PUMATECH, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 1 BASIS OF PRESENTATION

The accompanying condensed consolidated financial statements of Pumatech, Inc. (Pumatech or the Company) for the three and six months ended January 31, 2001 and 2000 are unaudited and reflect all normal recurring adjustments which are, in the opinion of management, necessary for their fair presentation. These condensed consolidated financial statements should be read in conjunction with the Company's consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended July 31, 2000. The condensed consolidated balance sheet as of July 31, 2000 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. Certain prior period amounts have been reclassified to conform to the current period's presentation. The results of operations for the interim period ended January 31, 2001 are not necessarily indicative of results to be expected for the full year.

The accompanying condensed consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries, including the company formerly known as NetMind Technologies, Inc. (NetMind) that merged with and into a wholly-owned subsidiary of Pumatech on February 24, 2000 in a pooling of interests transaction. All periods presented have been restated in order to include the financial results of NetMind since inception. All significant inter-company accounts and transactions have been eliminated.

Prior to the acquisition, NetMind's fiscal year ended on December 31. The condensed consolidated financial statements for the three and six months ended January 31, 2001 and 2000 reflect the results of operations of Pumatech combined with the results of operations of NetMind for the corresponding periods.

NOTE 2 RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

In June 1998, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 133, "Accounting for Derivative Instruments and Hedging Activities," which establishes accounting and reporting standards for derivative instruments and hedging activities. SFAS 133 was amended by SFAS 138 in June 2000. SFAS 133 and 138 require that an entity recognize all derivatives as either assets or liabilities on the balance sheet and measure those instruments at fair value. The Company adopted these statements on August 1, 2000. Since the Company does not engage in hedging activities and does not buy or sell derivative instruments, the adoption of SFAS 133 and 138 had no impact on the consolidated financial statements.

Edgar Filing: PUMATECH INC - Form 10-Q

REVENUE RECOGNITION AND FINANCIAL STATEMENTS

In December 1999, the Securities and Exchange Commission (SEC) issued SEC Staff Accounting Bulletin (SAB) No. 101, "Revenue Recognition in Financial Statements." SAB 101 summarized certain of the SEC's views in applying generally accepted accounting principles to revenue recognition in financial statements. SAB 101 must be implemented by the Company no later than its fourth quarter of

5

fiscal 2001. The Company is reviewing the requirements of SAB 101 and currently believes that its revenue recognition policy is consistent with the guidance of SAB 101.

ACCOUNTING FOR CERTAIN SALES INCENTIVES

In May 2000, the Emerging Issues Task Force Issue (EITF) released issue No. 00-14 "Accounting for Certain Sales Incentives," which provides guidance on the accounting for certain sales incentives offered by companies to their customers such as discounts, coupons and rebates on products or services. EITF 00-14 became effective for all fiscal quarters beginning after May 18, 2000 and addresses the recognition, measurement and income statement classification for sales incentives offered voluntarily by a vendor without charge to customers that can be used in, or that are exercisable by a customer as a result of a single exchange transaction. The provisions of EITF 00-14 require the Company to classify free product and service incentives delivered to customers at the time of sale as cost of sales in its consolidated statement of operations. The application of EITF 00-14 did not have a material impact on the Company's financial position or results of operations.

ACCOUNTING FOR SHIPPING AND HANDLING FEES AND COSTS

In August 2000, the EITF released issue No. 00-10, "Accounting for Shipping and Handling Fees and Costs." EITF 00-10 addresses the income statement classification of amounts billed to a customer for shipping and handling costs as well as the classification of amounts incurred for shipping and handling costs. The EITF concluded that amounts billed to customers in sales transactions related to shipping and handling should be classified as revenue, and any costs incurred should be classified as cost of goods sold or, in general, as operating expense. If shipping and handling costs incurred are not included in cost of goods sold, the amount of such costs and the line item on the statement of operations which includes those costs should be disclosed. The Company has adopted EITF 00-10. The application of EITF 00-10 did not have a material impact on the Company's financial position or results of operations.

NOTE 3 BALANCE SHEET COMPONENTS

Inventories, net, consist of the following:

	JANUARY 31, 2001	JULY 31, 2000
	-----	-----

		=====	=====

Additions to intangible assets arose from the asset acquisitions of The Windward Group and SwiftTouch Corporation. See Note 8 for more information on the acquisitions. Additions to goodwill also include adjustment of \$46,000 to goodwill relating to acquisition of Dry Creek Software in fiscal 2000.

Edgar Filing: PUMATECH INC - Form 10-Q

NOTE 4 LONG-TERM INVESTMENTS

The Company is a limited partner in a venture capital fund and also invests directly for business and strategic purposes in equity instruments of privately-held companies, which include a number of its strategic partners who are both customers and vendors. These investments are included in other long-term assets and are accounted for under the cost method as none of the investments represents over 5% ownership in the respective companies, and the Company does not have the ability to exercise significant influence over operations. These investments consist of the following (in thousands):

	January 31, 2001	July 31, 2000
	-----	-----
Azure Venture Partners, L.L.P.....	\$2,250	\$1,250
YadaYada, Inc. (fka Free Communications, Inc.).....	750	750
If & Then, Inc.....	330	330
PulseMD Corporation (fka 7th Street, Inc.).....	100	100
Others.....	2	2
	-----	-----
Long-term investments.....	\$3,432	\$2,432
	-----	-----

The Company regularly reviews the assumptions underlying the operating performance and cash flow forecasts of its investees in assessing the carrying values of the investments. The Company identifies

7

and records impairment losses when events and circumstances indicate that such assets might be impaired. To date, no such impairment has been recorded.

NOTE 5 NET INCOME (LOSS) PER SHARE

Basic net income (loss) per share is computed by dividing net income (loss) available to common stockholders by the weighted average number of common shares outstanding for the period. Diluted net income (loss) per share is computed by dividing net income (loss) by the weighted average number of dilutive potential common shares that were outstanding during the period. Diluted weighted average shares reflect the dilutive effect, if any, of common stock options based on the treasury stock method.

Basic and diluted net loss per share were calculated as follows during the three and six months ended January 31, 2001 and 2000, respectively:

	THREE MONTHS ENDED JANUARY 31,	
	-----	-----
(IN THOUSANDS, EXCEPT PER SHARE AMOUNTS)	2001	2000
	-----	-----
NUMERATOR:		
Net loss attributable to common stockholders	\$ (6,572)	\$ (4,050)
	=====	=====

Edgar Filing: PUMATECH INC - Form 10-Q

DENOMINATOR:

Weighted average shares outstanding used to compute basic and diluted net loss per common share	43,658 =====	36,114 =====	
Basic and diluted net loss per share	\$ (0.15) =====	\$ (0.11) =====	\$ =====

All common shares that were held in escrow, totaling approximately 140,000 as of January 31, 2001, were excluded from basic and diluted net loss per share calculations. See Note 8 for more information on common shares held in escrow.

Potential common shares attributable to mandatorily redeemable preferred stock, stock options, and warrants of 5,163,066 and 10,253,794 were outstanding at January 31, 2001 and 2000, respectively. However, as a result of a net loss incurred by the Company in the three and six months ended January 31, 2001 and 2000, the corresponding weighted average outstanding shares (using the treasury stock method) were antidilutive and were excluded from net loss per share calculations.

8

NOTE 6 COMPREHENSIVE INCOME / (LOSS)

Accumulated other comprehensive income (loss) on the condensed consolidated balance sheets consists of unrealized gains (losses) on available for sale investments and foreign currency translation adjustments. Total comprehensive loss for the three and six months ended January 31, 2001 and 2000, respectively, is presented in the following table:

(IN THOUSANDS)	THREE MONTHS ENDED JANUARY 31,		S
	2001	2000	
Net loss	\$ (6,572)	\$ (2,285)	\$ (11)
Other comprehensive income/(loss):			
Change in unrealized gain/(loss) on investments	119	(616)	
Change in currency translation adjustments	(32)	(31)	
Total other comprehensive income/(loss)	87	(647)	
Total comprehensive loss	\$ (6,485) =====	\$ (2,932) =====	\$ (11) =====

The balance of unrealized gain/loss on investments at January 31, 2001 consisted of unrealized gain/loss for our holdings of Amazon.com common stock and government bonds. The balance of unrealized gain/loss on investments at January 31, 2000 consisted entirely of unrealized gain/loss for our holdings of Amazon.com common stock.

Edgar Filing: PUMATECH INC - Form 10-Q

NOTE 7 PURCHASED IN-PROCESS RESEARCH AND DEVELOPMENT

The Company expensed purchased in-process research and development costs of \$4,218,000 as a result of the ProxiNet, Inc. (ProxiNet) acquisition in the first quarter of fiscal 2000.

The ProxiNet acquisition has been accounted for as a purchase. The total purchase price of approximately \$17,384,000 was assigned, based on an independent appraisal, to the fair value of the assets acquired, including the following (in thousands):

Tangible assets, net, acquired.....	\$ 676
In-process research and development.....	4,218
Core technology.....	3,092
Acquired workforce-in-place.....	286
Goodwill.....	9,112

	\$17,384
	=====

As of the acquisition date, technological feasibility of the in-process technology had not been established and the technology had no alternative future use. Therefore, the Company expensed the in-process research and development in the first quarter of fiscal year 2000. The remaining intangible assets are being amortized using the straight-line method over the estimated useful life of the assets ranging from 18 months to 5 years.

The value assigned to this acquired in-process research and development was determined by identifying research projects in areas for which technological feasibility had not been established as of the acquisition date. These include projects for ProxiWare(TM) and ProxiWeb(TM) technology. The value was

9

determined by estimating the revenue contribution and the percentage of completion of each of these projects. The projects were deemed to be 55% complete on the date of acquisition. The net cash flows were then discounted utilizing a weighted average cost of capital of 27.5%, which, among other related assumptions, we believe to be fairly accurate. This discount rate takes into consideration the inherent uncertainties surrounding the successful development of the in-process research and development, the expected profitability levels of such technology, and the uncertainty of technological advances that could potentially impact the estimates described above. Revenues were projected to be generated in fiscal 2000 for the products in development at the acquisition date.

To date, actual results have been consistent, in all material respects, with our assumptions at the time of the acquisition. The assumptions primarily consist of an expected completion date for the in-process projects, estimated costs to complete the projects, and revenue and expense projections once the products have entered the market. The projects for ProxiWare and ProxiWeb technology that is currently branded as the Browse-it(TM) product were completed, as expected, in the fourth quarter of fiscal 2000 and are now generating revenue. Failure to achieve the expected levels of revenue and net income from this product during its entire life cycle will negatively impact the return on investment expected

Edgar Filing: PUMATECH INC - Form 10-Q

at the time that the acquisition was completed and potentially result in impairment of any other assets related to the development activities.

NOTE 8 ACQUISITIONS

THE WINDWARD GROUP

In October 2000, the Company signed and closed an asset purchase agreement with Vanteon Corporation (Vanteon), of Rochester, New York to acquire certain assets and assume certain liabilities of The Windward Group (Windward), a wholly owned subsidiary of Vanteon headquartered in Los Gatos, California. Windward is a professional services company specializing in creating consumer and enterprise solutions that combine mobile, wireless, desktop, Internet and database technology. The condensed consolidated financial statements include the results of operations of Windward since the date of acquisition. Under the terms of the agreement, we paid \$12,250,000 in cash and placed 171,026 shares of Pumatech common stock in escrow. These shares will be valued upon issuance from escrow based on the fair value of the common stock on that date and as a result, the amount of goodwill arising from the transaction will increase. The shares will be released in equal installments to Vanteon based on the achievement of quarterly performance milestones through the first quarter of fiscal 2002. The performance milestones set for the second quarter of fiscal year 2001 were met and therefore 42,757 shares, valued at approximately \$204,000, were released for the quarter ending January 31, 2001. The agreement also provided for a rent reimbursement from Vanteon for the Los Gatos facility over the remaining term of the related lease which has been assumed by the Company. \$611,000, representing the present value of the rent reimbursement, was treated as a reduction of the purchase price.

