FORM 10-K

(Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2013

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 001-35628

PERFORMANT FINANCIAL CORPORATION
(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

20-0484934
(I.R.S. Employer
Identification No.)

333 North Canyons Parkway, Livermore, CA
(Address of principal executive offices)

94551
(Zip Code)

Registrant's telephone number, including area code: (925) 960-4800

Securities registered pursuant to Section 12(b) of the Act:

Title of each class:	Name of each exchange on which registered:
Common Stock, par value \$.0001 per share	NASDAQ Global Select Market

Securities registered pursuant to Section 12(g) of the Act:

Common Stock, par value \$.0001 per share
(Title of class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (section 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Edgar Filing: Performant Financial Corp - Form 10-K

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

As of June 28, 2013 (the last business day of the registrant's most recently completed second quarter), the aggregate market value of the common stock held by non-affiliates of the registrant was \$328,500,099. Shares of common stock beneficially held by each officer and director and by each person who owns 10% or more of the outstanding common stock have been excluded in that such persons may be deemed to be affiliates. This determination of affiliate status is not necessarily a conclusive determination for other purposes.

As of March 11, 2014, 48,433,887 shares of the registrant's common stock were outstanding.

Documents Incorporated By Reference

All or a portion of Items 10 through 14 in Part III of this Form 10-K are incorporated by reference to the Registrant's definitive proxy statement on Schedule 14A, which will be filed within 120 days after the close of the fiscal year covered by this report on Form 10-K, or if the Registrant's Schedule 14A is not filed within such period, will be included in an amendment to this Report on Form 10-K which will be filed within such 120 day period.

Cautionary Statement Regarding Forward-Looking Information

This Annual Report on Form 10-K contains, in addition to historical information, certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact contained in this Annual Report on Form 10-K, including statements regarding our future results of operations and financial position, strategy and plans, and our expectations for future operations, are forward-looking statements. The words “believe,” “may,” “estimate,” “continue,” “anticipate,” “design,” “intend,” “expect” and similar expressions are intended to identify forward-looking statements. We have based these forward-looking statements largely on our current expectations and projections about future events and trends that we believe may affect our financial condition, results of operations, strategy, short-term and long-term business operations and objectives, and financial needs.

Forward-looking statements include, but are not limited to, statements about:

- our opportunities and expectations for growth in the student lending, healthcare and other markets;
- anticipated trends and challenges in our business and competition in the markets in which we operate;
- our client relationships and future growth opportunities;
- the adaptability of our technology platform to new markets and processes;
- our ability to invest in and utilize our data and analytics capabilities to expand our capabilities;
- our growth strategy of expanding in our existing markets and considering strategic alliances or acquisitions;
- our ability to meet our liquidity and working capital needs;
- maintaining, protecting and enhancing our intellectual property;
- our expectations regarding future expenses;
- expected future financial performance; and
- our ability to comply with and adapt to industry regulations and compliance demands.

These statements reflect current views with respect to future events and are based on assumptions and subject to risks and uncertainties. There are a variety of factors that could cause actual results to differ materially from the anticipated results or expectations expressed in our forward-looking statements. These risks and uncertainties include, but are not limited to, those risks discussed in Item 1A of this report. Given these uncertainties, you should not place undue reliance on these forward-looking statements.

Forward-looking statements contained in this report present management’s views only as of the date of this report. We undertake no obligation to publicly update forward-looking statements, whether as a result of new information, future events or otherwise. You are advised, however, to consult any further disclosures we make on related subjects in our quarterly reports on Form 10-Q and current reports on Form 8-K filed with the Securities and Exchange Commission.

ITEM 1. Business

Overview

We provide technology-enabled recovery and related analytics services in the United States. Our services help identify and recover delinquent or defaulted assets and improper payments for both government and private clients in a broad range of markets. Our clients typically operate in complex and regulated environments and outsource their recovery needs in order to reduce losses on billions of dollars of defaulted student loans, improper healthcare payments and delinquent state tax and federal treasury receivables. We generally provide our services on an outsourced basis, where we handle many or all aspects of our clients’ recovery processes.

We believe we have a leading position in our markets based on our proprietary technology-enabled services platform, long-standing client relationships and the large volume of funds we have recovered for our clients. In 2013, we provided recovery services on approximately \$11.0 billion of combined student loans and other delinquent federal and state receivables and recovered approximately \$598 million in improper Medicare payments. Our clients include 11 of the 30 public sector participants in the student loan industry and these relationships average more than 10 years in length, including a 23-year relationship with the Department of Education. As of September 30, 2013, approximately \$91 billion of government-supported student loans were in default. In the healthcare market, we are currently one of four prime Medicare Recovery Audit Contractors, or RACs, in the United States for the Centers for Medicare and

Medicaid Services, or CMS. According to the

1

Table of Contents

Government Accountability Office, Medicare paid \$573 billion of claims in 2012, of which approximately \$44 billion were estimated to be improper payments.

We utilize our technology platform to efficiently provide recovery and analytics services in the markets we serve. We have continuously developed and refined our technology platform for almost two decades by using our extensive domain and data processing expertise. Our technology platform allows us to disaggregate otherwise complex recovery processes into a series of simple, efficient and consistent component steps, which we refer to as workflows, for our recovery and healthcare claims review specialists. This approach enables us to continuously refine our recovery processes to achieve higher rates of recovery with greater efficiency. By optimizing what traditionally have been manually-intensive processes, we believe we achieve higher workforce productivity versus more traditional labor-intensive outsourcing business models. For example, we generated in excess of \$170,000 of revenues per employee during 2013, based on the average number of employees during the year.

We believe that our platform is easily adaptable to new markets and processes. Over the past several years, we have successfully extended our platform into additional markets with significant recovery opportunities. For example, we utilized the same basic platform previously used primarily for student loan recovery activities to enter the healthcare market. We have enhanced our platform through investment in new data and analytics capabilities, which we believe will enable us to provide additional services such as services relating to the detection of fraud, waste and abuse.

Our revenue model is generally success-based as we earn fees based on a percentage of the aggregate amount of funds that we enable our clients to recover. Our services do not require any significant upfront investments by our clients and we offer our clients the opportunity to recover significant funds otherwise lost. Because our model is based upon the success of our efforts and the dollars we enable our clients to recover, our business objectives are aligned with those of our clients and we are generally not reliant on their spending budgets. Further, our business model does not require significant capital expenditures and we do not purchase loans or obligations.

For the year ended December 31, 2013, we generated approximately \$255.3 million in revenues, \$36.3 million in net income, \$89.4 million in adjusted EBITDA and \$42.8 million in adjusted net income. See "Managements Discussion and Analysis of Financial Condition and Results of Operations - Adjusted EBITDA and Adjusted Net Income" in Item 7 below for a definition of adjusted EBITDA and adjusted net income and reconciliations of adjusted EBITDA and adjusted net income to net income determined in accordance with generally accepted accounting principles.

We commenced our operations in 1976 under the corporate name Diversified Collection Services, Inc., or DCS. We were incorporated in Delaware on October 8, 2003 under the name DCS Holdings, Inc. and subsequently changed our name to Performant Financial Corporation in 2005. Our website address is www.performantcorp.com.

Our Markets

We operate in markets characterized by strong growth, a complex regulatory environment and a significant amount of delinquent, defaulted or improperly paid assets.

Student Lending

Government-supported student loans are authorized under Title IV of the Higher Education Act of 1965. Historically, there have been two distribution channels for student loans: (i) the Federal Direct Student Loan Program, or FDSLPL, which represents loans made and managed directly by the Department of Education; and (ii) the Federal Family Education Loan Program, or FFELP, which represents loans made by private institutions and currently backed by any of the 31 Guaranty Agencies, or "GAs".

In July 2010, the government-supported student loan sector underwent a structural change with the passage of SAFRA. This legislation transitioned all new government-supported student loan originations to the FDSLPL, and away from originations made by private institutions within the FFELP that had previously utilized the GAs to guarantee, manage and service loans. The GAs are non-profit 501(c)(3) public benefit corporations operating under contract with the U.S. Secretary of Education, pursuant to the Higher Education Act of 1965, as amended, solely for the purpose of guaranteeing and managing student loans originated by lenders participating in the FFELP.

Consequently, while the original distribution channels for student loans have been consolidated into one channel, the Department of Education, this does not impact the volume of government-supported student loan origination, which is a key driver of the volume of defaulted student loan inventory. In addition, despite this transition of all new loan originations to the FDSLPL, GAs will continue to manage a significant amount of defaulted student loans for some

period of time, due to their large outstanding portfolios of loans originated prior to July 2010. The outstanding portfolios of defaulted FFELP loans will, therefore, require recovery for the foreseeable future.

Table of Contents

The Department of Education estimates that the balance of defaulted loans was approximately \$55.9 billion in the FDSLPL and approximately \$34.5 billion in the FFELP as of September 30, 2013. These programs collectively guaranteed approximately \$896 billion of federal government-supported student loans according to the Congressional Budget Office as of September 30, 2012. Given the operational and logistical complexity involved in managing the recovery of defaulted student loans, the Department of Education and the GAs generally choose to outsource these services to third parties.

Healthcare

The healthcare industry represents a significant portion of the U.S. GDP. According to CMS, U.S. healthcare spending reached \$2.8 trillion in 2012 and is forecast to grow at a 6% annual rate through 2022. In particular, CMS indicates that federal government-related healthcare spending for 2012 totaled approximately \$1.2 trillion. This federal government-related spending included approximately \$573 billion for Medicare, which provides a range of healthcare coverage primarily to elderly and disabled Americans, and \$421 billion for Medicaid, which provides federal matching funds for states to finance healthcare for individuals at or below the public assistance level.

Medicare was initially established as part of the Social Security Act of 1965 and consists of four parts: Part A covers hospital and other inpatient stays; Part B covers hospital outpatient, physician and other services; Part C is known as Medicare Advantage, under which beneficiaries receive benefits through private health plans; and Part D is the Medicare outpatient prescription drug benefit.

Of the \$573 billion of 2012 Medicare spending, the Department of Health and Human Services estimated that approximately \$44 billion, or approximately 8%, was improper, and that Medicare is the federal program with the largest amount of improper payments. Medicare improper payments generally involve incorrect coding, procedures performed which were not medically necessary, and incomplete documentation or claims submitted based on outdated fee schedules, among other issues. Likewise, Medicaid improper payments were estimated to be \$19 billion, or 5%, of total Medicaid payments for 2012.

In accordance with the Medicare Prescription Drug, Improvement, and Modernization Act of 2003, a demonstration program was conducted from March 2005 to March 2008 in six states to determine if the RAC program could be effectively used to identify improper payments for claims paid under Medicare Part A and Part B. Due to the success of this demonstration, under The Tax Relief and Health Care Act of 2006, the U.S. Congress authorized the expansion of the RAC program nationwide. CMS relies on third-party contractors to execute the RAC program to analyze millions of Medicare claims annually for improper payments to healthcare providers. The program was implemented by designating one prime contractor in each of the four major regions in the United States: West, Midwest, South, and Northeast.

In addition to government-related healthcare spending, significant growth in spending is expected in the private healthcare market. According to CMS' National Health Expenditures Projections, the private healthcare market accounted for approximately \$1.6 trillion in spending in 2012 and private expenditures are projected to grow more than 5% annually through 2022.

Other Markets

State Tax Market

As state governments struggle with revenue generation and face significant budget deficits, many states have focused on recovery of delinquent state taxes. According to the Center on Budget and Policy Priorities, an independent think tank, 31 U.S. states faced projected budget shortfalls totaling \$55 billion in the year ended September 30, 2013. The economic recession beginning in 2008 led to lower income and sales taxes from both individuals and corporations, reducing overall tax revenues and leading to large budget deficits at the state government level. While many states have received federal aid, most have cut services and increased taxes to help close the budget shortfall and have evaluated outsourcing at least some aspect of delinquent tax recovery.

Federal Agency Market

The federal agency market consists of government debt subrogated to the Department of the Treasury by numerous different federal agencies, comprising a mix of commercial and individual obligations and a diverse range of receivables. These debts are managed by the Bureau of the Fiscal Service (formerly the Department of Financial Management Service), a bureau of the Department of the Treasury, or FS. Since 1997, the FS has recovered more than

Edgar Filing: Performant Financial Corp - Form 10-K

\$62 billion in delinquent federal debt. For the year ended September 30, 2013, federal agency recoveries in this market totaled more than \$7 billion, an increase of more than \$800 million over 2012. A significant portion of these collections are processed by private collection firms on behalf of the FS.

3

Table of Contents

Our Competitive Strengths

We believe that our business is difficult to replicate, as it incorporates a combination of several important and differentiated elements, including:

Scalable and flexible technology-enabled services platform. We have built a proprietary technology platform that is highly flexible, intuitive and easy to use for our recovery and claims specialists. Our platform is easily configurable and deployable across multiple markets and processes. For example, we have successfully extended our platform from the student loan market to the state tax, federal treasury receivables and the healthcare recovery markets, each having its own industry complexities and specific regulations.

Advanced, technology-enabled workflow processes. Our technology-enabled workflow processes, developed over many years of operational experience in recovery services, disaggregate otherwise complex recovery processes into a series of simple, efficient and consistent steps that are easily configurable and applicable to different types of recovery-related applications. We believe our workflow software is highly intuitive and helps our recovery and claims specialists manage each step of the recovery process, while automating a series of otherwise manually-intensive and document-intensive steps in the recovery process. We believe our streamlined workflow technology drives higher efficiencies in our operations, as illustrated by our ability to generate in excess of \$170,000 of revenues per employee during 2013, based on the average number of employees during the year. We believe our streamlined workflow technology also improves recovery results relative to more labor-intensive outsourcing models.

Enhanced data and analytics capabilities. Our data and analytics capabilities allow us to achieve strong recovery rates for our clients. We have collected recovery-related data for over two decades, which we combine with large volumes of client and third-party data to effectively analyze our clients' delinquent or defaulted assets and improper payments. We have also developed a number of analytics tools that we use to score our clients' recovery inventory, determine the optimal recovery process and allocation of resources, and achieve higher levels of recovery results for our clients. In addition, we utilize analytics tools to continuously measure and test our recovery workflow processes to drive refinements and further enhance the quality and effectiveness of our capabilities. Finally, we possess enhanced data analytics capabilities, which we refer to as Performant Insight, which provides capabilities in several areas including the detection of fraud, waste and abuse in various markets and has assisted in our recovery activities for CMS. We intend to use our enhanced analytics capabilities to pursue additional opportunities in both the public and private healthcare markets.

Long-standing client relationships. We believe our long-standing focus on achieving superior recovery performance for our clients and the significant value our clients derive from this focus have helped us achieve long-tenured client relationships, strong contract retention and better access to new clients and future growth opportunities. We have business relationships with 11 of the 30 public sector participants in the student loan market and these relationships average more than 10 years in length, including an approximate 23-year relationship with the Department of Education. In the healthcare market, we have a seven-year relationship with CMS and are currently one of four prime Medicare RAC contractors.

Extensive domain expertise in complex and regulated markets. We have extensive experience and domain expertise in providing recovery services for government and private institutions that generally operate in complex and regulated markets. We have demonstrated our ability to develop domain expertise in new markets such as healthcare and state tax and federal Treasury receivables. We believe we have the necessary organizational experience to understand and adapt to evolving public policy and how it shapes the regulatory environment and objectives of our clients. We believe this helps us identify and anticipate growth opportunities. For example, we successfully identified government healthcare as a potential growth opportunity that has thus far led to the award of three contracts to us by CMS. Together with our flexible technology platform, we have the ability to adapt our business strategy, to allocate resources and to respond to changes in our regulatory environment to capitalize on new growth opportunities.

Proven and experienced management team. Our management team has significant industry experience and has demonstrated strong execution capabilities. Our senior management team, led by Lisa Im, has been with us for an average of approximately 11 years. This team has successfully grown our revenue base and service offerings beyond the original student loan market into healthcare and delinquent state tax and private financial institutions receivables. Our management team's industry experience, combined with deep and specialized understanding of

4

Table of Contents

complex and highly regulated industries, has enabled us to maintain long-standing client relationships and strong financial results.

Our Growth Strategy

Key elements of our growth strategy include the following:

Expand our student loan recovery volume. The balance of defaulted government-supported student loans was approximately \$91 billion as of September 30, 2013. While we have long-standing relationships with some of the largest participants in the government-supported student loan market, we believe there are significant opportunities within this growing market to increase the volume of student loans placed with us by existing and new clients. For example, if we are able to enter into a new contract with the Department of Education, which is currently subject to a rebidding process, we believe there is an opportunity to grow our placement volume through strong performance. Further, as a result of our relationships with five of the seven largest GAs, we believe we are well-positioned to benefit as a result of any consolidation of smaller GAs over the coming years.

