2.3 Business Review

In the first quarter of 2010, China's economy further rebounded. Encouraged by the Chinese government's policies for boosting domestic demand and improving the people's livelihood the domestic demand for petroleum, natural gas and petrochemical products grew steadily. The Company took various proactive measures to expand the market, optimize the structure of products and increase the gross output. Meanwhile, high priority was placed on the safe operation, saving energy and reducing energy consumption, so the production of natural gas, refinery throughput of crude oil, sales volume of oil products and production of ethylene increased substantially, achieving good production and business results.

Exploration & Production: The Company sped up two-dimension and three-dimension seismic field acquisition and exploration, strengthened its work on non-conventional oil and gas resources. Meanwhile, the Company devoted more efforts to increase the recovery rate and single well capacity. Despite the impact of nature disasters such as blizzard and sea ice, the production of crude oil remained stable. The pipeline of Sichuan-to-East China gas project was put into safe and steady operation. In the first quarter, the output of crude oil amounted to 10.3806 million tonnes, a year-on-year reduction of 0.14%, and the output of natural gas amounted to 2.794 billion cubic meters, a year-on-year growth of 40.97%.

Oil Refining: The Company kept the refining facilities running at high capacity, made more efforts to adjust the structure of products and, according to the needs of production, increased the output of chemical light oil, as well as high value-added products such as asphalt, petroleum coke and liquefied petroleum gas, etc. Meanwhile, the Company endeavoured to organise new constructions and to put revamped / expanded facilities into operation. In the first quarter, the Company processed 49.5041 million tonnes of crude oil, a year-on-year growth of 20.42%.

Marketing and Distribution: The Company adapted itself to the changing market by expanding the market and enhancing the quality of services. It also developed non-oil business and improved the functions of service stations. Meanwhile, green service channels were opened to guarantee oil supply for supporting drought relief. In the first quarter, the domestic sales of oil products amounted to 32.8382 million tonnes, a year-on-year growth of 24.25%. The total number of service stations increased by 0.33%.

Chemicals: The Company endeavoured to strengthen the connection among production, sales and research, and optimize its production plan and structure of products according to the market demand. The operation of chemical facilities was kept at high capacity, and Tianjin ethylene project was put into smooth production. It devoted more efforts to develop new products, and increase the marketable and high value-added products. In the first quarter, the production of ethylene and synthetic resin hit 2.028 million tonnes and 2.9167 million tones respectively, a year-on-year growth of 36.29% and 20.72% respectively.

3.2 The progress of significant events and their impacts as well as the analysis and explanations for the solutions

3.2.1 Acquisition of shares and loans of SSI owned by International Petroleum Exploration & Production Limited

On March 26, 2010, the fifth meeting of the Fourth Session of the Board of Directors of Sinopec Corp. approved the proposal of acquisition of shares and loans of Sonangol Sinopec International Limited (“SSI”) owned by China Petrochemical Corporation. The consideration for the Target Shares is USD1.678 billion, and the consideration for the loan is USD 779,119,000. The aggregate consideration for the shares and the loan is USD 2.457 billion (equivalent to approximately RMB 16.776 billion). The SSI owns 50% equity of Angola Block 18, which is a deep sea area and divided into the east zone and the west zone. Eight oil fields have been discovered and exploration success rate reaches 100%. The east zone was put into production in October 2007. The daily output capacity is 0.24 million barrels, which is in an upward trend period. Through this acquisition, Sinopec Corp. will enter into overseas oil and gas resources market, thus a good foundation laid for future acquisition.