The Windward acquisition has been accounted for as a purchase. The total purchase price of approximately \$12,234,000 (including liabilities of \$191,000, acquisition costs of \$200,000, and newly released shares from escrow of \$204,000) was assigned to the fair value of net assets acquired, including the following (in thousands):

Tangible assets, net, acquired.....	\$ 406
Existing contracts.....	200
Acquired workforce-in-place.....	1,281
Goodwill.....	10,347

	\$ 12,234
	=====

10

The intangible assets acquired are being amortized using the straight-line method over the estimated useful life of the assets. The estimated useful life of the existing contracts is the remaining term of the respective contracts ranging from one to four months. The useful life of the acquired workforce-in-place and goodwill is estimated to be 18 months and 5 years, respectively.

The following unaudited pro-forma consolidated financial information reflects the results of operations for the three and six months ended January 31, 2001 and 2000, as if the acquisition of Windward had occurred on August 1, 1999 and after giving effect to purchase accounting adjustments. These pro-forma results have been prepared for comparative purposes only and do not purport to be

Edgar Filing: PUMATECH INC - Form 10-Q

indicative of what operating results would have been had the acquisition actually taken place on August 1, 1999. In addition, these results are not intended to be a projection of future results and do not reflect any synergies that might be achieved from the combined operations.

	THREE MONTHS ENDED JANUARY 31,	
	2001	2000
		(IN THOUSANDS,
Pro-forma revenue.....	\$ 11,311	\$ 9,476
Pro-forma net loss.....	\$ (6,582)	\$ (5,149)
Pro-forma basic and diluted net loss per share.....	\$ (0.15)	\$ (0.14)

SWIFTOUCH CORPORATION

In November 2000, the Company signed and closed a definitive agreement to acquire certain assets of SwiftTouch Corporation (SwiftTouch) of Bedford, Massachusetts, a provider of Web-based Universal Access Solutions. The condensed consolidated financial statements include the results of operations of SwiftTouch since the date of acquisition. Under the terms of the agreement, the Company paid \$320,000 in cash and issued 100,000 shares of the Company's common stock, 12,000 of which were held in escrow to be released in fiscal 2002. The shares were valued at approximately \$1,368,000, using the average price of the Company's common stock, net of a 2.5% discount, for the period ending around the date of acquisition.

The SwiftTouch acquisition has been accounted for as a purchase. The total purchase price of approximately \$1,688,000 was assigned to the fair value of the assets acquired, including the following (in thousands):

Tangible assets acquired.....	\$ 20
Developed technology.....	1,518
Acquired workforce-in-place.....	50
Goodwill.....	100

	\$ 1,688
	=====

The intangible assets acquired are being amortized using the straight-line method over the estimated useful life of the assets ranging from 18 months to 5 years.

Pro forma results of operations have not been presented because the effect of the acquisition was not material to the Company's financial position or results of operations.

NOTE 9 BUSINESS SEGMENTS

Operating segments are identified as components of an enterprise about which separate discrete financial information is available that is evaluated by the

Edgar Filing: PUMATECH INC - Form 10-Q

chief operating decision maker or decision-making group to make decisions about how to allocate resources and assess performance. The Company's chief operating decision maker is the chief executive officer. To date the Company has reviewed its operations principally in a single segment. The chief operating decision maker assesses performance based on the gross profit generated by this segment.

The Company operates in a single industry segment encompassing the development, marketing and support of mobile data exchange software. The Company markets its products to customers primarily in North America, Asia and Europe. The Company's customer base consists primarily of corporate organizations, business development organizations, industry associations, resellers, international system integrators, large OEMs in the PC market and selected distributors in North America, Africa, Asia, Australia, Europe, New Zealand and South America which primarily market to the retail channel.

Revenue information by geographic region is as follows:

	THREE MONTHS ENDED JANUARY 31,	
	2001	2000
	(IN THOUSANDS)	
North America.....	\$ 9,336	\$ 5,477
Japan.....	1,461	1,517
Other International.....	514	367
Total revenue.....	\$ 11,311	\$ 7,361

Substantially all of the Company's long-lived assets are in the United States.

Revenue information by product family is as follows:

	THREE MONTHS ENDED JANUARY 31,	
	2001	2000
	(IN THOUSANDS)	
Notebook royalty revenues.....	\$ 603	\$ 1,153
Enterprise.....	5,511	3,352
MAP.....	3,140	2,053
Service.....	2,057	803
Total revenue.....	\$ 11,311	\$ 7,361

NOTE 10 STOCK OPTION CANCELLATION/REGRANT

In January 2001, the Company's compensation committee approved a proposal to offer its employees, officers and directors the opportunity to cancel stock options granted to them between December 1999 and October 2000 for an equal

Edgar Filing: PUMATECH INC - Form 10-Q

number of new options to be granted in the future, on a date at least six months after the date of cancellation of the original options. The company's compensation committee determined that existing options eligible under the terms of the proposal no longer have sufficient value to motivate and retain employees in a tight labor market.

12

The exercise price of the new options will be 85% of the market price on July 30, 2001, the date of the new grant. The new grants will have the same terms, vesting start date and vesting schedule as those cancelled. In order to receive the new options, the employees must remain employed by the Company until the new grant date.

Holders of options exercisable for approximately 3,358,000 shares with exercise prices of \$15 or greater were given the opportunity to cancel their options and holders of options exercisable for approximately 2,846,000 million shares elected to cancel their options. The cancelled options had exercise prices ranging from \$18.31 to \$83.50, with a weighted average exercise price of \$31.93. The cancelled options had been granted under the Puma Technology, Inc. Amended and Restated 1993 Plan, NetMind Technologies, Inc. 1997 Stock Plan and the Puma Technology, Inc. 2000 Supplemental Stock Option Plan.

In connection with the regrant, the Company expects to incur a stock compensation charge upon the reissuance of the options in the amount equal to the 15% subsidy or the difference between the exercise price of the new options and the market value of the underlying shares at July 30, 2001. The portion of the charge relating to options that are deemed vested as of July 31, 2001 will be expensed in the fourth quarter of fiscal 2001. The rest of the charge will be amortized over the remaining vesting period. In addition, stock compensation charges for 4,000 of the new options are expected to be subjected to variable plan accounting until their expiration or exercise.

13

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

THE FOLLOWING INFORMATION SHOULD BE READ IN CONJUNCTION WITH THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS AND THE NOTES THERETO CONTAINED ELSEWHERE IN THIS FORM 10-Q AND IN CONJUNCTION WITH THE CONSOLIDATED FINANCIAL STATEMENTS AND MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS IN OUR FORM 10-K. THIS QUARTERLY REPORT ON FORM 10-Q, AND IN PARTICULAR MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, CONTAINS FORWARD-LOOKING STATEMENTS REGARDING FUTURE EVENTS OR OUR FUTURE PERFORMANCE THAT INVOLVE CERTAIN RISKS AND UNCERTAINTIES INCLUDING THOSE DISCUSSED IN "FACTORS THAT MAY AFFECT FUTURE OPERATING RESULTS" BELOW. IN THIS FORM 10-Q, THE WORDS "ANTICIPATES", "BELIEVES", "EXPECTS", "INTENDS", "FUTURE" AND SIMILAR EXPRESSIONS IDENTIFY FORWARD-LOOKING STATEMENTS. ALL STATEMENTS THAT ADDRESS OPERATING PERFORMANCE, EVENTS OR DEVELOPMENTS THAT WE EXPECT OR ANTICIPATE WILL OCCUR IN THE FUTURE, INCLUDING STATEMENTS RELATING TO PLANNED PRODUCT RELEASES AND COMPOSITION OF REVENUE, BOTH IN TERMS OF SEGMENT

Edgar Filing: PUMATECH INC - Form 10-Q

AND GEOGRAPHICAL SOURCE, ARE FORWARD-LOOKING STATEMENTS. SUCH FORWARD-LOOKING STATEMENTS ARE BASED ON MANAGEMENT'S CURRENT VIEWS AND ASSUMPTIONS REGARDING FUTURE EVENTS AND OPERATING PERFORMANCE, AND SPEAK ONLY AS OF THE DATE HEREOF. WE UNDERTAKE NO OBLIGATION TO PUBLICLY UPDATE OR REVISE ANY FORWARD-LOOKING STATEMENTS WHETHER AS A RESULT OF NEW INFORMATION, FUTURE EVENTS OR OTHERWISE. ACTUAL EVENTS OR OUR ACTUAL FUTURE RESULTS MAY DIFFER MATERIALLY FROM ANY FORWARD LOOKING STATEMENTS DUE TO THE RISKS AND UNCERTAINTIES OUTLINED BELOW.

Management's discussion and analysis includes:

- Business overview.
- A comparison of our results of operations in the three and six months ended January 31, 2001 with the results in the corresponding period in fiscal 2000.
- A discussion of our operating liquidity and capital resources.
- A discussion of factors that may affect our future operating results.

BUSINESS OVERVIEW

Pumatech, Inc. (Pumatech or the Company) was incorporated in California in August 1993 and reincorporated in Delaware in November 1996 under the name Puma Technology, Inc. The Company changed its corporate name to Pumatech, Inc. in December 2000. We develop, market and support synchronization, change detection/notification, and Web rendering/browsing software that enables consumers, mobile professionals and information technology officers to harness the full capabilities of handheld organizers/computers, Web-enabled-cellular phones, pagers and other wireless/wireline personal communications platforms. We provide a mobile solution that addresses several scenarios for synchronization, complete customization of device-based applications, centralized backup, security, information flow control, notification, e-commerce and browsing of intranet and Internet-based information. Our software is designed to improve the productivity of business professionals and corporations who are increasingly relying on mobile computing devices to address their growing needs for accessible, up-to-date information, whether in or out of the office. Our product families, which include Intellisync(R), Intellisync Anywhere(R), Satellite Forms (R), Browse-it(TM), Mind-it(TM) and Sync-it(TM) software, are designed to connect mobile devices to essential information anytime, anywhere. The Intellisync platform lets users synchronize the critical connection between both wired and wireless handheld devices and the vast stores of information found in corporate databases, the Internet and

14

individuals' PC applications. Intellisync Anywhere keeps users current with remote and LAN-based data synchronization between groupware servers and handheld devices. Satellite Forms provides the tools needed to create custom applications for Palm OS(R) handheld devices and the ability to integrate those applications with desktop or network databases. Browse-it enables users to view Web pages online or offline on their Palm OS handhelds in a secure, conventional and quick manner. Mind-it technology provides user-driven personalization, enabling users to track specific Web information and be notified when that information changes. Based on our Intellisync synchronization software, our recently announced Sync-it solution allows users to perform true, multi-point, Web-based synchronization of calendar, e-mail, contacts, and tasks between their Palm OS handheld and their home PC, work PC, and Internet PIM (Personal Information Management), using a network, dial-up, or wireless connection to the Internet.

Edgar Filing: PUMATECH INC - Form 10-Q

Browse-it, Mind-it and Sync-it form the essential components of our Mobile Application Platform (MAP) offering. MAP is the common server platform on which we are building our new mobile and wireless solutions. Designed for maximum scalability and performance, MAP empowers both Internet access and wireless access to mobile devices. This differs markedly from the PC-centric connectivity solutions that enable Internet access only while tethered to a PC. MAP will provide ubiquitous access to mobile devices over both wired and wireless media, and will not require the PC to act as a gateway to the network. MAP is deployed inside the firewalls of major corporations. In addition, MAP is hosted in the public Internet space through our Intellisync.com(SM) Web service.

We license our software products to several original equipment manufacturers (OEMs) and business development organizations worldwide. In addition, we sell our retail products through several distribution channels both domestically and internationally, including major distributors, resellers, computer dealers, retailers and mail-order companies. Internationally, we are represented by over 20 distributors and resellers in Africa, Asia, Australia, Canada, Europe, New Zealand, and South America.

