RESOURCE CAPITAL CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2006
(Unaudited)

NOTE 1 - ORGANIZATION AND BASIS OF QUARTERLY PRESENTATION

Resource Capital Corp. and subsidiaries (the ‘‘Company’’) was incorporated in Maryland on January 31, 2005 and commenced its operations on March 8, 2005 upon receipt of the net proceeds from a private placement of shares of its common stock. The Company’s principal business activity is to purchase and manage a diversified portfolio of commercial real estate-related assets and commercial finance assets. The Company’s investment activities are managed by Resource Capital Manager, Inc. (‘‘Manager’’) pursuant to a management agreement (‘‘Management Agreement’’). The Manager is a wholly owned indirect subsidiary of Resource America, Inc. (“RAI”) (Nasdaq: REXI).

The consolidated financial statements and the information and tables contained in the notes to the consolidated financial statements are unaudited. However, in the opinion of management, these interim financial statements include all adjustments necessary to fairly present the results of the interim periods presented. The unaudited interim consolidated financial statements should be read in conjunction with the audited consolidated financial statements included in the Company’s Annual Report on Form 10-K for the period ended December 31, 2005. The results of operations for the three and nine months ended September 30, 2006 may not necessarily be indicative of the results of operations for the full year ending December 31, 2006.

Certain reclassifications have been made to the 2005 consolidated financial statements to conform to the 2006 presentation.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Income Taxes

For financial reporting purposes, current and deferred taxes are provided for on the portion of earnings recognized by the Company with respect to its interest in Resource TRS, Inc. (“Resource TRS”), a domestic taxable real estate investment trust (“REIT”) subsidiary, because it is taxed as a regular subchapter C corporation under the provisions of the Internal Revenue Code of 1986, as amended. As of September 30, 2006, Resource TRS did not have any taxable income.

Apidos CDO I and Apidos CDO III, the Company’s foreign taxable REIT subsidiaries, are organized as exempted companies incorporated with limited liability under the laws of the Cayman Islands, and are generally exempt from federal and state income tax at the corporate level because their activities in the United States are limited to trading in stock and securities for their own account. Therefore, despite their status as taxable REIT subsidiaries, they generally will not be subject to corporate tax on their earnings and no provision for income taxes is required; however, because they are “controlled foreign corporations,” the Company will generally be required to include Apidos CDO I’s and Apidos CDO III’s current taxable income in its calculation of REIT taxable income.

Allowance and Provision for Loan Losses

At September 30, 2006, all of the Company’s loans are current with respect to the scheduled payments of principal and interest. In reviewing the portfolio of loans and the observable secondary market prices, the Company did not identify any loans that exhibit characteristics indicating that impairment has occurred. Accordingly, as of September 30, 2006, the Company had not recorded an allowance for loan losses.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Stock Based Compensation

The Company has adopted Statement of Financial Accounting Standards ("SFAS") No. 123(R), "Share Based Payment," as of January 1, 2006. Issuances of restricted stock and options are accounted for using the fair value based methodology prescribed by SFAS No. 123(R) whereby the fair value of the award is measured on the grant date and recorded in stockholders' equity through an increase to additional paid-in capital and an offsetting entry to deferred equity compensation (a contra-equity account). For issuances to the Company's Manager, the unvested stock and options are adjusted quarterly to reflect changes in fair value as performance under the agreement is completed. For issuance to the Company's four non-employee directors, the amount is not remeasured under the fair value-based method. The deferred compensation for each of these issuances is amortized over the service period and included in equity compensation expense (see Note 8).

Variable Interest Entities

During July 2005, the Company entered into warehouse and master participation agreements with an affiliate of Citigroup Global Markets Inc. ("Citigroup") providing that Citigroup will fund the purchase of loans by Apidos CDO III. On May 9, 2006, the Company terminated its Apidos CDO III warehouse agreement with Citigroup upon the closing of the CDO. The warehouse funding liability was replaced with the issuance of long-term debt by Apidos CDO III. The Company owns 100% of the equity issued by Apidos CDO III and is deemed to be the primary beneficiary. As a result, the Company consolidated Apidos CDO III at September 30, 2006.

Accounting for Certain Mortgage-Backed Securities and Related Repurchase Agreements

In certain circumstances, the Company has purchased debt investments from a counterparty and subsequently financed the acquisition of those debt investments through repurchase agreements with the same counterparty. The Company currently records the acquisition of the debt investments as assets and the related repurchase agreements as financing liabilities gross on the consolidated balance sheets. Interest income earned on the debt investments and interest expense incurred on the repurchase obligations are reported gross on the consolidated statements of operations. However, under a certain technical interpretation of SFAS 140, "Accounting for Transfers and Servicing of Financial Assets," such transactions may not qualify as a purchase. Management of the Company believes, and it is industry practice, that it is accounting for these transactions in an appropriate manner. However, the result of this technical interpretation would prevent the Company from presenting the debt investments and repurchase agreements and the related interest income and interest expense on a gross basis on the Company's consolidated financial statements. Instead, the Company would present the net investment in these transactions with the counterparty as a derivative with the corresponding change in fair value of the derivative being recorded through earnings. The value of the derivative would reflect changes in the value of the underlying debt investments and changes in the value of the underlying credit provided by the counterparty. As of September 30, 2006, the Company had no transactions in mortgage-backed securities where debt instruments were financed with the same counterparty.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – (Continued)

