognized in earnings. The balance at the beginning of each fiscal year represents the credit loss component for which OTTI occurred on debt securities in prior periods. The additions represent the first time a debt security was credit impaired or when subsequent credit impairment has occurred. The credit loss component is reduced when the corporate bonds mature or are sold.

	2014	2015	2016
	(in millions)		
Balance at beginning of fiscal year	¥ 24,525	¥ 12,556	¥ 8,814
Additions:			
Initial credit impairments	1,466	2,728	915
Subsequent credit impairments	1,139	785	48
Reductions:			
Securities sold or matured	(14,574)	(7,255)	(3,086)
Balance at end of fiscal year	¥ 12,556	¥ 8,814	¥ 6,691

The cumulative declines in fair value of the credit impaired debt securities, which were mainly corporate bonds, held at March 31, 2015 and 2016 were ¥4,602 million and ¥4,098 million, respectively. Of which, the credit loss components recognized in earnings were ¥8,814 million and ¥6,691 million, and the remaining amounts related to all other factors recognized in Accumulated OCI before taxes were ¥4,212 million and ¥2,593 million at March 31, 2015 and 2016, respectively.

F-40

Table of Contents

MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Other debt securities

As of March 31, 2016, other debt securities primarily consist of private placement debt conduit bonds, which are not rated by external credit rating agencies. The unrealized losses on these bonds result from a higher return on capital expected by the secondary market compared with the return on capital required at the time of origination when the bonds were purchased. The MUFG Group estimates loss projections for each security by assessing the underlying collateral of each security. The MUFG Group estimates the portion of loss attributable to credit based on the expected cash flows of the underlying collateral using estimates of current key assumptions such as probability of default and loss severity. Cash flow analysis of the underlying collateral provides an estimate of OTTI, which is performed when the fair value of a security is lower than its amortized cost and potential impairment is identified. Based on the analysis, no OTTI losses were recorded in the accompanying consolidated statements of income.

Marketable equity securities

The MUFG Group determines whether unrealized losses on marketable equity securities are temporary based on its ability and positive intent to hold the investments for a period of time sufficient to allow for any anticipated recovery and the results of its review conducted to identify and evaluate investments that have indications of possible impairment. Impairment is evaluated considering various factors, and their relative significance varies from case to case. The MUFG Group's review includes, but is not limited to, consideration of the following factors:

The length of time that the fair value of the investment has been below cost The MUFG Group generally deems a continued decline of fair value below cost for six months or more to be other-than-temporary.

The extent to which the fair value of investments has been below cost as of the end of the reporting period The MUFG Group's investment portfolio is exposed to volatile equity prices affected by many factors including investors' perspectives as to future economic prospects and the issuers' performance. The MUFG Group generally deems the decline in fair value below cost of 20% or more as an indicator of an other-than-temporary decline in fair value.

The financial condition and near-term prospects of the issuer The MUFG Group considers the financial condition and near-term prospects of the issuer primarily based on the credit standing of the issuers as determined by its credit rating system.

At March 31, 2016, unrealized losses on marketable equity securities which have been in a continuous loss position are considered temporary based on the evaluation as described above.

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****4. LOANS AND ALLOWANCE FOR CREDIT LOSSES**

Loans at March 31, 2015 and 2016 by domicile and industry of the borrower are summarized below. Classification of loans by industry is based on the industry segment loan classifications as defined by the Bank of Japan.

	2015	2016
	(in millions)	
Domestic:		
Manufacturing	¥ 11,703,428	¥ 12,158,642
Construction	977,892	913,180

Other	6,065,782	5,818,747
Total foreign	48,684,109	50,654,587
Unearned income, unamortized premiums net and deferred loan fees net	(293,672)	(299,567)
Total⁽²⁾	¥ 118,265,202	¥ 122,790,958

Notes:

- (1) Loans to so-called non-bank finance companies are generally included in the Banks and other financial institutions category. Non-bank finance companies are primarily engaged in consumer lending, factoring and credit card businesses.
- (2) The above table includes loans held for sale of ¥88,927 million and ¥100,889 million at March 31, 2015 and 2016, respectively, which are carried at the lower of cost or fair value.

The MUFG Group classifies its loan portfolio into the following portfolio segments Commercial, Residential, Card, MUAH, and Krungsri based on the grouping used by the MUFG Group to determine the allowance for credit losses. See Note 1 for further information.

Loans of ¥950,295 million, which were transferred from the former BTMU Bangkok Branch to Krungsri, were included in the Commercial segment as of March 31, 2015. For the fiscal year starting from April 1, 2015, these loans were integrated into the Krungsri segment since the methodologies used to estimate the allowance for credit losses on these loans were changed to those of the Krungsri segment. An allowance for credit losses relating to these loans was not material as of March 31, 2015.

Nonaccrual Loans

Originated loans are generally placed on nonaccrual status when substantial doubt exists as to the full and timely collection of either principal or interest, when principal or interest is contractually past due one month or more with respect to loans within all classes of the Commercial segment, three months or more with respect to loans within the Card, MUAH, and Krungsri segments, and six months or more with respect to loans within the Residential segment. See Note 1 for further information.

Notes:

- (1) These loans do not require an allowance for credit losses because the fair values of the impaired loans equal or exceed the recorded investments in the loans.
- (2) Included in impaired loans at March 31, 2015 and 2016 are accrual TDRs as follows: ¥708,414 million and ¥457,219 million Commercial; ¥71,454 million and ¥60,634 million Residential; ¥44,661 million and ¥37,896 million Card; ¥34,106 million and ¥49,601 million MUAH; and ¥8,455 million and ¥8,494 million Krungsri, respectively.
- (3) In addition to impaired loans presented in the above table, there were loans held for sale that were impaired of ¥624 million and ¥400 million at March 31, 2015 and 2016, respectively.

Interest income on nonaccrual loans for all classes was recognized on a cash basis when ultimate collectibility of principal was certain. Otherwise, cash receipts were applied as principal reductions. Interest income on accruing impaired loans, including TDRs, was recognized on an accrual basis to the extent that the collectibility of interest income was reasonably certain based on management's assessment.

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table shows a roll-forward of accrual TDRs and other impaired loans (including nonaccrual TDRs) for the fiscal years ended March 31, 2014, 2015 and 2016:

	2014	2015 (in millions)	2016

Foreign-excluding MUAH and Krungsri	97,032	103,615
Residential⁽¹⁾	71,454	60,634
Card⁽²⁾	90,705	79,309
MUAH⁽²⁾	56,299	98,843
Krungsri⁽²⁾	19,924	26,422
Total	¥ 946,796	¥ 722,427

Notes:

- (1) TDRs for the Commercial and Residential segments include accruing loans with concessions granted, and do not include nonaccrual loans with concessions granted.
- (2) TDRs for the Card, MUAH and Krungsri segments include accrual and nonaccrual loans. Included in the outstanding recorded investment balances as of March 31, 2015 and 2016 are nonaccrual TDRs as follows: ¥46,044 million and ¥41,413 million Card; ¥22,193 million and ¥49,242 million MUAH; and ¥7,136 million and ¥13,756 million Krungsri, respectively.

A modification of terms of a loan under a TDR mainly involves: (i) a reduction in the stated interest rate applicable to the loan, (ii) an extension of the stated maturity date of the loan, (iii) a partial forgiveness of the principal of the loan, or (iv) a combination of all of these. Those loans are also considered impaired loans, and hence the allowance for credit losses is separately established for each loan. As a result, the amount of allowance for credit losses increases in many cases upon classification as a TDR loan. The amount of pre-modification outstanding recorded investment and post-modification outstanding recorded investment may differ due to write-offs made as part of the concession. The

impact of write-offs associated with TDRs on the MUFG Group's results of operations for the fiscal years ended March 31, 2014, 2015 and 2016 was not material.

