Summarized Analysis of Adjusted Income

Adjusted Net Income and Profitability

The return on the Average Adjusted Shareholder's Equity (ROAE) stood at 21.9% in June 2015. Such performance stems from the growth of adjusted net income, which increased by 5.4% quarter-over-quarter and 20.6% comparing the first semester of 2015 with the same period in the previous year. The main events that affected adjusted net income are detailed below.

Adjusted net income reached R\$4,504 million in the second quarter of 2015, up R\$230 million or 5.4% compared to the previous quarter, mainly due to (i) the largest revenues for services provided; (ii) the highest operating result of Insurance, Pension Plans and Capitalization Bonds, net of variation of technical reserves, retained claims and others; (iii) lower other operating expenses, net; and partially impacted by: (iv) higher personnel and administrative expenses.

In the comparison between the first semester of 2015 and the same period in the previous year, the adjusted net income increased R\$1,501 million or 20.6%, which reflects the highest revenues due to: (i) the interest earning portion, partially due to the effect the margin of intermediation and of the assets and liabilities management (ALM); and (ii) the services provided; being partially offset by: (iii) higher allowance for loan losses expenses; (iv) increased operating expenses, net; and (v) higher personnel and administrative expenses, whose variation was below the index of inflation (IPCA) in the period.

Shareholders' Equity totaled R\$86.972 million in June 2015, up 13.2% over June 2014. Basel III Ratio, calculated based on the Prudential Consolidated, stood at 16.0%, 12.8% of which was classified as Common Equity / Tier I. Total Assets registered R\$1.030 trillion in June 2015, a 10.6% increase over June 2014, driven by the increased turnover. Return on Average Assets (ROAA) reached 1.7%.

Operating Efficiency Ratio (ER)

The 12-month accumulated ER⁽¹⁾ reached 37.9% in the second guarter of 2015, again registering its best historical level. This result reflects: (i) investments in organic growth, which enabled an increase in our income; and (ii) the continued efforts to control expenses, including our Efficiency Committee actions and investments in Information Technology, which have improved internal systems and processes. It should be mentioned that the 0.4 p.p. improvement compared to the previous guarter was primarily due to: (i) a higher net interest income and revenues from fee and commission; and (ii) the strict control of our operating expenses, which were held below inflation; all these factors also contributed to the improvement of the ER in the "risk-adjusted" concept, reflecting the impact of the risk associated with loan operations⁽²⁾, which reached 46.5%, an improvement of 0.4 p.p. in the quarter.

The ER - quarterly was partially impacted by: (i) higher administrative expenses, primarily originated by the growth in volume of business and of expenses with advertising and outsourced services; (ii) higher personnel expenses, partially due to a lower number of employees on vacation in this quarter; and partially offset by: (iii) the increase of the Fee and Commission Income.

(1) ER = (Personnel Expenses – Employee Profit Sharing + Administrative Expenses) / (Net Interest Income + Fee and Commission Income + Income from Insurance + Equity in the Earnings (Losses) of Unconsolidated Companies + Other Operating Income – Other Operating Expenses). If we considered the ratio between (i) total administrative costs (Personnel Expenses + Administrative Expenses + Other Operating Expenses + Tax Expenses not related to income generation + Insurance Sales Expenses) and (ii) net income generation of related taxes (not considering Insurance Claims and Sales Expenses), our ER accumulated in the last 12 months in the second quarter of 2015 would be 42.4%; and

In the second quarter of 2015, the revenue increased 23.0% over the same period in the previous year, disregarding DPVAT insurance, mainly due to "Life and Pension" products, which increased 45.3%.

In the first semester of 2015, the production registered an increase of 19.4% over the same period in the previous year, disregarding the DPVAT insurance, influenced by "Life and Pension Plans" and "Health" Bonds" products, which increased 26.1% and 21.6%, respectively.

