## 1 Introduction

**1.1** TGO is a closed capital corporation controlled by Tele Centro Oeste Celular Participações S.A. (98.69% of the voting capital and 97.21% of total capital).

**1.2** TGO explores services of mobile cellular telephony, including the necessary or useful activities for the execution of such services, in compliance with the authorization it was granted, operating in the area of Goiás and Tocantins, with an authorization period valid until October 29, 2008.

**1.3** According to the relevant fact of May 14, 2004, the Board of TCP, of TCO and controlled corporations approved (with the exception of TCO IP and NBT), a corporate restructuring of TCO and its controlled corporations (with the exception of TCO IP and NBT) which, among other objectives, also approaches the incorporation of shares of such controlled corporations in TCO.

**1.4** Due to the incorporation of shares, we were hired to carry out the appraisal of TGO at market value, of its assets, with the purpose of complying with, when applicable, the provisions applicable in the calculation of the relations of substitution of shares anticipated in Article 264 of Law no 6.404, dated December 15, 1976, changed by Law no 9.457, dated May 05, 1997.

## **2 Objective**

**2.1** According to the terms of our contract for the provision of professional services dated March 24, 2004, we carried out the independent appraisal at market value of the assets of TGO, with the purpose of complying with, when applicable, the provisions applicable in the calculation of the relations of substitution of shares anticipated in Article 264 of Law no 6.404, dated December 15, 1976, changed by Law no 9.457, dated May 05, 1997.

## **3 Sources of Information**

**3.1** We used TCO's quarterly information of March 31, 2004, reviewed by the independent auditors and partial balance sheets of TGO with the same base date. Certain adjustments were carried out on the quarterly information based on the auditing of the consolidated statement of TCO done by its independent auditors on base date April 30, 2004, retroactive to March 31, 2004, according to letter from DTT to KPMG Corporate Finance.

**3.2** The work also was based on interviews with the Administration of TCO, management data, and additional information, written or verbal, provided by the Administration of TCO and on projections of economic indicators available by BACEN<sup>1</sup> in its website.

**3.3** We also stress that this report is not an audit of the financial statements utilized, nor of any other data contained herein and must not, therefore, be interpreted as such.

<sup>1</sup> BACEN Website, [www.bacen.gov](http://www.bacen.gov), in the section Expectativas de mercado.

## **4 Subsequent Events**

**4.1** We emphasize that the appraisal does not reflect any events subsequent to this report's date of issue. In addition, any relevant facts occurring between the appraisal's base date and this document's date of issue and not brought to the attention of KPMG Corporate Finance may affect the value obtained by the appraisal.

**4.2** Eventual relevant changes of Brazilian macro-economic factors after the base date may also impact the results herein.

**4.3** KPMG Corporate Finance was not hired to update this report after its date of issue.

**4.4** KPMG Corporate Finance is not aware of any event in TGO's operations until the date of the issuance of this report that may affect the results of this appraisal.

## 5 Methodology and Scope

**5.1** The methodology of adjusted shareholder's equity at market value was applied for calculating the market value of TGO considering, the assets and liabilities recorded in its financial statements dated March 31, 2004.

**5.2** The application of the methodology begins with the book value of the accounted assets and liabilities, some of which are require adjustments to reflect their probable realization values. The result of the application of this method may offer an initial starting point for estimating the value of a company, as well as a useful comparison base with the results of other methodologies.

**5.3** The methodology and scope of this appraisal intended to value an ongoing corporation. Thus, some costs arising from expenses normally incurred in during the realization of assets or the payment of liabilities (brokerages, commissions, among others), as well as those arising from company bankruptcies or liquidations, such as rescissions, judicial disputes and the hiring of third-parties (lawyers, advisors etc.) were not considered in our calculations.

**5.4** In summary, the following procedures were adopted for the application of this methodology:

Reading and analysis of TGO's partial balance sheets;

Analysis of the assets and liabilities accounts recorded in TGO's asset statement, to identify the items susceptible to adjustments, as well as the calculation of their probable market values;

Adjustment of the fixed assets of the Company by their respective market values based on the assessment opinion prepared by the specialized engineering company Consult Soluções Patrimoniais.

Discussion with TCO's independent auditors on the adjustments they proposed for the Company's financial statements dated March 31, 2004 based on the auditing results auditoria carried out by the auditors on consolidated TCO with base date of April 30, 2004.

Calculation of the tax effects (income tax and social contribution) on the increased and reduced values resulting from this assessment.

Calculation of the market value of TGO's shareholders' equity (**Attachment I**).

**5.5** For purposes of exchange relation, according to provisions in the current legislation, we did not consider the tax credit values originating from taking advantage of the overprice of R\$ 3,314 thousand (three million, three hundred and fourteen thousand reais) of the result of this appraisal.