We believe that successful implementation of our technology by our customers and future growth in our product sales depend on our ability to provide our customers with adequate support, training and consulting. We, therefore, remain committed to continuously improving the various services we offer to our customers, which include providing contract support services upon the purchase or use of our products and performing non-recurring engineering service projects for software development. To implement this commitment, we have developed an in-house professional services organization. Our professional services organization, created in July 2000 with the acquisition of Dry Creek Software (Dry Creek), provides business application experience, technical expertise and product knowledge to complement our MAP infrastructure and to provide solutions to customers' business requirements. The major types of services provided include software consulting, integration and hosting services which allow more rapid and customer-unique end-to-end deployments. Our recent acquisition of certain assets and liabilities of The Windward Group (Windward), as described below, including our hiring of approximately 40 employees from Windward, represents a threefold expansion of our professional services organization, which now focuses on delivering customized solutions based on our MAP infrastructure for target customers such as wireless carriers, ISPs, Web portals and corporate enterprises.

In October 2000, we signed and closed an asset purchase agreement with Vanteon Corporation (Vanteon), of Rochester, New York to acquire selective assets and assume certain liabilities of The Windward Group (Windward), a wholly owned subsidiary of Vanteon headquartered in Los Gatos, California. Windward is a professional services company specializing in creating consumer and enterprise solutions that combine mobile, wireless, desktop, Internet and database technology. The condensed consolidated financial statements presented in this Form 10-Q include the results of operations of Windward since the date of acquisition. The transaction was accounted for as a purchase. Under the terms of the agreement, we paid \$12,250,000 in cash and placed 171,026 shares of Pumatech common stock in escrow. These shares will be valued upon issuance from escrow based on the fair value

15

of the common stock on that date of acquisition and as a result, the amount of goodwill arising from the transaction will increase. The shares will be released in equal installments to Vanteon based on the achievement of quarterly performance milestones through the first quarter of fiscal 2002. The performance milestones set for the second quarter of fiscal year 2001

Edgar Filing: PUMATECH INC - Form 10-Q

were met and therefore 42,757 shares, valued at approximately \$204,000, were released for the quarter ending January 31, 2001. The agreement also provided for a rent reimbursement from Vanteon for the Los Gatos facility over the remaining term of the related lease which has been assumed by Pumatech. \$611,000, representing the present value of the rent reimbursement, was treated as a reduction of the purchase price. In connection with this acquisition, we hired from Windward approximately 40 additional employees for our professional services organization.

On November 7, 2000, we signed and closed a definitive agreement to acquire certain assets of SwiftTouch Corporation (SwiftTouch) of Bedford, Massachusetts, a provider of Web-based Universal Access Solutions. The condensed consolidated financial statements presented in this Form 10-Q include the results of operations of SwiftTouch since the date of acquisition. The transaction was accounted for as a purchase. Under the terms of the agreement, we paid \$320,000 in cash and issued 100,000 shares of Pumatech common stock, 12,000 of which were held in escrow to be released in fiscal 2002. The shares were valued at approximately \$1,368,000, using the average price of the Company's common stock, net of a 2.5% discount, for the period ending around the date of acquisition.

RESULTS OF OPERATIONS

All historical financial information and analysis have been restated to reflect the acquisition of NetMind Technologies, Inc. (NetMind) on February 24, 2000, which was accounted for as a pooling-of-interests.

The following table sets forth certain consolidated statement of operations data as a percentage of revenue for the periods indicated:

	THREE MONTHS ENDED JANUARY 31,		SIX MONTHS ENDED FEBRUARY 24,
	2001	2000	
Revenue			
License	81.8%	89.1%	85.1%
Services	18.2	10.9	14.9
Total revenue	100.0	100.0	100.0
Cost and operating expenses:			
Cost of revenue	25.6	14.1	14.1
Research and development	57.4	52.7	52.7
Sales and marketing	45.8	47.1	47.1
General and administrative	14.8	16.8	16.8
In-process research and development	-	-	-
Amortization of intangibles	20.5	11.3	11.3
Total cost and operating expenses	164.1	142.0	142.0
Operating loss	(64.1)	(42.0)	(42.0)
Other income, net	6.7	13.2	13.2
Loss before income taxes	(57.4)	(28.8)	(28.8)
Provision for income taxes	(0.7)	(2.2)	(2.2)
Net loss	(58.1)	(31.0)	(31.0)
Accretion of mandatorily redeemable convertible

preferred stock to redemption value	-	(24.0)	
	-----	-----	-----
Net loss attributable to common stockholders	(58.1)%	(55.0)%	(
	=====	=====	=====

REVENUE. We derive revenue from two primary sources: software licenses and fees for service. Revenue in the three and six months ended January 31, 2001 was \$11,311,000 and \$21,234,000, respectively, compared to \$7,361,000 and \$13,773,000, respectively, for the corresponding periods in fiscal 2000. The 54% revenue growth in the three and six months ended January 31, 2001 resulted from higher revenues from our Enterprise products, MAP licensing, and services. This increase in revenue more than offset the decline in our legacy notebook business--Intellisync for Notebook and TranXit(R) product royalty revenue. Revenue in the three and six months ended January 31, 2001 from our core business, excluding all revenue from our legacy notebook business, increased 73% to \$10,708,000 and 80% to \$19,874,000, respectively, compared to \$6,208,000 and \$11,040,000, respectively, for the corresponding periods in fiscal 2000.

OEM revenue continues to represent a significant portion of our revenue. OEM revenue in the three and six months ended January 31, 2001, was \$2,802,000, or 25% of revenue, and \$5,597,000, or 26% of revenue, respectively, compared to \$3,220,000, or 44% of revenue, and \$6,482,000, or 47% of revenue, respectively, in the corresponding periods in fiscal 2000. The decrease in OEM revenue was primarily due to the decline in Intellisync for Notebook and TranXit product royalty revenue, and in server revenue, partially offset by an increase in platform licensing of Software Development Kits (SDK). No customer accounted for more than 10% of total revenue in the three and six months ended January 31, 2001 and 2000. Although several OEMs agreements contain contractual minimum purchase obligations, there can be no assurance that any particular OEM will satisfy such obligation. In addition, we believe that the percentage of revenue derived from OEMs may fluctuate in future periods since the revenue associated with the distribution channels we use both domestically and internationally for our existing and future products are subject to change. Further, we expect the notebook and PC OEM portion of this revenue to continue to decrease as a percentage of our overall revenue throughout fiscal 2001.

International revenue continues to represent a significant portion of our revenue. International revenue in the three and six months ended January 31, 2001, was \$2,287,000, or 20% of revenue, and \$4,632,000, or 22% of revenue, respectively, compared to \$1,935,000, or 26% of revenue, and \$4,455,000, or 32% of revenue, respectively, in the corresponding periods in fiscal 2000. The increase in our international revenue in absolute terms is consistent with our continued efforts to expand our international presence and sales efforts. This increase was partially offset by lower international notebook and PC OEM royalties. International revenue decreased as a percentage of total revenue due to the substantial increase in our U.S. revenue. We expect, however, our international revenue to continue to increase in absolute dollars in future periods as we continue to expand our operations worldwide, particularly in Europe. We believe that continued growth would require further expansion in international markets. We have utilized and will continue to utilize substantial resources to expand existing and establish additional international operations. International revenue may be subject to certain risks not normally encountered in domestic operations, including exposure to tariffs, various trade regulations and fluctuations in currency exchange rates. See "Factors That May Affect Future Operating Results."

Edgar Filing: PUMATECH INC - Form 10-Q

- LICENSE REVENUE. License revenue is earned from the sale and use of software products and royalty agreements with OEMs. License revenue in the three and six months ended January 31, 2001 increased 41% to \$9,254,000 and 44% to \$18,044,000, respectively, compared to \$6,558,000 and \$12,547,000, respectively, for the corresponding periods in fiscal 2000. The increase in license revenues reflected an increase in revenues of MAP products and Enterprise products, primarily Intellisync, Satellite Forms and Intellisync Anywhere. This increase was offset by declining revenue received for our legacy notebook business--the Intellisync for Notebook and TranXit products. Revenue from our Enterprise products increased due to the market's continued widespread adoption of our Enterprise product offerings. MAP revenue increased due to an increase in the number of licensing arrangements entered into by the Company during the first half of fiscal 2001. Notebook revenue decreased as its revenue stream has matured and as we continue to deemphasize the resources and effort associated with this revenue segment.

17

Accordingly, we expect that our legacy notebook business revenue in subsequent quarters would be flat or moderately lower. Deferred revenue was \$5,744,000 and \$4,666,000 at January 31, 2001 and 2000, respectively. The 23% increase in deferred revenue was primarily attributable to revenues related to licensing of our MAP components, Intellisync Gold and Intellisync Anywhere products and platform licensing of SDK.

- SERVICE REVENUE. Service revenue is derived from fees for services, including time and materials for professional services, non-recurring engineering service projects for software development, amortization of maintenance contract programs, and advertising fees. Service revenue in the three and six months ended January 31, 2001 increased 156% to \$2,057,000 and 160% to \$3,190,000, respectively, compared to \$803,000 and \$1,226,000, respectively, for the corresponding periods in fiscal 2000. The increase in service revenue was brought about primarily by increased personnel in our professional services organization primarily as a result of our acquisitions of Dry Creek and the Windward Group. The increase was also due to an increase in maintenance contract programs and in advertising fees. This increase was partially offset by a decrease in revenue resulting from fewer non-recurring engineering service projects. We expect service revenue to continue to increase as we are able to increase our client base and overall utilization rate of our professional services team.

COST OF REVENUE. Cost of revenue consists of license costs and service costs. License costs include packaged product costs including product media and duplication, manuals, packing supplies, shipping expenses and in certain instances, royalties paid to third-party vendors. Service costs include personnel related costs associated with work performed under professional services contracts and non-recurring engineering agreements. Service costs also include hosting costs for online services associated with the hosting of MAP to both partners and end users via Intellisync.com. These hosting costs include expenses related to bandwidth for hosting, tape backup, security and storage, third-party fees and internal personnel costs associated with logistical support of the hosting services and depreciation of computer

Edgar Filing: PUMATECH INC - Form 10-Q

equipment associated with the hosting service.

In general, license costs are a far lower percentage of license revenue than service costs, which have a much higher cost structure as a percentage of service revenue. Additionally, license costs tend to be variable based on license revenue volumes where service costs tend to be fixed within certain service revenue volume ranges. We would expect, therefore, that an increase in service revenue as a percentage of our total revenue, would generate lower overall gross margins as a percentage of total revenue. Also, given the high amount of fixed costs associated with the professional services and online services, inability to generate revenue sufficient to absorb these fixed costs could lead to negative service margins.

Cost of revenue in the three and six months ended January 31, 2001, was \$2,900,000, or 26% of revenue, and \$4,459,000, or 21% of revenue, respectively, compared to \$1,037,000, or 14% of license revenue, and \$1,642,000, or 12% of revenue, respectively, in the corresponding periods in fiscal 2000. The increase in cost of revenue in absolute dollars and as a percentage of revenue was due to an increase in service costs including an increase in hosting costs associated with increased revenues from our MAP components and increased headcount in our professional services organization. Additionally, the increase in cost of revenue was due, to a lesser extent, to an increase in license costs, primarily packaged product costs associated with increased revenues from our Enterprise products.

RESEARCH AND DEVELOPMENT. Research and development expenses consist primarily of salaries and other related expenses, including non-cash stock compensation, for research and development personnel, quality assurance personnel, product localization, fees to outside contractors and the cost of facilities and depreciation of capital equipment. We invest in research and development both for new products and to provide continuing enhancements to existing products. Research and development expenses in the three and six months ended January 31, 2001, were \$6,497,000, or 57% of revenue, and \$12,584,000, or 59% of revenue, respectively, compared to \$3,874,000, or 53% of revenue, and \$6,797,000, or 49% of revenue, respectively, in the corresponding periods in fiscal 2000. The increase in research and

18

development expenses was primarily due to increased personnel that we acquired in connection with our recent acquisitions, increased planned spending for the integration of various MAP technologies on a common, modular platform, and increased costs associated with the production launch of Intellisync.com. We believe that a significant level of investment in MAP, Intellisync.com and other research and development initiatives is required to integrate our technologies and service our customer needs.