Net income for the second quarter of 2015 remained in line with the one presented in the previous quarter, primarily due to: (i) the growth in turnover; (ii) the reduction in the claims ratio; (iii) the improvement in the administrative efficiency ratio; and partially offset by: (iv) the reduction in the financial result.

Net income for the first semester of 2015 was 21.5% higher compared to the same period in the previous year, due to: (i) an increase in revenue; (ii) the growth of the financial result; (iii) the maintenance of the expense ratio; (iv) an improvement in the administrative efficiency ratio, even considering the collective bargaining agreement, in January 2015; partially offset by: (v) an increase in the claims ratio in the "Health" segment.

Minimum Capital Required – Grupo Bradesco Seguros

According to CNSP Resolution No.316/14, corporations should have adjusted shareholder's equity (ASE) equal to or higher than the minimum capital required (MCR). MCR is equivalent to the highest value between the base capital and the risk capital. For companies regulated by the ANS, Normative Resolution No.373/15 establishes that corporations should have adjusted shareholder's equity (ASE) equal to or higher than the Solvency Margin.

The capital adjustment and management process is continuously monitored, and aims to ensure that Grupo Bradesco Seguros keeps a solid capital base to support the development of activities and cope with the risks in any market situation, in compliance with regulatory requirements and/or Corporate Governance principles. Companies must permanently maintain a capital compatible with the risks for their activities and operations, according to the characteristics and peculiarities of each company belonging to Grupo Bradesco Seguros, represented by adequate capital levels. Grupo Bradesco Seguros permanently observes the limits required by the respective regulatory entities. The Minimum Capital Required in May 2015 was R\$7.669 billion.

Fee and Commission Income

In the first semester of 2015 fee and commission income totaled R\$11,862 million, presenting an increase of R\$1,251 million, or 11.8%, compared to the same period in the previous year, primarily due to: (i) an increase in the volume of operations, due to continuous investments in technology and service channels; and (ii) the progress in the customer segmentation process, allowing for a more adequate offer of products and services. It must be noted that the incomes that have most contributed to this result derived from: (i) the good performance of the cards activity, as a result of (a) an increased revenue; (b) the impact of the creation of a services joint venture (Cateno) by our controlled Cielo; and (c) the highest volume of transactions performed; (ii) an increase in the incomes of checking accounts, due to an improvement in the customer segmentation process; (iii) the largest revenue with credit operations, resulting from the increase in the volume of operations of sureties and guarantees in the period; and evolution of revenue with: (iv) fund management; and (v) consortium management.

In the quarter-over-quarter comparison, an increase of R\$374 million, or 6.5%, was provided, mainly due to the increase of offering of products and services. The revenues that most contributed to this result were those arising from: (i) card income; (ii) checking account; (iii) loan operations; and (iv) consortium management.

Summarized Analysis of Adjusted Income

Personnel Expenses

In the comparison between the first semester of 2015 and the same period in the previous year, the increase of R\$336 million, or 5.0%, was primarily due to the variation in the "structural" portion, related to higher expenses with payroll, social charges and benefits, affected by increased wage levels, in accordance with 2014 collective agreements (readjustment of 8.5%).

In the second quarter of 2015, the increase of R\$173 million, or 5.0%, over the previous quarter, is a result of variations in the following expenses:

• "structural" – an increase of R\$82 million, mainly due to a lower number of employees on vacation, which is common in the second quarter of 2015; and

• "non-structural" – an increase of R\$91 million, primarily due to higher expenses with: (i) provision for labor claims; (ii) training; and (iii) costs with termination and charges of employment contracts. The decrease in the fourth quarter of 2014 includes the transfer of 2,431 employees from Scopus Tecnologia to IBM Brasil.

Note: Structural Expenses = Salaries + Social Charges + Benefits + Pension Plans.

Non-Structural Expenses = Employee and Management Profit Sharing + Training + Labor Provision + Costs with termination of employment contracts.