Expand our recovery services in the healthcare market. According to CMS, Medicare spending totaled approximately \$573 billion in 2012 and is expected to increase to \$1.1 trillion in 2022, representing a compound annual growth rate of 6%. In the private healthcare market, spending totaled \$1.6 trillion in 2012 and is expected to grow more than 5% annually through 2022, according to CMS' National Health Expenditures Projections. As these large markets continue to grow, we expect the need for recovery services to increase in the public and private healthcare markets. If we are able to continue to provide audit and recovery services for CMS under a new RAC contract, which is currently open to a competitive bidding process, we plan to expand our audit and recovery services in the public healthcare market. Further, we expect to continue to develop our audit, recovery and analytics services in the private healthcare market. In addition, through our enhanced analytics capabilities, we intend to pursue opportunities to find and eliminate losses prior to payment for healthcare services, including the detection of fraud, waste and abuse in the public and private healthcare markets.

Pursue strategic alliances and acquisitions. We intend to selectively consider opportunities to grow through strategic alliances or acquisitions that are complementary to our business. These opportunities may enhance our existing capabilities, enable us to enter new markets, expand our product offerings and allow us to diversify our revenues.

Our Platform

Our technology-enabled services platform is based on over two decades of experience in recovering large amounts of funds on behalf of our clients across several markets. The components of our platform include our data management expertise, analytics capabilities and technology-based workflow processes. Our platform integrates these components to allow us to achieve optimized outcomes for our clients in the form of increased efficiency and productivity and high recovery rates. Our platform and workflow processes are also intuitive and easy to use for our recovery and claims specialists and allow us to increase our employee retention and productivity.

The components of our platform include the following:

Data Management Expertise

Our platform manages and stores large amounts of data throughout the workflow process. This includes both proprietary data we have compiled over two decades as well as third-party data which we can integrate efficiently and in real-time to reduce errors, reduce cycle time processing and, ultimately, improve recovery rates. The strength of our data management expertise augments our analytics capabilities and provides our recovery and claims specialists with powerful workflow processes.

Data Analytics Capabilities

Our data analytics capabilities efficiently screen and allocate massive volumes of recovery inventory. For example, upon receipt of each placement of student loans, we utilize our proprietary algorithms to assist us in determining the most efficient recovery process and the optimal allocation of recovery specialist resources for each loan. In the healthcare market, we analyze millions of Medicare claims to find potential correlations between claims data and improper payments, which enhance our future recovery rates. Across all of our current markets, we utilize our

proprietary analytics tools to continuously and rigorously test our workflow processes in real-time to drive greater process efficiency and improvement in recovery rates.

5

Table of Contents

Furthermore, we believe our enhanced analytics capabilities will extend our potential markets, permitting us to pursue significant new business opportunities. For example, we have expanded the use of our data analytics capabilities in the healthcare sector to offer a variety of services from post and pre-payment audit of healthcare claims in both the public and private healthcare sector, to detection of fraud, waste and abuse of healthcare claims, to coordination of benefits and pharmacy fraud detection.

Workflow Processes

Over many years, we have developed and refined our recovery workflow processes, which we believe drive higher efficiency and productivity and reduce our reliance on labor-intensive methods relative to more traditional recovery outsourcing models. We refer to the patented technology that supports our proprietary workflows as “Smart Bins.” Smart Bins disaggregate otherwise complex recovery processes into a series of simple, efficient and consistent steps that are easily configurable and applicable to different types of recovery-related applications. Our workflow processes integrate a broad range of functions that encompass each stage of a recovery process.

Smart Bins have been designed to be highly intuitive and help our recovery and claims specialists manage each step in the recovery process and enhance their productivity to high levels, regardless of skill differences among specialists. Smart Bins direct specialists toward the most efficient and effective action, or step with respect to the management and recovery of a defaulted student loan, with some input by specialists. Our technology places expert system rules into the workflow engine, allowing employees at different skill levels to manage the more complex work steps that highly experienced workers would perform, while automating document management and compliance functionality as industry regulations and compliance demands change.

The following recovery diagram illustrates how the various components of our platform work together to solve a typical client workflow:

Table of Contents

7

Table of Contents

Our Services

We use our technology-enabled services platform to provide recovery and analytics services in a broad range of markets for the identification and recovery of student loans, improper healthcare payments and delinquent state tax and federal treasury receivables. The table below summarizes our recovery services and related analytics capabilities and the markets we serve.

Recovery Services			Analytics Capabilities
<p>Student Loans</p> <ul style="list-style-type: none"> • Provide recovery services to the Department of Education, GAs and private institutions • Identify and track defaulted borrowers across our clients’ portfolios of student loans • Utilize our proprietary technology, our history of borrower data and our analytics capabilities to rehabilitate and recover past due student loans • Earn contingent, success-based fees calculated as a percentage of funds that we enable our clients to recover 	<p>Healthcare</p> <ul style="list-style-type: none"> • Provide audit and recovery services to identify improper healthcare payments for public and private healthcare providers • Identify improper payments typically resulting from incorrect coding, procedures that were not medically necessary, incomplete documentation or claims submitted based on outdated fee schedules • Earn contingent, success-based fees based on a percentage of claim amounts recovered 	<p>Other Markets</p> <ul style="list-style-type: none"> • Provide tax recovery services to state and municipal agencies • Recover government debt for numerous different federal agencies under a contract with the Treasury and provide recovery and audit services for the Department of Education • Enable financial institutions to proactively manage loan portfolios and reduce the incidence of defaulted loan assets • Earn contingent, success-based fees calculated as a percentage of the amounts recovered, fees based on dedicated headcount and hosted technology licensing fees 	<ul style="list-style-type: none"> • We use our enhanced data analytics capabilities, which we refer to as Performant Insight, to offer a variety of services from post- and pre-payment audit of healthcare claims to detection of fraud, waste and abuse of healthcare claims, to coordination of benefits and pharmacy fraud detection

Recovery Services

Student Loans

We provide recovery services primarily to the government-supported student loan industry, and our clients include the Department of Education and several of the largest GAs, as well as private financial institutions. We use our proprietary technology to identify, track and communicate with defaulted borrowers on behalf of our clients to implement suitable recovery programs for the repayment of outstanding student loan balances.

Our clients contract with us to provide recovery services for large pools of student loans generally representing a portion of the total outstanding defaulted balances they manage, which they provide to us as “placements” on a periodic basis. Generally, the volume of placements that we receive from our clients is influenced by our performance under our contracts and our ability to recover funds from defaulted student loans, as measured against the performance of competitors who may service a similar pool of defaulted loans for the same client. To the extent we perform well under our existing contracts and differentiate our services from those of our competitors, we may receive a relatively greater number of student loan placements under these contracts and may improve our ability to obtain future contracts from these clients and other potential clients.

We use algorithms derived from over two decades of experience with defaulted student loans to make reasonably accurate estimates of the recovery outcomes likely to be derived from a placement of defaulted student loans.

We also restructure and recover student loans issued directly by banks to students outside of federal lending programs. These types of loans typically supplement government-supported student loans to meet any shortfall in supply of student loan needs that cannot be met by grants or federal loans. Unlike government-supported student loans, private student loans do not have capped interest rates and, accordingly, involve higher instances of default relative to federally-backed student loans.

Healthcare

We provide recovery services related to improper payments in the healthcare market. In 2009 we were awarded the role as one of four prime RAC contractors in the United States, with exclusive responsibility for the Northeast region. Under our existing RAC contract, we identify and facilitate the recovery of improper Parts A and B Medicare payments. Our existing

Table of Contents

contract with CMS is currently subject to a competitive rebidding process. Our relationship with CMS began in 2005 with an initial demonstration contract to recover improper payments for Medicare Secondary Payor claims.

Under our RAC contract with CMS, we utilize our technology-enabled services platform to screen Medicare claims against several criteria, including coding procedures and medical necessity standards, to determine whether a claim should be further investigated for recoupment or adjustment by CMS. We conduct automated and, where appropriate, detailed medical necessity reviews. If we determine that the likelihood of finding a potential improper payment warrants further investigation, we request and review healthcare provider medical records related to the claim, utilizing experts in Medicare coding and registered nurses. We interact and communicate with healthcare providers and other administrative entities, and ultimately submit the claim to CMS for correction.

In the private healthcare market, we utilize our technology-enabled services platform to provide audit, recovery and analytical services for private healthcare providers.

Other Markets

We also provide recovery services to several state and municipal tax authorities, the Department of the Treasury, the Department of Education and a number of financial institutions.

For state and municipal tax authorities, we analyze a portfolio of delinquent tax and other receivables placed with us, develop a recovery plan and execute a recovery process designed to maximize the recovery of funds. In some instances, we have also run state tax amnesty programs, which provide one-time relief for delinquent tax obligations, and other debtor management services for our clients. We currently have relationships with ten state and municipal governments. Delinquent obligations are placed with us by our clients and we utilize a process that is similar to the student loan recovery process for recovering these obligations.

For the Department of the Treasury, we recover government debt subrogated to it by numerous different federal agencies. The placements we are provided represent a mix of commercial and individual obligations. We are one of four contractors for the most recent Treasury contract.

We also provide risk management advisory services that enable these clients to proactively manage loan portfolios and reduce the incidence of defaulted loan assets over time. Our experience suggests that proactive default prevention practices produce significant net yield and earnings gains for our clients. We deliver these services in two forms. First, we contact and consult with borrowers to implement a repayment program, including payment through automatic debit arrangements, prior to the beginning of the repayment period in order to increase the likelihood that payments begin on time. Second, we offer a service that involves contacting delinquent borrowers in an effort to cure the delinquency prior to the loan entering default.

Analytics Capabilities

For several years, we have leveraged our data analytics tools to help filter, identify and recover delinquent and defaulted assets and improper payments as part of our core recovery services platform. Through our enhanced data analytics capabilities, which we refer to as Performant Insight, we are able to review, aggregate, and synthesize very large volumes of structured and unstructured data, at high speeds, from the initial intake of disparate data sources, to the warehousing of the data, to the analysis and reporting of the data. We believe we have built a differentiated, next-generation “end-to-end” data processing solution that will maximize value for current and future customers. Performant Insight provides numerous benefits for our recovery services platform. Performant Insight has not only enhanced our existing recovery services under our RAC contract by analyzing significantly higher volumes of healthcare claims at faster rates and reducing our cycle time to review and assess healthcare claims, but has also enabled us to develop improved and more sophisticated business intelligence rules that can be applied to our audit processes. We believe our enhanced analytics capabilities will extend our potential markets, permitting us to pursue significant new business opportunities. We have expanded the use of our data analytics capabilities in the healthcare sector to offer a variety of services from post and pre-payment audit of healthcare claims in both the public and private healthcare sector, to detection of fraud, waste and abuse of healthcare claims, to coordination of benefits and pharmacy fraud detection.

Our Clients

We provide our services across a broad range of government and private clients in several markets.

Department of Education

Table of Contents

We have provided student loan recovery services to the Department of Education for approximately 23 years. We restructure and recover defaulted student loans distributed directly by the Department of Education as part of the FDSLPL. Due to its limited resources and recovery capabilities, the Department of Education outsources much of its defaulted student loan portfolio to third-party vendors for recovery. Recovery fees are entirely contingency-based, and our fee for a particular recovery depends on the type of recovery facilitated. We also receive incremental performance incentives based upon our performance as compared to other contractors with the Department of Education, which are comprised of additional inventory allocation volumes and incentive fees. To participate in the Department of Education contracts, firms must follow a highly competitive selection process. For the latest Department of Education contract, the fourth major contract the Department of Education has outsourced to selected vendors, we were selected as one of 17 unrestricted vendors and initiated work on this contract in the fourth quarter of 2009. We are currently subject to a competitive rebidding process for the next contract with the Department of Education. Because all federally-supported student loans are being originated by the Department of Education as a result of SAFRA, our relationship with the Department of Education will become increasingly more important over time. The Department of Education was responsible for approximately 20.2% of our revenues for the years ended December 31, 2013.

Guaranty Agencies

We restructure and recover defaulted student loans issued by private lenders and backed by GAs under the FFELP. Despite the transition from FFELP to FDSLPL, we believe GA default volumes will continue to rise for a few years as there is a lag between originations and defaults of at least three to four years. When a borrower stops making regular payments on a FFELP loan, the GA is obligated to reimburse the lender approximately 97% of the loan's principal and accrued interest. GAs then seek to recover and restructure these obligations. The GAs with which we contract generally structure one to three-year initial term contracts with multiple renewal periods, and historically the fees that we receive are generally similar to the fees we receive from the Department of Education contract. For some GA clients, we provide services through MSAs, under which we manage a GA's entire portfolio of defaulted student loans and, for certain clients, engage subcontractors to provide a portion of the recovery services associated with a GA's student loan portfolio.

We have a relationship with 11 of the 30 active GAs in the U.S., including Great Lakes Higher Education Guaranty Corporation and American Student Assistance Corporation, which were responsible for 16.5% and 12.1%, respectively, of our revenues for the year ended December 31, 2013. We have had relationships with GA clients for over 25 years.

CMS

We have a seven-year relationship with CMS. Under our RAC contract with CMS awarded in 2009, we identify and facilitate the recovery of improper Parts A and B Medicare payments in the Northeast region of the United States and which accounted for approximately 26.2% of our revenues for the year ended December 31, 2013. We are currently subject to a competitive rebidding process for the next RAC contract with CMS. The fees that we receive for identifying these improper payments from CMS are entirely contingency-based, and the contingency-fee percentage depends on the methods of recovery, and, in some cases, the type of improper payment that we identify.

U.S. Department of the Treasury

We have assisted the Department of the Treasury for 16 years in the recovery of delinquent receivables owed to a number of different federal agencies. The debt obligations we help to recover on behalf of the Department of the Treasury include commercial and individual debt obligations. We are one of the four firms servicing the current Department of the Treasury contract. Similar to our other recovery contracts, our fees under this contract are contingency-based. We view this as an important strategic relationship, as it provides us valuable insight into other business opportunities within the federal government.

State Tax and Municipal Agencies

We provide outsourced recovery services for individuals' delinquent state tax and other municipal obligations on a hosted model and under MSAs. We currently have relationships with ten state and municipal governments.

Private Lenders

We provide recovery services for private student loans, that supplement federally guaranteed loans, and home mortgages to private lenders.

Sales and Marketing

10

Table of Contents

Our new business opportunities have historically been driven largely by referrals and natural extensions of our existing client relationships, as well as a targeted outreach by senior management. Our sales cycles are often lengthy, and demand high levels of attention from our senior management. At any point in time, we are typically focused on a limited number of potentially significant new business opportunities. As a result, to date, we have operated with a small staff of experienced individuals with responsibility for developing new sales, relying heavily upon our executive staff, including a Senior Vice President of Sales and Marketing and a sales team covering various markets.

Technology Operations

Our technology center is based in Livermore, California, with a redundant capacity in our Grants Pass, Oregon office. Additionally, Performant Insight, our data analytics business, is supported by staff in Miami Lakes, Florida. We have designed our infrastructure for scalability and redundancy, which allows us to continue to operate in the event of an outage at either datacenter. We maintain an information systems environment with advanced network security intrusion detection and prevention with 24x7 monitoring and security incident response capabilities. We utilize encryption technologies to protect sensitive data on our systems, all data during transmission and all data on redundancy or backup media. We also maintain a comprehensive enterprise-wide information security system based upon recognized standards, including the NIST800 53 and ISO 27002 Code of Practice for Information Security Program Management, to uphold high security standards needed for the protection of sensitive information.

Competition

We face significant competition in all aspects of our business.

In recovery services for delinquent and defaulted assets, we face competition from a number of companies. Holders of these delinquent and defaulted assets typically engage several firms simultaneously to provide recovery services on different portions of their portfolios. The number of recovery firms engaged varies by client. For example, we are one of 17 unrestricted providers of recovery services on the current Department of Education contract, while some of the GAs may only engage a few recovery vendors at any time. Initially, we compete to be one of the retained firms in a competitive bidding process and, if we are successful, we then face continuing competition from the client's other retained firms based on the client's benchmarking of the recovery performance of its several vendors. Clients such as the Department of Education typically will allocate additional placements to those recovery vendors producing the highest recovery rates. We believe that we primarily compete on the basis of recovery rate performance, as well as maintenance of high standards of recovery practices and data security capabilities. We believe that we compete favorably with respect to most of these factors as evidenced by our long-standing relationships with our clients in these markets. Pricing is not usually a major competitive factor as all recovery services vendors in these markets typically receive the same contingency-based fee rate.

In the recovery of improper healthcare payments, we faced a highly competitive process, involving a large number of bidders, to become one of the four prime RAC contractors in the United States. CMS is currently in the procurement process for the next round of RAC contracts. We expect that our competition will include the other three RAC service providers: Health Management Systems, Inc., Connolly Consulting, Inc. and CGI Group. We also may face competition from a variety of healthcare consulting and healthcare information services companies. Some of these potential competitors for the next RAC contract may have greater financial and other resources than we do. According to the request for quotes, the competitive factors for this new RAC contract are demonstrated experience in effective recovery services in the healthcare market, technical approach for identifying improper payments, key personnel and staffing, financial capability to perform under the RAC contract and recovery fee rates. We believe that our seven-year relationship with CMS and our related experience in providing recovery services to identify improper payments allows us to compete favorably with respect to many of these factors. We expect that our performance in identifying claims, managing the claims processes under the current RAC contract, and established systems integration with CMS and related Medicare administrative contractors will also be key factors in determining our continued service to CMS.

