GRUPO FINANCIERO GALICIA S.A.

(Exact name of Registrant as specified in its charter)

GALICIA FINANCIAL GROUP

(Translation of Registrant's name into English)

REPUBLIC OF ARGENTINA

(Jurisdiction of incorporation or organization)

Grupo Financiero Galicia S.A.

Tte. Gral. Juan D. Perón 456

C1038 AAJ-Buenos Aires, Argentina

(Address of principal executive offices)

Pedro Richards, Managing Director

Tel: 54 11 4 343 7528 / Fax: 54 11 4 331 9183, prichards@gfgsa.com

Perón 456, 2° Piso C1038AAJ Buenos Aires ARGENTINA

(Name, Telephone, E-mail and/or Facsimile number and Address of Company Contact Person)

Securities registered or to be registered pursuant to Section 12(b) of the Act:

Class B Ordinary Shares, Ps. 1.00 par value, each ten shares of which are represented by an American Depositary Share

Securities registered or to be registered pursuant to Section 12(g) of the Act:

None

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act:

None

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report:

Class A Ordinary Shares, Ps. 1.00 par value	281,221,650
Class B Ordinary Shares, Ps. 1.00 par value	960,185,367

Edgar Filing: GRUPO FINANCIERO GALICIA SA - Form 20-F

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).
Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and larger accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP

International Financial Reporting Standards

Other

As issued by the International Accounting Standards Board

Indicate by check mark which financial statement item the registrant has elected to follow. Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

PRESENTATION OF FINANCIAL INFORMATION

Grupo Financiero Galicia S.A. (Grupo Financiero Galicia) is a financial services holding company incorporated in Argentina and is one of Argentina's largest financial services groups. In this annual report, references to we, our, and us are to Grupo Financiero Galicia and its consolidated subsidiaries, except where otherwise noted. Our consolidated financial statements consolidate the accounts of the following companies:

Grupo Financiero Galicia S.A.;

Banco de Galicia y Buenos Aires S.A., our largest subsidiary, its wholly-owned subsidiary Banco Galicia Uruguay S.A., (Galicia Uruguay), Galicia Uruguay's subsidiaries and other subsidiaries and affiliated companies required to be consolidated under Argentine Banking GAAP (collectively Banco Galicia or the Bank except where otherwise noted);

Tarjetas Regionales S.A., a wholly owned subsidiary of the Bank, and its operating subsidiaries;

Sudamericana Holding S.A., and its subsidiaries;

Galicia Warrants S.A.;

Net Investment S.A., and its subsidiaries;

Galval Agente de Valores S.A.; and

GV Mandataria de Valores S.A. (GV Mandataria).

We maintain our financial books and records in Argentine Pesos and prepare our financial statements in conformity with the accounting rules of the Argentine Central Bank, which entity prescribes the generally accepted accounting principles for all financial institutions in Argentina. This annual report refers to those accounting principles as

Argentine Banking GAAP. Argentine Banking GAAP differs in certain relevant respects from generally accepted accounting principles in Argentina, which we refer to as Argentine GAAP. Argentine Banking GAAP also differs in certain significant respects from the generally accepted accounting principles in the United States, which we refer to as U.S. GAAP. See note 33 to our consolidated audited financial statements included in this annual report for a description of the differences between Argentine GAAP and Argentine Banking GAAP, and Item 5. Operating and Financial Review and Prospects-Item 5.A. Operating Results-U.S. GAAP and Argentine Banking GAAP Reconciliation and note 35 to our consolidated audited financial statements for a reconciliation of the principal differences between Argentine Banking GAAP and U.S. GAAP and a reconciliation to U.S. GAAP of our net income and total shareholders' equity for the three fiscal years ended December 31, 2008.

In this annual report, references to US\$, US Dollars, and Dollars are to United States Dollars and references to Ps. Pesos are to Argentine Pesos. The exchange rate used in translating Pesos into US Dollars and used in calculating the convenience translations included in the following tables is the Reference Exchange Rate which is published by the Argentine Central Bank and which was Ps. 3.4537, Ps. 3.1510 and Ps. 3.0695 per US\$1.00 as of December 31, 2008, December 31, 2007 and December 31, 2006, respectively. The exchange rate translations contained in this annual report should not be construed as representations that the stated Peso amounts actually represent or have been or could be converted into US Dollars at the rates indicated or at any other rate.

Table of Contents

Our fiscal year ends on December 31, and references in this annual report to any specific fiscal year are to the twelve-month period ended December 31 of such year.

References to the Government are to the Argentine Federal Government unless otherwise indicated.

In 2002, Argentina experienced high inflation. As a result, for periods between July 17, 2002, and February 28, 2003, financial information may have been adjusted to account for inflation. However, information included in this annual report as of and for the five fiscal years ended December 31, 2008 does not include any effects of inflation accounting. Unless otherwise indicated, all information regarding deposit and loan market shares and other financial industry information has been derived from information published by the Argentine Central Bank.

We have expressed all amounts in millions of Pesos, except percentages, ratios, multiples and per-share data.

In this annual report, we refer to the 2001-2002 crisis as the series of events that unfolded in Argentina between late 2001 and 2002, a period of great political, economic and social instability, with severe consequences for the Argentine economy by any variable used as a measure, including a banking crisis, and a material negative impact on financial institutions operating in Argentina, including us. The 2001-2002 crisis triggered a series of far reaching measures that produced structural changes in the Argentine economy and legal framework.

Also, in this annual report, asymmetric pesification refers to the compulsory conversion in January 2002 of most Dollar-denominated assets and certain Dollar-denominated liabilities held by financial institutions operating in Argentina, into Peso-denominated assets and liabilities at different exchange rates. In addition, Compensatory Bond and Hedge Bond refer to the bonds that the Government issued to the Bank (as well as to other financial institutions), as compensation for the negative effects of the asymmetric pesification on the Bank's and other financial institutions financial condition. This is more fully described in Item 4. Information on the Company-Government Regulation-Compensation to Financial Institutions.

FORWARD LOOKING STATEMENTS

This annual report contains forward-looking statements that involve substantial risks and uncertainties, including, in particular, statements about our plans, strategies and prospects under the captions Item 4. Information on the Company- Capital Investments and Divestitures , Item 5.A. Operating Results-Principal Trends and Item 5.B.

Liquidity and Capital Resources . All statements other than statements of historical facts contained in this annual report (including statements regarding our future financial position, business strategy, budgets, projected costs and management's plans and objectives for future operations) are forward-looking statements. In addition, forward-looking statements generally can be identified by the use of such words as may, will, expect, intend, estimate, anticipate, believe, continue or other similar terminology. Although we believe that the expectations reflected in these forward-looking statements are reasonable, no assurance can be provided with respect to these statements. Because these statements are subject to risks and uncertainties, actual results may differ materially and adversely from those expressed or implied by such forward-looking statements. Factors that could cause actual results to differ materially and adversely from those contemplated in such forward-looking statements include but are not limited to:

- changes in general political, legal, social or other conditions in Argentina;
- changes in capital markets in general that may affect policies or attitudes toward lending to Argentina or Argentine companies, including expected or unexpected turbulence or volatility in domestic or international financial markets such as the ongoing global economic slowdown;

Table of Contents

changes in regional, national and international business and economic conditions, including inflation; changes in government regulation, including tax regulations and changes in or failures to comply with banking or other regulations;

increased competition in the banking, financial services, credit card services, insurance, asset management and related industries;

changes in interest rates which may, among other things, adversely affect margins;

a loss of market share by any of our main businesses;

a change in the credit cycle and increased borrowers defaults;

our inability to sustain or improve our performance;

our inability to obtain additional debt or equity financing on attractive conditions or at all, which may limit our ability to fund existing operations and to finance new activities;

technological changes, changes in consumer spending and saving habits, our inability to implement new technologies, and

other factors discussed under Item 3. Key Information-Risk Factors in this annual report.

You should not place undue reliance on forward-looking statements, which speak only as of the date that they were made. Moreover, you should consider these cautionary statements in connection with any written or oral forward-looking statements that we may issue in the future. We do not undertake any obligation to release publicly any revisions to forward-looking statements after completion of this annual report to reflect later events or circumstances or to reflect the occurrence of unanticipated events.

In light of the risks and uncertainties described above, the forward-looking events and circumstances discussed in this annual report might not occur and are not guarantees of future performance.

Table of Contents**PART I****Item 1. Identity of Directors, Senior Management and Advisers**

Not applicable.

Item 2. Offer Statistics and Expected Timetable

Not applicable.

Item 3. Key Information**Item 3.A. Selected Financial Data**

The following table presents summary historical financial and other information about us as of the dates and for the periods indicated.

Our financial statements do not include any effect for inflation accounting.

The selected consolidated financial information as of December 31, 2008 and December 31, 2007 and for the fiscal years ended December 31, 2008, 2007 and 2006 has been derived from our audited consolidated financial statements included in this annual report. The selected consolidated financial information as of December 31, 2006, December 31, 2005 and December 31, 2004 and for the fiscal years ended December 31, 2005 and December 31, 2004 has been derived from our audited consolidated financial statements not included in this annual report.

You should read this data in conjunction with Item 5. Operating and Financial Review and Prospects and our audited consolidated financial statements included in this annual report.

Table of Contents

- (1) *The exchange rate used to convert the December 31, 2008 amounts into US Dollars was Ps. 3.4537 per US\$1.00. All amounts are stated in millions of Pesos, except inflation and exchange rates, percentages, ratios, multiples and per-share data.*
- (2) *Net financial income primarily represents income from interest on loans and other receivables resulting from financial brokerage plus net income from government and corporate debt securities, including gains and losses, minus interest on deposits and other liabilities from financial intermediation and monetary loss from financial brokerage. It also includes the CER adjustment.*
- (3) *Includes primarily liabilities with other banks and international entities. Until December 31, 2006, debt with the Argentine Central Bank was also included.*
- (4) *The average balances of assets, including the related interest that is due are calculated on a daily basis for Banco Galicia and for Galicia Uruguay, as well as for Tarjetas Regionales S.A consolidated with its operating subsidiaries, and on a monthly basis for Grupo Financiero Galicia and its non-banking subsidiaries.*
- (5) *Net interest earned divided by interest-earning assets. For a description of net interest*

earned, see Item 4.

*Information on the
Company-Selected Statistical
Information-Interest-Earning
Assets-Net Yield on
Interest-Earning Assets .*

- (6) Financial margin represents net financial income divided by average interest-earning assets.*
- (7) Net income excluding minority interest as a percentage of average total assets.*
- (8) Net income as a percentage of average shareholders equity.*
- (9) Operating income is defined as net financial income plus net income from services.*
- (10) Administrative expenses as a percentage of operating income as defined above.*
- (11) Past-due loans are defined as the aggregate principal amount of a loan plus any accrued interest that is due and payable for which either the principal or any interest payment is 91 days or more past due.*
- (12) Non-Accrual loans are defined as those loans in the categories of: (a) Consumer portfolio: Medium Risk, High Risk, Uncollectible, and Uncollectible Due to Technical Reasons; and (b) Commercial portfolio: With problems, High Risk of Insolvency, Uncollectible, and Uncollectible Due to*

Technical Reasons .

(13) *Charge-offs plus direct charge-offs minus bad debts recovered.*

(14) *As measured by the annual change in the end-of-period Wholesale Price Index (WPI), published by INDEC.*

(15) *As measured by the annual change in the end-of-period Consumer Price Index (CPI), published by INDEC.*

(16) *Annual change in the end-of-period exchange rate expressed in Pesos per US Dollar.*

(17) *The CER is the Coeficiente de Estabilización de Referencia, an adjustment coefficient based on changes in the Consumer Price Index, which became effective February 3, 2002.*

(18) *The CVS is the Coeficiente de Variación Salarial, an adjustment coefficient based on the variation of salaries, which was effective between October 1, 2002 and March 31, 2004. The percentage disclosed for fiscal year 2004 corresponds to the variation between January 1, 2004 and March 31, 2004.*

Exchange Rate Information

The following table sets forth the annual high, low, average and period-end exchange rates for US Dollars for the periods indicated, expressed in Pesos per Dollar and not adjusted for inflation.

	Exchange Rate ⁽¹⁾			
High	Low	Average ^{(2) (3)}	Period-End	

		<i>(in Pesos per US Dollar)</i>		
2004	3.0718	2.8037	2.9415 ⁽³⁾	2.9738
2005	3.0523	2.8592	2.9233 ⁽³⁾	3.0315
2006	3.1072	3.0305	3.0740 ⁽³⁾	3.0695
2007	3.1797	3.0553	3.1154 ⁽³⁾	3.1510
2008	3.4537	3.0128	3.1623 ⁽³⁾	3.4537
December 2008	3.4537	3.3763	3.4226	3.4537
January 2009	3.4875	3.4497	3.4640	3.4875

Item 3.D. Risk Factors

You should carefully consider the risks described below in addition to the other information contained in this annual report. In addition, most, if not all, of the risks described below must be evaluated bearing in mind that our most important asset is our equity interest in Banco Galicia, thus, a material change in Banco Galicia's shareholders' equity or income statement would also adversely affect our businesses and results of operations. We may also face risks and uncertainties that are not presently known to us or that we currently deem immaterial, which may impair our business. Our operations, property and customers are located mainly in Argentina. Accordingly, the quality of our customer portfolio, loan portfolio, financial condition and results of operations depend, to a significant extent, on the macroeconomic and political conditions prevailing in Argentina. In general, the risk assumed when investing in the securities of issuers from countries such as Argentina, is higher than when investing in the securities of issuers from developed countries.

Risk Factors Relating to Argentina

A contraction in the domestic economy as well as a deterioration in market conditions could adversely affect the financial system and Grupo Financiero Galicia

Grupo Financiero Galicia's results of operations may be affected by inflation, fluctuations in the exchange rate, modifications of the interest-rate, changes in the Government's policies (including, among others, foreign investment or tax policies), social instability and other political, economic or international developments in Argentina or other changes somehow affecting the country. It should be taken into account that the Government has exercised and currently exercises a marked influence on the Argentine economy.

It cannot be assured that any change in the future, including the enacting of regulations by Argentine authorities, will not substantially and adversely affect the financial position or the results of operations of private sector companies, including us, as has happened in the past.

Argentina's political and economic instability is still high and could continue to affect the economy and our business

During 2001 and 2002, Argentina went through a period of great political, economic and social instability, leading to the early resignation of the President, the default on Argentina's sovereign debt and the devaluation of the Argentine Peso, after more than 10 years of fixed exchange-rate parity with the US Dollar.

Even though the Government succeeded in stabilizing the main macroeconomic variables, such as the exchange-rate and domestic prices, allowing for the continuous growth of the Gross Domestic Product (GDP), some analysts believe that the growth of some indicators of the national economy and the stabilization achieved cannot be sustainable in the mid- and long term.

Table of Contents

Despite the recent economic growth, Argentina may, in the future, experience another economic recession, which could include high inflation and unemployment rates. Consequently, our results of operations as well as the results of operations of our subsidiaries, including Banco Galicia, could be substantially and adversely affected.

Inflation may rise and undermine the economy and our business

In January 2002, following the decision to abandon the fixed exchange-rate regime set forth in the Convertibility Law (pursuant to which, from April 1, 1991 to January 7, 2002, the Peso was freely convertible into U.S. Dollars on a one-to-one basis), the devaluation of the Peso had an effect on the domestic price system and led to inflation in 2002 after several years of price stability.

According to the data provided by the *Instituto Nacional de Estadísticas y Censos* (INDEC, National Institute for Statistics and Census), in 2008 the inflation rate, measured using the consumer prices index, was 7.2%, in comparison to 8.5% in 2007 and 9.8% in 2006, in each case measured against the consumer prices in the immediately preceding year. Other price indexes, however, such as those reflecting construction prices and producers' prices, showed an increasing trend in the last two years despite the decrease in consumer inflation as measured by INDEC, which has generated a significant debate over the correct measurement and the possible understatement of the CPI by INDEC. Inflation may continue to increase or significantly accelerate going forward. Given the current uncertainties, it is not possible to assure you that inflation will not increase. In the past, inflation materially undermined the Argentine economy and the Government's ability to create conditions that promote economic growth. In addition, high inflation or high volatility in inflation rates would negatively and materially affect the financial system's volume of operations, making it difficult for Banco Galicia to continue with the development of its financial intermediation activities and possibly negatively impacting Argentina's level of economic activity and employment.

High inflation would also undermine Argentina's foreign competitiveness, with the same negative effect on the level of economic activity, employment, real salaries, consumption and interest-rates. High volatility of economic variables and uncertainty would also shorten contractual terms and would erode economic agents' planning and decision making capacity, affecting the economic activity. All of these factors would adversely affect us, our business, financial condition, results of operations and prospects.

A significant devaluation of the Peso may adversely affect the Argentine economy and us

It cannot be assured that in the future, and due to various local and international circumstances, there will not be abrupt fluctuations in the value of the Peso. Since the second half of 2008, due to domestic and foreign factors, the Peso has devaluated versus the US Dollar.

Despite the positive effects of the real depreciation of the Peso in 2002 on the competitiveness of certain sectors of the Argentine economy, such depreciation has had a far-reaching negative impact on the Argentine economy in general, as well as on businesses' and individuals' financial condition. The devaluation of the Peso had a negative impact on the ability of Argentine businesses to honor their debt denominated in foreign currency, led to high inflation, strongly reduced real wages and had a negative impact on businesses whose activity was dependent on domestic market demand, such as utilities and the financial industry. The Government's ability to honor its foreign debt obligations was also negatively affected.

If the Peso were to significantly depreciate again, the related negative effects on the Argentine economy could occur again, with adverse consequences on our business, financial condition, results of operations and prospects.

Table of Contents

Argentina's economy remains vulnerable to external shocks which could have an adverse effect on the country's economic growth and on our prospects. In addition, the Argentine economy is vulnerable to the ongoing economic crisis in the United States of America

Financial and securities markets in Argentina are influenced, to varying degrees, by economic and market conditions in other countries. Although said conditions vary from country to country, investor reactions to events occurring in one country may substantially affect capital available to issuers (and the price of the securities of issuers) in other countries, with similar characteristics, including Argentina. Lower capital inflows and declining securities prices negatively affect the real economy of a country through higher interest-rates or exchange-rate volatility.

In the past, Argentina's economy was adversely affected by developments in other markets, such as, among others, the events that occurred in Mexico at the end of 1994 and the collapse of several Asian economies between 1997 and 1998. There is a risk that similar events may affect the Argentine economy in the future.

Argentina may also be affected by the economic conditions of major trade partners, such as Brazil, or countries such as the United States, that are significant trade partners and/or have influence over world economic cycles. If these countries' economies entered into a recession, the negative effect on the Argentine economy would stem from a decrease in Argentine exports, which would reduce the country's economic growth. All of these factors would have a negative impact on us, our business, operations, financial condition and prospects.

In addition, at the end of 2007 and in early 2008, the United States' economy started to show signs of weakness, stemming from the uncertainty provoked by the course of the world economy. The crisis in the subprime mortgage market in the United States spread quickly into other geographical regions, such as Europe, Asia, and even Latin America.

As a consequence of said financial and economic crisis, the world's major economies have entered into recessions or have shown a marked fall in their economic activities and this crisis could trigger a less favorable or an unfavorable international environment for Argentina, forcing domestic policy adjustments, which could trigger lower growth and adversely affect us, our business, financial condition, results of operations and prospects.

A decline in international prices for Argentina's main commodity exports could have an adverse effect on Argentina's economic growth and on us

Argentina's financial recovery from the 2001-2002 crisis has been significantly assisted by the increase in commodity prices, including its main commodity exports, such as soy. High commodity prices have contributed to the increase in the value of Argentine exports since the third quarter of 2002 and to high Government revenues from taxes on exports. The prices of the commodities that Argentina exports have decreased relative to their 2008 levels, affecting export levels in 2009. If prices continue to fall, the growth of the Argentine economy, as well as its exports, could be adversely affected. Such occurrence would have a negative impact on the levels of Government revenues and the Government's ability to service its debt, and could either generate recessionary or inflationary pressures, depending on the Government's reaction. Either of these results would adversely impact us, our business, financial condition, results of operations and prospects.

Argentina's ability to obtain financing from international capital markets and foreign direct investment is limited, which could adversely affect the economy and our business

In the first half of 2005, Argentina restructured part of its sovereign foreign debt, which had been in default since late 2001. According to the Government, the swap for the restructuring of said debt was accepted by 76% of creditors. However, holders of approximately US\$20 billion of the sovereign debt subject to the restructuring offer, mainly from the United States, Italy and Germany did not accept the swap and initiated litigation against Argentina (holdouts). New legal proceedings could be brought in the future.

Table of Contents

In September 2, 2008, Argentina announced through Decree No. 1394/08 its intention to cancel its sovereign debt with the creditor nations of the Paris Club. The Paris Club announced its acceptance of such decision through a note dated September 18, 2008. As of the date of this annual report, the amount of the debt to be cancelled, the terms of such cancellation, and the extent of the representations of the parties are still unknown. Almost 70% of Argentina's debt with the Paris Club is with Germany, Japan and Spain, but the Paris Club includes creditors such as the United States and other members of the Group of Eight, which are industrially developed countries. A failure to agree with the Paris Club could curb financing from multilateral financial institutions, which could adversely affect Argentina's economic growth and public finances, and, consequently, adversely affect our business, financial position and results of operations.

Recently, due to certain modifications made to the pension and retirement system, which was in charge of the *Administradora de Fondos de Jubilaciones y Pensiones* (AFJPs, Retirement and Pension Fund Administrators), some holdouts obtained a favorable decision from the Federal District Court for the District of New York City, which ordered a freeze on the assets held by AFJPs in the United States currently held by the *Administración Nacional de la Seguridad Social* (ANSES, National Social Security Administration), a decentralized entity of the Government. During January and early February of 2009, the Government exchanged certain of its debt for *Préstamos Garantizados Nacionales* (loans issued by the Government or Secured Loans to restructure bank loans during and after the 2001-2002 crisis), and as a result, was able to reduce the amount of sovereign debt maturing between 2009 and 2011.

In addition, foreign investors in Argentine public utilities companies filed claims with the *Centro Internacional de Arreglo de Disputas de Inversiones* (CIADI, International Center for Settlement of Investment Disputes), for substantial amounts, due to certain measures taken by the Government to overcome the 2001-2002 crises, and alleging that some measures are inconsistent with certain bilateral treaties signed by Argentina.

The Government's default on its debt payments, its delay in completing the debt restructuring with holdout creditors and the above-mentioned claims against the country, could hinder Argentina's and the country's private sectors access to the capital markets and ability to obtain direct foreign investment. Additionally, in recent years, the CIADI issued certain judgments against Argentina, all of which have been appealed. If such judgments result in court rulings against Argentina, they would involve large amounts of money for the country, as well as injunctions or other provisional remedies related to assets in Argentina that the Government intended to use for other matters. Consequently, the Government could lack sufficient financial resources to promote growth. In addition, private sector investment, which is necessary for the same purpose, may not be available due to the lack of financing.

If Argentina's ability to access financing from international markets and attract direct foreign investment is restricted, there is a risk that it may lack sufficient capital to sustain an investment cycle and sustain a high-economic growth rate. As a consequence, the country's fiscal balance could be affected, which could lead to higher inflation and could negatively affect the Government's ability to implement economic policies that would foster economic growth. If a sustained growth cycle is not achieved, political, social and economic instability could resume. All of these events would have an adverse effect on the Argentine economy and financial system, as well as on us, our business, financial condition, results of operations and prospects.

The foreign exchange market is subject to controls that restrict our access to foreign currency and our access to foreign funds and more restrictive measures could be implemented in the future that would adversely affect our business operations

At the end of 2001 and in 2002, the Government and the Argentine Central Bank established controls over the foreign exchange market and over capital transfers abroad, substantially limiting the ability of companies operating in Argentina to retain foreign currency or make debt payments abroad. The existence of such controls and the surplus in the country's trade balance contributed to an appreciation of the Peso and to the increased availability of foreign currency, which in turn resulted in the easing of many of these restrictions. However, certain restrictions are still in force that limit access to the foreign exchange market by residents and non-residents, including us, to certain monthly amounts and their and our ability to make transfers of foreign currency and payments abroad. In addition, the Government issued a decree in June 2005 that established new controls and restrictions in connection with capital inflows, including the requirement that 30% of funds remitted to Argentina remain deposited in a domestic financial

institution for one year without earning any interest. This measure increases the cost of obtaining foreign funds and limits access to these funds. For more information, see Item 4. Information on the Company-Government Regulation-Foreign Exchange Market.

Table of Contents

In an economic environment where access to local capital is substantially constrained, these controls could have a negative effect on the Argentine economy and on our business, by limiting the ability of economic agents operating in Argentina to obtain foreign financing. Moreover, the Argentine authorities could again establish more severe restrictions on the foreign exchange market and on capital movements from and into Argentina, among others, in the future, in response to significant capital outflows or to a significant depreciation of the Peso. These restrictions may hamper foreign investors' ability to receive payments in connection with debt or equity securities of Argentine issuers, such as us, or more severely restrict our access to the foreign capital markets, both of which could adversely impact us, our business, financial condition, results of operations and prospects.

The volatility of the regulatory environment in Argentina could continue to be high and future Argentine governmental policies could adversely affect the Argentine economy as a whole as well as financial institutions such as us and our subsidiaries

The Government has historically exercised significant influence over the country's economy and financial institutions in particular have operated in a highly regulated environment for extended periods. In addition, Argentina's regulatory environment has been volatile. The lack of a stable regulatory environment has imposed limitations on the operation of the economy as a whole, including the financial system. During the 2001-2002 crisis, Argentina experienced a deep economic and financial crisis, social unrest and political turmoil. As a result, the Government took a series of far reaching measures that produced radical structural changes in the Argentine economy and legal framework. Laws and regulations currently governing the economy or the financial sector may change in the future. Future Government policies may include nationalization, forced renegotiation or modification of existing contracts and debt obligations, suspension of the enforcement of creditors' rights, new taxation policies, including royalty and tax increases and retroactive tax claims, and changes in laws and policies affecting international trade and investment. Future changes in the regulatory environment and Government policies may adversely affect the economy and financial institutions in Argentina, including us and our subsidiaries, as well as our and our subsidiaries' business, financial condition, results of operations and prospects. This change could negatively impact our ability to raise funds through the local capital markets in the future, thus possibly negatively impacting our business, financial condition, results of operations and prospects.

Foreign judgments may not be able to be normally enforced in Argentina

We and most of our subsidiaries are companies incorporated under the laws of Argentina. Most of our and our subsidiaries shareholders, directors, members of the Supervisory Syndics' Committee, officers, and some specialists named herein are domiciled in Argentina and the most significant part of our and our subsidiaries assets is located in Argentina.

Under Argentine law, the enforcement of foreign judgments is allowed provided that the requirements set forth in sections 517 to 519 of the National Code of Civil and Commercial Procedures are met or, if it is one of the powers reserved to the provinces, the requirements in the local codes of procedure, and provided that the foreign judgment does not infringe on the concepts of public policy in Argentine law, as determined by the competent courts of Argentina. As such, your ability to enforce a judgment of, among others, a U.S. court against us or our subsidiaries in Argentina may be limited.

The reform of the Integrated Retirement and Pension System may limit our ability to obtain funding

Through the enactment of Law No. 26,425 in November 20, 2008, the Argentine Congress approved the elimination of the capitalization system run by the AFJPs, which was absorbed and replaced by a single government run pension organization called the *Sistema Integrado Previsional Argentino* (SIPA, the Integrated Social Security System). Among other measures, the law establishes that: (i) funds accumulated in the private retirement and pension system during the last fourteen years will be administered by the ANSES and (ii) the retirement and pension system will now be run by the Government and citizens must contribute to this new system.

Table of Contents

The elimination of the existing capitalization system will cause a significant change in Argentina's local capital markets, as AFJPs have historically been important institutional investors. This change could limit our ability to obtain funding through the local capital markets, thus possibly negatively impacting our business, financial condition, results of operations and prospects.

Risk Factors Relating to the Argentine Financial System

The ongoing international financial crisis could intensify and spread, possibly impacting Argentine banks, including Banco Galicia

Although most Argentine banks have not been severely impacted by the ongoing banking crisis in the United States, Europe and Asia, the possibility that Argentine banks could, in the future, be impacted by such crisis cannot be ruled out. Likewise, the high volatility in international assets was also present in local ones. These factors could lead to a lack of confidence by depositors and affect the Argentine financial system, most likely affecting Banco Galicia's profitability. If Banco Galicia's profitability decreases, our business, financial condition, results of operations and prospects would most likely be negatively affected as well.

The recovery of the financial system is dependent upon the ability of financial institutions, including Banco Galicia, to maintain and increase the confidence of depositors

The measures implemented by the Argentine government in late 2001 and early 2002, in particular the restrictions imposed on depositors' ability to withdraw money freely from banks and the pesification and restructuring of their deposits, were strongly opposed by depositors due to the monetary losses that they sustained and undermined their confidence in the Argentine financial system and in all financial institutions operating in Argentina.

Although the financial system has seen a substantial recovery in deposits (mostly transactional deposits) since 2002, it cannot be assured that this trend will continue or that the deposit base of the Argentine financial system, including Banco Galicia's, will not be affected in the future by adverse economic, social and political events. If the confidence of depositors in the financial system is affected once again, it will have a direct impact on the manner in which financial institutions, including Banco Galicia, conduct their business by, in general terms, affecting their ability to operate as financial intermediaries. If Banco Galicia's volume of business or ability to act as a financial intermediary is negatively impacted, its profitability may decrease which, in turn, may adversely impact our business, financial conditions, results of operations and prospects.

The negative consequences of the 2001-2002 crisis on the profile and activities of the financial system, including us, may not be overcome in the short term or at all

Immediately after the 2001 and 2002 crisis, the financial system temporarily practically ceased acting as an intermediary between savings and credit. Even though the financial system's private sector deposits and loans have increased substantially from the low levels of 2002, financial depth in Argentina (measured by the ratio of the total financial system's private-sector deposits and loans to GDP), remains low when compared to the levels displayed by comparable countries, such as other Latin American countries, and with past levels recorded in Argentina itself, especially in the case of loans to the private sector. Such loans represented approximately 12% of the Argentine GDP at the end of 2008, as compared to approximately 23% at the end of 1999. The time period necessary for the Argentine financial system's credit activity to return to pre-crisis relative levels remains uncertain.

Table of Contents

In addition, even though deposits in the financial system have increased significantly since mid 2002, most deposits are either sight or short-term time deposits. The sources of medium and long-term funding for financial institutions are currently limited. Due to these reasons, and to the characteristics of credit demand, the loan expansion recorded since 2004 has been largely based on short-term loans to individuals and companies.

For the financial system to be able to reach an adequate financial depth level and, at the same time, develop a medium and long-term credit business without having to assume excessive risks in terms of maturity gaps, several developments would need to occur, including, principally: (i) growth in deposits and loans would need to continue over time, (ii) the terms of assets and liabilities in the Argentine financial system would need to be extended, (iii) the public's confidence in the Argentine financial system would need to increase to levels enabling the country's savings to be channeled to the financial system to a greater extent than at present, and (iv) a process of sustained growth with macroeconomic and legal stability would be needed. These trends may not materialize and, even if they do, financial intermediation activities may not develop to the extent needed or may not reach the necessary volume so as to allow the recurrent income generation capacity of Argentine financial institutions, including us, to improve substantially or the expansion of the credit business beyond short-term lending.

Financial institutions' asset quality could deteriorate if the economic growth process does not recover, which would have a negative impact on financial institutions' profitability as well as on ours

After the 2001-2002 crisis, the asset quality ratios of Argentine financial institutions improved and in the last four years the Argentine financial system enjoyed a period of very low credit risk in historical terms. The portfolio quality of financial institutions has improved due to the considerable growth of the country's economy, the improvement of the economic situation in general and the completion of various debt restructuring processes. However, while certain sectors benefited from the post-crisis relative price system, other sectors were adversely affected. The portfolio quality of the private sector, overall, started to deteriorate during 2008. It cannot be assured that the private sector portfolio will not continue to deteriorate.

The value of a large portion of the assets held by various Argentine financial institutions, as well as those institutions' income generation capacity, is dependent, to a large extent, on sustained economic growth.

Should growth significantly slow down or if economic activity experiences a downturn, borrowers' performance could deteriorate, as could employment levels and real wages. Also, even if the Argentine economy continues to grow, if inflation continues to rise it could also affect real wages and employment levels and trigger nominal interest rates increases, all of which would weaken credit demand and borrowers' repayment capacity. In addition, individuals' indebtedness has increased significantly in the past years, which could trigger deterioration in their repayment ability, especially if coupled with a tightening financial scenario. Finally, legacy loans from the 2001-2002 crisis have reached a very low level and, therefore, no material further positive effect on credit quality ratios would be derived from further improvement thereof.

Improvement in the credit risk environment after the 2001-2002 crisis and the low credit risk environment of the recent years have had a positive impact on financial institutions' profitability as they have translated into low loan loss provisions as well as above average income from loan recoveries and the reversal of loan loss provisions in connection with legacy loans. In a tougher credit environment, coupled with the fact that above average income from the recovery of legacy loans and the reversal of loan loss reserves on such loans is reaching an end, credit losses could rise, which may require increases in loan loss reserves, which would most likely have a negative impact on financial institutions' profitability including on ours.

Judgments against financial institutions in connection with the pesification and restructuring of deposits in 2002 may result in a deterioration of financial institutions' deposit base and liquidity, including ours

As a consequence of the application by financial institutions of emergency measures implemented by the executive branch of the Government during and in respect of the 2001-2002 crisis, which mandated the pesification of deposits originally denominated in Dollars and the restructuring of such deposits, in 2002 individuals and entities initiated a significant number of legal actions (known as *amparo* claims) against financial institutions, including the Bank, on the basis that these measures violated their constitutional and other rights. Most appellate and lower courts have declared the above-mentioned emergency measures unconstitutional and, as a result, financial institutions have been required to reimburse the relevant Dollar-denominated deposits, or their equivalent in Pesos, at the then current free market

exchange rate.

Table of Contents

These rulings resulted in a significant withdrawal of deposits from the financial system and the Bank in 2002 and in significant losses for financial institutions to date, including us, as these institutions have had to reimburse the restructured deposits (mostly Dollar-denominated deposits before pesification) at market exchange rates rather than at the rate at which the deposits were pesified and booked in accordance with the applicable regulations. Pursuant to Argentine Central Bank rules, the losses from the above-mentioned court rulings were deferred and began to be amortized over a five-year period. The negative impact of these losses on financial institutions' capital has been significant. The Government has not provided compensation for these losses and has expressed that it does not intend to do so.

The Argentine Supreme Court of Justice (or the Argentine Supreme Court) has issued several rulings in connection with the pesification of deposits, which referred to particular cases, with different implications. Also, under Argentine law, Argentine Supreme Court rulings are not precedent setting for lower courts and, therefore, whether these rulings will be followed in similar cases to be heard by lower courts is uncertain. As a consequence of the foregoing, the final resolution of such cases is uncertain. However, if an increasing number of new adverse judgments against financial institutions such as us should materialize, financial institutions, including us, could incur further significant losses and their and our financial condition could be adversely impacted.

New limitations on creditors' rights in Argentina and to the ability to foreclose on certain guarantees and collateral may adversely impact financial institutions such as us

In order to protect debtors, who were affected by the 2001-2002 crisis, the Government passed various laws and regulations temporarily suspending the ability of creditors to foreclose on collateral and to exercise their rights pursuant to guarantees and similar instruments. Such regulations have restricted Argentine creditors, such as us, from initiating collection actions or lawsuits to recover on defaulted loans. Even though these rules have ceased to be applicable, under an adverse economic environment or other circumstances, the Government may pass new rules and regulations affecting the ability of creditors to enforce their rights pursuant to debt agreements, guarantees and similar instruments, which may have an adverse effect on the financial system and our business.

Certain administrative proceedings being initiated by Argentine provincial tax authorities against financial institutions could generate losses for such institutions, including us

Certain provincial authorities have initiated administrative proceedings against financial institutions in order to collect certain local taxes levied on financial institutions' gross income obtained in 2002 and thereafter. The amounts that provincial tax authorities seek to collect in these administrative proceedings in relation to the gross income generated in 2002 by financial institutions are significant, as such authorities are including in the taxable income those gains obtained by financial institutions in connection with the compensatory bonds that the Government made available to them in order to compensate them for the losses that they would otherwise have incurred as a consequence of the policies implemented by the Government to deal with the 2001-2002 crisis, particularly the asymmetric pesification. Although the final outcome of these administrative proceedings is still highly uncertain, as is the number of provincial authorities that will initiate such proceedings and when, these proceedings could generate losses for financial institutions, including us, during fiscal year 2009.

Table of Contents

Consumer protection laws may limit some of the rights afforded to us and our subsidiaries

Law No. 24,240, the Consumer Protection Law, as amended and with supplementary rules, (the Consumer Protection Law) sets forth a series of rules and principles to protect consumers. On March 12, 2008, the Argentine Congress approved an amendment to the Consumer Protection Law, enacted by the Executive Branch through Decree No. 565/08 dated April 3, 2008, published in the Official Gazette of the Argentine Republic (the Official Gazette) on April 7, 2008.

The Consumer Protection Law was thus amended in various aspects, namely: (i) the universe of people considered as consumers under the Consumer Protection Law was widened, (ii) the maximum fines applicable to suppliers violating this law was increased and the administrative authority charged with enforcing such law was empowered to order any supplier to pay direct damages up to a maximum amount, (iii) the courts were entitled to sentence suppliers to pay punitive damages to consumers (such punitive damages cannot exceed Ps. 5 million, depending on the seriousness of the event and other circumstances), and (iv) the ability of consumers associations to bring class action law suits on behalf of an indeterminate universe of consumers rights was regulated. Also, the Secretary of Domestic Commerce, which is part of the Ministry of Economy and Production, was appointed as the national enforcement authority and the city of Buenos Aires and the provinces are to act as local enforcement authorities.

We cannot assure you that court and administrative rulings arising from the measures adopted by the Secretary of Domestic Commerce and other enforcement authorities will not cause an increase in the degree of protection given to our debtors and other clients, or that such rulings will not favor the claims brought by consumers groups or associations. This could prevent us and/or our subsidiaries from collecting payments for services and financing provided, with an adverse effect on our assets, financial condition, business, results of operations and prospects.

Risk Factors Relating to Us

Since we are a holding company, our ability to pay cash dividends depends on the ability of our subsidiaries to pay dividends to us

We are a holding company and, as such, we conduct all of our operations through our subsidiaries. Thus, dividends or other intercompany transfers of funds from subsidiaries are expected to be our primary source of funds to pay for expenses and dividends. Banco Galicia is our most significant subsidiary. As of December 31, 2008, Banco Galicia s consolidated assets represented 98.8% of our consolidated assets. While we do not anticipate that we will conduct operations at the level of the holding company, any expenses we incur at such level, will reduce amounts available to be distributed to our shareholders. The ability of our subsidiaries to pay dividends and make other payments to our holding company will depend on their results of operations and financial condition and may be restricted by, among other things, applicable corporate and other laws and regulations and contractual limitations. In addition, our ability to pay dividends will be subject to legal and other requirements.

Table of Contents

We have not received dividends from Banco Galicia since October 2001. In addition, Banco Galicia is restricted from paying dividends as, among other things, under Argentine Central Bank regulations it must reduce its retained earnings available to be distributed as cash dividends by, among others, the difference between the market value and the carrying value of all of its public-sector assets, after netting the legal reserve and other reserves established by Banco Galicia's bylaws. Also, the loan agreements entered into by Banco Galicia, as part of the restructuring of its debt denominated in foreign currency and subject to foreign law (the Bank's foreign debt), limit its ability to pay dividends. See Item 8. Financial Information-Dividend Policy and Dividends-Dividend Policy.

Our ability to repay indebtedness at the holding company level may be impaired due to the lack of liquidity at such level

We conduct our business through our subsidiaries and, therefore, at the holding company level we do not have significant operations or material assets of our own other than the capital stock of our subsidiaries. Excluding such assets, our ability to repay our indebtedness, at the level of the holding company, is dependent on the cash flows generated by our subsidiaries and their ability to make cash distributions. In the absence of such dividend payments, we may need to seek other funding sources in respect of such indebtedness, which may not be available to us at all or on reasonable terms.

Our subsidiaries do not have any obligation to pay amounts to us so that our indebtedness at the holding company level can be repaid or to make funds available for that purpose. Each of our subsidiaries is a distinct legal entity and, under certain circumstances, legal and contractual restrictions, as well as our subsidiaries' financial condition and operating requirements may limit our ability to obtain cash from our subsidiaries. Furthermore, the Bank's ability to pay dividends or make other intercompany payments is limited by Argentine Central Bank's rules and certain financial covenants. See -A breach of any of the covenants under the Bank's debt agreements and the agreements entered into by the Bank and us as part of the restructuring of the Bank's foreign debt in 2004 could result in the occurrence of an event of default under these agreements and Item 8. Financial Information-Dividend Policy and Dividends. In the absence of dividend payments, we may not have sufficient liquidity to repay our outstanding indebtedness.

We may operate finance-related businesses that have little or no regulatory supervision

We may operate finance-related businesses outside of Banco Galicia that are not regulated by the Argentine Central Bank. These businesses will be subject only to those regulatory limitations that may be applicable to them. We may enter into businesses that have little or no regulatory supervision or that entail greater risks than our existing businesses, and which may adversely impact our business and financial condition.

We are subject to corporate disclosure and accounting standards that may limit the information available to our shareholders

A principal objective of the securities laws of the United States, Argentina and other countries is to promote full and fair disclosure of all material information of companies issuing securities. However, there may be less publicly available information about us than is regularly published by or about listed companies in certain countries with more developed capital markets, such as the United States. While we are subject to the periodic reporting requirements of the United States Securities Exchange Act of 1934, as amended, or the Exchange Act, the periodic disclosure required of non-United States issuers under the Exchange Act is more limited than the periodic disclosure required of United States issuers. Furthermore, we are not required to comply with the United States Securities and Exchange Commission's (or SEC) proxy rules in connection with shareholders' meetings.

Table of Contents

In addition, we maintain our financial books and records in Pesos and prepare our financial statements in conformity with Argentine Banking GAAP, which differs in certain respects from Argentine GAAP and U.S. GAAP. See Item 5.A. Operating Results-U.S. GAAP and Argentine Banking GAAP Reconciliation and note 35 to our consolidated audited financial statements included in this annual report for a description of the principal differences between Argentine Banking GAAP and U.S. GAAP.

Also, for a description of the differences between Argentine and Nasdaq corporate governance requirements, see Item 6. Directors, Senior Management and Employees-Nasdaq Corporate Governance Standards.

Our shareholders may be subject to liability for certain votes of their securities

Shareholders who have a conflict of interest with us and who do not abstain from voting may be held liable for damages to us. Also, shareholders who willfully or negligently vote in favor of a resolution that is subsequently declared void by a court as contrary to Argentine law or our bylaws may be held liable for damages to us or to other third parties, including other shareholders.

United States holders of our class B shares may not be able to exercise preemptive and accretion rights

Under Argentine law, holders of our ordinary (common) Class B shares (including the Class B shares underlying our American depositary shares (the class B shares and ADSs, respectively) have preemptive and accretion rights with respect to future issuances of class B shares. United States holders of our class B shares may not be able to exercise such preemptive and accretion rights unless a registration statement under the Securities Act of 1933 is effective with respect to such rights or an exemption from the registration requirements of the Securities Act is available. We are not obligated to file a registration statement with respect to such rights or the shares related thereto. Therefore, if we elect not to file a registration statement with respect to such rights or if an exemption from registration is not otherwise available, a United States holder of class B shares (including those underlying our ADSs) may not be able to exercise such rights. In addition, the depositary may not be able to sell such rights and distribute the proceeds thereof to a United States holder of class B shares (including those underlying our ADSs) as contemplated in the Depositary agreement, in which case such rights may lapse.

Table of Contents

The concentration of our assets in Argentine public-sector debt instruments is high, which makes our future financial condition dependent on the Government's credit quality and ability and willingness to comply with its repayment obligations

As of December 31, 2008, our exposure to the Argentine public sector (as shown under Item 5.A. Operating Results-Exposure to the Argentine Public Sector), amounted to Ps. 6,054.3 million, representing 24.5% of our total assets. Under U.S. GAAP this amount was Ps. 3,777.2 million. Therefore, the value of our assets, our income and cash flow generation capacity and our future financial condition is strongly dependent on the Government's ability to comply with its payment obligations in respect of these public-sector assets. In turn, the ability of the Government to comply with its payment obligations with respect to such public-sector assets is dependent on, among other things, its ability to establish an economic policy that is successful in promoting sustainable economic growth in the long run, generating tax revenues and controlling public expenses, all or some of which may not occur.

We carry a significant portion of our public-sector assets at values that do not reflect their market value, which is substantially lower than their respective book value

We carry our public-sector assets under Argentine Banking GAAP, in accordance with Argentine Central Bank valuation rules, as explained under Item 4. Information on the Company-Selected Statistical Information-Government and Corporate Securities-Valuation, and Item 5.A. Operating Results-Critical Accounting Policies- U.S. GAAP Critical Accounting Policies-Fair Value Estimates. The book values of our positions in Secured Loans, Boden 2012 Bonds (bonds issued by the Government as compensation for the asymmetric pesification), and Discount Bonds in Pesos and GDP-Linked Negotiable Securities (issued by the Government as part of the restructuring of its foreign debt in 2005) are greater than their respective quoted market values.

The difference between the aggregate book value of the above-mentioned assets and their respective aggregate market value as of December 31, 2008, amounted to Ps. 1,827 million, as explained under Item 4. Information on the Company-Selected Statistical Information-Government and Corporate Securities. As market conditions change, adjustments to the market value of the above-mentioned assets are not reflected in our financial condition. Future sales or settlements of these assets will reflect the market conditions at the time and may result in losses, representing the difference between the settlement amount and the then carrying value, thereby adversely affecting our financial results.

We hold Argentine securities which might be highly volatile

We have had and we currently have certain investments in Argentine government debt and corporate debt. In particular, we hold a significant amount of Boden Bonds, Discount Bonds and other investments the underlying assets of which are mostly government securities. Investments in such securities involve certain risks, including market volatility and the risk of a loss of principal.

Some of the issuers in which we have invested and may invest, including the Argentine government, have experienced in the past substantial difficulties in servicing their debt obligations, which have led to the restructuring of certain indebtedness. We cannot assure that the issuers in which we have invested or may invest will not be subject to similar or other difficulties in the future which may adversely affect the value of our investments in such issuers. In addition, such issuers and, therefore, such investments, are generally subject to many of the risks that are described in this section with respect to us, and, thus, could have little or no value, thereby adversely impacting our financial results.

Table of Contents

Our net position in CER-adjusted assets exposes us to increases in the real interest rate

The policies implemented by the Government to address the 2001-2002 crisis created mismatches between our assets and liabilities in terms of currency, yield and maturities. Currently, we carry a net position in CER-adjusted assets (the CER is a coefficient based on the variation of consumer prices), which bear fixed interest rates over CER-adjusted principal. This position is funded by Peso-denominated liabilities (with no principal adjustment linked to inflation), bearing market interest rates and repricing, mainly, in the short term. See Item 5.A. Operating Results-Currency Composition of Our Balance Sheet . This mismatch exposes us to the fluctuations in real interest rates, with an adverse impact on income resulting from a significant increase in real interest rates paid on our Peso-denominated liabilities, which occurs when nominal interest rates increase more than the consumer inflation rate published by INDEC.

A breach of any of the covenants under the Bank's debt agreements and the agreement entered into by the Bank and us as part of the restructuring of the Bank's foreign debt in 2004 could result in the occurrence of an event of default under these agreements

The loan agreements and indenture entered into by the Bank as part of its foreign debt restructuring in May 2004, include certain covenants that, among other things, restrict the Bank's ability to pay dividends on stock, purchase its stock or the stock of its subsidiaries or use the proceeds of the sale of certain assets or from the issuance of debt or equity securities. Some of these agreements also require that the Bank maintain specified financial ratios. We agreed to maintain certain corporate governance standards and to provide the Bank's creditors with certain financial information and reports on a quarterly and annual basis. A breach of any of these covenants or the Bank's inability to maintain the required ratios could result in an event of default under these agreements. In the event of a default, the relevant lenders could elect, among other options, to declare the Bank's indebtedness, together with accrued interest and other fees, to be immediately due and payable. For more information see Item 10. Additional Information-Material Contracts.

It may be difficult for us to fully overcome all of the residual negative effects of the 2001-2002 crisis

Our income generation capacity was negatively affected by the 2001-2002 crisis, especially our capacity to generate financial income. It is difficult to predict whether we will be able to increase our level of activity and loan origination to the private sector so as to generate sufficient increased financial revenue and income from services in order for our operating results to more than offset losses from the amortization of *amparo* claims, the negative margin on our matched position in foreign currency resulting from the low yield of our Boden 2012 Bonds and potential losses if we were to mark-to-market the portfolio of public-sector assets. Although demand for fee-related products and services as well as for credit has been increasing in Argentina, together with the growth of the economy, demand for financial products and credit may not continue to increase or may not increase to the extent or at the necessary pace. In addition, we may not be able to sufficiently increase our business volume or margins between lending and borrowing could decrease or be insufficient for our operating income to exceed the above-mentioned losses. Also, lower economic growth would have a negative impact on credit quality and credit losses. Therefore, we may not be able to increase our operating results in the required amount or at the required pace in order to offset these losses.

Item 4. Information on the Company

History and Development of the Company

Our legal name is Grupo Financiero Galicia S.A. We are a financial services holding company that was incorporated on September 14, 1999, as a *sociedad anónima* (a stock corporation) under the laws of Argentina. As a holding company we do not have operations of our own and conduct our business through our subsidiaries. Banco Galicia is our main subsidiary and one of Argentina's largest full-service banks. Through the operating subsidiaries of Tarjetas Regionales S.A., a holding company wholly owned by the Bank, we provide proprietary brand credit cards and consumer finance services throughout Argentina. Through Sudamericana Holding S.A. and its subsidiaries or Sudamericana we provide insurance products in Argentina. We directly or indirectly own other companies providing financial related products as explained herein. We are one of Argentina's largest financial services groups with consolidated assets of Ps. 24,735.8 million as of December 31, 2008.

Our goal is to consolidate our position as one of Argentina's leading comprehensive financial services providers while continuing to strengthen Banco Galicia's position as one of Argentina's leading banks. We seek to broaden and complement the operations and businesses of Banco Galicia, through holdings in companies and undertakings whose objectives are related to and/or can produce synergies with financial activities. Our non-banking subsidiaries operate in financial and related activities that Banco Galicia cannot undertake or in which it is limited to invest in due to restrictive banking regulations.

Our domicile is in Buenos Aires, Argentina. Under our bylaws, our corporate duration is until June 30, 2100. Our duration can be extended by a resolution passed at a general extraordinary shareholders' meeting. Our principal executive offices are located at Teniente General Juan D. Perón 456, Second Floor, (1038) Buenos Aires, Argentina. Our telephone number is (54-11) 4343-7528.

Our agent for service of process in the United States is CT Corporation System, presently located at 111 Eighth Avenue, 13th Floor, New York, New York 10011.

Organizational Structure

The following table illustrates our organizational structure as of December 31, 2008. Percentages indicate the ownership interests held. All of the companies shown in the chart are incorporated in Argentina, except for:

Galicia Uruguay, incorporated in Uruguay and currently not an operating financial institution;

Table of Contents

Galval Agente de Valores S.A. or Galval , incorporated in Uruguay;
Galicia Pension Fund Ltd. and Galicia (Cayman) Ltd. or Galicia Cayman , incorporated in the Cayman Islands;
Tarjeta Naranja Dominicana S.A., incorporated in the Dominican Republic.

History

Grupo Financiero Galicia

Grupo Financiero Galicia was formed on September 14, 1999 as a financial services holding company to hold all of the shares of the capital stock of Banco Galicia held by members of the Escasany, Ayerza and Braun families. Its initial nominal capital amounted to 24,000 common shares, 12,516 of which were designated as class A ordinary (common) shares (the class A shares) and 11,484 of which were designated as class B shares.

Table of Contents

Following Grupo Financiero Galicia's formation, the holding companies that held the shares in Banco Galicia on behalf of the Escasany, Ayerza and Braun families were merged into Grupo Financiero Galicia. Following the merger, Grupo Financiero Galicia held 46.34% of the outstanding shares of Banco Galicia. In addition, and due to the merger, Grupo Financiero Galicia's capital increased from 24,000 to 543,000,000 common shares, 281,221,650 of which were designated as class A shares and 261,778,350 of which were designated as class B shares. Following this capital increase, all of our class A shares were held by EBA Holding S.A., an Argentine corporation that is 100% owned by our controlling shareholders, and our class B shares were held directly by our controlling shareholders in an amount equal to their ownership interests in the holding companies that were merged into Grupo Financiero Galicia.

On May 16, 2000, our shareholders held an extraordinary shareholders' meeting during which they unanimously approved a capital increase of up to Ps. 628,704,540 and the public offering and listings of our class B shares. All of the new common shares were designated as class B shares, with a par value of Ps. 1.00. During this extraordinary shareholders' meeting, all of our existing shareholders waived their preemptive rights. In addition, the shareholders determined that the exchange ratio for the exchange offer would be one class B share of Banco Galicia for 2.5 of our class B shares and one ADS of Banco Galicia for one of our ADSs. The exchange offer was completed in July 2000 and the resulting capital increase was of Ps. 549,407,017. At date of completion of the exchange offer, our only significant asset was our 93.23% interest in Banco Galicia.

On January 2, 2004, our shareholders held an extraordinary shareholders' meeting during which they approved a capital increase of up to 149,000,000 preferred shares, each of them mandatorily convertible into one of our class B shares on the first anniversary of the date of issuance, to be subscribed for in up to US\$100.0 million of face value of subordinated notes to be issued by the Bank to its creditors in the restructuring of the foreign debt of its Head Office in Argentina (the "Head Office") and its Cayman Branch, or cash. This capital increase was carried out in connection with the restructuring of the Bank's foreign debt. On May 13, 2004, we issued 149,000,000 preferred non-voting shares, with preference over the ordinary shares in the event of a liquidation, each with a face value of Ps. 1.00. The preferred shares were converted into class B shares on May 13, 2005. With this capital increase, our capital increased to Ps. 1,241,407,017. For more information on the Bank's debt restructuring, please see below.

In January 2005, we created Galval, a securities broker based in Uruguay, with the purpose of providing trading and custody services. We own 100% of the capital and voting rights of this subsidiary.

In August 2007, Grupo Financiero Galicia exercised its preemptive rights in the Bank's share issuance and subscribed for 93.6 million shares of the Bank. The consideration consisted of: (i) US\$102.2 million face value of negotiable obligations due 2014 issued by the Bank in May 2004, and (ii) cash. In order to fund such cash payment, on July 24, 2007, Grupo Financiero Galicia entered into a loan agreement for US\$80 million with Merrill Lynch International. The loan was unsecured and was initially scheduled to be paid in two installments. The interest rate was 7.75% for the first year and 3-month Libor plus 350 basis points for the second year, payable annually in July 2008 and July 2009. The first payment of principal, which was for US\$18 million, was due one year after the granting of the loan, and was paid on July 28, 2008. The second payment of principal, for the remaining balance of US\$62 million, which was due on July 25, 2009, was fully repaid in advance at a discount on January 6, 2009, through a single and final payment of US\$39.1 million. For more information on this loan, see Item 8. Financial Information-Significant Changes.

Table of Contents

After the capital increase, Grupo Financiero Galicia holds 94.66% of the Bank's shares, up from 93.60%. For more information on the Bank's capital increase, please see -Banco Galicia-Banco Galicia's 2007 Capital Increase .

Banco Galicia

Banco de Galicia y Buenos Aires S.A. is a banking corporation organized as a stock corporation under Argentine law and supervised and licensed to operate as a commercial bank by the *Superintendencia de Entidades Financieras y Cambiarias* (Superintendency of Financial Institutions and Exchange Bureaus or the Superintendency).

The Bank was founded in September 1905 by a group of businessmen from the Spanish community in Argentina and initiated its activities in November of that year. Two years later, in 1907, the Bank's stock was listed on the Buenos Aires Stock Exchange (BASE). The Bank's business and branch network increased significantly by the late 1950s and continued expanding in the following decades, after regulatory changes allowed the Bank to exercise its potential and gain a reputation for innovation, thereby achieving a leading role within the domestic banking industry.

In the late 1950s, the Bank launched the equity fund FIMA Acciones and founded the predecessor of Galicia Administradora de Fondos S.A., Sociedad Gerente de Fondos Comunes de Inversión (Galicia Administradora de Fondos). Beginning in the late 1960s the Bank began to establish an international network mainly comprised of branches in New York and in the Cayman Islands, a bank in Uruguay and several representative offices.

In order to develop automated banking in Argentina and avoid bank disintermediation (i.e. when consumers directly access information or goods rather than using intermediaries) in the provision of electronic information and fund transfer services, in 1985, Banco Galicia established, together with four other private-sector banks operating in Argentina, Banelco S.A. to operate a nationwide automated teller system, which became the largest in the country. During the same year, Banco Galicia also acquired an interest in VISA Argentina S.A., and is currently one of the largest issuers of such cards in Argentina.

During the 1990s, the Bank implemented a growth and modernization strategy directed at achieving economies of scale and increasing productivity and, therefore, heavily invested in developing new businesses, acquiring new customers, widening its product offering, developing its IT and human resources capabilities, and expanding its distribution capacity. This was comprised of traditional channels (branches) and, especially, alternative channels, including new types of branches (in-store for example), ATMs, banking centers, phone banking and Internet banking. As part of its growth strategy, in 1995, the Bank began a new expansion drive into the *Interior* of Argentina where high growth potential was believed to exist. Argentines refer to the *Interior* as that part of the country's territory different from the federal capital and the areas surrounding the city of Buenos Aires (Greater Buenos Aires), i.e., the provinces, including the Buenos Aires Province but excluding the city of Buenos Aires and its surroundings. Typically the Interior is underserved relative to the city of Buenos Aires and its surroundings with respect to access to financial services and its population tends to use fewer banking services. As such, mainly between 1995 and 1999, the Bank acquired equity interests in entities or formed several non-banking companies providing financial services to individuals in the Interior through the issuance of proprietary brand credit cards. See -Regional Credit Card Companies below. In addition, in 1997, the Bank acquired a regional bank that was merged into it, with branches located mainly in Santa Fe and Córdoba, two of the wealthiest and more populated Argentine provinces.

Table of Contents

In order to fund its strategy, during the 1990s, the Bank tapped the international capital markets for both equity and debt. In June 1993, the Bank carried out its initial international public offering in the U.S. and Europe and, as a result, began to list its American depositary receipts (ADRs) on the Nasdaq Stock Market until 2000, when the Bank's shares were exchanged for our shares. In 1991, it was the first Argentine bank to issue debt in the European capital markets and, in 1994, it was the first Latin American issuer of a convertible bond. In 1996, the Bank raised equity again through a local and international public offering.

In 1996, Banco Galicia entered the bank-assurance business through an agreement with ITT Hartford Life Insurance Co. for the joint development of initiatives in the life insurance business. In this same year, the Bank initiated its Internet presence, which evolved into a full e-banking service for both companies and individuals.

At the end of 2000, the Bank was the largest private-sector bank in the Argentine market with a 9.8% deposit market share.

In 2001 and 2002 Argentina experienced a severe political and financial crisis, which had a material adverse effect on the financial system, including on Banco Galicia, and on financial businesses as a whole but especially on financial intermediation activity. However, during the crisis, the provision of banking services of a transactional nature was maintained. With the normalization of the Argentine economy's situation and the subsequent growth cycle that began in mid 2002, financial activities began to expand at high rates, which translated into high growth at the level of the financial system as a whole, including the Bank. The provision of services continued to develop, even further than prior to the crisis, and financial intermediation resumed progressively.

Beginning in May 2002, the Bank began to implement a series of initiatives to deal with the liquidity shortage caused by the systemic deposit run, the unavailability of funding and other adverse effects of the 2001-2002 crisis on the financial system as a whole. The Bank significantly streamlined its operations and reduced its administrative expenses and, immediately after launching such initiatives, restored its liquidity. Also, in late 2002 and early 2003, the Bank closed all of its operating units abroad or began to wind them down. In addition, the Bank: (i) restructured most of its commercial loan portfolio, a process that was substantially completed in 2005, (ii) restructured its foreign debt, a process that began in 2002 and that was completed in May 2004, and resulted in an increase in its capitalization, and (iii) in February 2004, finalized the restructuring of its debt with the Argentine Central Bank incurred as a consequence of the 2001-2002 crisis.

Table of Contents

Together with the launching of the above-mentioned initiatives, the Bank began to normalize its activities, progressively restoring its customer relations and growing its business with the private sector. The Bank's deposit base began to increase in the second half of 2002 and loan origination picked up in late 2003. In parallel to the implementation of the above-mentioned initiatives, and while consistently expanding its business, the Bank undertook to progressively strengthen its balance sheet by (i) obtaining compensation from the Government for the negative effects of the asymmetric pesification, (ii) consistently reducing its high exposure to the public sector that was a legacy of the 2001-2002 crisis as well as (iii) reducing those liabilities incurred as a consequence of such crisis. Between 2005 and 2007, the Bank significantly reduced its exposure to the public sector by, among others, using public-sector assets to repay in advance Argentine Central Bank debt and restructured foreign debt. In 2007, the Bank finalized the full repayment in advance of its debt with the Argentine Central Bank incurred as a consequence of the 2001-2002 crisis. In addition, in August 2007, the Bank repaid in full the negotiable obligations that it had issued to restructure the debt of its New York Branch and undertook a share offering to increase its capitalization, in order to be able to support the increase in regulatory capital requirements on a bank's exposure to the public sector and the current and projected high growth of its business with the private sector. For more information, see "Banco Galicia's 2007 Capital Increase" below.

Restructuring of the Foreign Debt of the Bank's Head Office in Argentina and its Cayman Branch

On May 18, 2004, the Bank successfully completed the restructuring of US\$1,320.9 million of the debt of the Bank's Head Office and its Cayman Branch, consisting of bank debt (including debt with multilateral credit agencies) and bonds. This amount represented 98.2% of the foreign debt eligible for restructuring. As of December 31, 2008, the principal amount of old debt, the holders of which did not participate in the exchange offer was US\$1.7 million. To make the Bank's foreign debt restructuring possible we issued 149 million of our preferred shares on May 13, 2004, each of which was mandatorily convertible into one of our class B shares a year later, which occurred on May 13, 2005. Creditors of the Bank opting for the equity participation offer received 87.8 million of our preferred shares and cash and we received US\$100 million of subordinated bonds in exchange for those shares and cash. In addition, we entered into an agreement with the Bank's bank creditors in which we agreed to maintain certain corporate governance standards and to provide them with certain financial information and reports on a quarterly and annual basis. In accordance with the terms of the Bank's foreign debt restructuring, the Bank made certain cash payments for interest accrued until April 30, 2002, and applied cash not used in the cash offer to prepay at par long-term instruments to be delivered to creditors participating in the restructuring. Based on the final amounts validly tendered, on May 18, 2004, the Bank paid creditors who elected to participate in the cash offer and the Boden offer and issued the following new debt instruments:

US\$648.5 million of long-term Dollar-denominated debt instruments, of which US\$464.8 million were Dollar-denominated negotiable obligations due 2014 (referred to as the "Step Up Notes Due 2014" or the "2014 Notes") issued under an indenture.

Table of Contents

US\$399.8 million of medium-term Dollar-denominated debt instruments, of which US\$352.8 million were Dollar-denominated negotiable obligations due 2010 (referred to as the Floating Rate Notes Due 2010 or the 2010 Notes) issued under an indenture.

US\$230.0 million of subordinated Dollar-denominated debt instruments, of which US\$218.2 million were Dollar-denominated negotiable obligations due 2019 (referred to as the Subordinated Notes Due 2019 or the 2019 Notes) issued under an indenture.

As of December 31, 2008, the outstanding principal amount of debt resulting from the above-mentioned restructuring amounted to US\$688.5 million, US\$85.9 million lower than as of December 31, 2007 and US\$608.7 million lower than as of December 31, 2006, due to amortization, prepayments and advance cancellations. For more information see Item 5.A. Operating Results-Contractual Obligations and Item 5.A. Operating Results-Funding .

Capitalization as a Result of the Restructuring of the Foreign Debt. In the restructuring of the New York Branch's debt, the Bank increased its capitalization by US\$42.6 million as a result of exchanging part of the old debt for new debt or cash at a discount. In the restructuring of the foreign debt of the Bank's Head Office and its Cayman Branch, the Bank increased its regulatory capital by US\$278.9 million, due to: (i) the exchange of part of the debt subject to restructuring for cash and Boden 2012 Bonds at a discount, and the capitalization of interest past due at a rate lower than the contractual rate recorded in the Bank's books, which generated in aggregate a US\$48.9 million increase in shareholders' equity; and (ii) the issuance of US\$230.0 million of subordinated debt computable as supplemental capital under the Argentine Central Bank's capital adequacy rules.

Banco Galicia's 2007 Capital Increase

On October 11, 2006, the Bank's shareholders resolved to increase the Bank's capital stock by up to 100 million ordinary (common) book-entry, class B shares, with one vote per share and a nominal value of Ps. 1.0 each. The new shares could be purchased, at the option of the purchaser, in cash or in 2010 Notes, 2014 Notes and/or 2019 Notes. The offer was made only to shareholders. The purpose of the capital increase was to guarantee the Bank's compliance with the Argentine Central Bank's capital adequacy rules, in light of the increase in such requirements. This increase was expected because of the current and projected growth of the Bank's business volume with the private sector and the Argentine Central Bank's regulations establishing increasing capital requirements in respect of public-sector assets. See Item 4. Information on the Company-Selected Statistical Information-Regulatory Capital-Banco Galicia. The period during which preemptive rights could be exercised commenced on July 23, 2007, and ended on August 1, 2007. Accretion rights were able to be exercised during the same period. On July 27, 2007, we purchased 93,604,637 new shares through the exercise of our preemptive rights. During August 2007, the Bank issued 93,664,806 new shares through the exercise of its shareholders' preemptive and accretion rights. In total, the transaction led to a net increase in the Bank's shareholder's equity of Ps. 493 million, of which Ps. 466 million was an aggregate increase in the Bank's shareholders' equity items capital stock and issuance premiums, net of issuance costs, and Ps. 27 million was a profit in connection with the portion paid for in 2014 Notes, given that these notes were received by the Bank at a value lower than their book value.