TDRs for the Commercial and Residential segments in the above tables include accruing loans with concessions granted, and do not include nonaccrual loans with concessions granted. Once a loan is classified as a nonaccrual loan, a modification would have little likelihood of resulting in the recovery of the loan in view of the severity of the financial difficulty of the borrower. Therefore, even if a nonaccrual loan is modified, the loan continues to be classified as a nonaccrual loan. The vast majority of modifications to nonaccrual loans are temporary extensions of the maturity dates, typically for periods up to 90 days, and continually made as the borrower is unable to repay or refinance the loan at the extended maturity. Accordingly, the impact of such TDRs on the outstanding recorded investment is immaterial, and the vast majority of nonaccrual TDRs have subsequently defaulted.

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

TDRs that subsequently defaulted in the Commercial and Residential segments of the above tables include those accruing loans that became past due one month or more within the Commercial segment and six months or more within the Residential segment, and those accruing loans reclassified to nonaccrual loans due to financial difficulties even without delinquencies. This is because classification as a nonaccrual loan is regarded as default under the MUFG Group's credit policy. Also, the MUFG Group defines default as payment default for the purpose of the disclosure.

Regarding the Card, MUAH and Krungsri segments, the TDRs in the above tables represent modified nonaccrual and accruing loans, and the defaulted loans in the above table represent nonaccruing and accruing loans that became past due one month or more within the Card segment, 60 days or more within the MUAH segment, and six months or more within the Krungsri segment.

Historical payment defaults are one of the factors considered when projecting future cash flows in determining the allowance for credit losses for each segment.

The MUFG Group provided commitments to extend credit to customers with TDRs. The amounts of such commitments were ¥24,332 million and ¥31,302 million at March 31, 2015 and 2016, respectively. See Note 25 for further discussion of commitments to extend credit.

MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(2) Total loans of MUAH do not include FDIC covered loans and small business loans which are not individually rated totaling ¥53,884 million and ¥43,037 million as of March 31, 2015 and 2016, respectively. The MUFG Group will be reimbursed for a substantial portion of any future losses on FDIC covered loans under the terms of the FDIC loss share agreements.

The MUFG Group classifies loans into risk categories based on relevant information about the ability of borrowers to service their debt, including, but not limited to, historical and current financial information, historical and current payment experience, credit documentation, public and non-public information about borrowers and current economic trends as deemed appropriate to each segment.

The primary credit quality indicator for loans within all classes of the Commercial segment is the internal credit rating assigned to each borrower based on the MUFG Group's internal borrower ratings of 1 through 15, with the rating of 1 assigned to a borrower with the highest quality of credit. When assigning a credit rating to a borrower, the MUFG Group evaluates the borrower's expected debt-service capability based on various information, including financial and operating information of the borrower as well as information on the industry in which the borrower operates, and the borrower's business profile, management and compliance system. In evaluating a borrower's debt-service capability, the MUFG Group also conducts an assessment of the level of earnings and an analysis of the borrower's net worth. Based on the internal borrower rating, loans within the Commercial segment are categorized as Normal (internal borrower ratings of 1 through 9), Close Watch (internal borrower ratings of 10 through 12), and Likely to become Bankrupt or Legally/Virtually Bankrupt (internal borrower ratings of 13 through 15).

Loans to borrowers categorized as Normal represent those that are not deemed to have collectibility issues.

Loans to borrowers categorized as Close Watch represent those that require close monitoring as the borrower has begun to exhibit elements of potential concern with respect to its business performance and financial condition, the borrower has begun to exhibit elements of serious concern with respect to its business performance and financial condition, including business problems requiring long-term solutions, or the borrower's loans are TDRs or loans contractually past due 90 days or more for special reasons.

Loans to borrowers categorized as Likely to become Bankrupt or Legally/Virtually Bankrupt represent those that have a higher probability of default than those categorized as Close Watch due to serious debt repayment problems with poor progress in achieving restructuring plans, the borrower being considered virtually bankrupt with no prospects for an improvement in business operations, or the borrower being legally bankrupt with no prospects for continued business operations because of non-payment, suspension of business, voluntary liquidation or filing for legal liquidation.

The accrual status is a primary credit quality indicator for loans within the Residential segment, the Card segment and consumer loans within the MUAH segment. The accrual status of these loans is determined based on the number of delinquent payments. See Note 1 for further details of categorization of Accrual and Nonaccrual.

Commercial loans within the MUAH segment are categorized as either pass or criticized based on the internal credit rating assigned to each borrower. Criticized credits are those that are internally risk graded as Special Mention, Substandard or Doubtful. Special Mention credits are potentially weak, as the borrower has begun to exhibit

deteriorating trends, which, if not corrected, may jeopardize repayment of the loan and result in further downgrade. Classified credits are those that are internally risk graded as Substandard or Doubtful. Substandard credits have well-defined weaknesses, which, if not corrected, could jeopardize the full satisfaction of the debt. A credit classified as Doubtful has critical weaknesses that make full collection improbable on the basis of currently existing facts and conditions.

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Loans within the Krungsri segment are categorized as Normal, Special Mention, Substandard, Doubtful, and Doubtful of Loss primarily based on their delinquency status. Loans categorized as Special Mention generally represent those that have the overdue principal or interest payments for a cumulative period exceeding one month commencing from the contractual due date. Loans categorized as Substandard, Doubtful or Doubtful of Loss generally represent those that have the overdue principal or interest payments for a cumulative period exceeding three months commencing from the contractual due date.

For the Commercial, Residential and Card segments, credit quality indicators are based on information as of March 31. For the MUAH and Krungsri segments, credit quality indicators are generally based on information as of December 31.

Notes:

- (1) Others are principally comprised of gains or losses from foreign exchange translation.
- (2) For the Krungsri segment, the acquired loans were recorded at their fair values as of the acquisition date, and there were no indications that an allowance for credit losses was necessary for these loans for the fiscal year ended March 31, 2014. Therefore, no allowance for credit losses was stated at March 31, 2014 in the above table.

Note:

(1) Total loans in the above table do not include loans held for sale, and represent balances without adjustments in relation to unearned income, unamortized premiums and deferred loan fees.

Nonperforming loans were actively disposed of by sales during recent years. The allocated allowance for credit losses for such loans was removed from the allowance for credit losses and transferred to the valuation

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

allowance for loans held for sale upon a decision to sell. Net charge-offs in the above table include a decrease in the allowance for credit losses due to loan disposal activity amounting to ¥16.2 billion, ¥3.5 billion and ¥0.8 billion for the fiscal years ended March 31, 2014, 2015 and 2016, respectively.

The MUFG Group sold ¥906 billion, ¥748 billion and ¥640 billion of loans within the Commercial segment during the fiscal years ended March 31, 2014, 2015 and 2016, respectively.

The MUFG Group purchased ¥337 billion of loans within the MUAH segment during the fiscal year ended March 31, 2014. See Note 2 for MUB's acquisition of PB Capital Corporation's institutional CRE lending division.

Loans Acquired in a Transfer

In accordance with the guidance on loans and debt securities acquired with deteriorated credit quality, the following table sets forth information regarding loans acquired in connection with mergers, for which it is probable, at acquisition, that the MUFG Group will be unable to collect all contractually required payments receivable.

