Notes to the Condensed Consolidated Financial Statements

Note 1 – Basis of Presentation

The unaudited condensed consolidated financial statements of T-Mobile US, Inc. (“T-Mobile,” “we,” “our,” “us” or the “Company”) include all adjustments of a normal recurring nature necessary for the fair presentation of the results for the interim periods presented. The results for the interim periods are not necessarily indicative of those for the full year. The condensed consolidated financial statements should be read in conjunction with our consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2015.

The condensed consolidated financial statements include the balances and results of operations of T-Mobile and our consolidated subsidiaries. We consolidate majority-owned subsidiaries over which we exercise control, as well as variable interest entities (“VIE”) where we are deemed to be the primary beneficiary and VIEs, which cannot be deconsolidated, such as those related to Tower obligations. Intercompany transactions and balances have been eliminated in consolidation.

Certain prior period amounts relating to the adoption of Accounting Standards Update (“ASU”) 2015-03 “Simplifying the Presentation of Debt Issuance Costs,” have been reclassified to conform to the current presentation. See “Accounting Pronouncements Adopted During the Current Year” below.

The preparation of financial statements in conformity with United States (“U.S.”) generally accepted accounting principles (“GAAP”) requires our management to make estimates and assumptions which affect the financial statements and accompanying notes. Estimates are based on historical experience, where applicable, and other assumptions which our management believes are reasonable under the circumstances. These estimates are inherently subject to judgment and actual results could differ from those estimates.

Revenue Recognition

We offer products and services to customers through bundled arrangements, which may be comprised of multiple contracts entered into with a customer at or near the same time. We assess such agreements as a single bundled arrangement that may involve multiple deliverables, which include wireless devices, wireless services or a combination thereof. For multiple deliverable arrangements revenue is allocated between the separate units of accounting based on such components’ relative selling prices on a standalone basis.

In June 2016, we introduced #GetThanked, which offers eligible customers the following free promotional items as part of their T-Mobile service:

T-Mobile stock - A share of T-Mobile stock to eligible new (through December 31, 2016) or existing (as of June 6, 2016) customers. Shares issued to customers under this promotion are purchased by an independent third-party broker in the open market on behalf of eligible customers. The associated cost, which is paid by T-Mobile, is recorded as a reduction of service revenue for existing customers and as a reduction of equipment revenue for new customers in our Condensed Consolidated Statements of Comprehensive Income. Through December 31, 2016, existing eligible customers can also receive a share of T-Mobile stock (subject to a maximum of 100 shares in a calendar year) for every new active account they refer, purchased by the third-party broker and paid for by T-Mobile. The cost of shares issued under this refer-a-friend program are included in Selling, general and administrative expense in our Condensed Consolidated Statements of Comprehensive Income;

•

Weekly surprise items - Each Tuesday, eligible customers who download the T-Mobile Tuesday app are informed about and can redeem products and services offered by participating business partners. The associated cost is included in Selling, general and administrative expense in our Condensed Consolidated Statements of Comprehensive Income; and

In-flight Wi-Fi - A full hour of in-flight Wi-Fi free to eligible customers on their smartphone on all Gogo-equipped domestic flights. The associated cost, which is paid by T-Mobile, is included in Cost of services in our Condensed Consolidated Statements of Comprehensive Income.

Table of Contents

Accounting Pronouncements Adopted During the Current Year

In April 2015, the Financial Accounting Standards Board (the “FASB”) issued ASU 2015-03, “Simplifying the Presentation of Debt Issuance Costs.” The standard requires debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs are not affected. We adopted this new guidance in the first quarter of 2016 and applied the changes retrospectively. The implementation of this standard did not have a significant impact on our condensed consolidated financial statements.

In March 2016, the FASB issued ASU 2016-09, “Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting,” which simplifies several aspects of the accounting for share-based payment transactions, including income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. We elected to adopt this standard as of January 1, 2016, as permitted. The impacts on our condensed consolidated financial statements from the adoption of this standard are as follows:

Condensed Consolidated Balance Sheets - A \$38 million decrease to the January 1, 2016 Accumulated deficit balance from the recognition, on a modified retrospective basis, of all previously unrecognized income tax attributes related to share-based payments;

Condensed Consolidated Statements of Comprehensive Income - On a prospective basis, all excess tax benefits and deficiencies related to share-based payments will be recognized through Income tax expense. Prior period amounts were not adjusted; and

Condensed Consolidated Statements of Cash Flows - On a prospective basis, as permitted, excess tax benefits related to share-based payments will be presented as operating activities. Prior period amounts were not adjusted.

Accounting Pronouncements Not Yet Adopted

In May 2014, the FASB issued ASU 2014-09, “Revenue from Contracts with Customers” (“ASU 2014-09”), and has since modified the standard with ASU 2015-14, “Revenue From Contracts With Customers (Topic 606): Deferral of the Effective Date,” ASU 2016-08, “Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net),” ASU 2016-10, “Revenue from Contracts with Customers (Topic 606): Identifying Performance Obligations and Licensing” and ASU 2016-12, “Revenue from Contracts with Customers (Topic 606): Narrow-Scope Improvements and Practical Expedients.” The standard requires entities to recognize revenue through the application of a five-step model, which includes identification of the contract, identification of the performance obligations, determination of the transaction price, allocation of the transaction price to the performance obligations and recognition of revenue as the entity satisfies the performance obligations. We plan to adopt the standard when it becomes effective beginning January 1, 2018; however, early adoption with the original effective date for periods beginning January 1, 2017 is permitted. Under ASU 2014-09, two adoption methods are allowed. Under one method, a company may apply the rules to contracts in all reporting periods presented, subject to certain allowable exceptions. Under the other method, a company may apply the rules to all contracts existing as of January 1, 2018 (provided early adoption is not elected), recognizing an adjustment to retained earnings for the cumulative effect of the change and providing additional disclosures comparing results to previous rules. We continue to evaluate the impact of the new standard and available adoption methods on our consolidated financial statements and believe the standard will result in the implementation of new revenue accounting systems, processes and internal controls over revenue recognition.

In February 2016, the FASB issued ASU 2016-02, “Leases.” The standard requires all lessees to report a right-of-use asset and a lease liability for most leases. The income statement recognition is similar to existing lease accounting and

is based on lease classification. The standard requires lessees and lessors to classify most leases using principles similar to existing lease accounting, but eliminates the “bright line” classification tests. For lessors, the standard modifies the classification criteria and the accounting for sales-type and direct financing leases. The standard will become effective for us beginning January 1, 2019 and will require recognizing and measuring leases at the beginning of the earliest period presented using a modified retrospective approach. Early adoption is permitted. We are currently evaluating the standard and the timing of adoption but expect that it will have a material impact on our consolidated financial statements.

In June 2016, the FASB issued ASU 2016-13, “Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments.” The standard requires a financial asset (or a group of financial assets) measured at amortized cost basis to be presented at the net amount expected to be collected. The measurement of expected credit losses is based on relevant information about past events, including historical experience, current conditions and reasonable and supportable

Table of Contents

forecasts that affect the collectibility of the reported amount. The standard will become effective for us beginning January 1, 2020 and will require a cumulative-effect adjustment to Accumulated deficit as of the beginning of the first reporting period in which the guidance is effective (that is, a modified-retrospective approach). Early adoption is permitted for us as of January 1, 2019. We are currently evaluating the impact this guidance will have on our consolidated financial statements and the timing of adoption.

In August 2016, the FASB issued ASU 2016-15, "Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments." The standard provides guidance on how certain cash receipts and payments are presented and classified in the statement of cash flows, including beneficial interests in securitization, which would impact the presentation of the deferred purchase price from sales of receivables. The standard is intended to reduce current diversity in practice. The standard will become effective for us beginning January 1, 2018 and will require a retrospective approach. Early adoption is permitted, including adoption in an interim period. We are currently evaluating the impact this guidance will have on our consolidated financial statements and the timing of adoption.

Note 2 – Significant Transactions

Spectrum License Transactions

The following table summarizes our spectrum license activity:

(in millions)	Spectrum Licenses
Balance at December 31, 2015	\$23,955
Spectrum license acquisitions	2,914
Spectrum licenses transferred to held for sale	(323)
Costs to clear spectrum	44
Balance at September 30, 2016	\$26,590

We had the following spectrum license transactions during the nine months ended September 30, 2016:

We closed on the agreement with AT&T Inc. for the acquisition and exchange of certain spectrum licenses. Upon closing of the transaction during the first quarter of 2016, we recorded the spectrum licenses received at their estimated fair value of approximately \$1.2 billion and recognized a gain of \$636 million included in Gains on disposal of spectrum licenses in our Condensed Consolidated Statements of Comprehensive Income.

We closed on agreements with multiple third parties for the purchase and exchange of certain spectrum licenses for \$1.3 billion in cash. Upon closing of the transactions during the nine months ended September 30, 2016, we recorded spectrum licenses received at their estimated fair values totaling approximately \$1.7 billion and recognized gains of \$199 million included in Gains on disposal of spectrum licenses in our Condensed Consolidated Statements of Comprehensive Income.

We entered into an agreement with a third party for the exchange of certain spectrum licenses, which is expected to close in the first quarter of 2017. Our spectrum licenses to be transferred as part of the exchange transaction were reclassified as assets held for sale and were included in Other current assets in our Condensed Consolidated Balance Sheets at their carrying value of \$86 million as of September 30, 2016.

We entered into an agreement with a third party for the purchase of certain spectrum licenses covering approximately 11 million people for approximately \$420 million. The transaction is expected to close in the fourth quarter of 2016, subject to regulatory approval and other customary closing conditions.

Debt

In March 2016, T-Mobile USA, Inc. (“T-Mobile USA”), a subsidiary of T-Mobile US, Inc., and certain of its affiliates, as guarantors, entered into a purchase agreement with Deutsche Telekom AG (“Deutsche Telekom”), our majority stockholder, under which T-Mobile USA may, at its option, issue and sell to Deutsche Telekom \$2.0 billion of 5.300% Senior Notes due 2021 (the “5.300% Senior Notes”) for an aggregate purchase price of \$2.0 billion. If T-Mobile USA does not elect to issue the 5.300% Senior Notes on or prior to November 30, 2016, the commitment under the purchase agreement terminates and T-Mobile USA must reimburse Deutsche Telekom for the cost of its hedging arrangements (if any) related to the transaction. As

Table of Contents

of September 30, 2016, if the commitment under this purchase agreement was terminated, the reimbursement amount due to Deutsche Telekom would not be significant.

In April 2016, T-Mobile USA and certain of its affiliates, as guarantors, (i) issued \$1.0 billion of public 6.000% Senior Notes due 2024, (ii) entered into a purchase agreement with Deutsche Telekom, under which T-Mobile USA may, at its option, issue and sell to Deutsche Telekom up to \$1.35 billion of 6.000% Senior Notes due 2024 and (iii) entered into another purchase agreement with Deutsche Telekom, under which T-Mobile USA may, at its option, issue and sell up to an additional \$650 million of 6.000% Senior Notes due 2024.