Interest Rate Risk

The primary market risk to the Company is interest rate risk. Interest rates are highly sensitive to many factors, including governmental monetary and tax policies, domestic and international economic and political considerations and other factors beyond the Company's control. Changes in the general level of interest rates can affect net interest income, which is the difference between the interest income earned on interest-earning assets and the interest expense incurred in connection with the interest-bearing liabilities, by affecting the spread between the interest-earning assets and interest-bearing liabilities. Changes in the level of interest rates also can affect the value of the Company's interest-earning assets and the Company's ability to realize gains from the sale of these assets. A decline in the value of the Company's interest-earning assets pledged as collateral for borrowings under repurchase agreements could result in the counterparties demanding additional collateral pledges or liquidation of some of the existing collateral to reduce borrowing levels.

The Company seeks to manage the extent to which net income changes as a function of changes in interest rates by matching adjustable-rate assets with variable-rate borrowings. During periods of changing interest rates, interest rate mismatches could negatively impact the Company's consolidated financial condition, consolidated results of operations and consolidated cash flows. In addition, the Company mitigates the potential impact on net income of periodic and lifetime coupon adjustment restrictions in its investment portfolio by entering into interest rate hedging agreements such as interest rate caps and interest rate swaps.

Changes in interest rates may also have an effect on the rate of mortgage principal prepayments and, as a result, prepayments on mortgage-backed securities in the Company's investment portfolio. The Company seeks to mitigate the effect of changes in the mortgage principal repayment rate by balancing assets purchased at a premium with assets purchased at a discount. At September 30, 2006, the aggregate discount exceeded the aggregate premium on the Company's mortgage-backed securities by approximately $3.3 million. At December 31, 2005, the aggregate discount exceeded the aggregate premium on the Company's mortgage-backed securities by approximately $2.8 million.

Recent Accounting Pronouncements

In July 2006, the Financial Accounting Standards Board ("FASB") issued Interpretation ("FIN 48"), "Accounting for Uncertainty in Income Taxes - An Interpretation of SFAS 109." FIN 48 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FASB 109, "Accounting for Income Taxes." FIN 48 also prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. The new FASB standard also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. The provisions of FIN 48 are effective for fiscal years beginning after December 15, 2006. The Company is currently determining the effect, if any, the adoption of FIN 48 will have on its financial statements.

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157 ("FAS 157") "Fair Value Measurements". FAS 157 clarifies the definition of fair value, establishes a framework for measuring fair value in GAAP and expands the disclosure of fair value measurements. This statement is effective for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. The Company is currently determining the effect, if any, the adoption of FAS 157 will have on its financial statements.

Recent Accounting Pronouncements – (Continued)

In September 2006, the Securities and Exchange Commission staff issued Staff Accounting Bulletin No. 108, "Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements" ("SAB 108"). SAB 108 provides guidance for how errors should be evaluated to assess materiality from a quantitative perspective. SAB 108 permits companies to initially apply its provisions by either restating prior financial statements or recording the cumulative effect of initially applying the approach as adjustments to the carrying values of assets and liabilities as of January 1, 2006 with an offsetting adjustment to retained earnings. SAB 108 is required to be adopted for the fiscal years ending after November 30, 2006 and is not expected to have a material effect on the Company's financial statements.

NOTE 3 - RESTRICTED CASH

Restricted cash consists of $24.8 million of principal and interest payments collected on investments held in four CDO trusts, a $1.5 million credit facility reserve used to fund future investments that will be acquired by the Company's two bank loan CDO trusts and a $1.2 million expense reserve used to cover CDOs' operating expenses. The remaining $1.6 million consists of an interest reserve and security deposits held in connection with the Company's equipment lease and loan portfolio.

NOTE 4 - SECURITIES AVAILABLE-FOR-SALE

On September 27, 2006, the Company entered into an agreement to sell its remaining agency residential mortgage-backed securities ("RMBS") for gross proceeds totaling $753.2 million, realizing a loss of $10.9 million. The proceeds from this sale were used to repay related debt of $716.5 million on October 2, 2006. The balance of the proceeds will be subsequently received in October and November 2006. Principal repayment receivables of $14.5 million relating to the agency RMBS portfolio sold have been reflected in principal paydown receivables in the Company's consolidated balance sheets.

The following tables summarize the Company's mortgage-backed securities, other asset-backed securities and private equity investments, including those pledged as collateral and classified as available-for-sale, which are carried at fair value (in thousands):

Total temporarily impaired securities	$ 1,314,732	$ (22,765)	$ 1,314,732	$ (22,765)

The temporary impairment of the available-for-sale securities results from the estimated fair value of the securities falling below their amortized cost basis and is solely attributed to changes in interest rates. As of September 30, 2006 and December 31, 2005, respectively, none of the securities held by the Company had been downgraded by a credit rating agency since their purchase. The Company intends and has the ability to hold the securities until the estimated fair value of the securities held is recovered, which may be maturity if necessary. As such, the Company does not believe any of the securities held are other-than-temporarily impaired at September 30, 2006 and December 31, 2005, respectively.