	2015	2016
	(in millions)	
Loans acquired during the fiscal year:		
Contractually required payments receivable at acquisitions	¥ 10,048	¥ 6,993
Cash flows expected to be collected at acquisitions	548	935
Fair value of loans at acquisition	548	935
Accretable yield for loans within the scope of the guidance on loans and debt securities acquired with deteriorated credit quality:		
Balance at beginning of fiscal year	¥ 93,621	¥ 73,625
Additions		
Accretion	(46,487)	(28,413)
Disposals	(641)	(546)
Reclassifications from nonaccretable difference	21,070	9,111
Foreign currency translation adjustments	6,062	(759)
Balance at end of fiscal year	¥ 73,625	¥ 53,018
Loans within the scope of the guidance on loans and debt securities acquired with deteriorated credit quality:		
Outstanding balance at beginning of fiscal year	¥ 531,327	¥ 399,736
Outstanding balance at end of fiscal year	399,736	301,447
Carrying amount at beginning of fiscal year	269,376	180,103
Carrying amount at end of fiscal year	180,103	124,806

**Nonaccruing loans within the scope of the guidance on loans and debt securities
acquired with deteriorated credit quality:**

Carrying amount at acquisition date during fiscal year	¥ 548	¥ 935
Carrying amount at end of fiscal year	26,248	12,805

**Allowance for credit losses within the scope of the guidance on loans and debt
securities acquired with deteriorated credit quality:**

Balance of allowance for credit losses at beginning of fiscal year	¥ 29,429	¥ 25,045
Additional provisions during fiscal year	2,533	2,532
Reductions of allowance during fiscal year	456	1,449
Balance of allowance for credit losses at end of fiscal year	25,045	15,731

F-57

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The MUFG Group considered prepayments in the determination of contractual cash flows and cash flows expected to be collected based on historical results.

Lease Receivables

As part of its financing activities, the MUFG Group enters into leasing arrangements with customers. The MUFG Group's leasing operations are conducted through leasing subsidiaries and consist principally of direct financing leases involving various types of data processing equipment, office equipment and transportation equipment.

As of March 31, 2015 and 2016, the components of the investment in direct financing leases were as follows:

	2015	2016
	(in millions)	
Minimum lease payments receivable	¥ 1,729,901	¥ 1,640,245
Estimated residual values of leased property	25,329	28,780
Less unearned income	(228,416)	(223,476)
Net investment in direct financing leases	¥ 1,526,814	¥ 1,445,549

Future minimum lease payment receivables under noncancelable leasing agreements as of March 31, 2016 were as follows:

	Direct Financing Leases (in millions)
Fiscal year ending March 31:	
2017	¥ 452,748
2018	411,741
2019	287,632
2020	208,520
2021	117,157
2022 and thereafter	162,447
Total minimum lease payment receivables	¥ 1,640,245

Sales of Loans

The MUFG Group originates various types of loans to corporate and individual borrowers in Japan and overseas in the normal course of business. In order to improve its loan quality, BTMU and MUTB actively disposed of nonperforming loans. Most of the nonperforming loans were disposed of by sales to third parties without any continuing involvement. Management of BTMU and MUTB generally approves disposals after significant sales terms, including prices, are negotiated. As such, loans are disposed of by sales shortly after the loans are transferred to the held-for-sale classification. The net gains on the sales of loans were ¥18,984 million, ¥15,257 million and ¥12,094 million for the fiscal years ended March 31, 2014, 2015 and 2016, respectively.

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****Related Party Loans***

In some cases, the banking subsidiaries of MUFG make loans to related parties, including their directors and executive officers, in the course of their normal commercial banking business. At March 31, 2015 and 2016, outstanding loans to such related parties were not material.

In the opinion of management, these related party loans were made on substantially the same terms, including interest rates and collateral requirements, as those terms prevailing at the date these loans were made. For the fiscal years ended March 31, 2014, 2015 and 2016, there were no loans to related parties that were charged off. Additionally, at March 31, 2014, 2015, and 2016, there were no loans to related parties that were impaired.

5. PREMISES AND EQUIPMENT

Premises and equipment at March 31, 2015 and 2016 consisted of the following:

	2015	2016
	(in millions)	
Land	¥ 409,271	¥ 394,782
Buildings	760,974	767,810
Equipment and furniture	615,540	654,099
Leasehold improvements	282,179	287,831
Construction in progress	35,773	38,491
Total	2,103,737	2,143,013
Less accumulated depreciation	1,121,532	1,137,108
Premises and equipment-net	¥ 982,205	¥ 1,005,905

Premises and equipment include capitalized leases, principally related to data processing equipment, which amounted to ¥36,678 million and ¥34,365 million at March 31, 2015 and 2016, respectively. Accumulated depreciation on such capitalized leases at March 31, 2015 and 2016 amounted to ¥26,249 million and ¥23,874 million, respectively.

BTMU has entered into sales agreements to sell its buildings and land and, under separate agreements, leased those properties back for its business operations, including bank branches. BTMU either provided nonrecourse financings to the buyers for the sales proceeds or invested in the equities of the buyers. As a result, BTMU was considered to have continuing involvement with the properties. For accounting and reporting purposes, these transactions were accounted for under the financing method with the sales proceeds recognized as a financing obligation. The properties were reported on the accompanying consolidated balance sheets and depreciated. The financing obligation at March 31, 2015 and 2016 was ¥45,256 million and ¥44,152 million, respectively.

For the fiscal years ended March 31, 2014, 2015 and 2016, the MUFG Group recognized ¥13,850 million, ¥6,057 million and ¥7,016 million, respectively, of impairment losses for long-lived assets, primarily real estate which was either formerly used for its banking operations and is no longer used or real estate that is being used where recovery of the carrying amount is doubtful. In addition, ¥226 million, ¥176 million and ¥541 million of impairment losses were recognized for real estate held for sale for the fiscal years ended March 31, 2014, 2015 and 2016, respectively. These losses are included in Other non-interest expenses. In computing the amount of impairment losses, fair value was determined primarily based on market prices, if available, or the estimated price based on an appraisal.

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****6. GOODWILL AND OTHER INTANGIBLE ASSETS***Goodwill*

The table below presents the movement in the carrying amount of goodwill by business segment during the fiscal years ended March 31, 2015 and 2016:

Effective April 1, 2015, the Integrated Retail Banking Business Group, the Integrated Corporate Banking Business Group, the Integrated Trust Assets Business Group, the Integrated Global Business Group and the Integrated Global Markets Business Group were renamed the Retail Banking Business Group, the Corporate Banking Business Group, the Trust Assets Business Group, the Global Business Group and the Global Markets Business Group, respectively.

Effective April 1, 2015, the MUFG Group began to include Krungsri as part of the Global Business Group, as shown in the table below.

	Retail Banking Business Group	Corporate Banking Business Group	Trust Assets Business Group	Other than MUAH /Krungsri	Global Business Group			Global Markets Business Group	Total

Notes:

(1) See Note 30 for the business segment information of the MUFG Group.

(2) See Note 2 for the goodwill acquired in connection with acquisition.

U.S. GAAP requires to test goodwill for impairment at least annually, or more frequently if events or changes in circumstances indicate that goodwill may be impaired, using a two-step process that begins with an estimation of the fair value of a reporting unit, which is to be compared with the carrying amount of the reporting unit including goodwill, to identify potential impairment of goodwill. If the carrying amount of a reporting unit including goodwill exceeds its estimated fair value, the second step of the goodwill impairment test is performed to measure the amount of impairment loss recorded in the consolidated statements of income. This test requires comparison of the implied fair value of the reporting unit's goodwill with the carrying amount of its goodwill.

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

For the fiscal years ended March 31, 2014, 2015 and 2016, the MUFG Group recognized ¥7,792 million, ¥3,432 million and ¥4,298 million, respectively, in impairment of goodwill relating to reporting units within the Trust Assets Business Group segment. The MUFG Group readjusted its future cash flow projection of the reporting units in this segment, considering the subsidiaries' recent business performance. Due to the situation, the fair value of the reporting units, which were based on discounted future cash flows, fell below the carrying amounts of the reporting units. Accordingly, the second step of the goodwill impairment test was performed for the reporting units. As a result, the carrying amounts of reporting units' goodwill exceeded the implied fair value of the reporting units' goodwill, and the impairment losses were recognized on the related goodwill.