The purchase price for the 6.000% Senior Notes that may be issued under the \$1.35 billion purchase agreement will be approximately 103.316% of the outstanding principal balance of the notes issued. If T-Mobile USA does not elect to issue the 6.000% Senior Notes under the \$1.35 billion purchase agreement on or prior to November 5, 2016 or elects to issue less than \$1.35 billion of 6.000% Senior Notes, any unused portion of the commitment under the purchase agreement terminates and T-Mobile USA must reimburse Deutsche Telekom for the cost of its hedging arrangements (if any) related to the transaction. As of September 30, 2016, if the commitment under this purchase agreement was terminated, the reimbursement amount due to Deutsche Telekom would not be significant.

The purchase price for the 6.000% Senior Notes that may be issued under the \$650 million purchase agreement will be approximately 104.047% of the outstanding principal balance of the notes issued. If T-Mobile USA does not elect to issue the 6.000% Senior Notes under the \$650 million purchase agreement on or prior to November 5, 2016 or elects to issue less than \$650 million of 6.000% Senior Notes, any unused portion of the commitment under the purchase agreement terminates and T-Mobile USA must reimburse Deutsche Telekom for the cost of its hedging arrangements (if any) related to the transaction. As of September 30, 2016, if the commitment under this purchase agreement was terminated, the reimbursement amount due to Deutsche Telekom would not be significant.

In addition to the new debt issued, and purchase commitments with Deutsche Telekom, the supplemental indentures governing the Senior Reset Notes to affiliates provided for the adjustment of the interest rates on such Notes at various reset dates to rates determined in accordance with the applicable supplemental indenture. In April 2016, the interest rate on the \$600 million of Senior Reset Notes to affiliates due 2023 was adjusted from 5.950% to 9.332%.

Other

In June 2016, a refundable deposit of \$2.2 billion was made to a third party in connection with a potential asset purchase. The deposit is included in Asset purchase deposit in our Condensed Consolidated Balance Sheets.

During the quarter ended and subsequent to September 30, 2016, a handset Original Equipment Manufacturer (“OEM”) announced recalls on certain of its smartphone devices. As a result, we recorded no revenue associated with the device sales to customers and impaired the devices to their net realizable value. The OEM has agreed to reimburse T-Mobile, as such, we have recorded an amount due from the OEM as an offset to the loss recorded in Cost of equipment sales in our Condensed Consolidated Statements of Comprehensive Income and a reduction to Accounts payable and accrued liabilities in our Condensed Consolidated Balance Sheets.

Note 3 – Sales of Certain Receivables

We have entered into transactions to sell certain service and Equipment Installment Plan (“EIP”) accounts receivables. The transactions, including our continuing involvement with the sold receivables and the respective impacts to our financial statements, are described below.

Sales of Service Receivables

Overview of the Transaction

In 2014, we entered into an arrangement to sell certain service accounts receivables on a revolving basis with a current maximum funding commitment of \$750 million and scheduled expiration date in March 2017 (the “service receivable sale arrangement”). The service receivable sale arrangement provided funding of \$750 million as of September 30, 2016 and December 31, 2015. Sales of receivables occur daily and are settled on a monthly basis. The receivables consist of service charges currently due from customers and are short-term in nature.

Table of Contents

In connection with the service receivable sale arrangement, we formed a wholly-owned subsidiary, which qualifies as a bankruptcy remote entity to sell service accounts receivables (“Service BRE”). Service BRE does not qualify as a Variable Interest Entity (“VIE”), and due to the significant level of control we exercise over the entity, it is consolidated. Pursuant to the arrangement, certain of our wholly-owned subsidiaries transfer selected receivables to Service BRE. Service BRE then sells the receivables to an unaffiliated entity (“Service VIE”), which was established to facilitate the sale of beneficial ownership interests in the receivables to certain third parties.

Variable Interest Entity

We determined that Service VIE qualifies as a VIE as it lacks sufficient equity to finance its activities. We have a variable interest in Service VIE, but are not the primary beneficiary as we lack the power to direct the activities that most significantly impact Service VIE’s economic performance. Those activities include committing Service VIE to legal agreements to purchase or sell assets, selecting which receivables are purchased in the service receivable sale arrangement, determining whether Service VIE will sell interests in the purchased service receivables to other parties, funding of the entities and servicing of receivables. We do not hold the power to direct the key decisions underlying these activities. For example, while we act as the servicer of the sold receivables, which is considered a significant activity of the VIE, we are acting as an agent in our capacity as the servicer and the counterparty to the service receivable sale arrangement has the ability to remove us as the servicing agent of the receivables at will with no recourse available to us. As we have determined we are not the primary beneficiary, the results of Service VIE are not consolidated into our condensed consolidated financial statements.

The following table summarizes the carrying amounts and classification of assets (primarily the deferred purchase price) and liabilities included in our Condensed Consolidated Balance Sheets that relate to our variable interest in Service VIE:

(in millions)	September 30, December 31,	
	2016	2015
Other current assets	\$ 167	\$ 206
Other current liabilities	57	73

Sales of EIP Receivables

Overview of the Transaction

In 2015, we entered into an arrangement to sell certain EIP accounts receivables on a revolving basis with a maximum funding commitment of \$800 million (the “EIP sale arrangement”). In June 2016, the EIP sale arrangement was amended to increase the maximum funding commitment to \$1.3 billion with a scheduled expiration date in November 2017. As of September 30, 2016 and December 31, 2015, the EIP sale arrangement provided funding of \$1.2 billion and \$800 million, respectively. Sales of EIP receivables occur daily and are settled on a monthly basis. The receivables consist of customer EIP balances, which require monthly customer payments for up to 24 months.

In connection with this EIP sale arrangement, we formed a wholly-owned subsidiary, which qualifies as a bankruptcy remote entity (“EIP BRE”). Pursuant to the EIP sale arrangement, our wholly-owned subsidiary transfers selected receivables to EIP BRE. EIP BRE then sells the receivables to a non-consolidated and unaffiliated third-party entity for which we do not exercise any level of control, nor does the entity qualify as a VIE.

Variable Interest Entity

We determined that EIP BRE is a VIE as its equity investment at risk lacks the obligation to absorb a certain portion of its expected losses. We have a variable interest in EIP BRE and determined that we are the primary beneficiary

based on our ability to direct the activities which most significantly impact EIP BRE's economic performance. Those activities include selecting which receivables are transferred into EIP BRE and sold in the EIP sale arrangement and funding of EIP BRE. Additionally, our equity interest in EIP BRE obligates us to absorb losses and gives us the right to receive benefits from the EIP BRE that could potentially be significant to EIP BRE. Accordingly, we determined that we are the primary beneficiary, and include the balances and results of operations of EIP BRE in our condensed consolidated financial statements.

Table of Contents

The following table summarizes the carrying amounts and classification of assets (primarily the deferred purchase price) and liabilities included in our Condensed Consolidated Balance Sheets that relate to our EIP BRE:

(in millions)	September 30, December 31,	
	2016	2015
Other current assets	\$ 350	\$ 164
Other assets	73	44
Accounts payable and accrued liabilities	—	14
Other long-term liabilities	5	3

In addition, EIP BRE is a separate legal entity with its own separate creditors who will be entitled, prior to any liquidation of EIP BRE, to be satisfied prior to any value in EIP BRE becoming available to us. Accordingly, the assets of EIP BRE may not be used to settle our general obligations and creditors of EIP BRE have limited recourse to our general credit.

Sales of Receivables

The transfers of service receivables and EIP receivables to the non-consolidated entities are accounted for as sales of financial assets. Once identified for sale, the receivable is recorded at the lower of cost or fair value. Upon sale, we derecognize the net carrying amount of the receivables. We recognize the net cash proceeds in Net cash provided by operating activities in our Condensed Consolidated Statements of Cash Flows.

The proceeds are net of the deferred purchase price, consisting of a receivable from the purchasers that entitles us to certain collections on the receivables. We recognize the collection of the deferred purchase price in Net cash provided by operating activities as it is dependent on collection of the customer receivables and is not subject to significant interest rate risk. The deferred purchase price represents a financial asset that is primarily tied to the creditworthiness of the customers and which can be settled in such a way that we may not recover substantially all of our recorded investment, due to default by the customers on the underlying receivables. We elected, at inception, to measure the deferred purchase price at fair value with changes in fair value included in Selling, general and administrative expense in our Condensed Consolidated Statements of Comprehensive Income. The fair value of the deferred purchase price is determined based on a discounted cash flow model which uses primarily unobservable inputs (Level 3 inputs), including customer default rates. As of September 30, 2016 and December 31, 2015, our deferred purchase price related to the sales of service receivables and EIP receivables was \$588 million and \$389 million, respectively.

The following table summarizes the impacts of the sale of certain service receivables and EIP receivables in our Condensed Consolidated Balance Sheets:

(in millions)	September 30, December 31,	
	2016	2015
Derecognized net service receivables and EIP receivables	\$ 2,379	\$ 1,850
Other current assets	517	370
of which, deferred purchase price	515	345
Other long-term assets	73	44
of which, deferred purchase price	73	44
Accounts payable and accrued liabilities	—	14
Other current liabilities	57	73
Other long-term liabilities	5	3
Net cash proceeds since inception	1,863	1,494
Of which:		
Net cash proceeds during the year-to-date period	369	884

Net cash proceeds funded by reinvested collections	1,494	610
--	-------	-----

We recognized losses from sales of receivables of \$59 million and \$26 million for the three months ended September 30, 2016 and 2015, respectively, and \$157 million and \$139 million for the nine months ended September 30, 2016 and 2015, respectively. These losses from sales of receivables were recognized in Selling, general and administrative expense in our Condensed Consolidated Statements of Comprehensive Income. Losses from sales of receivables include adjustments to the receivables' fair values and changes in fair value of the deferred purchase price.

Table of Contents

Continuing Involvement

Pursuant to the sale arrangements described above, we have continuing involvement with the service receivables and EIP receivables we sell as we service the receivables and are required to repurchase certain receivables, including ineligible receivables, aged receivables and receivables where write-off is imminent. We continue to service the customers and their related receivables, including facilitating customer payment collection, in exchange for a monthly servicing fee. As the receivables are sold on a revolving basis, the customer payment collections on sold receivables may be reinvested in new receivable sales. While servicing the receivables, we apply the same policies and procedures to the sold receivables as we apply to our owned receivables, and we continue to maintain normal relationships with our customers. Pursuant to the EIP sale arrangement, under certain circumstances, we are required to deposit cash or replacement EIP receivables for contracts terminated by customers under our JUMP! Program.

In addition, we have continuing involvement with the sold receivables as we may be responsible for absorbing additional credit losses pursuant to the sale arrangements. Our maximum exposure to loss related to the involvement with the service receivables and EIP receivables sold under the sale arrangements was \$1.1 billion as of September 30, 2016. The maximum exposure to loss, which is a required disclosure under GAAP, represents an estimated loss that would be incurred under severe, hypothetical circumstances whereby we would not receive the deferred purchase price portion of the contractual proceeds withheld by the purchasers and would also be required to repurchase the maximum amount of receivables pursuant to the sale arrangements without consideration for any recovery. As we believe the probability of these circumstances occurring is remote, the maximum exposure to loss is not an indication of our expected loss.

