FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934

For the quarterly period ended March 31, 2014

Or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 001-33783

THOMPSON CREEK METALS COMPANY INC.

(Exact name of registrant as specified in its charter)

British Columbia, Canada

(State or other jurisdiction of

incorporation or organization)

26 West Dry Creek Circle, Suite 810, Littleton, CO

(Address of principal executive offices)

(303) 761-8801

(Registrant's telephone number, including area code)

98-0583591

(I.R.S. Employer

Identification No.)

80120

(Zip code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer		Non-accelerated filer <input type="checkbox"/>	
<input checked="" type="checkbox"/>		(Do not check if a	Smaller reporting
	Accelerated filer <input type="checkbox"/>	smaller reporting	company <input type="checkbox"/>
		company)	

Indicate by check mark whether the registrant is a shell company (as defined by Rule 12b-2 of the Act). Yes No
As of May 9, 2014, there were 171,757,166 shares of the registrant's common stock, no par value, outstanding.

THOMPSON CREEK METALS COMPANY INC.

Notes to the Condensed Consolidated Financial Statements- Unaudited

(US dollars in millions, except per share amounts)

1. Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q. In compliance with those instructions, certain information and footnote disclosures normally included in consolidated financial statements prepared in accordance with generally accepted accounting principles in the United States ("US GAAP") have been condensed or omitted. This report should be read in conjunction with Thompson Creek Metals Company Inc.'s ("TCM," "Company," "we," "us" or "our") consolidated financial statements and notes contained in its Annual Report on Form 10-K for the year ended December 31, 2013 (the "2013 Form 10-K") filed with the Securities and Exchange Commission ("SEC"). The information furnished herein reflects all adjustments which are, in the opinion of management, necessary for a fair statement of the results for the interim periods reported. Operating results for the three months ended March 31, 2014 are not necessarily indicative of the results that may be expected for any other quarter or for the year ending December 31, 2014.

The preparation of financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. TCM bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. Accordingly, actual results may differ significantly from these estimates under different assumptions or conditions.

The condensed consolidated financial statements include the accounts of TCM and its subsidiaries. Intercompany accounts and transactions have been eliminated in consolidation. Financial amounts are presented in United States ("US") dollars unless otherwise stated. References to C\$ are Canadian dollars.

2. Accounts Receivable, Net

Accounts receivable are carried at their estimated collectible amounts. Accounts receivable included net trade receivables of \$49.5 million, and other receivables of \$5.0 million at March 31, 2014 and trade receivables of \$41.6 million and other receivables of \$6.2 million at December 31, 2013. Other receivables consisted of \$1.8 million and \$3.3 million of Goods and Services Sales Tax refunds and Canadian Harmonized Sales Tax refunds as of March 31, 2014 and December 31, 2013, respectively.

3. Inventory

The carrying value of product inventory was as follows:

(US\$ in millions)	March 31, 2014	December 31, 2013
Finished product	\$80.1	\$67.3
Work-in-process	14.7	28.0
Stockpiled ore	25.2	26.8
	\$120.0	\$122.1

As of March 31, 2014 and March 31, 2013, the carrying value of TCM's concentrate and molybdenum inventory exceeded the market value, resulting in write downs of \$6.9 million and \$5.6 million, respectively.

The following table sets forth the inventory write downs in the accompanying Condensed Consolidated Statements of Operations and Comprehensive Income (Loss) for the periods presented:

Table of Contents

THOMPSON CREEK METALS COMPANY INC.

Notes to the Condensed Consolidated Financial Statements (Continued) - Unaudited

(US dollars in millions, except per share amounts)

3. Inventory (Continued)

(US\$ in millions)	Three Months Ended	
	March 31, 2014	March 31, 2013
Canadian Operations Molybdenum		
Operating expense	\$5.1	\$4.7
Depreciation, depletion and amortization	1.8	0.9
	\$6.9	\$5.6

4. Property, Plant, Equipment and Development, Net

Property, plant, equipment and development, net, was comprised of the following:

(US\$ in millions)	March 31, 2014	December 31, 2013
Mining properties and mineral reserves	\$771.7	\$768.6
Mining and milling equipment and facilities	1,586.1	1,661.2
Processing facilities	168.8	168.5
Construction-in-progress	47.4	42.7
Other	15.9	18.3
	2,589.9	2,659.3
Less: Accumulated depreciation, depletion and amortization	(153.1) (121.3
	\$2,436.8	\$2,538.0

The construction-in-progress balance included \$37.6 million and \$33.2 million related to Mt. Milligan Mine as of March 31, 2014 and December 31, 2013, respectively. The construction-in-progress balance at March 31, 2014 consisted of \$28.5 million related to construction of a permanent operations residence, \$6.1 million for Phase 2 of the tailings facility system and \$3.0 million for other items for Mt. Milligan Mine.

5. Derivative Financial Instruments

TCM enters into various derivative financial instruments in the normal course of operations to manage exposure to the market prices for its products, including copper, gold and molybdenum. TCM does not apply hedge accounting to its derivative instruments. Accordingly, changes in fair value of derivative instruments are recorded in the Condensed Consolidated Statements of Operations and Comprehensive Income (Loss), except those contracts for which TCM has elected to apply the normal purchases and normal sales scope exception.

The following table provides details about the fair values of TCM's derivative assets and liabilities:

(US\$ in millions)	Fair Value as of	
	March 31, 2014	December 31, 2013
Assets ^(a)		
Commodity contracts	\$0.3	\$0.2
Forward currency contracts	0.3	—
Total	\$0.6	\$0.2

(a) TCM's derivative assets are included in prepaid expenses and other current assets, and derivative liabilities are included in other current liabilities. Certain derivative instruments, such as provisionally-priced contracts and forward currency contracts, have an immaterial fair value as of the balance sheet dates, while the change in the fair value during the three months ended March 31, 2014 and 2013 are disclosed below. TCM is exposed to credit risk when counterparties with which it has entered into derivative transactions are unable to pay. To reduce counterparty credit exposure, TCM deals

Table of Contents

THOMPSON CREEK METALS COMPANY INC.

Notes to the Condensed Consolidated Financial Statements (Continued) -Unaudited

(US dollars in millions, except per share amounts)

5. Derivative Financial Instruments (Continued)

primarily with large, credit-worthy financial institutions and companies and limits credit exposure to each. TCM believes the counterparties to the contracts to be credit-worthy entities and, therefore, TCM believes credit risk of counterparty non-performance is relatively low, and, as such, the fair value of the derivatives has not been adjusted. The following table sets forth the gains (losses) on derivative instruments for periods presented:

Derivative Type	Statement of Operations Classification	Three Months Ended	
		March 31, 2014	March 31, 2013
Royal Gold hedges	Gold sales	\$0.1	\$—
Other commodity contracts	Operating expenses	\$—	\$0.1
Forward currency contracts	Gain (loss) on foreign exchange, net	\$0.6	\$—

Royal Gold Hedges and Other Commodity Contracts

TCM must satisfy its obligation under the Gold Stream Arrangement (discussed in Note 9) by delivering gold to Royal Gold after TCM receives payment from third party purchasers, including offtakers and traders, that purchase concentrate from Mt. Milligan Mine ("MTM Customers"). In connection with TCM's first 12 shipments of concentrate from Mt. Milligan Mine, TCM must pay Royal Gold a percentage of the provisional payments received from MTM Customers within two days of receiving the provisional payment. The percentage of the provisional payments required to be paid to Royal Gold declines over the 12 shipments, declining to nil after the 12th shipment for the life of the agreement. After the 12th shipment, TCM is required to pay Royal Gold upon receipt of final payment from the applicable MTM Customers.

TCM receives payment from MTM Customers in cash, thus requiring the purchase of gold in order to satisfy the obligation to pay Royal Gold in gold. In order to hedge its gold price risk that arises when physical purchase and concentrate sales pricing periods do not match, TCM has entered into certain forward gold purchase and sales contracts where it purchases gold at an average price during a quotational period and sells gold at a spot price. TCM records its commodity contracts at fair value using a market approach based on observable quote market prices and contracted prices.

In connection with the sale of concentrate from Mt. Milligan Mine, TCM is exposed to price fluctuations between the concentrate shipment, provisional payment and final payment. In order to hedge the price risk for the metals contained in concentrate, TCM has entered into certain forward copper and gold purchase and sale contracts where it purchases copper or gold at an average price during a quotational period and sells copper or gold at a spot price. Additionally, TCM has entered into zero cost collars where it agrees with a counterparty to a floor and ceiling relative to future prices of gold. If the gold price is below the floor, the counterparty pays TCM the difference between the price and the floor. If the gold price is above the ceiling, TCM pays the counterparty the difference between the price and the ceiling. TCM records its commodity contracts at fair value using a market approach based on observable quote market prices and contracted prices. TCM is using hedging activities to protect the price risk for the variable of time in the purchase contracts.

Additionally, TCM has entered into a natural gas hedge at the Langeloth Facility to fix the prices paid for natural gas used in operations.

The following table provides details of TCM's commodity contracts as of March 31, 2014:

	Quantity	Sell Price	Buy Price	Maturities Through
Royal Gold Hedge Sales (oz)	14,785	\$1,288 - \$1,321	TBD	May 2014 - June 2014
Royal Gold Hedge Purchases (oz)	4,440	TBD	TBD	May 2014 - August 2014
Forward Gold Sales (oz)	7,300	\$1,290 - \$1,292	TBD	May 2014 - October 2014
Forward Copper Sales (lb)	4,850,170	\$3.02	TBD	April 2014
Natural Gas Purchase (Dt)	94,840	n/a	\$3.49 - \$3.60	April 2014 - September 2014

Edgar Filing: Thompson Creek Metals Co Inc. - Form 10-Q

	Quantity	Put Price	Call Price	Maturities Through
Gold Collars (oz)	3,000	\$1,200	\$1,365 - \$1,368	April 2014 - October 2014

9

Table of Contents

THOMPSON CREEK METALS COMPANY INC.

Notes to the Condensed Consolidated Financial Statements (Continued) -Unaudited

(US dollars in millions, except per share amounts)

5. Derivative Financial Instruments (Continued)

Forward Currency Contracts

TCM transacts business in various currencies in the normal course of its operations and for capital expenditures. In addition, with all of its revenues denominated in US dollars, TCM has an ongoing foreign exchange risk with respect to its Canadian operations. To help mitigate this risk, TCM has entered into foreign currency forward contracts in which it has agreed to buy Canadian dollars at an agreed-upon rate. TCM records its currency contracts at fair value using a market approach based on observable quoted exchange rates and contracted notional amounts. As of March 31, 2014, TCM had two open foreign currency option contracts to buy C\$20 million at exchange rates ranging from \$1.12 to \$1.13 which will settle in April 2014.

Fixed-Priced Contracts

TCM has entered into certain sales contracts pursuant to which it sells future production at fixed prices. These fixed prices may be different than the quoted market prices at the date of sale. The Gold Stream Arrangement contains an agreement to sell gold at a fixed price, but it does not meet the definition of a derivative instrument.

The following table sets forth TCM's outstanding fixed-priced sales contracts as of March 31, 2014:

	Quantity	Sell price	Maturities Through
Molybdenum fixed price sales (000's lb)	194	\$13.25	September 2015

6. Fair Value Measurement

US GAAP includes a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 inputs) and the lowest priority to unobservable inputs (Level 3 inputs). TCM's policy is to recognize transfers into and out of Level 3 as of the actual date of the event or change in circumstances. There were no transfers into or out of Level 1, 2 or 3 during the three months ended March 31, 2014.

The following tables set forth TCM's financial assets and liabilities measured at fair value by level within the US GAAP fair value hierarchy. As required, assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement, as discussed in Note 2 to the 2013 Form 10-K.

(US\$ in millions)	Fair Value at March 31, 2014			
	Total	Level 1	Level 2	Level 3
Liabilities:				
Senior secured notes	\$399.8	\$—	\$399.8	\$—
Senior unsecured notes	540.5	—	540.5	—
tMEDS	10.5	—	—	10.5
	\$950.8	\$—	\$940.3	\$10.5

(US\$ in millions)	Fair Value at December 31, 2013			
	Total	Level 1	Level 2	Level 3
Liabilities:				
Senior secured notes	\$397.2	\$—	\$397.2	\$—
Senior unsecured notes	492.4	—	492.4	—
tMEDS	12.7	—	—	12.7
	\$902.3	\$—	\$889.6	\$12.7

TCM classified its senior secured and unsecured notes within Level 2 because they are valued using a mix of inputs, including a risk-free interest rate input that is quoted in an active market and credit spread inputs that are observable but are not

Table of Contents

THOMPSON CREEK METALS COMPANY INC.

Notes to the Condensed Consolidated Financial Statements (Continued) -Unaudited

(US dollars in millions, except per share amounts)

6. Fair Value Measurement (Continued)

quoted market prices for identical liabilities. Both inputs are negatively correlated to the fair value measure; an increase (decrease) in the input will decrease (increase) the fair value measure.

TCM classified its Tangible Equity Units ("tMEDS") within Level 3 because they are valued using significant unobservable inputs. TCM determined the fair value of the debt component of tMEDS using a discounted cash flow model by obtaining yields for comparably-rated issuers trading in the market, considering the market yield of existing TCM debt and the credit rating of TCM.