Table of Contents

Banco Galicia Uruguay S.A. and Galicia (Cayman) Ltd.

In 1983, Banco Galicia Uruguay S.A. was established as a *Casa Bancaria*, a license that granted an offshore status, as an alternative service location for the Bank's customers. In September and October 1999, the Uruguayan government's executive branch and the Uruguayan Central Bank, respectively, approved Galicia Uruguay's status as a full service domestic bank. Due to the effects of the 2001-2002 crisis on Galicia Uruguay, in early 2002, the Central Bank of Uruguay suspended its activities and assumed control and management of Galicia Uruguay. In December 2002, Galicia Uruguay restructured its deposits into debt maturing in 2011. On June 1, 2004, Galicia Uruguay's license to operate as a domestic commercial bank was revoked by the Central Bank of Uruguay, but it retained the license from the Uruguayan government's executive branch. Control and management of Galicia Uruguay by the Central Bank of Uruguay ended on February 22, 2007. At the date of this annual report, Galicia Uruguay is not engaged in any active business and its existing restructured debt (time deposits and negotiable obligations), has been repaid in full.

Galicia (Cayman) Ltd. was established in 1988 in the Cayman Islands as another alternative service location for the Bank's customers. Galicia Uruguay's situation adversely affected its subsidiary Galicia Cayman, which commenced voluntary liquidation and surrendered its banking license effective as of December 31, 2002. In May 2003, Galicia Cayman together with the provisional liquidators designated by the Grand Court of the Cayman Islands completed a debt restructuring plan and, with the authorization of such Court, presented it to all creditors for their consideration. The plan was approved, in whole, by the vote of 99.7% of creditors, exceeding the legal majority required, on July 10, 2003, and became effective and mandatory for all creditors. On February 2, 2006, the Grand Court of the Cayman Islands declared the plan as terminated and ended the involvement of any third parties in the company's management beginning on February 23, 2006.

Regional Credit Card Companies

In the mid 90s, Banco Galicia made the strategic decision to target the non-bankarized individuals market, which, in Argentina, typically includes the low and medium-low income segments of the population which typically live in the Interior of the country, in addition to certain locations of the Greater Buenos Aires. To implement this strategic decision, among others, in 1995, the Bank began investing in non-bank companies operating in certain regions of the Interior, providing financial services to individuals through the issuance of credit cards with proprietary brands and extending credit to its customers through such cards. We refer to these companies in aggregate as the regional credit card companies.

In 1995, Banco Galicia made the first investment in this business by acquiring a minority stake in Tarjeta Naranja S.A. The remaining stake remained in the hands of the founders of the company, who currently retain a minority interest. This company had begun operations in 1985 in the city of Córdoba, the second largest city in Argentina, by marketing Tarjeta Naranja, its proprietary brand credit card, in this city and had enjoyed local growth.

Table of Contents

In 1996, the Bank formed Tarjetas Cuyanas S.A., to operate in the Cuyo Region (the provinces of Mendoza, San Juan and San Luis) in partnership with local businessmen, who currently retain a minority interest in the company. This company launched the Nevada Card in May 1996 in the city of Mendoza. Also in 1996, the Bank formed a new company, Tarjetas del Mar S.A., to operate in the city of Mar del Plata and its area of influence. Tarjetas del Mar S.A. began marketing the Mira card in March 1997.

In early 1997, the Bank purchased an interest in Comfiar S.A., a consumer finance company operating in the provinces of Santa Fe and Entre Ríos, which was merged into Tarjeta Naranja S.A. in January 2004.

In 1999, the Bank reorganized its participation in this business through Tarjetas Regionales S.A., a holding company wholly owned by Banco de Galicia y Buenos Aires S.A. and Galicia Cayman, which achieved control of Tarjeta Naranja S.A., Comfiar S.A., Tarjetas Cuyanas S.A., and Tarjetas del Mar S.A. In addition, in 1999, Tarjetas Regionales S.A. acquired a 12.5% interest in Tarjetas del Sur S.A., a credit card company operating in southern Argentina. In January 2000, this interest increased to 60% and, in February of the same year, Tarjeta Naranja S.A. acquired the remaining 40%. In March 2001 Tarjetas del Sur S.A. merged into Tarjeta Naranja S.A.

As of December 31, 2008, Banco Galicia held 68.22% of Tarjetas Regionales S.A. while Galicia Cayman held the remaining 31.78%. Directly or indirectly, as of that date, the Bank held 80.0% of Tarjeta Naranja S.A., 60.0% of Tarjetas Cuyanas S.A., and 99.995% of Tarjetas del Mar S.A.

These companies have experienced a significant expansion of their customer bases, in absolute terms and with respect to the range of customers served, number of cards issued, distribution networks and size of operations, as well as a technological upgrade and general modernization. By mid 1995, Tarjeta Naranja S.A. had approximately 200,000 cards outstanding. As of December 31, 2008, the regional credit cards companies had more than 4.7 million cards outstanding in the aggregate and were the largest proprietary brand credit card operation in Argentina.

Sudamericana

In 1996, Banco Galicia entered the bank-assurance business, through the establishment of a joint venture with Hartford Life International to sell life insurance and annuities, in which it had a 12.5% interest. In December 2000, the Bank sold its interest in this company and purchased 12.5% of Sudamericana, a subsidiary of Hartford Life International. As a result of various acquisitions, Grupo Financiero Galicia owns 87.5% of Sudamericana (with the remaining 12.5% being held by Banco Galicia) which offers life, retirement and property and casualty insurance products in Argentina through its subsidiaries Galicia Seguros S.A. (property and casualty and life insurance), Galicia Retiro Compañía de Seguros S.A. (retirement insurance) and Sudamericana Asesores de Seguros S.A. (insurance broker).

Net Investment S.A.

Net Investment S.A. (Net Investment) was established in February 2000 as a holding company whose initial purpose was to invest in and develop businesses related to technology, communications, the Internet, connectivity, and contents. On February 1, 2007, Tradecom Argentina -the only operating subsidiary of Net Investment was merged into Net Investment and the merger was registered with the *Inspección General de Justicia* (IGJ, the Argentine Superintendency of Companies). Net Investment conducts its operations under the name Tradecom Argentina and provides business-to-business e-commerce services.

Table of Contents

By the beginning of 2008, Net Investment began to make changes to both its institutional and product images in order to improve its market presence, look for new customers and retain its current clients. Net Investment focused on, among other objectives, improving its organizational structure in order to strengthen its strategic areas, so as to be able to take advantage of new business opportunities.

The efforts made were not sufficient to reach the business volumes necessary to generate the resources needed to cover Net Investment's operating expenses for 2008. Additionally, the estimates for 2009 are less favorable than those for 2008 due to among other factors the economic crisis currently affecting international markets, which has already had an impact at the domestic level.

Therefore, Net Investment's Board of Directors decided to refocus its operations and reorganize its structure, based on the future activities and objectives.

Galicia Warrants S.A.

Galicia Warrants S.A. (Galicia Warrants) was founded in April 1993, when it obtained the authorization from the relevant authorities to store goods and issue certificates of deposit of goods and warrants under the provisions of Law No. 9,643. On August 30, 2001, we acquired 87.5% of the capital stock and voting rights of Galicia Warrants, Banco Galicia holds the remaining 12.5%.

Galval

In January 2005, Galval Agente de Valores S.A. (Galval) was incorporated under the laws of Uruguay. This company operates in Montevideo's free trade zone and acts as stock broker in Uruguay. Grupo Financiero Galicia owns 100% of the voting shares of this company. Galval gradually started to operate in September 2005.

GV Mandataria

In March 2008, GV Mandataria de Valores S.A. (GV Mandataria) was incorporated with the purpose of carrying out securities related representations, mandates and commissions of all types, whether involving domestic or international companies. Grupo Financiero Galicia holds 90% of GV Mandataria's stock, and the remaining 10% is held by Galval. GV Mandataria was registered with the IGJ on July 16, 2008.

Business

Banking

Banco Galicia is our largest subsidiary. Banco Galicia operates in Argentina and substantially all of its customers, operations and assets are located in Argentina. Banco Galicia is a bank that provides, directly or through its subsidiaries, a wide variety of financial products and services to large corporations, small- and medium-sized companies (SMEs), and individuals.

Table of Contents

Banco Galicia is one of the main banks within the Argentine financial system, and is a leading provider of financial services in Argentina. As per the information published by the Argentine Central Bank, as of December 31, 2008, the Bank ranked third in terms of assets, deposits and loan portfolios within private-sector banks. As of the same date, the Bank was also ranked first among private-sector domestic bank in terms of assets, loans and deposits. Its market share of private sector deposits and of loans to the private sector was of 7.61% and 6.12% respectively, as of the end of 2008. On a consolidated basis, as of the end of fiscal year 2008, Banco Galicia had total assets of Ps. 24,440 million, total loans of Ps. 12,247 million, total deposits of Ps. 14,097 million, and its shareholders' equity amounted to Ps. 1,955 million.

Banco Galicia provides a full range of financial services through one of the most extensive and diversified distribution platforms amongst private-sector financial institutions in Argentina. This distribution platform is comprised of 238 full service banking branches, located throughout the country, 1,399 ATMs and self-service terminals owned by Banco Galicia, phone banking and e-banking facilities. The Bank's customer base reaches more than 1.8 million customers, who were comprised of mostly individuals but who also included nearly 44,000 companies. The Bank has a strong competitive position in retail banking, both with respect to individuals and SMEs. Specifically, it is one of the primary providers of financial services to individuals, one of the largest providers of credit cards, the primary private-sector institution serving the SMEs sector, and has traditionally maintained a leading position in the agriculture and livestock sectors.

For a breakdown of the Bank's revenues for the last three financial years, see Item 5.A. Operating Results-Results by Segments-Banking .

Wholesale Banking

The Wholesale Banking Division (Wholesale Banking) is in charge of the Bank's business with the corporate sector. It provides financial services and products to companies of all sizes and across all sectors of the economy and focuses on generating value-adding solutions that meet the needs of customer companies and establishing close, lasting relationships with its customers. Wholesale Banking provides personalized advice and a wide variety of commercial banking and investment banking products, to provide working capital and to finance middle and long term investment projects and international trade, among other purposes, and a wide range of transactional services among which are deposit accounts, commercial credit cards, collection and payment services, cash management, international trade services, direct payroll deposit, alternatives in the capital markets, foreign trade solutions and Galicia Office (the e-banking service for companies). Strong collaboration between the commercial banking units and the capital markets and investment banking units allows the Bank to better meet its customers' needs.

The Bank closed fiscal year 2008 with nearly 44,000 corporate customers, strengthening its leadership in the SMEs and agricultural and livestock sectors, as well as its strong presence in the large corporate sector. As of the end of fiscal year 2008, the corporate loans portfolio of the Bank (on an individual basis) was Ps. 4,865.4 million, and Ps. 17,671 million were disbursed in loans, including the purchase of checks and negotiable instruments for Ps. 9,300 million.

Table of Contents

Middle-Market Banking. Middle-Market Banking provides services to businesses with annual sales of more than Ps. 1 million, excluding multinationals or subsidiaries of multinationals or global companies. This unit offers its customers a broad range of financial products, including deposit taking and lending including general commercial loans, working capital loans, trade finance, on-lending of funds originated in other entities, overdraft credit lines, mortgage loans, and leasing services, transactional services, such as pay roll direct deposit, collections, and corporate credit cards as well as the Galicia Rural card, a proprietary card developed by the Bank especially for the agribusiness sector. Middle Market Banking is divided into three different units, each of which provides services tailored to companies particular needs based on such companies' annual sales, and has a special unit specializing in providing services to the agricultural and livestock sector, as follows:

SMEs: annual sales between Ps. 1 million and Ps. 150 million. Service of this sector is also divided in subcategories.

Large companies: annual sales above Ps. 150 million.

Agribusinesses: all agribusinesses and those individuals with activity in the agriculture and livestock sectors with annual revenues above Ps. 200,000 (individuals below Ps. 200,000 are served by the Retail Banking division).

In 2008, the Bank offered credit lines to, among other purposes, fund working capital and medium and long-term investment projects and also offered a leasing option to finance the acquisition of production equipment for the industrial and agricultural and livestock sectors. Among long-term loans, the International Finance Corporation (IFC) line of credit is notable. Such line of credit, which was used to fund investment projects in Argentina by SMEs from all economic sectors, allowed the Bank to close 36 transactions, totaling US\$26.1 million, during the fiscal year. In turn, in order to fund technological innovation projects for companies in the manufacturing and industrial sectors, the Bank continued to offer the FONTAR (*Fondo Tecnológico Argentino*, the Argentine Technological Fund) line of credit, and had the leading position in its placement, through 24 projects approved for Ps. 28.3 million during the fiscal year.

Within the commercial credit cards market, the Bank also maintained its leading position providing solutions and benefits for each segment of such market. The Visa Business card, for the SMEs segment and the Visa Corporate card, for the corporate segment, both designed to meet the needs of the companies' administrative and commercial activities, reflected an increase in purchases greater than 64% as compared to 2007.

The Galicia Rural credit card is an exclusive means of payment developed by the Bank for the agricultural and livestock sectors designed to finance the purchase of machinery and all of the supplies and services necessary for these sectors' activities. In fiscal year 2008, this product continued to grow and strengthened its leading position with an estimated 60% market share and over Ps. 1,000 million in agrochemicals, machinery, fuel, seeds and cattle financed, and a 17% increase in consumption as compared to 2006. The Bank has historically worked closely with this sector, through a direct relationship with the producers, a distinctive value added component of the Galicia brand. During the fiscal year, the Bank offered a whole range of products and services to producers, as well as the best financial assistance available. This close relationship was also evidenced by the Bank's involvement in over 300 agricultural events and its presence in over 180 cattle auctions all over the country, in which financing with the Galicia Rural card was provided.

Table of Contents

The Corporate Banking Centers play a key role in the Bank's service model, allowing it to strengthen relationships with its corporate customers and to deepen its knowledge of the different regions in which they operate. Currently, the Bank has centers located in the cities of Mar del Plata, Rosario, Mendoza, Córdoba, Corrientes and Tucumán, and new centers will be opened in Neuquén, Pilar and Quilmes. In each center, a team of specialized officials provides assistance on products and services for SMEs, agribusiness and international trade.

Corporate Banking. Corporate Banking serves the largest corporations and multinationals or subsidiaries of multinationals or global companies. This business unit offers clients a broad range of services tailored to fit their specific needs, including deposit-taking and lending, trade finance, general commercial and syndicated loans, working capital loans, letters of credit, collections and treasury services, and payroll direct deposit, among others. The objectives set forth for these products and services for fiscal year 2008 were exceeded. During the fiscal year, the Bank continued to selectively give priority to working capital financing, especially in international trade transactions, through pre-financing, financing of imports and, to a lesser extent, financial loans denominated in a foreign currency to companies that generate US Dollars through sales abroad.

Capital Markets and Investment Banking. These units focus on the integral development of complex capital markets and investment banking products and services for the Wholesale Banking Division's customers, the Bank itself and its subsidiaries. These services include strategic advice, capital raising through equity and debt securities, securitizations, debt restructuring, structured finance, and M&A advice, among others.

During fiscal year 2008, the Bank managed to maintain its income level as compared to the previous fiscal year, in spite of the environment within which the national and international markets developed. The Bank showed its leadership in market based on the variety and quantity of structured products it offered, among which the establishment of trust funds and the placement of corporate debt were most notable. With respect to the securitization market, the Bank established trust funds containing bank loans for the sale of durable goods and for sales through credit cards and, also, established financial trusts for agricultural activities. With respect to funding transactions, the Bank placed US Dollar-denominated bonds and Peso-denominated short-term securities. In total, the Bank placed 11 financial trusts, totaling approximately Ps. 854 million, and four debt transactions, for Ps. 212 million. This unit actively participated in the Bank's financial strategy, by structuring trust funds using the Bank's own portfolio consumer loans for Ps. 338 million. In addition, five trust funds were established totaling Ps. 459 million and three bond issuances totaling US\$49.6 million were undertaken for the regional credit card companies.

International Trade. The Bank's international trade services include documentary and stand by letters of credit, guarantees, documentary collections, payment order processing, as well as the possibility of financing trade related transactions. These services are supplemented by Galicia Factoring y Leasing S.A., a wholly owned subsidiary that offers international factoring services. The volume of factored international transactions in 2007 amounted to US\$48.5 million.

Table of Contents

The volume of foreign trade transactions handled through the Bank increased 42% as compared to the prior fiscal year, reaching US\$9,424 million and including over 4,800 clients. Taking into consideration only commercial transactions (imports and exports), the increase was equal to 43.6%. This rate greatly exceeded the increase in the total foreign trade amount for the country as a whole in 2008, which was equal to 31.5%. For these two items, the Bank carried out transactions totaling US\$8,443 million, which was equal to 6.4% of Argentina's foreign trade for the year. This growth was also reflected in the over 230,000 transactions processed, which was a 14.2% rate of growth for the fiscal year.

All these results were achieved due to the development of several actions within the relationship banking concept, which sought to strengthen the Bank's position as a model for foreign trade transactions. It is also important to highlight the Bank's active involvement in sector-specific chambers of commerce and bank associations, an involvement that strengthened its position as a market leader.

Non-Financial Public Sector. Through this unit the Bank provides financial services to different government areas and entities, in different districts, focusing on transactional services. During fiscal year 2008, visits to various districts were intensified, new agreements were subscribed to and the range of services rendered to the municipal sector was broadened. The increased interest in such services offered has placed the Bank in a good position to continue to do business for the public sector in 2009.

Corporate and Real Estate Business Development. This unit's objective is to develop and leverage business opportunities related to the corporate area and to channel business development, structuring and real estate projects financing opportunities within the corporate, commercial, industrial and tourism-related segments. During 2008, the Bank's leading position was strengthened with respect to the structuring and execution of real estate leasing transactions for the purchase and construction of real estate assets for different companies.

Retail Banking

The Retail Banking Division manages the Bank's business with individuals and with businesses, small retailers and professionals with annual revenues below Ps. 1 million. Retail Banking provides a wide range of financial products and services, encompassing transactions, loans, and investments. On the transactions side, among others, the Bank offers its customers checking and savings accounts, credit and debit cards, and payroll direct deposit. On the investment side, Banco Galicia's products and services include certificates of deposit, mutual funds and insurance products. In addition, Banco Galicia provides credit for the acquisition of consumer goods and housing, mainly through personal loans, credit-card loans, overdraft loans and residential mortgages. The Bank's product offerings also include securities and foreign exchange brokerage, securities custody, and safety boxes, among others. In addition the Bank provides private banking services. The Bank's customers have access to its services through its branch network as well as through its electronic distribution channels. See below and -Sales and Marketing .

Table of Contents

Year after year, the Bank renews its commitment to work with its customers, offering financial solutions suitable for the different market sectors it services. During the fiscal year, in addition to continuing to focus on its broad client base, the Bank has, through mass advertising, reached out to a broader potential client base, all over the country. At the end of fiscal year 2008, Retail Banking's customer base was comprised of more than 1.8 million individuals and the Bank's portfolio of loans to individuals amounted to Ps. 5,578.3 million, 20.4% more than at the end of fiscal year 2007. With respect to the number of new accounts, the portfolio of individuals' current accounts increased 25% and with respect to savings accounts, an 18% increase was recorded, in both cases as compared to 2007.

With respect to credit cards, the amount in Pesos corresponding to purchases with Visa, Visa Débito, American Express and MasterCard cards issued by the Bank exceeded Ps. 8,400 million (a 31% increase as compared to the previous fiscal year) in over 83 million transactions (a 15% increase as compared to 2007). The number of accounts and debit cards used for purchases, amounted to over 1.1 million as of December 2008, accounting for a 15% increase as compared to the previous fiscal year. Also, the Bank continued to offer the benefit of the Aerolíneas Plus program, which represents a differential advantage over our competitors, through which over 55,000 customers were able to fly to the place they desired using the points accumulated through their purchases made using their credit cards issued by the Bank. This benefit program is based on an agreement between the Bank and the airline company that, among other things, establishes the price of the mileage that the Bank's customers accumulate through the use of their credit cards, which price the Bank pays on an ongoing basis. The mileage is then credited to the customers' account with the airline company.

With respect to personal loans, the Bank extended such loans to its existing customers, continuing to pre-assign credit limits (the loan amount authorized to be extended) to those customers with salaries directly deposited at the Bank or that already had a risk product outstanding, and non-customers. In 2008, investments and deposits from clients that did not have a risk product were included as customers able to receive personal loans, thus adding over 40,000 clients and reaching over 300,000 clients who now have an automatic rating available in order to obtain access to consumer loans. In addition, the Bank improved its loan-origination times using on-line crediting to accounts, thus allowing the customer to immediately have the funds available. Sales through automatic channels (telemarketing, Fonobanco and Home Banking) recorded a 38% increase in comparison with fiscal year 2007. The sale of consumer loans was added to the automated teller machines (ATM) transactions, an option through which customers can have access to a loan immediately and withdraw the funds through the ATM itself. The Bank also continued to work hard on placement campaigns, reaching customers and non-customers through mass communications and direct marketing actions with an assigned loan rating. All of the above allowed the Bank to place over 95,000 loans in compliance with the objectives set forth for the fiscal year and within the changing context with respect to liquidity and demand that characterized the fiscal year.

Despite the characteristics of a real estate market that did not grow, the Bank, in accordance with its prudential policy of the past years, continued to meet its customers' demands by offering a wide range of uses, terms and rates (mainly fixed and combined). During fiscal year, the portfolio maintained its balances' level, recording a 3% growth in comparison with 2007.

Table of Contents

In addition, the Bank markets through its wide distribution network a broad range of property and life insurance, from Sudamericana Holding, as well as from other leading insurance companies. During fiscal year, the Bank continued to strengthen its position within the bank assurance market and its role as a comprehensive financial services provider, which translated into an increase in insurance related income from services. In 2008, the Bank once again recorded an increase in insurance placements, positioning the Bank among the main actors in marketing property insurance products.

In fiscal year 2008, the number of customers that collected their salaries through the Bank grew more than 18%, while the amounts deposited increased more than 48% as compared to 2007. It is also worth mentioning that foreign-currency brokerage of both US Dollars and Euros, a service rendered in all branches, showed a 30% increase in the amount traded and a 35% increase in its related annual income as compared to the previous year. In addition, during 2008, the Bank continued the implementation of its branch network safety box service installation plan, increasing annual income by 32%.

Private Banking. Galicia Banca Privada (Galicia Private Banking) offers premium, professional financial services to people with medium to high net worths through the management of their investment portfolios and the provision of financial counseling. In addition, it offers a wide range of domestic financial investments to its clients, giving priority to the Bank's products (deposits, Fima mutual funds, among others) and trust funds and bonds for which the Bank acts as an underwriter.

One of the competitive advantages offered by Private Banking within this segment is the broad geographic coverage of its service centers, which includes: six regional centers in the main cities of the country and six centers in the Autonomous City of Buenos Aires and Greater Buenos Aires, including the service center located on the 16th Floor of the Bank's corporate building.

Branch Network

As of December 31, 2008, the Bank's branch network's geographical distribution was as follows:

Geographical Area	Number of Branches
City of Buenos Aires	76
Greater Buenos Aires	60
Rest of the Province of Buenos Aires	31
Santa Fe	15
Córdoba	14
Mendoza	9
Entre Ríos and Chubut	4 each
Río Negro	3
Corrientes, La Pampa, Misiones, San Luis, Tierra del Fuego and Tucumán	2 each
Catamarca, Chaco, Formosa, Jujuy, La Rioja, Neuquén, Salta, Santa Cruz, Santiago del Estero and San Juan	1 each
Total	238

Table of Contents

During 2008, the Bank opened 6 new branches in the following locations in accordance with the plan presented the previous fiscal year: Canning, located in Greater Buenos Aires, Villa Mercedes, in the province of San Luis, Recta Martinoli, in Córdoba Capital City, Tucumán Barrio Norte, in the province of Tucumán, San Lorenzo, in the province of Santa Fe, and Comodoro Barrio Industrial, in the province of Chubut. In addition, the number of business officers specialized in personalized services to the highest-potential customers segments, both SMEs and individuals was increased.

The Bank continued to work on strengthening its Commercial Coaching program, the main objective of which is to increase sales productivity within the individuals segment and to make the application of its customer service model more consistent. A challenge for the next fiscal year is the strengthening of the Advisory Sale program, which was initiated in 2007, in order to establish better relationships and business reciprocity with certain Wholesale Banking customers.

Alternative Channels

The services, transactions and sales channels that the Bank offers, other than traditional branches that service both individual and corporate customers, include the Customer Contact Center, e-galicia.com, Red Galicia 24, Galicia Móvil, the Retail Sales Unit and the Real Estate Center. As in previous fiscal years, the level of use of alternative channels by the Bank's customers recorded an upward trend.

e-galicia.com. e-galicia.com provides specific services for both individuals (Home Banking) and companies (Galicia Office) and enables customers to access and utilize their products anywhere 365 days per year as if they were carrying out their transactions in a traditional branch. e-galicia.com enables individual customers to undertake different operations, from inquiries and requests of information to investments and transfers between their accounts and third party accounts at the Bank or any other bank. In the case of companies, Galicia Office provides a wide range of functions aimed at facilitating such companies' treasury management, making collections and payments, including salaries, easier, providing information related to such transactions and a communication channel between companies and their suppliers, among others.

Through Home Banking alone, approximately 9 million monthly enquiries and transactions were made in 2008, up 53% in respect to 2007. The trend of an increasing number of subscribed customers continued from the last years, with a 28% rise in fiscal year 2008. Among the wide range of available transactions, data reveals a significant increase in the channel's efficiency and a special preference for the payment of services and transfers to third parties, with increases of 47% and 40%, respectively during the fiscal year.

It is worth highlighting the level of use this channel reached within the Business and Professionals segment. 42% of these customers generally use the wide range of transactions available and access exclusive services, such as payroll payments, enquiries on business settlements and payments received, and access Red de Campo and Galicia Compras.

Table of Contents

Galicia Office has been available for over nine years and has over 30,000 customers, or 71% of the Wholesale Banking customer base. With over 45 million enquiries and 1.7 million transactions, the operational volume increased 46% during the fiscal year. As regards payroll direct deposits, the number of these transactions exceeded by 112% the figure recorded in 2007, and over 61% of these direct deposits were carried out through Galicia Office. As regards international trade, the amount of transfers abroad and payment orders processing exceeded by 39% the figure recorded in the previous fiscal year. As in previous years, the Bank worked on the generation of new functionalities, among which the allocation of pre-financing in the settlement of payment orders and the implementation of a significant development in order to improve the distribution of files of Integrated Collection, Supplier Payments and Automatic Debit Services stand out.

Galicia Compras , our e-commerce channel and Red de Campo, our agricultural data site, both for the exclusive use of Galicia Office customers, continued to grow with respect to the number of queries made. In addition, new benefits and improvements have been added to both channels. In Galicia Compras, the Bank worked hard on the generation of promotional offers through agreements subscribed to with first class suppliers and service providers and on the development of the channel s transactional phase through which the customer can place its purchase orders to its suppliers, which became operational during early 2009.

Customer Contact Center (the CCC). The CCC includes: Fonobanco, the telephone banking service (with an automated customer-service system, or IVR, in operation); FonoSeguros, which offers assistance on all kinds of insurance coverage; International Trade, which offers assistance on the Bank s products and on all international trade matters; e-galicia, the technical support and counseling service that assists customers that operate with the Bank s Internet services; Galicia Responde, the suggestions, complaints and claims specialized service; Telemarketing, the sales and telephone advice facility for customers and non-customers, through which the Bank has been able to reach customers in a fast and efficient manner, closing sales immediately, signifying a premium service; the Investments Center, through which a broad range of investment products is made available; and the Collections Center.

Red Galicia 24. Comprises 620 ATMs (7% more than 2007) and 754 self-service terminals (25% more than 2007) installed in the Bank s branch network and other locations throughout the country such as gas stations, supermarkets and shopping malls. This network of state-of-the-art technology terminals solves transactional needs for our customers and users in a dynamic, simple, safe and affordable way, on a 24-7 basis. The Bank s ATM network, one of the most extensive in the country, recorded a 16% increase in the number of total transactions for the fiscal year as compared to the previous year, while the amounts of transactions carried at self-service terminals recorded a 25% increase over the same period. During 2008, 53 million ATM transactions and 18 million self-service terminal transactions were made. In accordance with the plan to improve Red Galicia 24 s service quality and increase its capabilities and functions, the Bank continued to replace ATMs, 90% of which were already replaced as of the end of 2008, and finished the technical upgrade of self-service terminals.

Table of Contents

Galicia Móvil. Galicia Móvil (Galicia Mobile) was launched in 2006, adding a new service channel available through cellular phones. Initially, it focused on small payments and later evolved to make available to its customers a cell phone application that allows them to make queries and payments of services, taxes and credit cards. These new applications were in addition to the existing message services for cell phones, such as balances alerts, payroll deposits, credit cards due dates, time deposits and automatic debits. In addition, two months after the launch of the new iPhone mobile phone, the Bank implemented an application that allows direct access to the Bank's webpage, searches for the nearest branch through GPS systems and the presentation of promotional offers and services.

Retail Sales Unit. This specialized sales force made a significant contribution to the increase in retail banking products sales. During 2008, this unit experienced significant growth, ending the year with a team of sales professionals distributed in over 30 main locations throughout the country.

Real Estate Center. Its purpose is to strengthen and encourage the placement of mortgage loans through interaction with realtors. In order to do so, the center has trained personnel that is specialized in these credit lines and who provide constant advice to realtors and personalized service for each referred customer.

Treasury Division

The Treasury Division is responsible for the centralized management of the Bank's treasury operations and liquidity, as well as for its foreign-exchange and securities positions, and it participates in the management of market, liquidity, interest-rate and currency risks. To this end, it develops the necessary data and strategies to keep such risks within the limits established by the Board of Directors. In addition, it provides financial services and distributes financial products to, among others, corporations, financial entities, mutual funds, the public sector and insurance companies. The Bank carries out securities trading services in the different markets, mainly in its capacity as an agent of the *Mercado Abierto Electrónico* (MAE, Argentine Over-The-Counter Market) and also through Galicia Valores S.A. Sociedad de Bolsa (Galicia Valores), a brokerage firm that operates on the BASE. This division manages the Bank's business relations with correspondent banks, international credit agencies and international mutual funds.

Financial Operations. Despite international and local factors that did not favour the flow of capital to emerging markets, traded volumes within the domestic market during 2008 did not show significant variations in comparison to 2007. As regards fixed-income instruments, the traded amount was US\$88,840 million (9.7% below 2007), with the total amount traded by the Bank US\$1,485 million. In the equity market, the total traded volume amounted to Ps. 124,570 million (a 17% increase in comparison to 2007) and to which Galicia Valores contributed with a total of Ps. 1,482 million.

In addition, during the fiscal year, the Bank placed in the local and international markets 12 issuances of financial trust securities and negotiable obligations, both its own and for third parties. The total amount of said issuances amounted to Ps. 898 million.

Table of Contents

As regards foreign-exchange brokerage, during 2008, the higher volatility caused an increase in traded volumes. In foreign-trade transactions, traded amounts reached US\$9,424 million, which represented a 42% increase from the previous fiscal year, and foreign-exchange bills brokerage reached US\$3,060 million, which represented a 57% increase as compared to 2007. In the wholesale foreign-exchange market, the total amount corresponding to transactions closed by the Bank through the MAE amounted to US\$10,593 million, similar to the amount traded in 2007. As regards the forward market (OCT-Rofex), the volume traded by the Bank amounted to US\$6,004 million during 2008, thus doubling the volume recorded the previous year.

Asset Management. Banco Galicia distributes the FIMA mutual funds family through its broad distribution network (branches and electronic banking channels, such as ATMs, phone banking and e-galicia.com) to different customer segments (institutions, companies and individuals) and it also acts as the custodian of the assets that make up the funds, in its role as depository. Galicia Administradora de Fondos is the Bank's subsidiary that manages investments and determines the value of the mutual fund units on a daily basis. The mutual funds invest in a variety of financial instruments, such as government and corporate securities, and equity or term deposits, among others, depending on the different investment profiles.

The mutual funds sector, and international mutual funds in particular, recorded a significant drop in value, caused, on the one hand, by the drop in prices of fixed and variable-income assets due to the worsening of the international markets crisis and, on the other hand, due to local regulations which first restricted funds with Mercosur assets in the AFJPs portfolios (Joint resolution No. 517 by the *Comisión Nacional de Valores* (CNV, National Securities Commission) the Argentine Central Bank and the Superintency of AFJPs) and then eliminated the AFJPs system with these funds being now fully managed by the ANSES. This last situation turned ANSES into one of the main stakeholders in the industry, mainly as regards time deposits and international share deposits. Notwithstanding, during 2008, total funds managed by Galicia Administradora de Fondos grew 26.1%, amounting to Ps. 776 million at fiscal year end.

International. The Bank's positive image, consolidated by, among other things, its permanent presence in main international events, enabled the Bank to keep available all commercial lines by correspondents despite the financial crisis. This enabled the Bank to cover all of the foreign-trade business requirements channeled through the Bank by our customers. It is important to highlight that, despite the increase in financial costs due to the decrease in international liquidity, the Bank has managed to maintain margins related to its foreign trade operations.

Regional Credit Cards

The regional credit card companies' operation is estimated to be the largest of its kind in Argentina. These companies issue proprietary brand credit cards (the Naranja, Nevada and Mira cards) to their customers in the Interior, which allow their holders to charge purchases of goods or services in a network of approximately 115,000 retailers that have agreed to accept the cards, located throughout the Interior and in certain locations of the Greater Buenos Aires area. The companies accept and process from each participating retailers the charges arising from cardholder purchases. The cards can be used as charge cards or purchases can be financed through different payment schedules among which cardholders can choose and that differ by company. The regional credit card companies also extend personal loans to the cardholders to be repaid in up to 24 fixed installments. Through these cards, customers also have access to the ATM networks operating in Argentina (Banelco and Link) to make cash withdrawals and to automatic debit services, among others. The regional credit card companies also market Sudamericana's insurance products and issue Visa, Amex and MasterCard cards (accepted all over the world) to holders of their proprietary brand cards. All of the products of a customer are managed through one statement.

Table of Contents

At the end of fiscal year 2008, the number of statements issued and the number of cards managed by the regional credit card companies exceeded 1.9 million and 4.7 million, respectively. With respect to business volume, aggregate annual purchases made by cardholders exceeded Ps. 7.55 billion in fiscal year 2008, representing almost an increase of 35% from fiscal year 2007, while, as of December 31, 2008, the regional credit card companies loan portfolio before allowances for loan losses and including securitized loans, amounted to more than Ps. 3.25 billion, representing a 20% increase from the end of 2007. In 2008, the total number of transactions (purchase coupons plus loan and advance operations) amounted to about 70 million. These higher volumes were accompanied by a deterioration in the asset quality indicators although they remain at good levels for the long-term.

The regional credit card companies' distribution network is made up of 208 service centers (of which 151 are branches), 21 more than at the end of 2007. Originally their operations were concentrated in their regions of influence and their distribution networks did not generally overlap. In the last years, these companies have expanded their geographical reach and are undergoing a phase of geographical expansion throughout Argentina, which is causing competition among the companies in certain locations. During 2008 Tarjeta Naranja S.A. expanded into the Greater Buenos Aires area, an area of high potential due to its large population, while, in 2007 and 2008, Tarjetas Cuyanas S.A. entered the most important markets in the north of Argentina and Tarjetas del Mar S.A. broadened its area of influence (Mar del Plata) increasing its number of branches from 3 to 9. The regional credit card companies target mainly the low and medium-low income segment of the population, which in Argentina rarely uses a bank or may not operate with a bank at all but, with time, their customer base has expanded to include other segments of the population.

For a breakdown of the regional credit card companies' revenues for the last three financial years, see Item 5.A.

Operating Results-Results by Segments-Regional Credit Cards .

Insurance

Galicia Seguros S.A. (Galicia Seguros) is a provider of a variety of property and casualty (P&C) and life insurance products. Its most important line of business is group life insurance, including employee benefit plans and credit related insurance. With regard to P&C insurance products, it primarily underwrites home and ATM theft insurance. Galicia Retiro Compañía de Seguros S.A. (Galicia Retiro) provides annuity products, and Sudamericana Asesores de Seguros S.A. is an insurance broker. These companies operations are all located in Argentina.

The joint production of the above-mentioned insurance companies amounted to Ps. 293.7 million in 2008, compared with Ps. 145.4 million in 2007. This production increase was experienced both by Galicia Seguros and Galicia Retiro. In Galicia Seguros, the commercial activities were aimed at increasing sales (which amounted to Ps. 74.1 million in annualized premiums in 2008, and to Ps. 46.3 million in annualized premiums in 2007), improving the insurance policy lap ratio, and increasing the type of coverage offered. On the other hand, Galicia Retiro launched in August 2007 the Pension-Linked Life Annuities, resulting in a production amounting to Ps. 13.3 million in 2007, and Ps. 18.8 million in 2008. For a breakdown of the insurance companies' revenues for the last three financial years, see Item 5.A. Operating Results-Results by Segments-Insurance .

Table of Contents

In line with our strategy, this investment allows us to consolidate our leadership as a financial services provider and supplement those businesses that Banco Galicia may only conduct to a limited extent due to prevailing regulations. The Bank and the regional credit card companies market Sudamericana's insurance products through their distribution network. Sudamericana's subsidiaries also sell their products through their own distribution networks.

Other Businesses

Galicia Warrants: this company is a leading company in its industry, in which it has continuously conducted business in Argentina since 1994. Galicia Warrants stores goods and issues certificates of deposit for goods and warrants. Warrants are legal instruments that are delivered to banks as collateral for their financing. By issuing such certificates Galicia Warrants helps agricultural producers to mitigate the price seasonality of their products by allowing them to choose when to sell them. It also facilitates its customers' access to credit, secured by such certificates and the use of goods kept in custody by Galicia Warrants as collateral reduces the cost of credit for its customers. Galicia Warrants principal customers belong to the agricultural, industrial, agro-industrial, export and retail sectors, and it serves more than 600 companies in more than 800 warehouses distributed throughout the country. Its activities are concentrated in the central region of Argentina. During 2008, the revenues of this company amounted to Ps. 11.6 million (61% more than in 2007), with Ps. 2.1 million in profits (as compared with Ps. 1.1 million in profits in 2007). During 2008, the company issued deposit certificates and warrants in the amount of US\$91.9 million for third-party's goods distributed all over the country and relating to a wide range of products.

Net Investment: this company conducts its operations under the name Tradecom Argentina, providing business-to-business e-commerce support services and virtual markets for transactions between companies and suppliers.

Galval: this company mainly generates fee income from brokerage and custodial services rendered to the Bank's customers. As of December 2008, it had custody of customers' securities for an amount of US\$80.0 million, out of which US\$12.9 million related to securities held by Grupo Financiero Galicia.

For a breakdown of the other businesses' revenues for the last three financial years, see Item 5.A. Operating Results-Results by Segments-Other Grupo Businesses .

Competition

Due to our financial holding structure, competition is experienced at the level of our operating subsidiaries. We face strong competition in most of the areas in which our subsidiaries are active. For a breakdown of our total revenues, for each of the past three fiscal years, for the activities discussed below (i.e., banking, regional credit cards and insurance), please see Item 5.A. Operating Results-Results by Segments .

Table of Contents

Banking

Banco Galicia faces significant competition in all of its principal areas of operation. The Bank faces competition from foreign banks operating in Argentina, mainly large retail banks which are subsidiaries or branches of banks with global operations, Argentine national and provincial government-owned banks, private-sector domestic banks and to a lesser extent from cooperative banks, as well as from non-bank financial institutions.

With respect to private-sector customers, the most important segment for the Bank, the main competitors are large foreign retail banks and certain domestically-owned private-sector banks, which, prior to the crisis, operated in merchant or private banking and that, after the 2001-2002 crisis, acquired the retail operations of banks that left the business as a result of such crisis. Competition from public-sector banks has decreased from the immediate post-crisis period, as the public, which was initially attracted to such institutions as safe harbors, began to search for better service with private-sector financial institutions. However, the three largest government-owned banks are of a significant size and also compete with the Bank.

The Bank's estimated market share of private-sector deposits in the Argentine financial system only and considering only the Bank's operations in Argentina, was 7.61% as of December 31, 2008, compared to 8.23% and 8.43% as of December 31, 2007 and 2006, respectively. Following the 2001-2002 crisis, the Bank significantly increased its deposit market share. The decrease is attributable, mainly, to a reduction of its exposure to institutional deposits, due to its high liquidity condition.

The Bank is one of the leading banks in Argentina and the largest domestically owned private-sector bank, as measured by its assets. As of December 31, 2008, measured by its deposits in Argentina only, the Bank was ranked fifth in the whole financial system and third among private-sector banks (including foreign banks). The Bank has a strong competitive position in retail banking, both with respect to individuals and SMEs. Specifically, it is one of the primary providers of financial services to individuals, it is the primary private-sector institution serving the SMEs sector and it has traditionally maintained a dominant position in the agriculture and livestock sector.

Argentine Banking System

As of December 31, 2008, the Argentine financial system consisted of 84 financial institutions, of which 67 were banks and 17 were financial non-bank institutions (including finance companies, credit unions and savings and loans associations). Of the 67 banks, 12 were Argentine national and provincial government-owned or related banks. Of the 55 private-sector banks, 33 were private-sector domestically-owned banks; 21 were foreign-owned banks (i.e., local branches or subsidiaries of foreign banks); and 1 was a cooperative bank, also domestically-owned.

Table of Contents

As of the same date, the largest private-sector banks, in terms of total deposits, were: BBVA Banco Francés, Banco Río Santander, Banco Galicia, Banco Macro, HSBC Bank, Citibank, Credicoop and Standard Bank. Banco Galicia, Banco Macro and Credicoop are domestically-owned banks and the others are foreign-owned banks. According to information published by the Argentine Central Bank as of December 31, 2008, private-sector banks accounted for 57.4% of total deposits and approximately 63.8% of total net loans in the Argentine financial system. Argentine financial industry regulations do not raise any entry or exit barriers, nor do they make any differentiation between locally or foreign-owned institutions. The only cooperative bank is active principally in consumer and middle-market banking, with a special emphasis on the lower end of the market. As of December 31, 2008, financial institutions (other than banks) accounted for approximately 0.3% of deposits and 3.4% of net loans in the Argentine financial system.

As of December 31, 2008, the largest Argentine national and provincial government-owned or related banks, in terms of total deposits, were Banco Nación and Banco de la Provincia de Buenos Aires. Under the provisions of Law No. 21,526 as amended (*Ley de Entidades Financieras*, the Financial Institutions Law), public-sector banks have comparable rights and obligations to private banks, except that public-sector banks are usually chosen as depositaries for public-sector revenues and promote regional development and certain public-sector banks have preferential tax treatment. The bylaws of some public-sector banks provide that the governments that own them (both national and provincial governments) guarantee their commitments. Under current law, Banco de la Provincia de Buenos Aires is not subject to any taxes, levies or assessments that the Government may impose. According to information published by the Argentine Central Bank, as of December 31, 2008, government-owned banks and banks in which the national, provincial and municipal governments had an ownership interest accounted for 42.3% of deposits and 32.9% of loans in the Argentine financial system.

Consolidation has been a dominant theme in the Argentine banking sector since the 1990s, with the total number of financial institutions declining from 214 in 1991 to 84 at December 31, 2008, with the ten largest banks holding 75.62% of the system's deposits and 68.69% of the system's loans as of December 31, 2008.

During the 1990s, foreign banks significantly increased their presence in the Argentine financial system. Since the last quarter of 1996, control of most of the largest Argentine private-sector domestically-owned commercial banks was transferred to foreign banks, which now control most of the largest private sector financial institutions except the Bank. This foreign presence grew both in the universal banking sector and among financial institutions specializing in specific products or markets. This situation has not changed despite the fact that the number of foreign banks decreased by 16 through December 2008, as compared to the end of 2001, and that foreign banks' share of total deposits has decreased since the 2001-2002 crisis while the share of domestic private-sector banks has increased.

Regional Credit Cards

No official data is available about the credit card and consumer finance market of the Interior in which the regional credit card companies operate. However, the regional credit card companies' operation is estimated to be the largest of its kind in Argentina and Tarjeta Naranja is estimated to be the largest proprietary brand issuer in Argentina amongst approximately 170 companies. After the 2001-2002 crisis, which significantly affected these companies' competitors and led many of them to cease operations, and until 2004, competition had been relatively low or inexistent. Since 2005, and especially during 2006, 2007 and the first half of 2008, the regional credit-card companies have faced increased competition from: (i) the banks due to a nation wide aggressive offering of personal loans with low interest rates, (ii) the creation by banks of units, companies and products specializing in services for the low and mid-to-low income segments of the population, which is the regional credit card companies' target, and (iii) large retail trade players, such as supermarkets, home appliance chains and department stores, which offered their customers ample financing, apart from price cuts in purchases made at their stores with their proprietary credit cards.

Table of Contents**Insurance**

Sudamericana's subsidiaries face significant competition, as the Argentine insurance industry was comprised of approximately 183 insurance companies as of December 2008, 45 of which were dedicated exclusively to life insurance and 22 to annuities. Subsidiaries of foreign insurance companies and the world's largest insurance companies with global operations are among these companies. In addition, as of that date, the number of brokers amounted to approximately 27,000 individuals and 240 companies.

In 2008, the market recovery continued and production was close to Ps. 27 billion, with an 8% increase in current values. Of this amount, 71% of the total production related to P&C insurance; 20%, to life and personal insurance; and the remaining 9% related to retirement insurance. Out of the 71% related to P&C insurance, the automotive insurance segment continued, as in the prior years, to be the most important segment (45% of the P&C insurance sector), followed by the labor risk segment (25%). Out of the remaining 29%, nonpension-linked life insurance represented 55% thereof, followed by pension-linked life insurance (13%), pension-linked retirement (25%) and voluntary retirement (7%). The most dynamic sector in terms of annual growth was life insurance.

As of December 2008, Galicia Seguros ranked sixth in terms of the number of group life insurance policies underwritten and tenth in terms of the number of home insurance policies underwritten.

Sales and Marketing

Banco Galicia's and the regional credit card companies' distribution capabilities are our principal marketing channels. Our distribution network is one of the largest and most flexible distribution platforms in the country and has nationwide coverage. The network of offices of the regional credit-card companies mainly serves the medium and low income segments of the population, which generally make less use of bank services, through offices located all across the Interior of the country and through Banco Galicia, we operate a nationwide distribution network, which is one of the most extensive and diversified distribution networks among private-sector financial institutions in Argentina.

	March 2009

Self-Service Terminals	758
Electronic Banking Transactions (thousands per month)	
ATMs + Self-Service Terminals	7,724
Phone-Banking	457
e-banking	12,693

Table of Contents

The Bank markets all of its financial products and services to high-, medium- and medium-low-income individuals, including loans, insurance and FIMA family of mutual funds, among others, through its branch network, which operates on-line in real time. Within the branches, the sales force is specialized by type of customer and by customer segment. The Bank's sales policy encourages tellers to perform sales functions as well. Wealthy individuals who are private banking customers are served by specialized officers and a specialized network of service centers, including a head office facility.

Commercial and investment banking services to large corporations and other entities are provided in a centralized manner. Branch officers are responsible for the Bank's relationship with middle-market and small businesses and most of the agriculture and livestock sector customers. The Bank also has established specialized centers that concentrate on providing service to businesses, which are distributed across the country and located in main cities of the Interior and certain customer companies facilities.

All of the Bank's individual and corporate customers have access to the Bank's electronic distribution channels, including the ATM and self-service terminals network and self-service terminals (Red Galicia 24), a multifunction call center (the CCC), an e-banking website (e-galicia.com) and a banking service through cell phones (Galicia Móvil). In addition, the Bank has a special sales unit specializing in marketing various retail banking products and services, and a centralized unit specializing in the marketing of mortgage loans, which works together with realtors. Banco Galicia is clearly client service oriented and assigns great importance to its service model and seeks to improve it constantly. In 2005, a new sales and service model was designed and implemented, with the purpose of increasing commercial efficacy, establishing an integrated strategy among the different distribution channels and improving the quality of service. In line with this model, the Bank moved forward in its specialization of distribution channels (readjusting product offerings by segment/channel), the redesign of the customer service model at the branches, and the attraction of new open-market customers, among others. Also a plan for the migration of cash operations to automatic means in order to reduce operating burden and waiting times at the branches was added. In 2006, the new customer service model, which had been implemented in all branches during the previous year, was reinforced through the assignment of business officers for medium- and high-income individuals as well as for companies. In the latter case, emphasis was placed on the agricultural and livestock sectors and the whole range of the SMEs segment. During 2007, the number of officials specializing in personalized service to the higher potential customer segments was increased while in 2008 the retail sales unit recorded significant growth increasing its distribution and service capacity.

Table of Contents

The Bank has a segmented marketing approach. In the late 1990s, data warehouse capabilities began to be used to design marketing campaigns focused on specific segments of the Bank's customer base. The Bank focuses on the ongoing enrichment and exploitation of its corporate data warehouse and of the Retail Division's data mart in order to, among others, generate the information and the necessary knowledge to create data mining models to focus product sales in accordance with each customer's preferences. These tools have allowed the Bank to improve its knowledge of its customers and its portfolio segmentation, and to work on micro segmentation and the identification of more precise targets. The Bank's marketing strategy is also focused on the development of long-term relationships with customers based on a deep and increasing knowledge of those customers. As part of this client-oriented strategy, in the late 1990s, the Bank began to implement customer relationship management technology. Currently, a program named "Genesis" is under development, geared at improving the way the Bank's business relationships with its current and potential customers are managed, spanning all of the Bank's business units, and combining the perspective of each of them into an integral vision.

The Bank's investment in advertising has increased in the last years, in line with the general market's trend and particularly, the Argentine financial system's increase in investment and number of advertisers. These actions, along with massive events in shopping centers across the country and many direct-marketing programs have reinforced the perception of the Bank as a close and friendly bank and have strengthened the brand image, allowing the Bank to regain the "top of mind" (immediate brand recollection) leadership in its category.

During 2007, the Bank completed a brand image change project, launching its new brand and starting to use it in all products and communication pieces on March 31, 2008. Implementation at the branches was launched and will be gradual. This decision not only implies a change in style, but is also strategic and goes hand in hand with the continuous development of the Bank's products and services. This change is focused on visually communicating the Bank's identity in a more modern way and on achieving a better connection between its identity and visual representation.

The Bank considers quality of service as the main element capable of distinguishing it from competitors. In order to measure this indicator, the Bank periodically performs surveys, with positive results in the last years, showing high customer satisfaction. During 2005, the Bank implemented new measures and activities, especially at the branch level, and during 2006, started the implementation of a three-year plan for the purpose of strengthening the organizational culture through certain values such as commitment, kindness, and accuracy, while continuing with the assessment of service quality at the branches. This assessment is part of the incentive program and is based on the ongoing monitoring of indicators of customer satisfaction, service quality and the response to claims. In November 2005, the Bank began adhering to the "Code of Banking Practices" established by the four bank associations of Argentina, which will further contribute to the improvement of the quality of service.

The regional credit card companies market their products and services through a network of branches and service centers, the size of which depends on the size of the locations in which they operate. The companies' culture is strongly client service oriented and assigns great importance to quality of service. Sales officials receive intensive training in personalized sale of the companies' products and quality of service, given that the bulk of sales is conducted on a one-on-one basis. Quality of service at the branches is permanently monitored by third parties and availability is enhanced through extended business hours. In addition, each of the companies has a web site through which they conduct sales, receive customers' requests (such as requests for statements, loans or increases in the credit limits assigned and new cards, among others), provide information on and promote products. These sites include a link that allows payments to be made. In addition, each company has a call center, through which sales, post-sales and collection functions are performed.

Table of Contents

To market its products, Sudamericana's subsidiaries mainly use the Bank's and the regional credit card companies distribution networks. They also use the sales officers of Sudamericana Asesores de Seguros S.A. In addition Sudamericana has a telemarketing center of its own.

Table of Contents

In 1994, Banco Galicia purchased the building located at Reconquista 188/200, in Buenos Aires and, between 1992 and 2000, it purchased the building located at Tte. Gral. Juan D. Perón 444, in Buenos Aires. In addition to these locations, the Bank has a new corporate tower at Tte. Gral. Juan D. Perón 430, which centralizes most of its offices.

As of December 31, 2008, our distribution network consisted of:

Banco Galicia: 238 branches located in Argentina, 137 of which were owned and 101 of which were rented by Banco Galicia, located in all of Argentina's 23 provinces.

Tarjeta Naranja S.A.: 114 sales points located in 21 of the 23 Argentine provinces, 113 of which were rented by the company.

Tarjetas Cuyanas S.A.: 28 sales points located in the provinces of Mendoza, San Juan, San Luis, Santiago del Estero, La Pampa, La Rioja, Catamarca, Neuquén, Rio Negro, Salta, Jujuy and Tucumán. All of them were rented.

Tarjetas del Mar S.A.: 8 sales points located in the Province of Buenos Aires, all of which were rented.

Capital Investments and Divestitures

During 2008, our capital expenditures amounted to Ps. 279.9 million, distributed as follows:

Ps. 103.4 million in fixed assets (real estate, machinery and equipment, vehicles, furniture and fittings);

Ps. 44 million in construction in progress; and

Ps. 132.5 million in organizational and IT system development expenses.

During 2007, our capital expenditures amounted to Ps. 208.7 million, distributed as follows:

Ps. 80.5 million in fixed assets (real estate, machinery and equipment, vehicles, furniture and fittings);

Ps. 44.7 million in construction in progress; and

Ps. 83.5 million in organizational and IT system development expenses.

During 2006, our capital expenditures amounted to Ps. 136.5 million, distributed as follows:

Ps. 41.7 million in fixed assets (real estate, machinery and equipment, vehicles, furniture and fittings);

Ps. 46.7 million in construction in progress; and

Ps. 48.1 million in organizational and IT system development expenses.

Table of Contents

These capital expenditures were made mainly in Argentina.

During 2008, Grupo Financiero Galicia decided to create G.V. Mandataria de Valores S.A., contributing working capital of Ps. 0.6 million. Its main object is to develop securities related businesses; currently, it is attending to the development of securities related business for Grupo Financiero Galicia's controlled Galval Agente de Valores S.A. In addition, also during 2008, Grupo Financiero Galicia contributed working capital to Net Investment for Ps. 0.2 million.

During September 2008, the interests and credits that Banco Galicia had in Aguas Argentinas S.A. and Aguas Provinciales de Santa Fe S.A. (in liquidation) were sold, and the contingent obligations timely assumed in relation to such investments were also settled. As of December 31, 2007, the interests were fully provisioned, while the credits had their related regulatory provisions according to the debtor's standing. As of September 30, 2008, and as a result of this transaction, a profit amounting to Ps. 23.4 million was generated.

In 2007, after having obtained the necessary authorizations, on July 27, 2007 Grupo Financiero Galicia subscribed and paid for 93,604,637 of Banco Galicia's class B shares with a face value of Ps. 1.0 each. Payment for the shares was made in cash in an amount equal to Ps. 175.3 millions and in 2014 Notes issued by Banco Galicia with a face value of US\$102.2 million. There were no capital contributions to any other of our subsidiaries during 2007.

On December 19, 2006, Tarjeta Naranja S.A. paid Ps. 0.009 million to acquire a 99.4% ownership interest in Ancud Comercial S.A., a company incorporated in the Dominican Republic (which is currently known as Tarjeta Naranja Dominicana S.A.). On the same date, Tarjeta Naranja S.A. made a US\$4 million capital contribution to such company. The total investment in such company amounted to Ps. 12.1 million.

We have budgeted capital expenditures for the fiscal year ending December 31, 2009, for the following purposes and amounts:

	<i>(In millions of Pesos)</i>	
Construction of the New Corporate Tower (construction, furniture, equipment, phones, etc.)	Ps.	14.5
Fixed Assets		94.3
Organizational and IT System Development		90.8
In Subsidiaries		8.0
Total	Ps.	207.6

Table of Contents

Management considers that internal funds will be sufficient to finance fiscal year 2009 capital expenditures. In addition, on June 2, 2009, Banco Galicia entered into an agreement with American International Group, Inc. and AIG Consumer Finance Group (AIG) to purchase 80% of AIG s shares in its consumer finance operations in Argentina, consisting of Compañía Financiera Argentina S.A. (CFA), Cobranzas y Servicios S.A. (CyS) and AIG Universal Processing Center S.A. (UPC) in a transaction that involves the sale of all the shares of said companies to Banco Galicia along with other third parties. Through this transaction, which amounts to Ps. 133.2 million, the Bank will be able to further consolidate its expansion strategy in the Argentine market. The consummation of this purchase, however, is subject to the satisfaction of certain conditions, including the approval of the Argentine Central Bank.

Selected Statistical Information

You should read this information in conjunction with the other information provided in this annual report, including our audited consolidated financial statements and Item 5. Operating and Financial Review and Prospects . We prepared this information from our financial records, which are maintained under accounting methods established by the Argentine Central Bank under Argentine Banking GAAP, and do not reflect adjustments necessary to reflect the information in accordance with U.S. GAAP.

The exchange rate used in translating Pesos into US Dollars, which is used in calculating the convenience translations included in the following tables is the Reference Exchange Rate published by the Argentine Central Bank, which was Ps. 3.4537, Ps. 3.1510 and Ps. 3.0695 per US\$1.00 as of December 31, 2008, December 31, 2007 and December 31, 2006 respectively. The exchange rate translations contained in this annual report should not be construed as representations that the stated Peso amounts actually represent or have been or could be converted into US Dollars at the rates indicated or any other rate. See Item 3. Key Information-Exchange Rate Information.

Average Balance Sheet and Income from Interest-Earning Assets and Expenses from Interest-Bearing Liabilities

The average balances of interest-earning assets and interest-bearing liabilities, including the related interest that is receivable and payable, are calculated on a daily basis for Banco Galicia, Galicia Uruguay and Tarjetas Regionales S.A. on a consolidated basis. The average balances of interest-earning assets and interest bearing liabilities are calculated on a monthly basis for Grupo Financiero Galicia and its other non-banking subsidiaries.

Average balances have been separated between those denominated in Pesos and those denominated in Dollars. The nominal interest rate is the amount of interest earned or paid during the period divided by the related average balance. Net gains/losses on government securities and related differences in quoted market prices are included in interest earned. We manage our trading activities in government securities as an integral part of our business. We do not distinguish between interest income and market gains or losses on its government securities portfolio. The non-accrual loans balance is included in the average loan balance calculation.

(*) Rates include the CER adjustment.

(1) Includes, among other amounts, the amounts corresponding to the Compensatory Bond and the Hedge Bond to be received.

The negative interest rate spread in US Dollars and the negative net yield on interest-earning assets in US Dollars are due to the fact that the yield on the Dollar-denominated assets (mainly Boden 2012 Bonds) is lower than the cost of the Dollar-denominated liabilities (mainly the Bank's restructured foreign debt).

Table of Contents**Changes in Net Interest Income-Volume and Rate Analysis**

The following table allocates, by currency, changes in our consolidated interest income and interest expenses between changes in the average volume of interest-earning assets and interest-bearing liabilities and changes in their respective nominal interest rates for (i) the fiscal year ended December 31, 2008 compared with the fiscal year ended December 31, 2007; and (ii) the fiscal year ended December 31, 2007, compared with the fiscal year ended December 31, 2006. Differences related to rate or volume are allocated proportionally to the rate variance and the volume variance, respectively.

Of the Ps. 592.5 million increase in interest income for fiscal year 2008 as compared to the previous year, 51.4% is explained by an increase in rates and 48.6% is explained by an increase in volume. The main increases both in volume and in rates were due to the loans to the private sector in Pesos.

Table of Contents

In terms of interest expenses, the Ps. 206.5 million increase was mainly due to the increase in the rate of Peso-denominated time deposits (Ps. 193.5 million). Although the rates of the Dollar-denominated negotiable obligations increased (Ps. 39.1 million), the reduction in volume offset said increase and the combined effect showed a slight improvement.

Interest-Earning Assets-Net Yield on Interest-Earning Assets

The following table analyzes, by currency of denomination, the levels of our average interest-earning assets and net interest earned, and illustrates the net yields and spreads obtained, for each of the periods indicated.

and foreign currency included in the item with the same denomination that is part of the Financial Expenses/Income caption in the Income Statement, and (iii) the premiums and adjustments on forward transactions in foreign currency, included in the item Financial Income-Others in the Income Statement. Net interest earned also includes income from government securities used as security margins in repurchase transactions. This income/loss is included in Miscellaneous Income/Loss Others in the Income Statement. Net income from government securities includes both interest and gains/losses due to the variation of market quotations.

(2) *Net interest earned, divided by average interest-earning assets.*

(3)

Interest spread, nominal basis is the difference between the average nominal interest rate on interest-earning assets and the average nominal interest rate on interest-bearing deposits.

Table of Contents**Government and Corporate Securities**

The following table shows our holdings of government and corporate securities at the balance sheet dates stated below, and the breakdown of the portfolio in accordance with the Argentine Central Bank classification system and by the currency of denomination of the relevant securities. Our holdings of government securities represent mainly holdings of the Bank.

The Ps. 525.9 million holdings of Boden 2012 Bonds (US\$ 300.7 million of face value) represent Boden 2012 Bonds resulting from the Bank's purchase of the Hedge Bond. The decrease in our holdings of government securities in 2008

mainly reflects a decrease in our investment holdings of Boden 2012 Bonds mainly because of the reinstatement of repurchase guarantees originated in the collection of the coupon of amortization and in the fall of prices described in our consolidated financial statements. It also includes an increase in forward sales (Ps. 232.1 million and Ps. 127.5 million) and in Government securities issued by the Argentine Central Bank (Ps. 218.6 million).

Table of Contents

The decrease in our holdings of government securities in 2007 mainly reflects sales under repurchase agreements of Boden 2012 Bonds by the Bank, sales of these bonds, the proceeds of which were used for the repurchase of restructured foreign debt, and collection of the annual amortization, in August. It also reflects sales of the remaining Bank's holdings of Bogar Bonds (Ps. 229.5 million of face value) during the first quarter of 2007.

It is worth mentioning that due to the international financial crisis, over the last months of fiscal year 2008 domestic as well as international capital markets evidenced a high level of volatility with respect to equity and debt securities quotations. As explained under Item 4. Information on the Company-Selected Statistical Information-Government and Corporate Securities-Valuation, and Item 5.A. Operating Results-Critical Accounting Policies- U.S. GAAP - Critical Accounting Policies-Fair Value Estimates, our public-sector assets are recorded in accordance with Argentine Banking GAAP, as established by the Argentine Central Bank valuation rules. Had these securities been marked-to-market, shareholders' equity would have been reduced by approximately Ps. 1,827.0 million as of December 31, 2008.

All government securities, except for the Lebac and Nobac, which are issued by the Argentine Central Bank, were issued by the Argentine government.

Government Securities - Net Position

The following table shows our net position in government and corporate securities at the balance sheet date, and the breakdown of the portfolio in accordance with the Argentine Central Bank classification system and by the securities currency of denomination. The net position is defined as holdings plus forward purchases and spot purchases pending settlement, minus forward sales and spot sales pending settlement.

As of December 31, 2008, our position in government securities amounted to Ps. 3,645.3 million, and the difference between our holdings of government securities and our net position was mainly due to forward purchases of Boden 2012 Bonds and Discount Bonds in Pesos, in connection with repurchase agreements, for Ps. 1,824.9 million and Ps. 597.1 million, respectively, to forward sales of PR12 bonds (*Bonos de Consolidación en Moneda Nacional Cuarta Serie 2%*), Boden 2013 and Boden 2015 for Ps. 232.1 million, Ps. 79.8 million and Ps. 47.7 million, respectively and to Ps. 51.1 million of Lebac and Nobac delivered to the Rosario Futures Exchange (*Rofex*) as guarantees of transactions conducted on such exchange.

Table of Contents

As of December 31, 2008 and based on quoted market prices:

The market value of our position in Boden 2012 Bonds was Ps. 1,253.4 million. This total comprises both our holdings recorded as government securities held for investment and our forward purchases in connection with repurchase agreements.

The market value of our position in Discount Bonds in Pesos and GDP-Linked Negotiable Securities was Ps. 196.5 million.

Our holdings of Lebac and Nobac and Bonar Bonds were marked-to-market.

Valuation

In accordance with Argentine Central Bank rules, quoted government securities held-for-trading purposes are carried at their Argentine closing market quotation less estimated selling costs.

Quoted government securities in investment accounts are valued at their acquisition cost increased by accruing their internal rate of return over the period elapsed since the date of inclusion of the securities in the investment account category. Argentine Central Bank Communiqué A 3857, dated January 7, 2003, established that financial institutions could record as investments, only those securities incorporated in their balance sheets through December 31, 2002.

After that date, the value of any securities (except the Compensatory Bond and the Hedge Bond received and/or to be received according to applicable compensation rules or other compensation to be received) incorporated into a bank's position was required to be marked-to-market.

