RESOURCE CAPITAL CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2016
(unaudited)

NOTE 1 - ORGANIZATION AND BASIS OF PRESENTATION

Resource Capital Corp. and its subsidiaries' (collectively the "Company") originate, purchase and manage a diversified portfolio of commercial real estate ("CRE") debt investments. The Company's investment activities are managed by Resource Capital Manager, Inc. ("Manager") pursuant to a management agreement (the "Management Agreement"). The Manager is a wholly-owned, indirect subsidiary of Resource America, Inc. ("Resource America") (formerly traded on NASDAQ: REXI). On September 8, 2016, Resource America was acquired by C-III Capital Partners LLC ("C-III"), a commercial real estate services company engaged in a broad range of activities, including primary and special loan servicing, loan origination, fund management, collateralized debt obligation ("CDO") management, principal investment, investment sales and multifamily property management. As part of the transaction, C-III took over control of the Manager with respect to the Management Agreement and became the beneficial owner of the Company's common shares owned by Resource America, approximately 2.3% of the Company's outstanding shares as of September 30, 2016.

On January 1, 2016, the Company adopted the amendments to the consolidation guidance as outlined in Note 2. As a result of its evaluation, the Company determined that it is no longer the primary beneficiary of the following VIEs and, therefore, deconsolidated these entities: Resource Real Estate Funding CDO 2006-1, Ltd. ("RREF CDO 2006-1"), Resource Real Estate Funding CDO 2007-1, Ltd. ("RREF CDO 2007-1"), Apidos Cinco CDO, Ltd. ("Apidos Cinco CDO"), Pelium Capital Partners, L.P., ("Pelium Capital") and RCM Global, LLC ("RCM Global").

On July 1, 2016, the Company underwent an internal tax restructuring in order to reduce the costs associated with ownership of multiple legal entities, simplify its overall legal entity structure, ease deployment of cash throughout the business for operations and opportunities and consolidate operations into one centralized entity or group of entities. As a result of this tax restructuring, several of the Company's directly owned subsidiaries converted from corporations to single member LLCs. Also, the following directly owned subsidiaries of the Company merged into RCC Residential Portfolio TRS, Inc. ("RCC Resi TRS") and were dissolved upon the restructuring: Long Term Care Conversion, Inc. ("LTCC") and Resource TRS II, Inc. ("Resource TRS II"). On October 1, 2016, RCC Residential, Inc. ("RCC Residential") merged into RCC Resi TRS.

The following subsidiaries are consolidated in the Company's financial statements:

RCC Real Estate, Inc. ("RCC Real Estate") holds real estate investments, including commercial real estate loans, commercial real estate-related securities and direct investments in real estate. RCC Real Estate owns 100% of the equity of the following VIEs:

RREF CDO 2006-1, a Cayman Islands limited liability company and qualified real estate investment trust ("REIT") subsidiary ("QRS"). RREF CDO 2006-1 was established to complete a collateralized debt obligation ("CDO") issuance secured by a portfolio of CRE loans and commercial mortgage-backed securities ("CMBS"). This entity was deconsolidated as of January 1, 2016 and the retained investment is accounted for as an investment security, available-for-sale (see Note 2) in the Company's consolidated financial statements. On April 25, 2016, RREF CDO 2006-1 was liquidated and, in exchange for the Company's interests in RREF CDO 2006-1, the remaining assets of the CDO were distributed to the Company, comprised of investment securities available-for-sale and loans held for investment, which were recorded at fair value.

RREF CDO 2007-1, a Cayman Islands limited liability company and QRS. RREF CDO 2007-1 was established to complete a CDO issuance secured by a portfolio of CRE loans and CMBS. This entity was deconsolidated as of January 1, 2016 and the retained investment is now accounted for as an investment security, available-for-sale (see Note 2) in the Company's consolidated financial statements.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Reverse Stock Split and Amended and Restated Certificate of Incorporation

Effective August 31, 2015, the Company completed a one-for-four reverse stock split of its outstanding common stock. The accompanying financial statements and notes to the financial statements give retroactive effect to the reverse stock split for all periods presented. In addition, the Company adopted an Amended and Restated Certificate of Incorporation, which provides that its authorized capital stock consists of 125,000,000 shares of common stock, \$0.001 par value per share, and 100,000,000 shares of preferred stock, \$0.001 par value per share.

Principles of Consolidation

The accompanying consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America ("GAAP") and the accounting policies set forth in Note 2 included in our annual report on Form 10-K for the year ended December 31, 2015. The consolidated financial statements include the accounts of the Company. All inter-company transactions and balances have been eliminated.

Cash and Cash Equivalents

Cash and cash equivalents include cash on hand and all highly liquid investments with original maturities of three months or less at the time of purchase. At September 30, 2016 and December 31, 2015, approximately \$111.2 million and \$74.3 million of the reported cash balances exceeded the Federal Deposit Insurance Corporation deposit insurance limit of \$250,000 per institution, subjecting the Company to risk related to the uninsured balance. All of the Company's cash deposits are held at large, established financial institutions.

Income Taxes

Due to changes in management's focus regarding the non-CRE businesses, the Company determined that it no longer expects to have sufficient forecasted taxable income to completely realize the tax benefits of the gross deferred tax asset of \$56.5 million (tax effected \$21.9 million) as of September 30, 2016. The Company believes it will be able to utilize up to \$15.4 million of the gross deferred tax asset prior to its expiration. Therefore, a gross valuation allowance of \$41.1 million (tax effected expense of \$16.3 million) has been recorded against the deferred tax asset as of September 30, 2016. Management will continue to assess its estimate of the amount of deferred tax asset that the Company expects to utilize. The net income tax expense recorded during the quarter ended September 30, 2016 was \$12.3 million which consists of \$4.0 million of tax benefits attributable to operating loss incurred during the quarter and a \$16.3 million valuation allowance.

Recent Accounting Standards

In August 2016, the FASB issued new guidance to reduce the diversity in practice around the presentation and classification of certain cash receipts and cash payments in the statement of cash flows. The guidance addresses the following eight specific cash flow issues : debt prepayments or extinguishment costs; contingent consideration payments made after a business combination; proceeds from the settlement of insurance claims; proceeds from the settlement of corporate-owned life insurance policies (including bank-owned life insurance policies); settlement of zero-coupon debt instruments or other debt instruments with insignificant coupon rates; distributions received from equity method investees; beneficial interests in securitization transactions; and separately identifiable cash flows and application of the predominance principle. The guidance is effective for annual reporting periods beginning after December 15, 2017, and interim periods within that reporting period. Early adoption is permitted. The Company is in the process of evaluating the impact of this new guidance.

In June 2016, the FASB issued guidance which will change how credit losses for most financial assets and certain other instruments that are measured at fair value through net income are determined. The new guidance will replace the current incurred loss approach with an expected loss model for instruments measured at amortized cost. For available-for-sale debt securities, the guidance requires recording allowances rather than reducing the carrying

amount, as it is currently under the other-than-temporary impairment model. It also simplifies the accounting model for credit-impaired debt securities and loans. This guidance is effective for annual reporting periods beginning after December 15, 2019, and interim periods within that reporting period. Early adoption is permitted for annual periods beginning after December 15, 2018, and interim periods within that reporting period, with any adjustments reflected as of the beginning of the fiscal year of adoption. The Company is in the process of evaluating the impact of this new guidance.

In March 2016, the FASB issued guidance intended to simplify various aspects related to how share-based payments are accounted for and presented in the financial statements. The new guidance allows for entities to make an entity-wide accounting policy election to either estimate the number of awards that are expected to vest or account for forfeitures when they occur. In addition, the guidance allows employers to withhold shares to satisfy minimum statutory tax withholding requirements up to the employees' maximum individual tax rate without causing the award to be classified as a liability. The guidance also stipulates that cash paid by an employer to a taxing authority when directly withholding shares for tax-withholding purposes should be classified as a financing activity on the statement of cash flows. This guidance is effective for annual reporting periods beginning after December 15, 2016, and interim periods within that reporting period. Early adoption is permitted in any interim or annual period, with any adjustments reflected as of the beginning of the fiscal year of adoption. The Company is in the process of evaluating the impact of this new guidance.

In February 2016, the FASB issued guidance requiring lessees to recognize a lease liability and a right-of-use asset for all leases. Lessor accounting will remain largely unchanged. The guidance will also require new qualitative and quantitative disclosures to help financial statement users better understand the timing, amount and uncertainty of cash flows arising from leases. This guidance will be effective for reporting periods beginning on or after December 15, 2018, with early adoption permitted. The Company is currently evaluating the impact of this guidance and its impact on our consolidated financial statements.

In January 2016, the FASB issued guidance to address certain aspects of recognition, measurement, presentation and disclosure of financial instruments in order to provide users of financial statements with more decision-useful information. The guidance requires equity investments to be measured at fair value with changes in fair value recognized in net income; simplifies the impairment assessment of equity investments without readily determinable fair values by requiring a qualitative assessment to identify impairment; eliminates the requirement for public business entities to disclose the method(s) and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost on the balance sheet; requires public business entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes; requires an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option for financial instruments; requires separate presentation of financial assets and financial liabilities by measurement category and form of financial assets on the balance sheet or the accompanying notes to the financial statements and clarifies that an entity should evaluate the need for a valuation allowance on a deferred tax asset related to available-for-sale securities in combination with the entity's other deferred tax assets. It is effective for annual reporting periods, and the interim periods within those periods, beginning after December 15, 2017 and early adoption is permitted for certain provisions. The Company is currently evaluating the effect of adoption.

In September 2015, the FASB issued guidance that simplifies the accounting for adjustments made to provisional amounts recognized in a business combination, which are currently recognized on a retrospective basis. Under the new requirements, adjustments to provisional amounts will be recognized in the reporting period in which the adjustments are determined. The effects of changes in depreciation, amortization, or other income arising from changes to the provisional amounts, if any, are included in earnings of the reporting period in which the adjustments to the provisional amounts are determined. An entity is also required to present separately on the face of the income statement or disclose in the notes the portion of the amount recorded in current-period earnings by line item that would have been recorded in previous reporting periods if the adjustment to the provisional amounts had been

recognized as of the acquisition date. It is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2015. Adoption did not have a material impact on the Company's consolidated financial statements.

In April 2015, the FASB issued guidance that simplifies the presentation of debt issuance costs by requiring that debt issuance costs be presented in the balance sheet as a deduction from the carrying amount of the related debt liability, consistent with debt discounts or premiums. The recognition and measurement guidance for debt issuance costs are not affected by the amendments in this update. It is effective for annual reporting periods beginning after December 15, 2015. The Company has early adopted the provisions of this guidance. Note 12, Borrowings, reflects the presentation of debt issuance costs as prescribed by this accounting standards update. Adoption did not have a material impact on the Company's consolidated financial statements.

In February 2015, the FASB issued guidance that requires an entity to evaluate whether it should consolidate certain legal entities. All legal entities are subject to reevaluation under the revised consolidation model. Specifically, the amendments: (1) modify the evaluation of whether limited partnerships and similar legal entities are VIEs; (2) eliminate the presumption that a general partner should consolidate a limited partnership; (3) affect the consolidation analysis of reporting entities that are involved with VIEs, particularly those that have fee arrangements and related-party relationships; and (4) provide a scope exception from

consolidation guidance for reporting entities with interests in legal entities that are required to comply with or operate in accordance with requirements that are similar to those in Rule 2a-7 of the Investment Company Act of 1940 for registered money market funds. This guidance is effective for public business entities for fiscal years, and for interim periods within those fiscal years, beginning after December 15, 2015.

On January 1, 2016, the Company adopted the above guidance as required. As a result of its re-evaluation, the Company determined it was no longer the primary beneficiary of the following VIEs and, therefore, they were deconsolidated: RREF CDO 2006-1, RREF CDO 2007-1, Apidos Cinco CDO, Pelium Capital, and RCM Global. As a result of these deconsolidations, the Company no longer reflects the underlying collateral (loans and securities) of those VIEs in its consolidated financial statements. Instead, the Company prospectively reflects in its consolidated balance sheet, its direct investments (the "retained investments") in the issued and outstanding securities of those VIEs. The Company's retained investments in RREF CDO 2006-1, RREF CDO 2007-1, Apidos Cinco CDO are now accounted for as investment securities, available-for-sale and, as a result, are marked-to-market while the Company's retained investments in Pelium Capital and RCM Global are accounted for as equity method investments. The Company has elected to retrospectively reflect the deconsolidation of these entities on a modified basis, which resulted in a reduction to the beginning balance of retained earnings as of January 1, 2016, of \$16.9 million. The reduction to retained earnings represents the effect of marking the investments to market value as of the date of the adoption.

The following table summarizes the net impact of the deconsolidation of the five VIEs upon adoption on January 1, 2016 (in thousands) net of eliminations:

In November 2014, the FASB issued guidance to eliminate the use of different methods in practice and thereby reduce existing diversity under GAAP in the accounting for hybrid financial instruments issued in the form of shares. An entity that issues or invests in a hybrid financial instrument is required to separate an embedded derivative feature from the host contract (for example, an underlying share) and account for the feature as a derivative according to Accounting Standards Codification ("ASC") Subtopic 815-10 on derivatives and hedging if certain criteria are met. This guidance is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2015. Adoption did not have a material impact on the Company's consolidated financial statements. In August 2014, the FASB issued guidance that clarifies the disclosures management must make in its interim and annual financial statement footnotes when management has determined that conditions exist that raise substantial doubt about the entity's ability to continue as a going concern within one year after the date the financial statements are issued (or within one year after the date the financial statements are available to be issued when applicable). In accordance with this guidance, management's assessment is required to be made each reporting period and should be based on relevant conditions and events that are known and reasonably knowable at the date the financial statements are issued. In all cases, to the extent that substantial doubt about the entity's ability to continue as a going concern is determined to be probable, management must disclose the principal conditions or events that gave rise to the substantial doubt about the entity's ability to continue as a going concern, management's evaluation of the significance of those conditions or events in relation to the entity's ability to meet its obligations, and management's plans that either alleviate or are intended to mitigate the conditions or events that gave rise to the substantial doubt about the entity's ability to continue as a going concern. Additionally, to the extent substantial doubt about the entity's ability to continue as a going concern is not alleviated by management's plans, management must indicate in the footnotes that there is substantial doubt about the entity's ability to continue as a going concern. This guidance is effective for the annual period ending after December 15, 2016, and for annual periods and interim periods thereafter. Early adoption is permitted. The Company is currently evaluating the effect of adoption.

In August 2014, the FASB issued guidance that provides for the election of a measurement alternative when a reporting entity determines that it is the primary beneficiary of a collateralized financing entity and, hence, is required to consolidate that collateralized financing entity. The measurement alternative allows a qualifying consolidated collateralized financing entity to use the more observable of the fair value of the financial assets or the fair value of the financial liabilities adjusted by the carrying amount of non-financial assets and the fair value of any beneficial interests retained by the reporting entity (including those beneficial interests that represent compensation for services). Alternatively, if the measurement alternative is not elected for a qualifying consolidated collateralized financing entity, this guidance requires that the financial assets and financial liabilities be measured in accordance with ASC Topic 820, and that any difference in the fair value of the financial assets and the fair value of the financial liabilities be reflected in earnings and attributed to the reporting entity in the consolidated statement of operations. This guidance was effective for public business entities for annual periods, and interim periods within those annual periods, beginning after December 15, 2015. Adoption did not have a material impact on the Company's consolidated financial statements.

Reclassifications

Certain reclassifications have been made to the 2015 consolidated financial statements to conform to the 2016 presentation.

NOTE 3 - VARIABLE INTEREST ENTITIES

The Company has evaluated its securities, loans, investments in unconsolidated entities, liabilities to subsidiary trusts issuing preferred securities (consisting of unsecured junior subordinated notes), securitizations, guarantees and other

financial contracts in order to determine if they are variable interests in VIEs. The Company regularly monitors these legal interests and contracts and, to the extent it has determined that it has a variable interest, analyzes the related entity for potential consolidation. A VIE is required to be consolidated by its primary beneficiary, which, generally, is the entity that has the power to direct the activities that are most significant to the VIE and the right to receive benefits or the obligation to absorb losses that could potentially be significant to the VIE. The Company continuously analyzes entities in which it holds variable interests, including when there is a reconsideration event, to determine whether such entities are VIEs and whether such potential VIEs should be consolidated or deconsolidated. This analysis requires considerable judgment.

Consolidated VIEs (the Company is the primary beneficiary)

Based on management's analysis, the Company is the primary beneficiary of seven VIEs at September 30, 2016: Apidos CDO I, Apidos CDO III, Whitney CLO I, RCC CRE Notes 2013, RCC 2014-CRE2, RCC 2015-CRE3 and RCC 2015-CRE4 (collectively

the "Consolidated VIEs"). The Consolidated VIEs were formed on behalf of the Company to invest in real estate-related securities, CMBS, property available-for-sale, bank loans, corporate bonds and asset-backed securities and were financed by the issuance of debt securities. The Manager manages the commercial real estate-related entities on behalf of the Company, and CVC Credit Partners manages the commercial finance-related entities on behalf of the Company. By financing these assets with long-term borrowings through the issuance of bonds, the Company seeks to generate attractive risk-adjusted equity returns and to match the term of its assets and liabilities. The primary beneficiary determination for each of these VIEs was made at each VIE's inception and is continually assessed. All of the Company's VIEs were reevaluated under the revised consolidation model effective for the Company on January 1, 2016 (see Note 2).

As of December 31, 2015, the Company was the primary beneficiary of thirteen VIEs: Apidos CDO I, Apidos CDO III, Apidos Cinco CDO, Apidos CLO VIII, RREF CDO 2006-1, RREF CDO 2007-1, Whitney CLO I, RCC CRE Notes 2013, RCC 2014-CRE2, RCC 2015-CRE3, RCC 2015-CRE4, Moselle CLO and RCM Global (collectively, the "Consolidated VIEs at December 31, 2015"). In performing the primary beneficiary analysis for the Consolidated VIEs at December 31, 2015, it was determined that the parties that have the power to direct the activities that are most significant to each of these VIEs and that had the right to receive benefits or the obligation to absorb losses that could potentially be significant to these VIEs, were a related-party group. It was then determined that the Company was the party within that group that was more closely associated with each such VIE considering the design of the VIE, the principal-agency relationship between the Company and other members of the related-party group, and the relationship and significance of the activities of the VIE to the Company compared to the other members of the related-party group. Apidos CDO I, Apidos CDO III, Apidos Cinco CDO, Apidos CLO VIII, RREF CDO 2006-1, RREF CDO 2007-1, RCC CRE Notes 2013, RCC 2014-CRE2, RCC 2015-CRE3 and RCC 2015-CRE4 were formed on behalf of the Company to invest in real estate-related securities, CMBS, property available-for-sale, bank loans, corporate bonds and asset-backed securities and were financed by the issuance of debt securities. The Manager manages the commercial real estate-related entities on behalf of the Company, and CVC Credit Partners manages the commercial finance-related entities on behalf of the Company. The primary beneficiary determination for each of these VIEs was made at each VIE's inception and is continually assessed.

Moselle CLO was a European securitization in which the Company purchased a \$30.4 million interest in the form of subordinate notes representing 100% of the Class 1 Subordinated Notes and 67.9% of the Class 2 Subordinated Notes in February 2014. The CLO was managed by an independent third-party, and such collateral management activities were determined to be the activities that most significantly impacted the economic performance of the CLO. Though neither the Company nor one of its related parties managed the CLO, due to certain unilateral kick-out rights within the collateral management agreement it was determined that the Company had the power to direct the activities that most significantly impacted the economic performance of Moselle CLO. Having both the power to direct the activities that most significantly impact Moselle CLO and a financial interest that was expected to absorb both positive and negative variability in the CLO that could potentially be significant, the Company was determined to be the primary beneficiary of Moselle CLO and, therefore, consolidated the CLO. During the fourth quarter of 2014, the CLO began the liquidation process and all assets were subsequently sold. The Company's interest in the Moselle CLO Subordinated Notes was fully redeemed in March 2016.

Whitney CLO I was a securitization in which the Company acquired rights to manage the collateral assets held by the entity in February 2011. For a discussion on the primary beneficiary analysis for Whitney, see "— Unconsolidated VIEs – Resource Capital Asset Management," below.

For a discussion of the Company's consolidated securitizations, see Note 1, and for a discussion of the debt issued through the securitizations, see Note 12.

For consolidated CLOs in which the Company does not own 100% of the subordinated notes, the Company imputes an interest rate using expected cash flows over the life of the CLO and records the third party's share of the cash flows as interest expense on the consolidated statements of operations.

The Company has exposure to losses on its securitizations to the extent of its subordinated debt and preferred equity interests in them. The Company is entitled to receive payments of principal and interest on the debt securities it holds and, to the extent revenues exceed debt service requirements and other expenses of the securitizations, distributions with respect to its preferred equity interests. As a result of consolidation, debt and equity interests the Company holds in these securitizations have been eliminated, and the Company's consolidated balance sheets reflects both the assets held and debt issued by the securitizations to third parties and any accrued expense to third parties. The Company's operating results and cash flows include the gross amounts related to the securitizations' assets and liabilities as opposed to the Company's net economic interests in the securitizations. Assets and liabilities related to the securitizations are disclosed, in the aggregate, on the Company's consolidated balance sheets.

 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)
 SEPTEMBER 30, 2016
 (unaudited)

The creditors of the Company's seven consolidated VIEs have no recourse to the general credit of the Company. During the three and nine months ended September 30, 2016, the Company provided no financial support to any of its VIEs nor does it have any requirement to do so, although it may choose to do so in the future to maximize future cash flows on such investments by the Company. There are no explicit arrangements that obligate the Company to provide financial support to any of its consolidated VIEs.

The following table shows the classification and carrying value of assets and liabilities of the Company's consolidated VIEs as of September 30, 2016 (in thousands):

(1) Includes \$2.9 million designated to fund future commitments on specific commercial real estate loans in certain of the securitizations.

(2) Assets of each of the consolidated VIEs may only be used to settle the obligations of each respective VIE.

Unconsolidated VIEs (the Company is not the primary beneficiary, but has a variable interest)

Based on management's analysis, the Company is not the primary beneficiary of the VIEs discussed below since it does not have both (i) the power to direct the activities that most significantly impact the VIE's economic performance and (ii) the obligation to absorb the losses of the VIE or the right to receive the benefits from the VIE, which could be significant to the VIE. Accordingly, the following VIEs are not consolidated in the Company's financial statements as of September 30, 2016. The Company's maximum exposure to risk for each of these unconsolidated VIEs is set forth in the "Maximum Exposure to Loss" column in the table below.

RREF CDO 2006-1, RREF CDO 2007-1 and Apidos Cinco CDO

RREF CDO 2006-1, RREF CDO 2007-1 and Apidos Cinco CDO were formed on behalf of the Company to invest in real estate-related securities, CMBS, property available-for-sale, bank loans, corporate bonds and asset-backed securities and were financed by the issuance of debt securities. The Manager manages the commercial real

estate-related entities on behalf of the Company, and CVC Credit Partners manages the commercial finance-related entities on behalf of the Company. By financing these assets with long-term borrowings through the issuance of bonds, the Company seeks to generate attractive risk-adjusted equity returns and to match the term of its assets and liabilities. The primary beneficiary determination for each of these VIEs was made at each VIE's inception and is continually assessed. On January 1, 2016, the Company adopted the amendments to the consolidation guidance as outlined in Note 2. As a result of its evaluation, the Company determined that it was no longer the primary beneficiary of these VIEs as its investments in these vehicles do not provide the Company with a controlling financial interest. As a result of its evaluation, these investments were deconsolidated. At deconsolidation, the Company recorded its investments in RREF CDO 2006-1, RREF CDO 2007-1 and Apidos Cinco CDO at fair value and accounts for these investments as investment securities available-for-sale in its consolidated financial statements. On April 25, 2016, the Company called and liquidated its investment in RREF CDO 2006-1 and, in exchange for the Company's interest in RREF CDO 2006-1, the Company distributed the remaining assets of \$65.6 million at fair value after paying off the CDO debt owed to third parties of \$7.5 million. The Company recognized a gain of approximately \$846,000 as a result of this transaction. On September 28, 2016, Apidos Cinco CDO's trustee issued a notice to call the CDO.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)
SEPTEMBER 30, 2016
(unaudited)

RCM Global, LLC

On July 9, 2014, RCC Residential, together with Resource America and certain Resource America employees, acquired through RCM Global a portfolio of securities from JP Morgan for \$23.5 million. The portfolio is managed by Resource America. RCC Residential contributed \$15.0 million for a 63.8% membership interest. Each of the members of RCM Global is allocated revenues and expenses of RCM Global in accordance with his or her membership interest. RCM Global was determined to be a VIE based on the equity holders' inability to direct the activities that are most significant to the entity. On January 1, 2016, the Company adopted the amendments to the consolidation guidance as outlined in Note 2. Upon adoption, the Company reevaluated its variable interest in RCM Global and determined it would not be the primary beneficiary of RCM Global, as its investment in the limited liability company does not provide the Company with a controlling financial interest. As a result of its evaluation, the Company deconsolidated its investment in RCM Global. As of January 1, 2016, the Company accounted for its investment in RCM Global as an investment in an unconsolidated entity in its consolidated financial statements. As of September 30, 2016, the Company holds a 28.6% interest in RCM Global.