Government Regulation

The nature of our business requires that we adhere to a complex array of federal and state laws and regulations. These include the Health Insurance Portability and Accountability Act, or HIPAA, the Fair Debt Collection Practices Act, or FDCPA, the Fair Credit Reporting Act, or FCRA, the rules and regulations established by the Consumer Financial Protection Bureau, or CFPB, and related state laws. We are also governed by a variety of state laws that regulate the

collection, use, disclosure and protection of personal information. We have implemented and maintain physical, technical and administrative safeguards intended to protect all personal data and we have processes in place to assist us in complying with applicable laws and regulations regarding the protection of this data. Our compliance efforts include training of personnel and monitoring our systems and personnel.

Table of Contents

HIPAA and Related State Laws

Our Medicare recovery business subjects us to compliance with HIPAA and various related state laws that contain substantial restrictions and requirements with respect to the use and disclosure of an individual's protected health information. HIPAA prohibits us from using or disclosing an individual's protected health information unless the use or disclosure is authorized by the individual or is specifically required or permitted under HIPAA. Under HIPAA, we must establish administrative, physical and technical safeguards to protect the confidentiality, integrity and availability of electronic protected health information maintained or transmitted by us or by others on our behalf. We are required to notify affected individuals and government authorities of data security breaches involving unsecured protected health information. The Department of Health and Human Services Office of Civil Rights enforces HIPAA privacy violations; CMS enforces HIPAA security violations and the Department of Justice enforces criminal violations of HIPAA. We are subject to statutory penalties for violations of HIPAA.

Most states have enacted patient confidentiality laws that protect against the unauthorized disclosure of confidential medical information, and many states have adopted or are considering further legislation in this area, including privacy safeguards, security standards and data security breach notification requirements. These state laws, if more stringent than HIPAA requirements, are not preempted by the federal requirements, and we must comply with them even though they may be subject to different interpretations by various courts and other governmental authorities. In addition, numerous other state laws govern the collection, dissemination, use, access to and confidentiality of individually identifiable health and healthcare provider information.

Our compliance efforts include the encryption of protected health information that we hold and the development of procedures to detect, investigate and provide appropriate notification if protected health information is compromised. Our employees and contractors receive initial and periodic supplemental training and are tested to ensure compliance. As part of our certification and accreditation process, we must undergo audits by federal agencies as noted below. CMS regularly audits us for, among other items, compliance with their security standards.

Privacy Act of 1974

The Privacy Act of 1974 governs the collection, use, storage, destruction and disclosure of personal information about individuals by a government agency and extends to government contractors who have access to agency records performing services for government agencies. The Act requires maintenance of a code of conduct for employees with access to the agency records addressing the obligations under the Privacy Act, training of employees and discipline procedures for noncompliance. The Act also requires adopting and maintaining appropriate administrative, technical and physical safeguards to insure the security and confidentiality of records and to protect against any anticipated threats or hazards to their security or integrity.

As a contractor to federal government agencies we are required to comply with the Privacy Act of 1974. Our compliance effort includes initial and ongoing training of employees and contractors in their obligations under the Act. In addition we have implemented and maintain physical, technical and administrative safeguards and processes intended to protect all personal data consistent with or exceeding our obligations under the Privacy Act.

Certification, Accreditation and Security

Business services that collect, store, transmit or process information for United States government agencies and organizations are required to undergo a rigorous certification and accreditation process to ensure that they operate at an acceptable level of security risk. As a government contractor, we currently have Authority to Operate, or ATO, licenses from both the Department of Education and CMS.

We maintain a comprehensive enterprise-wide information security system based upon recognized standards, including the NIST800 53 and ISO 27002 Code of Practice for Information Security Program Management, to uphold high security standards needed for the protection of sensitive information. In addition, we hold SSAE – SOC 1 Type II certification, which provides assurance to auditors of third parties that we maintain the necessary controls and procedures to effectively manage third party data. We undergo an independent audit by our government agency clients on the award of the contract and periodically thereafter. We also conduct periodic self-assessments.

Our regulatory compliance group is charged with the responsibility of ensuring our regulatory compliance and security. All our facilities have security perimeter controls with segregated access by security clearance level. The information systems environment maintains advanced network security intrusion detection and prevention with 24x7

monitoring and security incident response capabilities. We utilize encryption technologies to protect sensitive data on our systems, all data during transmission and all data on redundancy or backup media. Employees undergo background and security checks appropriate to their position. This can include security clearances by the Federal Bureau of Investigation. We also maintain compliant disaster recovery and business continuity plans, annually conduct two table top disaster exercises, conduct routine

12

Table of Contents

security risk assessments and maintain a continuous improvement process as part of our security risk mitigation and management activity.

FDCPA and Related State Laws

The FDCPA regulates persons who regularly collect or attempt to collect, directly or indirectly, consumer debts owed or asserted to be owed to another person. Certain of our debt recovery and loan restructuring activities may be subject to the FDCPA. The FDCPA establishes specific guidelines and procedures that debt recovery firms must follow in communicating with consumer debtors, including the time, place and manner of such communications. Further, it prohibits harassment or abuse by debt recovery firms, including the threat of violence or criminal prosecution, obscene language or repeated telephone calls made with the intent to abuse or harass. The FDCPA also places restrictions on communications with individuals other than consumer debtors in connection with the collection of any consumer debt and sets forth specific procedures to be followed when communicating with such third parties for purposes of obtaining location information about the consumer. In addition, the FDCPA contains various notice and disclosure requirements and prohibits unfair or misleading representations by debt recovery firms. Finally, the FDCPA imposes certain limitations on lawsuits to collect debts against consumers.

Prior to the adoption of amendments to the FDCPA as part of the Dodd-Frank Act, no federal agency had the authority to issue interpretative regulations for the FDCPA. As a result, judicial determinations and non-binding interpretative positions issued by the Federal Trade Commission under the FDCPA created compliance difficulties for the consumer debt collections industry. With the adoption of the amendments to the FDCPA as part of the Dodd-Frank Act in 2011, however, as well as specific statutory authority to issue implementing regulations for the FDCPA, primary jurisdiction for the FDCPA was transferred to the Consumer Financial Protection Bureau, or CFPB. Subsequently, the CFPB has indicated that it may issue proposed regulations under the FDCPA in 2014.

Debt recovery activities are also regulated at the state level. Most states have laws regulating debt recovery activities in ways that are similar to, and in some cases more stringent than, the FDCPA. In addition, some states require debt recovery firms to be licensed.

Our compliance efforts include written procedures for compliance with the FDCPA and related state laws, employee training and monitoring, auditing client calls, periodic review, testing and retraining of employees, and procedures for responding to client complaints. In all states where we operate, we believe that we currently hold all required state licenses or are exempt from licensing. Violations of the FDCPA may be enforced by the U.S. Federal Trade Commission, or FTC, or by a private action by an individual or class. Violations of the FDCPA are deemed to be an unfair or deceptive act under the Federal Trade Commission Act, which can be punished by fines for each violation. Class action damages can total up to one percent of the net worth of the entity violating the statute. Attorney fees and costs are also recoverable. In the ordinary course of business we are sued for alleged violations of the FDCPA and comparable state laws, although the amounts involved in the disposition or settlement of any such claims have not been significant.

FCRA

We are also subject to the Fair Credit Reporting Act, or FCRA, which regulates consumer credit reporting and which may impose liability on us to the extent that the adverse credit information reported on a consumer to a credit bureau is false or inaccurate. State law, to the extent it is not preempted by the FCRA, may also impose restrictions or liability on us with respect to reporting adverse credit information. Our compliance efforts include initial and ongoing training of employees working with consumer credit reports, monitoring of performance, and periodic review and risk assessments. Violations of FCRA, which are deemed to be unfair or deceptive acts under the Federal Trade Commission Act, are enforced by the FTC or by a private action by an individual or class. Civil actions by consumers may seek damages per violation, with punitive damages, attorneys fees and costs also recoverable. Under the Federal Trade Commission Act, penalties for engaging in unfair or deceptive acts can be punished by fines for each violation.

CFPB

The CFPB was created as part of the Dodd-Frank Act in 2011, with primary implementing and interpretative authority for most federal consumer protection laws, including the FDCPA, transferred to the CFPB. Among other things, the CFPB was given the authority to issue interpretive regulations for the FDCPA, which it has indicated may be issued as a proposal in 2014.

In addition to its authority in regard to federal consumer protection laws, the CFPB was also provided direct jurisdiction over certain consumer financial service providers. In October of 2012, the CFPB issued a rule asserting direct jurisdiction over large consumer debt collectors, which includes debt collectors with annual assets of more than \$10 million. In accordance with the calculations included in this rule, we are subject to direct jurisdiction of the CFPB and in the future may be

13

Table of Contents

directly examined and supervised by the CFPB. In that regard, the CFPB has also released examination guidance that its examiners will use when reviewing compliance by debt collectors subject to its direct supervision.

State Law Compliance and Security Breach Response

Many states impose an obligation on any entity that holds personally identifiable information or health information to adopt appropriate security to protect such data against unauthorized access, misuse, destruction, or modification.

Many states have enacted laws requiring holders of personal information to take certain actions in response to data breach incidents, such as providing prompt notification of the breach to affected individuals and government authorities. In many cases, these laws are limited to electronic data, but states are increasingly enacting or considering stricter and broader requirements. Massachusetts has enacted a regulation that requires any entity that holds, transmits or collects certain personal information about its residents to adopt a written data security plan meeting the requirements set forth in the statute. We have implemented and maintain physical, technical and administrative safeguards intended to protect all personal data and have processes in place to assist us in complying with applicable laws and regulations regarding the protection of this data and properly responding to any security incidents. We have adopted a system security plan and security breach incident response plans to address our compliance with these laws.

Intellectual Property

Our intellectual property is a significant component of our business, including, most notably, the intellectual property underlying our proprietary technology-enabled services platform through which we provide our defaulted asset recovery and other services. To protect our intellectual property, we rely on a combination of intellectual property rights, including patents, trade secrets, trademarks and copyrights. We also utilize customary confidentiality and other contractual protections, including employee and third-party confidentiality and invention assignment agreements. As of December 31, 2013, we had two U.S. patents, both covering aspects of the workflow management systems and methods incorporated into our technology-enabled services platform. These patents will expire in December 2019. We routinely assess appropriate occasions for seeking additional patent protection for those aspects of our platform and other technologies that we believe may provide competitive advantages to our business. We also rely on certain unpatented proprietary expertise and other know-how, licensed and acquired third-party technologies, and continuous improvements and other developments of our various technologies, all intended to maintain our leadership position in the industry.

As of December 31, 2013, we had five trademarks registered with the U.S. Patent and Trademark office: Performant, Performant Recovery, Performant Technologies, Discovery Analytics and Performant Business Services.

We have registered copyrights covering various copyrighted material relevant to our business. We also have unregistered copyrights in many components of our software systems. We may not be able to use these unregistered copyrights to prevent misappropriation of such content by unauthorized parties in the future; however, we rely on our extensive information technology security measures and contractual arrangements with employees and third-party contractors to minimize the opportunities for any such misuse of this content.

We are not subject to any material intellectual property claims alleging that we infringe, misappropriate or otherwise violate the intellectual property rights of any third party, nor have we asserted any material intellectual property infringement claim against any third party.

Employees

As of December 31, 2013, we had approximately 1,479 full-time employees. None of our employees is a member of a labor union and we consider our employee relations to be good.

Available Information

The SEC maintains an Internet site at <http://www.sec.gov> that contains our Annual Report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports, if any, or other filings filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, or the Exchange Act, proxy and information statements. All reports that we file with the SEC may be read and copied at the SEC's Public Reference Room at 100 F Street, N.E., Washington, DC, 20549. Information about the operation of the Public Reference Room can be obtained by calling the SEC at 1-800-SEC-0330.

ITEM 1A. Risk Factors

Table of Contents

Our business, financial condition, results of operations and liquidity are subject to various risks and uncertainties, including those described below, and as a result, the trading price of our common stock could decline.

Risks Related to Our Business

Our agreements with the Department of Education and CMS, two of our largest customers, are currently subject to rebidding processes, and our failure to renew these agreements or a renewal on less favorable terms would have a significant negative impact on our revenues and results of operations.

Our existing contracts with the Department of Education and CMS are currently subject to rebidding processes. The Department of Education and CMS were responsible for approximately 20.2% and 26.2% of our revenue for the year ended December 31, 2013, respectively. The Department of Education has initiated a contract re-compete process that is ongoing. Similarly, we are currently participating in a competitive bidding process for the next RAC contract, but this process has been and may continue to be delayed due in part to protests filed by our competitors with respect to the terms proposed for the next RAC contract. While we believe our performance under existing contracts with the Department of Education and CMS and the experience we have gained in performing under these contracts position us well to renew both of these agreements, failure to retain either of these agreements or a significant adverse change in the terms of either of these agreements upon any renewal would seriously harm our revenues and our operating results.

Revenues generated from our four largest clients represented 75% of our revenues for the year ended December 31, 2013, and any termination of or deterioration in our relationship with any of these clients would result in a decline in our revenues.

We derive a substantial majority of our revenues from a limited number of clients, including the Department of Education, CMS and two GAs. Revenues from our four largest clients represented 75% of our revenues for the year ended December 31, 2013. All of our contracts with these clients are subject to periodic renewal and re-bidding processes and if we lose one of these clients or if the terms of our relationships with any of these clients become less favorable to us, our revenues would decline, which would harm our business, financial condition and results of operations.

The transition rules implemented by CMS in connection with the award of the new RAC contract will have an adverse impact on our 2014 revenues.

Our audit activities under the RAC contract are currently set to expire in June 2014. In planning for the award of the next RAC contracts, CMS has announced transition procedures that will affect our operations during the transition period. In this regard, CMS permitted us to submit medical records requests until February 21, 2014. In addition, CMS has placed restrictions on the types of claims and the amount of certain medical records requests that we may make during the transition period, and CMS has maintained a long-running prohibition on requesting medical records from PIP providers. We expect that these transition rules will have an adverse effect on our revenues during 2014. Further, protests have been filed in connection with the new RAC contract, and any delay in the award of the new RAC contract as a result of these protests or future protests would have an adverse impact on our future revenues in light of these transition rules. Lastly, given the uncertainties surrounding the timing of the RAC contract renewal period and the final scope of the transition rules, we may be required to retain certain employees whose services may not be required during the transition period, or may terminate certain employees who we may not be able to re-hire in the future, either of which could have an adverse impact on our business and future revenues.

Many of our contracts with our clients for the recovery of student loans and other receivables are not exclusive and do not commit our clients to provide specified volumes of business. In addition, the terms of these contracts may be changed unilaterally and on short notice by our clients. As a consequence, there is no assurance that we will be able to maintain our revenues and operating results.

Substantially all of our existing contracts for the recovery of student loan and other receivables, which represented approximately 73.6% of our revenues in 2013, enable our clients to unilaterally terminate their contractual relationship with us at any time without penalty, potentially leading to loss of business or renegotiation of terms. Further, most of our contracts in these markets allow our clients to unilaterally change the volume of loans and other receivables that are placed with us at any given time. In addition, most of our contracts are not exclusive, with our clients retaining multiple service providers with whom we must compete for placements of loans or other obligations. Therefore,

despite our contractual relationships with our clients, our contracts do not provide assurance that we will generate a minimum amount of revenues or that we will receive a specific volume of placements.

Our revenues and operating results would be negatively affected if our student loan and receivables clients, which include four of our five largest clients in 2013, reduce the volume of student loan placements provided to us, modify the terms of service, including the success fees we are able to earn upon recovery of defaulted student loans, or any of these clients establish more favorable relationships with our competitors. For example, in 2013 our contractual arrangement with the

Table of Contents

Department of Education changed as a result of the Department of Education's decision to have its recovery vendors promote income-based repayment, or IBR, to defaulted student loans. The IBR program provides flexibility on the required monthly payment for student loan borrowers at an amount intended to be affordable based on a borrower's income and family size. In connection with the implementation of the IBR program, the Department of Education unilaterally reduced the contingency fee rate that we receive for rehabilitating student loans by approximately 13% as of March 1, 2013. Any changes in the contingency fee percentages or other compensation terms that we are paid under existing and future contracts could have a significant impact on our revenues and operating results.

Our ability to derive revenues under our RAC contract will depend in part on the number and types of potentially improper claims that we are allowed to pursue by CMS, and our results of operations may be harmed if the scope of claims that we are allowed to pursue and be compensated for is limited.

Under our existing RAC contract with CMS and any new RAC contract that we enter into upon completion of the current rebidding process with CMS, we are not permitted to and may not seek the recovery of an improper claim unless that particular type of claim has been pre-approved by CMS to ensure compliance with applicable Medicare payment policies, as well as national and local coverage determinations. Accordingly, the long-term growth of the revenues we derive under a RAC contract will also depend in part on CMS expanding the scope of potentially improper claims that we are allowed to pursue. If we are unable to continue to identify improper claims within the types of claims that we are permitted to pursue from time to time or if CMS does not expand the scope of potentially improper claims that we are allowed to pursue, our results of operations could be adversely affected.