Within the context of high volatility experienced by the international and local capital markets since July 2007, the Argentine Central Bank issued Communiqué A 4698 dated August 24, 2007, through which, among other items, it established that debt instruments issued by such institution that are included in the volatility list published monthly by that institution, may be classified in investment accounts and recorded at their amortized cost plus the corresponding internal rate of return, as long as the financial institution commits to hold them until maturity. The difference with respect to the market value has to be disclosed in the notes to the quarterly and annual financial statements. Holdings in investment accounts may be used in repurchase transactions, subject to certain conditions.

Table of Contents

Securities received by financial institutions as compensation for the effects of the asymmetric pesification established by Decrees No. 905/02 and complementary rules (in the Bank's case, Boden 2012 Bonds) are carried at their technical value, in accordance with Argentine Central Bank Communiqué A 3785 issued on October 29, 2002. Technical value means the face value adjusted by contractual terms. In accordance with Argentine Central Bank rules, the Bank recorded the Boden 2012 Bonds already received at 100% of their technical value. As of December 31, 2008 and 2007, the Boden 2012 Bonds were trading at approximately 53% and 89% of such value, respectively. The market value of the Bank's position in these securities, as of December 31, 2008, is shown in Government Securities-Net Position above.

Also in the context of the high market volatility in the second half of 2007, by means of Communiqué A 4702 dated August 30, 2007, the Argentine Central Bank established that holdings of debt securities issued by such entity and of government securities may be classified as Available for Sale. These holdings must be recorded at their market value, with the use of such methodology as well as the potential effect on the income statement disclosed in the notes to the financial statements. The difference (negative or positive) between the carrying amount of these holdings and their market value has to be recognized in equity accounts specially created for this effect. Interest will be recognized in the income statement in each period by accruing the internal rate of return, with the counterpart recorded in equity accounts. The rule allows the use of these holdings in repurchase transactions subject to certain conditions, and for withdrawal from this category in the case of sale, collection of amortization and/or principal installment or when the volatility published by the Argentine Central Bank is no longer available, in which case they must be recorded under Holdings without Quotation.

By means of Communiqué A 3911, dated March 28, 2003, the Argentine Central Bank established a new method for the valuation of public sector assets. This rule applies to Secured Loans, secured promissory notes or bonds (Bogar Bonds) issued by the Fiduciary Fund for Provincial Development to restructure loans received by provincial governments prior to the crisis, or FFDP, other loans to the non-financial public sector, and government securities without quotation, except for, among others, government securities accounted in investment accounts, securities issued by the Argentine Central Bank (Lebac and others) and government securities received or pending receipt as compensation for government policy measures. Beginning with the financial statements for March 2003, assets within the scope of Communiqué A 3911 and complementary rules had to be valued at the lowest of their technical value and their present value, with the latter converging with its market value in June 2008. In order to determine the present value, the Argentine Central Bank established a discount rate that increased gradually over time as shown in the table below. The difference between the lowest of the present value and the technical value, and the book value must be reflected in an asset regularizing account, in case of a positive difference, or be charged to income in case the difference is negative. For as long as it did have a position in such bonds, this valuation rule generated a loss for the Bank.

Table of Contents

By means of Comunicqué A 4704, dated September 7, 2007, effective August 31, 2007, the Argentine Central Bank resolved to set the discount rate to be used for the valuation of public-sector assets within the scope of Comunicqué A 3911 and complementary rules at a value that does not imply either a loss or a gain at the level of the financial system as a whole, taking into account the accrual of such assets' yield, and, if applicable, adjusted by the *Coficiente de Estabilización de Referencia* (CER, Reference Stabilization Index). This criterion will be applicable as long as, when applying the rate that would correspond according to the table above, the discount rate is such that it implies a loss -for the financial system as a whole- in the valuation of the comprised portfolio.

Through Comunicqué A 4084, dated January 30, 2004, public-sector assets granted as collateral for advances from the Argentine Central Bank to acquire Boden Bonds (both for banks' customers and held by banks) set forth in sections 10, 11 and 12 of Decree No. 905/02, were excluded from valuation at present value. These assets, in the Bank's case Bogar Bonds, could be recorded at the value determined by the Argentine Central Bank for their use as collateral. In the case of Bogar Bonds this value was the technical value.

By means of Comunicqué A 4414, dated September 8, 2005, among others, the Argentine Central Bank modified the valuation criteria of government and corporate securities without quotation, effective for information as of August 2005. The securities without quotation within the scope of such Comunicqué (Argentine Central Bank bills and notes, subordinated and non-subordinated negotiable obligations and financial trust securities) must be carried at cost plus their internal rate of return, at period-end.

Through Comunicqué A 4270, the Argentine Central Bank allowed the Discount Bonds in Pesos and the GDP-Linked Negotiable Securities, stemming from the debt exchange for the restructuring of the defaulted Argentine sovereign foreign debt carried out in 2005, to be recorded at the lower of: (i) the carrying value of the tendered securities in accordance with the prevailing valuation rules (Comunicqué A 4084 item 1 v) and item 5, and complementary rules), and (ii) the total future nominal cash payments up to maturity specified by the terms and conditions of said securities. The Bank's holdings of Discount Bonds in Pesos and GDP-Linked Negotiable Securities were recorded as per the first alternative. This valuation is reduced in the amount of the perceived service payments and accrued interest shall not be recognized. The market value of these securities as of December 31, 2008, is shown in Government Securities-Net Position above.

The Argentine Central Bank restricts the distribution of cash dividends by establishing, among other things, that banks must adjust their earnings to be distributed as cash dividends by the difference between the market value and the carrying value of their public-sector assets, including all government securities.

Table of Contents

On January 22, 2009, within the framework of the swap of Secured Loans, the Argentine Central Bank issued its Communiqué A 4898, establishing that, beginning in February 2009 and at the Bank's option, such holdings could be registered in special investment accounts and valued at their acquisition cost increased on an exponential basis according to their internal rate of return, and adjusted by CER, when applicable. When the market price of each bond is lower than their book value, the monthly accrual of the internal rate of return and the CER adjustment is recorded, on a cumulative basis, in contraasset accounts (i.e. accounts which counter, or subtract from asset accounts), until their book value equals their market price. Said contraasset account is withdrawn with a charge to the income statement as long as its balance is greater than the positive difference between the market price and the book value. As of the date of this annual report our holdings of Nobac, Boden 2014 Bonds and Bogar 2018 Bonds stemming from such swap are registered in special investment accounts.

Our portfolio of quoted corporate debt and equity securities is considered to be held for trading and, therefore, is carried at market value.

Remaining Maturity and Weighted-Average Yield

The following table analyzes the remaining maturity and weighted-average yield of our holdings of investment and trading government and corporate securities as of December 31, 2008. Our government securities portfolio yields do not contain any tax equivalency adjustments.

Loan Portfolio

Our total loans reflect the Bank's and the regional credit card companies' loan portfolios including past due principal amounts. Personal loans and credit-card loans are typically loans to individuals granted by the Bank or the regional credit card companies. The regional credit card companies' loans are included under Credit card loans. As well, certain amounts related to advances, promissory notes, mortgage loans and pledge loans are extended to individuals. However, advances and promissory notes represent mainly loans to companies. The following table analyzes our loan portfolio, i.e., Banco Galicia's loan portfolio consolidated with the regional credit card companies' loan portfolio, by type of loan and total loans with guarantees.

(1) *Categories of loans include:*

Advances: short-term obligations drawn on by customers through overdrafts.

Promissory Notes: endorsed promissory notes, negotiable obligations and other promises to pay signed by one borrower or group of borrowers and factored loans.

Mortgage Loans: loans granted to purchase or improve real estate and collateralized by such real estate and commercial loans secured by a real estate mortgage.

Pledge Loans: loans secured by collateral (such as cars or machinery) other than real estate, where such collateral is an integral part of the loan documents.

Personal Loans: loans to individuals.

Credit-Card Loans: loans granted through credit cards to credit card holders.

Placements in Banks Abroad: short-term loans to banks abroad.

Other loans: loans not included in other categories.

Documented interest: discount on notes and bills.

- (2) *Preferred guarantees include mortgages on real estate property or pledges on movable property, such as cars or machinery, where the Bank has priority, endorsements of the Federal Office of the Secretary of Finance, pledges of Government securities, or gold or cash as collateral.*

In fiscal year 2008, our loan portfolio before the allowance for loan losses increased 2.3% compared to the previous fiscal year end, due to an increase in the public-sector and financial sector portfolios, while the private-sector loan portfolio did not register any significant changes. Loans to the financial and non-financial public sector as of fiscal year end 2008 amounted to Ps. 1,426.7 million, with an 8.3% increase in comparison with the Ps. 1,317.9 million outstanding as of the close of the previous fiscal year.

As of December 31, 2008, loans to the private sector (including residents abroad) before the allowance for loan losses were up 1.5% from the Ps. 10,656.8 million recorded as of the end of the previous fiscal year. During 2008, short-term lending to individuals, through credit-card loans (including the Bank's and the regional credit card companies' loan portfolio) and personal loans, recorded very high growth, with credit-card loans recording the greatest increase in absolute terms.

Table of Contents

As of December 31, 2007, the loan portfolio before the allowance for loan losses totaled Ps. 11,974.7 million, with a 10.8% increase with respect to the end of the previous year, as a consequence of a strong increase in the private-sector loan portfolio, partially offset by a substantial decrease in the public-sector loan portfolio. The decrease in the latter was mainly due to the sale of Secured Loans during 2007. As of December 31, 2007, loans to the financial sector and non-financial public sector amounted to Ps. 1,317.9 million, 52.9% lower than the Ps. 2,798.0 million outstanding as of the close of the previous fiscal year. This total includes Ps. 1,208.6 million in Secured Loans and Ps. 107.4 million in loans granted to the financial public sector.

Loans by Type of Borrower

The following table shows the breakdown of our total loan portfolio, by type of borrower at December 31, 2008, 2007 and 2006. Except for loans to individuals, all of the other categories of loans in the table below correspond to loans granted by the Bank only. The middle-market companies category includes the Bank's loans to SMEs and the agricultural and livestock sectors while the individuals category includes loans granted by the Bank and the regional credit card companies. Loans to individuals comprise both consumer loans and commercial loans extended to individuals with a commercial activity.

	2008		As of December 31, 2007		2006	
	Amount	% of Total	Amount	% of Total	Amount	% of Total
	<i>(in millions of Pesos, except percentages)</i>

(1) *Includes local and international financial sectors.*

(2) *Before the allowance for loan losses.*

By sector of economic activity, while Services including loans to the non-financial public sector remains the most significant item, as in fiscal year 2007, its share of the total loan portfolio shows a decrease. The Services sector share declined from 19.7% as of December 31, 2007 to 18.2% as of fiscal year end 2008. Out of the remaining sectors, consumer loans continued to be the most significant category, with a 43.2% share of the total portfolio, as well as loans to the manufacturing sector, with a 13.0% share, and loans to the primary products industry with a 10.9% share. This last portfolio is mainly made up of loans to the agricultural sector.

(3) *Includes short-term and long-term loans whose rates are determined at the beginning of the loans life.*

Table of Contents***Credit Review Process***

Credit risk is the potential for financial loss resulting from the failure of a borrower to honor its financial contractual obligations. Our credit risk arises mainly from Banco Galicia's and the regional credit card companies' lending activities, and from the fact that, in the normal course of business, these subsidiaries are parties to certain transactions with off-balance sheet treatment and associated risk, mainly commitments to extend credit and guarantees granted.

See also Item 5.A. Operating Results-Off-Balance Sheet Arrangements.

Our credit approval and credit risk analysis is a centralized process based on the concept of opposition of interests. This is achieved through the existing separation between the credit and the origination functions, thus enabling us to achieve an ongoing and efficient control of asset quality, a proactive management of problem loans, aggressive write-offs of uncollectible loans, and an adequate loan loss provisioning. The process also includes credit-quality monitoring by borrower, as well as the monitoring of problem loans and related losses. The process facilitates early detection of situations that could entail some degree of portfolio impairment and provides appropriate protection of our assets.

Banco Galicia

The Bank's Credit Division defines the credit risk policies and procedures, monitors their compliance, constantly assesses credit risk and develops credit evaluation models to be applied to risk products. It is also responsible for loan approval, classification of the loan portfolio and recovery of past due loans as well as generating the information on credit issues required by the Bank's Board of Directors and by the regulatory authorities. To perform its tasks, the Division is made up of the Corporate Credit Department, which is in charge of approving, supervising, classifying and provisioning the commercial and financial institutions' loan portfolio; the Corporate Recovery and Legal Proceedings Department, which is in charge of the follow-up and legal recovery of the past due commercial portfolio and consumer portfolio; and the Retail Credit Department, which is in charge of approving consumer loans as well as following up and recovering past due consumer loans.

A significant characteristic of fiscal year 2008 was the establishment of a maximum limit for financial assistance to a client/economic group (excluding interbank transactions) to 5% of the computable regulatory capital (RPC). The Board of Directors' simple majority shall decide in which cases it is necessary to make an exception to address special funding situations.

In addition, the Board of Directors decided that significant credits, defined as credits to clients/economic groups exceeding Ps. 30 million (excluding interbank transactions), must be approved by the Bank's Board of Directors' simple majority and, for related customers, it must be approved by two thirds of the Board of Directors.

Finally, for middle-market clients (except for Corporate Banking) it was decided that customers rated CCC, CC or C, will only be accepted under exceptional circumstances, duly justified by their corresponding level and which must comply with, among others, the following characteristics: (i) belonging to an economic group with a better rating and that is a customer of the Bank, (ii) having a shareholder (legal person) with very good equity and economic-financial indexes, (iii) being a company initiating an investment project as long as the group/customer justifies it, and (iv) having undergone significant changes after the date of their balance sheet that favorably affect their situation.

In addition, the Internal Audit Division is in charge of overseeing the classification of the loan portfolio, in accordance with the regulations established by the Argentine Central Bank.

The Bank constantly monitors its loan portfolio through different ratios (arrears, roll rates, etc.), as well as the classification and concentration of such portfolio (through maximum exposure to each client, its own RPC, and that of each client). The portfolio classification as well as its concentration control, is carried out following the Argentine Central Bank regulations. In turn, advanced statistical models are under development which generate an internal rating that will allow the Bank to organize and quantify credit risk in terms of expected losses (with the ability to estimate the different components defined by the formula) as well as to adjust pricing and/or risk policies based on a customer's group/sector. For the commercial loan portfolio, these models are in the implementation stage.

The Board of Directors' Credit Committee decides on loans exceeding a certain amount for individuals as well as companies and on all loans to financial institutions (domestic or foreign) and related parties. The Retail Credit Department, the Credit Division Manager and officials of the Corporate Credit Department approve the remaining loans pursuant to credit authority levels previously granted. For a description of the Board of Directors' Credit

Committee, see Item 6. Directors, Senior Management and Employees- Functions of the Board of Directors of Banco Galicia.

Table of Contents

Retail Credit. As regards consumer loans, the Bank assesses applications for different products such as credit cards, cash advances in current accounts and secured and unsecured personal loans. Applications for these products are assessed through computerized credit evaluation systems that take into account different variables to determine the customer's credit profile and repayment capacity, as well as through granting guidelines based on the customer's credit history within the financial system or with the Bank (credit screening). Analysis of the information required from applicants and the credit approval or refusal decision is made in a centralized manner. Applicants' previous credit performance, either at Banco Galicia or in the financial system as a whole, is verified through the information provided by a company that provides credit information services.

The Retail Credit Department is responsible for approving loans for amounts up to Ps. 1.25 million. Loans exceeding such amount have to be approved by the Board of Directors' Credit Committee. This Department also defines and approves credit policies for the retail banking business, together with the originating sectors. The Retail Credit Department also monitors the classification of the loan portfolio pursuant to the Argentine Central Bank regulations and the Bank's internal policies. In accordance with the rules in force, classification of the retail loan portfolio is based on the borrower's performance.

As regards the recovery of past due loans, the Retail Credit Department manages individual past due loans from early stages of delinquency until such loans are recovered or the recovery procedures are abandoned in the case of loans deemed uncollectible. Collections throughout Argentina are carried out either directly or through third parties.

When a consumer loan is more than three days past due, recovery procedures are undertaken through the Collection Center (a specialized area of the Bank's Customer Contact Center) and through letters. The Bank uses a system that performs automated telephone calls for the follow-up of loans in early stages of delinquency. For a better coverage of the locations in the provinces, the Department also coordinates actions with the Bank's branch network staff. When these procedures are exhausted, recovery of these loans is turned to collection agencies hired by the Bank to handle recovery through out of court proceedings, while court proceedings are the responsibility of the Judicial Proceedings sector, which reports to the Corporate Recovery and Legal Proceedings Department. The Retail Credit Department oversees the performance of these agencies.

Banco Galicia does not classify, nor does it provide for recovery procedures of certain small balance loans, including credit card balances from membership fees and other administrative costs charged to customers on unsolicited credit cards, and small residual balances from lending operations where the cost of recovery and legal costs are prohibitive. These small balance loans are charged-off directly to the income statement.

Table of Contents

Corporate Credit. Prior to the approval of a loan, the Bank performs an evaluation of the corporate borrower and its financial condition. For credits above certain amounts, the Bank carries out a standard analysis of each credit line and of each corporate borrower. For credits below certain amounts, automated risk evaluation systems that provide financial and non-financial information on the borrower are used. They can also perform automated risk evaluations and financial-statement projections and have the capacity to generate automatic warnings when certain situations are verified that may indicate an increase in risk.

The Bank bases its risk assessment on the following factors:

Qualitative analysis	Assessment of the quality of the corporate borrower performed by the officer to which the account has been assigned on the basis of personal knowledge.
Economic and financial risk	Quantitative analysis of the borrower's financial statements.
Economic sector risk	Measurement of the general risk of the sector in which the borrower operates (based on statistical information gathered from internal and external sources).
Environmental risk	Environmental impact assessment (required for all investment projects exceeding Ps. 15 million).

The Corporate Credit Department is responsible for approving loans to corporate customers with a credit limit not exceeding Ps. 10.0 million. In such process, the primary objective is to maintain high credit-quality standards, in accordance with the Bank's policies and procedures. The Department also classifies the performing and non-performing commercial portfolios, in accordance with the regulations set by the Argentine Central Bank and with the Bank's own internal policies, and coordinates the Credit Division's relations with the Argentine Central Bank, the independent auditors, and the rating agencies. Moreover, it reviews all those corporate customers whose total credit exceeds Ps. 500,000 in accordance with a review schedule determined by the level of credit risk.

The Corporate Banking and Middle-Market Banking Departments are responsible for the business relations with the Bank's corporate customers with respect to both the management of the various lines of business and credit origination.

An officer of the Credit Division must approve all credit extensions. Approval of commercial credits is structured based on the credit limit assigned to each customer, as follows:

Up to Ps. 6.0 million: credit granting proposals are presented by business officers and approved by officers of the Corporate Credit Department in accordance with pre established credit authority levels.

Over Ps. 6.0 million and up to Ps. 10.0 million: credit granting proposals are presented by the manager of the business department to which the account belongs and approved by the manager of the Credit Division.

Over Ps. 10.0 million: credit granting operations must be approved by the Board of Directors Committee. The participation of the managers of the business departments depends on the account under approval.

Table of Contents

Corporate Recovery and Legal Proceedings. The Corporate Recovery and Legal Proceedings Department (Recovery Department) is responsible for monitoring and controlling past-due commercial portfolios. It establishes procedures, acts proactively, and designs action plans on a case-by-case basis to recover any amounts that exceed the credit limits that are assigned to the different corporate customers. The Recovery Department also oversees recovery of problem loans in the corporate portfolio, managing them efficiently and working to regularize the status of those customers that are most attractive to the Bank. Finally, the Recovery Department manages court and out-of-court proceedings aimed at recovering corporate portfolios and court proceedings involving the consumer portfolio. This includes overseeing lawsuits carried out in various jurisdictions by law firms hired to handle these matters.

Policy for Requiring Collateral. The credit review process at Banco Galicia is not affected by the collateral underlying the loan. The Bank's credit review process and the Argentine Central Bank's loan classification system is based on a borrower's capacity to repay or on the past due status of the loan rather than on the structure of the loan. However, once a loan is classified, the level of the reserve that should be made against the loan is determined by whether the loan is secured or unsecured. In order to protect its assets, the Bank performs reviews of the collateral received in various opportunities during the duration of the loan, whether it is upon the initial granting of the loan, or due to the portfolio's periodic reviews or due to the updating of the credit margins.

Regional Credit Card Companies

Each of the regional credit card companies maintains its own credit products and limits; however, their credit approval and credit risk analysis procedures are basically the same. Assessment of the credit risk of each customer is based on certain information required and provided by the customer, which is verified by the companies, as well as on information on customers' credit records obtained from credit bureaus and other entities. Once the information is verified, the credit card is issued. There are certain requirements such as age, minimum levels of income (depending on the type of customer, i.e. employee, self-employed, etc.) and domicile area that must be fulfilled in order to qualify for a credit card. Credit limits are defined based on customers' income. Credit limits may be raised for a particular customer, either at the customer's request or based on the customer's past payment profile, at the companies' discretion or for all customers, due to, among other factors, macroeconomic conditions such as inflation, salary trends or interest rates.

Credit risk assessment, credit approval (the extension of a credit card and the assignment of a limit) and classification of the loan portfolio are managed by each company on a centralized basis by a unit that is separate from the sales units. The credit process is described in manuals and Tarjeta Naranja S.A., the largest regional credit card company, has certified all of its processes under the ISO 9001/2000 standard. Credit limits and policies are defined by the board of directors of each regional credit card company.

Table of Contents

As regards recovery of past due loans, the regional credit card companies manage the early stages of delinquency through their branch personnel and use different types of contact with customers (letters, phone calls, etc.). After 90 days, recovery is turned over to collection agencies that manage out of court proceedings, and if the loan is not recovered, court proceedings are initiated by these agencies. Cobranzas Regionales S.A., a subsidiary of Tarjeta Naranja S.A and Tarjetas Cuyanas S.A., supervises the whole process of recovery, including recovery procedures of said collection agencies.

Main Argentine Central Bank's Rules on Loan Classification and Loan Loss Provisions

General

Independently of its internal policies and procedures designed to minimize credit risk, we comply with the applicable regulations of the Argentine Central Bank. The following regulations are applicable to the Bank and to the regional credit card companies, which periodically file information with the Argentine Central Bank on their portfolio classification in accordance with Argentine Central Bank rules, in their capacity as credit card issuers.

In 1994, the Argentine Central Bank introduced the current loan classification system and the corresponding minimum loan loss provision requirements, applicable to loans and other types of credit (together referred to as loans in this section) to private-sector borrowers. The current loan classification system is a bifurcated system, applying certain criteria to classify loans in a bank's consumer portfolio, and another set of criteria to classify loans in its commercial portfolio. The classification system does not depend on the currency of denomination of the loan. The loan classification criteria applied to loans in the consumer portfolio are based on objective guidelines related to the borrowers' degree of fulfillment of its obligations or its legal status, the information provided by the Financial System's Debtors System whenever they reflect lower quality levels than the rating assigned by the Bank-, by the Non-Performing Debtors database from former financial institutions and the status resulting from the enforcement of the refinance guidelines. In case of discrepancies, the guideline indicating the highest uncollectibility risk must be taken into account.

For Argentine Central Bank purposes, consumer loans are mainly defined as mortgage loans, pledge loans, credit card loans and other installment loans to individuals. The remaining loans are deemed commercial. The regional credit card companies do not offer commercial loans. In addition, in accordance with the requirements set forth by the Argentine Central Bank, banks may choose to apply the consumer portfolio classification criteria to commercial loans of up to Ps. 500,000. Given that the Bank uses this option, it classifies as part of its consumer portfolio all commercial loans up to Ps. 500,000, the classification of which is based on the level of fulfillment and status thereof.

The principal criterion for the classification of loans in the commercial portfolio is the applicable borrower's ability to pay, as measured mainly by such borrower's future cash flow. If a customer has both commercial and consumer loans, consumer loans will be added to commercial loans to determine eligibility for classification in the consumer portfolio. Loans backed by preferred guarantees will be considered at 50% of their nominal value.

In applying the Argentine Central Bank's classification to commercial loans, banks must assess the current and projected financial situation of the borrower, the customer's exposure to currency risk, management and operational history, the capacity of the borrower to provide accurate and timely financial information, as well as the general risk of the sector in which the borrower operates and the borrower's relative position within that sector.

Table of Contents

The Argentine Central Bank's regulations establish that a team that is independent from the areas in charge of loan origination must conduct a periodic evaluation of the commercial portfolio. The Bank's Credit Division, which is independent from the business units that generate the transactions, is in charge of these reviews.

The review must be carried out on each borrower with outstanding debt pending payment equal to the lesser of the following amounts: Ps. 1 million or 1% of a bank's RPC but, in any case, the review shall at least cover 20% of the total loan portfolio. The frequency of each borrower's review shall depend on a bank's exposure thereto. The Argentine Central Bank requires that the larger the exposure is, the more frequent the review should be. This review must be conducted every calendar quarter when credit exposure to that borrower is equal to or in excess of 5% of a bank's RPC, or every six months when exposure equals or exceeds the lesser of the following amounts: Ps. 1 million or 1% of a bank's RPC. In all cases, at least 50% of the Bank's commercial portfolio must be reviewed by the end of each six months, and all other borrowers in the Bank's commercial portfolio must be reviewed during a fiscal year, so that the entire commercial portfolio is reviewed every fiscal year.

In addition, only one level of discrepancy is permitted between the classification assigned by a bank to a customer and the lowest classification assigned to it by at least two other banks, the combined credit of which represents 40% or more of the total credit to such borrower considering all banks. If the Bank's classification was different by more than one level from the lowest of such classification, it must immediately downgrade its classification of the debtor to the same classification, or within one classification level.

With the purpose of facilitating customers' access to credit after the 2001-2002 crisis, the Argentine Central Bank resolved, mainly through Communiqués A 4070 and A 4254, dated January 9 and December 2, 2004, respectively, to introduce certain changes aimed at counterbalancing the effects of said crisis on customers' classification. The most important modifications that are still in effect are the following:

- the reduction in the required loan amortization necessary to improve the customer's classification; and

- the possibility to provide customers with new financial assistance and classify as normal customers classified in a non-performing status in the financial system, thereby restricting this financing assistance to pre-established percentages based on the worst situation a customer registers in the financial system.

Communiqué A 4738 of the Argentine Central Bank, dated November 26, 2007, introduced certain amendments to the classification rules applicable the consumer portfolio, in order to reflect a borrower's total risk more accurately.

Consequently, the rule establishes new consumer portfolio categories. In addition, said Communiqué establishes that, in order to determine the degree of timely fulfillment of obligations, it will be necessary to analyze the client's arrears, legal situation and the classification assigned by the rest of the financial institutions and whether the fulfillment of obligations depends on any kind of refinancing.

Table of Contents

Pursuant to this Communiqué, those clients having received any kind of refinancing may achieve a better credit status than the one they had at the time of such refinancing, by previously repaying a certain number of installments for monthly or bimonthly amortization loans or a percentage of the debt for any other type of loans, without incurring any arrears exceeding 31 days. In addition:

to achieve this better quality status, the client must comply with the rest of the requirements for the new category;

in case of having refinanced and non-refinanced obligations, the resulting classification shall be the lowest resulting from the individual analysis of each transaction;

if a client with a refinanced loan received or had received additional financial assistance, it will remain within the category for 180 days after the refinancing or the granting of additional credit, whichever is more recent;

debtors with arrears of over 31 days must be classified within the category resulting from adding the number of arrear days corresponding to the first refinanced debt unpaid installment and those of the minimum arrears set forth for the category in which the debtor is classified at the time default is recorded.

For clients in a normal situation, additional financial assistance granted shall not be deemed to be refinancing as long as it implies an increase in principal owed and the client's ability to pay the obligation resulting from said financial assistance is assessed. The remaining cases, in which no debt increase is recorded, will be deemed refinancing and only those clients that have not exceeded two refinancing instances within 12 months since the last refinancing will be kept within category 1.

Also, higher financial assistance to fund working capital increases or additional investment shall not be deemed to be refinancing.

Loan Classification

The following tables contain the six loan classification categories corresponding to the different risk levels set forth by the Argentine Central Bank. The total exposure to a private-sector client must be classified according to the riskiest classification corresponding to any part of said exposure.

Commercial Portfolio.

Loan Classification

Description

1. Normal Situation

The debtor is widely able to meet its financial obligations, demonstrating a significant cash flow, a liquid financial situation, an adequate financial structure, a timely payment record, competent management, available information in a timely, accurate manner and satisfactory internal controls. The debtor is in the upper 50% of a sector of activity that is operating properly and presents good prospects.

2. With Special Follow-up

The cash flow analysis reflects that the debt may be repaid even though it is possible that the client's future payment ability may deteriorate without a proper follow-up.

This category is divided into two subcategories:

(2.a). Under Observation;

(2.b). Under Negotiation or Agreements to Refinance.

3. With Problems

The cash flow analysis evidences problems to repay the debt, and therefore, should these problems not be solved, there may be some losses.

-73-

Table of Contents

Loan Classification	Description
4. High Risk of Insolvency	The cash flow analysis evidences that repayment of the full debt is highly unlikely.
5. Uncollectible	The amounts in this category are deemed total losses. Even though these assets may be recovered under certain future circumstances, inability to make payments is evident at the date of analysis. Includes loans to insolvent or bankrupt borrowers.
6. Uncollectible due to Technical Reasons	Includes borrowers indicated by the Argentine Central Bank to be in non-performing status with financial institutions that have been liquidated or are being liquidated, or whose authorization to operate has been revoked. It also includes loans to foreign banks and other institutions that are not: <ul style="list-style-type: none"> (i) classified as normal , (ii) subject to the supervision of the Argentine Central Bank or other similar authority of the country of origin, and (iii) classified as investment grade by any of the rating agencies admitted to the Argentine Central Bank pursuant to Communiqué A 2729.

Consumer Portfolio.

Loan Classification	Description
1. Normal Situation	Loans with timely repayment or arrears not exceeding 31 days, both with respect to principal and interest. In addition, a client classified under category 2, having been refinanced may be recategorized within this category, as long as he amortizes one principal installment (whether monthly or bimonthly) or repays 10% of principal.
2. Low Risk	Occasional late payments, with a payment in arrears of more than 32 days and up to 90 days. A client classified under category 3 having been refinanced may be recategorized within this category, as long as he amortizes two principal installments (whether monthly or bimonthly) or repays 10% of principal.
3. Medium Risk	Some inability to make payments, with arrears of more than 91 days and up to 180 days. A client classified under category 4 having been refinanced may be recategorized within this category, as long as he amortizes three principal installments (whether monthly or bimonthly) or repays 15% of principal.
4. High Risk	

Judicial proceedings seeking collection have been initiated or arrears of more than 180 days and up to one year. A client classified under category 5 having been refinanced may be recategorized within this category, as long as he amortizes three principal installments (whether monthly or bimonthly) or repays 20% of principal.

5. Uncollectible

Loans to insolvent or bankrupt borrowers, or subject to judicial proceedings, with little or no possibility of collection, or with arrears in excess of one year.

6. Uncollectible due to Technical Reasons

Loans to borrowers who fall within the conditions described above under Commercial Portfolio-Uncollectible due to Technical Reasons .

Table of Contents*Loan Loss Provision Requirements*

Allocated Provisions. Minimum allowances for loan losses are required for the different categories in which loans are classified. The rates vary by category and by whether the loans are secured or not. The percentages apply to the customer's total obligations, considering both principal and interest. The allowance for loan losses on the normal portfolio is unallocated, while the allowances for the other categories are individually allocated. The regulations suspend accrual of interest or require allowances equivalent to 100% of interest for customers classified as With Problems or Medium Risk or lower. The allowances required are as follows:

Minimum Allowances for Loan Losses

Category	Secured	Unsecured
1. Normal Situation	1.0%	1.0%
2. (a) Under Observation and Low Risk	3.0%	5.0%
2. (b) Under Negotiation or Agreements to Refinance	6.0%	12.0%
3. With Problems and Medium Risk	12.0%	25.0%
4. High Risk of Insolvency and High Risk	25.0%	50.0%
5. Uncollectible	50.0%	100.0%
6. Uncollectible Due to Technical Reasons	100.0%	100.0%

Pursuant to Argentine Central Bank regulations, these minimum provisions are not required for interbank financial transactions of less than thirty days, or loans to Argentine provincial governments or to financial institutions majority-owned by the Argentine national, provincial or city governments with governmental guarantees.

Credits covered by preferred A guarantees must be provisioned at 1.0% regardless of the customer's category.

General Provisions. In addition to the specific loan loss allowances described above, the Argentine Central Bank requires the establishment of a general allowance of 1.0% for all loans in its normal situation category. This general allowance is not required for interbank financial transactions of less than thirty days, or loans to the non-financial public sector or to financial institutions majority-owned by the Argentine national, provincial or city governments with governmental guarantees. Besides these general provisions, the Bank establishes additional provisions, determined based on the Bank's judgment of the entire loan portfolio risk at each reporting period.

As of December 31, 2008, December 31, 2007 and December 31, 2006, we maintained a general loan loss allowance of Ps. 298.4 million, Ps. 188.0 million and, Ps. 101.0 million, respectively, which exceeded by Ps. 200.0 million, Ps. 88.5 million and, Ps. 35.2 million, respectively, the 1.0% minimum general allowance required by the Argentine Central Bank. The excess over the minimum requirement of fiscal years 2006 and 2007 was maintained in connection with commercial loans under a restructuring process which was not completed as of each date, and which were the remaining of the cases stemming from the 2001-2002 crisis. The increase in these amounts in fiscal year 2008 was related to the seasoning of the individuals' loan portfolio and to the possible occurrence of certain cases of default in the commercial loan portfolio, as a consequence of the worsening of certain macroeconomic variables.

Classification of the Loan Portfolio based on Argentine Central Bank Regulations

The following tables set forth the amounts of our loans past due and the amounts not yet due of the loan portfolio, including the loan portfolios of the Bank and the regional credit card companies, applying the Argentine Central Bank's loan classification criteria in effect at the dates indicated.

	As of December 31, 2008

(1) *Before the allowance for loan losses.*

(2) *Non-Accrual loans are defined as those loans in the categories of:*
(a) Consumer portfolio:
Medium Risk,
High Risk,
Uncollectible,
and
Uncollectible Due to Technical Reasons; and
(b) Commercial portfolio: With problems,
High Risk of Insolvency,
Uncollectible,
and
Uncollectible Due to Technical Reasons .

Our non-accrual loan portfolio, both in absolute terms and measured as a percentage of total loans, decreased significantly between the end of fiscal years 2004 and 2008, in the context of strong improvement in the credit

environment in Argentina after the 2001-2002 crisis. At the end of fiscal year 2008, our non-accrual to total loans ratio was 3.49%, up from 3.14% at the end of fiscal year 2007, due to the reduction of the public-sector loan portfolio and, also, to the seasoning of the private-sector's loan portfolio, mainly the individuals' portfolio. As a result of this last effect, considering only loans to the private sector, the non-accrual loan portfolio as a percentage of said portfolio rose from 3.53% as of December 31, 2007 to 3.95% as of December 31, 2008. The seasoning of the individuals' portfolio is a consequence of the strong growth process it has undergone for several years.

Since fiscal year 2005, our coverage of non-accrual loans with allowances for loan losses has exceeded 100%.

The table below shows the interest income that would have been recorded on non-accrual loans on which the accrual of interest was discontinued and the recoveries of interest on loans classified as non-accrual on which the accrual of interest had been discontinued:

	2008	2007	As of December 31, 2006	2005	2004
			<i>(in millions of Pesos)</i>		
Interest Income that Would Have Been Recorded on Non-Accrual Loans on which the Accrual of Interest was Discontinued	35.4	35.9	23.7	45.9	32.5

Pledge Loans	0.1	0.2	0.2
Personal Loans	27.5	6.6	1.5
Credit-Card Loans			

Table of Contents

During fiscal year 2008, Ps. 289.2 million were written off against the allowance for loan losses in connection with the close of negotiations with commercial customers in a debt restructuring process. During fiscal year 2007, Ps. 125.4 million were written off against the allowance for loan losses. This amount mainly represents charge offs of loans to individuals, including the regional credit card companies' portfolios and the increased amount as compared to the prior year is attributable to the seasoning of the individuals' loan portfolio.

Foreign Outstandings

Cross-border or foreign outstandings for a particular country are defined as the sum of all claims against third parties domiciled in that country and comprise loans (including accrued interest), acceptances, interest-bearing deposits with other banks, other interest-bearing investments and any other monetary assets that are denominated in Dollars or other non-local currency. The following were our foreign outstandings as of the dates indicated representing 0.75% or more of our total assets:

Country	Fiscal Year Ended		
	2008	December 31, 2007	2006
	<i>(in millions of Pesos)</i>		
United Kingdom			
Demand Deposits	6.0	2.0	0.7
Forward Purchases of Boden 2012 Bonds	829.0	1,244.8	355.1
Forward Purchases of Discount Bonds in Pesos	603.2	600.6	723.9
Total	1,438.2	1,847.4	1,079.7
United States			
Demand Deposits	353.4	532.1	234.0
Overnight Placements	317.3	159.3	608.1
Other	0.7		
Total	671.4	691.4	842.1
Germany			
Demand Deposits	3.0	0.9	
Forward Purchases of Boden 2012 Bonds	1,087.9	240.8	
Forward Purchases of Discount Bonds in Pesos		105.9	
Total	1,090.9	347.6	

As of December 31, 2008, we had the following foreign outstandings:

Ps. 1,438.2 million (5.8% of our total assets) with United Kingdom financial institutions, of which Ps. 829.0 million represent three forward purchases of Boden 2012 Bonds and Ps. 603.2 million represent two forward purchases of Discount Bonds in Pesos, both in connection with repurchase transactions with such financial institutions, and Ps. 6.0 million correspond to demand deposits with such institutions; all are one-year term transactions and bear market floating interest rates based on Libor plus a fixed spread.

Ps. 671.4 million (2.7% of our total assets) representing liquid placements with United States financial institutions, of which Ps. 353.4 million correspond to demand deposits and Ps. 317.3 million represent overnight placements.

Table of Contents

Ps. 1,090.9 million (4.4% of our total assets) with a German financial institution, of which Ps. 1,087.9 million represent three forward purchases of Boden 2012 Bonds in connection with repurchase transactions with the applicable financial institution, and Ps. 3.0 million correspond to demand deposits with such institution; two repurchase transactions are for a two-year term and one is for a one-year term; all bear market floating interest rates based on Libor plus a fixed spread.

There were no other foreign outstandings representing 0.75% or more of our total assets as of December 31, 2008, 2007 and 2006.

Deposits

The following table sets out the composition of our deposits as of December 31, 2008, 2007 and 2006. Our deposits represent deposits with the Bank.

	As of December 31,		
	2008	2007	2006
	<i>(in millions of Pesos)</i>		
Current Accounts and Other Demand Deposits	3,105.4	2,675.4	2,011.4
Savings Accounts	4,035.0	3,380.1	2,589.5
Time Deposits	6,548.0	6,704.8	5,831.5
Other Deposits ⁽¹⁾	263.2	291.6	215.6
Plus: Accrued Interest, Quotation Differences and CER Adjustment	104.5	113.7	131.4
Total Deposits	14,056.1	13,165.6	10,779.4

(1) Includes among other, deposits originated by Decree No. 616/05, Reprogrammed Deposits under judicial proceedings and other demand deposits.

In 2008, our consolidated deposits increased 6.8% mainly as a result of a Ps. 1,084.9 million increase in deposits in current and savings accounts. As in prior years, these increases were due to deposits received by the Bank's Argentine operation. As of December 31, 2008, time deposits included Ps. 47.3 million of CER-adjusted time deposits.

In 2007, our consolidated deposits increased 22.1% mainly as a result of a Ps. 873.3 million increase in time deposits and a Ps. 1,454.6 million increase in deposits in current and savings accounts. As in prior years, these increases were due to private sector deposits received by the Bank's Argentine operation. As of December 31, 2007, time deposits included Ps. 238.7 million of CER-adjusted time deposits.

For more information, see Item 5.A. Operating Results-Funding .

Table of Contents

CER adjustment

The categories with the highest concentration of maturities per original term are those within the segments within 30 days and after 31 days but within 59 days (Pesos and Dollars), which accounted for 27.7% of the total and mainly corresponded to Peso-denominated time deposits. The rest of the terms have a homogeneous participation. As of December 31, 2008, the average original term of non-adjusted Peso and US Dollar-denominated time deposits (excluding Reprogrammed Deposits with *amparo* claims) was approximately 93 days. Dollar-denominated deposits, for Ps. 2,386.5 million (only principal), represented 17.1% of total deposits, of which 9.9% (Ps. 236.1 million, only principal) corresponded to Galicia Uruguay (consolidated).

The following table provides information about the maturity of our outstanding time deposits exceeding Ps. 100,000, based on to whether they were made at our domestic or foreign branches, as of December 31, 2008.

	Domestic Offices	Foreign Offices

Regulatory Capital*Grupo Financiero Galicia*

The capital adequacy of Grupo Financiero Galicia is not under the supervision of the Argentine Central Bank. Grupo Financiero Galicia has to comply with the minimum capital requirement established by Law No. 19,550, as amended, (*Ley de Sociedades Comerciales* or the Corporations Law), which, is required to be Ps. 0.012 million.

Table of Contents*Banco Galicia*

Banco Galicia is subject to the capital adequacy rules of the Argentine Central Bank. Banks have to comply with capital requirements both on an individual basis and on a consolidated basis with their significant subsidiaries. For the purposes of Argentine Central Bank capital adequacy rules, Banco Galicia's significant subsidiaries that it is consolidated with are Galicia Uruguay and Tarjetas Regionales S.A. consolidated.

Through its Communiqués A 3959 and A 3986, respectively, the Argentine Central Bank established a new capital adequacy rule effective as of January 1, 2004. The new capital adequacy rule is based on the Basel Committee methodology, similar to the previous rule, and establishes the minimum capital a financial institution is required to maintain in order to cover the different risks inherent in its business activity and thus incorporated into its assets. Such risks include mainly: credit risk, generated both by exposure to the private sector and to the public sector; market risk, generated by foreign-currency, securities and CER positions; and interest-rate risk, generated by the mismatches between assets and liabilities in terms of interest rate repricing. The minimum capital requirement stated by the new rule is 8% of an entity's risk-weighted assets, with a 100% risk weighting for public-sector assets (within the previous rule, this risk-weighting was 0%) and private-sector assets; with said requirement being lower depending on the existence of certain guarantees in the case of private-sector assets and for certain liquid assets.

The above-mentioned Argentine Central Bank rules provided a schedule for the gradual compliance by entities with the new rule over time. For this, it established the application, beginning on January 2004, of two coefficients known as Alfa 1 and Alfa 2, in order to temporarily, and in a decreasing manner, reduce the minimum capital requirement to cover the credit risk of public-sector assets and interest-rate risk, respectively. Argentine Central Bank rules established that full compliance was to be reached in January 2009, when Alfa 1 would be equal to 1.00, which means that no reduction on the required capital requirement would be allowed. The Alfa 1 coefficient value increases progressively, in January of each year, until it reached 1.00 on January 1, 2009, and the value of the Alfa 2 coefficient increased in the same manner until it reached 1.00 on January 1, 2007, as shown in the table below:

January 1st/ December 31st	Alfa 1	Alfa 2
2004	0.05	0.20
2005	0.15	0.40
2006	0.30	0.70
2007	0.50	1.00
2008	0.75	
2009	1.00	

Under Argentine Central Bank rules, core capital primarily corresponds to a bank's shareholders' equity at the beginning of the fiscal year and supplemental capital primarily is comprised of 50% of the fiscal year's profits and 100% of fiscal year's losses, and subordinated debt. In the case of the Bank, supplemental capital includes the subordinated debt maturing in 2019 issued as a result of the restructuring of the Bank's foreign debt. Pursuant to Argentine Central Bank regulations on this point, subordinated debt computable as supplemental capital is limited to 50% of core capital and supplemental capital cannot exceed the latter.

Comunicación A 4782 of the Argentine Central Bank, dated March 3, 2008, broadened the range of subordinated contractual obligations that financial institutions may include in their calculation of supplementary shareholders equity. Pursuant to this Comunicado, it is now possible to record as such not only subordinated debt securities with a public offering, but also any other liability contractually subordinated that meets the requirements set forth in the regulation, regardless of whether such debt had a public offering and notwithstanding the manner of execution (which allows supplementary capital to include liabilities such as loans or credit lines from abroad, for example).

Table of Contents

The table below shows information on the Bank's consolidated computable regulatory capital, or RPC or Adjusted Shareholders' Equity, and minimum capital requirements as of the dates indicated.

	As of December 31,		
	2008	2007	2006
	<i>(in millions of Pesos, except percentages)</i>

Excess Over Required Capital (B)-(A)	987.8	1,054.3	777.3
Excess Over Required Capital as a % of Required Capital	63.14	80.93	71.69
Total Capital Ratio	13.92	15.54	15.03

(1) In accordance with Argentine Central Bank rules applicable at each date.

As of December 31, 2008, Banco Galicia's computable capital amounted to Ps. 2,552.3 million, exceeding the minimum capital requirement by Ps. 987.8 million pursuant to the regulations provided for by the Argentine Central Bank effective as of such date. This excess amount was Ps. 1,054.3 million as of December 31, 2007. The decrease of Ps. 66.5 million in the excess was due to a Ps. 261.7 million increase in the minimum capital requirement partially offset by a Ps. 195.2 million increase in computable capital.

A greater minimum capital requirement was mainly the result of: (i) the Ps. 168.8 million increase in the minimum capital required to account for credit risk, as a consequence of the growth of the Bank's exposure to the private sector during fiscal year 2008 and (ii) the Ps. 93.3 million increase in minimum capital requirement for the exposure to the non-financial public sector, which was mainly due to the increase of the Alfa 1 coefficient from 0.50 to 0.75 as explained herein.

The Ps. 195.2 million increase in computable capital when compared to December 31, 2007 was mainly the result of a Ps. 237.6 million increase in supplemental capital. This latter increase was mainly due to the fiscal year's net income offset by greater deductions of Ps. 85.3 million corresponding to an increase in organization and development expenses.

Regional Credit Card Companies

Since the regional credit card companies are not financial institutions, their capital adequacy is not regulated by the Argentine Central Bank. The regional credit card companies have to comply with the minimum capital requirement established by the Corporations Law, which was required to be Ps. 0.012 million. However, as noted above, Banco Galicia has to comply with the Argentine Central Bank's capital adequacy rules on a consolidated basis, which consolidated includes the regional credit card companies.

Table of Contents

Minimum Capital Requirements of Insurance Companies

The insurance companies controlled by Sudamericana must meet the minimum capital requirements set by General Resolution No. 31,134 of the National Insurance Superintendency. This resolution requires insurance companies to maintain a minimum capital level equivalent to the highest of the amounts calculated as follows:

- (a) By line of insurance: this method establishes a fixed amount by line of insurance. For life insurance companies, it is Ps. 4 million, increasing to Ps. 5 million for companies that offer pension-linked life insurance. For providers of retirement insurance that do not offer pension-linked annuities, the requirement is Ps. 3 million (increasing to Ps. 5 million for companies that offer pension-linked annuities). For companies that offer property insurance that includes damage coverage (excluding those related to vehicles) the requirement is Ps. 1.5 million (increasing to Ps. 8 million for companies that offer all P&C products).
- (b) By premiums and additional fees: to use this method, the company must calculate the sum of the premiums written and additional fees earned in the last 12 months. Based on the total, the company must calculate 16%. Finally, it must adjust the total by the ratio of net paid claims to gross paid claims for the last 36 months. This ratio must be at least 50%.
- (c) By claims: to use this method, the company must calculate the sum of gross claims paid during the 36 months prior to the end of the period under analysis. To that amount, it must add the difference between the balance of unpaid claims as of the end of the period under analysis and the balance of unpaid claims as of the 36th month prior to the end of the period under analysis. The resulting figure must be divided by three. Then the company must calculate 23%. The resulting figure must be adjusted by the ratio of net paid claims to gross paid claims for the last 36 months. This ratio must be at least 50%.
- (d) For life insurance companies that offer policies with an investment component, the figures obtained in b) and c) must be increased by an amount equal to 4% of the technical reserves adjusted by the ratio of net technical reserves to gross technical reserves (at least 85%), plus 0.3% of at-risk capital adjusted by the ratio of retained at-risk capital to total at-risk capital (at least 50%).

The minimum required capital must then be compared to computable capital, defined as shareholder's equity less non-computable assets. Non-computable assets consist mainly of deferred charges, pending capital contributions, and excess investments in authorized instruments. As of December 31, 2008, according to the estimates carried out as of such date, the computable capital of the companies held by Sudamericana exceeded the minimum capital requirement of Ps. 39.7 million by Ps. 12.3 million.

Sudamericana also holds Sudamericana Asesores de Seguros S.A., a company dedicated to brokerage in different lines of insurance that is regulated by the guidelines of the Corporations Law, which provided for a minimum capital requirement of Ps. 0.012 million.

Government Regulation

General

All companies operating in Argentina must be registered with the Argentine Superintendency of Companies whose regulations are applicable to all companies in Argentina but may be superseded by other regulatory entities' rules, depending on the matter, such as the CNV or the Argentine Central Bank. All companies operating in Argentina are regulated by the Corporations Law.

Table of Contents

In their capacity as companies listed in Argentina, Grupo Financiero Galicia and Banco Galicia must comply with the disclosure, reporting, governance and other rules applicable to such companies issued by the markets in which they are listed and their regulators, including Law No. 17,811, as amended, Law No. 20,643 and Decrees No. 659/74 and No. 2,220/80, as well as Decree No. 677/01 otherwise known as the Decree for Transparency in the Public Offering (*Régimen de la Transparencia de la Oferta Pública*). In their capacity as public issuers of securities these companies are subject to the above mentioned rules. As Grupo Financiero Galicia has publicly listed ADSs in the United States, it is also subject to the reporting requirements of the United States Exchange Act for foreign private issuers and to the provisions applicable to foreign private issuers under the Sarbanes Oxley Act. See Item 9. The Offer and Listing-Market Regulations.

Our operating subsidiaries are also subject to the following laws: Law No. 25,156 (the Competition Defense Law, *Ley de Defensa de la Competencia*), Law No. 22,820 (Fair Business Practice Law, *Ley de Lealtad Comercial*) and Law No. 24,240 or the Consumer Protection Law (*Ley de Defensa del Consumidor*).

As a financial services holding company, we do not have a specific institution that regulates our activities. Our banking and insurance subsidiaries are regulated by different regulatory entities. In the case of the Bank, the Argentine Central Bank is the main regulatory and supervising entity.

The banking industry is highly regulated in Argentina. Banking activities in Argentina are regulated by the Financial Institutions Law, which places the supervision and control of the Argentine banking system in the hands of the Argentine Central Bank. The Argentine Central Bank regulates all aspects of financial activity. See -Argentine Banking Regulation below.

The Bank and our insurance subsidiaries are subject to Law No. 25,246, which was passed on April 13, 2000, as amended, which provides for an anti-money laundering framework in Argentina, including Law No. 26,268, which amends the latter to include within the scope of criminal activities those associated with terrorism and its financing. Sudamericana's insurance subsidiaries are regulated by the National Insurance Superintendency and Laws No. 17,418 and No. 20,091. Sudamericana Asesores de Seguros S.A. is regulated by the National Insurance Superintendency, through Law No. 22,400.

The activity of the regional credit card companies and the credit card activities of the Bank are regulated by Law No. 25,065, as amended, or the Credit Cards Law (*Ley de Tarjetas de Crédito*). Both the Argentine Central Bank and the National Undersecretary of Industry and Trade have issued regulations to, among other things, enforce public disclosure of companies pricing (fees and interest rates) in order to assure consumer awareness of such pricing. See -Credit Cards Regulation.

Net Investment and its controlled companies are regulated by the Corporations Law and are not regulated by a specific regulatory agency. Galicia Warrants is regulated by Law No. 9,643.

On January 6, 2002, the Argentine Congress enacted Law No. 25,561, or the Public Emergency Law, which together with various decrees and Argentine Central Bank rules, provided for the principal measures in order to deal with the 2001 and 2002 crisis, including asymmetric pesification, among others. The period of effectiveness of the Public Emergency Law was extended again until December 31, 2009.

Table of Contents

Foreign Exchange Market

In late 2001 and early 2002, restrictions were imposed on access to the Argentine foreign exchange market and on capital movements, which were tightened by the middle of 2002. The Public Emergency Law granted the executive branch of the Government the power to regulate the local foreign exchange market.

Since its creation this regime was subject to various modifications. Only the principal features currently in force are detailed below.

On June 9, 2005, the executive branch of the Government issued Decree No. 616/05, which established certain major amendments to the rules for capital movements into and from Argentina. This Decree was effective as of June 10, 2005 and, as regulated, established a system whereby:

- (a) Foreign exchange flows into and from the local foreign exchange market and all resident new debt transactions that may imply future foreign exchange payments to nonresidents must be registered with the Argentine Central Bank.
- (b) All new debt of the private sector with non-residents must be for a minimum term of 365 days, except for international trade financing and primary issuances of debt securities, if such securities public offering and listing on self-regulated markets in Argentina has been duly authorized.
- (c) All inflows of foreign exchange resulting from such indebtedness, with the exceptions mentioned in the previous item and those regulated by the Argentine Central Bank which are detailed below, and all inflows of foreign exchange by non-residents, excluding direct foreign investments and certain portfolio investments (subscriptions of primary issuances of debt and equity securities, which public offering and listing in self-regulated markets in Argentina has been duly authorized, and government securities acquired in the secondary market), must be for a term of at least 365 days and will be subject to a 30% deposit requirement.
- (d) Such deposit requirement will be held in a local financial institution as an unremunerated Dollar-denominated time deposit maturing in at least 365 days; such funds will not be available as a guarantee for any kind of debt and, upon the deposit maturity date, such funds will become available within the country and, therefore, will be subject to the applicable restrictions on foreign exchange transfers abroad.
- (e) The 30% deposit is not required for, among other things, inflows of foreign currency:
 - (i) resulting from loans granted to residents by local financial institutions in foreign currency;
 - (ii) resulting from capital contributions to local institutions, when the contributor owns, previously or as a result of such contributions, 10% or more of the company's capital or votes, subject to compliance with certain requirements;
 - (iii) resulting from sales of interests in local entities to direct investors;
 - (iv) to be applied to real estate acquisitions;

Table of Contents

- (v) resulting from an indebtedness with multilateral and bilateral credit agencies and with official credit agencies;
- (vi) resulting from other foreign indebtedness of the local non-financial private sector, with an average life of no less than two years, the proceeds of which will be applied to the acquisition of non-financial investments (as defined by the Argentine Central Bank);
- (vii) resulting from other foreign indebtedness where the proceeds will be applied to the settlement of foreign debt principal amortization or long term investments in foreign assets;
- (viii) that will be utilized within 10 business days from their liquidation in the local foreign exchange market for purposes listed as current transactions within the international accounts by the International Monetary Fund, among others, within such purposes are the payment by non-Argentine residents of certain local taxes; or
- (ix) resulting from the sale of foreign assets of residents in order to subscribe to primary issuances of public debt issued by the Government; and
- (f) The proceeds of sales of foreign assets brought into the country by residents (capital repatriation) will be subject to the 30% deposit requirement noted in (c) above, which will apply to any amounts exceeding US\$ 2.0 million per month if certain other operative requirements are met.

The Ministry of Economy is entitled to modify the percentages and terms detailed above, when a change in the macroeconomic situation so requires. It is also entitled to modify the rest of the requirements established by Decree No. 616/05, and/or establish new ones, and/or increase the types of foreign currency inflows included. The Argentine Central Bank is entitled to regulate and control compliance with the regime established by Decree No. 616/05, and to enforce the applicable penalties.

In addition to Decree No. 616/05, the Ministry of Economy issued Resolution No. 637/05, dated November 16, 2005, which established that, beginning on November 17, 2005, the restrictions established in said Decree are also applicable to all inflows of funds to the local foreign exchange market for the subscription of primary issuances of debt securities or certificates of participation by financial trusts, if such restrictions were applicable to capital inflows to be used to acquire any of the trusts assets. The corresponding criminal regime will be applicable in the case that any of these rules are violated.

In addition, currently, access to the local foreign exchange market by non-residents (both individuals and entities) to transfer funds abroad is permitted:

- (a) With no limit in the case of: (i) proceeds from the principal amortization of government securities; (ii) recoveries from local bankruptcies; (iii) proceeds from the sale of direct investments in the non-financial private sector in Argentina or the final disposition of such investments if they were made with foreign currency that entered the local foreign exchange market no less than 365 days before; and (iv) certain other specific cases.
- (b) With a US\$ 500,000 monthly limit in the case of the aggregate proceeds of the sale of portfolio investments made with foreign currency that entered the local foreign exchange market no less than 365 days before.
- (c) With a US\$ 5,000 monthly limit in cases not contemplated above, unless authorization from the Argentine Central Bank is obtained.

Table of Contents

Access to the local foreign exchange market by residents (both individuals and entities) to make foreign real estate, direct or portfolio investments or buy foreign exchange or traveler checks is allowed but limited to US\$ 2.0 million per month if certain other operative requirements are met. Such limit may be increased in certain specific cases.

Access to the foreign exchange local market for the transfer of profits and dividends abroad is permitted when corresponding to audited and final balance sheets.

Pursuant to Decree No. 260/02, all foreign exchange transactions in Argentina must be executed only through the *mercado libre y único de cambios* (free and single foreign exchange market) on which the Argentine Central Bank buys and sells currency.

Compensation to Financial Institutions

For the Asymmetric Pesification and its Consequences

Decree No. 214/02 provided for compensation to financial institutions, for:

the losses caused by the mandatory conversion into Pesos of certain liabilities at the Ps. 1.4 per US\$ 1.0 exchange rate, which exchange rate was greater than the Ps. 1.0 per US\$ 1.0 exchange rate established for the conversion into Pesos of certain Dollar-denominated assets. This was to be achieved through the delivery of a Peso-denominated compensatory bond issued by the Government.

the currency mismatch left on financial institutions' balance sheets after the compulsory pesification of certain of their assets and liabilities after the conversion of the Peso-denominated compensatory bond into a Dollar-denominated compensatory bond. This would be achieved by the purchase by financial institutions of a Dollar-denominated hedge bond. For such purpose, the Government established the issuance of a Dollar-denominated bond bearing Libor and maturing in 2012 (Boden 2012 Bonds).

Among others, Decree No. 905/02 established the methodology for calculating the compensation to be received by financial institutions. We recorded the compensation for the amounts we had determined according to the regulations. The Argentine Central Bank had to confirm the amounts after a review.

In March 2005, we agreed to receive US\$ 2,178.0 million of face value of Boden 2012 Bonds, comprised of US\$ 906.3 million of face value of Boden 2012 Bonds corresponding to the Compensatory Bond (fully delivered to us in November 2005) and US\$ 1,271.7 million of face value of Boden 2012 Bonds corresponding to the Hedge Bond (fully delivered to us in April 2007). On December 1, 2006, the Bank received Boden 2012 Bonds for a face value of US\$ 1,155.0 million corresponding to 90.8% of the Hedge Bond, at their 75% residual value, and US\$ 406.8 million for pass due amortization and interest coupons.

Table of Contents

The Boden 2012 Bonds pending delivery as of December 31, 2006, for US\$ 116.8 million of face value, were recorded on our balance sheet under the item Other Receivables Resulting from Financial Brokerage, as they represented a right to receive Boden 2012 Bonds as compensation for the asymmetric pesification and its consequences as explained above. The delivery to us of the Boden 2012 Bonds corresponding to the Compensatory Bond and to 90.8% of the Hedge Bond implied the availability of such bonds, thus the bonds were recorded as securities under Government Securities.

We recorded on our balance sheet the advance for the acquisition of the Hedge Bond and the compensation simultaneously. On December 1, 2006, we executed 90.8% of the aforementioned advance and simultaneously settled this liability using Bogar Bonds and Secured Loans granted as collateral, for Ps. 1,111.6 million and Ps. 0.07 million of face value, respectively, and cash for Ps. 1,369.7 million. As a result of the foregoing, both our assets and liabilities decreased by Ps. 3,302.6 million, due to the decrease by such amount of both the advance for the acquisition of the Hedge Bond and the assets used in the settlement of such liability.

Due to the settlement in cash noted above, Bogar Bonds previously granted as collateral for said liability for a face value of Ps. 392.8 million were released. The valuation of such securities in accordance with Argentine Central Bank regulations, at their present value calculated by using the discount rate set forth in those regulations, generated a reduction in the book value thereof of Ps. 109.1 million.

The Boden 2012 Bonds pending delivery as of December 31, 2006 were subscribed for on April 24, 2007 using Secured Loans for a face value of Ps. 115.9 million, in accordance with the direct swap alternative set forth in Decree No. 905/02. This decision generated a Ps. 32.0 million loss, which was recorded in February 2007, resulting from the release of the Bogar Bonds that, as of December 31, 2006, were allocated as collateral for the advance for the acquisition of the remaining Hedge Bond. Such release determined their valuation at present value calculated using the discount rate established by the Argentine Central Bank, in accordance with its Communiqué A 3911 as amended, while, according to such rule, Bogar Bonds used as collateral could be recorded at their technical value, which was higher than the aforementioned present value. In addition, the above-mentioned swap alternative instead of the advance requested from the Argentine Central Bank to finance the acquisition of the remaining Hedge Bond caused a Ps. 32.8 million increase in the acquisition cost of the remaining Hedge Bond. This loss was recognized in the Financial Statements in March 2007. The swap was completed on April 24, 2007.

The process of compensating us for the effects of the asymmetric pesification established by Decree No. 905/02 was completed on such date. The acquisition of the Boden 2012 Bonds corresponding to the Hedge Bond using public-sector assets has strengthened our balance sheet by reducing risk concentration in such assets, increasing our structural liquidity and expanding the resources available to be applied to the business.

There were not any significant changes to mention during fiscal year 2008.

Table of Contents*For Differences Related to Amparo Claims*

As a result of the provisions of Decree No. 1,570/01, the Public Emergency Law, Decree No. 214/02 and concurrent regulations, and as a result of the restrictions on cash withdrawals and of the issuance of measures that established the pesification and restructuring of foreign-currency deposits, since December 2001, a significant number of claims have been filed against the Government and/or financial institutions, formally challenging the emergency regulations and requesting prompt payment of deposits in their original currency. Most lower and upper courts have declared the emergency regulations unconstitutional.

The difference between the amounts paid as a result of these court orders and the amount resulting from converting deposits at the Ps. 1.40 per US Dollar exchange rate, adjusted by the CER and interest accrued up to the payment date, which amounted to Ps. 786.3 million as of December 31, 2008, was recorded under Intangible Assets. The residual value as of said date was Ps. 316.9 million. We have repeatedly reserved our right to make claims, at a suitable time, in view of the negative effect caused on our financial condition by the reimbursement of deposits originally denominated in Dollars, pursuant to orders issued by the Judicial Branch, either in US Dollars or in Pesos for the equivalent amount at the market exchange rate, since compensation of this effect was not included by the Government in the calculation of the compensation to financial institutions. The method of accounting for such right as a deferred loss, as set forth by Argentine Central Bank regulations, does not affect the existence or legitimacy of such right. To such effect, we have reserved all of the corresponding rights.

On December 30, 2003, we formally requested from the executive branch of the Government with a copy to the Ministry of Economy and to the Argentine Central Bank, the payment of the due compensation for the losses incurred that were generated by the asymmetric pesification and, especially, for the negative effect on our financial condition caused by final court decisions. We have reserved our right to further extend such request in order to encompass losses made definitive by new final judgments.

On December, 2006, the Argentine Supreme Court pronounced its ruling with respect to the case *Massa c/ Estado Nacional y Bank Boston* resolving that the defendant bank had to fulfill its obligation to reimburse a US Dollar-denominated deposit subject to the emergency regulations by paying the original amount deposited converted into Pesos at an exchange rate of Ps. 1.40 per US Dollar, adjusted by CER until the effective date of payment, together with an interest rate of 4% per annum, and computing amounts paid in order to comply with preliminary injunctions or other measures as payments on account. In August 2007 (the *Kujarchuk* case), the Argentine Supreme Court established a calculation method for payments on account, which confirmed the criteria held by most courts of law since the *Massa* ruling mentioned above. With respect to judicial deposits, in March 2007, the Argentine Supreme Court ruled in the case *EMM S.R.L. against Tía S.A.*, that Decree No. 214/02 does not apply to such deposits, and that such deposits must be reimbursed to the depositors in their original currency.

It is expected that the aforementioned rulings by the Argentine Supreme Court will be strongly followed in similar cases to be heard by the lower courts. The Bank continues to gradually address the judicial resolutions on a case-by-case basis, in accordance with the individual circumstances of each case. Management continuously monitors and analyzes the implications of the above resolutions. The Bank has recorded a Ps. 37.9 million liability for the remaining amounts that may need to be paid in connection with cases pending resolution. The amount resulting from the difference between the amount ultimately determined by the courts and the amount recorded by the Bank, if any, will be recorded in accordance with Argentine Central Bank's rules under the item Intangible Assets, and will be amortized over a period of 60 months. Due to the above, and based on the information available to date, it is the opinion of the Bank's management that the effects resulting from these situations will not significantly affect the Bank's shareholders' equity. During 2008, as well as during the previous fiscal years, the number of legal actions filed by customers requesting the reimbursement of deposits in their original currency decreased significantly.

Table of Contents

With respect to judicial deposits that have been subject to pesification, the Argentine Central Bank established that, beginning in July 2007, financial institutions must establish a provision in an amount equal to the difference that results from comparing such deposits' balances at each month's end, considered in their original currency, and the corresponding Peso balances actually recorded on the books. Such provision, established as of December 31, 2008 and charged to income, amounted to Ps. 1.9 million.