As of March 31, 2014, the carrying values of the 9.75% senior secured notes, the 12.5% senior unsecured notes and tMEDS were lower than the fair values of approximately \$399.8 million, \$220.2 million and \$10.5 million, respectively, while the carrying value of the 7.375% senior unsecured notes was higher than the fair value of \$320.3 million. TCM determined the fair value of the notes using a discounted cash flow valuation model, consisting of inputs such as risk-free interest rates and credit spreads. TCM determined the fair value of the tMEDS using a discounted cash flow valuation model, consisting of inputs such as credit spreads and the current trading price of the tMEDS.

7. Leases

TCM's total capital lease obligations consisted of the following:

(US\$ in millions)	March 31, 2014	December 31, 2013
Equipment facility capital leases	\$25.5	\$27.2
Equipment facility sale leaseback	56.4	59.8
Endako Mine sale leaseback	3.1	3.5
Total lease obligations	85.0	90.5
Less: Current portion	(22.0) (21.8
Total long-term lease obligations	\$63.0	\$68.7

Interest pertaining to the equipment financing facility with Caterpillar Financial Services Ltd., is allocable to the cost of developing mining properties and to constructing new facilities and is capitalized until assets are ready for their intended use. Beginning in September 2013, in conjunction with the start-up phase of Mt. Milligan Mine, TCM ceased capitalizing the interest and debt issuance costs associated with the leases under the Equipment Facility for Mt. Milligan Mine as the related assets were placed in service. During the three months ended March 31, 2014, TCM repaid \$5.5 million in principal.

Interest and debt issuance costs on the equipment financings consisted of the following:

(US\$ in millions)	Three Months Ended	
	March 31, 2014	March 31, 2013
Interest paid	\$1.2	\$0.9
Interest and debt issuance costs capitalized	\$—	\$1.3
Interest and debt issuance costs expensed	\$1.3	\$—

8. Debt

TCM's total debt consisted of the following:

9.75% Senior Secured Notes		

On November 27, 2012, TCM issued \$350.0 million of 9.75% senior secured notes (the "2017 Notes"). The proceeds received in the offering were \$336.8 million, net of financing fees of \$10.0 million and a discount of \$3.2 million. The net proceeds from the 2017 Notes offering were used to fund the completion of Mt. Milligan Mine and for general working capital purposes. The 2017 Notes are guaranteed on a senior basis by substantially all of TCM's subsidiaries and are secured by a first priority lien subjected to permitted liens on substantially all of our and the guarantors' property and assets.

The 2017 Notes mature on December 1, 2017 and accrue interest from November 27, 2012 until maturity at a fixed rate of 9.75% per year. Interest on the 2017 Notes is payable on February 1 and August 1 of each year, commencing February 1, 2013, to the holders of record at the close of business on the January 15 and July 15 prior to each interest payment date.

The 2017 Notes are governed by a base indenture, dated May 11, 2012, supplemented by the first supplemental indenture, dated May 11, 2012, and the fifth supplemental indenture, dated November 27, 2012 (the "2017 Notes Indenture"). There are no maintenance covenants with respect to TCM's financial performance. However, the 2017 Notes Indenture does contain transaction-based restrictive covenants that restrict TCM's ability and the ability of certain of TCM's subsidiaries to incur additional indebtedness; pay dividends or make other distributions or repurchase or redeem capital stock; prepay, redeem or repurchase certain debt; make loans and investments; sell assets; incur liens; enter into transactions with affiliates; and enter into agreements restricting our subsidiaries' ability to pay dividends and consolidate, merge or sell all or substantially all of our assets, in each case subject to certain exceptions.

The 2017 Notes are redeemable at TCM's option at any time prior to December 1, 2015 at a price equal to 100% of the principal amount of the 2017 Notes, plus accrued and unpaid interest and a make-whole premium. TCM may also redeem up to 35% of the original principal amount of the 2017 Notes at any time prior to December 1, 2015 with the

proceeds of certain equity offerings at a redemption price of 109.75% of the principal amount of the 2017 Notes, together with accrued and unpaid interest to, but not including, the date of redemption. TCM may also redeem the 2017 Notes at any time on or after December 1, 2015 at the redemption prices specified in the 2017 Notes Indenture together with accrued and unpaid interest to, but not including, the date of redemption. Finally, TCM may redeem the 2017 Notes at any time upon the occurrence of specified events relating to Canadian tax law at a redemption price of 100% of the principal amount of the 2017 Notes plus accrued and unpaid interest to, but not including, the date of redemption.

THOMPSON CREEK METALS COMPANY INC.

Notes to the Condensed Consolidated Financial Statements (Continued) - Unaudited

(US dollars in millions, except per share amounts)

8. Debt (Continued)

The 2017 Notes Indenture contains customary events of default. If an event of default occurs and is continuing under the 2017 Notes Indenture, the trustee or holders of at least 25% in principal of the outstanding 2017 Notes may declare the principal, premium, if any, and accrued and unpaid interest on all the 2017 Notes to be due and payable immediately. Certain events of bankruptcy or insolvency are events of default that would result in the 2017 Notes being due and payable immediately upon the occurrence of such events of default.

12.5% Senior Unsecured Notes

On May 11, 2012, TCM issued \$200.0 million of 12.5% senior unsecured notes (the "2019 Notes"). The proceeds received in the offering were \$193.1 million, net of financing fees of \$6.9 million. The net proceeds from the 2019 Notes offering were used to fund the completion of Mt. Milligan Mine and for general working capital purposes. The 2019 Notes are guaranteed on a senior basis by substantially all of TCM's subsidiaries.

The 2019 Notes mature on May 1, 2019 and accrue interest from May 11, 2012 until maturity at a fixed rate of 12.5% per year. Interest on the 2019 Notes is payable on May 1 and November 1 of each year, commencing November 1, 2012, to the holders of record at the close of business on the April 15 and October 15 prior to each interest payment date.

The 2019 Notes are governed by a base indenture as supplemented by the first supplemental indenture and the second supplemental indenture thereto, each dated May 11, 2012 (the "2019 Notes Indenture"). There are no maintenance covenants with respect to our financial performance. However, the 2019 Notes Indenture does contain transaction-based restrictive covenants that restrict our ability and the ability of certain of our subsidiaries to incur additional indebtedness; pay dividends or make other distributions or repurchase or redeem capital stock; prepay, redeem or repurchase certain debt; make loans and investments; sell assets; incur liens; enter into transactions with affiliates; and enter into agreements restricting our subsidiaries' ability to pay dividends and consolidate, merge or sell all or substantially all of our assets, in each case subject to certain exceptions.

The 2019 Notes are redeemable at TCM's option at any time prior to May 1, 2016 at a price equal to 100% of the principal amount of the 2019 Notes, plus accrued and unpaid interest and a make-whole premium. TCM may also redeem up to 35% of the original principal amount of the 2019 Notes at any time prior to May 1, 2015 with the proceeds of certain equity offerings at a redemption price of 112.5% of the principal amount of the 2019 Notes, together with accrued and unpaid interest to, but not including, the date of redemption. TCM may also redeem the 2019 Notes at any time on or after May 1, 2016 at the redemption prices specified in the 2019 Notes Indenture together with accrued and unpaid interest to, but not including, the date of redemption. Finally, TCM may redeem the 2019 Notes at any time upon the occurrence of specified events relating to Canadian tax law at a redemption price of 100% of the principal amount of the 2019 Notes plus accrued and unpaid interest to, but not including, the date of redemption.

The 2019 Notes Indenture contains customary events of default. If an event of default occurs and is continuing under the 2019 Notes Indenture, the trustee or holders of at least 25% in principal of the outstanding 2019 Notes may declare the principal, premium, if any, and accrued and unpaid interest on all the 2019 Notes to be due and payable immediately. Certain events of bankruptcy or insolvency are events of default that would result in the 2019 Notes being due and payable immediately upon the occurrence of such events of default.

7.375% Senior Unsecured Notes

On May 20, 2011, TCM issued of \$350.0 million of 7.375% senior unsecured notes (the "2018 Notes"). The proceeds received in the offering were \$339.9 million, net of financing fees of \$10.1 million. The net proceeds from the 2018 Notes offering were used to fund the development of Mt. Milligan and for general working capital purposes. The 2018 Notes are guaranteed on a senior basis by substantially all of our subsidiaries.

The 2018 Notes mature on June 1, 2018 and accrue interest from May 20, 2011 until maturity at a fixed rate of 7.375% per year. Interest is payable on June 1 and December 1 of each year, and the first interest payment occurred on December 1, 2011. Interest is payable to the holders of record at the close of business on the May 15 and November 15 prior to each interest payment date.

Table of Contents

THOMPSON CREEK METALS COMPANY INC.

Notes to the Condensed Consolidated Financial Statements (Continued) - Unaudited

(US dollars in millions, except per share amounts)

8. Debt (Continued)

The 2018 Notes are governed by an indenture, dated May 20, 2011 (the "2018 Notes Indenture"). There are no maintenance covenants with respect to our financial performance. However, the 2018 Notes Indenture does contain transaction-based restrictive covenants that restrict our ability and the ability of certain of our subsidiaries to incur additional indebtedness; pay dividends or make other distributions or repurchase or redeem capital stock; prepay, redeem or repurchase certain debt; make loans and investments; sell assets; incur liens; enter into transactions with affiliates; enter into agreements restricting our subsidiaries' ability to pay dividends and consolidate, merge or sell all or substantially all of our assets, in each case subject to certain exceptions.

The 2018 Notes are redeemable at our option at any time prior to June 1, 2014 at a price equal to 100% of the principal amount of the 2018 Notes, plus accrued and unpaid interest and a make-whole premium. We may also redeem up to 35% of the original principal amount of the 2018 Notes at any time prior to June 1, 2014 with the proceeds of certain equity offerings at a redemption price of 107.375% of the principal amount of the 2018 Notes, together with accrued and unpaid interest to, but not including, the date of redemption. We may also redeem the 2018 Notes at any time on or after June 1, 2014 at the redemption prices specified in the 2018 Notes Indenture, together with accrued and unpaid interest to, but not including, the date of redemption. Finally, we may redeem the 2018 Notes at any time upon the occurrence of specified events relating to Canadian tax law at a redemption price of 100% of the principal amount of the 2018 Notes plus accrued and unpaid interest to, but not including, the date of redemption.

The 2018 Notes Indenture contains customary events of default. If an event of default occurs and is continuing under the 2018 Notes Indenture, the trustee or holders of at least 25% in principal of the outstanding 2018 Notes may declare the principal, premium, if any, and accrued and unpaid interest on all the 2018 Notes to be due and payable immediately. Certain events of bankruptcy or insolvency are events of default that would result in the 2018 Notes being due and payable immediately upon the occurrence of such events of default. In connection with the issuance of the 2018 Notes, we as guarantors, and the initial purchasers, entered into an agreement obligating us to file a registration statement with the SEC so that the holders of the 2018 Notes can exchange the 2018 Notes for registered notes and related guarantees evidencing the same indebtedness as the 2018 Notes. In December 2011, we completed the exchange offer of the original 2018 Notes for a like principal amount of exchange notes registered under the Securities Act of 1933.

Mobile Mining Equipment Loans

On December 8, 2010, TCM executed an equipment financing agreement with Caterpillar in the amount of \$12.8 million secured by six units of mobile mining equipment purchased by TCM during 2010. This fixed-rate loan bears interest at 3.6%, is scheduled to mature no later than December 8, 2015.

9. Gold Stream Arrangement

Pursuant to an agreement dated October 2010, as subsequently amended in December 2011 and August 2012, with a subsidiary of Royal Gold, Inc. ("Royal Gold") (referred to as the "Gold Stream Arrangement"), TCM agreed to sell Royal Gold 52.25% of the refined gold production from Mt. Milligan Mine for a total upfront payment of \$781.5 million plus \$435 per ounce, or the prevailing market rate if lower than \$435 per ounce, when the gold is delivered. The upfront cash payments received under the Gold Stream Arrangement were recorded as deferred revenue and classified as a liability on our Condensed Consolidated Balance Sheets. Mt. Milligan Mine began delivering gold to Royal Gold in the fourth quarter of 2013, and as such, the deferred revenue is being recognized based on the amount of gold delivered in a period compared to total expected gold deliveries over the life of the mine.

Edgar Filing: Thompson Creek Metals Co Inc. - Form 10-Q

During the three months ended March 31, 2014, TCM delivered 4,780 ounces of gold to Royal Gold under the Gold Stream Arrangement and recognized \$3.8 million of revenue, of which \$1.7 million was previously deferred, within the gold sales line in our Condensed Consolidated Statements of Operations and Comprehensive Income (Loss). In the event of any default under the Gold Stream Arrangement, Royal Gold could require TCM to repay the deposits received from Royal Gold, which amounts totaled \$776.0 million at March 31, 2014.

10. tMEDS

On May 11, 2012, TCM completed a public offering of 8,800,000 tMEDS with a stated value of \$25.00. Each tMEDS unit consists of a prepaid common stock purchase contract and a senior amortizing note due May 15, 2015. During the three months

Table of Contents

THOMPSON CREEK METALS COMPANY INC.

Notes to the Condensed Consolidated Financial Statements (Continued) - Unaudited

(US dollars in millions, except per share amounts)

10. tMEDS (Continued)

ended March 31, 2014, no purchase contracts were settled. During the three months ended March 31, 2013, holders settled 360,000 purchase contracts for which TCM issued 1,650,780 shares of common stock. For more information, please see Note 11 within Item 8 of our 2013 Form 10-K.

The unamortized deferred financing costs related to the tMEDS were \$0.5 million and \$0.9 million at March 31, 2014 and 2013, respectively.

