-

## Section 2 - Financial Information

### Item 2.05 Costs Associated with Exit or Disposal Activities.

On April 29, 2015, the Board of Directors of The Dow Chemical Company (“Dow” or the “Company”) approved actions to further streamline the organization and optimize the Company’s footprint as a result of the pending separation of a significant portion of Dow’s chlorine value chain. These actions, which will further accelerate Dow’s value growth and productivity targets, will result in a reduction of approximately 1,500 to 1,750 positions across a number of businesses and functions. In addition, the Company is also announcing additional adjustments to its asset footprint to enhance competitiveness, as described in Item 2.06 below. All of these actions are expected to be completed during the next two years.

The Company will record a charge in the second quarter of 2015 for costs associated with these activities. In total, these costs are expected to be in the range of \$200 million to \$230 million, and will consist of severance costs ranging from \$190 million to \$210 million and other associated costs, including environmental remediation costs, ranging from \$10 million to \$20 million.

All severance costs, environmental remediation costs and other costs associated with these activities will result in future cash expenditures.

The Company will involve local stakeholders as defined in each country and in compliance with relevant information and consultation processes.

### Item 2.06 Material Impairments.

On April 29, 2015, the Board of Directors of the Company approved actions to optimize facilities and respond to changing demand. As a result of these activities, the Company will record a charge in the second quarter of 2015 ranging from \$130 million to \$150 million for asset write-downs and write-offs.

The asset impairments related to manufacturing facilities represent less than one percent of the Company's net property value and include minor consolidation and shut downs of select small manufacturing facilities in response to changing market dynamics and to position the relevant businesses for long-term growth.

In addition, certain investments will be written down as a result of management’s strategic change to monetize and exit the Company’s Venture Capital portfolio.

None of the costs related to the write-down or write-off of assets will result in future cash expenditures.

The Company will involve local stakeholders as defined in each country and in compliance with relevant information and consultation processes.

## Section 8 - Other Events

### Item 8.01 Other Events.

The Company issued a press release on May 4, 2015, regarding the preceding items. The press release is included below in its entirety.

#### Dow Announces Actions to Streamline and Remove Stranded Costs In Advance of Dow Chlorine Products Transaction

MIDLAND, Mich. - May 4, 2015 - The Dow Chemical Company (NYSE: DOW) today announced a series of actions to further streamline the organization and optimize its footprint as a result of the Company's pending separation of a significant portion of its chlorine value chain.

Dow has shifted its portfolio toward targeted, integrated high-value markets, and as a result the Company is taking additional actions to further enhance its organizational effectiveness - with a focus on driving geographic market engagement coupled with global efficiency - to deliver maximum value from its growth investments.

The actions will further accelerate Dow's value growth and productivity targets, and will result in a reduction of approximately 1,500 - 1,750 positions, or approximately 3 percent of the global workforce. In parallel, the Company is also announcing additional minor adjustments to its asset footprint to enhance competitiveness.

The Company will take charges totaling approximately \$330 million - \$380 million in the second quarter of 2015 for asset impairments, severance and other costs related to these measures, which are expected to be completed during the next two years. Once fully implemented, these actions are expected to result in approximately \$300 million of annual operating cost savings.

"At our Investor Day last fall, we committed to a new, three-year \$1 billion productivity drive. Our productivity efforts continue to center on cost-out actions and doing more with the resources we have in place, all to enable higher earnings," said Howard Ungerleider, Dow's chief financial officer. "We executed against each of our financial, operational and strategic objectives again in the first quarter, and today's announcement illustrates our ongoing commitment to the consistent implementation of our strategy moving forward and proactively addresses any stranded costs from the divestment of Dow Chlorine Products."

In parallel, minor asset footprint adjustments will be made to select manufacturing facilities. The facilities impacted represent less than one percent of the Company's net property value and include minor consolidation and shut downs in response to changing market dynamics and to position the relevant businesses for long-term growth.

The Company will involve local stakeholders as defined in each country and in compliance with relevant information and consultation processes.