Argentine Banking Regulation

The following is a summary of certain matters relating to the Argentine banking system, including provisions of Argentine law and regulations applicable to financial institutions in Argentina. This summary is not intended to constitute a complete analysis of all laws and regulations applicable to financial institutions in Argentina.

General

Since 1977, banking activities in Argentina have been regulated by the Financial Institutions Law which places the supervision and control of the Argentine banking system in the hands of the Argentine Central Bank, which is an autonomous institution. The Argentine Central Bank has vested the Superintendency with most of the Argentine Central Bank's supervisory powers. In this section, unless the context otherwise requires, references to the Argentine Central Bank shall be understood as references to the Argentine Central Bank acting through the Superintendency. The Financial Institutions Law provides the Argentine Central Bank with broad access to the accounting systems, books, correspondence, and other documents of banking institutions. The Argentine Central Bank regulates the supply of credit and monitors the liquidity of, and generally supervises the operation of, the Argentine banking system. The Argentine Central Bank enforces the Financial Institutions Law and grants authorization for banks to operate in Argentina. The Financial Institutions Law confers numerous powers to the Argentine Central Bank, including the ability to grant and revoke bank licenses, to authorize the establishment of branches outside Argentina, to approve bank mergers, capital increases and certain transfers of stock, to fix minimum capital, liquidity and solvency requirements and lending limits, to grant certain credit facilities to financial institutions in cases of temporary liquidity problems and to promulgate other regulations that further the intent of the Financial Institutions Law.

Current regulations equally regulate local and foreign owned banks.

The Public Emergency Law, sanctioned on January 6, 2002, introduced substantial amendments to the Argentine Central Bank's charter which, among others, eliminated certain restrictions on its ability to act as a lender of last resort and allowed the Argentine Central Bank to make advances to the Government. These changes were further implemented by Law No. 25,780, published in the Official Gazette on September 8, 2003, which amended the Financial Institutions Law and the Argentine Central Bank charter.

Table of Contents***Supervision***

As the supervisor of the Argentine financial system, the Argentine Central Bank requires financial institutions to submit information on a daily, monthly, quarterly, semiannual and annual basis. These reports, which include balance sheets and income statements, information relating to reserve funds, use of deposits, portfolio quality (including details on debtors and any loan loss provisions established) and other pertinent information, allow the Argentine Central Bank to monitor financial institutions' financial condition and business practices.

The Argentine Central Bank periodically carries out formal inspections of all banking institutions for purposes of monitoring compliance by banks with legal and regulatory requirements. If the Argentine Central Bank rules are breached, it may impose various sanctions depending on the gravity of the violation. These sanctions range from calling attention to the infraction to the imposition of fines or even the revocation of the financial institution's operating license. Moreover, non-compliance with certain rules may result in the obligatory presentation to the Argentine Central Bank of specific adequacy or regularization plans. The Argentine Central Bank must approve these plans in order for the financial institution to remain in business.

Financial institutions operating in Argentina have been subject to the supervision of the Argentine Central Bank on a consolidated basis since 1994. Information set out in -Limitations on Types of Business, -Capital Adequacy Requirements, -Lending Limits, and -Loan Classification System and Loan Loss Provisions below, relating to a bank's loan portfolio, is calculated on a consolidated basis. However, regulations relating to a bank's deposits are not based on consolidated information, but on such bank's deposits in Argentina (for example, liquidity requirements and contributions to the deposit insurance system).

Examination by the Argentine Central Bank

The Argentine Central Bank began to rate financial institutions based on the CAMEL quality rating system in 1994. Each letter of the CAMEL system corresponds to an area of the operations of each bank being rated, with: C standing for capital, A for assets, M for management, E for earnings, and L for liquidity. Each factor is evaluated and rated on a scale from 1 to 5, 1 being the highest rating an entity can receive. The Argentine Central Bank modified the supervision system effective in September 2000. The objective and basic methodology of the new system, denominated CAMELBIG, do not differ substantially from the CAMEL system. The components were redefined in order to evaluate business risks separately from management risks. The components used to rate the business risks are: capital, assets, market, earnings, liquidity and business. The components to rate management risks are: internal control and the quality of management. By combining the individual factors that are under evaluation, a combined index can be obtained that represents the final rating for the financial institution.

After the 2001-2002 crisis, the Argentine Central Bank resumed the examination process, which was interrupted due to such crisis. In the Bank's case, the first examination was based on information as of June 30, 2005. New examinations were conducted based on information as of September 30, 2006 and as of June 30, 2008.

Table of Contents

BASIC System

The Argentine Central Bank established a control system (BASIC) with the purpose of allowing the public access to a greater level of information and increased security with respect to their holdings in the Argentine financial system.

Each letter corresponds to one of the following procedures:

B (*Bonos* or Bonds). On an annual basis, all financial institutions in Argentina were required to engage in certain debt issuing transactions in order to expose them to scrutiny and analysis by third parties with high standards. This requirement was eliminated by the Argentine Central Bank effective March 1, 2002.

A (*Auditoría* or Audit). The Argentine Central Bank requires a set of external audit procedures that include: (a) the creation of a registry of auditors; (b) the implementation of strict accounting procedures to be complied with by external auditors; (c) the payment of a performance guarantee by those auditors to induce their compliance with the procedures, and (d) the creation of a department within the Argentine Central Bank liable for verifying that the procedures are followed. The purpose of this requirement is to assure accurate disclosure by the financial institutions to both the Superintendency and the public.

S (*Supervisión* or Supervision). The Argentine Central Bank has the right to inspect financial institutions from time to time.

I (*Información* or Information). Financial institutions are required to file on a monthly basis certain daily, weekly, monthly and quarterly statistical information.

C (*Calificación* or Rating). The Argentine Central Bank established a system that required the periodic credit evaluation of financial entities by internationally recognized rating agencies, which was suspended by Communiqué A 3601 in May 2002.

Legal Reserve

The Argentine Central Bank requires that banks annually allocate a percentage of their net income set by the Argentine Central Bank, which is currently 20.0%, to a legal reserve. Such reserve can only be used during periods in which a bank has incurred losses and has exhausted all allowances and other provisions. Dividends may not be paid if the legal reserve has been impaired.

Limitations on Types of Business

As provided by the Financial Institutions Law, commercial banks are authorized to conduct all activities and operations that are not specifically prohibited by law or by Argentine Central Bank regulations. Some of the activities which are permitted include the ability to make and receive loans, to receive deposits from the public in both local and foreign currency, to guarantee customers debts, to acquire, place or negotiate stock or debt securities in the MAE, subject to the approval of the CNV, to conduct transactions in foreign currency, to act as a fiduciary and to issue credit cards. Banks are not permitted to own commercial, industrial, agricultural and other types of businesses, except with prior authorization from the Argentine Central Bank. Under Argentine Central Bank regulations, the aggregate amount of equity investments of a commercial bank (including interests in domestic mutual funds called *fondos comunes de inversión*) may not exceed 50.0% of such bank's computable regulatory capital (as defined below). In addition, investments in:

equity shares without quotation, excluding (a) stock of companies which provide services complementary to the services offered by the bank, and (b) certain stock participations which are necessary in order to obtain the rendering of public services, if any,

Table of Contents

listed stock and participations in mutual funds which are not included in order to determine the capital requirements related to market risk; and

listed stock that does not have a largely publicly available market price (when daily quotes of relevant transactions are available, which quotes would not be significantly affected by the disposition of the bank's holdings of such stock)

may not exceed, in the aggregate, 15.0% of a bank's computable regulatory capital.

Under Argentine Central Bank regulations, financial institutions are typically precluded from engaging directly in insurance activities and from holding an equity interest in excess of 12.5% of the outstanding capital of a company that does not provide services defined as complementary to those provided by financial institutions or which exceed specified percentages of the respective financial institution's RPC as described above. The Argentine Central Bank determines which services are complementary to the services provided by financial institutions, which services primarily include services in connection with stock brokerage, the issuance of credit, debit or similar cards, financial intermediation in leasing and factoring transactions.

Computable Regulatory Capital

A bank's computable regulatory capital or RPC or Adjusted Shareholders' Equity is defined under the Argentine Central Bank's regulations as:

- i) the core capital, which includes permanent capital, non-equity contributions, net worth adjustments, surplus reserves, audited retained earnings (of closed fiscal years) and, effective October 1, 2006, long-term debt instruments, as long as such instruments fulfill certain requirements (maturity of more than 30 years, accrual of recognized return per year not exceeding issuer financial entity's profits, with unpaid services not being cumulative, so that they cannot be deferred and accumulated to be paid after its maturity date) and do not exceed certain core capital percentages, equal to 30% until December 31, 2008, subject to a schedule that converges with the 15% international standard on January 1, 2013; plus
- ii) the supplemental capital, which may not exceed the core capital, consisting of 50% of unaudited profits and 100% of unaudited losses, and 100% of audited profits or losses for the current fiscal year, 50% of the reserves on the loan portfolio classified as normal (general reserves), subordinated debt not exceeding 50% of core capital and with a maturity of at least 5 years, and, effective October 1, 2006, debt instruments which fulfill the requirements to be considered as core capital but exceed the above-mentioned limits, debt instruments with a remaining maturity of less than 10 years and those for which unpaid services are cumulative. In this case, the limit is 50% of the core capital; minus
- iii) the following deductions: (a) demand deposits with banks abroad not rated as investment grade; (b) securities deposited with custodians that were not authorized by the Argentine Central Bank; (c) sovereign bonds issued by a foreign government with a rating lower than that assigned to Argentine sovereign bonds; (d) share holdings in other financial institutions; (e) unregistered real estate; (f) goodwill; (g) organizational and development expenses; and (h) provisioning deficiencies as determined by the Superintendency.

Financial institutions must comply with capital adequacy requirements both on an individual basis and a consolidated basis.

Table of Contents***Capital Adequacy Requirements***

See -Selected Statistical Information-Regulatory Capital .

Capitalization of Debt Instruments

Through Communiqué A 4652, dated April 25, 2007, the Argentine Central Bank modified Item 7.3 Capital Contributions of Chapter VI. Capital Adequacy- Section 7. Regulatory Capital of its LISOL 1 rule. Through such Communiqué, the Argentine Central Bank broadened the set of financial instruments different from cash that it expressly allows to be contributed as capital for the purposes of all regulations related to capital, capital calculations and capital increases. Besides cash, in which case no special authorization from the Argentine Central Bank is required, the regulation establishes that subject to the prior authorization by the Superintendency, the following instruments are allowed as capital contributions: (i) securities issued by the Government, (ii) debt instruments issued by the Argentine Central Bank, and (iii) a financial institution's deposits and other liabilities resulting from financial brokerage, including subordinated obligations. In cases (i) and (ii), the contributions must be recorded at market value. It is understood that an instrument has a market value when it has regular quotations in stock markets and regulated local and foreign markets. In case (iii), contributions must be recorded at market value, as defined in the previous sentence or, in the case of financial institutions that publicly offer their stock, at the price determined by the regulatory authority. When the previous situation is not verified, contributions will be admitted at their accounting value, pursuant to Argentine Central Bank rules.

Profit Distribution

See Item 8. Financial Information-Dividend Policy and Dividends.

Treatment of Losses in Connection with Amparo Claims

Through Communiqué A 3916 dated April 3, 2003, the Argentine Central Bank provided for the recording of an intangible asset on account of the difference between the amount paid by financial institutions pursuant to legal actions and the amount resulting from the conversion into Pesos of the balance of the US Dollar deposits reimbursed, at the exchange rate of Ps. 1.4 per US\$ 1.0 (adjusted by the CER plus accrued interest as of the payment date). In addition, it established that the corresponding amount shall be amortized in 60 monthly equal and consecutive installments beginning in April 2003.

On November 17, 2005, through Communiqué A 4439, the Argentine Central Bank established that, beginning in December 2005, financial institutions having granted, as from that date, new commercial loans with an average life of more than two years could defer the losses related to the amortization of *amparo* claims. The maximum amount to be deferred cannot exceed 10% of financial institutions' RPC nor 50% of the new commercial loans. Likewise, financial institutions will not be able to reduce the rest of their commercial loan portfolio. This methodology will be applied until December 2008, when the balance recorded as of that date would begin to amortize in up to 36 monthly equal and consecutive installments. Our application of this rule has resulted in the deferral of losses related to *amparo* claims since December 2005. No losses for this concept were recorded in fiscal years 2005 and 2006, while losses of Ps. 108.7 million and Ps. 39.5 million were recorded in fiscal years 2007 and 2008, respectively. As of December 31, 2008 the accumulated deferred amortization amounted to Ps. 209.7 million.

Table of Contents

As of December 31, 2008, this intangible asset, net of amortizations and including deferred amortizations, amounted to Ps. 316.9 million. We have repeatedly reserved our right to make claims, at suitable time, in view of the negative effect caused in connection with *amparo* claims. See Item 4. Compensation to Financial Institutions-For Differences Related to *Amparo* Claims.

Legal Reserve Requirements for Liquidity Purposes

The minimum cash requirements that banks are required to carry are established as a percentage of the balances of the different types of bank deposits and, for time deposits (including Cedros and Reprogrammed Deposits with *amparo* claims, when corresponding), the percentage varies with the remaining maturity. The deposit amount minus the minimum cash requirement is such deposits' lending capacity.

The Argentine Central Bank modifies from time to time the percentages of the minimum cash requirements depending on monetary policy considerations. Compliance with the minimum cash requirements must be accomplished with certain assets (see below), in the same currency as the deposit that triggers such requirement. Compliance with the minimum cash requirements is determined in averages, for monthly periods. The Argentine Central Bank can modify this practice, depending on monetary policy considerations.

Through Communiqué A 3486, dated March 22, 2002, and Communiqué A 3528, dated March 25, 2002, the Argentine Central Bank established that foreign currency denominated deposits lending capacity must only be applied to US Dollar-denominated international trade financing, interbank loans and Lebac, and that any such lending capacity not applied to the aforementioned purposes will constitute a greater cash minimum requirement in Pesos, for the same amount. Subsequently, other purposes were added, allowing for the financing of activities that do not directly generate cash flows in foreign currency, such as the granting of loans to finance the importing of capital goods to be used to increase the production for the local market.

Pursuant to Communiqué A 4449, dated December 2, 2005, the Argentine Central Bank established that, effective December 2005, the minimum cash requirement in Pesos is to be applied over the monthly average of the daily balances of the obligations comprised, except for the period from December to February of the following year, for which the quarterly average was used.

At the end of fiscal year 2008, the percentages of minimum cash requirements applicable in accordance with Argentine Central Bank rules, were as follows:

Demand deposits:

Peso-denominated current accounts and savings accounts: 19%.

Dollar-denominated savings accounts: 20%.

Time deposits, including those adjusted by CER (by remaining maturity):

Peso-denominated: up to 29 days: 14%; from 30 to 59 days: 11%; from 60 to 89 days: 7%; from 90 to 179 days: 2%; from 180 to 365 days: 0%.

Dollar-denominated: up to 29 days: 20%; from 30 to 59 days: 15%; from 60 to 89 days: 10%; from 90 to 179 days: 5%; from 180 to 365 days: 2%; and more than 365 days: 0%.

The assets computable for compliance with this requirement are the technical cash, which includes cash (bills and coins in vaults, in ATMs and branches, and in transportation and in armored truck companies, up to a 67% maximum beginning on October 1, 2006, as established by the Argentine Central Bank's Communiqué A 4580), the balances of the Peso- and Dollar-denominated accounts at the Argentine Central Bank and that of the escrow accounts held at the Argentine Central Bank in favor of clearing houses.

Table of Contents

As of December 31, 2008, the Bank was in compliance with its legal reserve requirements, and has continued to be up to the date of this annual report.

Lending Limits

According to Argentine Central Bank rules, the aggregate amount of loans and other receivables (including guarantees granted), together referred herein as financial assistance or credit, a bank can grant to any customer at any time is based on the bank's RPC on the last day of the immediately preceding month and on the customer's net worth.

i) Limits to financial assistance that refer to the borrowers' capital: as a general rule, financial assistance to a customer cannot exceed 100% of such customer's capital. This limit may be raised up to 300% with the approval of the financial institution's board of directors and if additional credit does not exceed 2.5% of the bank's RPC. For forward transactions, different percentages are considered, depending on the transaction's characteristics.

ii) Limits that refer to the financial institution's RPC: the limits to the financial assistance a bank can provide are (as a percentage of a bank's RPC):

	Without Collateral	With Collateral
Non-related Customers (*)	15%	25%
Domestic Financial Institutions (**)	25%	25%
Foreign Financial Institutions (Investment Grade)	25%	25%
Foreign Financial Institutions (Other)	5%	5%
Reciprocal Guarantee Entities Authorized by the Argentine Central Bank (***)		25%
Public Sector (****):		
i) National	50%	50%
ii) City of Buenos Aires and Provinces (Each)	10%	10%
iii) Municipalities (Each)	3%	3%

(*) *For the purpose of these limits, business groups shall be considered as a one client.*

(**) *For second floor financial institutions, the limit is 100%.*

(***) *Law 24,467: associations of companies authorized by the Argentine Central Bank to guarantee loans. In case one of the companies fails to pay, the other*

*takes
responsibility.*

*(****) Excess over the
new limits set in
March 2003 will
not be computed
if arising from
loans granted
before
March 2003, if
determined or
increased by the
receipt of bonds
or promissory
notes as
compensation
for the
asymmetric
pesification, or
if arising from
the rolling over
of preexisting
loans.*

Communiqué A 3911 issued on March 28, 2003, established the applicable limits shown in the table above for a financial institution's new exposure (granted after April 1, 2003) to the Argentine non-financial public sector. These limits exclude the exposure outstanding as of March 31, 2003, government securities received as compensation in accordance with Decree No. 905/02 or those to be received pursuant to other regulations, and the roll over of principal payments. Total exposure to the public sector, described in items (i), (ii) and (iii) in the table above, with the exclusions mentioned, must not exceed 75%.

Table of Contents

In addition, according to item 12 of this Communiqué, beginning on January 1, 2006, a bank's total financial assistance, without any exemption, to all of the non-financial public sector, could not exceed 40% of a bank's total assets as of the end of the previous month, with such percentage having been reduced to 35% of total assets, as of July 1, 2007. Any excess over this limit will add an equal amount to the minimum capital requirement of the bank. The Bank submitted a plan in order to comply with item 12 of Communiqué A 3911, as amended, over time, which was approved by the Argentine Central Bank on February 28, 2006. On June 27, 2007, the Argentine Central Bank informed the Bank that its plan to comply with the regulation was considered accomplished, given that since December 2006, the Bank was in compliance with the established general limit.

iii) The limits on equity interests in other companies are the following:

	Limit based on a Bank's RPC	Limit based on Customers' Net Worth
Companies with Non-complementary Activities		12.5% (**)
Companies with Complementary Activities		100%
Total Shares	50%	
Shares Without Quotation (*)	15%	

(*) *Includes shares that do not quote frequently and therefore are not subject capital requirements to cover market risk.*

(**) *Shares or equity interests can be accepted for the payment of credits, up to 20% of the firm's capital, without exceeding 20% of the votes. They must be sold within one year so as to reach the regulatory limit.*

Financial assistance is also limited in order to prevent risk concentration. To that end, the aggregate of all financial assistance that, taken alone, exceeds 10% of a bank's RPC, must not exceed three times and five times a bank's RPC, excluding and including, respectively, the financial assistance to local banks. For a second floor financial institution (i.e. a financial institution which only provides financial products to other banks and not to the public) the latter limit is 10 times.

Financial assistance exceeding 2.5% of a bank's RPC, except interbank loans, must be approved by a bank's board of directors.

The Argentine Central Bank also regulates the level of total financial exposure (defined as financial assistance or credit plus equity participations) of bank to a related party (defined as a bank's affiliates and related individuals). For purposes of these limits, affiliate means any entity over which a bank, directly or indirectly, has control, is controlled by, or is under common control with, or any entity over which a bank has, directly or indirectly, significant influence with respect to such entity's corporate decisions. Related individuals mean a bank's directors, senior management, syndics and such persons' direct relatives.

The Argentine Central Bank limits the level of total financial exposure that a bank can have outstanding to related parties, depending on the rating granted to each bank by the Superintendency. Banks rated 4 or 5 are forbidden to extend financial assistance to related parties, except for related persons who are individuals, in which case a bank's total financial assistance cannot exceed Ps. 50,000, and must have been granted exclusively for personal or family purposes. For banks ranked between 1 and 3, the financial assistance to related parties cannot exceed, together with any equity participation held by the bank in its affiliates, 5.0% of such bank's RPC. However, a bank may increase its total financial exposure to such related parties up to an amount equal to 10.0% of such bank's RPC: (i) if the affiliate provides complementary services, (ii) in the case of a temporary acquisition of shares in companies to facilitate their development in order to sell such shares afterwards, (iii) if the affiliate is a local financial institution rated other than 1 or 2 by the Argentine Central Bank, or (iv) if the additional financial assistance is secured with certain liquid assets, including public or private debt securities.

Table of Contents

If the affiliate is a financial institution rated 1, the amount of total financial exposure can reach 100% of a bank's RPC. If the receiving affiliate financial institution is rated 2, the amount of total financial exposure can reach 10% and an additional 90% can be included if the term for the loans and other credit facilities do not exceed 180 days.

In addition, the aggregate amount of a bank's total financial exposure to its related parties may not exceed 20% of such bank's RPC.

Failure to observe these requirements may result in an increase of the minimum capital requirements for credit risk in an amount equal to 100% of the daily excess amounts over the limits established, beginning in the month when the excess amounts are first recorded and continuing for as long as the excess amounts remain.

Notwithstanding the limitations described above, a bank's aggregate amount of non-exempt total financial exposure (including equity participations) independently of whether customers qualify as such bank's related parties or not, in the case in which such exposure exceeds 10% of such bank's RPC, may not exceed three times the bank's RPC excluding total financial exposure to domestic financial institutions, or five times the bank's RPC, including such exposure.

The Bank has historically complied with such rules.

Loan Classification System and Loan Loss Provisions

Financial Assistance from the Argentine Central Bank

Financial Assistance for Liquidity Support Granted After March 10, 2003

Communiqué A 3901, issued on March 19, 2003, established an automatic mechanism to regulate the provision by the Argentine Central Bank of assistance for liquidity support to financial institutions. This mechanism does not apply to the financial assistance granted for such reasons during the 2001-2002 crisis.

Table of Contents*Financial Assistance for Liquidity Support Granted Before April 1, 2003*

Through Decree No. 739/03, dated April 1, 2003, the Government established a voluntary procedure for the restructuring of the financial assistance granted by the Argentine Central Bank to financial institutions during the 2001-2002 crisis. On March 2, 2007, the Bank repaid the total outstanding balance of the financial assistance it received from the Argentine Central Bank as a consequence of the 2001-2002 crisis. For more information, see Item 5.A. Operating Results-Funding .

Foreign Currency Position

Through Communiqué A 4350, dated May 12, 2005, the Argentine Central Bank suspended, effective May 1, 2005, the limit on the positive Global Foreign Currency Net Position (defined as assets and liabilities from financial brokerage and securities denominated in foreign currencies) established at the lowest of 30% of a bank's RPC or a bank's liquid shareholder equity as of the end of the previous month. Although, at that moment the Argentine Central Bank kept the limit on the negative foreign currency net position at 30% of a bank's RPC, through Communiqué A 4577, issued on September 28, 2006, and effective January 1, 2007, it established that this position should not exceed 15% of the RPC of the preceding month. Subsequently, through Communiqué A 4598, dated November 17, 2006, the Argentine Central Bank allowed, in certain cases, the limit to increase by 15%. Communiqué A 4577 also clarified that participation certificates or debt securities issued by financial trusts and credit rights on ordinary trusts, in the corresponding proportion, should be calculated when the trust's underlying assets are denominated in foreign currency.

Deposit Insurance System

In 1995, Law No. 24,485 and Decree No. 540/95, as amended, created a deposit insurance system for bank deposits and delegated to the Argentine Central Bank the organization and start-up of the deposit insurance system. The deposit insurance system was implemented through the creation of a fund named *Fondo de Garantía de los Depósitos* (FGD), which is administered by Seguros de Depósitos S.A. (Sedesa). The shareholders of Sedesa are the Government, through the Argentine Central Bank, which holds at least one share, and a trust constituted by the financial institutions which participate in the fund. The Argentine Central Bank establishes the extent of participation by each institution in proportion to the resources contributed by each such institution to the FGD. Banks must contribute to the FGD on a monthly basis in an amount that is currently equal to 0.015% of the monthly average of daily balances of a financial institution's deposits (both Pesos and foreign currency denominated).

The deposit insurance system covers all Peso and foreign currency deposits held in demand deposit accounts, savings accounts and time deposits for an amount up to Ps. 30,000. Deposits made after July 1, 1995, with an interest rate 200 basis points above the interest rate quoted by Banco Nación for deposits with equivalent maturities are not covered by this system. The guarantee provided by the deposit insurance system must be made effective within 30 days from the revocation of the license of a financial institution, subject to the outcome of the exercise by depositors of their priority rights described under -Priority Rights of Depositors below. The Argentine Central Bank may modify, at any time, and with general scope, the amount of the mandatory deposit guarantee insurance.

Table of Contents

Decree No. 1292/96, enhanced Sedesa's functions to allow it to provide equity capital or make loans to Argentine financial institutions experiencing difficulties and to institutions that buy such financial institutions or their deposits. As a result of such decree, Sedesa has the flexibility to intervene in the restructuring of a financial institution experiencing difficulties prior to bankruptcy.

Priority Rights of Depositors

According to section 49 e) of the Financial Institutions Law, in the event of a judicial liquidation or the bankruptcy of a financial entity, the holders of deposits in Pesos and foreign currency benefit from a general priority right to obtain repayment of their deposits up to the amount set forth below, with priority over all other creditors, with the exception of the following: (i) credits secured by a mortgage or pledge, (ii) rediscounts and overdrafts granted to financial entities by the Argentine Central Bank, according to section 17 subsections b), c) and f) of the Argentine Central Bank Charter, (iii) credits granted by the Banking Liquidity Fund created by Decree No. 32 of December 26, 2001, secured by a mortgage and pledge and (iv) certain labor credits, including accrued interest until their total cancellation. The holders of the following deposits are entitled to the general preferential right established by the Financial Institutions Law (following this order of preference),

deposits of individuals or entities up to Ps. 50,000 or the equivalent thereof in foreign currency, with only one person per deposit being able to use this preference. For the determination of this preference, all deposits of the same person registered by the entity shall be computed;

deposits in excess of Ps. 50,000 or the equivalent thereof in foreign currency, referred to above;

liabilities originated on commercial credit lines granted to the financial entity, which are directly related with international trade.

According to the Financial Institutions Law, the preferences set forth in previous paragraphs (i) and (ii) above, are not applicable to deposits held by persons who are affiliates of the financial entity, either directly or indirectly as determined by the Argentine Central Bank.

In addition, under section 53 of the Financial Institutions Law, the Argentine Central Bank has an absolute priority over all other creditors of the entity except as provided by the Financial Institutions Law.

Financial Institutions with Economic Difficulties

The Financial Institutions Law establishes that financial institutions, including commercial banks such as the Bank, which evidence a deficiency in their cash reserves, have not complied with certain required technical standards, including minimum capital requirements, or whose solvency or liquidity is deemed to be impaired by the Argentine Central Bank must submit a restructuring plan to the Argentine Central Bank. Such restructuring plan must be presented to the Argentine Central Bank on the date specified by the Argentine Central Bank, which should not be later than 30 calendar days from the date on which the request is made by the Argentine Central Bank. In order to facilitate the implementation of a restructuring plan, the Argentine Central Bank is authorized to provide a temporary exemption from compliance with technical regulations and/or the payment of charges and fines that arise from such non-compliance.

Table of Contents

The Argentine Central Bank may also, in relation to a restructuring plan presented by a financial institution, require such financial institution to provide guarantees or limit the distribution of profits, and appoint a supervisor, to oversee such financial institutions' management, with the power to veto decisions taken by the financial institution's corporate authorities.

In addition, the Argentine Central Bank's charter authorizes the Superintendency, subject only to the prior approval of the president of the Argentine Central Bank, to suspend for up to 30 days, in whole or in part, the operations of a financial institution if its liquidity or solvency have been adversely affected. Notice of this decision must be given to the board of directors of the Argentine Central Bank. If at the end of such suspension period the Superintendency considers it is necessary to renew it, it can only be authorized by the board of directors of the Argentine Central Bank, for an additional period not to exceed 90 days. During the suspension period: (i) there is an automatic stay of claims, enforcement actions and precautionary measures; (ii) any commitment increasing the financial institution's liabilities is void, and (iii) acceleration of indebtedness and interest accrual is suspended.

If, in the judgment of the Argentine Central Bank, a financial institution is in a situation which, under the Financial Institutions Law, would authorize the Argentine Central Bank to revoke the financial institution's license to operate as such, the Argentine Central Bank may, prior to considering such revocation, order a variety of measures, including (1) taking steps to reduce, increase or sell the financial institution's capital; (2) revoking the approval granted to the shareholders of the financial institution to own an interest therein, giving a term for the transfer of such shares; (3) excluding and transferring assets and liabilities; (4) constituting trusts with part or all the financial institution's assets; (5) granting of temporary exemptions to comply with technical regulations and/or pay charges and fines arising from such defective compliance; or (6) appointing a bankruptcy trustee and removing statutory authorities.

Furthermore, any actions authorized, commissioned or decided by the Argentine Central Bank under section 35 bis of the Financial Institutions Law, involving the transfer of assets and liabilities, or complementing it, or necessary to execute the restructuring of a financial institution, as well as those related to the reduction, increase and sale of equity, are not subject to any court authorization and cannot be deemed inefficient in respect of the creditors of the financial institution which was the owner of the excluded assets, even though its insolvency preceded any of such actions.

Dissolution and Liquidation of Financial Institutions

The Argentine Central Bank must be notified of any decision to dissolve a financial institution pursuant to the Financial Institutions Law. The Argentine Central Bank, in turn, must then notify a court of competent jurisdiction which will determine who will liquidate the entity (the corporate authorities or an appointed, independent liquidator). This determination is based on whether or not sufficient assurances exist regarding the ability of such corporate authorities to carry out the liquidation properly.

Table of Contents

Pursuant to the Financial Institutions Law, the Argentine Central Bank no longer acts as liquidator of financial institutions. However, when a restructuring plan has failed or is not considered viable, local and regulatory violations exist, or substantial changes have occurred in the financial institution's condition since the original authorization was granted, the Argentine Central Bank may decide to revoke the license of the financial institution to operate as such. In this case, the law allows judicial or extrajudicial liquidation as in the case of voluntary liquidation described in the preceding paragraph.

The bankruptcy of a financial institution cannot be adjudicated until the license is revoked by the Argentine Central Bank. No creditor, with the exception of the Argentine Central Bank, may request the bankruptcy of the former financial institution before 60 days have elapsed since the revocation of its license.

Credit Cards Regulation

The Credit Cards Law establishes the general framework for credit card activities. Among other, this law:

places the supervision of credit and debit card companies in the hands of the Argentine Central Bank for financial matters and of the National Undersecretary of Industry and Trade for business and commercial matters;

sets a 3% cap on the rate a credit card company can charge merchants with which it has entered into card acceptance agreements for processing customer card holders' transactions with such merchants, calculated as a percentage of the customers' purchases;

establishes that credit card companies must provide the Argentine Central Bank with the information on their loan portfolio that such entity requires, and

sets a cap on the interest rate a credit card company can charge a card holder, which cannot exceed by more than 25% the average interest rate charged by the issuer on personal loans and, for non-bank issuers, it cannot exceed by more than 25% the financial system's average interest rate on personal loans published by the Argentine Central Bank.

Both the Argentine Central Bank and the National Undersecretary of Industry and Trade have issued regulations to, among other things, enforce public disclosure of companies' pricing (fees and interest rates) to assure consumer awareness of such pricing.

Concealment and Laundering of Assets of a Criminal Origin

Law No. 25,246 (as amended by Laws No. 26,087, No. 26,119 and No. 26,268) incorporates money laundering as a crime under the Argentine Criminal Code. Additionally, with the goal of preventing and stopping money laundering, the *Unidad de Información Financiera* (UIF, Financial Information Unit) was created under the jurisdiction of the Argentine Ministry of Justice, Security and Human Rights.

Table of Contents

Regulations in force establish, among other things, that:

- i) Any person who converts, transfers, administers, sells, encumbers or uses money or any other asset derived from any crime in which he was not involved, with the possible result of giving those original or secondary assets the appearance of having a legal origin and as long as their value is greater than Ps. 50,000, whether through a single act or through a series of related events, will be imprisoned for two to ten years and will be fined an amount that will be between two and ten times the amount of the transaction.
- ii) Any person that was not involved in a crime committed by another person but that (a) helps a person to elude or escape from an investigation by the relevant authority; (b) hides, alters or destroys any trail, evidence or object related to the crime or helps the perpetrator of the crime or any participant to hide them, alter them or make them disappear; (c) acquires, receives or hides money or objects arising from a crime; (d) does not report a crime or does not identify a perpetrator of or participant in a crime that is known to him when obligated to do so in order to promote the criminal prosecution of a crime of such nature; (e) secures or helps the perpetrator of or participant in a crime to secure the product or profit of a crime, will be imprisoned for six months to three years.

The minimum and maximum of the criminal scale will be doubled when (a) the foregoing acts were crimes that are particularly serious, meaning those crimes with a punishment that is greater than three years of imprisonment; (b) the perpetrator committed the crime for profit; and (c) the perpetrator regularly performs concealment activities. The criminal scale will only be increased once, even when more than one of the above mentioned acts occurs. In such a case the court may take into consideration the multiple acts when individualizing the punishment.

In addition, regulations establish that: (a) within the framework of a review of reported suspicious activity, the persons that are obligated to provide information may not withhold information required by the UIF because such information is a banking, stock market or professional secret nor because it is legally or contractually confidential; (b) if after having completed its analysis of the reported activity, the UIF has found sufficient elements to suspect that the activity is a money laundering operation pursuant to the law, then the UIF shall notify the Public Ministry in order to determine if a criminal prosecution should begin; (c) those persons who have acted for their spouse, any relative that is related by blood up to the fourth degree or by marriage up to the second degree or a close friend or a person to whom they owe special gratitude, shall be exempted from criminal responsibility.

Notwithstanding the foregoing, pursuant to the Argentine Criminal Code, the exemption shall not be effective in the following cases: (i) with respect to a person who secures or helps the perpetrator of or a participant in a crime to secure the product or profit of the crime; (ii) with respect to a perpetrator that committed the crime for profit; (iii) with respect to a perpetrator that regularly performs concealment activities; or (iv) with respect to a person that converts, transfers, administers, sells, encumbers or uses money or any other asset derived from any crime in which he was not involved, with the possible result of giving those original or secondary assets the appearance of having a legal origin and as long as their value is greater than Ps. 50,000, whether through a single act or through a series of related events.

Table of Contents

The law lists the parties that are obligated to report to the UIF; these parties include, among others: financial institutions, agents and stock companies, insurance companies, notary publics and those registered professionals whose activities are governed by the *Consejo de Profesionales de Ciencias Económica* (Economic Sciences Professional Council). Such reporting obligation generally consists of performing due diligence in order to get to know the client and in order to understand the corresponding transaction and, if applicable, in order to report any irregular or suspicious activity to the UIF, pursuant to the terms and conditions established by the regulation applicable to such obligated party.

Likewise, Law No. 26,119 modified the composition and the structure of the UIF, which is now comprised of a President and a Vice-president that are appointed by the executive branch based on a proposal made by the Ministry of Justice and an advisory council comprised of representatives of the Argentine Central Bank, the Argentine Revenue Service (AFIP), the CNV, the SEDRONAR (the Government's secretary for the prevention of drug use and dealing), the Ministry of Justice, Security and Human Rights, the Ministry of Economy and the Ministry of Interior.

On June 13, 2007 Law No. 26,268 was enacted. Such law establishes the punishments and sanctions applicable to those individuals that are part of an unlawful association the purpose of which is, through the execution of crimes, the terrorizing of a population and the forcing of a government or an international organization to commit an act or refrain from committing an act, as long as the following characteristics are fulfilled: (a) there is a plan to spread hate regarding specific ethnic, religious or political groups; (b) the association has an international operational network; and (c) the association has at its disposal war weapons, explosives, chemical or bacterial agents or any other instruments that can put the life or safety of an uncertain number of people in danger.

In light of the above described framework, in 2000, the Bank formed a Board Committee, the Committee for the Control and Prevention of Money Laundering, the name of which was changed in 2005 to the Committee for the Control and Prevention of Money Laundering and Funding of Terrorist Activities, which is in charge of establishing the general guidelines for the Bank's strategy to control and prevent money laundering and the financing of terrorism. For more information, see Item 6. Directors, Senior Management and Employees-Functions of the Board of Directors of Banco Galicia. In addition, a unit specializing in this area was created, the Anti-Money Laundering Unit, which is responsible for the execution of the policies passed by the committee and for the monitoring of control systems and procedures in order to ensure that they are adequate.

The guide for unusual or suspicious transactions within the scope of the financial and foreign exchange system (passed by Resolution No. 2/02 of the UIF) establishes the obligation to report the following investment related transactions: (a) investments related to purchases of government or corporate securities given in custody to the financial institution if such securities' value appears to be inappropriate due to the type of business of the client; (b) deposits or back to back loan transactions with branches, subsidiaries or affiliates of the bank in places known to be tax havens or countries or territories considered by the Financial Action Task Force as non-cooperative, (c) client requests for investment management services (whether in foreign currency, shares or trusts) where the source of the funds is not clear or is not consistent with its business; (d) significant and unusual movements in custodial accounts; (e) frequent use by infrequent clients of special investment accounts whose owner is the financial entity; (f) regular securities transactions, through purchases and sales on the same day and for identical volumes and nominal values, taking advantage of quotation differences, when such transactions are not consistent with the client's profile and regular activity.

Item 5. Operating and Financial Review and Prospects

Item 5.A. Operating Results

The following discussion and analysis is intended to help you understand and assess the significant changes and trends in our historical results of operations and the factors affecting our resources. You should read this section in conjunction with our audited consolidated financial statements and their related notes included elsewhere in this annual report.

Overview

In the last three years, in order to increase our recurrent earnings generation capacity, we have undertaken to:

Expand the volume of our business with the private sector;

Progressively strengthen our balance sheet by consistently reducing the Bank's high exposure to the public sector, as well as those liabilities incurred by the Bank as a consequence of the 2001-2002 crisis, and

Capitalize the Bank.

This strategy responds to the consequences of the 2001-2002 crisis on us, which left the Bank with a very low exposure to the private sector and an unusually high and low yielding exposure to the public sector with expensive liabilities supporting such assets, mainly CER adjusted debt with the Argentine Central Bank and our restructured foreign debt. Therefore, we have undertaken to significantly increase the relative size of our business with the private sector in terms of our total balance sheet, reducing public-sector asset concentration and thus freeing resources tied to low yielding public-sector exposures, both of which have so far strengthened our balance sheet which in turn allows our business with the private sector to continue to grow and to contribute more meaningfully to our bottom line. In addition we have undertaken to increase the Bank's capital in order for it to be able to support the growth of its business.

Our strategy for reducing the Bank's liabilities has been to use the Bank's public-sector exposure to repay them, both through the proceeds of sales of these assets or swaps, while always taking advantage of market conditions to dispose of public-sector assets in order to minimize the impact of such strategy on our shareholders' equity.

Mainly in 2006 and in the first months of 2007, we made significant payments in advance on the financial assistance from the Argentine Central Bank received as a consequence of the crisis, to a large extent using the proceeds of the sale of public-sector assets granted as collateral for such financial assistance. This debt, which originally matured in 2011, was settled in advance on March 2, 2007. As of December 31, 2005, this debt amounted to Ps. 5,314.9 million and as of December 31, 2006, it amounted to Ps. 2,688.7 million.

Table of Contents

We received the Boden 2012 Bonds corresponding to the Compensatory Bond in late 2005 and, on December 1, 2006, we acquired 90.8% of the Hedge Bond (Boden 2012 Bonds for US\$ 1,155.0 million of face value) with the proceeds of the execution of the same proportion of the advance from the Argentine Central Bank for the acquisition of such bond. This liability was simultaneously settled with public-sector assets granted as collateral for such liability and cash. Moreover, after the close of the first quarter of 2007, we acquired the Boden 2012 Bonds corresponding to the remaining 9.2% of the Hedge Bond (US\$ 116.8 million of face value) through a swap for Secured Loans (Ps. 115.9 million of face value).

Substantially as a result of all the above, but also as a result of sales of Bogar Bonds, Secured Loans and Boden 2012 Bonds, we reduced our exposure to the public sector from Ps. 16,414.5 million to Ps. 6,054.3 million between December 31, 2005 and December 31, 2008, representing a reduction of Ps. 10,360.2 million or 63.1% of the former amount.

Although the acquisition of the Hedge Bond implied significant losses due to the valuation of public-sector assets (recorded at the end of fiscal year 2006 and in the first quarter of 2007) it also meant (i) completion of the process of compensating us for the effects of the asymmetric pesification measures of 2002, (ii) the finalization of repayment of the Ps. 8,611.9 million expensive liabilities with the Argentine Central Bank, and (iii) the increase of our ability to generate new business, as we were able to gradually apply to our business the resources previously tied up in public-sector assets, which were released from their status as collateral for debt with the Argentine Central Bank, in addition to the full availability of the Boden 2012 Bonds corresponding to the Hedge Bond. In addition, repayment of the expensive liabilities with the Argentine Central Bank and of part of our restructured foreign debt contributed to the increase in our financial margin.

We have expanded our operations significantly since mid 2002, increasing our customer base and our fee based and financial intermediation activities with the private sector, strengthening our position as a leading domestic private-sector financial institution. In addition, also contributing to our operating profitability, our asset quality recorded a significant improvement with both our total deposits (which began to increase in the second half of 2002) and loan origination (which began to increase gradually in 2003) increasing, both at the level of the Bank and at the level of the regional credit card companies.

The increase in our overall level of activity, which led to the above mentioned increase in the volume of our fee based business and financial intermediation with the private sector, has had a positive impact on our net financial income and on our net income from services. However, despite this growth and although our net financial income began to recover from the very low levels, both in absolute values and relative to total assets, it is still low relative to our net income from services. This condition calls for the continuation of our efforts to reduce the non-interest yielding assets and the Dollar-denominated intermediation between high cost restructured foreign debt and Libor-yielding Boden 2012 Bonds, while pursuing our strategy of increasing the size of our financial intermediation business with the private sector.

Table of Contents

At the beginning of the recovery of the Argentine economy, the decreasing risk profile of the loan portfolio reduced the need to establish loan loss reserves and the improvement in the quality of the loan portfolio allowed for the reversal of provisions and strong loan recoveries, which reduced the impact of net credit losses on our bottom line. Nevertheless this effect decreased progressively, and loan loss provisions increased due to the seasoning of individuals loan portfolios.

During this period, following the expansion of our business volume we decided to expand our distribution network, with a related increase in personnel and a greater use of resources in general, as well as considerable expenses for advertising and publicity. In addition, the administrative expenses reflect an inflationary environment and the adjustment of salaries that has taken place.

During 2008, and in particular during the second half of the year, there was a marked worsening of the international financial crisis and the spread of its effects to the Argentine economy. In addition, certain preexisting domestic problems and the Government's decision to nationalize the private pension funds system dampened domestic confidence and raised uncertainty regarding future economic policies. On the monetary front, the combination of high international and domestic uncertainty triggered a strong dollarization of portfolios. The direct consequence of the strong demand for US Dollars was the shift away from private sector Peso deposits, and, in turn, a deceleration in growth rates of the loans to the private sector. In spite of the adverse international and local financial condition, during fiscal year 2008 the Bank managed to expand its business with the private sector and to improve its income generation, while strengthening its financial condition, the coverage of its credit risks in a scenario of deterioration of asset quality, and the provisioning for other contingencies.

In summary, in the last years, our results of operations were strongly influenced by the negative effect on our net financial income of certain consequences of the 2001-2002 crisis, including the valuation of our exposure to the public sector in accordance with Argentine Central Bank regulations, among others. However, our operating profitability was positively impacted by the strengthening of our balance sheet, including the progressive reduction of public-sector assets and liabilities and the growth of our business with the private sector, both the financial intermediation and fee based businesses, in a still low credit risk environment.

Excluding non-recurring gains, our miscellaneous net income increased, primarily due to the reversal of loan loss provisions and loan recoveries, partially offset by an increase in the amortization of amparo claims.

The Argentine Economy, Financial System and Insurance Industry in the Three Years Ended December 31, 2008

From the second half of 2002 until the end of 2007, the Argentine economy grew. During this period, the Argentine economy registered an impressive performance, expanding at high rates without interruption, with its GDP growing more than 50.0% between 2002 and 2007, inclusively, based on increasing domestic and external aggregate demand. During this period, the economy demonstrated improving and sound fundamentals, with high fiscal and current account surpluses, increasing international reserves, growing exports, low interest rates and low inflation, being some of the principal. This performance was achieved in a favorable international context, which included strong commodity prices, low international interest rates and decreasing risk aversion of international capital markets with regard to emerging markets, during most of the period. On the domestic front, an undervalued currency, low levels of capacity utilization and high unemployment after the 2001-2002 crisis, and low domestic interest rates led to the combination of high GDP growth rates and low inflation for several years.

Table of Contents

In 2008, the crisis in the international financial markets intensified, as did its impact on the value of assets and the level of economic activity in the major economies of the world. Furthermore, capital outflows from emerging markets to developed economies and the significant decrease in the price of commodities had a negative impact on the perspectives regarding the evolution of emerging economies in general, and Argentina in particular.

This adverse international environment, together with pre-existing domestic problems, was reflected in the significant slowdown shown by the economy during 2008. Even though GDP grew 7% during the year, a strong deterioration in the level of activity was shown in the last quarter. During the first half of 2008, the economy continued growing at an increased pace, an annual 8.2%, despite the negative effect of the conflict between the Government and the agriculture and livestock sector that also had a negative effect on the economy during the second quarter, which grew 7.8% inter-annually. However, during the second semester of 2008, when the slowdown worsened, annual growth rates were 6.9% for the third quarter and 4.9% for the fourth quarter of 2008. The last quarter of 2008 showed a 0.3% decrease compared to the previous quarter without seasonal variations. This was the first quarterly drop experienced since the first quarter of 2002. Moreover, the annual expansion rate experienced by the economy during the fourth quarter was the lowest one seen for the last six years.

Domestic demand showed a significant slowdown toward the end of the year. Private consumption, which during the first semester had grown at an annual 8%, during the fourth quarter grew only 4.3%. As such, domestic demand grew 6.7% in 2008, lower than the figure recorded in 2007 (an increase of 9% inter-annually). Similarly, fixed gross investments, which increased 16.8% during the first semester of 2008, moderated their growth pace during the third quarter, with an 8.5% rate, and dropped to 2.8% during the last three months of 2008. As a whole, investments grew 9% when compared to 2007, which represented a slowdown of its expansion rate compared to 2007, when it grew 13.6%. Both components of domestic demand showed the strong impact that the intensification of the international crisis that took place during the last months of the year had on expectations and, therefore, on the level of activity. Exports of goods and services showed a significant deterioration as they grew only 1.1% in 2008, as compared to the 9% growth shown the previous year. This result was the combination of several factors that occurred during 2008. The conflict between the Government and the agricultural and livestock sector due to export taxes led to a 1.6% annual decrease during the second quarter. In addition, the worsening of the financial crisis, which had a negative impact on the price of commodities, together with the drought that affected most of the agricultural and livestock areas, among other factors, led to the sharp 11.3% decrease in exports during the last quarter of 2008. On the other hand, imports grew 13.3% in 2008, almost half of the previous year's growth rate. Similarly to the rest of the components that constitute GDP, imports showed a strong deterioration toward the last quarter of the year, when they dropped 3.9%, in comparison with the 20% growth experienced during the first three quarters of the year.

With respect to aggregate supply, during 2008 the services sector was the most dynamic, growing 8.3% inter-annually. The financial sector stood out, which grew 17.4%, in line with the growth pace shown during the previous year. The goods sector grew 3.4% during the same period, which implied a strong slowdown when compared to the previous year (an increase of 7.9% inter-annually). This result was influenced by the poor performance of the agricultural sector in 2008, which showed a 1.6% decrease during the year (with 3.4% drops in the second and fourth quarters). In turn, the construction sector, which grew only 3.7% annually (one third of the expansion shown in 2007), significantly decreased its growth pace toward the end of the year, falling 1.9% in the fourth quarter, when compared to the fourth quarter of 2007. The industrial sector showed an average 5% increase during 2008.

Table of Contents

The unemployment rate decreased from 7.5% of the economically active population for the fourth quarter of 2007 to 7.3% for the fourth quarter of 2008, reflecting a slight improvement in the labor market performance.

The main monetary indicators evolved in line with the international financial crisis and the uncertainty generated by the conflict between the Government and agricultural and livestock producers. Due to the lower demand for money, the monetary base that expanded at an average 23% rate during the first half of the year, as of December 2008 dropped to an average 10.5% rate, equivalent to an average of Ps. 106,439 million. Unlike previous years, when the Argentine Central Bank could sustain a policy of preventative accumulation of international reserves, during the most unstable months of 2008 it was forced to sell foreign currency to the market in order to reduce exchange volatility. Therefore, the US\$ 2,596 million purchased by the Argentine Central Bank during the first quarter were more than offset by the US\$ 2,735 million sold to the market during the following quarter. A similar trend occurred during the second half of the year, with purchases for US\$ 1,324 million during the third quarter and sales for US\$ 2,203 million during the last quarter of 2008. However, during 2008 the Argentine Central Bank injected liquidity to the market, mainly through the net payment of Lebac and Nobac in the amount of Ps. 19,193 million, as well as through the acquisition of government securities and other transactions for a total value of Ps. 8,721 million. Using these monetary expansion mechanisms, the monetary base contraction which was derived from a Ps. 5,602 million increase in repurchase agreements, governmental transactions amounting to Ps. 7,638 million, Ps. 3,538 million in foreign currency sales, and the settlement of rediscounts in the financial system amounting to Ps. 667 million- was overcome.

Moreover, other steps were taken to strengthen the financial system's liquidity, among which the following stand out: the creation of a new liquidity source through repurchase transactions with certain government securities held by banks (Bogar Bonds and Secured Loans), increasing the options with respect to the terms of repurchase transactions; the adoption of an additional liquidity provision system, allowing banks that held Lebac and Nobac (with maturity terms not higher than six months) to obtain funds immediately; the coefficients for cash reserves required for deposits in Dollars were reduced, aimed at increasing the availability of funds for financing foreign trade transactions; the line of repurchase transactions at a fixed rate was increased from Ps. 3,000 million to Ps. 10,000 million, and a guaranteed pre-rating system was established with respect to the financial assistance system.

During the year, interest rates also evolved in line with the domestic monetary and exchange uncertainty, with an upward trend. In particular, the interest rate applicable to 30-day time deposits in Pesos over Ps. 1 million (private banks Badlar interest rate) increased from an average 13.52% in December 2007 to 19.08% in December 2008.

However, this trend was not linear due to the fact that, in June and November, the rate averaged 17.45% and 21.50%, respectively, reaching a 26.13% ceiling in mid-November.

The reference exchange rate set by the Argentine Central Bank increased from Ps. 3.151 to Ps. 3.454 per US Dollar between December 31, 2007 and December 31, 2008, while the average exchange rate increased from Ps. 3.116 per US Dollar in 2007 to Ps. 3.161 per US Dollar in 2008.

The high level of use of installed capacity within a framework in which demand was still growing continued to exert pressure on prices. According to the Consumers Price Index (CPI) of the INDEC, the inflation rate was 7.2% in 2008, lower than the 8.5% rate of the previous fiscal year. In turn, the Wholesale Domestic Price Index (WPI) recorded an 8.9% increase.

In the fiscal area, although tax revenues increased 34.8% in 2008 when compared to 2007, the combination of a lower level of activity and a strong reduction in the international price of commodities during the second half of the year resulted in a growth deceleration by year-end, reaching an inter-annual 25% growth rate in the fourth quarter. In turn, primary expenditure expanded during 2008 by 31.3%, well above the 30.7% increase in total revenues. Therefore, the Argentine public sector obtained a primary surplus of Ps. 32,529 million, equivalent to 3.1% of GDP. The financial surplus, after interest payments for Ps. 17,874 million, amounted to Ps. 14,655 million, equivalent to 1.4% of GDP.

The current account of the balance of payments once more recorded a surplus as a result of a still high trade balance surplus. Despite this, in terms of GDP there was a reduction to approximately 2.4% in 2008, from 2.7% in 2007. The balance of trade experienced a US\$ 13,174 million surplus in 2008, well over the US\$ 11,153 million of the previous year.

Table of Contents

Exports showed 27% growth, well over the expansion pace shown during 2007 (an increase of 20%). However, this result is due to the strong increase in prices, which offset the non-existent variation of volumes exported (which actually decreased during the last quarter of 2008). As regards prices, the deterioration of the market price of the Bank's most important goods for export shown during the fourth quarter was more than offset by the exceptional performance thereof during the first half of the year. While exports of agriculture and livestock goods continue to be the exports with the highest share in the total exports of Argentina (increasing 35%), they performed poorly with respect to volume, with a 9% decrease for the year, the same was true for the volume of commodities exported (decreasing 5%). In turn, imports grew at a 28% rate in comparison to 2007, due to the joint effect of the increase in prices and volumes. Products purchased as intermediate goods represented 35% of total imports, followed by the purchases of capital goods (representing 22%).

Within a framework of considerable uncertainty, both internationally and locally, the private sector's capital account experienced a net foreign currency outflow of US\$ 6,677 million during the first nine months of 2008. The moderate capital inflow shown during the first quarter of the year was more than offset by the capital outflow that took place during the second and third quarters. Even though we have no official information for the fourth quarter of the year, capital outflows would have continued during such period. As of December 31, 2008, the Argentine Central Bank's international reserves amounted to US\$ 46,386 million, almost at the same levels shown at the end of 2007.

The Argentine Financial System

The Argentine financial system was not immune to the strong volatility experienced in international financial markets and the deterioration of the global economy. Despite this, it grew moderately, in terms of intermediation with the private sector.

Total loans to the private sector increased by 21.2% as compared with December 2007, reaching Ps. 130,154 million. The loans that increased the most were consumer credit lines, made up of loans granted through credit cards and personal loans, which increased by 31.7% in 2008, reaching Ps. 43,673 million. Short-term commercial loans i.e., cash advances in current accounts and promissory notes grew 13.0%, reaching Ps. 41,102 million. Pledge loans increased 28.7%, with a final balance of Ps. 7,761 million, while mortgage loans increased 29.3% (to Ps. 18,887 million). On the other hand, loans to the public sector continued to decrease, in line with the current situation, reaching 12.5% of total assets, equivalent to a reduction of 3.8 percentage points (p.p.) during the year.

With respect to liabilities, total deposits in the financial system increased 15.1% during 2008, reaching Ps. 234,577 million. Considering the transfer of accounts from AFJPs to the ANSES, deposits from the non-financial private sector increased 9.3%, reaching Ps. 164,242 million, while deposits from the public sector increased 33.3%, reaching Ps. 67,280 million. Regarding deposits from the private sector, transactional deposits amounted to Ps. 84,863 million by the end of the year, equivalent to a 10.5% growth, which is lower than the 31.0% growth of the previous year. Time deposits amounted to Ps. 71,244 million by year-end, equivalent to 8.9% growth, which is lower than the 20.9% of the previous year. The average interest rate paid by private banks in December was 18.5%, with an increase of 633 basis points (b.p.) inter-annually, while in the case of time deposits over Ps. 1 million, the average interest rate was 19.1% (an increase of 557 b.p.), a trend that started to reverse in December 2008.

Financial institutions increased their liquidity levels as a prudent policy, which in turn contributed to financial stability. The liquidity ratio increased from an average 19.4% in December 2007 to 21.7% in December 2008.

In order to moderate the impact of the domestic and international situation on the Argentine economy, the Argentine Central Bank injected liquidity into the market mainly by repurchasing debt securities (Lebac and Nobac), thus avoiding any further interest rate fluctuations. At the same time, the high level of international reserves and the managed floating of the exchange rate allowed for the reduction of volatility in a foreign exchange market that was more adverse than in previous years.

Table of Contents

In terms of solvency, the Argentine financial system's net worth increased by Ps. 4,553 million during 2008, i.e., a 12.4% improvement. The system's profitability in 2008 was equivalent to 1.5% of total assets (the same as in the previous year), while the return on equity was 13.3%, higher than the 11% in 2007. Income from interests and income from services increased, thus representing 3.1% and 3.6% of total assets, respectively, as compared to 2.2% and 3.1% in 2007. The negative effects of the capital markets' volatility on the results from holdings of government securities did not allow for a better performance. On the other hand, although administrative expenses increased (from 5.5% to 6.1% of total assets), operating income increased even more, thus resulting in an efficiency improvement. Provisions for loan losses increased from 0.7% to 0.9% of total assets representing low levels in historical terms but reflecting a deterioration of the quality of the portfolio.

The non-accrual portfolio of loans to the non-financial private sector decreased from 3.2% in December 2007 to 3.0% in December 2008, although delinquency grew 0.2 p.p. in the last quarter of the year. There was also a slight improvement in the level of provisioning by making allowances regarding non-accrual loans to the private sector, reaching 131.0% in December 2008, as compared to 129.6% in December 2007.

As of December 31, 2008, there were 84 financial institutions in Argentina, taking into account both banking and non-banking institutions. Of such total, 67 were banks, out of which 55 were private banks (holding 57.4% of total deposits in the system). In turn, 34 were domestic banks: one was a cooperative bank (which represented 28.6% of the deposits, showing no differences as compared with December 2007), and 21 were foreign-owned banks (which represented 28.8% of total deposits, showing no differences as compared to December 2007). There were 12 Government-owned banks (with 42.3% of total deposits) and 17 non-banking financial institutions (with only a 0.3% share in total deposits).

The concentration of the financial system measured by the market share of the ten leading banks in terms of deposits reached 75.6% as of December 31, 2008. This percentage was similar to that recorded at the end of December 2007. Based on September 2008 data (the last information available to date), the financial system employed a total of 100,405 people (58% related to the private sector), representing a 1.7% increase compared to January 2008.

The Argentine Insurance Industry

During 2008, the insurance industry continued growing for the sixth consecutive year. Insurance production amounted to nearly Ps. 27,000 million, an 8% increase at constant values, compared to the previous year. Out of the total insurance production, 71% related to property insurance, 20% related to life and personal insurance, and 9% to retirement insurance. Within property insurance, automotive insurance continues to be the most important segment, with a 45% share, followed by the labor risk segment, with a 25% share.

Inflation

The following table shows the rate of inflation, as measured by the variations in the WPI and the CPI, and the evolution of the CER index used to adjust the principal of certain of our assets and liabilities, for the periods indicated.

<i>(in percentages)</i>	For the 12-month period ended December		
	2008	31, 2007	2006
Price Indices ⁽¹⁾			
WPI	8.82	14.56	7.14
CPI	7.24	8.47	9.84
Adjustment Indices			
CER	7.97	8.50	10.08

(1) Source: INDEC.

In the first five months of 2009, the WPI increased 2.08% and the CPI increased 2.29%. Over the same period, the CER increased 2.29%.

Table of Contents**Currency Composition of Our Balance Sheet**

The following table sets forth our assets and liabilities denominated in foreign currency, in Pesos and adjustable by the CER, at the dates indicated.

	2008	As of December 31, 2007	2006
	<i>(In millions of Pesos)</i>		
Assets			
In Pesos, Unadjusted	15,165.1	14,177.0	12,510.4
In Pesos, Adjusted by the CER	2,439.2	2,350.7	4,271.5
In Foreign Currency ⁽¹⁾	7,131.5	6,301.0	6,833.5
Total Assets	24,735.8	22,828.7	23,615.4
Liabilities and Shareholders Equity			
In Pesos, Unadjusted, Including Shareholders Equity	17,262.1	15,597.3	13,096.4
In Pesos, Adjusted by the CER	50.3	277.3	3,826.2
In Foreign Currency ⁽¹⁾	7,423.4	6,954.1	6,692.8
Total Liabilities and Shareholders Equity	24,735.8	22,828.7	23,615.4

(1) If adjusted to reflect forward sales and purchases of foreign exchange made by the Bank and recorded off-balance sheet, assets amounted to Ps. 10,495.4 million and liabilities Ps. 10,228.3 million.

Funding of our long position in CER-adjusted assets through Peso-denominated liabilities bearing a market interest rate (and no principal adjustment linked to inflation) exposes us to differential fluctuations in the inflation rate and in market interest rates, with a significant increase in market interest rates vis-à-vis the inflation rate (which is reflected in the CER variation) having a negative impact on our net financial income.

Results of Operations for the Fiscal Years Ended December 31, 2008, December 31, 2007 and December 31, 2006

We discuss below our results of operations for the fiscal year ended December 31, 2008, as compared with our results of operations for the fiscal year ended December 31, 2007 and our results of operations for the fiscal year ended December 31, 2007 as compared with our results of operations for the fiscal year ended December 31, 2006.

(1) For the calculation of the return on average assets, profits or losses corresponding to minority interests are excluded from net income.

Table of Contents

During fiscal year 2008, we recorded net income of Ps. 176.8 million as compared to a net income of Ps. 46.0 million in the prior fiscal year and a Ps. 18.9 million net loss in fiscal year 2006.

Net income per share for fiscal year 2008 was Ps. 0.142, as compared to Ps. 0.037 in fiscal year 2007. The return on average assets and the return on average shareholders' equity were 0.91% and 10.13%, respectively, for fiscal year 2008, as compared to 0.37% and 2.86%, respectively, during fiscal year 2007. During fiscal year 2006, a Ps. 0.015 net loss was recorded, the return on average assets was 0.0004% and the return on average shareholders' equity was (1.15%).

Fiscal Year 2008 Compared to Fiscal Year 2007

Net income for fiscal year 2008 amounted to Ps. 176.8 million, Ps. 130.8 million higher than the previous fiscal year.

This increase in net income was mainly attributable to:

- a 30.1% increase in net income from services, from Ps. 913.1 million to Ps. 1,187.9 million,

- a 28.1% increase in financial income, from Ps. 1,997.9 million to Ps. 2,559.3 million,

- a Ps. 55.0 million increase in miscellaneous net income, from Ps. 25.1 million to Ps. 80.1 million, and

- a Ps. 54.8 million increase in income from equity investments, from Ps. 2.0 million to Ps. 56.8 million.

These factors were partially offset by:

- a 38.5% increase in administrative expenses, which increased from Ps. 1,286.3 million to Ps. 1,781.1 million,

- a 14.0% increase in financial expenses, from Ps. 1,246.7 million to Ps. 1,421.0 million, and

- a Ps. 139.9 million increase in provisions for losses on loans, from Ps. 255.5 million to Ps. 395.4 million.

Fiscal Year 2007 Compared to Fiscal Year 2006

During fiscal year 2007, net income amounted to Ps. 46.0 million, as compared to a net loss of Ps. 18.9 million in the previous fiscal year. This increase was mainly attributable to:

- a 32.7% reduction in financial expenses, from Ps. 1,851.6 million to Ps. 1,246.7 million,

- a 35.9% increase in net income from services, from Ps. 672.0 million to Ps. 913.1 million, and

- a Ps. 22.7 million decrease in income tax charges, 24.1% lower than the Ps. 94.2 million corresponding to the previous fiscal year.

These factors were partially offset by:

- a 32% increase in administrative expenses, which increased from Ps. 974.6 million to Ps. 1,286.3 million,

- a 10.4% reduction in financial income, from Ps. 2,229.8 million to Ps. 1,997.9 million,

- a Ps. 144.6 million increase in provisions for losses on loans, from Ps. 110.9 million to Ps. 255.5 million, and

- a Ps. 118.9 million reduction in miscellaneous net income, from Ps. 144.0 million to Ps. 25.1 million.

Table of Contents**Financial Income**

Our financial income was composed of the following:

	Fiscal Year Ended December 31,		
	2008	2007	2006
	<i>(in millions of Pesos)</i>

adjustment.

(5) *Net interest earned divided by average interest-earning assets. Interest rates include the CER adjustment.*

(6) *Represents net financial income, divided by average interest-earning assets.*

Fiscal Year 2008 Compared to Fiscal Year 2007

Financial income amounted to Ps. 2,559.3 million, a 28.1% increase compared to the Ps. 1,997.9 million recorded in fiscal year 2007. This increase in financial income was the result of a higher average yield on interest-earning assets, together with the growth of the average volume thereof.

The average yield on interest-earning assets was 12.14%, with a 214 b.p. increase, which can be explained by increases of 284 b.p. and 66 b.p. in the average lending interest rate and in the average interest rate on government securities, respectively. A 32 b.p. decrease in the average rate on other interest-earning assets partially offset such effects.

Table of Contents

Average interest-earning assets increased 9.1%, from Ps. 18,225.9 million to Ps. 19,892.5 million. This was a result of: (i) a 14.7% increase in the average balance of the total loan portfolio, and (ii) a 22.1% increase in the average balance of other interest-earning assets, from Ps. 3,418.2 million during the previous fiscal year to Ps. 4,173.0 million in 2008. This effect was partially offset by a 14.9% decrease in the average balance of the net position in government securities, from Ps. 4,278.8 million to Ps. 3,642.2 million.

The average loan portfolio amounted to Ps. 12,077.3 million, 14.7% higher than the Ps. 10,528.9 million for fiscal year 2007. This increase was due to a Ps. 1,968.7 million increase in the average loans to the private sector, partially offset by a decrease in the average loans to the public sector, which amounted to Ps. 420.3 million (a decrease of 24.9% as compared to the prior year). The decrease in the average portfolio of loans to the public sector was mainly due to the sales of Secured Loans and the use of such loans for the acquisition of the remaining Hedge Bond, both during the first semester of fiscal year 2007.