Interest and debt issuance costs paid, capitalized and expensed was as follows:

(US\$ in millions)	Three Months Ended	
	March 31, 2014	March 31, 2013
Interest paid	\$0.6	\$0.9
Interest capitalized	\$—	\$0.9
Interest and debt issuance costs expensed	\$0.7	\$—

11. Stock-Based Compensation

As of March 31, 2014, TCM has granted stock options, PSUs and RSUs, as discussed below.

Stock Options

The following table summarizes stock option activity during the three months ended March 31, 2014:

	Options (000's)	Weighted-Average Exercise Price (1)
Stock options outstanding at January 1, 2014	2,580	\$8.86
Granted	163	2.66
Exercised	11	2.70
Canceled/expired/surrendered	218	9.58
Stock options outstanding at March 31, 2014	2,514	\$8.26

The weighted-average exercise price of options outstanding is shown in US dollars as the majority of the options (1) granted starting in 2011 have a strike price denominated in US dollars. Options with a Canadian dollar strike price have been converted to US dollars for disclosure purposes using the exchange rates on the respective date of grant. The expiration date and vesting provisions of stock options granted are established at the time an award is made. Stock options generally vest in three tranches over two or three years and are exercisable over a period of time not to exceed 10 years from the grant date but generally expire five years from the grant date. When an option is exercised, TCM issues the requisite shares from authorized but unissued common stock. The exercise price of options granted prior to March 1, 2011 is equal to the greater of: (i) the volume weighted-average trading price of the underlying shares on the Toronto Stock Exchange over the five consecutive trading days immediately before the grant date and (ii) if the award date occurs in a trading black-out period, the weighted-average trading price over the five consecutive trading days immediately after the black-out period has been lifted. The exercise price of options granted after March 1, 2011 is equal to the volume weighted-average trading price of the underlying shares over the five consecutive trading days immediately before the grant date.

For the three months ended March 31, 2014 and 2013, TCM recorded compensation expense related to stock options of \$0.1 million and \$0.2 million, respectively.

As of March 31, 2014, approximately 0.6 million outstanding options had not vested and were not exercisable. The total unrecognized compensation cost related to these options was \$0.6 million and is expected to be recognized over a weighted-average period of 1.73 years.

Edgar Filing: Thompson Creek Metals Co Inc. - Form 10-Q

As of March 31, 2014, approximately 1.9 million options had vested, were exercisable and had an aggregate intrinsic value of nil.

Performance Share Units (PSUs)

The following table summarizes PSU activity during the three months ended March 31, 2014:

	Units (000's)	Weighted-Average Fair Value
Outstanding at January 1, 2014	1,225	\$ 7.88
PSUs granted	—	—
Canceled/expired/forfeited	174	11.98
Outstanding at March 31, 2014	1,051	\$ 7.38

The vesting of the PSUs granted prior to January 1, 2012 is contingent upon employee service and the performance of TCM's share price relative to the established award price. At each anniversary date during the vesting period, if the per share closing price of TCM's common stock on such date is at or higher than the award price, then the awards will vest one-third on each anniversary date, and the requisite shares will be issued from authorized but unissued common stock. If the closing price is

Table of Contents

THOMPSON CREEK METALS COMPANY INC.

Notes to the Condensed Consolidated Financial Statements (Continued) - Unaudited

(US dollars in millions, except per share amounts)

11. Stock-Based Compensation (Continued)

less than the award price, and therefore, the market condition is not achieved, then those PSUs do not vest and are carried forward to the following anniversary date. Any PSUs not vested at the end of the three-year vesting period will expire.

The vesting of the PSUs granted subsequent to January 1, 2012 is contingent upon two performance metrics: 1) TCM's Total Shareholder Return (TSR) relative to the Russell 2000 Index during the three-year performance period as measured by the Relative TSR performance percentage as set forth by the plan administrator and 2) the proven and probable mine reserves replaced by TCM during the three-year performance period as measured by the replacement reserves percentage determined by the plan administrator. The PSUs cliff vest three years from the date of issuance upon achievement of the above metrics.

All PSUs granted are accounted for at fair value using a Monte Carlo simulation valuation model on the date of grant. The Monte Carlo model is based on random projections of stock price paths. Expected volatility is calculated using a weighted average of historical daily volatilities and implied volatility and represents the extent to which TCM's stock price performance is expected to fluctuate during each of the three calendar-year periods of the award's anticipated term.

For the three months ended March 31, 2014 and 2013, TCM recorded compensation expense related to the PSUs of \$0.6 million and \$0.6 million, respectively. As of March 31, 2014, unrecognized compensation expense related to PSUs totaled \$2.9 million that will be recognized on a straight-line basis over a weighted-average period of 1.60 years.

Restricted Stock Units (RSUs)

The following table summarizes RSU activity during the three months ended March 31, 2014:

	Units (000's)	Weighted-Average Fair Value
Outstanding at January 1, 2014	1,346	\$ 4.23
RSUs granted	194	2.79
RSUs vested and common shares issued	377	4.58
Canceled/expired/forfeited	137	4.60
Outstanding at March 31, 2014	1,026	\$ 3.78

For the three months ended March 31, 2014 and 2013, TCM recorded \$0.3 million and \$0.6 million of compensation expense related to its RSUs, respectively, net of impact of canceled RSUs. As of March 31, 2014, unrecognized compensation expense related to restricted stock and RSUs totaled \$3.3 million that will be recognized on a straight-line basis over a weighted-average period of 1.84 years.

12. Commitments and Contingencies

Legal Matters

Below are descriptions of certain legal actions that involve certain properties of TCM. Although the results of legal actions cannot be predicted with certainty, it is the opinion of management that the resolution of these actions are not likely to have a material adverse effect on TCM's future consolidated financial position, results of operations or cash flows.

Table of Contents

THOMPSON CREEK METALS COMPANY INC.

Notes to the Condensed Consolidated Financial Statements (Continued) - Unaudited

(US dollars in millions, except per share amounts)

12. Commitments and Contingencies (Continued)

In 2010, the Stelat'en First Nation filed a petition in the Supreme Court of British Columbia against the British Columbia Minister of Energy, Mines and Petroleum Resources and TCM alleging that Endako Mine and the mill expansion project at Endako Mine represent infringements of the aboriginal title of the petitioners and impacts to their aboriginal rights, and that the government breached its duty to consult with the Stelat'en First Nation in relation to the impacts of Endako Mine and the mill expansion. The petitioners sought a declaration that the Provincial Crown did not fulfill its duty to consult with them in relation to the mill expansion project, a declaration that the mining permits and/or tenures held by TCM are invalid, an order quashing or setting aside the decision to issue a permit amendment to TCM and an injunction prohibiting further construction or alterations relating to the mill expansion project. The matter was heard by the Supreme Court of British Columbia in a hearing that took place in early 2011. In August 2011, the Court dismissed the petitioners' claims in full. The Stelat'en First Nation subsequently filed a notice of appeal from that decision to the Court of Appeal of British Columbia seeking to have the decision of the Supreme Court of British Columbia set aside and seeking an order staying the permit amendment and any future permitting until the Province has engaged in further consultation. In September 2013, the Court of Appeal dismissed the Stelat'en First Nation's appeal. In January 2014, the Stelat'en First Nation applied for leave from the Supreme Court of Canada to appeal the British Columbia Court of Appeal decision. In February 2014, the Supreme Court of Canada dismissed the Stelat'en First Nation's leave to appeal application, and awarded costs to the respondents. TCM is from time to time involved in or subject to other legal proceedings related to its business. While it is not feasible to predict or determine the outcome of these proceedings, it is the opinion of management that the resolution of these proceedings are not expected to have a material adverse effect on TCM's consolidated financial position, results of operations or cash flows.

Concentrate Sales Agreements

TCM is party to three concentrate sales agreements for the sale of concentrate produced at Mt. Milligan Mine. Pursuant to these agreements, TCM has agreed to sell an aggregate of approximately 85% of the copper-gold concentrate produced at Mt. Milligan Mine during 2014 and an aggregate of approximately 120,000 dry metric tons in each of the two calendar years thereafter. Under one of the agreements, TCM has the option to sell to the counterparty and the counterparty has the obligation to purchase from TCM additional concentrate up to an amount equal to 40,000 dry metric tons per year during each of 2015 and 2016. Pricing under these concentrate sales agreements will be determined by reference to specified published reference prices during the applicable quotation periods. Payment for the concentrate will be based on the price for the agreed copper and gold content of the parcels delivered, less smelting and refining charges and certain other deductions, if applicable. The copper smelting and refining charges will be negotiated in good faith and agreed by the parties for each contract year based on terms generally acknowledged as industry benchmark terms. The gold refining charges are as specified in the agreements.

Molybdenum Purchases

As of March 31, 2014, we have commitments to purchase approximately 9.3 million pounds of molybdenum as unroasted molybdenum concentrate from 2014 to 2016 to be priced at the time of purchase at a set discount to the market price for roasted molybdenum concentrate. In addition, we have purchase agreements to buy approximately 1.3 million pounds of molybdenum as roasted molybdenum concentrate during the remainder of 2014 to be priced at market at the time of delivery.

Molybdenum Sales

In the normal course of operations, TCM enters into certain molybdenum sales contracts where it sells future production at fixed prices. As of March 31, 2014, TCM had commitments to sell approximately 194 thousand pounds of molybdenum oxide in 2014 and 2015 at an average price of \$13.25 per pound.

Capital Purchase Commitments

As of March 31, 2014, TCM had open purchase orders, contracts and capital purchase commitments of \$10.4 million related to the Mt. Milligan permanent operations residence.

13. Income and Mining Tax Expense (Benefit)

Income and mining taxes for the three months ended March 31, 2014 and 2013 were a benefit of \$15.0 million and \$3.2 million, respectively. The tax benefit for the three months ended March 31, 2014 differs from the tax that would result from applying the Canadian federal and provincial income tax rates primarily due to the following items: the US percentage

17

Table of Contents

THOMPSON CREEK METALS COMPANY INC.

Notes to the Condensed Consolidated Financial Statements (Continued) - Unaudited

(US dollars in millions, except per share amounts)

13. Income and Mining Tax Expense (Benefit) (Continued)

depletion benefit; the pre-tax Endako Mine book loss, which has no tax benefit as a result of a valuation allowance recognized; an increased amount of our deferred tax assets that will be realized due to higher taxable income in the first quarter as compared to previous forecasts; and a successful conclusion to a tax appeal. The tax benefit for the three months ended March 31, 2014 included \$0.4 million gain on foreign exchange. The tax benefit for the three months ended March 31, 2013 also differs from the tax that would result from applying the Canadian federal and provincial income tax rates primarily due to the US percentage depletion benefit and the pre-tax Endako Mine book loss, which has no tax benefit as a result of a valuation allowance recognized.

Our current and non-current deferred income tax assets and liabilities changed at March 31, 2014 as compared to December 31, 2013 from a net liability of \$13.6 million to a net asset of \$4.1 million, or a net change of \$17.7 million. This is primarily due to a \$17.1 million deferred tax benefit in the first quarter of 2014, a component of our total tax benefit of \$15.0 million. Most of the deferred tax benefit occurred at a particular tax paying component which had a small net non-current deferred income tax liability at December 31, 2013. This changed the component's non-current deferred income tax position from a net liability to a net asset; therefore, most of the deferred tax benefit is reflected as an increase to the non-current deferred tax asset on our balance sheet. The remaining \$0.6 million is due to currency translation adjustments as a result of change in foreign exchange rates.

14. Net Income (Loss) per Share

The following is a reconciliation of net income (loss) and weighted-average common shares outstanding for purposes of calculating diluted net income (loss) per share for the three months ended March 31, 2014 and 2013:

(US\$ in millions, except per share amounts)	Three Months Ended	
	March 31, 2014	March 31, 2013
Net income (loss)	\$(39.1) \$0.9
Basic weighted-average number of shares outstanding	171.6	169.7
Effect of dilutive securities		
Common stock purchase warrants	—	0.2
Share-based awards	—	46.4
Diluted weighted-average number of shares outstanding	171.6	216.3
Net income (loss) per share		
Basic	\$(0.23) \$0.01
Diluted	\$(0.23) \$—

For the three months ended March 31, 2014, TCM was in a net loss position, and approximately 2.5 million stock options, 1.1 million PSUs, 1.0 million RSUs and 45.5 million shares for the settlement of the tMEDS purchase contracts were excluded from the computation of diluted weighted-average shares as the effect would have been anti-dilutive under the treasury stock method.

For the three months ended March 31, 2013, approximately 2.3 million stock options and 1.7 million PSUs were excluded from the computation of diluted weighted-average shares as the exercise prices exceeded the price of the common stock. Additionally, approximately 1.3 million RSUs were excluded from the computation of diluted weighted-average shares as the effect would have been anti-dilutive under the treasury stock method.

15. Transactions with our Endako Mine Joint Venture Partner

Total sales by TCM to Sojitz, TCM's Endako Mine joint venture partner, were \$24.0 million and \$15.3 million for the three months ended March 31, 2014 and 2013, respectively. This represented 14.9% and 14.1% of TCM's total revenues for these respective periods.

For the three months ended March 31, 2014 and 2013, TCM recorded management fee income of \$0.1 million and nil, respectively, and selling and marketing costs of \$0.2 million and \$0.1 million, respectively, from Sojitz.

Table of Contents

Income and mining taxes paid, net of refunds ⁽²⁾	\$ 0.5	\$ (1.1)

⁽¹⁾ For the three months ended March 31, 2014 and 2013, cash interest paid of \$6.3 million and \$7.9 million, respectively, had been previously capitalized related to the Company's debt.

