- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item 1.04 Mine Safety - Reporting of Shutdowns and Patterns of Violations.

On September 18, 2014, Connolly-Pacific Co., an indirect subsidiary of MDU Resources Group, Inc., received a written imminent danger order issued by the Mine Safety and Health Administration (“MSHA”) under section 107(a) of the Federal Mine Safety and Health Act of 1977 (the “Act”) at the Pebbly Beach Quarry on Catalina Island, California.

The imminent danger order was issued following observation of two miners not wearing fall protection on September 4, 2014. The miners were repairing a water line approximately 3 feet over the edge of a slope, which was located at the entrance road of the mine. The slope is approximately 32.8 degrees and 40 feet high. Upon observation, MSHA withdrew the miners from the slope pursuant to section 107(a) of the Act. The miners vacated the slope immediately and will utilize adequate fall protection when making further repairs to the damaged water line.