With respect to loans to the private sector, a significant increase in the volume of such loans was registered during 2008, with a 22.3% increase in the fiscal year's average balance compared to the previous fiscal year. It is worth noting that this increase is net of the portfolio transferred to trusts and of the charge-offs against allowances for loan losses during fiscal year 2008.

The estimated market share of Banco Galicia, on an individual basis, in the Argentine financial system's total loans to the private sector was 6.13% at the end of December 2008, whereas such market share was 7.75% as of December 31, 2007.

The average interest rate on total loans, including the CER adjustment, was 17.01% in fiscal year 2008, compared to 14.17% in fiscal year 2007. The portfolio of loans to the private sector accrued a 17.47% average interest rate and the public-sector loan portfolio accrued a 13.10% average interest rate, including the CER adjustment.

The average interest rate on Peso-denominated loans to the private sector increased by 364 b.p., from 16.21% in fiscal year 2007 to 19.85% in fiscal year 2008. This increase reflected the increase experienced in the Argentine market in general. The average interest rate on foreign-currency denominated loans to the private sector increased by 32 b.p., from 6.43% in fiscal year 2007 to 6.75% in fiscal year 2008.

The average position in government securities amounted to Ps. 3,642.2 million in fiscal year 2008, 14.9% lower than the Ps. 4,278.8 million in fiscal year 2007. This variation was mainly due to a Ps. 588.9 million decrease in the average balance of the position in government securities in US Dollars mainly as a result of the collection of the annual amortization payment and sales of Boden 2012 Bonds in the market, the proceeds of which were used to repurchase part of the Bank's foreign debt. This decrease was partially offset by the increase in the price of the US Dollar during the year (from Ps. 3.15 to Ps. 3.45).

The average yield on government securities increased by 66 b.p., from 3.42% in fiscal year 2007 to 4.08% in fiscal year 2008. This variation is made up of a 482 b.p. increase in the average interest rate on government securities in Pesos, partially offset by a 114 b.p. decrease in the average interest rate on government securities in US Dollars.

The increase in the average interest rate on government securities in Pesos was partly due to the fact that the average interest rate in fiscal year 2007 included a Ps. 32.0 million loss as a consequence of the release of Bogar Bonds which, as of December 31, 2006, had been delivered as collateral for the advance for the acquisition of the remaining Hedge Bond. Pursuant to Communiqué A 3911 and supplementary regulations, Bogar Bonds used as collateral were recorded at their technical value, while those not allocated in that way were recorded at their present value calculated using the rate provided for by the Argentine Central Bank. Furthermore, during fiscal year 2008 higher income was recorded related to trading operations. In turn, the nominal interest rate in 2008 and 2007 was influenced by the fact that Peso-denominated Discount Bonds and GDP-Linked Negotiable Securities were recorded under such caption, which recording is regulated by Communiqué A 4270 of the Argentine Central Bank. See Item 4. Information on the Company-Selected Financial Information-Government and Corporate Securities Net Position and Item 4. Information on the Company-Selected Financial Information-Government and Corporate Securities-Valuation.

Table of Contents

The decrease in the average interest rate on government securities in US Dollars in fiscal year 2008 was mainly due to the decrease of the Libo rate, accrued by Boden 2012 Bonds. Apart from that, the average interest rate for fiscal year 2007 was influenced by the Ps. 27.5 million loss as a consequence of the sale of Boden 2012 Bonds for US\$ 178.8 million in February 2007, the proceeds of which sale were used for the repurchase of part of the Bank's foreign debt instrumented as loans due in 2010 and 2014, at market prices.

The average rate of the Other Interest-Earning Assets section decreased 32 b.p. in 2008, as a result of the variation of the relative size of the transactions in Pesos and in foreign currency, since the average rate of other interest-earning assets in foreign currency decreased by 167 b.p., from 2.87% to 1.20%, while the average rate in Pesos increased only 24 b.p., from 6.53% to 6.77%. The decrease in the average rate for transactions in foreign currency was mainly a result of the decrease, determined by the Argentine Central Bank, of the interest rate on the funds deposited in the Argentine Central Bank, corresponding to the minimum cash requirements. This decrease came with a decrease in the average yield of the balances deposited in correspondent accounts.

Financial income for fiscal year 2008 included a Ps. 173.3 million profit from foreign-exchange quotation differences, which includes income from foreign exchange forward transactions. The above-mentioned financial income also includes a Ps. 163.7 million gain from foreign exchange brokerage activities and a Ps. 9.6 million gain from the valuation of the net position in foreign currency. Financial income for fiscal year 2007 amounted to Ps. 88.0 million, which included a Ps. 91.9 million profit from foreign-exchange brokerage activities. It is worth noting that, in fiscal year 2007, foreign exchange forward transactions recorded a loss and, therefore, they were recorded as financial expenses. It is also worth mentioning that, in October 2008, Grupo Financiero Galicia entered into a forward foreign currency hedge contract aimed at covering the risk associated with the exchange-rate exposure of Dollar-denominated debts.

The following table shows our market shares:

<i>(in percentages)</i>	Fiscal Year Ended		
	December 31,		
	2008	2007	2006
Total Deposits	5.93	6.32	6.18
Private-Sector Deposits			
Total	7.61	8.23	8.43
Deposits in Current and Savings Accounts and Non-Restructured Time Deposits	7.87	8.55	8.78
Total Loans	6.16	7.41	8.13
Private-Sector Loans	6.12	7.75	7.22

Banco de Galicia y Buenos Aires S.A., only, within the Argentine financial system. Based on daily information on deposits and loans prepared by the Argentine Central Bank using end-of-month balances. Beginning on December 2008, deposits from AFJPs were transferred to the ANSES, which implied a transfer of deposits from the private sector to the public sector.

Fiscal Year 2007 Compared to Fiscal Year 2006

Financial income for fiscal year 2007 amounted to Ps. 1,997.9 million, representing a 10.4% decrease from the Ps. 2,229.8 million recorded in fiscal year 2006. The decrease in financial income was the result of a lower volume of average interest-earning assets, partially offset by an increase in their average yield.

The average yield on interest-earning assets was 10% in fiscal year 2007, with a 116 b.p. increase, which can be explained by increases of 196 b.p. and 84 b.p. in the average lending interest rate and in the average rate on other interest-earning assets, respectively. A 326 b.p. decrease in the average interest rate on government securities partially offset such effects. Average interest-earning assets decreased 16.2%, from Ps. 21,752.6 million to Ps.

18,225.9 million. This was a result of: i) a 3% decrease in the average balance of the total loan portfolio, ii) an 8.5% decrease in the average balance of the net position in government securities, since the same decreased from Ps. 4,675.8 million in fiscal year 2006 to Ps. 4,278.8 million in fiscal year 2007, and iii) a 45.1% decrease in the average

balance of other interest-earning assets, from Ps. 6,225.8 million to Ps. 3,418.2 million.

Table of Contents

The average loan portfolio amounted to Ps. 10,528.9 million, 3% lower than the Ps. 10,851.0 million for fiscal year 2006. This reduction was due to a significant decrease in the average balance of loans to the public sector, for Ps. 2,684.4 million (61.4%), partially offset by an important increase in the average balance of loans to the private sector, for Ps. 2,362.3 million (36.4%). The decrease in the average portfolio of loans to the public sector was mainly due to the sales of Secured Loans carried out during fiscal year 2006 and during the first half of fiscal year 2007. It was also due to the use of these loans for the purchase of the remaining Hedge Bond.

As regards loans to the private sector, a very significant rise in the volume of such loans was registered during 2007, with a 36.4% increase in the average balance for fiscal year 2007, compared to fiscal year 2006. The estimated market share of Banco Galicia (on an individual basis and excluding the regional credit card companies' loan portfolios) in the Argentine financial system's total loans to the private sector was 7.75% at the end of December 2007, whereas such market share was 7.22% as of December 31, 2006. The transfer of loan portfolios to financial trusts affects these figures.

The average interest rate on total loans, including the CER adjustment, was 14.17% in fiscal year 2007, compared to 12.21% in fiscal year 2006. In fiscal year 2007, the private-sector loan portfolio accrued a 14.37% average interest rate and the public-sector loan portfolio accrued a 13.13% average interest rate, including the CER adjustment. The interest rate on loans to the public sector, mostly Secured Loans, rose to 13.13% in fiscal year 2007 from 11.36% in fiscal year 2006. This variation was mainly due to a lower loss from the valuation adjustment of such loans in accordance with Communiqué A 3911 and supplementary regulations, since during the previous fiscal year such adjustment amounted to Ps. 122.3 million, while in fiscal year 2007 it amounted to Ps. 6.4 million. The loss recorded in fiscal year 2006 was a consequence of the fact that the discount rate established by the Argentine Central Bank to determine the present value of the public-sector loan portfolio was higher during 2006 than the average rate of the Secured Loans portfolio, which rate continued rising during the year. In fiscal year 2007, the discount rates used between the months of January and June 2007 were lower than the rates in effect as of December 2006. This was partially offset by the increase experienced by the discount rate since July, caused by the market volatility that followed the subprime mortgage market crisis in the U.S. In addition, it should be added that the CER variation was higher in 2006 than in 2007.

In fiscal year 2007, the average interest rate on Peso-denominated loans to the private sector increased by 156 b.p., to 16.21%, from 14.65% in fiscal year 2006. This increase reflected the increase recorded in the Argentine market in general. The average interest rate on foreign currency loans to the private sector increased by 80 b.p., from 5.63% in fiscal year 2006 to 6.43% in fiscal year 2007.

The average position in government securities was of Ps. 4,278.8 million in fiscal year 2007, 8.5% lower than the Ps. 4,675.8 million of fiscal year 2006. This variation is composed of a Ps. 2,292.4 million decrease (from Ps. 3,501.5 million in 2006 to Ps. 1,209.1 million in 2007) in the average balance of the position in government securities in Pesos and a Ps. 1,895.4 million increase (from Ps. 1,174.3 million to Ps. 3,069.7 million) in the average balance of the position in government securities in US Dollars. The lower position in Pesos was mainly due to the following: i) the settlement, on December 1, 2006, of 90.8% of the advance for the acquisition of the Hedge Bond using Bogar Bonds allocated as collateral, and ii) the sales of Bogar Bonds carried out during fiscal year 2006 and the first quarter of fiscal year 2007. The higher position in US Dollars mainly reflects the delivery to us on December 1, 2006 and on April 24, 2007 of Boden 2012 Bonds corresponding to 90.8% and 9.2% of the Hedge Bond, respectively. These were recorded, until each of the above-mentioned dates, under the line item "Other Receivables Resulting from Financial Brokerage", since they represented a right, and once delivered to us, they were recorded under the line item

Government Securities". Also, the average balance of Boden 2012 Bonds for fiscal year 2007 decreased, mainly due to the annual amortization and to market sales, the proceeds of which were used for the repurchase of part of the restructured foreign debt.

The average yield on the position of government securities declined by 326 b.p., to 3.42% in fiscal year 2007, from 6.68% in fiscal year 2006. This variation is comprised of decreases of 581 b.p. and 89 b.p. in the average interest rates on Peso and Dollar-denominated government securities, respectively.

Table of Contents

The decrease in the average rate on the position in government securities in Pesos was partly due to the fact that, in fiscal year 2006, the average portfolio included a significant amount of Bogar Bonds, the principal of which is adjusted by the CER and which, as explained above, ceased to be part of the Bank's portfolio as a result of the settlement, in December 2006, of 90.8% of the advance for the acquisition of the Hedge Bond and of sales. In addition, the average rate on government securities in Pesos includes a Ps. 32 million loss resulting from the release of Bogar Bonds, which, as of December 31, 2006, were granted as collateral for the advance for the acquisition of the remaining Hedge Bond. Pursuant to Communiqué A 3911 and supplementary regulations, Bogar Bonds used as collateral are recorded at their technical value, while those not allocated in that way are recorded at their present value calculated using the discount rate provided for by the Argentine Central Bank. In turn, the low nominal interest rate in fiscal year 2007 is attributable to the fact that Peso-denominated Discount Bonds and GDP-Linked Negotiable Securities are recorded in such line item, which recording is regulated by Communiqué A 4270 of the Argentine Central Bank. See -Consolidated Assets-Government Securities-Net Position.

The decrease in the average rate on the position of government securities in US Dollars in fiscal year 2007 was mainly due to the Ps. 27.5 million loss from the Bank's sale of Boden 2012 Bonds for US\$ 178.8 million in February 2007, which proceeds were used for the repurchase of part of its restructured foreign debt instrumented as loans due in 2010 and 2014.

The Other Interest-Earning Assets line item was mainly comprised of the Compensatory and the Hedge Bonds to be received as compensation for the asymmetric pesification, and recorded under Other Receivables from Financial Brokerage. As explained above, delivery to us of the Boden 2012 Bonds corresponding to 90.8% of the Hedge Bond, which took place on December 1, 2006, implied the availability of those Boden 2012 Bonds, which were therefore recorded under Government Securities. As this occurred by the end of 2006, it did not have a major impact in the Other Interest-Earning Assets average for fiscal year 2006, but it did in fiscal year 2007. Also, on April 24, 2007, the Bank purchased the remaining Hedge Bond and, as from that moment, the corresponding Boden 2012 Bonds were also recorded under Government Securities. These facts mainly explain the Ps. 2,807.6 million decrease in the average balance of the line item Other Interest-Earning Assets, compared to the Ps. 6,225.8 million recorded in 2006.

The average rate of the line item Other Interest-Earning Assets experienced an 84 b.p. increase in fiscal year 2007, mainly as a result of the variation in the relative weight of the transactions in Pesos and in foreign currency, since although for the transactions in Pesos the average rate decreased by 53 b.p. and for the transactions in US Dollars it decreased by 70 b.p., transactions in Pesos, which have a higher nominal rate, significantly increased their relative weight during fiscal year 2007, mainly as a result of what is explained in the previous paragraph, increasing to 69.6% of the total in fiscal year 2007, from 28.6% in fiscal year 2006. Another factor that contributed to the rate increase, among others, was the increase of the balance of interest-earning deposits at the Argentine Central Bank, corresponding to the minimum cash requirements, and the increase of leasing transactions, recorded under this line item, in Pesos. The average rate on other Peso-denominated assets was mainly influenced by the lower variation of the CER during fiscal year 2007 as compared to fiscal year 2006 (as discussed in previous paragraphs), which influenced the yield of the securities issued by the Galtrust I Financial Trust, the principal of which is adjusted by such coefficient and which are also recorded under this line item.

Financial income for fiscal year 2007 includes a Ps. 88.0 million profit from foreign-exchange quotation differences, which includes a Ps. 91.9 million gain from foreign exchange brokerage.

Table of Contents**Financial Expenses**

Our financial expenses were composed of the following:

	Fiscal Year Ended December 31,		
	2008	2007	2006
	<i>(in millions of Pesos)</i>		
Interest on Deposits	786.1	547.3	346.1
Negotiable Obligations	288.8	335.2	294.9
Contributions and Taxes	135.9	86.4	68.6
CER Adjustment	9.2	67.0	697.7
Other ⁽¹⁾	201.0	210.8	444.3
Total	1,421.0	1,246.7	1,851.6

(1) Includes accrued interest on liabilities resulting from financial brokerage with banks and international entities and premiums payable on repurchases.

Fiscal Year 2008 Compared to Fiscal Year 2007

Financial expenses for fiscal year 2008 amounted to Ps. 1,421.0 million, representing a 14.0% increase as compared to the Ps. 1,246.7 million for fiscal year 2007.

This variation stemmed from a 93 b.p. increase in the average cost of funds and a 5.6% increase in the average balance of interest-bearing liabilities.

Average interest-bearing liabilities amounted to Ps. 15,694.5 million in fiscal year 2008, as compared to Ps. 14,858.8 million in fiscal year 2007. This variation was due to the Ps. 767.7 million increase in total interest-bearing liabilities, which increased from Ps. 9,537.5 million to Ps. 10,305.2 million, and to the increase in other interest-bearing liabilities, which increased from Ps. 1,699.7 million to Ps. 2,589.1 million. This effect was partially offset by a Ps. 560.3 million decrease in the average balance of debt securities, from Ps. 3,360.1 million to Ps. 2,799.8 million.

The increase in the average balance of interest-bearing deposits was mainly the result of the increase in the Bank's deposits in Argentina, in current accounts, savings accounts and time deposits. Taking into consideration the final balances of the Bank's total deposits in Argentina, such increase totaled Ps. 1,019.0 million for fiscal year 2008, equivalent to a 7.8% increase from the previous fiscal year-end total. Average transactional deposits increased 20.6%, while time deposits grew 2.5%, which allowed for an improvement of interest-bearing deposits. Of the total average interest-bearing deposits, Ps. 1,960.6 million were Dollar-denominated deposits and Ps. 8,344.6 million were Peso-denominated, as compared to Ps. 1,653.7 million and Ps. 7,883.8 million, respectively, in fiscal year 2007. Considering only private-sector deposits in current and savings accounts and time deposits (excluding those restructured), raised by the Bank only in Argentina, the estimated deposit market share of the Bank in the Argentine financial system decreased from 8.55% as of December 31, 2007 to 7.86% as of December 31, 2008. In order to

understand the evolution of deposits by sector, it must be remembered that the recent Social Security reform entailed the creation of the SIPA and the elimination of the capitalization system. This caused the transfer of deposits from Private Pension Funds to SIPA's Sustainability Guarantee Fund, managed by the ANSES. This implied the reallocation of funds from the private to the public sector. Therefore, if balances are adjusted based on said transfer of ownership, the Bank's share in private sector's deposits (current and savings accounts, and time deposits, excluding restructured deposits) would have decreased 0.46 p.p., as compared to December 31, 2007.

The average rate on interest-bearing deposits was 7.70%, 158 b.p. higher than the 6.12% average rate recorded in fiscal year 2007. Peso-denominated deposits (including those adjusted by CER) accrued a 9.30% average interest rate in fiscal year 2008, as compared to 7.21% in fiscal year 2007. This increase was experienced by the Argentine market as a whole in 2008. Likewise, the cost of Dollar-denominated deposits was 0.91% in 2008, similar to the one recorded in fiscal year 2007.

Table of Contents

The average balance of the line item *Argentine Central Bank* for fiscal year 2008 was Ps. 0.4 million, while in fiscal year 2007 it amounted to Ps. 261.5 million. This line item included the average balances of the financial assistance granted by the Argentine Central Bank and the advance for the acquisition of the Hedge Bond. During the first quarter of fiscal year 2007, the Bank repaid in advance the total debt for the financial assistance granted, which as of December 31, 2006 amounted to Ps. 2,688.7 million. During April 2007, the Bank acquired the remaining 9.2% of the Hedge Bond by means of an exchange for Secured Loans. The average rate in fiscal year 2007 was a consequence of the Ps. 32.8 million loss recorded, which was related to such exchange transaction.

The average balance of debt securities amounted to Ps. 2,799.8 million in fiscal year 2008, Ps. 560.3 million lower than the Ps. 3,360.1 million in fiscal year 2007. This decrease is mainly related to a US\$ 85.5 million net decrease (taking into consideration the capitalization of interests on Notes due 2019) in the final balance of the Bank's foreign debt instrumented as notes, due to amortizations, redemptions and repayments in advance and due to the payment of US\$ 24.6 million made by Galicia Uruguay for the amortization installment of its notes due September 2008 and the payment in advance of the installments due September 2009 and 2010. The average cost was 10.00% in fiscal year 2008, while it had been 8.66% in fiscal year 2007. The average rate for fiscal year 2007 was mainly influenced by the Ps. 27.0 million gain resulting from the partial payment of the Bank's capital increase in notes received at a value lower than their book value. If such an effect would have been eliminated, the average rate would have been 9.46%. The higher average rate for fiscal year 2008 is mainly due to the increase in the rates of the restructured foreign debt pursuant to the contractual conditions.

The average balance of the *Other Interest-Bearing Liabilities* line item for fiscal year 2008 was Ps. 2,589.1 million, with an average rate of 7.86% while, for fiscal year 2007, the average balance amounted to Ps. 1,699.7 million and the average rate was 7.50%. This line item records, mainly, Dollar-denominated debt with international banks and credit agencies, Dollar-denominated obligations in connection with repurchase transactions of government securities and the Dollar-denominated unsecured loans granted to Grupo Financiero Galicia in 2007 for the payment of the Bank's capital increase. The variation of the average balance is mainly due to the higher average balance of repurchase and reverse repurchase transactions and credit lines related to foreign trade. It is worth noting that in July 2008, Grupo Financiero Galicia paid the first principal installment of the loan granted by Merrill Lynch International, for US\$ 18.0 million, and later, on January 7, 2009, repaid such loan in advance pursuant to what is included in Item 8.

Financial Information-Significant Changes. The average rate for fiscal year 2007 was mainly influenced by the Ps. 6.9 million profit resulting from the repurchase carried out in February, at market prices, of part of the Bank's foreign debt instrumented as loans. Excluding this profit, the average interest rate on *Other Interest-Bearing Liabilities* would have amounted to 8.82%. The decrease, as compared to fiscal year 2007, is mainly due to the decrease in the average rate related to repurchase and reverse repurchase transactions.

Fiscal Year 2007 Compared to Fiscal Year 2006

Financial expenses for fiscal year 2007 amounted to Ps. 1,246.7 million, representing a 32.7% decrease from the Ps. 1,851.6 million for fiscal year 2006. It should be noted that the loss from the valuation of Secured Loans (Ps. 6.4 million and Ps. 122.3 million in fiscal years 2007 and 2006, respectively), pursuant to the provisions of *Comunicado A 3911* and supplementary regulations, is recorded under *Other* in the table named *Financial Expenses*, whereas in the table named *Yield on Interest-Earning Assets and Cost of Funds*, it is recorded netting the average rate on loans to the public sector. Corrected for this effect, financial expenses in fiscal year 2007 amounted to Ps. 1,240.3 million, and those for fiscal year 2006 to Ps. 1,729.3 million, thus decreasing by Ps. 489 million (28.3%) in fiscal year 2007 as compared to the previous fiscal year. This decrease stemmed from a 158 b.p. decrease in the average cost of funds and a 21.4% increase in the average balance of interest-bearing liabilities.

Average interest-bearing liabilities amounted to Ps. 14,858.8 million in fiscal year 2007, as compared to Ps. 18,894.0 million in fiscal year 2006. This decrease was mainly due to a 95.7% decrease in liabilities with the Argentine Central Bank equal, on average, to Ps. 5,821.6 million, and to a Ps. 72.3 million decrease in the line item *Debt Securities* in fiscal year 2007. These effects were partially offset by the Ps. 1,791.5 million increase in total interest-bearing deposits, which rose to Ps. 9,537.5 million in fiscal year 2007 from Ps. 7,746.0 million in fiscal year 2006.

Table of Contents

The increase in the average balance of interest-bearing deposits was mainly the result of the strong increase in the Bank's deposits in Argentina, in current accounts, savings accounts and time deposits. Taking into consideration the final balances of the Bank's total deposits in Argentina, such increase totaled Ps. 2,398.3 million for fiscal year 2007, equivalent to a 22.6% increase from the previous fiscal year-end total. Of the total average interest-bearing deposits, Ps. 1,653.7 million were Dollar-denominated deposits and Ps. 7,883.8 million were Peso-denominated, compared to Ps. 1,369.9 million and Ps. 6,376.1 million, respectively, in fiscal year 2006.

Considering only private-sector deposits in current and savings accounts and time deposits (excluding restructured deposits), raised only by the Bank in Argentina, the estimated deposit market share of the Bank in the Argentine financial system decreased from 8.78% as of December 31, 2006, to 8.55% as of December 31, 2007. This decrease is attributable, primarily, to a lower market share with respect to institutional deposits, due to the high liquidity condition of the Bank.

The average rate on interest-bearing deposits was 6.12% in fiscal year 2007, 43 b.p. greater than the 5.69% average rate for the previous fiscal year. Peso-denominated deposits (including those adjusted by CER) accrued a 7.21% average interest rate, compared to a 6.76% average interest rate in fiscal year 2006. This increase was a result, mainly, of the increase in the borrowing interest rates in Pesos experienced by the Argentine market as a whole during 2007. Likewise, the cost of Dollar-denominated deposits was 0.93%, 23 b.p. greater than the 0.70% average cost for fiscal year 2006. The interest rate increase is in line with the one experienced by the domestic market as a whole.

The average balance of the Argentine Central Bank line item in fiscal year 2007 was Ps. 5,821.6 million lower than the Ps. 6,083.1 million for fiscal year 2006, and the average cost for fiscal year 2007 was 26.31%, compared to 12.65% for the previous fiscal year. In this line item we show the average balance of the financial assistance from the Argentine Central Bank and the average balance of the advance for the acquisition of the Hedge Bond. During the first quarter of fiscal year 2007, the Bank fully canceled in advance the debt owed for the financial assistance, which as of December 31, 2006 amounted to Ps. 2,688.7 million. During April 2007, Banco Galicia purchased 9.2% of the Hedge Bond, through a swap for Secured Loans. The 1,366 b.p. increase in the average cost mentioned above was due to the recognition of a Ps. 32.8 million loss in connection with the above-mentioned swap, since such alternative, instead of the advance requested to the Argentine Central Bank to finance the acquisition of the remaining Hedge Bond, resulted in a Ps. 32.8 million increase in the acquisition cost of such Bond.

The average balance of debt securities was Ps. 3,360.1 million in fiscal year 2007, Ps. 72.3 million lower than the Ps. 3,432.4 million for the previous fiscal year. This decrease is primarily related to a net reduction (including interest capitalized on the Notes due 2019) of US\$ 342.6 million in the year-end balance of the Bank's restructured foreign debt instrumented as notes, resulting from amortizations, redemptions and repayments in advance. This reduction was partially offset by the issuance by Tarjetas Cuyanas S.A. of notes for Ps. 200 million during the second quarter of 2007, and by the granting to Grupo Financiero Galicia of a US\$ 80 million loan by Merrill Lynch International, which loan was repaid in advance on January 7, 2009.

The average cost of debt securities in fiscal year 2007 was 8.66%, while in the previous fiscal year it had been 8.59%. The average interest rate for fiscal year 2007 was mainly affected by the Ps. 27.0 million profit resulting from the partial payment of the Bank's capital increase in notes received at a value lower than their book value. Excluding this effect, the average rate would amount to 9.46%, primarily resulting from the 1 percentage point increase in the interests on the notes due 2014 which, as from January 1, 2007, rose from 5% per annum to 6% per annum, in accordance with the existing contractual terms.

In fiscal year 2007, the average balance of the line item Other Interest-Bearing Liabilities was Ps. 1,699.7 million, with an average rate of 7.50% while, for fiscal year 2006, the average balance amounted to Ps. 1,632.5 million and the average rate was 9.48%. This line item records, mainly, Dollar-denominated debt with banks and international entities, and Dollar-denominated negotiable obligations in connection with repurchase and reverse repurchase transactions of government securities. The reduction of the debt due in 2010 and 2014 was offset by the increase in repurchase and reverse repurchase transactions. The average rate for fiscal year 2007 was mainly influenced by the Ps. 6.9 million profit resulting from the repurchase carried out in February, at market prices, of part of the Bank's foreign debt instrumented as loans. Excluding this profit, the average interest rate on the line item Other Interest-Bearing Liabilities, would amount to 8.77%, and the decrease compared to fiscal year 2006 is mainly due to the

above-mentioned change in the breakdown of the line item.

Table of Contents**Net Financial Income**

Net financial income for fiscal year 2008 amounted to Ps. 1,138.3 million, and the financial margin was 5.72%. In fiscal year 2007, the corresponding figures were Ps. 751.2 million and 4.12% respectively, and in 2006, the corresponding figures were Ps. 378.2 million and 1.74%, respectively.

Excluding the income from the valuation adjustment of public-sector assets (Ps. 9.2 million profit), and including the financial income related to margin requirements for repurchase transactions (Ps. 34.2 million profit), net financial income amounted to Ps. 1,163.3 million and the corresponding adjusted financial margin was 5.85%. During fiscal year 2007, the net financial income, calculated the same way, amounted to Ps. 805.2 million, and the corresponding adjusted financial margin was 4.42%.

Net financial income for fiscal year 2008 was mainly due to the profit from the Peso-denominated matched portfolio, offset by the loss recorded by the matched portfolio in foreign currency.

The improvement in the adjusted net financial margin, in spite of the increase in the cost of Peso-denominated deposits, was mainly attributable to: (i) the increase in income from intermediation with the private sector (with an increase in the volume of average loans and an increase in the average interest rate on such loans) and (ii) a decrease in the average cost of liabilities resulting from the change in their structure as a consequence of the change in the composition of deposits, with an increase in transactional deposits, and the reduction of the restructured foreign debt.

Provision for Losses on Loans and Other Receivables

Provisions for losses on loans and other receivables amounted to Ps. 395.4 million in fiscal year 2008, Ps. 139.9 million higher than the Ps. 255.5 million for fiscal year 2007. A significant percentage of this increase was due to the seasoning of our loan portfolio, mainly the individuals portfolio.

Provisions for losses on loans and other receivables amounted to Ps. 255.5 million in fiscal year 2007, Ps. 144.6 million higher than the Ps. 110.9 million of the previous fiscal year. A significant percentage of this increase was due to the seasoning of our loan portfolio, mainly the individuals portfolio.

For more information on asset quality, see Item 4. Information on the Company-Selected Statistical Information-Amounts Past Due and Non-Accrual Loans and -Selected Statistical Information-Loan Loss Experience .

Net Income from Services

Our net income from services consisted of:

(1) *Includes, among others, fees from investment banking activities, asset management, safe deposit boxes and cash management.*

Table of Contents*Fiscal Year 2008 Compared to Fiscal Year 2007*

Net income from services amounted to Ps. 1,187.9 million for fiscal year 2008, 30.1% higher than the Ps. 913.1 million recorded in fiscal year 2007. All categories grew, mainly as a consequence of an increase in the volume of transactions together with an increase in the price of certain services, in line with the dynamics of the financial market.

The Bank's income from credit and debit card transactions, on an individual basis, amounted to Ps. 367.7 million in fiscal year 2008, a 45.2% increase over the Ps. 253.2 million recorded in fiscal year 2007. This higher income was attributable not only to the greater number of credit cards managed, but also to the greater average purchases made with such cards during the year. The total number of cards managed by the Bank (excluding those managed by the regional credit card companies) increased 11.8%, reaching 1,238.5 thousand as of December 31, 2008, as compared to 1,107.5 thousand as of December 31, 2007.

Income from services corresponding to the regional credit card companies was Ps. 584.9 million in fiscal year 2008, 40.5% higher than the Ps. 416.3 million recorded in fiscal year 2007. This variation was mainly due to the increase in the average number of credit cards managed and to the increase in the purchases made with these credit cards during fiscal year 2008. These companies managed 4,742.8 thousand cards as of December 31, 2008, a 10.7% increase from December 31, 2007.

The Bank's total deposit accounts amounted to 1,540.7 thousand as of December 31, 2008, 13.0% higher than as of December 31, 2007.

Reflecting credit activity, the increase in the volume of deposits and in the number of accounts, the higher sales of products, and the increase in the price of certain services, significant growth was achieved during fiscal year 2008 in income from the services related to financial transactions (45.8%), utility bills collections services (38.3%), deposit accounts (25.7%), collections (24.2%), credit transactions (21.0%) and foreign trade (16.7%).

Expenses from services increased 49.1%, from Ps. 257.6 million in fiscal year 2007 to Ps. 384.2 million in fiscal year 2008.

Fiscal Year 2007 Compared to Fiscal Year 2006

Net income from services amounted to Ps. 913.1 million in fiscal year 2007, 35.9% higher than the Ps. 672.0 million recorded in fiscal year 2006. All categories of fee income grew, mainly as a consequence of a significant increase in the volume of transactions, together with an increase in the price for certain services.

The Bank's income from credit and debit card transactions, on an individual basis, was Ps. 253.2 million in fiscal year 2007, representing a 48.3% increase over the Ps. 170.7 million recorded in the previous fiscal year. This higher income was attributable not only to the greater number of credit cards managed, but also to the greater average purchases made with such cards during the year. The total number of cards managed by the Bank (excluding those managed by the regional credit card companies) increased 23.2%, reaching 1,107.5 thousand as of December 31, 2007, compared to 899.1 thousand as of December 31, 2006.

Income from services corresponding to the regional credit card companies was Ps. 416.3 million in fiscal year 2007, 37.4% higher than the Ps. 302.9 million recorded in fiscal year 2006. This variation was mainly due to the increase in the average number of managed credit cards and to the significant increase in the purchases made with these credit cards during fiscal year 2007. These companies managed 4,283.8 thousand cards as of December 31, 2006, a 26.6% increase from December 31, 2006.

Table of Contents

In addition, in fiscal year 2007 significant growth was achieved in income from the following sections: collections (49.2%), financial transactions (48.5%), credit transactions (48.1%), insurance (35.1%), deposit accounts (27.7%) and foreign trade (23.8%), thus reflecting the expansion of credit activity, the increase in the volume of deposits and in the number of deposit accounts, the higher sales of products and the increase in the price for certain services.

The Bank's total deposit accounts amounted to 1,363.8 as of December 31, 2007, 12.4% higher than that as of December 31, 2006.

Expenses from services increased 42.2%, from Ps. 181.1 million in fiscal year 2006 to Ps. 257.6 million in fiscal year 2007.

The following table sets forth the number of credit cards outstanding as of the dates indicated:

Credit Cards	December 31,			% Change

Total	1,781.1	1,286.3	974.6	38.5	32.0

Fiscal Year 2008 Compared to Fiscal Year 2007

In fiscal year 2008, administrative expenses amounted to Ps. 1,781.1 million, 38.5% higher than the Ps. 1,286.3 million recorded in fiscal year 2007. Salaries and social security contributions and expenses related to personnel services increased 45.4%, from Ps. 616.3 million in fiscal year 2007 to Ps. 896.0 million in fiscal year 2008. This increase was mainly due to higher salaries and to an increase in staff. The Bank's staff, on a consolidated basis, grew 3.2%, to 9,246 employees in fiscal year 2008, from 8,962 employees a year before, as a consequence of the greater level of activity and the expansion of the distribution network of the Bank and the regional credit card companies. The remaining administrative expenses amounted to Ps. 885.1 million in fiscal year 2008, thus reflecting a 32.1% increase from the Ps. 670.0 million recorded in fiscal year 2007, with increases in all of its components. These increases were associated, as were the personnel expenses, with the higher level of activity, the geographic expansion and the increase in inflation during the year.

Fiscal Year 2007 Compared to Fiscal Year 2006

In fiscal year 2007, administrative expenses amounted to Ps. 1,286.3 million, 32% higher than the Ps. 974.6 million recorded in the previous fiscal year. Salaries and social security contributions and expenses related to personnel services increased 33.4%, from Ps. 462.0 million in fiscal year 2006 to Ps. 616.3 million in fiscal year 2007. This increase was mainly due to higher salaries and to an increase in staff. The Bank's staff, on a consolidated basis, grew 13.8%, to 8,962 employees as of December 31, 2007, from 7,878 employees a year before. This was a consequence of the greater level of activity of the Bank and the expansion of the distribution network of the regional credit card companies. The remaining administrative expenses amounted to Ps. 670.0 million in fiscal year 2007, thus reflecting a 30.7% increase from the Ps. 512.6 million recorded in the previous fiscal year, with increases in all of its components. These increases were associated with the higher level of activity and inflation during the year. Among the remaining administrative expenses, expenses related to advertising and publicity, which is a significant line item, grew 34.7%.

Income/(Loss) from Equity Investments

In fiscal year 2008, a Ps. 56.8 million gain from equity investments was recorded, as compared to a Ps. 2.0 million profit recorded in fiscal year 2007. Income for fiscal year 2008 was mainly a consequence of the Ps. 53.8 million profit from dividends received due to the Bank's interest in Visa Argentina S.A. Income for fiscal year 2007 was mainly due to the Ps. 2.5 million profit from the Bank's interest in Banelco S.A. In fiscal year 2006, the loss from equity investments amounted to Ps. 14.4 million, due to the establishment of a valuation allowance to fully cover the investment in Aguas Argentinas S.A.

Table of Contents***Miscellaneous Income/(Loss), Net***

Miscellaneous net income for fiscal year 2008 amounted to Ps. 80.1 million, as compared to a Ps. 25.1 million profit for fiscal year 2007. Excluding the profits from security margins of repurchase transactions (for Ps. 34.2 million), which are of a financial nature, miscellaneous net income in fiscal year 2008 amounted to Ps. 45.9 million, while in fiscal year 2007 a gain of Ps. 9.3 million was recorded (also excluding the above-mentioned financial income of Ps. 15.8 million). Miscellaneous net income for fiscal year 2008 was mainly due to: (i) Ps. 43.5 million representing Sudamericana's net operating income recorded under miscellaneous income/losses for consolidation purposes, (ii) a Ps. 75.7 million gain related to loan recoveries, (iii) the net establishment of allowances for Ps. 132.9 million and (iv) the amortization of deferred losses from *amparo* claims for Ps. 39.5 million.

Miscellaneous net income for fiscal year 2007 amounted to Ps. 25.1 million, as compared to miscellaneous net income of Ps. 144.0 million for the previous fiscal year. Excluding the profits from security margins of repurchase transactions (for Ps. 15.8 million), which are of a financial nature, miscellaneous net income in fiscal year 2007 amounted to Ps. 9.3 million, while in the previous fiscal year we recorded a gain of Ps. 91.5 million (also excluding the above-mentioned financial income of Ps. 52.5 million). Miscellaneous net income for fiscal year 2007 was mainly due to loan recoveries in the amount of Ps. 61.5 million, and a net gain of Ps. 22.0 million mainly representing Sudamericana's operating income and expenses recorded under Miscellaneous Income/Loss for consolidation purposes, partially offset by the amortization of deferred losses from *amparo* claims in the amount of Ps. 108.7 million and the establishment of allowances for other contingencies, in the amount of Ps. 13.4 million. The decrease in miscellaneous net income in fiscal year 2007, as compared to the previous fiscal year, was mainly attributable to the resumption of amortization of deferred losses from *amparo* claims in fiscal year 2007, given that the Bank reached the maximum limit allowed by the applicable regulations while, in fiscal year 2006, such amortization was deferred.

Income Tax

Argentine Central Bank regulations do not require the recognition of deferred tax assets and liabilities and, therefore, income taxes for Banco Galicia are recognized on the basis of amounts due in accordance with Argentine tax regulations. However, Grupo Financiero Galicia and Grupo Financiero Galicia's non-banking subsidiaries apply the deferred income tax method.

The income tax charge for fiscal year 2008 was Ps. 74.0 million (a Ps. 2.5 million, or a 3.5%, increase when compared to fiscal year 2007), of which Ps. 63.0 million corresponded to Tarjetas Regionales S.A. consolidated with its operating subsidiaries, and Ps. 11.1 million, Ps. 1.3 million and Ps. 0.5 million correspond to Sudamericana, Galicia Warrants and Galicia Factoring y Leasing S.A., respectively. Grupo Financiero Galicia recorded a Ps. 2.1 million reversal in its individual balance sheet.

The income tax charge for fiscal year 2007 was Ps. 71.5 million, of which Ps. 60.9 million corresponded to Tarjetas Regionales S.A. consolidated with its operating subsidiaries and Ps. 6.0 million, Ps. 0.8 million, Ps. 0.3 million and Ps. 0.3 million correspond to Sudamericana, Galicia Warrants, Galicia Factoring y Leasing S.A. and Galicia Valores, respectively. Grupo Financiero Galicia recorded a Ps. 3.2 million charge in its individual balance sheet.

The income tax charge for fiscal year 2006 was Ps. 94.2 million. This amount consisted of: (i) an income tax charge of Ps. 44.2 million corresponding to Tarjetas Regionales S.A. consolidated with its operating subsidiaries and of income tax charges of Ps. 3.7 million, Ps. 0.9 million, Ps. 0.2 million and Ps. (0.4) million corresponding to Sudamericana, Galicia Warrants, Galicia Factoring y Leasing S.A. and Galicia Valores, respectively, and (ii) an income tax charge for Ps. 45.6 million corresponding to us on an individual basis, mainly resulting from the profits on our holdings of 2014 Notes and 2019 Notes.

Table of Contents**U.S. GAAP and Argentine Banking GAAP Reconciliation****General**

We prepare our financial statements in accordance with Argentine Banking GAAP. The more significant differences between Argentine Banking GAAP and U.S. GAAP relate to the determination of the allowance for loan losses, the carrying value of certain government securities and receivables for government securities, the accounting of the Bank's foreign debt restructuring and recognition of deferred income taxes. For more detail on differences in accounting treatment between Argentine Banking GAAP and U.S. GAAP as of December 31, 2008, see note 35 to our consolidated financial statements.

Allowances for Loan Losses

With respect to the determination of the allowance for loan losses, we follow the rules of the Argentine Central Bank. Under these rules, reserves are based on minimum reserve requirements established by the Argentine Central Bank. U.S. GAAP requires that an impaired loan be generally valued at the present value of expected future cash flows discounted at the loan's effective rate or at the fair value of the collateral if the loan is collateral dependent. For the purposes of analyzing our loan loss reserve under U.S. GAAP, we divide our loan portfolio into performing and non-performing commercial and consumer loans.

The following table shows the allowance for loan losses for the periods indicated under Argentine Banking GAAP and U.S. GAAP and the corresponding shareholders' equity adjustment under U.S. GAAP:

	December 31, 2008	December 31, 2007	December 31, 2006
		<i>(in millions of Pesos)</i>	
Argentine Banking GAAP	526.8	428.6	327.0
U.S. GAAP			
SFAS 114			
Allowance for Loan Losses	134.5	246.3	291.9
Effect of BG Trust Securitization - Treated as a Secured			
Borrowing for U.S. GAAP Purposes	(40.9)	(64.9)	(89.7)
SFAS 5	452.9	240.9	170.6
U.S. GAAP Shareholders' Equity Adjustment	(19.7)	6.3	(45.8)

SFAS 114 Analysis

The non-performing commercial loan portfolio is comprised of loans falling into the following classifications of the Argentine Central Bank:

With Problems

High Risk of Insolvency

Uncollectible

The following table shows our loan loss reserve under SFAS 114 for our non-performing commercial loan portfolio as of the dates indicated.

	December 31, 2008	December 31, 2007	December 31, 2006
		<i>(in millions of Pesos)</i>	
Loan Loss Reserve Under U.S. GAAP - SFAS 114			
Analysis	134.5	246.3	291.9

Table of Contents

For such non-performing commercial loans, we applied the procedures required by SFAS 114. For loans that were not collateral dependent, the expected future cash flows to be received from the loans were discounted using the interest rate at each balance sheet date for variable loans. Loans that were collateral dependent, and for which there was an expectation that the loan balance would be recovered via the exercise of collateral, were valued using the fair value of the collateral. In addition, in order to assess the fair value of collateral, we discounted collateral valuations due to the extended period of time that it can take to foreclose on assets in Argentina.

SFAS 5 Analysis

We perform an analysis of historical losses from our consumer and performing commercial loan portfolios in order to estimate losses for U.S. GAAP purposes resulting from loan losses that had been incurred in such loan portfolios at the balance sheet date but which had not been individually identified. We estimate that, on average, it takes a period of up to one year between the trigger of an impairment event and identification of a loan as being a probable loss. The increase in the allowances recorded under SFAS 5 is mostly due to a higher volume of credit card and personal loans granted during 2008 and the rise of the loan loss reserves ratios. The table below shows our loan loss reserve under SFAS 5 for consumer and performing commercial loans as of the dates indicated.

	December 31, 2008	December 31, 2007	December 31, 2006
		<i>(in millions of Pesos)</i>	
Loan Loss Reserve Under U.S. GAAP SFAS 5 Analysis	452.9	240.9	170.6

In addition to assessing the reasonableness of the loan loss reserve as described above, Banco Galicia makes an overall determination of the adequacy of each period's reserve based on such ratios as:

Loan loss reserves as a percentage of non-accrual loans,

Loan loss reserves as a percentage of total amounts past due, and

Loan loss reserves as a percentage of past-due unsecured amounts.

The table below shows the above mentioned ratios as of the dates indicated.

	December 31, 2008	December 31, 2007	December 31, 2006
Loan Loss Reserves as a Percentage of Non-accrual Loans	141.34%	132.13%	168.58%
Loan Loss Reserves as a Percentage of Total Amounts Past Due	171.81%	149.57%	183.29%
Loan Loss Reserves as a Percentage of Past-due Unsecured Amounts	190.78%	167.19%	210.51%

Carrying Value of Secured Loans, Certain Government Securities and Receivables for Government Securities

Under Argentine Banking GAAP, our holdings of Secured Loans, Boden 2012 Bonds, and Discount Bonds in Pesos are recorded in accordance with Argentine Central Bank valuation rules for public-sector assets, as explained hereunder in Item 4. Information on the Company-Selected Financial Information-Government and Corporate Securities-Valuation.

Table of Contents

Under U.S. GAAP, except for the Secured Loans, all of these assets are carried at fair value as fully explained in note 35 to our financial statements and -U.S. GAAP Critical Accounting Policies . Secured Loans are recorded at amortized cost, which cost is the fair value at the date of exchange (December 2001).

Government securities under investment accounts or classified as government securities without quotation under Argentine Central Bank rules (Boden 2012 Bonds corresponding to the Compensatory Bond or Hedge Bond received as well as Discount Bonds in Pesos), are considered as available for sale under U.S. GAAP. Unrealized gains or losses on these securities are reflected in other comprehensive income. As of December 31, 2008, the amortized cost exceeded the fair value of these securities. After considering the time during which these securities value has been under its cost value, Grupo Financiero Galicia has recorded an other-than-temporary impairment of these securities, based on a variety of factors, including the length of time and extent to which the market value has been less than cost, and Grupo Financiero Galicia's intent and ability to hold these securities to recovery. The fair value of these securities was determined on the balance sheet date, based on their quoted market price, and will constitute the new cost basis for this investment.

In connection with the Hedge Bond receivable, under Argentine Banking GAAP, the Bank had recognized the right to purchase the corresponding Boden 2012 Bonds at its equivalent value as if the Bank had the associated bond in its possession, and recognized the associated liability to fund the Hedge Bond as if the Bank had executed the debt agreement with the Argentine Central Bank. The receivable was denominated in US Dollars and accrued interest at Libor, while the liability to the Argentine Central Bank was denominated in Pesos and accrued interest at CER plus 2.0%, each retroactive to February 3, 2002. Under U.S. GAAP, the right to purchase the Hedge Bond is not considered an asset under Financial Accounting Standards Board Statement of Financial Accounting Concepts No. 6, *Elements of Financial Statements*. Under this concept statement, assets are defined as ... probable future economic benefits obtained or controlled by an entity as a result of past transactions or events . In addition, one of the three essential characteristics of an asset is that an entity can obtain the benefit and can control others' access to it. As of December 31, 2006, the Hedge Bond pending receipt and the related advance was accounted for at fair value, as an option contract in accordance with SFAS 133. As of December 31, 2007, the Boden 2012 Bonds corresponding to the Hedge Bond had been acquired in full and we had full control of such bonds.

In addition, as of December 31, 2008, 2007 and 2006, under Argentine Banking GAAP, the Bank had recorded under Intangible Assets the difference arising from the reimbursement of Reprogrammed Deposits at the market exchange rate pursuant to *amparo* claims and the carrying value of these deposits. The receivable for differences related to *amparo* claims does not represent an asset under U.S. GAAP.

Foreign Debt Restructuring

On May 18, 2004, the Bank completed the restructuring of its foreign debt. As a result of this restructuring, we recorded a Ps. 119.7 million net gain under Argentine Banking GAAP.

Table of Contents

For U.S. GAAP purposes, we accounted for the restructuring in two steps. The first step of the debt restructuring required the holders of the Bank's debt to exchange its old debt with the Bank for new debt in two tranches. Pursuant to EITF 02-04, the Bank did not receive any concession from the holders of its debt and therefore, we did not consider the first step of the Bank's debt restructuring as a troubled debt restructuring. Pursuant to EITF 96-19 we accounted for the first step restructuring as a modification of the old debt and therefore we did not recognize any gain or loss. The second step restructuring required the holders of the Bank's debt to forgive it a certain amount of debt based on different options that the Bank offered to exchange its debt. Pursuant to U.S. GAAP we accounted for this second step of the Bank's debt restructuring in accordance with FAS 15, as the holders of the Bank's debt granted it certain concessions. FAS 15 requires the comparison of the future cash flows of the restructured debt and the carrying value of the old debt at the restructuring date.

We did not record any gain on the Bank's troubled debt restructuring since a gain can only be recognized when the carrying value of the old debt at the date of the restructuring exceeds the total future cash payments of the restructured debt reduced by the fair value of the assets and equity given by the Bank as payment of the debt. As a result, under U.S. GAAP, the carrying amount of the Bank's restructured debt is greater than the amount recorded under Argentine Banking GAAP. Therefore, under U.S. GAAP, we calculated a new effective interest rate to reflect the present value of the future cash payments of the Bank's restructured debt.

Securitizations

Under Argentine Banking GAAP, transfers of financial assets to a financial trust are recorded as sales. The financial trust's debt securities retained are recorded at face value plus accrued interest, while certificates of participation retained are recorded under the equity method.

Under U.S. GAAP, transfers of financial assets can be recorded as sales, if control of such assets is surrendered. If control is not surrendered, they are recorded as secured borrowings, and the assets are retained in the books of the transferor and a liability is recognized for the fair value of the consideration received. The retained interests in a transfer recorded as a sale are initially recorded based on their allocated book value using the fair value allocation method. Then, the securities are considered available for sale securities and recorded at their fair value with changes in unrealized gains and losses charged to equity through other comprehensive income.

As of December 31, 2008, Grupo Financiero Galicia had recorded an other-than-temporary impairment of these securities related to the certificates of participation in the Almafuerce Special Fund and Galtrust I based on a variety of factors, mostly including the length of time and extent to which the market value has been less than cost and the weakening of the global and local markets condition in which Grupo Financiero Galicia operates, with no immediate prospect of recovery. The fair value of these retained interests in the trusts is determined based upon an estimate of cash flows to be collected by Grupo Financiero Galicia as holder of the retained interests, discounted at an estimated market rate and will constitute the new cost basis of these securities.

Transfers of financial assets consolidated Variable Interest Entities

In the ordinary course of business, we utilize certain financing arrangements to meet our balance sheet management, funding and liquidity needs. For additional information on our liquidity risk, see Item 5.B. Liquidity and Capital Resources. These activities utilize special purpose entities (SPEs), typically in the form of trusts, which raise funds by issuing debt securities to third party investors. These SPEs typically hold various types of financial assets whose cash flows are the primary source of repayment for the liabilities of the SPEs. These SPEs are typically structured as variable interest entities (VIEs) and are thus subject to consolidation by the reporting enterprise that absorbs the majority of the economic risks and rewards of the VIE.

Table of Contents

The overall methodology for evaluating transactions and relationships under the VIE requirements includes the following two steps:

- determine whether the entity meets the criteria to qualify as a VIE and;
- determine whether Grupo Financiero Galicia is the primary beneficiary of the VIE.

In performing the first step the significant factors and judgments that were considered in making the determination as to whether an entity is a VIE include:

- the design of the entity, including the nature of its risks and the purpose for which the entity was created, to determine the variability that the entity was designed to create and distribute to its interest holders;
- the nature of the involvement with the entity;
- whether control of the entity may be achieved through arrangements that do not involve voting equity;
- whether there is sufficient equity investment at risk to finance the activities of the entity and;
- whether parties other than the equity holders have the obligation to absorb expected losses or the right to received residual returns.

For each VIE identified, Grupo Financiero Galicia performs the second step and evaluates whether it is the primary beneficiary of the VIE by considering the following significant factors and criteria:

- whether the variable interest absorbs the majority of the VIE's expected losses;
- whether the variable interest receives the majority of the VIE's expected returns and;
- whether Grupo Financiero Galicia has the ability to make decisions that significantly affect the VIE's results and activities.

Based on the mentioned evaluation as of December 31, 2008, we consolidated certain VIEs related to trusts created as part of securitization transactions for credit cards and personal loans in which we have a controlling financial interest due to the holding of residual interests in these trusts (see Note 35.h of our consolidated financial statements).

Therefore, we reconsolidated these loans and re-established the corresponding loan loss reserves. Under Argentine Banking GAAP, these transactions were accounted for as sales and the debt securities and certificates retained by the Bank are accounted for at cost plus accrued interest for the debt securities, and the equity method is used to account for the residual interest in the trust.

As of December 31, 2008, the table below presents the assets and liabilities of the financial trusts which have been consolidated for US GAAP purposes:

<i>(In millions of Pesos)</i>	December 31, 2008	
Cash and due from banks	Ps.	33.4
Loans (net of allowances)		939.9
Other assets		21.2
Total Assets		994.5
Debt Securities		722.0
Certificates of Participation		247.7
Other liabilities		24.8
Total Liabilities		994.5

Income Tax

Argentine Central Bank regulations do not require the recognition of deferred tax assets and liabilities and, therefore, income taxes for Banco Galicia are recognized on the basis of amounts due in accordance with Argentine tax regulations. However, Grupo Financiero Galicia and Grupo Financiero Galicia's non-bank subsidiaries apply the deferred income tax method.

The income tax charge for fiscal year 2008 was Ps. 74.0 million (a Ps. 2.5 million, or a 3.5%, increase when compared to fiscal year 2007), of which Ps. 63.0 million corresponded to Tarjetas Regionales S.A. consolidated with its operating subsidiaries, and Ps. 11.1 million, Ps. 1.3 million and Ps. 0.5 million correspond to Sudamericana, Galicia Warrants and Galicia Factoring y Leasing S.A., respectively. Grupo Financiero Galicia recorded a Ps. 2.1 million reversal in its individual balance sheet.

Table of Contents

The income tax charge for fiscal year 2007 was Ps. 71.5 million, of which Ps. 60.9 million corresponded to Tarjetas Regionales S.A. consolidated with its operating subsidiaries and Ps. 6.0 million, Ps. 0.8 million, Ps. 0.3 million and Ps. 0.3 million correspond to Sudamericana, Galicia Warrants, Galicia Factoring y Leasing S.A. and Galicia Valores, respectively. Grupo Financiero Galicia recorded a Ps. 3.2 million charge in its individual balance sheet.

Summary

As a result of the above and other differences, our net income and shareholders' equity under Argentine Banking GAAP and U.S. GAAP for the periods indicated were as follows:

	Net Income (Loss)		Shareholders' Equity (Deficit)	
	Argentine Banking GAAP	U.S. GAAP	Argentine Banking GAAP	U.S. GAAP
	<i>(in millions of Pesos)</i>			
Fiscal Year 2008	176.8	(1,171.0)	1,845.7	(754.4)
Fiscal Year 2007	46.0	592.9	1,654.5	238.1
Fiscal Year 2006	(18.9)	3,524.9	1,608.5	145.8

The significant differences that result between net income under U.S. GAAP and other comprehensive income and net income under Argentine Banking GAAP primarily reflect that under U.S. GAAP:

Since 2005, given that the Compensatory Bond was received in full in that year, the corresponding Boden 2012 Bonds are reflected at market value, with changes in values being recognized under other comprehensive income, the effect of which varies significantly in 2006 and 2007. As of December 31, 2008, Grupo Financiero Galicia had recorded an other-than-temporary impairment for U.S. GAAP purposes, which resulted in a significant decrease in its net income for fiscal year 2008 under U.S. GAAP.

The Hedge Bond and the liability with the Argentine Central Bank for its purchase were not recognized under U.S. GAAP in 2005, while they were recognized in 2006. With the delivery to the Bank of 90.8% of the Hedge Bond in 2006, as the Bank acquired control of 90.8% of the asset that previously was not recognized as such, the adjustment made in the prior year (to reflect that the asset, recognized under Argentine Banking GAAP, was not recognized under U.S. GAAP) was reversed in the same proportion which generated a significant increase in our net income for fiscal year 2006 under U.S. GAAP.

Discount Bonds in Pesos are reflected at market values, with changes from market values at the time of exchange being recognized as other comprehensive income. As of December 31, 2008, Grupo Financiero Galicia had recorded an other-than-temporary impairment for U.S. GAAP purposes, which resulted in a significant decrease in its net income for fiscal year 2008 under U.S. GAAP.

The Bank's foreign debt restructuring completed in 2004 was accounted as a troubled debt restructuring. Therefore the carrying value of such debt is higher under U.S. GAAP and no gain was recognized at the time of the restructuring.

Table of Contents

Certain of our securitization transactions are considered sales under U.S. GAAP, with the valuation of retained interests reflecting fair values, with changes in unrealized gains and losses charged to equity through other comprehensive income. As of December 31, 2008, Grupo Financiero Galicia had recorded an other-than-temporary impairment of the certificates of participation in Galtrust I, in Nues Trust and in Almafuerite Special Fund, based on a variety of factors, mostly including the period of time and extent to which the market value had been lower than the cost and the weakening of the global and local markets. The fair value of these retained interests in the trusts is determined based upon an estimate of cash flows to be collected by Grupo Financiero Galicia as the holder of the retained interests, discounted at an estimated market rate and will constitute the new cost basis of these securities.

Results by Segments

Effective 2007, the results of Banco Galicia's operations, our main subsidiary, are not segregated by geographical regions. Rather, the banking business is reported as one single segment that is evaluated regularly by the Board of Directors in deciding how to allocate resources and in assessing performance of our business. As a result, our segment disclosures for the years ended December 31, 2008 and 2007 are presented on a new basis to correspond with our internal reporting structure. The segment disclosures for the fiscal year ended December 31, 2006 has been restated to conform to the new presentation of business segments.

We measure the performance of each of our business segments primarily in terms of Net income, in accordance with the regulatory reporting requirements of the Argentine Central Bank. Net income and other information by segment are based on Argentine Banking GAAP and are consistent with the presentation of our consolidated financial statements.

Our segments are the following:

Banking: our banking business segment represents Banco de Galicia y Buenos Aires S.A. consolidated line by line with Galicia Uruguay and its subsidiaries and the results of other small banking-related subsidiaries.

Regional Credit Cards: our regional credit cards business segment represents the accounts of Tarjetas Regionales S.A. consolidated with its subsidiaries.

Insurance: our insurance business segment represents the accounts of Sudamericana and its subsidiaries.

Other Grupo Businesses: this segment includes the results of Net Investment, Galicia Warrants, GV Mandataria and Galval.

Our results by segments are shown in note 31 to our audited consolidated financial statements. Below is a discussion of our results of operations by segments for the years ended December 31, 2008, December 31, 2007 and December 31, 2006.

Table of Contents**Banking**

The table below shows the results of our banking business segment.

<i>In millions of Pesos, except percentages</i>	As of December 31,		
	2008	2007	2006
Net Financial Income	847.3	516.2	66.0
Net Income from Services	655.0	520.4	377.3
Net Operating Revenue	1,502.3	1,036.6	443.3
Provisions for Loan Losses	214.9	159.2	57.6
Administrative Expenses	1,166.5	875.1	681.4
Net Operating Income	120.9	2.3	(295.7)
Income from Equity Investments			
Tarjetas Regionales SA	76.4	88.2	70.9
Sudamericana	2.9	1.9	1.1
Others	58.1	3.5	(14.8)
Income from Equity Investments	137.4	93.6	57.2
Other Income (Loss)	(63.0)	(65.5)	112.3
Pre-tax Income	195.3	30.4	(126.2)
Net Income	195.3	30.4	(126.2)
Net Income as a % of Grupo Financiero Galicia's Net Income	110%	66%	667%
Average Loans	8,707.5	7,140.6	5,332.3
Average Deposits	13,199.0	11,857.0	9,506.0

This segment recorded Ps. 195.3 million net income for fiscal year 2008, Ps. 164.9 million higher than the Ps. 30.4 million recorded in fiscal year 2007, which in turn was Ps. 156.6 million higher than the Ps. 126.2 million net loss for fiscal year 2006.

The improvement in net income for fiscal year 2008 was attributable to a Ps. 465.7 million increase in net operating revenue (net financial income plus net income from services) and to a Ps. 43.8 million increase in income from equity investments. These gains were partially offset by greater administrative expenses (which increased by Ps.

291.4 million), and greater provisions for losses on loans and other receivables (which increased by Ps. 55.7 million).

The improvement in net income for fiscal year 2007 was attributable to the Ps. 593.3 million increase in net operating revenue (net financial income plus net income from services) and to a Ps. 36.4 million increase in income from equity investments. These gains were partially offset by greater administrative expenses (which increased by Ps.

193.7 million), lower miscellaneous net income (which declined by Ps. 177.8 million) and greater provisions for losses on loans and other receivables (which increased by Ps. 101.6 million).

The increase in net financial income (an increase of Ps. 331.1 million) for fiscal year 2008 was the consequence of the improvement in the financial margin, together with an increase in the average volume of financial intermediation with the private sector. The average interest rate on Peso-denominated loans to the private sector increased, which reflected the growth observed in the Argentine market in general. Average loans to the private sector amounted to Ps.

8,707.5 million, 21.9% higher than the Ps. 7,140.6 million for fiscal year 2007. The improvement in net financial income is also attributable to the relative decrease in the cost of liabilities, resulting from the change in their structure

as a consequence of the change in the composition of deposits, with an increase in transactional deposits, and the reduction of the restructured foreign debt. The average balance of total deposits increased by Ps. 1,342.0 million, equivalent to an 11.3% increase. The average rate on interest-bearing deposits was 7.70%, 158 b.p. higher than the 6.12% average rate recorded for the previous fiscal year. This increase was experienced by the Argentine market as a whole in 2008.

Table of Contents

The increase in the net financial income for fiscal year 2007 was due to the significant increase in the Bank's volume of financial intermediation with the private sector, reflecting the high growth environment, both for the Argentine economy as a whole and for the Argentine financial system, which was not affected by the volatility in international financial markets in the second half of the year. The increase in the Bank's average loans to the private sector amounted to Ps. 1,808.3 million in fiscal year 2007, representing a 33.9% increase over the amount for fiscal year 2006. Net financial income also increased due to the decline in the cost of funds related to the change in the composition of the Bank's liabilities. The increase in the Bank's level of activity and the improvement in its net financial income were made possible by the Bank's strategy of strengthening its financial condition, including its August 2007 capital increase (See Item 4. Information on the Company-History-Banco Galicia-Banco Galicia's 2007 Capital Increase) and the reduction of its exposure to the public sector (which increased the share of private-sector exposure in total interest-earning assets and reduced the related valuation losses, which were Ps. 38.2 million in fiscal year 2007 as compared to Ps. 198.4 million in fiscal year 2006) and in its expensive debt with the Argentine Central Bank. Also, given that the Bank carries a net financial loss on its matched position in foreign currency (due to the lower yield of the Boden 2012 Bonds, the Bank's main foreign currency asset, relative to the cost of its restructured foreign debt), the reduction in the Bank's restructured foreign debt improved its net financial income.

In addition, another effect in connection with the Bank's balance sheet strengthening strategy was added: the negative impact on net financial income due to the postponement of the acquisition of the Hedge Bond, 90.8% of which was acquired in December 2006, was not present in 2007, but it affected the net financial income for practically all of fiscal year 2006.

Before the losses from the valuation of public-sector assets, net financial income for fiscal year 2008 was Ps. 283.7 million higher than in fiscal year 2007, which was, in turn, Ps. 290 million higher than in fiscal year 2006. Net income from services amounted to Ps. 655.0 million in fiscal year 2008, 25.9% higher than the Ps. 520.4 million recorded in fiscal year 2007, which was in turn 37.9% above the Ps. 377.3 million recorded in fiscal year 2006. For both fiscal years 2008 and 2007, almost all the categories of fee based income grew, mainly as a consequence of an increase in the volume of transactions together with an increase in the price of certain services, in line with the dynamics of the financial market.

Provisions for losses on loans and other receivables amounted to Ps. 214.9 million in fiscal year 2008, Ps. 55.7 million higher than the Ps. 159.2 million in fiscal year 2007, which was in turn Ps. 101.6 million higher than the Ps. 57.6 million recorded in fiscal year 2006. Both in fiscal year 2008 and 2007, a significant percentage of this increase was attributable to the seasoning of the loan portfolio, mainly the individuals' portfolio.

Administrative expenses for fiscal year 2008 amounted to Ps. 1,166.5 million, 33.3% higher than the Ps. 875.1 million for fiscal year 2007, which in turn was 28.4% higher than the Ps. 681.4 million for fiscal year 2006. Both in fiscal years 2008 and 2007, the increase in administrative expenses was related to the increase in personnel expenses and in the remaining administrative expenses. These increases were related to the increase in staff, the higher level of activity, the expansion of the distribution network and the increase in inflation rate during the year.

Income from equity investments amounted to Ps. 137.4 million, Ps. 93.6 million, and Ps. 57.2 million for fiscal years 2008, 2007 and 2006, respectively. Income from equity investments for fiscal year 2008 was mainly due to the Bank's gain from its interest in Tarjetas Regionales S.A. (Ps. 76.4 million) and its Ps. 53.8 million profit from dividends received because of the Bank's interest in Visa Argentina S.A. In fiscal year 2007, income from equity investments was mainly due to the Bank's interest in Tarjetas Regionales S.A.

The Bank recorded Ps. 63.0 million and Ps. 65.5 million miscellaneous net losses for fiscal years 2008 and 2007, respectively. In fiscal year 2006, Banco Galicia recorded a Ps. 112.3 million miscellaneous net income. The loss for fiscal year 2008 was mainly attributable to the amortization of deferred losses from *amparo* claims of Ps. 39.5 million, together with the net establishment of allowances. This effect was partially offset by income related to loan recoveries of Ps. 54.6 million and financial income from margin requirements in connection with repurchase transactions of Ps. 34.2 million. The loss for fiscal year 2007 was mainly attributable to the loss due to the amortization of deferred losses from *amparo* claims of Ps. 108.7 million (while in fiscal year 2006 such amortization was deferred), partially offset by loan recoveries of Ps. 36.7 million and financial income from margin requirements in connection with repurchase transactions of Ps. 15.8 million.