**5.6** The procedures applied for adjusting the assets susceptible to evaluation at market values are described in Chapter 6 of this report.

**5.7** It is worth pointing out that the following items were not the object of our work: the identification and assessment of intangible assets of the Company that were not recorded in the financial statements, nor the identification and quantifying of liabilities not recorded nor revealed by the Administration of the Company.

## 6 Parameters adopted for the adjustment of assets liable for appraisal at market value

6.1 Below, we describe the parameters used for calculating the market value of TGO's assets and liabilities.

**Main adjustments obtained through the discussion of the audit results of consolidated TCO on the base date of April 30, 2004, retroactive to the financial statements of TGO on March 31, 2004**

6.2 Based on our discussions with TCO's independent auditors, we were informed through a letter dated May 25, 2004, of the following main adjustments varied out in the asset statement of TGO.

Increase of the Provision for losses due to disputes from clients	(3.271)
Reduction of R\$ 331 thousand in other assets	(331)
Actual x Estimated (revenues cycle 38): Increase of R\$ 1,623 thousand in Accounts Receivable	1.623
Complement of the provision for obsolescence: Reduction of R\$ 295 thousand in merchandise inventories	(295)
Reduction of R\$ 223 thousand in Accounts Receivable from debt installments	(223)
Difference between estimated and actual revenues: Increase of R\$ 1,370 thousand in Accounts Receivable	1.370
PIS and COFINS w/ adjustment of estimated revenues: Reduction of R\$ 109 thousand in payable PIS and Cofins	(109)
Reduction of R\$ 348 thousand in the ICMS account to be paid over the adjustment in revenues	(348)
Fiscal effects of the above adjustments: Reduction of R\$ 539 thousand in the provision of payable income tax	539
<b>Total</b>	<b>(1.046)</b>

### Accounts receivable from customers

**6.3 Introduction:** Comprises amounts to be received for services provided and goods sold by TGO, including billed and unbilled amounts, adjusted in line with "Provisions for Doubtful Accounts".

**6.4 Billed Amounts:** This account refers to services provided and goods sold by TGO whose invoices had been issued up to the appraisal base date:

*Billed telecommunications services* - refers to services provided by TGO, whose issued invoices were still unpaid on March 31, 2004, including the sub-account "Payment of Debts in Installments."

*Network usage rates* - refers to the rates charged by TGO for the use of their telephony networks by other telecommunications firms.

*Sale of goods* - refers to the sale of handsets and cell-phone accessories to TGO's distributors, as well as to its own retail outlets, for selling to final consumers.

**6.5 Amounts to be Billed:** This account refers to services provided by TGO, whose invoices had not been issued by the appraisal base date.

## **6.6 Criteria for the Adjustments: Billed Amounts**

*Billed Telecommunication Services* - For calculating its market value, we used the historic receivables percentages of TGO, based on management reports provided by TGO' administration and the calculation of the present value of the projected receivables, based on the projected CDI for the period (Source: Bacen)

*Network usage rates* - For calculating its market value, we adopted the following criteria: (i) For the non-disputed amount, considering that the flow of receivable actually occurs totally within the month subsequent to billing, we considered that its market value is equivalent to the book value; (ii) for the disputed amounts, we used a history of receivables, based on a study carried out by TCO's Administration, and the calculation of the present value of these receivables, based on the projected CDI for the period (Source: Bacen)

*Sale of goods* - Considering that all such receivables are totally paid in the month subsequent to their billing, their market value was considered as equal to their book value.

**6.7 Criteria for the Adjustments: Values Pending Billing** - For the calculation of their market value, we used a criteria identical to those of the billed values based on the historic percentage of receivables of TGO and the calculation of the present value of these receivables, based on projected CDI for the period (Source: Bacen).

**6.8 Value of the Adjustment:** Reduction of R\$ 3,012 thousand (three million, and twelve thousand reais) in the accounts receivable of TGO.

Recoverable Taxes

Recoverable ICMS

**6.9 Criteria for the Adjustments:** The recoverable ICMS over purchases of the fixed assets of TGO was discounted on the present value according to its realization periods, based on projected the CDI for the period (Source: Bacen).

**6.10 Value of the Adjustment:** Reduction of R\$ 1,716 thousand (one million, seven hundred and sixteen thousand reais) in the dividends account of TGO.

## **Deferred Income tax and Social Contributions**

### *Tax Credits Referring to Overprice in Acquisitions*

**6.11 Criteria for the Adjustments:** According to our earlier mention, for purposes of exchange relation, the deferred income tax and social contribution values referring to the overprice recorded in the investments account maintained in TGO were adjusted to reflect the exclusion of the overprice special reserve of the Company's shareholders' equity.

**6.12 Value of the Adjustment:** Reduction of R\$ 4,420 thousand (four million, four hundred and twenty thousand reais) in TGO's Recoverable Taxes account.