In addition, CMS has implemented rules that, for the period through September 30, 2014, prevent RAC contractors from being able to review and audit (i) whether inpatient care delivered to patients with hospital stays lasting less than two midnights was medically necessary and therefore deserving of the higher reimbursement levels under Medicare Part A or (ii) whether inpatient treatment was medically necessary for admissions spanning more than two midnights. In connection with these restrictions, hospitals cannot bill CMS for outpatient services on hospital stays lasting less than two midnights during such period. Fees associated with recoveries initiated by us based upon improper claims for inpatient reimbursement of these short stays have represented a substantial portion of the revenues we have earned under our existing RAC contract. The suspension of this type of review activity could have a material adverse effect on our future healthcare revenues and operating results, depending on a variety of factors including, among other things, CMS's evaluation of provider compliance with the new rules, the rules ultimately adopted by CMS with respect to medical necessity reviews of Medicare reimbursement claims associated with short stay inpatient admissions and, more generally, the scope of improper claims that CMS allows us to pursue and our ability to successfully identify improper claims within the permitted scope. In connection with the award of the new RAC contract, CMS has indicated that it is reviewing certain aspects of the RAC contract including the amount of medical records that RAC vendors may request and the timeframes for review and communications between RAC vendors and providers.

We face significant competition in connection with obtaining, retaining and performing under our existing client contracts, including our contracts with the Department of Education and CMS, and an inability to compete effectively in the future could harm our relationships with our clients, which would impact our ability to maintain our revenues and operating results.

We operate in very competitive markets. In providing our services to the student loan and other receivables markets, we face competition from many other companies. Initially, we compete with these companies to be one of typically several firms engaged to provide recovery services to a particular client and, if we are successful in being engaged, we then face continuing competition from the client's other retained firms based on the client's benchmarking of the recovery rates of its several vendors. In addition, those recovery vendors who produce the highest recovery rates from a client often will be allocated additional placements and in some cases additional success fees. Accordingly, maintaining high levels of recovery performance, and doing so in a cost-effective manner, are important factors in our ability to maintain and grow our revenues and net income and the failure to achieve these objectives could harm our business, financial condition and results of operations. Some of our current and potential competitors in the markets in which we operate may have greater financial, marketing, technological or other resources than we do. The ability of any of our competitors and potential competitors to adopt new and effective technology to better serve our markets may allow them to gain market strength. Increasing levels of competition in the future may result in lower recovery

fees, lower volumes of contracted recovery services or higher costs for resources. Any inability to compete effectively in the markets that we serve could adversely affect our business, financial condition and results of operations. The U.S. federal government accounts for a significant portion of our revenues, and any loss of business from, or change in our relationship with, the U.S. federal government would result in a significant decrease in our revenues and operating results.

Table of Contents

We have historically derived and are likely to continue to derive a significant portion of our revenues from the U.S. federal government. For the year ended December 31, 2013, revenues under contracts with the U.S. federal government accounted for approximately 48% of our total revenues, compared to 42% for the year ended December 31, 2012. In addition, fees payable by the U.S. federal government are expected to become a larger percentage of our total revenues over the next several years as a result of legislation that has transferred responsibility for all new student loan origination to the Department of Education. The continuation and exercise of renewal options on existing government contracts and any new government contracts are, among other things, contingent upon the availability of adequate funding for the applicable federal government agency. Changes in federal government spending could directly affect our financial performance. For example, the Bipartisan Budget Act of 2013, which was signed into law by President Obama on December 26, 2013, reduced the compensation paid to GAs for the rehabilitation of student loans, effective July 1, 2014. This "revenue enhancement" measure will reduce from 18.5% to 16% of the outstanding loan balance, the amount that GAs can charge borrowers when a rehabilitated loan is sold by the GA and will eliminate entirely the GAs retention of 18.5% of the outstanding loan balance as a fee for rehabilitation services. It is unclear how the reduction in compensation the GAs receive will impact the contingency fee percentage that we receive from the GAs for assisting in the rehabilitation of defaulted student loans; however, any decrease in this contingency fee percentage would result in a decrease in our revenues. The loss of business from the U.S. federal government, or significant policy changes or financial pressures within the agencies of the U.S. federal government that we serve would result in a significant decrease in our revenues, which would adversely affect our business, financial condition and results of operations.

Future legislative or regulatory changes affecting the markets in which we operate could impair our business and operations.

The two principal markets in which we provide our recovery services, government-supported student loans and the Medicare program, are a subject of significant legislative and regulatory focus and we cannot anticipate how future changes in government policy may affect our business and operations. For example, SAFRA significantly changed the structure of the government-supported student loan market by assigning responsibility for all new government-supported student loan originations to the Department of Education, rather than originations by private institutions and backed by one of 31 government-supported GAs. This legislation, and any future changes in the legislation and regulations that govern these markets, may require us to adapt our business to the new circumstances and we may be unable to do so in a manner that does not adversely affect our business and operations.

Our business relationship with the Department of Education has accounted for a significant portion of our revenues and will take on increasing importance to our business as a result of SAFRA. Our failure to maintain this relationship would significantly decrease our revenues.

While the majority of our historical revenues from the student loan market have come from our relationships with the GAs, as a result of SAFRA, the Department of Education will ultimately become the sole source of revenues in this market, although the GAs will continue to service their existing student loan portfolios for many years to come. As a result, over time, and assuming we are successful in entering into a new contract with the Department of Education under the current rebidding process, defaults on student loans originated by the Department of Education will predominate and our ability to maintain the revenues we had previously received from a number of GA clients will depend on our relationship with a single client, the Department of Education. While we have 23 years of experience in performing student loan recovery services for the Department of Education, we are one of 17 unrestricted recovery service providers on the current Department of Education contract. If we are successful in entering into a new contract with the Department of Education, there may be more than the current 17 recovery service providers, which could lead to greater competition among the selected service providers. If our relationship with the Department of Education terminates or deteriorates or if the Department of Education, ultimately as the sole holder of defaulted student loans, requires its contractors to agree to less favorable terms, our revenues would significantly decrease, and our business, financial condition and results of operations would be harmed.

We could lose clients as a result of consolidation among the GAs, which would decrease our revenues.

As a result of SAFRA, which terminated the ability of the GAs to originate government-supported student loans, some have speculated that there may be consolidation among the 30 GAs. This speculation has heightened as a result of the

reduction of fees that the GAs will receive for rehabilitating student loans as a result of the Bipartisan Budget Act of 2013. If GAs that are our clients are combined with GAs with whom we do not have a relationship, we could suffer a loss of business. We currently have relationships with 11 of the 30 GAs and two of our GA clients were each responsible for more than 10% of our total revenues in the year ended December 31, 2013. The consolidation of our GA clients with others and the failure to provide recovery services to the consolidated entity could decrease our revenues, which could negatively impact our business, financial condition and results of operations. Our results of operations may fluctuate on a quarterly or annual basis and cause volatility in the price of our stock.

Table of Contents

Our revenues and operating results could vary significantly from period-to-period and may fail to match our past performance because of a variety of factors, some of which are outside of our control. Any of these factors could cause the price of our common stock to fluctuate. Factors that could contribute to the variability of our operating results include:

- the amount of defaulted student loans and other receivables that our clients place with us for recovery;
- the timing of placements of student loans and other receivables which are entirely in the discretion of our clients;
- the schedules of government agencies for awarding contracts including the impact of any protests filed in connection with the award of any such contracts;
- our ability to successfully identify improper Medicare claims and the number and type of potentially improper claims that CMS authorizes us to pursue under our RAC contract;
- the loss or gain of significant clients or changes in the contingency fee rates or other significant terms of our business arrangements with our significant clients;
- technological and operational issues that may affect our clients and regulatory changes in the markets we service; and
- general industry and macroeconomic conditions.

For example, a technology system upgrade at the Department of Education significantly decreased the volume of student loan placements by the Department of Education to all recovery vendors, including us. While we and the other recovery vendors began to receive larger placement volumes in the fourth quarter of 2012, the majority of the revenues from these placements were delayed until the three months ended September 30, 2013, because we do not begin to earn rehabilitation revenues from a given placement until at least nine months after receipt of a placement. In addition, for approximately twelve months beginning in September 2011, because of this technology system upgrade, the Department of Education was not able to process a portion of rehabilitated student loans and accordingly we were not able to recognize certain revenues associated with rehabilitation of loans for this client. However, the Department of Education continued to pay us based on invoices submitted and we recorded these cash receipts as deferred revenues on our balance sheet.

Similarly, in our healthcare markets, our claim recovery volume related to PIP providers in our region has been limited and we estimate that PIP providers in our region account for approximately 20% of Medicare claims. PIP providers are reimbursed for Medicare claims through different processes than other healthcare providers, and technology adjustments were necessary to permit automated processing of claims involving PIP providers. Prior to April 2012, we were not permitted to audit Medicare claims for these PIP providers and the improper payments to PIP providers that we identified beginning in April 2012 were not processed by CMS until January 2013, when a small portion of such payments began to be processed manually. In June 2013, CMS implemented the system adjustment necessary for automated processing of claims, which allowed us to recognize approximately \$12 million in 2013.

Downturns in domestic or global economic conditions and other macroeconomic factors could harm our business and results of operations.

Various macroeconomic factors influence our business and results of operations. These include the volume of student loan originations in the United States, together with tuition costs and student enrollment rates, the default rate of student loan borrowers, which is impacted by domestic and global economic conditions, rates of unemployment and similar factors, and the growth in Medicare expenditures resulting from changes in healthcare costs. For example, during the global financial crisis beginning in 2008, the market for securitized student loan portfolios was disrupted, resulting in delays in the ability of some GA clients to resell rehabilitated student loans and, as a result, delays our ability to recognize revenues from these rehabilitated loans. Changes in the overall economy could lead to a reduction in overall recovery rates by our clients, which in turn could adversely affect our business, financial condition and results of operations.

We may not be able to maintain or increase our profitability, and our recent financial results may not be indicative of our future financial results.

We may not succeed in maintaining our profitability on a quarterly or annual basis and could incur quarterly or annual losses in future periods. We have incurred additional operating expenses associated with being a public company and we intend to continue to increase our operating expenses as we grow our business. We also expect to continue to make

investments in our proprietary technology platform and hire additional employees and subcontractors as we expand our healthcare recovery and other operations, thus incurring additional expenses. If our revenues do not increase to offset these increases in expenses, our

18

Table of Contents

operating results could be adversely affected. Our historical revenues and net income growth rates are not indicative of future growth rates.

We may not be able to manage our growth effectively and our results of operations could be negatively affected. Our business has expanded significantly, especially in recent years with the expansion of our services in the healthcare market, and we intend to maintain our focus on growth. However, our continued focus on growth and the expansion of our business may place additional demands on our management, operations and financial resources and will require us to incur additional expenses. We cannot be sure that we will be able to manage our growth effectively. In order to successfully manage our growth, our expenses will increase to recruit, train and manage additional qualified employees and subcontractors and to expand and enhance our administrative infrastructure and continue to improve our management, financial and information systems and controls. If we cannot manage our growth effectively, our expenses may increase and our results of operations could be negatively affected.

A failure of our operating systems or technology infrastructure, or those of our third-party vendors and subcontractors, could disrupt the operation of our business.

A failure of our operating systems or technology infrastructure, or those of our third-party vendors and subcontractors, could disrupt our operations. Our operating systems and technology infrastructure are susceptible to damage or interruption from various causes, including acts of God and other natural disasters, power losses, computer systems failures, Internet and telecommunications or data network failures, operator error, computer viruses, losses of and corruption of data and similar events. The occurrence of any of these events could result in interruptions, delays or cessations in service to our clients, reduce the attractiveness of our recovery services to current or potential clients and adversely impact our financial condition and results of operations. While we have backup systems in many of our operating facilities, an extended outage of utility or network services may harm our ability to operate our business.

Further, the situations we plan for and the amount of insurance coverage we maintain for losses as result of failures of our operating systems and infrastructure may not be adequate in any particular case.

If our security measures are breached or fail and unauthorized access is obtained to our clients' confidential data, our services may be perceived as insecure, the attractiveness of our recovery services to current or potential clients may be reduced, and we may incur significant liabilities.

Our recovery services involve the storage and transmission of confidential information relating to our clients and their customers, including health, financial, credit, payment and other personal or confidential information. Although our data security procedures are designed to protect against unauthorized access to confidential information, our computer systems, software and networks may be vulnerable to unauthorized access and disclosure of our clients' confidential information. Further, we may not effectively adapt our security measures to evolving security risks, address the security and privacy concerns of existing or potential clients as they change over time, or be compliant with federal, state, and local laws and regulations with respect to securing confidential information. Unauthorized access to confidential information relating to our clients and their customers could lead to reputational damage which could deter our clients and potential clients from selecting our recovery services, or result in termination of contracts with those clients affected by any such breach, regulatory action, and claims against us.

In the event of any unauthorized access to personal or other confidential information, we may be required to expend significant resources to investigate and remediate vulnerabilities in our security procedures, and we may be subject to fines, penalties, litigation costs, and financial losses that are either not insured against or not fully covered through any insurance maintained by us. If one or more of such failures in our security and privacy measures were to occur, our business, financial condition and results of operations could suffer.

Our business may be harmed if we lose members of our management team or other key employees.

We are highly dependent on members of our management team and other key employees and our future success depends in part on our ability to retain these people. Our inability to continue to attract and retain members of our management team and other key employees could adversely affect our business, financial condition and results of operations.

The growth of our healthcare business will require us to hire and retain employees with specialized skills and failure to do so could harm our ability to grow our business.

The growth of our healthcare business will depend in part on our ability to recruit, train and manage additional qualified employees. Our healthcare-related operations require us to hire registered nurses and experts in Medicare coding. Finding, attracting and retaining employees with these skills is a critical component of providing our healthcare-related

Table of Contents

recovery and audit services, and our inability to staff these operations appropriately represents a risk to our healthcare service offering and associated revenues. An inability to hire qualified personnel, particularly to serve our healthcare clients, may restrain the growth of our business.

We rely on subcontractors to provide services to our clients and the failure of subcontractors to perform as expected could harm our business operations and our relationships with our clients.

We engage subcontractors to provide certain services to our clients. These subcontractors participate to varying degrees in our recovery activities with regards to all of the services we provide. While most of our subcontractors provide specific services to us, we engage one subcontractor to provide all of the audit and recovery services under our contract with CMS within a portion of our region. While we believe that we perform appropriate due diligence before we hire subcontractors, our subcontractors may not provide adequate service or otherwise comply with the terms set forth in their agreements. In the event a subcontractor provides deficient performance to one or more of our clients, any such client may reduce the volume of services we are providing under an existing contract or may terminate the relevant contract entirely and we may face claims for breach of contract. Any such disruption in our relations with our clients as a result of services provided by any of our subcontractors could adversely affect our revenues and operating results.

If our software vendors or utility and network providers fail to deliver or perform as expected our business operations could be adversely affected.

Our recovery services depend in part on third-party providers, including software vendors and utility and network providers. Our ability to service our clients depends on these third-party providers meeting our expectations and contractual obligations in a timely and effective manner. Our business could be materially and adversely affected, and we might incur significant additional liabilities, if the services provided by these third-party providers do not meet our expectations or if they terminate or refuse to renew their relationships with us on similar contractual terms.

We are subject to extensive regulations regarding the use and disclosure of confidential personal information and failure to comply with these regulations could cause us to incur liabilities and expenses.

We are subject to a wide array of federal and state laws and regulations regarding the use and disclosure of confidential personal information and security. For example, the federal Health Insurance Portability and Accountability Act of 1996, as amended, or HIPAA, and related state laws subject us to substantial restrictions and requirements with respect to the use and disclosure of the personal health information that we obtain in connection with our audit and recovery services under our contract with CMS and we must establish administrative, physical and technical safeguards to protect the confidentiality of this information. Similar protections extend to the type of personal financial and other information we acquire from our student loan, state tax and federal receivables clients.

We are required to notify affected individuals and government agencies of data security breaches involving protected health and certain personally identifiable information. These laws and regulations also require that we develop, implement and maintain written, comprehensive information security programs containing safeguards that are appropriate to protect personally identifiable information or health information against unauthorized access, misuse, destruction or modification. Federal law generally does not preempt state law in the area of protection of personal information, and as a result we must also comply with state laws and regulations. Regulation of privacy, data use and security requires that we incur significant expenses, which could increase in the future as a result of additional regulations, all of which adversely affects our results of operations. Failure to comply with these laws and regulations can result in penalties and in some cases expose us to civil lawsuits.

Our student loan recovery business is subject to extensive regulation and consumer protection laws and our failure to comply with these regulations and laws may subject us to liability and result in significant costs.