Administrative Expenses

In the comparison between the first semester of 2015 and the same period in the previous year, the 7.1%, or R\$504 million, increase was primarily due to an increase of expenses originated by: (i) the growth in turnover and services in the period; (ii) contractual adjustments; and (iii) expansion of 1,062 Service Points in the period, bringing the total number of Service Points to 74,270 on June 30, 2015. The inflation index (IPCA) performance over the past 12 months should also be highlighted, since it reached 8.9%.

In the second quarter of 2015, the increase of 7.9%, or R\$287 million, in the administrative expenses over the previous quarter, was mainly due to higher expenses with: (i) outsourced services; (ii) advertising and marketing; (iii) communication; and (iv) maintenance and conservation of assets.

(1) The decrease in June and March 2015 is related to (i) the migration of "External ATM Network Points – Bradesco" to "Banco24Horas Network" and (ii) the deactivation of ATMs from "Assisted Banco24Horas Network Points".

Other Operating Income and Expenses

In the first semester of 2015, other operating expenses, net, totaled R\$3,518 million, a R\$794 million increase over the same period in the R\$475 million; being offset, in part, by higher expenses related to: (ii) the addition of tax provision, made in the second quarter of 2015, previous year, primarily due to: (i) the constitution of tax provisions, in the first semester of 2015, relating to the levy of pension plan contributions and IRPJ/CSLL on credit losses, in the amount of R\$570 million; (ii) higher expenses related to: (a) the constitution of civil provisions; and (b) various losses; (iii) the impact of the creation of a services joint venture (Cateno) in Cielo; and (iv) the amortization of goodwill.

In the second quarter of 2015, other operating expenses, net, totaled R\$1,606 million, a R\$306 million reduction over the previous quarter, primarily due to: (i) the constitution of tax provisions, in the first quarter of 2015, relating to the levy of pension plan contributions and IRPJ/CSLL on credit losses, in the amount of relating to the levy of pension plan contributions, in the amount of R\$95 million; (iii) the constitution of civil provisions; and (iv) the various losses.

Income Tax and Social Contribution

The expenses with income tax and social contribution presented an increase of 3.3% over the previous quarter, and 13.2% in the first semester of 2015 compared to the same period of the previous year, mainly due to the highest taxable results in the period.

Unrealized Gains

Unrealized gains totaled R\$23,373 million at the end of the second quarter of 2015, a R\$3,558 million increase over the end of the previous quarter. Such variation is mainly due to the appreciation of: (i) investments, particularly Cielo shares, which increased by 15.1% in the quarter; and (ii) the devaluation of fixed income securities.

Capital Ratios - Basel III

Basel Ratio

The implementation of the new capital structure in Brazil began in October 2013. Through the CMN Resolution No. 4.192/13, Bacen provided a new methodology to calculate Capital, replacing CMN Resolution No. 3.444/07. Since then, the Capital started being calculated based on CMN Resolution No. 4.192/13, which established that the calculation must be made based on the "Prudential Consolidated", as of January 2015.

In June 2015, the Capital of the Prudential Consolidated stood at R\$97,016 million, against risk-weighted assets totaling R\$607,226 million. The total Basel Ratio of the Prudential Consolidated presented an increase of 0.8 p.p, from 15.2% in March 2015 to 16.0% in June 2015, and from 12.1% in March 2015 to 12.8% in June

Full Impact – Basel III

We included a Basel III simulation, considering the opening of some of the main future adjustments, which include: (i) the application of 100% of the deductions provided in the implementation schedule; (ii) the allocation of resources, obtained via payment of dividends, of our Insurance Group; and (iii) the realization of tax credits arising from tax losses up to December 2018, for a rate of 2015 for the Common Equity, primarily impacted by: (i) the increase in the Net Equity due to the increase of the result in the quarter; and (ii) the reduction in the weighting of assets of market risk and credit.

(1) Includes the allocation of resources, obtained via payment of dividends, of the Insurance Group.

12.6% of Common Equity, which, added to funding obtained via subordinated debt, may amount to an approximate Tier I Basel Ratio of 14.1%, in the end of 2018.