For the fiscal year ended March 31, 2016, the MUFG Group recognized ¥151,671 million in impairment of goodwill relating to reporting unit Other than MUAH/Krungsri within the Global Business Group segment. The Bank of Japan introduced Quantitative and Qualitative Monetary Easing with Negative Interest Rates in January, 2016, and the benchmark yield turned and stayed negative through to the end of the fiscal year. Share prices have fallen and the Japanese yen has appreciated since the start of the calendar year as a reflection of heightened risk aversion around the globe. It led MUFG's stock price to decline from ¥743.7 at March 31, 2015 to ¥521.5 at March 31, 2016. Since the fair value of reporting unit Other than MUAH/Krungsri within the Global Business Group segment was estimated based on MUFG's stock price, this decline led to decrease market capitalization and negatively affected the fair value of the reporting unit. Due to the situation, the fair value of the reporting unit fell below the carrying amount of the reporting unit. Accordingly, the second step of the goodwill impairment test was performed for this reporting unit. As a result, the carrying amount of reporting unit's goodwill exceeded the implied fair value of the reporting unit's goodwill, and the impairment loss was recognized on the related goodwill.

For the fiscal year ended March 31, 2016, the MUFG Group recognized ¥177,750 million in impairment of goodwill relating to Krungsri reporting unit within the Global Business Group segment. The economy in China continued to slow down due to the suppressed investment environment, while weak exports weighed on other Asian economies. It led the slowing economic growth in Thailand and Krungsri's stock price to decline from Thai baht 44.75 at December 31, 2014 to Thai baht 29.75 at December 31, 2015. Since the fair value of Krungsri reporting unit within the Global Business Group segment was estimated based on Krungsri's stock price, this decline led to decrease market capitalization and negatively affected the fair value of the reporting unit. Due to the situation, the fair value of the reporting unit fell below the carrying amount of the reporting unit. Accordingly, the second step of the goodwill impairment test was performed for this reporting unit. As a result, the carrying amount of reporting unit's goodwill exceeded the implied fair value of the reporting unit's goodwill, and the impairment loss was recognized on the related goodwill.

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****Other Intangible Assets***

The table below presents the gross carrying amount, accumulated amortization and net carrying amount, in total and by major class of intangible assets at March 31, 2015 and 2016:

	2015			2016		
	Gross carrying amount	Accumulated amortization	Net carrying amount	Gross carrying amount	Accumulated amortization	Net carrying amount
(in millions)						
Intangible assets subject to amortization:						
Software	¥ 2,032,617	¥ 1,372,238	¥ 660,379	¥ 2,204,185	¥ 1,517,237	¥ 686,948
Core deposit intangibles	712,878	519,587	193,291	137,337	76,872	60,465
Customer relationships	403,652	171,920	231,732	378,295	182,284	196,011
Trade names	77,175	20,693	56,482	78,079	23,915	54,164
Other	10,537	3,350	7,187	12,293	4,015	8,278
Total	¥ 3,236,859	¥ 2,087,788	1,149,071	¥ 2,810,189	¥ 1,804,323	1,005,866
Intangible assets not subject to amortization:						
Indefinite-lived trade names			3,037			
Other			8,056			9,284
Total			11,093			9,284
Total			¥ 1,160,164			¥ 1,015,150

Intangible assets subject to amortization acquired during the fiscal year ended March 31, 2015 amounted to ¥209,278 million, which primarily consisted of ¥207,062 million of software. The weighted average amortization period for these assets is 5 years. There is no significant residual value estimated for these assets. Intangible assets not subject to amortization acquired during the fiscal year ended March 31, 2015 amounted to ¥265 million.

Intangible assets subject to amortization acquired during the fiscal year ended March 31, 2016 amounted to ¥231,602 million, which primarily consisted of ¥223,809 million of software and ¥6,479 million of customer relationships. The weighted average amortization periods for these assets are 6 years and 22 years, respectively. There is no significant residual value estimated for these assets. Intangible assets not subject to amortization acquired during the fiscal year ended March 31, 2016 amounted to ¥389 million.

For the fiscal years ended March 31, 2014, 2015 and 2016, the MUFG Group recognized ¥312 million, ¥677 million and ¥117,726 million, respectively, of impairment losses for intangible assets whose carrying amounts exceeded their fair value. In computing the amount of impairment losses, fair value was determined primarily based on the present value of expected future cash flows, the estimated value based on appraisals, or market prices.

The impairment loss for the fiscal year ended March 31, 2016 included a loss of ¥8,043 million relating to customer relationship under Trust Asset Business Group segment. The fair value of the customer relationship was calculated based on the present value of expected future cash flow, which could be affected by the amount of the assets under management and fluctuation of the markets. Estimated future cash flow of the above customer relationship was readjusted downwards due to instability of bond markets and large fluctuations of foreign

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

exchange markets. Accordingly, the MUFG Group reevaluated customer relationship and recognized an impairment loss. Also, for the fiscal year ended March 31, 2016, the MUFG Group recognized an impairment loss of ¥8,923 million related to software for internal use.

The impairment loss for the fiscal year ended March 31, 2016 included a loss of ¥99,981 million relating to core deposit intangible acquired in connection with the merger with UFJ Holdings. The fair value of this core deposit intangible was calculated based on the present value of expected future cash flows in 2005. As a result of negative interest rate policy by the Bank of Japan, estimated future cost saving became negative due to the decrease of the spread between the interest rate of the core deposit funding and the decreased alternative interest rate of the market funding, and the estimated future cash flows were revised downwards. Accordingly, the MUFG Group reevaluated core deposit intangible and recognized impairment loss.

The estimated aggregate amortization expense for intangible assets for the next five fiscal years is as follows:

	(in millions)
Fiscal year ending March 31:	
2017	¥ 237,761
2018	204,469
2019	165,748
2020	128,532
2021	86,670

7. INCOME TAXES***Income before Income Tax Expense***

Income before income tax expense by jurisdiction for the fiscal years ended March 31, 2014, 2015 and 2016 was as follows:

	2014	2015	2016
	(in millions)		
Domestic income	¥ 1,012,551	¥ 1,545,510	¥ 735,128
Foreign income	407,892	717,146	427,542
Total	¥ 1,420,443	¥ 2,262,656	¥ 1,162,670

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****Income Tax Expense (Benefit)***

Total	¥ 555,033	¥ 1,346,072	¥ 98,051

On November 30, 2011, the Japanese Diet enacted two tax related laws: Amendment to the 2011 Tax Reform and Special Measures to Secure the Financial Resources to Implement the Restoration from The Great East Japan Earthquake. The changes under the new laws include a limitation on the use of net operating loss carryforwards to 80% of taxable income, a two-year increase in the carryforward period of certain net operating loss carryforwards to a nine-year period, and an approximately 5% reduction in the effective statutory rate of corporate income tax from 40.6% to 35.6%. While the reduction in the effective statutory rate was effective for fiscal years beginning on or after April 1, 2012, a temporary surtax levied on corporate income taxes to fund the earthquake recovery efforts caused the effective statutory rate of corporate income tax to be approximately 38.0% for the three year period between April 1, 2012 and March 31, 2015. However, on March 20, 2014, the Japanese Diet enacted the 2014 Tax Reform which

terminated the temporary surtax levied on corporate income taxes one year earlier than the change in tax law on November 30, 2011. As a result, the effective statutory rate of corporate income tax for the fiscal year ending March 31, 2015 was set at approximately 35.6%. The change in tax law resulted in an increase of ¥16,687 million in income tax expense for the fiscal year ended March 31, 2014.

The MUFG Group has changed to filing on a consolidated basis for corporate income taxes within Japan beginning with the fiscal year ended March 31, 2015. A consolidated basis for corporate income taxes results in the reporting of taxable income or loss based upon the combined profits or losses of the parent company and its wholly-owned domestic subsidiaries.

On March 31, 2015, the Japanese Diet enacted the 2015 Tax Reform which includes changes in the limitation on the use of net operating loss carryforwards from 80% to 65% of taxable income for the two-year

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

period between April 1, 2015 and March 31, 2017, and from 65% to 50% for the fiscal years beginning on or after April 1, 2017, respectively, and one-year increase in the carryforward period of certain net operating loss carryforwards from nine-year period to ten-year period for the fiscal years beginning on or after April 1, 2017, as well as reduction in the effective statutory rate of corporate income tax from approximately 35.6% to 33.9% for the fiscal year beginning on or after April 1, 2015. The change in tax law resulted in a decrease of ¥39,966 million in income tax expense for the fiscal year ended March 31, 2015.