Note 4 – Equipment Installment Plan Receivables

We offer certain retail customers the option to pay for their devices and other purchases in installments over a period of up to 24 months using an EIP.

The following table summarizes the EIP receivables:

(in millions)	September 30, 2016	December 31, 2015
EIP receivables, gross	\$ 2,795	\$ 3,558
Unamortized imputed discount	(154)	(185)
EIP receivables, net of unamortized imputed discount	2,641	3,373
Allowance for credit losses	(133)	(148)
EIP receivables, net	\$ 2,508	\$ 3,225

Classified on the balance sheet as:

Equipment installment plan receivables, net	\$ 1,669	\$ 2,378
Equipment installment plan receivables due after one year, net	839	847
EIP receivables, net	\$ 2,508	\$ 3,225

We use a proprietary credit scoring model that measures the credit quality of a customer at the time of application for mobile communications service using several factors, such as credit bureau information, consumer credit risk scores and service plan characteristics. Based upon customer credit profiles, we classify EIP receivables into the credit categories of “Prime” and “Subprime.” Prime customer receivables are those with lower delinquency risk and Subprime customer receivables are those with higher delinquency risk. Subprime customers may be required to make a down payment on their equipment purchases. In addition, certain customers within the Subprime category are required to pay an advance deposit.

EIP receivables for which invoices have not yet been generated for the customer are classified as Unbilled. EIP receivables for which invoices have been generated but which are not past the contractual due date are classified as Billed – Current. EIP receivables for which invoices have been generated and the payment is past the contractual due date are classified as Billed – Past Due.

Table of Contents

The balance and aging of the EIP receivables on a gross basis by credit category were as follows:

(in millions)	September 30, 2016			December 31, 2015		
	Prime	Subprime	Total	Prime	Subprime	Total
Unbilled	\$1,084	\$ 1,501	\$2,585	\$1,593	\$ 1,698	\$3,291
Billed – Current	54	80	134	77	91	168
Billed – Past Due	26	50	76	37	62	99
EIP receivables, gross	\$1,164	\$ 1,631	\$2,795	\$1,707	\$ 1,851	\$3,558

The increase in subprime EIP receivables as a percentage of total EIP receivables is primarily due to the EIP sale arrangement funding increase during the nine months ended September 30, 2016.

Activity for the nine months ended September 30, 2016 and 2015 in the unamortized imputed discount and allowance for credit losses balances for the EIP receivables was as follows:

(in millions)	September 30, 2016	September 30, 2015
Imputed discount and allowance for credit losses, beginning of period	\$ 333	\$ 448
Bad debt expense	185	269
Write-offs, net of recoveries	(201)	(248)
Change in imputed discount on short-term and long-term EIP receivables	103	(47)
Impacts from sales of EIP receivables	(133)	—
Imputed discount and allowance for credit losses, end of period	\$ 287	\$ 422

The EIP receivables had weighted average effective imputed interest rates of 9.2% and 8.8% as of September 30, 2016 and December 31, 2015, respectively.

Note 5 – Fair Value Measurements

Assets and Liabilities Measured at Fair Value on a Recurring Basis

The carrying amounts and fair values of our short-term investments and long-term debt included in our Condensed Consolidated Balance Sheets were as follows:

(in millions)	September 30, 2016		December 31, 2015	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Assets:				
Short-term investments	\$—	\$—	\$2,998	\$2,998
Liabilities:				
Senior Notes to third parties	\$18,600	\$19,805	\$17,600	\$18,098
Senior Reset Notes to affiliates	5,600	5,930	5,600	6,072
Senior Secured Term Loans	1,985	2,014	2,000	1,990

Short-term Investments

The fair value of our short-term investments as of December 31, 2015, which consisted of U.S. Treasury securities, was determined based on quoted market prices in active markets, and therefore was classified as Level 1 in the fair value hierarchy. We did not have any short-term investments as of September 30, 2016.

Long-term Debt

The fair value of our Senior Notes to third parties was determined based on quoted market prices in active markets, and therefore was classified as Level 1 in the fair value hierarchy. The fair value of the Senior Secured Term Loans and Senior Reset Notes to affiliates was determined based on a discounted cash flow approach using quoted prices of instruments with similar terms and maturities and an estimate for the stand-alone credit risk of T-Mobile. Accordingly, our Senior Secured Term Loans and Senior Reset Notes to affiliates were classified as Level 2 in the fair value hierarchy.

Table of Contents

Although we have determined the estimated fair values using available market information and commonly accepted valuation methodologies, considerable judgment was required in interpreting market data to develop fair value estimates for the Senior Secured Term Loans and Senior Reset Notes to affiliates. The fair value estimates were based on information available as of September 30, 2016 and December 31, 2015. As such, our estimates are not necessarily indicative of the amount we could realize in a current market exchange.

Deferred Purchase Price Assets

In connection with the sales of certain service and EIP receivables pursuant to the sale arrangements, we have deferred purchase price assets measured at fair value that are based on a discounted cash flow model using unobservable Level 3 inputs, including customer default rates. There were no significant changes in fair value for the three and nine months ended September 30, 2016. See Note 3 – Sales of Certain Receivables for further information.

Guarantee Liabilities

We offer a device trade-in program, Just Upgrade My Phone (“JUMP!”), which provides eligible customers a specified-price trade-in right to upgrade their device. For customers who enroll in the device trade-in program, we defer the portion of equipment revenues which represents the estimated fair value of the specified-price trade-in right guarantee incorporating the expected probability and timing of the handset upgrade and the estimated fair value of the used handset which is returned. Accordingly, our guarantee liabilities were classified as Level 3 in the fair value hierarchy. When customers upgrade their device, the difference between the trade-in credit to the customer and the fair value of the returned device is recorded against the guarantee liabilities. Guarantee liabilities were \$140 million and \$163 million as of September 30, 2016 and December 31, 2015, respectively, and are included in Other current liabilities in our Condensed Consolidated Balance Sheets.

The total estimated remaining gross EIP receivable balances of all enrolled handset upgrade program customers, which are the remaining EIP amounts underlying the JUMP! guarantee, including EIP receivables that have been sold, was \$2.0 billion as of September 30, 2016. This is not an indication of our expected loss exposure as it does not consider the expected fair value of the used handset or the probability and timing of the trade-in.

Note 6 – Earnings Per Share

Basic earnings per share amounts are computed by dividing net income, after the deduction of preferred stock dividends declared by the weighted average number of common shares outstanding. Diluted earnings per share amounts assume the issuance of common stock for potentially dilutive share equivalents outstanding.

The computation of basic and diluted earnings per share was as follows:

(in millions, except shares and per share amounts)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2016	2015	2016	2015
Net income	\$366	\$ 138	\$1,070	\$ 436
Less: Dividends on mandatory convertible preferred stock	(13)	(13)	(41)	(41)
Net income attributable to common stockholders - basic and diluted	\$353	\$ 125	\$1,029	\$ 395
Weighted average shares outstanding - basic	822,998,817	817,069,272	821,626,671	815,783,620
Effect of dilutive securities:				
Outstanding stock options and unvested stock awards	9,259,162	9,947,948	9,614,353	8,731,128
Weighted average shares outstanding - diluted	832,257,979	827,017,220	831,241,024	824,514,748

Edgar Filing: T-Mobile US, Inc. - Form 10-Q

Earnings per share - basic	\$0.43	\$ 0.15	\$1.25	\$ 0.49
Earnings per share - diluted	\$0.42	\$ 0.15	\$1.24	\$ 0.48

Potentially dilutive securities:

Outstanding stock options and unvested stock awards	278,675	576,408	287,375	1,289,514
Mandatory convertible preferred stock	32,237,266	32,237,266	32,237,266	32,237,266

Potentially dilutive securities were not included in the computation of diluted earnings per share if to do so would have been anti-dilutive.

Note 7 – Commitments and Contingencies

Commitments

Operating Leases and Purchase Commitments

Future minimum payments for non-cancelable operating leases and purchase commitments are summarized below:

(in millions)	Operating Purchase	
	Leases	Commitments
Year Ending September 30,		
2017	\$ 2,429	\$ 3,360
2018	2,246	957
2019	2,064	857
2020	1,898	719
2021	1,579	627
Thereafter	5,345	1,116
Total	\$ 15,561	\$ 7,636

In May 2016, we entered into a purchase agreement with a third party for the acquisition of certain spectrum licenses for \$420 million. See Note 2 – Significant Transactions for further information.

Related-Party Commitments

In March 2016, T-Mobile USA entered into a purchase agreement with Deutsche Telekom under which T-Mobile USA may, at its option, issue and sell to Deutsche Telekom \$2.0 billion of 5.300% Senior Notes due 2021 for an aggregate purchase price of \$2.0 billion.

In April 2016, T-Mobile USA entered into a purchase agreement with Deutsche Telekom under which T-Mobile USA may, at its option, issue and sell to Deutsche Telekom up to \$1.35 billion of 6.000% Senior Notes due 2024. The purchase price for the 6.000% Senior Notes to be issued under this purchase agreement will be approximately 103.316% of the outstanding principal balance of the notes issued.

In April 2016, T-Mobile USA entered into a purchase agreement with Deutsche Telekom under which T-Mobile USA may, at its option, issue and sell to Deutsche Telekom up to \$650 million of 6.000% Senior Notes due 2024. The purchase price for the 6.000% Senior Notes will be approximately 104.047% of the outstanding principal balance of the notes issued.

See Note 2 – Significant Transactions - Debt for further information.

Contingencies and Litigation

T-Mobile is involved in various lawsuits, claims, government agency investigations and enforcement actions, and other proceedings (“Litigation Matters”) that arise in the ordinary course of business, which include numerous court actions alleging that T-Mobile is infringing various patents. Virtually all of the patent infringement cases are brought by non-practicing entities and effectively seek only monetary damages, although they occasionally seek injunctive relief as well. The Litigation Matters described above have progressed to various stages and some of them may proceed to trial, arbitration, hearing or other adjudication that could include an award of monetary or injunctive relief in the coming 12 months, if they are not otherwise resolved. T-Mobile has established an accrual with respect to

certain of these matters, where appropriate, which is reflected in the condensed consolidated financial statements but that T-Mobile does not consider, individually or in the aggregate, material. An accrual is established when T-Mobile believes it is both probable that a loss has been incurred and an amount can be reasonably estimated. For other matters, where the Company has not determined that a loss is probable or because the amount of loss cannot be reasonably estimated, the Company has not recorded an accrual due to various factors typical in contested proceedings, including but not limited to: uncertainty concerning legal theories and their resolution by courts or regulators; uncertain damage theories and demands; and a less than fully developed factual record. While T-Mobile does not expect that the ultimate resolution of these proceedings, individually or in the aggregate will have a material adverse effect on the Company's financial position, an unfavorable outcome of some or all of these proceedings could have a material adverse impact on results of operations or cash flows for a particular period. This assessment is based on T-Mobile's current

Table of Contents

understanding of relevant facts and circumstances. As such, T-Mobile's view of these matters is subject to inherent uncertainties and may change in the future.