Pelium Capital

In September 2014, the Company contributed \$17.5 million to Pelium Capital for an initial ownership interest of 80.4%. Pelium Capital is a specialized credit opportunity fund managed by Resource America. The Company funded its final commitment of \$2.5 million, as of February 1, 2015. The Company will receive 10% of the carried interest in the partnership for the first five years which can increase its interest to 20% if the Company's capital contributions aggregate \$40.0 million. Resource America contributed cash of \$2.8 million to the formation of Pelium Capital. At December 31, 2015, Pelium Capital was accounted for as a consolidated voting interest subsidiary. On January 1, 2016, the Company adopted the amendments to the consolidation guidance as outlined in Note 2. Upon adoption, the Company reevaluated its interest in Pelium Capital and determined that although it now possessed a variable interest in Pelium Capital, it would not be the primary beneficiary of Pelium Capital, as its investment in the limited liability company does not provide the Company with a controlling financial interest. As a result of its reevaluation, the Company deconsolidated its investment in Pelium Capital on January 1, 2016, and accounted for its investment in Pelium Capital as an investment in an unconsolidated entity in its consolidated financial statements. As of September 30, 2016, the Company holds an 80.2% interest in Pelium Capital.

Pearlmark Mezzanine Realty Partners IV, L.P.

On June 24, 2015, the Company committed up to \$50.0 million in Pearlmark Mezzanine Realty Partners IV, L.P. ("Pearlmark Mezz"), a Delaware limited partnership created to acquire and manage financial interests in commercial real estate property. The contractual fund manager of the fund is Pearlmark Real Estate LLC ("Pearlmark"), a Delaware limited liability company that is 50% owned by Resource America. The Company determined it possessed a variable interest Pearlmark Mezz, however, it would not be the primary beneficiary of Pearlmark Mezz, as its investment in the limited liability company does not provide the Company with a controlling financial interest. The Company will pay Pearlmark Mezz management fees of 1.0% on the unfunded committed capital and 1.5% on the invested capital. The Company is entitled to a management fee rebate of 25% for the first year of the fund. As of September 30, 2016, the Company has an investment balance of \$16.8 million and a 47.7% ownership interest in the fund.

LEAF Commercial Capital, Inc.

On November 16, 2011, the Company together with LEAF Financial, Inc. ("LEAF Financial"), a subsidiary of Resource America, and LEAF Commercial Capital, Inc. ("LCC"), another subsidiary of Resource America, entered into a stock purchase agreement and related agreements (collectively the "SPA") with Eos Partners, L.P., a private investment firm, and its affiliates ("Eos"). In exchange for its prior interests in its lease related investments, the Company received 31,341 shares of Series A Preferred Stock (the "Series A Preferred Stock"), 4,872 shares of newly issued 8% Series B Redeemable Preferred Stock (the "Series B Preferred Stock") and 2,364 shares of newly issued Series D Redeemable Preferred Stock (the "Series D Preferred Stock"), collectively representing, on a fully-diluted basis, assuming conversion, a 26.7% interest in LCC. At the time of investment, the Company's investment in LCC was valued at \$36.3 million based on a third-party valuation. During 2013, the Company entered into a third stock purchase agreement with LCC to purchase 3,682 shares of newly issued Series A-1 Preferred Stock (the "Series A-1 Preferred Stock") for \$3.7 million and 4,445 shares of newly issued Series E Preferred Stock (the "Series E Preferred Stock") for \$4.4 million. The Series E Preferred Stock expired and the Company was issued additional Series A-1 Preferred Stock in exchange for its investment in the Series E Preferred Stock. The Company's fully-diluted interest in LCC, assuming conversion, was 29.0% at September 30, 2016. The Company's investment in LCC was recorded at \$44.8 million and \$42.0 million as of September 30, 2016 and December 31, 2015, respectively. The Company determined that it is not the primary beneficiary of LCC because it does not participate in any management or portfolio decisions, holds only two of six board positions, and only controls 29.0% of the voting rights in the entity. Furthermore, Eos holds consent rights with

respect to significant LCC actions, including the incurrence of indebtedness, consummation of a sale of the entity, liquidation or initiating a public offering (see Note 17).

Unsecured Junior Subordinated Debentures

The Company has a 100% interest in the common shares of Resource Capital Trust I (“RCT I”) and RCC Trust II (“RCT II”), valued at \$1.5 million in the aggregate (or 3% of each trust). RCT I and RCT II were formed for the purposes of providing debt financing to the Company, as described below. The Company completed a qualitative analysis to determine whether or not it is the primary beneficiary of each of the trusts and determined that it was not the primary beneficiary of either trust because it does not have the power to direct the activities most significant to the trusts, which include the collection of principal and interest and protection of collateral through servicing rights.

Accordingly, neither trust is consolidated into the Company’s consolidated financial statements.

The Company records its investments in RCT I and RCT II’s common shares as investments in unconsolidated trusts using the cost method and records dividend income when declared by RCT I and RCT II. The trusts each hold subordinated debentures for which the Company is the obligor in the amount of \$25.8 million for RCT I and \$25.8 million for RCT II. The debentures were funded by the issuance of trust preferred securities of RCT I and RCT II. The Company will continuously reassess whether it should be deemed to be the primary beneficiary of the trusts.

Resource Capital Asset Management CLOs

In February 2011, the Company purchased a company that managed bank loan assets through five CLOs. As a result, the Company became entitled to collect senior, subordinated and incentive management fees from these CLOs. The purchase price of \$22.5 million resulted in an intangible asset that was allocated to each of the five CLOs and is amortized over the expected life of each CLO. The unamortized balance of the intangible asset was \$512,000 and \$5.3 million at September 30, 2016 and December 31, 2015, respectively. The Company recognized fee income of \$553,000 and \$1.5 million for the three and nine months ended September 30, 2016, respectively. The Company recognized fee income of \$791,000 and \$2.7 million for the three and nine months ended September 30, 2015, respectively. With respect to four of these CLOs, the Company determined that it does not hold a controlling financial interest and, therefore, is not the primary beneficiary. One of the CLOs was liquidated in February 2013. In January 2016, a second RCAM-managed CLO was called and \$2.4 million of impairment, on a pre-tax basis, was recorded in depreciation and amortization on the Company’s consolidated statements of operations on the related intangible asset, as of December 31, 2015. In September 2016, the third RCAM-managed CLO was called and \$1.5 million of impairment, on a pre-tax basis, was recorded in impairment losses on the Company’s consolidated statements of operations on the related intangible asset, during the three months ended September, 30 2016. In September 2016, the Company recorded impairment on the one remaining CLO of \$2.2 million, on a pre-tax basis, on the related intangible asset on which the Company anticipates redemption in early 2017.

With respect to the fifth CLO, Whitney CLO I, in October 2012, the Company purchased 66.6% of its preferred equity, which resulted in consolidation. Based upon that purchase, the Company determined that it had an obligation to absorb losses and/or the right to receive benefits that could potentially be significant to Whitney CLO I and that a related party had the power to direct the activities that are most significant to the VIE. As a result, together with the related party, the Company had both the power to direct and the right to receive benefits and the obligation to absorb losses. It was then determined that, between the Company and the related party, the Company was the party within that group that was more closely associated with Whitney CLO I because of its preferred equity interest in Whitney CLO I. The Company, therefore, consolidated Whitney CLO I. In May 2013, the Company purchased additional equity in this CLO which increased its ownership of the outstanding preferred equity to 68.3%. In September 2013, the Company liquidated Whitney CLO I, and, as a result, all of the assets were sold.

Investment in ZAIS

In February 2015, the Company made an investment in ZAIS CLO 4 Limited, an offshore financing vehicle created to acquire and warehouse syndicated bank loans, through its wholly-owned, indirect subsidiary ZAIS and through its unconsolidated subsidiary Pelium Capital together with a Resource America employee. The Company, through ZAIS and Pelium Capital, committed to invest \$10.0 million and \$3.0 million, respectively, during the vehicle's warehousing period. The warehouse credit facility closed on May 5, 2016, at which time, Resource TRS III purchased a beneficial interest in ZAIS CLO 4. The vehicle is managed by ZAIS Leveraged Loan Manager 4, LLC (the "Collateral Manager"), an entity unrelated to the Company or to Pelium Capital, and such collateral management activities were determined to be the activities that most significantly impacted the economic performance of the entity. The Collateral Manager can be replaced either for cause by the entity's administrative agent if there is an event of default or by a unanimous vote of the entity's equity investors, excluding any preference shares held by the Collateral Manager or its affiliates. Although the Company has an investment in the entity that is potentially significant, because it was determined that the Company did not have

the ability to kick out the collateral manager, the Company was not determined to be the primary beneficiary and, hence, not required to consolidate ZAIS CLO 4. As of September 30, 2016, the Company had a beneficial interest of \$10.6 million in ZAIS CLO 4. The Company accounts for its investment in ZAIS CLO 4 as an investment security available-for-sale in its consolidated financial statements.

Investments in the Harvest CLO Securities

In September 2013 and March 2014, the Company made investments in Harvest CLO VII Limited and Harvest CLO VIII Limited (collectively, the "Harvest Securities"), respectively, offshore limited liability companies created to acquire syndicated bank loans and issue collateral loan obligations, through its wholly-owned, direct subsidiary Commercial II. The Harvest Securities are managed by 3i Debt Management Investments Limited (the "Portfolio Manager"), an entity unrelated to the Company, and such collateral management activities were determined to be the activities that most significantly impacted the economic performance of the entity. The Portfolio Manager can be replaced only for cause by the Harvest Securities' trustee. Although the Company has investments in the Harvest Securities that are potentially significant, because it was determined that the Company did not have the ability to unilaterally kick out the Portfolio Manager, the Company was not determined to be the primary beneficiary and, hence, not required to consolidate the Harvest Securities. As of September 30, 2016, the Company had investments of \$4.4 million in Harvest CLO VII Limited and \$5.2 million in Harvest CLO VIII Limited. The Company accounts for its investments in the Harvest Securities as investment securities available-for-sale in its consolidated financial statements.

Investment in Harvest CLO XV Designated Activity Company

In September 2015, the Company made an investment in Harvest CLO XV Designated Activity Company ("Harvest XV"), an offshore financing vehicle created to acquire and warehouse syndicated bank loans, through its wholly-owned, direct subsidiary Commercial II. In May 2016, the warehouse closed and the Company invested in Harvest CLO XV DAC ("Harvest CLO XV"). The CLO is managed by the Portfolio Manager, and such collateral management activities were determined to be the activities that most significantly impacted the economic performance of the entity. The Portfolio Manager can be replaced only for cause by the entity's administrative agent. Although the Company has an investment in the entity that is potentially significant, because it was determined that the Company did not have the ability to unilaterally kick out the collateral manager, the Company was not determined to be the primary beneficiary and, hence, not required to consolidate Harvest CLO XV. As of September 30, 2016, the Company's investment in Harvest CLO XV is \$14.0 million. The Company accounts for its investment in Harvest CLO XV as an investment security available-for-sale in its consolidated financial statements.

The following table shows the classification, carrying value and maximum exposure to loss with respect to the Company's unconsolidated VIEs as of September 30, 2016 (in thousands):

RESOURCE CAPITAL CORP. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)
 SEPTEMBER 30, 2016
 (unaudited)

As a result of updated accounting guidance, effective January 1, 2016 (see Note 2), the Company deconsolidated all of the assets of Pelium Capital, resulting in the removal of \$21.9 million of investment securities, trading from its balance sheet, which is the primary cause of the decrease of securities during the period. The Company sold no investment securities during the three and nine months ended September 30, 2016. The Company sold nine and 19 investment securities during the three and nine months ended September 30, 2015 for a net realized gain of approximately \$750,000 and \$1.4 million, respectively. The Company held six and 56 investment securities, trading as of September 30, 2016 and December 31, 2015, respectively.

NOTE 6 - INVESTMENT SECURITIES AVAILABLE-FOR-SALE

The following table summarizes the Company's investment securities, including those pledged as collateral and classified as available-for-sale. ABS may include, but are not limited to the Company's investments in RREF CDO 2007-1, Apidos Cinco CDO, Harvest CLO Securities, ZAIS and other securities backed by syndicated bank loans, and other loan obligations.  NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)
 SEPTEMBER 30, 2016
 (unaudited)

During the three and nine months ended September 30, 2016, the Company recognized \$21.6 million of other-than-temporary impairment on its investment securities available-for-sale.

Of this amount, \$20.7 million relates to the Company's previously consolidated CRE CDO, RREF 2007-1, which is classified as an investment security available-for-sale. The Company's security interest in the vehicle is supported by 12 CMBS securities and seven CRE loans. As part of the Company's ongoing credit evaluation of its investment securities, third-party appraisals were obtained on six of the seven remaining legacy CRE loans, which are part of the asset pool of the vehicle. The remaining loan was under an agreement of sale. As a result of having the properties supporting the loans appraised, two of the CRE loans in the vehicle were determined to have cost bases in excess of their expected cash flows, as a result of the updated appraisals, causing a collective impairment charge to the cash flows of the vehicle of \$20.7 million. The impairment charge on the security reflects the credit impact to the fair value of the security given the results of the updated appraisals and reduces the Company's cost basis in the security permanently. The impairment charge was calculated by comparing the previous projected cash flows of the security to the revised cash flows including the results of the updated appraisals.

The Company recorded other-than-temporary impairment of \$241,000 on three positions classified as securities available-for-sale, RMBS during the three and nine months ended September 30, 2016 after it was determined the Company would not be able to recover the full cost basis of these positions due to declines in the future projected cash flows of the securities.

One CMBS position classified as a security available for sale with a par balance of \$4.0 million was identified as a position the Company would be required to sell before it could recover its cost basis in the security. As such, the Company recorded the difference between its amortized cost basis and the estimated fair value. Other-than-temporary impairment of \$732,000 was recognized during the three and nine months ended September 30, 2016, as a result of the anticipated sale of this security.

During the three and nine months ended September 30, 2015, the Company recognized no other-than-temporary impairment on its investment securities available-for-sale.

The following table summarizes the Company's sales of investment securities available-for-sale (in thousands, except number of securities):

	For the Three Months Ended			For the Nine Months Ended				
	Positions Sold	Positions Redeemed	Par Amount Sold/Redeemed	Realized Gain (Loss)	Positions Sold	Positions Redeemed	Par Amount Sold/Redeemed	Realized Gain (Loss)

Amounts include deferred amendment fees of \$12,000 being amortized over the life of the loans as of September 30, 2016. Amounts include deferred amendment fees of \$42,000 and deferred upfront fees of \$12,000 ⁽¹⁾ being amortized over the life of the loans as of December 31, 2015. Amounts also include loan origination fees of \$6.7 million and \$9.9 million as of September 30, 2016 and December 31, 2015, respectively.

As a result of the consolidation guidance adopted January 1, 2016, the Company deconsolidated loans held for ⁽²⁾investment in the amount of \$271.8 million of its CRE loans and \$134.5 million of its bank loans and the related allowance for loan losses of \$41.7 million (see Note 2).

(3) Substantially all loans are pledged as collateral under various borrowings as of September 30, 2016 and December 31, 2015, respectively.

(4) Amortized cost approximates fair value.

As a result of RREF CDO 2006-1 being called and liquidated on April 25, 2016, a mezzanine loan with a par value (5) of \$28.8 million was acquired as part of the liquidation proceeds and is reflected on the Company's balance sheet at a fair value of zero as of September 30, 2016.

Whole loans had \$67.3 million and \$112.6 million in unfunded loan commitments as of September 30, 2016 and (1) December 31, 2015, respectively. These unfunded commitments are advanced as the borrowers formally request additional funding as permitted under the loan agreement and any necessary approvals have been obtained.

(2) Totals do not include allowances for loan losses of \$9.4 million and \$41.8 million as of September 30, 2016 and December 31, 2015, respectively.

(3) Maturity dates do not include possible extension options that may be available to the borrowers.

Includes two whole loans with a combined \$11.2 million and \$51.2 million senior component as of September 30, 2016 and December 31, 2015, respectively, that entered into modifications in 2016 and 2015 that resulted in a (4) fixed rate of 0.50% as of September 30, 2016 and December 31, 2015, respectively (the difference of which was a result of the deconsolidation of RREF CDO 2006-1 and RREF CDO 2007-1 - see Note 2). The two loans were previously identified as troubled debt restructurings ("TDR's").

(5) Includes four whole loans with a combined \$4.5 million in mezzanine components that have interest rates ranging from 1.5% to 5.2% as of September 30, 2016 and December 31, 2015.

(6) Includes a \$799,000 junior mezzanine tranche of a whole loan that has a fixed rate of 10.0% as of September 30, 2016 and December 31, 2015.

Contracted interest rates do not include a whole loan with an amortized cost of \$2.0 million and \$32.5 million as of September 30, 2016 and December 31, 2015, respectively, that entered into modifications in 2016 and 2015 which (7) reduced the floating rate spread to 1.00% as of September 30, 2016 and December 31, 2015, respectively (the difference of which was a result of the deconsolidation of RREF CDO 2007-1 - see Note 2). The loan was previously identified as a TDR.

(8) Contracted interest rates and maturity dates do not include rates or maturity dates associated with one loan with an amortized cost of \$38.1 million that was fully reserved as of June 30, 2015.

(9) As a result of updated accounting guidance, effective January 1, 2016 (see Note 2), the Company deconsolidated all of the assets of RREF CDO 2006-1 and RREF CDO 2007-1, resulting in the removal of \$271.8 million of loans

pledged as collateral from its balance sheet.

(10) As a result of RREF CDO 2006-1 being called and liquidated on April 25, 2016, a mezzanine loan with a par value of \$28.8 million was acquired as part of the liquidation proceeds and is reflected on the Company's balance sheet at a fair value of zero at September 30, 2016. The mezzanine loan is comprised of two tranches, with maturity dates of November 2016 and September 2021.

The investment in RRE VIP Borrower was sold as of December 31, 2014. Earnings for the three and nine months (1) ended September 30, 2016 and 2015 are related to insurance premium and property tax refunds and the liquidation of bank accounts with respect to the underlying sold properties of the portfolio.

(2) In December 2015, the Company elected a full redemption of its remaining investment in the fund.

(3) The Company has committed to invest up to \$50.0 million in Pearlmark Mezzanine Realty Partners IV, L.P. The commitment termination date ends the earlier of when the original commitment is fully funded, or the fifth anniversary following the final closing date of June 24, 2015.

(4) Pursuant to the new consolidation guidance adopted January 1, 2016, these previously consolidated VIEs are now accounted for under the equity method.

(5) Investment in School Lane House was sold as of December 31, 2014. Earnings for the three and nine months ended September 30, 2016 and 2015 related to the return of a security deposit and payment of an insurance claim.

(6) For the three and nine months ended September 30, 2016 and 2015, these amounts are recorded in interest expense on the Company's consolidated statements of operations.

Credit quality indicators

Commercial Real Estate Loans

Loans are graded at inception and updates to assigned grades are made continually as new information is received. As a result, a loan previously rated 4 may, over time and with improved performance, be rated better than 4. Loans are graded on a scale of 1 to 4 with 1 representing the Company's highest rating and 4 representing its lowest rating. Commercial real estate loans are first individually evaluated for impairment. To the extent no individual impairment is determined, a general reserve is established.

The characteristics of each rating category are as follows:

1. A loan with a rating of a 1 is considered to have satisfactory performance with no issues noted. All interest and principal payments are current and the probability of loss is remote;
 A loan is graded with a rating of a 2 if a surveillance trigger event has occurred, but loss is not probable at this time. Such trigger events could include but are not limited to a trending decrease in occupancy rates or a flattening of lease revenues; and to a lesser extent, ground lease defaults, ground lease expirations that occur in the next six months or the borrower is delinquent on payment of property taxes or insurance.;
2. A loan with a rating of 3 has experienced an extended decline in operating performance, a significant deviation from its origination plan or the occurrence of one or more surveillance trigger events which create an increased risk for potential default. Loans identified in this category show some liquidity concerns. However, the risk of loss is not specifically assignable to any individual loan. The noted risk of the loans in this category is generally covered by general reserves;
3. A loan with a rating of a 4 is considered to be in payment default or default is expected, full recovery of the unpaid principal balance is improbable and loss is considered probable. The noted risk of the loans in this category is covered by specific reserves.

Credit risk profiles of commercial real estate loans were as follows (in thousands):

	Rating 1 ⁽²⁾	Rating 2	Rating 3	Rating 4 ⁽³⁾	Held for Sale	Total
As of September 30, 2016:						
CRE whole loans	\$1,232,641	\$99,083	\$	-\$29,459	\$	-\$1,361,183
Mezzanine loans ⁽¹⁾	—	—	—	—	—	—
	\$1,232,641	\$99,083	\$	-\$29,459	\$	-\$1,361,183
As of December 31, 2015:						
CRE whole loans	\$1,596,099	\$32,500	\$	-\$2,202	\$	-\$1,630,801
B notes	15,934	—	—	—	—	15,934
Mezzanine loans	7,300	—	—	38,072	—	45,372
	\$1,619,333	\$32,500	\$	-\$40,274	\$	-\$1,692,107

(1) The Company has one mezzanine loan with a par value of \$28.8 million that was acquired at a fair value of zero as a result of the liquidation of RREF 2006-1.

(2) Includes four loans which were impaired as of December 31, 2015.

(3) Includes three loans which were impaired as of September 30, 2016.

As part of the Company's ongoing loan monitoring, third-party appraisal services were obtained on six legacy CRE loans during the quarter ended September 30, 2016. As a result of the evaluation of those appraisals, it was determined that two loans previously disclosed as impaired loans, one in Studio City, CA with an amortized cost of \$27.5 million and the other in Tucson, AZ with an amortized cost of \$2.0 million, had cost bases in excess of their appraised values. As such, for the three and nine months ended September 30, 2016, the Company recorded specific provisions of \$6.1 million on the Studio City, CA loan and \$2.0 million on the Tucson, AZ loan. Previously, the Studio City, CA loan was under contract for sale at a value in excess of the Company's loan amount. The contract for sale was terminated in October 2016. The Tucson, AZ loan was previously supported by a broker's opinion of value received as of December 31, 2015. The updated appraisal, after factoring in modified terms with

the operating manager, and adjustments to projected occupancy and the average daily rate, returned a fair value below our cost basis, resulting in the full impairment of the portion of this whole loan held directly on balance sheet. A portion of this whole loan is also held in RREF CDO 2007-1. The provisions recorded against these loans reflect the estimated recoverable value. These and other assets in the loan pool continue to be monitored consistent with the Company's impairment evaluation process.

The Company also had six loans classified as rating 2 due to surveillance triggers being registered. Of the six loans, several will be classified as loans held for sale as of December 31, 2016 (see Note 24). The other two loans had surveillance trigger events due to a mechanics lien and a code violation. These two loans were not considered impaired as of September 30, 2016.

All of the Company's commercial real estate loans were current with exception of one mezzanine loan that had defaulted as of September 30, 2016 and December 31, 2015. This loan was deconsolidated as part of the Company's adoption of amendments to consolidation accounting guidance as required on January 1, 2016 (see Note 2). However, as a result of RREF CDO 2006-1 being called and liquidated on April 25, 2016, par value of \$28.8 million of this mezzanine loan was acquired as part of the liquidation proceeds and is reflected on the Company's balance sheet at a fair value of zero at September 30, 2016.