All of our research and development costs have been expensed as incurred. Statement of Financial Accounting Standards (SFAS) No. 86 requires capitalization of certain software development costs once technological feasibility is established. We define establishment of technological feasibility at the point that product reaches beta. Software development costs incurred subsequent to the establishment of technological feasibility through the period of general market availability of the product are capitalized, if material. To date, all of these software development costs have been insignificant and expensed as incurred.

In March 2000, the Emerging Issues Task Force (EITF) reached a consensus on

Edgar Filing: PUMATECH INC - Form 10-Q

Issue 00-2, "Accounting for the Costs of Developing a Web Site." In general, EITF 00-2 states that the costs of developing a Web site should be accounted for under the provisions of Statement of Position (SOP) 98-1, "Accounting for the Costs of Computer Software Developed or Obtained for Internal Use." It requires that costs incurred during the Web application and infrastructure and graphics development stages of development should be capitalized. We adopted EITF 00-2. The application of EITF 00-2 did not have a material impact on our financial position or results of operations.

SALES AND MARKETING. Sales and marketing expenses consist primarily of salaries, commissions, promotional expenses and other related expenses, including non-cash stock compensation, of sales, marketing and technical support personnel. Sales and marketing expenses in the three and six months ended January 31, 2001, were \$5,177,000, or 46% of revenue, and \$10,645,000, or 50% of revenue, respectively, compared to \$3,470,000, or 47% of revenue, and \$6,825,000, or 50% of revenue, respectively, in the corresponding periods in fiscal 2000. Sales and marketing expenses increased primarily due to an increase in sales personnel to expand our sales and business development organizations, and an increase in corporate marketing resources, corporate branding and marketing headcount for our online services group. We expect that sales and marketing expenses will continue to increase in absolute dollars throughout the remainder of fiscal 2001 as we continue to expand our direct sales force, particularly in Europe, as we plan to invest more resources in marketing Intellisync.com services, and as the related personnel and marketing support costs also increase.

GENERAL AND ADMINISTRATIVE. General and administrative expenses consist primarily of salaries and other related expenses, including non-cash stock compensation, of administrative, executive and financial personnel and other outside professional fees. General and administrative expenses in the three and six months ended January 31, 2001, were \$1,676,000, or 15% of revenue, and \$3,037,000, or 14% of revenue, respectively, compared to \$1,238,000, or 17% of revenue, and \$2,304,000, or 17% of revenue, respectively, in the corresponding periods in fiscal 2000. The increase in absolute general and administrative spending was primarily due to an increased provision for bad debts allowance. Additionally, to a much lesser extent, the addition of personnel and increased fees for professional services, such as legal, accounting, and other consulting services, to support the expansion of our infrastructure, and the consolidation and assimilation of the ProxiNet, NetMind, Dry Creek, Windward and SwiftTouch businesses also contributed to the increase.

NON-CASH STOCK COMPENSATION. Non-cash stock compensation, included in each appropriate operating expense category, relates to stock options that were deemed to have been granted at a price below market value. These charges are amortized on a straight-line basis over the vesting period of the options. The aggregate non-cash stock compensation charge, net of the effect of terminations, in the three and six months ended January 31, 2001 was \$220,000 and \$441,000, respectively, compared to \$484,000 and \$875,000, respectively, in the corresponding periods in fiscal 2000. The non-cash compensation expense

in the three and six months ended January 31, 2001 and 2000 relates to options that were granted by NetMind prior to our acquisition of NetMind. The aggregate amortization expense is expected to be approximately \$1,400,000, \$500,000 and \$400,000 in fiscal 2001, 2002 and 2003, respectively. Future amortization expense would be reduced if any employee terminates employment prior to the expiration of the option vesting period.

Edgar Filing: PUMATECH INC - Form 10-Q

PURCHASED IN-PROCESS RESEARCH AND DEVELOPMENT. We expensed purchased in-process research and development costs of \$4,218,000 as a result of the ProxiNet acquisition in the first quarter of fiscal 2000.

The ProxiNet acquisition has been accounted for as a purchase. The total purchase price of approximately \$17,384,000 (including liabilities of \$2,070,000), was assigned to the fair value of the assets acquired, including \$676,000 to tangible assets acquired, \$3,378,000 to identified intangible assets, \$4,218,000 to in-process research and development, and \$9,112,000 to goodwill. The in-process research and development was expensed at the acquisition date. The value assigned to this acquired in-process research and development was determined by identifying research projects in areas for which technological feasibility had not been established as of the acquisition date. These include projects for ProxiWare(TM) and ProxiWeb(TM) technology. The value was determined by estimating the revenue contribution and the percentage of completion of each of these projects. The projects were deemed to be 55% complete on the date of acquisition. The net cash flows were then discounted utilizing a weighted average cost of capital of 27.5%, which, among other related assumptions, we believe to be fairly accurate. This discount rate takes into consideration the inherent uncertainties surrounding the successful development of the in-process research and development, the expected profitability levels of such technology, and the uncertainty of technological advances that could potentially impact the estimates described above. Revenues were projected to be generated in fiscal 2000 for the products in development at the acquisition date.

To date, actual results have been consistent, in all material respects, with our assumptions at the time of the acquisition. The assumptions primarily consist of an expected completion date for the in-process projects, estimated costs to complete the projects, and revenue and expense projections once the products have entered the market. The projects for ProxiWare and ProxiWeb technology that is currently branded as the Browse-it product was completed, as expected, in the fourth quarter of fiscal 2000 and are now generating revenue. Failure to achieve the expected levels of revenue and net income from this product during its entire life cycle will negatively impact the return on investment expected at the time that the acquisition was completed and potentially result in impairment of any other assets related to the development activities.

AMORTIZATION OF INTANGIBLES. Amortization of acquired intangibles in the three and six months ended January 31, 2001, was \$2,314,000, or 20% of revenue, and \$3,696,000, or 17% of revenue, respectively, compared to \$835,000, or 11% of revenue, and \$909,000, or 7% of revenue, respectively, in the corresponding periods in fiscal 2000. The increase in amortization of intangibles resulted from our acquisitions of SwiftTouch and Windward in fiscal 2001 and Dry Creek and ProxiNet in fiscal 2000.

INTEREST AND OTHER INCOME, NET. Interest and other income, net, represents interest earned on cash and short-term investments and realized gain on miscellaneous investments, offset by interest expense on long-term debt and capitalized leases and miscellaneous bank fees and charges. Net interest and other income in the three and six months ended January 31, 2001 was \$763,000 and \$1,851,000, respectively, compared to \$974,000 and \$2,240,000, respectively, in the corresponding periods in fiscal 2000. Net interest and other income during the three and six months ended January 31, 2001 include increased yields on investments and interest earned on a higher average cash balance resulting primarily from the private placement completed in March 2000. This increase in yields and interest was offset by an adjustment of \$197,000 for the impairment of PG&E commercial paper. Net interest and other income

Edgar Filing: PUMATECH INC - Form 10-Q

during the three and six months ended January 31, 2000, however includes a higher gain realized from the sales of Amazon.com securities.

PROVISION FOR INCOME TAXES. The provision for income taxes primarily represents foreign withholding taxes on royalties earned from certain foreign customers. Provision for income taxes in the three and six months ended January 31, 2001 was \$82,000 and \$218,000, respectively, compared to \$166,000 and \$358,000, respectively, in the corresponding periods of fiscal 2000.

ACCRETION OF MANDATORILY REDEEMABLE CONVERTIBLE PREFERRED STOCK TO REDEMPTION VALUE. During fiscal 1999, NetMind issued approximately 4 million shares of Series B Preferred Stock which converted into approximately 3.4 million shares of Pumatech common stock upon completion of the NetMind merger in February 2000. Under the terms of the original issuance, the Series B shares were redeemable in September 2003 and 2004, at the higher of their original issue price or the fair value of the stock at the dates of redemption. The difference between the issuance price and the fair value of the Series B stock was accreted by NetMind. Such accretion aggregated to \$1,765,000 and \$3,300,000 in the three and six months ended January 31, 2000.

LIQUIDITY AND CAPITAL RESOURCES

We ended the second quarter of fiscal 2001 with \$58,291,000 in cash, cash equivalents and short-term investments. Cash and cash equivalents decreased by \$23.7 million during the first half of fiscal 2001 to \$30.8 million at January 31, 2001. Short-term investments decreased by \$3.3 million to \$27.5 million during the same period.

Net cash used in operations of \$11.2 million during the six months ended January 31, 2001, was comprised of the net loss adjusted for non-cash items of \$5.8 million and net change in operating assets and liabilities of \$5.4 million. Net cash used in operations of \$4.8 million during the six months ended January 31, 2000, was comprised of the net loss adjusted for non-cash items of \$1.4 million and net change in operating assets and liabilities of \$3.4 million.

Net cash used in investing activities of \$13.6 million during the six months ended January 31, 2001, resulted from \$12.6 million of cash paid for the asset purchase of Windward and SwiftTouch, \$3.4 million for capital expenditures and \$1.0 million for an other long-term investments, partially offset by net sales of short term investments of \$3.4 million. Net cash provided by investing activities of \$2.5 million during the six months ended January 31, 2000 was primarily for net sales of short-term investments of \$3.7 million, partially offset by capital expenditures of \$1.2 million.

Net cash provided by financing activities of \$1.1 million during the six months ended January 31, 2001 resulted primarily from \$1.2 million of proceeds from issuance of common stock, partially offset by \$0.1 million of principal repayments on notes payable. Net cash provided by financing activities of \$0.2 million during the six months ended January 31, 2000, resulted from \$0.6 million of proceeds from issuance of common stock and \$0.4 million of proceeds from line of credit, partially offset by \$0.8 million of payments made to settle acquired liabilities.

We maintain a loan and security agreement that provides a \$1,000,000 revolving credit line and a \$750,000 equipment line. Borrowings under the revolving credit line bear interest at a per annum rate equal to the prime rate plus one half of one percent. Borrowings under the equipment line bear interest at a per annum rate equal to the prime rate plus one percent. Equipment acquired is pledged as collateral. The loan and security agreement contains covenants requiring that we

Edgar Filing: PUMATECH INC - Form 10-Q

maintain a minimum level of equity and meet certain quick and liquidity ratios. The agreement also contains certain restrictive covenants including but not limited to limitations on indebtedness, limitations on dividends

21

and other restricted payments (including repurchases of our common stock), limitations on transactions with affiliates, limitations on liens and limitations on disposition of proceeds of asset sales, among others. We are currently in compliance with all of the aforementioned covenant obligations. At January 31, 2001, \$453,000 was outstanding on the equipment line and we had no outstanding balance drawn on the revolving credit line.

In October 2000, in connection with our acquisition of Windward, we used \$12,250,000 of cash and issued 171,026 shares of Pumatech common stock to Vanteon. For additional information regarding the acquisition, refer to Note 7 of the Notes to Condensed Consolidated Financial Statements.

In November 2000, in connection with our acquisition of certain assets of SwiftTouch, we used \$320,000 of cash and issued 100,000 shares of Pumatech common stock. For additional information regarding the acquisition, refer to Note 7 of the Notes to Condensed Consolidated Financial Statements.

We believe that our current cash, cash equivalents and short-term investment balances, including the credit lines and cash generated from operations, if any, will be sufficient to meet our working capital and other cash requirements for at least the next 12 months.

In the future, we may seek to raise cash through the issuance of debt or equity securities. There can be no assurance that such financing would be available to us at all or on terms favorable to us.

FACTORS THAT MAY AFFECT FUTURE OPERATING RESULTS

There are many factors that affect our business and the results of our operations, some of which are beyond our control. The following is a description of some of the important factors that may cause the actual results of our operations in future periods to differ materially from those currently expected or desired.