On April 4, 2012, T-Mobile was sued in a patent infringement case by Prism Technologies LLC ("Prism") in federal court in Nebraska. After a jury trial resulted in a defense verdict, the court entered judgment in favor of T-Mobile. Both parties have appealed. Absent a significant adverse change in the status of the case, the Company does not expect that the ultimate resolution of this case will have a material adverse effect on the Company's financial position, results of operations or cash flows.

Note 8 – Income Taxes

Income tax expense was \$232 million and \$100 million for the three months ended September 30, 2016 and 2015, respectively, and \$651 million and \$61 million for the nine months ended September 30, 2016 and 2015, respectively. The effective tax rate was 38.8% and 42.0% for the three months ended September 30, 2016 and 2015, respectively, and 37.8% and 12.3% for the nine months ended September 30, 2016 and 2015, respectively. The lower effective income tax rate for the three months ended September 30, 2016 compared to the same period in 2015 resulted primarily from the increase in income before income taxes and the resulting decrease in the impact of unfavorable tax items. The higher effective income tax rate for the nine months ended September 30, 2016 compared to the same period in 2015 resulted from income tax benefits for discrete income tax items recognized in 2015 that did not impact 2016, including certain changes in state and local income tax laws and the recognition of certain federal tax credits. The increase in the effective income tax rate for the nine months ended September 30, 2016 was partially offset by the recognition of \$24 million of excess tax benefits related to share-based payments in Income tax expense resulting from the adoption of ASU 2016-09 as of January 1, 2016. See Note 1 – Basis of Presentation for further information.

Note 9 – Guarantor Financial Information

Pursuant to the applicable indentures and supplemental indentures, the long-term debt to affiliates and third parties, excluding Senior Secured Term Loans and capital leases, issued by T-Mobile USA ("Issuer") is fully and unconditionally guaranteed, jointly and severally, on a senior unsecured basis by T-Mobile ("Parent") and certain of the Issuer's 100% owned subsidiaries ("Guarantor Subsidiaries").

In April 2016, T-Mobile USA and certain of its affiliates, as guarantors, issued \$1.0 billion of public 6.000% Senior Notes due 2024.

The guarantees of the Guarantor Subsidiaries are subject to release in limited circumstances only upon the occurrence of certain customary conditions. The indentures governing the long-term debt contain covenants that, among other things, limit the ability of the Issuer and the Guarantor Subsidiaries to: incur more debt; pay dividends and make distributions; make certain investments; repurchase stock; create liens or other encumbrances; enter into transactions with affiliates; enter into transactions that restrict dividends or distributions from subsidiaries; and merge, consolidate, or sell, or otherwise dispose of, substantially all of their assets. Certain provisions of each of the indentures and the supplemental indentures relating to the long-term debt restrict the ability of the Issuer to loan funds or make payments to Parent. However, the Issuer and Guarantor Subsidiaries are allowed to make certain permitted payments to the Parent under the terms of the indentures and the supplemental indentures.

Presented below is the condensed consolidating financial information as of September 30, 2016 and December 31, 2015 and for the three and nine months ended September 30, 2016 and 2015.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Cautionary Statement Regarding Forward-Looking Statements

This Quarterly Report on Form 10-Q ("Form 10-Q") includes forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical fact, including information concerning our future results of operations, are forward-looking statements. These forward-looking statements are generally identified by the words "anticipate," "believe," "estimate," "expect," "intend," "may," "could" or similar expressions. Forward-looking statements are based on current expectations and assumptions, which are subject to risks and uncertainties and may cause actual results to differ materially from the forward-looking statements. The following important factors, along with the Risk Factors included in Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2015, could affect future results and cause those results to differ materially from those expressed in the forward-looking statements:

- adverse conditions in the U.S. and international economies or disruptions to the credit and financial markets;
- competition in the wireless services market;
- challenges in implementing our business strategies or funding our wireless operations, including payment for additional spectrum, network upgrades and technological advancements;
- the possibility that we may be unable to renew our spectrum licenses on attractive terms or acquire new spectrum licenses at reasonable costs and terms;
- difficulties in managing growth in wireless data services, including network quality;
- material changes in available technology;
- the timing, scope and financial impact of our deployment of advanced network and business technologies;
- the impact on our networks and business from major technology equipment failures;
 - breaches of our and/or our third party vendors' networks, information technology and data security;
- natural disasters, terrorist attacks or similar incidents;
- existing or future litigation;
- any changes in the regulatory environments in which we operate, including any increase in restrictions on the ability to operate our networks;
- any disruption of our key suppliers' provisioning of products or services;
- material adverse changes in labor matters, including labor negotiations or additional organizing activity, and any resulting financial and/or operational impact;
- the ability to make payments on our debt or to repay our existing indebtedness when due;
- adverse change in the ratings of our debt securities by nationally accredited rating organizations or adverse conditions in the credit markets affecting the cost, including interest rates, and/or availability of further financing;
- changes in accounting assumptions that regulatory agencies, including the Securities and Exchange Commission ("SEC"), may require or that result from changes in the accounting rules or their application, which could result in an impact on earnings; and,
- changes in tax laws, regulations and existing standards and the resolution of disputes with any taxing jurisdictions.

Given these risks and uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements. We undertake no obligation to revise or publicly release the results of any revision to these forward-looking statements, except as required by law. In this Form 10-Q, unless the context indicates otherwise, references to "T-Mobile," "T-Mobile US," "our Company," "the Company," "we," "our," and "us" refer to T-Mobile US, Inc., Delaware corporation, and its wholly-owned subsidiaries.

Investors and others should note that we announce material financial and operational information to our investors using our investor relations website, press releases, SEC filings and public conference calls and webcasts. T-Mobile

intends to also use the @TMobileIR Twitter account (<https://twitter.com/TMobileIR>) and the @JohnLegere Twitter (<https://twitter.com/JohnLegere>), Facebook and Periscope accounts, which Mr. Legere also uses as means for personal communications and observations, as means of disclosing information about the Company, its services and other matters and for complying with its disclosure obligations under Regulation FD. The information we post through these social media channels may be deemed material. Accordingly, investors should monitor these social media channels in addition to following the Company's press releases, SEC filings and public conference calls and webcasts. The social media channels that T-Mobile intends to use as a means of disclosing the information described above may be updated from time to time as listed on the Company's investor relations website.

Table of Contents

Overview

Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") is intended to provide a reader of our consolidated financial statements with a narrative explanation from the perspective of management of our financial condition, results of operations, cash flows, liquidity and certain other factors that may affect future results. The MD&A is provided as a supplement to, and should be read in conjunction with, our unaudited condensed consolidated financial statements included in Part I, Item 1 of this Form 10-Q and audited Consolidated Financial Statements included in Part II, Item 8 of our Form 10-K for the year ended December 31, 2015. Unless expressly stated otherwise, the comparisons presented in this MD&A refer to the same period in the prior year.

Business Overview

In June 2016, we introduced #GetThanked, a history-making move dedicated exclusively to saying "thank you" to our customers. This program, offered to our customers as part of their T-Mobile service: (i) offers eligible new (through December 31, 2016) or existing (as of June 6, 2016) customers ownership in the Company with a free share of T-Mobile stock or an additional share of T-Mobile stock for every new active account each customer refers through December 31, 2016, subject to a maximum of 100 shares in a calendar year, (ii) enables eligible customers who download the T-Mobile Tuesday app to be informed about and to redeem products and services offered by participating business partners each Tuesday and (iii) offers eligible customers a full hour of free in-flight Wi-Fi on their smartphone on all Gogo-equipped domestic flights.

In September 2016, we introduced the latest in our Un-carrier initiatives, T-Mobile ONE and T-Mobile ONE Plus, a move that gives our customers unlimited calls, unlimited text, and unlimited high-speed 4G Long Term Evolution (LTE) data. On T-Mobile ONE, video typically streams at DVD (480p) quality and tethering is at maximum 3G speeds. Customers on T-Mobile ONE Plus plans also receive unlimited high-speed 4G LTE mobile hotspot data, unlimited High Definition Day Passes, and up to two times faster speeds when traveling abroad in 140+ countries and destinations.

On September 1, 2016, we sold our marketing and distribution rights to certain existing T-Mobile co-branded customers to a current Mobile Virtual Network Operator ("MVNO") partner for nominal consideration (the "MVNO Transaction"). Upon the sale, the MVNO Transaction resulted in a transfer of 1,365,000 branded postpaid phone customers and 326,000 branded prepaid customers to wholesale customers. Prospectively from September 1, 2016, revenue for these customers is recorded within wholesale revenues in our Condensed Consolidated Statements of Comprehensive Income. Additionally, the impact of the MVNO Transaction resulted in improvements to branded postpaid phone churn for the three and nine months ended September 30, 2016.

During the quarter ended and subsequent to September 30, 2016, a handset Original Equipment Manufacturer ("OEM") announced recalls on certain of its smartphone devices. As a result, we recorded no revenue associated with the device sales to customers and impaired the devices to their net realizable value. The OEM has agreed to reimburse T-Mobile, as such, we have recorded an amount due from the OEM as an offset to the loss recorded in Cost of equipment sales in our Condensed Consolidated Statements of Comprehensive Income and a reduction to Accounts payable and accrued liabilities in our Condensed Consolidated Balance Sheets.

Results of Operations

Highlights for the three and nine months ended September 30, 2016

-

Total revenues of \$9.2 billion for the three months ended September 30, 2016 increased \$1.4 billion, or 18%, compared to the same period in 2015. Total revenues of \$27.1 billion for the nine months ended September 30, 2016 increased \$3.3 billion, or 14%, compared to the same period in 2015. The increases were primarily from growth in service and equipment revenues as discussed below.

Service revenues of \$7.1 billion for the three months ended September 30, 2016 increased \$831 million, or 13%, compared to the same period in 2015. Service revenues of \$20.6 billion for the nine months ended September 30, 2016 increased \$2.3 billion, or 13%, compared to the same period in 2015. The increases were primarily due to growth in our average branded customer base as a result of the strong customer response to our Un-carrier initiatives and the success of our MetroPCS brand promotional activities and continued growth in new markets.

- Equipment revenues of \$1.9 billion for the three months ended September 30, 2016 increased \$532 million, or 38%, compared to the same period in 2015. Equipment revenues of \$6.0 billion for the nine months ended September 30, 2016 increased \$805 million, or 16%, compared to the same period of 2015. The increases were primarily due to

Table of Contents

higher lease revenues and an increase in the number of devices sold. The increase for the nine months ended September 30, 2016 was partially offset by a lower average revenue per device sold.