Our student loan recovery business is subject to regulation and oversight by various state and federal agencies, particularly in the area of consumer protection. The Fair Debt Collection Practices Act, or FDCPA, and related state laws provide specific guidelines that we must follow in communicating with holders of student loans and regulates the manner in which we can recover defaulted student loans. Some state attorney generals have been active in this area of consumer protection regulation. We are subject, and may be subject in the future, to inquiries and audits from state and federal regulators, as well as frequent litigation from private plaintiffs regarding compliance under the FDCPA and related state regulations. We are also subject to the Fair Credit Reporting Act, or FCRA, which regulates

consumer credit reporting and may impose liability on us to the extent adverse credit information reported to a credit bureau is false or inaccurate. Our compliance with the FDCPA, FCRA and other federal and state regulations that affect our student loan recovery business may result in significant costs, including litigation costs. We may also become subject to regulations promulgated by the United States Consumer Financial Protection Bureau, or CFPB, which was established in July 2011 as part of the Dodd-Frank Act to, among other things, establish regulations regarding consumer financial protection laws. In addition, the CFPB has investigatory and

Table of Contents

enforcement authority with respect to whether persons are engaged in unlawful acts or practices in connection with the collection of consumer debts. On April 12, 2013, we received a Civil Investigative Demand, or a CID, from the CFPB requesting production of documents and answers to questions generally related to the Company's debt collection practices and procedures. The CFPB has not alleged a violation by us of any law or regulation. We responded to the CID, but have not been examined by the CFPB. In light of the possibility that the CFPB may issue interpretative regulations for the FDCPA, the issuance of such regulations could adversely affect our business and results of operations if we are not able to adapt our services and client relationships to meet any new regulatory structure that might be required.

In addition, changing laws, regulations and standards relating to corporate governance and public disclosure are creating uncertainty for public companies, increasing legal and financial compliance costs and making some activities more time consuming. These laws, regulations and standards are subject to varying interpretations, in many cases due to their lack of specificity, and, as a result, their application in practice may evolve over time as new guidance is provided by regulatory and governing bodies. This could result in continuing uncertainty regarding compliance matters and higher costs necessitated by ongoing revisions to disclosure and governance practices. We will continue to invest resources to comply with evolving laws, regulations and standards, and this investment may result in increased general and administrative expenses and a diversion of management's time and attention from revenue-generating activities to compliance activities. If our efforts to comply with new laws, regulations and standards differ from the activities intended by regulatory or governing bodies due to ambiguities related to their application and practice, regulatory authorities may initiate legal proceedings against us and our business may be adversely affected.

However, for as long as we remain an "emerging growth company" as defined in the Jumpstart Our Business Startups Act of 2012, or the JOBS Act, we may take advantage of certain exemptions from various reporting requirements that are applicable to other public companies that are not "emerging growth companies," including, but not limited to, not being required to comply with the auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act, reduced disclosure obligations regarding executive compensation in our periodic reports and proxy statements, and exemptions from the requirements of holding a nonbinding advisory vote on executive compensation and shareholder approval of any golden parachute payments not previously approved. We may take advantage of these reporting exemptions until we are no longer an "emerging growth company."

We will remain an "emerging growth company" for up to five years following our initial public offering in August 2012, although if the market value of our common stock that is held by non-affiliates exceeds \$700 million as of any June 30 before that time, our revenues exceed \$1 billion, or we issue more than \$1 billion in non-convertible debt in a three-year period, we would cease to be an "emerging growth company" as of the following December 31.

As a result of disclosure of information as a public company, our business and financial condition have become more visible, which we believe may result in threatened or actual litigation, including by competitors and other third parties. If such claims are successful, our business operations and financial results could be adversely affected, and even if the claims do not result in litigation or are resolved in our favor, these claims, and the time and resources necessary to resolve them, could divert the resources of our management and adversely affect our business operations and financial results. These factors could also make it more difficult for us to attract and retain qualified employees, executive officers and members of our board of directors.

Failure to achieve and maintain effective internal controls in accordance with Section 404 of Sarbanes-Oxley would impair our ability to produce accurate and reliable financial statements, which would harm our stock price.

We are subject to reporting obligations under Section 404 of the Sarbanes-Oxley Act that require us to include a management report on our internal control over financial reporting in our annual report, which contains management's assessment of the effectiveness of our internal control over financial reporting. These requirements first apply to this annual report on Form 10-K and complying with these requirements can be difficult. For example, in June 2012, we determined that we had incorrectly accounted for our mandatorily redeemable preferred stock, which required audit adjusting entries for the three-year period ended December 31, 2011. Our failure to detect this error was deemed to be a deficiency in internal control and this deficiency was considered to be a material weakness. To address this situation, our independent registered public accounting firm recommended that the Company emphasize the importance of thoroughly researching all new accounting policies and revisiting accounting policies set for existing transactions

when changes in the business or reporting requirements occur or are expected to occur. To prevent issues like these in the future, we have bolstered our technical accounting expertise and, where appropriate, engaged outside consultants with specialized knowledge.

Our management may conclude that our internal control over our financial reporting is not effective. We have limited accounting personnel and other resources with which to address our internal controls and procedures. If we fail to timely achieve and maintain the adequacy of our internal control over financial reporting, we may not be able to produce reliable financial reports or help prevent fraud. Our failure to achieve and maintain effective internal control over financial reporting

Table of Contents

could prevent us from filing our periodic reports on a timely basis, which could result in the loss of investor confidence in the reliability of our financial statements, harm our business and negatively impact the trading price of our common stock.

We are required to disclose changes made in our internal controls and procedures on a quarterly basis. However, our independent registered public accounting firm is not required to formally attest to the effectiveness of our internal control over financial reporting pursuant to Section 404 until such time that we are no longer an “emerging growth company” as defined in the JOBS Act, if we continue to take advantage of the exemptions contained in the JOBS Act. At such time, our independent registered public accounting firm may issue a report that is adverse in the event it is not satisfied with the level at which our controls are documented, designed or operating. Our remediation efforts may not enable us to avoid a material weakness in the future.

Litigation may result in substantial costs of defense, damages or settlement, any of which could subject us to significant costs and expenses.

We are party to lawsuits in the normal course of business, particularly in connection with our student loan recovery services. For example, we are regularly subject to claims that we have violated the guidelines and procedures that must be followed under federal and state laws in communicating with consumer debtors. We may not ultimately prevail or otherwise be able to satisfactorily resolve any pending or future litigation, which may result in substantial costs of defense, damages or settlement. In the future, we may be required to alter our business practices or pay substantial damages or settlement costs as a result of litigation proceedings, which could adversely affect our business operations and results of operations.

We typically face a long period to implement a new contract which may cause us to incur expenses before we receive revenues from new client relationships.

If we are successful in obtaining an engagement with a new client or a new contract with an existing client, we typically have a subsequent long implementation period in which the services are planned in detail and we integrate our technology, processes and resources with the client’s operations. If we enter into a contract with a new client, we typically will not receive revenues until implementation is completed and work under the contract actually begins. Our clients may also experience delays in obtaining approvals or delays associated with technology or system implementations, such as the delays experienced with the implementation of our RAC contract with CMS due to an appeal by competitors who were unsuccessful in bidding on the contract. Because we generally begin to hire new employees to provide services to a new client once a contract is signed, we may incur significant expenses associated with these additional hires before we receive corresponding revenues under any such new contract. If we are not successful in maintaining contractual commitments after the expenses we incur during our typically long implementation cycle, our results of operations could be adversely affected.

If we are unable to adequately protect our proprietary technology, our competitive position could be harmed or we could be required to incur significant costs to enforce our rights.

The success of our business depends in part upon our proprietary technology platform. We rely on a combination of copyright, patent, trademark, and trade secret laws, as well as on confidentiality procedures and non-compete agreements, to establish and protect our proprietary technology rights. The steps we have taken to deter misappropriation of our proprietary technology may be insufficient to protect our proprietary information. Any infringement or misappropriation of our patents, trademarks, trade secrets, or other intellectual property rights could adversely affect any competitive advantage we currently derive or may derive from our proprietary technology platform and we may incur significant costs associated with litigation that may be necessary to enforce our intellectual property rights.

Claims by others that we infringe their intellectual property could force us to incur significant costs or revise the way we conduct our business.

Our competitors protect their proprietary rights by means of patents, trade secrets, copyrights, trademarks and other intellectual property. Any party asserting that we infringe, misappropriate or violate their intellectual property rights may force us to defend ourselves, and potentially our clients, against the alleged claim. These claims and any resulting lawsuit, if successful, could be time-consuming and expensive to defend, subject us to significant liability for damages or invalidation of our proprietary rights, prevent us from operating all or a portion of our business or force us to

redesign our services or technology platform or cause an interruption or cessation of our business operations, any of which could adversely affect our business and operating results. In addition, any litigation relating to the infringement of intellectual property rights could harm our relationships with current and prospective clients. The risk of such claims and lawsuits could increase if we increase the size and scope of our services in our existing markets or expand into new markets.

Table of Contents

We may make acquisitions that prove unsuccessful, strain or divert our resources and harm our results of operations and stock price.

We may consider acquisitions of other companies in our industry or in new markets. We may not be able to successfully complete any such acquisition and, if completed, any such acquisition may fail to achieve the intended financial results. We may not be able to successfully integrate any acquired businesses with our own and we may be unable to maintain our standards, controls and policies. Further, acquisitions may place additional constraints on our resources by diverting the attention of our management from other business concerns. Moreover, any acquisition may result in a potentially dilutive issuance of equity securities, the incurrence of additional debt and amortization of expenses related to intangible assets, all of which could adversely affect our results of operations and stock price. Our current or future indebtedness could adversely affect our business and financial condition and reduce the funds available to us for other purposes, and our failure to comply with the covenants contained in our credit agreement could result in an event of default that could adversely affect our results of operations.

As of December 31, 2013, our total debt was \$133.3 million. For the year ended December 31, 2013, our consolidated interest expense was \$11.6 million. Our ability to make scheduled payments or to refinance our debt obligations and to fund our other liquidity needs depends on our financial and operating performance, which is subject to prevailing economic and competitive conditions and to certain financial, business and other factors beyond our control. We cannot make assurances that we will maintain a level of cash flows from operating activities sufficient to permit us to pay the principal and interest on our indebtedness and to fund our other liquidity needs. If our cash flows and capital resources are insufficient to fund our debt service obligations and allow us to maintain compliance with the covenants under our credit agreement or to fund our other liquidity needs, we may be forced to reduce or delay capital expenditures, sell assets or operations, seek additional capital or restructure or refinance our indebtedness. We cannot ensure that we would be able to take any of these actions, that these actions would be successful and permit us to meet our scheduled debt service obligations or that these actions would be permitted under the terms of our existing or future debt agreements, including our credit agreement. If we cannot make scheduled payments on our debt, we will be in default and, as a result, our debt holders could declare all outstanding principal and interest to be due and payable, the lenders under our credit agreement could terminate their commitments to lend us money and foreclose against the assets securing our borrowings and we could be forced into bankruptcy or liquidation.

Our debt agreements contain, and any agreements to refinance our debt likely will contain, financial and restrictive covenants that limit our ability to incur additional debt, including to finance future operations or other capital needs, and to engage in other activities that we may believe are in our long-term best interests, including to dispose of or acquire assets. Our failure to comply with these covenants may result in an event of default, which, if not cured or waived, could accelerate the maturity of our indebtedness or result in modifications to our credit terms. See "Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources - Long Term Debt" in Item 7 below for a more detailed discussion of our financial covenants as well as our current status under these covenants. If our indebtedness is accelerated, we may not have sufficient cash resources to satisfy our debt obligations and we may not be able to continue our operations as planned.

The price of our common stock could be volatile, and you may not be able to sell your shares at or above the public offering price.

Since our initial public offering in August 2012, the price of our common stock, as reported by NASDAQ, has ranged from a low sales price of \$7.11 on February 21, 2014 to a high sales price of \$14.09 on March 4, 2013. The trading price of our common stock may be significantly affected by various factors, including: quarterly fluctuations in our operating results; the financial projections we may provide to the public, any changes in those projections or our failure to meet those projections; changes in investors' and analysts' perception of the business risks and conditions of our business; our ability to meet the earnings estimates and other performance expectations of financial analysts or investors; unfavorable commentary or downgrades of our stock by equity research analysts; changes in our capital structure, such as future issuances of debt or equity securities; lawsuits threatened or filed against us; strategic actions by us or our competitors, such as acquisitions or restructurings; new legislation or regulatory actions; changes in our relationship with any of our significant clients; fluctuations in the stock prices of our peer companies or in stock markets in general; and general economic conditions.

Our significant stockholder has the ability to influence significant corporate activities and our significant stockholder's interests may not coincide with yours.

Parthenon Capital Partners beneficially owns approximately 32.4% of our common stock as of March 11, 2014. As a result of its ownership, Parthenon Capital Partners has the ability to influence the outcome of matters submitted to a vote of stockholders and, through our board of directors, the ability to influence decision-making with respect to our business direction and policies. Parthenon Capital Partners may have interests different from our other stockholders' interests, and may vote in a

Table of Contents

manner adverse to those interests. Matters over which Parthenon Capital Partners can, directly or indirectly, exercise influence include: the election of our board of directors and the appointment and removal of our officers; mergers and other business combination transactions, including proposed transactions that would result in our stockholders receiving a premium price for their shares; other acquisitions or dispositions of businesses or assets; incurrence of indebtedness and the issuance of equity securities; repurchase of stock and payment of dividends; and the issuance of shares to management under our equity incentive plans.

In addition, Parthenon Capital Partners has a contractual right to designate a number of directors proportionate to its stock ownership. Further, under our amended and restated certificate of incorporation, Parthenon Capital Partners does not have any obligation to present to us, and Parthenon Capital Partners may separately pursue, corporate opportunities of which it becomes aware, even if those opportunities are ones that we would have pursued if granted the opportunity.

If securities analysts do not publish research or if securities analysts or other third parties publish inaccurate or unfavorable research about us, the price of our common stock could decline.

The trading market for our common stock relies in part on the research and reports that securities analysts and other third parties choose to publish about us. We do not control these analysts or other third parties. The price of our common stock could decline if one or more securities analysts downgrade our common stock or if one or more securities analysts or other third parties publish inaccurate or unfavorable research about us or cease publishing reports about us.

Anti-takeover provisions contained in our certificate of incorporation and bylaws could impair a takeover attempt that our stockholders may find beneficial.

Our amended and restated certificate of incorporation and amended and restated bylaws contain provisions that could have the effect of rendering more difficult or discouraging an acquisition deemed undesirable by our board of directors. Our corporate governance documents include the following provisions: establishing a classified board of directors so that not all members of our board are elected at one time; providing that directors may be removed by stockholders only for cause; authorizing blank check preferred stock, which could be issued with voting, liquidation, dividend and other rights superior to our common stock; limiting the ability of our stockholders to call and bring business before special meetings and to take action by written consent in lieu of a meeting; limiting our ability to engage in certain business combinations with any "interested stockholder," other than Parthenon Capital Partners, for a three-year period following the time that the stockholder became an interested stockholder; requiring advance notice of stockholder proposals for business to be conducted at meetings of our stockholders and for nominations of candidates for election to our board of directors; requiring a super majority vote for certain amendments to our amended and restated certificate of incorporation and amended and restated bylaws; and limiting the determination of the number of directors on our board of directors and the filling of vacancies or newly created seats on the board, to our board of directors then in office. These provisions, alone or together, could have the effect of delaying or deterring a change in control, could limit the opportunity for our stockholders to receive a premium for their shares of our common stock, and could also affect the price that some investors are willing to pay for our common stock.

ITEM 1B. Unresolved Staff Comments

None.

ITEM 2. Properties

Facilities

As of December 31, 2013, we operated five separate office locations throughout the United States. The largest of these facilities is in Livermore, California and serves as our corporate headquarters, as well as a data center and production location. Our Livermore facility represents approximately 50,291 square feet and has a lease expiration of September 2017. We also lease production centers in California, Oregon, Florida and Texas and own a production/data center in Oregon.

We believe that our facilities are adequate for current operations and that additional space will be available as required. See note (6) to our consolidated financial statements included elsewhere in this Annual Report on Form 10-K for information regarding our lease obligations.

ITEM 3. Legal Proceedings

24

Table of Contents

We are involved in various legal proceedings that arise from our normal business operations. These actions generally derive from our student loan recovery services, and generally assert claims for violations of the Fair Debt Collection Practices Act or similar federal and state consumer credit laws. While litigation is inherently unpredictable, we believe that none of these legal proceedings, individually or collectively, will have a material adverse effect on our financial condition or our results of operations.

ITEM 4. Mine Safety Disclosures

Not applicable.

PART II

ITEM 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market For Our Common Equity

Our common stock began trading on the NASDAQ Global Select market under the symbol "PFMT" on August 10, 2012. Prior to that, there was no public market for our common stock. The table sets forth, for the periods indicated below, the high and low sales prices per share of our common stock as reported by NASDAQ since August 10, 2012.

	High	Low
2012		
Third Quarter (beginning August 10, 2012)	12.18	9.20
Fourth Quarter	11.84	7.55
2013		
First Quarter	14.09	10.06
Second Quarter	13.26	9.25
Third Quarter	12.01	10.27
Fourth Quarter	11.02	9.26

On March 12, 2014, the closing price as reported by NASDAQ of our common stock was \$7.86 per share.

Stockholders

As of December 31, 2013, we had approximately 14 holders of record of our common stock.