BECAUSE WE HAVE HAD LIMITED INTERNET OPERATING HISTORY, IT IS DIFFICULT TO EVALUATE OUR BUSINESS AND WE MAY FACE VARIOUS RISKS, EXPENSES AND DIFFICULTIES ASSOCIATED WITH EARLY STAGE COMPANIES.

Historically, we have licensed our products and technology primarily to PC OEMs, corporations and to end users through our channels of distribution. In the second quarter of fiscal 2000, we announced our Internet initiative. This initiative has required us to add additional resources and to develop and market our Intellisync.com service destination site and the products and technologies we obtained in the ProxiNet and NetMind acquisitions. We plan to market and license our new Web-based products and solutions to wireless carriers, Web portals and individual consumers. We also plan to offer these new products and solutions to corporations. We expect to incur significant costs in implementing our Internet initiative.

Our overall operating results have changed significantly as a result of developing and bringing to market our new Internet products. It is important to understand that our historical financial statements include operating results of

Edgar Filing: PUMATECH INC - Form 10-Q

our recently launched Internet initiative only to the extent that NetMind's historical operating results have been reflected under pooling-of-interests accounting. As a result of our Internet initiative, we expect our combined results to reflect an operating loss for at least the next several fiscal quarters. There can be no assurance that we will be able to achieve or sustain profitability.

Since we just launched our Internet initiative, there is little information on which to evaluate our business and prospects as an Internet company. An investor in our common stock should consider the risks, expenses and difficulties that young companies frequently encounter in the new and rapidly evolving markets for Internet products and services. These risks to us include:

22

- our evolving new business model;
- our need and ability to manage growth; and
- rapid evolution of technology.

To address these risks and uncertainties, we must take several steps, including:

- creating and maintaining strategic relationships;
- expanding sales and marketing activities;
- integrating existing and acquired technologies;
- expanding our customer base and retaining key clients;
- introducing and expanding new services, including our professional services organization;
- managing rapidly growing operations, including new facilities and information technology infrastructure;
- competing in a highly competitive market; and
- attracting, retaining and motivating key employees.

We may not be successful in implementing any of our strategies or in addressing these risks and uncertainties. We expect that our operating expenses will continue to increase, primarily as a result of our investment in our new Internet product initiative. Moreover, even if we accomplish our objectives, we still may not achieve sustainable profitability in the future.

We have invested substantial amounts in technology and infrastructure development and development of our professional services organization. We expect to continue to invest substantial financial and other resources to develop and introduce new Internet and wireless products and services, and to expand our sales and marketing organizations, our professional services organization, strategic relationships and operating infrastructure. We expect that our cost of revenue, sales and marketing expenses, operations and customer support expenses, and depreciation and amortization expenses may continue to increase in absolute dollars and may increase as a percent of revenue. If revenue does not correspondingly increase, our operating results and financial condition could be negatively affected.

OUR BUSINESS AND PROSPECTS DEPEND ON DEMAND FOR AND MARKET ACCEPTANCE OF THE

Edgar Filing: PUMATECH INC - Form 10-Q

INTERNET, WIRELESS DEVICES AND MOBILE COMPUTING DEVICES.

The increased use of the Internet, wireless devices and mobile computing devices for retrieving, sharing and transferring information among businesses, consumers, suppliers and partners, and for Internet personalization services has only begun to develop in recent years. Our success will depend in large part on continued growth in the use of the Internet, wireless devices and mobile computing devices. Critical issues concerning the commercial use of the Internet, wireless devices and mobile computing devices, including security, reliability, cost, ease of access and use, quality of service, regulatory initiatives and necessary increases in bandwidth availability, remain unresolved and are likely to affect the development of the market for our services. The adoption of the Internet, wireless devices and mobile computing devices for information retrieval and exchange, commerce and communications generally will require

23

the acceptance of a new medium of conducting business and exchanging information. Demand for and market acceptance of the Internet, wireless devices and mobile computing devices are subject to a high level of uncertainty and are dependent on a number of factors, including:

- the growth in access to and market acceptance of new interactive technologies;
- emergence of a viable and sustainable market for Internet personalization services;
- the development of technologies that facilitate interactive communication between organizations; and
- increases in bandwidth for data transmission.

If the market for Internet personalization services or the Internet, wireless devices and mobile computing devices as a commercial or business medium does not develop, or develops more slowly than expected, our business, results of operations and financial condition will be seriously harmed.

Specifically, even if an Internet personalization services market does develop, services that we currently offer or may offer in the future may not achieve widespread market acceptance. Failure of our current and planned services to operate as expected could delay or prevent their adoption. If our target customers do not adopt, purchase and successfully deploy our current and planned services, our revenue will not grow significantly and our business, results of operations and financial condition will be seriously harmed. We have not taken any steps to mitigate the risks associated with reduced demand for our existing Internet personalization services.

WE DERIVE A PORTION OF OUR REVENUE FROM A NUMBER OF THINLY CAPITALIZED CUSTOMERS SUCH AS DOT-COM COMPANIES.

We have derived, and believe that we will continue to derive, a portion of our revenues from small companies including dot-coms. Recently, many of these dot-com and other small companies have been closing down their operations. As a result of such failures, many similarly situated customers and potential customers may be experiencing difficulty in their funding activities and may be thinly capitalized. The composition of our customer base exposes us to additional risks, including longer payment cycles and collection problems. We have implemented policies and procedures to identify and mitigate our exposure

Edgar Filing: PUMATECH INC - Form 10-Q

to such risks.

Failure of these thinly capitalized companies to be successful in their operations could have a material adverse effect on our business, results of operations and financial condition.

THE RECENT ECONOMIC DOWNTURN MAY SEVERELY AFFECT A NUMBER OF OUR THINLY CAPITALIZED CUSTOMERS, AS WELL AS VENDORS, WHICH MAY SUBSEQUENTLY HARM OUR BUSINESS AND RESULTS OF OPERATIONS.

Economic downturns could cause our thinly capitalized customers to reduce or cease their investment in products, services and technologies such as those we provide. Any decrease in the demand for our products and services could adversely affect our operating results and financial condition. Our operating results and financial condition may also be adversely affected by difficulties we may encounter in collecting our accounts receivable and maintaining our profit margins during an economic downturn.

Economic downturns may also affect our various vendors on which we rely for certain integral services used to support our operations. Our operating results and financial condition may be adversely affected in the event that a vendor were to experience financial or operational difficulties that resulted in a reduction or interruption in services it provides us.

24

THERE ARE RISKS ASSOCIATED WITH OUR LONG-TERM INVESTMENTS THAT MAY ADVERSELY AFFECT OUR RESULTS OF OPERATIONS.

Historically, we have made direct or indirect investments in privately held companies. Additionally, we entered into a commitment with a venture capital firm and invested in some of our strategic partners, both customers and vendors, that we believe have the potential to grow, and we may continue to make strategic investments in the future. See Note 4 of the notes to the condensed consolidated financial statements for more details. There can be no assurance that these investments will bring us a return on investment. In addition, because the strategic investments tend to be in small, start-up technology companies, which are at a risk of financial failure especially during an economic downturn, there is a greater risk that the investments might be impaired. Any impairments could have a material adverse effect on our results of operations and financial condition.

HOSTING OUR MOBILE APPLICATION PLATFORM ON INTELLISYNC.COM MAY NOT BE SUCCESSFUL; AND, IF SUCCESSFUL, MAY DIVERT OUR ATTENTION FROM OUR EXISTING PRODUCT LICENSE BUSINESS, WHICH COULD RESULT IN LOWER REVENUE FROM SUCH BUSINESS.

In January 2001, Intellisync.com became available as a public web site. By the end of the first half of calendar year 2001, we intend to announce the fee structure for the premium services that we plan to offer on Intellisync.com service. An unsuccessful launch of Intellisync.com for the public may have a negative effect on our revenue and results of operations. Our customers may not choose to use MAP through Intellisync.com for their applications for a variety of reasons, including: the actual or perceived reduction in security protections of mobile solutions hosted on the Internet; the possible reluctance to be dependent on a third party to host important information and infrastructure and to perform basic support and other functions; and the possible inability of MAP to be able to support many users in an enterprise-wide environment. Although we expect to derive a significant portion of our future revenue from our Intellisync.com subscription offering, we just recently have commercially introduced it and, therefore, do not have a proven expense and revenue model for

Edgar Filing: PUMATECH INC - Form 10-Q

it. Intellisync.com may not be commercially viable if our expense and revenue model is not acceptable to our customers. This would seriously harm our business, particularly if the failure of Intellisync.com and MAP to achieve market acceptance negatively affects sales of our other products and services. In addition, if our customers adopt the MAP offering through Intellisync.com, we may experience a decline in the growth of our existing product license business.

THE EMERGENCE OF A DOMINANT PLATFORM FOR MOBILE DEVICES COULD REDUCE OUR CUSTOMER BASE AND REVENUES.

The marketplace for mobile devices is currently characterized by a number of competing Internet systems and standards for mobile computing devices. Currently, our customers and potential customers often use a variety of mobile devices with multiple connectivity options. One of the primary benefits of our products is their ability to operate across a wide variety of platforms. If a dominant platform for mobile devices emerges, the demand for our platform and products may diminish.

THE SIZE OF THE MOBILE COMPUTING MARKET CANNOT BE ACCURATELY PREDICTED, AND IF OUR MARKET DOES NOT GROW AS WE EXPECT, OUR REVENUE WILL BE BELOW OUR EXPECTATIONS AND OUR BUSINESS AND FINANCIAL RESULTS WILL SUFFER.

We are focusing on expanding into the mobile computing market, an unproven market. Accordingly, the size of this market cannot be accurately estimated and therefore we are unable to accurately determine the potential demand for our products and services. If our customer base does not expand or if there is not widespread acceptance of our products and services, our business and prospects will be harmed. We

25

believe that our potential to grow and increase the market acceptance of our products depends principally on the following factors, some of which are beyond our control:

- the effectiveness of our marketing strategy and efforts;
- our product and service differentiation and quality;
- our ability to provide timely, effective customer support;
- our distribution and pricing strategies as compared to our competitors;
- growth in the sales of handheld devices supported by our software and growth in wireless network capabilities to match end user demand and requirements;
- our industry reputation; and
- general economic conditions such as downturns in the computer or software markets.

OUR MARKET CHANGES RAPIDLY DUE TO CHANGING TECHNOLOGY AND EVOLVING INDUSTRY STANDARDS. IF WE DO NOT ADAPT TO MEET THE SOPHISTICATED NEEDS OF OUR CUSTOMERS, OUR BUSINESS AND PROSPECTS WILL SUFFER.

The market for our services is characterized by rapidly changing technology, evolving industry standards and frequent new service introductions. Our future success will depend to a substantial degree on our ability to offer services

Edgar Filing: PUMATECH INC - Form 10-Q

that incorporate leading technology, address the increasingly sophisticated and varied needs of our current and prospective customers and respond to technological advances and emerging industry standards and practices on a timely and cost-effective basis. You should be aware that:

- our technology or systems may become obsolete upon the introduction of alternative technologies;
- we may not have sufficient resources to develop or acquire new technologies or to introduce new services capable of competing with future technologies or service offerings; and
- the price of the services we provide is expected to decline as rapidly as the cost of any competitive alternatives.

We may not be able to effectively respond to the technological requirements of the changing market. To the extent we determine that new technologies and equipment are required to remain competitive, the development, acquisition and implementation of such technologies and equipment are likely to continue to require significant capital investment by us. Sufficient capital may not be available for this purpose in the future, and even if it is available, investments in new technologies may not result in commercially viable technological processes and there may not be commercial applications for such technologies. If we do not develop and introduce new products and services and achieve market acceptance in a timely manner, our business and prospects may suffer.

OPERATING RESULTS MAY FLUCTUATE SIGNIFICANTLY AND MAY BE DIFFICULT TO PREDICT.