Buffer Capital/Return on the Common Equity at 11%

Bradesco has improved its measurement methodology, and has structured processes for buffer capital, so that it can maintain enough capital available to cope with the risks incurred.

The Governance structure responsible for the evaluations and approvals of capital decided to maintain a minimum buffer capital of approximately 27%, considering the minimum regulatory capital of 11%.

Considering the minimum required Common Equity of 11% according to the full interpretation of Basel III rules, profitability would be 26.3% in the period of 12 months ended on June 30, 2015. (1) Last 12 months

Economic Scenario

The risks present in the international scenario were reduced in the second guarter of this year. As a result, the dollar reversed part of the appreciation displayed during the previous three months in relation to the main currencies. After the frustration with the performance of the North American economy from January to March, some recovery is evident, in particular, of the labor market. At the same time, the deceleration of the Chinese economy has lessened, in response to the fiscal and monetary stimuli adopted by the government of the country. Finally, the speed of the European recovery has settled on a moderate level, responding to the incentives of the European Central Bank. Even so, at the end of the guarter, risks emerged to the stabilization of the macroeconomic scenario. The impasse in negotiations between Greece and its European creditors and the sharp fall of the Chinese stock exchanges introduced new risks to the international environment.

The accommodation of North American growth, in the first quarter of the year, seems to have been an atypical event, since the GDP returned to the previous level of expansion, in the three following months. In particular, the labor market maintained to record the net creation of jobs exceeding 200 thousand per month, bringing the unemployment rate to lower levels when compared to those displayed before the crisis of 2008/2009. Thus, the Federal Reserve (Fed) has intensified the signaling toward the beginning of the normalization of monetary conditions in the country. Even so, the president of the institution, Janet Yellen has Greece and its European creditors represented a risk factor to the scenario for the region at the end of the quarter.

There were advances in the reorientation of the domestic economic policy, especially, concerning the tax policy. The deceleration of the internal economic activity intensified in the second quarter, which reflected in the collection of taxes by the public sector. Even though this can hinder the achievement of the target for the primary results this year, more important are the actions to guarantee the tax sustainability in the medium term and the progress in the agenda of reforms. Efforts in this direction represent a requirement for the maintenance of the economic predictability to raising the confidence level of families and business people, in order to resume the trend of an actual income increase.

The weakening of domestic economic activity highlights the relevance of structural initiatives aimed at promoting future growth. The constant search for excellence in education is Brazil's front line in its struggle to become more competitive and to expedite its efforts to upgrade infrastructure. From this point-of-view, the success of the new stage of concessions has significant importance. It is always important to remind that, in the long term, the main source of economic growth is productivity, which becomes an even more relevant topic within a global context characterized by high levels of efficiency. reinforced that this process will be very gradual.

In addition, the Chinese economy began to show signs of stabilization, succeeding significant deceleration in the first months of the year, in response to monetary and tax incentives, adopted by the government since the end of 2014. The pace of growth, however, is still moderate for the Chinese standards, compatible with a GDP growth of less than 7.0%. In addition, an additional risk to the Chinese economic growth came at the end of the quarter, with the Shanghai stock market plunge, which should lead the government to adopt more stimuli throughout the year. At the same time, the speed of recovery of the European economy showed some accommodation in the second quarter. The impasse in the negotiations between Productive investments tend to play an increasingly relevant role in the breakdown of growth over the next few years, which should be favored by the increased share of the capital market in funding of these projects. At the same time, despite the shift in consumer market expansion levels in some segments, the potential of domestic demand for goods and services has yet to be depleted, and there is still much room for growth.

Bradesco maintains a positive outlook towards Brazil, with favorable perspectives for its operating segments. Credit volume is growing at sustainable and risk-compatible rates, whereas delinquency rates are stabilized at historically low and controlled levels, in spite of a cyclic elevation due to the retraction of the activity this year. The scenario is still very promising for the Brazilian banking and insurance sectors in the medium and long terms.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