On March 29, 2016, the Japanese Diet enacted the 2016 Tax Reform which reduces in the effective statutory rate of corporate income tax from approximately 33.9% to 31.5% for the fiscal year beginning on or after April 1, 2016. In addition, this 2016 Tax Reform partially amends the articles in the 2015 Tax Reform relating to the limitation on the use of net operating loss carryforwards and the carryforward period of certain net operating loss carryforwards in order to equalize the tax burden of companies. That is, changes in the limitation on the use of net operating loss carryforwards from 65% to 60% of taxable income for the period between April 1, 2016 and March 31, 2017, and from 50% to 55% for the period between April 1, 2017 and March 31, 2018, respectively, and one-year decrease in the carryforward period of certain net operating loss carryforwards from ten-year period to nine-year period for the period between April 1, 2017 and March 31, 2018. The change in tax law resulted in a decrease of ¥50,081 million in income tax expense for the fiscal year ended March 31, 2016.

Reconciliation of Effective Income Tax Rate

Income taxes in Japan applicable to the MUFG Group are imposed by the national, prefectural and municipal governments, and in the aggregate resulted in a normal effective statutory rate of approximately 38.0%, 35.6%, and 33.9% for the fiscal years ended March 31, 2014, 2015 and 2016, respectively. Foreign subsidiaries are subject to income taxes of the countries in which they operate.

A reconciliation of the effective income tax rates reflected in the accompanying consolidated statements of income to the combined normal effective statutory tax rates for the fiscal years ended March 31, 2014, 2015 and 2016 is as follows:

	2014	2015	2016
Combined normal effective statutory tax rate	38.0%	35.6%	33.9%
Nondeductible expenses	0.2	0.1	0.3
Impairment of goodwill	0.2		9.7
Foreign tax credit and payments	(0.6)	(1.0)	(1.9)
Lower tax rates applicable to income of subsidiaries	(0.4)	(0.1)	(0.2)
Change in valuation allowance	(12.4)	(1.3)	(4.0)
Realization of previously unrecognized tax effects of subsidiaries	(0.1)		
Nontaxable dividends received	(3.3)	(1.6)	(1.9)
Undistributed earnings of subsidiaries	0.5	0.1	0.7
Tax and interest expense for uncertainty in income taxes		(0.2)	0.0

Effect of changes in tax laws	1.2	(1.7)	(4.3)
Other net	0.5	(0.5)	(0.5)
Effective income tax rate	23.8%	29.4%	31.8%

F-65

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****Deferred Tax Assets and Liabilities***

Deferred tax assets and liabilities are computed for each tax jurisdiction using currently enacted tax rates applicable to periods when the temporary differences are expected to reverse. The tax effects of the items comprising the MUFG Group's net deferred tax assets at March 31, 2015 and 2016 were as follows:

	2015	2016
	(in millions)	
Deferred tax assets:		
Allowance for credit losses	¥ 570,049	¥ 497,419
Operating loss carryforwards	110,211	150,922
Loans	13,295	11,240
Accrued liabilities and other	172,959	173,405
Premises and equipment, including sale-and-leaseback transactions	86,461	86,773
Derivative financial instruments	95,593	
Accrued severance indemnities and pension plans	17,286	57,398
Valuation allowance	(274,010)	(208,282)
Total deferred tax assets	791,844	768,875
Deferred tax liabilities:		
Investment securities (including trading account assets at fair value under fair value option)	1,321,462	1,000,966
Intangible assets	147,173	86,672
Lease transactions	74,605	82,816
Derivative financial instruments		17,466
Other	70,352	70,860
Total deferred tax liabilities	1,613,592	1,258,780
Net deferred tax assets (liabilities)	¥ (821,748)	¥ (489,905)

The valuation allowance was provided primarily against deferred tax assets recorded at MUFG and its subsidiaries with operating loss carryforwards. The valuation allowance is determined to reduce the measurement of deferred tax assets not expected to be realized. Management considers all available evidence, both positive and negative, to determine whether the valuation allowance is necessary based on the weight of that evidence. Management determines the amount of the valuation allowance based on future reversals of existing taxable temporary differences and future taxable income exclusive of reversing temporary differences. Future taxable income is developed from forecasted operating results, based on recent historical trends and approved business plans, the eligible carryforward periods and other relevant factors.

For the fiscal year ended March 31, 2014, the MUFG Group recorded a valuation allowance release, on the basis of management's reassessment of the amount of its deferred tax assets that were more likely than not to be realized. As of March 31, 2014, management considered new evidence, both positive and negative, that could impact management's view with regard to future realization of deferred tax assets.

Among others, a release of valuation allowance of ¥91,070 million was due to the application of the consolidated corporate-tax system beginning with the fiscal year ended March 31, 2015. This was because MUFG would be able to utilize income in more profitable subsidiaries to realize the benefit of net operating loss carryforwards and existing deductible temporary differences recorded at MUFG. Management believed that the net operating loss carryforwards related to Japanese corporate taxes would be fully utilized by the application of the consolidated corporate-tax system.

Table of Contents

MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Among others, a release of valuation allowance of ¥45,922 million was due to the profitability improvement of a certain subsidiary. Management considered various factors, including the improved operating performance and cumulative operating results over the prior several years of the subsidiary as well as the outlook regarding prospective operating performance of the subsidiary, and determined that sufficient positive evidence exists as of March 31, 2014, to conclude that it was more likely than not that additional deferred tax assets would be realizable.

For certain subsidiaries where strong negative evidence exists, such as the existence of significant amounts of operating loss carryforwards, cumulative losses and the expiration of unused operating loss carryforwards in recent years, a valuation allowance was recognized against the deferred tax assets as of March 31, 2015 and 2016 to the extent that it is more likely than not that they will not be realized.

For the fiscal year ended March 31, 2016, the MUFG Group recorded a valuation allowance release of ¥65,728 million which was mainly due to the profitability improvement of a certain subsidiary. Management considered various factors, including the improved operating performance and cumulative operating results over the prior several years of the subsidiary as well as the outlook regarding prospective operating performance of the subsidiary, and determined that sufficient positive evidence exists as of March 31, 2016, to conclude that it is more likely than not that additional deferred tax assets would be realizable. As a result, a valuation allowance provided against deferred tax assets with operating loss carryforwards not expected to be realized as of March 31, 2015 was partially reduced as of March 31, 2016.

Income taxes are not provided on undistributed earnings of certain foreign subsidiaries that are considered to be indefinitely reinvested in the operations of such subsidiaries. At March 31, 2015 and 2016, the undistributed earnings of such foreign subsidiaries amounted to approximately ¥22,741 million and ¥29,250 million, respectively. Determination of the amount of unrecognized deferred tax liabilities with respect to these undistributed earnings is not practicable because of the complexity associated with its hypothetical calculation including foreign withholding taxes and foreign tax credits. MUFG has neither plans nor the intention to dispose of investments in such foreign subsidiaries and, accordingly, does not expect to record capital gains or losses, or otherwise monetize the undistributed earnings of such foreign subsidiaries.

Furthermore, under the Japanese tax law, 95% of a dividend received from a foreign company in which a domestic company has held generally at least 25% of the outstanding shares for a continuous period of six months or more ending on the date on which the dividend is declared can be excluded from the domestic company's taxable income. Therefore, if undistributed earnings of certain foreign subsidiaries are repatriated through dividends, only 5% of the amount of dividends will be included in the taxable income.