Branded postpaid phone churn of 1.32% for the three months ended September 30, 2016 decreased 14 basis points, compared to the same period in 2015. Branded postpaid phone churn of 1.30% for the nine months ended September 30, 2016 decreased 6 basis points, compared to the same period in 2015. The improvements in branded postpaid phone churn for the three and nine months ended September 30, 2016 was primarily the result of the MVNO Transaction and increased customer satisfaction and loyalty from ongoing improvements to network quality, customer service and the overall value of our offerings in the marketplace.

Operating income of \$1.0 billion for the three months ended September 30, 2016 increased \$476 million, compared to the same period in 2015. Operating income of \$2.9 billion for the nine months ended September 30, 2016 increased \$1.6 billion, compared to the same period in 2015. The increases were primarily due to higher total revenues, partially offset by an increase in depreciation and amortization primarily related to devices leased under our JUMP! On Demand Program, higher costs to support customer growth and retention initiatives and higher cost of equipment sales resulting from increases in the number of devices sold. An additional factor driving the increases for the three and nine months ended September 30, 2016 included gains on disposal of spectrum licenses of \$199 million and \$835 million, respectively, compared to \$1 million and \$24 million, for the same periods in 2015.

Net income of \$366 million for the three months ended September 30, 2016 increased \$228 million, or 165%, compared to the same period in 2015. Net income of \$1.1 billion for the nine months ended September 30, 2016 increased \$634 million, or 145%, compared to the same period in 2015. The increases were primarily a result of higher operating income driven by the factors described above, partially offset by higher interest expense related to higher average debt and higher income tax expense. The three and nine months ended September 30, 2016 included \$122 million and \$511 million of net, after-tax gains on disposal of spectrum licenses, respectively.

Adjusted EBITDA (see “Performance Measures”), a non-GAAP financial measure, of \$2.6 billion for the three months ended September 30, 2016 increased \$722 million, or 38%, compared to the same period in 2015. Adjusted EBITDA of \$7.8 billion for the nine months ended September 30, 2016 increased \$2.7 billion, or 53%, compared to the same period in 2015. These increases were primarily due to higher service revenues and gains on disposal of spectrum licenses, partially offset by increases in selling, general and administrative expenses. An additional factor driving the increase for the nine months ended September 30, 2016 included lower losses on equipment primarily due to the impact of customers leasing devices with JUMP! On Demand.

Net cash provided by operating activities of \$1.7 billion for the three months ended September 30, 2016 increased \$209 million, or 14%, compared to the same period in 2015. Net cash provided by operating activities of \$4.5 billion for the nine months ended September 30, 2016 increased \$1.4 billion, or 43%, compared to the same period in 2015. The increases were primarily due to an increase in net non-cash income and expenses included in Net income primarily due to changes in Depreciation and Amortization, Gains on disposal of spectrum licenses and Deferred income tax expense as well as an increase in Net income. The increases were partially offset by an increase in net cash outflows from changes in working capital.

Free Cash Flow (see “Performance Measures”), a non-GAAP financial measure, of \$581 million for the three months ended September 30, 2016 increased \$170 million, or 41%, compared to the same period in 2015. Free Cash Flow of \$690 million for the nine months ended September 30, 2016 increased \$802 million, or 716%, compared to the same period in 2015. The increases were primarily from higher net cash provided by operating activities as discussed above, partially offset by higher purchases of property and equipment from the build-out of our LTE network.

Table of Contents

Set forth below is a summary of consolidated results:

(in millions)	Three Months Ended		Change		Nine Months Ended		Change		
	September 30, 2016	September 30, 2015	\$	%	September 30, 2016	September 30, 2015	\$	%

NM – Not Meaningful									

Revenues

Branded postpaid revenues increased \$450 million, or 11%, for the three months ended and \$1.4 billion, or 12%, for the nine months ended September 30, 2016, compared to the same periods in 2015, primarily due to a 13% and 15% increase, respectively, in the number of average branded postpaid phone and mobile broadband customers, driven by strong customer response to our Un-carrier initiatives and promotions for services and devices. The growth in our customer base also drove increases in our device insurance program revenues for the three and nine months ended September 30, 2016. The increase for the three months ended September 30, 2016 was partially offset by an increase

in the non-cash net revenue deferral for Data Stash and from the impact of the MVNO Transaction. Higher regulatory program revenues also contributed to the increase for the nine months ended September 30, 2016, partially offset by lower branded postpaid phone average revenue per user (“ARPU”) primarily due to an increase in the non-cash net revenue deferral for Data Stash.

Branded prepaid revenues increased \$288 million, or 15%, for the three months ended and \$729 million, or 13%, for the nine months ended September 30, 2016, compared to the same periods in 2015, primarily due to growth in the number of average branded prepaid customers driven by the success of our MetroPCS brand promotional activities and continued growth in new markets.

Table of Contents

Wholesale revenues increased \$68 million, or 40%, for the three months ended and \$153 million, or 31%, for the nine months ended September 30, 2016, compared to the same periods in 2015, primarily due to an increase in data usage per customer and growth in customers of certain MVNO partners, including the impact of the MVNO Transaction.

Roaming and other service revenues increased \$25 million, or 61%, for the three months ended and \$40 million, or 31%, for the nine months ended September 30, 2016, compared to the same periods in 2015, primarily due to higher international roaming revenues driven by an increase in inbound roaming volumes.

Equipment revenues increased \$532 million, or 38%, for the three months ended and \$805 million, or 16%, for the nine months ended September 30, 2016, compared to the same periods in 2015, primarily due to the following:

Increases of \$323 million and \$1.0 billion in lease revenues for the three and nine months ended September 30, 2016, respectively, which are recognized over the lease term, resulting from the launch of our JUMP! On Demand program at the end of the second quarter of 2015;

• An increase of \$209 million in device sales revenues for the three months ended September 30, 2016, primarily due to a 19% increase in the number of devices sold. Device sales revenue is recognized at the time of sale.

A decline of \$227 million in device sales revenues for the nine months ended September 30, 2016 primarily due to a lower average revenue per device sold resulting from promotions for devices and the impact of our JUMP!

• On Demand program launched at the end of the second quarter of 2015, partially offset by a 5% increase in the number of devices sold as well as an increase in the number of accessories sold.

During the three and nine months ended September 30, 2016, we provided \$1.4 billion and \$4.2 billion, respectively, in gross equipment installment plan (“EIP”) device financing to our customers, which increased by \$265 million and decreased by \$107 million, respectively, compared to the same periods in 2015. The increase for the three months ended September 30, 2016 was primarily due to an increase in devices financed through EIP due to focus on devices financed on EIP in the third quarter of 2016, compared to focus on devices financed on JUMP! On Demand in the third quarter of 2015. The decrease for the nine months ended September 30, 2016 was primarily due to a decline in devices financed through EIP.

Other revenues increased \$34 million, or 26%, for the three months ended and \$122 million, or 34%, for the nine months ended September 30, 2016, compared to the same periods in 2015, primarily due to higher revenue from revenue share agreements with third parties. Higher lease income associated with reciprocal spectrum license lease agreements also contributed to the increase for the nine months ended September 30, 2016.

Operating Expenses

Cost of services increased \$58 million, or 4%, for the three months ended and \$116 million, or 3%, for the nine months ended September 30, 2016, compared to the same periods in 2015, primarily due to higher regulatory program costs and expenses associated with network expansion and the build-out of our network to utilize our 700 MHz A-Block spectrum licenses, including higher employee-related costs. The increases for the three and nine months ended September 30, 2016 were partially offset by synergies realized from the decommissioning of the MetroPCS Code Division Multiple Access (“CDMA”) network and lower long distance and toll costs. In addition, higher lease expense associated with reciprocal spectrum license lease agreements contributed to the increase for the nine months ended September 30, 2016.

Cost of equipment sales increased \$554 million, or 28%, for the three months ended and \$207 million, or 3%, for the nine months ended September 30, 2016, compared to the same periods in 2015.

The increase for the three months ended September 30, 2016 was primarily due to a 19% increase in the number of devices sold and a higher average cost per device sold;

The increase for the nine months ended September 30, 2016 was primarily due to a 5% increase in the number of devices sold as well as an increase in the number of accessories sold, partially offset by a lower average cost per device sold primarily due to the impact of our JUMP! On Demand program launched at the end of the second quarter of 2015. The impact from returned and purchased leased devices and an increase in insurance claims costs also contributed to the increase for the nine months ended September 30, 2016. With JUMP! On Demand, the cost of the leased wireless device is capitalized and recognized as depreciation expense over the term of the lease rather than recognized as cost of equipment sales when the device is delivered to the customer.

Table of Contents

Selling, general and administrative increased \$274 million, or 10%, for the three months ended and \$985 million, or 13%, for the nine months ended September 30, 2016, compared to the same periods in 2015, primarily attributable to strategic investments to support our growing customer base, including higher employee-related costs, higher commissions driven by an increase in branded customer additions and higher promotional costs.

Depreciation and amortization increased \$411 million, or 36%, for the three months ended and \$1.4 billion, or 41%, for the nine months ended September 30, 2016, compared to the same periods in 2015, primarily due to \$367 million and \$1.2 billion, respectively, in depreciation expense related to devices leased under our JUMP! On Demand program launched at the end of the second quarter of 2015, as well as increases resulting from the build-out of our LTE network. With JUMP! On Demand, the cost of a leased wireless device is depreciated over the lease term to its estimated residual value.

Cost of MetroPCS business combination of \$15 million for the three months ended and \$110 million for the nine months ended September 30, 2016, primarily reflects network decommissioning costs associated with the business combination. We do not expect to incur significant additional network decommissioning costs as cell site assets are removed in 2016.

Gains on disposal of spectrum licenses of \$199 million for the three months ended September 30, 2016 consisted of gains from spectrum license transactions during the third quarter of 2016. Gains on disposal of spectrum licenses of \$835 million for the nine months ended September 30, 2016 also included a gain of \$636 million from a spectrum license transaction with AT&T Inc. recorded in the first quarter of 2016. Gains on disposal of spectrum licenses of \$24 million for the nine months ended September 30, 2015 primarily consisted of a gain from a spectrum license transaction with Verizon recorded in the second quarter of 2015. See Note 2 – Significant Transactions of the Notes to the Condensed Consolidated Financial Statements.

Other Income (Expense)

Interest expense increased \$114 million, or 44%, for the three months ended and \$303 million, or 39%, for the nine months ended September 30, 2016, compared to the same periods in 2015, primarily due to higher debt balances with third parties for the three and nine months ended September 30, 2016, compared to the same periods in 2015, as well as lower capitalized interest costs associated with the build out of our network to utilize our 700 MHz A-Block spectrum licenses.

Interest expense to affiliates decreased \$45 million, or 37%, for the three months ended and \$29 million, or 10%, for the nine months ended September 30, 2016, compared to the same periods in 2015, primarily due to changes in the fair value of embedded derivative instruments associated with Senior Reset Notes issued to Deutsche Telekom AG (“Deutsche Telekom”) in 2015. The decreases for the three and nine months ended September 30, 2016 were partially offset by an increase in interest rates on certain Senior Reset Notes issued to Deutsche Telekom, which were adjusted at reset dates in the second quarter of 2016 and in 2015, as well as lower capitalized interest costs associated with the build out of our network to utilize our 700 MHz A-Block spectrum licenses.

