ITEM 7. EXHIBITS

EXHIBIT 99.1 CONTRACT STATUS SUMMARY AT MARCH 14, 2002

ITEM 9. REGULATION FD DISCLOSURE

As previously reported, the RICHMOND was moved to a dockside location in February 2002 to undergo some general maintenance, painting and required inspections. After completing certain inspections, the Company has increased the scope of work on the rig which could take until the end of April to complete. The Company will incur approximately \$1 million of additional cost in the quarter relating to the work being performed on the RICHMOND. Contract opportunities for the rig immediately following the completion of the work planned for the dockside period are being pursued.

The ATWOOD EAGLE continues to work under its one-well program in Sicily which is currently expected to extend into April 2002. Upon completion of this

Edgar Filing: ATWOOD OCEANICS INC - Form 8-K

commitment, the rig will be immediately moved to a shipyard in Greece to commence its \$90 million upgrade.

The ATWOOD FALCON continues its work in the Philippines, which is currently expected to extend into April 2002. Upon completion of this commitment, the rig will be moved to Malaysia to commence its firm five-well plus options contract.

The ATWOOD SOUTHERN CROSS should complete its current drilling program in Egypt by the end of March, at which time it will commence drilling a one-well program in Egypt at a dayrate of \$55,000. The Company is continuing with its planning to move the ATWOOD SOUTHERN CROSS to Israel to commence a four to five month drilling program following completion of its commitments in Egypt with dayrates of \$69,000 for the firm wells and \$74,000 for an option well. The Company continues to monitor the ongoing situation in Israel, in particular, and the Middle East, in general for any future developments which could negatively affect future operations.

The current consensus estimate of diluted earnings per share for the Company's fiscal 2002 second quarter is \$.48. With the additional expense to be incurred in the quarter relating to the current ongoing work on the Richmond, the Company feels more comfortable with an estimated diluted earnings per share of \$.45 for the quarter ending March 31, 2002.

Additional information with respect to the Company's contract status summary at March 14, 2002 is attached hereto as Exhibit 99.1 which is being furnished in accordance with Rule 101 (e) (1) under Regulation FD and should not be deemed to be filed.

Statements contained in this report with respect to the future are forward-looking statements. These statements reflect management's reasonable judgment with respect to future events. Forward-looking statements involve risks and uncertainties. Actual results could differ materially from those anticipated as a result of various factors; the Company's dependence on the oil and gas industry; the risks involved in upgrade to the Company's rigs; competition; operating risks; risks involved in foreign operations; risks associated with possible disruption in operations due to terrorism; and governmental regulations and environmental matters. A list of additional risk factors can be found in the Company's annual report on Form 10-K for the year ended September 30, 2001, filed with the Securities and Exchange Commission.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.