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)***Operating Loss and Tax Credit Carryforwards*

At March 31, 2016, the MUFG Group had operating loss carryforwards for corporate tax of ¥465,920 million and tax credit carryforwards of ¥12,653 million for tax purposes. Such carryforwards, if not utilized, are scheduled to expire as follows:

	Operating loss carryforwards	Tax credit carryforwards
	(in millions)	
Fiscal year ending March 31:		
2017	¥ 1,344	¥ 1,598
2018	24,513	172
2019	4,921	33
2020	35,818	111
2021	8,840	115
2022	20,899	85
2023 and thereafter	339,369	8,716
No definite expiration date	30,216	1,823
Total	¥ 465,920	¥ 12,653

Uncertainty in Income Tax

The following is a roll-forward of the MUFG Group's unrecognized tax benefits for the fiscal years ended March 31, 2014, 2015 and 2016:

	2014	2015	2016
	(in millions)		
Balance at beginning of fiscal year	¥ 30,956	¥ 13,993	¥ 10,940
Gross amount of increases for current year's tax positions	439	606	1,095
Gross amount of increases for prior years' tax positions	333	3,361	162
Gross amount of decreases for prior years' tax positions	(25,318) ⁽¹⁾	(6,561)	
Net amount of changes relating to settlements with tax authorities	(244)	(809)	(1,299)
Decreases due to lapse of applicable statutes of limitations		(1,452)	(296)
Foreign exchange translation and others	7,827	1,802	(652)
Balance at end of fiscal year	¥ 13,993	¥ 10,940	¥ 9,950

Note:

(1) The decrease related to prior year tax positions is primarily from the resolution of uncertain tax positions in the U.S. for both federal income taxes and California state tax. The total amounts of unrecognized tax benefits at March 31, 2014, 2015 and 2016 that, if recognized, would affect the effective tax rate are ¥3,570 million, ¥1,485 million and ¥1,065 million, respectively. The remainder of the uncertain tax positions have offsetting amounts in other jurisdictions or are temporary differences.

F-68

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The MUFG Group classifies interest and penalties, if applicable, related to income taxes as Income tax expense. Accrued interest and penalties (not included in the unrecognized tax benefits above) are a component of Other liabilities. The following is a roll-forward of the interest and penalties recognized in the accompanying consolidated financial statements for the fiscal years ended March 31, 2014, 2015 and 2016:

	2014	2015	2016
	(in millions)		
Balance at beginning of fiscal year	¥4,528	¥ 5,946	¥4,876
Total interest and penalties in the consolidated statements of income	(698)	(1,468)	201
Total cash settlements, foreign exchange translation and others	2,116	398	(350)
Balance at end of fiscal year	¥5,946	¥ 4,876	¥4,727

The MUFG Group is subject to ongoing tax examinations by the tax authorities of the various jurisdictions in which it operates. The following are the major tax jurisdictions in which the MUFG Group operates and the status of years under audit or open to examination:

Jurisdiction	Tax years
Japan	2015 and forward
United States Federal	2010 and forward
United States California	2009 and forward
Thailand	2010 and forward
United Kingdom	2014 and forward

The MUFG Group is currently under continuous examinations by the tax authorities in various domestic and foreign jurisdictions and many of these examinations are resolved every year. The unrecognized tax benefits will decrease since resolved items will be removed from the balance regardless of whether their resolution results in payment or recognition. It is reasonably possible that the unrecognized tax benefits will decrease by approximately ¥2.6 billion during the next twelve months.

8. PLEDGED ASSETS AND COLLATERAL***Pledged Assets***

At March 31, 2016, assets mortgaged, pledged, or otherwise subject to lien were as follows:

	2016 (in millions)
Trading account securities	¥ 12,727,807
Investment securities	6,841,237
Loans	8,815,364
Other	61,080
Total	¥ 28,445,488

F-69

Table of Contents

MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The above pledged assets were classified by type of liabilities to which they related as follows:

	2016 (in millions)
Deposits	¥ 377,649
Payables under repurchase agreements and securities lending transactions	14,968,645
Other short-term borrowings and long-term debt	12,869,907
Other	229,287
Total	¥ 28,445,488

In addition, at March 31, 2016, certain investment securities, principally Japanese national government and Japanese government agency bonds, loans, and other assets aggregating to ¥19,223,557 million were pledged as collateral for acting as a collection agent of public funds, for settlement of exchange at the Bank of Japan and the Tokyo Bankers Association, for derivative transactions and for certain other purposes.

The MUFG Group engages in on-balance sheet securitizations. These securitizations of mortgage and apartment loans, which do not qualify for sales treatment, are accounted for as secured borrowings. The amount of loans in the table above represents the carrying amount of these transactions with the carrying amount of the associated liabilities included in Other short-term borrowings and Long-term debt.

Under Japanese law, Japanese banks are required to maintain certain reserves on deposit with the Bank of Japan based on the amount of deposit balances and certain other factors. There are similar reserve deposit requirements for foreign offices engaged in banking businesses in foreign countries. At March 31, 2015 and 2016 the reserve funds maintained by the MUFG Group, which are included in Cash and due from banks and Interest-earning deposits in other banks, were ¥30,482,570 million and ¥40,427,837 million, respectively. Average reserves during the fiscal years ended March 31, 2015 and 2016 were ¥22,853,187 million and ¥33,939,765 million, respectively.

Collateral

The MUFG Group accepts and provides financial assets as collateral for transactions, principally commercial loans, repurchase agreements and securities lending transactions, call money, and derivatives. Financial assets eligible for such collateral include, among others, marketable equity securities, trade and notes receivable and CDs.

Secured parties, including creditors and counterparties to certain transactions with the MUFG Group, may sell or repledge financial assets provided as collateral. Certain contracts, however, may not be specific about the secured party's right to sell or repledge collateral under the applicable statutes and, therefore, whether or not the secured party is permitted to sell or repledge collateral would differ depending on the interpretations of specific provisions of the existing statutes, contract or certain market practices. If the MUFG Group determines, based on available information, that a financial asset provided as collateral might not be sold or repledged by the secured parties, such collateral is not

separately reported in the accompanying consolidated balance sheets. If a secured party is permitted to sell or repledge financial assets provided as collateral by contract or custom under the existing statutes, the MUFG Group reports such pledged financial assets separately on the face of the accompanying consolidated balance sheets. At March 31, 2016, the MUFG Group pledged ¥29,653 billion of assets that may not be sold or repledged by the secured parties.

Certain banking subsidiaries accept collateral for commercial loans and certain banking transactions under a standardized agreement with customers, which provides that these banking subsidiaries may require the

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

customers to provide collateral or guarantees with respect to the loans and other banking transactions. Financial assets pledged as collateral are generally negotiable and transferable instruments, and such negotiability and transferability are authorized by applicable legislation. In principle, Japanese legislation permits these banking subsidiaries to repledge financial assets accepted as collateral unless otherwise prohibited by contract or relevant statutes. Nevertheless, the MUFG Group did not sell or repledge nor does it plan to sell or repledge such collateral accepted in connection with commercial loans before a debtor's default or other credit events specified in the agreements as it is not customary within the banking industry in Japan to dispose of collateral before a debtor's default and other specified credit events. Derivative agreements commonly used in the marketplace do not prohibit a secured party's disposition of financial assets received as collateral, and in resale agreements and securities borrowing transactions, securities accepted as collateral may be sold or repledged by the secured parties. At March 31, 2015 and 2016, the fair value of the collateral accepted by the MUFG Group that is permitted to be sold or repledged was ¥19,756 billion and ¥19,366 billion, respectively, of which ¥14,496 billion and ¥13,959 billion, respectively, was sold or repledged.

At March 31, 2015 and March 31, 2016, the cash collateral pledged for derivative transactions, which is included in Other assets, was ¥1,716,302 million and ¥1,510,689 million, respectively, and the cash collateral received for derivative transactions, which is included in Other liabilities, was ¥906,456 million and ¥1,265,041 million, respectively.