Our operating results have fluctuated in the past, and with our Internet product initiative, the ProxiNet, NetMind and Dry Creek acquisitions and the Windward and SwiftTouch asset purchases, our operating results are likely to continue to fluctuate significantly. A number of factors, many of which are outside of our control, are likely to cause fluctuations in operating results, including, but not limited to:

26

- the demand for our products and services;
- our success in developing new products and integrating acquired technologies;
- the timing of new product introductions by us and our competitors;
- market acceptance of our new and enhanced products and services;
- market acceptance of handheld devices generally, and those supported by our products and services;
- the emergence of new industry standards;
- the timing of customer orders;
- the mix of products and services sold;
- product life cycles;
- competition;
- the mix of distribution channels employed;

Edgar Filing: PUMATECH INC - Form 10-Q

- seasonal trends;
- the timing and magnitude of our capital expenditures, including costs relating to the expansion of operations;
- the evolving and unpredictable nature of the markets for our products and mobile computing devices generally;
- the rate of growth of the Internet and the personal computer market in general; and
- general economic conditions.

In addition, we typically operate with a relatively small order backlog. As a result, quarterly sales and operating results depend in part on the volume and timing of orders received and fulfilled within the quarter, which are difficult to forecast. A significant portion of our expense levels are fixed in advance, based in large part on our resource requirements to meet planned product and customer requirements. If revenue is below expectations in any given quarter, the adverse impact of the shortfall on operating results may be magnified by our inability to adjust spending to compensate for the shortfall. Therefore, a shortfall in actual revenue as compared to estimated revenue would have an immediate adverse effect on our business, operating results and financial condition that could be material.

Due to our ongoing efforts to expand into retail and reseller channels, we are focusing our efforts on licensing our server and personal applications to corporations and licensing our Software Development Kits (SDKs) to software developers and mobile computing device manufacturers. SDKs provide the complete solution for adding intelligent synchronization to enterprise applications, mobile devices and Web-based services. With intelligent synchronization, users can keep their critical information up-to-date and in sync across multiple applications and mobile devices. As a result, we expect that our notebook and PC OEM revenue will decrease as a percentage of our overall revenue. This new sales strategy has the following risks:

27

- sales into these channels are harder to predict and may have lower margins than sales in other channels;
- we have a very limited history in penetration and support for these channels;
- the average transaction size and sales cycle vary significantly, making forecasting difficult;
- smaller transactions may have relatively higher administrative costs;
- any significant deferral of purchases of our products by customers could jeopardize our operating results in any particular quarter;
- to the extent that significant sales occur earlier than expected, operating results for subsequent quarters may be adversely affected;
- products that are accepted in the OEM market may not be readily accepted by corporations;
- we may incur increased costs related to new infrastructure

Edgar Filing: PUMATECH INC - Form 10-Q

requirements; and

- planned marketing strategy may require significant expenditures but may not have immediate or future beneficial effect on sales.

Our gross margin on service revenue, particularly non-recurring engineering service and professional service revenue, is substantially lower than gross margin on license revenue. We have recently acquired Dry Creek and, in connection with the acquisition of assets from Windward, we hired a number of employees of Windward, which forms the basis of our professional service group, and, consequently, professional service revenue increased this quarter and we expect that it will continue to increase in future quarters. Until we are able to fully utilize all employees in the professional service group, our gross margin will continue to be low. Any increase in non-recurring engineering service and professional service revenue would have a corresponding increase in cost of revenue and would have an adverse effect on our gross margins as a percent of total revenue. We may also change prices or increase spending in response to competition or to pursue new market opportunities.

The operating results of many software companies reflect seasonal fluctuation. For example, sales in Europe and certain other countries typically are adversely affected in the summer months when business activity is reduced. Our revenue and operating results may be adversely affected by diminished demand for products on a seasonal basis.

Period-to-period comparisons of operating results are not a good indication of future performance. It is likely that operating results in some quarters will be below market expectations. In this event, the price of our common stock is likely to decline.

IF WE FAIL TO MAINTAIN OUR EXISTING RELATIONSHIPS OR ENTER INTO NEW KEY RELATIONSHIPS WITH ORIGINAL EQUIPMENT MANUFACTURERS AND BUSINESS DEVELOPMENT ORGANIZATIONS, OUR BRAND AWARENESS AND THE USE OF OUR PRODUCTS AND SERVICES WOULD SUFFER.

The success of our product and service offerings depends, in large part, on our ability to develop and maintain relationships with original equipment manufacturers and business development organizations that help distribute our products and promote our services. We depend on these relationships to:

- distribute our products to purchasers of mobile devices;

28

- increase usage of our MAP components;
- build brand awareness through product marketing; and
- cooperatively market our products and services.

Also, because we depend on equipment manufacturers and business development organizations to help distribute our products and promote our services, the growth of our operations is dependent in part upon their success. If the products that these companies sell, or the operating systems upon which these products are based, were to lose popularity, or if any of these equipment manufacturers or business development organizations cease to utilize our product and service offerings in significant volumes, our business would suffer.

RAPID GROWTH IN OUR BUSINESS COULD STRAIN OUR RESOURCES AND HARM OUR BUSINESS AND FINANCIAL RESULTS.

Edgar Filing: PUMATECH INC - Form 10-Q

The planned expansion of our Internet initiative as well as growth in our existing enterprise business will place a significant strain on our management, financial controls, operations systems, personnel and other resources. If we are successful in implementing our marketing strategy, we also expect the demands on our technical support resources to grow rapidly, and we may experience difficulties responding to customer demand for our services and providing technical support in accordance with our customers' expectations. We expect that these demands will require not only the addition of new management personnel, but also the development of additional expertise by existing management personnel and the establishment of long-term relationships with third-party service vendors. Additionally, we have recently opened an additional office in the United Kingdom and intend to open new offices elsewhere in Europe and other international locations. We may encounter difficulties in integrating information and communications systems in multiple locations. We may not be able to keep pace with growth, successfully implement and maintain our operational and financial systems or successfully obtain, integrate and utilize the employees, facilities, third-party vendors and equipment, or management, operational and financial resources necessary to manage a developing and expanding business in our evolving and increasingly competitive industry. If we are unable to manage growth effectively, we may lose customers or fail to attract new customers and our business and financial results will suffer.

BECAUSE TRACKING INTERNET-BASED INFORMATION ACROSS THE ENTIRE WORLDWIDE WEB IS A HIGHLY COMPLEX PROCESS, OUR PRODUCTS AND SERVICES MAY HAVE ERRORS OR DEFECTS THAT COULD SERIOUSLY HARM OUR BUSINESS.

The tracking of Internet-based information across the entire worldwide Web is a highly complex process. We and our customers have, from time to time, discovered errors and defects in our software. In the future, there may be additional errors and defects in our software that may adversely affect our products and services. If we are unable to efficiently fix errors or other problems that may be identified, we could experience:

- loss of or delay in revenue and loss of market share;
- loss of customers;
- failure to attract new customers or achieve market acceptance;
- diversion of development resources;

29

- loss of reputation and credibility;
- increased service costs; and
- legal actions by our customers.

IF WE ARE UNABLE TO SUCCESSFULLY EXPAND OUR PROFESSIONAL SERVICES ORGANIZATION, CUSTOMER SATISFACTION AND DEMAND FOR OUR PRODUCTS WILL SUFFER.

We believe that successful implementation of our technology by our customers and future growth in our product sales depend on our ability to provide our customers with professional services, including customer support, training, consulting and initial implementation and deployment of our products. We have developed an in-house professional services organization with employees who can perform these tasks and who also educate third-party systems integrators

Edgar Filing: PUMATECH INC - Form 10-Q

in the use of our products so that they can provide these services to our customers. Competition for qualified professional services personnel is intense due to the limited number of people who have the requisite knowledge and skills. As a result, we may not be able to attract or retain a sufficient number of qualified professional services personnel. If we are unable to develop sufficient relationships with third-party systems integrators and our professional services organization is under-staffed, we could be unable to complete implementations in a timely manner, which would cause delays in revenue recognition. In addition, if we do not provide adequate customer support, consulting and training for our customers, we could face customer dissatisfaction, damage to our reputation and decreased overall demand for our products.

ACQUISITIONS WE HAVE MADE AND MAY MAKE IN THE FUTURE COULD DISRUPT OUR BUSINESS OR NOT BE SUCCESSFUL AND HARM OUR FINANCIAL CONDITION.

We have in the past acquired or made investments in, and intend in the future to acquire or make investments in other complementary companies, products and technologies. We have acquired certain assets of Windward and SwiftTouch and acquired Dry Creek, NetMind, ProxiNet, SoftMagic Corporation, RealWorld Solutions, Inc. and IntelliLink Corporation. In the event of any future acquisitions or investments, we could:

- issue stock that would dilute the ownership of our then existing stockholders;
- incur debt;
- assume liabilities;
- face the Securities and Exchange Commission (SEC) challenges to the accounting treatment of these acquisitions which may result in changes to our financial statements and cause us to incur charges to earnings over time that we did not expect;
- incur amortization expenses related to goodwill and other intangible assets; or
- incur large and immediate write-offs.

These acquisitions and investments also involve numerous risks, including:

- problems integrating the operations, technologies or products purchased with those we already have;
- unanticipated costs and liabilities;

30

- diversion of management's attention from our core business;
- adverse effects on existing business relationships with suppliers and customers;
- risks associated with entering markets in which we have no or limited prior experience; and
- potential loss of key employees, particularly those of the acquired organizations.

Edgar Filing: PUMATECH INC - Form 10-Q

WE HAVE ANTI-TAKEOVER DEFENSES THAT COULD DELAY OR PREVENT A TAKEOVER THAT STOCKHOLDERS MAY CONSIDER FAVORABLE.

Certain provisions of our certificate of incorporation and bylaws and provisions of Delaware law could have the effect of delaying, deferring or preventing an acquisition of us. These provisions include a classified board of directors and limitations on actions by our stockholders by written consent. In addition, our board of directors has the right to issue up to 2,000,000 shares of "blank check" preferred stock without stockholder approval, which could be used to dilute the stock ownership of a potential hostile acquirer. The preferred stock we issue could have mandatory redemption features, liquidation preference and other rights that are senior to the rights of common stockholders. Delaware law also imposes some restrictions on mergers and other business combinations between us and any holder of 15% or more of our outstanding common stock. Although we believe these provisions provide for an opportunity to receive a higher bid by requiring potential acquirers to negotiate with our board of directors, these provisions apply even if the offer may be considered beneficial by some stockholders.

In addition, our stockholders may not take actions by written consent and our stockholders are limited in their ability to make proposals at stockholder meetings.

Our common stock will likely be subject to substantial price and volume fluctuations due to a number of factors, some of which are beyond our control.

The trading price of our common stock has been and is likely to continue to be highly volatile. Our stock price is subject to wide fluctuations in response to a variety of factors including:

- quarterly variations in operating results;
- announcements of technological innovations;
- announcements of new software or services by us or our competitors;
- changes in financial estimates by securities analysts; or
- other events beyond our control.

In addition, the stock market has experienced significant price and volume fluctuations that have particularly affected the trading prices of equity securities of many high technology companies. These fluctuations have often been unrelated or disproportionate to the operating performance of these companies. Any negative change in the public's perception of Internet or Internet software companies or companies in the wireless communications market could depress our stock price regardless of our operating results.

Recently, when the market price of a stock has been volatile, holders of that stock have often instituted securities class action litigation against the company that issued the stock when such stock declines. If

any of our stockholders brought such a lawsuit against us, we could incur substantial costs defending the lawsuit. The lawsuit could also divert the time and attention of our management.

We expect that our future operating results could fluctuate significantly as a result of numerous factors including, but not limited to, the demand for

Edgar Filing: PUMATECH INC - Form 10-Q

our products, our success in developing new products, the timing of new product introductions by us and our competitors, the timing of releases of new handheld devices by our customers, market acceptance of our new and enhanced products, the emergence of new industry standards, the timing of customer orders, the mix of products sold, competition, the mix of distribution channels employed, the evolving and unpredictable nature of the markets for our products and mobile computing devices generally, the rate of growth of the personal computer market in general and general economic conditions.