⁽²⁾ For the three months ended March 31, 2014 and 2013, TCM received \$0.9 million and \$1.2 million, respectively in refunds of US and Canadian income taxes related to prior year tax returns.

Non-cash Investing and Financing Activities

	Three Months Ended	
	March 31, 2014	March 31, 2013
Financing activities		
Capitalized debt costs ⁽¹⁾	\$ 0.9	\$ 23.7

⁽¹⁾ Includes capitalized interest not paid in cash, amortization of deferred financing costs and debt discounts.

17. Concentration of Credit Risk

TCM is exposed to counterparty risk from its cash and cash equivalent balances and its reclamation deposits held by financial institutions and governmental entities. TCM monitors its positions with, and the credit quality of, the financial institutions and companies in which it invests its cash, cash equivalents and that hold its reclamation deposits. Counterparties to cash balances and its reclamation deposits, other than balances maintained in various bank operating accounts, are US and Canadian institutions and the US and Canadian governments.

TCM manages its credit risk from its accounts receivable through its collection activities. As of March 31, 2014, TCM had six customers who owed TCM more than \$3.0 million and accounted for approximately 46.1% of total accounts and other receivables outstanding. Another seven customers had balances greater than \$1.0 million but less than \$3.0 million that accounted for approximately 22.3% of total accounts and other receivables. As of March 31, 2014, all of these customers were compliant with credit terms and scheduled payment dates.

TCM's maximum counterparty and credit risk exposure is the carrying value of its cash and cash equivalents and accounts receivable. The carrying amounts of accounts receivable, accounts payable, accrued liabilities and fixed-rate debt, excluding the Senior secured and unsecured notes and tMEDS, as discussed in Note 6, approximate fair value as of March 31, 2014.

18. Segment Information

TCM has three reportable segments, based on products and geography: Copper-Gold, US Operations Molybdenum and Canadian Operations Molybdenum. The Copper-Gold segment includes all expenditures, including all mining, milling, mine

Table of Contents

THOMPSON CREEK METALS COMPANY INC.

Notes to the Condensed Consolidated Financial Statements (Continued) - Unaudited

(US dollars in millions, except per share amounts)

18. Segment Information (Continued)

site administration, transportation, shipping, concentrate selling and refining costs, and sale of concentrate from Mt. Milligan Mine. The US Operations Molybdenum segment includes all mining, milling, mine site administration, transportation, roasting and sale of molybdenum products from TC Mine and the Langeloth Facility, as well as all roasting and sales of third-party purchased material from the Langeloth Facility. The Canadian Operations Molybdenum segment includes all mining, milling, mine site administration, transportation, roasting and sale of molybdenum products from the 75% owned Endako Mine. The Inter-segment represents the elimination of management fee income, revenue and cost of sales of product transported from the Canadian Operations to the US Operations for processing.

TCM's chief operating decision makers (Chief Executive Officer and Chief Operating Officer) evaluate segment performance based on segment revenue less costs and expenses. TCM attributes other income and expenses to the reporting segments if the income or expense is directly related to segment operations, as described above. TCM does not allocate corporate expenditures such as general and administrative, exploration and interest income and expense items to its reporting segments, unless such expenditures are directly related to segment operations. Gains and losses on foreign exchange are calculated on transactions denominated in a different currency than the segment's functional currency; the Copper-Gold segment's unrealized foreign exchange balance is primarily comprised of its intercompany notes related to the equipment financing facility.

Segment information for the three months ended March 31, 2014 and 2013 was as follows:

For the three months ended March 31, 2014:

(US\$ in millions)	Copper-Gold	US Operations Molybdenum	Canadian Operations Molybdenum	Inter- segment	Total

(1) Included \$5.6 million in permanent operations residence capital expenditure and \$4.4 million in operations capital expenditure at Mt. Milligan Mine. Excluded \$0.6 million of remaining prepaid deposits already made to one vendor.

(2) Capital expenditures were for the three months ended March 31, 2014.

(3) Included \$18.1 million in permanent operations residence capital expenditure and \$12.0 million in operations capital expenditure at Mt. Milligan Mine. Excluded \$2.3 million of remaining prepaid deposits already made to one vendor.

(4) Capital expenditures were for the year ended December 31, 2013.

19. Guarantor Financial Information

TCM has not presented separate combined financial statements of subsidiary guarantors that guarantee the 9.75% senior secured notes, the 7.375% senior unsecured notes and the 12.5% senior unsecured notes, because (1) each of the subsidiary guarantors is wholly owned by TCM; (2) the guarantees are full and unconditional; (3) the guarantees are joint and several and (4) TCM has no independent assets and operations, and all subsidiaries of TCM other than the subsidiary guarantors are immaterial.

Pursuant to the indentures governing the 9.75% senior secured notes, the 7.375% senior unsecured notes and the 12.5% senior unsecured notes, a guarantor may be released from its guarantee obligations only under certain customary circumstances specified in the indentures, namely upon (1) the sale or other disposition (including by way of merger, amalgamation or consolidation) of such guarantor, (2) the designation of such guarantor as an unrestricted subsidiary in accordance with the terms of the indentures, (3) upon a legal defeasance or covenant defeasance or (4) upon the full satisfaction of our obligations under the respective indenture.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Management's Discussion and Analysis ("MD&A") provides information that management believes is relevant to an assessment and understanding of the condensed consolidated financial condition and results of operations of Thompson Creek Metals Company Inc. and its subsidiaries (collectively, "Thompson Creek," "TCM," "we," "us" or "our") for the three months ended March 31, 2014, and should be read in conjunction with TCM's condensed consolidated financial statements and the notes thereto included in Item 1 herein and the discussion of Risk Factors included in Part II, Item 1A herein. Additionally, the following discussion should be read in conjunction with the consolidated financial statements, the related "Management's Discussion and Analysis of Financial Condition and Results of Operations," the discussion of "Risk Factors" and the discussion of TCM's "Business and Properties" in our 2013 Form 10-K.

The results of operations reported and summarized below are not necessarily indicative of future operating results. Throughout this MD&A, all references to earnings or losses per share are on a diluted basis, unless otherwise noted. The condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the United States ("US GAAP"). All dollar amounts are expressed in United States dollars ("US\$") unless otherwise indicated. References to C\$ refers to Canadian dollars.

Forward-Looking Statements

Certain statements in this report, other than purely historical information are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, and applicable Canadian securities legislation and are intended to be covered by the safe harbor provided by these regulations. These forward-looking statements can, in some cases, be identified by the use of such terms as "believe," "project," "expect," "anticipate," "estimate," "intend," "strategy," "future," "opportunity," "plan," "may," "should," "will," "would," "will be," "will continue," "will likely result," and similar expressions. Our forward-looking statements may include, without limitation, statements with respect to: future financial or operating performance of the Company or its subsidiaries and its projects; access to existing or future financing arrangements; future inventory, production, sales, payments from customers, cash costs, capital expenditures and exploration expenditures; future earnings and operating results; expected concentrate and recovery grades; estimates of mineral reserves and resources, including estimated mine life and annual production; statements as to the projected completion of the permanent operations residence and production ramp-up at Mt. Milligan Mine; future operating plans and goals; and future molybdenum, copper, gold and silver prices.

Where we express an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, our forward-looking statements are based on current expectations and assumptions that are subject to risks and uncertainties, which may cause actual results to differ materially from future results expressed, projected or implied by those forward-looking statements. Important factors that could cause actual results and events to differ from those described in such forward-looking statements can be found in the section entitled "Risk Factors" in our 2013 Form 10-K, Quarterly Reports on Form 10-Q and other documents filed on EDGAR at www.sec.gov and on SEDAR at www.sedar.com. Although we have attempted to identify those material factors that could cause actual results or events to differ from those described in such forward-looking statements, there may be other factors, currently unknown to us or deemed immaterial at the present time that could cause results or events to differ from those anticipated, estimated or intended. Many of these factors are beyond our ability to control or predict. Given these uncertainties, the reader is cautioned not to place undue reliance on our forward-looking statements. We undertake no obligation to update or revise publicly any forward-looking statements, whether as a result of new information, future events or otherwise.

Highlights for the First Quarter 2014

- Consolidated revenues for the first quarter of 2014 increased 48.1% over consolidated revenues for the first quarter of 2013, primarily as a result of added revenue generated from sales of copper and gold from Mt. Milligan Mine, which began the commissioning and start-up phase in the third quarter of 2013 and reached commercial production (defined as operation of the mill at 60% design capacity mill throughput for 30 days)

Edgar Filing: Thompson Creek Metals Co Inc. - Form 10-Q

as of February 18, 2014. For the first quarter of 2014, we made three shipments of concentrate and recorded two sales of copper and gold concentrate. The sale for the last shipment was recorded in early April 2014 and represented future revenues of \$15.1 million for copper and \$13.9 million for gold.

Payable production at Mt. Milligan during the first quarter of 2014 was 14.2 million pounds of copper and 39,181 ounces of gold, and our average realized sales prices for copper and gold in the first quarter of 2014 were \$3.01 per pound and \$1,025 per ounce, respectively.

Table of Contents

THOMPSON CREEK METALS COMPANY INC.

Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued)

Molybdenum sales volumes increased by 1.0 million pounds for the first quarter of 2014 as compared to the first quarter of 2013, but our average realized molybdenum sales price decreased to \$10.45 in the first quarter of 2014, representing a \$1.42 per pound decrease from the first quarter of 2013. Molybdenum production for the first quarter of 2014 was 7.9 million pounds compared to 7.7 million pounds in the first quarter of 2013, resulting primarily from higher mill recoveries at our mines, partially offset by lower grade ore.

Consolidated operating income for the first quarter of 2014 was \$13.1 million compared to an operating income of \$17.0 million for the first quarter of 2013. Consolidated operating results were impacted by lower-of-cost-or-market molybdenum product inventory write downs from Endako Mine of \$6.9 million and \$5.6 million in the first quarter of 2014 and 2013, respectively.

Net loss for the first quarter of 2014 was \$39.1 million, or \$0.23 per diluted share compared to a net income for 2013 of \$0.9 million, or nil per diluted share. The first quarter of 2014 and 2013 included non-cash foreign exchange losses of \$46.5 million and \$19.4 million, respectively, primarily on intercompany notes.

Non-GAAP adjusted net income for the first quarter of 2014 was \$4.3 million, or \$0.02 per diluted share, compared to non-GAAP adjusted net income of \$18.0 million, or \$0.08 per diluted share for the first quarter of 2013. Non-GAAP adjusted net income (loss) for the first quarter of 2014 and 2013 excludes foreign exchange losses.

Non-GAAP unit cash costs for copper and gold for the first quarter of 2014 were, on a by-product basis, \$2.29 per pound of copper, and, on a co-product basis, \$2.27 per pound of copper and \$606 per ounce of gold.

Non-GAAP average molybdenum cash cost per pound produced for the first quarter of 2014 was \$5.75 per pound compared to \$5.91 per pound in the first quarter of 2013.

Cash generated by operating activities was \$16.2 million in the first quarter of 2014 compared to \$15.3 million in the first quarter of 2013.

Capital expenditures in the first quarter of 2014 were \$21.8 million, comprised of \$20.9 million for Mt. Milligan Mine and \$0.9 million of other capital costs for Endako Mine, TC Mine, the Langeloth Facility and corporate combined, compared to \$155.1 million in the first quarter of 2013.

Total cash and cash equivalents at March 31, 2014 were \$202.7 million compared to \$233.9 million at December 31, 2013. Total debt at March 31, 2014 was \$1,003.6 million, including capital lease obligations, compared to \$1,012.8 million at December 31, 2013.

Overview

We are a diversified North American mining company. We operate a copper and gold mine, two primary molybdenum mines and a metallurgical roasting facility. Our Mt. Milligan Mine ("Mt. Milligan Mine") is a conventional truck-shovel open-pit copper and gold mine and concentrator with a copper-gold flotation processing plant in British Columbia, Canada. Our molybdenum producing properties are Thompson Creek Mine, an open-pit molybdenum mine and concentrator in Idaho, USA ("TC Mine"), Endako Mine, an open-pit molybdenum mine, concentrator and roaster in British Columbia, Canada in which we own a 75% joint venture interest ("Endako Mine") and the Langeloth Metallurgical Facility in Pennsylvania, USA (the "Langeloth Facility").

We have three reportable segments, based on products and geography: Copper-Gold, US Operations Molybdenum and Canadian Operations Molybdenum. The Copper-Gold segment includes all expenditures, including all mining,

milling, mine site administration, transportation, shipping, concentrate selling and refining costs and sale of concentrate from Mt. Milligan Mine. The US Operations Molybdenum segment includes all mining, milling, mine site administration, transportation, roasting and sale of molybdenum products from TC Mine and the Langeloth Facility, as well as all roasting and sales of third-party purchased material from the Langeloth Facility. The Canadian Operations Molybdenum segment includes all mining, milling, mine site administration, transportation, roasting and sale of molybdenum products from the 75% owned Endako Mine.

Our financial results can vary significantly as a result of fluctuations in the market prices of copper, gold and molybdenum and fluctuations in our production. World market prices for our products have fluctuated historically and are

25

Table of Contents

THOMPSON CREEK METALS COMPANY INC.

Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued)

affected by numerous factors beyond our control. Any significant weakness in demand or reduction in prices may have a material adverse effect on our operating results, cash flows and financial condition.