Interest income decreased \$47 million, or 43%, for the three months ended and \$137 million, or 41%, for the nine months ended September 30, 2016, compared to the same periods in 2015, primarily due to a decline in imputed interest income associated with devices financed through EIP resulting from sales of certain EIP receivables pursuant to our EIP receivables sales arrangement and following the launch of our JUMP! On Demand program at the end of the second quarter of 2015. Interest associated with EIP receivables, which is imputed at the time of a device sale and then recognized over the financed installment term, was \$59 million and \$189 million for the three and nine months

ended September 30, 2016, respectively, compared to \$108 million and \$331 million for the same periods in 2015. See Note 4 – Equipment Installment Plan Receivables of the Notes to the Condensed Consolidated Financial Statements.

Income Taxes

Income tax expense was \$232 million and \$100 million for the three months ended September 30, 2016 and 2015, respectively, and \$651 million and \$61 million for the nine months ended September 30, 2016 and 2015, respectively. The effective tax rate was 38.8% and 42.0% for the three months ended September 30, 2016 and 2015, respectively, and 37.8% and 12.3% for the nine months ended September 30, 2016 and 2015, respectively. The lower effective income tax rate for the three months ended September 30, 2016 compared to the same period in 2015 resulted primarily from the increase in income before income taxes and the resulting decrease in the impact of unfavorable tax items. The higher effective income tax rate for the nine months ended September 30, 2016 compared to the same period in 2015 resulted from income tax benefits for discrete income tax items recognized in 2015 that did not impact 2016, including certain changes in state and local income tax laws and

Table of Contents

the recognition of certain federal tax credits. The increase in the effective income tax rate for the nine months ended September 30, 2016 was partially offset by the recognition of \$24 million of excess tax benefits related to share-based payments in Income tax expense resulting from the adoption of ASU 2016-09 as of January 1, 2016. See Note 1 – Basis of Presentation of the Notes to the Condensed Consolidated Financial Statements.

Net Income

Net income increased \$228 million, or 165%, for the three months ended and \$634 million, or 145%, for the nine months ended September 30, 2016, compared to the same periods in 2015, as a result of the factors described above. The three and nine months ended September 30, 2016 included \$122 million and \$511 million of net, after-tax gains on disposal of spectrum licenses, respectively.

Guarantor Subsidiaries

The financial condition and results of operations of the Parent, Issuer and Guarantor Subsidiaries is substantially similar to the Company's consolidated financial condition.

The most significant components of the financial condition of our Non-Guarantor Subsidiaries were as follows:

(in millions)	September 30, December 31, Change			
	2016	2015	\$	%
Other current assets	\$ 497	\$ 400	\$97	24 %
Property and equipment, net	395	454	(59)	(13)%
Tower obligations	2,224	2,247	(23)	(1)%
Total stockholders' deficit	(1,356)	(1,359)	3	— %

The most significant components of the results of operations of our Non-Guarantor Subsidiaries were as follows:

(in millions)	Three Months Ended September 30,				Nine Months Ended September 30,			
	2016	2015	\$	%	2016	2015	\$	%
Service revenues	\$520	\$428	\$92	21 %	\$1,500	\$1,227	\$273	22 %
Cost of equipment sales	300	188	112	60 %	768	531	237	45 %
Selling, general and administrative	227	180	47	26 %	645	528	117	22 %
Total comprehensive income (loss)	(19)	11	(30)	(273)%	8	44	(36)	(82)%

The increases in Service revenues, Cost of equipment sales and Selling, general and administrative were primarily the result of an increase in activity of the non-guarantor subsidiary that provides device insurance, primarily driven by growth in our customer base. All other results of operations of the Parent, Issuer and Guarantor Subsidiaries are substantially similar to the Company's consolidated results of operations. See Note 9 – Guarantor Financial Information of the Notes to the Condensed Consolidated Financial Statements.

Performance Measures

In managing our business and assessing financial performance, we supplement the information provided by our financial statements with other operating or statistical data and non-GAAP financial measures. These operating and financial measures are utilized by our management to evaluate our operating performance and, in certain cases, our ability to meet liquidity requirements. Although companies in the wireless industry may not define each of these

measures in precisely the same way, we believe that these measures facilitate comparisons with other companies in the wireless industry on key operating and financial measures.

Total Customers

A customer is generally defined as a SIM card with a unique T-Mobile identity number which is associated with an account that generates revenue. Branded customers generally include customers that are qualified either for postpaid service utilizing phones or mobile broadband devices (including tablets), where they generally pay after receiving service, or prepaid service, where they generally pay in advance. Wholesale customers include Machine-to-Machine (“M2M”) and MVNO customers that operate on our network, but are managed by wholesale partners.

Table of Contents

The following table sets forth the number of ending customers:

(in thousands)	September 30,		Change	
	2016	2015	#	%
Customers, end of period				
Branded postpaid phone customers	30,364	28,438	1,926	7 %
Branded postpaid mobile broadband customers	2,866	1,965	901	46 %
Total branded postpaid customers	33,230	30,403	2,827	9 %
Branded prepaid customers	19,272	17,162	2,110	12 %
Total branded customers	52,502	47,565	4,937	10 %
Wholesale customers	16,852	13,655	3,197	23 %
Total customers, end of period	69,354	61,220	8,134	13 %

The following table sets forth the number of net customer additions:

(in thousands)	Three Months				Nine Months			
	Ended		Change		Ended		Change

NM – Not Meaningful

Net customer additions were 1,970,000 for the three months ended September 30, 2016, compared to 2,312,000 for the same period in 2015. Net customer additions were 6,072,000 for the nine months ended September 30, 2016, compared to 6,202,000 for the same period in 2015. At September 30, 2016, we had 69.4 million total customers, a 13% increase from the total as of September 30, 2015, as a result of growth in the customer categories described below. The MVNO Transaction resulted in a transfer of 1,365,000 branded postpaid phone customers and 326,000 branded prepaid customers to wholesale customers on September 1, 2016. Prospectively from September 1, 2016, net customer additions for these customers are included within Wholesale customers. Ending customers as of September 30, 2016 reflect the transfers in connection with the MVNO Transaction.

Branded Customers

Total branded net customer additions decreased 27,000, or 2%, for the three months ended September 30, 2016, compared to the same period in 2015, primarily due to the following:

- Lower branded postpaid mobile broadband net customer additions primarily due to higher deactivations resulting from a growing branded postpaid mobile broadband customer base; partially offset by
- Higher branded prepaid net customer additions primarily due to the success of our MetroPCS brand promotional activities and continued growth in new markets, partially offset by an increase in the number of qualified branded

prepaid customers migrating to branded postpaid plans; and
Higher branded postpaid phone net customer additions primarily due to an increase in the number of qualified
branded prepaid customers migrating to branded postpaid plans, partially offset by lower gross customer additions
primarily due to an increase in competitive activity.

Table of Contents

Total branded net customer additions increased 803,000, or 20%, for the nine months ended September 30, 2016, compared to the same period in 2015, primarily due to the following:

Higher branded prepaid net customer additions primarily due to the success of our MetroPCS brand promotional activities and continued growth in new markets; partially offset by an increase in the number of qualified branded prepaid customers migrating to branded postpaid plans;

Lower branded postpaid phone net customer additions primarily due to higher deactivations resulting from a growing branded postpaid phone customer base, partially offset by lower branded postpaid phone churn as well as an increase in the number of qualified branded prepaid customers migrating to branded postpaid plans; and

Lower branded postpaid mobile broadband net customer additions primarily due to higher deactivations resulting from a growing branded postpaid mobile broadband customer base, partially offset by higher gross customer additions.

Wholesale

Wholesale net customer additions decreased 315,000, or 50%, for the three months ended September 30, 2016, compared to the same period in 2015, primarily due to lower gross customer additions.

Wholesale net customer additions decreased 933,000, or 44%, for the nine months ended September 30, 2016, compared to the same period in 2015, primarily due to higher deactivations resulting from a growing customer base and lower gross customer additions.

Customers Per Account

Customers per account is calculated by dividing the number of branded postpaid customers as of the end of the period by the number of branded postpaid accounts as of the end of the period. An account may include branded postpaid phone and mobile broadband customers. We believe branded postpaid customers per account provides management with useful information to evaluate our branded postpaid customer base on a per account basis.

	September 30, 2016	September 30, 2015	Change #	%
Branded postpaid customers per account	2.78	2.48	0.30	12%

Branded postpaid customers per account increased primarily due to ongoing service promotions targeting families, increased penetration of mobile broadband devices and the impact of the MVNO Transaction.

Churn

Churn represents the number of customers whose service was disconnected as a percentage of the average number of customers during the specified period. The number of customers whose service was disconnected is presented net of customers that subsequently have their service restored within a certain period of time. We believe that churn provides management with useful information to evaluate customer retention and loyalty.

	Three Months Ended September 30, 2016			Nine Months Ended September 30, 2016		
	2016	2015	Bps Change	2016	2015	Bps Change
Branded postpaid phone churn	1.32%	1.46%	-14 bps	1.30%	1.36%	-6 bps
Branded prepaid churn	3.82%	4.09%	-27 bps	3.86%	4.54%	-68 bps

Branded postpaid phone churn decreased 14 basis points for the three months ended and 6 basis point for the nine months ended September 30, 2016, compared to the same periods in 2015, and was primarily impacted by the MVNO Transaction, which had a higher rate of branded postpaid phone churn and increased customer satisfaction and loyalty from ongoing improvements to network quality, customer service and the overall value of our offerings in the marketplace. If the MVNO transaction had occurred on July 1, 2016, reported postpaid phone churn would have been 12 basis points lower at 1.20% for the three months ended September 30, 2016.

Branded prepaid churn decreased 27 basis points for the three months ended and 68 basis points for the nine months ended September 30, 2016, compared to the same periods in 2015, and was primarily impacted by a decrease in certain customers,

Table of Contents

which had a higher rate of branded prepaid churn, as well as strong performance of the MetroPCS brand. Additionally, branded prepaid churn for the nine months ended September 30, 2016 was impacted by a methodology change in the third quarter of 2015 that had no impact on our reported branded prepaid ending customers or net customer additions, but resulted in computationally lower branded prepaid gross customer additions and deactivations. Revision of prior periods in 2015 was not practicable because certain historical data was no longer available.

Average Revenue Per User, Average Billings Per User

ARPU represents the average monthly service revenue earned from customers. We believe ARPU provides management, investors and analysts with useful information to assess and evaluate our service revenue realization per customer and assist in forecasting our future service revenues generated from our customer base. Branded postpaid phone ARPU excludes mobile broadband customers and related revenues.

Average Billings Per User (“ABPU”) represents the average monthly customer billings, including monthly lease revenues and EIP billings, per customer. We believe branded postpaid ABPU provides management, investors and analysts with useful information to evaluate average branded postpaid customer billings as it is indicative of estimated cash collections, including device financing payments, from our customers each month.