Dividends

Our board of directors does not currently intend to pay regular dividends on our common stock. However, we expect to reevaluate our dividend policy on a regular basis and may, subject to compliance with the covenants in our credit agreement and other considerations, determine to pay dividends in the future. Our ability to pay dividends is subject to restrictive covenants contained in our credit agreement.

Securities Authorized for Issuance Under Equity Compensation Plans

Information regarding the securities authorized for issuance under our equity compensation plans can be found under Item 12 of this Annual Report on Form 10-K.

Issuer Purchases of Equity Securities

None.

ITEM 6. Selected Financial Data

The selected consolidated balance sheet data as of December 31, 2013 and 2012, and the selected consolidated statements of operations data for each year ended December 31, 2013, 2012 and 2011, have been derived from our audited consolidated financial statements which are included elsewhere in this annual report. The selected consolidated balance sheet data as of December 31, 2011, 2010 and 2009, and the selected consolidated statements of operations data for the years ended December 31, 2010 and 2009 have been derived from our audited consolidated financial statements not included in this annual

Table of Contents

report. Historical results are not necessarily indicative of future results. You should read the following selected consolidated historical financial data below in conjunction with the section titled “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and the consolidated financial statements, related notes, and other financial information included in this Annual Report on Form 10-K. The selected consolidated financial data in this section is not intended to replace the consolidated financial statements and is qualified in its entirety by the consolidated financial statements and related notes and schedule included in this Annual Report on Form 10-K.

ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

We provide technology-enabled recovery and related analytics services in the United States. Our services help identify and recover delinquent or defaulted assets and improper payments for both government and private clients in a broad range of markets. Our clients typically operate in complex and regulated environments and outsource their recovery needs in order to reduce losses on billions of dollars of defaulted student loans, improper healthcare payments and delinquent state tax and federal treasury and other receivables. We generally provide our services on an outsourced basis, where we handle many or all aspects of our clients' recovery processes.

Our revenue model is generally success-based as we earn fees on the aggregate amount of funds that we enable our clients to recover. Our services do not require any significant upfront investments by our clients and offer our clients the opportunity to recover significant funds otherwise lost. Because our model is based upon the success of our efforts and the dollars we enable our clients to recover, our business objectives are aligned with those of our clients and we are generally not reliant on their spending budgets. Furthermore, our business model does not require significant capital expenditures and we do not purchase loans or obligations.

Sources of Revenues

We derive our revenues from services for clients in a variety of different markets. These markets include our two largest markets, student lending and healthcare, as well as our other markets which include but are not limited to delinquent state taxes and federal Treasury and other receivables.

	Year Ended December 31,		
	2013	2012	2011
	(in thousands)		
Student Lending	\$163,708	\$132,445	\$122,253
Healthcare	67,531	54,747	21,549
Other	24,063	22,881	19,172
Total Revenues	\$255,302	\$210,073	\$162,974

Student Lending

We derive the majority of our revenues from the recovery of student loans. These revenues are contract-based and consist primarily of contingency fees based on a specified percentage of the amount we enable our clients to recover. Our contingency fee percentage for a particular recovery depends on the type of recovery facilitated. We also receive incremental performance incentives based upon our performance as compared to other contractors with the Department of Education, which are comprised of additional inventory allocation volumes and incentive fees. We are currently subject to a competitive rebidding process for the next contract with the Department of Education. Based on data compiled from over two decades of experience with the recovery of defaulted student loans, at the time we receive a placement of student loans, we are able to make a reasonably accurate estimate of the recovery outcomes likely to be derived from such placement and the revenues we are likely able to generate based on the anticipated recovery outcomes.

There are five potential outcomes to the student loan recovery process from which we generate revenues. These outcomes include: full repayment, recurring payments, rehabilitation, loan restructuring and wage garnishment. Of these five potential outcomes, our ability to rehabilitate defaulted student loans is the most significant component of our revenues in this market. Generally, a loan is considered successfully rehabilitated after the student loan borrower has made nine consecutive qualifying monthly payments and our client has notified us that it is recalling the loan. Once we have structured and implemented a repayment program for a defaulted borrower, we (i) earn a percentage of each periodic payment collected up to and including the final periodic payment prior to the loan being considered "rehabilitated" by our clients, and (ii) if the loan is "rehabilitated," then we are paid a one-time percentage of the total amount of the remaining unpaid balance. The fees we are paid vary by recovery outcome as well as by contract. For non-government-supported student loans we are generally only paid contingency fees on two outcomes: full repayment or recurring repayments. The table below describes our typical fee structure for each of these five

outcomes.

27

Table of Contents

Student Loan Recovery Outcomes

Full Repayment	Recurring Payments	Rehabilitation	Loan Restructuring	Wage Garnishment
<ul style="list-style-type: none"> • Repayment in full of the loan • We are paid a percentage of the full payment that is made 	<ul style="list-style-type: none"> • Regular structured payments, typically according to a renegotiated payment plan • We are paid a percentage of each payment 	<ul style="list-style-type: none"> • After a defaulted borrower has made nine consecutive recurring payments, the loan is eligible for rehabilitation • We are paid based on a percentage of the overall value of the rehabilitated loan 	<ul style="list-style-type: none"> • Restructure and consolidate a number of outstanding loans into a single loan, typically with one monthly payment and an extended maturity • We are paid based on a percentage of overall value of the restructured loan 	<ul style="list-style-type: none"> • If we are unable to obtain voluntary repayment, payments may be obtained through wage garnishment after certain administrative requirements are met • We are paid a percentage of each payment

For certain guaranty agency, or GA, clients, we have entered into Master Service Agreements, or MSAs. Under these agreements, clients provide their entire inventory of outsourced loans or receivables to us for recovery on an exclusive basis, rather than just a portion, as with traditional contracts that are split among various service providers. In certain circumstances, we engage subcontractors to assist in the recovery of a portion of the client's portfolio. We also receive success fees for the recovery of loans under MSAs and our revenues under MSA arrangements include fees earned by the activities of our subcontractors. As of December 31, 2013, we had three MSA clients in the student loan market.

Healthcare

We derive revenues from the healthcare market primarily from our RAC contract, under which we are the prime contractor responsible for detecting improperly paid Part A and Part B Medicare claims in 12 states in the Northeastern United States. Revenues earned under the RAC contract are driven by the identification of improperly paid Medicare claims through both automated and manual review of such claims. We are paid contingency fees by CMS based on a percentage of the dollar amount of claims recovered by CMS as a result of our efforts. We recognize revenue when the provider pays CMS or incurs an offset against future Medicare claims. The revenues we recognize are net of our estimate of claims that will be overturned by appeal following payment by the provider. We are currently subject to a competitive rebidding process for the next RAC contract with CMS.

To accelerate our ability to provide Medicare audit and recovery services across our region following our award of our initial RAC contract, we outsourced certain aspects of our healthcare recovery process to three different subcontractors. Two of these subcontractors provide a specific service to us in connection with our claims recovery process, and one subcontractor is engaged to provide all of the audit and recovery services for claims within a portion of our region. We recognize all of the revenues generated by the claims recovered through these subcontractor relationships, and we recognize the fees that we pay to these subcontractors in our expenses.

We have also recently begun utilizing our technology-enabled services platform to provide audit, recovery and analytical services for private healthcare providers.

Other

We also derive revenues from the recovery of delinquent state taxes, and federal Treasury and other receivables, default aversion services for certain clients including financial institutions and the licensing of hosted technology solutions to certain clients. For our hosted technology services, we license our system and integrate our technology into our clients' operations, for which we are paid a licensing fee. Our revenues for these services include contingency fees, fees based on dedicated headcount to our clients and hosted technology licensing fees.

Operating Metrics

We monitor a number of operating metrics in order to evaluate our business and make decisions regarding our corporate strategy. These key metrics include Placement Volume, Placement Revenue as a Percentage of Placement Volume, Net Claim Recovery Volume and Claim Recovery Fee Rate.

Table of Contents

	Year Ended December 31,		
	2013	2012	2011
	(dollars in thousands)		
Student Lending:			
Placement Volume	\$6,607,485	\$5,768,945	\$6,241,483
Placement Revenue as a percentage of Placement Volume	2.48	% 2.30	% 1.96
Healthcare:			
Net Claim Recovery Volume	\$598,071	\$482,202	\$188,573
Claim Recovery Fee Rate	11.29	% 11.35	% 11.43

Placement Volume. Our Placement Volume represents the dollar volume of defaulted student loans first placed with us during the specified period by public and private clients for recovery. Placement Volume allows us to measure and track trends in the amount of inventory our clients in the student lending market are placing with us during any period. The revenues associated with the recovery of a portion of these loans may be recognized in subsequent accounting periods, which assists management in estimating future revenues and in allocating resources necessary to address current Placement Volumes.

Placement Revenue as a Percentage of Placement Volume. Placement Revenue as a Percentage of Placement Volume is calculated by dividing revenues recognized during the specified period by Placement Volume first placed with us during that same period. This metric is subject to some level of variation from period to period based upon certain timing differences including, but not limited to, the timing of placements received by us within a period and the fact that a significant portion of revenues recognized in a current period is often generated from the Placement Volume received in prior periods. However, we believe that this metric provides a useful indication of the revenues we are generating from Placement Volumes on an ongoing basis and provides management with an indication of the relative efficiency of our recovery operations from period to period.

Net Claim Recovery Volume. Our Net Claim Recovery Volume measures the dollar volume of improper Medicare claims that we have recovered for CMS during the applicable period net of any amount that we have reserved to cover appeals by healthcare providers. We are paid recovery fees as a percentage of this recovered claim volume. We calculate this metric by dividing our claim recovery revenues by our Claim Recovery Fee Rate. This metric shows trends in the volume of improper payments within our region and allows management to measure our success in finding these improper payments, over time.

Claim Recovery Fee Rate. Our Claim Recovery Fee Rate represents the weighted-average percentage of our fees compared to amounts recovered by CMS. This percentage primarily depends on the method of recovery and, in some cases, the type of improper payment that we identify. This metric helps management measure the amount of revenues we generate from Net Claim Recovery Volume.

Costs and Expenses

We generally report two categories of operating expenses: salaries and benefits and other operating expense. Salaries and benefits expenses consist primarily of salaries and performance incentives paid and benefits provided to our employees. Other operating expense includes expenses related to our use of subcontractors, other production related expenses, including costs associated with data processing, retrieval of medical records, printing and mailing services, amortization and other outside services, as well as general corporate and administrative expenses. In addition to our main components of operating expenses, in 2011 we incurred a \$13.4 million impairment expense to write off the carrying amount of the trade name intangible asset due to our plan to retire our Diversified Collection Services, Inc. trade name, which we report as impairment of trade name. We expect a significant portion of our expenses to increase as we grow our business. However, we expect certain expenses, including our corporate and general administrative expenses, to grow at a slower rate than our revenues. As a result, and over the long term, we expect our overall expenses to modestly decline as a percentage of revenues.

Factors Affecting Our Operating Results

Our results of operations are influenced by a number of factors, including allocation of placement volume, claim recovery volume, contingency fees, regulatory matters, effects of client concentration and macroeconomic factors.

Allocation of Placement Volume

Our clients have the right to unilaterally set and increase or reduce the volume of defaulted student loans or other receivables that we service at any given time. In addition, many of our recovery contracts for student loans and other receivables are not exclusive, with our clients retaining multiple service providers to service portions of their portfolios. Accordingly, the number of delinquent student loans or other receivables that are placed with us may vary from time to time,

Table of Contents

which may have a significant effect on the amount and timing of our revenues. We believe the major factors that influence the number of placements we receive from our clients in the student loan market include our performance under our existing contracts and our ability to perform well against competitors for a particular client. To the extent that we perform well under our existing contracts and differentiate our services from those of our competitors, we may receive a relatively greater number of placements under these existing contracts and may improve our ability to obtain future contracts from these clients and other potential clients. Further, delays in placement volume, as well as acceleration of placement volume, from any of our large clients may cause our revenues and operating results to vary from quarter to quarter.

Typically we are able to anticipate with reasonable accuracy the timing and volume of placements of defaulted student loans and other receivables based on historical patterns and regular communication with our clients. Occasionally, however, placements are delayed due to factors outside of our control. For example, a technology system upgrade at the Department of Education significantly decreased the volume of student loan placements by the Department of Education to all recovery vendors, including us. While we and the other recovery vendors have recently received substantially larger placement volume in the fourth quarter of 2012 as a result of the completion of this technology system upgrade, the majority of the revenues from these placements were not recognized until the third quarter of 2013 because we do not begin to earn rehabilitation revenues from a given placement until at least nine months after receipt of a placement. In addition, for approximately twelve months beginning in September 2011, the Department of Education was not able to process a portion of rehabilitated student loans and accordingly we were not able to recognize certain revenues associated with rehabilitation of loans for this client. However, the Department of Education continued to pay us based on invoices submitted and we recorded these cash receipts as deferred revenues on our balance sheet.

Claim Recovery Volume

While we are entitled to review Medicare records for all Part A and Part B claims in our region, we are not permitted to identify an improper claim unless that particular type of claim has been pre-approved by CMS to ensure compliance with applicable Medicare payment policies, as well as national and local coverage determinations. The growth of our revenues is determined primarily by the aggregate volume of Medicare claims in our region and our ability to identify improper payments within these claims. However, the long-term growth of these revenues will also be affected by the scope of the issues pre-approved by CMS.

Our claim recovery volume related to PIP providers in our region has been limited and we estimate that PIP providers in our region account for approximately 20% of Medicare claims. PIP providers are reimbursed for Medicare claims through different processes than other healthcare providers, and technology adjustments were necessary to permit automated processing of claims involving PIP providers. Prior to April 2012, we were not permitted to audit Medicare claims for these PIP providers and the improper payments to PIP providers that we identified beginning in April 2012 were not processed by CMS until January 2013, when a small portion of such payments began to be processed manually. In June 2013, CMS implemented the system adjustment necessary for automated processing of claims, which allowed us to recognize approximately \$12 million in revenues for 2013.

Our audit activities under the RAC contract are currently set to expire in June 2014. In planning for the award of the next RAC contracts, CMS has been developing transition procedures that will affect our operations during the transition period. In this regard, CMS permitted us to submit medical records requests until February 21, 2014. In addition, CMS has placed restrictions on the types of claims and the amount of certain medical records requests that we may make during the transition period, and CMS has maintained a long-running prohibition on requesting medical records from PIP providers other than for a three week period that began in late October 2013. We expect that these transition rules will have an adverse effect on our revenues during 2014. In addition, CMS has implemented rules that, during the period October 1 through December 31, 2013, we and the other RAC contractors will not be able to review and audit (i) whether inpatient care delivered to patients with hospital stays lasting less than two midnights was medically necessary and therefore deserving of the higher reimbursement levels under Medicare Part A or (ii) whether inpatient treatment was medically necessary for admissions spanning more than two midnights. In connection with these restrictions, hospitals cannot bill CMS for outpatient services on hospital stays lasting less than two midnights during such period. CMS has subsequently extended this rule for hospitals until September 30, 2014. Also, during this

time, CMS has initiated a provider education and compliance review program.

Fees associated with recoveries initiated by us based upon improper claims for inpatient reimbursement of these short stays have represented a substantial portion of the revenues we have earned under our recovery and audit contract. The suspension of this type of review activity could have a material adverse effect on our 2014 healthcare revenues and operating results, depending on a variety of factors including, among other things, CMS's evaluation of provider compliance with the new rules, the rules ultimately adopted by CMS with respect to medical necessity reviews of Medicare reimbursement claims associated with short stay inpatient admissions and, more generally, the scope of improper claims that CMS allows us to pursue and our ability to successfully identify improper claims within the permitted scope. In connection with the award of the new

Table of Contents

RAC contract, CMS has indicated that it is reviewing certain aspects of the RAC contract including the amount of medical records that RAC vendors may request and the timeframes for review and status communications between RAC vendors and providers.

Contingency Fees

Our revenues consist primarily of contract-based contingency fees. The contingency fee percentages that we earn are set by our clients or agreed upon during the bid process, and may change from time to time either under the terms of existing contracts or pursuant to the terms of contract renewals. For example, we have been advised that our contractual arrangement with the Department of Education is under review as a result of the Department of Education's decision to have its recovery vendors promote IBR to defaulted student loans. The IBR program provides flexibility on the required monthly payment for student loan borrowers at an amount intended to be affordable based on a borrower's income and family size. As a result of the increased application of the IBR program to defaulted student loans, we expect that there will be an increase in the number of loans that become eligible for rehabilitation because more defaulted student loan borrowers will be able to make qualifying payments. In connection with the implementation of the IBR program, the Department of Education reduced the contingency fee rate that we receive for rehabilitating student loans by approximately 13% effective March 1, 2013. In addition, the Bipartisan Budget Act of 2013, which was signed into law by President Obama on December 26, 2013, reduced the compensation paid to GAs for the rehabilitation of student loans, effective July 1, 2014. This "revenue enhancement" measure will reduce from 18.5% to 16% of the outstanding loan balance, the amount that GAs can charge borrowers when a rehabilitated loan is sold and will eliminate entirely the GAs retention of 18.5% of the outstanding loan balance as a fee for rehabilitation services. It is unclear how the reduction of fees that the GAs receive will impact the contingency fee percentage that we receive from the GAs for assisting in the rehabilitation of defaulted student loans; however, any material decrease in this contingency fee percentage would result in a decrease in our revenues.