WE MAY REQUIRE ADDITIONAL CAPITAL, WHICH WE MAY NOT BE ABLE TO OBTAIN.

The expansion and development of our business may require additional capital in the future to fund our operating losses, working capital needs and capital expenditures. Historically we have relied on the capital markets, including a private placement in March 2000 to raise money for our working capital and capital expenditure needs. The capital markets are very volatile and we may not be able to obtain future equity or debt financing in the future on satisfactory terms or at all. Our failure to generate sufficient cash flows from sales of products and services or to raise sufficient funds may require us to delay or abandon some or all of our development and expansion plans or otherwise forego market opportunities. Our inability to obtain additional capital on satisfactory terms may delay or prevent the expansion of our business, which could cause our business, operating results and financial condition to suffer.

Our working capital is primarily comprised of cash, short-term investments, accounts receivable, inventory, other current assets, accounts payable, accrued expenses, deferred revenue and current portion of notes payable. The timing and amount of our future capital requirements may vary significantly depending on numerous factors, including our financial performance, technological, competitive and other developments in our industry. These factors may cause our actual revenue and costs to vary from expected amounts, possibly to a material degree, and such variations are likely to affect our future capital requirements.

WE ARE DEPENDENT ON OUR INTERNATIONAL OPERATIONS FOR A SIGNIFICANT PORTION OF OUR REVENUES.

Our international activities expose us to additional risks. International revenue, primarily from customers based in Japan, accounted for 22% of our revenue in the six months ended January 31, 2001, 27% of revenue in fiscal 2000, and 40% of revenue in fiscal 1999. A key component of our strategy is to further expand our international activities. As we continue to expand internationally, we are increasingly subject to risks of doing business internationally, including:

- unexpected changes in regulatory requirements and tariffs;
- export controls relating to encryption technology and other export restrictions;
- political and economic instability;
- difficulties in staffing and managing foreign operations;
- reduced protection for intellectual property rights in some countries;
- longer payment cycles;

Edgar Filing: PUMATECH INC - Form 10-Q

- problems in collecting accounts receivable;
- potentially adverse tax consequences;
- seasonal reductions in business activity during the summer months in Europe and certain other parts of the world;
- fluctuations in currency exchange rates that may make our products more expensive to international customers;
- gains and losses on the conversion to U.S. dollars of accounts receivable and accounts payable arising from international operations due to foreign currency denominated sales;
- nonrefundable withholding taxes on royalty income from customers in certain countries, such as Japan and Taiwan; and
- an adverse effect on our provision for income taxes based on the amount and mix of income from foreign customers; and
- exposure to risk of non-payment by customers in foreign countries with highly inflationary economies.

Any of these risks could harm our international operations. For example, some European countries already have laws and regulations related to content distributed on the Internet and technologies used on the Internet that are more strict than those currently in force in the United States. The European Parliament has recently adopted a directive relating to the reform of copyright in the European Community that will, if made into law, restrict caching and mirroring. Any or all of these factors could cause our business and prospects to suffer.

Our international sales growth will be limited if we are unable to establish additional foreign operations, expand international sales channel management and support, hire additional personnel, customize products for local markets and develop relationships with international service providers, distributors and device manufacturers. Even if we are able to successfully expand international operations, we cannot be certain that we will succeed in maintaining or expanding international market demand for our products.

FOREIGN EXCHANGE FLUCTUATIONS COULD DECREASE OUR REVENUES OR CAUSE US TO LOSE MONEY, ESPECIALLY SINCE WE DO NOT HEDGE AGAINST CURRENCY FLUCTUATIONS.

To date, the majority of our customers have paid for our services in U.S. dollars. Through the first half of fiscal 2001 and for the fiscal years 2000 and 1999, costs denominated in foreign currencies were nominal and we had minimal foreign currency losses during those periods. However, we believe that in the future an increasing portion of our costs will be denominated in foreign currencies as we begin opening offices in Europe and other countries. Fluctuations in the value of the Yen, Euro or other foreign currencies may cause our business and prospects to suffer. We will also be exposed to increased risk of non-payment by our customers in foreign countries, especially those with highly inflationary economies. We currently do not engage in foreign exchange hedging activities and, although we have not yet experienced any material losses due to foreign currency fluctuation, our international revenues are currently subject to the risks of foreign currency fluctuations and such risks will increase as our international revenues increase.

Edgar Filing: PUMATECH INC - Form 10-Q

REGULATIONS OR CONSUMER CONCERNS REGARDING PRIVACY ON THE INTERNET COULD LIMIT MARKET ACCEPTANCE OF OUR PRODUCTS AND SERVICES.

Our products and services will allow our customers to develop and maintain Web user profiles to tailor content to specific users. Profile development involves both data supplied by the user and data derived from the user's Web site behavior. Privacy concerns may cause users to resist providing personal data or to avoid Web sites that track user behavior. In addition, legislative or regulatory requirements may heighten consumer concerns if businesses must notify Web site users that user profile data may be used to direct product promotion and advertising to users. Other countries and political entities, such as the European Economic Community, have adopted such legislation or regulatory requirements. The United States may do so in the future. If privacy legislation is enacted or consumer privacy concerns limit the market acceptance of personalization software, our business, financial condition and operating results could be harmed.

We use cookies to provide users convenient access to the Web sites they are minding and to track demographic information and user preferences. A cookie is information keyed to a specific user that is stored on a computer's hard drive, typically without the user's knowledge. Cookies are generally removable by the user, although removal could affect the content available on a particular site. A number of governmental bodies and commentators in the United States and abroad have urged passage of laws limiting or abolishing the use of cookies. If such laws are passed or if users begin to delete or refuse cookies as a common practice, market demand for our products and services could be reduced.

INCREASING GOVERNMENT REGULATION COULD CAUSE DEMAND FOR OUR PRODUCTS AND SERVICES TO GROW MORE SLOWLY OR TO DECLINE.

We are subject not only to regulations applicable to businesses generally, but also to laws and regulations directly applicable to the Internet. Demand for our products in certain countries, and our ability to meet this demand, is subject to export controls on hardware and on the encryption software incorporated into our products. In addition, state, federal and foreign governments may adopt laws and regulations governing any of the following issues:

- user privacy;
- taxation of electronic commerce;
- the online distribution of specific material or content; and
- the characteristics and quality of online products and services.

One or more states or the federal government could enact regulations aimed at companies like us, which provide software that facilitates e-commerce and the distribution of content over the Internet. The likelihood of the enactment of regulation in these areas will increase as the Internet becomes more pervasive and extends to more people's daily lives. Any legislation, regulation or taxation of or concerning electronic commerce could dampen the growth of the Internet and decrease its acceptance as a communications and commercial medium. If a reduction in growth occurs as a result of these events, demand for our Internet service and other products could decline significantly.

ACTIONS BY MAJOR WEB SITE PROVIDERS TO BLOCK OUR SOFTWARE FROM MINDING THEIR SITES COULD LIMIT MARKET ACCEPTANCE OF OUR PRODUCTS.

Edgar Filing: PUMATECH INC - Form 10-Q

One of the primary benefits of our products and services is that they bring users back to a Web site through click-throughs on links within our change notifications. This is generally very beneficial to Web site providers. These providers do, however, have the ability to detect our monitoring of their sites and could block our access to their site. Widespread blocking by major Web sites could seriously limit market acceptance of our products.

THERE ARE MANY COMPANIES PROVIDING COMPETING PRODUCTS AND SERVICES.

There are few substantial barriers to entry and we expect that we will face additional competition from existing competitors and new market entrants in the future.

We currently face direct competition with respect to MAP and its individual elements--Sync-it, Browse-it and Mind-it, and Intellisync.com. MAP infrastructure faces competition from Aether Software, IBM Corporation, Microsoft Corporation, Openwave Systems, Inc., OracleMobile, Inc. and Wireless Knowledge, Inc. Sync-it's synchronization features face competition from Aether, Chapura, Inc., Extended Systems, Inc. (recently acquired by Palm, Inc), FusionOne, Inc., Motorola, Inc., Openwave and Synchrologic, Inc. Browse-it's transformation and mobile content distribution features face competition from AvantGo, Bluelark Systems, Inc. (recently acquired by Handspring, Inc.), 4thpass LLC, Qualcomm, Inc., and ThinkersGroup, Inc. In the area of alerts, change detection and analytics, Mind-it faces competition from Adeptra, Inc., Alerts.com, Inc., BroadVision, Inc., Categorical Software Corporation and MicroStrategy, Inc. Intellisync.com faces competition from FusionOne, InfoSpace, Inc., Palm, Synchrologic, and Visto Corporation. In addition to direct competition noted above, we face indirect competition from existing and potential customers that may provide internally developed solutions to each of the elements of MAP.

Many of our competitors have substantially greater financial, technical and marketing resources, larger customer bases, longer operating histories, greater name recognition and more established relationships in the industry than we do. Our larger competitors may be able to provide customers with additional benefits in connection with their Internet systems and network solutions, including reduced communications costs. As a result, these companies may be able to price their products and services more competitively than we can and respond more quickly than us to new or emerging technologies and changes in customer requirements. If we are unable to compete successfully against our current or future competitors, we may lose market share, and our business and prospects would suffer.

Increased competition could result in:

- price and revenue reductions and lower profit margins;
- loss of customers or failure to obtain additional customers; and
- loss of market share.

Any one of these could materially and adversely affect our business, financial condition and results of operations.

35

THE INTEGRATION OF KEY NEW EMPLOYEES AND OFFICERS INTO OUR MANAGEMENT TEAM HAS INTERFERED, AND WILL CONTINUE TO INTERFERE, WITH OUR OPERATIONS.

We have recently hired a number of key employees to our professional services

Edgar Filing: PUMATECH INC - Form 10-Q

organization, administrative and sales and marketing groups. To integrate into our company, new employees must spend a significant amount of time learning our business model and management system, in addition to performing their regular duties. Accordingly, the integration of new personnel has resulted and will continue to result in some disruption to our ongoing operations. If we fail to complete this integration in an efficient manner, our business and financial results will suffer.

WE MUST RETAIN AND ATTRACT KEY EMPLOYEES OR ELSE WE MAY NOT GROW OR BE SUCCESSFUL.

We are highly dependent on key members of our management and engineering staff. The loss of one or more of these officers or key employees might impede the achievement of our business objectives. Furthermore, recruiting and retaining qualified technical personnel to perform research, development and technical support is critical to our success. If our business grows, we will also need to recruit a significant number of management, technical and other personnel for our business. Competition for employees in our industry and geographic location is intense. We may not be able to continue to attract and retain skilled and experienced personnel on acceptable terms.

OUR FAILURE TO ADEQUATELY PROTECT OUR PROPRIETARY RIGHTS MAY HARM OUR COMPETITIVE POSITION.

We rely on a combination of patents, copyrights, trademark, service mark and trade secret laws and contractual restrictions to establish and protect proprietary rights in our products and services. However, we will not be able to protect our intellectual property if we are unable to enforce our rights or we do not detect unauthorized use of our intellectual property.

Although we currently have 12 issued United States patents and have an additional 12 patent applications pending, we cannot be certain that such patents and patent applications will provide an adequate level of intellectual property protection. In addition, we have corresponding international patent applications pending under the Patent Cooperation Treaty in countries to be designated at a later date. We cannot be certain that any pending or future patent applications will be granted, that any pending or future patents will not be challenged, invalidated or circumvented, or that rights granted under any patent that may be issued will provide competitive advantages to us.

We have also provided our source code under escrow agreements and to foreign translators which may increase the likelihood of misappropriation by third parties.

We have applied for trademarks and service marks on certain terms and symbols that we believe are important for our business. However, the steps we have taken to protect our technology or intellectual property may be inadequate. Our competitors may independently develop technologies that are substantially equivalent or superior to ours. Moreover, in other regions where we do business, such as in Africa, Asia-Pacific and Europe, there may not be effective legal protection of patents and other proprietary rights that we believe are important to our business.