The following tables illustrate the calculation of our operating measures ARPU and ABPU and reconcile these measures to the related service revenues:

(in millions, except average number of customers, ARPU and ABPU)	Three Months Ended September 30, 2016				Change #	Change %	Nine Months Ended September 30, 2016			
	2016	2015	#	%			2016	2015	#	%

of months in period

Branded prepaid ARPU	\$38.01	\$37.46	\$0.55	1	%	\$37.82	\$37.70	\$0.12	NM
----------------------	---------	---------	--------	---	---	---------	---------	--------	----

NM – Not Meaningful

Branded postpaid phone ARPU increased \$0.16, or flat, for the three months ended and decreased \$0.38, or 1%, for the nine months ended September 30, 2016, compared to the same periods in 2015, primarily due to an increase in the non-cash net revenue deferrals for Data Stash and dilution from continued growth of customers on promotions targeting families, partially offset by continued growth of our insurance programs and higher data attach rates. The transfer of customers as part of the MVNO transaction contributed to the increase for the three months ended September 30, 2016. Higher regulatory program revenues also contributed to an increase for the nine months ended September 30, 2016.

Table of Contents

Branded postpaid ABPU increased \$0.42, or 1%, for the three months ended and \$0.21, or flat, for the nine months ended September 30, 2016, compared to the same periods in 2015, primarily due to increases in lease revenues and the impact from the transfer of customers as part of the MVNO Transaction, partially offset by lower EIP billings, an increase in the non-cash net revenue deferrals for Data Stash, dilution from continued growth of customers on promotions targeting families and increased penetration of mobile broadband devices. The decreases in EIP billings were primarily due to the impact of our JUMP! On Demand program launched at the end of the second quarter of 2015.

Branded prepaid ARPU increased \$0.55, or 1%, for the three months ended and \$0.12, or flat, for the nine months ended September 30, 2016, compared to the same periods in 2015, primarily due to a decrease in certain customers that had lower average branded prepaid ARPU, as well as higher data attach rates. The increases were partially offset by dilution from growth of customers on rate plan promotions.

Adjusted EBITDA

Adjusted EBITDA represents earnings before interest expense, net of Interest income, Income tax expense, Depreciation and amortization, non-cash Stock-based compensation and certain expenses not reflective of T-Mobile's operating performance. Net income margin represents Net income divided by Service revenues. Adjusted EBITDA margin represents Adjusted EBITDA divided by Service revenues.

Adjusted EBITDA is a non-GAAP financial measure utilized by our management to monitor the financial performance of our operations. We use Adjusted EBITDA internally as a metric to evaluate and compensate our personnel and management for their performance, and as a benchmark to evaluate our operating performance in comparison to our competitors. Management believes analysts and investors use Adjusted EBITDA as a supplemental measure to evaluate overall operating performance and facilitate comparisons with other wireless communications companies because it is indicative of our ongoing operating performance and trends by excluding the impact of interest expense from financing, non-cash depreciation and amortization from capital investments as well as non-cash stock-based compensation and certain other nonrecurring expenses. Adjusted EBITDA has limitations as an analytical tool and should not be considered in isolation or as a substitute for income from operations, net income or any other measure of financial performance reported in accordance with GAAP.

The following table illustrates the calculation of Adjusted EBITDA and reconciles Adjusted EBITDA to Net income, which we consider to be the most directly comparable GAAP financial measure:

	Three Months				Nine Months				
	Ended September 30,		Change		Ended September 30,		Change		
(in millions)	2016	2015	\$	%	2016	2015	\$	%

NM – Not Meaningful

(1) Stock-based compensation includes payroll tax impacts and may not agree to stock-based compensation expense in the condensed consolidated financial statements.

Table of Contents

Adjusted EBITDA increased \$722 million, or 38%, for the three months ended and \$2.7 billion, or 53%, for the nine months ended September 30, 2016, compared to the same periods in 2015, primarily due to the following:

Increased branded postpaid and prepaid service revenues primarily due to strong customer response to our Un-carrier initiatives and the ongoing success of our promotional activities;

Higher gains on disposal of spectrum licenses;

Lower losses on equipment for the nine months ended September 30, 2016 primarily due to the impact of customers leasing devices with JUMP! On Demand, as the costs of leased devices, which are capitalized and depreciated over the lease term, are excluded from Adjusted EBITDA. In connection with JUMP! On Demand, we had lease revenues of \$353 million and \$1.1 billion for the three and nine months ended September 30, 2016, respectively, and depreciation expense of \$367 million and \$1.2 billion related to leased wireless devices for the three and nine months ended September 30, 2016, respectively; and

Focused cost control and synergies realized from the MetroPCS business combination, primarily in cost of services; partially offset by

- Higher selling, general and administrative expenses primarily attributable to strategic investments to support our growing customer base, including higher employee-related costs, higher commissions driven by an increase in branded customer additions and higher promotional costs.

Liquidity and Capital Resources

Our principal sources of liquidity are our cash and cash equivalents and cash generated from operations, proceeds from issuance of long-term debt, capital leases, common and preferred stock, the sale of certain receivables, financing arrangements of vendor payables which effectively extend payment terms and an unsecured revolving credit facility with Deutsche Telekom.

Cash Flows

The following is an analysis of our year-to-date cash flows:

	Nine Months		Change	
	Ended			
(in millions)	2016	2015	\$	%
Net cash provided by operating activities	\$4,533	\$3,181	\$1,352	43 %
Net cash used in investing activities	(4,386)	(5,238)	852	16 %
Net cash provided by (used in) financing activities	623	(625)	1,248	NM

NM – Not Meaningful

Operating Activities

Cash provided by operating activities increased \$1.4 billion, or 43%, primarily due to the following:

\$986 million increase in net non-cash income and expenses included in net income primarily due to changes in Depreciation and amortization, Gains on disposal of spectrum licenses and Deferred income tax expense;

\$634 million increase in net income; partially offset by

\$268 million increase in net cash outflows from changes in working capital primarily due to changes in Accounts payable and accrued liabilities, Equipment installment plan receivables, including inflows from the EIP sale arrangement funding increase and Inventories.

Investing Activities

Cash used in investing activities decreased \$852 million, or 16%, to a use of \$4.4 billion primarily due to the following:

- \$3.8 billion for the purchase of property and equipment primarily related to the build out of our LTE network;
- \$3.5 billion for the purchase of spectrum licenses and other intangible assets, including a \$2.2 billion deposit made to a third party in connection with a potential asset purchase; partially offset by
- \$3.0 billion in sales of short-term investments.

Table of Contents

Financing Activities

Cash provided by financing activities increased \$1.2 billion to inflow of \$623 million primarily due to the following:

\$997 million from the issuance of long-term debt; partially offset by \$150 million for repayments of short-term debt for purchases of inventory, property and equipment, net and \$133 million for repayments of capital lease obligations.

Cash and Cash Equivalents

As of September 30, 2016, our cash and cash equivalents were \$5.4 billion.

Free Cash Flow

Free Cash Flow represents net cash provided by operating activities less payments for purchases of property and equipment. Free Cash Flow is a non-GAAP financial measure utilized by our management, investors and analysts of T-Mobile's financial information to evaluate cash available to pay debt and provide further investment in the business.

The following table illustrates the calculation of Free Cash Flow and reconciles Free Cash Flow to Net cash provided by operating activities, which we consider to be the most directly comparable GAAP financial measure:

	Three Months				Nine Months			
	Ended		Change		Ended		Change	
(in millions)	September 30,				September 30,			
	2016	2015	\$	%	2016	2015	\$	%
Net cash provided by operating activities	\$1,740	\$1,531	\$209	14%	\$4,533	\$3,181	\$1,352	43%
Cash purchases of property and equipment	(1,159)	(1,120)	(39)	3%	(3,843)	(3,293)	(550)	17%
Free Cash Flow	\$581	\$411	\$170	41%	\$690	\$(112)	\$802	716%

Free Cash Flow increased \$170 million for the three months ended and \$802 million for the nine months ended September 30, 2016, compared to the same periods in 2015. These increases were primarily due to higher net cash provided by operating activities, partially offset by higher purchases of property and equipment from the build-out of our LTE network, as described above.

Debt

As of September 30, 2016, our total debt was \$27.8 billion, excluding our tower obligations, of which \$27.4 billion was classified as long-term debt. Significant debt-related activity during 2016 included:

In March 2016, T-Mobile USA, Inc. ("T-Mobile USA"), a subsidiary of T-Mobile US, Inc., and certain of its affiliates, as guarantors, entered into a purchase agreement with Deutsche Telekom AG ("Deutsche Telekom"), our majority stockholder, under which T-Mobile USA may, at its option, issue and sell to Deutsche Telekom \$2.0 billion of 5.300% Senior Notes due 2021 (the "5.300% Senior Notes") for an aggregate purchase price of \$2.0 billion. If T-Mobile USA does not elect to issue the 5.300% Senior Notes on or prior to November 30, 2016, the commitment under the purchase agreement terminates and T-Mobile USA must reimburse Deutsche Telekom for the cost of its hedging arrangements (if any) related to the transaction.

In April 2016, T-Mobile USA issued \$1.0 billion of public 6.000% Senior Notes due 2024.

•

In April 2016, T-Mobile USA entered into a purchase agreement with Deutsche Telekom, under which T-Mobile USA may, at its option, issue and sell to Deutsche Telekom up to \$1.35 billion of 6.000% Senior Notes due 2024 and (iii) entered into another purchase agreement with Deutsche Telekom, under which T-Mobile USA may, at its option, issue and sell to Deutsche Telekom up to an additional \$650 million of 6.000% Senior Notes due 2024.

The purchase price for the 6.000% Senior Notes that may be issued under the \$1.35 billion purchase agreement will be approximately 103.316% of the outstanding principal balance of the notes issued. If T-Mobile USA does not elect to issue the 6.000% Senior Notes under the \$1.35 billion purchase agreement on or prior to November 5, 2016 or elects to issue less than \$1.35 billion of 6.000% Senior Notes, any unused portion of the commitment under the purchase

Table of Contents

agreement terminates and T-Mobile USA must reimburse Deutsche Telekom for the cost of its hedging arrangements (if any) related to the transaction.

In April 2016, T-Mobile USA entered into another purchase agreement with Deutsche Telekom, in which T-Mobile USA may, at its option, issue and sell to Deutsche Telekom up to an additional \$650 million of 6.000% Senior Notes due 2024. The purchase price for the 6.000% Senior Notes that may be issued under the \$650 million purchase agreement will be approximately 104.047% of the outstanding principal balance of the notes issued. If T-Mobile USA does not elect to issue the 6.000% Senior Notes under the \$650 million purchase agreement on or prior to November 5, 2016 or elects to issue less than \$650 million Senior Notes, any unused portion of the commitment under the purchase agreement terminates and T-Mobile USA must reimburse Deutsche Telekom for the cost of its hedging arrangements (if any) related to the transaction.