Regulatory Matters

Each of the markets which we serve is highly regulated. Accordingly, changes in regulations that affect the types of loans, receivables and claims that we are able to service or the manner in which any such delinquent loans, receivables and claims can be recovered will affect our revenues and results of operations. For example, the passage of the Student Aid and Fiscal Responsibility Act, or SAFRA, in 2010 had the effect of transferring the origination of all government-supported student loans to the Department of Education, thereby ending all student loan originations guaranteed by the GAs. Loans guaranteed by the GAs represented approximately 70% of government-supported student loans originated in 2009. While the GAs will continue to service existing outstanding student loans for years to come, this legislation will over time shift the portfolio of student loans that we manage toward the Department of Education, and further concentrate our sources of revenues and increase our reliance on our relationship with the Department of Education. In addition, our entry into the healthcare market was facilitated by passage of the Tax Relief and Health Care Act of 2006, which mandated CMS to contract with private firms to audit Medicare claims in an effort to increase the recovery of improper Medicare payments. Any changes to the regulations that affect the student loan industry or the recovery of defaulted student loans or the Medicare program generally or the audit and recovery of Medicare claims could have a significant impact on our revenues and results of operations.

Client Concentration

Our revenues from the student loan market depend on our ability to maintain our contracts with some of the largest providers of student loans. In 2013, three providers of student loans each accounted for more than 10% of our revenues during such period and they collectively accounted for 49% of our total revenues during this period. Our contracts with these clients entitle them to unilaterally terminate their contractual relationship with us at any time without penalty. If we lose one of our significant clients, including if one of our significant clients is consolidated by an entity that does not use our services, if the terms of compensation for our services change or if there is a reduction in the level of placements provided by any of these clients, our revenues could decline.

Our contract with CMS for the recovery of improper Medicare payments began generating significant revenues during 2011 and represented 26% of our total revenues in both of the years ended December 31, 2012 and 2013. Our audit work under the RAC contract is currently set to expire in June 2014, and we are currently participating in a competitive bidding process for the next RAC contract, but this process may be delayed due in part to protests filed by

our competitors. While we believe our performance under the existing agreement and the experience we have gained in performing this contract position us well to renew the agreement, failure to renew the agreement or renewal on substantially less favorable terms could significantly harm our revenues and results of operations.

Macroeconomic Factors

31

Table of Contents

Certain macroeconomic factors influence our business and results of operations. These include the increasing volume of student loan originations in the U.S. as a result of increased tuition costs and student enrollment, the default rate of student loan borrowers, the growth in Medicare expenditures resulting from increasing healthcare costs, as well as the fiscal budget tightening of federal, state and local governments as a result of general economic weakness and lower tax revenues.

Critical Accounting Policies

Our consolidated financial statements are prepared in accordance with generally accepted accounting principles in the United States, or GAAP. The preparation of these consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, costs and expenses and related disclosures. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances. In many instances, we could have reasonably used different accounting estimates, and in other instances changes in the accounting estimates are reasonably likely to occur from period-to-period. Accordingly, actual results could differ significantly from the estimates made by our management. To the extent that there are material differences between these estimates and actual results, our future financial statement presentation, financial condition, results of operations and cash flows will be affected. We believe that the accounting policies discussed below are critical to understanding our historical and future performance, as these policies relate to the more significant areas involving management's judgments and estimates.

Revenue Recognition

The majority of our contracts are contingency fee based. We recognize revenues on these contingency fee based contracts when third-party payors remit payments to our clients or remit payments to us on behalf of our clients, and, consequently, the contingency is deemed to have been satisfied. Under our RAC contract with CMS, we recognize revenues when the healthcare provider has paid CMS for a given claim or incurs an offset against future Medicare claims. Providers have the right to appeal a claim and may pursue additional appeals if the initial appeal is found in favor of CMS. We accrue an estimated liability for appeals based on the amount of commissions received which are subject to appeal and which we estimate are probable of being returned to providers following successful appeal. This estimated liability for appeals is an offset to revenues on our income statement. Our estimates are based on our historical experience with appeals activity under our CMS contract since January 2010. During the year ended December 31, 2013, we reserved an amount equal to 16.1% of gross revenues from our CMS contract. We increased our estimated liability for appeals in 2013 due to recent trends in our historical data related to the likelihood of successful appeals. Commencing on December 31, 2011, we established a separate line item in the current liabilities section of our balance sheet entitled "Estimated liability for appeals" to reflect our estimate of this liability. The \$15.3 million balance as of December 31, 2013, represents our best estimate of the probable amount of losses related to appeals of claims for which commissions were previously collected. We estimate that it is reasonably possible that we could be required to pay up to an additional approximately \$4.5 million as a result of potentially successful appeals. To the extent that required payments by us related to successful appeals exceed the amount accrued, revenues in the applicable period would be reduced by the amount of the excess. We similarly accrue an allowance against accounts receivable related to commissions yet to be collected, which was \$1.2 million as of December 31, 2013, based on the same estimates used to establish the estimated liability for appeals of commissions received. Our inability to correctly estimate the estimated liabilities and allowance against accounts receivable could adversely affect our revenues in future periods.

Goodwill

We periodically review the carrying value of intangible assets not subject to amortization, including goodwill, to determine whether an impairment may exist. GAAP requires that goodwill and certain intangible assets not subject to amortization be assessed annually for impairment using fair value measurement techniques.

The balance of goodwill was \$81.6 million as of December 31, 2013. We review goodwill for impairment by first assessing qualitative factors to determine whether it is more likely than not that the fair value of the reporting unit is less than its carrying amount, including goodwill, as a basis for determining whether it is necessary to perform the two-step goodwill impairment. If it is determined that it is not more likely than not that the fair value of the reporting unit is less than its carrying amount, we conclude that goodwill is not impaired. If it is determined that it is more likely

than not that the fair value of the reporting unit is less than its carrying amount, we conduct detailed impairment testing. The first step of the goodwill impairment testing involves estimating the fair value of the reporting unit and comparing this to its carrying amount, including goodwill. If the carrying amount of the reporting unit exceeds its fair value, the second step of the two-step goodwill impairment test is performed to measure the amount of impairment loss, if any. The second step of the goodwill impairment test compares the implied fair value of the reporting unit's goodwill with the carrying amount of that goodwill. If the carrying amount of the reporting unit's goodwill exceeds the implied fair value of that goodwill, an impairment loss is recognized in an amount equal to that excess. The implied fair value of goodwill is determined in the same manner as the amount of goodwill recognized in a business combination. That is, the fair value of the reporting unit is allocated to all of the assets and liabilities

Table of Contents

of that unit as if the reporting unit had been acquired in a business combination and the fair value of the reporting unit was the purchase price paid to acquire the reporting unit.

Impairments of Depreciable Intangible Assets

The balance of depreciable intangible assets was \$32.5 million as of December 31, 2013. We evaluate depreciable intangible assets for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. Depreciable intangible assets consist of client contracts and related relationships, and are being amortized over their estimated useful life, which is generally 20 years. We evaluate the client contracts intangible at the individual contract level. The recoverability of such assets is measured by a comparison of the carrying amount of the assets to future undiscounted net cash flows expected to be generated by the assets. If the assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. There was no impairment expense for depreciable intangible assets in 2013, 2012 or 2011.

Results of Operations

Year Ended December 31, 2013 compared to the Year Ended December 31, 2012

The following table represents our historical operating results for the periods presented:

	Year Ended December 31,				
	2013	2012	\$ Change	% Change	
	(in thousands)				
Consolidated Statements of Operations Data:					
Revenues	\$255,302	\$210,073	\$45,229	22	%

Accrual for preferred stock dividends	—	2,038	(2,038)) (100))%
Net income available to common shareholders	\$36,339	\$20,913	\$15,426	74	%

Revenues

Total revenues were \$255.3 million for the year ended December 31, 2013, an increase of \$45.2 million or 22%, compared to total revenues of \$210.1 million for the year ended December 31, 2012. This increase is due to growth in revenues in both our student lending and healthcare markets.

Student lending revenues were \$163.7 million for the year ended December 31, 2013, representing an increase of \$31.3 million, or 24%, compared to the year ended December 31, 2012. This increase was primarily a result of volume growth of student loan placements during the second half of 2012, which led to an increase in rehabilitation revenues for the year ended December 31, 2013, and continued execution on a contract involving a specialized portfolio of student loans with one of our leading GA clients.

Healthcare revenues were \$67.5 million for the year ended December 31, 2013, representing an increase of \$12.8 million, or 23%, compared to the year ended December 31, 2012. This increase was primarily a result of higher net claim recovery volume under our RAC contract.

Salaries and Benefits

Salaries and benefits expense was \$96.8 million for the year ended December 31, 2013, an increase of \$13.8 million, or 17%, compared to salaries and benefits expense of \$83.0 million for the year ended December 31, 2012. This

increase is primarily due to an increase in employee headcount to support operational growth related to the recovery of student loans.

Table of Contents

Other Operating Expense

Other operating expense was \$85.7 million for the year ended December 31, 2013, an increase of \$14.4 million, or 20%, compared to other operating expense of \$71.3 million for the year ended December 31, 2012. This increase is primarily due to increased costs related to our use of subcontractors and consultants, production related expenses associated with data processing, retrieval of medical records, printing and mailing services, and higher spending on professional services related to operating as a public company.

Income from Operations

As a result of the factors described above, income from operations was \$72.9 million for the year ended December 31, 2013, compared to \$55.8 million for the year ended December 31, 2012, representing an increase of \$17.1 million, or 31%.

Debt Extinguishment Costs

We did not incur any debt extinguishment costs for the year ended December 31, 2013. In March 2012, we incurred debt extinguishment costs of \$3.7 million in connection with a new credit facility.

Interest Expense

Interest expense was \$11.6 million for the year ended December 31, 2013 compared to \$12.4 million for the year ended December 31, 2012, representing a decrease of 7%. Interest expense decreased due to repayments of principal under our credit agreement, resulting in a lower outstanding balance during 2013.

Income Taxes

Income tax expense was \$25.0 million for the year ended December 31, 2013 compared to \$16.8 million for the year ended December 31, 2012, representing an increase of 48.7% consistent with the increase in income before provision for income taxes. Our effective income tax rate decreased to 40.7% for the year ended December 31, 2013 from 42.2% for the year ended December 31, 2012. The decrease in the effective tax rate is the result of approximately 0.7% decrease due to changes in the state tax rate, and approximately 1% decrease due to income tax benefits associated with increases in stock options exercises as a result of two follow on offerings during the year, and the end of the lock-up periods for certain employees. These decreases were offset by approximately a 1.7% increase as a result of the non-deductible expenses associated with the follow on offerings. The 2012 effective tax rate includes a one time tax expense due to the non-deductible termination of an advisory services agreement of approximately 1.9%.

Net Income

As a result of the factors described above, net income was \$36.3 million for the year ended December 31, 2013, which represented an increase of \$13.4 million compared to net income of \$23.0 million for the year ended December 31, 2012.

Year Ended December 31, 2012 compared to the Year Ended December 31, 2011

The following table presents our historical operating results for the periods presented:

Table of Contents

	Year Ended December 31,		\$ Change	% Change	
	2012	2011			
Consolidated Statement of Operations Data:					
Revenues	\$210,073	\$162,974	\$47,099	29	%
Operating expenses:					
Salaries and benefits	83,002	67,082	15,920	24	%
Other operating expense	71,305	49,199	22,106	45	%
Impairment of trade name	—	13,400	(13,400)	(100))%
Total operating expenses	154,307	129,681	24,626	19	%
Income from operations	55,766	33,293	22,473	68	%
Debt extinguishment costs	(3,679)	—	(3,679)	—	%
Interest expense	(12,414)	(13,530)	1,116	(8))%
Interest income	64	125	(61)	(49))%
Income before provision for income taxes	39,737	19,888	19,849	100	%
Provision for income taxes	16,786	7,516	9,270	123	%
Net income	22,951	12,372	10,579	86	%
Accrual for preferred stock dividends	2,038	6,495	(4,457)	(69))%
Net income available to common shareholders	\$20,913	\$5,877	\$15,036	256	%

Revenues

Total revenues were \$210.1 million for the year ended December 31, 2012, an increase of \$47.1 million, or 28.9%, compared to total revenues of \$163.0 million for the year ended December 31, 2011. This increase in revenues is primarily due to an increase of \$33.2 million in revenues received from CMS under our RAC contract as a result of higher claim recovery volume and an increase of \$4.8 million generated from a new default-aversion service contract that commenced in May 2012, for a new service offering we provide in other markets we serve. Revenues from student lending increased by 8.3% in 2012 to \$132.4 million from \$122.2 million in the prior year period.

Salaries and Benefits

Salaries and benefits expense was \$83.0 million for the year ended December 31, 2012, an increase of \$15.9 million, or 23.7%, compared to salaries and benefits expense of \$67.1 million for the year ended December 31, 2011. This increase is primarily due to hiring of new employees to provide services under our RAC contract with CMS, an increase in expenses associated with the engagement of additional software engineers to assist in the integration of a recently acquired software license and an increase in expenses associated with the hiring of additional administrative employees.

Other Operating Expense

Other operating expense was \$71.3 million for the year ended December 31, 2012, an increase of \$22.1 million, or 44.9%, compared to other operating expense of \$49.2 million for the year ended December 31, 2011. This increase is primarily due to (i) an additional \$10 million of subcontractor fees incurred in connection with increased services provided under the RAC contract and MSA contracts and (ii) \$1.3 million paid to an affiliate of Parthenon Capital Partners in connection with the termination of an advisory services agreement, and an additional \$0.9 million paid to Parthenon Capital Partners at the closing of our initial public offering also as a result of the termination of the advisory agreement.

Impairment of Trade Name

We did not recognize an impairment expense for intangible assets in 2012. In 2011, we recorded \$13.4 million of impairment expense to write off the carrying value of our former trade name, Diversified Collection Services Inc., due to our decision to retire that trade name.

Income from Operations

As a result of the factors described above, income from operations was \$55.8 million for the year ended December 31, 2012, compared to \$33.3 million for the year ended December 31, 2011, representing an increase of \$22.5 million, or 67.5%.

Table of Contents

Debt Extinguishment Costs

As a result of the entry into our new credit facility and the repayment of all amounts owed under our then existing credit facility in March 2012, we incurred debt extinguishment costs of \$3.7 million, comprised of approximately \$3.3 million in fees paid to the lenders in connection with our new credit facility and approximately \$0.3 million of unamortized debt issuance costs associated with our old credit facility. We did not incur a similar expense in the year ended December 31, 2011.

Interest Expense

Interest expense was \$12.4 million for the year ended December 31, 2012, compared to \$13.5 for the year ended December 31, 2011, representing a decrease of 8.2% due to lower interest rates under the new credit agreement as compared to the interest rates under our old credit agreement.

Income Taxes

Income tax expense was \$16.8 million for the year ended December 31, 2012, compared to \$7.5 million for the year ended December 31, 2011, representing an increase of 123.3% consistent with the increase in income before provision for income taxes. Our effective income tax rate increased to 42.2% for the year ended December 31, 2012 from 37.8% for the year ended December 31, 2011. Approximately 2.5% of the increase results from changes in the state tax rate, which includes a 2011 one-time benefit from a change in California tax law of 2.3%. In addition, approximately 1.9% of the increase was due to the non-deductible termination of an advisory services agreement in 2012.

Net Income

As a result of the factors described above, net income was \$23.0 million for the year ended December 31, 2012, which represented an increase of \$10.6 million compared to net income of \$12.4 million for the year ended December 31, 2011.

Liquidity and Capital Resources

Our principal sources of liquidity are cash flows from operations, term loans, and the proceeds received from our initial public offering in August 2012. Cash and cash equivalents, which totaled \$81.9 million as of December 31, 2013, consist primarily of cash on deposit with banks. We expect that operating cash flows will continue to be a primary source of liquidity for our operating needs. There are currently no borrowings outstanding under our revolving credit facility other than a \$1.4 million letter of credit. Due to our operating cash flows, our existing cash and cash equivalents and availability under our revolving credit facility, we believe that we have the ability to meet our working capital and capital expenditure needs for the foreseeable future.

The following table presents information regarding our cash flows for the years ended December 31, 2013, 2012 and 2011:

	Year Ended		
	December 31,		
	2013	2012	2011
	(in thousands)		
Net cash provided by operating activities	\$61,206	\$37,005	\$28,985
Net cash used in investing activities	(12,503)	(12,193)	(6,111)
Net cash used in financing activities	(4,637)	(6,973)	(13,948)
Cash flows from operating activities			

Operating activities provided \$61.2 million of cash during the year ended December 31, 2013 an increase of \$24.2 million, compared to cash provided by operating activities of \$37.0 million for the year ended December 31, 2012, primarily due to net income of \$36.3 million, an increase in the estimated liability for appeals of \$10.9 million associated with our RAC contract with CMS, collection of trade receivables of \$3.4 million, and an increase in accrued salaries and benefits of \$2.5 million. These items were partially offset by various working capital fluctuations such as a decrease in other current liabilities and deferred revenue. The estimated liability for appeals for revenue associated with CMS totaled \$15.3 million in 2013, compared \$4.4 million in 2012, due to higher claim recovery volumes under our RAC contract with CMS.

