**Power Generation Increases 11.24% in the first THREE QUARTERS of 2007
OVERSEAS REGULATORY ANNOUNCEMENT**

This announcement is made pursuant to Rule 13.09 of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited.

Huaneng Power International, Inc. (the "Company") announced its power generation in the first three quarters of 2007.

Based on the Company's preliminary statistics, for the first three quarters up to 30 September 2007, the Company's total power generation based on a consolidated basis amounted to 124.521 billion kWh, an increase of 11.24% over the same period last year. The power generation of Xindian Power Plant, Luohuang Power Plant, Huaiyin Power Plant, Taicang Power Plant, Shanghai Combined Cycle and Nanjing Power Plant increased significantly as compared to the same period last year.

The increase in power generation of the Company's power plants was mainly attributable to the following reasons:

1. By reinforcing its strategy research, the Company has adopted effective sales and marketing strategies, thereby capturing more market shares.
2. The stable operation of the newly operated generating units at Yuhuan Power Plant (Phase I), Luohuang Power Plant (Phase III) and Huaiyin Power Plant (Phase III) contributed to the growth of the Company's power generation.
3. The steady increase of power demand in the regions where the Company's power plants are located provided favourable market conditions for more power generation by the Company's power plants.

The power generation of each of the Company's power plants in the first three quarters of 2007 was listed below (in billion kWh):

Dalian	7.808	Taicang	7.992