We have entered into uncommitted capital lease facilities with certain partners, which provide us with the ability to enter into capital leases for network equipment and services. As of September 30, 2016, we have committed to \$1.1 billion of capital leases under these capital lease facilities, of which \$679 million was executed during the nine months ended September 30, 2016. We expect to enter into up to an additional \$121 million in capital lease commitments during 2016.

As of September 30, 2016, there was no outstanding balance on our unsecured revolving credit facility with Deutsche Telekom that allows for up to \$500 million in borrowings.

See Note 2 – Significant Transactions of the Notes to the Condensed Consolidated Financial Statements for additional details.

We could seek additional sources of liquidity, including through the issuance of additional long-term debt in 2016, to continue to opportunistically acquire spectrum licenses in private party transactions and future FCC spectrum license auctions, including the broadcast incentive auction in 2016, or for the refinancing of existing long-term debt on an opportunistic basis. Excluding any additional liquidity needed to acquire spectrum, we expect our principal sources of funding to be sufficient to meet our anticipated liquidity requirements in the next 12 months and intend to use our principal sources of funding for general corporate purposes, including capital investments other than spectrum licenses, and enhancing our financial flexibility.

We determine future liquidity requirements, for both operations and capital expenditures, based in large part upon projected financial and operating performance, and opportunities to acquire additional spectrum. We regularly review and update these projections for changes in current and projected financial and operating results, general economic conditions, the competitive landscape and other factors. There are a number of risks and uncertainties that could cause our financial and operating results and capital requirements to differ materially from our projections, which could cause future liquidity to differ materially from our assessment.

The indentures and credit facilities governing our long-term debt to affiliates and third parties, excluding capital leases, contain covenants that, among other things, limit the ability of the Issuer and the Guarantor Subsidiaries to: incur more debt; pay dividends and make distributions on our common stock; make certain investments; repurchase stock; create liens or other encumbrances; enter into transactions with affiliates; enter into transactions that restrict dividends or distributions from subsidiaries; and merge, consolidate, or sell, or otherwise dispose of, substantially all of their assets. Certain provisions of each of the credit facilities, indentures and supplemental indentures relating to the long-term debt to affiliates and third parties restrict the ability of the Issuer to loan funds or make payments to the Parent. However, the Issuer is allowed to make certain permitted payments to the Parent under the terms of each of the credit facilities, indentures and supplemental indentures relating to the long-term debt to affiliates and third parties. We were in compliance with all restrictive debt covenants as of September 30, 2016.

Capital Expenditures

Our liquidity requirements have been driven primarily by capital expenditures for spectrum licenses and the construction, expansion and upgrading of our network infrastructure. Property and equipment capital expenditures primarily relate to our network modernization, including the build out of LTE 700 MHz A-Block spectrum licenses. We expect cash capital expenditures for property and equipment to be in the range of \$4.5 billion to \$4.7 billion in 2016. This does not include property and equipment obtained through capital lease agreements, leased wireless devices transferred from inventory or purchases of spectrum licenses.

Table of Contents

Contractual Obligations

The following table summarizes our contractual obligations and borrowings as of September 30, 2016 and the timing and effect that such commitments are expected to have on our liquidity and capital requirements in future periods:

(in millions)	Less Than 1 Year	1 - 3 Years	4 - 5 Years	More Than 5 Years	Total
Long-term debt ⁽¹⁾	\$20	\$3,040	\$7,790	\$15,335	\$26,185

Purchase obligations ⁽³⁾	3,360	1,814	1,346	1,116	7,636
Network decommissioning ⁽⁴⁾	117	191	89	55	452
Total contractual obligations	\$8,149	\$13,666	\$16,163	\$25,381	\$63,359

Represents principal amounts of long-term debt to affiliates and third parties at maturity, excluding unamortized (1) premium from purchase price allocation fair value adjustment, capital lease obligations and vendor financing arrangements.

(2) Future minimum payments, including principal and interest payments and imputed lease rental income, related to the tower obligations.

T-Mobile calculated the minimum obligation for certain agreements to purchase goods or services based on termination fees that can be paid to exit the contract. Termination penalties are included in the above table as payments due in less than one year, as this is the earliest T-Mobile could exit these contracts. For certain contracts (3) that include fixed volume purchase commitments and fixed prices for various products, the purchase obligations are calculated using fixed volumes and contractually fixed prices for the products that are expected to be purchased. This table does not include open purchase orders as of September 30, 2016 under normal business purposes.

(4) Represents future undiscounted cash flows related to decommissioned MetroPCS CDMA network and certain other redundant cell sites as of September 30, 2016.

Certain commitments and obligations are included in the table based on the year of required payment or an estimate of the year of payment. Other long-term liabilities, excluding network decommissioning, have been omitted from the table above due to the uncertainty of the timing of payments, combined with the absence of historical trending to be used as a predictor of such payments. In addition, because dividends on preferred stock are subject to approval by our Board of Directors, amounts are not included in the preceding table unless such authorization has occurred and the dividend has not been paid.

The purchase obligations reflected in the table above are primarily commitments to purchase handsets and accessories, equipment, software, programming and network services, and marketing activities, which will be used or sold in the ordinary course of business. These amounts do not represent T-Mobile's entire anticipated purchases in the future, but represent only those items for which T-Mobile is contractually committed. Where T-Mobile is committed to make a minimum payment to the supplier regardless of whether it takes delivery, T-Mobile has included only that minimum payment as a purchase obligation. Additionally, included within purchase obligations are amounts for the acquisition of spectrum licenses, which are subject to regulatory approval and other customary closing conditions.

Spectrum License Agreement

In May 2016, we entered into an agreement with a third party for the purchase of certain spectrum licenses covering approximately 11 million people for approximately \$420 million. The transaction is expected to close in the fourth

quarter of 2016, subject to regulatory approval and other customary closing conditions.

Off-Balance Sheet Arrangements

In 2015, we entered into an arrangement, as amended, to sell certain EIP accounts receivable on a revolving basis through November 2017 as an additional source of liquidity. In June 2016, the arrangement was amended to increase the maximum funding commitment to \$1.3 billion with a scheduled expiration date in November 2017. In 2014, we entered into an arrangement, as amended, to sell certain service accounts receivable on a revolving basis through March 2017 as an additional source of liquidity. As of September 30, 2016, T-Mobile derecognized net receivables of \$2.4 billion upon sale through these arrangements. See Note 3 – Sales of Certain Receivables of the Notes to the Condensed Consolidated Financial Statements.

Table of Contents

Related-Party Transactions

In March 2016, T-Mobile USA entered into a purchase agreement with Deutsche Telekom under which T-Mobile USA may, at its option, issue and sell to Deutsche Telekom \$2.0 billion of 5.300% Senior Notes due 2021 for an aggregate purchase price of \$2.0 billion.

In April 2016, T-Mobile USA entered into a purchase agreement with Deutsche Telekom under which T-Mobile USA may, at its option, issue and sell to Deutsche Telekom up to \$1.35 billion of 6.000% Senior Notes due 2024. The purchase price for the 6.000% Senior Notes that may be issued under the \$1.35 billion purchase agreement will be approximately 103.316% of the outstanding principal balance of the notes issued.

In April 2016, T-Mobile USA entered into a purchase agreement with Deutsche Telekom under which T-Mobile USA may, at its option, issue and sell to Deutsche Telekom up to \$650 million of 6.000% Senior Notes due 2024. The purchase price for the 6.000% Senior Notes that may be issued under the \$650 million purchase agreement will be approximately 104.047% of the outstanding principal balance of the notes issued.

See Note 2 – Significant Transactions of the Notes to the Condensed Consolidated Financial Statements.

Disclosure of Iranian Activities under Section 13(r) of the Securities Exchange Act of 1934

Section 219 of the Iran Threat Reduction and Syria Human Rights Act of 2012 added Section 13(r) to the Exchange Act of 1934, as amended (“Exchange Act”). Section 13(r) requires an issuer to disclose in its annual or quarterly reports, as applicable, whether it or any of its affiliates knowingly engaged in certain activities, transactions or dealings relating to Iran or with designated natural persons or entities involved in terrorism or the proliferation of weapons of mass destruction. Disclosure is required even where the activities, transactions or dealings are conducted outside the U.S. by non-U.S. affiliates in compliance with applicable law, and whether or not the activities are sanctionable under U.S. law.

As of the date of this report, we are not aware of any activity, transaction or dealing by us or any of our affiliates for the three months ended September 30, 2016 that requires disclosure in this report under Section 13(r) of the Exchange Act, except as set forth below with respect to affiliates that we do not control and that are our affiliates solely due to their common control with Deutsche Telekom. We have relied upon Deutsche Telekom for information regarding their activities, transactions and dealings.

Deutsche Telekom, through certain of its non-U.S. subsidiaries, is party to roaming and interconnect agreements with the following mobile and fixed line telecommunication providers in Iran, some of which are or may be government-controlled entities: Gostareh Ertebatat Taliya, Irancell Telecommunications Services Company (“MTN Irancell”), Telecommunication Kish Company, Mobile Telecommunication Company of Iran, and Telecommunication Infrastructure Company of Iran. For the three months ended September 30, 2016, gross revenues of all Deutsche Telekom affiliates generated by roaming and interconnection traffic with Iran were less than \$1.0 million and estimated net profits were less than \$1.0 million.

In addition, Deutsche Telekom, through certain of its non-U.S. subsidiaries, operating a fixed line network in their respective European home countries (in particular Germany), provides telecommunications services in the ordinary course of business to the Embassy of Iran in those European countries. Gross revenues and net profits recorded from these activities for the three months ended September 30, 2016 were less than \$0.1 million. We understand that Deutsche Telekom intends to continue these activities.

Critical Accounting Policies and Estimates

Preparation of our consolidated financial statements in accordance with U.S. GAAP requires us to make estimates and assumptions that affect the reported amounts of certain assets, liabilities, revenues and expenses, as well as related disclosure of contingent assets and liabilities. There have been no material changes to the critical accounting policies and estimates as previously disclosed in Part II, Item 8 of our Annual Report on Form 10-K for the year ended December 31, 2015.

Recently Issued Accounting Standards

See Note 1 – Basis of Presentation of the Notes to the Condensed Consolidated Financial Statements.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There have been no material changes to the interest rate risk as previously disclosed in Part II, Item 7A of our Annual Report on Form 10-K for the year ended December 31, 2015.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures designed to ensure information required to be disclosed in our periodic reports filed or submitted under the Exchange Act, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Our disclosure controls are also designed to ensure that information required to be disclosed in the reports we file or submit under the Exchange Act is accumulated and communicated to our management, including our Principal Executive Officer and Principal Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer, we carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective, as of the end of the period covered by this report.

The certifications required by Section 302 of the Sarbanes-Oxley Act of 2002 are filed as Exhibits 31.1 and 31.2, respectively, to this Form 10-Q.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting, as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act, during our most recently completed fiscal quarter that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

See Note 7 – Commitments and Contingencies of the Notes to the Condensed Consolidated Financial Statements.

Item 1A. Risk Factors

There have been no material changes in our risk factors as previously disclosed in Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2015.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

None.

Item 5. Other Information

None.