The average published price for our products has fluctuated as follows for the periods shown:

	Copper ⁽¹⁾	Gold ⁽²⁾	Molybdenum oxide ⁽³⁾
April 2014	\$ 3.03	\$ 1,299	\$ 12.26
First quarter 2014	\$ 3.19	\$ 1,293	\$ 9.98
Fourth quarter 2013	\$ 3.24	\$ 1,271	\$ 9.65
Third quarter 2013	\$ 3.21	\$ 1,327	\$ 9.42
Second quarter 2013	\$ 3.24	\$ 1,414	\$ 10.87
First quarter 2013	\$ 3.60	\$ 1,631	\$ 11.35

(1) Average Metals Bulletin Daily published price for London Metal Exchange (LME) settlement per pound.

(2) Average Metals Bulletin Daily published price for daily average London price per troy ounce.

(3) Average Platts Metals Week published price per pound for molybdenum oxide.

For copper and gold, as discussed in Note 5 of Item 1 of this 10-Q, in addition to certain existing forward gold purchase and sales contracts related to our Gold Stream Arrangement as discussed in Note 9 of Item 1 of this 10-Q, as of March 31, 2014 we have put in place commodity price hedges in connection with our day-to-day copper and gold business designed to protect our cash flow for 10,300 ounces of gold, with 3,000 ounces of gold at a floor price of \$1,200 per ounce and a ceiling price ranging from \$1,365 to \$1,368 per ounce, maturing May to October 2014, and 7,300 ounces of gold at a forward sales price of approximately \$1,291 per ounce maturing from June to October 2014. As of March 31, 2014, we also have put in place hedges for 4.9 million pounds of copper at forward sales price of \$3.02 per pound maturing May 2014.

We began the commissioning and start-up phase of Mt. Milligan Mine in the fourth quarter of 2013, and Mt. Milligan Mine reached commercial production as of February 18, 2014. We expect that the ramp-up at Mt. Milligan will continue to progress throughout 2014 and that mill throughput will achieve 75% to 80% of design capacity by the end of 2014.

At TC Mine, molybdenum production for the first quarter of 2014 was 5.7 million pounds at a cash cost of \$3.86 per pound produced compared to 5.9 million pounds at a cash cost of \$4.18 per pound produced for the first quarter of 2013. Unit cash costs decreased by 7.7% compared to the first quarter of 2013 despite slightly lower production. Operating costs at TC Mine were lower primarily due to the decision to suspend stripping in the next mine phase (Phase 8) and to put TC Mine on care and maintenance in the fourth quarter of 2014.

At Endako Mine, our 75% share of molybdenum production for the first quarter of 2014 was 2.2 million pounds at a cash cost of \$10.54 per pound produced compared to 1.8 million pounds at a cash cost of \$11.75 per pound produced for the first quarter of 2013. Unit cash costs decreased by 10.3% compared to the first quarter of 2013. We obtained higher mill recoveries and higher production in the first quarter of 2014 due to mill optimization partially offset by various operational challenges, as described further below.

Our cash and cash equivalents balance is \$202.7 million and \$233.9 million at March 31, 2014 and December 31, 2013, respectively. As we ramp up Mt. Milligan Mine, we anticipate this balance to continue to decrease. The lowest cash and cash equivalent balance is expected to occur in the third quarter of 2014; but is not expected to be below \$100 million. As we achieve design capacity at Mt. Milligan Mine in 2014 and 2015, we expect to begin to accumulate our cash and cash equivalent balance. Please refer to the Liquidity and Capital Resources section below for further discussion.

Summary of Quarterly Results

Financial Review

Three Months Ended March 31, 2014

Net Income (Loss)

Net loss for the first quarter of 2014 was \$39.1 million, or \$0.23 per diluted share, compared to net income of \$0.9 million, or nil per diluted share, for the first quarter of 2013. The net loss primarily related to non-cash foreign exchange losses of \$46.5 million and interest expense of \$23.6 million partially offset by operating income of \$13.1 million and a consolidated income and mining tax benefit of \$15.0 million. During the same quarter of 2013, our net income was primarily due to

Table of Contents

THOMPSON CREEK METALS COMPANY INC.

Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued)

operating income of \$17.0 million and an income and mining tax benefit of \$3.2 million, partially offset by \$19.4 million of non-cash foreign currency losses.

Non-GAAP adjusted net income for the first quarter of 2014 was \$4.3 million, or \$0.02 per diluted share, compared to \$18.0 million or \$0.08 per diluted share for the first quarter of 2013. The decrease in non-GAAP adjusted net income per diluted share in the quarter was due to lower operating income and higher interest expense, partially offset by an increase in non-cash foreign exchange losses.

Revenues

Revenues in the first quarter of 2014 were \$161.0 million, up 48.1% compared to revenue in the first quarter of 2013. This increase in revenue was due to the addition of \$54.2 million of copper and gold revenue from Mt. Milligan Mine, offset by a decrease in molybdenum sales revenue primarily driven by lower average realized molybdenum sales prices in the comparable periods. During the first quarter of 2014, we sold 10.8 million pounds of copper and 23,874 ounces of gold at average realized sales prices of \$3.01 per pound and \$1,025 per ounce, respectively. During the first quarter of 2014, we sold 9.8 million pounds of molybdenum at an average realized price of \$10.45 per pound compared to 8.8 million pounds of molybdenum in the first quarter of 2013 at an average realized price of \$11.87 per pound.

The timing of the concentrate shipments and sales of copper and gold from Mt. Milligan are based on the structure of the various sales agreements that we have in place. To that end, for the first quarter of 2014, we made three shipments of concentrate and recorded two sales of copper and gold concentrate. The sale for the last shipment was recorded in early April 2014 and represented future revenues of \$15.1 million for copper and \$13.9 million for gold.

Operating Expenses

Operating expenses for the first quarter of 2014 were \$107.8 million, which were up 57.1% from the same quarter in 2013. The increase in operating expenses in the first quarter of 2014 was driven by \$42.8 million of operating expenses at Mt. Milligan Mine related to copper and gold production, which commenced in the fourth quarter of 2013, and an increase in lower-of-cost-or-market molybdenum product inventory write downs as follows:

(US\$ in millions)	Three Months Ended	
	March 31, 2014	March 31, 2013
Endako Mine inventory	\$5.1	\$4.7

These increases were partially offset by favorable foreign exchange rates converting C\$ operating expenses to US\$ operating expenses. The foreign exchange rate averaged US\$1.00 = C\$1.10 for the first quarter of 2014 compared to an average rate of US\$1.00 = C\$1.01 for the same period in 2013.

The non-GAAP financial measure of cash cost per pound produced from Mt. Milligan Mine in the first quarter of 2014 was \$2.29 per pound of payable copper produced, on a by-product basis, and \$2.27 per pound of payable copper produced on a co-product basis and \$606 per ounce of payable gold produced on a co-product basis.

The non-GAAP financial measure of cash cost per pound produced from our molybdenum mines was \$5.75 per pound in the first quarter of 2014 compared to \$5.91 per pound for the same quarter in 2013 primarily as a result of lower cash costs at both TC Mine and Endako Mine. Cash costs at TC Mine in the first quarter of 2014 were lower primarily due to lower operating costs resulting from the decision to suspend stripping in the next mine phase (Phase 8) in October 2012 and to put TC Mine on care and maintenance in the fourth quarter of 2014. This resulted in postponed maintenance repairs and major equipment rebuilds, fewer wear part replacements, less diesel consumed and decreased blasting costs. Cash costs at Endako Mine were lower primarily due to significantly higher recoveries offset by increased operating costs primarily related to processing fresh ore in the first quarter of 2014 versus solely processing stockpiled ore in the first quarter of 2013 together with various operational challenges discussed below.

Depreciation, Depletion and Amortization Expense ("DD&A")

DD&A in the first quarter of 2014 was \$28.4 million compared to \$12.8 million in the first quarter of 2013 due to the addition of DD&A from Mt. Milligan Mine, partially offset by lower DD&A for TC Mine and our share of Endako

Mine. During the fourth quarter of 2013, we recognized a pre-tax, non-cash write down of the property, plant and equipment assets at

30

Table of Contents

THOMPSON CREEK METALS COMPANY INC.

Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued)

TC and Endako Mines, which significantly lowered the assets' carrying value and depreciable base, which, in turn, lowered DD&A for TC Mine and our share of Endako Mine in the first quarter of 2014.

Lower-of-cost-or-market product inventory write downs within DD&A for the three months ended March 31, 2014 and 2013 were as follows:

	Three Months Ended	
	March 31, 2014	March 31, 2013
Endako Mine inventory	\$1.8	\$0.9

These increases were partially offset by favorable foreign exchange rates converting C\$ DD&A to US\$ DD&A. The foreign exchange rate averaged US\$1.00 = C\$1.10 for the first quarter of 2014 compared to an average rate of US\$1.00 = C\$1.01 for the same period in 2013.

Selling and Marketing Expense

Selling and marketing expense in the first quarter of 2014 was \$4.1 million compared to \$2.3 million in the first quarter of 2013. Increased selling and marketing expense in the first quarter of 2014 was primarily due to an increase in selling and marketing expense in conjunction with shipments made for Mt. Milligan during the quarter.

General and Administrative Expense

General and administrative expense in the first quarter of 2014 was \$6.6 million compared to \$7.1 million in the first quarter of 2013. Lower general and administrative expense in the first quarter of 2014 was primarily due to a planned reduction in headcount at our corporate office which resulted in lower salaries and benefits costs offset by \$0.8 million in contingent legal fees related to a favorable settlement associated with interest on a state tax refund received in 2010. General and administrative expense for the first quarter of 2014 and 2013 also included \$0.7 million and \$0.8 million, respectively, in stock-based compensation expense.

Foreign Exchange Gains and Losses

For the first quarter of 2014 and 2013, we recognized \$46.5 million and \$19.4 million of foreign exchange losses, respectively. These non-cash foreign currency losses were primarily unrealized and related to intercompany notes that were entered into as part of a strategy to manage cash balances to fund our operations and provide future tax benefits. The increase in foreign exchange losses was due to additional borrowings related to these intercompany notes and the weakening of the C\$ against the US\$. The foreign exchange rate at which the notes were revalued was US\$1.00 = C\$1.11 at March 31, 2014 compared to US\$1.00 = C\$1.02 at March 31, 2013. The foreign exchange losses related to intercompany notes in the current quarter were partially offset by approximately \$1.1 million of realized gains, comprised of \$0.4 million related to forward currency contracts and \$0.7 million related to other operating items.

Interest and Finance Fees

Interest and finance fees were \$23.6 million in the first quarter of 2014 compared to \$0.1 million in the first quarter of 2013. For the three months ended March 31, 2014, interest and finance fees were comprised of \$22.9 million attributable to our debt and capital lease obligations and \$0.7 million attributable to our Tangible Equity Units ("tMEDS"). The increase in interest expense in the comparable periods was due to a decrease in capitalized interest and debt issuance costs. Beginning in September 2013, in conjunction with the start-up phase of Mt. Milligan, we incurred lower capitalized expenditure and therefore capitalized less interest and debt issuance costs related to our secured and unsecured notes, tMEDS and equipment financing facility.

In the first quarter of 2014 and 2013, we capitalized \$0.9 million and \$24.6 million, respectively, of interest and amortization of debt issuance costs. We capitalize interest expense allocable to the cost of developing mining properties and to construct new facilities until assets are ready for their intended use. Capitalized interest is amortized using the units-of-production method over the estimated life of the ore body based on recoverable quantities to be

mined from proven and probable reserves.

Other

31

Table of Contents

THOMPSON CREEK METALS COMPANY INC.

Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued)

Other income in the first quarter of 2014 was \$2.8 million compared to nil in the first quarter of 2013. The increase during the quarter was due to a favorable settlement associated with interest on a state tax refund received in 2010.

Income and Mining Tax Expense (Benefit)

For the first quarter of 2014, our tax benefit was \$15.0 million compared to \$3.2 million in the first quarter of 2013. The difference is mainly due to both a larger net loss before tax and a higher Canadian federal and provincial income tax rate for the first quarter of 2014 compared to the first quarter of 2013. In the first quarter of 2014, due to higher taxable income as compared to previous forecasts, we concluded that an increased amount of our deferred tax assets would be realized, increasing our tax benefit by \$2.3 million. The tax benefit for the first quarter of 2014 also increased \$1.4 million due to the successful conclusion of a tax appeal and \$0.4 million due to a gain on foreign exchange recorded as a component of the tax benefit.

Segment Discussion

The following discussion presents operating and financial results for the three months ended March 31, 2014 and 2013 for each reportable segment.

Copper-Gold**Mt. Milligan**

The following table summarizes Mt. Milligan Mine's operating and financial results for the three months ended March 31, 2014 and 2013:

	Three Months Ended March

(1) See "Non-GAAP Financial Measures" for the definition and reconciliation of these non-GAAP measures.

Revision to Operational Statistics

In the first quarter of 2014, subsequent to filing our 2013 Form 10-K, we discovered that we had misstated reporting of certain operational statistics for Mt. Milligan Mine in our Form 10-Q for the quarter ended September 30, 2013 and

our 2013

32

Table of Contents

THOMPSON CREEK METALS COMPANY INC.

Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued)

Form 10-K. Following the discovery of these misstatements, we revised the operational statistics for Mt. Milligan Mine for the third and fourth quarters of 2013 as well as the full year 2013 to adjust the impacted operational statistics.

