Number 01/06

BHP BILLITON PRODUCTION REPORT FOR THE QUARTER ENDED 31 DECEMBER 2005

BHP Billiton today released its production report for the quarter ended 31 December 2005. Throughout this report,

unless otherwise stated, production volumes refer to BHP Billiton share.

- Record half year production of aluminium, copper, nickel and LNG supported by strong market conditions.
- Half year production of copper up 24% and nickel up 137% following the acquisition of WMC in June 2005.
- Escondida (Chile) achieved third consecutive quarter of record copper production.
- Increased production at Western Australian Iron Ore (Australia) following weather and derailment interruptions last quarter.

	DEC	DEC	DEC	DEC	DEC Q05
	2005	2005	vs	vs	vs
PETROLEUM	HALF	QTR	DEC	DEC	SEPT
			H04	Q04	Q05
Crude Oil & Condensate ('000 bbl)	23,434	11,200	-3%	-8%	-8%
Natural Gas (bcf)	184.00	86.35	12%	-1%	-12%
Total Petroleum Products (million boe)	59.31	27.93	3%	-5%	-11%

#### Total Petroleum Products -

Total production for the December 2005 half year increased against the half year ended December 2004. This primarily reflects increased production from Minerva (Australia), Angostura (Trinidad & Tobago), Mad Dog (USA), all commissioned in January 2005 and ROD (Algeria), commissioned in October 2004. This was offset by natural field decline at Bass Strait (Australia) and Liverpool Bay (UK), the sale of our interests in Laminaria (Australia) in January 2005, and hurricane related disruptions in the Gulf of Mexico.

#### Crude Oil and Condensate -

Production for the December 2005 quarter was impacted by the loss of production from the Typhoon/Boris facility (USA) due to hurricane damage, natural field decline at Bass Strait and Liverpool Bay, the sale of our interests in Laminaria in January 2005 and unscheduled well downtime at North West Shelf. Offsetting this was increased production following the commissioning of Angostura and Mad Dog, both in January 2005 and ROD in October 2004.

Production was lower than the September 2005 quarter due to the timing of recognition of production entitlements and planned maintenance at ROD, loss of production from the Typhoon / Boris facility and a scheduled annual shut-down at North West Shelf.

#### Natural Gas -

Production for the December 2005 quarter was in line with the December 2004 quarter.

Production for the December 2005 quarter was lower than the September 2005 quarter due to lower seasonal demand for Bass Strait gas, partly offset by higher seasonal demand for Liverpool Bay gas and North West Shelf LNG. Minerva gas production decreased during the quarter primarily as a result of scheduled maintenance.

Edgar Filing: BHP BILLITON LTD - Form 6-K

	DEC	DEC	DEC H05	DEC Q05	DEC Q05
	2005	2005	vs	vs	vs
ALUMINIUM	HALF	QTR	DEC H04	DEC Q04	SEPT Q05
Alumina ('000 tonnes)	2,040	1,012	0%	-2%	-2%
Aluminium ('000 tonnes)	678	344	0%	2%	3%

Alumina -

Production for the half year and quarter ended December 2005 was in line with all comparative periods.

Aluminium

- Record production was achieved for the half year ended December 2005. Mozal (Mozambique) and Hillside (South Africa) continue to deliver strong production, both achieving quarterly and half yearly records. Bayside (South Africa) returned to full operating capacity during the quarter following a potline outage in April 2005.

	DEC	DEC	DEC H05	DEC Q05	DEC Q05
	2005	2005	vs	vs	vs
BASE METALS	HALF	QTR	DEC H04	DEC Q04	SEPT Q05
Copper ('000 tonnes)	637.3	328.4	24%	24%	6%
Silver ('000 ounces)	25,228	13,866	5%	12%	22%
Lead (tonnes)	142,060	77,187	4%	8%	19%
Uranium Oxide Concentrate (tonnes)	2,158	1,070	n/a	n/a	-2%

Copper -

Production for the December 2005 half year was a record 637,300 tonnes, 24% higher than the December 2004 half year, reflecting improved performance at Escondida and inclusion of a full six months of production from Olympic Dam (Australia).

Escondida achieved its third consecutive quarter of record production due to increased mill throughput, the commissioning of Norte and higher head grades. Increased mill throughput and higher head grades also led to record quarterly production at Antamina (Peru) and higher production at Olympic Dam. Production from Cerro Colorado (Chile) continued to ramp up to near full operational capacity following an earthquake in June 2005.

Silver -

Production was higher in the December 2005 half year primarily due to record production at Escondida reflecting increased throughput, inclusion of six months of production from Olympic Dam and improved mill throughput at Cannington (Australia).