Edgar Filing: Performant Financial Corp - Form 10-K

Operating activities provided \$37.0 million of cash during the year ended December 31, 2012, an increase of \$8.0 million, compared to cash provided by operating activities of \$29.0 million for the year ended December 31, 2011 primarily due to the increase in net income for the year ended December 31, 2012 to \$23.0 million compared to \$12.4 million for 2011.

Table of Contents

Cash used to pay accrued salary and benefits totaled \$9.3 million in 2012, as compared to the \$7.1 million in accrued salaries and benefits payable for the comparable period in 2011. Accounts payable increased \$1.3 million in 2012 compared to 2011, primarily due to timing. The estimated liability for appeals for revenue associated with CMS totaled \$4.4 million in 2012, compared \$0.5 million in 2011, due to higher claim recovery volumes under our RAC contract with CMS.

We generated \$29.0 million of cash from operating activities during the year ended December 31, 2011, primarily resulting from our net income of \$12.4 million, non-cash depreciation and amortization of \$7.8 million, an impairment expense to write off the carrying amount of the trade name intangible asset due to the retirement of the Diversified Collection Services, Inc. trade name of \$13.4 million and changes in operating assets and liabilities of \$3.8 million, offset by non-cash deferred income taxes of \$9.6 million.

Cash flows from investing activities

Investments in property, plant and equipment resulted in cash outflow of \$12.5 million during 2013 primarily for purchases related to information technology, data storage, hardware, telecommunication systems and security enhancements to our proprietary software.

Investing activities resulted in cash outflow of \$12.2 million during the year ended December 31, 2012. The primary uses of cash associated with investing activities in 2012 were \$11.4 million for property, equipment and leasehold improvements, to enhance our proprietary technology platform, improve our telecommunications systems, upgrade our IT infrastructure for storage and operating activities, and \$0.8 million for the purchase of a perpetual software license.

We used \$6.1 million of cash in investing activities for the purchase of property, equipment and leasehold improvements during the year ended December 31, 2011, primarily for investments in information technology systems and infrastructure to support increased business volumes.

Cash flows from financing activities

Cash used in financing activities of \$4.6 million in 2013 was due to the repayment of principal on outstanding debt and other contractual obligations of \$15.5 million, offset by an income tax benefit of \$9.1 million associated with the exercise of employee stock options, and \$1.8 million in proceeds received from the exercise of employee stock options.

For the year ended December 31, 2012, our primary financing activities were \$156 million in proceeds from term loans, \$12.8 million of net proceeds from our IPO which was completed in August 2012, and \$4.5 million in revolving credit facility borrowings. These proceeds were offset by \$103.4 million used for the repayment of our old notes payable and repayment of principal on our new term loans, \$12.7 million used for the repayment of our old and new lines of credit, \$60.3 million used to redeem 5.3 million shares of preferred stock, and \$3.1 million used for debt issuance costs.

We used \$13.9 million of cash in financing activities for the repayment of notes payable during the year ended December 31, 2011.

Long-term Debt

On March 19, 2012, we, through our wholly owned subsidiary, entered into a \$147.5 million credit agreement with Madison Capital Funding LLC as administrative agent, ING Capital LLC as syndication agent, and other lenders party thereto. The senior credit facility consists of (i) a \$57.0 million term A loan that matures in March 2017, (ii) a \$79.5 million term B loan that matures in March 2018, and (iii) a \$11.0 million revolving credit facility that expires in March 2017, which had a borrowing capacity of \$9.6 million as of December 31, 2013. On June 28, 2012, we increased the amount of our borrowings under our term B loan by \$19.5 million. We may also request the lenders to increase the size of the term B loan or other term loans by up to an additional \$10.5 million at any time prior to March 19, 2014.

All borrowings under the credit agreement bear interest at a rate per annum equal to an applicable margin plus, at our option, either (i) a base rate determined by reference to the highest of (a) the prime rate published in the Wall Street Journal or another national publication, (b) the federal funds rate plus 0.5%, and (c) 2.5% or (ii) a London Interbank Offered Rate, or Libor, rate determined by reference to the highest of (a) a Libor rate published in Reuters or another

national publication and (b) 1.5%. The term A loan and the revolving credit facility have an applicable margin of 4.25% for base rate loans and 5.25% for Libor rate loans. The term B loan has an applicable margin of 4.75% for base rate loans and 5.75% for Libor rate loans. The minimum per annum interest rate that we are required to pay is 6.75% for the term A loan and revolving credit facility and 7.25% for the term B loan. Interest is due at the end of each month for base rate loans and at the end of each Libor period for Libor rate loans unless the Libor period is greater than 3 months, in which case interest is due at the last day of each 3-month interval of such Libor period.

Table of Contents

The credit agreement requires us to prepay the two term loans on a prorated basis and then to prepay the revolving credit facility under certain circumstances: (i) with 100% of the net cash proceeds of any asset sale or other disposition of assets by us or our subsidiaries where the net cash proceeds exceed \$1 million, (ii) with a percentage of our annual excess cash flow each year where such percentage ranges from 25%-75% depending on our total debt to EBITDA ratio reduced by any voluntary prepayments that are made on our term loans during the same period and (iii) with any net cash proceeds from a qualified initial public offering by us, less net proceeds applied to redeem any outstanding preferred equity or convertible debt, to pay a common shareholder dividend not to exceed \$20 million or, if we comply with an adjusted EBITDA ratio set forth in the agreement, to our cash balances in an amount not to exceed \$75 million. We applied the proceeds from our initial public offering to our cash balances.

We have to abide by certain negative covenants for our credit agreement, which limit the ability for our subsidiaries and us to:

- incur additional indebtedness;
- create or permit liens;
- pay dividends or other distributions to our equity holders;
- purchase or redeem certain equity interests of our equity holders, including any warrants, options and other security rights;
- pay management fees or similar fees to any of our equity holders;
- make any redemption, prepayment, defeasance, repurchase or any other payment with respect to any subordinated debt;
- consolidate or merge;
- sell assets, including the capital stock of our subsidiaries;
- enter into transactions with our affiliates;
- enter into different business lines; and
- make investments.

The credit agreement also requires us to meet certain financial covenants, including maintaining a fixed charge coverage ratio and a total debt to EBITDA ratio as such terms are defined in our credit agreement. These financial covenants are tested at the end of each quarter beginning on December 31, 2012. The table below further describes these financial covenants, as well as our status under these covenants as of December 31, 2013.

Financial Covenant	Covenant Requirement	Actual Ratio at December 31, 2013
Fixed charge coverage ratio (minimum)	1.20 to 1.0	2.60
Total debt to EBITDA ratio (maximum)	3.25 to 1.0	1.53

Contractual Obligations

The following summarizes our contractual obligations as of December 31, 2013:

Contractual Obligations	Payments Due by Period				
	Total	Less Than 1 Year	1-3 Years	3-5 Years	More Than 5 Years
Long-Term Debt Obligations	\$ 133,304	\$ 10,763	\$ 31,523	\$ 91,018	\$—
Interest Payments	34,467	9,446	23,584	1,437	—
Operating Lease Obligations	6,620	1,883	2,923	1,351	463
Purchase Obligations	7,163	6,825	338	—	—
Total	\$ 181,554	\$ 28,917	\$ 58,368	\$ 93,806	\$ 463

We entered into our new credit agreement on March 19, 2012 and amended it on June 28, 2012, with all (1) outstanding indebtedness under our prior loan facility paid in full. Long-term debt obligations and interest payments presented in this table relate solely to our new credit agreement, as amended.

Table of Contents

Adjusted EBITDA and Adjusted Net Income

To provide investors with additional information regarding our financial results, we have disclosed in the table below and within this report adjusted EBITDA and adjusted net income, both of which are non-GAAP financial measures. We have provided a reconciliation below of adjusted EBITDA to net income and adjusted net income to net income, the most directly comparable GAAP financial measure to these non-GAAP financial measures.

We have included adjusted EBITDA and adjusted net income in this report because they are key measures used by our management and board of directors to understand and evaluate our core operating performance and trends and to prepare and approve our annual budget. Accordingly, we believe that adjusted EBITDA and adjusted net income provide useful information to investors and analysts in understanding and evaluating our operating results in the same manner as our management and board of directors.

Our use of adjusted EBITDA and adjusted net income has limitations as an analytical tool, and you should not consider it in isolation or as a substitute for analysis of our results as reported under GAAP. Some of these limitations are:

although depreciation and amortization are non-cash charges, the assets being depreciated and amortized may have to be replaced in the future, and adjusted EBITDA does not reflect cash capital expenditure requirements for such replacements or for new capital expenditure requirements;

adjusted EBITDA does not reflect interest expense on our indebtedness;

adjusted EBITDA does not reflect changes in, or cash requirements for, our working capital needs;

adjusted EBITDA does not reflect tax payments;

adjusted EBITDA and adjusted net income do not reflect the potentially dilutive impact of equity-based compensation;

adjusted EBITDA and adjusted net income do not reflect the impact of certain non-operating expenses resulting from matters we do not consider to be indicative of our core operating performance; and

other companies may calculate adjusted EBITDA and adjusted net income differently than we do, which reduces its usefulness as a comparative measure.

Because of these limitations, you should consider adjusted EBITDA and adjusted net income alongside other financial performance measures, including net income and our other GAAP results.

The following tables present a reconciliation of adjusted EBITDA and adjusted net income for the years ended December 31, 2013, 2012 and 2011 to actual net income for these periods:

	Year Ended December 31,		
	2013	2012	2011
	(in thousands)		
Reconciliation of Adjusted EBITDA:			
Net income	\$36,339	\$22,951	\$12,372

Represents debt extinguishment costs comprised of approximately \$3.3 million of fees paid to lenders in (1) connection with our new credit facility and approximately \$0.3 million of unamortized debt issuance costs in connection with our old credit facility.

(2) Represents direct and incremental costs associated with the Company's secondary offerings in February and April 2013.

(3) Represents impairment expenses to write off the carrying amount of the trade name intangible asset due to the retirement of the Diversified Collection Services, Inc. trade name.

(4) Represents professional fees and settlement costs related to strategic corporate development activities and a \$1.2 million legal settlement in 2011.

(5) Represents expenses incurred under an advisory services agreement with Parthenon Capital Partners, which was terminated in April 2012 and the August 2012 expense of \$0.9 million associated with a payment to a financial advisor as part of the Company's initial public offering. See Note 11 "Related Party Transactions."

(6) Represents amortization of capitalized expenses related to the acquisition of Performant by an affiliate of Parthenon Capital Partners in 2004, and also an acquisition in the first quarter of 2012 to enhance our analytics capabilities.

(7) Represents amortization of capitalized financing costs related to debt offerings conducted in 2009, 2010 and 2012.

(8) Represents tax adjustments assuming a marginal tax rate of 40%.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements.

Recent Accounting Pronouncements

In December 2011, the Financial Accounting Standards Board, or FASB issued Accounting Standards Update (ASU) 2011-11, Balance Sheet (Topic 210), Disclosures about Offsetting Assets and Liabilities, updated by ASU 2013-01, Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities, which requires companies to disclose information about financial instruments that have been offset and related arrangements to enable users of the company's financial statements to understand the effect of those arrangements on the company's financial position. Companies will be required to provide both net (offset amounts) and gross information in the notes to the financial statements for relevant assets and liabilities that are offset. ASU 2011-11, as amended by ASU 2013-01, is effective for fiscal years, and interim periods within those years, beginning on or after January 1, 2013. The adoption of this guidance did not have a material effect on our consolidated financial statements.

In July 2012, FASB issued ASU No. 2012-02, Intangibles-Goodwill and Other (Topic 350): Testing Indefinite-Lived Intangible Assets for Impairment. This newly issued accounting standard allows an entity the option to first assess qualitative factors to determine whether it is necessary to perform a quantitative impairment test for indefinite-lived intangibles other than goodwill. Under that option, an entity would no longer be required to calculate the fair value of an indefinite-lived intangible asset unless the entity determines, based on that qualitative assessment, that it is more likely than not that the fair value of the indefinite-lived intangible asset is less than its carrying amount. This ASU is effective for annual and interim indefinite-lived intangible asset impairment tests performed for fiscal years beginning after September 15, 2012. Early adoption is permitted. The adoption of this guidance did not have a material effect on our consolidated financial statements.

In March 2013, FASB issued ASU No. 2013-04, Obligations Resulting from Joint and Several Liability Arrangements for which the Total Amount of the Obligation is Fixed at the Reporting Date, which addresses the recognition, measurement, and disclosure of certain joint and several obligations including debt arrangements, other contractual obligations, and settled litigation and judicial rulings. The ASU is effective for public entities for fiscal years, and interim periods within those years, beginning after December 15, 2013. The adoption of this guidance will not have a material effect on our consolidated financial statements.

ITEM 7A. Quantitative and Qualitative Disclosures about Market Risk

We do not hold or issue financial instruments for trading purposes. We conduct all of our business in U.S. currency and therefore do not have any direct foreign currency risk. We do have exposure to changes in interest rates with respect to the borrowings under our senior secured credit facility, which bear interest at a variable rate based on the prime rate or LIBOR. For example, if the interest rate on our borrowings increased 100 basis points (1%) from the credit facility floor of 1.5%, our annual interest expense would increase by approximately \$1.3 million. In July 2012, we entered into an interest rate cap agreement per the terms of our senior secured credit agreement. The interest rate cap agreement is effective beginning in October 2012, and matures in October 2014, with a total notional amount of \$75 million and a cap on LIBOR at 2.0%. If the LIBOR rate were to increase by 100 basis points (1.0%) above the credit facility floor of 1.5% for a year, we would receive a payment from the interest rate cap of approximately \$0.4 million.

While we currently hold our excess cash in an operating account, in the future we may invest all or a portion of our excess cash in short-term investments, including money market accounts, where returns may reflect current interest rates. As a result, market interest rate changes impact our interest expense and interest income. This impact will depend on variables such as the magnitude of interest rate changes and the level of our borrowings under our credit facility or excess cash balances.

ITEM 8. Financial Statements and Supplementary Data

Our consolidated financial statements and notes thereto and the reports of KPMG LLP are set forth in the Index to Financial Statements under Item 15, Exhibits, Financial Statement Schedules, and is incorporated herein by reference.

ITEM 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

ITEM 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We maintain a system of disclosure controls and procedures that are designed to ensure that information required to be disclosed in the Company's reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to management, including our Chief Executive Officer and the Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

Management, with the participation of our Chief Executive Officer and our Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures, as defined in Rule 13a-15(e) under the Exchange Act, as of the fiscal year covered by this Annual Report on Form 10-K. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were functioning effectively at the reasonable assurance level as of December 31, 2013.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of our consolidated financial statements for external purposes in accordance with United States Generally Accepted Accounting Principles ("US GAAP"). Under the supervision of, and with the participation of our Chief Executive Officer and Chief Financial Officer, management assessed the effectiveness of internal control over financial reporting as of December 31, 2013. Management based its assessment on criteria established in "Internal Control Integrated Framework" issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). Based on this evaluation, management concluded that its internal control over financial reporting was effective as of December 31, 2013.

Changes in Internal Control over Financial Reporting

There was no change in our internal control over financial reporting during the quarter ended December 31, 2013, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting, other than those noted above.

ITEM 9B. Other Information

None.

PART III

ITEM 10. Directors, Executive Officers and Corporate Governance

This Item is incorporated by reference to our definitive proxy statement on Schedule 14A, which will be filed within 120 days after the close of the fiscal year covered by this report on Form 10-K, or if our proxy statement is not filed by that date, will be included in an amendment to this Report on Form 10-K.

ITEM 11. Executive Compensation

This Item is incorporated by reference to our definitive proxy statement on Schedule 14A, which will be filed within 120 days after the close of the fiscal year covered by this report on Form 10-K, or if our proxy statement is not filed by that date, will be included in an amendment to this Report on Form 10-K.

ITEM 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

This Item is incorporated by reference to our definitive proxy statement on Schedule 14A, which will be filed within 120 days after the close of the fiscal year covered by this report on Form 10-K, or if our proxy statement is not filed by that date, will be included in an amendment to this Report on Form 10-K.

Report of Independent Registered Public Accounting Firm
The Board of Directors and Stockholders
Performant Financial Corporation

We have audited the accompanying consolidated balance sheets of Performant Financial Corporation and subsidiaries as of December 31, 2013 and 2012, and the related consolidated statements of operations, changes in redeemable preferred stock and stockholders' equity (deficit), and cash flows for each of the years in the three year period ended December 31, 2013. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Performant Financial Corporation and subsidiaries as of December 31, 2013 and 2012, and the results of their operations and their cash flows for each of the years in the three year period ended December 31, 2013, in conformity with U.S. generally accepted accounting principles.