Bank Loans

Loans are graded at inception and updates to assigned grades are made continually as new information is received. Loans are graded on a scale of 1 to 5 with 1 representing the Company's highest rating and 5 representing its lowest rating. Bank loans are first individually evaluated for impairment. To the extent no individual impairment is determined, a general reserve is established.

The characteristics of each rating category are as follows:

1. Loans with a rating of 1 are considered performing within expectations. All interest and principal payments are current, all future payments are anticipated and loss is not probable;

2. Loans with a rating of a 2 are considered to have limited liquidity concerns and are watched closely. Loans identified in this category show remote signs of liquidity concerns, loss is not probable and therefore no reserve is established;

3. Loans with a rating of a 3 are considered to have possible future liquidity concerns. Loans identified in this category show some liquidity concerns, but the ability to estimate potential defaults is not quantifiable and therefore no reserve is established;

4. Loans with a rating of a 4 are considered to have nearer term liquidity concerns. These loans have a reasonable possibility of future default. However, the risk of loss is not assignable to one specific credit. The noted risk of the loans in this category is covered by general reserves; and

5. Loans with a rating of a 5 have defaulted in payment of principal and interest or default is imminent. It is probable that impairment has occurred on these loans based on their payment status and that impairment is estimable. The noted risk of the loans in this category is covered by specific reserves.

Credit risk profiles of bank loans were as follows (in thousands):

Rating 1	Rating 2	Rating 3	Rating 4	Rating 5	Held for Sale	Total
----------	----------	----------	----------	----------	---------------	-------

As of December 31, 2015:

Bank loans	\$ 113,897	\$ 17,578	\$ 1,498	\$ —	\$ 1,544	\$ 1,475	\$ 135,992
------------	------------	-----------	----------	------	----------	----------	------------

As of September 30, 2016 all of the Company's bank loans were deconsolidated (see Note 2). As of December 31, 2015, all of the Company's bank loans were current with respect to debt service with the exception of one loan with an

amortized aggregate cost of \$1.5 million, on which there was a reserve.

Middle Market Loans

At inception, all middle market loans are graded at a 2. Updates to assigned grades are made continually as new information is received. Loans are graded on a scale of 1 to 5 with 1 representing the Company's highest rating and 5 representing its lowest rating. Middle market loans are only evaluated individually for impairment.

The characteristics of each rating category are as follows:

1. A loan with a rating of a 1 is considered performing above expectations and the likelihood of loss is remote;
2. A loan with a rating of a 2 is considered performing within expectations and the likelihood of loss is remote;
 A loan with a rating of a 3 is considered performing below expectations and requires close monitoring but no loss of interest or principal is expected. Loans receiving this rating may be out of compliance with financial covenants; however, these loans are current with respect to interest and principal;
3. A loan with a rating of a 4 is considered performing below expectations and some loss of interest or dividend is expected but no loss of principal. In addition to the borrower being generally out of compliance with debt covenants, loan payments may be past due, but generally not more than 180 days past due; and
 A loan with a rating of a 5 is considered performing substantially below expectations, in default and some loss of principal is expected. The borrower is out of compliance with most or all of the debt covenants and payments are substantially delinquent.

Credit risk profiles of middle market loans were as follows (in thousands):

	Rating 1	Rating 2	Rating 3	Rating 4	Rating 5	Held for Sale	Total
As of September 30, 2016:							
Middle market loans	\$—	\$40,048	\$11,491	\$—	\$—	-\$7,182	\$58,721

---------------------	----------	-----------	----------	-----	-----	---	-----------

As of September 30, 2016, the Company's syndicated loans were all performing and one remaining directly originated loan classified as held for sale was in default. The Company recorded an additional unrealized loss on this loan of \$9.6 million, included in the net realized and unrealized gain (loss) on sales of investment securities available-for-sale and loans and derivatives line item on the consolidated statement of operations, representing the lower of the loan's cost or fair value based on an updated third party valuation at September 30, 2016. The rest of the Company's portfolio is current with respect to debt service. All of the Company's middle market loans were current with respect to debt service as of December 31, 2015.

Residential Mortgage Loans

Residential mortgage loans are reviewed periodically for collectability in light of historical experience, the nature and amount of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral, and prevailing underlying conditions.

Direct Financing Leases

During the year ended December 31, 2015, the Company recorded a provision against the value of the direct financing leases in the amount of \$465,000. As of September 30, 2016, the Company held \$571,000 of direct financing leases, net of reserves.

NOTE 10 - BUSINESS COMBINATIONS

On February 26, 2014, the Company made an additional capital contribution to LCF which gave the Company majority ownership at 50.2%. As a result, the Company began consolidating the LCF joint venture. The joint venture was established for the purpose of acquiring life settlement contracts through a financing facility. On April 30, 2015, the Company committed to another capital contribution in the amount of \$750,000, increasing its ownership of LCF to 60.7%. The first installment of \$375,000 was funded on April 30, 2015 and the second installment of \$375,000 was funded on July 30, 2015. On December 15, 2015, the Company committed to an additional capital contribution in the amount of \$1.3 million, increasing its ownership of LCF to 70.9%. The first installment of \$750,000 was funded on January 5, 2016 and the second installment of \$500,000 was funded on June 30, 2016.

The Company engaged a third party expert to assist in determining the fair values of the assets and liabilities assumed on this investment. Based on the final valuation, which determined an enterprise value of LCF of approximately \$4.1 million, and in accordance with guidance on business combinations, the Company confirmed that no further adjustments were necessary.

Management Contracts and Wholesale/Correspondent Relationships

The Company recognized fee income on management contracts of \$553,000 and \$1.5 million for the three and nine months ended September 30, 2016, respectively, and \$791,000 and \$2.7 million for the three and nine months ended September 30, 2015, respectively.

For the three and nine months ended September 30, 2016 the Company recorded amortization expense of \$331,000 and \$1.1 million, respectively, related to the Company's management contracts. For the three and nine months ended September 30, 2015 the Company recorded amortization expense of \$518,000 and \$1.5 million related to the Company's management contracts and wholesale/correspondent relationships, respectively. In October 2016, one of the two remaining CLOs associated with the management contracts was called, and the anticipated call date of the other CLO was determined to be early 2017. In accordance with guidance on intangible assets other than goodwill, the Company tested its two remaining management contracts for impairment at September 30, 2016. The carrying amounts of the management contracts were deemed to be unrecoverable and in excess of their fair values, calculated using a discounted cash flow analysis. As a result, an impairment loss of \$3.7 million was recognized for the three months ended September 30, 2016 and recorded on the Company's consolidated statement of operations. The Company expects to record amortization expense on its management contracts of \$299,000 for the three months ending December 31, 2016. The Company expects to record amortization expense on its management contracts of \$213,000 for the year ending December 31, 2017, and no amortization expense of its management contracts in 2018, 2019 or 2020. The weighted average amortization period was 0.7 years and 5.8 years at September 30, 2016 and December 31, 2015, respectively.

Mortgage Servicing Rights

Through the Company's wholly-owned residential mortgage loan originator PCM, residential mortgage loans are sold through one of the following methods: (i) sales to or pursuant to programs sponsored by the Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation and the Government National Mortgage Association, or (ii) sales to private investors. The Company may have continuing involvement in mortgage loans sold by retaining servicing rights and servicing obligations.

The total servicing portfolio consists of loans associated with capitalized mortgage servicing rights ("MSRs") and loans held for sale. In accordance with guidance on servicing assets and liabilities, the Company utilizes the amortization method for the subsequent measurement of its MSRs. The total servicing portfolio was \$3.0 billion and \$2.0 billion as of September 30, 2016 and December 31, 2015, respectively. MSRs recorded in the Company's consolidated balance sheets are related to the capitalized servicing portfolio and are created through the sale of originated residential

mortgage loans. Amounts related to capitalized MSR's are recorded in the gain (loss) on sale of residential mortgage loans line item in the Company's statement of operations. Amounts related to temporary impairment adjustments are recorded in fee income in the Company's statement of operations.

For the three and nine months ended September 30, 2016, the Company recognized \$1.5 million and \$3.8 million of amortization expense related to MSR's, respectively. For the three and nine months ended September 30, 2015, the Company recognized \$1.3 million and \$3.1 million, respectively. The Company expects to recognize amortization related to its MSR's

portfolio in the amount of \$1.6 million for the three months ending December 31, 2016, \$5.5 million for the year ending December 31, 2017, \$4.4 million for the year ending December 31, 2018, \$3.5 million for the year ending December 31, 2019, and \$2.9 million for the year ending December 31, 2020. The weighted average amortization period was 5.1 years and 6.7 years at September 30, 2016 and December 31, 2015, respectively.

The Company also records MSR's at fair value on a non-recurring basis. MSR's are recorded at fair value at inception and at the end of each reporting period if the fair value is less than unamortized cost. The Company uses a discounted cash flow approach to estimate the fair value of MSR's utilizing the valuation services of an independent third party. The key assumptions used in the estimation of the fair value of MSR's include prepayment speeds, discount rates, default rates, cost to service, contractual servicing fees and escrow earnings. During the three months ended September 30, 2016 the Company recorded temporary impairment of \$800,000 increasing the impairment for the nine months ended September 30, 2016 to \$5.6 million. The fair value of MSR's was \$25.3 million and \$21.3 million at September 30, 2016 and December 31, 2015, respectively.

The activity in the loan servicing portfolio associated with capitalized servicing rights consisted of the following (in thousands):

	September 30, 2016	December 31, 2015
Balance, beginning of period	\$ 1,998,273	\$ 894,767
Additions	1,288,392	1,236,145
Payoffs, sales and curtailments	(294,899)	(132,639)
Balance, end of period	\$ 2,991,766	\$ 1,998,273

The value of MSR's is driven by the net positive, or in some cases net negative, cash flows associated with servicing activities. These cash flows include contractually specified servicing fees, late fees and other ancillary servicing revenue and were recorded within fee income as follows (in thousands):

	For the Three Months Ended September 30, 2016		For the Nine Months Ended September 30, 2015	
Servicing fees from capitalized portfolio	\$1,794	\$1,071	\$4,786	\$2,533

Other ancillary servicing revenue	\$12	\$2	\$24	\$9

- (6) The value of collateral related to residential mortgage financing agreements is the appraised value of the collateral underlying the residential mortgage loans subject to repurchase as of September 30, 2016 and December 31, 2015.
- (7) Amounts also include accrued interest expense of \$0 and \$40,000 related to CMBS short term repurchase facilities as of September 30, 2016 and December 31, 2015.
- (8) The Company sold its interest in Northport TRS, LLC and the Senior Secured Revolving Credit Agreement was assumed by the purchaser. See Note 4 and Note 7 for further details.

The Company obtained three waivers of certain covenants for its CRE repurchase facilities and Wells Fargo Bank, NA ("Wells Fargo") CMBS repurchase facility as of September 30, 2016. The Company is in compliance with all other covenants in the respective agreements as of September 30, 2016.

Securitizations

The following table sets forth certain information with respect to the Company's consolidated securitizations:

Securitization	Closing Date	Maturity Date	End of Designated Principal Reinvestment Period (1)	Total Note Paydowns as of September 30, 2016 (in millions)
RCC CRE Notes 2013	December 2013	December 2028	N/A	\$ 244.5
RCC 2014-CRE2	July 2014	April 2032	July 2016	\$ 97.4
RCC 2015-CRE3	February 2015	March 2032	February 2017	\$ 76.0
RCC 2015-CRE4	August 2015	August 2032	August 2017	\$ 47.7

The designated principal reinvestment period is the period where principal payments received by each respective (1) securitization may be designated by the Company to purchase funding participations of existing collateral originally underwritten at the close of each securitization, which was funded outside of the deal structure.

The investments held by the Company's securitizations collateralize the securitization's borrowings and, as a result, are not available to the Company, its creditors, or stockholders. All senior notes retained at closing or subsequently repurchased by the Company as of September 30, 2016 eliminate in consolidation.

On January 1, 2016, the Company adopted the amendments to the consolidation guidance (see Note 2). As a result of its evaluation, the Company deconsolidated RREF CDO 2006-1, RREF CDO 2007-1 and Apidos Cinco CDO.

CRE - Term Repurchase Facilities

In February 2012, RCC Real Estate's wholly-owned subsidiary, RCC Real Estate SPE 4 LLC ("SPE 4"), entered into a master repurchase and securities agreement (the "2012 Facility") with Wells Fargo to finance the origination of commercial real estate loans. In July 2016, in exchange for applicable structuring and extension fees, the Company entered into a fifth amendment of the 2012 Facility which extended the current term to July 2018 with three additional one year extension options exercisable at the Company's option.

Residential Investments – Term Repurchase Facility

In June 2014, the Company's wholly-owned subsidiaries, RCC Resi Portfolio, RCC Resi TRS, and RCC Resi Depositor (the "Sellers") entered into a master repurchase and securities contract (the "2014 Facility") with Wells Fargo. Under the 2014 Facility, from time to time, the parties may enter into transactions in which the Sellers transfer to Wells Fargo all of their right, title and interest to certain residential mortgage backed securities and other assets against the transfer of funds by Wells Fargo to the Sellers, with a simultaneous agreement by Wells Fargo to transfer back to the Sellers such assets at a date certain or on demand, against the transfer of funds from the Sellers to Wells Fargo. In July 2016, the Company elected to terminate the 2014 Facility.

Residential Mortgage Financing Agreements

In February 2011, PCM entered into a master repurchase agreement (the "New Century Facility") with New Century Bank d/b/a Customer's Bank ("New Century") to finance the acquisition of residential mortgage loans. In August 2016, PCM entered into a tenth amendment of the New Century Facility which extended the facility through December 2016 and reduced the maximum borrowing amount from \$65.0 million to \$50.0 million through October 2016 then to \$35.0 million through November 2016 and finally to \$25.0 million through December 2016. The New Century Facility's tenth amendment increases the interest margins following the October 2016 maximum amount reduction. New Century's compliance with purchase requests will no longer be required effective November 2016. No other material changes were made to the New Century Facility's terms.

In July 2014, PCM entered into a master repurchase agreement (the "Wells Fargo Facility") with Wells Fargo to finance the acquisition of residential mortgage loans. In May 2016, PCM amended its agreement with Wells Fargo to increase the maximum of the amount of the Wells Fargo Facility from \$100.0 million to \$115.0 million for the period from May 2016 to June 2016. In June 2016, PCM amended its agreement with Wells Fargo to increase the maximum of the amount of the Wells Fargo Facility from \$115.0 million to \$150.0 million. In August 2016, PCM entered into a seventh amendment of the Wells Fargo Facility to extend the facility to November 2016. No other material changes were made to the Wells Fargo Facility's terms.

Contractual maturity dates of the Company's borrowings by category and year are presented in the table below (in thousands):

On or after July 30, 2024, the Company may, at its option, redeem its Series C preferred stock, in whole or part, at any time and from time to time, for cash at \$25.00 per share, plus accrued and unpaid dividends, if any, to the redemption date.

Under a dividend reinvestment plan authorized by the board of directors on March 21, 2013, the Company is authorized to issue up to 5,000,000 shares of common stock. During the three and nine months ended September 30, 2016, the Company sold approximately 3,000 and 9,000 shares of common stock through this program, resulting in proceeds of approximately \$40,000 and \$110,000, respectively.

Under a share repurchase plan authorized by the board of directors on August 3, 2015, the Company is authorized to repurchase up to \$50.0 million of its outstanding equity and debt securities. During the nine months ended September 30, 2016, the Company repurchased \$9.2 million of its common stock, representing approximately 800,000 shares. Since the inception of the program through September 30, 2016, the Company has repurchased \$35.2 million of its common stock, representing approximately 2.8 million shares or 8.3% of the outstanding balance. During the nine months ended September 30, 2016, the Company repurchased \$3.1 million of its outstanding Series B preferred stock, representing approximately 196,000 shares or 3.4% of the initial outstanding balance. In March 2016, the Company's board of directors approved a new securities repurchase program for up to \$50.0 million of its outstanding securities, which replaced the August 2015 repurchase plan.

In connection with a grant of restricted common stock made on September 24, 2014, the Company agreed to issue up to 17,682 shares of common stock if certain loan origination performance thresholds were achieved by personnel from the Company's loan origination team. The performance criteria were measured at the end of two annual measurement periods which began April 1, 2014. The agreement also provided dividend equivalent rights pursuant to which the dividends that would have been paid on the shares had they been issued on the date of grant were paid at the end of each annual measurement period if the performance criteria were met. If the performance criteria were not met, the accrued dividends would be forfeited. As a consequence, the Company did not record the dividend equivalent rights until earned. On March 31, 2016, the final measurement period ended and 8,840 shares were earned. Approximately \$42,000 of accrued dividend equivalent rights were paid in April 2016. These shares will vest over the subsequent 12 months at a rate of one-fourth per quarter.

The following table summarizes the status of the Company's vested stock options as of September 30, 2016:

(1) Non-employees are employees of Resource America.

(2) Amounts include \$896,000 of equity compensation expense, for the three and nine months ended September 30, 2016, associated with the accelerated stock vesting of former executives of the Company.

Under the Company's Management Agreement, incentive compensation is paid quarterly. Up to 75% of the incentive compensation is paid in cash and at least 25% is paid in the form of an award of common stock. There were no incentive fees paid to the Manager for the three and nine months ended September 30, 2016 and 2015.

Apart from incentive compensation payable under the Management Agreement, the Company has established no formal criteria for the issuance of equity awards as of September 30, 2016. All awards are discretionary in nature and subject to approval by the compensation committee of the Company's board of directors.

On October 31, 2013, the Company, through its TRS, RCC Residential, completed a business combination whereby it acquired the assets of PCM, an Atlanta based company that originates and services residential mortgage loans, for approximately \$7.6 million in cash. As part of this transaction, a key employee of PCM was granted approximately \$800,000 of the Company's restricted stock. In March 2016, this key employee ended his service period and all remaining amortization expense on unvested stock in the amount of \$555,000 was accelerated. Any grants for employees of PCM are accounted for as compensation and amortized to equity compensation expense over the vesting period. Dividends declared on the stock while unvested are recorded as a general and administrative expense. Dividends declared after the stock vests are recorded as a distribution. For the three and nine months ended September 30, 2016, \$63,000 and \$900,000 of amortization of the stock grants was recorded to equity compensation expense, respectively. For the three and nine months ended September 30, 2015, \$177,000 and \$528,000 of amortization of the stock grants was recorded to equity compensation expense, respectively. For the three and nine months ended September 30, 2016, \$38,000 and \$115,000 of expense related to dividends on unvested shares was recorded to general and administrative expense on the Company's consolidated statements of operations, respectively. For the three and nine months ended September 30, 2015, \$50,000 and \$136,000 of expense related to dividends on unvested shares was recorded to general and administrative expense on the Company's consolidated statements of operations, respectively.

NOTE 15 - EARNINGS PER SHARE

On August 3, 2015, the Company's board of directors approved a one-for-four reverse stock split of its outstanding common stock which took effect after the close of business on August 31, 2015. Outstanding share and per-share amounts disclosed as of September 30, 2016 and for all other comparative periods provided have been retroactively adjusted to reflect the effects of the stock split.

The following table presents a reconciliation of basic and diluted earnings per share for the periods presented as follows (in thousands, except share and per share amounts):

NOTE 17 - RELATED PARTY TRANSACTIONS

Relationship with Resource America and Certain of its Subsidiaries

Relationship with Resource America. On September 19, 2013, the audit committee of the board of directors of Resource America concluded that Resource America should consolidate the financial statements of the Company, which was previously treated as an unconsolidated VIE. Resource America's audit committee reached this conclusion after consultations with the Office of the Chief Accountant of the Securities and Exchange Commission (the "Commission") following comments received from the staff of the Division of Corporation Finance of the Commission and the audit committee's discussion with the Company's management and its independent registered public accounting firm. Resource America's audit committee noted that consolidation of the Company was not expected to materially affect Resource America's previously reported net income attributable to common shareholders. In December 2015, Resource America elected to early adopt consolidation guidance issued by the FASB in February 2015 (see Note 2) and as a result was required to reevaluate whether or not the Company should be consolidated into Resource America's financial statements. It was determined that the Company is no longer a VIE and Resource America will no longer consolidate the Company's financial statements. On September 8, 2016, Resource America was acquired by C-III, a leading commercial real estate services company engaged in a broad range of activities, including primary and special loan servicing, loan origination, fund management, CDO management, principal investment, investment sales and multifamily property management. As part of the transaction, C-III took over control of the Company's Manager with respect to the management agreement (described below) from Resource America and

became beneficial owner of 715,396 shares of the Company's common equity (2.3% of the Company's outstanding shares) held by Resource America as of September 30, 2016. On May 22, 2016, Resource America entered into a letter agreement with the Company pursuant to which the Company irrevocably waived its right to terminate the management agreement as a result of a "Change of Control" (as defined in the management agreement) resulting from the merger. At the close of the transaction on September 8, 2016, Resource America paid a \$1.5 million fee to the Company for the waiver which was recorded in other income (expense) on the consolidated statements of operations. The Company is managed by the Manager, which is a wholly-owned subsidiary of Resource America, pursuant to a management agreement that provides for both base and incentive management fees. For the three and nine months ended September 30, 2016 the Manager earned base management fees of approximately \$2.9 million and \$9.8 million, respectively. For

the three and nine months ended September 30, 2015, the Manager earned base management fees of approximately \$3.1 million and \$9.8 million, respectively. No incentive management fees were earned for the three and nine months ended September 30, 2016 or 2015. The Company also reimburses the Manager and Resource America for expenses, including the expenses of employees of Resource America who perform legal, accounting, due diligence and other services that outside professionals or consultants would otherwise perform, and for the wages, salaries and benefits of several Resource America personnel dedicated to the Company's operations. The Company also reimburses Resource America for additional costs incurred related to the Company's life care business, Long Term Care Conversion Funding, established for the purpose of originating and acquiring life settlement contracts. The initial agreement, authorized in December 2012, provided for an annual fee of \$550,000, with a two-year term. In March 2015, the agreement was amended to extend the term for an additional two years terminating in December 2016. This fee is paid quarterly. For the three and nine months ended September 30, 2016 the Company paid the Manager \$1.4 million and \$4.0 million, respectively, as expense reimbursements. For the three and nine months ended September 30, 2015 the Company paid the Manager \$1.3 million and \$4.0 million, respectively, as expense reimbursements.

On November 24, 2010, the Company entered into an Investment Management Agreement with Resource Capital Markets, Inc. ("RCM"), a wholly-owned subsidiary of Resource America. The initial agreement provided that: (a) RCM may invest up to \$5.0 million of the Company's funds, with the investable amount being adjusted by portfolio gains (losses) and collections, and offset by expenses, taxes and realized management fees, and (b) RCM can earn a management fee in any year that the net profits earned exceed a preferred return. On June 17, 2011, the Company entered into a revised Investment Management Agreement with RCM which provided an additional \$8.0 million of the Company's funds. The management fee is 20% of the amount by which the net profits exceed the preferred return. During the three and nine months ended September 30, 2016 and 2015, RCM earned no management fees. The portfolio began a partial liquidation during the year ended December 31, 2013 that has resulted in the outstanding portfolio balance being significantly decreased. The Company holds \$3.7 million in fair market value of trading securities as of September 30, 2016, no change from \$3.7 million at fair market value as of December 31, 2015. The Company also reimburses RCM for expenses paid on the Company's behalf. For the three and nine months ended September 30, 2016, the Company paid RCM \$1,000 and \$9,000, respectively, as expense reimbursements. For the three and nine months ended September 30, 2015 the Company paid RCM \$21,000 and \$118,000, respectively, as expense reimbursements.

At September 30, 2016, the Company was indebted to the Manager for \$1.5 million, comprised of base management fees of \$948,000 and expense reimbursements of \$600,000. At December 31, 2015, the Company was indebted to the Manager for \$2.5 million, comprised of base management fees of \$978,000 and expense reimbursements of \$1.6 million. At September 30, 2016, the Company was indebted to RCM under the Company's Investment Management Agreement for \$77,000, comprised entirely of expense reimbursements. At December 31, 2015, the Company was indebted to RCM under the Company's Investment Management Agreement for \$152,000, comprised entirely of expense reimbursements. The Company's base management fee payable as well as expense reimbursements payable are recorded in accounts payable and other liabilities on the consolidated balance sheets.

