LABOR SMART, INC.
NOTES TO FINANCIAL STATEMENTS

NOTE 1 – NATURE OF OPERATIONS

Nature of Business

Labor Smart, Inc. (the “Company”) was incorporated in the State of Nevada on May 31, 2011. Labor Smart, Inc. provides temporary blue-collar staffing services. It supplies general laborers on demand to the light industries, including manufacturing, logistics, and warehousing, skilled trades’ people, and general laborers to commercial construction industries.

NOTE 2 – GOING CONCERN

The accompanying financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. The Company requires capital for its contemplated operational and marketing activities. The Company’s ability to raise additional capital through the future issuances of common stock is unknown. Accordingly, the Company has an accumulated deficit of \$1,881,533 at June 30, 2013. The obtainment of additional financing and increasingly profitable operations are necessary for the Company to continue operations. The ability to successfully resolve these factors raise substantial doubt about the Company’s ability to continue as a going concern. These financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts, or amounts and classification of liabilities that might result from this uncertainty.

NOTE 3 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

These financial statements are presented in United States dollars and have been prepared in accordance with generally accepted accounting principles in the United States of America. The Company has adopted a December 31 fiscal year end.

Fair Value of Financial Instruments

As required by the Fair Value Measurements and Disclosures Topic of the FASB ASC (“ASC 820-10”), fair value is measured based on a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value as follows: (Level 1) observable inputs such as quoted prices in active markets; (Level 2) inputs, other than the quoted prices in active markets, that are observable either directly or indirectly; and (Level 3) unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

The three levels of the fair value hierarchy are described below:

- Level 1 Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;
- Level 2 Quoted prices in markets that are not active, or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability;
- Level 3 Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

Edgar Filing: Labor Smart, Inc. - Form 10-Q

Pursuant to ASC 825, the fair value of cash and marketable securities is determined based on “Level 1” inputs, which consist of quoted prices in active markets for identical assets. The Company believes that the recorded values of cash, accounts receivables, marketable securities, accounts payable and accrued liabilities, and notes payable approximate their current fair values because of their nature and respective relatively short maturity dates or durations.

Assets measured at fair value on a recurring basis were presented on the Company’s balance sheets as of June 30, 2013 and December 31, 2012 as follows:

	Fair Value Measurements as of June 30, 2013 Using:

Cash and Cash Equivalents

Cash and cash equivalents consist of cash and short-term investments with original maturities of less than ninety (90) days. Cash equivalents are placed with high credit quality financial institutions and are primarily in money market funds. The carrying value of those investments approximates fair value.

Revenue Recognition

The Company recognizes revenues and the related costs when persuasive evidence of an arrangement exists, delivery and acceptance has occurred or service has been rendered, the price is fixed or determinable, and collection of the resulting receivable is reasonably assured. Amounts invoiced or collected in advance of product delivery or providing services are recorded as deferred revenue. The Company accrues for sales returns, bad debts, and other allowances based on its historical experience.

Deferred Financing Costs

Deferred financing costs consist of costs incurred to obtain debt financing, including legal fees, origination fees and administration fees. Costs associated with the Convertible Promissory Note are deferred and amortized in our accompanying statement of operations using the straight-line method, which approximates the effective interest method, over the terms of the respective financing instrument.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the Company to make estimates and judgments that affect the reported amounts of assets and liabilities, revenues and expenses, and related disclosures of contingent assets and liabilities. These estimates and judgments are based on historical information, information that is currently available to the Company, and on various other assumptions that the Company believes to be reasonable under the circumstances. Actual results could differ from those estimates.

Factoring Agreement and Accounts Receivable

The Company has a month-to-month financing agreement with RIVIERA FINANCE that includes a non-recourse factoring arrangement that provides notification factoring on substantially all of the Company's sales. RIVIERA FINANCE, based on credit approved orders, assumes the accounts receivable risk of the Company's customers in the event of insolvency or non-payment. All other receivable risks for customer deductions that reduce the customer receivable balances are retained by the Company, including, but not limited to, allowable customer markdowns, disputes, and discounts. The Company assumes the risk on accounts receivable not factored to RIVIERA FINANCE, which is shown as accounts receivable on the accompanying balance sheets, net of factored accounts receivable. As of June 30, 2013 and December 31, 2012, factored accounts receivable total \$201,905 and \$291,708, respectively.

Equipment

Property and equipment are stated at the lower of cost or fair value. Depreciation is provided on a straight-line basis over the estimated useful lives of the assets, as follows:

Description	Estimated Life
Office equipment and furniture	3 years

The estimated useful lives are based on the nature of the assets as well as current operating strategy and legal considerations such as contractual life. Future events, such as property expansions, property developments, new competition, or new regulations, could result in a change in the manner in which the Company uses certain assets requiring a change in the estimated useful lives of such assets.

Earnings Per Share

Basic earnings per common share is computed by dividing net income available to common shareholders by the weighted-average number of shares of common stock outstanding during the period. Diluted earnings per common share is computed by dividing income available to common shareholders by the weighted-average number of shares of common stock outstanding during the period increased to include the number of additional shares of common stock that would have been outstanding if potentially dilutive securities had been issued. There were no potentially dilutive securities outstanding during the periods presented.

Recent Accounting Pronouncements

The Company does not expect the adoption of recently issued accounting pronouncements to have a significant impact on the Company's results of operations, financial position, or cash flow.