9. DEPOSITS

The balances of time deposits, including CDs, issued in amounts of ¥10 million (approximately U.S.\$89 thousand at the Federal Reserve Bank of New York's noon buying rate on March 31, 2016) or more with respect to domestic deposits and issued in amounts of U.S.\$100,000 or more with respect to foreign deposits were ¥26,741,038 million and ¥27,056,193 million, respectively, at March 31, 2015, and ¥29,005,124 million and ¥23,867,036 million, respectively, at March 31, 2016.

The maturity information at March 31, 2016 for domestic and foreign time deposits, including CDs, is summarized as follows:

	Domestic	Foreign
	(in millions)	
Due in one year or less	¥ 35,553,119	¥ 24,020,814
Due after one year through two years	6,076,048	460,129
Due after two years through three years	2,957,445	280,569
Due after three years through four years	981,293	146,945
Due after four years through five years	998,626	34,147
Due after five years	846,129	6,503
Total	¥ 47,412,660	¥ 24,949,107

10. CALL MONEY AND FUNDS PURCHASED

A summary of funds transactions for the fiscal years ended March 31, 2015 and 2016 is as follows:

	2015	2016
	(in millions, except percentages and days)	
Outstanding at end of fiscal year:		
Amount	¥ 3,668,986	¥ 1,388,589
Principal range of maturities	1 day to 30 days	1 day to 30 days
Weighted average interest rate	0.17%	0.34%

F-71

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****11. DUE TO TRUST ACCOUNT**

MUTB holds assets on behalf of its customers in an agent, fiduciary or trust capacity. Such trust account assets are not the MUFG Group's proprietary assets and are managed and accounted for separately.

However, excess cash funds of individual trust accounts are often placed with MUTB which manages the funds together with its own funds in its proprietary account. Due to trust account reflects a temporary placement of the excess funds from individual trust accounts and, in view of the MUFG Group's funding, due to trust account is similar to short-term funding, including demand deposits and other overnight funds purchased. The balance changes in response to the day-to-day changes in the excess funds placed by the trust accounts. A summary of due to trust account transactions at March 31, 2015 and 2016 is as follows:

	2015	2016
	(in millions, except percentages)	
Amount outstanding at end of fiscal year	¥ 1,610,992	¥ 6,338,154
Weighted average interest rate on outstanding balance at end of fiscal year	0.05%	0.02%

12. SHORT-TERM BORROWINGS AND LONG-TERM DEBT

At March 31, 2015 and 2016, the MUFG Group had unused lines of credit for short-term financing amounting to ¥8,486,059 million and ¥6,711,520 million, respectively. The amounts principally consist of non-interest-bearing collateralized intraday overdraft lines and collateralized overnight loans on bills at the official discount rate granted by the Bank of Japan, which are used to cover shortages in the Bank of Japan account and to meet liquidity needs. The MUFG Group may borrow from the Bank of Japan on demand up to the total amount of collateral eligible for credit extension.

Other short-term borrowings at March 31, 2015 and 2016 were comprised of the following:

	2015	2016
	(in millions, except percentages)	
Domestic offices:		
Commercial paper	¥ 1,579,550	¥ 1,177,972
Borrowings from the Bank of Japan	4,809,950	2,662,968
Borrowings from other financial institutions	271,413	256,567
Other	54,509	42,011
Total domestic offices	6,715,422	4,139,518
Foreign offices:		

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 20-F

Commercial paper	4,363,937	4,906,571
Borrowings from other financial institutions	137,764	78,849
Short-term debentures	148,644	42,608
Other	180,281	190,474
Total foreign offices	4,830,626	5,218,502
Total	11,546,048	9,358,020
Less unamortized discount	241	292
Other short-term borrowings net	¥ 11,545,807	¥ 9,357,728
Weighted average interest rate on outstanding balance at end of fiscal year	0.21%	0.36%

Notes:

- (1) Adjustable rate debts are debts where interest rates are reset in accordance with the terms of the debt agreements, and floating rate debts are debts where interest rates are repriced in accordance with movements of markets indices.
- (2) Minor currencies, such as Australian dollars, British pounds, Indonesian rupiah, Brazilian real, Russian ruble, etc, have been summarized into the other currencies classification.

The MUFG Group uses derivative financial instruments to manage its interest rate and currency exposures for certain debts. The derivative financial instruments include swaps, forwards, options and other types of derivatives. As a result of these derivative instruments, the effective rates reflected in the table above may differ from the coupon rates. The interest rates for the adjustable and floating rate debt shown in the above table are those in effect at March 31, 2015 and 2016.

Table of Contents

MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Certain debt agreements permit the MUFG Group to redeem the related debt, in whole or in part, prior to maturity at the option of the issuer on terms specified in the respective agreements.

The following is a summary of maturities of long-term debt subsequent to March 31, 2016:

	MUFG	BTMU	Other subsidiaries	Total
	(in millions)			
Fiscal year ending March 31:				
2017	¥ 6	¥ 2,341,212	¥ 993,499	¥ 3,334,717
2018	8	1,834,575	709,784	2,544,367

2022 and thereafter	1,560,555	3,799,481	1,441,097	6,801,133
Total	¥ 1,839,799	¥ 14,076,587	¥ 6,055,691	¥ 21,972,077

New Issuances of Bonds for Basel III

In March 2016, the MUFG Group issued to institutional investors in Japan ¥300,000 million aggregate principal amount of unsecured perpetual subordinated Additional Tier 1 notes. These notes are subject to the MUFG Group's discretion to cease interest payments and a write-down of the principal upon the occurrence of certain events, including when the MUFG Group's Common Equity Tier 1 ratio declines below 5.125%, when the MUFG Group is deemed to be at risk of becoming non-viable or when the MUFG Group becomes subject to bankruptcy proceedings. After a part of the principal amount of the bonds have been written down upon the occurrence of a loss absorption event, such principal amount of the bonds shall be reinstated upon the occurrence of a Reinstatement Event to the extent of the amount to be determined by MUFG in consultation with the Financial Services Agency of Japan (FSA) or other relevant regulatory authority. (The Reinstatement Event occurs when MUFG determines that the principal amount of the bonds that have been written-down be reinstated after obtaining prior confirmation of the FSA or any other relevant regulatory authority that MUFG's consolidated Common Equity Tier1 capital ratio remains at a sufficiently high level after giving effect to the relevant reinstatement of the bonds.)

In October 2015, the MUFG Group issued in a public offering in Japan ¥150,000 million aggregate principal amount of unsecured perpetual subordinated Additional Tier 1 notes with similar terms. It was the MUFG Group's first offering of Basel III-compliant subordinated bonds to the public.

In March 2016, the MUFG Group issued \$5,000 million of Asia's first bond with an intent to count towards Total Loss-Absorbing Capacity (TLAC) to global institutional investors to meet the TLAC requirement under the standards issued by the Financial Stability Board (FSB). Under the FSB's TLAC standard, the MUFG Group is required to hold

TLAC debt in an amount not less than 16% of the risk weighted assets and six percent of the applicable Basel III leverage ratio denominator by January 1, 2019.

13. SEVERANCE INDEMNITIES AND PENSION PLANS

Defined Benefit Pension Plans

The MUFG Group has funded contributory and non-contributory defined benefit pension plans (pension benefits), which cover substantially all of its employees and mainly provide for lifetime annuity payments commencing at age 65 based on eligible compensation at the time of severance, rank, years of service and other factors.

F-75

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

BTMU and certain domestic subsidiaries, MUSHD, Mitsubishi UFJ NICOS and some subsidiaries of MUFG have non-contributory Corporate Defined Benefit Pension plans (CDBPs) which provide benefits to all their domestic employees. In addition, MUTB had a contributory CDBP similar to these non-contributory CDBPs until a transfer of its remaining corporate portion into a non-contributory CDBP subsequent to the separation process as described below.