As a matter of company policy, we enter into confidentiality and assignment agreements with our employees, consultants and vendors. We also control access to and distribution of our software, documents and other proprietary information. Notwithstanding these precautions, it may be possible for an unauthorized third party to copy or otherwise obtain and use our software or other proprietary information or to develop similar software independently. Policing unauthorized use of our products is difficult, particularly because the global nature of the Internet makes it difficult to control the ultimate destination or security of software and other transmitted data. The laws of

other countries may afford us

36

little or no effective protection of our intellectual property. The steps we have taken to prevent misappropriation of our technology, including entering into agreements for that purpose may be insufficient. In addition, litigation may be necessary in the future to enforce our intellectual property rights, to protect our trade secrets, to determine the validity and scope of the proprietary rights of others or to defend against claims of infringement or invalidity. Such litigation, whether successful or unsuccessful, could result in substantial costs and diversions of our management resources, either of which could harm our business.

WE MAY BE UNABLE TO LICENSE NECESSARY TECHNOLOGY AND IT MAY BE SUBJECT TO INFRINGEMENT CLAIMS BY THIRD PARTIES.

Our commercial success will also depend in part on not infringing the proprietary rights of others and not breaching technology licenses that cover technology used in our products. It is uncertain whether any third party patents will require us to develop alternative technology or to alter our products or processes, obtain licenses or cease activities that infringe on third party's intellectual property rights. If any such licenses are required, we may not be able to obtain such licenses on commercially favorable terms, if at all. Our failure to obtain a license to any technology that we may require to commercialize our products and services could cause our business and prospects to suffer. Litigation may also be necessary to enforce any patents issued or licensed to us or to determine the scope and validity of third party proprietary rights.

WE ARE DEPENDENT ON NON-EXCLUSIVE LICENSES FOR CERTAIN TECHNOLOGY INCLUDED IN OUR PRODUCTS.

We depend on development tools provided by a limited number of third party vendors. Together with application developers, we rely primarily upon software development tools provided by companies in the PC and mobile computing device industries. If any of these companies fail to support or maintain these development tools, we will have to support the tools ourselves or transition to another vendor. Any maintenance or our support of the tools or transition could be time consuming, could delay product release and upgrade schedule and could delay the development and availability of third party applications used on our products. Failure to procure the needed software development tools or any delay in availability of third party applications could negatively impact our ability and the ability of third party application developers to release and support our products or they could negatively and materially affect the acceptance and demand for our products, business and prospects.

The risks associated with such non-exclusive third party licenses:

- If we are unable to continue to license the technology or to license other necessary technologies for use with our products or if there are substantial increases in royalty payments under third-party licenses, it could jeopardize our operating results.
- The effective implementation of our products depends upon the successful operation of these licenses in conjunction with our products, and therefore any undetected errors in products resulting from such licenses may prevent the implementation or impair the functionality of our products, delay new product introductions and injure our reputation. Such problems could have a material adverse

Edgar Filing: PUMATECH INC - Form 10-Q

effect on our business, operating results and financial condition.

- Although we are generally indemnified against claims that the third party technology we license infringes the proprietary rights of others, this indemnification is not always available for all types of intellectual property rights (for example, patents may be excluded) and, in some cases, the scope of such indemnification is limited. Even if we receive broad indemnification, third party indemnitors are not always well-capitalized and

37

may not be able to indemnify us in the event of infringement, resulting in substantial exposure to us. There can be no assurance that infringement or invalidity claims arising from the incorporation of third party technology in our products, and claims for indemnification from our customers resulting from these claims, will not be asserted or prosecuted against us. These claims, even if not meritorious, could result in the expenditure of significant financial and managerial resources in addition to potential product redevelopment costs and delays, all of which could materially adversely affect our business, operating results and financial condition.

OUR PRODUCTS MAY CONTAIN PRODUCT ERRORS THAT COULD SUBJECT US TO PRODUCT LIABILITY CLAIMS.

Our products may contain undetected errors or failures when first introduced or as new versions are released, which can result in loss of or delay in market acceptance and could adversely impact future operating results. We do not currently maintain product liability insurance. Although our license agreements contain provisions limiting our liability in the case of damages resulting from use of the software, in the event of such damages, we may be found liable, and in such event such damages could materially affect our business, operating results and financial condition.

SYSTEM FAILURES OR ACCIDENTAL OR INTENTIONAL SECURITY BREACHES COULD DISRUPT OUR OPERATIONS, CAUSE US TO INCUR SIGNIFICANT EXPENSES, EXPOSE US TO LIABILITY AND HARM OUR REPUTATION.

Our operations depend upon our ability to maintain and protect our computer systems, which are located at our offices in California and New Hampshire. Our systems are vulnerable to damage from break-ins, unauthorized access, vandalism, fire, floods, earthquakes, power loss, telecommunications failures and similar events. Although we maintain insurance against break-in, unauthorized access, vandalism, fires, floods, earthquakes and general business interruptions, the amount of coverage may not be adequate in any particular case, and will not likely compensate us for all the damages caused by these or similar events. We may be unable to prevent computer programmers or hackers from penetrating our network security from time to time. A breach of our security could seriously damage our reputation, which would harm our business. In addition, because a hacker who penetrates our network security could misappropriate proprietary information or cause interruptions in our services, we might be required to expend significant resources to protect against, or to alleviate, problems caused by hackers. We might also face liability to persons harmed by misappropriation of secure information if it is determined that we did not exercise sufficient care to protect our systems.

38

Edgar Filing: PUMATECH INC - Form 10-Q

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to a variety of risks, including changes in interest rates, foreign currency fluctuations, marketable equity security prices and market values of our investments which could impact our results of operations and financial condition. We currently do not utilize derivative financial instruments to hedge such risks.

At January 31, 2001, we had an investment portfolio of fixed income securities excluding those classified as cash and cash equivalents and securities available for sale of \$27,492,000. These securities, like all fixed income instruments, are subject to interest rate risk and will fall in values if market interest rates increase. If market interest rates were to increase immediately and uniformly by 10% from levels as of January 31, 2001, the decline of the fair value of the portfolio would be immaterial. Our fixed income investments have maturities of less than one year. While we have the intent to hold our fixed income investments until maturity to avoid recognizing an adverse impact in income or cash flows in the event of an increase in market interest rates, there can be no assurance that we will be able to do so.

Due to the recent energy crisis in California that has caused a dramatic change in the financial position of PG&E Corporation, PG&E has defaulted on the interest and principal payments of its commercial paper obligations. Our investment portfolio includes the PG&E commercial paper. Accordingly, we recorded an adjustment of approximately \$197,000 to the value of our PG&E commercial paper for the impairment of this security. This adjustment is reflected in "Other income, net" in Condensed Consolidated Statements of Operations for the three and six months ended January 31, 2001.

To date, substantially all of our recognized revenue has been denominated in U.S. dollars and generated primarily from customers in the United States, and our exposure to foreign currency exchange rates has been immaterial. We expect, however, that more product and service revenue may also be derived from international markets and may be denominated in the currency of the applicable market in the future. As a result, our operating results may become subject to significant fluctuations based upon changes in exchange rates of certain currencies in relation to the U.S. dollar. We will also be exposed to increased risk of non-payment by our customers in foreign countries, especially those of highly inflationary economies. Furthermore, to the extent that we engage in international sales denominated in U.S. dollars, an increase in the value of the U.S. dollar relative to foreign currencies could make our products and services less competitive in international markets. Although we will continue to monitor our exposure to currency fluctuations, and, when appropriate, may use financial hedging techniques in the future to minimize the effect of these fluctuations, we cannot be assured that exchange rate fluctuations will not adversely affect our financial results in the future.

We are subject to equity price risks on the marketable portion of investments in publicly traded equity securities. These investments are generally in companies having operations or technology in areas within our strategic focus. We do not attempt to reduce or eliminate our market exposure on these securities. At January 31, 2001, the fair value of these investments is \$17,000. We believe that a decline in the investments' fair values would not adversely impact our results of operations.

We are a limited partner in a venture capital fund and invest directly in equity instruments of privately-held companies, which include a number of our strategic partners who are customers and vendors, for business and strategic purposes. These investments are included in other long-term assets and are accounted for under the cost method as ownership is less than 5% and we do

Edgar Filing: PUMATECH INC - Form 10-Q

not have the ability to exercise significant influence over operations. At January 31, 2001, these investments amounted to \$3,432,000 (See Note 4 of the notes to the condensed consolidated financial statements for more details.) For these investments, we regularly review the assumptions underlying the operating performance and cash flow forecasts in assessing the carrying values. We identify and record impairment losses when events and circumstances indicate that such assets might be impaired. To date, no such impairment has been

39

recorded. Although we will continue to assess the carrying values of our investments, we cannot be assured that a decline in value of our investments will not adversely affect our financial results in the future. Futhermore, given the recent economic downturn and its effect on the capital markets, we cannot be assured that these investments can be fully recouped if at all.

40

PUMATECH, INC.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS - Not Applicable

ITEM 2. CHANGES IN SECURITIES AND USE OF PROCEEDS

On November 7, 2000 and in connection with the acquisition of certain assets of SwiftTouch Corporation, we issued 100,000 shares of common stock to SwiftTouch. The issuance of these shares was exempt from registration under Section 4(2) of the Securities Act of 1933. The resale of these shares and other shares issued in connection with the acquisitions of Dry Creek Software and The Windward Group has been registered on a Registration Statement on Form S-3 filed with the Securities and Exchange Commission on December 4, 2000.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES - Not Applicable

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

On December 6, 2000, the Company held its annual meeting of stockholders. At that meeting, the following individuals were elected to serve as directors until the next annual meeting of stockholders or until their earliest resignation or removal:

NOMINEE	FOR	WITHHELD	AGAINST
Bradley A. Rowe.....	36,808,789	409,818	0
Stephen A. Nicol.....	34,257,519	2,961,088	0
Michael M. Clair.....	36,815,579	403,028	0
Tyrone F. Pike*.....	35,789,852	1,428,755	0

Edgar Filing: PUMATECH INC - Form 10-Q

M. Bruce Nakao.....	34,228,923	2,989,684	0
Gary Rieschel**.....	34,060,352	3,158,255	0

* Resigned on December 22, 2000

**Resigned on January 30, 2001

Also at that meeting, the following matters were voted upon with the number of votes cast for, against or withheld as set forth in the columns opposite the respective matters.

MATTER	FOR	AGAINST	ABSTAIN
To approve an amendment to the Puma Technology, Inc. Amended and Restated 1993 Stock Option Plan to increase the number of shares of Common Stock reserved for issuance thereunder by 500,000 shares.....	31,624,762	5,503,934	89,911

41

MATTER	FOR	AGAINST	ABSTAIN
To approve an amendment to Pumatech's Certificate of Incorporation to change the name from Puma Technology, Inc. to Pumatech, Inc.....	37,085,624	491,186	41,797
To approve an amendment to Pumatech's Certificate of Incorporation to increase the number of authorized shares of Common Stock from 60,000,000 to 80,000,000.....	36,477,239	672,644	68,724
To ratify the appointment of PricewaterhouseCoopers LLP as Pumatech's independent public accountant for the fiscal year ending July 31, 2001.....	37,115,111	46,784	56,712

ITEM 5. OTHER INFORMATION - Not Applicable

ITEM 6. EXHIBITS AND REPORTS ON FORM 8-K.

(a) EXHIBITS.

3.1 Certificate of Amendment of Restated Certificate

Edgar Filing: PUMATECH INC - Form 10-Q

of Incorporation dated December 19, 2000.

(b) REPORTS ON FORM 8-K.

Report on Form 8-K dated December 20, 2000 reporting change of corporate name from Puma Technology, Inc. to Pumatech, Inc. and resignation of Tyrone Pike as a member of Pumatech's Board of Directors.

Report on Form 8-K dated January 29, 2001 reporting cancellation and Replacement of Options and resignation of Gary Rieschel as a member of Pumatech's Board of Directors.

42