Table of Contents**Regional Credit Cards**

The table below shows the results of our regional credit cards business segment.

<i>In millions of Pesos, except percentages</i>	As of December 31,		
	2008	2007	2006
Net Financial Income	296.2	203.2	157.5
Net Income from Services	571.8	409.0	289.8
Net Operating Revenue	868.0	612.2	447.3
Provisions for Loan Losses	180.4	96.3	53.2
Administrative Expenses	554.5	369.5	263.9
Net Operating Income	133.1	146.4	130.2
Other Income (Loss)	45.2	41.3	20.7
Minority Interests	(20.6)	(27.5)	(24.1)
Pre-tax Income	157.7	160.2	126.8
Income Tax Provision	81.3	72.1	55.9
Net Income	76.4	88.1	70.9
Net Income as a % of Grupo Financiero Galicia's Net Income	43%	192%	(375)%
Average Loans	2,105.0	1,703.1	1,149.3

In fiscal year 2008, the Regional Credit Cards segment recorded net income of Ps. 76.4 million, 13.2% lower than in fiscal year 2007. In turn, net income for fiscal year 2007, which amounted to Ps. 88.1 million, was 24.3% higher than in fiscal year 2006.

The decrease in net income for fiscal year 2008 was mainly a result of the fact that the increase in net operating revenue (net financial income plus net income from services) of Ps. 255.8 million was more than offset by higher provisions for loan losses and other receivables for Ps. 84.1 million, due to a deterioration in the performance of our credit card loans in connection with the increased volume, and higher administrative expenses, of Ps. 185.0 million, due to higher salaries and increases in social security contributions.

In fiscal year 2007, the increase in net income reflected significant increases in net operating revenue, which in turn reflected the increase in the volume of the regional credit card companies' business, influenced by the strong growth of the economy as a whole and aggregate consumption in particular, as well as by the geographical expansion of their distribution network. In fiscal year 2007, higher operating revenue was partially offset by higher provisions for losses on loans and other receivables (which increased 81.0%), higher administrative expenses (which increased 40.0%) and greater income taxes (which increased 29.0%), while a 99.5% increase in miscellaneous net income contributed to a higher overall net income.

During fiscal year 2008, the customer base of the regional credit card companies as a whole increased 16% as compared to the previous fiscal year, and the number of authorized cards exceeded 4.7 million cards as of December 31, 2008. The number of statements issued increased 18.1% in fiscal year 2008, as compared to the previous fiscal year, with almost 1.9 million statements as of December 31, 2008. The distribution network continued growing, reaching 208 service centers in Argentina, 23 more centers than in fiscal year 2007 (a 12% increase). The regional credit card companies' staff increased by 127 people, reaching 3,892 employees. Annual turnover in stores (valued at real prices as of December 31, 2008) exceeded Ps. 7,550 million, while the average loan portfolio increased

23.6% as compared to 2007.

During fiscal year 2007, the regional credit card companies continued to increase their customer base, the loans granted to their customers and their distribution networks. The number of statements issued increased 20% in fiscal year 2007 as compared to the previous fiscal year, while purchases made by card holders with the credit cards issued by these companies increased 35%. In addition, the loan portfolio of the regional credit card companies (including portfolios securitized) increased 45%. The foregoing increases led to increases in the net operating revenue of the regional credit cards segment of Ps. 164.9 million (36.9%) in fiscal year 2007.

In fiscal years 2008 and 2007, the higher provisions for losses on loans and other receivables were mainly related to the seasoning of the portfolio.

The increase in administrative expenses, both in fiscal year 2008 and 2007, is related to the increase in the level of activity, the geographical expansion and the inflation rate.

In both fiscal years, miscellaneous net income mainly reflected loans recovered.

Table of Contents**Insurance**

The table below shows the results of our insurance business segment.

<i>In millions of Pesos, except percentages</i>	As of September 30,		
	2008	2007	2006
Net Financial Income	20.2	16.6	17.0
Net Operating Revenue	20.2	16.6	17.0
Administrative Expenses	30.0	16.1	11.2
Net Operating Income	(9.8)	0.5	5.8
Other Income (Loss)	43.5	22.0	6.9
Pre-tax Income	33.7	22.5	12.7
Income Tax Provision	11.1	7.9	3.7
Net Income	22.6	14.6	9.0
Net Income as a % of Grupo Financiero Galicia's Net Income	12.8%	32%	(48)%

Argentine Banking GAAP establish that the accounts of non-homogeneous activities must be included under Other Income/Loss, therefore the income statement of Sudamericana was reclassified and, as such, in the table above, its main accounts (earned premiums, claims, acquisition costs, etc.) are included in such line item. The results of this segment mainly represent the results of Galicia Seguros. For consolidation purposes, we have used Sudamericana's consolidated financial statements as of September 30 of each year.

In the twelve-month period ended September 30, 2008, the insurance segment recorded Ps. 22.6 million in net income. In the same period, Galicia Seguros recorded gains of Ps. 20.7 million. This segment's net income was mainly due to: (i) Ps. 221.4 million of earned premiums, claims of Ps. 22.1 million, and acquisition costs of Ps. 90.2 million, (ii) net financial income of Ps. 20.2 million, and (iii) administrative expenses amounting to Ps. 30.0 million, of which approximately 41% corresponded to personnel expenses. Earned premiums for the twelve months ended September 30, 2008 were Ps. 129.4 million greater than in the same period of 2007, representing a 134% increase, mainly as a result of Galicia Seguros' performance. This company's growth in premiums earned mainly reflects group life insurance, home insurance and accidental death and dismemberment insurance sold through the Bank and the regional credit card companies. An alternative channel that helped to achieve such growth was the call center. Acquisition costs grew following the increase in underwritten premiums. The Ps. 13.9 million increase in administrative expenses was mainly due to the fact that a part of the value added tax is recorded at cost (certain life insurance products are exempt from such tax but the fees paid to the brokers and other expenses related thereto are charged with such tax), as well as salary increases and increases in other expenses within an inflationary context. It is important to mention that claims have remained at practically the same level of previous years; therefore the increase in insurance production did not cause an increase in claims, reflecting the strategy of focusing on businesses with a lower claims ratio and with a potential for margin improvement.

In the twelve-month period ended September 30, 2007, the insurance segment recorded Ps. 14.6 million in net income. In the same period, Galicia Seguros recorded gains of Ps. 15.6 million. This segment's net income was mainly due to: (i) Ps. 93.4 million of earned premiums and additional fees, claims of Ps. 20.8 million, and acquisition costs of Ps. 31.7 million, (ii) net financial income of Ps. 16.6 million, and (iii) administrative expenses amounting to Ps. 16.1 million, of which approximately 50% corresponded to personnel expenses.

In the twelve month period ended September 30, 2006, the insurance segment recorded Ps. 9.0 million in net income. In the same period, Galicia Vida and Galicia Patrimoniales (now merged into Galicia Seguros) recorded gains of Ps. 12.1 million. This segment's net income mainly consisted of: (i) earned premiums and additional fees of Ps. 44.5 million, claims of Ps. 21.8 million and acquisition costs of Ps. 13.4 million, (ii) net financial income of Ps. 17.0 million, of which Ps. 12.4 million represented income on Secured Loans, and (iii) administrative expenses amounting to Ps. 11.2 million, of which approximately 61% corresponded to personnel expenses.

Table of Contents**Other Grupo Businesses**

This segment includes the results of Net Investment, Galicia Warrants, Galval and GV Mandataria. In fiscal year 2008, this segment posted Ps. 0.1 million in net income, as compared to Ps. 1.2 million in fiscal year 2007 and Ps. 0.9 million in fiscal year 2006. In fiscal year 2008, this segment's results were attributable to Galicia Warrants' net income of Ps. 2.4 million, and were partially offset by losses of Ps. 1.2 million, Ps. 1.1 million and Ps. 0.02 million for Net Investment, Galval and GV Mandataria, respectively.

In fiscal year 2007, this segment's results were attributable to Galicia Warrant's net income of Ps. 1.3 million, which were partially offset by a Ps. 0.04 million loss of Galval.

In fiscal year 2006, this segment's results were attributable to Galval's and Galicia Warrants' net income of Ps. 1.0 million and Ps. 0.7 million, respectively, which were partially offset by the Ps. 0.8 million loss recorded by Net Investment.

Consolidated Assets

The structure and main components of our consolidated assets as of the dates indicated were as follows:

	2008		As of December 31, 2007		2006	
	Amounts	%	Amounts	%	Amounts	%
	<i>(in millions of Pesos, except percentages)</i>					
Cash and Due from Banks	3,405.1	13.8	2,960.0	13.0	2,294.8	9.7
Government and Corporate Securities	1,531.9	6.2	1,694.0	7.4	3,188.6	13.5
Loans to the Non Financial Public Sector	11,774.6	47.6	11,601.0	50.8	10,525.0	44.6
Hedge Bond to be Acquired					401.3	1.7
Other Receivables - Argentine Central Bank					1,733.3	7.3
Other Assets	8,024.2	32.4	6,573.7	28.8	5,472.4	23.2
Total	24,735.8	100.0	22,828.7	100.0	23,615.4	100.0

Of our Ps. 24,735.8 million total assets as of December 31, 2008, Ps. 24,439.8 million, equivalent to 98.8% of the total, corresponded to the Bank on a consolidated basis. The remaining 1.2% was attributable mainly to Sudamericana on a consolidated basis (Ps. 227.7 million). The composition of our assets shows an increase in the participation of the line items Cash and due from banks, Loans to the Non Financial Public Sector and Other Assets, to the detriment of Government and corporate securities.

The item Cash and due from banks mainly included cash for Ps. 986.7 million, balances held at the Argentine Central Bank for Ps. 2,036.2 million and balances held in correspondent banks for Ps. 382.3 million. The balance held at the Argentine Central Bank and part of the cash are computable for meeting the minimum cash requirements set by the Argentine Central Bank as explained under Item 5.B. Liquidity and Capital Resources-Liquidity.

Our holdings of government and corporate securities as of December 31, 2008 amounted to Ps. 1,531.9 million, of which Ps. 1,531.8 million were government securities. Our holdings of government and corporate securities are shown in more detail under Item 4. Information on the Company-Selected Statistical Information-Government and Corporate Securities.

Our total net loans amounted to Ps. 11,774.6 million, of which Ps. 11,720.5 million corresponded to the Bank (including the regional credit card companies' portfolios) and the remaining amount to Secured Loans held by Sudamericana. For more information on the Bank's loan portfolio, see Item 4. Information on the Company-Selected Statistical Information-Loan Portfolio.

Table of Contents

The Other assets item mainly includes the following items recorded on our balance sheet under Other Receivables Resulting from Financial Brokerage, unless otherwise noted:

- Ps. 1,824.9 million of forward purchases of Boden 2012 Bonds in connection with repurchase agreements (including the corresponding security margins recorded as Miscellaneous Receivables in the balance sheet).
- Ps. 1,164.9 million recorded under Bank Premises and Equipment, Miscellaneous Assets and Intangible Assets, excluding from the latter the deferred losses from *amparo* claims.
- Ps. 634.0 million corresponding to our holdings of debt securities and participation certificates issued by the Galtrust I Financial Trust, resulting from the securitization of loans to the provincial public sector in late 2000.
- Ps. 597.1 million of forward purchases of Discount Bonds in Pesos in connection with repurchase agreements (including the corresponding security margins recorded as Miscellaneous Receivables in the balance sheet).
- Ps. 445.2 million corresponding to Assets under Financial Leases.
- Ps. 408.9 million corresponding to holdings of the participation certificate in, and debt securities of, the special fund (referred to as Special Fund Former Almafuerde Bank) jointly formed by the Bank with other private-sector banks in order to facilitate the recovery of the assets of former Almafuerde Bank.
- Ps. 365.3 million corresponding to participation certificates in, and debt securities of, different financial trusts, created by the Bank or by third parties.
- Ps. 316.9 million recorded as an intangible asset, which reflect deferred losses in connection with *amparo* claims due to the difference between the amount paid to depositors (the depositors original contractual amount, collected by depositors in US Dollars or at the free market exchange rate) as a consequence of court orders, and the amount established by the pesification rules (conversion at the Ps. 1.40 per US Dollar exchange rate, plus CER adjustment and interest), net of the accumulated amortization, plus the amount of deferred amortization.
- Ps. 283.5 million corresponding to the minimum presumed income tax recorded under Miscellaneous Receivables.
- Ps. 258.4 million corresponding to balances deposited at the Argentine Central Bank as guarantees in favor of clearing houses.
- Ps. 57.3 million corresponding to equity investments.
- Ps. 46.6 million corresponding to debt securities, mostly of the Bank (Ps. 39.8 million) and the rest corresponding to securities issued by other companies.

Exposure to the Argentine Public Sector

The following table shows our total net exposure to the Argentine public sector as of December 31, 2008, 2007 and 2006. This exposure mainly consisted of exposure of the Bank.

	As of December 31,		
	2008	2007	2006
	<i>(in millions of Pesos)</i>		
Net Position in Government Securities	3,345.3	3,877.8	4,832.7
Trading and Investment Accounts	627.6	435.8	164.3
Boden 2012 Bonds	2,350.8	2,744.3	3,582.9
Bogar Bonds			366.5
Discount Bonds in Pesos and GDP-Linked Negotiable Securities	666.9	697.7	719.0
Loans	1,481.5	1,372.9	2,846.7
Financial Sector	107.9	107.4	107.4
Secured Loans and Others	1,373.6	1,265.5	2,739.3

Table of Contents

	2008	As of December 31, 2007	2006
		<i>(in millions of Pesos)</i>	
Other Receivables Resulting from Financial Brokerage	927.5	870.1	1,218.6
Boden 2012 Bonds (Hedge Bond)			401.3
Trusts Certificates of Participation and Securities	927.5	870.1	817.3
Total Assets ⁽¹⁾	6,054.3	6,120.8	8,898.0
Liabilities with the Argentine Central Bank			3,026.0
Net Exposure	6,054.3	6,120.8	5,872.0

(1) *Does not include deposits with the Argentine Central Bank, which constitute one of the items by which the Bank complies with the Argentine Central Bank's minimum cash requirements.*

As of December 31, 2008, our total exposure to the public sector amounted to Ps. 6,054.3 million, compared to Ps. 6,120.8 million and Ps. 8,898.0 million at the close of the two previous fiscal years, which represented a decrease of Ps. 66.5 million in 2008 and of Ps. 2,843.7 million in 2008 and 2007, on a combined basis.

Securitization of Assets

In the normal course of business, our operating subsidiaries (the Bank and the regional credit card companies) use the securitization of assets as a source of funding. The securitization of assets basically involves a company transferring assets to a trust and the trust funding the purchase by issuing securities that are sold to third parties. A trust is a special-purpose entity, not an operating entity; typically, a trust is set up for the single purpose of completing the securitization transaction, has a limited life and no employees. Trust securities can be publicly offered, which is the case in those financial trusts in which the Bank or the regional credit card companies acted as trustor. See note 30 to our audited financial statements for a description of the outstanding trusts as of December 31, 2008.

In 2008, 2007 and 2006, we generated funds through the securitization and sale of on-balance sheet and off-balance sheet loans of the Bank and the regional credit cards companies, for aggregate amounts of Ps. 644.3 million, Ps. 617.8 million, and Ps. 684.8 million, respectively. No gains or losses were recognized in the sale of these loans. As a result of these securitizations, we retained certain interests in those trusts through senior debt securities and certificates of participation in the amount of Ps. 101.1 million in fiscal year 2008, Ps. 101.0 million in fiscal year 2007 and Ps. 120.7 million in fiscal year 2006.

Funding

The Bank's and the regional credit card companies' lending activities are our main asset-generating businesses. Accordingly, most of our borrowing and liquidity needs are associated with these activities. We also have liquidity needs at the level of our holding company, which are discussed in Item 5.B. **Liquidity and Capital Resources-Liquidity-Holding Company on an Individual Basis**. Our objective is to maintain cost-effective and well diversified funding to support current and future asset growth in our businesses. For this, we rely on diverse sources of funding and have also engaged in a process of reducing the Bank's high cost liabilities incurred as a consequence of the 2001-2002 crisis. The use and availability of funding sources depends on market conditions, both local and foreign, and prevailing interest rates. Market conditions in Argentina include a structurally limited availability of domestic long-term funding.

Table of Contents

Our funding activities and liquidity planning are integrated into our asset and liability management and our financial risks management and policies. The liquidity policy of the Bank, our main subsidiary, is described in Item 5.B.

Liquidity and Capital Resources-Banco Galicia's Liquidity Management and our other financial risk policies, including interest rate, currency and market risks are described in Item 11. Quantitative and Qualitative Disclosures about Market Risk. Our funding sources are discussed below.

Traditionally, except for the period between the 2001-2002 crisis and the end of 2005, our primary source of funding has been the Bank's deposit taking activity. Although the Bank has access to Argentine Central Bank financing, management does not view this as a primary source of funding.

Other important sources of funding have traditionally included issuing Dollar-denominated medium- and long-term debt securities issued in foreign capital markets and borrowing from international banks and multilateral credit agencies. After the restructuring of its foreign debt in May 2004, the Bank has not relied on the issuance of new debt securities, having entered into two long term loan agreements with the IFC, in 2005 and 2007, for US\$90 million, with the purpose of funding long-term loans to SMEs. On the contrary, as part of the above-mentioned strategy of strengthening our balance sheet, the Bank began to prepay its restructured foreign debt (both bank loans and bonds maturing in 2010 and 2014). The regional credit card companies have issued debt securities in the local and foreign capital markets in the last few years.

Selling government securities under repurchase agreements has been another recurrent source of funding for the Bank. In 2008, because of the international crisis, the repurchase transactions of government securities decreased Ps. 273.2 million (principal and interest). Within its liquidity policy, the Bank considers its unencumbered liquid government securities holdings as part of its available excess liquidity. See Item 5.B. Liquidity and Capital Resources-Banco Galicia's Liquidity Management.

In the last few years, the securitization of assets in the local market has also become a significant and growing source of medium-term funding, for up to approximately four years for the Bank, while for the regional credit cards the terms are shorter (approximately two years). In fiscal year 2008, the securitization of loans generated funds of Ps. 261.5 million from the securitization of loans granted by the Bank on an individual basis, and of Ps. 382.8 million from the securitization of the regional credit-card companies' loan portfolios. See -Securitization of assets. The regional credit card companies fund their business through the issuance of debt securities in the local and international capital markets, borrowing from local financial institutions, asset securitization and debt with merchants generated in the ordinary course of business of any credit card issuing company. In 2008, the regional credit card companies issued negotiable obligations in an amount equal to Ps. 154.7 million.

Reduction of the Bank's debt with the Argentine Central Bank incurred as a consequence of the 2001-2002 crisis and of its restructured foreign debt was mainly funded with the proceeds from the sale of public-sector assets. During 2007, proceeds from the sale of Secured Loans and Bogar Bonds for Ps. 1,601.7 million (principal, interest and CER adjustment) were mostly applied to the prepayment of debt with the Argentine Central Bank and proceeds of the sale of Boden 2012 Bonds, for US\$190.8 million, were used for the prepayment of restructured foreign debt.

Table of Contents

Below is a breakdown of our funding as of the dates indicated:

	2008		December 31, 2007		2006	
	Amounts	%	Amounts	%	Amounts	%
	<i>(in millions of Pesos, except percentages)</i>					
Deposits	14,056.1	56.8	13,165.6	57.8	10,779.4	45.6

Domestic Financial Institutions	248.6	1.0	318.5	1.4	287.7	1.2
International Banks and Credit Agencies	941.5	3.8	733.3	3.2	870.5	3.7
Repurchases	982.8	4.0	1,256.0	5.5	1,033.5	4.4
Negotiable Obligations (Unsubordinated and Subordinated) ⁽¹⁾	2,932.5	11.9	3,105.6	13.6	3,676.0	15.6
Other obligations	3,728.6	15.0	2,595.2	11.3	2,334.3	9.9
Shareholders Equity	1,845.7	7.5	1,654.5	7.2	1,608.5	6.8
Total Funding	24,735.8	100.0	22,828.7	100.0	23,615.4	100.0

(1) Includes accrued interest, quotation differences, and CER adjustment where applicable.

As of December 31, 2008, deposits represented 56.8% of our funding, down from 57.8% as of December 31, 2007 and up from 45.6% as of December 31, 2006. Our deposit base has increased 6.8% in 2008 and 22.1% in 2007. In 2008, most of the increase in deposits (Ps. 1,084.9 million) was due to the increase in transactional deposits (deposits in current and savings accounts). The increase in 2007 was also the result of an increase in transactional deposits. All of the growth was due to deposits received by the Bank's Argentine operations. For more information on deposits, see

Item 4. Information on the Company-Selected Statistical Information-Deposits .

In March 2007, the Bank settled all of its debt from financial assistance from the Argentine Central Bank and currently has no debt with such entity in connection with the 2001-2002 crisis.

The advance for the acquisition of the Hedge Bond was also settled, because such Bond was fully subscribed for in April 2007 by using Secured Loans.

As of December 31, 2008, credit lines from international banks and credit agencies representing Dollar-denominated debt subject to foreign law amounted to Ps. 941.5 million. Of this total, Ps. 88.1 million represented debt of the Bank's Head Office, the restructuring of which was completed in May 2004, Ps. 585.5 million corresponded to trade loans, and Ps. 267.9 million corresponded to an IFC loan granted to the Bank in 2005 which increased at the end of 2007 with the signing of a new agreement. Credit lines from banks and international agencies increased to Ps. 941.5 million at the end of 2008 from Ps. 733.3 million as of December 31, 2007. The increase was mainly due to the use of the IFC loans and to the increase in trade loans.

Table of Contents

The decrease of the credit lines from banks and international agencies to Ps. 733.3 million at the end of 2007 from Ps. 870.5 million as of December 31, 2006 was mainly due to the Bank's repurchase of its loans due in 2010 and in 2014, in market transactions carried out during the fiscal year, for an aggregate principal amount of US\$188.3 million (US\$196.6 million of face value). It was also due to the amortization of loans due in 2010 in accordance with their terms and conditions (for US\$6.4 million) and to the partial prepayment of loans due in 2014 (for US\$2.3 million) at par and in reverse order to maturity, triggered by the Bank's capital increase, pursuant to the terms and conditions of the agreements subscribed for as part of the Bank's foreign debt restructuring completed in 2004. These decreases were partially offset by our borrowings of US\$80.0 million, in July 2007, which proceeds were used to capitalize the Bank. Our debt securities outstanding amounted to Ps. 2,932.5 million (principal and interest) as of December 31, 2008, as compared to Ps. 3,105.6 million as of December 31, 2007, and Ps. 3,676.0 million as of December 31, 2006. Of our debt securities outstanding at the end of fiscal year 2008, Ps. 2,507.6 million (only principal) corresponded to Dollar-denominated debt subject to foreign law and Ps. 369.4 million (only principal) corresponded to Peso-denominated debt of the regional credit-card companies structured as negotiable obligations. As of December 31, 2008, the breakdown of our Dollar-denominated debt was as follows:

Ps. 353.7 million and Ps. 934.0 million of 2010 Notes and 2014 Notes, respectively, and Ps.

987.0 million of 2019 Notes, all of them issued in 2004 and corresponding to new debt of the Bank resulting from the foreign debt restructuring completed in May of said year.

Ps. 55.7 million of negotiable obligations issued by Galicia Uruguay to refinance its deposits, which securities were issued either in connection with the original restructuring or with the exchange offers subsequently made by Galicia Uruguay to its customers.

Ps. 62.5 million and Ps. 69.1 million of Class VII and Class VIII Negotiable Obligations, respectively, maturing in 2009, issued by Tarjeta Naranja S.A.

Ps. 39.8 million of Series XIX Negotiable Obligations, maturing in 2009, issued by Tarjetas Cuyanas S.A.

Ps. 5.8 million of past due foreign debt included in the Bank's 2004 debt restructuring, the holders of which did not participate in such restructuring.

The decrease in our debt securities outstanding as of December 31, 2008 from the amount as of December 31, 2007 was mainly the consequence of the following: i) the payment of two principal installments for the 2010 Notes of 12.5% each, for a total of US\$68.4 million, ii) the cancellation in advance of 2014 Notes for US\$30.2 million (US\$32.2 million of face value), which were acquired in market transactions carried out during the fiscal year, and (iii) the reduction of Banco Galicia Uruguay's restructured debt structured as negotiable obligations by US\$25.0 million.

Table of Contents

The decrease in the balance of debt securities outstanding as of December 31, 2007 as compared to the amount as of December 31, 2006 mainly reflects the reduction of the Bank's foreign debt, pursuant to the following: i) the full amortization of the 2007 Notes for US\$38.6 million, ii) the payment of two principal installments of the 2010 Notes of 12.5% each, for a total of US\$88.2 million, iii) the partial cancellation in advance of 2010 Notes for US\$49.5 million (US\$79.2 million of face value), which were acquired in market transactions carried out during the fiscal year, iv) the cancellation in advance of 2014 Notes for US\$37.8 million (US\$40.5 million of face value), which were acquired in market transactions carried out during the fiscal year, and (v) the partial prepayment of 2014 Notes triggered by the Bank's capital increase, pursuant to the terms and conditions of the agreements subscribed for as part of the Bank's foreign debt restructuring. In addition, Banco Galicia Uruguay reduced by US\$16.0 million its restructured debt structured as negotiable obligations. These reductions were partially offset by the regional credit card companies' net issuance of negotiable obligations for Ps. 88.4 million.

For more information see -Contractual Obligations- below.

Ratings

In December 2008, Standard & Poor's granted Banco Galicia's 2010 Notes and 2014 Notes a *raA* rating, and it granted a *raA-* rating to Banco Galicia's Subordinated Notes due 2019, thus reflecting a *stable* outlook. Standard & Poor's notes that this reflects the expectations that Banco Galicia shall continue showing positive results that will contribute to an additional improvement of its capital level and shall continue gradually strengthening its balance sheet, with a higher reduction of its exposure to sovereign debt. The Bank's long- and short-term deposits were granted *raA* and *raA-1* ratings, respectively.

On September 5, 2008, Banco Galicia hired Moody's Latin America Calificadora de Riesgo S.A. to render its services. On December 29, 2008, Moody's issued its first rating report on the Bank and granted, nationally, an *Aa3.ar* rating to the outstanding notes mentioned in the paragraph above, while Peso-denominated deposits and deposits in foreign currency were granted *Aa2.ar* and *Ba1.ar* ratings, respectively.

During 2008, Tarjeta Naranja S.A. issued Class VII and Class VIII Notes, which are rated nationally by Fitch Argentina Calificadora de Riesgo S.A. as *A(arg)+* and *A1(arg)*, respectively.

In turn, Series XIX notes issued by Tarjetas Cuyanas S.A. were granted an *A2(arg)* rating by Fitch Argentina Calificadora de Riesgo S.A.

In May 2009, Evaluadora Latinoamericana granted Grupo Financiero Galicia's notes due in 2010 and in 2011 an *A+* rating.

Debt Programs

The ordinary shareholders' meeting of Grupo Financiero Galicia held on March 9, 2009 and a meeting of the Board of Directors of the same date created a Global Short-, Medium- and Long-Term Note Program, for a maximum outstanding amount of US\$60 million. This program was authorized pursuant to Resolution No 16113 of April 29, 2009 of the CNV. On March 16, 2009, and on April 24, 2009, the Board of Directors approved the terms and conditions of the issuance of the Class I, Series I and Series II Notes. Within the US\$60 million Global Short-, Medium- and Long-Term Note Program, on June 4, 2009 Grupo Financiero Galicia issued two series of bonds for a total amount of US\$45 million, with the following characteristics: (i) US\$34.4 million of Non-interest bearing Class I, Series I Notes, due on May 30, 2010, this bond was issued at a price of 92.68/100 and its yield will be 8%; and (ii) US\$10.6 million of 12.5% Class I, Series II Notes, due on May 25, 2011, this bond was issued at a price of 103.48/100 and its yield will be 10.5%. Interest is payable on the notes described in (ii) semiannually.

The Bank has a program outstanding for the issuance and re-issuance of non-convertible negotiable obligations, subordinated or non-subordinated, adjustable or non-adjustable, secured or unsecured, with a tenor from 30 days to up to the current permitted maximum (30 years), for a maximum outstanding face value during the period of such program of up to Ps. 1.0 billion or US\$342.5 million. The term of the program is for five years commencing on the date of approval by the CNV. The program was approved by the CNV on November 4, 2005. As of the date of this annual report, no debt had been issued under the program.

Table of Contents

Tarjeta Naranja S.A. has a program outstanding with the same characteristics, for a maximum outstanding face value during the period of such program of up to US\$350 million. The program was approved by the CNV on November 11, 2007. As of December 31, 2008, debt for a principal amount outstanding of US\$113.2 million had been issued under the program. Tarjetas Cuyanas S.A. has a program outstanding with the same characteristics, for a maximum outstanding face value during the period of such program of up to US\$80 million. The program was approved by the CNV on May 2, 2007. As of December 31, 2008, debt for a principal amount outstanding of US\$57 million had been issued under this program.

Contractual Obligations

Principal and interest. Includes the CER adjustment, where applicable.

(1) *Issued in 2004 as part of the restructuring of the foreign debt of the Bank's Head Office and its Cayman Branch.*

(2) *Interest payable in cash, semiannually, on January 1 and July 1 of each year, beginning on July 1, 2004.*

(3) *Floating Rate Notes Due 2010: Principal amortizes semiannually, on January 1 and July 1 of each year, beginning on July 1, 2006, in eight equal installments of 12.5% of principal at issuance or*

incurrence, until maturity on January 1, 2010, when the remaining 12.5% is due.

- (4) *Step-Up Rate Notes Due 2014: Principal amortizes semiannually, on January 1 and July 1 of each year, beginning on January 1, 2010, in eight equal installments of 11.11% of principal at issuance or incurrence, until maturity, when the remaining 4.86% is due (during 2007, the Bank made a cancellation in advance which was applied to the last installment, which modified the original cash flow). The rate increased 1% on January 1 of each year, until it reached 7% on January 1, 2008.*

- (5) *Subordinated Notes Due 2019: Interest paid in cash: 6% per annum from January 1,*

2004 until (but not including) January 1, 2014, payable semiannually, on January 1 and July 1 of each year, beginning on July 1, 2004. Unless the notes are previously redeemed, the annual interest rate will increase to 11% per annum from that date until (but not including) January 1, 2019. Interest paid in additional subordinated negotiable obligations due 2019: 5% per annum from January 1, 2004, to be paid on January 1, 2014 and January 1, 2019. Principal amortizes in full on January 1, 2019, unless the notes are previously redeemed at par plus accrued but unpaid interest, in whole or in part, at the Bank's option, at any time after the 2010 Notes and the 2014 Notes have been repaid in full

*and, otherwise,
in accordance
with the terms of
the agreements
governing such
notes.*

- (6) *The balance
represents debt
not tendered by
its holders to the
exchange
offered by the
Bank to
restructure its
foreign debt,
which was
completed in
May 2004.*

Table of Contents

- (7) *Interest payable in cash:*
Libor+78 b.p., per annum from January 1, 2004, until (but not including) January 1, 2014, payable semiannually, on January 1 and July 1 of each year, beginning on July 1, 2004. Unless the loans are previously redeemed, the annual interest rate will increase to Libor+578 b.p. per annum from that date until (but not including) January 1, 2019. Also pays interest in additional subordinated loans, due 2019: 5% per annum from January 1, 2004, to be paid on January 1, 2014 and January 1, 2019. Principal amortizes in full on January 1, 2019 unless the loans are previously redeemed at part plus accrued interest and additional amounts, if any,

in whole or in part at the Bank's option, in accordance with the terms of the agreements governing such loans.

(8) *Borrowings to finance international trade operations to Bank customers.*

(9) *Borrowing from Grupo Financiero Galicia to fund part of the subscription of the Bank's shares issued as part of its August 2007 capital increase. The principal of the loan amounts to US\$80 million. Interest accrues at a fixed rate of 7.75% per annum in the first year and in the second year it accrues at the 3-month Libor+350 b.p. Principal will be amortized as follows: US\$18 million are due in July 2008 and the remaining principal amount is due in July 2009.*

(10) *Corresponds to US\$10.0 million of principal at incurrence accruing Libor+550 b.p., with interest payable semiannually, in May and November of each year, and principal amortizing in 9 semiannual installments, beginning in May 2005 and ending in May 2009.*

(11) *Includes premiums.*

(12) *Issued in 2002 as part of the restructuring of Galicia Uruguay s deposits. Includes:*

2% Negotiable Obligations Due 2011: principal amortizes in 9 equal annual installments in September of each year, beginning in September 2003, the first 2 installments are of 15% of principal, and the remaining 7 are of 10% of principal. Interest is payable annually in September of each year, beginning in September 2003 and accrues at a fixed rate of 2% per annum.

Floating Rate Negotiable Obligations Due 2011: principal amortizes in 3 annual installments in December of each year, beginning in December 2009, the first 2 installments are of 30% of principal, and the remaining one is 40% of principal. Interest is payable semiannually in June and December of each year, beginning in December 2003, and accrues at Libor+300 b.p., and has a 7% cap.

Off- Balance Sheet Contractual Obligations

Operating Leases

As of December 31, 2008, we also had off-balance sheet contractual obligations arising from the leasing of certain properties used as a part of our distribution network. The estimated future lease payments in connection with these properties are as follows:

	<i>(In millions of Pesos)</i>
2009	44.81
2010	49.44
2011	52.77
2012	56.13

2013	58.60
2014 and After	60.25
Total	322.00

Other

As a shareholder of Aguas Cordobesas S.A., the Bank is a guarantor with respect to compliance with certain obligations arising from the concession contract signed by Aguas Cordobesas S.A. In addition, the Bank and the other shareholders committed, in certain circumstances, to provide financial support to the company if it was unable to fulfill the commitments it had undertaken with various international financial institutions.

The Bank, as a shareholder and proportionally to its 10.833% interest, is jointly responsible, to the Province of Córdoba, for contractual obligations under the concession contract for its entire term. Should any of the other shareholders fail to comply with the commitments arising from their joint responsibility, the province may force the Bank to assume the unfulfilled commitment, but only in the proportion and to the extent of the interest held by the Bank. See Note 3 to our consolidated financial statements.

Table of Contents**Off-Balance Sheet Arrangements**

Our off-balance sheet risk mainly arises from the Bank's activities.

In the normal course of its business, the Bank is a party to financial instruments with off-balance sheet risk which are entered into in order to meet the financing needs of its customers. These instruments expose us to credit risk in addition to the amounts recognized on our consolidated balance sheets. These financial instruments include commitments to extend credit, standby letters of credit, guarantees granted and acceptances.

Commitments to Extend Credit, Stand-By Letters of Credit and Guarantees Granted

The guarantees granted are surety guarantees in connection with transactions between two parties. Standby letters of credit and guarantees granted are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. Acceptances are conditional commitments for international trade transactions.

Commitments to extend credit are agreements to lend to a customer at a future date, subject to meeting certain contractual terms. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, total commitment amounts do not necessarily represent actual future cash requirements. We evaluate each customer's creditworthiness on a case-by-case basis.

We use the same credit policies in making commitments, conditional obligations and guarantees as we do for granting loans. In the opinion of management, our outstanding commitments and guarantees do not represent unusual credit risk.

Our exposure to credit loss in the event of non-performance by the other party to the financial instrument for commitments to extend credit, standby letters of credit, guarantees granted and acceptances is represented by the contractual notional amount of those investments.

Our credit exposure related to these items as of December 31, 2008, is summarized below:

	December 31, 2008 <i>(in millions of Pesos)</i>
Commitments to Extend Credit	1,003.4
Standby Letters of Credit	157.1
Guarantees Granted	208.9
Acceptances	69.5

In addition to the above mentioned commitments, as of December 31, 2007, purchase limits available for credit-card holders, of both the Bank and the regional credit card companies, amounted to Ps. 13,995.2 million.

Table of Contents

The credit risk involved in issuing letters of credit and granting guarantees is essentially the same as that involved in extending loan facilities to customers. In order to grant guarantees to our customers, we may require counter guarantees. As of December 31, 2008, these counter guarantees, classified by type, were as follows:

	December 31, 2008 <i>(in millions of Pesos)</i>
Preferred Counter Guarantees	34.7
Other Counter Guarantees	43.3

See note 25 to our audited consolidated financial statements.

Other

We account for checks drawn on us and other financial institutions, as well as other items in the process of collection, such as notes, bills and miscellaneous items, in memorandum accounts until the related item clears or is accepted. In management's opinion, the risk of loss on these clearing transactions is not significant. The amounts of clearing items in process as of December 31, 2008, were as follows:

	December 31, 2008 <i>(in millions of Pesos)</i>
Checks Drawn on the Bank	439.8
Checks Drawn on Other Banks	369.5
Bills and Other Items for Collection	1,322.1

With respect to fiduciary risk, we act as the trustee for trust agreements to guarantee obligations arising from various contracts between parties. As of December 31, 2008, the trust funds amounted to Ps. 509.8 million. In addition, we hold securities in custody, which as of December 31, 2008 amounted to Ps. 5,534.3 million.

See note 25 to our audited consolidated financial statements.

Critical Accounting Policies

We believe that the following are our critical accounting policies under Argentine Banking GAAP, as they are important to the portrayal of our financial condition and results of operations and require our most difficult, subjective and complex judgment and the need to make estimates about the effect of matters that are inherently uncertain.

Allowance for Loan Losses

Our allowance for loan losses including the allowance for loan losses of the regional credit card companies is maintained in accordance with Argentine Central Bank rules. Under such rules, a minimum allowance for loan losses is calculated primarily based upon the classification of Banco Galicia's commercial loan borrowers and upon delinquency aging (or the number of days the loan is past due) for individual loan borrowers of both the Bank and the regional credit card companies and for the Bank's commercial loans of less than Ps. 500,000. Although we are required to follow the methodology and guidelines for determining the minimum loan loss allowance as set forth by the Argentine Central Bank, we are allowed to establish additional allowances for loan losses. The determination of the allowance for loan losses requires a significant degree of judgment.

Table of Contents

For commercial loans, we are required to classify all of our commercial loan borrowers. In order to perform the classification, we must consider the management and operating history of the borrower, the present and projected financial situation of the borrower, the borrower's payment history and ability to service the debt, the capability of the borrower's internal information and control systems and the risk in the sector in which the borrower operates. We apply the minimum loss percentages required by the Argentine Central Bank to our commercial loan borrowers based on the loan classification and the nature of the collateral, or guarantee in respect of the loan. In addition, based on the overall risk of the portfolio, we consider whether or not additional loan loss reserves in excess of the minimum required are warranted.

For our consumer loan portfolio, including the loan portfolios of the Bank and the regional credit card companies, we classify loans based upon delinquency aging, consistent with the requirements of the Argentine Central Bank. Minimum loss percentages required by the Argentine Central Bank are also applied to the totals in each loan classification.

Other Receivables Resulting from Financial Brokerage and Miscellaneous Receivables

We carry other receivables resulting from financial brokerage and miscellaneous receivables net of allowances for uncollectible amounts. Our judgment regarding the ultimate collectibility is performed on an account-by-account basis and considers our assessment of the borrower's ability to pay based on factors such as the borrower's financial condition, past payment history, guarantees and past-due status.

Goodwill

Goodwill is carried at cost less accumulated amortization. The carrying amount of goodwill is analyzed for impairment based on estimates of future undiscounted cash flows generated by the business acquired. The estimate of future cash flows requires complex management judgment.

U.S. GAAP Critical Accounting Policies

Additional information in connection with critical accounting policies for U.S. GAAP purposes follows.

Other-than-temporary impairment

Under U.S. GAAP, Government bonds, including Boden 2012 and Discount Bonds, and certificates of participation in the Galtrust I Financial Trust and in the Almafuerde Trust, were classified as available-for-sale securities, and therefore, carried at fair value with changes in the fair value reflected in other comprehensive income for the years ended December 31, 2006 and 2007.

Table of Contents

As of December 31, 2008, the amortized cost exceeded the fair value of these securities by Ps. 846.8 million. Therefore, for U.S. GAAP purposes, we have recorded an other-than-temporary impairment of these securities, based on a variety of factors, including the length of time and extent to which the market value has been less than cost, and our intent and ability to hold these securities to recovery.

The fair value of Government bonds was determined on the balance sheet date, based on their quoted market price. To determine the fair value of the certificates of participation in the Galtrust I and the Almafuerde Trust, valuation models were used which consider certain assumptions in estimating future cash flows and a rate under which the cash flows are discounted. These fair values will constitute the new cost basis for these investments.

In the event that all of the amortized cost of our investment in Government securities becomes recoverable under U.S. GAAP, the corresponding recovery would be credited to income in the period the determination was made.

Allowance for Loan Losses

Under U.S. GAAP, the Bank considers loans to be impaired when it is probable that all amounts of principal and interest will not be collected according to the contractual terms of the loan agreement. The allowance for significant impaired loans are assessed based on the present value of estimated future cash flows discounted at the current effective loan rate or the fair value of the collateral in the case where the loan is considered collateral-dependent. An allowance for impaired loans is provided when discounted future cash flows or collateral fair value is lower than book value.

In addition, if necessary, a specific allowance for loan losses is established for individual loans, based on regular reviews of individual loans, recent loss experience, credit scores, the risk characteristics of the various classifications of loans and other factors directly influencing the potential collectibility and affecting the quality of the loan portfolio. To calculate the allowance required for smaller-balance impaired loans and unimpaired loans, historical loss ratios are determined by analyzing historical losses. Loss estimates are analyzed by loan type and thus for homogeneous groups of clients. Such historical ratios are updated to incorporate the most recent data reflecting current economic conditions, industry performance trends, geographic or obligor concentrations within each portfolio segment, and any other pertinent information that may affect the estimation of the allowance for loan losses.

Many factors can affect the Bank's estimates of allowance for loan losses, including volatility of default probability, migrations and estimated loss severity.

A ten percent decrease in the expected cash flows of significant impaired loans individually analyzed could result in an additional impairment of approximately Ps. 11.9 million.

A ten percent increase in the historical loss ratios for loans collectively analyzed could result in an additional impairment of approximately Ps. 5.2 million.

These sensitivity analyses do not represent management's expectations of the deterioration in risk ratings or the increases in loss rates but are provided as hypothetical scenarios to assess the sensitivity of the allowance for loan and lease losses to changes in key inputs. We believe the risk ratings and loss severities currently in use are appropriate and represent management's expectations about the credit risk inherent in its loan portfolio.

Table of Contents

Determining the allowance for loan losses requires significant management judgments and estimates including, among others, identifying impaired loans, determining customers' ability to pay and estimating the fair value of underlying collateral or the expected future cash flows to be received. Actual events are likely to differ from the estimates and assumptions used in determining the allowance for loan losses.

Fair Value Estimates

A portion of our assets is carried at fair value, including trading and available-for-sale securities, retained interests in assets transferred to financial trusts, futures and forwards transactions.

SFAS 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SFAS 157, among other things, requires Grupo Financiero Galicia to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

In addition, SFAS 159 provides an option to elect fair value as an alternative measurement for selected financial assets, financial liabilities, unrecognized firm commitments and written loan commitments not previously recorded at fair value. Under SFAS 159, fair value is used for both the initial and subsequent measurement of the designated assets, liabilities and commitments, with the changes on fair value recognized in net income. As a result of SFAS 159 analysis, Grupo Financiero Galicia has not elected to apply fair value accounting for any of its financial instruments not previously carried at fair value.

Fair Value Hierarchy

SFAS 157, defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

SFAS 157 establishes a three-level valuation hierarchy for disclosure of fair value measurements. The valuation hierarchy is based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. The three levels are defined as follows:

Level 1: inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2: inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the asset or liability.

Inputs include the following:

- (a) Quoted prices for similar assets or liabilities in active markets;
- (b) Quoted prices for identical or similar assets or liabilities in non-active markets;
- (c) Pricing models whose inputs are observable for substantially the full term of the asset or liability; and
- (d) Pricing models whose inputs are derived principally from or corroborated by observable market data through correlation or other means.

Level 3: inputs to the valuation methodology are unobservable and significant to the fair value measurement.

Table of Contents

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

Determination of Fair Value

Fair value is based upon quoted market prices, where available. If listed prices or quotes are not available, fair value is based upon internally developed models that use primarily market-based or independently-sourced market parameters, including interest rate yield curves, option volatilities and currency rates. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. These adjustments include amounts to reflect counterparty credit quality, the Bank's creditworthiness, liquidity and unobservable parameters that are applied consistently over time.

Grupo Financiero Galicia believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies, or assumptions, to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

Impairment of Assets Other Than Loans

Certain assets, such as goodwill and equity investments are subject to an impairment review. Asset impairment charges require considerable judgment and are recorded when market value declines below the carrying value, for declines other-than-temporary, or where the cost of the asset is deemed to not be recoverable.

Goodwill impairment exists when the fair value of the reporting unit to which the goodwill is allocated is not enough to cover the book value of its assets and liabilities and the goodwill. The fair value of the reporting units is estimated using discounted cash flow techniques. The sustained value of the majority of the goodwill is supported ultimately by revenue from our banking and credit-card businesses. A decline in earnings as a result of a lack of growth, or our inability to deliver cost-effective services over sustained periods, could lead to a perceived impairment of goodwill, which would be evaluated and, if necessary, recorded as a write-down in our consolidated income statement. On an annual basis, or as circumstances dictate, management reviews goodwill and evaluates events or other developments that may indicate impairment in the carrying amount. The evaluation methodology for potential impairment is inherently complex and involves significant management judgment in the use of estimates and assumptions. These estimates involve many assumptions, including the expected results of the reporting unit, an assumed discount rate and an assumed growth rate for the reporting unit.

As of December 31, 2008, Grupo Financiero Galicia performed the impairment test of the goodwill related to the acquisition of certain loan portfolio of the ABN-AMRO Bank. As a result of this analysis, an impairment loss was recognized.

The fair value of equity investments is determined using discounted cash flow techniques. This technique involves complex management judgment in terms of estimating the future cash flows of the companies and in defining the applicable interest rate to discount those cash flows.

Table of Contents

Deferred Tax Asset Valuation Allowance

Deferred tax assets and liabilities are recorded for the estimated future tax effects of temporary differences between the carrying amounts of assets and liabilities recorded for accounting and tax reporting purposes and for the future tax effects of net operating loss carryforwards. We had a significant amount of deferred tax assets as of December 31, 2008, 2007 and 2006. Recognition of those deferred tax assets is subject to management's judgment based on available evidence that realization is more likely than not and they are reduced, if necessary, by a valuation reserve.

Management's judgment on the likelihood that deferred tax assets can be realized is subjective and involves estimates and assumptions about matters that are inherently uncertain. This judgment involves estimating future taxable income and the timing at which the temporary differences between book and taxable income will be reversed. Underlying estimates and assumptions can change over time, influencing our overall tax positions, as a result of unanticipated events or circumstances.

During 2006, the Bank received 90.8% of the Hedge Bond and settled the related advance granted by the Argentine Central Bank in cash and with government securities. Additionally, the Bank prepaid financial assistance granted by the Argentine Central Bank mainly using the proceeds of the sale of Secured Loans and government securities. As a result, the Bank substantially reduced the differences between Argentine Banking GAAP and U.S. GAAP and its corresponding deferred tax effect.

We had significant accumulated tax loss carryforwards as of December 31, 2008 and 2007. Based on the analysis performed, management believes that we will recover only temporary differences with future taxable income.

Therefore, it is more likely than not that the net operating tax loss carryforwards and presumed minimum income tax will not be recovered in the carryforward period and hence, a valuation allowance was provided against these amounts as of December 31, 2008, 2007 and 2006.

In the event that all of our net deferred tax assets in the future become realizable under U.S. GAAP, an adjustment to our deferred tax assets would be credited to income tax expense in the period the determination was made.

Assets Not Recognized Under U.S. GAAP

Under Financial Accounting Standards Board Statement of Financial Accounting Concepts No. 6, Elements of Financial Statements, assets are defined as "... probable future economic benefits obtained or controlled by an entity as a result of past transactions or events". In addition, one of the three essential characteristics of an asset is that an entity can obtain the benefit and can control others' access to it. Determining if a company has control of an asset involves in certain cases some judgment.

Table of Contents

At the end of 2005, the Hedge Bond was pending receipt in full and the right to purchase the Hedge Bond was not considered an asset, as the Bank could not obtain the benefit of the Hedge Bond given that the transaction had not been approved by the Argentine Central Bank and the Bank had not remitted funds to the Argentine Central Bank. The liability under U.S. GAAP was not recognized until the Bank actually entered into the financing arrangement. For U.S. GAAP purposes, the amounts recognized under Argentine Banking GAAP had to be fully reversed as the Hedge Bond to be received was not considered to be an asset under U.S. GAAP. As of December 31, 2006, with the delivery to the Bank of 90.8% of the Hedge Bond, the adjustment made the prior year was reversed in the same proportion, as the Bank had acquired control of 90.8% of the asset that previously was not recognized as such. The remaining 9.2% of the Hedge Bond pending receipt as of December 31, 2006, and the related advance was accounted for at fair value, as an option contract in accordance with SFAS 133.

As of December 31, 2008, 2007 and 2006, under Argentine Banking GAAP, the Bank had recorded under Intangible Assets the difference arising from the reimbursement of Reprogrammed Deposits at the market exchange rate pursuant to *amparo* claims and the carrying value of these deposits. The receivable for differences related to *amparo* claims does not represent an asset under U.S. GAAP.

Securizations

Under U.S. GAAP, there are two key accounting determinations that must be made relating to securitizations. A decision must be made as to whether a transfer would be considered a sale under U.S. GAAP, resulting in the transferred assets being removed from our consolidated balance sheet with a gain or loss recognized. Alternatively, the transfer would be considered a secured borrowing, resulting in recognition of a liability in our consolidated balance sheet. The second key determination to be made is whether the securitization entity must be consolidated and included in our consolidated balance sheet or whether such entity is sufficiently independent that it does not need to be consolidated.

If the securitization entity's activities are sufficiently restricted to meet certain accounting requirements in order to be considered a qualifying special-purpose entity (QSPE), the securitization entity is not consolidated by the seller of the transferred assets. Additionally, under FASB Interpretation No. 46, if securitization entities other than QSPEs meet the definition of a VIE, we must evaluate whether it is the primary beneficiary of the entity and, if so, must consolidate it.

Certain of our securitization transactions meet the criteria for sale accounting and non-consolidation. As established by FAS 140 these criteria are: (i) the transferred assets have been isolated from the transferor-put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership, (ii) each transferee (or, if the transferee is a QSPE, each holder of its beneficial interests) has the right to pledge or exchange the assets (or beneficial interests) it received, and no condition both constrains the transferee (or holder) from taking advantage of its right to pledge or exchange and provides more than a trivial benefit to the transferor, and (iii) the transferor does not maintain effective control over the transferred assets through either (1) an agreement that both entitles and obligates the transferor to repurchase or redeem them before their maturity or (2) the ability to unilaterally cause the holder to return specific assets, other than through a cleanup call. See -U.S. GAAP and Argentine Banking GAAP Reconciliation.

Table of Contents

Principal Trends

Related to Argentina

Economic prospects for fiscal year 2009 are less favorable than they were in previous years. Continued uncertainty in international financial markets, and bleak growth expectations of its principal commercial partners, create a challenge that might interrupt the high-growth cycle experienced over the last few years in Argentina. GDP figures for the fourth quarter of the year, which demonstrated a 0.3% decrease as compared to the previous quarter in the seasonality-free series, suggest that this trend might continue during the first half of the year, and GDP could actually fall slightly during fiscal year 2009. Notwithstanding, both the duration and the depth of the decrease in business levels will depend largely on how fast the international crisis is overcome and the effectiveness of public policies designed to mitigate its impact.

In 2009, the Argentine financial system is expected to become increasingly sound as a result of positive net results. Net financial revenues; however, are likely to grow at a slower pace, as a result of decreased financial brokerage activity with the private sector, while income from services is likely to have more relative importance. Financial institutions are expected to focus on reviewing their administrative expenses and carefully monitoring portfolio quality. While an increase in non-performing loans is possible, the financial system has a high level of bad-debt provisions, which should enable it to deal with a more complex context. For additional information on these trends, see Item 5A. Operating Results-The Argentine Economy, Financial System and Insurance Industry in the Three Years Ended December 31, 2008.

These prospects should be analyzed in the light of the considerations noted under Item 3. Key Information-Risk Factors.

Related to Us

Under this section we discuss the trends relating to Banco Galicia, as it is our principal asset. Substantial growth in the business levels of the Bank over the last few years has resulted in higher business volumes and has had a positive impact on our net financial income and income from services. This growth has occurred notwithstanding the fact that net financial income is still low as compared to aggregate operating income. As a result, the Bank needs to continue to reduce the amount of low-performance assets, mainly certain public sector assets, and its foreign currency position, because the Bank's main foreign-currency assets are represented by Boden 2012 Bonds, which accrue interest at the Libor rate, while the Bank continues to develop its strategy of enhancing its financial brokerage business with the private sector. The Bank expects this strategy to continue to boost net financial income and income from services in 2009. The Bank further expects the aggregate increase in administrative expenses and bad-debt provisions to remain below the growth levels of operating income, although the credit environment is expected to deteriorate after several years of low risk, as a result of the substantial growth in loans provided.

The Bank's strategy to increase profitability from recurring transactions is to increase the volume of banking brokerage business with the private sector, although it foresees that the growth rate of loans to the private sector will probably be lower than it used to be in the past few years. Additionally, the Bank has taken some important steps in order to strengthen its financial condition, by reducing exposure to the public sector, increasing capitalization, and substantially reducing its external debt. The Bank expects to maintain this foreign debt reduction policy, while minimizing losses, to the extent permitted by the Bank's liquidity position.

Table of Contents

However, our outlook should be analyzed in the light of the considerations noted under Item 3 Key Information-Risk Factors . The Argentine economy has historically been very volatile, which has negatively affected the financial system's volume and growth. Volatility now prevailing in the international context could also affect the financial markets and the economy in Argentina.

Item 5.B. Liquidity and Capital Resources

Liquidity Holding Company on an Individual Basis

We generate our net earnings/losses from our operating subsidiaries, especially Banco Galicia, our main operating subsidiary. Until 2001, the Bank was the primary source of funds available to us in the form of dividends.

The Bank's dividend-paying ability was impaired since late 2001 by the effects of the 2001-2002 crisis on its liquidity and income-generation capacity. In addition, there are other restrictions on the Bank's ability to pay dividends resulting from applicable Argentine Central Bank rules and the loan agreements entered into by the Bank as part of its foreign debt restructuring. We have not received dividends from the Bank since October 2001. See Item 8. Financial Information-Dividend Policy and Dividends.

The extent to which a banking subsidiary may extend credit or otherwise provide funds to a holding company is limited by Argentine Central Bank rules. For a description of these rules, see Item 4. Information on the Company-Argentine Banking Regulation-Lending Limits .

On a stand-alone basis, our current policy is to retain earnings to pay for our operating expenses, support the growth of certain of our businesses and repay our liabilities. Cash available to support the growth of certain of our businesses will be limited until said loan is fully repaid.

As of December 31, 2008, Grupo Financiero Galicia, on an individual basis, had cash and due from banks of Ps. 0.2 million and short-term investments of Ps. 27.3 million. Grupo Financiero Galicia's short-term investments were made up of: (i) special current account deposits of Ps. 15.2 million, (ii) time deposits of Ps. 11.8 million, (iii) government securities from abroad of Ps. 0.2 million, and (iv) investments in mutual funds of Ps. 0.1 million.

As of December 31, 2007, on a non-consolidated basis, we had cash and due from banks in the amount of Ps. 10.7 million and short-term investments for Ps. 16.4 million.

As of December 31, 2006, we held US\$ 107.0 million of face value of 2014 Notes and US\$ 4.3 million of face value of 2019 Notes. In January 2007, we sold the latter and part of our 2014 Notes and acquired loans maturing in 2019 issued by the Bank as part of its foreign debt restructuring. As of December 2007, we held US\$ 10.2 million of face value of such loans. In July 2007, in an exercise of our preemptive rights, we used our remaining US\$ 102.2 million of face value of 2014 Notes and cash to subscribe for 93.6 million shares of the Bank, in the offering carried out by the Bank. To fund such cash subscription we entered into an US\$ 80 million loan agreement in July 2007. See Item 10.

Additional Information-Material contracts and Item 3. Key Information-Risk Factors-Risk factors relating to Us-Our ability to repay indebtedness at the holding company level may be impaired due to the lack of liquidity at such level.

Each of our subsidiaries is responsible for their own liquidity management. For a discussion of the Bank's liquidity management, see -Banco Galicia's Liquidity Management-Banco Galicia (Unconsolidated) Liquidity Management.

Consolidated Cash Flows

Our consolidated statements of cash flows were prepared using the measurement methods prescribed by the Argentine Central Bank, but in accordance with the presentation requirements of SFAS No. 95, Statement of Cash Flows. See our consolidated cash flow statements as of and for the fiscal years ended December 31, 2008, December 31, 2007, and December 31, 2006, included in this annual report.

As of December 31, 2008, on a consolidated basis, we had Ps. 4,795.4 million in available cash (defined as total cash on hand and cash equivalents), representing a Ps. 1,029.2 million increase from the Ps. 3,766.2 million as of December 31, 2007. At the end of fiscal year 2007, our available cash (and cash equivalents) had decreased in the amount of Ps. 1,222.0 million from the Ps. 4,988.2 million of available cash (and cash equivalents) at the end of the prior fiscal year.

Effective May 14, 2007, and in accordance with the provisions of Argentine Central Bank's Communiqué A 4667, cash equivalents are comprised of the following: Argentine Central Bank debt instruments (Nobac and Lebac) having a remaining maturity that does not exceed 90 days, securities in connection with reverse repurchase transactions with the Argentine Central Bank, short term call loans to corporations, local interbank loans, and overnight placements in correspondent banks abroad. Cash equivalents also comprise, in the case of the regional credit card companies, time deposit certificates and mutual fund shares.

The table below summarizes the information from our consolidated statements of cash flows for the three fiscal years ended December 31, 2008, which is also discussed in more detail below.

	2008	December 31, 2007	2006

Table of Contents

Our investing activities primarily consist of our origination of loans and other credits to the private sector, net of loan portfolio securitizations. In the last years, these activities have also included reducing our public-sector exposure through both sales and collections. Our financing activities primarily include raising customer deposits, in addition to entering into sales of government securities under repurchase agreements, issuing bonds in the local and foreign capital markets and borrowing from foreign and local banks and international credit agencies. In the last few years, these activities have also included reducing expensive liabilities incurred as a consequence of the 2001-2002 crisis. As shown by the table above, and explained in more detail below, in the last three years and consistently with our strategy of strengthening our balance sheet, we have generated significant amounts of cash from our exposure to the public sector, which represents mainly the Bank's exposure, for approximately Ps. 3,080.8 million in 2006 and Ps. 2,683.9 million and Ps. 302.4 million, respectively, in 2007 and 2008, and have used cash generated by such assets (as well as these assets directly) mainly to repay debt with the Argentine Central Bank and restructured foreign debt, both representing liabilities incurred as a consequence of or related to the 2001-2002 crisis. Such public-sector assets are associated both with our operating activities (mainly Bogar Bonds and Boden 2012 Bonds) and our investing activities (Secured Loans). Cash was generated by proceeds from the sale of such public-sector assets as well as from the collection of principal and interest on such assets. Proceeds from Bogar Bonds and Secured Loans were mostly used for the repayment of Argentine Central Bank debt while proceeds from Boden 2012 Bonds were used for the repayment of restructured foreign debt.

Proceeds from Boden 2012 Bonds were particularly significant in fiscal year 2006 when, due to the acquisition of most of the Hedge Bond, the Bank collected past due amortization and interest on the acquired Boden 2012 Bonds, corresponding to that year and to the prior fiscal year. In addition, sales of Secured Loans were most significant in 2006. The cash accumulated at the close of fiscal year 2006 was applied to the repayment of Argentine Central Bank debt and restructured foreign debt in early 2007.

In 2008, due to the international economic crisis and its local impact, our main source of funds was funds available at the end of the fiscal year due to a decrease in loans to the private sector (in replacement of our principal source of funding: deposits).

In years 2007 and 2006, due to the aggressive repayment of the above-mentioned liabilities, cash and cash equivalents generated by operating activities were used by investing activities and financing activities, except in fiscal year 2006 in which investing activities actually provided cash due to sales of Secured Loans. However, cash was generated also, to a large extent, by deposit raising and other sources (securitizations of loans, by both the Bank and the regional credit card companies, repurchases and bank borrowings in the case of the Bank and negotiable obligations issuances by the regional credit card companies) in amounts sufficient to fund our growing business with the private sector and the significant increases in our lending to such sector.

Table of Contents

Management believes that cash flows from operations and available cash and cash equivalent balances, will be sufficient to fund our financial commitments and capital expenditures for fiscal year 2009.

Cash Flows from Operating Activities

In fiscal year 2008, net cash provided by operating activities exceeded our net income of Ps. 176.8 million and amounted to Ps. 888.6 million, due to the depreciation and amortization of intangibles assets, which represent non-cash expenses, of Ps. 161.3 million, loan loss provisions, which, similarly, do not require cash at the time of provision and which, net of reversals, amounted to Ps. 335.7 million and a decrease of Ps. 839.2 million of government securities attributable to the collection of amortization and interest on Boden 2012 Bonds for Ps. 621.1 million, sales of Boden 2012 Bonds and Argentine bonds for Ps. 68.0 million and Ps. 64.5 million of Argentine Central Bank debt instruments (Nobac and Lebac) having a remaining maturity that exceed 90 days. In addition, net cash was provided by other fluctuations in operating assets and liabilities: (i) Ps. 113.2 million capitalization of CER adjustment, (ii) Ps. 86.8 million of interest on repurchases, (iii) Ps. 76.0 million of minimum presumed income tax, and (iv) Ps. 79.3 million of securitization of loans which represents non-cash income. Cash generated from operating activities was lower than in fiscal year 2007, basically because of fewer sales of government securities.

In fiscal year 2007, net cash provided by operating activities exceeded our net income and amounted to Ps. 2,449.8 million, due to depreciation and amortization of intangibles assets, which represent non-cash expenses, for Ps. 214.6 million, and loan loss provisions, which, similarly, do not require cash at the time of provision and which, net of reversals, amounted to Ps. 269.2 million. In addition, net cash was provided by the following fluctuations in operating assets and liabilities: (i) a Ps. 1,589.5 million decrease in government securities mainly attributable to sales of Bogar Bonds excluding CER adjustments for Ps. 208.0 million, sales of Boden 2012 Bonds for Ps. 601.5 million, collection of amortization and interest on Boden 2012 Bonds for Ps. 639.9 million, and collection of amortization and interest on Bogar Bonds and Secured Loans, (ii) Ps. 485.6 million collection of the CER adjustment associated with Bogar Bonds sold, net of payments for Ps. 161.3 million on other debt (premiums on repurchases, short-term loans, etc.). Cash generated from operating activities was lower than in fiscal year 2006, basically because in fiscal year 2006 collection on Boden 2012 Bonds was of an extraordinary amount, while such collection was normalized in 2007.

In 2006, net cash provided by operating activities amounted to Ps. 3,548.1 million, due to depreciation and amortization, of Ps. 92.9 million, and loan loss provisions net of reversals of Ps. 80.9 million. In addition, net cash was provided by the following fluctuations in operating assets and liabilities: (i) a Ps. 1,267.5 million decrease in government securities, mainly due to sales of Bogar Bonds and the monthly collection of principal and interest on those bonds (excluding the CER adjustment), for Ps. 1,254.1 million, (ii) a Ps. 1,064.4 million decrease in other assets, mainly attributable to proceeds from Boden 2012 Bonds, for Ps. 1,126.2 million (collection of past due amortization and interest on Boden 2012 Bonds corresponding to the portion of the Hedge Bond that was pending receipt as of the end of fiscal 2005 and that was delivered to us in late 2006, and amortization and interest on Boden 2012 Bonds sold under agreements to repurchase), (iii) collection of Ps. 891.9 million associated with the CER adjustment mainly corresponding to public-sector assets sold, and (iv) a Ps. 162.3 million increase in debt with retailers of the regional credit card companies. The increase from the amount generated in 2005 is attributable to greater proceeds from our exposure to the public sector, mainly collection of past due principal and interest on Boden 2012 Bonds when these bonds were acquired and the cashing in of the CER adjustment on Secured Loans sold.

Table of Contents

Cash Flows from Investing Activities

In fiscal year 2008, net cash generated by investing activities decreased to Ps. 1,057.1 million. This decrease was mainly attributable to the decrease of Ps. 1,501.3 million in our private-sector loan portfolio. In addition, cash equal to Ps. 403.1 million was applied to bank premises and equipment, miscellaneous and intangible assets, including payments of deposits pursuant to *amparo* claims. Cash used by investing activities decreased from 2007, as our private-sector loan portfolio decreased, because of the international financial crisis and its local impact.

In fiscal year 2007, net cash used by investing activities increased to Ps. 1,715.7 million. This increase was mainly attributable to the use of Ps. 1,410.8 million to fund the increase in the Bank's loan portfolio resulting from a Ps. 2,027.8 million net increase in our private-sector loan portfolio (net of securitizations for Ps. 617.0 million) and was partially offset by the sale of Secured Loans. In addition, cash for Ps. 287.6 million was applied to bank premises and equipment, miscellaneous and intangible assets, mainly representing payments of deposits pursuant to *amparo* claims. Cash used by investing activities increased from 2006, as our private-sector loan portfolio increased, loan securitization was slightly lower and less cash was generated by the sale of Secured Loans.