During the year ended December 31, 2013, the Company, through one of its subsidiaries, Northport TRS, LLC, began originating middle-market loans. Resource America was paid origination fees in connection with the Company's middle-market lending operations, which capped out at 2% of the loan balance for any loan originated. The Company was indebted to RCM for \$0 and \$93,000 as of September 30, 2016 and December 31, 2015, respectively, for the middle-market operations. As a result of its sale of Northport TRS, LLC, the Company has sold substantially all of its direct origination middle market loans and one syndicated loan, with an aggregate par balance of \$257.3 million.

On November 7, 2013, the Company, through a wholly-owned subsidiary, purchased all of the membership interests in Elevation Home Loans, LLC, a start-up residential mortgage company, from a person who subsequently became an employee of Resource America for \$830,000, paid in the form of 34,165 shares of restricted Company common stock. The restricted stock vests in full on November 7, 2016, and includes dividend equivalent rights. Elevation Home Loans, LLC was liquidated in 2016.

In May 2016, the Company made an €12.5 million investment in Harvest CLO XV, a European CLO with a total par value of €413.0 million with an unrelated third-party collateral manager. In connection with this transaction, the Company paid a \$2.3 million structuring and placement fee to Resource America.

As of September 30, 2016, the Company retained equity in eight securitizations, which were structured for the Company by the Manager. Under the Management Agreement, the Manager was not separately compensated by the Company for executing these transactions and is not separately compensated for managing the securitizations' entities and their assets. The Company has liquidated two of these securitizations, one in October 2014 and another in June 2015. On January 1, 2016, the Company adopted new consolidation guidance on variable interest entities and, as a result, two of the Company's remaining securitizations were deconsolidated.

Relationship with LEAF Commercial Capital. LCC originated and managed equipment leases and notes on behalf of the Company. On March 5, 2010, the Company entered into agreements with Lease Equity Appreciation Fund II, L.P. ("LEAF II") (an equipment leasing partnership sponsored by LEAF Financial and of which a LEAF Financial subsidiary is the general partner), pursuant to which the Company provided and funded an \$8.0 million credit facility to LEAF II. The credit facility initially had a one year term with interest at 12% per year, payable quarterly, and was secured by all the assets of LEAF II, including its entire ownership interest in LEAF II Receivables Funding. The Company received a 1% origination fee in connection with establishing the facility. The facility originally matured on March 3, 2011 and was extended until September 3, 2011 with a 1% extension fee paid on the outstanding loan balance. On June 3, 2011, the Company entered into an amendment to extend the maturity to February 15, 2012 and to decrease the interest rate from 12% to 10% per annum resulting in a troubled-debt restructuring under current accounting guidance. On February 15, 2012, the credit facility was further amended to extend the maturity to February 15, 2013 with a 1% extension fee accrued and added to the amount outstanding. On January 11, 2013, the Company entered into another amendment to extend the maturity to February 15, 2014 with an additional 1% extension fee accrued and added to the amount outstanding. On December 17, 2013, the Company entered into another amendment to extend the maturity to February 15, 2015. At the end of 2014, the Company recorded a provision for loan loss on this loan of \$1.3 million before extinguishing the loan and bringing direct financing leases in the amount of \$2.1 million on the Company's books in lieu of the loan receivable. There was no provision taken during the three and nine months ended September 30, 2016. During the three and nine months ended September 30, 2015, the Company recorded a partial recovery of the previously taken provision in the amount \$0 and \$216,000, respectively. As of September 30, 2016, the Company held \$571,000 of direct financing leases, net of reserves.

On November 16, 2011, the Company, together with LEAF Financial and LCC, entered into the SPA with Eos (see Note 3). The Company's resulting interest is accounted for under the equity method. For the three and nine months ended September 30, 2016 the Company recorded income of \$415,000 and \$2.8 million, respectively, which was recorded in equity in earnings of unconsolidated subsidiaries on the consolidated statements of operations. For the three and nine months ended September 30, 2015 the Company recorded income of \$961,000 and \$1.4 million, respectively, which was recorded in equity in earnings of unconsolidated subsidiaries on the consolidated statements of operations. The Company's investment in LCC was \$44.8 million and \$42.0 million as of September 30, 2016 and December 31, 2015, respectively.

Relationship with CVC Credit Partners. On April 17, 2012, Apidos Capital Management ("ACM"), a former subsidiary of Resource America, was sold to CVC Credit Partners, L.P. ("CVC Credit Partners"), a joint venture entity in which Resource America owns a 24% interest. CVC Credit Partners manages internally and externally originated bank loan assets on the Company's behalf. Also, on February 24, 2011, a subsidiary of the Company purchased 100% of the ownership interests in Churchill Pacific Asset Management LLC ("CPAM") from Churchill Financial Holdings LLC for \$22.5 million. CPAM subsequently changed its name to RCAM. Through RCAM, the Company was initially entitled to collect senior, subordinated and incentive fees related to five CLOs holding approximately \$1.9 billion in assets managed by RCAM. RCAM is assisted by CVC Credit Partners in managing these CLOs. CVC Credit Partners is entitled to 10% of all subordinated fees and 50% of the incentive fees received by RCAM. For the three

and nine months ended September 30, 2016 CVC Credit Partners earned subordinated and incentive fees of \$254,000 and \$561,000, respectively. For the three and nine months ended September 30, 2015 CVC Credit Partners earned subordinated and incentive fees of \$173,000 and \$631,000, respectively. In October 2012, the Company purchased 66.6% of the preferred equity in one of the RCAM CLOs. In May 2013, the Company purchased additional equity in this CLO, increasing its ownership percentage to 68.3%. In 2013 two of the five CLOs were called and the notes were paid down in full. In January 2016 another RCAM-managed CLO was called and \$2.4 million of impairment, on a pre-tax basis, was recorded in depreciation and amortization on the Company's consolidated statements of operations on the related intangible asset as of December 31, 2015. In September 2016, another RCAM-managed CLO was called and \$1.5 million of impairment, on a pre-tax basis, was recorded in impairment losses on the Company's consolidated statements of operations on the related intangible asset during the three months ended September, 30 2016. In September 2016, the Company recorded impairment on the remaining CLO of \$2.2 million, on a pre-tax basis, on the related intangible asset for its anticipated redemption in early 2017.

In May, June and July 2013, the Company invested a total of \$15.0 million in CVC Global Credit Opportunities Fund, L.P. which generally invests in assets through the Master Fund. The fund pays the investment manager a quarterly management fee in advance calculated at the rate of 1.5% annually based on the balance of each limited partner's capital account. The Company's management fee was waived upon entering the agreement because the Company is a related party of CVC Credit Partners. For the three and nine months ended September 30, 2015, the Company recorded a loss of \$628,000 and earnings of \$293,000, which was recorded in equity in earnings of unconsolidated subsidiaries on the consolidated statements of operations. In March 2015, the Company elected to withdraw \$5.0 million from the fund. In July 2015, a \$625,000 withdrawal was requested and received. In October 2015, another \$4.0 million withdrawal was requested and received. In December 2015, the Company elected to withdraw the remaining \$8.6 million from the fund. The Company retained no investment in the fund as of December 31, 2015. Relationship with Resource Real Estate. Resource Real Estate, a subsidiary of Resource America, originates, finances and manages the Company's commercial real estate loan portfolio. The Company reimburses Resource Real Estate for loan origination costs associated with all loans originated. The Company had a receivable in the amount of \$0 and \$2,500 due from Resource Real Estate for loan origination costs in connection with the Company's commercial real estate loan portfolio as of September 30, 2016 and December 31, 2015, respectively.

On December 1, 2009, the Company purchased a membership interest in RRE VIP Borrower, LLC (an unconsolidated VIE that held an interest in a real estate joint venture) from Resource America for \$2.1 million, its book value. RREM was asset manager of the venture and received a monthly asset management fee equal to 1.0% of the combined investment calculated as of the last calendar day of the month. There were no fees incurred for the three and nine months ended September 30, 2016 and 2015, as the last property associated with the joint venture was sold in July 2014. For the three and nine months ended September 30, 2016 the Company recorded income of \$0 and \$35,000, respectively, which was recorded in equity in earnings of unconsolidated subsidiaries on the consolidated statements of operations. For the three and nine months ended September 30, 2015 the Company recorded income of \$0 and \$46,000, respectively, which was recorded in equity in earnings of unconsolidated subsidiaries on the consolidated statements of operations. The income recorded in 2016 and 2015 was related to insurance premium refunds and the liquidation of bank accounts with respect to the underlying sold properties of the portfolio.

On January 15, 2010, the Company loaned \$2.0 million to Resource Capital Partners, Inc. ("RCP"), a wholly-owned subsidiary of Resource America, so that it could acquire a 5.0% limited partnership interest in Resource Real Estate Opportunity Fund, L.P. ("RRE Opportunity Fund"). RCP is the general partner of the RRE Opportunity Fund. The loan was secured by RCP's partnership interest in the RRE Opportunity Fund. The promissory note bore interest at a fixed rate of 8.0% per annum on the unpaid principal balance. In the event of default, interest accrued at a rate of 5.0% in excess of the fixed rate. Interest was payable quarterly. Mandatory principal payments were required to the extent distributable cash or other proceeds from RRE Opportunity Fund represent a return of RCP's capital. The loan had an original maturity date of January 14, 2015, with two one-year extensions. RCP exercised the first option, extending the maturity to January 14, 2016. The loan was paid in full in April 2015.

The Company has closed the following four real estate securitization transactions, which provide financing for commercial real estate loans: RCC CRE Notes 2013, a \$307.8 million securitization in December 2013; RCC 2014-CRE2, a \$353.9 million securitization on July 30, 2014; RCC 2015-CRE3, a \$346.2 million securitization on February 24, 2015; and RCC 2015-CRE4, a \$312.9 million securitization on August 18, 2015. Resource Real Estate serves as special servicer for each transaction. With respect to each specialty service mortgage loan, Resource Real Estate receives an amount equal to the product of (a) the special servicing fee rate, 0.25% per annum, and (b) the outstanding principal balance of such specialty service mortgage loan. The servicing fee is payable monthly, on an asset-by-asset basis. The Company utilizes the brokerage services of Resource Securities, Inc. ("Resource Securities"), a

wholly-owned broker-dealer subsidiary of Resource America, on a limited basis to conduct some of its asset trades. The Company paid Resource Securities placement agent fees in connection with each transaction as follows: \$205,000, \$175,000, \$100,000, and \$85,000, respectively.

In July 2014, the Company formed RCM Global Manager to invest in RCM Global, an entity formed to hold a portfolio of structured product securities. The Company contributed \$15.0 million for a 63.8% membership interest in RCM Global. A five member board manages RCM Global, and all actions, including purchases and sales, must be approved by no less than three of the five members of the board. The portion of RCM Global that the Company does not own is presented as non-controlling interest as of September 30, 2015 and for the periods presented for the three and nine months ended September 30, 2015 in the Company's consolidated financial statement. All intercompany accounts and transactions have been eliminated in consolidation. In March and June 2015, the Company requested and received a proportional, in-kind distribution in certain securities held by RCM Global. The distribution of and subsequent sale of those securities by the Company through its subsidiary, RCC Residential,

resulted in the realization of \$5.0 million of net gain for the year ended December 31, 2015. During the nine months ended September 30, 2016 RCC Residential received a cash distribution in the amount of \$620,000. The Company's ownership interest was 28.6% as of September 30, 2016. On January 1, 2016, the Company adopted new consolidation guidance on variable interest entities and, as a result, the Company deconsolidated RCM Global and now accounts for this investment as an investment in unconsolidated entities on the consolidated balance sheet (see Note 2). For the three and nine months ended September 30, 2016, the Company recorded losses of \$560,000 and \$160,000 which was recorded in equity in earnings of unconsolidated subsidiaries on the consolidated statements of operations, respectively.

In September 2014, the Company contributed \$17.5 million to Pelium Capital for an initial ownership interest of 80.4%. Pelium Capital is a specialized credit opportunity fund managed by Resource America. The Company funded its final commitment of \$2.5 million, as of February 1, 2015. The Company will receive 10% of the carried interest in the partnership for the first five years, and can increase its interest to 20% if the Company's capital contributions aggregate \$40.0 million. Resource America contributed securities valued at \$2.8 million to the formation of Pelium Capital. The portion of the fund that the Company does not own is presented as non-controlling interests as of the dates and for the periods presented in the Company's consolidated financial statements. Pelium Capital was determined not to be a VIE as there was sufficient equity at risk, the Company does not have disproportionate voting rights and Pelium Capital's partners have all of the following characteristics: (1) the power to direct the activities of Pelium; (2) the obligation to absorb losses; and (3) the right to receive residual returns. However, Pelium Capital was consolidated as a result of the Company's majority ownership and the Company's unilateral kick-out rights. The non-controlling interests in Pelium Capital are owned by Resource America and outside investors. All intercompany accounts and transactions were eliminated in consolidation as of December 31, 2015. The Company's ownership interest in Pelium Capital was 80.2% as of September 30, 2016. On January 1, 2016, the Company adopted new consolidation guidance on variable interest entities and, as a result, the Company deconsolidated Pelium Capital and now accounts for this investment as an investment in unconsolidated entities on the consolidated balance sheet (see Note 2). For the three and nine months ended September 30, 2016, the Company recorded earnings of \$1.0 million and \$2.8 million which was recorded in equity in earnings of unconsolidated subsidiaries on the consolidated statements of operations, respectively.

On April 10, 2015, the Company entered into two first mortgage bridge loans in the amount of \$2.5 million and \$3.3 million with two funds sponsored by Resource America, Resource Real Estate Investors LP and Resource Real Estate Investors

II, LP. Each loan carried an interest rate of LIBOR plus 5.75% with a LIBOR floor of 0.25%. The loans had a maturity date of May 5, 2016, with two consecutive one-year options to extend upon the first maturity date. The loan in the amount of \$2.5 million was repaid in full with interest on April 29, 2015. The second loan in the amount of \$3.3 million was repaid in full with interest on July 31, 2015.

On June 24, 2015, the Company committed to invest up to \$50.0 million in Pearlmark Mezz, a Delaware limited partnership. The contractual fund manager of the fund is Pearlmark Real Estate LLC ("Pearlmark"), a Delaware limited liability company that is 50% owned by Resource America. The Company will pay Pearlmark Mezz management fees of 1.0% on the unfunded committed capital and 1.5% on the invested capital. The Company is entitled to a management fee rebate of 25% for the first year of the fund. As of September 30, 2016, the Company is indebted for \$268,000 for management fees, net of the rebate. Resource America has agreed that it will credit any such fees paid by the Company to Pearlmark against the base management fee that the Company pays to Resource

America. The Company has invested an aggregate of \$17.8 million in capital in Pearlmark Mezz. For the three and nine months ended September 30, 2016, the Company recorded earnings of \$132,000 and \$552,000 which was recorded in equity in earnings of unconsolidated subsidiaries on the consolidated statements of operations. As of September 30, 2016, the Company has an investment balance of \$16.8 million and a 47.7% ownership interest in the fund.

Relationship with Law Firm. Until 1996, Edward E. Cohen, a former director who was the Company's Chairman from its inception until November 2009, was of counsel to Ledgewood, P.C. ("Ledgewood"), a law firm. In addition, one of the Company's former executive officers, Jeffrey F. Brotman, was employed by Ledgewood until 2007. Mr. E. Cohen receives certain debt service payments from Ledgewood related to the termination of his affiliation with Ledgewood and its redemption of his interest in the firm. Mr. Brotman also receives certain debt service payments from Ledgewood related to the termination of his affiliation with the firm. For the three and nine months ended September 30, 2016 the Company paid Ledgewood \$137,000 and \$305,000, respectively, in connection with legal services rendered to the Company. For the three and nine months ended September 30, 2015 the Company paid Ledgewood \$13,000 and \$348,000, respectively, in connection with legal services rendered to the Company. On September 8, 2016, as part of the merger with C-III, Mr. E. Cohen and Mr. Brotman stepped down from their positions in the Company, and, as a result, Ledgewood is no longer considered a related party of the Company.

NOTE 18 - DISTRIBUTIONS

For the quarter ended September 30, 2016, the Company declared and subsequently paid a dividend of \$0.42 per common share.

In order to qualify as a REIT, the Company must currently distribute at least 90% of its taxable income. In addition, the Company must distribute 100% of its taxable income in order not to be subject to corporate federal income taxes on retained income. The Company anticipates it will distribute substantially all of its taxable income to its stockholders. Because taxable income differs from cash flow from operations due to non-cash revenues or expenses (such as provisions for loan and lease losses and depreciation), in certain circumstances, the Company may generate operating cash flow in excess of its distributions or, alternatively, may be required to borrow to make sufficient distribution payments.

The Company's 2016 dividends are determined by the Company's board of directors which also consider the composition of any dividends declared, including the option of paying a portion in cash and the balance in additional common shares.

The following tables present dividends declared (on a per share basis) for the first three quarters of 2016 and each of the quarters in 2015:

NOTE 19 - FAIR VALUE OF FINANCIAL INSTRUMENTS

The following table presents information about the Company's assets and liabilities measured at fair value on a recurring basis and indicates the fair value hierarchy of the valuation techniques utilized by the Company to determine such fair value as follows (in thousands):

The Company's residential mortgage loan portfolio included in loans held for sale is comprised of both agency loans and non-agency jumbo loans. The fair values of the Company's agency loan portfolio are generally classified as Level 2 in the fair value hierarchy, as those values are determined based on quoted market prices for similar assets or upon other observable inputs. The fair values of the Company's jumbo loan portfolio are generally classified as Level 3 in the fair value hierarchy, as those values are based upon the fair value of securities backed by similar mortgage loans, adjusted for certain factors to approximate the fair value of a whole mortgage loan including the value attributable to servicing rights and credit risk. Loans are adjusted for spread to agency mortgage back securities with similar underlying mortgage loans, at rates ranging between 0.5% and 7.3%.

The fair value of interest rate lock commitments ("IRLCs") is estimated as the fair value of the of the underlying mortgage loans to be sold, which is based on quoted mortgage-backed securities ("MBSs") prices, plus the estimated fair value of the mortgage servicing rights, less the price committed to the borrower or mortgage lender and direct origination costs, adjusted for the probability that the mortgage will fund ("pull-through" rate). The estimated

pull-through rate is based on the Company's historical data. IRLCs are included in derivatives on the Company's consolidated balance sheets.

The average pull-through rate used in measuring the fair value of IRLCs as of September 30, 2016 was 83.6% for assets and 90.5% for liabilities. The pull-through percentage is considered a significant unobservable input and is estimated based on changes in pricing and actual borrower behavior using a historical analysis of loan closing data. Generally, a change in interest rates is accompanied by a directionally opposite change in the assumption used for the pull-through percentage, and the impact to fair value of a change in pull-through would be partially offset by the related change in price.

Forwards - residential mortgage loans fix the forward sales price that will be realized upon the sale of mortgage loans into the secondary market. The fair value of forward delivery commitments is primarily based upon the current agency mortgage-backed security market to-be-announced pricing specific to the loan program, delivery coupon and delivery date of the trade. Best effort sales commitments are also executed for certain loans at the time the borrower commitment is made. These best effort sales commitments are valued using the committed price to the counterparty against the current market price of the interest rate lock commitment or mortgage loan held for sale. Forwards are included in derivatives on the Company's consolidated balance sheets.

As part of the origination of a certain middle market loan, the Company received warrants as consideration at the loan's origination. The fair value of the warrants at December 31, 2015 was \$1.1 million which was calculated by performing a Black-Scholes analysis. The significant unobservable inputs were a measure of 50.0% for the annual volatility over the term of the warrants and a market capitalization of \$172.7 million. These warrants were settled in August 2016.

In accordance with guidance on fair value measurements and disclosures, the Company is not required to disclose quantitative information with respect to unobservable inputs contained in fair value measurements that are not developed by the Company. As a consequence, the Company has not disclosed such information associated with fair values obtained for investment securities, trading and investment securities available for sale from third-party pricing sources.

The following table presents additional information about assets that are measured at fair value on a recurring basis for which the Company has utilized Level 3 inputs (in thousands):

The following table summarizes the financial assets and liabilities measured at fair value on a nonrecurring basis and indicates the fair value hierarchy of the valuation techniques utilized by the Company to determine such fair value as follows (in thousands):

	Level 1	Level 2	Level 3	Total
As of September 30, 2016:				
Assets:				
Loans held for sale	\$	—\$2,557	\$4,625	\$7,182

Impaired loans	—	262	129,433	129,695
Total assets at fair value	\$	—\$1,541	\$129,586	\$131,127

(1) See Note 11 for a description of the valuation techniques and key assumption types to the calculation of the fair value of mortgage servicing rights.

Loans held for sale consist of middle market loans identified for sale. The fair value of Level 2 middle market loans held for sale are based on quoted market prices for similar assets or upon other observable inputs. The fair value of Level 3 middle market loans held for sale may be determined using a market or income approach methodology, both of which may require significant judgment or estimation for factors such as EBITDA multiples, market capitalization rates or discount rates, depending on the methodology used. The following unobservable input was used in the determination of fair value with respect to Level 3 middle market loans at September 30, 2016: EBITDA multiples ranged from 3.5x - 4.5x.

Impaired loans consist of CRE loans for which an impairment analysis was conducted during the period. For the Company's CRE loans for which there is no primary market, fair value is measured using a discounted cash flow analysis, appraisal or and other valuation technique; and these loans are classified as nonrecurring Level 3.

For both the three and nine months ended September 30, 2016 there were \$8.1 million of nonrecurring fair value losses for specifically impaired loans. The amounts of nonrecurring fair value losses for specifically impaired loans for the three and nine months ended September 30, 2015 were \$920,000 and \$42.4 million, respectively. The amounts of nonrecurring fair value losses for loans held for sale for the three and nine months ended September 30, 2016 were \$9.6 million and \$21.8 million, respectively. The amounts of nonrecurring fair value losses for loans held for sale for the three and nine months ended September 30, 2015 were \$35,000 and \$841,000, respectively. Fair value was determined using an appraisal as a practical expedient to fair value.

The Company is required to disclose the fair value of financial instruments for which it is practicable to estimate that value. The fair values of the Company's short-term financial instruments such as cash and cash equivalents, restricted cash, principal paydown receivable, interest receivable, distribution payable, accrued interest expense, repurchase agreements and the secured

revolving credit agreement approximate their carrying value on the consolidated balance sheets. The fair values of the Company's investment securities, trading are reported in Note 5. The fair values of the Company's investment securities available-for-sale are reported in Note 6. The fair values of the Company's derivative instruments are reported in Note 20.

The fair value of the Company's Level 2 loans held-for-investment are primarily measured using a third-party pricing service. The fair value of the Company's Level 3 loans held-for-investment are measured by discounting the expected future cash flows using the current interest rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities.

CDO notes are valued using dealer quotes, typically the dealer who underwrote the CDO in which the notes are held. Junior subordinated notes are estimated by discounted cash flows with discount rates of 13.14% and 13.15% and used in the evaluation of RCT I and RCT II.

The fair value of the convertible notes was determined using a discounted cash flow model that discounts the expected future cash flows using current interest rates on similar debts that do not have a conversion option. The 6.0%

Convertible Senior Notes are discounted at a rate of 7.00% and the 8.0% Convertible Senior Notes are discounted at a rate of 8.60%. The fair value of the CRE portfolio was determined using a discounted cash flow model that discounts the expected future cash flows at current rates at which similar loans would be made to borrowers with similar credit ratings and with the same remaining maturities. Discount rates used range between 15%-25%.

Repurchase agreements and the senior secured revolving credit agreement are variable rate debt instruments indexed to LIBOR that reset periodically and, as a result, their carrying value approximates their fair value.

The fair values of the Company's remaining financial instruments that are not reported at fair value on the consolidated balance sheets are reported in the following table (in thousands):

NOTE 20 - MARKET RISK AND DERIVATIVE INSTRUMENTS

The Company is directly and indirectly affected by changes in certain market conditions. These changes in market conditions may adversely impact the Company's financial performance and are referred to as "market risks." When deemed appropriate, the Company uses derivatives as a risk management tool to mitigate the potential impact of certain market risks. The primary market risks managed by the Company through the use of derivative instruments are interest rate risk and foreign currency exchange rate risk.