### *Deferred Taxes - Fiscal Impact on the Adjustments Made - Capital Loss*

**6.13** Considering that part of the adjustments made to TGO's shareholders' equity would result in a tax-deductible loss, the tax and contribution credits should be considered as a positive factor of these adjustments. This is because the realization of the appraised assets and liabilities would result in a loss that would generate more tax credits for these companies than those to which they are presently entitled.

**6.14** Therefore, we identified each adjustment individually and divided them into those corresponding to an expense and those corresponding to revenue and further classified them as operational or non-operating (pursuant to the definition of a non-operating result contained in Law 9.249/95).

**6.15** Taking only those adjustments constituting tax-deductible expenses and/or taxable revenues, we obtained a deductible loss that will become a tax-loss carry-forward. Such a loss, when operational in nature, was added to the existing losses, considering the expectations of realization provided by the Company. The present value of this loss was considered as an additional tax credit for this Company.

**6.16** As a result, the fiscal impact (tax credits) of the above adjustments was calculated and accounted under "Deferred Income Tax" and Deferred Social Contribution".

**6.17 Value of the Adjustment:** Based on the current legislation, we identified no adjustments for this item.

## **Investments**

### **Other Investments**

**6.18 Criteria for the Adjustments:** Other investments of TGO were scrutinized to assess its possible realization. Investments considered non-realizable had their book balances made void.

**6.19 Value of the Adjustment:** Reduction of R\$ 51 thousand (fifty one thousand reais) in the other investments account of TGO.

### **Fixed Assets**

**6.20 Criteria for the Adjustments:** Appraised at market value of March 31, 2003, through an Expert Appraisal Opinion prepared by Consult.

**6.21 Value of the Adjustment:** Reduction of R\$ 8,081 thousand (eight million, and eighty one thousand reais) in the fixed assets account of TGO.

### **Social Charges**

**6.22 Criteria for the Adjustments:** Discount of the present value according to their periods of realization, based on the projected CDI for the period (Source: Bacen).

**6.23 Value of the Adjustment:** Reduction of R\$ 11 thousand (eleven thousand reais) in TGO's Social Charges account.

### **Suppliers**

**6.24 Criteria for the Adjustments:** Discount of the present value according to their periods of realization, based on the projected CDI for the period (Source: Bacen).

**6.25 Value of the Adjustment:** Reduction of R\$ 566 thousand (five hundred and sixty six thousand reais) in TGO's Suppliers account.

### **Dividends and Interest Payable on Own Capital**

**6.26 Criteria for the Adjustments:** Discount of the present value according to their periods of realization, based on the projected CDI for the period (Source: Bacen).

**6.27 Value of the Adjustment:** Reduction of R\$ 3,233 thousand (three million, two hundred and thirty three thousand reais) in the Dividends Payable account of TGO.

### **Loans and Financing**

**6.28 Introduction:** TGO has recorded in its loans and financing account a growth operation provided by Goiás Fomento for the delay of payment of the ICMS and a payment in installments of fixed assets acquired from Brasil Telecom.

**6.29 Criteria for the Adjustments:** The installments for the amortization of the growth operation and for the payment in installments of the fixed assets, as well as its respective financial charges were discounted at present value according to its realization terms, based on the projected CDI for the period (Source: Bacen).

**6.30 Value of the Adjustment:** Reduction of R\$ 4,423 thousand (four million, four hundred and twenty three thousand reais) in the Loans and Financing account of TGO.

### **Remaining Goods, Rights and Obligations not Appraisable by Market Prices**

**6.31** These are items that by their nature, already are defined by their probable realization values.

## **7 Conclusion**

**7.1** Based on the objective and scope of this appraisal, the market value of TGO's shareholder' equity on March 31, 2004 is of R\$ 514,224 mil (five hundred and fourteen million, two hundred and twenty four thousand reais), which corresponds to R\$ 76.35 (seventy six reais and thirty five cents) per share.

**7.2** The market values of the goods that are part of the fixed assets of TGO were not subjected to appraisal by KPMG Corporate Finance. We limited our task in compiling the amounts reported in the Expert Appraisal Opinion issued by Consult for this purpose.

**7.3** A complete understanding of the conclusion of this report can only be obtained if it and its attachments are read in their entirety. No conclusions should therefore be drawn from a partial reading.

**7.4** KPMG Corporate Finance declares, for the duly purposes, that it does not have any direct or indirect interests in the Company, and additionally, in the operation for which this document is intended.

**7.5** Also, it states that it did not suffer any type of limitation in carrying out this job by the controllers and of the administrators of TCO.

**7.6** KPMG Corporate Finance was not hired to update this report after its date of issue.

## Edgar Filing: TELE CENTRO OESTE CELULAR PARTICIPACOES - Form 6-K

The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors.