In fiscal year 2006 investing activities generated cash for Ps. 689.3 million, mainly due to the Ps. 894.1 million net decrease in the Bank's loan portfolio resulting from the sale of Secured Loans, which more than offset the net increase in loans to the private sector. The use of cash to extend loans to the private sector was only of Ps. 27.3 million because this amount is net of the securitized loans of both the Bank and the regional credit card companies, which generated cash for Ps. 684.9 million in aggregate. In addition, cash for Ps. 196.3 million was applied to bank premises and equipment, miscellaneous and intangible assets, mainly representing payments of deposits pursuant to *amparo* claims.

Cash Flows from Financing Activities

In fiscal year 2008, financing activities used cash in the amount of Ps. 1,065.6 million, mainly due to:

- (i) a Ps. 474.0 million net decrease in long term credit facilities, mainly corresponding to: (a) payments of interest on restructured debt for US\$ 49 million, (b) the payment of two amortization installments on debt due 2010 for US\$ 68.4 million, (c) the prepayment of the Bank's 2014 Notes for US\$ 30.2 million, (d) a reduction of US\$ 24.6 million of Banco Galicia Uruguay's restructured debt structured as negotiable obligations, (e) an increase of Ps. 153.6 million of IFC loans and (f) a Ps. 80.5 million net decrease in funds obtained by the regional credit card companies through the issuance of negotiable obligations;
- (ii) a Ps. 376.6 million net decrease in repurchase transactions;

Table of Contents

(iii) a Ps. 156.6 million net decrease in short-term borrowings, mainly due to: (a) the decrease in borrowings from local and foreign banks, for Ps. 81.0 million and (b) the payment of US\$ 24.0 million as part of a US\$ 80 million loan granted to us in last year; and

(iv) a Ps. 57.0 million decrease in deposits, corresponding to: (a) a decrease of Ps. 908.4 million in time deposits and (b) an increase of Ps. 868.1 million in demand deposits.

In fiscal year 2007, financing activities used cash in the amount of Ps. 2,003.9 million, mainly due to a Ps. 1,752.5 million net increase in deposits, a Ps. 229.9 million net increase in repurchase transactions, a Ps. 174.9 million net increase in long term credit facilities (representing funds obtained by the regional credit card companies through the issuance of negotiable obligations), and a Ps. 407.5 million increase in funds obtained mainly from financial institutions and credit agencies (including part of the US\$ 80 million loan granted to us and a Ps. 102.9 million credit line from the Inter-American Development Bank for on lending to SMEs), which increases were more than offset by the following:

(i) a Ps. 1,823.5 million decrease in long-term liabilities, mainly corresponding to: (a) payments of interest on restructured debt for Ps. 280.0 million, (b) principal amortization of the 2007 Notes for Ps. 121.6 million, (c) payments by the regional credit card companies on negotiable obligations for Ps. 151.0 million, (d) repurchases of loans due 2010 and 2014 for Ps. 593.3 million, (e) payment of two amortization installments on debt due 2010 for Ps. 277.9 million, (f) prepayment of 2010 Notes for Ps. 155.9 million and of 2014 Notes for Ps. 119.1 million, (g) prepayment of 2014 Notes triggered by the cash subscription for the Bank's capital increase under our restructured foreign debt agreements, for Ps. 71.5 million, and (i) settlement by Galicia Uruguay of restructured debt, for Ps. 53.2 million, and

(ii) a Ps. 2,332.5 million decrease of short-term borrowings, mainly due to the full repayment of financial assistance from the Argentine Central Bank, for Ps. 2,713.0 million, partially offset by an increase in borrowings from local banks, for Ps. 102.9 million.

In fiscal year 2006 financing activities used Ps. 1,302.4 million of cash, mainly due to a Ps. 1,894.3 million net increase in deposits, a Ps. 934.4 million increase in repurchase transactions, and a Ps. 418.0 million increase in long term credit facilities (representing funds obtained by the regional credit card companies), which increases were more than offset by:

(i) a Ps. 687.0 million decrease in long-term liabilities, mainly due to: (a) payments of interest on restructured debt for Ps. 326.2 million, (b) principal amortization on 2007 Notes for Ps. 118.5 million, (c) payments by the regional credit card companies on negotiable obligations for Ps. 178.9 million, and (d) settlement by Galicia Uruguay of restructured debt, for Ps. 30.5 million, and

(ii) a Ps. 3,856.8 million decrease in short-term borrowings due to payments on short-term borrowings, mainly financial assistance from the Argentine Central Bank, for Ps. 2,665.0 million (including both scheduled payments and amounts settled in advance), and on the advance from such entity for the acquisition of the Hedge Bond, for Ps. 1,369.7 million, net of increased borrowings (short-term call loans) from local banks for Ps. 75.5 million and increased financing from the IFC, for Ps. 64.0 million.

Banco Galicia s Liquidity Management***Banco Galicia Consolidated Liquidity Gaps***

Liquidity risk is the risk that liquid assets are not available for the Bank to meet financial commitments at contractual maturity, take advantage of potential investment opportunities and meet demand for credit. To monitor and control liquidity risk, the Bank monitors and systematically calculates the gaps between financial assets and liabilities maturing within set time intervals based on contractual remaining maturity, on a consolidated basis with Galicia Uruguay and the regional credit card companies. All of the deposits in current accounts and other demand deposits and deposits in savings accounts are included in the first time interval. These figures are used to simulate different liquidity crisis scenarios based on assumptions stemming from historical experience.

As of December 31, 2008, the consolidated gaps between maturities of the Bank s financial assets and liabilities based on contractual remaining maturity were as follows:

	As of December 31, 2008 ⁽¹⁾				Total
	Less than one Year	1 5 Years	5 10 Years	Over 10 Years	
	<i>(in millions of Pesos, except ratios)</i>				
Assets					
Cash and Due from Banks	1,368.4				1,368.4
Argentine Central Bank Escrow Accounts	2,294.6				2,294.6

Domestic Banks	412.1	282.9	76.7		771.7
Other Liabilities ⁽¹⁾	123.6	242.0	28.7		394.3
	2,392.9	290.8			2,683.7
Total Liabilities	17,437.4	2,146.9	1,094.8	0.1	20,679.2
Asset / Liability Gap	(1,595.3)	1,723.2	(104.5)	29.2	52.6
Cumulative Gap	(1,595.3)	127.9	23.4	52.6	52.6

Ratio of Cumulative Gap to Cumulative Liabilities	(9.2)%	0.7%	0.1%	0.3%
Ratio of Cumulative Gap to Total Liabilities	(7.7)%	0.6%	0.1%	0.3%

Principal plus CER adjustment. Does not include interest.

(1) Includes, mainly, debt with retailers due to credit card operations, liabilities in connection with repurchase transactions, debt with domestic credit agencies and collections for third parties. The One Year bucket also includes Ps. 5.8 million corresponding to the Bank's foreign debt not tendered by its holders in the exchange offered to restructure such foreign debt, which was completed in May 2004.

Table of Contents

The Bank's Board of Directors has defined a maximum limit for liquidity mismatches. This limit has been established at -25% (minus 25%) for the ratio of cumulative gap to total liabilities within the first year. As shown in the table above, the Bank complies with said established policy since such gap was -7.7% (minus 7.7%) at the end of fiscal year 2008. As mentioned above, all of the deposits in current accounts and other demand deposits and deposits in savings accounts are included in the first time interval. However, historical experience shows that between 40% and 50% of these deposits represent a stable funding for the Bank and that such funding and the renewal of time deposits at maturity have funded the first-year negative gap. In addition, the Bank follows a liquidity policy based on the worst-case scenario of the recent economic history in Argentina, which policy is explained below.

Banco Galicia (Unconsolidated) Liquidity Management

The following is a discussion of the Bank's liquidity management, excluding the consolidated companies.

The Bank's policy is to maintain a level of liquid assets that allows it to meet financial commitments at contractual maturity, take advantage of potential investment opportunities, and meet customer's credit demand. To set the appropriate level, forecasts are made based on historical experience and on an analysis of possible scenarios. This enables management to project funding needs and alternative funding sources, as well as excess liquidity and placement strategies for such funds. As of December 31, 2008, the Bank's unconsolidated liquidity structure was as follows:

	As of December 31, 2008	
	<i>(in millions of Pesos)</i>	
Legal Requirement	Ps.	3,207.3
Excess Liquidity		1,497.9
Total Liquidity (1)	Ps.	4,705.2

(1) Excludes cash and due from banks of consolidated companies.

The legal requirement refers to the Minimum Cash Requirements set by Argentine Central Bank regulations, minus the permitted reduction in the requirement in the amount of the balance of the Special Fund Former Almafuerce Bank as per Resolution No. 408/03 of the Argentine Central Bank. For more information on the Argentine Central Bank regulations regarding reserve requirements for liquidity purposes, see Item 4. Information on the Company-Argentine Banking Regulation-Legal Reserve Requirements for Liquidity Purposes .

Excess liquidity consists of the following items: (i) 100% of the balance of overnight placements in banks abroad, (ii) the net amount of the margin requirement for short-term loans (call loans) to prime companies, (iii) 90% of the Lebac balance, (iv) 100% of the market value of available government securities, due to the potential liquidity that might be obtained through sales or repurchase transactions, (v) net short-term interbank loans (call loans), and (vi) 100% of the balance at the Argentine Central Bank (including escrow accounts in favor of clearing houses) in excess of the necessary items to cover the Minimum Cash Requirements.

Table of Contents

The Bank sets its total liquidity objective based on the analysis of the behavior of the Bank's deposits during the 2001-2002 crisis, considered as the worst-case scenario. Two liquidity levels are taken into account: the operational liquidity (to address the Bank's daily operations) and the additional liquidity (excess amount available). Deposits are classified into wholesale deposits and retail deposits.

Operational liquidity was established at 5% of retail demand deposits and time deposits maturing in less than 10 days, plus the balance of the escrow accounts held at the Argentine Central Bank and the balances in correspondent banks needed to address foreign-trade operations.

Additional liquidity varies according to the remaining maturity of the different types of deposits and to the currency in which such deposits are denominated. As a result of the analysis performed, the Bank defined a floor for the additional liquidity in Pesos at 50% of the necessary funds to face the worst-case scenario and for the additional liquidity in US Dollars the floor was set at 70% of the funds necessary to bear the worst-case scenario. Simultaneously, a margin must be kept in order to face a potential drop in deposits of 10% in Pesos and 15% in US Dollars without failing to meet the Minimum Cash Requirements. At the end of fiscal year 2008, the additional liquidity included in the above table amounted to Ps. 2,109.0 million and US\$ 483.9 million, equivalent to 50% and to 154% of the worst-case scenario, respectively, with both percentages exceeding the policy limits established by the Bank.

Capital

Our capital management policy is designed to ensure prudent levels of capital. The following table analyzes our capital resources as of the dates indicated.

	As of December 31,		
	2008	2007	2006
	<i>(in millions of Pesos, except ratios, multiples and percentages)</i>		
Shareholders' Equity	Ps. 1,845.7	Ps. 1,654.5	Ps. 1,608.5
Shareholders' Equity as a Percentage of Total Assets	7.46%	7.25%	6.81%
Total Liabilities as a Multiple of Total Shareholders' Equity	12.40x	12.80x	13.68x
Tangible Shareholders' Equity ⁽¹⁾ as a Percentage of Total Assets	5.17%	5.28%	4.68%

(1) *Tangible shareholders equity represents shareholders equity minus intangible assets.*

For information on our capital adequacy and that of our operating subsidiaries, see Item 4. Information on the Company-Selected Statistical Information-Regulatory Capital.

Capital Expenditures

For a description of our capital expenditures in 2008 and our capital commitments for 2009, see Item 4. Information on the Company-Capital Investments and Divestitures. For a description of financing of our capital expenditures, see -Consolidated Cash Flows.

Table of Contents**Item 6. Directors, Senior Management and Employees****Our Board of Directors**

Our ordinary shareholders meeting took place on April 28, 2009. The following table sets out the members of our Board of Directors as of that date (all of whom are resident in Buenos Aires, Argentina), the positions they hold within Grupo Financiero Galicia, their dates of birth, their principal occupations and the dates of their appointment and on which their current terms will expire.

Name	Position	Date of Birth	Principal Occupation	Member Since	Current Term Ends
Antonio R. Garcés	Chairman of the Board and Chief Executive Officer	May 30, 1942	Banker	April 2002	December 2010
Federico Braun	Vice Chairman	February 4, 1948	Businessman	September 1999	December 2010
Abel Ayerza	Director	May 27, 1939	Businessman	September 1999	December 2011
Eduardo Escasany	Director	June 30, 1950	Businessman	April 2005	December 2009
Enrique Martín	Director	October 19, 1945	Businessman	April 2006	December 2011
Luis O. Oddone	Director	May 11, 1938	Businessman	April 2005	December 2009
Pedro A. Richards	Director	November 14, 1952	Businessman	April 2005	December 2009
Silvestre Vila Moret	Director	April 26, 1971	Businessman	June 2002	December 2010

Luis S. Monsegur	Alternate Director	August 15, 1936	Accountant	April 2000	December 2010

The following is a summary of the biographies of the members of our Board of Directors:

Antonio Garcés: Mr. Garcés obtained a degree in national public accounting at the Universidad de Buenos Aires. He has been associated with the Bank since 1959. In April 1985, he was appointed as an alternate director of Banco Galicia, subsequently, he was appointed as the vice chairman of the Bank in September 2001, the chairman of the board from March 2002 until August 2002, the vice chairman from August 2002 until April 2003, when he was elected as the chairman of the board, a position he currently holds, after being reelected on April 27, 2006. Mr. Garcés is also the liquidator of Gal Mobiliaria S.A. de Ahorro para Fines Determinados (in liquidation), as well as the first vice chairman of the Argentine Bankers Association (ADEBA), director of IDEA and a lifetime trustee of the Fundación Banco de Galicia y Buenos Aires. He was elected for his current position at Grupo Financiero Galicia on April 23, 2003 and was reelected on April 28, 2005 and on April 29, 2008.

Federico Braun: Mr. Braun obtained a degree in industrial engineering at the Universidad de Buenos Aires. He was associated with the Bank from 1984 to 2002, having served as a member of the Board of Directors during such period. Mr. Braun is also the chairman of Asociación Argentina de Codificación de Productos Comerciales (Código), Campos de la Patagonia S.A., Estancia Anita S.A. and S.A. Importadora and Exportadora de la Patagonia; the vice chairman of Club de Campo Los Pingüinos S.A., Inmobiliaria y Financiera La Josefina S.A. and Asociación de Supermercados

Unidos y Mayorista Net S.A.; a member of Asociación Empresaria Argentina and a lifetime trustee of the Fundación Banco de Galicia y Buenos Aires. He has been a member of Grupo Financiero Galicia's Board of Directors since September, 1999. He was elected for his current position on June 3, 2002, and was reelected on April 28, 2005 and on April 29, 2008.

Table of Contents

Abel Ayerza: Mr. Ayerza obtained a degree in business administration at the Universidad Católica Argentina. He was associated with the Bank from 1966 to 2002, having served as a member of the Bank's Board of Directors from 1976 to 2002. Mr. Ayerza is also the chairman of Aygalpla S.A., a lifetime trustee and second vice chairman of the Fundación Banco de Galicia y Buenos Aires and the managing partner of Cribelco S.R.L., Crisabe S.R.L. and Huinca Cereales S.R.L. He has been a member of Grupo Financiero Galicia's Board of Directors since September, 1999. In April 2000 he was elected as the vice chairman, he was appointed as the chairman of the board on June 3, 2002, and on April 23, 2003 he was elected for his current position, and later reelected on April 27, 2006 and on April 28, 2009. Mr. Ayerza is the uncle of Mr. Pablo Gutierrez.

Eduardo Escasany: Mr. Escasany obtained a degree in economics at the Universidad Católica Argentina. He was associated with Banco Galicia from 1973 to 2002. He was appointed to the Bank's Board of Directors in 1975. In 1979, he was elected as the vice chairman and from 1989 to March 21, 2002 he was the chairman of the Bank's Board of Directors and its chief executive officer. He served as the vice chairman of the board between 1989 and 1993 and then, he was elected as the chairman of the Argentine Bankers Association from 1993 to 2002. He was also chairman of Grupo Financiero Galicia's Board of Directors from September, 1999 until June, 2002. He was elected again for his current position as a member of Grupo Financiero Galicia's Board of Directors in April 2005, and reelected in April 2007. He is also a lifetime trustee and vice chairman of the Fundación Banco de Galicia y Buenos Aires. Mr. Escasany is Mrs. María Ofelia Hordeñana de Escasany's son and Mr. Silvestre Vila Moret's uncle.

Enrique Martin: Mr. Martin obtained a degree in law at the Universidad de Buenos Aires. He was a professor at said university for more than 20 years and has a post-graduate certificate in international economics from the University of London. He was associated with Banco Galicia since 1977 until 2002 and was responsible for the International Banking Relations Department. Mr. Martin is Advisor to ZEIG S.A. He is also a director of the Argentine-Chilean Chamber of Commerce and an advisor to the Canadian-Argentine Chamber of Commerce. He has been a member of Grupo Financiero Galicia's Board of Directors since April, 2006, and was reelected in April 2009.

Luis Omar Oddone: Mr. Oddone obtained a degree in national public accounting at the Universidad de Buenos Aires. He was appointed as Grupo Financiero Galicia's syndic since 1999 until April 2005. Mr. Oddone is also the chairman of La Cigarra S.A. and Scharstof S.A., a director of Petrolera de Conosur S.A. and a syndic for Santa Emilia de Martin S.A. and Promotora S.A. He has been a member of Grupo Financiero Galicia's Board of Directors since April, 2005, and was reelected in April 2007.

Table of Contents

Pedro Alberto Richards: Mr. Richards obtained a degree in economics from the Universidad Católica Argentina and a master's degree of science in management from the Sloan School of Management at the Massachusetts Institute of Technology. He was director of the National Development Bank (BANADE). He has been associated with the Bank since 1990. He was member of the Board of Directors of Galicia Capital Markets S.A. between 1992 and 1994 and vice chairman of Net Investment S.A. between September 2001 and May 2007. Since August 2000, he has served as Grupo Financiero Galicia's Managing Director. Mr. Richards is also the vice chairman of Sudamericana Holding S.A. and Galicia Warrants S.A. and director of GV Mandataria of Valores S.A. and Galval Agente de Valores S.A. Mr. Richards was alternate director of Grupo Financiero Galicia from April 2003 until April 2005, when he was appointed for his current position as a director and was reelected as such in April 2007.

Silvestre Vila Moret: Mr. Vila Moret obtained a degree in banking administration at the Universidad Católica Argentina. He was associated with the Bank since 1997 until May 2002. Mr. Vila Moret is also vice chairman of El Benteveo S.A. and Santa Ofelia S.A. He has been a member of Grupo Financiero Galicia's Board of Directors since June 2002, and was reelected in April 2005 and in April 2008. Mr. Vila Moret is the grandson of Mrs. María Ofelia Hordeñana de Escasany and nephew of Mr. Eduardo Escasany.

Eduardo Jesús Zimmermann: Mr. Zimmermann obtained a degree in banking administration at the Universidad Argentina de la Empresa. He was associated with the Bank between 1958 and 2002, where he acted as a director from 1975 to 2002. Mr. Zimmermann is also a lifetime trustee of the Fundación Banco de Galicia y Buenos Aires. He is member of the Board of Directors since April 2000, and was reelected for his current position in April 2006 and in April 2009.

Pablo Gutiérrez: Mr. Gutierrez obtained a degree in business administration at the Universidad de Buenos Aires. He has been associated with the Bank since 1985. In April 2005, he was appointed to the Board of Director of the Bank. He served as the head of the Bank's Treasury Division until April 2007. Mr. Gutierrez is also chairman of Galicia Valores S.A. Sociedad de Bolsa, director of Argenclear S.A., vice chairman of Galicia Pension Fund Limited and an alternate trustee of the Fundación Banco de Galicia y Buenos Aires. He has been alternate director of Grupo Financiero Galicia since April 2003, and was reelected for his current position in April 2006 and in April 2009. Mr. Gutierrez is Mr. Abel Ayerza's nephew.

María Ofelia Hordeñana de Escasany: Mrs. Hordeñana de Escasany has held several positions in different subsidiaries of Banco Galicia. She is currently the chairman of the Fundación Banco de Galicia y Buenos Aires and Santamera S.A. She has been alternate director of Grupo Financiero Galicia since April 2000, and was reelected for her current position in April 2005 and in April 2008. Mrs. Hordeñana de Escasany is the mother of Mr. Eduardo Escasany and the grandmother of Mr. Silvestre Vila Moret.

Sergio Grinenco: Mr. Grinenco obtained a degree in economics at the Universidad Católica Argentina and a master's degree in business administration from Babson College in Wellesley, Massachusetts. He has been associated with the Bank since 1977. He was elected as an alternate director of the Bank in September 2001 and as the vice chairman in April 2003, a position he currently holds after being reelected in April 2006 and in April 2009. Mr. Grinenco is also the chairman of Galicia Factoring y Leasing S.A., liquidator of Galicia Capital Markets S.A. (in liquidation) and an alternate trustee of the Fundación Banco de Galicia y Buenos Aires.

Table of Contents

Alejandro María Rojas Lagarde: Mr. Rojas obtained a degree in law at the Universidad de Buenos Aires. He has held a variety of positions at Banco Galicia since 1963. From 1965 to January 2000, he was responsible for the general counsel office of Banco Galicia. He was reelected for his current position in April 2005 and in April 2008. He is also a manager of Rojas Lagarde S.R.L., director of Santiago Salud S.A. and lifetime trustee of the Fundación Banco de Galicia y Buenos Aires.

Luis Sila Monsegur: Mr. Monsegur obtained a degree in national public accounting at the Universidad de Buenos Aires. He held a variety of positions at Banco Galicia from 1962 to 1992 and is an alternate trustee of the Fundación Banco de Galicia y Buenos Aires. He was reelected for his current position in April 2005 and in April 2008.

Our Board of Directors may consist of between three and nine permanent members. Currently our Board of Directors has nine members. In addition, the number of alternate directors-individuals who act in the temporary or permanent absence of a director-has been set at five. The directors and alternate directors are elected by the shareholders at our annual general shareholders meeting. Directors and alternate directors are elected for a three-year term.

Messrs. Antonio Garcés, Sergio Grinenco and Pablo Gutierrez are also directors of Banco Galicia. In addition, some members of our Board of Directors may serve on the board of directors of any subsidiary we establish in the future. Four of our directors and two of our alternate directors are members of the families that are the controlling shareholders of Grupo Financiero Galicia.

Functions of Our Board of Directors

The members of our Board of Directors serve on the following Committees:

Audit Committee: in compliance with CNV rules regarding the composition of the Audit Committee of companies listed in Argentina, which require that the Audit Committee be comprised of at least three directors, with a majority of independent Directors, the Board of Directors established an Audit Committee with three members. Currently, Messrs. Luis O. Oddone, Eduardo Zimmermann and C. Enrique Martin are the members of the Audit Committee. All of the members of our Audit Committee are independent directors under the CNV and Nasdaq requirements. All three members of the Audit Committee are financially literate and have extensive managerial experience. Mr. Oddone is the financial expert serving on our Audit Committee.

Table of Contents

According to the CNV rules, the Audit Committee is primarily responsible for (i) issuing a report on the Board of Directors' proposals for the appointment of the independent auditors and the compensation for the Directors, (ii) issuing a report detailing the activities performed according to the CNV requirements, (iii) issuing the Audit Committee's annual plan and implementing the plan each fiscal year, (iv) evaluating the external auditors' independence, work plans and performance, (v) evaluating the plans and performance of the internal auditors, (vi) supervising the reliability of our internal control systems, including the accounting system, and of external reporting of financial or other information, (vii) following-up on the use of information policies on risk management at the company's main subsidiaries, (viii) evaluating the reliability of the financial information to be filed with the CNV and the SEC, (ix) verifying compliance with the applicable conduct rules, and (x) issuing a report on related party transactions and disclosing any transaction where a conflict of interest exists with corporate governance bodies and controlling shareholders. The Audit Committee has access to all information and documentation that it requires and is broadly empowered to fulfill its duties. During 2008, the Audit Committee held eleven meetings.

Disclosure Committee: this committee was established in response to the U.S. Sarbanes-Oxley Act of 2002. The main responsibility of this committee is to review and approve controls over the public disclosure of financial and related information, and other procedures necessary to enable our chief financial officer and chief executive officer to provide their certifications of our annual report that is filed with the SEC. The members are Messrs. Antonio Garcés, Pedro Richards, José Luis Gentile and Adrián Enrique Pedemonte. In addition, at least one of the members of this committee attends all of the meetings of our principal subsidiaries' disclosure committees.

Our Supervisory Committee

Our bylaws provide for a Supervisory Committee consisting of three members who are referred to as syndics (*syndics*) and three alternate members who are referred to as alternate syndics (*alternate syndics*). In accordance with the Corporations' Law and our bylaws, the syndics and alternate syndics are responsible for ensuring that all of our actions are in accordance with applicable Argentine law. Syndics and alternate syndics are elected by the shareholders at the annual general shareholders' meeting. Syndics and alternate syndics do not have management functions. Syndics are responsible for, among other things, preparing a report to shareholders analyzing our financial statements for each year and recommending to the shareholders whether to approve such financial statements. Alternate syndics act in the temporary or permanent absence of a syndic. Currently, there are three syndics and three alternate syndics. Syndics and alternate syndics are elected for a one-year term.

The following table shows the members of our Supervisory Committee. Each of our syndics was appointed at the ordinary shareholders' meeting held on April 28, 2009.

Name	Position	Principal Occupation	Current Term Ends
Norberto Corizzo	Syndic	Accountant	December 2009
Luis A. Díaz	Syndic	Accountant	December 2009
Adolfo Melián	Syndic	Lawyer	December 2009
Miguel Armando	Alternate Syndic	Lawyer	December 2009
Fernando Noetinger	Alternate Syndic	Lawyer	December 2009
Horacio Tedín	Alternate Syndic	Lawyer	December 2009

The following is a summary of the biographies of the members of our Supervisory Committee:

Norberto Corizzo: Mr. Corizzo obtained a degree in national public accounting at the Universidad de Buenos Aires. He has been associated with the Bank since 1977. Mr. Corizzo is also a syndic of Banco Galicia, Galicia Uruguay, EBA Holding, Tarjetas Regionales S.A. and its subsidiaries, Galicia Warrants S.A., Sudamericana Holding S.A. and its subsidiaries, Galicia Valores S.A. Sociedad de Bolsa, Galicia Factoring y Leasing S.A., Galicia Capital Markets S.A. (in liquidation), Gal Mobiliaria S.A. de Ahorro para Fines Determinados (in liquidation), Net Investment S.A. and AEC S.A., and alternate syndic of Galicia Internacional S.A. and Galicia Inmobiliaria S.A. (in liquidation).

Table of Contents

Luis Díaz: Mr. Díaz obtained a degree in national public accounting at the Universidad de Buenos Aires. He has provided services to the Bank since 1965, and was elected as a syndic of Banco Galicia at the shareholders meeting held on April 28, 2009. Adolfo Melián: Mr. Melián obtained a degree in law at the Universidad de Buenos Aires. He has been associated with the Bank since 1970. He served as counsel to the Bank's Board of Directors until 1975. Mr. Melián is also a syndic of Banco Galicia, Sudamericana Holding S.A., Galicia Retiro Compañía de Seguros S.A., Galicia Seguros S.A., Galicia Warrants S.A., Galicia Valores S.A. Sociedad de Bolsa, Galicia Factoring y Leasing S.A., Galicia Capital Markets S.A. (in liquidation), Tarjetas Regionales S.A. and its subsidiaries, Santiago Salud S.A., GV Mandataria de Valores S.A. and Net Investment S.A., and alternate syndic of Sudamericana Asesores de Seguros S.A., among others. Mr. Melián is a lifetime trustee of the Fundación Banco de Galicia y Buenos Aires.

Miguel Armando: Mr. Armando obtained a degree in law at the Universidad de Buenos Aires. He was first elected as an alternate syndic of the Bank in 1986. Mr. Armando is also a syndic of EBA Holding S.A. and an alternate syndic of Banco Galicia and Tarjetas Regionales S.A. and its subsidiaries, Sudamericana Holding S.A., Galicia Seguros S.A., Galicia Retiro Compañía de Seguros S.A., Galicia Capital Markets S.A. (in liquidation), Galicia Warrants S.A., Galicia Factoring y Leasing S.A., Galicia Valores S.A. Sociedad de Bolsa and Net Investment S.A., and director of Santiago de Compostela Promotora de Seguros S.A., among others.

Fernando Noetinger: Mr. Noetinger obtained a degree in law at the Universidad de Buenos Aires. He has been associated with the Bank since 1987. Mr. Noetinger is also an alternate syndic of EBA Holding S.A., Banco Galicia, Galicia Factoring y Leasing S.A., Galicia Retiro Compañía de Seguros S.A., Galicia Seguros S.A., Galicia Valores S.A. Sociedad de Bolsa, Galicia Capital Markets S.A. (in liquidation), Galicia Warrants S.A., Net Investment S.A., Santiago Salud S.A., Tarjetas Regionales S.A., Tarjetas del Mar S.A. and Sudamericana Holding S.A., among others.

Horacio Tedín: Mr. Tedín obtained a degree in law at the Universidad de Buenos Aires. In 1981 he founded his own law firm, which has actively worked for Banco Galicia and other big corporate clients. Mr. Tedín is also a syndic of Galicia Internacional S.A. and an alternate syndic of EBA Holding S.A., Galicia Administradora de Fondos S.A. Sociedad Gerente de Fondos Comunes de Inversión and Tarjetas Regionales S.A., among others.

Table of Contents

Compensation of Our Directors

Compensation for the members of Grupo Financiero Galicia's Board of Directors is considered by the shareholders at the shareholders' meeting once the fiscal year has ended. Our independent directors are paid an annual fee based on the functions they carry out and they may receive partial advance payments during the year. A director who is an employee receives a fixed compensation and may receive a variable fee based on individual performance and has access to retirement insurance.

We do not pay fees to the members of our Board of Directors who are also members of the Board of Directors of the Bank. The ordinary shareholders' meeting held on April 28, 2009 set the compensation for the Board of Directors at Ps. 1,485,700, which includes salaries, social benefits and fees for the fiscal year ending on December 31, 2008. For a description of the amounts to be paid to the Board of Directors of Banco Galicia, see "Compensation of Banco Galicia's Directors and Officers" below.

We do not maintain a stock-option, profit-sharing or pension plan for the benefit of our directors. In connection with the Bank's foreign debt restructuring, we agreed to limit the amounts paid per fiscal year to the members of our Board of Directors and agreed not to make any payments to our management in excess of market compensation. See Item 10.

Additional Information-Material Contracts.

We do not have a policy establishing any termination benefits for our directors.

Management of Grupo Financiero Galicia

Our organizational structure consists of a managing director who reports to the Board of Directors, and one manager who reports to the managing director: the financial and accounting manager.

The managing director's main functions are to implement policies defined by our Board of Directors and to oversee the financial and accounting department and investor relations department. Our managing director is Mr. Pedro Richards, who was born on November 14, 1952.

The financial and accounting manager is mainly responsible for assessing current and potential investments and for planning and coordinating our administrative services and financial resources in order to ensure their proper management. In addition, such person is responsible for complying with the financial information reporting requirements set by several controlling bodies and is also responsible for providing information required for internal controls and budgeting. Our financial and accounting manager is Mr. José Luis Gentile, who was born on March 15, 1956.

The investor relations department is mainly responsible for planning, preparing, coordinating and controlling the financial information that is provided to the stock exchanges where our shares are listed, regulatory bodies and both domestic and international investors and analysts. Apart from reviewing the materials published by analysts, the department also follows-up on their opinions, as well as on those of shareholders and investors in general.

Table of Contents

Our compensation policy, which is essentially the same as the policy followed by the companies that we control, consists of arranging salary levels in order of importance based on a system that describes and assesses job positions based on objective factors (the Hay System). The purpose of such system is to pay compensation that is similar to the compensation that is paid for a similar position in the domestic market. Managers and directors who are our or our controlled companies' employees receive a fixed salary and may receive a bonus based on individual performance. This policy for compensation includes the possibility of having access to retirement insurance.

We do not maintain stock-option, profit-sharing or pension plans or any other retirement plans for the benefit of our managers.

Board of Directors of Banco Galicia

The ordinary shareholders' meeting held on April 28, 2009, set the size of the Bank's Board of Directors at nine members and five alternate directors. The following table sets out the members of the Bank's Board of Directors as of April 28, 2009, all of whom are resident in Buenos Aires, Argentina, the position currently held by each of them, their dates of birth, their principal occupations, the dates of their appointment and on which their current terms will expire. The business address of the members of the Board of Directors is Tte. General J. D. Perón 407, (C1038AAI) Buenos Aires, Argentina.

Julio Pedro Naveyra: Mr. Naveyra obtained a degree in accounting at the Universidad de Buenos Aires. He has been associated with the Bank since April 2004 when he was elected as an independent alternate director. Mr. Naveyra has also been a member of Harteneck, López y Cía. (now Price Waterhouse & Co. S.R.L.). He is also a syndic of S.A. La Nación, Supermercados Makro S.A., Sandoz S.A., Exxon Mobil S.A., Ford Motor Argentina S.R.L. and Ford Credit Argentina S.A., and a director of Gas Natural Ban S.A. and Grupo Concesionario del Oeste S.A.

Functions of the Board of Directors of Banco Galicia

The Bank's Board of Directors may consist of three to nine permanent members. In addition, there can be one or more alternate directors who can act during the temporary or permanent absence of a director. As of the date of this annual report, seven directors and two alternate directors were engaged on a full time basis in the day-to-day operations of the Bank. Messrs. García Pinto, Fossatti, Del Piano, Garat, Canova and Naveyra are not employees of the Bank.

The Bank's Board of Directors meets formally twice each week and informally on a daily basis. The Bank's Board of Directors is responsible for all of the major decisions, including those relating to credit, the Bank's securities portfolio, the design of the branch network and entering into new businesses.

Table of Contents

Members of the Bank's Board of Directors serve on the following committees:

Risk Management Committee: this committee is composed of seven directors, the manager of the Planning and Management Control Division, the Internal Audit manager and the Risk and Anti-Money Laundering Management Department manager. This committee is in charge of approving risk management strategies, policies, processes and procedures and the contingency plans thereof. It is also responsible for setting specific limits for the exposure to each risk and approving, when applicable, temporary excesses over said limits as well as being informed of each risk position and compliance with policies. The committee meets at least once every two months. The committee acts formally by written resolutions.

Credit Committee: this committee is composed of four directors and the Credit Division manager. The Wholesale Banking Division manager, the Retail Banking Division manager and the Treasury Division manager may be present in the event that the account subject to the committee's approval belongs to any of those departments. This committee meets at least four times a week. It operates with a quorum of at least one director. This committee's function is to decide on loans greater than Ps. 5 million in the case of corporate customers, on loans greater than Ps. 1 million in the case of individuals and on all loans to be granted to financial institutions (local or foreign) and related companies. Approved operations are recorded in signed and dated documents.

Financial Risk Policy Committee: this committee is made up of seven directors, the Retail Banking Division manager, the Treasury Division manager, the Distribution Division manager and the Risk and Anti-Money Laundering Management Department manager. It is responsible for analyzing the evolution of the Bank's business from a financial point of view, in regard to fund raising and assets placement. Moreover, this committee is in charge of the follow up and control of liquidity, interest rate and currency mismatches. The committee meets at least once every fifteen days. The committee acts formally by written resolutions.

Systems Committee: this committee is composed of seven directors, the Corporate Services Division manager and the IT Department manager. This committee is in charge of supervising and approving new systems' developments plans and budgets, as well as supervising these systems' budget controls. It is also responsible for approving the general design of the systems' structure implemented and for supervising the quality of the Bank's systems. The committee meets at least once every three months. The committee acts formally by written resolutions.

Audit Committee: in accordance with the requirements set forth by Argentine Central Bank rules, the Bank has an Audit Committee composed of two directors, one of which is an independent director, and the Internal Audit manager. In addition, in its capacity as a publicly listed company (in Argentina), the Bank must comply with the transparency regime for public companies set forth by Decree No. 677/01 and by the rules established by the CNV in its resolutions No. 400, 402 and supplementary regulations. In compliance with the CNV regulations, the Audit Committee is made up of three directors, two of which are independent directors.

Table of Contents

Committee for the Control and Prevention of Money Laundering and Financing of Terrorist Activities: this committee is responsible for planning, coordinating and reviewing compliance with the policies for the prevention and control of money laundering and financing of terrorist activities established and agreed upon by the Board of Directors, based on current regulations. Furthermore, with respect to these matters the committee is in charge of the design of internal control and personnel training plans and compliance therewith by the internal audit. It is composed of four directors, the Corporate Services Division manager, the Wholesale Banking Division manager, the Distribution Division manager, the Risk and Anti-Money Laundering Management Department manager, the Organizational Development and Human Resources manager, the Internal Audit manager, a representative of the Syndics Committee, and the head of the Anti-Money Laundering Unit. The Anti-Money Laundering Unit reports directly to the Board of Directors. In addition, in accordance with the regulations set forth by the Argentine Central Bank, Director Mr. Enrique M. Garda Olaciregui was appointed the Bank's officer responsible for the control and prevention of money laundering and financing of terrorist activities, and Director Mr. Pablo Gutierrez, was appointed as the official in charge of financial intermediation transactions. The committee is scheduled to meet at least once every two months and its resolutions must be registered in a minutes book bearing folios and seals. In December 2007, Dr. Garda Olaciregui obtained the degree of Certified Specialist in Money Laundering, from the Association of Certified Specialists in Money Laundering.

Disclosure Committee: this committee was created to comply with the provisions of the U.S. Sarbanes-Oxley Act. This committee is composed of five directors, the Wholesale Banking Division manager, the Retail Banking Division manager, the Treasury Division manager, the Credit Division manager, the manager of the Planning and Management Control Division, the Internal Audit manager, and the managers of the Accounting Department, the Financial Analysis and Planning Department, the Relations with Investors and Rating Agencies Department, as well as a representative of the Bank's Supervisory Syndics Committee. A member of the committee that was created for the same purpose by Grupo Financiero Galicia also attends the meetings held by this committee.

Human Resources Committee: this committee is in charge of the appointment and assignment of personnel, transfers, rotation and development of personnel and headcount. This committee works at two levels: (i) the Restricted Human Resources Committee, composed of the Organizational Development and Human Resources manager, the Personnel Administration manager, and the Human Resources advisor and the Department manager of the corresponding area, deals with the issues of personnel included in the 1 to 6 salary levels, is scheduled to meet at least every two weeks and acts formally by written resolutions, and (ii) the Human Resources Committee, composed of directors, managers of the corresponding areas and the Organizational Development and Human Resources manager, deals with the issues of personnel included in salary levels 7, 8 and 9, and which, in the case of issues related to personnel included in levels 10 and above, submits its recommendations to the Board of Directors. The committee meets whenever there are issues that require consideration, and acts with a quorum of at least one director. The committee acts formally by written resolutions.

Assets and Liabilities Committee (Alco): this committee is in charge of analyzing and making recommendations to the business divisions in connection with the management of interest rate, currency and maturity mismatches, with the goal of maximizing financial and foreign-exchange results within acceptable parameters of risk and capital use. This committee is also responsible for suggesting changes to these parameters, if necessary, to the Board of Directors. Four directors, the manager of the Planning and Management Control Division (this Division being the Funding Unit manager), the Wholesale Banking Division manager, the Retail Banking Division manager, and the Treasury Division manager are members of this committee. This committee appointed a permanent staff composed of the Credit Division manager, and the managers of the following departments: Risk and Anti-Money Laundering, Planning and Control, Asset Management, Financial Operations, and Financial Analysis and Planning. The committee meets once every two weeks. Its meetings are recorded in minutes signed by two members of the committee.

Table of Contents

Customer Assistance Committee: this committee is in charge of the general supervision of the activities related to the attention, follow-up and resolution of customer complaints. The committee establishes the standards for customer service, with the purpose of implementing improvements to minimize the number of complaints and shorten response times. This committee is composed of two directors and the division and department managers and other officers whose participation is deemed relevant in connection with the agenda. The committee is scheduled to meet at least once every two months. The committee acts formally by written resolutions. It is composed of two directors and the head of the Customer Contact Center and of Galicia Responde.

Periodically, the Board of Directors is informed of the actions taken by the committees, which are recorded in minutes.

Banco Galicia s Executive Officers

The following divisions report to the Bank s Board of Directors:

Division	Manager
Wholesale Banking	To be appointed
Retail Banking	Daniel A. Llambías (in charge)
Treasury	To be appointed
Distribution	Juan Sarquís
Credit	Juan Carlos L. Afflitto
Corporate Services	Miguel Angel Peña

Wholesale Banking: this Division is responsible for managing the Bank s business related to corporate customers. The departments reporting to wholesale banking are: Corporate Banking, Middle-market Banking, Investment Banking, Capital Markets, Wholesale Marketing and International Trade.

Retail Banking: this Division is responsible for managing the Bank s business relating to individuals. The departments reporting to Retail Banking are: Consumer Banking, Retail Marketing and Private Banking.

Treasury: this Division is responsible for planning and managing the correct use of financial resources and providing the appropriate funding for the Bank s businesses, and for establishing and applying the Bank s deposit-raising and funding policies within the parameters established by the Bank s risk policies. It also manages short-term funds and the Bank s investment portfolio, ensuring the correct execution of transactions. The following departments report to this Division: Financial Analysis and Planning, Asset Management, Financial Operations, and International Banking and Financing Relations.

Table of Contents

Credit: this Division is responsible for defining credit risk management policies, verifying compliance with these policies, and developing the credit assessment models to be applied to the different risk products. It is also responsible for approving credit extensions to the Bank's customers while ensuring that the credit quality of the Bank's portfolio is preserved and generating the information on credit risk required by the Bank's Board of Directors and by the regulatory authorities. The following departments report to this Division: Corporate Credit, Retail Credit and Corporate Recovery.

Corporate Services: this Division is responsible for providing logistical support for all the organization's operations. The following departments report to this Division: IT, Operations, Administrative Services and Organization.

Distribution: this Division is in charge of the coordination of the different channels focused on each of the customer segments as well as the coordination of the marketing and distribution of the different products and services offered by the Bank. Two regional branch supervision departments and the Alternative Channels Department report to the Distribution Division.

In addition, the Legal Counsel, Planning and Management Control, Internal Audit, Organizational Development and Human Resources, Institutional Affairs, the Chief Economist and the Anti-Money Laundering Unit offices report to the Board of Directors. Messrs. Enrique M. Garda Olaciregui, Raúl H. Seoane, Omar Severini, Enrique C. Behrends, Diego F. Videla, Nicolás Dujovne and Claudia Estecho are in charge of the aforementioned offices, respectively. The following are the biographies of the Bank's senior executive officers mentioned above and not provided in the sections -Board of Directors of Banco Galicia or -Our Board of Directors above.

Juan H. Sarquis: Mr. Sarquis was born on June 23, 1957. He obtained a degree in economics at the Argentine Catholic University. He has been associated with the Bank since 1982. Mr. Sarquis is also an alternate director of Tarjetas Regionales S.A., Tarjeta Naranja S.A., Tarjetas del Mar S.A. and Tarjetas Cuyanas S.A.

Miguel Angel Peña: Mr. Peña was born on January 22, 1962. He obtained a degree in information systems from the Universidad Nacional Tecnológica. He has been associated with the Bank since 1994. Mr. Peña is a director of Tarjeta Naranja S.A. and an alternate director of Tarjetas Regionales S.A. He is also a voting member of the ONG-Usuaría (*Asociación Argentina de Usuarios de la Informática y las Comunicaciones*).

Juan Carlos L. Afflitto: Mr. L. Afflitto was born on September 15, 1958. He received a degree in national public accounting at the Universidad de Buenos Aires. He has been associated with the Bank since 1986. Prior to such time, he worked at Morgan, Bénédict y Asociados, where he acted as an advisor and accountant. He was a professor at the Universidad Católica Argentina until 1990.

Omar Severini: Mr. Severini was born on July 30, 1958. He obtained a degree in national public accounting from the Universidad de Belgrano. He has been associated with the Bank since 1978.

Enrique Carlos Behrends: Mr. Behrends was born on January 31, 1946. He obtained a degree in sociology from the Universidad del Salvador. Mr. Behrends has been associated with the Bank since 1987. Prior to such time, he worked at Arthur Andersen, Coopers & Lybrand and Ernst & Young.

Table of Contents

Diego Francisco Videla: Mr. Videla was born on November 7, 1947. He has been associated with the Bank since 1997. Prior to such time, he acted as an advisor in the privatization of Banco de la Provincia de Misiones S.A. Mr. Videla is a voting member of the Fundación Policía Federal Argentina and a secretary of Fundación Escuela de Guerra Naval Argentina.

Nicolás Dujovne: Mr. Dujovne was born on May 18, 1967. He received a degree in economics at the Universidad de Buenos Aires and a master's degree in Economics at the Universidad Torcuato Di Tella. He has been associated with the Bank since 1997. Prior to such time, he worked at Citibank Argentina, Alpha and Macroeconómica. In 1998, he served as the chief of advisors to the Secretary of the Argentine Treasury and, in 2000, as the representative of the Ministry of Economy at the Argentine Central Bank's board of directors. He also worked as a consultant for The World Bank. In 2001 he returned to the Bank as the Chief Economist.

Banco Galicia's Supervisory Committee

Banco Galicia's bylaws provide for a Supervisory Committee consisting of three syndics and three alternate syndics. Pursuant to Argentine law and to the provisions of the Bank's bylaws, the Bank's syndics and alternate syndics are responsible of ensuring that all of the Bank's actions are in accordance with applicable Argentine law. Syndics and alternate syndics do not participate in business management and cannot have managerial functions of any type. Syndics are responsible for, among other things, the preparation of a report to the shareholders analyzing the Bank's financial statements for each year and the recommendation to the shareholders as to whether to approve such financial statements. Syndics and alternate syndics are elected at the ordinary shareholders' meeting for a one-year term and they can be reelected. Alternate syndics act in the temporary or permanent absence of a syndic.

The table below shows the composition of Banco Galicia's Supervisory Committee as they were reelected by the annual shareholders' meeting held on April 28, 2009.

Name	Year of Appointment	Position	Principal Occupation	Current Term Ends
Adolfo H. Melián	2008	Syndic	Lawyer	December 31, 2009
Norberto D. Corizzo	2008	Syndic	Accountant	December 31, 2009
Luis A. Díaz	2009	Syndic	Accountant	December 31, 2009
Fernando Noetinger	2008	Alternate Syndic	Lawyer	December 31, 2009
Miguel N. Armando	2008	Alternate Syndic	Lawyer	December 31, 2009
Ricardo A. Bertoglio	2008	Alternate Syndic	Accountant	December 31, 2009

For the biographies of Messrs. Adolfo H. Melián, Norberto D. Corizzo, Luis A. Díaz, Fernando Noetinger and Miguel N. Armando, see -Our Supervisory Committee .

Ricardo Adolfo Bertoglio: Mr. Bertoglio obtained a degree in national public accounting at the Universidad de Buenos Aires. He has been associated with the Bank since 2002. He was elected as a syndic in June 2002 and served as a syndic until April 2006, at which time he was elected as an alternate syndic. Mr. Bertoglio is also the president of Plasmer S.A.

Table of Contents

Compensation of Banco Galicia's Directors and Officers

The Bank's Bylaws set forth that the shareholders' meeting can establish that an incentive compensation be paid to the Board of Directors, when applicable, in the amount approved at the shareholders' meeting. Such amount cannot exceed six percent (6%) of the Bank's net income before income tax or any other tax that may replace it.

Article 25, section 2, of the Bank's Bylaws establishes that among the powers and duties of the Board of Directors, the Board may determine, whenever it is deemed desirable for corporate interests, whether its members shall perform technical or administrative duties within the Company and receive remuneration for such activities, with such remuneration having to be reported at the shareholders' meeting. In such cases, compensation for the relevant Directors set by the shareholders' meeting shall be charged to general expenses.

The Bank's Board of Directors establishes the policy for compensation of the Bank's personnel. The Bank's managers receive a fixed compensation and they may receive a variable compensation, based on their performance. Seven directors and an alternate director are employees of the Bank and, therefore, receive a fixed compensation and may also receive a variable compensation based on their performance, provided that these additional payments do not exceed the standard levels of similar entities in the Argentine financial market, a provision that is applicable to managers as well. The compensation regime includes the possibility of acquiring a retirement insurance policy. The Bank does not maintain stock-option plans or pension plans or any other retirement plans for the benefit of its directors and managers. The Bank does not have a policy establishing any termination benefit for its directors. The compensation of the Board of Directors must be approved by the shareholders' meeting after the end of the fiscal year.

For fiscal year 2008, the Bank's ordinary shareholders' meeting held on April 28, 2009, approved remuneration for the Bank's Board of Directors in the total amount of Ps. 20.2 million, which includes the following:

total compensation, including salaries, variable compensation and other related concepts for the directors that are also employees and for executive and supervision functions they perform, and compensation for the independent directors.

During 2008, provisions were established to cover the variable compensation of the Bank's Board of Directors and managers for the fiscal year. In January 2008, the Bank's Board of Directors decided to pay the variable compensation corresponding to fiscal year 2007, based on the compensation for similar or equivalent positions in the market, in recognition of the performance and professional development of the respective beneficiaries during said fiscal year. The corresponding amount was funded with reserves established during said fiscal year. In January 2009, the Bank's Board of Directors decided to pay a variable compensation to certain Bank employees for the fiscal year 2008, based on the compensation for similar or equal job positions in the labor market, in recognition of the performance and professional development of the respective beneficiaries during fiscal year 2008. The corresponding amount was funded with reserves established during said fiscal year. The Bank's senior managers, excluding directors that are employees of the Bank, received compensation of Ps. 8.71 million for fiscal year 2008 and compensation of Ps. 8.2 million for fiscal year 2007. These amounts include fixed and variable compensations.

Table of Contents**Employees**

The following table shows the composition of our staff:

	As of December 31,		
	2008	2007	2006
Grupo Financiero Galicia S.A.	9	10	8
Banco de Galicia y Buenos Aires S.A.	5,324	5,164	4,676
Branches	2,888	2,604	2,414
Head Office	2,436	2,560	2,262
Galicia Uruguay	10	13	13
Regional Credit-Card Companies	3,898	3,769	3,174
Sudamericana Consolidated	105	96	91
Other Subsidiaries	62	51	46
Total	9,408	9,103	8,008

Within the current legal framework, membership in an employee union is voluntary and there is only one union of bank employees with national representation. As of December 31, 2008, approximately 9.6% of the Bank's employees were affiliated with the national bank employee union. The employees of the regional credit card companies are affiliated with the national commerce employee union, in a percentage that ranged from 2.8% to 7.2%, depending on the company, as of December 31, 2008. During the first four months of 2008 and 2007, and during the first quarter of 2006, the bank employee union and the national commerce employee union renegotiated their respective collective labor agreements in order to establish new minimum wages. As a result, between March and April of each year, salary increases were granted. Banco Galicia has not experienced a strike by its employees since 1973 and the regional credit card companies have not experienced any strike event. We believe that our relationship with our employees has developed within normal and satisfactory parameters.

We have a human resources policy that aims at providing our employees possibilities for growth and personal and socio-economic achievement. We will continue our current policy of monitoring both wage levels and labor conditions in the financial industry in order to be competitive. Our employees receive fixed compensation and may receive variable compensation according to their level of achievement. We do not maintain any profit-sharing programs for our employees.

The Fundación Banco de Galicia y Buenos Aires (the Fundación) is an Argentine non-profit organization that provides various services to Banco Galicia employees. The various activities of the Fundación include, among others, managing the medical services of Banco Galicia employees and their families, purchasing school materials for the children of Banco Galicia's employees and making donations to hospitals and other charitable causes, including cultural events. The Fundación is managed by a Council, certain members and alternate members of which are members of our Board of Directors and supervisory committee. Members and alternate members of the Council do not receive remuneration for their services as trustees.

Table of Contents

Nasdaq Corporate Governance Standards

Pursuant to Nasdaq Marketplace Rule 4350(a), a foreign private issuer may follow home country corporate governance practices in lieu of the requirements of Rule 4350, provided that the foreign private issuer complies with certain mandatory sections of Rule 4350, discloses each requirement of Rule 4350 that it does not follow and describes the home relevant country practice followed in lieu of such requirement. The requirements of Rule 4350 and the Argentine corporate governance practice that we follow in lieu thereof are described below:

- (i) Rule 4350 (b) (1) (A) Distribution of Annual and Interim Reports. In lieu of the requirements of Rule 4350 (b) (1) (A), we follow Argentine law, which requires that companies make public a Spanish language annual report, including annual audited consolidated financial statements, by filing such annual report with the CNV and the BASE, within 70 calendar days of the end of the company's fiscal year. Interim reports must be filed with the CNV and the BASE within 42 calendar days of the end of each fiscal quarter. The BASE publishes the annual reports and interim reports in the BASE bulletin and makes the bulletin available for inspection at its offices. In addition, our shareholders can receive copies of our annual reports and any interim reports upon such shareholders' request. English language translations of our annual reports and interim reports are furnished to the SEC. We also post the English language translation of our annual reports and quarterly press releases on our website. Furthermore, under the terms of the Second Amended and Restated Deposit Agreement, dated as of June 22, 2000, among us, The Bank of New York, as depositary, and owners of ADSs issued thereunder, we are required to furnish The Bank of New York with, among other things, English language translations of our annual reports and each of our quarterly press releases. Annual reports and quarterly press releases are available for inspection by ADR holders at the offices of The Bank of New York located at, 101 Barclay Street, 22nd Floor, New York, New York. Finally, Argentine law requires that 20 calendar days before the date of a shareholders' meeting, the board of directors must provide to the shareholders, at the company's executive office or through electronic means, all information relevant to the shareholders' meeting, including copies of any documents to be considered by the shareholders (which includes the annual report), as well as proposals of the company's board of directors.
- (ii) Rule 4350 (c) (1) Majority of Independent Directors. In lieu of the requirements of Rule 4350 (c) (1), we follow Argentine law, which does not require that a majority of the board of directors be comprised of independent directors. Argentine law instead requires that public companies in Argentina such as us must have a sufficient number of independent directors to be able to form an audit committee of at least three members, the majority of which must be independent pursuant to the criteria established by the CNV. In addition, because we are a controlled company as defined in Rule 4350 (c) (5), we are relying on the exemption provided thereby for purposes of complying with Rule 4350 (c) (1).

Table of Contents

- (iii) Rule 4350 (c) (2) Executive Sessions of the Board of Directors. In lieu of the requirements of Rule 4350 (c) (2), we follow Argentine law which does not require independent directors to hold regularly scheduled meetings at which only such independent directors are present (*i.e.*, executive sessions). Our Board of Directors as a whole is responsible for monitoring our affairs. In addition, under Argentine law, the board of directors may approve the delegation of specific responsibilities to designated directors or non-director managers of the company. Also, it is mandatory for public companies to form a supervisory committee (composed of *syndics*), which is responsible for monitoring the legality of the company's actions under Argentine law and the conformity thereof with its by-laws. Finally, our audit committee has regularly scheduled meetings and, as such, such meetings will serve a substantially similar purpose as executive sessions.
- (iv) Rule 4350 (c) (3) Compensation of Officers. In lieu of the requirements of Rule 4350 (c) (3), we follow Argentine law, which does not require companies to form a compensation committee comprised solely of independent directors. It also is not required in Argentine law that the compensation of the chief executive officer and all other executive officers be determined by either a majority of the independent directors or a compensation committee comprised solely of independent directors. Under Argentine law, the board of directors is the corporate body responsible for determining the compensation of the chief executive officer and all other executive officers, so long as they are not directors. In addition, under Argentine law, the audit committee shall give its opinion about the reasonableness of management's proposals on fees and option plans for directors or managers of the company. Finally, because we are a controlled company as defined in Rule 4350 (c) (5), we are relying on the exemption provided thereby for purposes of complying with Rule 4350 (c) (3).
- (v) Rule 4350(c)(4) Nomination of Directors. In lieu of the requirements of Rule 4350 (c) (4), we follow Argentine law which requires that directors be nominated directly by the shareholders at the shareholders meeting and that they be selected and recommended by the shareholders themselves. Under Argentine law, it is the responsibility of the ordinary shareholders' meeting to appoint and remove directors and to set their compensation. In addition, because we are a controlled company as defined in Rule 4350 (c) (5), we are relying on the exemption provided thereby for purposes of complying with Rule 4350 (c) (4).
- (vi) Rule 4350 (d) (1) Audit Committee Charter. In lieu of the requirements of Rule 4350 (d) (1), we follow Argentine law, which requires that audit committees have a charter but does not require that companies certify as to the adoption of the charter nor does it require an annual review and assessment thereof. Argentine law instead requires that companies prepare a proposed plan or course of action with respect to those matters, which are the responsibility of the company's audit committee. Such plan or course of action could, at the discretion of our audit committee, include a review and assessment of the audit committee charter.
- (vii) Rule 4350 (d) (2) Audit Committee Composition. Argentine law does not require, and it is equally not customary business practice in Argentina, that companies have an audit committee comprised solely of independent directors. Argentine law instead requires that companies establish an audit committee with at least three members comprised of a majority of independent directors as defined by Argentine law. Nonetheless, although not required by Argentine law, we have a three member audit committee comprised of entirely independent directors, as independence is defined in Rule 10 (A)-3 (b) (1), one of which the Board of Directors has determined to be an audit committee financial expert. In addition, we have a supervisory committee (*comisión fiscalizadora*) composed of three syndics, which are in charge of monitoring the legality, under Argentine law, of the actions of our board of directors and the conformity of such actions with our by-laws.

Table of Contents

- (viii) Rule 4350 (f) Quorum. In lieu of the requirements of Rule 4350 (f), we follow Argentine law and our bylaws, which distinguish between ordinary meetings and extraordinary meetings and require, in connection with ordinary meetings, that a quorum consist of a majority of stock entitled to vote. If no quorum is present at the first meeting, a second meeting may be called at which the shareholders present, whatever their number, constitute a quorum and resolutions may be adopted by an absolute majority of the votes present. Argentine law and our bylaws require, in connection with extraordinary meetings, that a quorum consist of 60% of the stock entitled to vote. However, if such quorum is not present at the first meeting, our bylaws provide that a second meeting may be called which may be held with the number of shareholders present. In both ordinary and extraordinary meetings, decisions are adopted by an absolute majority of votes present at the meeting, except for certain fundamental matters (such as mergers and spin-offs (when we are not the surviving entity and the surviving entity is not listed on any stock exchange), anticipated liquidation, a change in our domicile to outside of Argentina, total or partial recapitalization of our statutory capital following a loss, any transformation in our corporate legal form or a substantial change in our corporate purpose) which require an approval by vote of the majority of all the stock entitled to vote (all stock being entitled to only one vote).
- (ix) Rule 4350 (g) Solicitation of Proxies. In lieu of the requirements of Rule 4350 (g), we follow Argentine law which requires that notices of shareholders meetings be published, for five consecutive days, in the Official Gazette and in a widely circulated newspaper in Argentina no earlier than 45 calendar days prior to the meeting and at least 20 calendar days prior to such meeting. In order to attend a meeting and be listed on the meeting registry, shareholders are required to submit evidence of their book-entry share account held at Caja de Valores S.A. (Caja de Valores) up to three business days prior to the scheduled meeting date. If entitled to attend the meeting, a shareholder may be represented by proxy (properly executed and delivered with a certified signature) granted to any other person, with the exception of a director, syndic, member of the surveillance committee (*consejo de vigilancia*), manager or employee of the issuer, which are prohibited by Argentine law from acting as proxies. In addition, our ADR holders receive, prior to the shareholders meeting, a notice listing the matters on the agenda, a copy of the annual report and a voting card.
- (x) Rule 4350 (h) Conflicts of Interest. In lieu of the requirements of Rule 4350 (h), we follow Argentine law which requires that related party transactions be approved by the audit committee when the transaction exceeds one percent (1%) of the corporation's net worth, measured pursuant to the last audited balance sheet, so long as the relevant transaction exceeds the equivalent of three hundred thousand Argentine Pesos (Ps. 300,000). Directors can contract with the corporation only on terms consistent with prevailing market terms. If the contract is not in accordance with prevailing market terms, such transaction must be pre-approved by the board of directors (excluding the interested director). In addition, under Argentine law, a shareholder is required to abstain from voting on a business transaction in which its interests may be in conflict with the interests of the company. In the event such shareholder votes on such business transaction and such business transaction would not have been approved without such shareholder's vote, such shareholder may be liable to the company for damages and the resolution may be declared void.
- Other than as noted above, we are in full compliance with all other applicable Nasdaq corporate governance standards.

Table of Contents**Share Ownership**

For information on the share ownership of our directors and executive officers as of December 31, 2008, see Item 7.

Major Shareholders and Related Party Transactions-Major Shareholders.

Item 7. Major Shareholders and Related Party Transactions**Major Shareholders**

As of March 31, 2009, our capital structure was made up of class A shares, each of which is entitled to five votes and class B shares, each of which is entitled to one vote. As of March 31, 2009, we had 1,241,407,017 shares outstanding composed of 281,221,650 class A shares and 960,185,367 class B shares (320,454,370 of which were evidenced by 32,045,437 ADSs).

Our controlling shareholders are members of the Escasany, Ayerza and Braun families and the Fundación. As of March 31, 2009, the controlling shareholders owned 100% of our class A shares, through EBA Holding, which in turn owns 22.7% of our total outstanding shares, and 9.2% of our class B shares.

Based on information that is available to us, the table below sets forth, as of March 31, 2009, the number of our class A and class B shares held by holders of more than 5% of each class of shares, the percentage of each class of shares held by such holder, and the percentage of votes that each class of shares represent as a percentage of our total possible votes.

Class A Shares

Name	Class A Shares	% of Class A Shares	% of Total Votes
EBA Holding S.A.	281,221,650 class A shares	100	59.4

Class B Shares

Name	Class B Shares	% of Class B Shares	% of Total Votes
The Bank of New York ⁽¹⁾	320,454,370 class B shares	33.4	13.5
ANSES ⁽²⁾	253,609,737 class B shares	26.4	10.7
EBA Holding Shareholders ⁽³⁾	113,939,764 class B shares	11.9	4.8
Banco Santander ⁽⁴⁾	82,741,540 class B shares	8.6	3.5

(1) Pursuant to the requirements of Argentine law, all class B shares represented by ADSs are owned of record by The Bank of New York, as Depositary. The address for the Bank of New York is 101

Table of Contents

Based on information that is available to us, the table below sets forth, as of March 31, 2009, the shareholders that either directly or indirectly have more than 5% of our votes or shares.

Name	Shares	% of Shares	% of Total Votes
The Bank of New York	320,454,370 class B shares	25.8	13.5
EBA Holding S.A.	281,221,650 class A shares	22.7	59.4
ANSES	253,609,737 class B shares	20.4	10.7
EBA Holding Shareholders	113,939,764 class B shares	9.2	4.8
Banco Santander	82,741,540 class B shares	6.7	3.5

Members of the three controlling families have historically owned the majority of the issued share capital of Banco Galicia since 1959. Members of the Escasany family have been on the Board of Directors of the Bank since 1923. The Ayerza and Braun families have been represented on the Bank's Board of Directors since 1943 and 1947, respectively. Currently, there is one member of the controlling families on the Bank's Board of Directors and four members of these families on our Board of Directors. In addition, there are two alternate directors on our Board of Directors that are members of the controlling families.

On September 13, 1999, the controlling shareholders of Banco Galicia formed EBA Holding S.A., an Argentine corporation, which is 100% owned by our controlling shareholders. EBA Holding holds 100% of our class A shares. Currently, EBA Holding only has class A shares outstanding. EBA Holding's bylaws provide for certain restrictions on the sale or transfer of its class A shares. While the class A shares of EBA Holding may be transferred to any other class A shareholder of EBA Holding, any transfer of such class A shares to third parties would automatically result in the conversion of the sold shares into class B shares of EBA Holding having one vote per share. In addition, EBA Holding's bylaws contain rights of first refusal, buy-sell provisions and tag-along rights.

A public shareholder of Banco Galicia, who indirectly owns approximately 4.5% of the outstanding capital stock of Banco Galicia, has granted a right of first refusal for the purchase of all or part of its shares to certain of our controlling shareholders in the event such public shareholder decides to sell all or part of its Banco Galicia shares. As of March 31, 2008, we had 49 identified United States record shareholders (not considering The Bank of New York), of which 26 held our class B shares and 23 held our ADSs. Such United States holders, in the aggregate, held approximately 55.2 million of our class B shares, representing approximately 4.5% of our total outstanding capital stock as of said date.

Table of Contents**Related Party Transactions**

Other than as set forth below, Grupo Financiero Galicia and its non-banking subsidiaries are not a party to any transactions with, and have not made any loans to any (i) enterprises that directly or indirectly through one or more intermediaries, control or are controlled by Grupo Financiero Galicia or its non-banking subsidiaries, (ii) associates (i.e. an unconsolidated enterprise in which Grupo Financiero Galicia or its non-banking subsidiaries has a significant influence or which has significant influence over Grupo Financiero Galicia or its non-banking subsidiaries), (iii) individuals owning, directly or indirectly, an interest in the voting power of Grupo Financiero Galicia or its non-banking subsidiaries that gives them significant influence over Grupo Financiero Galicia or its non-banking subsidiaries, as applicable, and close members of any such individual's family (i.e. those family members that may be expected to influence, or be influenced by, that person in their dealings with Grupo Financiero Galicia or its non-banking subsidiaries, as applicable), (iv) key management personnel (i.e. persons that have authority and responsibility for planning, directing and controlling the activities of Grupo Financiero Galicia or its non-banking subsidiaries, including directors and senior management of companies and close members of such individual's family) or (v) enterprises in which a substantial interest is owned, directly or indirectly, by any person described in (iii) or (iv) or over which such a person is able to exercise significant influence nor are there any proposed transactions with such persons. For purposes of this paragraph, this includes enterprises owned by directors or major shareholders of Grupo Financiero Galicia or its non-banking subsidiaries that have a member of key management in common with Grupo Financiero Galicia or its non-banking subsidiaries, as applicable. In addition, significant influence means the power to participate in the financial and operating policy decisions of the enterprise but means less than control. Shareholders beneficially owning a 10% interest in the voting power of Grupo Financiero Galicia or its non-banking subsidiaries are presumed to have a significant influence on Grupo Financiero Galicia or its non-banking subsidiaries, as applicable.