These corrections of our operational statistics had no effect on our Consolidated Balance Sheets, Statements of Operations, Statements of Cash Flow, or Statements of Shareholders' Equity for the periods impacted. The following tables present the corrections of Mt. Milligan Mine's operational statistics:

	Three Months Ended September 30, 2013			
	As Previously Reported		As Revised	
Copper ore grade (%)	0.25	%	0.25	%
Gold ore grade (g per tonne)	0.45		0.45	
Copper recovery (%)	67.3	%	67.6	%

Copper recovery (%)	80.4	%	80.2	%
Gold recovery (%)	54.3	%	57.4	%
Concentrate production (dry tons)	22,912		18,503	
Copper payable production (000's lb)	9,348		9,350	
Gold payable production (oz)	18,446		17,952	
Copper cash cost (\$/payable lb produced) - By-Product	\$ 7.34		\$ 7.33	
Copper cash cost (\$/payable lb produced) - Co-Product	\$ 5.11		\$ 5.19	
Gold cash cost (\$/payable oz produced) - Co-Product	\$ 1,388		\$ 1,385	
	Year Ended December 31, 2013			
	As Previously Reported		As Revised	
Copper ore grade (%)	0.25	%	0.30	%
Gold ore grade (g per tonne)	0.60		0.55	
Copper recovery (%)	79.2	%	78.8	%
Gold recovery (%)	54.3	%	56.4	%
Concentrate production (dry tons)	24,713		20,304	
Copper payable production (000's lb)	10,352		10,362	
Gold payable production (oz)	20,374		19,879	
Copper cash cost (\$/payable lb produced) - Co-Product	\$ 5.36		\$ 5.40	
Gold cash cost (\$/payable oz produced) - Co-Product	\$ 1,456		\$ 1,468	
Copper and Gold Production and Cash Costs				

During the fourth quarter of 2013, Mt. Milligan Mine began the commissioning and start-up phase; Mt. Milligan Mine reached commercial production as of February 18, 2014, defined as operation of the mill at 60% design capacity mill throughput for 30 days.

As disclosed above, we are continuing to work through what we believe to be typical ramp-up issues. During the first quarter of 2014 ramp up at the Mt. Milligan Mine continued to progress as expected with the new leadership team focused on the optimization of the mine and mill. Concentrate production and cash costs continued to improve from

the fourth quarter of

33

Table of Contents

THOMPSON CREEK METALS COMPANY INC.

Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued)

2013, with payable copper production up by 52.1% from the previous quarter at a by-product cash cost that was 68.8% lower. Payable gold production also improved by 118.3% from the previous quarter at a co-product cash cost that was 56.3% lower.

Cash costs for the first quarter 2014 and fourth quarter 2013 were impacted by \$0.1 million and \$1.8 million, respectively, of costs to haul waste material from the mine pit to the tailings dam. This cost is expected to be part of Mt. Milligan Mine operations for the foreseeable future. Operating costs were positively impacted by favorable foreign exchange rates, as the US\$ strengthened against the C\$ in the first quarter of 2014. The average foreign exchange rate was US\$1.00 = C\$1.10 for the first quarter of 2014, resulting in an approximately \$3.9 million favorable impact on operating costs.

Copper and Gold Sold

During the first quarter of 2014, we sold 10.8 million pounds of copper and 23,874 ounces of payable gold. First quarter 2014 average realized prices were \$3.01 per pound of payable copper and \$1,025 per ounce of payable gold.

Development

During the three months ended March 31, 2014, cash capital expenditures were C\$23.0 million, consisting of C\$6.1 million for the permanent operations residence and C\$4.9 million for operations and C\$12.0 million for the project. The cash capital expenditures for the project were substantially complete as of March 31, 2014.

We currently estimate C\$45 million to C\$50 million of aggregate capital expenditures for the permanent operations residence, of which approximately C\$14 million to C\$19 million of expenditures remain to be spent through completion as of March 31, 2014. The permanent operations residence is expected to be completed in 2014.

US Operations Molybdenum**Thompson Creek Mine (TC Mine)**

The table that follows summarizes TC Mine's operating and financial results for the three months ended March 31, 2014 and 2013:

	Three Months Ended	
	March 31, 2014	March 31, 2013
Operational Statistics		
Mined		
Ore tonnes (000's)	1,683	3,045
Waste tonnes (000's)	84	77
Strip ratio	0.05	0.03
Milled (000's tonnes)	2,278	2,303
Grade (% molybdenum)	0.122	0.127
Recovery (%)	93.9	% 93.8
Molybdenum production (000's lb) ⁽¹⁾	5,658	5,929
Cash cost (\$/lb produced) ⁽²⁾	\$3.86	\$4.18
Molybdenum sold (000's lb)	5,868	5,279
Average realized sales price (\$/lb) ⁽²⁾	\$10.66	\$11.96

(1) Mined molybdenum production pounds reflected are molybdenum oxide and HPM.

(2) See "Non-GAAP Financial Measures" for the definition and reconciliation of these non-GAAP measures.

General

In October 2012, given the decline in molybdenum prices at the time and projected operating costs at TC Mine for 2015 and thereafter, we suspended waste stripping activity associated with Phase 8. The molybdenum market continued to weaken such that, as a result, at the end of 2013 we decided to put TC Mine on care and maintenance

when the mining and processing of Phase 7 ore is completed, which is expected to be in the fourth quarter of 2014. We intend to preserve the assets at TC Mine

Table of Contents

THOMPSON CREEK METALS COMPANY INC.

Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued)

while it is on care and maintenance to enable us to re-commence operations as market conditions may warrant. We continue to evaluate potential economically viable options for Phase 8.

Molybdenum Production and Cash Costs

Molybdenum production from TC Mine in the first quarter of 2014 was down 4.6% from the first quarter of 2013. Production for the first quarter of 2014 was negatively impacted by lower grade ore, which was partially offset by better than expected mill recoveries. Typical spring runoff water conditions in late March, which are expected to continue during the second quarter, impacted mining at the bottom of the pit, where ore grades are higher. Efforts to trench water away from the active dig faces allowed mining at the bottom of the pit to continue in late March, and stockpiled ore has been used to supplement feed to the mill.

In May 2014, TC Mine experienced a wall slide. As a result of the slide, access to Phase 7 ore has been temporarily cut off. Once it has been established that it is safe to resume operations in the pit mining of Phase 7 ore will recommence. During this period, we are processing stockpiled ore and, at this time, we do not believe there will be any material impact to the 2014 outlook as disclosed in our 2013 Form 10-K. However, we will be performing technical work to assess the full impact of the slide.

The non-GAAP financial measure of cash cost per pound produced in the first quarter of 2014 was lower than the first quarter of 2013, primarily due to lower operating costs primarily due to the decision to suspend stripping in the next mine phase (Phase 8) and to put TC Mine on care and maintenance in the fourth quarter of 2014. This resulted in deferred maintenance repairs and major equipment rebuilds, fewer wear part replacements, less diesel consumed and decreased blasting costs, as previously discussed.

Molybdenum Sold

Molybdenum pounds sold from TC Mine in the first quarter of 2014 was up 11.2% from the first quarter of 2013. The average realized sales price in the first quarter of 2014 was \$10.66 versus \$11.96 in the same period in 2013.

Langeloth Facility

Operating results for the Langeloth Facility represent activities related to the roasting and processing of third-party concentrate and other metals at the Langeloth Facility and excludes product volumes and costs related to the roasting and processing of TC Mine and Endako Mine product. The Langeloth Facility costs associated with roasting and processing of TC Mine and Endako Mine product are included in each Mine's respective operating results.

The following is a summary of the Langeloth Facility's operating results for the three months ended March 31, 2014 and 2013 :

	Three Months Ended	
	March 31, 2014	March 31, 2014
Operational Statistics		
Molybdenum sold from purchased product (000's lb)	1,254	2,240
Realized price on molybdenum sold from purchased product (\$/lb)	\$10.37	\$11.88
Toll roasted and upgraded molybdenum processed (000's lb)	579	2,195
Roasted metal products processed (000's lb)	1,780	5,969

In the first quarter of 2014, molybdenum sold from third-party purchased molybdenum concentrate was down 44.0% from the first quarter of 2013 due to substantially lower molybdenum purchases from third parties in the first quarter of 2014 compared to the same period in 2013. Since the Endako roaster shutdown in the first quarter of 2013, the Langeloth Facility has not purchased significant amounts of third-party molybdenum concentrate, instead served primarily as a roasting facility for material processed from our own molybdenum mines. When TC Mine goes on care and maintenance in the fourth quarter of 2014 as currently intended, we intend to increase our purchases of third party molybdenum concentrate.

The realized price on molybdenum sold from purchased product in the first quarter of 2014 was down 12.7% from the first quarter of 2013 due to a decrease in the market price of molybdenum.

35

Table of Contents

THOMPSON CREEK METALS COMPANY INC.

Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued)

The volume of toll roasted and upgraded molybdenum processed during the first quarter of 2014 decreased 73.6% compared to the same period in 2013, primarily due to lower capacity for third-party material due to higher volume of material processed from our own molybdenum mines.

The volume of roasted metal products processed during the first quarter of 2014 decreased 70.2% compared to the first quarter of 2013 primarily due to decreased customer demand and capacity for these services.

Canadian Operations Molybdenum

Endako Mine

The table and related discussion that follows summarize our 75% share of Endako Mine's operating and financial results for the three months ended March 31, 2014 and 2013:

	Three Months Ended			
	March 31, 2014	March 31, 2013		
Operational Statistics				
Mined				
Ore tonnes (000's)	1,925	—		
Wasted tonnes (000's)	315	—		
Strip ratio	0.16	—		
Milled (000's tonnes)	2,939	1,995		
Grade (% molybdenum)	0.045	0.056		
Recovery (%)	76.7	% 68.2	%	%
Molybdenum production (000's lb) ⁽¹⁾	2,229	1,761		
Cash cost (\$/lb produced) ⁽²⁾	\$10.54	\$11.75		
Molybdenum sold (000's lb)	2,723	1,295		
Average realized sales price (\$/lb) ⁽²⁾	\$10.06	\$11.49		

(1) Mined molybdenum production pounds are molybdenum oxide.

(2) See "Non-GAAP Financial Measures" for the definition and reconciliation of these non-GAAP measures.

Molybdenum Production and Cash Costs

Our 75% share of molybdenum production at Endako Mine in the first quarter of 2014 was 26.6% higher than the first quarter of 2013 primarily due to higher mill recoveries and throughput due to mill optimization and mining fresh ore instead of processing solely stock-piled ore, as we had done in the first quarter of 2013. These higher recoveries were partially offset by lower ore grades. As discussed previously, the mill has been fully optimized; however, Endako Mine has faced operational challenges in maintaining a consistent feed from the mine to the mill and with certain tailings operations, which adversely impacted production results during the first quarter of 2014.

Lower-of-cost-or-market product inventory write downs at Endako Mine were \$6.9 million and \$5.6 million during the first quarter of 2014 and 2013, respectively.

Non-GAAP cash cost per pound produced at Endako Mine decreased 10.3% in the first quarter of 2014 compared to the first quarter of 2013. The improvement in cash cost was primarily driven by higher production combined with a favorable impact on operating costs from foreign exchange rates, partially offset by lower ore grades and higher operating costs, which were primarily attributable to increased mining costs resulting from mining fresh ore, as discussed above. The foreign exchange rate averaged US\$1.00 = C\$1.10 for the first quarter of 2014 compared to an average rate of US\$1.00 = C\$1.01 for the same period in 2013, resulting in an approximately \$2.2 million favorable impact on operating costs.

Molybdenum Sold

Our share of molybdenum sold from Endako Mine in the first quarter of 2014 was 110.3% higher than the first quarter of 2013, due primarily to higher production and increased market demand. The average realized sales price in the first quarter of

36

Table of Contents

THOMPSON CREEK METALS COMPANY INC.

Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued)

2014 was \$10.06 per pound, which was down from the average realized sales price of \$11.49 per pound in the first quarter of 2013 as a result of declining market prices for molybdenum in the comparable periods.

Liquidity and Capital Resources

Our financial position was as follows:

	As of	
	March 31, 2014	December 31, 2013
Cash and cash equivalents	\$202.7	\$233.9
Accounts receivable, including related party receivables	62.8	54.1
Accounts payable and accrued liabilities	96.0	104.9
Current portion of debt, including equipment financings	37.6	37.2
Total working capital	279.7	315.4
Total debt, including equipment financings	1,003.6	1,012.8

During the first quarter of 2014, our debt and liquidity positions were affected by the following:

- Cash generated by operating activities of \$16.2 million;
- Capital expenditures of \$21.8 million, primarily related to the construction of the permanent operations residence at Mt. Milligan Mine; and
- Interest paid of \$19.4 million.

During the first quarter of 2014, we made three shipments to offtakers and received provisional payments for two of the shipments. We received an additional cash payment of approximately \$31 million in early April 2014 relating to the remaining shipment.

We monitor our exposure to the prices of our products as well as the currencies in which we operate. During the first quarter of 2014 we entered into hedges to manage our exposure to fluctuations in the prices of copper and gold, particularly since we sell copper and gold contained in concentrate to our customers, and also purchase gold to satisfy our obligations under the Royal Gold Arrangement. During the first quarter of 2014, we also entered into hedges to manage our exposure to the potential strengthening of the Canadian dollar against the US dollar. See Note 5 in Item 1 for further discussion. We monitor our positions with, and the credit quality of, the financial institutions and companies in which we invest our cash and cash equivalents. We manage our credit risk from accounts receivable through our collection activities. As of the date of this Quarterly Report on Form 10-Q, we have not experienced any material delinquencies regarding the collection of our accounts receivable.