The Company may hold various derivatives in the ordinary course of business, including warrants, interest rate swaps, forward contracts, options and IRLCs. Warrants are securities that give the holder the right, but not the obligation, to purchase securities from an issuer at a specific price and within a specified time period. All warrants held by the Company had been settled as of September 30, 2016. Options are contracts sold by one party to another that give the buyer the right, but not the obligation, to buy or sell a financial asset at an agreed-upon price during a certain period of time or on a specific date. Interest rate swap agreements are contracts between two parties to exchange cash flows based on specified underlying notional amounts, assets and/or indices. Forward contracts represent future commitments to either purchase or to deliver loans (residential mortgage lending), securities (TBA securities) or a quantity of a currency (foreign currency hedging) at a predetermined future date, at a predetermined rate or price and are used to manage interest rate risk on loan commitments and mortgage loans held for sale as well as currency risk with respect to the Company's long positions in foreign currency-denominated investment securities. Rate lock commitments represent commitments to fund loans at a specific rate and by a specified time and are used to mitigate risk of changes in interest rate in the Company's residential mortgage loan portfolio.

A significant market risk to the Company is interest rate risk. Interest rates are highly sensitive to many factors, including governmental monetary and tax policies, domestic and international economic and political considerations and other factors beyond the Company's control. Changes in the general level of interest rates can affect net interest income, which is the difference between the interest income earned on interest-earning assets and the interest expense incurred in connection with the interest-bearing liabilities, by affecting the spread between the interest-earning assets and interest-bearing liabilities. Changes in the level of interest rates also can affect the value of the Company's interest-earning assets and the Company's ability to realize gains from the sale of these assets. A decline in the value of the Company's interest-earning assets pledged as collateral for borrowings could result in the counterparties demanding additional collateral pledges or liquidation of some of the existing collateral to reduce borrowing levels. The Company seeks to manage the extent to which net income changes as a function of changes in interest rates by matching adjustable-rate assets with variable-rate borrowings. The Company seeks to mitigate the potential impact on net income of periodic and lifetime coupon adjustment restrictions in its investment portfolio by entering into interest rate hedging agreements such as interest rate caps and interest rate swaps.

On January 1, 2016, RREF CDO 2006-1 and RREF CDO 2007-1 were deconsolidated in accordance with new guidance on consolidation of VIEs (see Note 2). The Company deconsolidated six interest rate swap contracts as part of the deconsolidation. The aggregate notional amount of these deconsolidated interest rate swaps was \$99.9 million at January 1, 2016.

During April 2016, the Company requested and canceled its remaining interest rate swap contract through accumulated other comprehensive income (loss), to be amortized through earnings over the life of the remaining debt. As of September 30, 2016, the Company had no interest rate swap contracts outstanding. The Company had master netting agreements with Credit Suisse International and Wells Fargo at September 30, 2016. Regulations promulgated under the Dodd-Frank Act mandate that the Company clear certain new interest rate swap transactions through a central counterparty. Transactions that are centrally cleared result in the Company facing a clearing house, rather than a swap dealer, as counterparty. Central clearing requires the Company to post collateral in the form of initial and

variation margin to satisfy potential future obligations. As of September 30, 2016, there were no centrally cleared interest rate swap contracts. The Company classifies its hedges as cash flow hedges, which are hedges that eliminate the risk of changes in the cash flows of a financial asset or liability. The Company records changes in fair value of derivatives designated and effective as cash flow hedges in other comprehensive income, and records changes in fair value of derivatives designated and ineffective as cash flow hedges in earnings.

At December 31, 2015, the Company had nine interest rate swap contracts outstanding whereby the Company paid an average fixed rate of 5.38% and received a variable rate equal to one-month LIBOR. The aggregate notional amount of these contracts was \$102.8 million at December 31, 2015. The counterparties for the Company's designated interest rate hedge contracts are Credit Suisse International and Wells Fargo with which the Company has master netting agreements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)
SEPTEMBER 30, 2016
(unaudited)

The estimated fair value of the Company's liability related to interest rate swaps was \$0 and \$3.5 million as of September 30, 2016 and December 31, 2015, respectively. The Company had aggregate unrealized losses of \$41,000 and \$3.5 million on the interest rate swap agreements as of September 30, 2016 and December 31, 2015, respectively, which is recorded in accumulated other comprehensive income and a portion is recognized through earnings. The amortization is reflected in interest expense in the Company's consolidated statements of operations.

The Company is also exposed to foreign currency exchange risk, a form of risk that arises from the change in price of one currency against another. Substantially all of the Company's revenues are transacted in U.S. dollars; however, a significant amount of the Company's capital is exposed to other currencies, primarily the Euro and, to a lesser extent, the pound sterling. To address this market risk, the Company generally hedges foreign currency-denominated exposures (typically investments in debt instruments, including forecasted principal and interest payments) with foreign currency forward contracts. The Company classifies these hedges as fair value hedges, which are hedges that mitigate the risk of changes in the fair values of assets, liabilities, and certain types of firm commitments. The Company records changes in fair value of derivatives designated and effective as fair value hedges in earnings offset by corresponding changes in the fair values of the hedged items.

Forward contracts also contain an element of risk in that the counterparties may be unable to meet the terms of such agreements. In the event the parties to deliver commitments are unable to fulfill their obligations, the Company could potentially incur significant additional costs by replacing the positions at then current market rates. The Company manages its risk of exposure by limiting counterparties to those banks and institutions deemed appropriate by management. The Company does not expect any counterparty to default on its obligations and, therefore, the Company does not expect to incur any cost related to counterparty default.

The Company is exposed to interest rate risk on loans held for sale and IRLCs. As market interest rates increase or decrease, the fair value of mortgage loans held for sale and IRLCs will decline or increase accordingly. To offset this interest rate risk, the Company may enter into derivatives such as forward contracts to sell loans. The fair value of these forward sales contracts will change as market interest rates change, and the change in the value of these instruments is expected to largely, though not entirely, offset the change in fair value of loans held for sale and IRLCs. The objective of this activity is to minimize the exposure to losses on IRLCs and loans held for sale due to market interest rate fluctuations. The net effect of derivatives on earnings will depend on risk management activities and a variety of other factors, including market interest rate volatility, the amount of IRLCs that close, the ability to fill the forward contracts before expiration, and the time period required to close and sell loans.

During the warehousing phase of the Company's investments in certain structured vehicles, the Company may enter into total return swaps to finance the Company's exposure to assets that will ultimately be securitized. A total return swap is a swap agreement in which one party makes payments based on a set rate, while the other party makes payments based on the return of an underlying asset. Traditionally, the Company pays either an indexed or fixed interest payment to the warehousing lender and receives the net interest income and realized capital gains of the referenced portfolio of assets, generally loans, to be securitized that are owned and held by the warehousing lender. Upon the close of the warehousing period, the Company's invested equity plus net interest and any capital gains realized during the warehousing period are returned to the Company. Additionally, upon the close of the securitization, the Company may purchase beneficial interests in the securitization at fair value.

(2) Amounts represent amounts pledged as collateral against derivative transactions.

(3) The fair value of securities and/or cash and cash equivalents pledged against the Company's swaps was \$500,000 at December 31, 2015.

The combined fair value of securities and loans pledged against the Company's various term facilities and (4) repurchase agreements was \$942.3 million and \$643.2 million at September 30, 2016 and December 31, 2015, respectively.

In the Company's consolidated balance sheets, all balances associated with repurchase agreement and derivatives transactions are presented on a gross basis.

Certain of the Company's repurchase agreements and derivative transactions are governed by underlying agreements that generally provide for a right of offset in the event of default or in the event of a bankruptcy of either party to the transaction.

NOTE 22 - COMMITMENTS AND CONTINGENCIES

From time to time, the Company may become involved in litigation on various matters, including disputes arising out of loans in the Company's portfolio and agreements to purchase or sell assets. Given the nature of the Company's business activities, the Company considers these matters to be routine and in the ordinary conduct of its business. The resolution of these matters may result in adverse judgments, fines, penalties, injunctions and other relief against the Company as well as monetary payments or other agreements and obligations. Alternately, the Company may engage in settlement discussions on certain matters in order to avoid the additional costs of engaging in litigation.

In September 2015, Daren Levin filed a putative class action in the United States District Court for the Southern District of New York on behalf of all persons who purchased the Company's common stock between March 2, 2015 and August 4, 2015. In November 2015, the Court appointed Douglas Drees as the lead plaintiff in the action, and thereafter entered a stipulation and order directing the lead plaintiff to file an amended complaint. In February 2016, the lead plaintiff filed an amended complaint, alleging that the Company and certain of its officers and directors materially misrepresented certain risks of its commercial loan portfolio and its processes and controls for assessing the quality of its portfolio. Based on these allegations, the amended complaint asserts claims for violation of the securities laws and seeks a variety of relief, including unspecified monetary damages as well as costs and attorneys' fees. In April 2016, the Company filed a motion to dismiss the amended complaint, which the court denied on October 5, 2016; and the discovery process is now expected to commence. The Company believes the amended complaint is without merit and intends to defend itself vigorously.

In December 2015, Josh Reaves filed a shareholder derivative suit in the Supreme Court of New York alleging that the Company's directors and certain officers breached their fiduciary duties by causing the Company to misrepresent certain risks in its commercial loan portfolio, by failing to employ adequate internal and financial controls and by failing to disclose the alleged internal control deficiencies. The complaint purports to seek relief on behalf of the Company for unspecified damages as well as costs and attorneys' fees. The Company believes that the plaintiff, who failed to make a pre-suit demand on the board of directors, lacks standing to assert claims derivatively on the Company's behalf. In April 2016, the parties entered into a stipulation staying this proceeding until such time as the court ruled on the motion to dismiss the Levin action referenced above or certain other triggering events occur. That stay has now been lifted because the motion to dismiss the Levin action was denied.

PCM is a party to various claims and legal proceedings at various times. If PCM believes that a loss arising from any of these matters is probable and can be reasonably estimated, the loss is recorded. Currently, the only litigation involving PCM is related to claims for repurchases or indemnifications on loans that PCM has sold to investors. Such

claims are included in the reserve for mortgage repurchases and indemnifications. The reserve for mortgage repurchases and indemnifications was \$5.2 million and \$3.7 million as of September 30, 2016 and December 31, 2015, respectively.

Loans on one-to-four family residential mortgages originated by PCM are sold to various financial institutions and governmental entities with representations and warranties that are usual and customary for the industry. In the event of a breach of any of the representations and warranties related to a loan sold, PCM may be required to indemnify the investor against future losses, repurchase the mortgage loan or reimburse the investor for actual losses incurred (referred to as “make whole payments”). The maximum exposure to credit loss in the event of an indemnification or loan repurchase would be the unpaid principal balance of the loan along with any premium paid by the investor when the loan was purchased, accrued but unpaid interest and other minor cost reimbursements. This maximum exposure is at least partially mitigated by the value of the collateral underlying the mortgage loan.

On May 13, 2014, ResCap Liquidating Trust (“ResCap”), as successor to Residential Funding Company, LLC (“RFC”), filed an adversary proceeding against PCM in United States Bankruptcy Court of the Southern District of New York. ResCap has sued some 90 sellers of residential mortgage loans for alleged breaches of warranty in various loans sold to RFC. RFC contends that such breaches caused it damages from loan losses and liability to other transferee's of the loans.

As of September 30, 2016, outstanding demands for indemnification, repurchase or make whole payments totaled approximately \$20.5 million, of which a substantial portion related to loans sold to four investors prior to 2011. In October 2016, PCM reached agreements to settle repurchase claims with two of the four investors, including those subject to the litigation initiated by ResCap in May 2014. Pursuant to the settlement agreements, \$2.1 million was fully reserved for at September 30, 2016. These settlement agreements reduce the amount of outstanding demands against PCM for indemnification, repurchase or make whole payments to approximately \$10.0 million.

The most significant remaining make whole demands against PCM are from Lehman Brothers Holding, Inc. (“LBHI”). On February 3, 2016, LBHI filed an adversary proceeding against PCM in United States Bankruptcy Court of the Southern District of New York. LBHI has sued approximately 145 sellers of residential mortgage loans for alleged breaches of warranty in various loans sold to it. LBHI contends that such breaches caused it damages from loan losses and liability to other transferees of the loans. PCM intends to defend the action vigorously.

Unfunded commitments on the Company’s originated CRE loans generally fall into two categories: (1) pre-approved capital improvement projects; and (2) new or additional construction costs subject, in each case, to the borrower meeting specified criteria. Upon completion of the improvements or construction, the Company would receive additional interest income on the advanced amount. Unfunded commitments on the Company's originated middle market loans fall into two categories: (1) revolving credit facility; and (2) unfunded commitments subject to the borrower meeting pre-specified criteria.

Except as previously discussed, the Company is unaware of any contingencies arising from such routine litigation that would require accrual or disclosure in the consolidated financial statements as of September 30, 2016.

NOTE 23 - SEGMENT REPORTING

The Company has five reportable operating segments: Commercial Real Estate Lending, Commercial Finance, Middle Market Lending, Residential Mortgage Lending, and Corporate & Other. The reportable operating segments are business units that offer different products and services. The Commercial Real Estate Lending operating segment includes the Company’s activities and operations related to commercial real estate loans, commercial real estate-related securities, and investments in real estate. The Commercial Finance operating segment includes the Company’s activities and operations related to bank loans, bank loan-related securities, and direct financing leases. The Middle Market Lending operating segment includes the Company’s activities and operations related to the origination and purchase of middle market loans. The Residential Mortgage Lending operating segment includes the Company’s activities and operations related to the origination and servicing of residential mortgage loans and the investment in RMBS. The Corporate & Other segment includes corporate level interest income, interest expense, and general and administrative expense.

The accounting policies of the operating segments are the same as those described in Note 2. The Company accounts for inter-segment sales and transfers as if the sales or transfers were to third parties, that is, at current market prices. Relevant expenses incurred at the Corporate & Other segment are allocated to TRS subsidiaries based on their percentage of adjusted pre-tax net income (loss), which excludes unrealized gains and losses and provisions on loan

and lease losses that are specific to the periods presented.

NOTE 24 - SUBSEQUENT EVENTS

The Company has evaluated subsequent events through the filing of this report and determined that there have not been any events that have occurred that would require adjustments to or disclosures in the consolidated financial statements, except the following:

Subsequent to quarter end, the Company's board of directors approved the framework of a plan to streamline the Company's operations by focusing on CRE lending and exiting underperforming non-CRE businesses and investments. As part of this plan, the Company expects to discontinue operations in its middle market lending segment, its residential mortgage lending segment, and other non-real estate related portfolios. In addition, the Company intends to sell several of its legacy CRE loans and classify them as loans, held for sale as of December 31, 2016.

We are a commercial mortgage real estate investment trust ("REIT") focused on originating, holding and managing commercial real estate ("CRE") debt investments. We also have made commercial finance investments. We are organized and conduct our operations to qualify as a REIT under Subchapter M of the Internal Revenue Code of 1986, as amended. Our objective is to provide our stockholders with total returns over time, including quarterly distributions and capital appreciation, while seeking to manage the risks associated with our investment strategies. We invest in a combination of real estate debt investments and have invested, to a lesser extent, in higher-yielding commercial finance assets. We have financed a substantial portion of our portfolio investments through borrowing strategies seeking to match the maturities and repricing dates of our financings with the maturities and repricing dates of those investments, and have sought to mitigate interest rate risk through derivative instruments. We are externally managed by Resource Capital Manager, Inc., or the Manager, an indirect wholly-owned subsidiary of Resource America, Inc., (formerly traded on NASDAQ: REXI) or Resource America, a specialized asset management company that uses industry-specific expertise to evaluate, originate, service and manage investment opportunities through its CRE, financial fund management and commercial finance operating segments. On September 8, 2016, Resource America was acquired by C-III Capital Partners LLC ("C-III"), a leading CRE services company engaged in a broad range of activities, including primary and special loan servicing, loan origination, fund management, CDO management, principal investment, investment sales and multifamily property management. As part of the transaction, C-III took over control of the manager and became the beneficial owner of 715,396 shares of our common equity (2.3% of our outstanding shares) held by Resource America. As part of the acquisition of Resource America by C-III, we were paid a \$1.5 million consent fee by Resource America for having waived our right to terminate the Management Agreement as a result of the change of control of our Manager. The Manager now draws upon C-III and Resource America's management teams and their collective investment experience to provide its services. C-III has received approval from our board of directors to execute a strategic plan (the "Plan") to focus our strategy on CRE debt investments. The Plan contemplates disposing of certain legacy CRE debt instruments, exiting underperforming non-CRE businesses and investments, and establishing a dividend policy based on sustainable earnings. We expect to implement the Plan over the next 12 to 18 months.

During the quarter ended September 30, 2016, we recognized a net loss of \$51.6 million, as our credit review process resulted in several significant write-downs and adjustments during the period. We recorded additional provisions for loan losses of \$8.1 million on two legacy real estate loans. A middle market loan held for sale, which was previously credit impaired, required a \$9.6 million loss to recognize adjusted fair value. Securities available-for-sale had other-than-temporary impairments of \$25.3 million. Most of these impairments came from our legacy real estate portfolio, specifically in the RREF CDP 2007-01 securitization as the underlying collateral suffered impairments during the period. Upon making the decision to dispose of the non-CRE businesses, which are typically done through

taxable REIT subsidiaries, we re-evaluated our net deferred tax asset, which resulted in a net write-down of \$12.3 million. In addition to the shift away from non-CRE businesses, we plan to dispose of our legacy real estate loans, and will move those loans to hold for sale status in the fourth quarter.

We began the process of disposing of several ancillary businesses as part of the Plan during the fourth quarter of 2016. The anticipated dispositions include our residential mortgage origination segment acquired in late 2013, and the balance of our middle market lending segment, which currently holds syndicated bank loans and a middle market direct origination loan that is currently classified as loans held for sale. We expect to move these segments to discontinued operations and also to move our life

[\(Back to Index\)](#)

settlement contract investment as well as several legacy real estate loans to a held for sale classification in the fourth quarter of 2016. As part of this reclassification, we estimate impairments of \$11.0 million to \$14.0 million to fair value the assets and liabilities of these held for sale investments during the fourth quarter.

In August 2016, we sold our interest in Northport TRS, LLC our self-originated middle market lending business. We had also experienced a reduction in our other commercial finance assets that began to liquidate in 2014 and we saw this trend continue through 2015 into 2016. We expect to liquidate our last bank loan CLO, Apidos Cinco in November 2016.

During the latter half of 2015 our common shares began to trade at prices well below our book value per share. We had previously sought to enhance shareholder value by instituting, on August 4, 2015, a \$50.0 million securities repurchase program. Through September 30, 2016, we repurchased approximately \$38.3 million of our common and preferred shares. However, in September 2016, we stopped buying shares and instead began to marshal resources as part of our strategy to transform our operations into a real estate focused enterprise.

We generate our income primarily from the spread between the revenues we receive from our assets and the cost to finance the purchase of those assets, from management of assets and from hedging interest rate risks. Historically, we have generated revenues from the interest and fees we've earned on our whole loans, commercial mortgage-backed securities, or CMBS, middle market loans, other asset-backed securities, or ABS, and structured note investments. We also generated revenues from fees we've received for the management of externally originated bank loans, from our residential mortgage origination business and from our investment in an equipment leasing business. Given the new business strategy of focusing on commercial real estate activities, we expect to shift away from these ancillary businesses as we dispose of those investments and re-deploy the proceeds into commercial real estate activities.

Historically, we have used a substantial amount of leverage to enhance our returns and we have financed each of our different asset classes with different degrees of leverage. The cost of borrowings to finance our investments is a significant part of our expenses. Our net income depends on our ability to control these expenses relative to our revenue. As it relates to our commercial real estate loan portfolio, we historically have used repurchase agreements as a short-term financing source, and CDOs and, to a lesser extent, other term financing as long-term financing sources and expect to continue to use these financing sources into the near term future.

The current state of moderate growth in the United States economy has allowed us to make new investments, particularly in our primary business of commercial real estate lending. During 2015 and through September 30, 2016, we have underwritten 47 new commercial real estate, or CRE, loans for a total of \$914.4 million. These loans were initially financed in part through our CRE term facilities and then financed longer-term through CRE securitizations. As a result of the planned dispositions coupled with available debt financing of over \$390.0 million, we intend to begin to grow our commercial real estate lending program, which will allow us to maintain a market presence and working relationships with our commercial real estate borrowers.

As of September 30, 2016, and as we move toward a real estate centric business, we had allocated our invested equity capital among our targeted asset classes as follows: 73% in CRE assets, 17% in commercial finance assets, 7% in the residential mortgage lending business and 3% in other investments. As of December 31, 2015, we had allocated our invested equity capital as follows: 62% in CRE assets, 28% in commercial finance assets, 6% in the residential mortgage lending business and 4% in other assets.

Results of Operations

Our net loss allocable to common shares for the three and nine months ended September 30, 2016 was \$51.6 million or \$(1.69) per share-basic (\$(1.69) per share-diluted) and \$43.4 million or \$(1.42) per share-basic (\$(1.42) per share-diluted) respectively, as compared to net income allocable to common shares of \$6.8 million, or \$0.21 per share-basic (\$0.21 per share-diluted) and a net loss of \$14.8 million or \$(0.45) per share-basic (\$(0.45) per share-diluted) for the three and nine months ended September 30, 2015 respectively.

Three and Nine Months Ended September 30, 2016 as compared to Three and Nine Months Ended September 30, 2015

Aggregate interest income decreased \$7.0 million and \$3.0 million to \$31.4 million and \$107.2 million for the three and nine months ended September 30, 2016, respectively, as compared to \$38.3 million and \$110.2 million for the three and nine months ended September 30, 2015, respectively. We attribute these changes to the following:

Interest Income from Loans

Commercial real estate loans. Interest income on CRE loans decreased \$655,000 and increased \$2.3 million to \$21.8 million and \$64.5 million for the three and nine months ended September 30, 2016, respectively. The decrease for the three months ended September 30, 2016 is primarily due to the deconsolidation of our CRE loans at RREF 2006-1 and RREF 2007-1. The increase for the nine months ended September 30, 2016 is attributable to the origination of loans in our most recent CRE securitization, RCC 2015- CRE 4, which closed in August 2015.

Middle market loans. On August 4, 2016, we sold Northport TRS, LLC, selling substantially all of our direct middle market loans and one syndicated loan with a combined par balance of \$257.3 million. This reduced the weighted average balance to \$168.4 million and \$285.3 million for the three and nine months ended September 30, 2016, respectively, as compared to a weighted average balance of \$338.3 million and \$300.4 million for the three and nine months ended September 30, 2015. The weighted average yield on investments increased from 9.55% and 9.68% for the three and nine months ended September 30, 2015 to 9.85% and 11.34% for the three and nine months ended September 30, 2016, respectively, which was primarily driven by \$2.6 million of prepayment fees earned during for the nine months ended September 30, 2016.

[\(Back to Index\)](#)

Bank loans. The weighted average loan balance on our bank loan portfolio decreased by \$164.2 million and \$248.5 million for three and nine months ended September 30, 2016, respectively, due to the liquidation of Apidos CDO III, Ltd. ("Apidos CDO III") in June 2015 and the deconsolidation of Apidos Cinco CDO as of January 1, 2016, which is now recorded in interest income from securities.

Interest Income from Securities

Asset-Backed Securities, or ABS. Interest income from ABS increased \$1.9 million and \$4.3 million to \$3.5 million and \$10.2 million for the three and nine months ended September 30, 2016, respectively. The increase for the three and nine months ended September 30, 2016 is primarily attributable to the deconsolidation of RREF CDO 2006-1, RREF CDO 2007-1, and Apidos Cinco CDO on January 1, 2016. As a result of the deconsolidation, the interest income derived from ABS is now reported as interest income from available-for-sale securities as compared to loan interest income in the prior year. The deconsolidation significantly contributed to the increase in the weighted average balance of ABS from \$48.3 million to \$140.5 million and from \$51.3 million to \$154.3 million for the three and nine months ended September 30, 2016, respectively. The decrease in weighted average yield from 14.07% to 9.77% and from 15.74% to 8.84% directly relates to the deconsolidation of RCM Global and Pelium Capital whose income is now reported under earnings in unconsolidated entities.