Edgar Filing: BHP BILLITON LTD - Form 6-K

December 2005 quarterly production was higher than the September 2005 quarter as a result of improved mill throughput at Cannington compared to the previous period and record quarterly production at Antamina.

Lead -

December 2005 half year and quarterly production increased as a result of improved mill throughput at Cannington.

Uranium Oxide Concentrate -

Production in the December 2005 quarter was in line with the September 2005 quarter.

	DEC	DEC	DEC	DEC	DEC Q05
	2005	2005	vs	vs	vs
CARBON STEEL MATERIALS	HALF	QTR	DEC	DEC	SEPT
			H04	Q04	Q05
Iron ore ('000 tonnes)	48,211	24,610	2%	-1%	4%
Metallurgical Coal ('000 tonnes)	17,959	8,973	-5%	-7%	0%
Manganese Ores ('000 tonnes)	2,665	1,278	-3%	-6%	-8%
Manganese Alloys ('000 tonnes)	304	165	-24%	-20%	19%

Iron Ore -

December 2005 half year and quarterly production was in line with the December 2004 comparative periods.

Production was higher in the December 2005 quarter than the September 2005 quarter following the impact of heavy rainfall and a derailment in the previous quarter. This was partly offset by the impact of Rapid Growth Project 2 tie-in activity during the December 2005 quarter.

Metallurgical Coal -

Production for the half year and quarter ended December 2005 was lower than the half year and quarter ended December 2004. This primarily reflects reduced production at Queensland Coal (Australia) due to the depletion of reserves at Riverside, scheduled dragline outages at South Walker Creek and Saraji and increased maintenance at Blackwater. This was offset by the continued ramp up of Broadmeadow (Australia), commissioned in August 2005. Illawarra Coal (Australia) delivered strong production during the quarter with the ramp up of Dendrobium, which was commissioned in April 2005.

Production for the December 2005 quarter was in line with the September 2005 quarter.

Manganese ore -

Production for the December 2005 half year and quarter was lower than all comparative periods as a result of lower market demand.

Manganese alloys -

Edgar Filing: BHP BILLITON LTD - Form 6-K

December 2005 half year and quarterly production decreased compared to the December 2004 comparative periods primarily reflecting lower market demand.

December 2005 quarterly production was higher than the September 2005 quarter due to scheduled maintenance at Metalloys (South Africa) in the previous period.

	DEC	DEC	DEC H05	DEC Q05	DEC Q05
	2005	2005	vs	vs	vs
DIAMONDS & SPECIALTY PRODUCTS	HALF	QTR	DEC H04	DEC Q04	SEPT Q05
Diamonds ('000 carats)	1,466	614	-21%	-30%	-28%
Fertiliser ('000 tonnes)	497.5	252.6	n/a	n/a	3%

Diamonds -

Carat production decreased in the half year ended December 2005 primarily reflecting the processing of lower grade ore at Ekati (Canada).

December 2005 quarterly production was lower than the September 2005 quarter as a result of reduced throughput and lower grade following changed ore sources within the mine.

Fertiliser -

Record half year and quarterly production was achieved at Southern Cross Fertiliser Operations resulting from increased operating efficiency.

	DEC	DEC	DEC H05	DEC Q05	DEC Q05
	2005	2005	vs	vs	vs
ENERGY COAL	HALF	QTR	DEC H04	DEC Q04	SEPT Q05
Energy Coal ('000 tonnes)	45,297	21,287	1%	0%	-11%

Energy Coal -

Production for the half year ended December 2005 was in line with the December 2004 half year.

Production for the December 2005 quarter was lower than the September 2005 quarter, primarily reflecting lower seasonal demand for Ingwe (South Africa) domestic coal, return to normal longwall geological conditions at San Juan Coal (USA)

following a record quarter in September 2005 due to unusually favourable conditions, and reduced yields and equipment availability combined with increased strip ratios at Hunter Valley Coal (Australia).

	DEC	DEC	DEC H05	DEC Q05	DEC Q05
	2005	2005	vs	vs	vs
STAINLESS STEEL MATERIALS	HALF	QTR	DEC H04	DEC Q04	

					SEPT Q05
Nickel ('000 tonnes)	93.1	49.0	137%	149%	11%

## Nickel

- Record production for the half year ended December 2005 primarily reflects inclusion of a full six months of production from Nickel West.

Production for the December 2005 quarter was higher than the September 2005 quarter as a result of higher production at Nickel West due to improved alignment of concentrate availability with smelter uptime. This was partly offset by increased maintenance and the continuing impact of expansion tie-ins at Yabulu (Australia).