NOTE 6 – CUSTOMER RELATIONSHIP, NET

On April 29, 2013 the Company entered into an Asset Purchase Agreement (“Agreement”) with Qwik Staffing Solutions, Inc. (“Qwik”). Under the terms of the Agreement, Qwik sold all of the operating assets (“Assets”) of Qwik, excluding cash and accounts receivable. In consideration for the Assets, the Company agreed to pay \$320,000 in cash. The first \$150,000 is due one day prior to the delivery and transfer of the Assets. The remaining \$170,000 is due in monthly installments by paying an amount equal to 6.5% of the monthly accounts receivable collected by operating the Orlando, Jacksonville and Tampa, Florida locations. In the event these aggregate monthly payments total less than \$170,000, after 14 months, Qwik will issue the Company a credit memo for the difference.

The total purchase price for Qwik was approximately \$308,490. The purchase price consisted of approximately (i) \$150,000 in cash, (ii) Estimated fair value of consideration payable on collection 6.5% of the monthly accounts receivable collected by operating the Orlando, Jacksonville and Tampa, Florida locations over the next fourteen months of \$158,490. The Company expected to pay total consideration of \$170,000 in equal installments over 14 months. The fair value of the consideration was estimated by discounting the monthly installments by 12% per annum.

The determination of the estimated fair value of the acquired assets and liabilities assumed required management to make significant estimates and assumptions. We determined the fair value by applying established valuation techniques, based on information that management believed to be relevant to this determination. The following table summarizes the purchase price allocation of the fair value of the assets acquired and liabilities assumed at the date of purchase:

Equipment	\$10,654
Prepaid supplies	3,736
Customer relationships	294,100
Net assets acquired	\$308,490
Cash	\$150,000
Contingent consideration	158,490
Consideration paid	\$308,490

Administrative charges based on various rates are charged on the gross face amount of all accounts with minimum fees as defined in the agreement. Liquidity and Capital Resources

We have funded our operations to date primarily through the sale of equity, invoice factoring, convertible notes payable and shareholder loans. Based on our current operating plan, we anticipate that we have sufficient cash and cash equivalents to fund our operations into the coming months. We will require additional cash to fund our operating plan past that time. If the level of sales anticipated by our financial plan are not achieved or our working capital requirements are higher than planned, we will need to raise additional cash sooner or take actions to reduce operating expenses. We are implementing plans to reduce our costs of capital and improve our revenue. If we cannot generate adequate cash by implementing these steps, we plan to obtain additional cash through the issuance of equity or debt securities. There can be no assurance that additional cash will be available or that, if available, it will be available on terms acceptable to us on a timely basis. If adequate funds are not available on a timely basis, we intend to limit our operations to extend our funds as we pursue other financing opportunities and business relationships. This limitation of operations could include reducing our planned investment in working capital to fund revenue growth and result in reductions in staff, operating costs, and capital expenditures.

Net cash used in operations was \$640,273 during the six months ended June 30, 2013. Net cash flows used in operating activities for the six months ended June 30, 2013 mainly consisted of a net loss of \$1,410,735 adjusted for stock based compensation of \$274,570, interest and financing fees of \$436,204, an increase of our off-balance sheet receivables factoring of \$201,905, off set by an increase of \$1,147,862 in accounts receivable and an increase of \$824,010 in payroll taxes payable.

Net cash used in operating activities totaled approximately \$190,904 during the six months ended June 30, 2012. During the six months ended June 30, 2012, the cash used in operating activities was primarily driven by our trade receivables of approximately \$772,291, off set by factored accounts receivable of \$218,201 and an increase in payroll taxes payable of \$294,020.

Cash used in investing activities totaled \$149,755 for the six months ended June 30, 2013. Net cash flows from investing activities consisted of \$150,000 paid towards the asset purchase agreement and \$92,453 in the purchase of marketable securities offset by \$92,453 in proceeds from the sale of marketable securities and.

Net cash provided by financing activities totaled \$729,099 for the six months ended June 30, 2013. Net cash flows from financing activities consisted of proceeds from convertible notes payable of \$798,200, proceeds from the issuance of common stock of \$100,000 offset by payments on a convertible note payable of \$103,500, payments on related party notes of \$55,000, payments towards a contingent liability of \$410, and payments on financed insurance premiums of \$10,191.

Cash provided by financing activities totaled \$200,000 for the six months ended June 30, 2012. The proceeds were generated from shareholder loans of \$210,000 off set by repayments of \$10,000.

Our continued capital needs will depend on branch operating performance, our ability to control costs, and the continued impact from our expansion plans in 2013.

Assets and Liabilities:

At June 30, 2013, we had total current assets of approximately \$1,977,732 and current liabilities of approximately \$2,613,317. Included in current assets are trade accounts receivable of approximately \$1,656,210, prepaid expenses of \$93,378, and deferred financing costs of \$96,319. Accounts receivable are recorded at the invoiced amounts. We regularly review our accounts receivable for collectability. We will typically refer overdue balances to a collection agency at 120 days and the collection agent pursues collection for another 60 days. Most balances over 120 days past due are written off, as it is probable the receivable will not be collected. We wrote down \$957 in bad debt included in S,G,&A during the six months ended June 30, 2013. As our business matures, we will continue to monitor and seek to improve our historical collection ratio and aging experience with respect to trade accounts receivable. As we grow, our historical collection ratio and aging experience with respect to trade accounts receivable will continue to be important factors affecting our liquidity.