Our ability to fund our capital expenditures, our working capital needs and our scheduled debt and interest payments primarily depends on cash flow from TC Mine and Mt. Milligan Mine in 2014 and from Mt. Milligan Mine thereafter. As previously disclosed, TC Mine is expected to go on care and maintenance in the fourth quarter of 2014 when the mining and processing of Phase 7 ore is completed. We expect to incur non-recurring costs of approximately \$35 million in 2015 and 2016 related to tailings slope management costs and employee retention and severance costs. In addition, the annual care and maintenance costs for TC Mine are expected to be approximately \$8 million to \$10 million.

We currently estimate that the Mt. Milligan Mine will ramp up to 75% to 80% of the designed mill throughput of 60,000 tonnes per day by the end of 2014 and will continue to ramp up to 100% of the designed mill throughput during 2015. For Mt. Milligan Mine copper and gold recoveries, we currently estimate that we will be ramping up to the designed copper recovery rate (87% for the first six years of production) in the first quarter of 2015 and the designed gold recovery rate (73% for the first six years of production) in the first quarter of 2016. In the event that the time frames required to reach the mill design throughput and recovery rates at Mt. Milligan Mine are substantially longer than currently anticipated or future capital expenditures required to enable Mt. Milligan to reach such design rates materially exceed our current estimate of approximately \$27 million to \$33 million in 2014, our liquidity may be

materially adversely affected.

In addition, our ability to generate positive cash flow from operations will depend, in large part, upon the market prices of copper, gold and molybdenum, which are subject to fluctuation. Please refer to the discussion in Overview above.

37

Table of Contents

THOMPSON CREEK METALS COMPANY INC.

Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued)

Our cash and cash equivalents balance is \$202.7 million and \$233.9 million at March 31, 2014 and December 31, 2013, respectively. As we ramp up Mt. Milligan Mine, we anticipate this balance to continue to decrease. The lowest cash and cash equivalent balance is expected to occur in the third quarter of 2014; but is not expected to be below the minimum liquidity level of \$75 million to \$100 million that we have set for ourselves. As we achieve design capacity at Mt. Milligan Mine in 2014 and 2015, we expect to begin to accumulate our cash and cash equivalent balance.

Operating Cash Flows

Cash generated by operating activities in the first quarter of 2014 was \$16.2 million compared to \$15.3 million in the first quarter of 2013. This improvement in cash flow from operations was primarily the result of less cash used for working capital, which was mostly offset by a net loss for the first quarter of 2014 compared to net income for the first quarter of 2013.

Investing Cash Flows

Cash used in investing activities in the first quarter of 2014 was \$37.5 million compared to \$151.8 million in the first quarter of 2013. This decline is primarily related to the progress made in completing the construction and development of Mt. Milligan period over period. During the first quarter of 2014, we spent \$21.8 million on property, plant, equipment and development expenditures primarily related to the construction of the permanent operations residence at Mt. Milligan, the construction and development of the Mt. Milligan project (which is substantially complete as of the end of the 2014 first quarter) and operating capital. For the first quarter of 2013, we spent \$155.1 million on property, plant, equipment and development that was primarily related to the construction and development of Mt. Milligan. Payments of interest that was previously capitalized related to development of Mt. Milligan Mine were \$6.3 million in the first quarter of 2014 compared to \$7.9 million in the first quarter of 2013. In the first quarter of 2014, we posted \$10.0 million of cash collateral against existing surety bonds for TC Mine reclamation bonds compared to \$0.2 million in the first quarter of 2013. Investing activities for the first quarter of 2014 included the release of \$0.6 million of restricted cash related to construction hold-back accounts for to the construction of Mt. Milligan Mine compared to \$11.4 million in the first quarter of 2013.

Financing Cash Flows

Cash used in financing activities in the first quarter of 2014 was \$9.0 million compared to cash generated by financing activities of \$79.6 million in the first quarter of 2013. Proceeds from the Gold Stream Arrangement were completed in the third quarter of 2013. In addition, there were no equipment financings during the first quarter of 2014. For descriptions of our debt and lease obligations, see Notes 7 and 8 of Item 1 of this 10-Q.

Off-Balance Sheet Arrangements

As of March 31, 2014, we have commitments to purchase approximately 9.3 million pounds of molybdenum as unroasted molybdenum concentrate from 2014 to 2016 to be priced at the time of purchase at a set discount to the market price for roasted molybdenum concentrate. In addition, we have purchase agreements to buy approximately 1.3 million pounds of molybdenum as roasted molybdenum concentrate during the remainder of 2014 to be priced at market at the time of delivery. We also have fixed-priced sales contracts, under which we have committed to sell approximately 194 thousand pounds of molybdenum in 2014 and 2015 at an average market price of \$13.25 per pound.

Transactions with our Endako Mine Joint Venture Partner

Our total sales to a company affiliated with Sojitz, our Endako Mine joint venture partner, represented 14.9% and 14.1% of our total revenues for the first quarter of 2014 and 2013, respectively. See Note 15 to our unaudited condensed consolidated financial statements included in this Form 10-Q for more information about transactions with this joint venture partner.

Non-GAAP Financial Measures

In addition to the condensed consolidated financial statements presented in accordance with US GAAP, we use certain non-GAAP financial measures to assess our operating performance for the reasons described further below. These

measures do not have standard meanings prescribed by US GAAP and may not be comparable to similar measures presented by other companies. The presentation of these measures is not intended to be considered in isolation from, as a substitute for, or as superior to, the financial information prepared and presented in accordance with US GAAP. In addition, these non-GAAP measures have limitations in that they do not reflect all of the amounts associated with the results of operations as determined in accordance with US GAAP.

Adjusted Net Income (Loss), Adjusted Net Income (Loss) Per Share—Basic and Diluted

Management of the Company uses adjusted net income (loss) and adjusted net income (loss) per share—basic and diluted to evaluate the Company's operating performance and for planning and forecasting future business operations. The Company believes the use of these measures allows investors and analysts to compare results of the continuing operations of the Company to similar operating results of other mining companies, by excluding items that are considered non-core to our business.

Table of Contents

THOMPSON CREEK METALS COMPANY INC.

Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued)

Adjusted net income (loss) represents the income (loss) prepared in accordance with US GAAP, adjusted for significant non-cash items.

For the first quarter of 2014 and 2013, the significant non-cash items were the non-cash losses related to the impact of foreign exchange due primarily to intercompany notes, and related tax effects. For the other 2013 and 2012 periods, the significant non-cash items were the asset impairments and related materials and supplies inventory impairments, the goodwill impairment and the non-cash gain and losses related to the impact of foreign exchange due primarily to intercompany notes, and related tax effects.

In connection with our strategy to manage cash balances, fund our operations and provide future tax benefits, we may enter into intercompany loan arrangements. At times, the loans are denominated in currencies other than the measurement currency of one of the parties. US GAAP requires that notes that are intended to be repaid should not be considered a capital contribution, and, therefore, the foreign exchange fluctuations related to these loans impact net income (loss) each period. At each period end, we compare the exchange rate between the Canadian and US dollars to the exchange rate at the inception of the notes. The difference between those rates is recorded as an unrealized gain or loss on the Condensed Consolidated Statements of Operations and Comprehensive Income (Loss) at each period end. As the loans between us and our subsidiaries are the primary driver of our foreign exchange gains and losses, as discussed above, management does not consider gains or losses on foreign exchange in its evaluation of our financial performance. We believe that presentation of our non-GAAP measures excluding these gains or losses provides useful information to our investors regarding our financial condition and results of operations.

Adjusted net income (loss) per share (basic and diluted) is calculated using adjusted net income (loss), as defined above, divided by the weighted-average basic and weighted-average diluted shares outstanding during the period as determined in accordance with US GAAP. If the adjustments to net (loss) on a US GAAP basis result in non-GAAP adjusted net income, we calculate weighted-average diluted shares outstanding in accordance with US GAAP and use that to calculate adjusted net income per share—diluted. If the adjustments to net income on a US GAAP basis result in non-GAAP adjusted net (loss), we utilize weighted-average basic shares outstanding to calculate adjusted net income per share—diluted, in accordance with US GAAP.

The following tables reconcile net income (loss) presented in accordance with US GAAP to the non-GAAP financial measures of adjusted net income (loss) and adjusted net income (loss) per share—basic and diluted, for the three months ended March 31, 2014 and 2013 and for all of the previous eight quarters. All figures within the tables are presented in US\$ in millions, except shares and per share amounts.

- (1) The asset impairment for Endako Mine in 2013 did not have a net tax impact due to offsetting valuation allowance movement; therefore, the non-GAAP adjusted net income (loss) presentation excluded this tax effect on both lines.

- (2) Included foreign exchange gains of \$0.4 million and foreign exchange losses of \$0.1 million and \$0.4 million for the three months ended March 31, 2014, December 31, 2013 and September 30, 2013, respectively.

Copper-Gold Operations - Unit Cash Cost and Average Realized Price per Payable Pound or Payable Ounce Sold
Unit cash cost on a by-product and co-product basis are considered key measures in evaluating our operating performance in our Copper-Gold operations. Unit cash cost on a by-product and co-product basis are not measures of financial performance, do not have standardized meaning prescribed by US GAAP and may not be comparable to similar measures presented by other companies. We use these measures to evaluate the operating performance at our Mt. Milligan Mine, as well as on a consolidated basis, as measures of profitability and efficiency. We believe that these non-GAAP measures provide useful supplemental information to investors in order that they may evaluate our performance using the same measures as those used by management and, as a result, the investor is afforded greater transparency in assessing our financial performance.

Unit cash cost on a by-product and co-product basis represent the mining (including all stripping costs), milling, on-site general and administration, truck and rail transportation, refining and treatment, ocean freight and insurance and warehousing. In accordance with the cash cost standard endorsed by the World Gold Council and, previously, the Gold Institute, sales of by-product metals are deducted when computing cash costs on a by-product basis. Stripping costs that provide access to mineral reserves that will be produced in future periods are expensed under US GAAP as incurred.

Table of Contents

THOMPSON CREEK METALS COMPANY INC.

Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued)

Unit cash cost on a by-product and co-product basis exclude the effects of changes in inventory; non-cash corporate allocations; other non-cash employee benefits, such as stock-based compensation; depreciation, depletion, amortization and accretion.

On a co-product basis, cash costs are allocated between copper and gold based on production. Copper production is stated in thousands of pounds and gold has been converted to thousands of copper equivalent (Cu eq.) pounds. Copper equivalent pounds are determined by using the gold production for the periods presented, as well as the most recent quarterly average prices for copper and gold. The price used for gold are a weighted average of the most recent quarterly average of the Metals Bulletin Daily published prices for daily average London price per ounce and the fixed price established under the Gold Stream Arrangement (\$435 per oz). The price used for copper is the most recent quarterly average of the Metals Bulletin Daily published price for LME settlement per tonne.

The following tables provide a reconciliation of cash costs and unit cash cost and operating expenses for Copper-Gold operations included in our Condensed Consolidated Statements of Operations and Comprehensive Income (Loss) in the determination of net income (loss). All figures within the tables are presented in US\$ in millions, except shares and per share amounts.

By-Product

(US\$ in millions, except pounds and per pound amounts)	Three Months Ended March 31, 2014
Copper payable production (000's lbs)	14,223
Direct mining costs ⁽¹⁾	\$49.6
Refining and treatment costs	2.8
Transportation, warehousing and insurance costs	3.6
By-product credits ⁽²⁾	(23.5)
Non-GAAP cash cost	\$32.5
Non-GAAP unit cash cost	\$2.29

(1) Mining (including all stripping costs), milling and on-site general and administration costs.

By-product credits for gold product revenues, net of refining and treatment charges, have been included as a

(2) reduction of cash costs. The amortization of deferred revenue from the Gold Stream Arrangement has been excluded from the calculation of by-product credits. By-product credits included in our presentation of Cash Cost on a By-Product basis include:

Molybdenum Operations - Cash Cost per Pound Produced, Weighted-Average Cash Cost per Pound Produced and Average Realized Sales Price per Pound Sold

Cash cost per pound produced, weighted-average cash cost per pound produced and average realized sales price per pound sold are considered key measures in evaluating our operating performance in our molybdenum operations.

Cash cost per pound produced, weighted-average cash cost per pound produced and average realized sales price per pound sold are not measures of financial performance, do not have standardized meanings prescribed by US GAAP and may not be comparable to similar measures presented by other companies. We use these measures to evaluate the operating performance at each of our molybdenum mines, as well as on a consolidated basis, as measures of profitability and efficiency. We believe that these non-GAAP measures provide useful supplemental information to investors in order that they may evaluate our performance using the same measures as those used by management and, as a result, the investor is afforded greater transparency in assessing our financial performance.

Cash cost per pound produced represents the mining (including all stripping costs), milling, mine site administration, roasting and packaging costs for molybdenum oxide and HPM produced at each mine in the period. Stripping costs represent the costs associated with the activity of removing overburden and other mine waste materials in the production phase of a mining operation. Stripping costs that provide access to mineral reserves that will be produced in future periods are expensed under US GAAP as incurred.