In December 2011, in accordance with the Defined Benefit Corporate Pension Plan Act, which permits each employer and employees' pension fund plan to separate the substitutional portion of the employees' pension fund from the rest of the fund and transfer the related obligation and assets to the Japanese government, MUTB obtained an approval from the Minister of Health, Labor and Welfare for an exemption from the obligation to pay benefits for future employee services related to the substitutional portion of the governmental welfare pension program. In January 2013, MUTB also obtained an approval for an exemption from the obligation to pay benefits for past employee services related to the substitutional portion. To complete the separation process, the substitutional obligation and the related plan assets were transferred to the Japanese government on February 17, 2014. In accordance with the guidance, which addresses the accounting for the transfer to the Japanese government of a substitutional portion of employee pension fund liabilities, MUTB accounted for the entire separation process, upon completion of transfer of the plan assets to the government, as a single settlement transaction. During the fiscal year ended March 31, 2014, MUTB recognized (1) the difference of ¥115,210 million between the accumulated benefit obligations settled and the assets transferred to the Japanese government as a government subsidy, which was recognized as a gain in the accompanying consolidated statements of income, (2) the proportionate amount of the net unrealized loss of ¥42,435 million for the substitutional portion as settlement loss, and (3) the difference of ¥1,770 million between the projected benefit obligations and the accumulated benefit obligations related to the substitutional portion, as gain on derecognition of previously accrued salary progression. The settlement loss and gain on derecognition of previously accrued salary progression were included in Salaries and employee benefits in the accompanying consolidated statements of income. The remaining portion of the employees' pension fund (that is, the corporate portion) continued to exist as a CDBP, although, from a legal regulatory perspective, it is deemed to have been dissolved and a CDBP is deemed newly established when the separation process is completed. Subsequent to the separation process, MUTB transferred the remaining corporate portion of the employees' pension fund into a non-contributory CDBP.

The MUFG Group also offers qualified and nonqualified defined benefit pension plans in foreign offices and subsidiaries for their employees. The qualified plans are non-contributory defined pension plans, which provide benefits upon retirement based on years of service and average compensation and cover substantially all of the employees of such foreign offices and subsidiaries. With respect to the offices and subsidiaries in the United States of America, the qualified plans are funded on a current basis in compliance with the requirement of the Employee Retirement Income Security Act of the United States of America. The nonqualified plans are non-contributory defined benefit pension plans, under which certain employees earn pay and interest credits on compensation amounts above the maximum stipulated by applicable laws under the qualified plans.

Severance Indemnities Plans

The MUFG Group has SIPs under which their employees in Japan, other than those who are directors, are entitled, under most circumstances, upon mandatory retirement at normal retirement age or earlier termination of employment,

to lump-sum severance indemnities based on eligible compensation at the time of severance, rank, years of service and other factors. Under SIPs, benefit payments in the form of a lump-sum cash payment with no option to receive annuity payments, upon mandatory retirement at normal retirement age or earlier termination of employment, are provided. When a benefit is paid in a single payment to a benefit payee under the plans, the payment represents final relief of the obligation.

F-76

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****Other Postretirement Plans***

The MUFG Group's foreign offices and subsidiaries, primarily in the United States of America, provide their employees with certain postretirement medical and life insurance benefits ("other benefits").

Net periodic cost of pension benefits and other benefits for the fiscal years ended March 31, 2014, 2015 and 2016 include the following components:

	Domestic subsidiaries			Foreign offices and subsidiaries					
	2014	2015	2016	2014	2015		2016		
	Pension benefits and SIP	Pension benefits and SIP	Pension benefits and SIP	Pension benefits	Other benefits	Pension benefits	Other benefits	Pension benefits	Other benefits
	(in millions)								
Service cost benefits earned during the fiscal year	¥ 39,309	¥ 37,540	¥ 47,739	¥ 12,215	¥ 1,526	¥ 13,095	¥ 1,222	¥ 14,842	¥ 1,409
Interest cost on projected benefit obligation	22,464	19,794	16,529	13,467	1,352	15,966	1,501	18,120	1,843
Expected return on plan assets	(54,222)	(55,082)	(59,461)	(19,928)	(1,423)	(24,945)	(1,937)	(30,486)	(2,341)
Amortization of net actuarial loss	23,941	13,900	7,698	9,808	776	11,890	273	11,743	1,810
Amortization of prior service cost	(11,793)	(8,933)	(7,613)	157	(69)	(1,189)	(560)	(2,307)	(927)
Loss (gain) on settlements and curtailment	41,456	(2,742)	(1,168)			88		11	
Net periodic benefit cost	¥ 61,155	¥ 4,477	¥ 3,724	¥ 15,719	¥ 2,162	¥ 14,905	¥ 499	¥ 11,923	¥ 1,794

The following table summarizes the assumptions used in computing the present value of the projected benefit obligations and the net periodic benefit cost:

	Domestic subsidiaries			Foreign offices and subsidiaries					
	2014	2015	2016	2014	2015		2016		
	Pension benefits and SIP	Pension benefits and SIP	Pension benefits and SIP	Pension benefits	Other benefits	Pension benefits	Other benefits	Pension benefits	Other benefits
Weighted-average assumptions used:									
Discount rates in determining expense	1.25%	1.23%	0.93%	4.25%	4.01%	4.87%	4.63%	3.87%	3.83%
Discount rates in determining benefit obligation	1.23	0.93	0.68	4.87	4.63	3.87	3.83	4.17	4.09
Rates of increase in future compensation level for determining expense	3.07	3.36	3.23	4.58		4.64		4.65	
Rates of increase in future compensation level for determining benefit obligation	3.36	3.23	3.23	4.64		4.65		4.65	
Expected rates of return on plan assets	2.83	2.76	2.60	6.98	7.50	7.06	7.50	6.81	7.50

Benefits paid	(66,820)	(66,926)	(12,221)	(2,493)	(16,010)	(2,972)
Translation adjustments and other			50,226	3,904	(8,610)	17
Fair value of plan assets at end of fiscal year	2,305,093	2,200,033	451,993	31,090	457,989	30,653

Amounts recognized in the consolidated balance sheets:

Prepaid benefit cost	¥ 498,504	¥ 365,427	¥ 16,373	¥ 31,574	¥
Accrued benefit cost	(15,634)	(16,241)	(44,615)	(13,501)	(44,163) (15,408)
Net amount recognized	¥ 482,870	¥ 349,186	¥ (28,242)	¥ (13,501)	¥ (12,589) ¥ (15,408)

The aggregated accumulated benefit obligations of these plans at March 31, 2015 and 2016 were as follows:

	Domestic subsidiaries		Foreign offices and subsidiaries	
	2015	2016	2015	2016
	(in millions)			
Aggregated accumulated benefit obligations	¥ 1,784,570	¥ 1,814,070	¥ 458,662	¥ 443,384

The projected benefit obligations, accumulated benefit obligations and fair value of plan assets for the plans with accumulated benefit obligations in excess of plan assets at March 31, 2015 and 2016 were as follows:

	Domestic subsidiaries		Foreign offices and subsidiaries	
	2015	2016	2015	2016
	(in millions)			
Projected benefit obligations	¥ 20,236	¥ 26,273	¥ 110,315	¥ 78,640
Accumulated benefit obligations	18,706	26,273	101,053	68,277
Fair value of plan assets	5,475	10,417	65,879	34,679

Table of Contents**MITSUBISHI UFJ FINANCIAL GROUP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

BTMU, MUTB, MUSHD, Mitsubishi UFJ NICOS and other subsidiaries paid special lump-sum termination benefits which are not a part of pension plans to certain early-terminated employees. The amounts charged to operations for such early termination benefits for the fiscal years ended March 31, 2014, 2015 and 2016 were ¥7,358 million, ¥9,285 million and ¥7,428 million, respectively.

The following table presents the amounts recognized in Accumulated OCI of the MUFG Group at March 31, 2015 and 2016:

	Domestic subsidiaries		Foreign offices and subsidiaries			
	2015	2016	2015	2016	2015	2016