Interest income - other. Interest income - other decreased \$199,000 and increased \$1.4 million to \$769,000 and \$4.3 million for the three and nine months ended September 30, 2016, respectively, as compared to \$968,000 and \$2.9 million for the three and nine months ended September 30, 2015. The decrease for the three months ended September 30, 2016 is related to the warehouse period ending on our investment in ZWH4, LLC ("ZAIS") in May 2016. We earned \$450,000 of income on this investment in the three months ended September 30, 2015. This decrease was partially offset by an increase of \$138,000 in other interest income. The increase for the nine months ended September 30, 2016 is attributable to our investment in Harvest XV, in which \$2.1 million in income was earned. This was partially offset by a decrease in \$760,000 of income due to the sale of Harvest X in September 2015.

Three and Nine Months Ended September 30, 2016 as compared to Three and Nine Months Ended September 30, 2015

Aggregate interest expense decreased \$2.2 million and increased \$1.2 million to \$14.1 million and \$46.6 million for the three and nine months ended September 30, 2016 respectively as compared to \$16.3 million and \$45.3 million for the three and nine months ended September 30, 2015, respectively. We attribute the changes to the following:

Commercial real estate loans. Interest expense on commercial real estate loans increased \$876,000 and \$5.6 million to \$8.1 million and \$23.9 million for the three and nine months ended September 30, 2016, respectively. The increase was related to the increased borrowings from the consolidation of our securitization, RCC 2015-CRE4, which closed in August 2015 and, to a lesser extent, our securitization, RCC 2015-CRE3, that closed in February 2015. Current year interest expense also included a new financing facility to fund the production of new loans that was not included in the same period last year. These increases were partially offset by a decrease in interest expense due to the deconsolidation of RREF CDO 2006-1 and RREF CDO 2007-1.

Middle market loans. Interest expense on middle market loans decreased \$1.0 million and increased \$2.5 million to \$467,000 and \$6.2 million for the three and nine months ended September 30, 2016, respectively, as compared to \$1.5 million and \$3.7 million for the three and nine months ended September 30, 2015, respectively. On August 4, 2016, we sold Northport TRS, LLC. As a result of the transaction, \$2.6 million of amortization of the remaining deferred debt issuance costs related to the credit facility were accelerated and recorded as interest expense as of June 30, 2016.

Hedging Instruments. Interest expense on hedging instruments decreased \$1.7 million and \$4.8 million for the three and nine months ended September 30, 2016, respectively. The decrease is related to the deconsolidation of six hedge contracts in accordance with the deconsolidation of RREF CDO 2006-1 and RREF CDO 2007-1 on January 1, 2016 and maturity of two hedge contracts during the first quarter of 2016.

Bank loans. Interest expense on bank loans decreased \$452,000 and \$2.1 million for the three and nine months ended September 30, 2016. The decrease is due to the deconsolidation of our remaining CLO, Apidos Cinco CDO, and, to a lesser extent, the liquidation of Apidos CDO III, Ltd. (“Apidos CDO III”) in June 2015.

Total revenue	\$16,879	\$16,411	\$468	3	%

Three and Nine Months Ended September 30, 2016 as compared to Three and Nine Months Ended September 30, 2015

Gain (loss) on sale of residential mortgage loans. Gain (loss) on sale of residential mortgage loans increased \$2.9 million and \$4.0 million for the three and nine months ended September 30, 2016, respectively. In October 2016, Primary Capital Mortgage, LLC ("PCM") reached an agreement to settle the litigation initiated by a third party in May 2014 related to the settlement of legacy repurchase claims. In connection therewith, PCM recorded an additional \$1.0 million of indemnifications during the three months ended September 30, 2016 to fully reserve the total settlement amount of \$2.1 million as of September 30, 2016. In addition, there was an increase in secondary marketing income, where mortgage loans and servicing rights are sold between mortgage originators and investors, on our residential loan portfolio year over year.

Fee income. Fee income increased \$1.2 million and decreased \$3.3 million to \$2.0 million and \$1.4 million for the three and nine months ended September 30, 2016, respectively. These changes relate to recording a temporary impairment against income on our mortgage servicing rights portfolio of \$800,000 and \$5.6 million and its corresponding amortization for the three and nine months ended September 30, 2016 as compared to impairment on our mortgage servicing rights portfolio of \$900,000 and \$650,000 for the three and nine months ended September 30, 2015, respectively. A discounted cash flow approach is used to estimate the fair value of MSR's utilizing the valuation services of an independent third party. The key assumptions used in the estimation of the fair value of MSR's include prepayment speeds, discount rates, default rates, cost to service, contractual servicing fees and escrow earnings. In addition, there was a decrease in income resulting from the run-off of managed assets related to our investment in Resource Capital Asset Management, or RCAM, which holds management contracts that entitle us to collect senior, subordinated, and incentive fees related to RCAM's remaining CLO issuers that it manages.

Three and Nine Months Ended September 30, 2016 as compared to Three and Nine Months Ended September 30, 2015

Management fees – related party. Management fees-related party decreased \$199,000 and \$123,000 to \$3.1 million and \$10.2 million for the three and nine months ended September 30, 2016, respectively as compared to \$3.3 million and \$10.3 million for the three and nine months ended September 30, 2015, respectively. This expense represents compensation in the form of base management fees and incentive management fees pursuant to our management agreement as well as fees to the Manager of our structured note portfolio. The changes are described below:

Base management fee is a monthly fee equal to 1/12th of the amount of our equity multiplied by 1.50%. Under the management agreement, "equity" is equal to the net proceeds from any issuance of shares of capital stock less offering related costs, plus or minus our retained earnings (excluding non-cash equity compensation incurred in current or prior periods) less any amounts we have paid for stock repurchases. The calculation is adjusted for one-time events due to changes in GAAP, as well as other non-cash charges upon approval of our independent directors. The base management fee decreased for the three and nine months ended September 30, 2016 as compared to the three and nine months ended September 30, 2015 due to decreased stockholders' equity, a component in the formula by which base management fees are calculated, primarily as a result of our repurchase of approximately 8.3% of our outstanding shares as part of our \$50.0 million repurchase plan and quarterly dividend distributions in excess of earnings.

•

Incentive management fees are based upon the excess of adjusted operating earnings, as defined in the management agreement, over a variable base rate. There were no fees paid for the three and nine months ended September 30, 2016 or three and nine months ended September 30, 2015.

related to our life care business, Long Term Care Conversion Funding, established for the purpose of acquiring life settlement contracts. The initial agreement, authorized in December 2012, provided for an annual fee of \$550,000, with a two year term. In March 2015, the agreement was amended to extend the term for an additional two years terminating in December 2016. The oversight management fee was approximately \$138,000 and \$412,000 for the three and nine months ended September 30, 2016 and \$139,000 and \$411,000 for the three and nine months ended September 30, 2015.

Equity compensation - related party. Equity compensation - related party increased \$2.0 million and \$2.9 million to \$1.8 million and \$4.4 million for the three and nine months ended September 30, 2016, respectively as compared to income of \$225,000 and expense of \$1.6 million for the three and nine months ended September 30, 2015, respectively. These expenses relate to the amortization of annual grants of restricted common stock to our non-employee independent directors, and annual and discretionary grants of restricted stock to employees of Resource America who provide investment management services to us through our Manager as well as employees of our residential mortgage company subsidiary. This increase was primarily attributable to additional amortization of equity compensation in the amount of \$896,000 related to the acceleration of shares granted to terminated executives at the close of the C-III merger. In addition, accelerated amortization of \$555,000 of equity compensation expense was recorded at PCM in connection with an employment separation agreement during the first quarter of 2016. In addition, there was an increase in our stock price at September 30, 2016 compared to September 30, 2015, which directly impacts our quarterly measurement of compensation expense.

General and administrative expense. General and administrative expense increased \$2.1 million and \$3.7 million to \$12.3 million and \$33.4 million for the three and nine months ended September 30, 2016, respectively, as compared to \$10.2 million and \$29.6 million for the three and nine months ended September 30, 2015, respectively. The following table presents the allocation of general and administrative expenses between Corporate and PCM:

	For the Three Months Ended September 30,		Dollar Change	Percent Change
	2016	2015		
General and administrative expenses:				
Corporate	\$4,432	\$4,053	\$ 379	9 %
PCM	7,909	6,170	1,739	28 %
Total	\$12,341	\$10,223	\$ 2,118	21 %

	For the Nine Months Ended September 30,		Dollar Change	Percent Change
	2016	2015		
General and administrative expenses:				
Corporate	\$12,617	\$12,902	\$(285)	(2)%
PCM	20,736	16,739	3,997	24 %
Total	\$33,353	\$29,641	\$3,712	13 %

General and administrative expense - Corporate. General and administrative expense - Corporate increased \$379,000 and decreased \$285,000 to \$4.4 million and \$12.6 million for the three and nine months ended September 30, 2016, respectively, as compared to \$4.1 million and \$12.9 million for the three and nine months ended September 30, 2015. The increase in expenses for the three months ended September 30, 2016 is primarily attributable to legal expenses of approximately \$216,000 related to the C-III transaction. The decrease in expenses for the nine months ended September 30, 2016 is related to the deconsolidation of RCM Global, Pelium, Apidos Cinco CDO, and RREF CDO 2006-1 and RREF CDO 2007-1. Specific expenses are no longer recorded on an entity level basis for these entities. Prior to deconsolidation, each of the three CDOs recorded an average of \$50,000 of general and administrative expenses each quarter and Pelium recorded approximately \$75,000 each quarter. The decrease year over year was also

related to a non-recurring expense of approximately \$399,000 relating to a proposed restructuring which we determined not to pursue during the six months ended June 30, 2015. The decreases for the nine months ended September 30, 2016 were partially offset by legal expenses related to the closing of the Northport TRS, LLC sale transaction recorded during the second and third quarters of 2016.

General and administrative expense - PCM. General and administrative expense - PCM increased \$1.7 million and \$4.0 million to \$7.9 million and \$20.7 million for the three and nine months ended September 30, 2016, respectively, as compared to \$6.2 million and \$16.7 million for the three and nine months ended September 30, 2015, respectively. The increase is attributable to an increase in compensation costs and consulting fees to support PCM's continued geographic expansion as well as an increase in loan processing fees related to a rise in loan volume.

Depreciation and amortization. Depreciation and amortization decreased \$123,000 and \$164,000 to \$505,000 and \$1.7 million for the three and nine months ended September 30, 2016 respectively, as compared to \$628,000 and \$1.8 million for the three and nine months ended September 30, 2015, respectively. The decrease for the three and nine months ended September 30, 2016 was primarily due to an RCAM-managed CLO being called in January 2016 and, as a result, termination of amortization on the underlying intangible asset.

Net impairment losses recognized in earnings. Net impairment losses recognized in earnings was \$25.3 million for both the three and nine months ended September 30, 2016. This impairment is primarily related to other-than-temporary impairment recorded on our investment in RREF CDO 2007-1, which is now classified as investment securities available-for-sale. Third-party appraisers were recently engaged to perform appraisals on six of the seven remaining, legacy commercial real estate loans, which are part of the asset pool of RREF CDO 2007-1. As a result of having the properties supporting the loans appraised, two of the commercial real estate loans in the vehicle were determined to have cost bases in excess of their updated cash flows, as a result of the updated appraisals, causing a collective impairment charge to the cash flows of the vehicle of \$20.7 million. In addition, impairment losses of \$3.7 million, on a pre-tax basis, were recognized as a result of the reduction of the actual and expected revenue-earning useful lives of two RCAM managed CLOs: Shasta and San Gabriel. The Shasta CLO was called on October 20, 2016 and the San Gabriel CLO is expected to be called in the next three quarters.

Provision for loan and lease losses. Provision for loan and lease losses increased \$6.6 million and decreased \$24.0 million to \$7.7 million and \$19.8 million for the three and nine months ended September 30, 2016, respectively, as compared to \$1.0 million and \$43.8 million for the three and nine months ended September 30, 2015, respectively. The following table summarizes the information relating to our provision for loan losses for the periods presented (in thousands):

CRE loan portfolio provision - The CRE loan portfolio provision increased by \$8.0 million and decreased by \$30.0 million for the three and nine months ended September 30, 2016. During the three months ended September 30, 2016,

we recorded specific provisions of \$6.1 million and \$2.0 million, against two loans with amortized costs of \$27.5 million and \$2.0 million, respectively. As part of our ongoing monitoring, we obtained appraisals on six commercial real estate loans from third party vendors. Two of the loans were appraised and deemed to be valued below their previously stated cost basis. One loan, a hotel located in Studio City, CA, was previously under contract for sale that supported the value in excess of our loan amount. The contract for sale was dissolved in October 2016 and we utilized an updated appraisal as the determinant of value. The loan has a maturity date of February 2017 which triggered an appraisal on the 'as-is' basis to determine its current value resulting in a specific reserve of \$6.1 million on the mezzanine tranches of the loan. The second loan, a hotel located in Tucson, AZ, was supported by a broker quote

[\(Back to Index\)](#)

received during the December 2015 audit review. After the property had a modification of terms with the operating manager an updated appraisal was requested which applied updated assumptions to the cash flow analysis of the property. The appraisal returned an 'as-stabilized' value below our cost basis and as a result, the mezzanine tranche of \$2.0 million was fully reserved. The senior tranche of the loan is held in RREF CDO 2007-1. The provisions recorded against the loans reflect the estimated recoverable value. These and other assets in the loan pool continue to be monitored consistent with our impairment evaluation process. During the second quarter of 2015, we recorded an allowance for loan loss on a subordinated mezzanine loan position that was acquired in 2007. The outstanding loan balance of \$38.1 million was fully reserved and associated accrued interest of \$3.0 million was reversed against interest income, for a total charge to operations of \$41.1 million. The loan was originally supported by a portfolio of 13 hotel properties, most of which were luxury brand hotels. As of June 2015, of the original 13 hotel properties securing the loan, three properties remained, all of which were located in or near San Juan, Puerto Rico. As a result of economic and credit disruptions in Puerto Rico, we determined that the loan was impaired and required a full reserve as of June 2015.

Bank loan portfolio provision - The bank loan provision decreased by \$613,000 and \$2.3 million for the three and nine months ended September 30, 2016, respectively. These decreases are due to the call and liquidation of Apidos CDO III in June 2015 and the deconsolidation of Apidos Cinco CDO on January 1, 2016. The recovery recorded in 2016 is due to receiving a cash payment on a position that was previously written-off at the time of liquidation.

Middle market loan portfolio provision - The middle market loan provision decreased by \$782,000 and increased by \$8.0 million for the three and nine months ended September 30, 2016, respectively. During the three months ended September 30, 2016, we recorded a provision of approximately \$121,000, relating to an additional loss on the sale of Northport TRS, LLC. For the nine months ended, we recorded a provision of \$12.2 million, of which \$9.2 million related to the sale of Northport TRS, LLC, and \$3.4 million related to the one direct origination loan we retained following the sale, offset by a \$480,000 improvement in fair value mark on another position.

Three and Nine Months Ended September 30, 2016 as compared to Three and Nine Months Ended September 30, 2015

Equity in earnings of unconsolidated subsidiaries. Equity in earnings of unconsolidated subsidiaries increased \$698,000 and \$4.2 million to \$1.0 million and \$6.0 million for the three and nine months ended September 30, 2016 respectively, as compared to \$334,000 and \$1.7 million for the three and nine months ended September 30, 2015, respectively. An increase in earnings of approximately \$485,000 and \$2.6 million, respectively, was primarily related to two of our previously consolidated VIEs, RCM Global and Pelium, which are now accounted for as equity method investments due to a new amendment to the consolidation guidance which we adopted on January 1, 2016. We also recognized a gain from our equity investment in Pearlmark for the three and nine months ended September 30, 2016 of \$132,000 and \$551,000, respectively. We did not begin recognizing income from this investment until the fourth quarter of 2015. In addition, our investment in Leaf Commercial Capital realized a \$1.4 million increase in income year over year due to increased lease originations.

Net realized and unrealized gain (loss) on sales of investment securities available-for-sale and loans. Net realized and unrealized gain (loss) on investment securities available-for-sale and loans decreased \$12.6 million and \$24.4 million to a losses of \$10.1 million and \$7.8 million for the three and nine months ended September 30, 2016, respectively as compared to gains of \$2.5 million and \$16.6 million for the three and nine months ended September 30, 2015, respectively. These losses are primarily attributable to a \$9.6 million loss recorded on one of the retained middle market direct origination loans that is included in loans held for sale as of September 30, 2016. This loan missed payment on its last two interest payments and the loan was marked down based on an external third party valuation. In addition, during 2015, we recognized increased gains related to the net gain on the sale and settlement of certain securities in the RCM Global portfolio, and the in-kind distribution and subsequent sale of those securities, net realized and unrealized gains on foreign exchange transactions from the settlement of contracts, and unrealized gains on interest rate lock commitments on our residential loan portfolio. We had no such gains during the three and nine months ended September 30, 2016. In addition, the RCM Global portfolio was deconsolidated effective January 1, 2016 and as a result our investment is now accounted for as an equity method investment.

Net realized and unrealized (loss) gain on investment securities, trading. Net realized and unrealized (loss) gain on investment securities, trading increased \$338,000 and decreased \$1.7 million to a loss of \$242,000 and a gain of \$86,000 during the three and nine months ended September 30, 2016, respectively, as compared to a loss of \$580,000 and a gain of \$1.8 million for the three and nine months ended September 30, 2015, respectively. The 2016 activity is related to the change in valuation of trading securities on our legacy portfolio. The 2015 activity was primarily related to unrealized and realized gains recognized on Pelium Capital which invested in structured securities classified as trading securities. The Pelium Capital portfolio was deconsolidated effective January 1, 2016 and is now accounted for as an equity method investment.

Loss on reissuance/gain on extinguishment of debt. Loss on reissuance/gain on extinguishment of debt was \$332,000 and \$1.4 million for the three and nine months ended September 30, 2015, respectively. There were no gains or losses for the three and nine months ended September 30, 2016. The transactions that give rise to the recognition of a loss on the reissuance of debt resulted from the reissuance of previously repurchased senior and junior notes in our consolidated VIEs in the open market. These senior and junior notes were originally repurchased at discounts to par and represented an opportunity to provide us strategic

[\(Back to Index\)](#)

financing at beneficial rates upon reissuance. At the date these notes were repurchased, a gain, representing the difference between the repurchase price and the par value of the note, was recognized. As the same notes are reissued at a price less than par, an unrealized loss equal to the difference between the reissued price and the par value of the note is recognized in current earnings.

Other income (expense). Other income (expense) increased \$1.5 million for both the three and nine months ended September 30, 2016. This income represents a consent fee paid to us by Resource America at the closing of the C-III merger on September 8, 2016 in exchange for the authorization and approval to waive our rights under the management agreement to terminate the agreement as a result of a change in control of our manager.

Financial Condition

Summary.

Our total assets were \$2.2 billion at September 30, 2016 as compared to \$2.8 billion at December 31, 2015. The decrease in total assets was principally due to the adoption of the consolidation guidance on VIEs and the resulting deconsolidation of the following entities: RREF CDO 2006-1, RREF CDO 2007-1, Apidos Cinco CDO, Pelium Capital and RCM Global. In addition, we sold substantially all of our direct origination middle market loans and one syndicated loan with a par balance of \$257.3 million with the sale of Northport TRS, LLC, which closed on August 4, 2016. In addition, Impairment losses taken on investment securities available-for-sale and intangible assets, provisions for loan loss, and the recognition of deferred tax asset valuation adjustments recorded during the three months ended September 30, 2016 also had a significant impact on the decrease of our assets.

Commercial Mortgage-Backed Securities-Private Placement. In the aggregate, we purchased our CMBS portfolio at a net premium to par value. At September 30, 2016 and December 31, 2015, the remaining discount to be accreted into income over the remaining lives of the securities was \$323,000 and \$1.7 million, respectively. This decrease is primarily due to the deconsolidation of RREF CDO 2006-1 and RREF CDO 2007-1 and the underlying collateral held at these entities. At September 30, 2016 and December 31, 2015, the remaining premium to be amortized into income over the remaining lives of the securities was \$42,000 and \$710,000, respectively. These securities are classified as available-for-sale and, as a result, are carried at their fair value.

Edgar Filing: Resource Capital Corp. - Form 10-Q

During the three and nine months ended September 30, 2016, we recognized a \$732,000 other-than-temporary impairment on one position that supported our CMBS investments bringing the fair value to \$3.2 million. An approval to sell and the current price yielded a value that was less than a full recovery of our cost basis. The net impairment losses were recognized in earnings in our consolidated statements of operations. During the three and nine months ended September 30, 2015, we had no losses included in earnings due to other-than-temporary impairment.

Securities classified as available-for-sale have decreased on a net basis as of September 30, 2016 as compared to December 31, 2015 primarily due to the deconsolidation of RREF CDO 2006-1 and RREF CDO 2007-1 effective January 1, 2016, and to \$25.0 million of paydowns during the period. We perform an on-going review of third-party reports and updated financial data on the underlying property financial information to analyze current and projected loan performance. Rating agency downgrades are considered with respect to our income approach when determining other-than-temporary impairment and, when inputs are stressed, the resulting projected cash flows reflect a full recovery of principal.

As a result of updated accounting guidance, effective January 1, 2016 we deconsolidated all of the assets of Pelium, which resulted in the removal of \$21.9 million of investment securities, trading from our balance sheet, which is the primary cause of the decrease during the period. We sold no securities during the nine months ended September 30, 2016. We sold 19 securities during the nine months ended September 30, 2015, for a net realized gain of approximately \$1.4 million. We held 6 and 56 investment securities, trading as of September 30, 2016 and December 31, 2015, respectively.

Real Estate Loans. The following table is a summary of the loans in our commercial real estate loan portfolio (in thousands):

Description	Quantity	Amortized Cost	Contracted Interest Rates	Maturity Dates ⁽³⁾
As of September 30, 2016:				
Whole loans, floating rate ^{(1) (3) (4) (5) (6) (7)}	76	\$1,361,183	LIBOR plus 2.50% to LIBOR plus 6.45%	January 2017 to October 2019

As of December 31, 2015:				
Whole loans, floating rate ^{(1) (3) (4) (5) (6) (7)}	87	\$1,630,801	LIBOR plus 1.75% to LIBOR plus 12.00%	February 2016 to February 2019
B notes, fixed rate	1	15,934	8.68%	April 2016
Mezzanine loans, fixed rate ⁽⁸⁾	2	45,372	9.01%	September 2016
Total ⁽²⁾	90	\$1,692,107		

Whole loans had \$67.3 million and \$112.6 million in unfunded loan commitments as of September 30, 2016 and (1) December 31, 2015, respectively. These unfunded commitments are advanced as the borrowers formally request additional funding as permitted under the loan agreement and any necessary approvals have been obtained.

(2) Totals do not include allowances for loan losses of \$9.4 million and \$41.8 million as of September 30, 2016 and December 31, 2015, respectively.

(3) Maturity dates do not include possible extension options that may be available to the borrowers.

Includes two whole loans with a combined \$11.2 million and \$51.2 million senior component September 30, 2016 and December 31, 2015, respectively, that entered into modifications in 2016 and 2015 that resulted in a fixed rate (4) of 0.50% as of September 30, 2016 and December 31, 2015, respectively (the difference of which was a result of the deconsolidation of RREF CDO 2006-1 and RREF CDO 2007-1 - see Note 2). The two loans were previously identified as troubled debt restructurings, or TDR's.

(5) Includes four whole loans with combined \$4.5 million mezzanine components that have interest rates ranging from 1.50% to 5.20% as of September 30, 2016 and December 31, 2015.

(6) Includes a \$799,000 junior mezzanine tranche of a whole loan that has a fixed rate of 10.00% as of September 30, 2016 and December 31, 2015.

Contracted interest rates do not include a whole loan with an amortized cost of \$2.0 million and \$32.5 million September 30, 2016 and December 31, 2015, respectively, that entered into a modification in 2016 and 2015 which (7) reduced the floating rate spread to 1.00% as of September 30, 2016 and December 31, 2015, respectively (the difference of which was a result of the deconsolidation of RREF CDO 2007-1 see Note 2). The loan was previously identified as a TDR.

(8) Contracted interest rates and maturity dates do not include rates or maturity dates associated with one loan with an amortized cost of \$38.1 million that was fully reserved as of June 30, 2015.

As a result of updated accounting guidance, effective January 1, 2016 (see Note 2), we deconsolidated all of the (9) assets of RREF CDO 2006 and RREF CDO 2007, resulting in the removal of \$271.8 million of loans, pledged as collateral.