Cash cost per pound produced excludes the effects of purchase price adjustments; the effects of changes in inventory; corporate allocations; stock-based compensation; other non-cash employee benefits; and depreciation, depletion, amortization and accretion. Cash cost for TC Mine, which only produces molybdenum sulfide and HPM on site, includes an estimated molybdenum loss (sulfide to oxide), an allocation of roasting and packaging costs from the Langeloth Facility and transportation costs from TC Mine to the Langeloth Facility. The cash cost for Endako Mine in 2013 and 2014 includes an allocation of roasting and packaging costs from the Langeloth Facility and transportation costs from Endako Mine to the Langeloth Facility. The weighted-average cash cost per pound produced represents the cumulative total of the cash costs for TC Mine and Endako Mine divided by the cumulative total production from TC Mine and Endako Mine.

The average realized sales price per pound sold represents molybdenum sales revenue divided by the pounds sold.

The following table provides a reconciliation of cash costs and cash cost per pound produced, by mine, and operating expenses included in our Condensed Consolidated Statements of Operations and Comprehensive Income (Loss) in the determination of net income (loss). All figures within the tables are presented in US\$ in millions, except pounds and

per pound amounts.

(1) Mined production pounds are molybdenum oxide and HPM from our share of the production from the mines but excludes molybdenum processed from purchased product.

(2) Other operations represent activities related to the roasting and processing of third-party concentrate and other metals at the Langeloth Facility and exclude product volumes and costs related to the roasting and processing of TC Mine and Endako Mine concentrate. The Langeloth Facility costs associated with roasting and processing of TC Mine and Endako Mine concentrate are included in their respective operating results above.

Critical Accounting Estimates

The critical accounting policies and estimates used in the preparation of our condensed consolidated financial statements are set forth in our 2013 Form 10-K and have not changed.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**Commodity Price Risk**

Our consolidated revenues include the sale of concentrate from Mt. Milligan mine and the sale of molybdenum in various forms from TC and Endako Mines and from third-party material that is purchased, processed and sold from our and other mines as well as the Langeloth Facility. Our financial results can vary significantly as a result of fluctuations in the market prices of copper, gold and molybdenum.

At March 31, 2014, we estimate that, based on our 2014 production guidance, the following changes in the prices for each of our metals will impact our 2014 consolidated revenues as follows:

Table of Contents

Metal	Change in Price ¹	Impact on Revenue (US\$ in millions)	
Copper	\$0.10 per pound	\$6.5	to \$7.5
Gold	\$100 per ounce	\$7.9	to \$8.4
Molybdenum	\$1 per pound	\$24.0	to \$28.0

(1) Copper and molybdenum price changes are on realized prices. Gold price change is calculated using the price for our 47.75% share of payable gold.

Copper and Gold

Substantially all of our concentrate sales contracts provide final pricing in a specified future month (generally one to four months from the shipment date) based primarily on quoted LME monthly average spot copper prices or quoted LBMA monthly average spot gold prices. We receive market prices based on prices in the specified future period, which results in price fluctuations recorded through revenues until the date of settlement. To the extent final prices are higher or lower than what was recorded on a provisional basis, an increase or decrease to revenues is recorded each reporting period until the date of final pricing. Accordingly, in times of rising copper and gold prices, our revenues benefit from adjustments to the final pricing of provisionally priced sales pursuant to contracts entered into in prior periods; in times of falling copper and gold prices, the opposite occurs.

In order to hedge the price risk for the metals contained in concentrate, we have entered into certain forward copper and gold purchase and sale contracts where we purchase copper or gold at an average price during a quotational period and sell copper or gold at a spot price. Additionally, we have entered into zero - cost collars where we agreed with a counterparty to a floor and ceiling relative to future prices of gold.

To satisfy our obligations under the Gold Stream Arrangement, after the sale of concentrate to offtakers, we purchase unallocated refined gold and arrange for delivery to Royal Gold's designated account. We receive payments from offtakers in cash, thus requiring the purchase of gold in order to satisfy the obligation to pay Royal Gold in gold. At March 31, 2014, to satisfy our obligations under the Gold Stream Arrangement, we had one outstanding contract to purchase 5,212 ounces of gold that settled in early April 2014.

In order to hedge the risk that the price of gold will increase between the pricing period for sales of concentrate and our purchase of gold to satisfy our obligation under the Gold Stream Arrangement, we have entered into certain forward gold purchase and sales contracts where we purchase gold at an average price during a quotational period (QP) and sell gold at a spot price. The following table provides details of related commodity contracts as of March 31, 2014:

	Quantity	Sell Price	Buy Price	Maturities Through
Royal Gold Hedge Sales (oz)	14,785	\$1,288 - \$1,321	TBD	May 2014 - June 2014
Royal Gold Hedge Purchases (oz)	4,440	TBD	TBD	May 2014 - August 2014
Forward Gold Sales (oz)	7,300	\$1,290 - \$1,292	TBD	May 2014 - October 2014
Forward Copper Sales (lb)	4,850,170	\$3.02	TBD	April 2014
	Quantity	Put Price	Call Price	Maturities Through
Gold Collars (oz)	3,000	\$1,200	\$1,365 - \$1,368	April 2014 - October 2014
Molybdenum				

We will at times enter into provisionally-priced molybdenum sales contracts, whereby the contracts settle at prices to be determined at a future date. The future pricing mechanism of these agreements constitutes an embedded derivative, which is bifurcated and separately marked to estimated fair value at the end of each period. Changes to the fair value of embedded derivatives related to molybdenum sales contracts are included in molybdenum sales revenue in the determination of net income (loss). Changes to the fair value of embedded derivatives related to molybdenum purchase contracts are included in operating expenses in the determination of net income (loss). The following table sets forth our outstanding provisionally-priced molybdenum contracts as of March 31, 2014:

Table of Contents

	Pounds to be Sold/Purchased (000's lb)
Provisionally-priced sales	291
Provisionally-priced purchases	266
We also enter into certain molybdenum sales contracts to sell future molybdenum production at fixed prices. These fixed prices may be different than the quoted market price at the date of sale. We treat these contracts as normal purchase and normal sales contracts. The following table sets forth our outstanding fixed-price molybdenum sales contracts as of March 31, 2014:	
Molybdenum committed (000's lb)	194
Average price (\$/lb)	\$13.25

In the normal course of operations, we enter into agreements for the purchase of molybdenum. As of March 31, 2014, we have commitments to purchase approximately 9.3 million pounds of molybdenum unroasted molybdenum concentrate from 2014 to 2016 to be priced at the time of purchase at a set discount to the market price for roasted molybdenum concentrate. In addition, we have purchase agreements to buy approximately 1.3 million pounds of molybdenum as roasted molybdenum concentrate during the remainder of 2014 to be priced at market at the time of delivery.

Foreign Currency Exchange Risk

We transact business in various currencies in the normal course of our operations. All of our revenues are denominated in the US dollar; however, we pay certain expenses attributable to our Canadian operations in the Canadian dollar. As a result, we have ongoing foreign exchange translation risk with respect to our Canadian operations. A decrease of 5% in the value of the US dollar relative to the Canadian dollar would have decreased operating income (loss) during the first quarter of 2014 by approximately \$0.9 million.

To help mitigate this risk, we have entered into foreign currency forward contracts in which we have agreed to buy Canadian dollars at an agreed-upon rate. We record our currency contracts at fair value using a market approach based on observable quoted exchange rates and contracted notional amounts. As of March 31, 2014, we had two open foreign currency option contracts to buy C\$20 million at exchange rates ranging from \$1.12 to \$1.13 which settled in April 2014.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

TCM's disclosure controls and procedures are designed to ensure that information required to be disclosed in the reports that are filed under the Securities Exchange Act of 1934, as amended (the "Exchange Act") is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission, and that such information is accumulated and communicated to TCM's management, including the Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

The Chief Executive Officer and the Chief Financial Officer, with assistance from management, have evaluated the effectiveness of disclosure controls and procedures as of March 31, 2014. Based on that evaluation, the Chief Executive Officer and the Chief Financial Officer have concluded that TCM's disclosure controls and procedures were not effective as a result of the material weaknesses described below.

Previously Reported Material Weaknesses

As previously discussed in Item 9A "Controls and Procedures" of our December 31, 2013 Form 10-K, we reported material weaknesses at the Mt. Milligan mine site related to:

- inadequate management oversight and monitoring of certain financial controls;
- ineffective controls over the accuracy and valuation of inventory, including the accuracy of periodic physical counts and the accuracy of the assumptions used in the valuation;
- ineffective controls over the recognition and measurement of capitalized costs related to property, plant & equipment, specifically, cut-off procedures related to accrued liabilities and the allocation between capitalized costs and expenses.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting, other than described below, that occurred during the three months ended March 31, 2014 that have materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

During the three months ended March 31, 2014, we took steps to remediate the material internal control weaknesses related to our Mt. Milligan mine site, including:

- designed new controls for management oversight of the processes and procedures at, and the timely review of financial information from, the Mt. Milligan site;
- replacement of the leadership team at Mt. Milligan as of January 2014 to include experienced and trusted individuals from TCM's other operations; and
- implementing personnel changes across all levels of site management, including financial reporting and operations.

Management's Plans for Remediation of the Material Weaknesses

During the three months ended March 31, 2014, we began to implement our remediation plan; however, the material weakness will not be considered remediated and effective until additional review procedures regarding the operations of Mt. Milligan have been operating effectively for an adequate period of time. Management will consider the status of this remediation effort when assessing the effectiveness of the Company's internal controls over financial reporting and disclosure controls and procedures in future reporting periods. While management believes that the remediation efforts will resolve the identified material weaknesses, there is no assurance that management's remediation efforts conducted to date will be sufficient or that additional remediation will not be necessary.

PART II — OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

In 2010, the Stellat'en First Nation filed a petition in the Supreme Court of British Columbia against the British Columbia Minister of Energy, Mines and Petroleum Resources and TCM alleging that Endako Mine and the mill expansion project at Endako Mine represent infringements of the aboriginal title of the petitioners and impacts to their aboriginal rights, and that the government breached its duty to consult with the Stellat'en First Nation in relation to the impacts of Endako Mine and the mill

expansion. The petitioners sought a declaration that the Provincial Crown did not fulfill its duty to consult with them in relation to the mill expansion project, a declaration that the mining permits and/or tenures held by TCM are invalid, an order quashing or setting aside the decision to issue a permit amendment to TCM and an injunction prohibiting further construction or alterations relating to the mill expansion project. The matter was heard by the Supreme Court of British Columbia in a hearing that took place in early 2011. In August 2011, the Court dismissed the petitioners' claims in full. The Stelat'en First Nation subsequently filed a notice of appeal from that decision to the Court of Appeal of British Columbia seeking to have the decision of the Supreme Court of British Columbia set aside and seeking an order staying the permit amendment and any future permitting until the Province has engaged in further consultation. In September 2013, the Court of Appeal dismissed the Stelat'en First Nation's appeal. In January 2014, the Stelat'en First Nation applied for leave from the Supreme Court of Canada to appeal the British Columbia Court of Appeal decision. In February 2014, the Supreme Court of Canada dismissed the Stelat'en First Nation's leave to appeal application, and awarded costs to the respondents.

We are from time to time involved in or subject to other legal proceedings related to our business. While it is not feasible to predict or determine the outcome of these proceedings, it is the opinion of management that the resolution of these proceedings are not expected to have a material adverse effect on our consolidated financial position, results of operations or cash flows.

ITEM 1A. RISK FACTORS

Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2013 sets forth information relating to important risks and uncertainties that could materially adversely affect our business, financial condition or operating results. Those risk factors continue to be relevant to an understanding of our business, financial condition and operating results for the quarter ended March 31, 2014.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. MINE SAFETY DISCLOSURES

Under Section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act, mine operators are required to include in their periodic reports filed with the SEC certain information concerning mine safety violations and other regulatory matters. The required information is included in Exhibit 95 to this report.

ITEM 5. OTHER INFORMATION

None.

ITEM 6. EXHIBITS

Exhibit Number	Description
3.1	Notice of Articles, dated October 21, 2013 (incorporated by reference to Exhibit 4.1 to TCM's Registration Statement on Form S-8 filed with the SEC on November 22, 2013).
3.2	Certificate of Continuation, dated July 29, 2008 (incorporated by reference to Exhibit 3.1 to TCM's Amendment No. 1 to its Annual Report on Form 10-K filed with the SEC on March 1, 2010).
3.3	Articles of Continuance, effective July 21, 2008 (incorporated by reference to Exhibit 99.1 to TCM's Report on Form 6-K filed with the SEC on August 27, 2008).
*31.1	Certification of Chief Executive Officer required by Section 302 of the Sarbanes-Oxley Act of 2002.
*31.2	Certification of Chief Financial Officer required by Section 302 of the Sarbanes-Oxley Act of 2002.
*32.1	Certification of Chief Executive Officer required by Section 906 of the Sarbanes-Oxley Act of 2002. This document is being furnished in accordance with SEC Release No. 33-8328.
*32.2	Certification of Chief Financial Officer required by Section 906 of the Sarbanes-Oxley Act of 2002. This document is being furnished in accordance with SEC Release No. 33-8328.
*95	Mine Safety Disclosures.
*101	The following materials from the Annual Report on Form 10-Q of Thompson Creek Metals Company Inc. for the quarter ended March 31, 2014 formatted in XBRL (eXtensible Business

Edgar Filing: Thompson Creek Metals Co Inc. - Form 10-Q

Reporting Language): (i) Condensed Consolidated Statements of Operations and Comprehensive Income (Loss), (ii) Condensed Consolidated Balance Sheets, (iii) Condensed Consolidated Statements of Cash Flows, and (iv) related notes to these financial statements.

* Filed herewith.