Grupo Financiero Galicia has granted working capital loans to the following entities that it directly or indirectly controls:

Entity	Granted in	Rate %	Original Amount	Outstanding amount	
				December 31, 2008	April 30, 2009
				<i>(in millions of Pesos)</i>	
Net Investment S.A.	Nov/Dec 2008	0.0	Ps. 0.20	Ps. 0.20	Ps. 0.20
GV Mandataria de Valores S.A.	Nov/Dec 2008	0.0	Ps. 0.57	Ps. 0.57	Ps. 0.57

Some of our directors and the directors of the Bank have been involved in certain credit transactions with the Bank as permitted by Argentine law. The Corporations Law and the Argentine Central Bank's regulations allow directors of a limited liability company to enter into a transaction with such company if such transaction follows prevailing market conditions. Additionally, a bank's total financial exposure to related individuals or legal entities is subject to the regulations of the Argentine Central Bank. Such regulations set limits on the amount of financial exposure that can be extended by a bank to affiliates based on, among other things, a percentage of a bank's RPC. See Item 4. Information on the Company-Argentine Banking Regulation-Lending Limits .

Table of Contents

The Bank is required by the Argentine Central Bank to present to its Board of Directors, on a monthly basis, the outstanding amounts of financial assistance granted to directors, controlling shareholders, officers and other related entities, which are transcribed in the minute books of the Board of Directors. The Argentine Central Bank establishes that the financial assistance to directors, controlling shareholders, officers and other related entities must be granted on an equal basis with respect to rates, tenor and guarantees as loans granted to the general public.

In this section total financial exposure comprises equity interests and financial assistance (all credit related items such as loans, holdings of corporate debt securities without quotation, guarantees granted and unused balances of loans granted, among others), as this term is defined in Item 4. Information on the Company-Argentine Banking Regulation-Lending Limits .

Related parties refers to our directors and the directors of the Bank, our senior officers and senior officers of the Bank, our syndics and the Bank's syndics, our controlling shareholders as well as all individuals who are related to them by a family relationship of up to the second degree by blood and/or first degree by marriage and any entities directly or indirectly affiliated with any of these parties, not required to be consolidated.

The following table presents the aggregate amounts of total financial exposure of the Bank to related parties, the number of recipients, the average amounts and the single largest exposures as of the end of the three fiscal years ended December 31, 2008 and as of April 30, 2009, the last date for which information is available.

	April 30, 2009	December 31, 2008	December 31, 2007	December 31, 2006
	<i>In millions of Pesos, except as noted</i>			
Aggregate Total Financial Exposure	Ps. 52.8	Ps. 74.9	Ps. 40.8	Ps. 19.3
Number of Recipient Related Parties	218	221	207	205
Individuals	170	174	168	163
Companies	48	47	39	42
Average Total Financial Exposure	Ps. 0.2	Ps. 0.3	Ps. 0.2	Ps. 0.1
Single Largest Exposure	Ps. 8.8	Ps. 30.5	Ps. 11.6	Ps. 3.6

The financial assistance granted to our directors, officers and related parties by the Bank, including the financial assistance that was restructured, was granted in the ordinary course of business, on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other non-related parties, and did not involve more than the normal risk of collectibility or present other unfavorable features.

The Bank and Grupo Financiero Galicia have executed a trademark license agreement under which the Bank has authorized Grupo Financiero Galicia to use the word Galicia in our corporate name and has authorized our direct or indirect subsidiaries, other than those of the Bank, to use in their corporate names the Bank's registered trademarks, including the word Galicia, in marketing their products and services. The trademark license agreement has a 10-year term, ending in June 2010, and provides for the payment of an annual royalty that amounted to Ps. 1.1 million in 2008.

Table of Contents**Item 8. Financial Information**

We have elected to provide the financial information set forth in Item 18 of this annual report.

Legal Proceedings

We are a party to the following legal proceedings:

Theseus S.A. and Lagarcué S.A., two minority shareholders of Banco Galicia, have initiated legal proceedings against Banco Galicia and Grupo Financiero Galicia (*Theseus S.A. y otra c/ Banco de Galicia y Buenos Aires S.A. y Grupo Financiero Galicia S.A. s/ Ordinario*). The proceeding's purpose is to have the court declare null the corporate legal action done by Grupo Financiero Galicia with the cooperation of Banco Galicia pursuant to which there was an exchange of class B shares of Banco Galicia for class B shares of Grupo Financiero Galicia. Banco Galicia and Grupo Financiero Galicia have answered the claim, arguing in defense that the transaction was done under applicable legal terms and, among other things, that there was not one action of exchange of shares but rather as many legal actions (exchange agreements) as there were shareholders who tendered their Banco Galicia's shares to receive Grupo Financiero Galicia's shares (i.e., 3,172 legal actions). Therefore, in order to nullify all of the exchange agreements, it would be necessary that every single person who tendered shares be named in the lawsuit, not just Banco Galicia and Grupo Financiero Galicia. The material effect that the lawsuit could have, if it were successful, which is considered unlikely, is not assessed in monetary terms, since such effects are not indicated in the lawsuit. Currently, this lawsuit is in the discovery stage. Grupo Financiero Galicia considers that the result of this lawsuit is unlikely to produce a significant adverse effect on its financial condition.

On January 18, 2007, Grupo Financiero Galicia, Banco Galicia and their respective directors and syndics were notified of the CNV Resolution No. 15,557, dated as of January 11, 2007 (hereinafter, the Resolution), pursuant to which the CNV resolved to begin an investigation proceeding against all of the above-mentioned institutions and persons with respect to potential violations of various regulations relating to the wrong use of inside information and the possible insufficient disclosure of information. This is related to trading operations of the Notes due 2014 and the Notes due 2019 in the market carried out by Grupo Financiero Galicia and issued by the Bank as part of its foreign debt restructuring. Such institutions and persons presented their respective defenses, after which it was decided to commence an evidentiary period. After the evidentiary period ended in August 2007, the case was handed over to the CNV Board so that they would pass a final resolution on the matter. Grupo Financiero Galicia and the Bank believe that the proceeding has no factual support and that all the actions related to the matter were performed according to applicable laws and regulations. The aforementioned CNV's regulation is available at www.cnv.gov.ar.

Banco Galicia

In response to certain pending legal proceedings, the Bank has made allowances to cover (i) various types of claims filed by customers against it (e.g., claims for thefts from safe deposit boxes, collections of checks that had been fraudulently altered, discrepancies related to deposit and payment services rendered to the Bank's customers, etc.) and (ii) estimated amounts payable under labor-related lawsuits filed against Banco Galicia by former employees.

In connection with the application by financial institutions of emergency measures implemented by the Executive Branch of the Government during and in respect of the 2001-2002 crisis, which mandated the pesification of deposits originally denominated in US Dollars and the restructuring of such deposits, in 2002 individuals and institutions initiated a significant number of legal actions known as *amparo* claims against financial institutions, including the Bank, on the basis that these measures violated their constitutional and other rights. These legal actions have resulted in losses for financial institutions, including the Bank, as a result of court orders mandating the reimbursement of restructured deposits at values greater than those established by the emergency measures. The Argentine Central Bank issued regulations allowing for the deferral and amortization of such related losses, while the Government did not provide for any compensation for such losses to the financial institutions and the Argentine Supreme Court has issued rulings in several particular cases related to deposit pesification with different implications. The Bank has repeatedly reserved its right to make claims, at a suitable time, in view of the negative effect caused on its financial condition by the reimbursement of deposits originally denominated in US Dollars, pursuant to orders issued by the Judicial Branch, either in US Dollars or in Pesos for the equivalent amount at the market exchange rate, since compensation for this effect was not included by the Government in the calculation of the compensation to financial institutions. The method of accounting for such right as a deferred loss, set forth by the Argentine Central Bank regulations, does not

affect its existence or legitimacy. To such effect, the corresponding reservation of rights has been made. Dated on December 30, 2003, the Bank formally requested from the National Executive Branch, with a copy to the Ministry of Economy and Production (MECON) and to the Argentine Central Bank, the payment of due compensation for the losses incurred into by the Bank generated by the asymmetric pesification and especially for the negative effect on its financial condition caused by court decisions. The Bank has reserved its right to further extend such request in order to encompass losses made definitive by new final judgments.

Table of Contents

As of the date of this annual report, provincial tax collection authorities as well as tax collection authorities from the Autonomous City of Buenos Aires, are in the process (in different degrees of completion) of conducting audits related to turnover taxes corresponding to fiscal year 2002, mainly related to the Compensatory Bond. The Bank has been expressing its disagreement regarding these adjustments at the corresponding administrative and/or legal proceedings. These proceedings and their possible effects are constantly being monitored by the management of the Bank. Even though the foregoing has not been finally resolved yet, the Bank believes it has complied with its tax liabilities in full pursuant to current regulations.

Finally, it must be mentioned that Banco Galicia, its Directors and Syndics are also subject to the investigation proceeding initiated by the CNV last January 18, 2007 with respect to potential violations of various regulations relating to the possible wrong use of inside information and the possible insufficient disclosure of information. In addition, Theseus S.A. and Lagarcu  S.A., two minority shareholders of Banco Galicia, have initiated legal proceedings against Banco Galicia requesting that the court declare null the corporate legal action done by Grupo Financiero Galicia with the cooperation of Banco Galicia pursuant to which there was an exchange of class B shares of Banco Galicia for class B shares of Grupo Financiero Galicia. For more information on these two proceedings, see -Legal Proceedings-Grupo Financiero Galicia in this section.

Regional Credit Card Companies

As of the date of this annual report, the Argentine Revenue Service (AFIP), the Revenue Board of the Province of C rdoba and the municipalities of the cities of Mendoza and San Luis are in the process of conducting audits. Said bodies have served notices and made claims regarding taxes applicable to Tarjetas Regionales S.A.'s subsidiaries. Based on the opinions of their tax advisors, these companies believe that the abovementioned claims are both legally and technically groundless and that taxes related to the claims have been correctly calculated in accordance with tax regulations in force and existing case law. Therefore, both companies are taking the corresponding administrative and legal steps in order to resolve such issues.

Dividend Policy and Dividends

Dividend Policy

We may only declare and pay dividends out of our retained earnings representing the profit realized on our operations and investments. The Corporations Law and our bylaws state that no profits may be distributed until prior losses are covered. Dividends paid on our class A shares and class B shares will equal one another on a per share basis. As required by the Corporations Law, 5% of our net income is allocated to a legal reserve until the reserve equals 20% of our outstanding capital. Dividends may not be paid if the legal reserve has been impaired until it is fully restored. The legal reserve is not available for distribution to shareholders.

As a holding company, our principal source of cash from which to pay dividends on our shares is dividends or other intercompany transfers from our subsidiaries, primarily Banco Galicia. Due to the dividend restrictions contained in the Bank's loan agreements in connection with the Bank's foreign debt restructuring and in Argentine Central Bank regulations, as described below, our ability to distribute cash dividends to our shareholders has been materially and adversely affected.

Table of Contents

Our ability to pay dividends to our shareholders in the future will principally depend on (i) our net income (on a consolidated basis), (ii) availability of cash and (iii) applicable legal requirements.

Holders of our ADSs will be entitled to receive any dividends payable in respect of our underlying class B shares. We will pay cash dividends to the ADS depositary in Pesos, although we reserve the right to pay cash dividends in any other currency, including Dollars. The ADS deposit agreement provides that the depositary will convert cash dividends received by the ADS depositary in Pesos to Dollars and, after deduction or upon payment of fees and expenses of the ADS depositary and deduction of other amounts permitted to be deducted from such cash payments in accordance with the ADS deposit agreement (such as for unpaid taxes by the ADS holders in connection with personal asset taxes or otherwise), will make payment to holders of our ADSs in Dollars.

Under the loan agreements entered into by the Bank in connection with its foreign debt restructuring, the Bank may only pay dividends on its capital stock if there is no event of default under the loan agreements and only after the aggregate principal amount of the long term instruments and medium term instruments (together, but excluding the subordinated debt instruments maturing in 2019, the senior debt) issued in its foreign debt restructuring is equal to or less than 50% of the originally issued senior debt. If the Bank is able to pay dividends, it is required to repay US\$ 2 of the long-term instruments issued in its foreign debt restructuring for each US\$ 1 of dividends paid on its capital stock. Argentine Central Bank regulations further restrict the distribution of cash dividends by the Bank.

By means of Communiqués A 4589 and A 4591, issued on October 29 and November 8, 2006, the Argentine Central Bank modified the criteria by which a financial institution determines if it can distribute profits. According to the new rules, profits can be distributed up to the positive amount resulting after deducting from retained earnings the reserves that may be legally and statutory required, as well as the following items: the difference between the book value and the market value of a financial institution's portfolio of public-sector assets and/or debt issued by the Argentine Central Bank not marked-to-market, the amount of assets representing the losses from lawsuits related to deposits, and any adjustments required by the external auditors or the Argentine Central Bank not having been recognized. In addition, to be able to distribute profits, a financial institution must comply with the capital adequacy rule, with the minimum capital requirement and the regulatory capital calculated, only for the purpose of determining its ability to distribute profits, by deducting from its assets and retained earnings all the items mentioned in above, as well as the asset recorded in connection with the minimum presumed income tax and the amounts allocated to the repayment of long-term debt instruments computable as core capital pursuant to Communiqué A 4576. Likewise, in such calculation, a financial institution will not be able to compute the temporary reductions in the capital required to cover the exposure to the public sector (resulting from applying the Alfa 1 coefficient), as well as any other regulatory forbearance that the Argentine Central Bank may provide, affecting minimum capital requirements, computable regulatory capital or a financial institution's capital adequacy, and the amount of profits that it wishes to distribute.

Table of Contents

At the close of the fiscal year ended December 31, 2008, the Bank's capital, non-capitalized contributions, profit reserves, adjustments to Shareholders' Equity and retained earnings (not including the fiscal year's net income) totaled Ps. 1,759.4 million. The Bank's net income for fiscal year 2008 amounted to Ps. 195.3 million. In addition to the retained earnings at the previous fiscal year end, of Ps. 3.7 million, the Bank's total retained earnings amounted to Ps. 199.0 million. Taking into consideration the Argentine Central Bank rules regarding the distribution of profits, as explained above, the Bank's Board of Directors proposed at the shareholders' meeting held on April 28, 2009, and such shareholders' meeting approved, the following distribution of earnings:

	<i>In millions of Pesos</i>
To Legal Reserve	39.0
To Next Fiscal Year	160.0

As of December 31, 2008, the applicable adjustments to the Bank's retained earnings were the following: (i) Ps. 2,520.9 million, for the positive difference between the book value and the market value of public-sector assets and/or debt instruments issued by the Argentine Central Bank not marked-to-market, and Ps. 316.9 million for deferred losses in connection with lawsuits related to deposits (*amparo* claims).

Under the new rules, dividend distribution requires the prior authorization of the Argentine Central Bank, with such authorization having the purpose of verifying that the aforementioned requirements have been fulfilled.

In light of the restrictions on Banco Galicia's ability to make distributions, our current policy is to retain earnings and cash flows to pay for our operating expenses, support the growth of our business and repay our outstanding debt.

Dividends

Grupo Financiero Galicia is a holding company; thus dividends or other intercompany transfers from its subsidiaries, primarily Banco Galicia, are the main source of cash available to pay dividends on its shares. Therefore, Grupo Financiero Galicia's ability to pay dividends in the future is dependent, primarily, on (1) its net income (on a consolidated basis), (2) the availability of cash and (iii) applicable legal requirements.

We have not paid any dividends since March 2001, due to the fact that Banco Galicia did not post any distributable income as a result of the crisis and the other applicable restrictions. The last cash dividend we received from Banco Galicia was in October 2001 for Ps. 116.4 million, but those funds were deposited at Galicia Uruguay. The deposits we maintained at Galicia Uruguay that may have otherwise been available for distribution or to pay our operating expenses were restructured and most of these deposits were converted into subordinated negotiable obligations issued by Galicia Uruguay for US\$ 43 million in late 2002. In July 2005, we forgave these subordinated negotiable obligations.

In light of the restrictions on Banco Galicia's ability to make distributions and the international and domestic economic situation, Grupo Financiero Galicia's current policy is to retain its earnings to pay for its operating expenses and to support the growth of Grupo Financiero Galicia's businesses.

Table of Contents

Significant Changes

Grupo Financiero Galicia

On January 7, 2009, Grupo Financiero Galicia paid in advance, through a single and final payment of US\$ 39.1 million, the remaining balance of the loan entered into with Merrill Lynch International. In order to make the abovementioned prepayment, the Company used its own funds plus funds from a 180-day loan entered into with Sudamericana on January 6, 2009 for the amount of Ps. 97 million.

On March 9, 2009 Grupo Financiero Galicia's shareholders, at their ordinary shareholders meeting, approved the creation of a Negotiable Obligation Program for up to US\$ 60 million. The CNV approved said program on April 29, 2009, and, on May 9, 2009, also approved a pricing supplement for the offering of negotiable obligations for up to US\$ 45 million. See Item 5.A. Operating Results-Funding-Debt Programs.

On June 4, 2009, Grupo Financiero Galicia issued two bonds amounting to US\$ 45 million: (i) US\$ 34.4 million of non-interest bearing bonds due on May 30, 2010, these bonds were issued at a price of 92.68/100 and their yield will be 8%, and (ii) US\$ 10.6 million of bonds with a 12.5% coupon, due on May 25, 2011, these bonds were issued at a price of 103.48/100 and their yield will be 10.5%. Interest on the bonds noted in (ii) is payable semiannually. With the proceeds of said bonds, Grupo Financiero Galicia cancelled the bridge loan that it had entered with Sudamericana on January 6, 2009.

Banco Galicia

During January 2009, the Government offered a public debt swap, including Secured Loans set forth in Decree No. 1387/01 and other debt securities. Banco Galicia took part in an exchange of National Secured Loans (*Vencimiento 2009-7%, Bono Pagaré G+580 Mega (tasa fija)*), for other public-sector assets and instruments at market prices, with no adverse effects on the Bank's financial condition.

During the first quarter of fiscal year 2009, the Bank cancelled in advance US\$ 30.0 million of face value of its negotiable obligations due in 2014, acquired at market prices. After this transaction, the outstanding principal amount of negotiable obligations due in 2014 is US\$ 260.0 million of face value.

Table of Contents

On May 15, 2009 Banco Galicia Uruguay cancelled in advance the remaining outstanding balance of its restructured debt, the original due date of which was in September 2011, for a principal amount of US\$ 27.3 million.

On June 2, 2009, the Bank announced that it had entered into an agreement with AIG to purchase 80% of AIG's shares in its consumer finance operations in Argentina, consisting of CFA, CyS and UPC in a transaction that involved the sale of all the shares of the mentioned companies to Banco Galicia along with other third parties, for an amount of Ps. 133.2 million. The transaction is subject to the satisfaction of certain conditions, including the approval of the Argentine Central Bank. Banco Galicia is entering into this transaction in order to consolidate its expansion strategy in the Argentine market. CFA is a leading provider of personal loans in Argentina, with 93 branches nationwide, distribution agreements with approximately 3,900 retailers and approximately 1 million customers. As of March 31, 2009, its total assets amounted to approximately Ps. 1.5 billion, its loans to Ps. 1.0 billion and its shareholders' equity to Ps. 833 million.

Item 9. The Offer and Listing

Shares and ADSs

Our class B shares are listed on the BASE and the Córdoba Stock Exchange under the symbol GGAL. Our ADSs, each representing ten class B shares, are listed on the Nasdaq Capital Market, under the symbol GGAL. Our ADSs have been listed on Nasdaq Capital Market since August 2002. Previously, our ADSs had been listed on the Nasdaq National Market since July 24, 2000.

On May 13, 2004, we issued 149.0 million preferred shares in connection with the restructuring of the foreign debt of the Bank's Head Office and its Cayman Branch. Under the terms and conditions of the restructuring, our preferred shares were automatically convertible into class B shares on May 13, 2005. Such conversion took place on May 13, 2005. Our preferred shares were listed on the BASE and the Córdoba Stock Exchange under the symbol GGAL6 between May 13, 2004 and May 12, 2005.

Table of Contents

The following tables present, for the periods indicated, the high and low closing prices and the average trading volume of our class B shares and preferred shares on the BASE as reported by the BASE and the high and low closing prices and the average trading volume of our ADSs on the Nasdaq as reported by the Nasdaq Capital Market. There has been low trading volume of our class B shares on the Córdoba Stock Exchange. The following prices have not been adjusted for any stock dividends and/or stock splits.

Argentine Securities Market

The principal and oldest exchange for the Argentine securities market is the BASE. The BASE started operating in 1854 and handles approximately 95% of all equity trading in Argentina. Securities listed on the BASE include corporate equity and debt securities and government securities. Debt securities listed on the BASE may also be listed on the MAE. The Buenos Aires Stock Market (the MERVAL), which is affiliated with the BASE, was founded in 1929 and is the largest stock market in Argentina. The MERVAL is a corporation whose 133 shareholder members are the only individuals and entities authorized to trade, either as principal or as agent, in the securities listed on the BASE. Although there are 183 MERVAL shares outstanding, some banks and brokers own more than one share and currently there are 133 members. We are a member of the MERVAL through Galicia Valores, who owns three shares.

Trading on the BASE is conducted mostly through the *Sistema Integrado de Negociación Asistida por Computación* (Integrated Computer Assisted Trading System, SINAC) although there are still some transactions carried out by continuous open outcry, the traditional auction system, from 11:00 a.m. to 5:00 p.m. each business day of the year. SINAC is a computer trading system that permits trading in debt and equity securities and is accessed by brokers directly from workstations located at their offices. As a result of an agreement between the Merval and the MAE, equity securities are traded exclusively on the BASE and corporate and government debt securities are traded on the MAE and the BASE. Currently, all transactions relating to listed corporate and government debt securities can be effected on SINAC. In addition, a substantial over-the-counter market exists for private trading in listed debt securities and, prior to the agreement described above, equity securities. Such trades are reported on the MAE.

Table of Contents

Although companies may list all of their capital stock on the BASE, in most cases the controlling shareholders retain the majority of a company's capital stock. This results in only a relatively small percentage of most companies' stock being available for active trading by the public on the BASE. Even though individuals have historically constituted the largest group of investors in Argentina's equity markets, in recent years, banks and insurance companies have shown an interest in these markets. Argentine mutual funds, by contrast, continue to have very low participation in the market. Although 109 companies had equity securities listed on the BASE as of December 31, 2008, the 10 most-traded companies on the exchange accounted for approximately 81% of total trading value during 2008. Our shares were the third most-traded shares on the BASE in 2007, with a 3.5% share of trading volume.

The Córdoba Stock Exchange is another important stock market in Argentina. Securities listed on the Córdoba Stock Exchange include both corporate equity and debt securities and government securities. Through an agreement with the BASE, all of the securities listed on the BASE are authorized to be listed and subsequently traded on the Córdoba Stock Exchange. Thus, many transactions that originate on the Córdoba Stock Exchange relate to companies listed on the BASE and such trades are subsequently settled in Buenos Aires.

Market Regulations

The CNV oversees the Argentine securities markets and is responsible for authorizing public offerings of securities and supervising brokers, public companies and mutual funds. Argentine pension funds and insurance companies are regulated by separate Government agencies, while financial institutions are regulated mainly by the Argentine Central Bank. The Argentine securities markets are governed generally by Law No. 17,811, as amended, which created the CNV and regulates stock exchanges, market operations and the public offering of securities.

In compliance with the provisions of Law No. 20,643 and the Decrees No. 659/74 and No. 2220/80, most debt and equity securities traded on the exchanges and the MAE must, unless otherwise instructed by the shareholders, be deposited by the shareholders in Caja de Valores, which is a corporation owned by the BASE, the Merval and certain provincial exchanges. Caja de Valores is the central securities depository of Argentina, which provides depository facilities for securities and acts as a transfer and paying agent in connection therewith. It also handles settlement of securities transactions carried out on the BASE and operates the computerized exchange information system.

The level of regulation of the market for Argentine securities and investors' activities is low relatively as compared to the United States and certain other countries, and enforcement of existing regulatory provisions has been limited. In addition, there may be less publicly available information about Argentine companies than is regularly published by or about companies in these countries. However, the CNV has taken steps to strengthen disclosure and regulatory standards for the Argentine securities market, including the issuance of regulations prohibiting insider trading and requiring insiders to report on their ownership of securities, with associated penalties for non-compliance.

In order to improve Argentine securities market regulation, Decree No. 677/01 or Decree for Transparency in the Public Offering, was promulgated and took effect on June 1, 2001. This decree has come to be regarded as the financial consumer's bill of rights. Its objective is to provide transparency and protection to participants in the capital markets. The decree applies to individuals and entities that participate in the public offering of securities and to stock exchanges as well. Among its key provisions, the decree broadens the definition of security; governs the treatment of negotiable securities; obligates publicly listed companies to form audit committees composed of three or more members of the board of the directors, the majority of whom must be independent under CNV regulations; authorizes market-stabilization transactions under certain circumstances; governs insider trading, market manipulation and securities fraud; and regulates going-private transactions and acquisitions of voting shares, including controlling stakes in public companies.

Table of Contents

In order to offer securities to the public in Argentina, an issuer must meet certain requirements of the CNV regarding assets, operating history, management and other matters, and only securities for which an application for a public offering has been approved by the CNV may be listed on the corresponding stock exchange. This approval does not imply any kind of certification of assurance related to the merits of the quality of the securities, or the solvency of the issuer. Issuers of listed securities are required to file unaudited quarterly financial statements and audited annual financial statements, as well as various other periodic reports, with the CNV and the corresponding stock exchange. Securities can be freely traded on the Argentine markets but certain restrictions exist to regarding access by residents and non-residents to the local foreign exchange market and to transfers of foreign exchange abroad. See Item 4.

Information on the Company-Government Regulation-Foreign Exchange Market.

On October 2007, the CNV passed Resolution No. 516/07 providing for the voluntary adoption of a corporate governance code. The CNV recommends adoption of such code by public companies but requires that their policy with respect to each topic described in the code be disclosed in detail in the annual report. This resolution will be effective for fiscal years beginning on January 1, 2008 and after and, therefore, public companies, including us, will have to report on their degree of fulfillment of each topic of such code.

Item 10. Additional Information

Description of Our Bylaws

General

Set forth below is a brief description of certain provisions of our bylaws and Argentine law and regulations with regard to our capital stock. Your rights as a holder of our capital stock are subject to Argentine corporate law, which may differ from the corporate laws of other jurisdictions. This description is not purported to be complete and is qualified in its entirety by reference to our bylaws, Argentine law and the rules of the BASE, the Córdoba Stock Exchange as well as the CNV. A copy of our bylaws has been filed with and can be examined at the CNV in Buenos Aires and the SEC in Washington, D.C.

We were incorporated on September 14, 1999, as a stock corporation under the laws of Argentina and registered on September 30, 1999, with the Argentine Superintendency of Companies or IGJ, under corporate registration number 14,519 of Book 7, Volume of Stock Corporations. Our domicile is in Buenos Aires, Argentina. Under our bylaws, our duration is until June 30, 2100 and we are exclusively a financial and investment company (as stated in Chapter 2. Purpose. Article 3. of our by-laws). This duration may be extended by resolution taken at a general extraordinary shareholders meeting.

Our bylaws do not contain any provision governing the ownership threshold above which shareholder ownership must be disclosed.

During the shareholders meeting held on April 23, 2003, we decided not to adhere to the Optional Statutory System for the Mandatory Acquisition of Shares in a Public Offering regime in compliance with Decree No. 677/01, which requires a company to announce whether it has adopted this regime.

Table of Contents**Outstanding Capital Stock**

Our total subscribed and paid-in share capital as of December 31, 2008, amounted to Ps. 1,241,407,017, composed of class A shares and class B shares, each with a par value of Ps. 1.00. The following table presents the number of our shares outstanding as of December 31, 2008, and the voting interest that the shares represent.

Shares	As of December 31, 2009		
	Number of Shares	% of Capital Stock	% of Voting Rights
Class A Shares	281,221,650	22.65	59.42
Class B Shares	960,185,367	77.35	40.58
Total	1,241,407,017	100.00	100.00

Registration and Transfer

The class B shares are book-entry common shares held through Caja de Valores. Caja de Valores maintains a stock registry for us and only those persons listed in such registry will be recognized as our shareholders. Caja de Valores periodically delivers to us a list of the shareholders as at a certain date.

The class B shares are transferable on the books of Caja de Valores. Caja de Valores records all transfers in our registry. Within 10 days of any such transfer, Caja de Valores is required to confirm the registration of transfer with the transferor.

Voting Rights

At shareholders meetings, each class A share is entitled to five votes and each class B share is entitled to one vote. However, class A shares are entitled to only 1 vote in certain matters, such as:

- a merger or spin-off in which we are not the surviving corporation, unless the acquirer's shares are authorized to be publicly offered or listed on any stock exchange;
- a transformation in our legal corporate form;
- a fundamental change in our corporate purpose;
- a change of our domicile to outside Argentina;
- a voluntary termination of our public offering or listing authorization;
- our continuation following a delisting or a mandatory cancellation of our public offering or listing authorization;
- a total or partial recapitalization of our statutory capital following a loss; or
- the appointment of syndics.

All distinctions between our class A shares and our class B shares will be eliminated upon the occurrence of any of the following change of control events:

- EBA Holding sells 100% of its class A shares;
- EBA Holding sells a portion of our class A shares to a third person who, when aggregating all our class A shares with our class B shares owned by such person, if any, obtains 50% plus one vote of our total votes; or
- the current shareholders of EBA Holding sell shares of EBA Holding that will allow the buyer to exercise more than 50% of the voting power of EBA Holding at any general shareholders meeting of EBA Holding shareholders, except for transfers to other current shareholders of EBA Holding or to their heirs or their legal successors or to entities owned by any of them.

Table of Contents

Limited Liability of Shareholders

Shareholders are not liable for our obligations. Shareholders' liability is limited to the payment of the shares for which they subscribe. However, shareholders who have a conflict of interest with us and do not abstain from voting may be held liable for damages to us. Also, shareholders who willfully or negligently vote in favor of a resolution that is subsequently declared void by a court as contrary to Argentine law or our bylaws may be held liable for damages to us or to third parties, including other shareholders, resulting from such resolutions.

Directors

Our bylaws provide that the board of directors shall be composed by at least three and at most nine members, as decided at a general ordinary shareholders' meeting. To be appointed to our board of directors, such person must have been presented as a candidate by shareholders who represent at least 10% of our voting rights, at least three business days before the date the general ordinary shareholders' meeting is to be held. Our bylaws do not state an age limit over which the directors cannot serve on our board.

At each annual shareholders' meeting, the term of one third of the members of our board of directors (no fewer than three directors) expires and their successors are elected to serve for a term of three years. The shareholders' meeting shall have the power to fix a shorter period (one or two years) for the terms of office of one, several or all of the directors. This system of electing directors is intended to help maintain the continuity of the board. Alternate directors replace directors until the following general ordinary shareholders' meeting is held. Directors may also be replaced by alternate directors if a director will be absent from a board meeting. The board of directors is required to meet at least once every month and anytime any one of the directors or syndics so requests.

Our bylaws state that the board of directors may decide to appoint an executive committee and/or a delegate director. Our bylaws do not provide for any arrangements or understandings with major shareholders, customers, suppliers or others, pursuant to which any person referred to in this annual report was selected as a director or member of senior management.

Additionally, pursuant to our bylaws, any borrowing powers on behalf of the Company are granted to our Board of Directors. Our Board of Directors has the power to delegate these borrowing powers to our directors through a power of attorney and currently certain of our directors have powers of attorney to negotiate the terms of and borrow money on behalf of the Company. Furthermore, as stated by our bylaws, the chairman of our Board of Directors is also the legal representative of the Company. Although our bylaws do not expressly address a director's power to vote on proposals, arrangements or contracts in which the director has a material interest, pursuant to customary Argentine business practice and certain tenants of Argentine corporate law, our directors do not vote on proposals, arrangements or contracts in which the director has a material interest.

Table of Contents

Appointment of Directors and Syndics by Cumulative Voting

The Corporations Law provides for the use of cumulative voting to enable minority shareholders to appoint members of the board of directors and syndics. Upon the completion of certain requirements, shareholders are entitled to appoint up to one third of the vacancies to be filled on the board of directors by cumulative voting. Each shareholder voting cumulatively has the number of votes resulting from multiplying the number of votes to which such shareholder would normally be entitled by the number of vacancies to be filled. Such shareholder may apportion his votes or cast all such votes for one or a number of candidates not exceeding one third of the vacancies to be filled.

Compensation of Directors

The Corporations Law and the CNV establish rules regarding the compensation of directors. The maximum amount of aggregate compensation that the members of the board of directors may receive, including salaries and other compensation for the performance of permanent technical and administrative services, may not exceed 25.0% of profits of each fiscal year. This maximum amount shall be limited to 5.0% when no dividends are distributed to the shareholders and shall be increased proportionately to the dividend distribution until the 25.0% limit is reached when all profits are distributed.

The Corporations Law provides that aggregate director compensation may exceed the maximum percentage of computable profit in any one year when the company's profits are non-existent or too small as to allow payment of a reasonable compensation to board members which have been engaged in technical or administrative services to the company, provided that such proposal is described in the notice of the agenda for the ordinary shareholders meeting and is approved by a majority of shareholders present at such shareholders meeting.

In addition to the above, our bylaws establish that best practices and national and international market standards regarding directors with similar duties and responsibilities shall be considered when determining the compensation of board members.

Syndics

Our bylaws, in accordance with Argentine law, provide for the maintenance of a supervisory committee whose members are three permanent syndics and three alternate syndics. Syndics are elected for a one-year term and may be reelected. Alternate syndics replace permanent syndics in case of absence. For the appointment of syndics, each of our class A shares and class B shares has only one vote. Fees for syndics are established by the shareholders at the annual ordinary shareholders meeting. Their function is to oversee the management of the company, to control the legality of the actions of the board of directors, to attend all board of directors meetings, to attend all shareholders meetings, to prepare reports for the shareholders on the financial statements with their opinion, and to provide information regarding the company to shareholders that represent at least 2% of the capital stock. Syndics' liabilities are joint and several and unlimited for the non-fulfillment of their duties. They are also jointly and severally liable, together with the members of the board of directors, if the proper fulfillment of their duties as syndics would have avoided the damage or the losses caused by the members of the board of directors.

Table of Contents

Shareholders Meetings

Shareholders meetings may be ordinary meetings or extraordinary meetings. An annual ordinary shareholders meeting is required to be held in each fiscal year to consider the matters outlined in Article 234 of the Corporations Law, including, among others:

- approval of the financial statements and general performance of the management for the preceding fiscal year;
- appointment and remuneration of directors and members of the supervisory committee;
- allocation of profits; and
- any other matter the board of directors decides to submit to the shareholders meeting concerning the company's business administration. Matters which may be discussed at these or other ordinary meetings include resolutions regarding the responsibility of directors and members of the supervisory committee, as well as capital increases and the issuance of negotiable obligations.

Extraordinary shareholders meetings may be called at any time to discuss matters beyond the competence of the ordinary meeting, including but not limited to amendments to the bylaws, matters related to the liquidation of a company, limitation of the shareholders preemptive rights to subscribe new shares, issuance of bonds and debentures, transformation of the corporate form, a merger into another company and spin-offs, early winding-up, change of the company's domicile to outside Argentina, total or partial repayment of capital for losses, and a substantial change in the corporate purpose set forth in the bylaws.

Shareholders meetings may be convened by the board of directors or by the syndics. A shareholder or group of shareholders holding at least 5.0% in the aggregate of our capital stock may request the board of directors or the syndics to convene a general shareholders meeting to discuss the matters indicated by the shareholder.

Once a meeting has been convened with an agenda, the agenda limits the matters to be decided upon at such meeting and no other matters may be decided upon.

Additionally, our bylaws provide that any shareholder holding at least 5% in aggregate of our capital stock may present, in writing, to the Board of Directors, before February 28 of each year, proposals of items to be included in the agenda at the annual general ordinary shareholders meeting. The Board of Directors is not obligated to include such items in the agenda.

Class B shares represented by ADSs will be voted or caused to be voted by the Depositary in accordance with instructions of the holders of such ADSs. In the event instructions are not received from the holder, the Depositary shall give a discretionary proxy for the shares represented by such ADSs to a person designated by us.

Notice of each shareholders meeting must be published in the Official Gazette, and in a widely circulated newspaper in the country's territory, at least twenty days prior to the meeting but not more than forty-five days prior to the date on which the meeting is to be held. The board of directors will determine the appropriate publication of notices outside Argentina in accordance with the requirements of the jurisdictions and exchanges on which our shares are traded. In order to attend a meeting and to be listed on the meeting registry, shareholders must submit evidence of their book-entry share account held at Caja de Valores at least three business days prior to the scheduled meeting date without counting the meeting day.

Table of Contents

The quorum for ordinary meetings consists of a majority of stock entitled to vote, and resolutions may be adopted by the affirmative vote of 50% plus one vote (an absolute majority) of the votes present whether in person or participating via electronic means of communication. If no quorum is present at the first meeting, a second meeting may be called at which the shareholders present, whatever their number, shall constitute a quorum. Resolutions are to be adopted by an absolute majority of the votes present. The second meeting may be convened to be held one hour later on the same day as the first meeting had been called for, provided that it is an ordinary shareholders meeting, or within thirty days of the date for which the first ordinary meeting was called.

The quorum for extraordinary shareholders meetings consists of 60% of stock entitled to vote, and resolutions may be adopted by an absolute majority of the votes present. If no quorum is present at the first meeting, a second meeting may be called at which the shareholders present, whatever their number, shall constitute a quorum. Resolutions are to be adopted by an absolute majority of the votes present. The second meeting has to be convened to be held within thirty days of the date for which the first extraordinary meeting was called, and the notice must be published for three days, at least eight days before the date of the second meeting. Some special matters require a favorable vote of the majority of all the stock holding voting rights, the class A shares being granted the right to only one vote each. The special matters are described in -Voting Rights above.

Dividends

Dividends may be lawfully paid and declared only out of our retained earnings representing the profit realized on our operations and investments reflected in our annual financial statements, as approved at our annual general shareholders meeting. No profits may be distributed until prior losses are covered. Dividends paid on our class A shares and class B shares will equal one another on a per-share basis.

As required by the Corporations Law, 5% of our net income is allocated to a legal reserve until the reserve equals 20% of our outstanding capital. Dividends may not be paid if the legal reserve has been impaired. The legal reserve is not available for distribution to shareholders.

Our Board of Directors submits our financial statements for the previous fiscal year, together with reports prepared by our supervisory committee, to our shareholders for approval at the general ordinary shareholders meeting. The shareholders, upon approving the financial statements, determine the allocation of our net income.

Our Board of Directors is allowed by law and by our bylaws to decide to pay anticipated dividends on the basis of a balance sheet especially prepared for purposes of paying such dividends.

Table of Contents

Under CNV regulations and our bylaws, cash dividends must be paid to shareholders within 30 days of the shareholders meeting approving the dividend. Payment of dividends in shares requires authorization from the CNV, the BASE and the Córdoba Stock Exchange, whose authorizations must be requested within 10 business days after the shareholders meeting approving the dividend. We must make a distribution of the shares available to shareholders not later than three months after receiving authorization to do so from the CNV.

Shareholders may no longer claim the payment of dividends from us after three years have elapsed from the date on which the relevant dividends were made available to such shareholders.

Capital Increases and Reductions

We may increase our capital upon resolution of the general ordinary shareholders meeting. All capital increases must be reported to the CNV, published in the Official Gazette and registered with the Public Registry of Commerce.

Capital reductions may be voluntary or mandatory. A voluntary reduction of capital must be approved by an extraordinary shareholders meeting after the corresponding authorization by the BASE, the Córdoba Stock Exchange and the CNV and may take place only after notice of such reduction has been published and creditors have been given an opportunity to obtain payment or guarantees for their claims or attachment. A reduction of capital is mandatory when losses have exceeded reserves and more than 50% of the share capital of the company.

Preemptive Rights

Under Argentine law, it is mandatory that a shareholder of ordinary shares of any given class have preemptive rights, proportional to the number of shares he or she owns, to subscribe for shares of capital stock of the same class or of any other class if the new subscription offer does not include all classes of shares. Shareholders may only decide to suspend or limit preemptive rights by supermajority at an extraordinary shareholders meeting and only in exceptional cases. Shareholders may waive their preemptive rights only on a case-by-case basis.

In the event of an increase in our capital, holders of class A shares and class B shares have a preemptive right to subscribe for any issue of class B shares in an amount sufficient to maintain the proportion of capital then held by them. Holders of class A shares are entitled to subscribe for class B shares because no further class A shares carrying five votes each are allowed to be issued in the future. Under Argentine law, companies are prohibited from issuing stock with multiple voting rights after they have been authorized to make a public offering of securities.

Preemptive rights are exercisable following the last publication of the notification to shareholders of the opportunity to exercise preemptive rights in the Official Gazette and an Argentine newspaper of wide circulation for a period of 30 days, provided that such period may be reduced to no less than 10 days if so approved by an extraordinary shareholders meeting.

Shareholders who have exercised their preemptive rights and indicated their intention to exercise additional preemptive rights are entitled to additional preemptive rights (accretion rights), on a pro rata basis, with respect to any unsubscribed shares, in accordance with the terms of the Corporations Law. Class B shares not subscribed for by shareholders through the exercise of their preemptive or accretion rights may be offered to third parties.

Table of Contents

Holders of ADSs may be restricted in their ability to exercise preemptive rights if a registration statement relating to such rights has not been filed or is not effective or if an exemption from registration is not available.

Appraisal Rights

Whenever our shareholders approve:

- a merger or spin-off in which we are not the surviving corporation, unless the acquirer's shares are authorized to be publicly offered or listed on any stock exchange,
- a transformation in our legal corporate form,
- a fundamental change in our corporate purpose,
- a change of our domicile to outside Argentina,
- a voluntary termination of our public offering or listing authorization,
- our continuation following a delisting or a mandatory cancellation of our public offering or listing authorization, or
- a total or partial recapitalization of our statutory capital following a loss,

any shareholder that voted against such action or did not attend the relevant meeting may exercise its right to have its shares canceled in exchange for the book value of its shares, determined on the basis of our latest balance sheet prepared in accordance with Argentine laws and regulations, provided that such shareholder exercises its appraisal rights within the periods set forth below.

There is, however, doubt as to whether holders of ADSs, will be able to exercise appraisal rights with respect to class B shares represented by ADSs.

Appraisal rights must be exercised within five days following the adjournment of the meeting at which the resolution was adopted, in the event that the dissenting shareholder voted against such resolutions, or within 15 days following such adjournment if the dissenting shareholder did not attend such meeting and can prove that he was a shareholder on the date of such meeting. In the case of a merger or spin-off involving an entity authorized to make a public offering of its shares, appraisal rights may not be exercised if the shares to be received as a result of such transaction are listed on any stock exchange. Appraisal rights are extinguished if the resolution giving rise to such rights is overturned at another shareholders' meeting held within 75 days of the meeting at which the resolution was adopted.

Payment of the appraisal rights must be made within one year from the date of the shareholders' meeting at which the resolution was adopted, except if the resolution was to delist our capital stock, in which case the payment period is reduced to 60 days from the date of the related resolution.

Preferred Stock

According to the Corporations Law and our bylaws, an ordinary shareholders' meeting may approve the issuance of preferred stock. Such preferred stock may have a fixed dividend, cumulative or not cumulative, with or without additional participation in our profits, as decided by shareholders at a shareholders' meeting when determining the conditions of the issuance. They may also have other preferences, such as a preference in the event of our liquidation.

Table of Contents

The holders of preferred stock shall not be entitled to voting rights. Notwithstanding the foregoing, in the event that no dividends are paid to such holders for their preferred stock, and for as long as such dividends are not paid, the holders of preferred stock shall be entitled to voting rights. Holders of preferred stock are also entitled to vote on certain special matters, such as the transformation of the corporate form, a merger into another company and spin-offs (when we are not the surviving entity and the surviving entity is not listed on any stock exchange), early winding-up, a change of our domicile to outside Argentina, total or partial repayment of capital for losses and a substantial change in the corporate purpose set forth in our bylaws or in the event our preferred stock is traded on stock exchanges and such trading is suspended or terminated.

Conflicts of Interest

As a protection to minority shareholders, under the Corporations Law, a shareholder is required to abstain from voting on any resolution in which its direct or indirect interests conflict with that of or are different than ours. In the event such shareholder votes on such resolution, and such resolution would not have been approved without such shareholder's vote, the resolution may be declared void by a court and such shareholder may be liable for damages to the company as well as to any third party, including other shareholders.

Redemption or Repurchase

According to Decree No. 677/01, a stock corporation may acquire the shares issued by it, provided that the public offering and listing thereof has been authorized, subject to the following terms and conditions and those set forth by the CNV. The CNV has not yet issued its regulations. The above-mentioned conditions are: (a) the shares to be acquired shall be fully paid up; (b) there shall be a resolution signed by the board of directors to such effect; (c) the acquisition shall be made out of net profits or free or voluntary reserves; and (d) the total amount of shares acquired by the company, including previously acquired shares, shall not exceed 10% of the capital stock or such lower percentage determined by the CNV. The shares acquired by the company in excess of such limit shall be disposed of within the term of 90 days after the date of the acquisition originating such excess.

The shares acquired by the company shall be disposed of by the company within the maximum term of three years counted as from the date of acquisition thereof. Upon disposing of the shares, the company shall make a preemptive offer thereof. Such an offer will not be obligatory if the shares are used in connection with a compensation plan or program for the company's employees or if the shares are distributed among all shareholders pro rata their shareholdings. If shareholders do not exercise, in whole or in part, their preemptive rights, the sale shall be made at a stock exchange.

Liquidation

Upon our liquidation, one or more liquidators may be appointed to wind up our affairs. If no such appointment is made, our Board of Directors will act as liquidator. All outstanding common shares will be entitled to participate equally in any distribution upon liquidation. In the event of a liquidation, in Argentina as well as in any other country, our assets shall first be applied to satisfy our debts and liabilities.

Table of Contents

Other Provisions

Our bylaws are governed by Argentine law and the ownership of any kind of our shares represents acceptance of our bylaws and submission to the exclusive jurisdiction of the ordinary commercial courts of Buenos Aires for any claim or dispute related to us, our shareholders, directors and members of the supervisory committee.

Exchange Controls

For a description of the exchange controls that would affect us or the holders of our securities, see Item 4. Information on the Company-Government Regulation-Foreign Exchange Market.

Taxation

The following is a summary of the principal Argentine and U.S. Federal tax consequences arising from the acquisition, ownership and disposition of our class B shares and ADSs. It is based upon Argentine and U.S. Federal tax laws and regulations in effect as of the date of this annual report and is subject to any subsequent changes in such laws and regulations that may come into effect after such date. Any change could apply retroactively and could affect the continued validity of this summary. The summary which follows does not constitute legal advice or a legal opinion with respect to the transactions that the holders of our class B shares or ADSs may enter into, but rather is only a brief description of certain (and not all) aspects of the Argentine and U.S. Federal taxation system related to the acquisition, ownership and disposition of our class B shares and ADSs. In addition, although the following summary is believed to be a reasonable interpretation of the current taxation rules and regulations, we cannot assure you that the applicable authorities or tribunals will agree with all of, or any of, the tax consequences outlined below. Currently, there is no tax treaty between the United States and Argentina.

Argentine Taxes

Taxation of Dividends

In general, dividend payments on ADSs or ordinary shares, whether in cash, property, or stock, are not subject to Argentine withholding tax or other taxes.

There is an exception under which a 35% tax (equalization tax) will be imposed on certain dividends approved by the registrant's shareholders. The equalization tax will be applied only to the extent that distributions of dividends exceed the taxable income of the company increased by non-taxable dividends received by the distributing company in prior years and reduced by Argentine income tax paid by the distributing company.

In this situation the equalization tax will be imposed as a withholding tax on the shareholder receiving the dividend.

Dividends distributions made in property (other than cash) will be subject to the same tax rules as cash dividends.

Stock dividends are not subject to Argentine taxation.

Table of Contents

Taxation of Capital Gains

Pursuant to Decree No. 2,284/91 (the Deregulation Decree), capital gains derived by non-resident individuals or foreign companies from the sale, exchange or other disposition of ADSs or class B shares are not currently subject to income tax.

Beginning on January 1, 2001, capital gains from the sale, exchange or other dispositions of shares not listed in a stock exchange will be subject to income tax when derived by individuals domiciled in Argentina.

In addition, in the case of entities or permanent organizations incorporated or domiciled abroad that, pursuant to their bylaws, charters, documents or the applicable regulatory framework, have as their principal activity investing outside of the jurisdiction of their incorporation or domicile, or are generally restricted from doing business in their country of incorporation, it will be assumed, without any proof to the contrary being admitted, that the seller is an individual domiciled in Argentina. Such entities will be subject to income tax imposed as a withholding tax on the seller receiving the payment (for payments made beginning on April 30, 2001) at the rate of 17.50% (that is, 35% on 50% of the amount of the payment), but the foreign party may choose instead to pay a tax of 35% on the net gain realized on the sale. In such situation, the Deregulation Decree will not be applicable.

On July 3, 2003, the Government's Chief Counsel (*Procurador del Tesoro*) issued an opinion that the provisions of the income tax law that taxed capital gains arising from shares without quotation obtained by resident individuals or offshore companies, as defined by the Argentine Income Tax Law, are no longer in force because they have been implicitly abrogated. The validity of this opinion is difficult to assess. Opinions of the Government's Chief Counsel are binding upon all Government attorneys, including attorneys of the Argentine tax administration.

Transfer Taxes

No Argentine transfer taxes are applicable on the sale or transfer of ADSs or class B shares.

Tax on Minimum Notional Income

The tax reform in force since 1999 reinstated a tax on assets on Argentine companies that will be in effect during 10 years, unless that term is extended by future legislation. This tax is similar to the asset tax that was previously in effect in Argentina from 1990 to 1995. It applies at a general rate of 1% on a broadly defined asset base encompassing most of the taxpayer's gross assets at the end of any fiscal year ending after December 31, 1998.

Specifically, the Law establishes that banks, other financial institutions and insurance companies will consider a taxable base equal to 20% of the value of taxable assets.

A company's asset tax liability for a tax year will be reduced by its income tax payments, and asset tax payments for a tax year can be carried forward to be applied against the company's income tax liability in any of the following ten tax years.

Table of Contents

Personal Assets Tax

Individuals domiciled and undivided estates located in Argentina or abroad will be subject to an annual tax in respect of assets located in Argentina and abroad. The tax rate is from 0.5% to 1.25%, depending on the total amount of assets. Individuals domiciled abroad will pay the tax only in respect of the assets they hold in Argentina. In the case of individuals domiciled abroad, the tax will be paid by the individuals or entities domiciled in Argentina which, as of December 31st of each year, hold the joint ownership, possession, use, enjoyment, deposit, safekeeping, custody, administration or tenure of the assets located in Argentina subject to the tax belonging to the individuals domiciled abroad. When the direct ownership of negotiable obligations, government securities and certain other investments, except shares issued by companies ruled by the Corporations Law, corresponds to companies domiciled abroad in countries that do not enforce registration systems for private securities (with the exception of insurance companies, open-end investment funds, pension funds or banks and financial entities with head offices in countries that have adopted the international banking supervision standards laid down by the Basel Committee on Banking Supervision) or that pursuant to their bylaws, charter, documents or the applicable regulatory framework, have as their principal activity investing outside of the jurisdiction of their organization or domicile, or are generally restricted from doing business in their country of incorporation, it will be assumed, without any proof to the contrary being admitted, that those assets belong ultimately to individuals and therefore the system for paying the tax for such individuals domiciled abroad is applicable to them.

There is an exception pursuant to a tax reform that was published in the Official Gazette as Law No. 25,585, which went into effect on December 31, 2002. This tax reform introduced a mechanism to collect the personal assets tax on shares issued by companies ruled by the Corporations Law, which ownership belongs to individuals domiciled in Argentina or abroad and companies or entities domiciled abroad. In the case of companies or entities domiciled abroad, it will be assumed, without any proof to the contrary being admitted, that those shares belong ultimately to individuals domiciled abroad.

The tax will be assessed and paid by those companies ruled by the Corporations Law at the rate of 0.5% on the value of the shares or equity interest. The valuation of the shares, whether listed or not, must be made according to their proportional equity value. These companies may eventually seek reimbursement from the direct owner of their shares in respect of any amounts paid to the Argentine tax authorities as personal assets tax. Grupo Financiero Galicia has sought reimbursement for the amount paid corresponding to December 31, 2002. The board of directors submitted the decision on how to proceed with respect to fiscal year 2003 to the annual shareholders meeting held on April 22, 2004. At that meeting, our shareholders voted to suspend all claims on our shareholders for amounts unpaid for fiscal year 2002 and to have us absorb the amounts due for fiscal year 2003 onward when not withheld from dividends.

Other Taxes

There are no Argentine federal inheritance, succession or gift taxes applicable to the ownership, transfer or disposition of ADSs or class B shares. There are no Argentine stamp, issue, registration or similar taxes or duties payable by holders of ADSs or class B shares.

Table of Contents

Deposit and Withdrawal of Class B Shares in Exchange for ADSs

No Argentine tax is imposed on the deposit or withdrawal of class B shares in exchange for ADSs.

United States Taxes

The following is a summary of the material U.S. Federal income tax consequences of the acquisition, ownership and disposition of class B shares or ADSs, as such securities are set forth in the documents or the forms thereof, relating to such securities as in existence on the date hereof, but it does not purport to address all of the tax considerations that may be relevant to a decision to purchase, own or dispose of class B shares or ADSs. This summary assumes that the class B shares or ADSs will be held as capital assets and does not address tax consequences to all categories of investors, some of which (such as dealers or traders in securities or currencies, real estate investment trusts, regulated investment companies, grantor trusts, tax-exempt entities, banks, insurance companies, persons that received class B shares or ADSs as compensation for the performance of services, persons owning (or deemed to own for U.S. tax purposes) at least 10% or more (by voting power or value) of our shares, investors whose functional currency is not the US Dollar and persons that will hold the class B shares or ADSs as part of a position in a straddle or as part of a hedging or conversion transaction for U.S. tax purposes) may be subject to special tax rules. Moreover, this summary does not address the U.S. federal estate and gift or alternative minimum tax consequences of the acquisition, ownership and disposition of class B shares or ADSs.

This summary (i) is based the Internal Revenue Code of 1986, as amended (the Code), existing, proposed and temporary United States Treasury Regulations and judicial and administrative interpretations thereof, in each case as in effect and available on the date hereof; and (ii) is based in part on representations of the Depository and the assumption that each obligation in the Deposit Agreement and any related agreement will be performed in accordance with its terms. All of the foregoing are subject to change, which change could apply retroactively and could affect the tax consequences described below.

The U.S. Treasury Department has expressed concern that depositaries for American depository receipts, or other intermediaries between the holders of shares of an issuer and the issuer, may be taking actions that are inconsistent with the claiming of U.S. foreign tax credits by U.S. holders of such receipts or shares. Accordingly, the U.S. foreign tax credit analysis described below could be affected by future actions that may be taken by the U.S. Treasury Department.

For purposes of this summary, a U.S. Holder is a beneficial owner of class B shares or ADSs who, for U.S. Federal income tax purposes, is (i) a citizen or resident of the United States, (ii) a corporation organized in or under the laws of the United States or any state thereof or the District of Columbia, (iii) an estate the income of which is subject to U.S. Federal income taxation regardless of its source, or (iv) a trust if such trust validly elects to be treated as a United States person for United States federal income tax purposes or if (a) a United States court can exercise primary supervision over its administration and (b) one or more United States persons have the authority to control all of the substantial decisions of such trust. A Non-U.S. Holder is a beneficial owner of class B shares or ADSs that is neither a U.S. Holder nor a partnership (or other entity treated as such for U.S. federal income tax purposes).

Table of Contents

If a partnership (or any other entity treated as a partnership for U.S. federal income tax purposes) holds class B shares or ADSs, the tax treatment of the partnership and a partner in such partnership will generally depend on the status of the partner and the activities of the partnership. Such a partner or partnership should consult its tax advisor as to its tax consequences.

Each prospective purchaser should consult its own tax advisor with respect to the U.S. Federal, state, local and foreign tax consequences of acquiring, owning or disposing of class B shares or ADSs.

Ownership of ADSs in General

In general, for U.S. Federal income tax purposes holders of ADSs will be treated as the owners of the ADSs evidenced thereby and of the class B shares represented by such ADSs.

Taxation of Cash Dividends and Distribution of Stock

Subject to the discussion below under *Passive Foreign Investment Company Considerations*, for U.S. Federal income tax purposes, the gross amount of distributions by the Company of cash or property (other than certain distributions, if any, of class B shares or ADSs distributed pro rata to all shareholders of the Company, including holders of ADSs) made with respect to the class B shares or ADSs before reduction for any Argentine taxes withheld therefrom, will constitute dividends to the extent that such distributions are paid out of the Company's current and accumulated earnings and profits, and will be included in the gross income of a U.S. Holder as dividend income. Subject to the discussion below under *Passive Foreign Investment Company Considerations*, non-corporate U.S. Holders generally may be taxed on such distributions on ADSs (or shares that are readily tradable on an established securities market in the United States at the time of such distribution) at the lower rates applicable to long-term capital gains for taxable years beginning on or before December 31, 2010 (i.e., gains from the sale of capital assets held for more than one year). Non-corporate U.S. Holders that do not meet a minimum holding period requirement during which they are not protected from the risk of loss with respect to such ADSs (or shares), that elect to treat the dividend income as investment income pursuant to Section 163(d)(4)(B) of the Code or that receive dividends with respect to which they are obligated to make related payments, will not be eligible for the reduced rates of taxation. Such dividends will not be eligible for the dividends received deduction generally allowed to corporations under the Internal Revenue Code of 1986, as amended (the Code).

Subject to the discussion below under *Passive Foreign Investment Company Considerations*, if distributions with respect to the class B shares exceed the Company's current and accumulated earnings and profits, the excess would be treated first as a tax-free return of capital to the extent of such U.S. Holder's adjusted tax basis in the class B shares or ADSs. Any amount in excess of the amount of the dividend and the return of capital would be treated as capital gain. The Company does not maintain calculations of its earnings and profits under U.S. federal income tax principles.

Table of Contents

Dividends paid in Pesos will be included in the gross income of a U.S. Holder in an amount equal to the US Dollar value of the Pesos on the date of receipt, which, in the case of ADSs, is the date they are received by the depository. The amount of any distribution of property other than cash will be the fair market value of such property on the date of distribution. Any gains or losses resulting from the conversion of Pesos between the time of the receipt of dividends paid in Pesos and the time the Pesos are converted into US Dollars will be treated as ordinary income or loss, as the case may be, of a U.S. Holder. Dividends received by a U.S. Holder with respect to the class B shares or ADSs will be treated as foreign source income, which may be relevant in calculating such holder's foreign tax credit limitation. Subject to certain conditions and limitations, Argentine tax withheld on dividends may be deducted from taxable income or credited against a U.S. Holder's U.S. Federal income tax liability. The limitation on foreign taxes eligible for credit is calculated separately with respect to specific categories of income. For this purpose, dividend income with respect to your class B shares or ADSs should generally constitute passive category income, or in the case of certain U.S. Holders, general category income. The rules governing the foreign tax credit are complex. You are urged to consult your tax advisors regarding the availability of the foreign tax credit under your particular circumstances. Subject to the discussion below under Backup Withholding and Information Reporting Requirements, a Non-U.S. Holder generally will not be subject to U.S. Federal income or withholding tax on dividends received on class B shares or ADSs, unless such income is effectively connected with the conduct by the Non-U.S. Holder of a trade or business in the United States.

Taxation of Capital Gains

Subject to the discussion below under Passive Foreign Investment Company Considerations, U.S. Holders that hold class B shares or ADSs as capital assets will recognize capital gain or loss for U.S. Federal income tax purposes upon a sale or exchange of such class B shares or ADSs in an amount equal to the difference between such U.S. Holder's adjusted tax basis in the class B shares or ADSs and the amount realized on their disposition. In the case of a non-corporate U.S. Holder, the maximum marginal U.S. Federal income tax rate applicable to such gain will be lower than the maximum marginal federal income tax rate for ordinary income (other than certain dividends) if the U.S. Holder's holding period for the class B shares or ADSs exceeds one year. Gain or loss, if any, recognized by a U.S. Holder generally will be treated as United States source income or loss for U.S. foreign tax credit purposes. Certain limitations exist on the deductibility of capital losses for U.S. Federal income tax purposes.

The initial tax basis of the class B shares to a U.S. Holder is the US Dollar value of the Pesos denominated purchase price determined on the date of purchase. If the class B shares or ADSs are treated as traded on an established securities market, a cash basis U.S. Holder (or, if it elects, an accrual basis U.S. Holder) will determine the Dollar value of the cost of such class B shares or ADSs by translating the amount paid at the spot rate of exchange on the settlement date of the purchase.

Table of Contents

With respect to the sale or exchange of class B shares or ADSs, the amount realized generally will be the US Dollar value of the payment received determined on (i) the date of receipt of payment in the case of a cash basis U.S. Holder and (ii) the date of disposition in the case of an accrual basis U.S. Holder. If the class B shares or ADSs are treated as traded on an established securities market, a cash basis taxpayer (or, if it elects, an accrual basis taxpayer) will determine the US Dollar value of the amount realized by translating the amount received at the spot rate of exchange on the settlement date of the sale.

Subject to the discussion below under Backup Withholding Tax and Information Reporting Requirements, a Non-U.S. Holder generally will not be subject to U.S. Federal income or withholding tax on gain realized on the sale or exchange of class B shares or ADSs unless (i) such gain is effectively connected with the conduct by the Non-U.S. Holder of a trade or business in the United States or (ii) in the case of gain realized by an individual Non-U.S. Holder, the Non-U.S. Holder is present in the United States for 183 days or more in the taxable year of the sale or exchange and certain other conditions are met.

Passive Foreign Investment Company Considerations

A Non-United States corporation will be classified as a passive foreign investment company, or a PFIC, for U.S. federal income tax purposes in any taxable year in which, after applying certain look-through rules, either (1) at least 75 percent of its gross income is passive income or (2) at least 50 percent of the average value of its gross assets is attributable to assets that produce passive income or is held for the production of passive income. Passive income for this purpose generally includes dividends, interest, royalties, rents and gains from commodities and securities transactions, other than certain income derived in the active conduct of a banking business.

The application of the PFIC rules to certain banks is unclear under U.S. federal income tax law. The IRS has issued a notice and certain proposed Treasury Regulations that exclude from passive income any income derived in the active conduct of a banking business by a qualifying foreign bank (the Active Bank Exception). However, the IRS notice and proposed Treasury Regulations are inconsistent in certain respects. Since final Treasury Regulations have not been issued, there can be no assurance that the Company or its subsidiaries will satisfy the Active Bank Exception for any given taxable year.

Based on certain estimates of its gross income and gross assets, the nature of its business and relying on the Active Bank Exception, the Company believes that it will not be classified as a PFIC for the taxable year ended December 31, 2008. The Company's status in future years will depend on its assets and activities in those years. The Company has no reason to believe that its assets or activities will change in a manner that would cause it to be classified as a PFIC, but there can be no assurance that the Company will not be considered a PFIC for any taxable year. If the Company were a PFIC, a U.S. Holder of class B shares or ADSs generally would be subject to imputed interest charges and other disadvantageous tax treatment (including the denial of the taxation of certain dividends at the lower rates applicable to long-term capital gains, as discussed above under Taxation of Cash Dividends and Distribution of Stock) with respect to any gain from the sale or exchange of, and certain distributions with respect to, the class B shares or ADSs.

Table of Contents

If the Company were a PFIC, a U.S. Holder of class B shares or ADSs could make a variety of elections that may alleviate certain of the tax consequences referred to above, and one of these elections may be made retroactively. However, it is expected that the conditions necessary for making certain of such elections will not apply in the case of the class B shares or ADSs. U.S. Holders should consult their own tax advisors regarding the tax consequences that would arise if the Company were treated as a PFIC.

Backup Withholding and Information Reporting

United States backup withholding tax and information reporting requirements generally apply to certain payments to certain non-corporate holders of stock.

Information reporting generally will apply to payments of dividends on, and to proceeds from the sale or redemption of, class B shares or ADSs made within the United States, or by a U.S. payor or U.S. middleman, to a holder of class B shares or ADSs (other than an exempt recipient, including a corporation, a payee that is not a United States person that provides an appropriate certification and certain other persons).

A payor will be required to withhold backup withholding tax from any payments of dividends on, or proceeds from the sale or redemption of, class B shares or ADSs within the United States, or by a U.S. payor or U.S. middleman, to a holder (other than an exempt recipient such as a corporation or a payee that is not a United States person and that provides an appropriate certification) if such Holder fails to furnish its correct taxpayer identification number or otherwise fails to comply with, or establish an exemption from, such backup withholding tax requirements. The backup withholding tax rate is 28% through 2010.

THE ABOVE SUMMARIES ARE NOT INTENDED TO CONSTITUTE A COMPLETE ANALYSIS OF ALL TAX CONSEQUENCES RELATING TO THE OWNERSHIP OF THE CLASS B SHARES OR ADSs. YOU SHOULD CONSULT AN INDEPENDENT TAX ADVISOR CONCERNING THE TAX CONSEQUENCES OF YOUR PARTICULAR SITUATION.