(10)

Edgar Filing: Resource Capital Corp. - Form 10-Q

As a result of RREF CDO 2006-1 being called and liquidated on April 25, 2016, a mezzanine loan with a par value of \$28.8 million was acquired as part of the liquidation proceeds and is reflected on the Company's balance sheet at a fair value of zero at September 30, 2016. The mezzanine loan is comprised of two tranches, with maturity dates of November 2016 and September 2021.

Middle market loans. At September 30, 2016, our middle market loan portfolio had loans held for investment with a carrying value of \$51.5 million and loans held for sale with a fair value of \$7.2 million. The aggregate fair value of middle market loans held decreased by \$318.2 million over the fair value at December 31, 2015. This decrease was due to the sale of Northport TRS, LLC consisting of \$257.3 million par amount of direct originated loans held by it as well as loans paying off as well as by reductions in new originations in the middle market platform prior to the sale of Northport TRS, LLC.

Asset-backed Securities. At September 30, 2016, we held a total of \$153.1 million of ABS at fair value through RCC Real Estate, Resource TRS III, RCC Residential, Resource TRS and RCC Commercial II. At December 31, 2015, we

held a total of \$44.2 million of ABS at fair value through Apidos Cinco CDO, RCM Global, ZAIS and RCC Commercial II. The increase in total ABS was due to the reclassification of investments in deconsolidated entities RREF CDO 2006-1, RREF CDO 2007-1 and Apidos Cinco CDO to asset-backed securities that occurred during the first quarter 2016.

During the three and nine months ended September 30, 2016, we recognized \$20.7 million of other-than-temporary impairment on our previously consolidated CRE CDO, RREF 2007-1, which is classified as an investment securities available-for-sale. Our security interest in the vehicle is supported by 12 CMBS securities and seven CRE loans. Third-party appraisals were obtained on six of the seven remaining legacy CRE loans, which are part of the asset pool of RREF CDO 2007-1. The remaining loan was under an agreement of sale. As a result of having the collateral properties appraised, two of the CRE loans in the vehicle were determined to have cost bases in excess of their expected cash flows, as a result of the updated appraisals, causing a collective impairment charge to the cash flows of the vehicle of \$20.7 million. The impairment charge on the security reflects the credit impact to the fair value of the security given the results of the updated appraisal and reduces our cost basis in the security permanently. The impairment charge was calculated by comparing the previous projected cash flows of the security to the revised cash flows including the results of the updated appraisals.

Corporate bonds. At September 30, 2016, we held no corporate bonds on our balance sheet as a result of the deconsolidation of Apidos Cinco CDO on January 1, 2016. At December 31, 2015, Apidos Cinco CDO, held a total of \$2.3 million of corporate bonds at fair value, which secure the debt issued by this entity. We recorded the bonds at fair value, with any unrealized gain or loss reported in the stockholder's equity section of the balance sheet.

Credit quality indicators

Commercial Real Estate Loans

Loans are graded at inception and updates to assigned grades are made continually as new information is received, as such, a loan previously rated 4 may, over time and with improved performance, be rated better than 4. Loans are graded on a scale of 1 to 4 with 1 representing our highest rating and 4 representing our lowest rating. Commercial real estate loans are first individually evaluated for impairment. To the extent no individual impairment is determined, a general reserve is established.

The characteristics of each rating category are as follows:

1. A loan with a rating of a 1 is considered to have satisfactory performance with no issues noted. All interest and principal payments are current and the probability of loss is remote;
A loan is graded with a rating of a 2 if a surveillance trigger event has occurred, but loss is not probable at this time. Such trigger events could include but are not limited to a trending decrease in occupancy rates or a flattening of lease revenues; and to a lesser extent, ground lease defaults, ground lease expirations that occur in the next six months or the borrower is delinquent on payment of property taxes or insurance.;
2. A loan with a rating of 3 has experienced an extended decline in operating performance, a significant deviation from its origination plan or the occurrence of one or more surveillance trigger events which create an increased risk for potential default. Loans identified in this category show some liquidity concerns. However, the risk of loss is not specifically assignable to any individual loan. The noted risk of the loans in this category is generally covered by general reserves;
3. A loan with a rating of a 4 is considered to be in payment default or default is expected, full recovery of the unpaid principal balance is improbable and loss is considered probable. The noted risk of the loans in this category is covered by specific reserves.

Credit risk profiles of commercial real estate loans were as follows (in thousands):

(1) The Company has one mezzanine loan with a par value of \$28.8 million that was acquired at a fair value of zero as a result of the liquidation of RREF 2006-1.

(2) Includes four loans which were impaired as of December 31, 2015.

(3) Includes three loans which were impaired as of September 30, 2016.

As part of our ongoing loan monitoring, third-party appraisal services were obtained on six legacy CRE loans during the quarter ended September 30, 2016. As a result of the evaluation of those appraisals, it was determined that two loans previously disclosed as impaired loans, one in Studio City, CA with an amortized cost of \$27.5 million and the other in Tucson, AZ with an amortized cost of \$2.0 million, had cost bases in excess of their appraised values. As such, for the three and nine months ended September 30, 2016, we recorded specific provisions of \$6.1 million on the Studio City, CA loan and \$2.0 million on the Tucson, AZ loan. Previously, the Studio City, CA loan was under

contract for sale at a value in excess of our loan amount. The contract for sale was terminated in October 2016. The Tucson, AZ loan was previously supported by a broker's opinion of value received as of December 31, 2015. The updated appraisal, after factoring in modified terms with the operating manager, and adjustments to projected occupancy and the average daily rate, returned a fair value below our cost basis, resulting in the full impairment of the portion of this whole loan held directly on balance sheet. A portion of this whole loan is also held in RREF CDO 2007-1. The provisions recorded against these loans reflect the estimated recoverable value. These and other assets in the loan pool continue to be monitored consistent with our impairment evaluation process.

We also had six loans classified as rating 2 due to surveillance triggers being registered. Of the six loans, several will be classified as loans held for sale as of December 31, 2016. The other two loans had surveillance trigger events due to a mechanics lien and a code violation. These two loans were not considered impaired at September 30, 2016.

All of our commercial real estate loans were current with exception of one mezzanine loan that had defaulted as of September 30, 2016 and December 31, 2015. This loan was deconsolidated as part of our adoption of amendments to consolidation accounting guidance as required on January 1, 2016. However, as a result of RREF CDO 2006-1 being called and liquidated on April 25, 2016, par value of \$28.8 million of this mezzanine loan was acquired as part of the liquidation proceeds and is reflected on our balance sheet at a fair value of zero at September 30, 2016.

Bank Loans

Loans are graded at inception and updates to assigned grades are made continually as new information is received. Loans are graded on a scale of 1 to 5 with 1 representing our highest rating and 5 representing our lowest rating. Bank loans are first individually evaluated for impairment. To the extent no individual impairment is determined, a general reserve is established.

The characteristics of each rating category are as follows:

1. Loans with a rating of 1 are considered performing within expectations. All interest and principal payments are current, all future payments are anticipated and loss is not probable;

2. Loans with a rating of a 2 are considered to have limited liquidity concerns and are watched closely. Loans identified in this category show remote signs of liquidity concerns, loss is not probable and therefore no reserve is established;

3. Loans with a rating of a 3 are considered to have possible future liquidity concerns. Loans identified in this category show some liquidity concerns, but the ability to estimate potential defaults is not quantifiable and therefore no reserve is established;

4. Loans with a rating of a 4 are considered to have nearer term liquidity concerns. These loans have a reasonable possibility of future default. However, the risk of loss is not assignable to one specific credit. The noted risk of the loans in this category is covered by general reserves; and

5. Loans with a rating of a 5 have defaulted in payment of principal and interest or default is imminent. It is probable that impairment has occurred on these loans based on their payment status and that impairment is estimable. The noted risk of the loans in this category is covered by specific reserves.

Credit risk profiles of bank loans were as follows (in thousands):

As of September 30, 2016 all of our bank loans were deconsolidated. As of December 31, 2015, all of our bank loans were current with respect to debt service with the exception of one loan with an aggregate amortized cost of \$1.5 million, on which there was a reserve.

Middle Market Loans

At inception, all middle market loans are graded at a 2. Updates to assigned grades are made continually as new information is received. Loans are graded on a scale of 1 to 5 with 1 representing our highest rating and 5 representing our lowest rating. Middle market loans are only evaluated individually for impairment.

The characteristics of each rating category are as follows:

1. A loan with a rating of a 1 is considered performing above expectations and the likelihood of loss is remote;
2. A loan with a rating of a 2 is considered performing within expectations and the likelihood of loss is remote;
3. A loan with a rating of a 3 is considered performing below expectations and requires close monitoring but no loss of interest or principal is expected. Loans receiving this rating may be out of compliance with financial covenants; however, these loans are current with respect to interest and principal;
4. A loan with a rating of a 4 is considered performing below expectations and some loss of interest or dividend is expected but no loss of principal. In addition to the borrower being generally out of compliance with debt covenants, loan payments may be past due, but generally not more than 180 days past due; and
5. A loan with a rating of a 5 is considered performing substantially below expectations, in default and some loss of principal is expected. The borrower is out of compliance with most or all of the debt covenants and payments are substantially delinquent.

As of September 30, 2016, all of our syndicated loans were performing and one remaining directly originated loan classified as held for sale was in default. The Company recorded an additional unrealized loss on this loan of \$9.6 million, included in the net realized and unrealized gain (loss) on sales of investment securities available-for-sale and loans and derivatives line item on the consolidated statement of operations, representing the lower of the loan's cost or fair value based on an updated third party valuation as of September 30, 2016. The rest of the Company's portfolio is current with respect to debt service. All of the Company's middle market loans were current with respect to debt service as of December 31, 2015.

Residential Mortgage Loans

Residential mortgage loans are reviewed periodically for collectability in light of historical experience, the nature and amount of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral and prevailing underlying conditions.

Direct Financing Leases

During the year ended December 31, 2015, we recorded a provision against the value of our direct financing leases in the amount of \$465,000. As of September 30, 2016, we held \$571,000 of direct financing leases, net of reserves.

As of September 30, 2016 and 2015, there were no commercial real estate loan troubled-debt restructurings that subsequently defaulted.

Restricted Cash

At September 30, 2016, we had restricted cash of \$5.7 million, which consisted of \$5.5 million of restricted cash held by six securitizations, \$30,000 held as margin and \$197,000 held in various reserve accounts. At December 31, 2015, we had restricted cash of \$40.6 million, which consisted of \$39.0 million of restricted cash in our eight securitizations, \$1.4 million held as margin and \$195,000 held in various reserve accounts. The decrease of \$34.9 million is primarily related to the deconsolidation of Apidos Cinco CDO, which had \$16.7 million in restricted cash and also a reduction of \$17.7 million of restricted cash in our CRE securitizations used to fund our future funding commitments as well as the return of a margin posting of \$500,000.

[\(Back to Index\)](#)**Interest Receivable**

The following table summarizes our interest receivable as of the periods indicated (in thousands):

	September 30, December 31, Net

Interest receivable other	—	1,171	(1,171)
Interest receivable from escrow and sweep accounts	6	6	—
Total	\$ 6,623	\$ 14,009	\$(7,386)

At September 30, 2016, we had interest receivable of \$6.6 million, which primarily consisted of interest on our loans and securities and \$6,000 of interest earned on escrow and sweep accounts. At December 31, 2015, we had interest receivable of \$14.0 million, which primarily consisted of interest on our loans, securities and an equity investment in a warehouse facility and \$6,000 of interest earned on escrow and sweep account. The \$7.4 million decrease was primarily attributable to the deconsolidation of Pelium Capital, Apidos Cinco CDO, RREF CDO 2006-1 and RREF CDO 2007-1. As a result of the new accounting guidance, all of the assets of these four entities were deconsolidated on January 1, 2016. The sale of Northport TRS, LLC in August 2016 also resulted in a reduction of interest receivable of approximately \$2.1 million. Additionally, there was a decrease in interest receivable of \$1.2 million related to the closing of ZAIS, our syndicated bank loans warehouse, in May 2016.

Deferred Tax Assets

Deferred tax assets, net, decreased \$7.0 million to \$5.6 million as of September 30, 2016 from \$12.6 million as of December 31, 2015. The future realization of deferred tax assets depends upon the generation of future taxable income during the periods in which those temporary differences become deductible. Due to changes in management's focus regarding the non-CRE businesses, forecasted taxable income as of September 30, 2016 versus June 30, 2016 decreased; therefore, management believes it is more likely than not that the benefit from these deferred tax assets will not be completely realized. In recognition of this risk, we have provided a valuation allowance of \$16.3 million on deferred tax assets as of September 30, 2016. We will continue to evaluate our ability to realize the tax benefits associated with deferred tax assets by analyzing forecasted taxable income using both historical and projected future operating results, the reversal of existing temporary differences, taxable income in prior carry back years (if permitted) and the availability of tax planning strategies. The net income tax expense recorded during the quarter ended September 30, 2016 was \$12.3 million which consists of \$4.0 million of tax benefits attributable to operating loss incurred during the quarter and a \$16.3 million valuation allowance.

Prepaid Expenses

The following table summarizes our prepaid expenses at the periods indicated (in thousands):

	September 30, December 31, Net		
	2016	2015	Change
Prepaid taxes	\$ 2,653	\$ 1,598	\$ 1,055
Prepaid insurance	415	224	191
Other prepaid expenses	1,547	1,358	189
Total	\$ 4,615	\$ 3,180	\$ 1,435

Prepaid expenses increased \$1.4 million to \$4.6 million as of September 30, 2016 from \$3.2 million as of December 31, 2015. The primary cause was an increase in prepaid taxes of \$1.1 million due to the payment of estimated taxes during the three months ended September 30, 2016. Additionally, prepaid insurance increased \$191,000 due to the timing of payments on the annual renewal of our director's and officer's insurance policy and an increase in other prepaid expenses of \$189,000.

Other Assets

The following table summarizes our other assets as of the periods indicated (in thousands):

	September 30, December 31, Net		
	2016	2015	Change
Other receivables	\$ 1,972	\$ 12,578	\$(10,606)

Other assets	399	259	140
Total	\$ 12,516	\$ 22,295	\$(9,779)

The decrease of approximately \$9.8 million in other assets is primarily due to a decrease in other receivables of \$10.6 million; \$8.6 million of this amount relates to the cash received as a return of principal from our investment in CVC Credit Opportunities Fund, L.P., \$850,000 of this amount relates to a receivable accrued in December 2015 for a cash distribution from RCC 2015-CRE3; and \$400,000 relates to a decrease in the amount of a loan receivable due from LCF to fund new life settlement contracts, partially offset by other miscellaneous receivables. Additionally, there was a decrease in management fees receivable of \$1.1 million due to an incentive management fee earned on RCAM in December 2015 and paid in January 2016. These decreases were offset by an increase of \$1.4 million in life settlement contracts from the net acquisition of new contracts, an increase in \$409,000 of tax receivable due to the timing of tax payments made, and an increase of \$48,000 due to the acquisition of fixed assets at PCM.

We obtained three waivers of the EBITDA to fixed charge coverage ratio covenants for our CRE repurchase facilities and Wells Fargo CMBS repurchase facility as of September 30, 2016. We continuously monitor our compliance with all of the financial covenants. We are in compliance with all other financial covenants as defined in the respective agreements as of September 30, 2016.

Residential Investments – Term Repurchase Facility

In June 2014, our wholly-owned subsidiaries, RCC Resi Portfolio, RCC Resi TRS, and RCC Resi Depositor (the “Sellers”) entered into a master repurchase and securities contract (the “2014 Facility”) with Wells Fargo Bank, NA (“Wells Fargo”). Under the 2014 Facility, from time to time, the parties may enter into transactions in which the Sellers and Wells Fargo agree to transfer from the Sellers to Wells Fargo all of their right, title and interest to certain residential mortgage backed securities and other assets against the transfer of funds by Wells Fargo to the Sellers, with a simultaneous agreement by Wells Fargo to transfer back to the

Sellers such assets at a date certain or on demand, against the transfer of funds from the Sellers to Wells Fargo. In July 2016, we elected to terminate the 2014 Facility.

CRE - Term Repurchase Facilities

On February 27, 2012, our wholly-owned subsidiary, RCC Real Estate SPE 4 LLC ("SPE 4"), entered into a master repurchase and securities agreement (the "2012 Facility") with Wells Fargo to finance the origination of commercial real estate loans. In July 2016 in exchange for applicable structuring and extension fees, we entered into a fifth amendment of the 2012 Facility which extended the current term to July 2018 with three additional one year extension options exercisable at our option.

Residential Mortgage Financing Agreements

In February 2011, PCM entered into a master repurchase agreement (the "New Century Facility") with New Century Bank d/b/a Customer's Bank ("New Century") to finance the acquisition of residential mortgage loans. In August 2016, PCM entered into a tenth amendment of the New Century Facility which extended the facility through December 2016 and reduced the maximum borrowing amount from \$65.0 million to \$50.0 million through October 2016 then to \$35.0 million through November 2016 and finally to \$25.0 million through December 2016. The New Century Facility's tenth amendment increases the interest margins following the October 2016 maximum amount reduction. New Century's compliance with purchase requests will no longer be required effective November 2016. No other material changes were made to the New Century Facility's terms.

In July 2014, PCM entered into a master repurchase agreement (the "Wells Fargo Facility") with Wells Fargo to finance the acquisition of residential mortgage loans. In May 2016, PCM amended its agreement with Wells Fargo to increase the maximum of the amount of the Wells Fargo Facility from \$100.0 million to \$115.0 million for the period from May 2016 to June 2016. In June 2016, PCM amended its agreement with Wells Fargo to increase the maximum of the amount of the Wells Fargo Facility from \$115.0 million to \$150.0 million. In August 2016, PCM entered into a seventh amendment of the Wells Fargo Facility to extend the facility to November 2016. No other material changes were made to the Wells Fargo Facility's terms.

Securitizations

As of September 30, 2016, we had executed eight and currently retain equity in eight of these securitizations. Pertinent information about our securitizations that occurred during the first nine months of 2016 is as follows:

On January 1, 2016, we deconsolidated RREF CDO 2006-1, RREF CDO 2007-1, and Apidos Cinco CDO in accordance with guidance on consolidation. On September 28, 2016, Apidos Cinco CDO's trustee issued a notice to call the notes issued by the CDO.

On April 25, 2016, we called RREF CDO 2006-1 and in exchange for our equity notes and preference share, received the remaining collateral.

Senior Secured Revolving Credit Agreement

On August 4, 2016, we sold Northport TRS, LLC to CVC Credit Partners, an affiliated party, and to other third parties. This transaction included the assumption of the senior secured revolving credit agreement by the purchasers.

Equity

Total equity at September 30, 2016 was \$718.6 million and gave effect to \$42,000 of unrealized losses on our cash flow hedges and \$7.0 million of net unrealized gains on our available-for-sale portfolio, shown as a component of accumulated other comprehensive income. Equity at December 31, 2015 was \$826.8 million and gave effect to \$131,000 of unrealized losses on our cash flow hedges and \$835,000 of net unrealized losses on our available-for-sale portfolio, shown as a component of accumulated other comprehensive income. The decrease in equity during the nine months ended September 30, 2016 was principally due to the deconsolidation of RREF CDO 2006-1, RREF CDO 2007-1, Apidos Cinco CDO, Pelium Capital and RCM Global as a result of the consolidation guidance on variable interest entities which we adopted on January 1, 2016. Impairment losses taken on investment securities available-for-sale and intangible assets, provisions for loan loss, and the recognition of deferred tax asset valuation adjustments recorded during the three months ended September 30, 2016 also had a significant impact on the decrease of our equity from December 31, 2015 to September 30, 2016. In addition, equity also decreased due to stock

repurchases and distributions on our common stock and preferred stock in excess of earnings.

Per share calculations exclude unvested restricted stock, as disclosed on the consolidated balance sheet, of 496,756 (1) and 691,369 shares as of September 30, 2016 and December 31, 2015, respectively. The denominator for the calculation is 30,574,981 and 30,871,355 as of September 30, 2016 and December 31, 2015, respectively.

Pursuant to updated accounting guidance adopted on January 1, 2016 on consolidation of variable interest entities, we deconsolidated and recorded fair value adjustments on RREF CDO 2006-1 of (\$1.5 million) or (\$0.05) per share, RREF CDO 2007-1 of (\$9.8 million) or (\$0.32) per share and Apidos Cinco CDO of (\$5.6 million) or (\$0.18) per share all of which were reflected in book value as of September 30, 2016.

Under our repurchase plan, we purchased 2.8 million shares for \$35.2 million through September 30, 2016, including 800,000 shares for \$9.2 million during the nine months ended September 30, 2016.

Includes issuance of common shares from our dividend reinvestment plan of 9,000 shares and 195,000 net change of unvested shares of restricted stock.

Book value allocable to common shares is calculated as total stockholders' equity of \$719.8 million less preferred stock equity of \$270.1 million as of September 30, 2016.

Funds from Operations

We evaluate our performance based on several performance measures, including Funds From operations, or FFO, and Adjusted Funds From Operations, or AFFO, in addition to net income. We compute FFO in accordance with the standards established by the National Association of Real Estate Investment Trusts as net income (computed in accordance with GAAP), excluding gains or losses on the sale of depreciable real estate, the cumulative effect of changes in accounting principles, real estate-related depreciation and amortization, and after adjustments for unconsolidated/uncombined partnerships and joint ventures.

AFFO is a computation made by analysts and investors to measure a real estate company's operating performance. We calculate AFFO by adding or subtracting from FFO the impact of non-cash accounting items as well as the effects of items that we deem to be non-recurring in nature. We deem transactions to be non-recurring if a similar transaction has not occurred in the past two years, and if we do not expect a similar transaction to occur in the next two years. We adjust for these non-cash and nonrecurring items to analyze our ability to produce cash flow from on-going operations, which we have used to pay dividends to our shareholders. Non-cash adjustments to FFO include the following: impairment losses resulting from fair value adjustments on financial instruments; provisions for loan losses; equity investment gains and losses; straight-line rental effects; share based compensation expense; amortization of various deferred items and intangible assets; gains on sales of property that are wholly owned or owned through a joint venture; the cash impact of capital expenditures that are related to our real estate owned; and REIT tax planning adjustments, which primarily relate to accruals for owned properties for which we made a foreclosure election and adjustments to tax estimates with respect to the final resolution of foreclosed property when it is listed for sale. In addition, we calculate AFFO by adding and subtracting from FFO the realized cash impacts of the following: extinguishment of debt, reissuances of debt, sales of property and capital expenditures.

Management believes that FFO and AFFO are appropriate measures of our operating performance in that they are frequently used by analysts, investors and other parties in the evaluation of REITs. Management uses FFO and AFFO as measures of our operating performance, and believes they are also useful to investors because they facilitate an understanding of our operating performance apart from non-cash and non-recurring items, which may not necessarily be indicative of current operating performance and may not allow accurate period to period comparisons of our operating performance.

Although our calculations of AFFO may differ from the methodology used for calculating AFFO by other REITs and our FFO and AFFO may not be comparable to FFO and AFFO reported by other REITs, we also believe that FFO and AFFO may provide us and our investors with an additional useful measure to compare our performance with some other REITs. Neither FFO nor AFFO is equivalent to net income or cash generated from operating activities determined in accordance with GAAP. Furthermore, FFO and AFFO do not represent amounts available for management's discretionary use because of needed capital replacement or expansion, debt service obligations or other commitments or uncertainties. Neither FFO nor AFFO should be considered as an alternative to GAAP net income as an indicator of our operating performance or as an alternative to cash flow from operating activities as a measure of our liquidity.

Liquidity and Capital Resources

During the nine months ended September 30, 2016, our principal sources of liquidity were: liquidation of our investment in CVC Global Opportunities Fund, LP which returned \$8.6 million of principal in January 2016, proceeds from our CRE securitizations which purchased future funding commitments utilizing repaid principal of \$4.9 million, and \$104 million in proceeds from the sale of our Northport TRS, LLC middle market loan portfolio. These sources of liquidity principally provided the bulk of \$114.6 million of unrestricted cash we held at September 30, 2016. In addition as of September 30, 2016, we had capital available through a CMBS term facility to help finance the purchase of CMBS securities of \$81.4 million and \$312.4 million combined from two CRE term facilities for the origination of commercial real estate loans.

On February 27, 2012, we entered into a master repurchase and securities agreement (the "Wells CRE Facility") with Wells Fargo Bank, NA to finance the origination of commercial real estate loans. On October 31, 2014, we agreed to a modification of the terms of the Wells CRE Facility. The modification increases the facility maximum by \$150.0 million to \$400.0 million. On July 21, 2016, we agreed to a modification of the terms of the Wells CRE Facility. The modification extends the facility's maturity date to July 21, 2018, subject to three one-year extension rights which may extend the maturity to July 21, 2021. The amendment also modified certain financing rates and required debt yields. We paid extension fees as well as other standard closing costs.

On September 20, 2015, we entered into a master repurchase and securities agreement (the "Morgan Stanley Facility") with Morgan Stanley Bank, NA to finance the origination of commercial real estate loans. We paid a commitment fee as well as other standard closing costs. The Morgan Stanley Facility has a maximum capacity of \$250.0 million and an initial three year term that expires on September 10, 2018 with annual one year extension options.

In February 2011, we entered into a master repurchase and securities agreement ("Wells CMBS Facility") to finance the purchase of CMBS. The maximum amount of the Wells CMBS Facility is \$100.0 million and had an original two year term with a one year option to extend. In April 2014, we agreed to a third amendment of the facility, which extended the termination date to January 31, 2016. In May 2015, we agreed to a fourth amendment of the facility, which extended the termination date to January 31, 2017. We may enter into interest rate swaps and cap agreements for securities whose average life exceeds two years to mitigate interest rate risk under the Wells CMBS Facility.

During the second quarter 2015, we entered into the first and second amendments of Northport TRS, LLC's Senior Secured Revolving Credit Agreement ("Northport Credit Facility"), which increased the original commitment from \$225.0 million to \$300.0 million and secured \$85.0 million of additional availability, bringing the total available under the Northport Credit Facility to \$225.0 million. On August 1, 2016, we entered into a purchase agreement to sell our interest in Northport TRS, LLC for \$247.0 million. The transaction, which closed on August 4, 2016, included substantially all of the direct origination middle market loans and one syndicated loan with a par balance of \$257.3 million and the assumption of the Northport Credit Facility by the purchaser, for net proceeds of approximately \$104.2 million.

During the year ended December 31, 2015, our principal sources of liquidity were: net proceeds from our 8.0% convertible notes offering on January 13, 2015 of \$97.0 million, the return of equity at the close of RCC 2015-CRE3 on February 24, 2015 of \$78.0 million, the return of equity at the close of RCC 2015-CRE4 on August 18, 2015 of \$29.7 million, liquidation of Moselle CLO S.A. which returned \$30.0 million (which included \$1.0 million of proceeds from forward currency contracts), liquidation of Apidos CDO III in June 2015 which returned \$12.8 million of principal, cash flow from operations and \$3.0 million of net proceeds from the sale of our 8.25% Series B Preferred Stock through our at the market, or ATM, program in January 2015. These sources of liquidity provided the bulk of the \$78.8 million of unrestricted cash we held at December 31, 2015. In addition, we had capital available through a CMBS term facility to help finance the purchase of CMBS securities of \$74.4 million and \$425.0 million combined from two CRE term facilities for the origination of commercial real estate loans.

Our on-going liquidity needs consist principally of funds to make investments, make debt repurchases, make distributions to our stockholders and pay our operating expenses, including management fees. Our ability to meet our on-going liquidity needs will be subject to our ability to generate cash from operations and, with respect to our investments, our ability to maintain and/or obtain additional debt financing and equity capital together with the funds referred to above.

Since December 2013, we have met a significant portion of our debt funding requirements for CRE loans through securitizations. In February 2015, we closed a \$346.2 million CRE securitization, and in August 2015, we closed a \$312.9 million CRE securitization, which brings our total to just in excess of \$1.3 billion of mortgage loans financed during that period. We expect to derive substantial operating cash from our equity investments in the four newest securitizations, which do not have the same asset and interest coverage tests as are required by our legacy CRE CDOs. These CRE securitizations do not have reinvestment periods; however, principal payments, for a stipulated period, may be used to purchase funding participations with respect to existing collateral held outside of the securitizations. This will allow us to recycle some capital repaid and convert the designated

[\(Back to Index\)](#)

108

[\(Back to Index\)](#)

principal for funding companion loan participations, which would otherwise be used to pay down the most senior notes and reduce leverage and potential returns within the securitization.

Historically, we have financed a substantial portion of our portfolio investments through securitized notes that essentially match the maturity and repricing dates of these financing vehicles with the maturities and repricing dates of our investments, and, in view of current market conditions, we may continue to seek this type of securitization financing. We derive substantial operating cash from our equity investments in our securitizations which, if the securitizations fail to meet certain tests, will cease. Through September 30, 2016, we have not experienced difficulty in maintaining our existing securitized note financing and have passed all of the critical tests required by these financings. However, we cannot assure you that we will meet all such critical tests in the future. If we are unable to renew, replace or expand our sources of existing financing on substantially similar terms, we may be unable to implement our investment strategies successfully and may be required to liquidate portfolio investments. If required, a sale of portfolio investments could be at prices lower than the carrying value of such assets, which would result in losses and reduced income.

The following table sets forth the distributions made and coverage test summaries for each of our securitizations for the periods presented (in thousands):

(1) Interest coverage includes annualized amounts based on the most recent trustee statements.

(2) Interest coverage cushion represents the amount by which annualized interest income expected exceeds the annualized amount payable on all classes of securitization notes senior to our preference shares.

(3) Overcollateralization cushion represents the amount by which the collateral held by the securitization issuer exceeds the maximum amount required.

(4) Apidos Cinco CDO, RREF CDO 2006-1, and RREF CDO 2007-1 were deconsolidated as a result of the new consolidation accounting guidance adopted effective January 1, 2016.

(5) The reinvestment period for Resource Capital Corp. 2014-CRE2 ended in July 2016. The indenture does not contain any interest coverage test provisions.

Resource Capital Corp. 2015-CRE3 closed on February 24, 2015; the first distribution was in March 2015. There is no reinvestment period; however, principal repayments, for a period ending in February 2017, may be designated (6) to purchase loans held outside of the securitization that represent the funded commitments of existing collateral in the securitization that were not funded as of the date the securitization was closed. Additionally, the indenture does not contain any interest coverage test provisions.

(7) Resource Capital Corp. 2015-CRE4 closed on August 18, 2015; the first distribution was in September 2015. There is no reinvestment period; however, principal repayments, for a period ending in August 2017, may be designated

to purchase loans held outside of the securitization that represent the funded commitments of existing collateral in the securitization that were not funded as of the date the securitization was closed. Additionally, the indenture does not contain any interest coverage test provisions.

Moselle CLO S.A. was acquired on February 24, 2014 and the reinvestment period for this securitization expired (8) prior to the acquisition. In the fourth quarter of 2014 we began to liquidate Moselle CLO S.A. and, by January 2015, all of the assets were sold.

(9) RREF CDO 2006-1 was liquidated on April 25, 2016 and as a result, all \$66.3 million of the remaining assets were returned to us in exchange for our preference shares and equity notes in the securitization.

At October 31, 2016, RSO's liquidity is derived from three primary sources:

- unrestricted cash and cash equivalents of \$108.9 million and restricted cash of \$30,000 in margin call accounts;
- capital available for reinvestment in two of RSO's CRE securitizations of \$4.9 million, all of which is designated to finance future funding commitments on CRE loans; and
- loan principal repayments of \$491,000 that will pay down outstanding CLO note balances, as well as interest collections of \$80,000.

We also had a combined \$297.0 million available through two term financing facilities to finance the origination of CRE loans and \$74.3 million available through a term financing facility to finance the purchase of CMBS.

Our leverage ratio, defined as the ratio of borrowings to stockholders' equity may vary as a result of the various funding strategies we use. As of September 30, 2016 and December 31, 2015, our leverage ratio was 1.9 times and 2.3 times, respectively. Our leverage has decreased primarily as a result of the deconsolidation of RREF CDO 2006-1, RREF CDO 2007-1 and Apidos Cinco CDO, offset by the reduction of stockholder's equity due to credit impairments and the fair value adjustment recorded through retained earnings on those deconsolidated entities, as well as repurchases of our common stock and Series B preferred stock.

Several of our legacy CDOs and CLOs have been liquidated over the last few years. This trend continued in 2016. On April 25, 2016, we called and liquidated our investment in RREF CDO 2006-1. Our one remaining legacy CRE securitization and one remaining bank loan securitization have seen substantial pay downs of notes issued under their indentures as the underlying collateral has paid down or paid off in full. The table and footnotes below indicate current assets and liabilities in these legacy securitizations as well as our remaining equity and, in the case of our legacy CRE CDO, our share of notes repurchased and discounted purchase price of those notes. In the case of the CRE CDO, we expect to have assets distributed to us once the outstanding notes held by third parties have been paid off, which we anticipate in the fourth quarter of 2016. Once the loan assets are distributed we expect to be able to finance the loan assets on existing credit facilities.

The following tables presents the legacy securitizations' (deconsolidated at January 1, 2016) remaining equity as of September 30, 2016:

Name of Securitization	Fair Value of Asset Collateral	Cash	Total Assets	Outstanding Notes Held by Third Parties (at par)	Net Equity Held by RSO
RREF CDO 2007-1 ⁽¹⁾	\$ 132,729	\$—	\$ 132,729	\$ 34,733	\$ 97,996
Apidos Cinco CDO	\$ 59,889	\$ 16,277	\$ 76,166	\$ 54,861	\$ 21,305

Subsequent to the closing of the securitization, we purchased notes in RREF CDO 2007-1 at substantial discounts to par. Certain of those notes have either been repaid or canceled as of September 30, 2016. Of those repurchased notes that have not been repaid, cash gains on the extinguishment of debt of \$13.8 million has not been recognized (1) in AFFO as of September 30, 2016 on \$20.3 million of notes purchased at a weighted average price of \$31.81.

Additionally, of those notes that were not canceled and included in the net equity held by us are \$26.0 million of notes purchased at a weighted average price of \$32.40 with \$17.6 million that has not been recognized in AFFO as of September 30, 2016.

Subsequent to the closing of the securitization, we purchased notes in RREF CDO 2006-1 at substantial discounts to par and certain of those notes had either been repaid or canceled. Of those repurchased notes that have not been repaid or canceled, cash gains on the extinguishment of debt of \$21.4 million has not been recognized in AFFO prior to liquidation on \$32.4 million of notes purchased at a weighted average price of \$33.85. We were able to finance a portion of the collateral after liquidation and recorded a cash gain on extinguishment adjustment of \$6.3 million during the nine months ended September 30, 2016 and \$15.1 million of cash gains remain unrecognized in AFFO.

Distributions

In order to maintain our qualification as a REIT and to minimize corporate-level income tax on our income, we intend to make regular quarterly distributions of all or substantially all of our net REIT taxable income to holders of our common stock. This requirement can impact our liquidity and capital resources.

(1) Contractual commitments include \$600,000 of interest expense payable through the maturity dates on our repurchase agreements.

(2) Contractual commitments do not include \$29.7 million and \$30.4 million of estimated interest expense payable through the maturity dates of June 2036 and October 2036, respectively, on our trust preferred securities.

(3) Contractual commitments do not include \$17.5 million of interest expense payable through the maturity date of December 1, 2018 on our 6.0% Convertible Senior Notes.

(4) Contractual commitments do not include \$28.4 million of interest expense payable through the maturity date of January 15, 2020 on our 8.0% Convertible Senior Notes.

(5) Unfunded commitments on our originated CRE loans generally fall into two categories: (1) pre-approved capital improvement projects; and (2) new or additional construction costs subject, in each case, to the borrower meeting specified criteria. Upon completion of the improvements or construction, we would receive additional loan interest income on the advanced amount.

(6) On August 4, 2016, we sold Northport TRS, LLC. This transaction included the assumption of the senior secured revolving credit agreement.

(7) Calculated only for the next 12 months based on our current equity, as defined in our management agreement. Our management agreement also provides for an incentive fee arrangement that is based on operating performance. Because the incentive fee is not a fixed and determinable amount, it is not included in this table.

(8) Contractual commitments on borrowings are presented net of deferred debt issuance costs.

(9) We have committed to invest up to \$50.0 million in Pearlmark Mezzanine Realty Partners IV, L.P. The commitment termination date ends the earlier of when the original commitment is fully funded, or the fifth anniversary following the final closing date of June 24, 2015.

Off-Balance Sheet Arrangements

General

As of September 30, 2016, we did not maintain any relationships with unconsolidated entities or financial partnerships that were established for the purpose of facilitating off-balance sheet arrangements or contractually narrow or limited purposes, although we do have interests in unconsolidated entities not established for those purposes. Except as set forth below, as of September 30, 2016, we had not guaranteed obligations of any such unconsolidated entities or entered into any commitment or letter of intent to provide additional funding to any such entities.

Unfunded Commercial Real Estate Loan Commitments

In the ordinary course of business, we make commitments to borrowers whose loans are in our commercial real estate loan portfolio to provide additional loan funding in the future. These commitments generally fall into two categories:

(1) pre-approved capital improvement projects; and (2) new or additional construction costs. Disbursement of funds pursuant to these commitments is subject to the borrower meeting pre-specified criteria. Upon disbursement of funds, we receive loan interest income on any such advanced funds. As of September 30, 2016, we had 40 loans with unfunded commitments totaling \$67.3 million, which we intend to fund through principal repayments on other loans in our portfolio and the ability to fund in our newest securitizations within a specified time period and cash flow from normal operating activities. These commitments are subject to the same underwriting requirements and ongoing portfolio maintenance as are the on-balance sheet financial instruments that we

hold. Since these commitments may expire without being drawn upon, the total commitment amount does not necessarily represent future cash requirements.

Unfunded Middle Market Loan Commitments

As of September 30, 2016, we have one middle market loan, after the sale of Northport TRS, LLC, which had an unfunded commitment totaling \$950,000. We intend to fund this commitment through cash flow from normal operating activities. Disbursement of funds pursuant to this commitment is subject to the borrower meeting pre-specified criteria and in some instances, discretion. Since this commitment may expire without being drawn upon, the total commitment amount does not necessarily represent future cash requirements.

Hedging Instruments

A significant market risk to us is interest rate risk. Interest rates are highly sensitive to many factors, including governmental monetary and tax policies, domestic and international economic and political considerations and other factors beyond our control. Changes in the general level of interest rates can affect net interest income, which is the difference between the interest income earned on interest-earning assets and the interest expense incurred in connection with the interest-bearing liabilities, by affecting the spread between the interest-earning assets and interest-bearing liabilities. Changes in the level of interest rates also can affect the value of our interest-earning assets and our ability to realize gains from the sale of these assets. A decline in the value of our interest-earning assets pledged as collateral for borrowings could result in the counterparties demanding additional collateral pledges or liquidation of some of the existing collateral to reduce borrowing levels.

We are also exposed to foreign currency exchange risk, a form of risk that arises from the change in price of one currency against another. Substantially all of our revenues are transacted in U.S. dollars; however, a portion of our capital is exposed to other currencies, primarily the Euro and, to a lesser extent, the pound sterling. To address this market risk, we generally hedge our foreign currency-denominated exposures (typically investments in debt instruments, including forecasted principal and interest payments) with foreign currency forward contracts. We classify these hedges as fair value hedges, which are hedges that mitigate the risk of changes in the fair values of assets, liabilities, and certain types of firm commitments. We record changes in the fair value of derivatives designated and effective as fair value hedges in earnings offset by corresponding changes in the fair values of the hedged items.

The following tables present the fair value of our derivative financial instruments as well as their classification on our consolidated balance sheets and on the consolidated statements of operations for the years presented:

On January 1, 2016, we deconsolidated RREF CDO 2006-1 and RREF CDO 2007-1 in accordance with guidance on consolidation. This resulted in the deconsolidation of six CRE interest rate swaps.

During April 2016, we requested and canceled our remaining interest rate swap contract through accumulated other comprehensive income (loss), to be amortized through earnings over the life of the remaining debt. As of September 30, 2016, the Company had no interest rate swap contracts outstanding.

ITEM 3 . QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

As of September 30, 2016, the primary component of our market risk was interest rate risk, as described below. While we do not seek to avoid risk completely, we do seek to assume risk that can be quantified from historical experience, to actively manage that risk, to earn sufficient compensation to justify assuming that risk and to maintain capital levels consistent with the risk we undertake or to which we are exposed.

Effect on Fair Value

A component of interest rate risk is the effect changes in interest rates will have on the fair value of our assets. We face the risk that the fair value of our assets will increase or decrease at different rates than that of our liabilities, including our hedging instruments.

Primarily, we assess our interest rate risk by estimating the duration of our assets and the duration of our liabilities. Duration essentially measures the market price volatility of financial instruments as interest rates change. Generally, we calculate duration using various financial models and empirical data. Different models and methodologies can produce different duration numbers for the same securities.

The following sensitivity analysis tables present, at September 30, 2016 and December 31, 2015, the estimated impact on the fair value of our interest rate-sensitive investments and liabilities of changes in interest rates, assuming rates instantaneously fall 100 basis points and rise 100 basis points (dollars in thousands):

	September 30, 2016		
	Interest rates fall 100 basis points	Unchanged	Interest rates rise 100 basis points
CMBS – private placement ⁽¹⁾ :			
Fair value	\$71,386	\$71,087	\$70,794
Change in fair value	\$299	\$—	\$(293)
Change as a percent of fair value	0.42 %	— %	(0.41)%
	December 31, 2015		
	Interest rates fall 100 basis points	Unchanged	Interest rates rise 100 basis points
CMBS – private placement ⁽¹⁾ :			
Fair value	\$145,175	\$144,178	\$143,201
Change in fair value	\$997	\$—	\$(977)
Change as a percent of fair value	0.69 %	— %	(0.68)%
Hedging instruments:			
Fair value	\$(4,713)	\$(3,459)	\$(1,704)
Change in fair value	\$(1,254)	\$—	\$1,755
Change as a percent of fair value	(36.25)%	— %	50.74 %

(1)Includes the fair value of available-for-sale investments that are sensitive to interest rate change.

For purposes of the table, we have excluded our investments with variable interest rates that are indexed to LIBOR. Because the variable rates on these instruments are short-term in nature, we are not subject to material exposure to movements in fair value as a result of changes in interest rates.

[\(Back to Index\)](#)

It is important to note that the impact of changing interest rates on fair value can change significantly when interest rates change beyond 100 basis points from current levels. Therefore, the volatility in the fair value of our assets could increase significantly when interest rates change beyond 100 basis points from current levels. In addition, other factors impact the fair value of our interest rate-sensitive investments and hedging instruments, such as the shape of the yield curve, market expectations as to future interest rate changes and other market conditions. Accordingly, in the event of changes in actual interest rates, the change in the fair value of our assets would likely differ from that shown above and such difference might be material and adverse to our stockholders.

Risk Management

To the extent consistent with maintaining our status as a REIT, we seek to manage our interest rate risk exposure to protect our portfolio of fixed-rate commercial real estate mortgages and CMBS and related debt against the effects of major interest rate changes. We generally seek to manage our interest rate risk by:

- monitoring and adjusting, if necessary, the reset index and interest rate related to our mortgage-backed securities and our borrowings;
- attempting to structure our borrowing agreements for our CMBS to have a range of different maturities, terms, amortizations and interest rate adjustment periods; and
- using derivatives, financial futures, swaps, options, caps, floors and forward sales, to adjust the interest rate sensitivity of our fixed-rate commercial real estate mortgages and CMBS and our borrowing which we discuss in “Financial Condition-Hedging Instruments.”

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Securities Exchange Act of 1934 reports is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, our management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and our management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

Under the supervision of our Chief Executive Officer and Chief Financial Officer, we have carried out an evaluation of the effectiveness of our disclosure controls and procedures as of the end of the period covered by this report. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective at the reasonable assurance level.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting during the three and nine months ended September 30, 2016 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II

ITEM 1. LEGAL PROCEEDINGS

In September 2015, Daren Levin filed a putative class action in the United States District Court for the Southern District of New York on behalf of all persons who purchased our common stock between March 2, 2015 and August 4, 2015. In November 2015, the Court appointed Douglas Drees as the lead plaintiff in the action, and thereafter entered a stipulation and order directing the lead plaintiff to file an amended complaint. In February 2016, the lead plaintiff filed an amended complaint, alleging that we and certain of our officers and directors materially misrepresented certain risks of our commercial loan portfolio and our processes and controls for assessing the quality of our portfolio. Based on these allegations, the amended complaint asserts claims for violation of the securities laws and seeks a variety of relief, including unspecified monetary damages as well as costs and attorneys' fees. In April 2016, we filed a motion to dismiss the amended complaint, which the court denied on October 5, 2016; and the discovery process is now expected to commence. We believe the amended complaint is without merit and intend to defend ourselves vigorously.

In December 2015, Josh Reaves filed a shareholder derivative suit in the Supreme Court of New York alleging that our directors and certain officers breached their fiduciary duties by causing us to misrepresent certain risks of our commercial loan portfolio, by failing to employ adequate internal and financial controls and by failing to disclose the alleged internal control deficiencies. The complaint purports to seek relief on behalf of us for unspecified damages as well as costs and attorneys' fees. We believe that the plaintiff, who failed to make a pre-suit demand on the board of directors, lacks standing to assert claims derivatively on our behalf. In April 2016, the parties entered into a stipulation staying this proceeding until such time as the court ruled on the motion to dismiss the Levin action referenced above or certain other triggering events occur. That stay has now been lifted because the motion was to dismiss the Levin action was denied.

PCM is a party to various claims and legal proceedings at various times. If PCM believes that a loss arising from any of these matters is probable and can be reasonably estimated, the loss is recorded. Currently, the only litigation involving PCM relates to claims for repurchases or indemnifications on loans that PCM has sold to investors. Such claims are included in the reserve for mortgage repurchases and indemnifications. The reserve for mortgage repurchases and indemnifications was \$5.2 million and \$3.7 million as of September 30, 2016 and December 31, 2015, respectively.

Loans on one-to-four family residential mortgages originated by PCM are sold to various financial institutions and governmental entities with representations and warranties that are usual and customary for the industry. In the event of a breach of any of the representations and warranties related to a loan sold, PCM may be required to indemnify the investor against future losses, repurchase the mortgage loan or reimburse the investor for actual losses incurred (referred to as "make whole payments"). The maximum exposure to credit loss in the event of an indemnification or loan repurchase would be the unpaid principal balance of the loan along with any premium paid by the investor when the loan was purchased, accrued but unpaid interest and other minor cost reimbursements. This maximum exposure is at least partially mitigated by the value of the collateral underlying the mortgage loan.

On May 13, 2014, ResCap Liquidating Trust ("ResCap"), as successor to Residential Funding Company, LLC ("RFC"), filed an adversary proceeding against PCM in United States Bankruptcy Court of the Southern District of New York. ResCap has sued some 90 sellers of residential mortgage loans for alleged breaches of warranty in various loans sold to RFC. RFC contends that such breaches caused it damages from loan losses and liability to other transferee's of the loans.

As of September 30, 2016, outstanding demands for indemnification, repurchase or make whole payments totaled approximately \$20.5 million, of which a substantial portion related to loans sold to four investors prior to 2011. In October 2016, PCM reached agreements to settle repurchase claims with two of the four investors, including those subject to the litigation initiated by ResCap. Pursuant to the settlement agreements, \$2.1 million was fully reserved

for at September 30, 2016. These settlement agreements reduce the amount of outstanding demands against PCM for indemnification, repurchase and make whole payments to approximately \$10.0 million.

The most significant remaining make whole demands against PCM are from Lehman Brothers Holding, Inc. (“LBHI”). On February 3, 2016, LBHI filed an adversary proceeding against PCM in United States Bankruptcy Court of the Southern District of New York. LBHI has sued approximately 145 sellers of residential mortgage loans for alleged breaches of warranty in various loans sold to it. LBHI contends that such breaches caused it damages from loan losses and liability to other transferees of the loans. PCM intends to defend the action vigorously.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

On August 3, 2015, our Board of Directors authorized a program to repurchase up to \$50.0 million of our outstanding equity and debt securities. In March 2016, the Board of Directors approved a new securities repurchase program for up to \$50.0 million of our outstanding securities, which replaced the August 2015 repurchase plan.

The following tables provide information about our common stock and 8.25% Series B Preferred Stock repurchases made during the nine months ended September 30, 2016 in accordance with the previously mentioned stock repurchase program:
