Note Regarding Forward-Looking Statements

This Quarterly Report on Form 10-Q, including the Management s Discussion and Analysis of Financial Condition and Results of Operations, may contain or incorporate by reference information that includes or is based upon forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements give expectations or forecasts of future events. These statements can be identified by the fact that they do not relate strictly to historical or current facts. They use words such as anticipate, estimate, expect, project, intend, plan, believe and other words and terms of similar meaning in connection with a discussion of future operating or financial performance. In particular, these include statements relating to future actions, prospective services or products, future performance or results of current and anticipated services or products, sales efforts, expenses, the outcome of contingencies such as legal proceedings, trends in operations and financial results. See Management s Discussion and Analysis of Financial Condition and Results of Operations.

Note Regarding Reliance on Statements in Our Contracts

In reviewing the agreements included as exhibits to this Quarterly Report on Form 10-Q, please remember that they are included to provide you with information regarding their terms and are not intended to provide any other factual or disclosure information about MetLife, Inc., its subsidiaries or the other parties to the agreements. The agreements contain representations and warranties by each of the parties to the applicable agreement. These representations and warranties have been made solely for the benefit of the other parties to the applicable agreement and:

should not in all instances be treated as categorical statements of fact, but rather as a way of allocating the risk to one of the parties if those statements prove to be inaccurate;

have been qualified by disclosures that were made to the other party in connection with the negotiation of the applicable agreement, which disclosures are not necessarily reflected in the agreement;

may apply standards of materiality in a way that is different from what may be viewed as material to investors; and

were made only as of the date of the applicable agreement or such other date or dates as may be specified in the agreement and are subject to more recent developments.

Accordingly, these representations and warranties may not describe the actual state of affairs as of the date they were made or at any other time. Additional information about MetLife, Inc. and its subsidiaries may be found elsewhere in this Quarterly Report on Form 10-Q and MetLife, Inc. s other public filings, which are available without charge through the U.S. Securities and Exchange Commission website at www.sec.gov.

MetLife, Inc.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited)

1. Business, Basis of Presentation, and Summary of Significant Accounting Policies

Business

MetLife or the Company refers to MetLife, Inc., a Delaware corporation incorporated in 1999 (the Holding Company), and its subsidiaries, including Metropolitan Life Insurance Company (MLIC). MetLife is a leading provider of insurance, employee benefits and financial services with operations throughout the United States and the Latin America, Europe, and Asia Pacific regions. Through its subsidiaries and affiliates, MetLife offers life insurance, annuities, auto and home insurance, retail banking and other financial services to individuals, as well as group insurance and retirement & savings products and services to corporations and other institutions.

Basis of Presentation

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP) requires management to adopt accounting policies and make estimates and assumptions that affect amounts reported in the interim condensed consolidated financial statements. The most critical estimates include those used in determining:

- (i) the estimated fair value of investments in the absence of quoted market values;
- (ii) investment impairments;
- (iii) the recognition of income on certain investment entities;
- (iv) the application of the consolidation rules to certain investments;
- (v) the existence and estimated fair value of embedded derivatives requiring bifurcation;
- (vi) the estimated fair value of and accounting for derivatives;
- (vii) the capitalization and amortization of deferred policy acquisition costs (DAC) and the establishment and amortization of value of business acquired (VOBA);
- (viii) the measurement of goodwill and related impairment, if any;
- (ix) the liability for future policyholder benefits;
- (x) accounting for income taxes and the valuation of deferred income tax assets;
- (xi) accounting for reinsurance transactions;
- (xii) accounting for employee benefit plans; and
- (xiii) the liability for litigation and regulatory matters.

Table of Contents

In applying the Company s accounting policies, management makes subjective and complex judgments that frequently require estimates about matters that are inherently uncertain. Many of these policies, estimates and related judgments are common in the insurance and financial services industries; others are specific to the Company s businesses and operations. Actual results could differ from these estimates.

The accompanying interim condensed consolidated financial statements include the accounts of the Holding Company and its subsidiaries as well as partnerships and joint ventures in which the Company has control. Closed block assets, liabilities, revenues and expenses are combined on a line-by-line basis with the assets, liabilities, revenues and expenses outside the closed block based on the nature of the particular item. See Note 8. Intercompany accounts and transactions have been eliminated.

In addition, the Company has invested in certain structured transactions that are variable interest entities (VIEs). These structured transactions include reinsurance trusts, asset-backed securitizations, trust preferred securities, joint ventures, limited partnerships and limited liability companies. The Company is required to

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

consolidate those VIEs for which it is deemed to be the primary beneficiary. The Company reconsiders whether it is the primary beneficiary for investments designated as VIEs on a quarterly basis.

The Company uses the equity method of accounting for investments in equity securities in which it has a significant influence or more than a 20% interest and for real estate joint ventures and other limited partnership interests in which it has more than a minor equity interest or more than a minor influence over the joint venture s or partnership s operations, but does not have a controlling interest and is not the primary beneficiary. The Company uses the cost method of accounting for investments in real estate joint ventures and other limited partnership interests in which it has a minor equity investment and virtually no influence over the joint venture s or the partnership s operations.

Certain amounts in the prior year periods interim condensed consolidated financial statements have been reclassified to conform with the 2009 presentation. Such reclassifications include \$112 million for the nine months ended September 30, 2008 relating to the effect of change in foreign currency exchange rates on cash balances. These amounts were reclassified from cash flows from operating activities in the consolidated statements of cash flows for the nine months ended September 30, 2008. See also Note 18 for reclassifications related to discontinued operations.

The accompanying interim condensed consolidated financial statements reflect all adjustments (including normal recurring adjustments) necessary to state fairly the consolidated financial position of the Company at September 30, 2009, its consolidated results of operations for the three months and nine months ended September 30, 2009 and 2008, its consolidated cash flows for the nine months ended September 30, 2009 and 2008, and its consolidated statements of stockholders equity for the nine months ended September 30, 2009 and 2008, in conformity with GAAP. Interim results are not necessarily indicative of full year performance. The December 31, 2008 consolidated balance sheet data was derived from audited consolidated financial statements included in MetLife s Annual Report on Form 10-K for the year ended December 31, 2008, as amended on Form 8-K on June 12, 2009, (the 2008 Annual Report) filed with the U.S. Securities and Exchange Commission (SEC), which includes all disclosures required by GAAP. Therefore, these interim condensed consolidated financial statements should be read in conjunction with the consolidated financial statements should be read in conjunction with the consolidated financial statements of the Company included in the 2008 Annual Report.

In June 2009, the Financial Accounting Standards Board (FASB) approved *FASB Accounting Standards Codification* (Codification) as the single source of authoritative accounting guidance used in the preparation of financial statements in conformity with GAAP for all non-governmental entities. Codification, which changed the referencing and organization of accounting guidance without modification of existing GAAP, is effective for interim and annual periods ending after September 15, 2009. Since it did not modify existing GAAP, Codification did not have any impact on the Company's financial condition or results of operations. On the effective date of Codification, substantially all existing non-SEC accounting and reporting standards are superseded and, therefore, are no longer referenced by title in the accompanying interim condensed consolidated financial statements.

Adoption of New Accounting Pronouncements

Financial Instruments

Effective April 1, 2009, the Company adopted new guidance on the recognition and presentation of other-than-temporary impairments (OTTI guidance). This guidance amends previously used methodology for determining whether an other-than-temporary impairment (OTTI) exists for fixed maturity securities, changes the

presentation of OTTI for fixed maturity securities and requires additional disclosures for OTTI on fixed maturity and equity securities in interim and annual financial statements. It requires that an OTTI be recognized in earnings for a fixed maturity security in an unrealized loss position when it is anticipated that the amortized cost will not be recovered. In such situations, the OTTI recognized in earnings is the entire difference between the fixed maturity security s amortized cost and its fair value only when either: (i) the Company has the intent to sell the fixed

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

maturity security; or (ii) it is more likely than not that the Company will be required to sell the fixed maturity security before recovery of the decline in fair value below amortized cost. If neither of these two conditions exists, the difference between the amortized cost basis of the fixed maturity security and the present value of projected future cash flows expected to be collected is recognized as an OTTI in earnings (credit loss). If the fair value is less than the present value of projected future cash flows expected to be collected to be collected to be collected, this portion of OTTI related to other-than credit factors (noncredit loss) is recorded as other comprehensive income (loss). When an unrealized loss on a fixed maturity security is considered temporary, the Company continues to record the unrealized loss in other comprehensive income (loss) and not in earnings. There was no change for equity securities which, when an OTTI has occurred, continue to be impaired for the entire difference between the equity security is cost or amortized cost and its fair value with a corresponding charge to earnings.

Prior to the adoption of the OTTI guidance, the Company recognized in earnings an OTTI for a fixed maturity security in an unrealized loss position unless it could assert that it had both the intent and ability to hold the fixed maturity security for a period of time sufficient to allow for a recovery of fair value to the security s amortized cost basis. Also prior to the adoption of this guidance the entire difference between the fixed maturity security s amortized cost basis and its fair value was recognized in earnings if it was determined to have an OTTI.

The Company s net cumulative effect adjustment of adopting the OTTI guidance was an increase of \$76 million to retained earnings with a corresponding increase to accumulated other comprehensive loss to reclassify the noncredit loss portion of previously recognized OTTI losses on fixed maturity securities held at April 1, 2009. This cumulative effect adjustment was comprised of an increase in the amortized cost basis of fixed maturity securities of \$126 million, net of policyholder related amounts of \$10 million and net of deferred income taxes of \$40 million, resulting in the net cumulative effect adjustment of \$76 million. The increase in the amortized cost basis of fixed maturity securities, \$43 million residential mortgage-backed securities, \$17 million U.S. corporate securities, and \$13 million commercial mortgage-backed securities.

As a result of the adoption of the OTTI guidance, the Company s pre-tax earnings for the three months and nine months ended September 30, 2009 increased by \$225 million and \$441 million, respectively, offset by an increase in other comprehensive loss representing OTTI relating to noncredit losses recognized during the three months and nine months ended September 30, 2009.

The enhanced financial statement presentation of the total OTTI loss and the offset for the portion of noncredit OTTI loss transferred to, and recognized in, other comprehensive loss is presented in the consolidated statements of income and stockholders equity. The enhanced required disclosures are included in Note 3.

Effective April 1, 2009, the Company adopted two updates relating to fair value measurement and disclosure as follows:

The first update provides guidance on: (i) estimating the fair value of an asset or liability if there was a significant decrease in the volume and level of trading activity for these assets or liabilities; and (ii) identifying transactions that are not orderly. Further, it requires disclosure in interim financial statements of the inputs and valuation techniques used to measure fair value. The adoption of this update did not have an impact on the Company s consolidated financial statements. Additionally, the Company has provided all of the material

required disclosures in its consolidated financial statements.

The second update requires interim financial instrument fair value disclosures similar to those included in annual financial statements. The Company has provided all of the material required disclosures in its consolidated financial statements.

Effective January 1, 2009, the Company adopted guidance on disclosures about derivative instruments and hedging. This guidance requires enhanced qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of and gains and losses on derivative

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

instruments, and disclosures about credit risk-related contingent features in derivative agreements. The Company has provided all of the material required disclosures in its consolidated financial statements.

Effective January 1, 2009, the Company adopted prospectively an update on accounting for transfers of financial assets and repurchase financing transactions. This update provides guidance for evaluating whether to account for a transfer of a financial asset and repurchase financing as a single transaction or as two separate transactions. At adoption, this guidance did not have an impact on the Company s consolidated financial statements.

Business Combinations and Noncontrolling Interests

Effective January 1, 2009, the Company adopted revised guidance on business combinations and accounting for noncontrolling interests in the consolidated financial statements. Under this new guidance:

All business combinations (whether full, partial or step acquisitions) result in all assets and liabilities of an acquired business being recorded at fair value, with limited exceptions.

Acquisition costs are generally expensed as incurred; restructuring costs associated with a business combination are generally expensed as incurred subsequent to the acquisition date.

The fair value of the purchase price, including the issuance of equity securities, is determined on the acquisition date.

Assets acquired and liabilities assumed in a business combination that arise from contingencies are recognized at fair value if the acquisition-date fair value can be reasonably determined. If the fair value is not estimable, an asset or liability is recorded if existence or incurrence at the acquisition date is probable and its amount is reasonably estimable.

Changes in deferred income tax asset valuation allowances and income tax uncertainties after the acquisition date generally affect income tax expense.

Noncontrolling interests (formerly known as minority interests) are valued at fair value at the acquisition date and are presented as equity rather than liabilities.

Net income includes amounts attributable to noncontrolling interests.

When control is attained on previously noncontrolling interests, the previously held equity interests are remeasured at fair value and a gain or loss is recognized.

Purchases or sales of equity interests that do not result in a change in control are accounted for as equity transactions.

When control is lost in a partial disposition, realized gains or losses are recorded on equity ownership sold and the remaining ownership interest is remeasured and holding gains or losses are recognized.

The adoption of this guidance on a prospective basis did not have an impact on the Company s consolidated financial statements. Financial statements and disclosures for periods prior to 2009 reflect the retrospective application of the accounting for noncontrolling interests as required under this guidance.

Effective January 1, 2009, the Company adopted prospectively new guidance on the accounting for equity method investments. This guidance addresses a number of issues associated with the impact that business combinations and noncontrolling interest guidance might have on the accounting for equity method investments, including how an equity method investment should initially be measured, how it should be tested for impairment, and how changes in classification from equity method to cost method should be treated. The adoption of this guidance did not have an impact on the Company s consolidated financial statements.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

Effective January 1, 2009, the Company adopted prospectively new guidance on accounting for defensive intangible assets. This guidance requires that an acquired defensive intangible asset (i.e., an asset an entity does not intend to actively use, but rather, intends to prevent others from using) be accounted for as a separate unit of accounting at time of acquisition, not combined with the acquirer s existing intangible assets. In addition, the guidance concludes that a defensive intangible asset may not be considered immediately abandoned following its acquisition or have indefinite life. The adoption of this guidance did not have an impact on the Company s consolidated financial statements.

Effective January 1, 2009, the Company adopted prospectively new guidance on determination of the useful life of intangible assets. This guidance amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset. This change is intended to improve the consistency between the useful life of a recognized intangible asset and the period of expected cash flows used to measure the fair value of the asset. The Company determines useful lives and provides all of the material required disclosures prospectively on intangible assets acquired on or after January 1, 2009 in accordance with this guidance. Its adoption did not have an impact on the Company s consolidated financial statements.

Other Pronouncements

Effective April 1, 2009, the Company adopted prospectively new guidance which establishes general standards for accounting and disclosures of events that occur subsequent to the balance sheet date but before financial statements are issued or available to be issued. It also requires disclosure of the date through which management has evaluated subsequent events and the basis for that date. The Company has provided required disclosures in its consolidated financial statements.

Effective January 1, 2009, the Company implemented fair value measurements guidance for certain nonfinancial assets and liabilities that are recorded at fair value on a non-recurring basis. This guidance applies to such items as: (i) nonfinancial assets and nonfinancial liabilities initially measured at estimated fair value in a business combination; (ii) reporting units measured at estimated fair value in the first step of a goodwill impairment test; and (iii) indefinite-lived intangible assets measured at estimated fair value for impairment assessment. Its adoption did not have an impact on the Company s consolidated financial statements.

Effective January 1, 2009, the Company adopted prospectively guidance on issuer s accounting for liabilities measured at fair value with a third-party credit enhancement. This guidance concludes that an issuer of a liability with a third-party credit enhancement should not include the effect of the credit enhancement in the fair value measurement of the liability. In addition, it requires disclosures about the existence of any third-party credit enhancement related to liabilities that are measured at fair value. The adoption of this guidance did not have a material impact on the Company s consolidated financial statements.

Effective January 1, 2009, the Company adopted guidance on determining whether an instrument (or embedded feature) is indexed to an entity s own stock. This guidance provides a framework for evaluating the terms of a particular instrument and whether such terms qualify the instrument as being indexed to an entity s own stock. The adoption of this guidance did not have an impact on the Company s consolidated financial statements.

Future Adoption of New Accounting Pronouncements

Table of Contents

In September 2009, the FASB issued Accounting Standards Update (ASU) 2009-12, *Fair Value Measurements and Disclosures (Topic 820): Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)* (ASU 2009-12). ASU 2009-12 provides guidance on: (i) measuring the fair value of investments in certain entities that calculate net asset value (NAV) per share; (ii) how investments within its scope would be classified in the fair value hierarchy; and (iii) enhanced disclosure requirements, for both interim and annual periods, about the nature and risks of investments measured at fair value on a recurring or non-recurring

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

basis. The update is effective for the fourth quarter of 2009. The Company is currently evaluating the impact of ASU 2009-12 on its consolidated financial statements.

In August 2009, the FASB issued ASU 2009-05, *Fair Value Measurements and Disclosures (Topic 820): Measuring Liabilities at Fair Value* (ASU 2009-05). ASU 2009-05 provides clarification for measuring fair value in circumstances in which a quoted price in an active market for the identical liability is not available. In such circumstances a company is required to measure fair value using either a valuation technique that uses: (i) the quoted price of the identical liability when traded as an asset; or (ii) quoted prices for similar liabilities or similar liabilities when traded as assets; or (iii) another valuation technique that is consistent with the principles of fair value measurement such as an income approach (e.g., present value technique) or a market approach (e.g., entry value technique). The update is effective for the fourth quarter of 2009. The Company is currently evaluating the impact of ASU 2009-05 on its consolidated financial statements.

In June 2009, the FASB issued additional guidance on financial instrument transfers and evaluation of special purpose entities for consolidation. The guidance must be adopted in the first quarter of 2010.

The financial instrument transfer guidance eliminates the concept of a qualifying special purpose entity, eliminates the guaranteed mortgage securitization exception, changes the criteria for achieving sale accounting when transferring a financial asset and changes the initial recognition of retained beneficial interests. The guidance also requires additional disclosures about transfers of financial assets, including securitized transactions, as well as a company s continuing involvement in transferred financial assets. The Company is currently evaluating the impact of the new guidance on its consolidated financial statements.

The consolidation guidance relating to special purpose entities changes the determination of the primary beneficiary of a VIE from a quantitative model to a qualitative model. Under the new qualitative model, the primary beneficiary must have both the ability to direct the activities of the VIE and the obligation to absorb either losses or gains that could be significant to the VIE. The guidance also changes when reassessment is needed, as well as requires enhanced disclosures, including the effects of a company s involvement with VIEs on its financial statements. The Company is currently evaluating the impact of the new guidance on its consolidated financial statements.

In December 2008, the FASB issued new guidance to enhance the transparency surrounding the types of assets and associated risks in an employer s defined benefit pension or other postretirement benefit plans. Effective for fiscal years ending after December 15, 2009, this guidance requires an employer to disclose information about the valuation of plan assets similar to that required under other fair value disclosure guidance. The Company will provide the required disclosures in the appropriate future annual periods.

2. Acquisitions and Dispositions

Disposition of Texas Life Insurance Company

On March 2, 2009, the Company sold Cova Corporation (Cova), the parent company of Texas Life Insurance Company (Texas Life) to a third party for \$134 million in cash consideration, excluding \$1 million of transaction costs. The net assets sold were \$101 million, resulting in a gain on disposal of \$32 million, net of income tax. The

Company also reclassified \$4 million, net of income tax, of the 2009 operations of Texas Life into discontinued operations in the consolidated financial statements. As a result, the Company recognized income from discontinued operations of \$36 million, net of income tax, during the first quarter of 2009. See also Note 18.

- The Company has classified within the U.S. Treasury, agency and government guaranteed securities caption above certain corporate fixed maturity securities issued by U.S. financial institutions that were guaranteed by the Federal Deposit Insurance Corporation (FDIC) pursuant to the FDIC s Temporary Liquidity Guarantee Program (FDIC Program) of \$560 million and \$2 million at estimated fair value with unrealized gains (losses) of \$4 million and less than (\$1) million at September 30, 2009 and December 31, 2008, respectively.
- (2) The Company classifies perpetual securities that have attributes of both debt and equity as fixed maturity securities if the security has a punitive interest rate step-up feature, as it believes in most instances this feature will compel the issuer to redeem the security at the specified call date. Perpetual securities that do not have a punitive interest rate step-up feature are classified as non-redeemable preferred stock. Many of such securities have been issued by non-U.S. financial institutions that are accorded Tier 1 and Upper Tier 2 capital treatment by their respective regulatory bodies and are commonly referred to as perpetual hybrid securities. The following table presents the perpetual hybrid securities held by the Company at:

September 30, December 31, 2009 2008

Classification

Consolidated Balance Sheets	Sector Table	Fair		Estimated Fair Value (In		Estimated Fair Value ions)
Equity securities	Non-redeemable preferred stock	Non-U.S. financial institutions	\$	1,136	\$	1,224
Equity securities	Non-redeemable preferred stock	U.S. financial institutions	\$	332	\$	288
Fixed maturity securities	Foreign corporate securities	Non-U.S. financial institutions	\$	2,719	\$	2,110
Fixed maturity securities	U.S. corporate securities	U.S. financial institutions	\$	59	\$	46

(3) At September 30, 2009 and December 31, 2008, the Company held \$2,457 million and \$2,052 million at estimated fair value, respectively, of redeemable preferred stock which have stated maturity dates. These securities, commonly referred to as capital securities, are primarily issued by U.S. financial institutions, have cumulative interest deferral features and are included in the U.S. corporate securities sector within fixed maturity securities.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

(4) Equity securities primarily consist of investments in common and preferred stocks, including certain perpetual hybrid securities, and mutual fund interests. Such securities include common stock of privately held companies with an estimated fair value of \$1.1 billion at both September 30, 2009 and December 31, 2008.

The following table presents selected information about certain fixed maturity securities held by the Company at:

Concentrations of Credit Risk (Fixed Maturity Securities) Summary. The following section contains a summary of the concentrations of credit risk related to fixed maturity securities holdings.

The Company is not exposed to any concentrations of credit risk of any single issuer greater than 10% of the Company s stockholders equity, other than securities of the U.S. government, certain U.S. government agencies, and certain securities guaranteed by the U.S. government. At September 30, 2009 and December 31, 2008, the Company s holdings in U.S. Treasury, agency and government guaranteed fixed maturity securities at estimated fair value were

\$25.5 billion and \$21.3 billion, respectively. As shown in the sector table above, at both September 30, 2009 and December 31, 2008, the three largest sectors in the Company s fixed maturity security portfolio were U.S. corporate securities, residential mortgage-backed securities and foreign corporate securities.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

Concentrations of Credit Risk (Fixed Maturity Securities) U.S. and Foreign Corporate Securities. The Company maintains a diversified portfolio of corporate fixed maturity securities across industries and issuers. This portfolio does not have an exposure in any single issuer in excess of 1% of total investments. The tables below present the major industry types that comprise the corporate fixed maturity securities holdings, the amount of holdings in the single largest issuer and the combined holdings in the ten issuers to which it had the largest exposure at:

	September 3 Estimated	30, 2009	December 3 Estimated	31, 2008

Portion rated Aaa/AAA	\$ 35,341	81.4%	\$ 33,265	92.3%			

Collateralized mortgage obligations are a type of mortgage-backed security structured by dividing the cash flows of mortgages into separate pools or tranches of risk that create multiple classes of bonds with varying maturities and priority of payments. Pass-through mortgage-backed securities are a type of asset-backed security that is secured by a mortgage or collection of mortgages. The monthly mortgage payments from homeowners pass from the originating bank through an intermediary, such as a government agency or investment bank, which collects the payments, and for a fee, remits or passes these payments through to the holders of the pass-through securities.

The majority of the residential mortgage-backed securities were rated Aaa/AAA by Moody s Investors Service (Moody s), Standard & Poor s Ratings Services (S&P) or Fitch Ratings (Fitch) at September 30, 2009 and December 31, 2008, as presented above. The majority of the agency residential mortgage-backed securities were guaranteed or otherwise supported by the Federal National Mortgage Association (FNMA), the Federal Home Loan Mortgage Corporation (FHLMC) or the Government National Mortgage Association. In September 2008, the U.S. Treasury announced that FNMA and FHLMC had been placed into conservatorship. Prime residential mortgage lending includes the origination of residential mortgage loans to the most credit-worthy customers with high quality credit profiles. Alternative residential mortgage loans (Alt-A) are a classification of mortgage loans where the risk profile of the borrower falls between prime and sub-prime. Sub-prime mortgage lending is the origination of residential mortgage loans to customers with weak credit profiles. During 2009, there were significant ratings downgrades from investment grade to below investment grade for non-agency residential mortgage-backed securities,

both Alt-A and prime residential mortgage-backed securities, contributing to the decrease in the percentage of residential mortgage-backed securities with a Aaa/AAA rating of 81.4% at September 30, 2009 as compared to 92.3% at December 31, 2008 as presented above; and contributing to the substantial decrease presented below in the Company s Alt-A securities holdings rated Aa/AA or better as compared to December 31, 2008. The estimated fair value of Alt-A securities held by the Company by vintage year, net unrealized loss, portion of holdings rated Aa/AA or better by Moody s, S&P or Fitch, and portion of Alt-A holdings backed by fixed rate collateral or hybrid adjustable rate mortgages (ARMs) at September 30, 2009 and December 31, 2008, are presented below. Vintage year refers to the year of origination and not to the year of purchase.

MetLife, Inc.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

The following table presents the Company s investment in Alt-A residential mortgage-backed securities by vintage year and certain other selected data:

	Alt-A Residential Mortgage Backed Securities Estimated Net											Net	Rated				
	2003 & Prior		2004		2005		2006		2007	20 (I	08 în mi	2009 ons)	Fair Value		realized Loss	Aa/AA	Fixed Rate%

Concentrations of Credit Risk (Fixed Maturity Securities) Commercial Mortgage-Backed Securities. At September 30, 2009 and December 31, 2008, the Company s holdings in commercial mortgage-backed securities were \$15.5 billion and \$12.6 billion, respectively, at estimated fair value. The estimated fair value of such securities held by the Company by vintage year, net unrealized loss, and portion of holdings rated Aaa/AAA by Moody s, S&P or Fitch at September 30, 2009 and December 31, 2008, are presented below. The rating distribution of the Company s commercial mortgage-backed securities holdings at September 30, 2009 was as follows: 89% Aaa, 5% Aa, 3% A, 2% Baa, and 1% Ba or below. The rating distribution of the Company s commercial mortgage-backed securities holdings at December 31, 2008 was as follows: 93% Aaa, 4% Aa, 1% A, 1% Baa, and 1% Ba or below. At September 30, 2009 and December 31, 2008, the Company had no exposure in the Commercial Mortgage-Backed Securities index securities and its holdings of commercial real estate collateralized debt obligations securities were \$111 million and \$121 million, respectively, at estimated fair value.

The following table presents the Company s investment in commercial mortgage-backed securities by vintage year and certain other selected data:

Commercial Mortgage Backed Securities

Concentrations of Credit Risk (Fixed Maturity Securities) Asset-Backed Securities. At September 30, 2009 and December 31, 2008, the Company s holdings in asset-backed securities were \$13.3 billion and \$10.5 billion, respectively, at estimated fair value.

The Company s asset-backed securities are diversified both by sector and by issuer. The estimated fair value by collateral type, amount and portion rated Aaa/AAA by Moody s, S&P or Fitch of such securities held by the Company, and the portion of the asset-backed securities comprised of residential mortgage-backed securities backed by sub-prime mortgage loans credit enhanced by financial guarantor insurers and the related rating of the financial guarantor insurers at September 30, 2009 and December 31, 2008, are presented below.

contractual maturity. Mortgage-backed and asset-backed securities are shown separately in the table, as they are not due at a single maturity.

Evaluating Investments for an Other-Than-Temporary Impairment

As described more fully in Note 1 of the Notes to the Consolidated Financial Statements included in the 2008 Annual Report, the Company performs a regular evaluation, on a security-by-security basis, of its investment holdings in accordance with its impairment policy in order to evaluate whether such investments are other-than-temporarily impaired.

With respect to fixed maturity securities, the Company considers, amongst other criteria, whether it has the intent to sell a particular impaired fixed maturity security. The assessment of the Company s intent to sell a particular fixed maturity security considers broad portfolio management objectives such as asset/liability duration management, issuer and industry segment exposures, interest rate views and the overall total return focus. In following these portfolio management objectives, changes in facts and circumstances that were present in past reporting periods may trigger a decision to sell securities that were held in prior reporting periods. Decisions to sell are based on current conditions or the Company s need to shift the portfolio to maintain its portfolio management objectives including liquidity needs or duration targets on asset/liability managed portfolios. The Company attempts to anticipate these types of changes and if a sale decision has been made on an impaired security, the security will be deemed other-than-temporarily impaired in the period that the sale decision was made and an OTTI loss will be recorded in earnings. In certain circumstances, the Company may determine that it does not intend to sell a particular security but that it is more likely than not that it will be required to sell that security before recovery of the decline in fair value below amortized cost. In such instances, the fixed maturity security will be deemed other-than-temporarily impaired in the period during which it was determined more likely than not that the security will be required to be sold and an OTTI loss will be recorded in earnings. If the Company does not have the intent to sell (i.e., has not made the decision to sell) and it does not believe that it is more likely than not that it will be required to sell the security before recovery of its amortized cost, an impairment assessment is made, as described below. If the Company s estimate of the present value of the expected future cash flows to be received from the security is less than the amortized cost, the security will be deemed other-than-temporarily impaired in the period that such present value of the expected future cash flows falls below amortized cost and this difference, referred to as the credit loss, will be recognized in earnings. Any remaining difference between the present value of the expected future cash flows to be received and the estimated fair value of the security will be recognized as a separate component of other comprehensive loss and is referred to as the noncredit loss. Prior to April 1, 2009, the Company s assessment of OTTI for fixed maturity securities was performed in the same manner as described below for equity securities.

With respect to equity securities, the Company considers in its OTTI analysis its intent and ability to hold a particular equity security for a period of time sufficient to allow for the recovery of its value to an amount equal to or greater than cost. Decisions to sell equity securities are based on current conditions in relation to the same broad portfolio management considerations in a manner consistent with that described above for fixed maturity securities. If a sale decision is made with respect to a particular equity security and that equity security is not expected to recover to an amount at least equal to cost prior to the expected time of the sale, the security will be deemed other-than-temporarily impaired in the period that the sale decision was made and an OTTI loss will be recorded in earnings.

With respect to perpetual hybrid securities, some of which are classified as fixed maturity securities and some of which are classified as non-redeemable preferred stock, the Company considers in its OTTI analysis whether there has been any deterioration in credit of the issuer and the likelihood of recovery in value of the securities that are in a severe and extended unrealized loss position. The Company also considers whether any perpetual hybrid securities, with severe unrealized losses, regardless of credit rating, have deferred any dividend payments.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

Net Unrealized Investment Gains (Losses)

The components of net unrealized investment gains (losses), included in accumulated other comprehensive loss, are as follows:

	Sept	ember 30, 2009 (In n	Decem nillions)	ber 31, 2008
Fixed maturity securities that were temporarily impaired Fixed maturity securities with noncredit OTTI losses in other comprehensive loss	\$	(831) (547)	\$	(21,246)

interests				(10)
Net unrealized investment gains (losses) attributable to MetLife, Inc.	\$	(799)	\$	(12,564)

Fixed maturity securities with noncredit OTTI losses in other comprehensive loss, as presented above, of \$547 million includes \$126 million related to the transition adjustment, \$245 million and \$479 million (\$225 million and \$441 million, net of DAC) of noncredit losses recognized in the three months and nine months ended September 30, 2009, respectively, and \$63 million and \$58 million of subsequent increases in estimated fair value during the three

months and nine months ended September 30, 2009, respectively, on such securities for which a noncredit loss was previously recognized in other comprehensive loss.

The \$6.2 billion decrease in the deferred income tax benefit to \$322 million at September 30, 2009, was primarily the result of the decrease in net unrealized investment gains (losses), which also is a major contributor to the overall decrease in total deferred income tax assets to \$535 million.

Continuous Gross Unrealized Loss and OTTI Loss for Fixed Maturity and Equity Securities Available-for-Sale by Sector

The following tables present the estimated fair value and gross unrealized loss, of the Company s fixed maturity and equity securities in an unrealized loss position, aggregated by sector and by length of time that the securities have been in a continuous unrealized loss position. The unrealized loss amounts presented below at September 30, 2009 include the noncredit component of OTTI loss. Fixed maturity securities on which a noncredit OTTI loss has been recognized in accumulated other comprehensive loss are categorized by length of time as being less than 12 months or

equal to or greater than 12 months in a continuous unrealized loss position based on the point in time that the estimated fair value initially declined to below the amortized cost basis and not the period of time since the unrealized loss was deemed a noncredit OTTI loss.

Concentration of Gross Unrealized Loss and OTTI Loss for Fixed Maturity and Equity Securities Available-for-Sale

At September 30, 2009 and December 31, 2008, the Company s gross unrealized losses related to its fixed maturity and equity securities, including the portion of OTTI loss on fixed maturity securities recognized in accumulated other comprehensive loss at September 30, 2009, of \$11.8 billion and \$29.8 billion, respectively, were concentrated, calculated as a percentage of gross unrealized loss and OTTI loss, by sector and industry as follows:

	September 30, 2009	December 31, 2008		
Sector:				
U.S. corporate securities	27%	33%

Evaluating Temporarily Impaired Investments

The following table presents the gross unrealized loss of greater than \$10 million for the Company s fixed maturity and equity securities at:

	September 3	0, 2009	December 31	, 2008					
	Fixed Maturity Securities	Equity Securities	Fixed Maturity Securities	Equity Securities					
	(In millions, except number of securities)								
Number of securities	260	15	699	33					
Total gross unrealized loss	\$5,341	\$248	\$14,485	\$699					
Percentage of gross unrealized loss	47%	62%	50%	71%					

The fixed maturity and equity securities, each with a gross unrealized loss greater than \$10 million, decreased \$4.7 billion and \$9.6 billion during the three months and nine months ended September 30, 2009, respectively. These securities were included in the regular evaluation of whether such investments are other-than-temporarily impaired. Based upon the Company s current evaluation of these securities in accordance with its impairment policy, the cause of the decline being primarily attributable to a rise in market yields caused principally by an extensive widening of credit spreads which resulted from a lack of market liquidity and a short-term market dislocation versus a long-term deterioration in credit quality, and its current intentions and assessments (as applicable to the type of security) about holding, selling, and any requirements to sell these securities, the Company has concluded that these securities are not other-than-temporarily impaired.

In the Company s impairment review process, the duration of, and severity of an unrealized loss position for equity securities, such as unrealized losses of 20% or more for equity securities, is given greater weight and consideration than an unrealized loss position of 20% or more for fixed maturity securities. An extended and severe unrealized loss position on a fixed maturity security may not have any impact on the ability of the issuer to service all scheduled interest and principal payments and the Company s evaluation of recoverability of all contractual cash flows or the ability to recover an amount at least equal to its amortized cost based on the present value of the expected future cash flows to be collected. In contrast, for an equity security, greater weight and consideration is given by the Company to a decline in market value and the likelihood such market value decline will recover.

The following table presents certain information about equity securities available-for-sale with a gross unrealized loss of 20% or more at:

In connection with the equity securities impairment review process at September 30, 2009, the Company evaluated its holdings in non-redeemable preferred stock, particularly those of financial services companies. The Company considered several factors including whether there has been any deterioration in credit of the issuer and the likelihood of recovery in value of non-redeemable preferred stock with a severe or an extended unrealized loss.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

The Company also considered whether any non-redeemable preferred stock with unrealized losses of 20% or more, regardless of credit rating, have deferred any dividend payments. No such dividend payments were deferred.

With respect to common stock holdings, the Company considered the duration and severity of the unrealized losses for securities in an unrealized loss position of 20% or more; and the duration of unrealized losses for securities in an unrealized loss position of 20% or less in an extended unrealized loss position (i.e., 12 months or greater).

Future other-than-temporary impairments will depend primarily on economic fundamentals, issuer performance (including changes in the present value of future cash flows expected to be collected), changes in credit rating, changes in collateral valuation, changes in interest rates, and changes in credit spreads. If economic fundamentals and any of the above factors deteriorate, additional other-than-temporary impairments may be incurred in upcoming quarters.

Net Investment Gains (Losses)

Effective April 1, 2009, the Company adopted new guidance on the recognition and presentation of OTTI. With the adoption of this guidance, for those fixed maturity securities that are intended to be sold or for which it is more likely than not that the security will be required to be sold before recovery of the decline in fair value below amortized cost, the full OTTI loss from the fair value being less than the amortized cost is recognized in earnings. For those fixed maturity securities which the Company has no intent to sell (i.e., has not made the decision to sell) and the Company believes it is not more likely than not that it will be required to sell prior to recovery of the decline in fair value, and an assessment has been made that the amortized cost will not be fully recovered, only the OTTI credit loss component is recognized in earnings, while the remaining decline in fair value is recognized in accumulated other comprehensive income (loss), not in earnings for a fixed maturity security in an unrealized loss position unless it could assert that it had both the intent and ability to hold the fixed maturity security for a period of time to allow for a recovery of fair value to the security s amortized cost basis. There was no change in the impairment methodology for equity securities which, when an OTTI loss has occurred, continue to be impaired for the entire difference between the equity security s cost and its fair value with a corresponding charge to earnings. The discussion below describes the Company s methodology and significant inputs used to determine the amount of the credit loss effective April 1, 2009.

In order to determine the amount of the credit loss for a fixed maturity security, the Company calculates the recovery value by performing a discounted cash flow analysis based on the present value of future cash flows expected to be received. The discount rate is generally the effective interest rate of the fixed maturity security prior to impairment.

When determining the collectability and the period over which the fixed maturity security is expected to recover, the Company applies the same considerations utilized in its overall impairment evaluation process which incorporates information regarding the specific security, fundamentals of the industry and geographic area in which the security issuer operates, and overall macroeconomic conditions. Projected future cash flows are estimated using assumptions derived from management s best estimates of likely scenario-based outcomes after giving consideration to a variety of variables that include, but are not limited to: general payment terms of the security; the likelihood that the issuer can service the scheduled interest and principal payments; the quality and amount of any credit enhancements; the security s position within the capital structure of the issuer; possible corporate restructurings or asset sales by the issuer; and changes to the rating of the security or the issuer by rating agencies. Additional considerations are made

when assessing the unique features that apply to certain structured securities such as residential mortgage-backed securities, commercial mortgage-backed securities and asset-backed securities. These additional factors for structured securities include, but are not limited to: the quality of underlying collateral; expected prepayment speeds; current and forecasted loss severity; consideration of the

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

payment terms of the underlying assets backing a particular security; and the payment priority within the tranche structure of the security.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

(1) Other OTTI losses recognized in earnings include impairments on equity securities, impairments on perpetual hybrid securities classified within fixed maturity securities where the primary reason for the impairment was the severity and/or the duration of an unrealized loss position, and fixed maturity securities where there is an intent to sell or it is more likely than not that the Company will be required to sell the security before recovery of the decline in fair value.

The Company periodically disposes of fixed maturity and equity securities at a loss. Generally, such losses are insignificant in amount or in relation to the cost basis of the investment, are attributable to declines in estimated fair value occurring in the period of the disposition or are as a result of management s decision to sell securities based on current conditions, or the Company s need to shift the portfolio to maintain its portfolio management objectives. Investment gains and losses on sales of securities are determined on a specific identification basis.

OTTI losses recognized in earnings on fixed maturity and equity securities were \$441 million and \$1,656 million for the three months and nine months ended September 30, 2009, respectively, and \$1,027 million and \$1,357 million for the three months and nine months ended September 30, 2008, respectively.

Three Months Ended September 30, 2009 compared to the Three Months Ended September 30, 2008 In the third quarter of 2008, the stress experienced in the global financial markets, caused several financial institutions to enter bankruptcy, enter FDIC receivership or receive significant government capital infusions. The Company incurred fixed maturity and equity securities impairments of \$562 million (\$482 million on fixed maturity security holdings and \$80 million on equity security holdings) related to security holdings on three such financial institutions in the third quarter of 2008. In addition, the Company incurred fixed maturity security impairments of \$155 million in the third quarter of 2008 on securities the Company either lacked the intent to hold, or due to extensive credit spread widening, the Company was uncertain of its intent to hold these securities for a period of time sufficient to allow for recovery of the market value decline. Accordingly, impairments on the Company s financial services industry holdings, and total impairments across all sectors, were higher in the third quarter of 2008 than the third quarter of 2009 as presented in the tables below.

Nine Months Ended September 30, 2009 compared to the Nine Months Ended September 30, 2008 Conversely, impairments for the nine months ended September 2009 were higher than for the nine months ended September 2008, due to increased fixed maturity security impairments across several industry sectors as presented in the tables below, and not as a result of a concentration in the financial services industry sector. Impairments across these several industry sectors increased due to financial restructurings, bankruptcy filings, ratings downgrades, or difficult operating environments of the issuers.

While financial services industry impairments were lower in the three and nine months ended September 2009 than the comparable prior periods, financial services industry impairments in the three months and nine months ended September 30, 2009 totaled \$275 million and \$753 million, comprised of \$241 million and \$429 million on fixed maturity securities and \$34 million and \$324 million on equity securities, respectively. These financial services industry impairments included \$215 million and \$577 million for the three months and nine months ended September 30, 2009, respectively, on perpetual hybrid securities, some classified as fixed maturity securities and some classified as non-redeemable preferred stock, where there had been a deterioration in the credit rating of the issuer to below investment grade and due to a severe and extended unrealized loss position.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

Fixed maturity security OTTI losses recognized in earnings of \$405 million and \$1,290 million for the three months and nine months ended September 30, 2009, respectively, and \$748 million and \$961 million for the three months and nine months ended September 30, 2008, respectively, related to the following sectors and industries:

Other limited partnership interests (3)	128	(62)	(53)	141
Cash, cash equivalents and short-term investments	27	101	109	313
International joint ventures (4)	(16)	21	(86)	16
Other	37	83	156	230
Total investment income	4,146	4,542	11,627	14,259
Less: Investment expenses	223	495	713	1,598
Net investment income	\$ 3,923	\$ 4,047	\$ 10,914	\$ 12,661

- (1) Net investment income from trading securities includes interest and dividends earned on trading securities in addition to the net realized gains (losses) and subsequent changes in estimated fair value recognized on trading securities and the short sale agreement liabilities. During the three months and nine months ended September 30, 2008, unfavorable changes in estimated fair value of trading securities, due to volatility in the equity and credit markets, were in excess of interest and dividends earned and net realized gains (losses) on securities sold. The changes in estimated fair value included in net investment income on trading securities are presented in the trading securities section below.
- (2) Net investment income from wholly-owned real estate was more than offset by losses incurred on real estate joint ventures. Net investment income from real estate joint ventures within the real estate and real estate joint ventures caption represents distributions for investments accounted for under the cost method and equity in earnings for investments accounted for under the equity method. Overall, for the three months and nine months ended September 30, 2009, the net amount recognized were losses of \$25 million and \$184 million, respectively, resulting primarily from declining property valuations on certain investment funds that carry their real estate at estimated fair value and operating losses incurred on properties that were developed for sale by development

joint ventures. The commercial real estate properties underlying these investment funds have experienced declines in estimated fair value driven by capital market factors and deteriorating market conditions, which has led to declining property valuations, while the development joint ventures have experienced fewer property sales due to declining real estate market fundamentals and decreased availability of lending to finance these types of transactions.

(3) Net investment income from other limited partnership interests, including hedge funds, represents distributions from other limited partnership interests accounted for under the cost method and equity in earnings from other limited partnership interests accounted for under the equity method. Overall for the nine months ended September 30, 2009, the net amount recognized was a loss of \$53 million, resulting principally from losses on equity method investments. Such earnings and losses recognized for other limited partnership interests are impacted by volatility in the equity and credit markets.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

(4) Amounts are presented net of changes in estimated fair value of derivatives related to economic hedges of these equity method investments that do not qualify for hedge accounting of \$1 million and (\$115) million for the three months and nine months ended September 30, 2009, respectively, and \$33 million and \$41 million for the three months and nine months ended September 30, 2008, respectively. The increase in losses on the international joint ventures was driven by these derivatives, which moved from gains in the prior year to losses in the current year. The losses were primarily attributable to losses on equity derivatives (used to hedge embedded derivative risk) due to improving equity markets in the current period, as well as losses on foreign currency derivatives due to the U.S. Dollar weakening against several major foreign currencies.

Securities Lending

The Company participates in securities lending programs whereby blocks of securities, which are included in fixed maturity securities and short-term investments, are loaned to third parties, primarily major brokerage firms and commercial banks. The Company generally obtains collateral in an amount equal to 102% of the estimated fair value of the securities loaned. Securities loaned under such transactions may be sold or repledged by the transferee. The Company is liable to return to its counterparties the cash collateral under its control. The liability for cash collateral that is due back to the counterparties by aging category is presented below.

Elements of the securities lending programs are presented below at:

	-	nber 30,)09 (In m	December 31, 2008 nillions)		
Securities on loan:					
Cost or amortized cost	\$	19,790	\$	20,791	
Estimated fair value	\$	20,556	\$	22,885	
Aging of cash collateral liability:					
Open (1)	\$	2,473	\$	5,118	
Less than thirty days		9,091		14,711	
Greater than thirty days to sixty days		5,222		3,471	
Greater than sixty days to ninety days		1,659			
Greater than ninety days		2,606			
Total cash collateral liability	\$	21,051	\$	23,300	
Security collateral on deposit from counterparties	\$	40	\$	279	
Reinvestment portfolio estimated fair value	\$	20,150	\$	19,509	

(1) Open terms meaning that the related loaned security could be returned to the Company on the next business day requiring the Company to immediately return the cash collateral.

The estimated fair value of the securities related to the cash collateral on open terms at September 30, 2009 has been reduced to \$2,389 million from \$4,986 million at December 31, 2008. Of the \$2,389 million of estimated fair value of the securities related to the cash collateral on open terms at September 30, 2009, \$2,222 million, were U.S. Treasury, agency and government guaranteed securities which, if put to the Company, can be immediately sold to satisfy the cash requirements. The remainder of the securities on loan, related to the cash collateral aged less than thirty days to greater than ninety days, are primarily U.S. Treasury, agency and government guaranteed securities. The reinvestment portfolio acquired with the cash collateral consisted principally of fixed maturity securities (including residential mortgage-backed, asset-backed, U.S. corporate and foreign corporate securities).

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

Security collateral on deposit from counterparties in connection with the securities lending transactions may not be sold or repledged, unless the counterparty is in default, and is not reflected in the consolidated financial statements.

Assets on Deposit, Held in Trust and Pledged as Collateral

The assets on deposit, assets held in trust and assets pledged as collateral are presented in the table below. The amounts presented in the table below are at estimated fair value for cash and cash equivalents, fixed maturity and equity securities and at carrying value for mortgage loans.

	September 30, 2009 (In 1		December 31, 2008 millions)	
Assets on deposit:				
Regulatory agencies (1)	\$	1,397	\$	1,282
Assets held in trust:

Derivative transactions (8)		1,563		1,744
Short sale agreements (9)		473		346
Other				180
Total assets on deposit, held in trust and pledged as collateral	\$	36,898	\$	36,952

- (1) The Company had investment assets on deposit with regulatory agencies consisting primarily of fixed maturity and equity securities.
- (2) The Company held in trust cash and securities, primarily fixed maturity and equity securities, to satisfy collateral requirements. The Company has also pledged certain fixed maturity securities in support of the collateral financing arrangements described in Note 10.
- (3) The Company has pledged certain investments, primarily fixed maturity securities, in connection with certain reinsurance transactions.

(4)

The Company has pledged fixed maturity securities and mortgage loans in support of its debt and funding agreements with the Federal Home Loan Bank of New York (FHLB of NY) and has pledged fixed maturity securities to the Federal Home Loan Bank of Boston (FHLB of Boston). The nature of these Federal Home Loan Bank arrangements is described in Note 7 of the Notes to the Consolidated Financial Statements included in the 2008 Annual Report.

(5) The Company has pledged certain agricultural real estate mortgage loans in connection with funding agreements with the Federal Agricultural Mortgage Corporation (Farmer MAC). The nature of the Farmer MAC arrangements is described in Note 7 of the Notes to the Consolidated Financial Statements included in the 2008 Annual Report.

Table of Contents

MetLife, Inc.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

- (6) The Company has pledged qualifying mortgage loans and fixed maturity securities in connection with collateralized borrowings from the Federal Reserve Bank of New York s Term Auction Facility. The nature of the Federal Reserve Bank of New York arrangements is described in Note 9.
- (7) The Holding Company has pledged certain collateral in support of the collateral financing arrangements described in Note 10.
- (8) Certain of the Company s invested assets are pledged as collateral for various derivative transactions as described in Note 4.
- (9) Certain of the Company s trading securities and cash and cash equivalents are pledged to secure liabilities associated with short sale agreements in the trading securities portfolio as described in the following section.

See also the immediately preceding section Securities Lending for the amount of the Company s cash and invested assets received from and due back to counterparties pursuant to the securities lending program.

Trading Securities

The Company has trading securities portfolios to support investment strategies that involve the active and frequent purchase and sale of securities, the execution of short sale agreements and asset and liability matching strategies for certain insurance products.

Certain information about the Company s trading securities portfolios is as follows:

	September 30, December 31, 2009 2008 (In millions)			,	
Trading securities at estimated fair value Short sale agreement liabilities (included in other liabilities) Investments pledged to secure short sale agreement liabilities	\$ \$ \$	1,970 143 473	\$ \$ \$	946 57 346	
	Three Months Ended			Nine Months Ended

Changes in estimated fair value included in net investment income	\$ 101	\$ (105)	\$ 242	\$ (149)

(1) Includes interest and dividends earned on trading securities, in addition to the net realized gains (losses) and subsequent changes in estimated fair value, recognized on the trading securities and the related short sale agreement liabilities.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

Mortgage Servicing Rights

The following table presents the changes in capitalized mortgage servicing rights (MSRs), which are included in other invested assets, at and for the nine months ended September 30, 2009:

	Carrying Value (In millions)		
Fair value, beginning of period	\$	191	
Acquisition of mortgage servicing rights		117	
Origination of mortgage servicing rights		427	
Reduction due to loan payments		(85)	
Changes in estimated fair value due to:			
Changes in valuation model inputs or assumptions		70	
Fair value, end of period	\$	720	

The Company recognizes the rights to service residential mortgage loans as MSRs. MSRs are either acquired or are generated from the sale of originated residential mortgage loans where the servicing rights are retained by the Company. MSRs are carried at estimated fair value and changes in estimated fair value, primarily due to changes in valuation inputs and assumptions and to the collection of expected cash flows, are reported in other revenues in the period in which the change occurs. See also Note 19 for further information about how the estimated fair value of MSRs is determined and other related information.

Variable Interest Entities

The following table presents the total assets and total liabilities relating to VIEs for which the Company has concluded that it is the primary beneficiary and which are consolidated in the Company s financial statements at September 30, 2009 and December 31, 2008. Generally, creditors or beneficial interest holders of VIEs where the Company is the primary beneficiary have no recourse to the general credit of the Company.

Foreign government securities		5		5	
Cash and cash equivalents (including cash held in trust of less than					
\$1 million and \$60 million, respectively)		4		224	
Total	\$	3,159	\$	2,361	

- (2) Real estate joint ventures include partnerships and other ventures which engage in the acquisition, development, management and disposal of real estate investments. Upon consolidation, the assets and liabilities are reflected at the VIE s carrying amounts. At September 30, 2009 and December 31, 2008, the assets consisted of \$16 million and \$20 million, respectively, of real estate and real estate joint ventures held-for-investment, \$4 million and \$5 million, respectively, of cash and cash equivalents and \$1 million and \$1 million, respectively, of other assets. At both September 30, 2009 and December 31, 2008, liabilities consisted of \$15 million of other liabilities.
- (3) Other limited partnership interests include partnerships established for the purpose of investing in public and private debt and equity securities. Upon consolidation, the assets and liabilities are reflected at the VIE s carrying amounts. At September 30, 2009, the assets consisted of \$228 million of other limited partnership interests, \$104 million of other invested assets, \$12 million of cash and cash equivalents, and \$15 million of other assets. At December 31, 2008, the assets of \$20 million were included within other limited partnership interests. At September 30, 2009, liabilities of \$75 million and \$12 million were included within long-term debt and other liabilities, respectively, and at December 31, 2008, liabilities of \$3 million were included within other liabilities.
- (4) Other invested assets include tax-credit partnerships and other investments established for the purpose of investing in low-income housing and other social causes, where the primary return on investment is in the form of tax credits. Upon consolidation, the assets and liabilities are reflected at the VIE s carrying amounts. At September 30, 2009 and December 31, 2008, the assets of \$29 million and \$10 million, respectively, were included within other invested assets. At September 30, 2009 and December 31, 2008, the liabilities consisted of \$1 million and \$2 million, respectively, of long-term debt and \$1 million and \$1 million, respectively, of other liabilities.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

The following table presents the carrying amount and maximum exposure to loss relating to VIEs for which the Company holds significant variable interests but is not the primary beneficiary and which have not been consolidated at September 30, 2009 and December 31, 2008:

		Septemb		2009 ximum		Decemb	er 31, 2008 Maximum	
	Carrying Amount (1)		Exposure		Carrying Amount		Ex	posure
			to Loss (2)			(1)		Loss (2)
	(In mill					is)		
Fixed maturity securities available-for-sale:								
Foreign corporate securities	\$	1,212	\$	1,212	\$	1,080	\$	1,080
U.S. corporate securities		1,090		1,090		992		992
Real estate joint ventures		31		31		32		32
Other limited partnership interests		2,350		2,667		3,496		4,004
Other invested assets		388		225		318		108
Total	\$	5,071	\$	5,225	\$	5,918	\$	6,216

- (1) See Note 1 of the Notes to the Consolidated Financial Statements included in the 2008 Annual Report for further discussion of the Company s accounting policies with respect to the basis for determining carrying value of these investments.
- (2) The maximum exposure to loss relating to the fixed maturity securities available-for-sale is equal to the carrying amounts or carrying amounts of retained interests. The maximum exposure to loss relating to the real estate joint ventures and other limited partnership interests is equal to the carrying amounts plus any unfunded commitments. Such a maximum loss would be expected to occur only upon bankruptcy of the issuer or investee. For certain of its investments in other invested assets, the Company s return is in the form of tax credits which are guaranteed by a creditworthy third party. For such investments, the maximum exposure to loss is equal to the carrying amounts plus any unfunded commitments, reduced by tax credits guaranteed by third parties of \$237 million and \$278 million at September 30, 2009 and December 31, 2008, respectively.

As described in Note 12, the Company makes commitments to fund partnership investments in the normal course of business. Excluding these commitments, the Company did not provide financial or other support to investees designated as VIEs during the nine months ended September 30, 2009.

4. Derivative Financial Instruments

Accounting for Derivative Financial Instruments

Derivatives are financial instruments whose values are derived from interest rates, foreign currency exchange rates, or other financial indices. Derivatives may be exchange-traded or contracted in the over-the-counter market. The Company uses a variety of derivatives, including swaps, forwards, futures and option contracts, to manage the risk associated with variability in cash flows or changes in estimated fair values related to the Company s financial instruments. The Company also uses derivative instruments to hedge its currency exposure associated with net investments in certain foreign operations. To a lesser extent, the Company uses credit derivatives, such as credit default swaps, to synthetically replicate investment risks and returns which are not readily available in the cash market. The Company also purchases certain securities, issues certain insurance policies and investment contracts and engages in certain reinsurance contracts that have embedded derivatives.

Freestanding derivatives are carried on the Company s consolidated balance sheet either as assets within other invested assets or as liabilities within other liabilities at estimated fair value as determined through the use of quoted market prices for exchange-traded derivatives and interest rate forwards to sell residential mortgage-backed securities or through the use of pricing models for over-the-counter derivatives. The determination of estimated fair

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

value, when quoted market values are not available, is based on market standard valuation methodologies and inputs that are assumed to be consistent with what other market participants would use when pricing the instruments. Derivative valuations can be affected by changes in interest rates, foreign currency exchange rates, financial indices, credit spreads, default risk (including the counterparties to the contract), volatility, liquidity and changes in estimates and assumptions used in the pricing models.

The significant inputs to the pricing models for most over-the-counter derivatives are inputs that are observable in the market or can be derived principally from or corroborated by observable market data. Significant inputs that are observable generally include: interest rates, foreign currency exchange rates, interest rate curves, credit curves and volatility. However, certain over-the-counter derivatives may rely on inputs that are significant to the estimated fair value that are not observable in the market or cannot be derived principally from or corroborated by observable market data. Significant inputs that are unobservable generally include: independent broker quotes, credit correlation assumptions, references to emerging market currencies and inputs that are outside the observable portion of the interest rate curve, credit curve, volatility or other relevant market measure. These unobservable inputs may involve significant management judgment or estimation. Even though unobservable, these inputs are based on assumptions deemed appropriate given the circumstances and are assumed to be consistent with what other market inputs but, in certain cases, bid level inputs are used when they are deemed more representative of exit value. Market liquidity, as well as the use of different methodologies, assumptions and inputs may have a material effect on the estimated fair values of the Company's derivatives and could materially affect net income.

The credit risk of both the counterparty and the Company are considered in determining the estimated fair value for all over-the-counter derivatives after taking into account the effects of netting agreements and collateral arrangements. Credit risk is monitored and consideration of any potential credit adjustment is based on a net exposure by counterparty. This is due to the existence of netting agreements and collateral arrangements which effectively serve to mitigate credit risk. The Company values its derivative positions using the standard swap curve which includes a credit risk adjustment. This credit risk adjustment is appropriate for those parties that execute trades at pricing levels consistent with the standard swap curve. As the Company and its significant derivative counterparties consistently execute trades at such pricing levels, additional credit risk adjustments is monitored by the Company. The Company s ability to consistently execute at such pricing levels is in part due to the netting agreements and collateral arrangements that are in place with all of its significant derivative counterparties. The evaluation of the requirement to make additional credit risk adjustments is performed by the Company each reporting period.

The Company s policy is to not offset the fair value amounts recognized for derivatives executed with the same counterparty under the same master netting agreement.

If a derivative is not designated as an accounting hedge or its use in managing risk does not qualify for hedge accounting, changes in the estimated fair value of the derivative are generally reported in net investment gains (losses) except for those (i) in policyholder benefits and claims for economic hedges of liabilities embedded in certain variable annuity products offered by the Company, (ii) in net investment income for economic hedges of equity method investments in joint ventures, or for all derivatives held in relation to the trading portfolios and (iii) in other revenues for derivatives held in connection with the Company s mortgage banking activities. The fluctuations in estimated fair value of derivatives which have not been designated for hedge accounting can result in significant volatility in net

income.

To qualify for hedge accounting, at the inception of the hedging relationship, the Company formally documents its risk management objective and strategy for undertaking the hedging transaction, as well as its designation of the hedge as either (i) a hedge of the estimated fair value of a recognized asset or liability or an unrecognized firm commitment (fair value hedge); (ii) a hedge of a forecasted transaction or of the variability of

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

cash flows to be received or paid related to a recognized asset or liability (cash flow hedge); or (iii) a hedge of a net investment in a foreign operation. In this documentation, the Company sets forth how the hedging instrument is expected to hedge the designated risks related to the hedged item and sets forth the method that will be used to retrospectively and prospectively assess the hedging instrument s effectiveness and the method which will be used to measure ineffectiveness. A derivative designated as a hedging instrument must be assessed as being highly effective in offsetting the designated risk of the hedged item. Hedge effectiveness is formally assessed at inception and periodically throughout the life of the designated hedging relationship. Assessments of hedge effectiveness and measurements of ineffectiveness are also subject to interpretation and estimation and different interpretations or estimates may have a material effect on the amount reported in net income.

The accounting for derivatives is complex and interpretations of the primary accounting standards continue to evolve in practice. Judgment is applied in determining the availability and application of hedge accounting designations and the appropriate accounting treatment under these accounting standards. If it was determined that hedge accounting designations were not appropriately applied, reported net income could be materially affected. Differences in judgment as to the availability and application of hedge accounting designations and the appropriate accounting treatment may result in a differing impact on the consolidated financial statements of the Company from that previously reported.

Under a fair value hedge, changes in the estimated fair value of the hedging derivative, including amounts measured as ineffectiveness, and changes in the estimated fair value of the hedged item related to the designated risk being hedged, are reported within net investment gains (losses). The estimated fair values of the hedging derivatives are exclusive of any accruals that are separately reported in the consolidated statement of income within interest income or interest expense to match the location of the hedged item. However, accruals that are not scheduled to settle until maturity are included in the estimated fair value of derivatives in the consolidated balance sheets.

Under a cash flow hedge, changes in the estimated fair value of the hedging derivative measured as effective are reported within other comprehensive income (loss), a separate component of stockholders equity, and the deferred gains or losses on the derivative are reclassified into the consolidated statement of income when the Company s earnings are affected by the variability in cash flows of the hedged item. Changes in the estimated fair value of the hedging instrument measured as ineffectiveness are reported within net investment gains (losses). The estimated fair values of the hedging derivatives are exclusive of any accruals that are separately reported in the consolidated statement of income within interest income or interest expense to match the location of the hedged item. However, accruals that are not scheduled to settle until maturity are included in the estimated fair value of derivatives in the consolidated balance sheets.

In a hedge of a net investment in a foreign operation, changes in the estimated fair value of the hedging derivative that are measured as effective are reported within other comprehensive income (loss) consistent with the translation adjustment for the hedged net investment in the foreign operation. Changes in the estimated fair value of the hedging instrument measured as ineffectiveness are reported within net investment gains (losses).

The Company discontinues hedge accounting prospectively when: (i) it is determined that the derivative is no longer highly effective in offsetting changes in the estimated fair value or cash flows of a hedged item; (ii) the derivative expires, is sold, terminated, or exercised; (iii) it is no longer probable that the hedged forecasted transaction will occur; (iv) a hedged firm commitment no longer meets the definition of a firm commitment; or (v) the derivative is

de-designated as a hedging instrument.

When hedge accounting is discontinued because it is determined that the derivative is not highly effective in offsetting changes in the estimated fair value or cash flows of a hedged item, the derivative continues to be carried on the consolidated balance sheet at its estimated fair value, with changes in estimated fair value recognized currently in net investment gains (losses). The carrying value of the hedged recognized asset or liability under a fair value hedge is no longer adjusted for changes in its estimated fair value due to the hedged risk, and the cumulative

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

adjustment to its carrying value is amortized into income over the remaining life of the hedged item. Provided the hedged forecasted transaction is still probable of occurrence, the changes in estimated fair value of derivatives recorded in other comprehensive income (loss) related to discontinued cash flow hedges are released into the consolidated statement of income when the Company s earnings are affected by the variability in cash flows of the hedged item.

When hedge accounting is discontinued because it is no longer probable that the forecasted transactions will occur by the end of the specified time period or the hedged item no longer meets the definition of a firm commitment, the derivative continues to be carried on the consolidated balance sheet at its estimated fair value, with changes in estimated fair value recognized currently in net investment gains (losses). Any asset or liability associated with a recognized firm commitment is derecognized from the consolidated balance sheet, and recorded currently in net investment gains (losses). Deferred gains and losses of a derivative recorded in other comprehensive income (loss) pursuant to the cash flow hedge of a forecasted transaction are recognized immediately in net investment gains (losses).

In all other situations in which hedge accounting is discontinued, the derivative is carried at its estimated fair value on the consolidated balance sheet, with changes in its estimated fair value recognized in the current period as net investment gains (losses).

The Company is also a party to financial instruments that contain terms which are deemed to be embedded derivatives. The Company assesses each identified embedded derivative to determine whether it is required to be bifurcated. If the instrument would not be accounted for in its entirety at estimated fair value and it is determined that the terms of the embedded derivative are not clearly and closely related to the economic characteristics of the host contract, and that a separate instrument with the same terms would qualify as a derivative instrument, the embedded derivative is bifurcated from the host contract and accounted for as a freestanding derivative. Such embedded derivatives are carried on the consolidated balance sheet at estimated fair value with the host contract and changes in their estimated fair value are reported currently in net investment gains (losses) or in policyholder benefits and claims. If the Company is unable to properly identify and measure an embedded derivative for separation from its host contract, the entire contract is carried on the balance sheet at estimated fair value, with changes in estimated fair value recognized in the current period in net investment gains (losses) or in policyholder benefits and claims. Additionally, the Company may elect to carry an entire contract on the balance sheet at estimated fair value, with changes in estimated fair value recognized in the current period in net investment gains (losses) or in policyholder benefits and claims if that contract contains an embedded derivative that requires bifurcation. There is a risk that embedded derivatives requiring bifurcation may not be identified and reported at estimated fair value in the consolidated financial statements and that their related changes in estimated fair value could materially affect reported net income.

See Note 19 for information about the fair value hierarchy for derivatives.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

Primary Risks Managed by Derivative Financial Instruments and Non Derivative Financial Instruments

The Company is exposed to various risks relating to its ongoing business operations, including interest rate risk, foreign currency risk, credit risk, and equity market risk. The Company uses a variety of strategies to manage these risks, including the use of derivative instruments. The following table presents the notional amount, estimated fair value, and primary underlying risk exposure of the Company s derivative financial instruments, excluding embedded derivatives held at:

Primary Underlying Risk Exposure	Instrument Type	Septe Notional Amount		t Market Value (1) Liabilities	Deco Notional Amount illions)	ember 31, 20 Current or Fair V Assets	Market
Interest rate	Interest rate swaps Interest rate floors Interest rate caps Interest rate	\$ 36,558 23,691 28,409	\$ 2,306 638 249	\$ 1,227 58	\$ 34,060 48,517 24,643	\$ 4,617 1,748 11	\$ 1,468
	futures Interest rate	7,943	10	4	13,851	44	117
	options Interest rate	300	3		2,365	939	35
	forwards Synthetic GICs Foreign currency	13,331 4,340	203	62	16,616 4,260	49	70
Foreign currency	swaps Foreign currency	16,971	1,681	1,506	19,438	1,953	1,866
	forwards Currency options Non-derivative hedging	6,566 649	137 19	74	5,167 932	153 73	129
Credit	instruments (2) Swap spreadlocks Credit default				351 2,338		323 99
	swaps Other	6,994 90	119 4	161	5,219	152	69
Equity market	Equity futures Equity options Variance swaps Other	7,725 25,769 13,570 250	23 1,910 254	18 933 25 60	6,057 5,153 9,222 250	1 2,150 416	88 101
	Total	\$ 193,156	\$ 7,556	\$ 4,128	\$ 198,439	\$ 12,306	\$ 4,365

- (1) The estimated fair value of all derivatives in an asset position is reported within other invested assets in the consolidated balance sheets and the estimated fair value of all derivatives in a liability position is reported within other liabilities in the consolidated balance sheets.
- (2) The estimated fair value of non-derivative hedging instruments represents the amortized cost of the instruments, as adjusted for foreign currency transaction gains or losses. Non-derivative hedging instruments are reported within policyholder account balances in the consolidated balance sheets.

Interest rate swaps are used by the Company primarily to reduce market risks from changes in interest rates and to alter interest rate exposure arising from mismatches between assets and liabilities (duration mismatches). In an interest rate swap, the Company agrees with another party to exchange, at specified intervals, the difference between fixed rate and floating rate interest amounts as calculated by reference to an agreed notional principal amount. These transactions are entered into pursuant to master agreements that provide for a single net payment to be made by the counterparty at each due date. The Company utilizes interest rate swaps in fair value, cash flow, and non-qualifying hedging relationships.

The Company also enters into basis swaps to better match the cash flows from assets and related liabilities. In a basis swap, both legs of the swap are floating with each based on a different index. Generally, no cash is exchanged

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

at the outset of the contract and no principal payments are made by either party. A single net payment is usually made by one counterparty at each due date. Basis swaps are included in interest rate swaps in the preceding table. The Company utilizes basis swaps in non-qualifying hedging relationships.

Inflation swaps are used as an economic hedge to reduce inflation risk generated from inflation-indexed liabilities. Inflation swaps are included in interest rate swaps in the preceding table. The Company utilizes inflation swaps in non-qualifying hedging relationships.

Implied volatility swaps are used by the Company primarily as economic hedges of interest rate risk associated with the Company s investments in mortgage-backed securities. In an implied volatility swap, the Company exchanges fixed payments for floating payments that are linked to certain market volatility measures. If implied volatility rises, the floating payments that the Company receives will increase, and if implied volatility falls, the floating payments that the Company receives will increase are included in interest rate swaps in the preceding table. The Company utilizes implied volatility swaps in non-qualifying hedging relationships.

The Company purchases interest rate caps and floors primarily to protect its floating rate liabilities against rises in interest rates above a specified level, and against interest rate exposure arising from mismatches between assets and liabilities (duration mismatches), as well as to protect its minimum rate guarantee liabilities against declines in interest rates below a specified level, respectively. In certain instances, the Company locks in the economic impact of existing purchased caps and floors by entering into offsetting written caps and floors. The Company utilizes interest rate caps and floors in non-qualifying hedging relationships.

In exchange-traded interest rate (Treasury and swap) futures transactions, the Company agrees to purchase or sell a specified number of contracts, the value of which is determined by the different classes of interest rate securities, and to post variation margin on a daily basis in an amount equal to the difference in the daily market values of those contracts. The Company enters into exchange-traded futures with regulated futures commission merchants that are members of the exchange. Exchange-traded interest rate (Treasury and swap) futures are used primarily to hedge mismatches between the duration of assets in a portfolio and the duration of liabilities supported by those assets, to hedge against changes in value of securities the Company owns or anticipates acquiring, and to hedge against changes in interest rate futures is substantially impacted by changes in interest rates and they can be used to modify or hedge existing interest rate risk. The Company utilizes exchange-traded interest rate futures in non-qualifying hedging relationships.

Swaptions are used by the Company to hedge interest rate risk associated with the Company s long-term liabilities. A swaption is an option to enter into a swap with a forward starting effective date. In certain instances, the Company locks in the economic impact of existing purchased swaptions by entering into offsetting written swaptions. The Company pays a premium for purchased swaptions and receives a premium for written swaptions. Swaptions are included in interest rate options in the preceding table. The Company utilizes swaptions in non-qualifying hedging relationships.

The Company enters into interest rate forwards to buy and sell securities. The price is agreed upon at the time of the contract and payment for such a contract is made at a specified future date. The Company also uses interest rate forwards to sell securities as economic hedges against the risk of changes in the fair value of mortgage loans

held-for-sale and interest rate lock commitments. The Company utilizes interest rate forwards in cash flow and non-qualifying hedging relationships.

Interest rate lock commitments are short-term commitments to fund mortgage loan applications in process (the pipeline) for a fixed term at a fixed price. During the term of an interest rate lock commitment, the Company is exposed to the risk that interest rates will change from the rate quoted to the potential borrower. Interest rate lock commitments to fund mortgage loans that will be held-for-sale are considered derivative instruments. Interest rate

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

lock commitments are included in interest rate forwards in the preceding table. Interest rate lock commitments are not designated as hedging instruments.

A synthetic guaranteed interest contract is a contract that simulates the performance of a traditional guaranteed interest contract (GIC) through the use of financial instruments. Under a synthetic GIC, the policyholder owns the underlying assets. The Company guarantees a rate return on those assets for a premium. Synthetic GICs are not designated as hedging instruments.

Foreign currency derivatives, including foreign currency swaps, foreign currency forwards and currency option contracts, are used by the Company to reduce the risk from fluctuations in foreign currency exchange rates associated with its assets and liabilities denominated in foreign currencies. The Company also uses foreign currency forwards and swaps to hedge the foreign currency risk associated with certain of its net investments in foreign operations.

In a foreign currency swap transaction, the Company agrees with another party to exchange, at specified intervals, the difference between one currency and another at a fixed exchange rate, generally set at inception, calculated by reference to an agreed upon principal amount. The principal amount of each currency is exchanged at the inception and termination of the currency swap by each party. The Company utilizes foreign currency swaps in fair value, cash flow, net investment in foreign operations, and non-qualifying hedging relationships.

In a foreign currency forward transaction, the Company agrees with another party to deliver a specified amount of an identified currency at a specified future date. The price is agreed upon at the time of the contract and payment for such a contract is made in a different currency at the specified future date. The Company utilizes foreign currency forwards in net investment in foreign operations and non-qualifying hedging relationships.

The Company enters into currency option contracts that give it the right, but not the obligation, to sell the foreign currency amount in exchange for a functional currency amount within a limited time at a contracted price. The contracts may also be net settled in cash, based on differentials in the foreign exchange rate and the strike price. The Company uses currency options to hedge against the foreign currency exposure inherent in certain of its variable annuity products. The Company utilizes currency options in non-qualifying hedging relationships.

The Company uses certain of its foreign currency denominated GICs to hedge portions of its net investments in foreign operations against adverse movements in exchange rates. Such contracts are included in non-derivative hedging instruments in the preceding table.

Swap spreadlocks are used by the Company to hedge invested assets on an economic basis against the risk of changes in credit spreads. Swap spreadlocks are forward transactions between two parties whose underlying reference index is a forward starting interest rate swap where the Company agrees to pay a coupon based on a predetermined reference swap spread in exchange for receiving a coupon based on a floating rate. The Company has the option to cash settle with the counterparty in lieu of maintaining the swap after the effective date. The Company utilizes swap spreadlocks in non-qualifying hedging relationships.

Certain credit default swaps are used by the Company to hedge against credit-related changes in the value of its investments and to diversify its credit risk exposure in certain portfolios. In a credit default swap transaction, the Company agrees with another party, at specified intervals, to pay a premium to hedge credit risk. If a credit event, as

defined by the contract, occurs, generally the contract will require the swap to be settled gross by the delivery of par quantities of the referenced investment equal to the specified swap notional in exchange for the payment of cash amounts by the counterparty equal to the par value of the investment surrendered. The Company utilizes credit default swaps in non-qualifying hedging relationships.

Credit default swaps are also used to synthetically create investments that are either more expensive to acquire or otherwise unavailable in the cash markets. These transactions are a combination of a derivative and a cash instrument such as a U.S. Treasury or Agency security. The Company also enters into certain credit default swaps

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

held in relation to trading portfolios for the purpose of generating profits on short-term differences in price. These credit default swaps are not designated as hedging instruments.

In exchange-traded equity futures transactions, the Company agrees to purchase or sell a specified number of contracts, the value of which is determined by the different classes of equity securities, and to post variation margin on a daily basis in an amount equal to the difference in the daily market values of those contracts. The Company enters into exchange-traded futures with regulated futures commission merchants that are members of the exchange. Exchange- traded equity futures are used primarily to hedge liabilities embedded in certain variable annuity products offered by the Company. The Company utilizes exchange-traded equity futures in non-qualifying hedging relationships.

Equity index options are used by the Company primarily to hedge minimum guarantees embedded in certain variable annuity products offered by the Company. To hedge against adverse changes in equity indices, the Company enters into contracts to sell the equity index within a limited time at a contracted price. The contracts will be net settled in cash based on differentials in the indices at the time of exercise and the strike price. In certain instances, the Company may enter into a combination of transactions to hedge adverse changes in equity indices within a pre-determined range through the purchase and sale of options. Equity index options are included in equity options in the preceding table. The Company utilizes equity index options in non-qualifying hedging relationships.

Equity variance swaps are used by the Company primarily to hedge minimum guarantees embedded in certain variable annuity products offered by the Company. In an equity variance swap, the Company agrees with another party to exchange amounts in the future, based on changes in equity volatility over a defined period. Equity variance swaps are included in variance swaps in the preceding table. The Company utilizes equity variance swaps in non-qualifying hedging relationships.

Total rate of return swaps (TRRs) are swaps whereby the Company agrees with another party to exchange, at specified intervals, the difference between the economic risk and reward of an asset or a market index and LIBOR, calculated by reference to an agreed notional principal amount. No cash is exchanged at the outset of the contract. Cash is paid and received over the life of the contract based on the terms of the swap. These transactions are entered into pursuant to master agreements that provide for a single net payment to be made by the counterparty at each due date. The Company uses TRRs to hedge its equity market guarantees in certain of its insurance products. TRRs can be used as hedges or to synthetically create investments. TRRs are included in the other classification in the preceding table. The Company utilizes TRRs in non-qualifying hedging relationships.

- (1) Fixed rate liabilities
- (2) Fixed rate or floating rate liabilities

All components of each derivative s gain or loss were included in the assessment of hedge effectiveness. There were no instances in which the Company discontinued fair value hedge accounting due to a hedged firm commitment no longer qualifying as a fair value hedge.

Cash Flow Hedges

The Company designates and accounts for the following as cash flow hedges when they have met the requirements of cash flow hedging: (i) interest rate swaps to convert floating rate investments to fixed rate investments; (ii) interest rate swaps to convert floating rate liabilities; (iii) foreign currency swaps to hedge the foreign currency cash flow exposure of foreign currency denominated investments and liabilities; and (iv) interest rate forwards to lock in the price to be paid for forward purchases of fixed rate investments.

For the three months and nine months ended September 30, 2009, the Company recognized insignificant net investment losses which represented the ineffective portion of all cash flow hedges. For the three months and nine months ended September 30, 2008, the Company did not recognize any net investment gains (losses) which

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

represented the ineffective portion of all cash flow hedges. All components of each derivative s gain or loss were included in the assessment of hedge effectiveness. In certain instances, the Company discontinued cash flow hedge accounting because the forecasted transactions did not occur on the anticipated date or within two months of that date. The net amounts reclassified into net investment gains (losses) for the three months and nine months ended September 30, 2009 related to such discontinued cash flow hedges were gains (losses) of (\$8) and (\$7) million, respectively, and for the three months and nine months ended September 30, 2008, related to such discontinued cash flow hedges were gains (losses) of (\$6) million and (\$13) million, respectively. With the exception of certain cash flow hedges involving interest rate forwards, there were no hedged forecasted transactions, other than the variable payments or receipts on existing assets and liabilities, for the three months and nine months ended September 30, 2009. In connection with certain interest rate forwards, the maximum length of time over which the Company is hedging its exposure to variability in future cash flows for forecasted transactions does not exceed one year. There were no hedged forecasted transactions does not exceed one year. There were no hedged forecasted transactions does not exceed one year. There were no hedged forecasted transactions does not exceed one year. There were no hedged forecasted transactions does not exceed one year. There were no hedged forecasted transactions does not exceed one year. There were no hedged forecasted transactions does not exceed one year. There were no hedged forecasted transactions, other than the variable payments or receipts on existing assets and liabilities, for the three months and nine months ended September 30, 2008.

The following table presents the components of other comprehensive loss, before income tax, related to cash flow hedges:

	Three Months Ended September 30,					ths 30,		
	2	009		2008	2009		2	2008
				(In m	millions)			
Other comprehensive income (loss), beginning of period Gains (losses) deferred in other comprehensive loss on the effective	\$	13	\$	(318)	\$	82	\$	(270)
portion of cash flow hedges		12		123		(93)		77
Amounts reclassified to net investment gains (losses)		70		126		103		119

Hedges of Net Investments in Foreign Operations

The Company uses foreign exchange contracts, which may include foreign currency swaps, forwards and options, to hedge portions of its net investments in foreign operations against adverse movements in exchange rates. The Company measures ineffectiveness on these contracts based upon the change in forward rates. In addition, the Company may also use non-derivative financial instruments to hedge portions of its net investments in foreign operations against adverse movements in exchange rates. The Company may also use non-derivative financial instruments to hedge portions of its net investments in foreign operations against adverse movements in exchange rates. The Company measures ineffectiveness on non-derivative financial instruments based upon the change in spot rates.

When net investments in foreign operations are sold or substantially liquidated, the amounts in accumulated other comprehensive income (loss) are reclassified to the consolidated statements of income, while a pro rata portion will be reclassified upon partial sale of the net investments in foreign operations.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

The following table presents the effects of derivatives and non-derivative financial instruments in net investment hedging relationships on the consolidated statements of income and the consolidated statements of stockholders equity for the three months and nine months ended September 30, 2009 and 2008:

Derivatives and Non-Derivative Hedging Instruments in Net Investment Hedging Relationships (1), (2)	(I Def Accu Other Co (Effect)	nt of Gains Losses) Gerred in Lumulated Comprehensive Loss ive Portion) millions)
For the Three Months Ended September 30, 2009: Foreign currency forwards Foreign currency swaps Non-derivative hedging instruments	\$	(43) (9) (17)
Total	\$	(69)
For the Three Months Ended September 30, 2008: Foreign currency forwards Foreign currency swaps Non-derivative hedging instruments	\$	157 18 18
Total	\$	193
For the Nine Months Ended September 30, 2009: Foreign currency forwards Foreign currency swaps Non-derivative hedging instruments	\$	(192) (19) (37)
Total	\$	(248)
For the Nine Months Ended September 30, 2008: Foreign currency forwards Foreign currency swaps Non-derivative hedging instruments	\$	119 28 29
Total	\$	176

- (1) There were no sales or substantial liquidations of net investments in foreign operations that would have required the reclassification of gains or losses from accumulated other comprehensive loss into income during the periods presented.
- (2) There was no ineffectiveness recognized for the Company s hedges of net investments in foreign operations.

At September 30, 2009 and December 31, 2008, the cumulative foreign currency translation gain (loss) recorded in accumulated other comprehensive loss related to hedges of net investments in foreign operations was (\$122) million and \$126 million, respectively.

Non-Qualifying Derivatives and Derivatives for Purposes Other Than Hedging

The Company enters into the following derivatives that do not qualify for hedge accounting or for purposes other than hedging: (i) interest rate swaps, implied volatility swaps, caps and floors, and interest rate futures to economically hedge its exposure to interest rates; (ii) foreign currency forwards, swaps and option contracts to economically hedge its exposure to adverse movements in exchange rates; (iii) credit default swaps to economically hedge exposure to adverse movements in credit; (iv) equity futures, equity index options, interest rate futures and

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

equity variance swaps to economically hedge liabilities embedded in certain variable annuity products; (v) swap spreadlocks to economically hedge invested assets against the risk of changes in credit spreads; (vi) interest rate forwards to buy and sell securities to economically hedge its exposure to interest rates; (vii) synthetic GICs; (viii) credit default swaps and TRRs to synthetically create investments; (ix) basis swaps to better match the cash flows of assets and related liabilities; (x) credit default swaps held in relation to trading portfolios; (xi) swaptions to hedge interest rate risk; (xii) inflation swaps to reduce risk generated from inflation-indexed liabilities; and (xiii) interest rate lock commitments.

The following table presents the amount and location of gains (losses) recognized in income for derivatives that are not designated or qualifying as hedging instruments:

	Net Investment Gains (Losses)		Income (1)		Policyholder Benefits and Claims (2) n millions)		nefits Claims R (2)		Other Revenues (3)

- (1) Changes in estimated fair value related to economic hedges of equity method investments in joint ventures, and changes in estimated fair value related to derivatives held in relation to trading portfolios.
- (2) Changes in estimated fair value related to economic hedges of liabilities embedded in certain variable annuity products offered by the Company.
- (3) Changes in estimated fair value related to derivatives held in connection with the Company s mortgage banking activities.

Credit Derivatives

In connection with synthetically created investment transactions and credit default swaps held in relation to the trading portfolio, the Company writes credit default swaps for which it receives a premium to insure credit risk. Such credit

Table of Contents

derivatives are included within the non-qualifying derivatives and derivatives for purposes other than hedging table. If a credit event, as defined by the contract, occurs, generally the contract will require the Company to pay the counterparty the specified swap notional amount in exchange for the delivery of par quantities of the referenced credit obligation. The Company s maximum amount at risk, assuming the value of all referenced credit obligations is zero, was \$2,639 million and \$1,875 million at September 30, 2009 and December 31, 2008, respectively. The Company can terminate these contracts at any time through cash settlement with the counterparty at an amount equal to the then current fair value of the credit default swaps. At September 30, 2009, the Company would have received \$38 million to terminate all of these contracts, and at December 31, 2008, the Company would have paid \$37 million to terminate all of these contracts.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

The Company has also entered into credit default swaps to purchase credit protection on certain of the referenced credit obligations in the table below. As a result, the maximum amounts of potential future recoveries available to offset the \$2,639 million and \$1,875 million from the table below were \$3 million and \$13 million at September 30, 2009 and December 31, 2008, respectively. The following table presents the estimated fair value, maximum amount of future payments and weighted average years to maturity of written credit default swaps at September 30, 2009 and December 31, 2008:

	Sep	tember 30, Maximum	December 31, 2008 Maximum Amount

- (1) The rating agency designations are based on availability and the midpoint of the applicable ratings among Moody s, S&P, and Fitch. If no rating is available from a rating agency, then the MetLife rating is used.
- (2) Assumes the value of the referenced credit obligations is zero.
- (3) The weighted average years to maturity of the credit default swaps is calculated based on weighted average notional amounts.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

Credit Risk on Freestanding Derivatives

The Company may be exposed to credit-related losses in the event of nonperformance by counterparties to derivative financial instruments. Generally, the current credit exposure of the Company s derivative contracts is limited to the net positive estimated fair value of derivative contracts at the reporting date after taking into consideration the existence of netting agreements and any collateral received pursuant to credit support annexes.

The Company manages its credit risk related to over-the-counter derivatives by entering into transactions with creditworthy counterparties, maintaining collateral arrangements and through the use of master agreements that provide for a single net payment to be made by one counterparty to another at each due date and upon termination. Because exchange traded futures are effected through regulated exchanges, and positions are marked to market on a daily basis, the Company has minimal exposure to credit-related losses in the event of nonperformance by counterparties to such derivative instruments. See Note 24 of the Notes to the Consolidated Financial Statements included in the 2008 Annual Report for a description of the impact of credit risk on the valuation of derivative instruments.

The Company enters into various collateral arrangements, which require both the pledging and accepting of collateral in connection with its derivative instruments. At September 30, 2009 and December 31, 2008, the Company was obligated to return cash collateral under its control of \$3,312 million and \$7,758 million, respectively. This unrestricted cash collateral is included in cash and cash equivalents or in short-term investments and the obligation to return it is included in payables for collateral under securities loaned and other transactions in the consolidated balance sheets. At September 30, 2009 and December 31, 2008, the Company had also accepted collateral consisting of various securities with a fair market value of \$583 million and \$1,249 million, respectively, which are held in separate custodial accounts. The Company is permitted by contract to sell or repledge this collateral, but at September 30, 2009, none of the collateral had been sold or repledged.

The Company s collateral arrangements for its over-the-counter derivatives generally require the counterparty in a net liability position, after considering the effect of netting agreements, to pledge collateral when the fair value of that counterparty s derivatives reaches a pre-determined threshold. Certain of these arrangements also include credit-contingent provisions that provide for a reduction of these thresholds (on a sliding scale that converges toward zero) in the event of downgrades in the credit ratings of the Company and/or the counterparty. In addition, certain of the Company s netting agreements for derivative instruments contain provisions that require the Company to maintain a specific investment grade credit rating from at least one of the major credit rating agencies. If the Company s credit ratings were to fall below that specific investment grade credit rating, it would be in violation of these provisions, and the counterparties to the derivative instruments that are in a net liability position after considering the effect of netting agreements.

The following table presents the estimated fair value of the Company s over-the-counter derivatives that are in a net liability position after considering the effect of netting agreements, together with the estimated fair value and balance sheet location of the collateral pledged. The table also presents the incremental collateral that the Company would be required to provide if there was a one notch downgrade in the Company s credit rating at the reporting date

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

or if the Company s credit rating sustained a downgrade to a level that triggered full overnight collateralization or termination of the derivative position at the reporting date.

	Fai (Der in Li: Po Septe	imated r Value 1) of ivatives n Net ability osition mber 30, 2009	Fair Co Pr Septe	timated Value of Ilateral ovided ember 30, 2009	e of al Fai d		Value of Incremental Collateral Provided Upon:			
	2009 2009 Fixed Matur Securities (·	One Notch Downgrade in the Company s Credit Rating		Coi to Fu Colli T	Downgrade in the Company s Credit Rating to a Level that Triggers Full Overnight Collateralization or Termination of the Derivative Position			
Derivatives subject to credit-contingent provisions Derivatives not subject to credit-contingent provisions	\$	956 61	\$	815 57	\$	70	\$	188		
Total	\$	1,017	\$	872	\$	70	\$	188		

(1) After taking into consideration the existence of netting agreements.

(2) Included in fixed maturity securities in the consolidated balance sheet. The counterparties are permitted by contract to sell or repledge this collateral. At September 30, 2009, the Company did not provide any cash collateral.

Without considering the effect of netting agreements, the estimated fair value of the Company s over-the-counter derivatives with credit-contingent provisions that were in a gross liability position at September 30, 2009 was \$3,913 million. At September 30, 2009, the Company provided securities collateral of \$815 million in connection with these derivatives. In the unlikely event that both: (i) the Company s credit rating is downgraded to a level that triggers

full overnight collateralization or termination of all derivative positions; and (ii) the Company s netting agreements are deemed to be legally unenforceable, then the additional collateral that the Company would be required to provide to its counterparties in connection with its derivatives in a gross liability position at September 30, 2009 would be \$3,098 million. This amount does not consider gross derivative assets of \$2,957 million for which the Company has the contractual right of offset.

At December 31, 2008, the Company provided securities collateral for various arrangements in connection with derivative instruments of \$776 million, which is included in fixed maturity securities. The counterparties are permitted by contract to sell or repledge this collateral.

The Company also has exchange-traded futures, which require the pledging of collateral. At September 30, 2009 and December 31, 2008, the Company pledged securities collateral for exchange-traded futures of \$70 million and \$282 million, respectively, which is included in fixed maturity securities. The counterparties are permitted by contract to sell or repledge this collateral. At September 30, 2009 and December 31, 2008, the Company provided cash collateral for exchange-traded futures of \$621 million and \$686 million, respectively, which is included in premiums and other receivables.

Embedded Derivatives

The Company has certain embedded derivatives that are required to be separated from their host contracts and accounted for as derivatives. These host contracts principally include: variable annuities with guaranteed minimum withdrawal, guaranteed minimum accumulation and certain guaranteed minimum income riders; ceded reinsurance

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

contracts related to guaranteed minimum accumulation and certain guaranteed minimum income riders; and GICs with equity or bond indexed crediting rates.

The following table presents the estimated fair value of the Company s embedded derivatives at:

	Septemb 2009	9	December 31, 2008 nillions)		
Net embedded derivatives within asset host contracts: Ceded guaranteed minimum benefit riders Call options in equity securities	\$	114 (30)	\$	205 (173)	
Net embedded derivatives within asset host contracts	\$	84	\$	32	
Net embedded derivatives within liability host contracts: Direct guaranteed minimum benefit riders Other	\$	1,828 8	\$	3,134 (83)	
Net embedded derivatives within liability host contracts	\$	1,836	\$	3,051	

The following table presents changes in estimated fair value related to embedded derivatives:

	Three Months Ended			Nine Months Ended	
	Septemb	September 30,			
	2009	2008	2009	2008	
		nillions)			
Net investment gains (losses) (1) Policyholder benefits and claims	\$ (586) \$ (7)	\$ 31 \$	\$ 1,424 \$ (75)	\$ (29) \$	

(1) Effective January 1, 2008, the valuation of the Company s guaranteed minimum benefit riders includes an adjustment for the Company s own credit. Included in net investment gains (losses) for the three months and nine months ended September 30, 2009 were gains (losses) of (\$895) million and (\$1,605) million, respectively, in connection with this adjustment, and for the three months and nine months ended September 30, 2008, in connection with this adjustment, were gains (losses) of \$677 million and \$952 million, respectively.

MetLife, Inc.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

5. Deferred Policy Acquisition Costs and Value of Business Acquired

Information regarding DAC and VOBA at September 30, 2009 and December 31, 2008 is as follows:

	DAC		VOBA (In millions)		Total
Balance, beginning of period Capitalizations	\$	16,653 2,265	\$	3,491	\$ 20,144 2,265
Subtotal		18,918		3,491	22,409
Less: Amortization related to: Net investment gains (losses) Other expenses		(544) 1,264		(72) 190	(616) 1,454
Total amortization		720		118	838
Less: Unrealized investment gains (losses) Less: Other		2,042 (111)		470 (38)	2,512 (149)
Balance, end of period	\$	16,267	\$	2,941	\$ 19,208

The estimated future amortization expense allocated to other expenses for the next five years for VOBA is \$284 million in 2009, \$353 million in 2010, \$322 million in 2011, \$289 million in 2012, and \$250 million in 2013. For the nine months ended September 30, 2009, \$190 million has been amortized resulting in \$94 million estimated to be amortized for the remainder of 2009.

Amortization of VOBA and DAC is attributed to both investment gains and losses and to other expenses for the amount of gross margins or profits originating from transactions other than investment gains and losses. Unrealized investment gains and losses provide information regarding the amount of DAC and VOBA that would have been amortized if such gains and losses had been recognized.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

Information regarding DAC and VOBA by segment and reporting unit is as follows:

	Sept	DAC VOBA September 30, December 31, September 30, December 31, September 30, December 31, September 31, September 31, September 30, December 31, September 31, Se					Total September 30, December 31, 2009 2008

Auto & Home		157		157					
Corporate & Other (1)		470		470					
Total	\$	5,033	\$	5,008					

(1) The allocation of the goodwill to the reporting units was performed at the time of the respective acquisition. The \$470 million of goodwill within Corporate & Other relates to goodwill acquired as a part of the Travelers acquisition of \$405 million, as well as acquisitions by MetLife Bank, National Association (MetLife Bank) which resides within Corporate & Other. For purposes of goodwill impairment testing, the \$405 million of Corporate & Other goodwill has been attributed to the Individual and Institutional segment reporting units. The Individual segment was attributed \$210 million (traditional life \$23 million, variable & universal life

\$11 million and annuities \$176 million), and the Institutional segment was attributed \$195 million (group life \$2 million, retirement & savings \$186 million, and non-medical health & other \$7 million) at both September 30, 2009 and December 31, 2008.

The Company performs its annual goodwill impairment tests during the third quarter based upon data at June 30th and more frequently if events or circumstances, such as adverse changes in the business climate, indicate that there may be justification for conducting an interim test.

In performing its goodwill impairment tests, when management believes meaningful comparable market data are available, the estimated fair values of the reporting units are determined using a market multiple approach. When relevant comparables are not available, the Company uses a discounted cash flow model. For reporting units which are particularly sensitive to market assumptions, such as the annuities and variable & universal life reporting units within the Individual segment, the Company may corroborate its estimated fair values by using additional valuation methodologies.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

The key inputs, judgments and assumptions necessary in determining estimated fair value include projected earnings, current book value (with and without accumulated other comprehensive loss), the capital required to support the mix of business, long-term growth rates, comparative market multiples, the account value of in-force business, projections of new and renewal business, as well as margins on such business, the level of interest rates, credit spreads, equity market levels and the discount rate management believes appropriate to the risk associated with the respective reporting unit. The estimated fair value of the annuity and variable & universal life reporting units are particularly sensitive to the equity market levels.

Management applies significant judgment when determining the estimated fair value of the Company s reporting units. The valuation methodologies utilized are subject to key judgments and assumptions that are sensitive to change. Estimates of fair value are inherently uncertain and represent only management s reasonable expectation regarding future developments. These estimates and the judgments and assumptions upon which the estimates are based will, in all likelihood, differ in some respects from actual future results. Declines in the estimated fair value of the Company s reporting units could result in goodwill impairments in future periods which could materially adversely affect the Company s results of operations or financial position.

The Company performed its annual goodwill impairment tests during the third quarter of 2009 based upon data at June 30, 2009. The impairment tests indicated that goodwill was not impaired. Previously, due to economic conditions, the sustained low level of equity markets, declining market capitalizations in the insurance industry and lower operating earnings projections, particularly for the Individual segment, management performed an interim goodwill impairment test at December 31, 2008 and again, for certain reporting units most affected by the economic environment, at March 31, 2009. Based upon the tests performed, management concluded no impairment of goodwill had occurred for any of the Company s reporting units at March 31, 2009 and December 31, 2008.

7. Insurance

Insurance Liabilities

Insurance liabilities are as follows:

Guarantees

The Company issues annuity contracts which may include contractual guarantees to the contractholder for: (i) return of no less than total deposits made to the contract less any partial withdrawals (return of net deposits);

Table of Contents

MetLife, Inc.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

and (ii) the highest contract value on a specified anniversary date minus any withdrawals following the contract anniversary, or total deposits made to the contract less any partial withdrawals plus a minimum return (anniversary contract value or minimum return). The Company also issues annuity contracts that apply a lower rate of funds deposited if the contractholder elects to surrender the contract for cash and a higher rate if the contractholder elects to annuitize (two tier annuities). These guarantees include benefits that are payable in the event of death or at annuitization.

The Company also issues universal and variable life contracts where the Company contractually guarantees to the contractholder a secondary guarantee or a guaranteed paid-up benefit.

Information regarding the types of guarantees relating to annuity contracts and universal and variable life contracts is as follows:

	September 30, 2009					December	er 31, 2008

- (1) The Company s annuity and life contracts with guarantees may offer more than one type of guarantee in each contract. Therefore, the amounts listed above may not be mutually exclusive.
- (2) The net amount at risk is based on the direct amount at risk (excluding reinsurance).
- (3) The net amount at risk for guarantees of amounts in the event of death is defined as the current guaranteed minimum death benefit in excess of the current account balance at the balance sheet date.
- (4) The net amount at risk for guarantees of amounts at annuitization is defined as the present value of the minimum guaranteed annuity payments available to the contractholder determined in accordance with the terms of the contract in excess of the current account balance.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

(5) The net amount at risk for two tier annuities is based on the excess of the upper tier, adjusted for a profit margin, less the lower tier.

Information regarding the liabilities for guarantees (excluding base policy liabilities) relating to annuity and universal and variable life contracts at September 30, 2009 and December 31, 2008 is as follows:

	Gua	Annuity ranteed		tracts aranteed	Ur	niversal a Life C

8. Closed Block

On April 7, 2000 (the Demutualization Date), MLIC converted from a mutual life insurance company to a stock life insurance company and became a wholly-owned subsidiary of MetLife, Inc. The conversion was pursuant to an order by the New York Superintendent of Insurance approving MLIC s plan of reorganization, as amended

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

(the Plan). On the Demutualization Date, MLIC established a closed block for the benefit of holders of certain individual life insurance policies of MLIC.

Recent experience within the closed block, in particular mortality and investment yields, as well as realized and unrealized losses, has resulted in a policyholder dividend obligation of zero at both September 30, 2009 and December 31, 2008. The policyholder dividend obligation of zero and the Company s decision to revise the expected policyholder dividend scales, which are based upon statutory results, has resulted in a reduction to both actual and expected cumulative earnings of the closed block. Amortization of the closed block DAC, which resides outside of the closed block, will be based upon actual cumulative earnings rather than expected cumulative earnings of the closed block until such time as the actual cumulative earnings of the closed block exceed the expected cumulative earnings, at which time the policyholder dividend obligation will be reestablished. Actual cumulative earnings less than expected cumulative earnings will result in future adjustments to DAC and net income of the Company and increase sensitivity of the Company s net income to movements in closed block results.

MLIC charges the closed block with federal income taxes, state and local premium taxes, and other additive state or local taxes, as well as investment management expenses relating to the closed block as provided in the Plan. MLIC also charges the closed block for expenses of maintaining the policies included in the closed block.

9. Long-term and Short-term Debt

The following represents significant changes in debt from the amounts reported in Note 10 of the Notes to the Consolidated Financial Statements included in the 2008 Annual Report.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

Senior Notes

In May 2009, the Holding Company issued \$1,250 million senior notes due June 1, 2016. The notes bear interest at a fixed rate of 6.75%, payable semiannually. In connection with the offering, the Holding Company incurred \$6 million of issuance costs which have been capitalized and included in other assets. These costs are being amortized over the term of the notes.

In March 2009, the Holding Company issued \$397 million of floating rate senior notes due June 29, 2012 under the FDIC Program. The notes bear interest at a rate equal to three-month LIBOR, reset quarterly, plus 0.32%. The notes are not redeemable prior to their maturity. In connection with the offering, the Holding Company incurred \$15 million of issuance costs which have been capitalized and included in other assets. These costs are being amortized over the term of the notes.

In February 2009, the Holding Company closed the successful remarketing of the \$1,035 million Series B portion of the junior subordinated debt securities constituting part of its common equity units issued in June 2005. The common equity units consisted of a debt security and a stock purchase contract under which the holders of the units would be required to purchase common stock. The remarketing of the Series A portion of the junior subordinated debt securities and the associated stock purchase contract settlement occurred in August 2008. In the February 2009 remarketing, the Series B junior subordinated debt securities were modified, as permitted by their terms, to be 7.717% senior debt securities Series B, due February 15, 2019. The Holding Company did not receive any proceeds from the remarketing. Most common equity unit holders chose to have their junior subordinated debt securities remarketed and used the remarketing proceeds to settle their payment obligations under the stock purchase contracts. For those common equity unit holders that elected not to participate in the remarketing and elected to use their own cash to satisfy the payment obligations under the stock purchase contracts, the terms of the debt they received are the same as the terms of the remarketed debt. The subsequent settlement of the stock purchase contracts provided proceeds to the Holding Company delivered 24,343,154 shares of its newly issued common stock to settle the stock purchase contracts on February 17, 2009.

Repurchase Agreements with the Federal Home Loan Bank of New York

MetLife Bank is a member of the FHLB of NY and holds \$122 million and \$89 million of common stock of the FHLB of NY at September 30, 2009 and December 31, 2008, respectively, which is included in equity securities. MetLife Bank has also entered into repurchase agreements with the FHLB of NY whereby MetLife Bank has issued repurchase agreements in exchange for cash and for which the FHLB of NY has been granted a blanket lien on certain of MetLife Bank s residential mortgages, mortgage loans held-for-sale, commercial mortgages and mortgage-backed securities to collateralize MetLife Bank s obligations under the repurchase agreements. MetLife Bank maintains control over these pledged assets, and may use, commingle, encumber or dispose of any portion of the collateral as long as there is no event of default and the remaining qualified collateral is sufficient to satisfy the collateral maintenance level. The repurchase agreements and the related security agreement represented by this blanket lien provide that upon any event of default by MetLife Bank, the FHLB of NY s recovery is limited to the amount of MetLife Bank s liability under the outstanding repurchase agreements. The amount of MetLife Bank s liability for repurchase agreements entered into with the FHLB of NY was \$2.4 billion and \$1.8 billion at September 30, 2009 and December 31, 2008, respectively, which is included in long-term debt and short-term debt depending upon the original

tenor of the advance. During the nine months ended September 30, 2009 and 2008, MetLife Bank received advances related to long-term borrowings totaling \$950 million and \$945 million, respectively, from the FHLB of NY. MetLife Bank made repayments to the FHLB of NY of \$220 million and \$171 million related to long-term borrowings for the nine months ended September 30, 2009 and 2008, respectively. The advances on the repurchase agreements related to both long-term and short-term debt were collateralized by residential mortgages, mortgage loans held-for-sale, commercial mortgages and mortgage-backed

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

securities with estimated fair values of \$4.4 billion and \$3.1 billion at September 30, 2009 and December 31, 2008, respectively.

Collateralized Borrowing from the Federal Reserve Bank of New York

MetLife Bank is a depository institution that is approved to use the Federal Reserve Bank of New York Discount Window borrowing privileges and participate in the Federal Reserve Bank of New York Term Auction Facility. In order to utilize these facilities, MetLife Bank has pledged qualifying loans and investment securities to the Federal Reserve Bank of New York as collateral. At September 30, 2009 and December 31, 2008, MetLife Bank s liability for advances from the Federal Reserve Bank of New York under these facilities was \$1.2 billion and \$950 million, respectively, which is included in short-term debt. The estimated fair value of loan and investment security collateral pledged by MetLife Bank to the Federal Reserve Bank of New York at September 30, 2009 and December 31, 2008 was \$2.5 billion and \$1.6 billion, respectively. During the nine months ended September 30, 2009, the weighted average interest rate on these advances was 0.19%. During the nine months ended September 30, 2009, the average daily balance of these advances was \$1.9 billion and these advances were outstanding for an average of 23 days. The Company did not participate in these programs during the nine months ended September 30, 2008.

Short-term Debt

Short-term debt was \$2.1 billion and \$2.7 billion at September 30, 2009 and December 31, 2008, respectively. At September 30, 2009, short-term debt consisted of \$340 million of commercial paper, \$1.2 billion related to the aforementioned collateralized borrowings from the Federal Reserve Bank of New York and \$590 million related to MetLife Bank s liability under the aforementioned repurchase agreements with the FHLB of NY with original maturities of less than one year. At December 31, 2008, short-term debt consisted of \$714 million of commercial paper, \$950 million related to the aforementioned collateralized borrowing from the Federal Reserve Bank of New York, \$695 million related to MetLife Bank s liability under the aforementioned collateralized borrowing from the Federal Reserve Bank of New York, \$695 million related to MetLife Bank s liability under the aforementioned repurchase agreements with the FHLB of NY with original maturities of less than one year and \$300 million related to MetLife Insurance Company of Connecticut s liability for borrowings from the FHLB of Boston with original maturities of less than one year. During the nine months ended September 30, 2009 and 2008, the weighted average interest rate on short-term debt was 0.44% and 2.6%, respectively. During the nine months ended September 30, 2009 and 2008, the average interest rate on short-term debt was 0.44% and 2.6%, respectively. During the nine months ended September 30, 2009 and 2008, the average interest rate of short-term debt was 0.44% and 2.6%, respectively. During the nine months ended September 30, 2009 and 2008, the average interest rate of short-term debt was \$3.4 billion and \$808 million, respectively, and short-term debt was outstanding for an average of 15 days and 31 days, respectively.

Credit and Committed Facilities and Letters of Credit

Credit Facilities. The Company maintains unsecured credit facilities aggregating \$3.2 billion at September 30, 2009. When drawn upon, these facilities bear interest at varying rates in accordance with the respective agreements. The facilities are used for general corporate purposes. These facilities contain various administrative, reporting, legal and financial covenants, including a requirement for the Company to maintain a specified minimum consolidated net worth. Management has no reason to believe that its lending counterparties are unable to fulfill their respective contractual obligations.

Total fees associated with these credit facilities were \$7 million and \$37 million for the three months and nine months ended September 30, 2009, respectively, and \$2 million and \$5 million for the three months and nine

Table of Contents

MetLife, Inc.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

months ended September 30, 2008, respectively. Information on these credit facilities at September 30, 2009 is as follows:

Borrower(s)	Expiration	Capacity	Cı	Letter of Credit Issuances Drawdowns (In millions)			used nitments
MetLife, Inc. and MetLife Funding, Inc. MetLife Bank, N.A	June 2012 (1) August 2010	\$ 2,850 300	\$	537	\$	\$	2,313 300
Total		\$ 3,150	\$	537	\$	\$	2,613

(1) Proceeds are available to be used for general corporate purposes, to support the borrowers commercial paper programs and for the issuance of letters of credit. All borrowings under the credit agreement must be repaid by June 2012, except that letters of credit outstanding upon termination may remain outstanding until June 2013.

Committed Facilities. The Company maintains committed facilities aggregating \$11.3 billion at September 30, 2009. When drawn upon, these facilities bear interest at varying rates in accordance with the respective agreements. The facilities are used for collateral for certain of the Company s reinsurance liabilities. These facilities contain various administrative, reporting, legal and financial covenants, including a requirement for the Company to maintain a specified minimum consolidated net worth. Management has no reason to believe that its lending counterparties are unable to fulfill their respective contractual obligations.

Total fees associated with these committed facilities were \$12 million and \$37 million for the three months and nine months ended September 30, 2009, respectively, and \$10 million and \$17 million for the three months and nine months ended September 30, 2008, respectively. Information on committed facilities at September 30, 2009 is as follows:

Account Party/Borrower(s)	Expiration	Caj	pacity	C	etter of redit uances (In m	Maturity ts(Years)

- Letters of credit and replacements or renewals thereof issued under this facility of \$280 million, \$10 million and \$200 million are set to expire no later than December 2015, March 2016 and June 2016, respectively.
- (2) The Holding Company is a guarantor under this agreement.

Letters of Credit. At September 30, 2009, the Company had outstanding \$4.7 billion in letters of credit from various financial institutions, of which \$537 million and \$4.1 billion were part of credit and committed facilities, respectively. As commitments associated with letters of credit and financing arrangements may expire unused, these amounts do not necessarily reflect the Company s actual future cash funding requirements.

Covenants. Certain of the Company s debt instruments, credit facilities and committed facilities contain various administrative, reporting, legal and financial covenants. The Company believes it is in compliance with all covenants at September 30, 2009.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

10. Collateral Financing Arrangements

Associated with the Closed Block

In December 2007, MLIC reinsured a portion of its closed block liabilities to MetLife Reinsurance Company of Charleston (MRC), a wholly-owned subsidiary of the Company. In connection with this transaction, MRC issued to investors, placed by an unaffiliated financial institution, a \$2.5 billion, 35-year surplus note to provide statutory reserve support for the assumed closed block liabilities. Interest on the surplus note accrues at an annual rate of 3-month LIBOR plus 0.55%, payable quarterly. The ability of MRC to make interest and principal payments on the surplus note is contingent upon South Carolina regulatory approval. At both September 30, 2009 and December 31, 2008, the amount of the surplus note outstanding was \$2.5 billion.

Simultaneous with the issuance of the surplus note, the Holding Company entered into an agreement with the unaffiliated financial institution, under which the Holding Company is entitled to the interest paid by MRC on the surplus note of 3-month LIBOR plus 0.55% in exchange for the payment of 3-month LIBOR plus 1.12%, payable quarterly on such amount as adjusted, as described below. The Holding Company may also be required to pledge collateral or make payments to the unaffiliated financial institution related to any decline in the estimated fair value of the surplus note. Any such payments would be accounted for as a receivable and included in other assets on the Company s consolidated balance sheets and would not reduce the principal amount outstanding of the surplus note. Such payments would, however, reduce the amount of interest payments due from the Holding Company under the agreement. Any payment received from the unaffiliated financial institution would reduce the receivable by an amount equal to such payment and would also increase the amount of interest payments due from the Holding Company under the agreement. In addition, the unaffiliated financial institution may be required to pledge collateral to the Holding Company related to any increase in the estimated fair value of the surplus note. At December 31, 2008, the Company had paid \$800 million and had pledged collateral with an estimated fair value of \$230 million to the unaffiliated financial institution. As a result of continued fluctuations in the estimated fair value of the surplus note, the Holding Company paid an additional \$400 million to the unaffiliated financial institution in April 2009, and received \$400 million from the unaffiliated financial institution in June 2009. Both of these payments reduced collateral pledged between the Holding Company and the unaffiliated financial institution. At September 30, 2009, the unaffiliated financial institution had pledged collateral with an estimated fair value of \$257 million to the Holding Company related to an increase in estimated fair value of the surplus note. In addition, the Holding Company may also be required to make a payment to the unaffiliated financial institution in connection with any early termination of this agreement. See Note 20 for discussion of a payment received by the Holding Company under this agreement in October 2009.

A majority of the proceeds from the offering of the surplus note was placed in trust, which is consolidated by the Company, to support MRC s statutory obligations associated with the assumed closed block liabilities.

At September 30, 2009 and December 31, 2008, the estimated fair value of assets held in trust by the Company was \$2.4 billion and \$2.1 billion, respectively. The assets are principally invested in fixed maturity securities and are presented as such within the Company s interim condensed consolidated balance sheets, with the related income included within net investment income in the Company s consolidated statements of income. Interest on the collateral financing arrangement is included as a component of other expenses. Total interest expense was \$11 million and

\$42 million for the three months and nine months ended September 30, 2009, respectively, and \$25 million and \$86 million for the three months and nine months ended September 30, 2008, respectively.

Associated with Secondary Guarantees

In May 2007, the Holding Company and MetLife Reinsurance Company of South Carolina, a wholly-owned subsidiary of the Company, entered into a 30-year collateral financing arrangement with an unaffiliated financial institution that provides up to \$3.5 billion of statutory reserve support for MRSC associated with reinsurance obligations under intercompany reinsurance agreements. Such statutory reserves are associated with universal life

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

secondary guarantees and are required under U.S. Valuation of Life Policies Model Regulation (commonly referred to as Regulation A-XXX). At September 30, 2009 and December 31, 2008, \$2.8 billion and \$2.7 billion, respectively, had been drawn upon under the collateral financing arrangement. The collateral financing arrangement may be extended by agreement of the Holding Company and the unaffiliated financial institution on each anniversary of the closing.

Proceeds from the collateral financing arrangement were placed in trust to support MRSC s statutory obligations associated with the reinsurance of secondary guarantees. The trust is a VIE which is consolidated by the Company. The unaffiliated financial institution is entitled to the return on the investment portfolio held by the trust.

In connection with the collateral financing arrangement, the Holding Company entered into an agreement with the same unaffiliated financial institution under which the Holding Company is entitled to the return on the investment portfolio held by the trust established in connection with this collateral financing arrangement in exchange for the payment of a stated rate of return to the unaffiliated financial institution of 3-month LIBOR plus 0.70%, payable quarterly. The Holding Company may also be required to make payments to the unaffiliated financial institution, for deposit into the trust, related to any decline in the estimated fair value of the assets held by the trust, as well as amounts outstanding upon maturity or early termination of the collateral financing arrangement. In January 2009, the Holding Company paid \$360 million to the unaffiliated financial institution as a result of the decline in the estimated fair value of the assets in the trust. Cumulatively, the Holding Company has contributed \$680 million as a result of declines in the estimated fair value of the \$680 million was deposited into the trust.

In addition, the Holding Company may be required to pledge collateral to the unaffiliated financial institution under this agreement. At September 30, 2009 and December 31, 2008, the Holding Company had pledged \$76 million and \$86 million under the agreement, respectively.

At September 30, 2009 and December 31, 2008, the Company held assets in trust with an estimated fair value of \$3.2 billion and \$2.4 billion, respectively, associated with this transaction. The assets were principally invested in fixed maturity securities and were presented as such within the Company s consolidated balance sheet, with the related income included within net investment income in the Company s consolidated statements of income. Interest on the collateral financing arrangement was included as a component of other expenses. Total interest expense was \$9 million and \$37 million for the three months and nine months ended September 30, 2009, respectively, and \$23 million and \$77 million for the three months and nine months ended September 30, 2008, respectively.

11. Junior Subordinated Debt Securities

On July 8, 2009, the Holding Company issued junior subordinated debt securities with a face amount of \$500 million. The securities are scheduled for redemption on August 1, 2039 and the final maturity of the securities is August 1, 2069. The Holding Company may redeem the securities: (i) in whole or in part, at any time on or after August 1, 2034 at their principal amount plus accrued and unpaid interest to, but excluding, the date of redemption; or (ii) in certain circumstances, in whole or in part, prior to August 1, 2034 at their principal amount plus accrued and unpaid interest to, but excluding, the date of redemption or, if greater, a make-whole price. Interest is payable semi-annually at a fixed rate of 10.75% up to, but not including, the scheduled redemption date. In the event the securities are not redeemed on or before the scheduled redemption date, interest will accrue at an annual rate of three-month LIBOR plus a margin equal to 7.548%, payable quarterly in arrears. The Holding Company has the right to, and in certain circumstances the

requirement to, defer interest payments on the securities for a period up to ten years. Interest compounds during such periods of deferral. If interest is deferred for more than five consecutive years, the Holding Company is required to use proceeds from the sale of its common stock or warrants on common stock to satisfy its obligation. In connection with the issuance of the securities, the Holding Company entered into a replacement capital covenant (RCC). As part of the RCC, the Holding Company agreed that it will not repay,

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

redeem or purchase the securities on or before August 1, 2059, unless, subject to certain limitations, it has received proceeds during a specified period from the sale of specified replacement securities. The RCC will terminate upon the occurrence of certain events, including an acceleration of the securities due to the occurrence of an event of default. The RCC is not intended for the benefit of holders of the securities and may not be enforced by them. The RCC is for the benefit of holders of one or more other designated series of the Holding Company s indebtedness (which will initially be its 5.70% senior notes due June 2035). The Holding Company also entered into a replacement capital obligation which will commence in 2039 and under which the Holding Company must use reasonable commercial efforts to raise replacement capital to permit repayment of the securities through the issuance of certain qualifying capital securities. Issuance costs associated with the offering of these securities of \$5 million have been capitalized and included in other assets and are being amortized over the period from the issuance date of these securities until their scheduled redemption. Interest expense on the securities was \$12 million for both the three and nine months ended September 30, 2009.

12. Contingencies, Commitments and Guarantees

Contingencies

Litigation

The Company is a defendant in a large number of litigation matters. In some of the matters, very large and/or indeterminate amounts, including punitive and treble damages, are sought. Modern pleading practice in the United States permits considerable variation in the assertion of monetary damages or other relief. Jurisdictions may permit claimants not to specify the monetary damages sought or may permit claimants to state only that the amount sought is sufficient to invoke the jurisdiction of the trial court. In addition, jurisdictions may permit plaintiffs to allege monetary damages in amounts well exceeding reasonably possible verdicts in the jurisdiction for similar matters. This variability in pleadings, together with the actual experience of the Company in litigating or resolving through settlement numerous claims over an extended period of time, demonstrate to management that the monetary relief which may be specified in a lawsuit or claim bears little relevance to its merits or disposition value. Thus, unless stated below, the specific monetary relief sought is not noted.

Due to the vagaries of litigation, the outcome of a litigation matter and the amount or range of potential loss at particular points in time may normally be inherently impossible to ascertain with any degree of certainty. Inherent uncertainties can include how fact finders will view individually and in their totality documentary evidence, the credibility and effectiveness of witnesses testimony, and how trial and appellate courts will apply the law in the context of the pleadings or evidence presented, whether by motion practice, or at trial or on appeal. Disposition valuations are also subject to the uncertainty of how opposing parties and their counsel will themselves view the relevant evidence and applicable law.

On a quarterly and annual basis, the Company reviews relevant information with respect to litigation and contingencies to be reflected in the Company s consolidated financial statements. The review includes senior legal and financial personnel. Unless stated below, estimates of possible losses or ranges of loss for particular matters cannot in the ordinary course be made with a reasonable degree of certainty. Liabilities are established when it is probable that a loss has been incurred and the amount of the loss can be reasonably estimated. Liabilities have been established for a number of the matters noted below. It is possible that some of the matters could require the Company to pay damages

or make other expenditures or establish accruals in amounts that could not be estimated at September 30, 2009.

Demutualization Actions

Several lawsuits were brought in 2000 challenging the fairness of the Plan and the adequacy and accuracy of MLIC s disclosure to policyholders regarding the Plan. The actions discussed below name as defendants some or all of MLIC, the Holding Company, and individual directors. MLIC, the Holding Company, and the individual

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

directors believe they have meritorious defenses to the plaintiffs claims and have contested vigorously all of the plaintiffs claims in these actions.

Fiala, et al. v. Metropolitan Life Ins. Co., et al. (Sup. Ct., N.Y. County, filed March 17, 2000). The plaintiffs in the consolidated state court class action seek compensatory relief and punitive damages against MLIC, the Holding Company, and individual directors. The court has certified a litigation class of present and former policyholders on plaintiffs claim that defendants violated section 7312 of the New York Insurance Law. Pursuant to the court s order, plaintiffs have given notice to the class of the pendency of this action. Defendants motion for summary judgment is pending. On November 2, 2009, the court was informed that the parties had reached a proposed settlement in principle. The settlement cannot be finalized until notice of the proposed settlement is provided to class members and the court approves the settlement.

In re MetLife Demutualization Litig. (E.D.N.Y., filed April 18, 2000). In this class action against MLIC and the Holding Company, plaintiffs served a second consolidated amended complaint in 2004. Plaintiffs assert violations of the Securities Act of 1933 and the Securities Exchange Act of 1934 (Exchange Act) in connection with the Plan, claiming that the Policyholder Information Booklets failed to disclose certain material facts and contained certain material misstatements. They seek rescission and compensatory damages. By orders dated July 19, 2005 and August 29, 2006, the federal trial court certified a litigation class of present and former policyholders. Pursuant to the court s order, plaintiffs have given notice to the class of the pendency of this action. On March 30, 2009, the court denied MLIC s and the Holding Company s motion for summary judgment and plaintiffs motion for partial summary judgment. On July 17, 2009, the court entered an order setting the trial to begin on September 8, 2009. On October 2, 2009, after an interlocutory appeal of conflict of interest issues, the court that they had reached a proposed settlement in principle. The settlement cannot be finalized until reasonable notice of the proposed settlement is provided to class members and the court determines, after a hearing, that the settlement proposal is fair, reasonable, and adequate.

Asbestos-Related Claims

MLIC is and has been a defendant in a large number of asbestos-related suits filed primarily in state courts. These suits principally allege that the plaintiff or plaintiffs suffered personal injury resulting from exposure to asbestos and seek both actual and punitive damages. MLIC has never engaged in the business of manufacturing, producing, distributing or selling asbestos or asbestos-containing products nor has MLIC issued liability or workers compensation insurance to companies in the business of manufacturing, producing, distributing or selling asbestos or asbestos-containing products, producing, distributing or selling asbestos or asbestos-containing produces on allegations with respect to certain research, publication and other activities of one or more of MLIC s employees during the period from the 1920 s through approximately the 1950 s and allege that MLIC learned or should have learned of certain health risks posed by asbestos and, among other things, improperly publicized or failed to disclose those health risks. MLIC believes that it should not have legal liability in these cases. The outcome of most asbestos litigation matters, however, is uncertain and can be impacted by numerous variables, including differences in legal rulings in various jurisdictions, the nature of the alleged injury, and factors unrelated to the ultimate legal merit of the claims asserted against MLIC. MLIC employs a number of resolution strategies to manage its asbestos loss exposure, including seeking resolution of pending litigation by judicial rulings and settling individual or groups of claims or lawsuits under appropriate circumstances.

Claims asserted against MLIC have included negligence, intentional tort and conspiracy concerning the health risks associated with asbestos. MLIC s defenses (beyond denial of certain factual allegations) include that: (i) MLIC owed no duty to the plaintiffs it had no special relationship with the plaintiffs and did not manufacture, produce, distribute or sell the asbestos products that allegedly injured plaintiffs; (ii) plaintiffs did not rely on any actions of MLIC; (iii) MLIC s conduct was not the cause of the plaintiffs injuries; (iv) plaintiffs exposure occurred after the dangers of asbestos were known; and (v) the applicable time with respect to filing suit has expired. During

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

the course of the litigation, certain trial courts have granted motions dismissing claims against MLIC, while other trial courts have denied MLIC s motions to dismiss. There can be no assurance that MLIC will receive favorable decisions on motions in the future. While most cases brought to date have settled, MLIC intends to continue to defend aggressively against claims based on asbestos exposure, including defending claims at trials.

As reported in the 2008 Annual Report, MLIC received approximately 5,063 asbestos-related claims in 2008. During the nine months ended September 30, 2009 and 2008, MLIC received approximately 2,800 and 3,700 new asbestos-related claims, respectively. See Note 16 of the Notes to the Consolidated Financial Statements included in the 2008 Annual Report for historical information concerning asbestos claims and MLIC s increase in its recorded liability at December 31, 2002. The number of asbestos cases that may be brought, the aggregate amount of any liability that MLIC may incur, and the total amount paid in settlements in any given year are uncertain and may vary significantly from year to year.

The ability of MLIC to estimate its ultimate asbestos exposure is subject to considerable uncertainty, and the conditions impacting its liability can be dynamic and subject to change. The availability of reliable data is limited and it is difficult to predict with any certainty the numerous variables that can affect liability estimates, including the number of future claims, the cost to resolve claims, the disease mix and severity of disease in pending and future claims, the impact of the number of new claims filed in a particular jurisdiction and variations in the law in the jurisdictions in which claims are filed, the possible impact of tort reform efforts, the willingness of courts to allow plaintiffs to pursue claims against MLIC when exposure to asbestos took place after the dangers of asbestos exposure were well known, and the impact of any possible future adverse verdicts and their amounts.

The ability to make estimates regarding ultimate asbestos exposure declines significantly as the estimates relate to years further in the future. In the Company s judgment, there is a future point after which losses cease to be probable and reasonably estimable. It is reasonably possible that the Company s total exposure to asbestos claims may be materially greater than the asbestos liability currently accrued and that future charges to income may be necessary. While the potential future charges could be material in the particular quarterly or annual periods in which they are recorded, based on information currently known by management, management does not believe any such charges are likely to have a material adverse effect on the Company s financial position.

During 1998, MLIC paid \$878 million in premiums for excess insurance policies for asbestos-related claims. The excess insurance policies for asbestos-related claims provided for recovery of losses up to \$1.5 billion in excess of a \$400 million self-insured retention. The Company s initial option to commute the excess insurance policies for asbestos-related claims would have arisen at the end of 2008. On September 29, 2008, MLIC entered into agreements commuting the excess insurance policies at September 30, 2008. As a result of the commutation of the policies, MLIC received cash and securities totaling \$632 million. Of this total, MLIC received \$115 million in fixed maturity securities on September 26, 2008, \$200 million in cash on October 29, 2008, and \$317 million in cash on January 29, 2009. MLIC recognized a loss on commutation of the policies in the amount of \$35.3 million during 2008.

In the years prior to commutation, the excess insurance policies for asbestos-related claims were subject to annual and per claim sublimits. Amounts exceeding the sublimits during 2007, 2006 and 2005 were approximately \$16 million, \$8 million and \$0, respectively. Amounts were recoverable under the policies annually with respect to claims paid during the prior calendar year. Each asbestos-related policy contained an experience fund and a reference fund that provided for payments to MLIC at the commutation date if the reference fund was greater than zero at commutation or

pro rata reductions from time to time in the loss reimbursements to MLIC if the cumulative return on the reference fund was less than the return specified in the experience fund. The return in the reference fund was tied to performance of the S&P 500 Index and the Lehman Brothers Aggregate Bond Index. A claim with respect to the prior year was made under the excess insurance policies in each year from 2003 through 2008 for the amounts paid with respect to asbestos litigation in excess of the retention. The foregone loss reimbursements were approximately \$62.2 million with respect to claims for the period of 2002 through 2007. Because the policies were

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

commuted at September 30, 2008, there will be no claims under the policies or forgone loss reimbursements with respect to payments made in 2008 and thereafter.

The Company believes adequate provision has been made in its consolidated financial statements for all probable and reasonably estimable losses for asbestos-related claims. MLIC s recorded asbestos liability is based on its estimation of the following elements, as informed by the facts presently known to it, its understanding of current law, and its past experiences: (i) the probable and reasonably estimable liability for asbestos claims already asserted against MLIC, including claims settled but not yet paid; (ii) the probable and reasonably estimable liability for asbestos claims not yet asserted against MLIC, but which MLIC believes are reasonably probable of assertion; and (iii) the legal defense costs associated with the foregoing claims. Significant assumptions underlying MLIC s analysis of the adequacy of its recorded liability with respect to asbestos litigation include: (i) the number of future claims; (ii) the cost to resolve claims; and (iii) the cost to defend claims.

MLIC reevaluates on a quarterly and annual basis its exposure from asbestos litigation, including studying its claims experience, reviewing external literature regarding asbestos claims experience in the United States, assessing relevant trends impacting asbestos liability and considering numerous variables that can affect its asbestos liability exposure on an overall or per claim basis. These variables include bankruptcies of other companies involved in asbestos litigation, legislative and judicial developments, the number of pending claims involving serious disease, the number of new claims filed against it and other defendants, and the jurisdictions in which claims are pending. Based upon its regular reevaluation of its exposure from asbestos litigation, MLIC has updated its liability analysis for asbestos-related claims through September 30, 2009.

Regulatory Matters

The Company receives and responds to subpoenas or other inquiries from state regulators, including state insurance commissioners; state attorneys general or other state governmental authorities; federal regulators, including the SEC; federal governmental authorities, including congressional committees; and the Financial Industry Regulatory Authority (FINRA) seeking a broad range of information. The issues involved in information requests and regulatory matters vary widely. Certain regulators have requested information and documents regarding contingent commission payments to brokers, the Company s awareness of any sham bids for business, bids and quotes that the Company submitted to potential customers, incentive agreements entered into with brokers, or compensation paid to intermediaries. Regulators also have requested information relating to market timing and late trading of mutual funds and variable insurance products and, generally, the marketing of products. The Company has received a subpoena from and has had discussions with the Office of the U.S. Attorney for the Southern District of California regarding the insurance broker Universal Life Resources. The Company has been cooperating fully.

Regulatory authorities in a small number of states have had investigations or inquiries relating to sales of individual life insurance policies or annuities or other products by MLIC; New England Mutual Life Insurance Company, New England Life Insurance Company and New England Securities Corporation; General American Life Insurance Company; Walnut Street Securities, Inc. and MetLife Securities, Inc. (MSI). Over the past several years, these and a number of investigations by other regulatory authorities were resolved for monetary payments and certain other relief. The Company may continue to resolve investigations in a similar manner.

MSI is a defendant in two regulatory matters brought by the Illinois Department of Securities. In 2005, MSI received a notice from the Illinois Department of Securities asserting possible violations of the Illinois Securities Act in connection with alleged failure to disclose portability with respect to sales of a former affiliate s mutual funds and representative compensation with respect to proprietary products. A response has been submitted and in January 2008, MSI received notice of the commencement of an administrative action by the Illinois Department of Securities. In May 2008, MSI s motion to dismiss the action was denied. In the second matter, in December 2008 MSI received a Notice of Hearing from the Illinois Department of Securities based upon a complaint alleging that

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

MSI failed to reasonably supervise one of its former registered representatives in connection with the sale of variable annuities to Illinois investors. MSI intends to vigorously defend against the claims in these matters.

On April 14, 2009, MSI received a Wells Notice from FINRA stating that FINRA is considering recommending that a disciplinary action be brought against MSI. FINRA contends that during the period from March 1999 through December 2006, MSI s registered representative supervisory system was not reasonably designed to achieve compliance with National Association of Securities Dealers Conduct Rules relating to the review of registered representatives electronic correspondence. Under FINRA procedures, MSI can avail itself of the opportunity to respond to the FINRA staff before it makes a formal recommendation regarding whether any disciplinary action should be considered.

In June 2008, the Environmental Protection Agency issued a Notice of Violation (NOV) regarding the operations of the Homer City Generating Station, an electrical generation facility. The NOV alleges, among other things, that the electrical generation facility is being operated in violation of certain federal and state Clean Air Act requirements. Homer City OL6 LLC, an entity owned by MLIC, is a passive investor with a noncontrolling interest in the electrical generation facility, which is solely operated by the lessee, EME Homer City Generation L.P. (EME Homer). Homer City OL6 LLC and EME Homer are among the respondents identified in the NOV. EME Homer has been notified of its obligation to indemnify Homer City OL6 LLC and MLIC for any claims resulting from the NOV and has expressly acknowledged its obligation to indemnify Homer City OL6 LLC.

Other Litigation

Jacynthe Evoy-Larouche v. Metropolitan Life Ins. Co. (Que. Super. Ct., filed March 1998). This putative class action lawsuit involving sales practices claims was filed against MLIC in Canada. Plaintiff alleged misrepresentations regarding dividends and future payments for life insurance policies and sought unspecified damages. Pursuant to a judgment dated March 11, 2009, this lawsuit was dismissed.

Travelers Ins. Co., et al. v. Banc of America Securities LLC (S.D.N.Y., filed December 13, 2001). On January 6, 2009, after a jury trial, the district court entered a judgment in favor of The Travelers Insurance Company, now known as MetLife Insurance Company of Connecticut, in the amount of approximately \$42 million in connection with securities and common law claims against the defendant. On May 14, 2009, the district court issued an opinion and order denying the defendant s post judgment motion seeking a judgment in its favor or, in the alternative, a new trial. On June 3, 2009, the defendant filed a notice of appeal from the January 6, 2009 judgment and the May 14, 2009 opinion and order. As it is possible that the judgment could be affected during appellate practice, and the Company has not collected any portion of the judgment, the Company has not recognized any award amount in its consolidated financial statements.

Shipley v. St. Paul Fire and Marine Ins. Co. and Metropolitan Property and Casualty Ins. Co. (Ill. Cir. Ct., Madison County, filed February 26 and July 2, 2003). Two putative nationwide class actions have been filed against Metropolitan Property and Casualty Insurance Company in Illinois. One suit claims breach of contract and fraud due to the alleged underpayment of medical claims arising from the use of a purportedly biased provider fee pricing system. The second suit currently alleges breach of contract arising from the alleged use of preferred provider organizations to reduce medical provider fees covered by the medical claims portion of the insurance policy. Motions for class certification have been filed and briefed in both cases. A third putative nationwide class action relating to the

payment of medical providers, *Innovative Physical Therapy, Inc. v. MetLife Auto & Home, et ano (D. N.J., filed November 12, 2007),* was filed against Metropolitan Property and Casualty Insurance Company in federal court in New Jersey. The court granted the defendants motion to dismiss, and the U.S. Court of Appeals for the Third Circuit issued an order on July 22, 2009 affirming the dismissal. *Simon v. Metropolitan Property and Casualty Ins. Co. (W.D. Okla., filed September 23, 2008),* a fourth putative nationwide class action lawsuit relating to payment of medical providers, is pending in federal court in Oklahoma. The Company is vigorously defending against the claims in these matters.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

The American Dental Association, et al. v. MetLife Inc., et al. (S.D. Fla., filed May 19, 2003). The American Dental Association and three individual providers had sued the Holding Company, MLIC and other non-affiliated insurance companies in a putative class action lawsuit. The plaintiffs purported to represent a nationwide class of in-network providers who alleged that their claims were being wrongfully reduced by downcoding, bundling, and the improper use and programming of software. The complaint alleged federal racketeering and various state law theories of liability. On February 10, 2009, the district court granted the Company s motion to dismiss plaintiffs second amended complaint, dismissing all of plaintiffs claims except for breach of contract claims. Plaintiffs were provided with an opportunity to re-plead the dismissed claims by February 26, 2009. Since plaintiffs never amended these claims, they were dismissed with prejudice on March 2, 2009. By order dated March 20, 2009, the district court declined to retain jurisdiction over the remaining breach of contract claims and dismissed the lawsuit. On April 17, 2009, plaintiffs filed a notice of appeal from this order.

In Re Ins. Brokerage Antitrust Litig. (D. N.J., filed February 24, 2005). In this multi-district class action proceeding, plaintiffs complaint alleged that the Holding Company, MLIC, several non-affiliated insurance companies and several insurance brokers violated the Racketeer Influenced and Corrupt Organizations Act (RICO), the Employee Retirement Income Security Act of 1974 (ERISA), and antitrust laws and committed other misconduct in the context of providing insurance to employee benefit plans and to persons who participate in such employee benefit plans. In August and September 2007 and January 2008, the court issued orders granting defendants motions to dismiss with prejudice the federal antitrust, the RICO, and the ERISA claims. In February 2008, the court dismissed the remaining state law claims on jurisdictional grounds. Plaintiffs appeal from the orders dismissing their RICO and federal antitrust claims is pending with the U.S. Court of Appeals for the Third Circuit. A putative class action alleging that the Holding Company and other non-affiliated defendants violated state laws was transferred to the District of New Jersey but was not consolidated with other related actions. Plaintiffs motion to remand this action to state court in Florida is pending.

Metropolitan Life Ins. Co. v. Park Avenue Securities, et. al. (FINRA Arbitration, filed May 2006). MLIC commenced an action against Park Avenue Securities LLC., a registered investment adviser and broker-dealer that is an indirect wholly-owned subsidiary of The Guardian Life Insurance Company of America, alleging misappropriation of confidential and proprietary information and use of prohibited methods to solicit the Company s customers and recruit the Company s financial services representatives. On February 12, 2009, a FINRA arbitration panel awarded MLIC \$21 million in damages, including punitive damages and attorneys fees. In March 2009, Park Avenue Securities filed a motion to vacate the decision. In September 2009, the parties reached a settlement of this action together with related and similar matters brought by MLIC against Park Avenue Securities and The Guardian Life Insurance Company of America.

Roberts, et al. v. Tishman Speyer Properties, et al. (Sup. Ct., N.Y. County, filed January 22, 2007). This lawsuit was filed by a putative class of market rate tenants at Stuyvesant Town and Peter Cooper Village against parties including Metropolitan Tower Life Insurance Company and Metropolitan Insurance and Annuity Company. This group of tenants claim that the Company and the current owner, Tishman Speyer, improperly deregulated apartments while receiving J-51 tax abatements. The lawsuit seeks declaratory relief and damages for rent overcharges. In August 2007, the trial court granted the Company s motion to dismiss. In March 2009, New York s intermediate appellate court reversed the trial court s decision and reinstated the lawsuit. Tishman Speyer and the Company appealed this ruling to the New York State Court of Appeals, which in October 2009 issued an opinion affirming the ruling of the intermediate appellate court. The lawsuit will now return to the trial court for further proceedings. The Company will continue to vigorously defend against the claims in the lawsuit.

Thomas, et al. v. Metropolitan Life Ins. Co., et al. (W.D. Okla., filed January 31, 2007). A putative class action complaint was filed against MLIC and MSI. Plaintiffs asserted legal theories of violations of the federal securities laws and violations of state laws with respect to the sale of certain proprietary products by the Company s agency distribution group. Plaintiffs sought rescission, compensatory damages, interest, punitive damages and attorneys fees and expenses. In January and May 2008, the court issued orders granting the defendants motion to

Table of Contents

MetLife, Inc.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

dismiss in part, dismissing all of plaintiffs claims except for claims under the Investment Advisers Act. In August 2009, the Court granted defendants motion for summary judgment, dismissing the claims under the Investment Advisers Act.

Sales Practices Claims. Over the past several years, the Company has faced numerous claims, including class action lawsuits, alleging improper marketing or sales of individual life insurance policies, annuities, mutual funds or other products. Some of the current cases seek substantial damages, including punitive and treble damages and attorneys fees. At September 30, 2009, there were approximately 130 sales practices litigation matters pending against the Company. The Company continues to vigorously defend against the claims in these matters. The Company believes adequate provision has been made in its consolidated financial statements for all probable and reasonably estimable losses for sales practices matters.

Summary

Putative or certified class action litigation and other litigation and claims and assessments against the Company, in addition to those discussed previously and those otherwise provided for in the Company s consolidated financial statements, have arisen in the course of the Company s business, including, but not limited to, in connection with its activities as an insurer, employer, investor, investment advisor and taxpayer. Further, state insurance regulatory authorities and other federal and state authorities regularly make inquiries and conduct investigations concerning the Company s compliance with applicable insurance and other laws and regulations.

It is not possible to predict the ultimate outcome of all pending investigations and legal proceedings or provide reasonable ranges of potential losses, except as noted previously in connection with specific matters. In some of the matters referred to previously, very large and/or indeterminate amounts, including punitive and treble damages, are sought. Although in light of these considerations it is possible that an adverse outcome in certain cases could have a material adverse effect upon the Company s financial position, based on information currently known by the Company s management, in its opinion, the outcomes of such pending investigations and legal proceedings are not likely to have such an effect. However, given the large and/or indeterminate amounts sought in certain of these matters and the inherent unpredictability of litigation, it is possible that an adverse outcome in certain matters could, from time to time, have a material adverse effect on the Company s consolidated net income or cash flows in particular quarterly or annual periods.

Argentina

The Argentine economic, regulatory and legal environment, including interpretations of laws and regulations by regulators and courts, is uncertain. Potential legal or governmental actions related to pension reform, fiduciary responsibilities, performance guarantees and tax rulings could adversely affect the results of the Company.

Upon acquisition of Citigroup s insurance operations in Argentina, the Company established insurance and contingent liabilities, most significantly related to death and disability policy coverages and to litigation against the government s 2002 Pesification Law. These liabilities were established based upon the Company s interpretation of Argentine law at the time and the Company s best estimate of its obligations under laws applicable at the time.

In 2006, a decree was issued by the Argentine Government regarding the taxability of pesification related gains resulting in the \$8 million, net of income tax, reduction of certain tax liabilities during the year ended December 31, 2006.

In 2007, pension reform legislation in Argentina was enacted which relieved the Company of its obligation to provide death and disability policy coverages and resulted in the elimination of related insurance liabilities. The reform reinstituted the government s pension plan system and allowed for pension participants to transfer their future contributions to the government pension plan system.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

Although it no longer received compensation, the Company continued to be responsible for managing the funds of those participants that transferred to the government system. This change resulted in the establishment of a liability for future servicing obligations and the elimination of the Company s obligations under death and disability policy coverages. The impact of the 2007 Argentine pension reform was an increase to net income of \$114 million, net of income tax, due to the reduction of the insurance liabilities and other balances associated with the death and disability coverages of \$197 million, net of income tax, which exceeded the establishment of the liability for future service obligations of \$83 million, net of income tax, during the year ended December 31, 2007. During the first quarter of 2008, the future servicing obligation was reduced by \$23 million, net of income tax, when information regarding the level of participation in the government pension plan became fully available.

In October 2008, the Argentine government announced its intention to nationalize private pensions and, in December 2008, the Argentine government nationalized the private pension system seizing the underlying investments of participants which were being managed by the Company. With this action, the Company s pension business in Argentina ceased to exist and the Company eliminated certain assets and liabilities held in connection with the pension business. Deferred acquisition costs, deferred tax assets, and liabilities primarily the liability for future servicing obligation referred to above were eliminated and the Company incurred severance costs associated with the termination of employees. The impact of the elimination of assets and liabilities and the incurral of severance costs was an increase to net income of \$6 million, net of income tax, during the year ended December 31, 2008.

In September 2008, the Argentine Supreme Court issued a ruling in an individual lawsuit that was contrary to the 2002 Pesification Law enacted by the Argentine government. This ruling relates to certain social security pension annuity contractholders who had filed lawsuits challenging the 2002 Pesification Law. The annuity contracts impacted by this ruling, which were deemed peso denominated under the 2002 Pesification Law, are now considered to be U.S. Dollar denominated obligations of the Company. Contingent liabilities that were established at acquisition in 2005 in connection with the outstanding lawsuits have been adjusted and refined to be consistent with the ruling. The impact of the refinements resulting from the change in these contingent liabilities and the associated future policyholder benefits was an increase to net income of \$34 million, net of income tax, during the year ended December 31, 2008.

In March 2009, in light of market developments resulting from the Supreme Court ruling contrary to the Pesification Law and the implementation by the Company of a program to allow the contractholders that had not filed a lawsuit to convert to U.S. Dollars the social security annuity contracts denominated in pesos by the Law, the Company reassessed the corresponding contingent liability established at acquisition in 2005. The impact of this reassessment is an increase to net income of \$95 million, net of income tax, due to the reduction of the contingent liability established in 2005 of \$108 million, net of income tax, which was partially offset by the establishment of contingent liabilities from the implementation of the program to convert these contracts to U.S. Dollars of \$13 million, net of income tax, during the quarter ended March 31, 2009.

Commitments

Commitments to Fund Partnership Investments

The Company makes commitments to fund partnership investments in the normal course of business. The amounts of these unfunded commitments were \$4.1 billion and \$4.5 billion at September 30, 2009 and December 31, 2008,

respectively. The Company anticipates that these amounts will be invested in partnerships over the next five years.

Mortgage Loan Commitments

The Company has issued interest rate lock commitments on certain residential mortgage loan applications totaling \$4.2 billion and \$8.0 billion at September 30, 2009 and December 31, 2008, respectively. The Company

Table of Contents

MetLife, Inc.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

intends to sell the majority of these originated residential mortgage loans. Interest rate lock commitments to fund mortgage loans that will be held-for-sale are considered derivatives pursuant to the guidance on derivatives and hedging, and their estimated fair value and notional amounts are included within interest rate forwards in Note 4.

The Company also commits to lend funds under certain other mortgage loan commitments that will be held-for-investment. The amounts of these mortgage loan commitments were \$3.5 billion and \$2.7 billion at September 30, 2009 and December 31, 2008, respectively.

Commitments to Fund Bank Credit Facilities, Bridge Loans and Private Corporate Bond Investments

The Company commits to lend funds under bank credit facilities, bridge loans and private corporate bond investments. The amounts of these unfunded commitments were \$932 million and \$971 million at September 30, 2009 and December 31, 2008, respectively.

Guarantees

During the nine months ended September 30, 2009, the Company did not record additional liabilities for indemnities, guarantees and commitments. The Company s recorded liabilities were \$6 million at both September 30, 2009 and December 31, 2008.

13. Employee Benefit Plans

Pension and Other Postretirement Benefit Plans

Certain subsidiaries of the Holding Company (the Subsidiaries) sponsor and/or administer various qualified and non-qualified defined benefit pension plans and other postretirement employee benefit plans covering employees and sales representatives who meet specified eligibility requirements. The Subsidiaries also provide certain postemployment benefits and certain postretirement medical and life insurance benefits for retired employees. The Subsidiaries have issued group annuity and life insurance contracts supporting approximately 99% of all pension and postretirement employee benefit plan assets sponsored by the Subsidiaries. A December 31 measurement date is used for all of the Subsidiaries defined benefit pension and other postretirement benefit plans.

The components of net periodic benefit cost were as follows:

												Ot	her				
			Р	Pension Benefits						P	Postre	tirem	ment Benefits

(1) At September 30, 2008, other comprehensive income (loss) also includes \$4 million of amounts, which were reversed upon the disposition of Reinsurance Group of America, Incorporated (RGA). Such amounts were included in other comprehensive income (loss).

As disclosed in Note 17 of the Notes to the Consolidated Financial Statements included in the 2008 Annual Report, no contributions are required to be made to the Subsidiaries qualified pension plans during 2009; however, the Subsidiaries expected to make discretionary contributions of up to \$150 million to the plans during 2009. At September 30, 2009, the Subsidiaries no longer expect to make this contribution to the Subsidiaries qualified pension plans in 2009. The Subsidiaries fund benefit payments for their non-qualified pension and other postretirement plans as due through their general assets.

14. Equity

Preferred Stock

Information on the declaration, record and payment dates, as well as per share and aggregate dividend amounts, for preferred stock is as follows:

Common Stock

Repurchases

At September 30, 2009, the Company had \$1,261 million remaining under its common stock repurchase program authorizations. In April 2008, the Company s Board of Directors authorized a \$1 billion common stock repurchase program, which will begin after the completion of the January 2008 \$1 billion common stock repurchase

84

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

program, of which \$261 million remained outstanding at September 30, 2009. Under these authorizations, the Company may purchase its common stock from the MetLife Policyholder Trust in the open market (including pursuant to the terms of a pre-set trading plan, which meets the requirements of Rule 10b5-1 under the Exchange Act) and in privately negotiated transactions. The Company does not intend to make any purchases under the common stock repurchase programs in 2009.

Issuances

As described in Note 9, the Company delivered 24,343,154 shares of newly issued common stock on February 17, 2009 with proceeds of \$1,035 million to settle the remaining stock purchase contracts issued as part of the common equity units sold in June 2005.

During the three months and nine months ended September 30, 2009, 166,868 shares and 780,915 shares of common stock were issued from treasury stock for \$9 million and \$42 million, respectively.

Dividends

Future common stock dividend decisions will be determined by the Holding Company s Board of Directors after taking into consideration factors such as the Company s current earnings, expected medium- and long-term earnings, financial condition, regulatory capital position, and applicable governmental regulations and policies.

Stock-Based Compensation Plans

Description of Plans

The MetLife, Inc. 2000 Stock Incentive Plan, as amended (the Stock Incentive Plan), authorized the granting of awards in the form of options to buy shares of the Company s common stock (Stock Options) that either qualify as incentive Stock Options under Section 422A of the Internal Revenue Code or are non-qualified. The MetLife, Inc. 2000 Directors Stock Plan, as amended (the Directors Stock Plan), authorized the granting of awards in the form of the Company s common stock, non-qualified Stock Options, or a combination of the foregoing to outside Directors of the Company. Under the MetLife, Inc. 2005 Stock and Incentive Compensation Plan, as amended (the 2005 Stock Plan), awards granted may be in the form of Stock Options, Stock Appreciation Rights, Restricted Stock or Restricted Stock Units, Performance Shares or Performance Share Units, Cash-Based Awards, and Stock-Based Awards (each as defined in the 2005 Directors Stock Plan), awards granted may be in the MetLife, Inc. 2005 Non-Management Director Stock Options, Stock Appreciation Rights, Restricted Stock or Restricted Stock Units, Restricted Stock or Restricted Stock Units, or Stock-Based Awards (each as defined in the 2005 Directors Stock Plan), awards granted may be in the form of non-qualified Stock Options, Stock Appreciation Rights, Restricted Stock or Restricted Stock Units, or Stock-Based Awards (each as defined in the 2005 Directors Stock Plan). The Stock Incentive Plan, Directors Stock Plan, 2005 Stock Plan and the 2005 Directors Stock Plan, are hereinafter collectively referred to as the Incentive Plans.

At September 30, 2009, the aggregate number of shares remaining available for issuance pursuant to the 2005 Stock Plan and the 2005 Directors Stock Plan was 47,561,061 and 1,838,594, respectively.

Compensation expense of \$27 million and \$71 million, and income tax benefits of \$10 million and \$25 million, related to the Incentive Plans was recognized for the three months and nine months ended September 30, 2009,

respectively. Compensation expense of \$25 million and \$101 million, and income tax benefits of \$9 million and \$36 million, related to the Incentive Plans was recognized for the three months and nine months ended September 30, 2008, respectively. Compensation expense is principally related to the issuance of Stock Options, Performance Shares and Restricted Stock Units. The majority of awards granted by the Company are made in the first quarter of each year. As a result of the Company s policy of recognizing stock-based compensation over the shorter of the stated requisite service period or period until attainment of retirement eligibility, a greater proportion of the aggregate fair value for awards granted on or after January 1, 2007 is recognized immediately on the grant date.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

Stock Options

All Stock Options granted had an exercise price equal to the closing price of the Company s common stock as reported on the New York Stock Exchange on the date of grant, and have a maximum term of ten years. Certain Stock Options granted under the Stock Incentive Plan and the 2005 Stock Plan have or will become exercisable over a three year period commencing with the date of grant, while other Stock Options have or will become exercisable three years after the date of grant. Stock Options issued under the Directors Stock Plan are exercisable immediately. The date at which a Stock Option issued under the 2005 Directors Stock Plan becomes exercisable is determined at the time such Stock Option is granted.

During the nine months ended September 30, 2009, the Company granted 5,450,662 Stock Option awards with a weighted average exercise price of \$23.61 for which the total fair value on the date of grant was \$46 million. The number of Stock Options outstanding at September 30, 2009 was 30,303,583 with a weighted average exercise price of \$38.51.

Compensation expense of \$10 million and \$45 million related to Stock Options was recognized for the three months and nine months ended September 30, 2009, respectively, and \$11 million and \$42 million related to Stock Options was recognized for the three months and nine months ended September 30, 2008, respectively.

At September 30, 2009, there was \$49 million of total unrecognized compensation costs related to Stock Options. It is expected that these costs will be recognized over a weighted average period of 1.81 years.

Performance Shares

Beginning in 2005, certain members of management were awarded Performance Shares under (and as defined in) the 2005 Stock Plan. Participants are awarded an initial target number of Performance Shares with the final number of Performance Shares payable being determined by the product of the initial target multiplied by a performance factor of 0.0 to 2.0. The performance factor applied is based on measurements of the Company s performance, including with respect to: (i) the change in annual net operating earnings per share, as defined; and (ii) the proportionate total shareholder return, as defined, each with reference to the applicable three-year performance period relative to other companies in the S&P Insurance Index with reference to the same three-year period. Beginning with awards made in 2009, in order for Performance period or for the performance period as a whole. Also beginning with awards made in 2009, if the Company s Total Shareholder Return with reference to the applicable three-year performance period is zero percent or less, the performance factor will be multiplied by 75%. Performance Share awards will normally vest in their entirety at the end of the three-year performance period and will be settled entirely in shares of the Company s common stock.

During the nine months ended September 30, 2009, the Company granted 1,944,298 Performance Share awards for which the total fair value on the date of grant was \$40 million. The number of Performance Shares outstanding at September 30, 2009 was 3,591,098 with a weighted average fair value of \$38.48 per share. These amounts represent aggregate initial target awards and do not reflect potential increases or decreases resulting from the final performance factor to be determined following the end of the respective performance period. The three-year performance period associated with the Performance Shares awarded in 2006 was completed effective December 31, 2008. The final

performance factor has been applied to the 812,975 Performance Shares associated with the 2006 grant outstanding at December 31, 2008 and resulted in the issuance of 894,273 shares of the Company s common stock during the second quarter of 2009.

Compensation expense of \$16 million and \$23 million related to Performance Shares was recognized for the three months and nine months ended September 30, 2009, respectively, and \$13 million and \$57 million related to Performance Shares was recognized for the three months and nine months ended September 30, 2008, respectively.

Table of Contents

MetLife, Inc.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

At September 30, 2009, there was \$43 million of total unrecognized compensation costs related to Performance Share awards. It is expected that these costs will be recognized over a weighted average period of 1.53 years.

Restricted Stock Units

Restricted Stock Units will normally vest in their entirety on the third anniversary of their grant date and will be settled in an equal number of shares of the Company s common stock. During the nine months ended September 30, 2009, the Company granted 295,000 Restricted Stock Units for which the total fair value on the date of grant was \$6 million. The number of Restricted Stock Units outstanding at September 30, 2009 was 395,937 with a weighted average fair value of \$28.24 per unit.

Compensation expense of \$1 million and \$3 million related to Restricted Stock Units was recognized for the three months and nine months ended September 30, 2009, respectively. Compensation expense of \$1 million and \$2 million related to Restricted Stock Units was recognized for the three months and nine months ended September 30, 2008, respectively.

At September 30, 2009, there was \$7 million of total unrecognized compensation costs related to Restricted Stock Units. It is expected that these costs will be recognized over a weighted average period of 1.74 years.

15. Other Expenses

Information on other expenses is as follows:

	Three Months Ended September 30,						Nine Months Ended September 30,				
	2	2009		2008	2009			2008

(1) Includes restructuring charges as discussed below.

In September 2008, the Company began an enterprise-wide cost reduction and revenue enhancement initiative which is expected to be fully implemented by December 31, 2010. This initiative is focused on reducing complexity, leveraging scale, increasing productivity, and improving the effectiveness of the Company s operations, as well as providing a foundation for future growth. At September 30, 2009 and December 31, 2008, the Company had a liability for severance-related restructuring costs of \$48 million and \$86 million, respectively. In addition, at September 30, 2009, the Company had a liability for contract costs associated with the termination of an operating lease of \$11 million. Restructuring charges incurred in connection with this enterprise-wide initiative during the three months and nine months ended September 30, 2009 were \$45 million and \$82 million, respectively, and during both the three months and nine months ended September 30, 2008 were \$73 million. These restructuring costs were included in other expenses. As the expenses relate to an enterprise-wide

87

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

initiative, they were incurred within Corporate & Other. Estimated restructuring costs may change as management continues to execute its restructuring plans. Restructuring charges associated with this enterprise-wide initiative were as follows:

	Three Months Ended September 30, 2009 Contract Termination							Nine Months Ended September 30, 2009 Contract Termination

Total restructuring charges incurred since inception of program	\$	73	\$ 73

Management anticipates further restructuring charges including severance, lease and asset impairments will be incurred during the years ending December 31, 2009 and 2010. However, such restructuring plans are not sufficiently

developed to enable the Company to make an estimate of such restructuring charges at September 30, 2009.

In addition to the restructuring charges incurred in connection with the aforementioned enterprise-wide initiative, the Company also incurred severance costs in connection with the Argentine government s nationalization of its private pension business. At September 30, 2009 and December 31, 2008, the Company had a liability for severance-related restructuring costs of \$1 million and \$3 million, respectively. For the nine months ended September 30, 2009, the Company made payments of \$2 million within the International segment. No payments were made by the Company for the three months ended September 30, 2009.

(1) See Note 13 of the Notes to the Consolidated Financial Statements included in the 2008 Annual Report for a description of the common equity units. The stock purchase contracts underlying the common equity units as described therein were settled upon the initial stock purchase in August 2008 and the subsequent stock purchase in February 2009. During the period ended September 30, 2008, the average closing price of the Company s common stock exceeded the threshold appreciation price on the stock purchase contracts underlying the common equity units, and, accordingly, increased the weighted average shares outstanding presented above.

89

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

During the period ended September 30, 2009, the average closing price of the Company s common stock never exceeded the threshold appreciation price on the stock purchase contracts underlying the common equity units prior to the settlement in February 2009.

(2) For the three months and nine months ended September 30, 2009, 5,540,339 shares and 3,575,086 shares, respectively, related to the exercise or issuance of stock-based awards have been excluded from the calculation of diluted earnings per common share as these shares are anti-dilutive.

17. Business Segment Information

The Company is a leading provider of individual insurance, employee benefits and financial services with operations throughout the United States and the Latin America, Europe, and Asia Pacific regions. The Company s business is currently divided into four operating segments: Institutional, Individual, International, and Auto & Home, as well as Corporate & Other. These segments are managed separately because they either provide different products and services, require different strategies or have different technology requirements. Corporate & Other contains the excess capital not allocated to the business segments, various start-up entities, MetLife Bank and run-off entities, as well as interest expense related to the majority of the Company s outstanding debt and expenses associated with certain legal proceedings and income tax audit issues. Corporate & Other also includes the elimination of all intersegment amounts, which generally relate to intersegment loans, which bear interest rates commensurate with related borrowings, as well as intersegment transactions. The operations of RGA are also reported in Corporate & Other as discontinued operations, including real estate.

In July 2009, the Company announced the combination of its institutional and individual businesses, as well as its auto & home unit, into a single U.S. business organization. The Company expects to complete the integration of its operations as a single U.S. business organization and present its business segment information based on the realigned organization in the fourth quarter of 2009.

Set forth in the tables below is certain financial information with respect to the Company s segments, as well as Corporate & Other, for the three months and nine months ended September 30, 2009 and 2008. The accounting policies of the segments are the same as those of the Company, except for the method of capital allocation and the accounting for gains (losses) from intercompany sales, which are eliminated in consolidation. The Company allocates equity to each segment based upon the economic capital model that allows the Company to effectively manage its capital. Economic capital is an internally developed risk capital model, the purpose of which is to measure the risk in the business and to provide a basis upon which capital is deployed. The economic capital model accounts for the unique and specific nature of the risks inherent in MetLife s businesses. As a part of the economic capital process, a portion of net investment income is credited to the segments based on the level of allocated equity. The Company evaluates the performance of each segment based upon net income excluding net investment gains (losses) of consolidated entities and operating joint ventures reported under the equity method of accounting, net of income tax, adjustments related to net investment gains (losses), net of income tax, the impact from the cumulative effect of changes in accounting, net of income tax, costs related to business combinations, net of income tax, and discontinued operations, other than discontinued real estate, net of income tax, less preferred stock dividends. The Company allocates certain non-recurring items, such as expenses associated with certain legal proceedings, to Corporate & Other.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

The following table presents total assets with respect to the Company s segments, as well as Corporate & Other, at:

	September 30, 2009 December 31, 2 (In millions)							
Institutional Individual International Auto & Home Corporate & Other	\$	195,098 243,463 31,864 5,487 59,280	\$	195,191 214,476 25,891 5,232 60,888				
Total	\$	535,192	\$	501,678				

Revenues derived from any customer did not exceed 10% of consolidated revenues for the three months and nine months ended September 30, 2009 and 2008. Revenues from U.S. operations were \$9.1 billion and \$24.9 billion for the three months and nine months ended September 30, 2009, respectively, which represented 89% and 87%, respectively, of consolidated revenues. Revenues from U.S. operations were \$11.5 billion and \$32.1 billion for the three months and nine months ended September 30, 2008, respectively, which represented 86% and 87%, respectively, of consolidated revenues.

18. Discontinued Operations

Real Estate

The Company actively manages its real estate portfolio with the objective of maximizing earnings through selective acquisitions and dispositions. Income related to real estate classified as held-for-sale or sold is presented in discontinued operations. These assets are carried at the lower of depreciated cost or estimated fair value less expected disposition costs.

The following information presents the components of income from discontinued real estate operations:

	Three Months Ended September 30,			/Ionths ded 1ber 30,
	2009	2008 (In mi	2009 llions)	2008
Revenues: Investment income Investment expense	\$ 3 (1)	\$ 7 (1)	\$ 6 (1)	\$ 9 (3)

Total revenues Provision for income tax	2 1	6 3	5 2	6 5
Income from discontinued operations, net of income tax	\$ 1	\$ 3	\$ 3	\$ 1

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

The carrying value of real estate related to discontinued operations was \$50 million and \$51 million at September 30, 2009 and December 31, 2008, respectively.

The following table presents the discontinued real estate operations by segment:

	Three Months Ended September 30,			Months ded 1ber 30,

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

Reinsurance Group of America, Incorporated

As more fully described in Note 2 of the Notes to the Consolidated Financial Statements included in the 2008 Annual Report, the Company completed a tax-free split-off of its majority-owned subsidiary, RGA, in September 2008. As a result of the disposition, the Reinsurance segment was eliminated and RGA s operating results were reclassified to discontinued operations of Corporate & Other for all periods presented. Interest on economic capital associated with the Reinsurance segment has been reclassified to the continuing operations of Corporate & Other.

The following table presents the amounts related to the 2008 operations of RGA that have been reflected as discontinued operations in the consolidated statements of income:

	En Septen	Months Ided Iber 30, 108		ine Months Ended ptember 30, 2008
		(In millions)		
Revenues:				
Premiums	\$	878	\$	3,535
Net investment income	Ψ	143	Ψ	597
Other revenues		16		69
Net investment gains (losses)		(87)		(249)
Total revenues		950		3,952
Expenses:				
Policyholder benefits and claims		732		2,989
Interest credited to policyholder account balances		(29)		108
Other expenses		213		699
Total expenses		916		3,796
Income before provision for income tax		34		156
Provision for income tax		10		53
Income from discontinued operations, net of income tax, available to				
MetLife, Inc. s common shareholders		24		103
Income from discontinued operations, net of income tax, attributable to				
noncontrolling interests		23		94
Loss on disposal, net of income tax		(458)		(458)
Loss from discontinued operations, net of income tax	\$	(411)	\$	(261)

During the third quarter of 2009, the Company incurred \$2 million, net of income tax, of additional costs related to this split-off.

The operations of RGA include direct policies and reinsurance agreements with MetLife and some of its subsidiaries. These agreements are generally terminable by either party upon 90 days written notice with respect to future new business. Agreements related to existing business generally are not terminable, unless the underlying policies terminate or are recaptured. These direct policies and reinsurance agreements do not constitute significant continuing involvement by the Company with RGA. Included in continuing operations in the Company s interim condensed consolidated statements of income are amounts related to these transactions, including ceded amounts that reduced premiums and fees and ceded amounts that reduced policyholder benefits and claims by \$41 million and \$23 million, respectively, for the three months ended September 30, 2008, and by \$158 million and \$136 million, respectively, for the nine months ended September 30, 2008, that have not been eliminated as these transactions have continued after the RGA disposition.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

19. Fair Value

Effective January 1, 2008, the Company prospectively adopted the provisions of fair value measurement guidance. Considerable judgment is often required in interpreting market data to develop estimates of fair value and the use of different assumptions or valuation methodologies may have a material effect on the estimated fair value amounts.

Fair Value of Financial Instruments

Amounts related to the Company s financial instruments are as follows:

September 30, 2009	Notional Amount	Carrying Value 1 millions)	Estimated Fair Value		
Assets:					
Fixed maturity securities		\$ 223,896	\$	223,896	
Equity securities		\$ 3,117	\$	3,117	
Trading securities		\$ 1,970	\$	1,970

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

- (1) Carrying values presented herein differ from those presented on the consolidated balance sheet because certain items within the respective financial statement caption are not considered financial instruments. Financial statement captions omitted from the table above are not considered financial instruments.
- (2) Derivative assets are presented within other invested assets and derivative liabilities are presented within other liabilities. At September 30, 2009 and December 31, 2008, certain non-derivative hedging instruments of \$0 and \$323 million, respectively, which are carried at amortized cost, are included with the liabilities total in Note 4 but are excluded from derivative liabilities here as they are not derivative instruments.
- (3) Net embedded derivatives within asset host contracts are presented within premiums and other receivables. Net embedded derivatives within liability host contracts are presented primarily within policyholder account balances. At September 30, 2009 and December 31, 2008, equity securities also included embedded derivatives of (\$30) million and (\$173) million, respectively.
- (4) Commitments are off-balance sheet obligations. Negative estimated fair values represent off-balance sheet liabilities.

The methods and assumptions used to estimate the fair value of financial instruments are summarized as follows:

Fixed Maturity Securities, Equity Securities and Trading Securities When available, the estimated fair value of the Company s fixed maturity, equity and trading securities are based on quoted prices in active markets that are readily and regularly obtainable. Generally, these are the most liquid of the Company s securities holdings and valuation of these securities does not involve management judgment.

When quoted prices in active markets are not available, the determination of estimated fair value is based on market standard valuation methodologies. The market standard valuation methodologies utilized include: discounted cash flow methodologies, matrix pricing or other similar techniques. The inputs in applying these market standard valuation methodologies include, but are not limited to: interest rates, credit standing of the issuer or counterparty, industry sector of the issuer, coupon rate, call provisions, sinking fund requirements, maturity and management s assumptions regarding estimated duration, liquidity and estimated future cash flows. Accordingly, the estimated fair values are based on available market information and management s judgments about financial instruments.

The significant inputs to the market standard valuation methodologies for certain types of securities with reasonable levels of price transparency are inputs that are observable in the market or can be derived principally from or corroborated by observable market data. Such observable inputs include benchmarking prices for similar assets in active, liquid markets, quoted prices in markets that are not active and observable yields and spreads in the market.

When observable inputs are not available, the market standard valuation methodologies for determining the estimated fair value of certain types of securities that trade infrequently, and therefore have little or no price transparency, rely on inputs that are significant to the estimated fair value that are not observable in the market or cannot be derived principally from or corroborated by observable market data. These unobservable inputs can be based in large part on management judgment or estimation, and cannot be supported by reference to market activity. Even though unobservable, these inputs are based on assumptions deemed appropriate given the circumstances and consistent with

what other market participants would use when pricing such securities.

The use of different methodologies, assumptions and inputs may have a material effect on the estimated fair values of the Company s securities holdings.

Mortgage and Consumer Loans The Company originates mortgage and consumer loans for both investment purposes and with the intention to sell them to third parties. Commercial and agricultural loans are originated for investment purposes and are primarily carried at amortized cost. Loans classified as consumer loans

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

are generally purchased from third parties for investment purposes and are primarily carried at amortized cost. Mortgage loans held-for-sale consist principally of residential mortgage loans for which the Company has elected the fair value option and which are carried at estimated fair value and to a significantly lesser degree certain loans which were previously held-for-investment but where the Company has changed its intention as it relates to holding them for investment. The estimated fair values of these loans are determined as follows:

Mortgage and Consumer Loans Held-for-Investment For mortgage and consumer loans held-for-investment and carried at amortized cost, fair value was primarily determined by estimating expected future cash flows and discounting them using current interest rates for similar loans with similar credit risk.

Mortgage Loans Held-for-Sale Mortgage loans held-for-sale principally include residential mortgage loans for which the fair value option was elected and which are carried at estimated fair value. Generally, quoted market prices are not available for residential mortgage loans held-for-sale; accordingly, the estimated fair values of such assets are determined based on observable pricing of residential mortgage loans held-for-sale with similar characteristics, or observable pricing for securities backed by similar types of loans, adjusted to convert the securities prices to loan prices. When observable pricing for similar loans or securities that are backed by similar loans are not available, the estimated fair values of residential mortgage loans held-for-sale are determined using independent broker quotations, which is intended to approximate the amounts that would be received from third parties. Certain other mortgages previously classified as held-for-investment have also been designated as held-for-sale. For these loans, estimated fair value is determined using independent broker quotations or, when the loan is in foreclosure or otherwise determined to be collateral dependent, the fair value of the underlying collateral is estimated using internal models.

Policy Loans For policy loans with fixed interest rates, estimated fair values are determined using a discounted cash flow model applied to groups of similar policy loans determined by the nature of the underlying insurance liabilities. Cash flow estimates are developed applying a weighted-average interest rate to the outstanding principal balance of the respective group of loans and an estimated average maturity determined through experience studies of the past performance of policyholder repayment behavior for similar loans. These cash flows are discounted using current risk-free interest rates with no adjustment for borrower credit risk as these loans are fully collateralized by the cash surrender value of the underlying insurance policy. The estimated fair value for policy loans with variable interest rates approximates carrying value due to the absence of borrower credit risk and the short time period between interest rate resets, which presents minimal risk of a material change in estimated fair value due to changes in market interest rates.

Real Estate Joint Ventures and Other Limited Partnership Interests Real estate joint ventures and other limited partnership interests included in the preceding table consist of those investments accounted for using the cost method. The remaining carrying value recognized in the consolidated balance sheet represents investments in real estate or real estate joint ventures and other limited partnership interests accounted for using the equity method, which do not meet the definition of financial instruments for which fair value is required to be disclosed.

The estimated fair values for other limited partnership interests and real estate joint ventures accounted for under the cost method are generally based on the Company s share of the NAV as provided in the financial statements of the investees. In certain circumstances, management may adjust the NAV by a premium or discount when it has sufficient evidence to support applying such adjustments.

Short-term Investments Certain short-term investments do not qualify as securities and are recognized at amortized cost in the consolidated balance sheet. For these instruments, the Company believes that there is minimal risk of material changes in interest rates or credit of the issuer such that estimated fair value approximates carrying value. In light of recent market conditions, short-term investments have been monitored to ensure there is sufficient demand and maintenance of issuer credit quality and the Company has determined additional adjustment is not required. Short-term investments that meet the definition of a security are recognized at estimated fair value in the

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

consolidated balance sheet in the same manner described above for similar instruments that are classified within captions of other major investment classes.

Other Invested Assets Other invested assets in the consolidated balance sheet are principally comprised of freestanding derivatives with positive estimated fair values, leveraged leases, investments in tax credit partnerships, joint venture investments, mortgage servicing rights, investment in a funding agreement, funds withheld at interest and various interest-bearing assets held in foreign subsidiaries. Leveraged leases and investments in tax credit partnerships and joint venture investments, which are accounted for under the equity method, are not financial instruments subject to fair value disclosure. Accordingly, they have been excluded from the preceding table.

The estimated fair value of derivatives with positive and negative estimated fair values is described in the section labeled Derivatives which follows.

Although mortgage servicing rights are not financial instruments, the Company has included them in the preceding table as a result of its election to carry mortgage servicing rights at fair value. As sales of mortgage servicing rights tend to occur in private transactions where the precise terms and conditions of the sales are typically not readily available, observable market valuations are limited. As such, the Company relies primarily on a discounted cash flow model to estimate the fair value of the mortgage servicing rights. The model requires inputs such as type of loan (fixed vs. variable and agency vs. other), age of loan, loan interest rates and current market interest rates that are generally observable. The model also requires the use of unobservable inputs including assumptions regarding estimates of discount rates, loan pre-payment, and servicing costs.

The estimated fair value of the investment in a funding agreement is estimated by discounting the expected future cash flows using current market rates and the credit risk of the note issuer.

For funds withheld at interest and the various interest-bearing assets held in foreign subsidiaries, the Company evaluates the specific facts and circumstances of each instrument to determine the appropriate estimated fair values. These estimated fair values were not materially different from the recognized carrying values.

Cash and Cash Equivalents Due to the short-term maturities of cash and cash equivalents, the Company believes there is minimal risk of material changes in interest rates or credit of the issuer such that estimated fair value generally approximates carrying value. In light of recent market conditions, cash and cash equivalent instruments have been monitored to ensure there is sufficient demand and maintenance of issuer credit quality, or sufficient solvency in the case of depository institutions, and the Company has determined additional adjustment is not required.

Accrued Investment Income Due to the short-term until settlement of accrued investment income, the Company believes there is minimal risk of material changes in interest rates or credit of the issuer such that estimated fair value approximates carrying value. In light of recent market conditions, the Company has monitored the credit quality of the issuers and has determined additional adjustment is not required.

Premiums and Other Receivables Premiums and other receivables in the consolidated balance sheet are principally comprised of premiums due and unpaid for insurance contracts, amounts recoverable under reinsurance contracts, amounts on deposit with financial institutions to facilitate daily settlements related to certain derivative positions, amounts receivable for securities sold but not yet settled, fees and general operating receivables, and embedded

derivatives related to the ceded reinsurance of certain variable annuity riders.

Premiums receivable and those amounts recoverable under reinsurance treaties determined to transfer sufficient risk are not financial instruments subject to disclosure and thus have been excluded from the amounts presented in the preceding table. Amounts recoverable under ceded reinsurance contracts which the Company has determined do not transfer sufficient risk such that they are accounted for using the deposit method of accounting have been included in the preceding table with the estimated fair value determined as the present value of expected future cash flows under the related contracts discounted using an interest rate determined to reflect the appropriate credit standing of the assuming counterparty.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

The amounts on deposit for derivative settlements essentially represent the equivalent of demand deposit balances and amounts due for securities sold are generally received over short periods such that the estimated fair value approximates carrying value. In light of recent market conditions, the Company has monitored the solvency position of the financial institutions and has determined additional adjustments are not required.

Embedded derivatives recognized in connection with ceded reinsurance of certain variable annuity riders are included in this caption in the consolidated financial statements but excluded from this caption in the preceding table as they are separately presented. The estimated fair value of these embedded derivatives is described in the section labeled Embedded Derivatives within Asset and Liability Host Contracts which follows.

Other Assets Other assets in the consolidated balance sheet are principally comprised of prepaid expenses, amounts held under corporate owned life insurance, fixed assets, capitalized software, deferred sales inducements, value of distribution agreements, value of customer relationships acquired, and a receivable for cash collateral pledged under the MRC collateral financing arrangement as described in Note 10. With the exception of the receivable for collateral pledged, other assets are not considered financial instruments subject to disclosure. Accordingly, the amount presented in the preceding table represents the receivable for collateral pledged for which the estimated fair value was determined by discounting the expected future cash flows using a discount rate that reflects the credit of the financial institution.

Separate Account Assets Separate account assets are carried at estimated fair value and reported as a summarized total on the consolidated balance sheet. The estimated fair value of separate account assets are based on the estimated fair value of the underlying assets owned by the separate account. Assets within the Company s separate accounts include: mutual funds, fixed maturity securities, equity securities, mortgage loans, derivatives, hedge funds, other limited partnership interests, short-term investments and cash and cash equivalents. The estimated fair value of mutual funds is based upon quoted prices or reported NAVs provided by the fund manager. The estimated fair values of fixed maturity securities, derivatives, short-term investments and cash and cash equivalents held by separate accounts are determined on a basis consistent with the methodologies described herein for similar financial instruments held within the general account. The estimated fair value of hedge funds is based upon NAVs provided by the fund manager. The estimated fair cash flows, using current interest rates for similar loans with similar credit risk. Other limited partnership interests are valued giving consideration to the value of the underlying holdings of the partnerships and by applying a premium or discount, if appropriate, for factors such as liquidity, bid/ask spreads, the performance record of the fund manager or other relevant variables which may impact the exit value of the partnership interest.

Policyholder Account Balances Policyholder account balances in the table above include investment contracts and customer bank deposits. Embedded derivatives on investment contracts and certain variable annuity riders accounted for as embedded derivatives are included in this caption in the consolidated financial statements but excluded from this caption in the table above as they are separately presented therein. The remaining difference between the amounts reflected as policyholder account balances in the preceding table and those recognized in the consolidated balance sheet represents those amounts due under contracts that satisfy the definition of insurance contracts and are not considered financial instruments.

The investment contracts primarily include GICs, certain funding arrangements, fixed deferred annuities, modified guaranteed annuities, fixed term payout annuities, and total control accounts. The fair values for these investment

contracts are estimated by discounting best estimate future cash flows using current market risk-free interest rates and adding a spread for the Company s own credit which is determined using publicly available information relating to the Company s debt, as well as its claims paying ability.

Due to frequency of interest rate resets on customer bank deposits held in money market accounts, the Company believes that there is minimal risk of a material change in interest rates such that the estimated fair value approximates carrying value. For time deposits, estimated fair values are estimated by discounting the expected

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

cash flows to maturity using a discount rate based on an average market rate for certificates of deposit being offered by a representative group of large financial institutions at the date of the valuation.

Short-term and Long-term Debt, Collateral Financing Arrangements, and Junior Subordinated Debt Securities The estimated fair value for short-term debt approximates carrying value due to the short-term nature of these obligations. The estimated fair values of long-term debt, collateral financing arrangements, and junior subordinated debt securities are generally determined by discounting expected future cash flows using market rates currently available for debt with similar remaining maturities and reflecting the credit risk of the Company including inputs, when available, from actively traded debt of the Company or other companies with similar types of borrowing arrangements. Risk-adjusted discount rates applied to the expected future cash flows can vary significantly based upon the specific terms of each individual arrangement, including, but not limited to: subordinated rights; contractual interest rates in relation to current market rates; the structuring of the arrangement; and the nature and observability of the applicable valuation inputs. Use of different risk-adjusted discount rates could result in different estimated fair values.

The carrying value of long-term debt presented in the table above differs from the amounts presented in the consolidated balance sheet as it does not include capital leases which are not required to be disclosed at estimated fair value.

Payables for Collateral Under Securities Loaned and Other Transactions The estimated fair value for payables for collateral under securities loaned and other transactions approximates carrying value. The related agreements to loan securities are short-term in nature such that the Company believes there is limited risk of a material change in market interest rates. Additionally, because borrowers are cross-collateralized by the borrowed securities, the Company believes no additional consideration for changes in its own credit are necessary.

Other Liabilities Other liabilities in the consolidated balance sheet are principally comprised of freestanding derivatives with negative estimated fair values; securities trading liabilities; tax and litigation contingency liabilities; obligations for employee-related benefits; interest due on the Company s debt obligations and on cash collateral held in relation to securities lending; dividends payable; amounts due for securities purchased but not yet settled; amounts due under assumed reinsurance contracts; and general operating accruals and payables.

The estimated fair value of derivatives with positive and negative estimated fair values and embedded derivatives within asset and liability host contracts are described in the sections labeled Derivatives and Embedded Derivatives within Asset and Liability Host Contracts which follow.

The remaining other amounts included in the table above reflect those other liabilities that satisfy the definition of financial instruments subject to disclosure. These items consist primarily of securities trading liabilities; interest and dividends payable; amounts due for securities purchased but not yet settled; and amounts payable under certain assumed reinsurance contracts recognized using the deposit method of accounting. The Company evaluates the specific terms, facts and circumstances of each instrument to determine the appropriate estimated fair values, which were not materially different from the recognized carrying values.

Separate Account Liabilities Separate account liabilities included in the table above represent those balances due to policyholders under contracts that are classified as investment contracts. The difference between the separate account liabilities reflected above and the amounts presented in the consolidated balance sheet represents those contracts

classified as insurance contracts which do not satisfy the criteria of financial instruments for which fair value is to be disclosed.

Separate account liabilities classified as investment contracts primarily represent variable annuities with no significant mortality risk to the Company such that the death benefit is equal to the account balance; funding arrangements related to institutional group life contracts; and certain contracts that provide for benefit funding under Institutional retirement & savings products.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

Separate account liabilities, whether related to investment or insurance contracts, are recognized in the consolidated balance sheet at an equivalent summary total of the separate account assets. Separate account assets, which equal net deposits, net investment income and realized and unrealized capital gains and losses, are fully offset by corresponding amounts credited to the contractholders liability which is reflected in separate account liabilities. Since separate account liabilities are fully funded by cash flows from the separate account assets which are recognized at estimated fair value as described above, the Company believes the value of those assets approximates the estimated fair value of the related separate account liabilities.

Derivatives The estimated fair value of derivatives is determined through the use of quoted market prices for exchange-traded derivatives and interest rate forwards to sell residential mortgage-backed securities or through the use of pricing models for over-the-counter derivatives. The determination of estimated fair value, when quoted market values are not available, is based on market standard valuation methodologies and inputs that are assumed to be consistent with what other market participants would use when pricing the instruments. Derivative valuations can be affected by changes in interest rates, foreign currency exchange rates, financial indices, credit spreads, default risk (including the counterparties to the contract), volatility, liquidity and changes in estimates and assumptions used in the pricing models.

The significant inputs to the pricing models for most over-the-counter derivatives are inputs that are observable in the market or can be derived principally from or corroborated by observable market data. Significant inputs that are observable generally include: interest rates, foreign currency exchange rates, interest rate curves, credit curves and volatility. However, certain over-the-counter derivatives may rely on inputs that are significant to the estimated fair value that are not observable in the market or cannot be derived principally from or corroborated by observable market data. Significant inputs that are unobservable generally include: independent broker quotes, credit correlation assumptions, references to emerging market currencies and inputs that are outside the observable portion of the interest rate curve, credit curve, volatility or other relevant market measure. These unobservable inputs may involve significant management judgment or estimation. Even though unobservable, these inputs are based on assumptions deemed appropriate given the circumstances and are assumed to be consistent with what other market participants would use when pricing such instruments.

The credit risk of both the counterparty and the Company are considered in determining the estimated fair value for all over-the-counter derivatives after taking into account the effects of netting agreements and collateral arrangements. Credit risk is monitored and consideration of any potential credit adjustment is based on a net exposure by counterparty. This is due to the existence of netting agreements and collateral arrangements which effectively serve to mitigate credit risk. The Company values its derivative positions using the standard swap curve which includes a credit risk adjustment. This credit risk adjustment is appropriate for those parties that execute trades at pricing levels consistent with the standard swap curve. As the Company and its significant derivative counterparties consistently execute trades at such pricing levels, additional credit risk adjustments are not currently required in the valuation process. The need for such additional credit risk adjustments is monitored by the Company. The Company s ability to consistently execute at such pricing levels is in part due to the netting agreements and collateral arrangements that are in place with all of its significant derivative counterparties.

Most inputs for over-the-counter derivatives are mid market inputs but, in certain cases, bid level inputs are used when they are deemed more representative of exit value. Market liquidity, as well as the use of different methodologies, assumptions and inputs, may have a material effect on the estimated fair values of the Company s derivatives and

could materially affect net income.

Embedded Derivatives within Asset and Liability Host Contracts Embedded derivatives principally include certain direct, assumed and ceded variable annuity riders and certain GICs with equity or bond indexed crediting rates. Embedded derivatives are recorded in the financial statements at estimated fair value with changes in estimated fair value adjusted through net income.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

The Company issues certain variable annuity products with guaranteed minimum benefit riders. Guaranteed minimum withdrawal benefit, guaranteed minimum accumulation benefit (GMAB) and certain guaranteed minimum income benefit (GMIB) riders are embedded derivatives, which are measured at estimated fair value separately from the host variable annuity contract, with changes in estimated fair value reported in net investment gains (losses). These embedded derivatives are classified within policyholder account balances. The fair value for these riders is estimated using the present value of future benefits minus the present value of future fees using actuarial and capital market assumptions related to the projected cash flows over the expected lives of the contracts. A risk neutral valuation methodology is used under which the cash flows from the riders are projected under multiple capital market scenarios using observable risk free rates. The valuation of these riders includes an adjustment for the Company s own credit and risk margins for non-capital market inputs. The Company s own credit adjustment is determined taking into consideration publicly available information relating to the Company s debt, as well as its claims paying ability. Risk margins are established to capture the non-capital market risks of the instrument which represent the additional compensation a market participant would require to assume the risks related to the uncertainties of such actuarial assumptions as annuitization, premium persistency, partial withdrawal and surrenders. The establishment of risk margins requires the use of significant management judgment. These riders may be more costly than expected in volatile or declining equity markets. Market conditions including, but not limited to, changes in interest rates, equity indices, market volatility and foreign currency exchange rates; changes in the Company s own credit standing; and variations in actuarial assumptions regarding policyholder behavior and risk margins related to non-capital market inputs may result in significant fluctuations in the estimated fair value of the riders that could materially affect net income.

The Company ceded the risk associated with certain of the GMIB and GMAB riders described in the preceding paragraph. These reinsurance contracts contain embedded derivatives which are included in premiums and other receivables with changes in estimated fair value reported in net investment gains (losses) or policyholder benefit and claims depending on the income statement classification of the direct risk. The value of the embedded derivatives on the ceded risk is determined using a methodology consistent with that described previously for the riders directly written by the Company.

The estimated fair value of the embedded derivatives within funds withheld at interest related to certain ceded reinsurance is determined based on the change in estimated fair value of the underlying assets held by the Company in a reference portfolio backing the funds withheld liability. The estimated fair value of the underlying assets is determined as described above in Fixed Maturity Securities, Equity Securities and Trading Securities and Short-term Investments. The fair value of these embedded derivatives is included, along with their funds withheld hosts, in other liabilities with changes in estimated fair value recorded in net investment gains (losses). Changes in the credit spreads on the underlying assets, interest rates and market volatility may result in significant fluctuations in the estimated fair value of these embedded derivatives that could materially affect net income.

The estimated fair value of the embedded equity and bond indexed derivatives contained in certain GICs is determined using market standard swap valuation models and observable market inputs, including an adjustment for the Company s own credit that takes into consideration publicly available information relating to the Company s debt, as well as its claims paying ability. The estimated fair value of these embedded derivatives are included, along with their GIC host, within policyholder account balances with changes in estimated fair value recorded in net investment gains (losses). Changes in equity and bond indices, interest rates and the Company s credit standing may result in significant fluctuations in the estimated fair value of these embedded derivatives that could materially affect net income.

The accounting for embedded derivatives is complex and interpretations of the primary accounting standards continue to evolve in practice. If interpretations change, there is a risk that features previously not bifurcated may require bifurcation and reporting at estimated fair value in the consolidated financial statements and respective changes in estimated fair value could materially affect net income.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

Assets and Liabilities of Subsidiaries Held-For-Sale The carrying value of the assets and liabilities of subsidiaries held-for-sale reflects those assets and liabilities which were previously determined to be financial instruments and which were reflected in other financial statement captions in the table above in previous periods but have been reclassified to this caption to reflect the discontinued nature of the operations. The estimated fair value of the assets and liabilities of subsidiaries held-for-sale have been determined on a basis consistent with the asset type as described herein.

Mortgage Loan Commitments and Commitments to Fund Bank Credit Facilities, Bridge Loans, and Private Corporate Bond Investments The estimated fair values for mortgage loan commitments and commitments to fund bank credit facilities, bridge loans and private corporate bond investments reflected in the above table represent the difference between the discounted expected future cash flows using interest rates that incorporate current credit risk for similar instruments on the reporting date and the principal amounts of the original commitments.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

Assets and Liabilities Measured at Fair Value

Recurring Fair Value Measurements

The assets and liabilities measured at estimated fair value on a recurring basis, including those items for which the Company has elected the fair value option, are determined as described in the preceding section. These estimated fair values and their corresponding fair value hierarchy are summarized as follows:

	Fair Value Mea Quoted Prices in	September 3 surements at Repor		
	Active Markets for Identical Assets and Liabilities (Level 1)	Significant Other Observable Inputs (Level 2) (In millio	Significant Unobservable Inputs (Level 3) ons)	Total Estimated Fair Value

(1) Short-term investments as presented in the tables above differ from the amounts presented in the consolidated balance sheet because certain short-term investments are not measured at estimated fair value (e.g. time deposits, money market funds, etc.).

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

- (2) Mortgage and consumer loans as presented in the tables above differ from the amount presented in the consolidated balance sheet as these tables only include residential mortgage loans held-for-sale measured at estimated fair value on a recurring basis.
- (3) Derivative assets are presented within other invested assets and derivative liabilities are presented within other liabilities. The amounts are presented gross in the tables above to reflect the presentation in the consolidated balance sheets, but are presented net for purposes of the rollforward in the following tables. At September 30, 2009 and December 31, 2008, certain non-derivative hedging instruments of \$0 and \$323 million, respectively, which are carried at amortized cost, are included with the liabilities total in Note 4 but are excluded from derivative liabilities here as they are not derivative instruments.
- (4) Net embedded derivatives within asset host contracts are presented within premiums and other receivables. Net embedded derivatives within liability host contracts are presented primarily within policyholder account balances. At September 30, 2009 and December 31, 2008, equity securities also included embedded derivatives of (\$30) million and (\$173) million, respectively.
- (5) MSRs are presented within other invested assets.
- (6) Separate account assets are measured at estimated fair value. Investment performance related to separate account assets is fully offset by corresponding amounts credited to contractholders whose liability is reflected within separate account liabilities. Separate account liabilities are set equal to the estimated fair value of separate account assets.
- (7) Trading liabilities are presented within other liabilities.

The Company has categorized its assets and liabilities into the three-level fair value hierarchy based upon the priority of the inputs to the respective valuation technique. The following summarizes the types of assets and liabilities included within the three-level fair value hierarchy presented in the preceding table.

- Level 1 This category includes certain U.S. Treasury, agency and government guaranteed fixed maturity securities, certain foreign government fixed maturity securities; exchange-traded common stock; and certain short-term money market securities. As it relates to derivatives, this level includes exchange-traded equity and interest rate futures, as well as interest rate forwards to sell certain residential mortgage-backed securities. Separate account assets classified within this level principally include mutual funds. Also included are assets held within separate accounts which are similar in nature to those classified in this level for the general account.
- Level 2 This category includes fixed maturity and equity securities priced principally by independent pricing services using observable inputs. Fixed maturity securities classified as Level 2 include most U.S. Treasury, agency and government guaranteed securities, as well as the majority of U.S. and foreign corporate securities, residential mortgage-backed securities, commercial mortgage-backed securities, state and political subdivision securities, foreign government securities and asset-backed securities. Equity securities classified as Level 2 securities consist principally of common stock and

non-redeemable preferred stock where market quotes are available but are not considered actively traded. Short-term investments and trading securities included within Level 2 are of a similar nature to these fixed maturity and equity securities. Mortgage and consumer loans included in Level 2 include residential mortgage loans held-for-sale for which there is readily available observable pricing for similar loans or securities backed by similar loans and the unobservable adjustments to such prices are insignificant. As it relates to derivatives, this level includes all types of derivative instruments utilized by the Company with the exception of exchange-traded futures and interest rate forwards to sell certain residential mortgage-backed securities included within Level 1 and those derivative instruments with unobservable inputs as described in Level 3. Separate account assets classified within this level are generally similar to those classified within this level for the general account. Hedge funds owned by separate accounts are also included within this level. Embedded derivatives classified within this level include embedded equity derivatives contained in certain GICs.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

Level 3 This category includes fixed maturity securities priced principally through independent broker quotations or market standard valuation methodologies using inputs that are not market observable or cannot be derived principally from or corroborated by observable market data. This level primarily consists of less liquid fixed maturity securities with very limited trading activity or where less price transparency exists around the inputs to the valuation methodologies including: U.S. and foreign corporate securities including below investment grade private placements; residential mortgage-backed securities and asset-backed securities including all of those supported by sub-prime mortgage loans. Equity securities classified as Level 3 securities consist principally of non-redeemable preferred stock and common stock of companies that are privately held or of companies for which there has been very limited trading activity or where less price transparency exists around the inputs to the valuation. Short-term investments and trading securities included within Level 3 are of a similar nature to these fixed maturity and equity securities. Mortgage and consumer loans included in Level 3 include residential mortgage loans held-for-sale for which pricing for similar loans or securities backed by similar loans is not observable and the estimated fair value is determined using unobservable broker quotes. As it relates to derivatives this category includes: swap spreadlocks with maturities which extend beyond observable periods; interest rate forwards including interest rate lock commitments with certain unobservable inputs, including pull-through rates; equity variance swaps with unobservable volatility inputs or that are priced via independent broker quotations; foreign currency swaps which are cancelable and priced through independent broker quotations; interest rate swaps with maturities which extend beyond the observable portion of the yield curve; credit default swaps based upon baskets of credits having unobservable credit correlations, as well as credit default swaps with maturities which extend beyond the observable portion of the credit curves and credit default swaps priced through independent broker quotes; foreign currency forwards priced via independent broker quotations or with liquidity adjustments; interest rate caps and floors referencing unobservable yield curves and/or which include liquidity and volatility adjustments; implied volatility swaps with unobservable volatility inputs; and equity options with unobservable volatility inputs. Separate account assets classified within this level are generally similar to those classified within this level for the general account; however, they also include mortgage loans, and other limited partnership interests. Embedded derivatives classified within this level primarily include embedded derivatives associated with certain variable annuity riders. This category also includes MSRs which are carried at estimated fair value and have multiple significant unobservable inputs including discount rates, estimates of loan prepayments and servicing costs.

(1) Impact of adoption of fair value measurement guidance represents the amount recognized in earnings as a change in estimate associated with Level 3 financial instruments held at January 1, 2008. The net impact of adoption on Level 3 assets and liabilities presented in the table above was a \$23 million increase to net assets. Such amount was also impacted by an increase to DAC of \$17 million. The impact of this adoption on RGA

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

not reflected in the table above as a result of the reflection of RGA in discontinued operations was a net increase of \$2 million (i.e., a decrease in Level 3 net embedded derivative liabilities of \$17 million offset by a DAC decrease of \$15 million) for a total impact of \$42 million on Level 3 assets and liabilities. This impact of \$42 million along with a \$12 million reduction in the estimated fair value of Level 2 freestanding derivatives, resulted in a total net impact of \$30 million.

- (2) Amortization of premium/discount is included within net investment income which is reported within the earnings caption of total gains (losses). Impairments charged to earnings are included within net investment gains (losses) which are reported within the earnings caption of total gains (losses). Lapses associated with embedded derivatives are included with the earnings caption of total gains (losses).
- (3) Interest and dividend accruals, as well as cash interest coupons and dividends received, are excluded from the rollforward.
- (4) The amount reported within purchases, sales, issuances and settlements is the purchase/issuance price (for purchases and issuances) and the sales/settlement proceeds (for sales and settlements) based upon the actual date purchased/issued or sold/settled. Items purchased/issued and sold/settled in the same period are excluded from the rollforward. For embedded derivatives, attributed fees are included within this caption along with settlements, if any.
- (5) Total gains and losses (in earnings and other comprehensive income (loss)) are calculated assuming transfers in and/or out of Level 3 occurred at the beginning of the period. Items transferred in and out in the same period are excluded from the rollforward.
- (6) Freestanding derivative assets and liabilities are presented net for purposes of the rollforward.
- (7) The additions and reductions (due to loan payments) affecting MSRs were \$138 million and (\$24) million, respectively, for the three months ended September 30, 2009 and \$544 million and (\$85) million, respectively, for the nine months ended September 30, 2009. The additions and reductions (due to loan payments) affecting MSRs were \$305 million and (\$3) million, respectively, for both the three months and nine months ended September 30, 2008.
- (8) The changes in estimated fair value due to changes in valuation model inputs or assumptions, and other changes in estimated fair value affecting MSRs were (\$64) million and \$0, respectively, for the three months ended September 30, 2009, and \$70 million and \$0, respectively, for the nine months ended September 30, 2009. The changes in estimated fair value due to changes in valuation model inputs or assumptions, and other changes in estimated fair value affecting MSRs were \$1 million and \$0, respectively, for both the three months and nine months ended September 30, 2008.
- (9) Investment performance related to separate account assets is fully offset by corresponding amounts credited to contractholders whose liability is reflected within separate account liabilities.
- (10) Embedded derivative assets and liabilities are presented net for purposes of the rollforward.

(11) Amounts presented do not reflect any associated hedging activities. Actual earnings associated with Level 3, inclusive of hedging activities, could differ materially.

Notes to the Interim Condensed Consolidated Financial Statements (Unaudited) (Continued)

Fair Value Option Mortgage and Consumer Loans

The Company has elected fair value accounting for certain residential mortgage loans held-for-sale. The following table presents residential mortgage loans held for sale carried under the fair value option at:

	September 30, 2009 December 31, 20 (In millions)							
Unpaid principal balance Excess estimated fair value over unpaid principal balance	\$	2,322 82	\$	1,920 55				
Carrying value at estimated fair value	\$	2,404	\$	1,975				

Approximately \$2 million of the loans where the fair value option has been elected were in non-accrual status and none of the loans were more than 90 days past due at September 30, 2009. None of the loans where the fair value option has been elected were more than 90 days past due or in non-accrual status at December 31, 2008.

Residential mortgage loans held-for-sale accounted for under the fair value option are initially measured at estimated fair value. Interest income on residential mortgage loans held-for-sale is recorded based on the stated rate of the loan and is recorded in net investment income. Gains and losses from initial measurement, subsequent changes in estimated fair value, and gains or losses on sales are recognized in other revenues, and such changes in estimated fair value were due to the following:

	Three M End Septeml	ed	End	Nine Months Ended September 30,			
	2009	2008 (In m	2009 illions)	2008			
Instrument-specific credit risk based on changes in credit spreads for non-agency loans and adjustments in individual loan quality Other changes in fair value	\$ (1) \$ 149	\$ \$ 13	\$ (2) \$ 457	\$ \$ 13			

Non-Recurring Fair Value Measurements

Certain assets are measured at estimated fair value on a non-recurring basis and are not included in the tables above. The amounts below represent certain investments measured at estimated fair value during the period and still held as of the reporting dates.

- (1) *Mortgage and Consumer Loans* The impaired mortgage and consumer loans presented above were written down to their estimated fair values at the date the impairments were recognized. Estimated fair values for impaired mortgage and consumer loans are based on observable market prices or, if the loans are in foreclosure or are otherwise determined to be collateral dependent, on the value of the underlying collateral, or the present value of the expected future cash flows. Impairments to estimated fair value represent non-recurring fair value measurements that have been categorized as Level 3 due to the lack of price transparency inherent in the limited markets for such mortgage and consumer loans.
- (2) Other Limited Partnership Interests and Real Estate Joint Ventures The impaired investments presented above were accounted for using the cost basis. Impairments on these cost basis investments were recognized at estimated fair value determined from information provided in the financial statements of the underlying entities in the period in which the impairment was incurred. These impairments to estimated fair value represent non-recurring fair value measurements that have been classified as Level 3 due to the limited activity and price transparency inherent in the market for such investments.

20. Subsequent Events

On November 3, 2009, the date the September 30, 2009 interim condensed consolidated financial statements of MetLife, Inc. were issued, the Company evaluated the recognition and disclosure of subsequent events.

On October 27, 2009, the Company s Board of Directors approved an annual dividend for 2009 of \$0.74 per common share payable on December 14, 2009 to stockholders of record as of November 9, 2009. The Company estimates the

aggregate dividend payment to be \$606 million.

On October 22, 2009, the Holding Company received \$244 million from an unaffiliated financial institution related to an increase in the estimated fair value of the surplus note issued by MRC in connection with the collateral financing arrangement associated with MRC s reinsurance of the closed block liabilities, as described in Note 10. As a result of this payment, the collateral pledged by the unaffiliated financial institution to the Holding Company in connection with the collateral financing arrangement was reduced by \$244 million.

Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations

For purposes of this discussion, MetLife or the Company refers to MetLife, Inc., a Delaware corporation incorporated in 1999 (the Holding Company), and its subsidiaries, including Metropolitan Life Insurance Company (MLIC). Following this summary is a discussion addressing the consolidated results of operations and financial condition of the Company for the periods indicated. This discussion should be read in conjunction with MetLife, Inc. s Annual Report on Form 10-K for the year ended December 31, 2008, as amended on Form 8-K on June 12, 2009, (2008 Annual Report) filed with the U.S. Securities and Exchange Commission (SEC), the forward-looking statement information included below, the Risk Factors set forth in Part II, Item 1A and the additional risk factors referred to therein, and the Company s interim condensed consolidated financial statements included elsewhere herein.

This Management s Discussion and Analysis of Financial Condition and Results of Operations may contain or incorporate by reference information that includes or is based upon forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements give expectations or forecasts of future events. These statements can be identified by the fact that they do not relate strictly to historical or current facts. They use words such as anticipate, estimate, expect, project, intend, plan, believe and other words and terr meaning in connection with a discussion of future operating or financial performance. In particular, these include statements relating to future actions, prospective services or products, future performance or results of current and anticipated services or products, sales efforts, expenses, the outcome of contingencies such as legal proceedings, trends in operations and financial results.

Any or all forward-looking statements may turn out to be wrong. They can be affected by inaccurate assumptions or by known or unknown risks and uncertainties. Many such factors will be important in determining MetLife s actual future results. These statements are based on current expectations and the current economic environment. They involve a number of risks and uncertainties that are difficult to predict. These statements are not guarantees of future performance. Actual results could differ materially from those expressed or implied in the forward-looking statements. Risks, uncertainties, and other factors that might cause such differences include the risks, uncertainties and other factors identified in MetLife, Inc. s filings with the SEC. These factors include: (i) difficult and adverse conditions in the global and domestic capital and credit markets; (ii) continued volatility and further deterioration of the capital and credit markets, which may affect the Company s ability to seek financing or access its credit facilities; (iii) uncertainty about the effectiveness of the U.S. government s plan to stabilize the financial system by injecting capital into financial institutions, purchasing large amounts of illiquid, mortgage-backed and other securities from financial institutions, or otherwise; (iv) the impairment of other financial institutions; (v) potential liquidity and other risks resulting from MetLife s participation in a securities lending program and other transactions; (vi) exposure to financial and capital market risk; (vii) changes in general economic conditions, including the performance of financial markets and interest rates, which may affect the Company s ability to raise capital, generate fee income and market-related revenue and finance statutory reserve requirements and may require the Company to pledge collateral or make payments related to declines in value of specified assets; (viii) defaults on the Company s mortgage and consumer loans; (ix) investment losses and defaults, and changes to investment valuations; (x) impairments of goodwill and realized losses or market value impairments to illiquid assets; (xi) unanticipated changes in industry trends; (xii) heightened competition, including with respect to pricing, entry of new competitors, consolidation of distributors, the development of new products by new and existing competitors and for personnel; (xiii) discrepancies between actual claims experience and assumptions used in setting prices for the Company s products and establishing the liabilities for the Company s obligations for future policy benefits and claims; (xiv) discrepancies between actual experience and assumptions used in establishing liabilities related to other contingencies or obligations; (xv) ineffectiveness of risk management policies and procedures, including with respect to guaranteed benefit riders (which may be affected by fair value adjustments arising from changes in our own credit spread) on certain of the Company s variable annuity products; (xvi) increased expenses relating to pension and post-retirement benefit plans; (xvii) catastrophe losses; (xviii) changes in assumptions related to deferred policy acquisition costs (DAC), value of business acquired (VOBA)

or goodwill; (xix) downgrades in MetLife, Inc. s and its affiliates claims paying ability, financial strength or credit ratings; (xx) economic, political, currency and other risks relating to the Company s international operations; (xxi) availability and effectiveness of reinsurance or indemnification arrangements; (xxii) regulatory, legislative or tax changes that may affect the cost of, or demand for, the Company s products or services; (xxiii) changes in accounting standards, practices and/or policies; (xxiv) adverse results or other consequences from litigation, arbitration or regulatory investigations; (xxv) deterioration

in the experience of the closed block established in connection with the reorganization of MLIC; (xxvi) the effects of business disruption or economic contraction due to terrorism, other hostilities, or natural catastrophes; (xxvii) MetLife s ability to identify and consummate on successful terms any future acquisitions, and to successfully integrate acquired businesses with minimal disruption; (xxvii) MetLife, Inc. s primary reliance, as a holding company, on dividends from its subsidiaries to meet debt payment obligations and the applicable regulatory restrictions on the ability of the subsidiaries to pay such dividends; and (xxix) other risks and uncertainties described from time to time in MetLife, Inc. s filings with the SEC.

MetLife, Inc. does not undertake any obligation to publicly correct or update any forward-looking statement if MetLife, Inc. later becomes aware that such statement is not likely to be achieved. Please consult any further disclosures MetLife, Inc. makes on related subjects in reports to the SEC.

The following discussion includes references to operating earnings, which for purposes of this discussion should be read as operating earnings available to common shareholders. Operating earnings is not based on accounting principles generally accepted in the United States of America (GAAP). Operating earnings is defined as GAAP net income (loss) available to MetLife, Inc. s common shareholders, excluding net investment gains (losses); adjustments related to net investment gains (losses); adjustments related to net investment gains (losses) of consolidated entities and operating joint ventures reported under the equity method of accounting and the impact of MetLife s credit spread; adjustments related to acquisition costs incurred to effect a business combination after January 1, 2009; and discontinued operations other than discontinued real estate, all net of income tax. Scheduled periodic settlement payments on derivative instruments not qualifying for hedge accounting treatment are included in operating earnings. MetLife believes that operating earnings enhances the understanding and comparability of its performance by excluding net investment gains (losses), net of income tax, adjustments related to net investment gains (losses), net of income tax, and adjustments related to net investment gains (losses) of consolidated entities and operating joint ventures reported under the equity method of accounting and the impact of MetLife s credit spread, net of income tax, each of which can fluctuate significantly from period to period, and adjustments related to acquisition costs incurred to effect a business combination after January 1, 2009, net of income tax, and discontinued operations other than discontinued real estate, net of income tax, thereby highlighting the results from operations and the underlying profitability drivers of the business. Operating earnings should not be viewed as a substitute for GAAP net income (loss) available to MetLife, Inc. s common shareholders. A reconciliation of operating earnings to GAAP net income (loss) available to MetLife, Inc. s common shareholders, the most directly comparable GAAP measure, is provided below.

Executive Summary

MetLife is a leading provider of insurance, employee benefits and financial services with operations throughout the United States and the Latin America, Europe and Asia Pacific regions. Through its subsidiaries, MetLife offers life insurance, annuities, auto and home insurance, retail banking and other financial services to individuals, as well as group insurance and retirement & savings products and services to corporations and other institutions. MetLife is currently organized into four operating segments: Institutional, Individual, Auto & Home and International, as well as Corporate & Other.

Unless otherwise stated, all amounts are net of income tax.

During the three months ended September 30, 2009, MetLife, Inc. s net income (loss) available to common shareholders decreased \$1.3 billion to a loss of \$650 million from income of \$600 million in the comparable 2008 period. The period over period change is predominantly due to an unfavorable change of \$1.8 billion in net investment gains (losses), resulting from a \$1.4 billion net investment loss, net of related adjustments, in the current period compared with a net investment gain of \$422 million, net of related adjustments, in the comparable 2008 period. The change in net investment losses was partially offset by a reduction of \$428 million in losses from discontinued operations and an increase in operating earnings of \$110 million.

The trends noted above were also drivers of results for the nine months ended September 30, 2009, as net income (loss) available to common shareholders decreased \$4.8 billion to a loss of \$2.7 billion from income of \$2.1 billion in the comparable 2008 period. The increase in net investment losses was \$4.2 billion to a loss of \$4.3 billion, net of related adjustments, in the current period compared with a loss of \$83 million, net of related adjustments, in the comparable 2008 period. In addition, operating earnings declined \$990 million and income from discontinued operations of \$34 million increased from a loss of \$349 million.

The \$1.4 billion in net investment losses, net of related adjustments, in the three months ended September 30, 2009, includes an \$857 million loss on derivatives. MetLife uses derivatives in connection with its broader investment portfolio management efforts to hedge a number of risks, including changes in interest rates and foreign currencies. During the current quarter, an improvement, or tightening, in MetLife s credit spread, which impacts the valuation of certain insurance liabilities, contributed \$582 million to the \$857 million in derivative losses. Changes in the value of foreign-currency related derivatives, driven by the weakening of the U.S. Dollar against other major currencies, also contributed to the loss and are, in general, offset on an economic basis by gains recognized on various assets and liabilities. The balance of the net investment losses was primarily due to credit-related losses and impairments across a broad range of invested asset classes and was consistent with the Company s expectations.

For the nine months ended September 30, 2009, the \$4.3 billion of net investment losses, net of related adjustments, reflects a \$2.6 billion loss on derivatives, including an \$1.0 billion loss from improvement, or tightening, in MetLife s

credit spread.

In 2009, MetLife s businesses continued to perform well despite the current economic challenges, as evidenced by an increase in operating earnings of \$110 million, or 18%, to \$718 million in the three months ended September 30, 2009, compared to \$608 million in the comparable 2008 period. Organic growth across many of the businesses, coupled with the impact of acquisitions by MetLife Bank as it entered the mortgage origination and servicing business during 2008, and the impact of the improvement of certain financial market conditions were the primary drivers of the increase in operating earnings. In addition, lower expenses resulting, in part, from an enterprise-wide cost reduction and revenue enhancement initiative contributed to the increase in operating earnings. These increases were partially offset by the impact of lower variable net investment income in several of the interest spread businesses, as well as higher pension and post retirement benefit costs.

For the nine months ended September 30, 2009, lower net investment income, specifically lower variable net investment income resulting from lower yields and negative returns realized on real estate funds and real estate joint ventures, caused significant declines in the interest spread businesses. In addition, higher non-deferrable volume-related expenses and higher pension and post retirement benefits, partially offset by cost reductions related to an enterprise-wide initiative, also contributed to the decrease in operating earnings. These items offset the impact of acquisitions by MetLife Bank, as well as business growth from many of the Company s businesses, and improved mortality in the life products.

Consolidated Company Outlook

The marketplace continues to react and adapt to the economic crisis and the unusual financial market events that began in 2008 and continue into 2009. Management expects the volatility in the financial markets experienced in the first quarter, which abated somewhat during the second and third quarters, to stabilize further in the fourth quarter of 2009. As a result, management anticipates a modest increase, on a constant exchange rate basis, in premiums, fees and other revenues in the fourth quarter of 2009, with mixed results across the various businesses. While the Company continues to gain market share in certain product lines, as management expected, premiums, fees and other revenues have been, and may continue to be, impacted by the U.S. and global recession, which may be reflected in, but is not limited to:

Lower fee income from separate account businesses, including variable annuity and life products in Individual Business.

A potential reduction in payroll linked revenue from Institutional group insurance customers.

A decline in demand for certain International and Institutional retirement & savings products.

A decrease in Auto & Home premiums resulting from a depressed housing market and auto industry.

Management believes there will be continued downward pressure on net income, specifically net investment income, resulting from lower returns from other limited partnership interests, real estate joint ventures, and securities lending. Management s decision to maintain a slightly higher than normal level of short-term liquidity has adversely impacted net investment income in 2009. In addition, the resulting impact of the financial markets and the recession on net investment gains (losses) and unrealized investment gains (losses) can and will vary greatly and therefore, is difficult to predict. Also difficult to determine is the impact of changes in our own credit standing, particularly on our net investment gains and losses, as it varies significantly and this exposure is not hedged.

Certain insurance-related liabilities, specifically those associated with guarantees, are tied to market performance, which in times of depressed investment markets may require management to establish additional liabilities. However, many of the risks associated with these guarantees are hedged. The turbulent financial markets, sustained over a period of time, may also necessitate management to strengthen insurance liabilities that are not associated with guarantees. Management does not anticipate significant changes in the underlying trends that drive underwriting results, with the possible exception of certain trends in the disability business.

Certain expenses may increase due to initiatives such as Operational Excellence. The unusual financial market conditions have caused, and may continue to cause an impact on DAC amortization patterns. As expected, the Company s pension-related expense for 2009 has increased.

In response to the challenges presented by the unusual economic environment, management continues to focus on disciplined underwriting, pricing, hedging strategies, as well as focused expense management.

Industry Trends

The Company s segments continue to be influenced by a continuing unstable financial and economic environment that affect the industry.

Financial and Economic Environment. Our results of operations are materially affected by conditions in the global capital markets and the economy, generally, both in the United States and elsewhere around the world. The stress experienced by global capital markets that began in the second half of 2007 continued and substantially

increased through the first quarter of 2009. Beginning in mid-September 2008, the global financial markets experienced unprecedented disruption, adversely affecting the business environment in general, as well as the financial services industry, in particular. This disruption has since moderated, but not all financial markets are functioning normally. The U.S. economy entered a recession in January 2008 and most economists believe this recession ended in June 2009.

Throughout 2008 and continuing in 2009, Congress, the Federal Reserve Bank of New York, the U.S. Treasury and other agencies of the Federal government took a number of increasingly aggressive actions (in addition to continuing a series of interest rate reductions that began in the second half of 2007) intended to provide liquidity to financial institutions and markets, to avert a loss of investor confidence in particular troubled institutions, to prevent or contain the spread of the financial crisis and to spur economic growth. How and to whom these governmental institutions distribute amounts available under the governmental programs could have the effect of supporting some aspects of the financial services industry more than others or provide advantages to some of our competitors. Governments in many of the foreign markets in which MetLife operates have also responded to address market imbalances and have taken meaningful steps intended to restore market confidence. We cannot predict whether the U.S. or foreign governments will establish additional governmental programs or the impact any additional measures or existing programs will have on the financial markets, whether on the levels of volatility currently being experienced, the levels of lending by financial institutions, the prices buyers are willing to pay for financial assets or otherwise. See Business Regulation Governmental Responses to Extraordinary Market Conditions in the 2008 Annual Report.

The economic crisis and the resulting recession have had and will continue to have an adverse effect on the financial results of companies in the financial services industry, including the Company. The declining financial markets and economic conditions have negatively impacted our investment income, our net investment gains (losses), and the demand for and the cost and profitability of certain of our products, including variable annuities and guarantee riders. See Results of Operations and Liquidity and Capital Resources.

Acquisitions and Dispositions

On March 2, 2009, the Company sold Cova Corporation (Cova), the parent company of Texas Life Insurance Company (Texas Life) to a third party for \$134 million in cash consideration, excluding \$1 million of transaction costs. The net assets sold were \$101 million, resulting in a gain on disposal of \$32 million, net of income tax. The Company also reclassified \$4 million, net of income tax, of the 2009 operations of Texas Life into discontinued operations in the consolidated financial statements. As a result, the Company recognized income from discontinued operations of \$36 million, net of income tax, during the first quarter of 2009.

As more fully described in Note 18 to the September 30, 2009 Interim Condensed Consolidated Financial Statements, the Company recognized loss from discontinued operations for the three months and nine months ended September 30, 2008 of \$404 million and \$251 million, respectively, both net of income tax.

Summary of Critical Accounting Estimates

The preparation of financial statements in conformity with GAAP requires management to adopt accounting policies and make estimates and assumptions that affect amounts reported in the interim condensed consolidated financial statements. The most critical estimates include those used in determining:

- (i) the estimated fair value of investments in the absence of quoted market values;
- (ii) investment impairments;

- (iii) the recognition of income on certain investment entities;
- (iv) the application of the consolidation rules to certain investments;
- (v) the existence and estimated fair value of embedded derivatives requiring bifurcation;
- (vi) the estimated fair value of and accounting for derivatives;
- (vii) the capitalization and amortization of DAC and the establishment and amortization of VOBA;

126

- (viii) the measurement of goodwill and related impairment, if any;
- (ix) the liability for future policyholder benefits;
- (x) accounting for income taxes and the valuation of deferred income tax assets;
- (xi) accounting for reinsurance transactions;
- (xii) accounting for employee benefit plans; and
- (xiii) the liability for litigation and regulatory matters.

In applying the Company s accounting policies, which are more fully described in the 2008 Annual Report, management makes subjective and complex judgments that frequently require estimates about matters that are inherently uncertain. Many of these policies, estimates and related judgments are common in the insurance and financial services industries; others are specific to the Company s businesses and operations. Actual results could differ from these estimates.

The above critical accounting estimates are described in Management s Discussion and Analysis of Financial Condition and Results of Operations Summary of Critical Accounting Estimates and Note 1 of our 2008 Annual Report. We have updated the disclosures below due to the adoption of new accounting guidance on the recognition and measurement of impaired securities.

Investment Impairments

One of the significant estimates related to available-for-sale securities is the evaluation of investments for other-than-temporary impairments (OTTI). The assessment of whether impairments have occurred is based on management s case-by-case evaluation of the underlying reasons for the decline in estimated fair value. The Company s review of its fixed maturity and equity securities for impairments includes an analysis of the total gross unrealized losses by three categories of securities: (i) securities where the estimated fair value had declined and remained below cost or amortized cost by less than 20%; (ii) securities where the estimated fair value had declined and remained below cost or amortized cost by 20% or more for less than six months; and (iii) securities where the estimated fair value had declined and remained below cost or amortized loss position on a fixed maturity security may not have any impact on the ability of the issuer to service all scheduled interest and principal payments and the Company s evaluation of recoverability of all contractual cash flows or the ability to recover an amount at least equal to its amortized cost based on the present value of the expected future cash flows to be collected. In contrast, for certain equity securities, greater weight and consideration are given by the Company to a decline in estimated fair value and the likelihood such estimated fair value decline will recover.

Additionally, management considers a wide range of factors about the security issuer and uses its best judgment in evaluating the cause of the decline in the estimated fair value of the security and in assessing the prospects for near-term recovery. Inherent in management s evaluation of the security are assumptions and estimates about the operations of the issuer and its future earnings potential. Considerations used by the Company in the impairment evaluation process include, but are not limited to:

(i) the length of time and the extent to which the estimated fair value has been below cost or amortized cost;

- (ii) the potential for impairments of securities when the issuer is experiencing significant financial difficulties;
- (iii) the potential for impairments in an entire industry sector or sub-sector;
- (iv) the potential for impairments in certain economically depressed geographic locations;
- (v) the potential for impairments of securities where the issuer, series of issuers or industry has suffered a catastrophic type of loss or has exhausted natural resources;

- (vi) with respect to equity securities, whether the Company s ability and intent to hold the security for a period of time sufficient to allow for the recovery of its value to an amount equal to or greater than cost or amortized cost;
- (vii) with respect to fixed maturity securities, whether the Company has the intent to sell or will more likely than not be required to sell a particular security before recovery of the decline in fair value below amortized cost;
- (viii) unfavorable changes in forecasted cash flows on mortgage-backed and asset-backed securities; and
- (ix) other subjective factors, including concentrations and information obtained from regulators and rating agencies.

The cost of fixed maturity and equity securities is adjusted for impairments in value deemed to be other-than-temporary and charged to earnings in the period in which the determination is made. For equity securities, the carrying value of the equity security is impaired to its fair value, with a corresponding charge to earnings. When an other-than-temporary impairment of a fixed maturity security has occurred, the amount of the other-than-temporary impairment recognized in earnings depends on whether the Company intends to sell the security or more likely than not will be required to sell the security before recovery of its amortized cost basis. If the fixed maturity security meets either of these two criteria, the other-than-temporary impairment recognized in earnings is equal to the entire difference between the security security securities that do not meet either of these two criteria, the net amount recognized in earnings is equal to the difference between the amortized cost of the fixed maturity security and the present value of projected future cash flows to be collected from this security. Any difference between the fair value and the present value of the expected future cash flows of the security at the impairment measurement date is recorded in other comprehensive income (loss). The Company does not change the revised cost basis for subsequent recoveries in value.

The determination of the amount of allowances and impairments on other invested asset classes is highly subjective and is based upon the Company s periodic evaluation and assessment of known and inherent risks associated with the respective asset class. Such evaluations and assessments are revised as conditions change and new information becomes available. Management updates its evaluations regularly and reflects changes in allowances and impairments in operations as such evaluations are revised.

Economic Capital

Economic capital is an internally developed risk capital model, the purpose of which is to measure the risk in the business and to provide a basis upon which capital is deployed. The economic capital model accounts for the unique and specific nature of the risks inherent in MetLife s businesses. As a part of the economic capital process, a portion of net investment income is credited to the segments based on the level of allocated equity. This is in contrast to the standardized regulatory risk-based capital formula, which is not as refined in its risk calculations with respect to the nuances of the Company s businesses.

Results of Operations

		Three M Endo Septemb	ed oer 3	0,		
	2	2009 200 (In millions)				
Net income (loss) available to MetLife, Inc. s common shareholders Less: Net investment gains (losses), net of income tax Less: Adjustments related to net investment gains (losses), net of income tax Less: Adjustments related to acquisition costs, net of income tax Less: Discontinued operations, net of income tax	\$ ((650) (1,420) 66 (12) (2)	\$	600 483 (61) (430)		
Operating earnings available to MetLife, Inc. s common shareholders	\$	718	\$	608		

Unless otherwise stated, all amounts are net of income tax.

During the three months ended September 30, 2009, MetLife, Inc. s net income (loss) available to common shareholders decreased \$1.3 billion to a loss of \$650 million from income of \$600 million in the comparable 2008 period. The period over period change is predominantly due to an unfavorable change of \$1.8 billion in net investment gains (losses), resulting from a \$1.4 billion net investment loss, net of related adjustments, in the current period compared with a net investment gain of \$422 million, net of related adjustments, in the comparable 2008 period. The change in net investment losses was partially offset by a reduction of \$428 million in loss from discontinued operations and an increase in operating earnings of \$110 million.

The increase in net investment losses of \$1.8 billion, net of related adjustments, was primarily due to higher losses on freestanding and embedded derivatives. The negative change in freestanding derivatives, from gains in the prior period to losses in the current period, was primarily attributable to the effects of improving equity markets on equity options and futures, the weakening of the U.S. Dollar on foreign currency swaps and narrowing credit spreads on credit default swaps. The negative change in embedded derivatives, associated with variable annuity riders, from gains in the prior period to losses in the current period was driven by the impact of the narrowing of MetLife s credit spread. A decrease in fixed maturity and equity securities losses, due principally to lower impairments in the financial services industry sector, as well as lower net losses on sales of securities, was virtually offset by higher losses related to foreign currency-denominated liabilities reflecting the weakening of the U.S. Dollar against several other major currencies and from increases in mortgage valuation allowances resulting from weakening real estate market fundamentals.

Operating earnings increased \$110 million or, 18%, to \$718 million in the current period compared to \$608 million in the year ago period. Operating earnings by segment is as follows:

Operating earnings in the Institutional segment decreased \$85 million, or 21%, to \$311 million for the three months ended September 30, 2009 from \$396 million in the comparable 2008 period. The primary driver of the decrease in operating earnings was lower net investment income, specifically lower variable net investment income, which was the result of lower yields and negative returns realized on real estate funds and real estate joint ventures. Higher pension and post retirement benefit costs also contributed to the period over period decline in operating earnings. This increase in expense was partially offset by cost reductions related to operating earnings for the 2009 period were also reduced by a charge due to the impact of a reinsurance adjustment. A positive impact over the comparable 2008 period was favorable mortality in the retirement & savings business, partially diminished by less favorable mortality in group life products, higher benefit utilization in the dental business and less favorable morbidity in the disability business.

Operating earnings in the Individual segment increased \$22 million, or 10%, to \$237 million for the three months ended September 30, 2009 from \$215 million in the comparable 2008 period. Operating earnings improved over the 2008 period as a result of business growth, favorable mortality in the life products, and the impact of improving financial market conditions. Operating earnings for the 2009 period also benefited from the impact of the positive resolution of certain legal matters. These increases in operating earnings were partially offset by lower earnings as a result of a decline in net investment income, particularly variable net investment income. Lower earnings from the closed block, as well as higher non-deferrable volume-related expenses and higher pension and post retirement benefit costs also decreased operating earnings. These expense increases were partially offset by cost reductions related to operational efficiencies achieved through an enterprise-wide cost reduction and revenue enhancement initiative.

Operating earnings in the International segment increased \$35 million, or 30%, to \$153 million for the three months ended September 30, 2009 from \$118 million in the comparable 2008 period. Excluding the impact of changes in foreign currency exchange rates, which decreased operating earnings by \$22 million relative to the comparable 2008 period, operating earnings increased by \$57 million, or 59%, from the comparable 2008 period. This increase was driven by improving market conditions in Japan, including lower DAC amortization relative to the prior year related to market performance. In addition, International benefited from higher yields resulting from portfolio repositioning in Argentina, a change in tax strategy, a lower effective tax rate, a reduction in headcount and initiative spending, as well as business growth.

Operating earnings in the Auto & Home segment decreased \$15 million, or 15%, to \$86 million for the three months ended September 30, 2009 from \$101 million in the comparable 2008 period. This decrease was primarily due to a decline in premiums reflecting current market conditions. In addition, higher non-catastrophe losses, partially offset by lower catastrophe losses, contributed to the decline in operating earnings. Cost reductions related to operational efficiencies achieved through an enterprise-wide cost reduction and revenue enhancement initiative partially offset the declines in operating earnings.

Operating losses in Corporate & Other decreased \$153 million, or 69%, to \$69 million for the three months ended September 30, 2009 from a loss of \$222 million in the comparable 2008 period. In the 2009 quarter, Corporate & Other s improved results were primarily due to a benefit related to income taxes and the impact of acquisitions by MetLife Bank in late 2008. In addition, decreased legal expenses and cost reductions related to operational efficiencies achieved through an enterprise-wide cost reduction and revenue enhancement initiative were partially offset by lower net investment income.

	Nine M Enc Septem	ded
	2009 (In mi	2008 Ilions)
	(litolis)
Net income (loss) available to MetLife, Inc. s common shareholders	\$ (2,657)	\$ 2,130
Less: Net investment gains (losses), net of income tax	(4,573)	(217)
Less: Adjustments related to net investment gains (losses), net of income tax	331	134
Less: Adjustments related to acquisition costs, net of income tax	(21)	
Less: Discontinued operations, net of income tax	34	(349)
Operating earnings available to MetLife, Inc. s common shareholders	\$ 1,572	\$ 2,562

During the nine months ended September 30, 2009, MetLife, Inc. s net income (loss) available to common shareholders decreased \$4.8 billion to a loss of \$2.7 billion from income of \$2.1 billion in the comparable 2008 period. The period over period change is predominantly due to an increase in net investment losses of \$4.2 billion to a loss of \$4.3 billion, net of related adjustments, in the current period compared with a loss of \$83 million, net of related adjustments, in the current period compared \$990 million and income from discontinued operations of \$34 million increased from a loss of \$349 million.

The increase in net investment losses of \$4.2 billion, net of related adjustments, was primarily due to losses on freestanding derivatives, partially offset by gains on embedded derivatives. The negative change in freestanding derivatives, from gains in the prior period to losses in the current period, was primarily attributable to the effects of rising interest rates on interest rate swaps and floors and the improving equity markets on equity options and futures. The positive change in embedded derivatives, associated with variable annuity riders, was also driven by the positive impact of interest rate and equity market movements, which was more than offset by the narrowing of MetLife s credit spread. Also contributing to the increase in net investment losses were higher losses across most invested asset classes, primarily from higher credit-related losses and impairments due to the current financial market conditions.

Operating earnings decreased \$990 million, or 39%, to \$1.6 billion in the current period compared to \$2.6 billion in the year ago period. Operating earnings by segment are as follows:

Operating earnings available to MetLife, Inc. s										
common shareholders	\$	1,402	\$	849	\$	401	\$	251	\$ (341)	\$ 2,562

Operating earnings in the Institutional segment decreased \$585 million, or 42%, to \$817 million for the nine months ended September 30, 2009 from \$1.4 billion in the comparable 2008 period. The primary driver of the decrease in operating earnings was lower net investment income, specifically lower variable net investment income, which was the result of lower yields and negative returns realized on real estate funds and real estate joint ventures. The decline in operating earnings was partially due to higher non-deferrable volume-related expenses, which is consistent with the organic growth experienced in many of the businesses. Also contributing to the decline in operating earnings were higher benefit utilization in the dental business and less favorable mortality in the group life and retirement & savings businesses.

Operating earnings in the Individual segment decreased \$434 million, or 51%, to \$415 million for the nine months ended September 30, 2009 from \$849 million in the comparable 2008 period. Operating earnings declined from the 2008 period primarily as a result of the impact of the decline in the financial markets and a reduction in earnings from the closed block. Higher non-deferrable volume-related expenses and higher pension and post retirement benefits, partially offset by cost reductions related to operational efficiencies achieved through an enterprise-wide cost reduction and revenue enhancement initiative, also contributed to the decrease in operating earnings. These unfavorable impacts were partially offset by business growth, improved mortality in the life products, and the impact of the positive resolution of certain legal matters.

Operating earnings in the International segment increased \$41 million, or 10%, to \$442 million for the nine months ended September 30, 2009 from \$401 million in the comparable 2008 period. Excluding the impact of changes in foreign currency exchange rates, which decreased operating earnings by \$103 million relative to the comparable 2008 period, operating earnings, on a constant currency basis, increased by \$144 million, or 48%, from the comparable 2008 period. The International segment benefited from business growth, a reassessment of certain potential annuity claims and portfolio repositioning in Argentina, as well as from the refinement in assumptions for DAC amortization on the guaranteed annuity business, a lower effective tax rate, and cost reductions related to operational efficiencies achieved through an enterprise-wide cost reduction and revenue enhancement initiative. These increases were partially offset by the impact of foreign currency transaction gains in the prior year period and lower net investment income in Chile.

Operating earnings in the Auto & Home segment decreased \$13 million, or 5%, to \$238 million for the nine months ended September 30, 2009 from \$251 million in the comparable 2008 period. This decrease was primarily due to a decline in premiums reflecting current market conditions and lower net investment income. Lower catastrophe losses, partially offset by higher non-catastrophe losses partially offset the decrease in operating earnings. Also offsetting the decrease in operating earnings were cost reductions related to operational efficiencies achieved through an enterprise-wide cost reduction and revenue enhancement initiative.

Operating losses in Corporate & Other were relatively unchanged at \$340 million for the nine months ended September 30, 2009 compared to \$341 million in the comparable 2008 period. The acquisitions by MetLife Bank in

late 2008 and a benefit related to income taxes had positive impacts, which were offset by lower net investment income and costs related to an enterprise-wide cost reduction and revenue enhancement initiative.

In July 2009, the Company announced the combination of its institutional and individual businesses, as well as its auto & home unit, into a single U.S. business organization. The Company expects to complete the integration of its operations as a single U.S. business organization and present its business segment information based on the realigned organization in the fourth quarter of 2009.

Institutional

The Company s Institutional segment offers a broad range of group insurance and retirement & savings products and services to corporations and other institutions and their respective employees. Group insurance products and services include group life insurance, non-medical health insurance products and related administrative services, as well as other benefits, such as employer-sponsored auto and homeowners insurance provided through the Auto & Home segment and prepaid legal services plans. The Company s Institutional segment also offers group insurance products as employer-paid benefits or as voluntary benefits where all or a portion of the premiums are paid by the employee. Retirement & savings products and services include an array of annuity and investment products, including defined contribution plans, guaranteed interest products and other stable value products, accumulation and income annuities, and separate account contracts for the investment management of defined benefit and defined contribution plan assets.

The following table presents consolidated financial information for the Institutional segment for the periods indicated:

Three Months Ended September 30, 2009 compared with the Three Months Ended September 30, 2008 Institutional

Income (Loss) from Continuing Operations

Income (loss) from continuing operations decreased by \$516 million to income of \$56 million for the three months ended September 30, 2009 from income of \$572 million for the comparable 2008 period.

Net investment losses increased by \$389 million, net of income tax, to a loss of \$257 million, net of income tax, for the three months ended September 30, 2009 from a gain of \$132 million, net of income tax, for the comparable 2008 period. The increase in net investment losses was due primarily to increased losses on freestanding derivatives, certain foreign currency transactions, mortgage loans, embedded derivatives and real estate joint ventures, partially offset by decreased losses on fixed maturity securities and equity securities. The increase in the losses on freestanding derivatives was primarily driven by losses on purchased protection credit default swaps due to narrowing credit spreads and foreign currency derivatives due to the U.S. Dollar weakening against several major foreign currencies. Other net investment losses increased principally due to net losses on foreign currency-denominated liabilities due to the weakening of the U.S. Dollar against numerous other major currencies. The increase in losses on mortgage loans was principally due to increases in valuation allowances, which resulted from weakening of real estate market fundamentals. The increase in losses on embedded derivatives was primarily due to the impact of changes in the equity and credit markets on certain guaranteed investment contract liabilities with equity or bond indexed crediting rates. The increase in losses on real estate joint ventures was principally due to higher impairments on cost method investments resulting from declines in value driven by capital market factors and from weakening of real estate market fundamentals. The decrease in fixed maturity securities OTTI credit losses and equity securities losses was primarily attributable to a decrease, year over year, in impairments in the financial services industry sector. In third quarter 2008, the stress experienced in the global financial markets, caused several financial institutions to enter bankruptcy, enter Federal Deposit Insurance Corporation (FDIC) receivership or receive significant government capital infusions. The Company incurred significant impairments on its financial services industry fixed maturity and equity securities holdings in third quarter 2008. In addition to the decreased losses on impairments, net gains were realized on sales of fixed maturity securities and equity securities.

The impact of the change in net investment gains (losses) increased policyholder benefits and claims by \$62 million, net of income tax, the majority of which relates to policyholder participation in the performance of the portfolio.

Excluding the impact from net investment gains (losses), income (loss) from continuing operations decreased by \$65 million, net of income tax, compared to the prior period.

A decrease in interest margins of \$43 million, net of income tax, compared to the prior period, contributed to the decrease in income from continuing operations. Management attributed this decrease to a decrease in the retirement & savings business of \$55 million, net of income tax, partially offset by increases in the non-medical health & other and group life businesses of \$10 million and \$2 million, respectively, net of income tax. Interest margin is the difference between interest earned and interest credited to policyholder account balances. Interest earned approximates net investment income on investable assets attributed to the segment with minor adjustments related to the consolidation of certain separate accounts and other minor non-policyholder elements. Interest credited to policyholder account balances for investment-type products, recorded in interest credited to policyholder account balances. Interest credited to policyholder account balances. Interest credited to policyholder account balances for investment-type products, recorded in interest credited to policyholder account balances. Interest credited to a insurance products reflects the current period impact of the interest rate assumptions established at issuance or acquisition. Interest credited to policyholder account balances is subject to contractual terms, including some minimum guarantees. This tends to move in a manner similar to market interest rate movements, and may reflect actions by management to respond to competitive pressures and, therefore, generally does not, but it may, introduce

volatility in expense.

Other expenses contributed to the decrease in income from continuing operations, primarily due to an increase of \$4 million, net of income tax, related to DAC amortization. In addition, higher non-deferrable volume related expenses increased \$3 million, net of income tax. A portion of premiums, fees and other revenues is intended to cover the Company s operating expenses or non-insurance related expenses. As many of those expenses are fixed

135

expenses, management may not be able to reduce those expenses, in a timely manner, proportionate with declining revenues that may result from customer-related bankruptcies, customers reduction of coverage stemming from plan changes, elimination of retiree coverage, or a reduction in covered payroll.

Higher underwriting results of \$5 million, net of income tax, compared to the prior period, partially offset the decrease in income from continuing operations. Management attributed \$18 million, net of income tax, of this increase to the retirement & savings business, partially offset by decreases in the group life and non-medical health & other businesses of \$9 million and \$4 million, both net of income tax, respectively. Underwriting results are generally the difference between the portion of premium and fee income intended to cover mortality, morbidity, or other insurance costs less claims incurred, and the change in insurance-related liabilities. Underwriting results are significantly influenced by mortality, morbidity, or other insurance-related experience trends, as well as the reinsurance activity related to certain blocks of business. During periods of high unemployment, underwriting results, specifically in the disability businesses, tend to decrease as incidence levels trend upwards with unemployment levels and the amount of recoveries decline. In addition, certain insurance-related liabilities can vary as a result of the valuation of the assets supporting those liabilities. As invested assets underperform or lose value, the related insurance liabilities are increased to reflect the Company s obligation with respect to those products, specifically certain LTC products. Consequently, underwriting results can and will fluctuate from period to period.

The remaining increase in revenue was more than offset by the remaining increase in other expenses.

Revenues

Total revenues, excluding net investment gains (losses), decreased by \$559 million, or 9%, to \$5,810 million for the three months ended September 30, 2009 from \$6,369 million for the comparable 2008 period.

Net investment income decreased by \$213 million compared to the comparable 2008 period. Management attributed a \$189 million decrease in net investment income to a decrease in yields, primarily due to lower returns on fixed maturity securities, real estate joint ventures, and mortgage loans, partially offset by higher returns on other limited partnership interests and a decrease in net investment expenses. Management also attributed a decrease of \$24 million to a decrease in average invested assets, calculated on the cost basis without unrealized gains and losses, principally in fixed maturity securities including securities lending. The decrease in fixed maturity securities yields was primarily due to lower yields on floating rate securities due to declines in short-term interest rates and an increased allocation to high quality, lower yielding U.S. Treasury, agency and government guaranteed securities, including FDIC s Temporary Liquidity Guarantee Program (FDIC Program) bonds, and from decreased securities lending results due to the smaller size of the program, offset slightly by improved spreads. The reduction in yields and the negative returns in the third guarter of 2009 realized on real estate joint ventures was primarily from declining property valuations on certain investment funds that carry their real estate at estimated fair value and operating losses incurred on properties that were developed for sale by development joint ventures. The commercial properties underlying these investment funds have experienced declines in estimated fair value driven by capital market factors and deteriorating market conditions, which have led to declining property valuations, while the development joint ventures have experienced fewer property sales resulting from declining real estate market fundamentals and decreased availability of lending to finance these types of transactions. The decrease in yields associated with our mortgage loan portfolio was primarily attributable to lower prepayments on commercial mortgage loans and lower yields on variable rate loans due to declines in short-term interest rates. The increase in yields and the positive returns realized on other limited partnership interests were primarily due to higher valuations resulting from the recovery in the credit and equity markets. The increase in yields from the decrease in investment expenses was primarily attributable to lower cost of funds expense on the securities lending program and this decreased cost partially offsets the decrease in net investment income on fixed maturity securities. The decrease in net investment income was attributable to a \$24 million decrease in average invested assets calculated on the cost basis, primarily within fixed maturity securities

including securities lending. The decrease in fixed maturity securities was primarily due to the smaller size of the securities lending program and reinvestment into shorter-term investments within the securities lending program. Excluding securities lending, fixed maturity securities decreased slightly.

In addition, premiums, fees and other revenues decreased \$346 million, which was primarily due to a decrease in the retirement & savings business of \$438 million, partially offset by increases in the non-medical health & other and group life businesses of \$48 million and \$44 million, respectively.

The decline in the retirement & savings business of \$438 million was primarily due to decreases in the group institutional annuity, global GIC, small business record keeping and income annuity businesses of \$464 million, \$42 million, \$38 million and \$6 million, respectively. The decreases in the group institutional annuity and the income annuity business were primarily due to lower sales in the current period. The decline in the global GIC business was primarily due to the impact of fees earned on the surrender of a GIC contract in the prior period. Lastly, the decrease in the small business record keeping business was primarily due to the refinement of a reinsurance recoverable in the current period. Partially offsetting these decreases was the impact of higher sales, in the current period, in the structured settlement business of \$107 million. The remaining increase in the retirement & savings business was attributed to higher premiums, fees and other revenues across several products. Premiums, fees and other revenues from retirement & savings products are significantly influenced by large transactions and the demand for certain of these products can decline during periods of volatile credit and investment markets and, as a result, can fluctuate from period to period.

The growth in the non-medical health & other business of \$48 million was largely due to increases in the dental, LTC and individual disability businesses of \$58 million, \$8 million and \$6 million, respectively, primarily attributable to continued growth. Partially offsetting these increases were declines in the disability and AD&D businesses of \$14 million and \$10 million, respectively. The decrease in disability was primarily attributable to the impact of case terminations and lower covered lives in the current period, partially offset by a gain on the recapture of a reinsurance arrangement, also in the current period. The decrease in AD&D was primarily attributable to higher experience rated refunds in the current period.

The increase in the group life business of \$44 million was primarily due to a \$71 million increase in term life, which was largely attributable to an increase in net reinsurance activity. In addition, the impact of lower experience rated refunds in the current period also contributed to this increase. Partially offsetting this increase was a decrease of \$17 million in the COLI business, largely attributable to lower fees, primarily due to lower assets under management in the current period. In addition, a decrease of \$10 million in the universal life business was primarily due to higher experience rated refunds in the current period. Premiums, fees and other revenues from group life business can and will fluctuate based, in part, on the covered payroll of customers. In periods of high unemployment, revenue may be impacted. Revenue may also be impacted as a result of customer-related bankruptcies, customers reduction of coverage stemming from plan changes or elimination of retiree coverage.

Expenses

Total expenses decreased by \$366 million, or 6%, to \$5,339 million for the three months ended September 30, 2009 from \$5,705 million for the comparable 2008 period. The decrease in expenses was primarily attributable to lower interest credited to policyholder account balances and a decrease in policyholder benefits and claims of \$190 million and \$186 million, respectively, partially offset by higher other expenses of \$10 million.

The decrease in policyholder benefits and claims of \$186 million included a \$96 million increase related to net investment gains (losses). Excluding the increase related to net investment gains (losses), policyholder benefits and claims decreased by \$282 million.

Retirement & savings policyholder benefits and claims decreased \$405 million, which was primarily attributable to decreases in group institutional annuity and income annuity businesses of \$531 million and \$2 million, respectively. The decrease in the group institutional annuity business was primarily due to the aforementioned decrease in

premiums, fees and other revenues, the impact of a charge in the prior period due to liability adjustments of \$49 million, and favorable mortality in the current period, partially offset by an increase in interest credited on future policyholder benefits, which is consistent with the expectations of an aging block of business. The decrease in the income annuity business was primarily due to the aforementioned decrease in premium, partially offset by unfavorable mortality in the current period. Partially offsetting these decreases was an increase in the structured settlement business of \$128 million, which was primarily due to the aforementioned

increase in premiums, an increase in interest credited on future policyholder benefits in addition to unfavorable mortality in the current period.

Group life s policyholder benefits and claims increased \$63 million, mostly due to an increase in the term life business of \$82 million, which was primarily due to the aforementioned increase in premiums, fees and other revenues and less favorable mortality in the current period. These increases were partially offset by a decrease in interest credited on future policyholder benefits, primarily due to lower crediting rates. Partially offsetting the increase in the term life business was a decrease in the universal life business of \$20 million, which was primarily due to favorable claims experience in both non-participating and participating policies, in the current period. The decrease in the COLI business of \$2 million was primarily attributable to favorable mortality in the current period.

Non-medical health & other s policyholder benefits and claims increased \$60 million, which was primarily attributable to an increase in the dental, individual disability and LTC businesses. The increase in dental of \$65 million was largely due to the aforementioned increase in premium and the impact of less favorable morbidity in the current period, primarily due to higher benefit utilization, which management attributes to current labor market conditions. The increase in the individual disability business of \$10 million was primarily due to the aforementioned increase in premiums, fees and other revenues and the impact of less favorable morbidity in the current period. The increase in the LTC business of \$7 million was primarily attributable to the aforementioned increase in premium and an increase in interest credited on future policyholder benefits, partially offset by the impact of a separate account reserve strengthening in the prior period. Partially offsetting these increases was a decrease in the disability business of \$16 million, primarily due to the aforementioned decrease in premiums, fees, and other revenues. A decrease in the AD&D business of \$5 million was primarily due to favorable claims experience on participating policies, partially offset by less favorable claim experience on non-participating policies, both in the current period.

Management attributed the decrease of \$190 million in interest credited to policyholder account balances to a \$138 million decrease resulting from a decline in average crediting rates, which was largely due to the impact of lower short-term interest rates in the current period, and a \$52 million decrease primarily due to the decrease in average policyholder account balances, primarily in the global GIC and funding agreement businesses. Management considers the reduced volume of funding agreement issuances in the current period to be a direct result of the conditions in credit markets.

Higher other expenses of \$10 million include an increase in DAC amortization of \$6 million primarily due to refinements in amortization methodology. Non-deferrable volume related expenses increased \$4 million. This increase was primarily attributable to higher pension and post-retirement benefit expense, partially offset by a reduction in certain expenses, which management attributes to the Company s enterprise-wide cost reduction and revenue enhancement initiative. Non-deferrable volume related expenses include those expenses associated with information technology, and direct departmental spending. Direct departmental spending includes expenses associated with advertising, consultants, travel, printing and postage.

Nine months Ended September 30, 2009 compared with the Nine months Ended September 30, 2008 Institutional

Income (Loss) from Continuing Operations

Income (loss) from continuing operations decreased by \$2,657 million to a loss of \$1,452 million for the nine months ended September 30, 2009 from income of \$1,205 million for the comparable 2008 period.

Net investment losses increased by \$2,003 million, net of income tax, to a loss of \$2,283 million, net of income tax, for the nine months ended September 30, 2009 from a loss of \$280 million, net of income tax, for the comparable 2008 period. The increase in net investment losses was primarily due to increased losses on freestanding derivatives,

fixed maturity securities, mortgage loans, other limited partnership interests, certain foreign currency transactions, equity securities, embedded derivatives and real estate joint ventures. The increase in the losses on freestanding derivatives, from gains in the prior year to losses in the current year, was primarily driven by losses on interest rate swaps and swaptions due to mid- and long-term interest rates increasing in the current period, losses on purchased protection credit default swaps due to narrowing credit spreads and losses on foreign

currency derivatives due to the U.S. Dollar weakening against several major foreign currencies. The increase in fixed maturity and equity securities losses was primarily attributable to an increase in impairments across several industries due to increased financial restructurings, bankruptcy filings, ratings downgrades or difficult underlying operating environments of the issuer, including impairments on perpetual hybrid securities as a result of deterioration of the credit rating of the issuer to below investment grade and due to a severe and extended unrealized loss position. The increased fixed maturity security OTTI credit losses were partially offset by decreased losses on sales of fixed maturity securities. The increase in losses on mortgage loans was principally due to increases in valuation allowances which resulted from weakening of real estate market fundamentals. The increase in losses on other limited partnership interests, and real estate joint ventures was principally due to higher impairments on cost method investments resulting from deterioration in value due to volatility in real estate, equity and credit markets and from weakening of real estate market fundamentals. These investments experienced a reduction in net asset values as a result of revaluation of the underlying portfolio companies. The underlying valuations of the portfolio companies have decreased due to the current economic environment. An increase in other net investment losses was principally attributable to net losses on foreign currency denominated liabilities due to the weakening of the U.S. Dollar against several other major currencies. The increase in losses on embedded derivatives was primarily due to the impact of changes in the equity and credit markets on certain guaranteed investment contract liabilities with equity or bond indexed crediting rates.

The impact of the change in net investment gains (losses) increased policyholder benefits and claims by \$109 million, net of income tax, the majority of which relates to policyholder participation in the performance of the portfolio.

Excluding the impact from net investment gains (losses), income (loss) from continuing operations decreased by \$545 million, net of income tax, compared to the prior period.

A decrease in interest margins of \$486 million, net of income tax, compared to the prior period, contributed to the decrease in income from continuing operations. Management attributed this decrease to the retirement & savings, non-medical health & other and group life businesses, which contributed \$379 million, \$54 million and \$53 million, net of income tax, respectively. Interest margin is the difference between interest earned and interest credited to policyholder account balances. Interest earned approximates net investment income on investable assets attributed to the segment with minor adjustments related to the consolidation of certain separate accounts and other minor non-policyholder elements. Interest credited to policyholder account balances for investment-type products, recorded in policyholder benefits and claims, and the amount credited to policyholder account balances for investment-type products, recorded in interest credited to policyholder account balances. Interest credited on insurance products reflects the current period impact of the interest rate assumptions established at issuance or acquisition. Interest credited to policyholder account balances is subject to contractual terms, including some minimum guarantees. This tends to move in a manner similar to market interest rate movements, and may reflect actions by management to respond to competitive pressures and, therefore, generally does not, but it may, introduce volatility in expense.

Other expenses contributed to the decrease in income from continuing operations, primarily due to an increase of \$39 million, net of income tax, from higher non-deferrable volume related expenses. In addition, higher expenses of \$10 million, net of income tax, related to DAC amortization contributed to the decrease in income from continuing operations. A portion of premiums, fees and other revenues is intended to cover the Company s operating expenses or non-insurance related expenses. As many of those expenses are fixed expenses, management may not be able to reduce those expenses, in a timely manner, proportionate with declining revenues that may result from customer-related bankruptcies, customers reduction of coverage stemming from plan changes, elimination of retiree coverage, or a reduction in covered payroll.

Also contributing to the decrease in income from continuing operations were lower underwriting results of \$5 million, net of income tax, compared to the prior period. Management attributed this decrease to the non-medical health &

other and group life businesses of \$28 million and \$24 million, both net of income tax, respectively, partially offset by an increase in the retirement & savings business of \$47 million, net of income tax. Underwriting results are generally the difference between the portion of premium and fee income intended to cover mortality, morbidity, or other insurance costs less claims incurred, and the change in insurance-related liabilities. Underwriting results are significantly influenced by mortality, morbidity, or other insurance-related experience

trends, as well as the reinsurance activity related to certain blocks of business. During periods of high unemployment, underwriting results, specifically in the disability businesses, tend to decrease as incidence levels trend upwards with unemployment levels and the amount of recoveries decline. In addition, certain insurance-related liabilities can vary as a result of the valuation of the assets supporting those liabilities. As invested assets underperform or lose value, the related insurance liabilities are increased to reflect the Company s obligation with respect to those products, specifically certain LTC products. Consequently, underwriting results can and will fluctuate from period to period.

The remaining increase in revenue was more than offset by the remaining increase in other expenses.

Revenues

Total revenues, excluding net investment gains (losses), decreased by \$1,261 million, or 7%, to \$17,072 million for the nine months ended September 30, 2009 from \$18,333 million for the comparable 2008 period.

Net investment income decreased by \$1,165 million compared to the comparable 2008 period. Management attributed a \$1,009 million decrease in net investment income to a decrease in yields, primarily due to lower returns on real estate joint ventures, fixed maturity securities, other limited partnership interests, mortgage loans, and cash, cash equivalents and short-term investments, partially offset by a decrease in net investment expenses. Management also attributed a decrease of \$156 million to a decrease in average invested assets, calculated on the cost basis without unrealized gains and losses, principally in fixed maturity securities including securities lending, partially offset by increases in cash, cash equivalents and short-term investments and mortgage loans. The decrease in yields and the negative returns in the first nine months of 2009 realized on real estate joint ventures were primarily from declining property valuations on certain investment funds that carry their real estate at estimated fair value and operating losses incurred on properties that were developed for sale by development joint ventures. The commercial properties underlying these investment funds have experienced declines in estimated fair value driven by capital market factors and deteriorating market conditions, which have led to declining property valuations, while the development joint ventures have experienced fewer property sales due to declining real estate market fundamentals and decreased availability of lending to finance these types of transactions. The decrease in fixed maturity securities yields resulted primarily from lower yields on floating rate securities due to declines in short-term interest rates and an increased allocation to high quality, lower yielding U.S. Treasury, agency and government guaranteed securities, including FDIC Program bonds, and from decreased securities lending results due to the smaller size of the program, offset slightly by improved spreads. The increase in yields from the decrease in investment expenses was primarily attributable to lower cost of funds expense on the securities lending program and this decreased cost partially offsets the decrease in net investment income on fixed maturity securities. The reduction in yields and the negative returns realized on other limited partnership interests was primarily due to lower valuations resulting from significant weakness in the credit and equity markets in the first two guarters of 2009. These returns were partially offset by higher valuations due to improvement in these markets in the third quarter of 2009. The decrease in yields associated with our mortgage loan portfolio was primarily attributable to lower prepayments on commercial mortgage loans and lower yields on variable rate loans due to declines in short-term interest rates. The decrease in cash, cash equivalent and short-term investment yields was primarily attributable to declines in short-term interest rates. The decrease in net investment income was attributable to a \$156 million decrease in average invested assets calculated on the cost basis, primarily within fixed maturity securities including securities lending, partially offset by increases in cash, cash equivalents and short-term investments and mortgage loans. The decrease in fixed maturity securities was primarily due to the smaller size of the securities lending program and reinvestment into shorter-term investments within the securities lending program. Excluding securities lending, fixed maturity securities and cash, cash equivalents and short-term securities decreased. The increases in mortgage loans are driven by the reinvestment of operating cash flows in accordance with our investment portfolio allocation guidelines.

The decrease of \$96 million in premiums, fees and other revenues was largely due to a decrease in the retirement & savings business of \$471 million, partially offset by increases in the group life and non-medical health & other businesses of \$214 million and \$161 million, respectively.

The decrease in the retirement & savings business of \$471 million was primarily due to decreases in premiums in the group institutional annuity, income annuity, small market recordkeeping and the global GIC businesses of \$550 million, \$64 million, \$44 million and \$42 million, respectively. The decreases in the group institutional annuity and income annuity businesses were due to lower sales in the current period. The decrease in the global GIC business was primarily due to the impact of fees earned on the surrender of a GIC contract in the prior period. The decrease in the small market recordkeeping business was primarily due to the refinement of a reinsurance receivable as well as lower fees earned in the current period. Partially offsetting these decreases was the impact of higher sales, in the current period, in the structured settlement business of \$226 million. The remaining increase in the retirement & savings business was attributed to higher premiums, fees and other revenues from retirement & savings products are significantly influenced by large transactions and the demand for certain of these products can decline during periods of volatile credit and investment markets and, as a result, can fluctuate from period to period.

The increase in group life business of \$214 million was primarily due to a \$258 million increase in term life, which was largely attributable to an increase in net reinsurance activity and the impact of lower experience rated refunds in the current period. Partially offsetting this increase was a decrease in the COLI business of \$26 million, which was largely attributable to lower net fees, primarily driven by lower assets under management. In addition, the universal life business decreased \$14 million, primarily due to higher experience rated refunds in the current period. Premiums, fees and other revenues from group life business can and will fluctuate based, in part, on the covered payroll of customers. In periods of high unemployment, revenue may be impacted. Revenue may also be impacted as a result of customer-related bankruptcies, customers reduction of coverage stemming from plan changes or elimination of retiree coverage.

The growth in the non-medical health & other business of \$161 million was largely due to increases in the dental, LTC and individual disability businesses. An increase in the dental business of \$201 million was primarily due to organic growth and the incremental impact of an acquisition that closed in the prior period. The increases in the LTC and individual disability businesses of \$35 million and \$9 million, respectively, were primarily due to growth in the business. Partially offsetting these increases was a decline in the disability business of \$75 million, which was primarily attributable to higher case terminations, a decrease in covered lives in the current period, and higher reserve buyout activity in the prior period, partially offset by a gain on the recapture of a reinsurance arrangement, in the current period. In addition, a decrease in the AD&D business of \$12 million was primarily due to higher experience rated refunds in the current period. The remaining increase in the non-medical health & other business was attributed to business growth across several products.

Expenses

Total expenses decreased by \$275 million, or 2%, to \$15,818 million for the nine months ended September 30, 2009 from \$16,093 million for the comparable 2008 period. The decrease in expenses was primarily attributable to lower interest credited to policyholder account balances of \$516 million, partially offset by an increase in policyholder benefits and claims of \$167 million and higher other expenses of \$74 million.

The increase in policyholder benefits and claims of \$167 million included a \$168 million increase related to net investment gains (losses). Excluding the increase related to net investment gains (losses), policyholder benefits and claims decreased by \$1 million.

Retirement & savings policyholder benefits decreased \$436 million, which was primarily attributable to the group institutional annuity and income annuity businesses of \$639 million and \$53 million, respectively. The decrease in the group institutional annuity business was primarily due to the aforementioned decrease in premiums, fees and other revenues and the net favorable impact of liability refinements in both periods. There were unfavorable liability

refinements of \$107 million in the prior period and favorable liability refinements of \$28 million in the current period. Partially offsetting these decreases was the impact of less favorable mortality in the current period and an increase in interest credited on future policyholder benefits, which is consistent with the expectations of an aging block of business. The decrease in the income annuity business was primarily due to the aforementioned decrease in premium, partially offset by unfavorable mortality and an increase in interest credited to future policyholder benefits. Partially offsetting these decreases was an increase in the

structured settlement business of \$256 million, largely due to the aforementioned increase in premiums, an increase in interest credited on future policyholder benefits and the impact of unfavorable mortality in the current period. These increases were partially offset by a favorable liability refinement in the current period of \$8 million.

Non-medical health & other s policyholder benefits and claims increased \$219 million, which was primarily attributable to an increase in the dental, LTC and individual disability businesses. An increase in dental of \$242 million was largely due to the aforementioned increase in premium and the impact of unfavorable morbidity, primarily due to higher benefit utilization, which management attributes to current labor market conditions. The increase in the LTC business of \$50 million was primarily attributable to the aforementioned increase in premiums, fees and other revenues, an increase in interest credited on future policyholder benefits and the impact of an unfavorable liability refinement in the current period. The increase in the individual disability business of \$7 million was primarily due to the aforementioned increase in premiums, fees and other revenues, partially offset by an increase in interest credited on future policyholder benefits. In addition, a decrease in the AD&D business of \$25 million was primarily due to favorable claims experience in both non-participating and participating policies in the current period.

Group life s policyholder benefits and claims increased \$216 million, mostly due to an increase in the term life business of \$244 million, which was primarily due to the aforementioned increase in premiums, fees and other revenues and less favorable mortality in the current period, partially offset by a decrease in interest credited on future policyholder benefits, primarily due to lower crediting rates. Partially offsetting this increase was a decrease in the universal life business of \$22 million, primarily attributable to favorable claims experience in both non-participating and participating policies, coupled with lower interest credited on future policyholder balances in the current period. In addition, a decrease in the COLI business of \$8 million was primarily due to the aforementioned decrease in premiums, fees and other revenues.

Management attributed the decrease of \$516 million in interest credited to policyholder account balances to a \$540 million decrease resulting from a decline in average crediting rates, which was largely due to the impact of lower short-term interest rates in the current period, partially offset by a \$24 million increase, solely from growth in the average policyholder account balances, primarily the result of continued growth in the FHLB advances, partially offset by a decline in funding agreements. Management considers the reduced volume of funding agreement issuances in the current period to be a direct result of conditions in the credit markets.

Higher other expenses of \$74 million include an increase in DAC amortization of \$14 million. Non-deferrable volume related expenses increased \$60 million. This increase was primarily attributable to higher pension and post-retirement benefit expense, partially offset by a reduction in certain expenses, which management attributes to the Company s enterprise-wide cost reduction and revenue enhancement initiative. Non-deferrable volume related expenses include those expenses associated with information technology, and direct departmental spending. Direct departmental spending includes expenses associated with advertising, consultants, travel, printing and postage.

Individual

The Company s Individual segment offers a wide variety of protection and asset accumulation products aimed at serving the financial needs of its customers throughout their entire life cycle. Products offered by Individual include insurance products, such as traditional, variable and universal life insurance, and variable and fixed annuities. In addition, Individual sales representatives distribute disability insurance and LTC insurance products offered through the Institutional segment, investment products such as mutual funds, as well as other products offered by the Company s other businesses.

The following table presents consolidated financial information for the Individual segment for the periods indicated:

	En	ıber 30, 2008	Nine Months Ended September 30, 2009 2008 millions)

Income (Loss) from Continuing Operations

Income (loss) from continuing operations decreased by \$570 million to a loss of \$174 million for the three months ended September 30, 2009 from income of \$396 million for the comparable 2008 period.

Included in this decrease in income (loss) from continuing operations was an increase in net investment losses of \$729 million, net of income tax. The increase in net investment losses was due primarily to increased losses on freestanding derivatives, mortgage loans, embedded derivatives, equity securities, and real estate joint ventures, partially offset by decreased losses on fixed maturity securities, and certain foreign currency transactions. The increase in losses on freestanding derivatives, from gains in the prior year to losses in the current year, was primarily attributable to losses on equity derivatives (used to hedge embedded derivative risk) due to improving equity

markets in the current period, foreign currency derivatives due to the U.S. Dollar weakening against several major foreign currencies and losses on purchased protection credit default swaps due to narrowing credit spreads. Increase in losses on embedded derivatives, from gains in the prior year to losses in the current year, were principally associated with variable annuity riders, with losses on unhedged risks being partially offset by gains on hedged risks. As it relates to unhedged risks associated with variable annuity embedded derivatives, there was a year over year increase in losses, from gains in the prior year period to losses in the current year. The losses associated with unhedged risks were driven by the narrowing of MetLife s credit spread in the current period. As it relates to hedged risks associated with variable annuity riders, the year over year increase in gains, from a loss in the prior year to gains in the current year, was due to the positive impact of equity market movements. Hedged risks associated with variable annuity riders include interest rate risk and equity market risk. The increase in losses on mortgage loans was principally due to increases in valuation allowances, which resulted from weakening of the real estate market and other economic fundamentals. The increase in equity securities losses was attributable to a decrease, year over year, in gains on sales of securities, and also included impairments on perpetual hybrid securities as a result of deterioration of the credit rating of the issuer to below investment grade and due to a severe and extended unrealized loss position. The increase in losses on real estate joint ventures was principally due to higher impairments on cost method investments resulting from declines in value driven by capital market factors and from the weakening of real estate market fundamentals. The decrease in fixed maturity securities OTTI credit losses was attributable to a decrease, year over year, in impairments principally in the financial services industry sector. In third quarter 2008, the stress experienced in the global financial markets, caused several financial institutions to enter bankruptcy, enter FDIC receivership or receive significant government capital infusions. The Company incurred significant impairments on its financial services industry fixed maturity securities holdings in third quarter 2008. A decrease in other net investment losses was principally attributable to decreased net losses on foreign currency denominated assets due to the weakening of the U.S. Dollar against several other major currencies.

Excluding the impact of net investment gains (losses), income (loss) from continuing operations increased by \$159 million, net of income tax, from the comparable 2008 period and was driven by the following items:

Lower DAC amortization of \$352 million, net of income tax, primarily due to separate account balance increases from market improvement, which increase expected future gross profits, as well as current period net derivative losses.

Favorable underwriting results in life products of \$23 million, net of income tax. Underwriting results are generally the difference between the portion of premium and fee income intended to cover mortality, morbidity or other insurance costs less claims incurred and the change in insurance-related liabilities. Underwriting results are significantly influenced by mortality, morbidity, or other insurance-related experience trends, as well as the reinsurance activity related to certain blocks of business. Consequently, results can fluctuate from period to period.

A decrease in policyholder dividends of \$6 million, net of income tax, primarily due to updates of actuarial assumptions used in the calculation of the terminal dividend liability for certain life products.

These aforementioned increases in income (loss) from continuing operations were partially offset by the following items:

Higher annuity benefits of \$152 million, net of income tax, primarily due to current period hedge losses and higher guaranteed annuity benefit costs, partially offset by lower amortization of sales inducements.

Higher expenses of \$39 million, net of income tax, include higher non-deferrable volume related expenses, including those expenses associated with information technology and direct departmental spending, as well as

higher pension and post-retirement benefit expenses. This increase is partially offset by a reduction in certain expenses, which management attributes to the Company s enterprise-wide cost reduction and revenue enhancement initiative.

Lower universal life and investment-type product policy fees combined with other revenues of \$15 million, net of income tax, primarily resulting from lower average separate account balances due to recent unfavorable equity market performance.

Lower net investment income on blocks of business not driven by interest margins of \$15 million, net of income tax.

An increase in interest credited to policyholder account balances of \$2 million, net of income tax, due primarily to lower amortization of the excess interest reserves on acquired annuity and universal life blocks of business.

A decrease in interest margins of \$1 million, net of income tax. Interest margins relate primarily to the general account portion of investment-type products. Management attributed \$11 million of the decrease to other investment-type products, and a \$10 million increase to the deferred annuity business, both net of income tax. Interest margin is the difference between interest earned and interest credited to policyholder account balances related to the general account on these businesses. Interest earned approximates net investment income on invested assets attributed to these businesses with net adjustments for other non- policyholder elements. Interest credited to policyholder account balances. Interest credited to policyholder account balances is subject to contractual terms, including some minimum guarantees, and may reflect actions by management to respond to competitive pressures. Interest credited to policyholder account balances to move in a manner similar to market interest rate movements, subject to any minimum guarantees and, therefore, generally does not, but may introduce volatility in expense.

The change in effective tax rates between periods accounts for the remainder of the increase in income (loss) from continuing operations.

Revenues

Total revenues, excluding net investment gains (losses), increased by \$197 million, or 5%, to \$3,926 million for the three months ended September 30, 2009 from \$3,729 million for the comparable 2008 period.

Premiums increased by \$101 million primarily due to an increase in immediate annuity premiums of \$82 million, and growth in premiums of \$36 million driven by increased renewals of traditional life business. These increases were partially offset by a \$17 million decline in premiums associated with the run-off of the Company s closed block of business.

Other revenues, including universal life and investment-type product policy fees, were essentially flat compared to the third quarter of 2008 as decreases in asset-based fees were offset by business growth and a positive resolution of certain legal matters. Policy fees from variable life and annuity and investment-type products are typically calculated as a percentage of the average assets in policyholder accounts. The value of these assets can fluctuate depending on equity performance.

Net investment income increased by \$100 million. Management attributes an increase of \$120 million of net investment income to the general account portion of investment-type products and a decrease of \$20 million to other businesses. Management attributes \$95 million of the increase to a higher average asset base and \$5 million of the increase to improved yields. The \$95 million increase in net investment income was from an increase in average asset base, primarily in fixed maturity securities and cash, cash equivalents and short-term investments. The increased average asset base in fixed maturity securities was driven by the reinvestment of operating cash flows and accumulated liquidity into longer duration investments and was partially offset by decreased participation in the securities lending program. The increased average asset base in cash, cash equivalents and short-term investments was driven by operating cash inflows due to increased business in the Individual segment. Average invested assets are calculated on the cost basis without unrealized gains and losses. The \$5 million increase in net investment income million due to higher yields was attributable to lower investment expenses and higher returns on other limited

partnership interests, partially offset by decreases in fixed maturity securities and real estate joint ventures. The decrease in investment expenses was primarily attributable to lower cost of funds expense on the securities lending program and this decreased cost partially offset the decrease in net investment income on fixed maturity securities. The increase in yields and positive returns on other limited partnership interests was primarily due to higher valuations resulting from the recovery in the credit and equity markets. These increases in yields were partially offset by a decrease in fixed maturity securities yields resulting primarily from lower yields on floating rate

securities due to declines in short-term interest rates and an increased allocation to high quality, lower yielding U.S. Treasury, agency and government guaranteed securities, including FDIC Program bonds, and from decreased securities lending results due to the smaller size of the program, offset slightly by improved spreads. The decrease in yields and the negative returns in the third quarter of 2009 realized on real estate joint ventures was primarily from declining property valuations on certain investment funds that carry their real estate at estimated fair value and operating losses incurred on properties that were developed for sale by development joint ventures. The commercial real estate properties underlying these investment funds have experienced declines in estimated fair value driven by capital market factors and deteriorating market conditions, which have led to declining property valuations, while the development joint ventures have experienced fewer property sales due to declining real estate market fundamentals and decreased availability of lending to finance these types of transactions.

Expenses

Total expenses decreased by \$45 million, or 1%, to \$3,444 million for the three months ended September 30, 2009 from \$3,489 million for the comparable 2008 period.

Policyholder benefits and claims increased by \$318 million. Recent equity market improvements contributed to an increase of \$259 million primarily from current period hedge losses and higher guaranteed annuity benefit costs, partially offset by \$26 million of lower amortization of sales inducements. Revisions to policyholder benefits and claims in the current period increased policyholder benefits and claims by \$10 million. Favorable mortality decreased policyholder benefits and claims by \$26 million. Additionally, policyholder benefits and claims increased by \$101 million commensurate with the change in premiums discussed above.

Interest credited to policyholder account balances increased by \$127 million. Interest credited on the general account portion of investment-type products increased by \$116 million, of which \$97 million is attributed to higher average general account balances, and \$19 million to higher crediting rates. Interest credited on other businesses increased by \$8 million. Lower amortization of the excess interest reserves on acquired annuity and universal life blocks of business, primarily driven by lower lapses in the current period, increased interest credited to policyholder account balances by \$3 million.

Policyholder dividends decreased by \$9 million primarily due to updates of actuarial assumptions used in the calculation of the terminal dividend liability for certain life products.

Lower other expenses of \$481 million include lower DAC amortization of \$541 million primarily due to separate account balance increases from market improvement, which increase expected future gross profits, as well as current period net derivative losses. In addition, expenses increased \$60 million due to an increase in non-deferrable volume related expenses, which include those expenses associated with information technology and direct departmental spending, as well as higher pension and post retirement benefit expenses. This increase is partially offset by a reduction in certain expenses, which management attributes to the Company s enterprise-wide cost reduction and revenue enhancement initiative.

Nine Months Ended September 30, 2009 compared with the Nine Months Ended September 30, 2008 Individual

Income (Loss) from Continuing Operations

Income (loss) from continuing operations decreased by \$1,598 million to a loss of \$727 million for the nine months ended September 30, 2009 from income of \$871 million for the comparable 2008 period.

Included in this decrease in income (loss) from continuing operations was an increase in net investment losses of \$1,418 million, net of income tax. The increase in net investment losses was due primarily to increased losses on freestanding derivatives, mortgage loans, equity securities, real estate joint ventures and other limited partnership interests, which were partially offset by decreased losses on embedded derivatives, fixed maturity securities and foreign currency transactions. The increase in the losses on freestanding derivatives, from gains in the prior year to losses in the current year, was primarily driven by losses on equity derivatives (used to hedge embedded derivative risk) due to improving equity markets in the current period, interest rate floors due to mid- and long-term interest rates increasing in the current period, losses on foreign currency derivatives due to the U.S. Dollar weakening

against several major foreign currencies and losses on purchased protection credit default swaps due to narrowing credit spreads. The freestanding derivative losses were partially offset by gains on embedded derivatives principally associated with variable annuity riders. The positive change in embedded derivatives was driven by gains on embedded derivatives in the current year as compared with losses in the prior year period, with gains on hedged risks partially offset by losses on unhedged risks. As it relates to hedged risks associated with variable annuity riders, the year over year increase in gains, from losses in the prior year to gains in the current year, was due to the positive impact of interest rate and equity market movements. Hedged risks associated with variable annuity riders include interest rate risk and equity market risk. As it relates to unhedged risks associated with variable annuity embedded derivatives, there was a year over year increase in losses, from gains in the prior year to losses in the current year. The losses associated with unhedged risks were driven by the narrowing of MetLife s credit spread in the current period. The increase in losses on mortgage loans was principally due to increases in the valuation allowances, which resulted from weakening of real estate market fundamentals. The increase in equity securities losses was attributable to an increase, year over year, in impairments principally in the financial services industry sector including impairments on perpetual hybrid securities as a result of deterioration of the credit rating of the issuer to below investment grade and due to a severe and extended unrealized loss position. These increased equity security impairments were partially offset by net gains on sales of equity securities. The increase in losses on real estate joint ventures and other limited partnership interests was principally due to higher impairments on cost method investments resulting from deterioration in value due to volatility in real estate, equity and credit markets and from weakening of real estate market fundamentals. These investments experienced a reduction in net asset values due to the revaluation of the underlying portfolio companies. The underlying valuations of the portfolio companies have decreased due to the current economic environment. The increased losses in freestanding derivatives, mortgage loans, equity securities, real estate joint ventures and other limited partnerships were partially offset by decreased losses on embedded derivatives, fixed maturity securities, and foreign currency transactions. The decrease in fixed maturity securities OTTI credit losses was attributable to a decrease, year over year, in impairments principally in the financial services industry sector. Decreased losses on foreign currency transactions were principally attributable to the effect of gains on foreign currency denominated assets, due to the U.S. Dollar weakening, primarily against the Canadian Dollar.

Excluding the impact of net investment gains (losses), income (loss) from continuing operations decreased by \$180 million, net of income tax, from the comparable 2008 period and was driven by the following items:

Higher annuity benefits of \$317 million, net of income tax, primarily due to current period hedge losses and higher guaranteed annuity benefit costs, partially offset by lower amortization of sales inducements.

Lower universal life and investment-type product policy fees combined with other revenues of \$240 million, net of income tax, primarily resulting from lower average separate account balances due to lower equity market levels compared to the first nine months of 2008.

A decrease in interest margins of \$147 million, net of income tax. Interest margins relate primarily to the general account portion of investment-type products. Management attributed \$86 million of this decrease to the deferred annuity business and \$61 million of the decrease to other investment-type products, both net of income tax. Interest margin is the difference between interest earned and interest credited to policyholder account balances related to the general account on these businesses. Interest earned approximates net investment income on invested assets attributed to these businesses with net adjustments for other non-policyholder elements. Interest credited approximates the amount recorded in interest credited to policyholder to policyholder account balances. Interest credited to policyholder account balances is subject to contractual terms, including some minimum guarantees, and may reflect actions by management to respond to competitive pressures. Interest credited to policyholder account balances tends to move in a manner similar to market interest rate movements, subject to any minimum guarantees and, therefore, generally does not, but may introduce volatility in expense.

Lower net investment income on blocks of business not driven by interest margins of \$94 million, net of income tax.

Higher expenses of \$50 million, net of income tax, include higher pension and post-retirement benefits and commission expenses offset by higher DAC capitalization primarily from increases in annuity deposits and a

reduction in certain expenses, which management attributes to the Company s enterprise-wide cost reduction and revenue enhancement initiative. In addition, non-deferrable volume related expense, which include those expenses associated with information technology and direct departmental spending have also increased.

An increase in interest credited to policyholder account balances of \$11 million, net of income tax, due primarily to lower amortization of the excess interest reserves on acquired annuity and universal life blocks of business.

These aforementioned decreases in income (loss) from continuing operations were partially offset by the following items:

Lower DAC amortization of \$626 million, net of income tax, primarily due to current period net investment losses and separate account balance increases from market improvement, which increase expected future gross profits.

Favorable underwriting results in life products of \$53 million, net of income tax. Underwriting results are generally the difference between the portion of premium and fee income intended to cover mortality, morbidity or other insurance costs less claims incurred and the change in insurance-related liabilities. Underwriting results are significantly influenced by mortality, morbidity, or other insurance-related experience trends, as well as the reinsurance activity related to certain blocks of business. Consequently, results can fluctuate from period to period.

A decrease in policyholder dividends of \$14 million, net of income tax, primarily due to updates of actuarial assumptions used in the calculation of the terminal dividend liability for certain life products.

The change in effective tax rates between periods accounts for the remainder of the decrease in income (loss) from continuing operations.

Revenues

Total revenues, excluding net investment gains (losses), decreased by \$129 million, or 1%, to \$11,198 million for the nine months ended September 30, 2009 from \$11,327 million for the comparable 2008 period.

Premiums increased by \$273 million primarily due to an increase in immediate annuity premiums of \$210 million, and growth in premiums of \$113 million driven by increased renewals of traditional life business. These increases were partially offset by a \$50 million decline in premiums associated with the run-off of the Company s closed block of business.

Universal life and investment-type product policy fees combined with other revenues decreased by \$335 million primarily resulting from lower average separate account balances due to lower equity market levels compared to the first nine months of 2008. Policy fees from variable life and annuity and investment-type products are typically calculated as a percentage of the average assets in policyholder accounts. The value of these assets can fluctuate depending on equity performance.

Net investment income decreased by \$67 million. Management attributes an increase of \$84 million of net investment income to the general account portion of investment-type products and a decrease of \$151 million to other businesses. Management attributed \$366 million of the decrease to lower yields, primarily due to lower returns on fixed maturity securities, real estate joint ventures, cash, cash equivalents and short-term investments and other limited partnership interests, partially offset by increased securities lending results from improved spreads and decrease in investment

expenses. This decrease was partially offset by an increase of \$299 million due to a higher average asset base across various investment types. The decrease in fixed maturity securities yields was primarily due to lower yields on floating rate securities due to declines in short-term interest rates and an increased allocation to high quality, lower yielding U.S. Treasury, agency and government guaranteed securities, including FDIC Program bonds, and from decreased securities lending results due to the smaller size of the program, offset slightly by improved spreads. The decrease in yields and the negative returns in the first nine months of 2009 realized on real estate joint ventures was primarily from declining property valuations on certain investment funds that carry their real estate at estimated fair value and operating losses incurred on properties that were developed for

sale by development joint ventures. The commercial real estate properties underlying these investment funds have experienced declines in estimated fair value driven by capital market factors and deteriorating market conditions, which have led to declining property valuations, while the development joint ventures have experienced fewer property sales due to declining real estate market fundamentals and decreased availability of lending to finance these types of transactions. The decrease in the short-term investment yields was primarily due to declines in short-term interest rates. The reduction in yields and negative returns on other limited partnership interests was primarily due to lower valuations resulting from significant weakness in the credit and equity markets in the first two quarters of 2009. These lower returns were partially offset by higher valuations due to improvement in these markets in the third quarter of 2009. The increase in yields due to the decrease in investment expenses was primarily attributable to lower cost of funds expense on the securities lending program and this decreased cost partially offset the decrease in net investment income. Management attributed a \$299 million increase due to a higher average asset base across various investment types, primarily fixed maturities excluding securities lending, cash, cash equivalents and short-term investments and mortgage loans. Average invested assets are calculated on the cost basis without unrealized gains and losses. Excluding the impact of the decrease in the securities lending program, fixed maturity securities increased, driven by the reinvestment of operating cash flows and accumulated liquidity into longer duration investments. The increase in cash, cash equivalents and short-term investments has been accumulated to provide additional flexibility to address potential variations in cash needs while credit markets continue to stabilize. The increases in mortgage loans are driven by the reinvestment of operating cash flows in accordance with our investment portfolio allocation guidelines.

Expenses

Total expenses increased by \$127 million, or 1%, to \$10,146 million for the nine months ended September 30, 2009 from \$10,019 million for the comparable 2008 period.

Policyholder benefits and claims increased by \$713 million. This was primarily due to weaker equity markets during the current period, which resulted in hedge losses and higher guaranteed annuity benefit costs of \$519 million, partially offset by lower amortization of sales inducements of \$32 million. Favorable mortality and revisions to policyholder benefits and claims in both periods contributed decreases of \$40 million and \$7 million, respectively. Additionally, policyholder benefits and claims increased by \$273 million commensurate with the change in premiums discussed above.

Interest credited to policyholder account balances increased by \$320 million. Interest credited on the general account portion of investment-type products increased by \$305 million, of which \$279 million is attributed to higher average general account balances, and \$26 million to higher crediting rates. Interest credited on other businesses decreased by \$2 million. Lower amortization of the excess interest reserves on acquired annuity and universal life blocks of business, primarily driven by lower lapses in the current period, increased interest credited to policyholder account balances by \$17 million.

Policyholder dividends decreased by \$22 million primarily due to updates of actuarial assumptions used in the calculation of the terminal dividend liability for certain life products.

Lower other expenses of \$884 million include lower DAC amortization of \$963 million primarily due to current period net investment losses and separate account balance increases from market improvement, which increase expected future gross profits. Additionally, expenses decreased due to higher DAC capitalization primarily from increases in annuity deposits and a reduction in certain expenses, which management attributes to the Company s enterprise-wide cost reduction and revenue enhancement initiative. These decreases were offset by higher pension and post-retirement benefits and commission expenses, as well as an increase of \$79 million associated with non-deferrable volume related expenses, which include those expenses associated with information technology and direct departmental spending.

International

International provides life insurance, accident and health insurance, credit insurance, annuities and retirement & savings products to both individuals and groups. The Company focuses on emerging markets primarily within the Latin America, Europe and Asia Pacific regions. The following table presents consolidated financial information for the International segment for the periods indicated:

	Three Months Ended September 30, 2009 2008 (In m			Nine Months Ended September 30, 2009 2008 illions)

Three Months Ended September 30, 2009 compared with the Three Months Ended September 30, 2008 International

Income (Loss) from Continuing Operations

Income (loss) from continuing operations decreased by \$531 million, or 214%, to a loss of \$283 million for the three months ended September 30, 2009 from income of \$248 million for the comparable 2008 period. Included in this decrease in income (loss) from continuing operations was an increase in net investment losses of \$548 million, net of income tax. The increase in net investment losses was due to an increase in losses on derivatives, partially offset by lower losses on fixed maturity securities and gains on the sale of equity securities. Derivative losses were driven by losses on embedded derivatives associated with assumed risk on variable annuity riders written directly through the Japan joint venture, as well as losses on freestanding derivatives. Losses on the embedded derivatives

were driven by the effect of the narrowing of MetLife s own credit spread, as well as the impact of foreign currency rates, partially offset by gains due to movement in the equity markets and interest rates. Losses on freestanding derivatives were primarily driven by losses from equity options and futures due to increases in equity markets. The losses on the freestanding derivatives substantially offset the change in the underlying embedded derivative liability that is hedged by these derivatives.

The remaining \$17 million increase in income (loss) from continuing operations from the comparable 2008 period was comprised of the factors described below which increased income (loss) from continuing operations by \$26 million, as well as the negative impact of changes in foreign exchange rates of \$9 million, net of income tax.

Income (loss) from continuing operations excluding net investment gains (losses) increased in:

Mexico by \$30 million, net of income tax, primarily due to a decrease in certain policyholder liabilities caused by a decrease in the unrealized investment results on the invested assets supporting those liabilities relative to the prior period, growth in its individual and institutional businesses and higher premium rates in its institutional business, as well as a lower effective tax rate. These increases were partially offset by the impact of management s update of assumptions used to determine estimated gross profits in both the current and prior years, an increase in claims experience, as well as an increase in interest credited to policyholder account balances resulting from business growth.

The home office by \$13 million, net of income tax, primarily due to a reduction of tax liabilities resulting from an election to not repatriate earnings from our Australian operation in the future, as well as lower headcount and lower spending on growth and infrastructure initiatives.

Argentina by \$7 million, net of income tax, primarily due to higher yields resulting from portfolio repositioning, as well as higher income from the trading portfolio which experienced losses in the prior year period.

Partially offsetting these increases, income (loss) from continuing operations excluding net investment gains (losses) decreased in:

Japan by \$23 million, net of income tax, due to a decrease of \$21 million, net of income tax, from hedging activities associated with the guaranteed annuity business as well as a decrease of \$6 million from the Company s investment in Japan primarily due to the utilization of the fair value option for certain fixed annuities, partially offset by lower DAC amortization relative to the prior year related to market performance and a decrease in the costs of guaranteed annuity benefits. These decreases were partially offset by higher fees of \$4 million, net of income tax, from the assumed reinsurance business.

South Korea by \$3 million, net of income tax, primarily due to higher expenses due to investments in distribution capability and business growth as well as higher claims experience partially offset by an increase in surrender charges and business growth, as well as lower taxes resulting from a reduction in the statutory tax rate.

Increases from other countries account for the remainder of the change in income (loss) from continuing operations excluding net investment gains (losses).

Revenues

Total revenues, excluding net investment gains (losses), decreased by \$40 million, or 3%, to \$1,451 million for the three months ended September 30, 2009 from \$1,491 million for the comparable 2008 period. This decrease was comprised of the impact of foreign currency exchange rates which decreased total revenues, excluding net investment gains (losses), by \$206 million, as well as other factors described below which increased total revenues by \$166 million, or 13%, from the comparable 2008 period.

Premiums, fees and other revenues decreased by \$63 million, or 5%, to \$1,094 million for the three months ended September 30, 2009 from \$1,157 million for the comparable 2008 period. The decrease was comprised of the impact of changes in foreign currency exchange rates which decreased premiums, fees and other revenues by \$153 million, as well as other factors described below which increased premiums, fees and other revenues by \$90 million, or 9%, from the comparable 2008 period.

Premiums, fees and other revenues increased in:

Mexico by \$56 million primarily due to growth in its individual and institutional businesses, an increase in fees due to management s update of assumptions used to determine estimated gross profits in both the current and prior years and higher premium rates in its institutional business.

Hong Kong and India by \$17 million and \$10 million, respectively, due to a shift from variable to traditional business.

South Korea by \$9 million primarily due to an increase in surrender charges, as well as business growth.

Australia and Brazil by \$9 million and \$7 million, respectively, primarily due to business growth.

Japan by \$5 million due to an increase in assumed reinsurance premium.

Partially offsetting these increases, premiums, fees and other revenues decreased in:

Argentina by \$15 million primarily due to the nationalization of the pension business in the fourth quarter of 2008, which eliminated the revenue from this business.

Chile by \$13 million primarily due to lower annuity sales resulting from a contraction of the annuity market in Chile.

Contributions from the other countries account for the remainder of the change in premiums, fees and other revenues.

Net investment income increased by \$23 million, or 7%, to \$357 million for the three months ended September 30, 2009 from \$334 million for the comparable 2008 period. This increase was comprised of the impact of foreign currency exchange rates which decreased net investment income by \$53 million, as well as other factors described below which increased net investment income by \$76 million, or 27%, from the comparable 2008 period.

Net investment income increased in:

Hong Kong, Ireland and Brazil by \$107 million, \$83 million and \$12 million, respectively, primarily due to favorable results on the trading securities portfolio.

Argentina by \$7 million due to higher yields resulting from portfolio repositioning, as well as higher income from the trading portfolio.

South Korea by \$4 million primarily due to increases in invested assets.

Partially offsetting these increases, net investment income decreased in:

Chile by \$99 million due to the impact of lower inflation rates on indexed securities, the valuations and returns of which are linked to inflation rates.

Japan by \$38 million due to a decrease of \$32 million from hedging activities associated with the guaranteed annuity business, as well as a decrease of \$6 million from the Company s investment in Japan from the utilization of the fair value option for certain fixed annuities, partially offset by lower DAC amortization relative to the prior year related to market performance and a decrease in the costs of guaranteed annuity

benefits.

Australia by \$2 million due to a decrease in invested assets as a result of dividends remitted to parent.

Contributions from the other countries account for the remainder of the change in net investment income.

Expenses

Total expenses decreased by \$42 million, or 3%, to \$1,333 million for the three months ended September 30, 2009 from \$1,375 million for the comparable 2008 period. The impact of changes in foreign currency exchange rates decreased total expenses by \$189 million. Other factors described below increased total expenses by \$147 million, or 12%, from the comparable 2008 period.

Policyholder benefits and claims, policyholder dividends and interest credited to policyholder account balances decreased by \$30 million, or 3%, to \$927 million for the three months ended September 30, 2009 from \$957 million for the comparable 2008 period. This decrease was comprised of a decrease from changes in foreign currency exchange rates of \$140 million, as well as other factors described below which increased policyholder benefits and claims, policyholder dividends and interest credited to policyholder account balances by \$110 million, or 13%, from the comparable 2008 period.

Policyholder benefits and claims, policyholder dividends and interest credited to policyholder account balances increased in:

Hong Kong and Ireland by \$117 million and \$87 million, respectively, primarily due to favorable results on the trading securities portfolio which supports unit-linked policyholder liabilities.

Brazil by \$16 million due to higher interest credited resulting from better performance on the trading securities portfolio which supports unit-linked pension liabilities, as well as growth from entry into the dental insurance business in fourth quarter of 2008.

South Korea by \$7 million primarily due to claims experience.

Taiwan and Australia by \$5 million and \$4 million, respectively, primarily due to business growth.

Partially offsetting these increases, policyholder benefits and claims, policyholder dividends and interest credited to policyholder account balances decreased in:

Chile by \$116 million primarily due to a decrease in inflation indexed policyholder liabilities commensurate with the decrease in net investment income from inflation-indexed assets, as well as a decrease in the annuity business mentioned above, partially offset by higher interest credited.

Mexico by \$15 million, primarily due to a decrease in certain policyholder liabilities of \$41 million caused by a decrease in the unrealized investment results on the invested assets supporting those liabilities relative to the prior period, partially offset by increase in claims experience, as well as an increase in interest credited to policyholder account balances resulting from business growth.

Increases in other countries account for the remainder of the change.

Other expenses decreased by \$12 million, or 3%, to \$406 million for the three months ended September 30, 2009 from \$418 million for the comparable 2008 period. The impact of changes in foreign currency exchange rates decreased other expenses by \$49 million, and other factors described below increased other expenses by \$37 million, or 10% from the comparable 2008 period.

Other expenses increased in:

Mexico by \$32 million primarily due to an increase in DAC amortization relative to the prior year due to management s update of assumptions used to determine estimated gross profits in both the current and prior years.

South Korea by \$10 million due to investments in distribution capability and business growth.

Brazil by \$4 million primarily due to growth.

India by \$4 million primarily due to increased staffing, rent and DAC amortization due to business growth.

Australia by \$2 million due to currency transaction losses as well as growth.

Partially offsetting these increases in other expenses were decreases in:

Argentina by \$15 million due to lower administrative expenses resulting from the nationalization of the pension business.

The home office of \$3 million primarily due to lower headcount and lower spending on growth and infrastructure initiatives.

Increases in other countries account for the remainder of the change.

Nine Months Ended September 30, 2009 compared with the Nine Months Ended September 30, 2008 International

Income (Loss) from Continuing Operations

Income (loss) from continuing operations decreased by \$658 million, or 110%, to a loss of \$62 million for the nine months ended September 30, 2009 from income of \$596 million for the comparable 2008 period. Included in this decrease in income (loss) from continuing operations was an increase in net investment losses of \$572 million, net of income tax. The increase in net investment losses was due to losses on derivatives and fixed maturity securities. Derivative losses were driven by losses on freestanding derivatives partially offset by gains on embedded derivatives associated with assumed risk on variable annuity riders written directly through the Japan joint venture. Losses on freestanding derivatives were primarily driven by losses from equity options and futures due to rising equity indices, partially offset by gains on foreign currency forwards primarily due to the U.S. Dollar weakening, all of which hedge the embedded derivatives. The losses on these hedges partially offset the change in the underlying embedded derivative liability that is hedged by these derivatives. Gains on the embedded derivatives were driven by the positive impact of interest rates, foreign currency rates and movement in the equity markets. These embedded derivative gains include, increases in losses resulting from the effect of the narrowing of MetLife s own credit spread. Losses on fixed maturities increased due to the loss on the exchange of certain government bonds in Argentina, an increase in impairments primarily associated with financial services industry holdings, including impairments as a result of deterioration of the credit rating of the issuer to below investment grade and due to a severe and extended unrealized loss position, partially offset by lower losses on the sale of fixed maturities from the comparable period.

The remaining \$86 million decrease in income (loss) from continuing operations from the comparable 2008 period was comprised of the factors described below which caused a increase in income (loss) from continuing operations of \$14 million, as well as the negative impact of change in foreign exchange rates of \$100 million, net of income tax.

Income (loss) from continuing operations excluding net investment gains (losses) increased in:

Argentina by \$82 million, net of income tax, due to a reassessment by the Company of its approach to managing existing and potential future claims related to certain social security pension annuity contractholders, as a result of which liabilities of \$95 million related to pesification were released, as well as lower administrative expenses resulting from the nationalization of the pension business, higher investment yields resulting from portfolio repositioning, higher income from the trading portfolio which experienced losses in prior year period, as well as the adverse impact of currency transaction losses in the prior year. Our operations in Argentina also benefited more significantly in the current year from the utilization of deferred tax assets against which valuation allowances had previously been established. These increases were partially offset by a reduction in fees due to the nationalization of the pension business in December 2008, the reduction in the prior year of the liability for pension servicing obligations resulting from a refinement of assumptions and methodology as well as the availability of government statistics regarding the number of participants transferring to the government-sponsored plan created by the pension reform program, which was in effect from January 1, 2008 until December 2008 when the business was nationalized.

South Korea by \$19 million, net of income tax, due to an increase in surrender charges, lower taxes resulting from a reduction in the statutory tax rate and a one-time tax benefit related to the reduction in the statutory tax rate as well as business growth, partially offset by an increase in claims and higher expenses due to investments in distribution capability and business growth.

Chile by \$9 million, net of income tax, primarily due to the net impact of lower inflation rates on indexed securities and on policyholder liabilities. While the impact of inflation is neutral to net income, a portion of the

inflation impact is accounted for in net investment gains (losses).

Hong Kong by \$2 million, net of income tax, primarily due to business growth.

Partially offsetting these increases, income (loss) from continuing operations excluding net investment gains (losses) decreased in:

Japan by \$44 million, net of income tax, due to a decrease of \$101 million, net of income tax, from hedging activities associated with Japan s guaranteed annuity benefits, partially offset by an increase in premiums of \$7 million, net of income tax, from assumed reinsurance. In addition, the Company s earnings from its investment in Japan increased by \$50 million, net of income tax, due to the impact of a refinement in assumptions for DAC amortization on guaranteed annuity business, lower DAC amortization relative to the prior year related to market performance, a decrease in the costs of guaranteed annuity benefits, and the impact of a reduction in a liability for guarantee fund assessments, offset by the unfavorable impact from the utilization of the fair value option for certain fixed annuities.

Ireland by \$22 million, net of income tax, primarily due to foreign currency transaction gains and a tax benefit in the prior period, as well as higher initiative spending.

The home office by \$16 million, net of income tax, primarily due to a valuation allowance of \$40 million established against net deferred tax assets resulting from an election to not repatriate earnings from our Mexico operation, as well as higher economic capital charges and lower interest income due to a decrease in cash equivalents, partially offset by a reduction of tax liabilities resulting from an election to not repatriate earnings from our Australian operation in the future, as well as lower headcount and lower spending on growth and infrastructure initiatives.

Mexico by \$14 million, net of income tax, primarily due to an increase in certain policyholder liabilities caused by an increase in the unrealized investment results on the invested assets supporting those liabilities relative to the prior year, the impact of management s update of assumptions used to determine estimated gross profits in both the current and prior years, higher claims experience, a reduction in fees charged on the pension business, the impact of portfolio repositioning and a decrease in short-term yields as well as the prior year impact from the reinstatement of premiums. These items were partially offset by a decrease in policyholder liabilities resulting from a policy cancellation, a revision to certain dollar-denominated policyholder liabilities, growth in its individual and institutional businesses and higher premium rates in its institutional business, as well as a lower effective tax rate, and a one-time tax benefit related to a change in assumption regarding the repatriation of earnings.

Contributions from other countries account for the remainder of the change in income (loss) from continuing operations excluding net investment gains (losses).

Revenues

Total revenues, excluding net investment gains (losses), decreased by \$697 million, or 15%, to \$3,840 million for the nine months ended September 30, 2009 from \$4,537 million for the comparable 2008 period. The impact of changes in foreign currency exchange rates decreased total revenues by \$860 million. Other factors described below increased total revenues by \$163 million from the comparable 2008 period.

Premiums, fees and other revenues decreased by \$545 million, or 15%, to \$3,032 million for the nine months ended September 30, 2009 from \$3,577 million for the comparable 2008 period. This decrease was comprised of the impact of foreign currency exchange rates, which decreased premiums, fees and other revenues by \$664 million, partially offset by an increase from other factors described below, which increased premiums, fees and other revenues by \$119 million, or 4%, from the comparable 2008 period.

Premiums, fees and other revenues increased in:

Mexico by \$101 million due to growth in its individual and institutional businesses, an increase in fees due to management s update of assumptions used to determine estimated gross profits in both the current and prior years, and higher premium rates in its institutional business partially offset by the reinstatement of premiums in the prior period and a reduction in fees charged on the pension business.

Hong Kong by \$35 million due to a shift to traditional business, as well as an increase in surrender charges on non-traditional business.

South Korea by \$27 million primarily due to an increase in surrender charges, as well as business growth.

Australia and Poland by \$23 million and \$5 million, respectively, primarily due to business growth.

India by \$22 million due to business growth and a shift to traditional products.

Brazil by \$17 million due to its entry into the dental business in the fourth quarter of 2008, as well as growth in existing lines.

United Kingdom by \$8 million due to premium growth and the impact of stronger foreign currencies from business written outside of the United Kingdom, partially offset by a decrease in business written in the United Kingdom.

Japan by \$10 million due to an increase in assumed reinsurance premium.

Partially offsetting these increases, premiums, fees and other revenues decreased in:

Chile by \$94 million primarily due to lower annuity sales resulting from a contraction of the annuity market in Chile.

Argentina by \$44 million primarily due to the nationalization of the pension business in the fourth quarter of 2008, which eliminated the revenue from this business

Contributions from the other countries account for the remainder of the change in premiums, fees and other revenues.

Net investment income decreased by \$152 million, or 16%, to \$808 million for the nine months ended September 30, 2009 from \$960 million for the comparable 2008 period. This decrease was comprised of the impact of foreign currency exchange rates of \$196 million, as well as other factors described below which increased net investment income by \$44 million, or 6%, from the comparable 2008 period.

Net investment income increased in:

Hong Kong, Ireland, and Brazil by \$213 million, \$88 million, and \$20 million, respectively, primarily due to favorable results on the trading securities portfolio which supports unit-linked pension liabilities.

Mexico by \$25 million primarily due to an increase in invested assets, partially offset by the impact of lower inflation rates on indexed securities, the impact of portfolio repositioning and a decrease in short-term yields.

South Korea and Taiwan by \$12 million and \$7 million, respectively, primarily due to increases in invested assets.

Argentina by \$11 million due to higher yields resulting from portfolio repositioning, higher income from the trading portfolio as well as the adverse impact of currency transaction losses in the prior year.

Partially offsetting these decreases, net investment income decreased in:

Chile by \$221 million due to the impact of lower inflation rates on indexed securities, the valuations and returns of which are linked to inflation rates.

Japan by \$106 million primarily due to a decrease of \$156 million from hedging activities associated with Japan s guaranteed annuity benefits, partially offset by an increase of \$50 million, net of income tax, in the Company s earnings from its investment in Japan resulting from the impact of a refinement in assumptions for DAC amortization on guaranteed annuity business, lower DAC amortization relative to the prior year related to market performance, a decrease in the costs of guaranteed annuity benefits, and the impact of a reduction in the liability for guarantee fund assessments, offset by the unfavorable impact from the utilization of the fair value option for certain fixed annuities.

The home office by \$7 million primarily due to an increase in the amount charged for economic capital and lower interest income due to a decrease in cash equivalents.

Australia by \$2 million due to a decrease in invested assets as a result of dividends remitted to parent.

Contributions from the other countries account for the remainder of the change in net investment income.

Expenses

Total expenses decreased by \$471 million, or 12%, to \$3,398 million for the nine months ended September 30, 2009 from \$3,869 million for the comparable 2008 period. The impact of changes in foreign currency exchange rates decreased total expenses by \$707 million. Other factors described below increased total expenses by \$236 million, or 7%, from the comparable 2008 period.

Policyholder benefits and claims, policyholder dividends and interest credited to policyholder account balances decreased by \$245 million, or 10%, to \$2,295 million for the nine months ended September 30, 2009 from \$2,540 million for the comparable 2008 period. This decrease was comprised of the impact of changes in foreign currency exchange rates which decreased policyholder benefits and claims, policyholder dividends and interest credited to policyholder account balances by \$470 million, and other factors described below which increased policyholder dividends and interest credited to policyholder account balances by \$470 million, and other factors described below which increased policyholder dividends and interest credited to policyholder account balances by \$425 million, or 11%, from the comparable 2008 period.

Policyholder benefits and claims, policyholder dividends and interest credited to policyholder account balances increased in:

Hong Kong by \$239 million primarily due to favorable results on the trading securities portfolio which supports unit-linked policyholder liabilities compared to the prior period, as discussed above, as well as a shift to traditional business.

Mexico by \$143 million, primarily due to an increase in certain policyholder liabilities of \$57 million caused by an increase in the unrealized investment results on the invested assets supporting those liabilities relative to the prior period. The remainder of the increase was due to an increase in claims experience, as well as in interest credited to policyholder account balances resulting from business growth, partially offset by a decrease in policyholder liabilities resulting from a policy cancellation, as well as a revision in the calculation of certain dollar-denominated policyholder liabilities.

Ireland by \$91 million due to favorable results on the trading securities portfolio which supports unit-linked policyholder liabilities.

Brazil by \$28 million due to higher interest credited resulting from better performance on the trading securities portfolio which supports unit-linked pension liabilities, as well as growth from entry into the dental insurance business in fourth quarter of 2008.

South Korea by \$19 million primarily due to an increase in claims and surrenders.

India by \$15 million due to business growth.

Australia by \$14 million primarily due to business growth, as well as higher claims experience and an increase in liabilities related to reinsurance.

Taiwan by \$10 million primarily due to business growth.

Partially offsetting these increases, policyholder benefits and claims, policyholder dividends and interest credited to policyholder account balances decreased in:

Chile by \$335 million primarily due to a decrease in inflation indexed policyholder liabilities commensurate with the decrease in net investment income from inflation-indexed assets, as well as a decrease in the annuity business mentioned above, partially offset by higher interest credited.

Increases in other countries account for the remainder of the change.

Other expenses decreased by \$226 million, or 17%, to \$1,103 million for the nine months ended September 30, 2009 from \$1,329 million for the comparable 2008 period. The impact of changes in foreign currency exchange rates decreased other expenses by \$237 million and the other factors described below increased other expenses by \$11 million, or 1%, from the comparable 2008 period.

Other expenses increased in:

Mexico by \$43 million primarily due to an increase in DAC amortization relative to the prior year, due to management s update of assumptions used to determine estimated gross profits in both the current and prior years, as well as higher expenses from initiative spending and business growth.

Ireland by \$21 million due to foreign currency transaction gains in the prior period, higher spending on regional initiatives, and business growth.

India by \$15 million primarily due to increased staffing, rent and DAC amortization due to business growth.

South Korea by \$13 million due to investments in distribution capability and business growth.

Brazil by \$10 million primarily due to business growth and entry into the dental insurance business.

Australia by \$9 million primarily due to currency transaction losses as well as growth.

Chile by \$9 million due to an adjustment in DAC amortization related to the decrease in inflation partially offset by reductions administrative expenses.

Hong Kong by \$7 million due to business growth.

The United Kingdom by \$6 million due to higher commission cost related to the increase in premiums, as well as foreign currency transaction gains recognized in the prior period.

Partially offsetting these increases in other expenses were decreases in:

Argentina by \$97 million, due to a reassessment by the Company of its approach to managing existing and potential future claims related to certain social security pension annuity contractholders. As a result of this reassessment, contingent liabilities of \$95 million related to pesification were released. In addition, the nationalization of the pension business in December 2008 resulted in lower administrative expenses. These decreases were partially offset by a reduction in the prior period of the liability for pension servicing obligations resulting from a refinement of assumptions and methodology, as well as the availability of government statistics regarding the number of participants transferring to the government-sponsored plan created by the pension reform program which was in effect from January 1, 2008 until December 2008 when the business was nationalized.

The home office of \$25 million primarily due to lower headcount and lower spending on growth and infrastructure initiatives.

Auto & Home

Auto & Home, operating through Metropolitan Property and Casualty Insurance Company and its subsidiaries, offers personal lines property and casualty insurance directly to employees at their employer s worksite, as well as to individuals through a variety of retail distribution channels, including the agency distribution group, independent agents, property and casualty specialists and direct response marketing. Auto & Home primarily sells auto insurance and home insurance.

The following table presents consolidated financial information for the Auto & Home segment for the periods indicated:

Income from Continuing Operations

Income from continuing operations increased by \$10 million, or 18%, to \$67 million for the three months ended September 30, 2009 from \$57 million for the comparable 2008 period.

The increase in income from continuing operations was primarily attributable to a decrease in net investment losses of \$25 million, net of income tax, and a decrease in operating expenses of \$8 million, net of income tax, offset by a decrease in premiums of \$12 million, net of income tax, an increase in policyholder benefits and claims of \$8 million, net of income tax, and a decrease in investment income of \$2 million, net of income tax.

The decrease in net investment losses of \$25 million, net of income tax, was due primarily to higher levels of other-than-temporary losses in 2008 from preferred stocks.

The decrease in other expenses of \$8 million, net of income tax, resulted from operational efficiencies in a number of expense categories.

These increases in income from continuing operations were offset by a decrease in premiums of \$12 million, net of income tax, which was primarily comprised of a decrease of \$9 million, net of income tax, related to

decreased exposures and a decrease of \$3 million, net of income tax, related to a decrease in average earned premium per policy.

The increase in policyholder benefits and claims of \$8 million which was due to due to \$20 million, net of income tax, of less favorable development of prior year non-catastrophe losses, an increase of \$11 million, net of income tax, due primarily to higher severities in the auto line of business, an increase of \$8 million, net of income tax, from higher non-catastrophe claim frequencies, primarily in the auto line of business, and a \$2 million, net of income tax, increase in unallocated loss adjustment expenses. Offsetting these increases were a decrease of \$28 million, net of income tax, in catastrophe losses resulting from fewer and less severe catastrophe events than in 2008 and a decrease of \$5 million, net of income tax, related to a decrease in earned exposures.

Also decreasing income from continuing operations was a decline in net investment income of \$2 million, net of income tax, which was primarily due to a smaller asset base and a decrease of \$1 million, net of income tax, in other revenues.

A smaller proportion of tax advantaged investment income resulted in an increase in the segment s effective tax rate.

Revenues

Total revenues, excluding net investment gains (losses), decreased \$22 million, or 3%, to \$780 million for the three months ended September 30, 2009 from \$802 million for the comparable 2008 period.

Premiums decreased \$18 million due to a reduction of \$13 million related to a decrease in earned exposures and a reduction of \$5 million related to a decrease in average earned premium per policy.

Net investment income decreased \$3 million due primarily to a smaller asset base. Other revenues decreased \$1 million primarily related to less income from COLI.

Expenses

Total expenses decreased \$1 million, or less than 1%, to \$667 million for the three months ended September 30, 2009 from \$668 million for the comparable 2008 period.

Policyholder benefits and claims increased \$11 million due to \$31 million of less favorable development of prior year non-catastrophe losses, an increase of \$17 million due primarily to higher severities in the auto line of business, an increase of \$12 million from higher non-catastrophe claim frequencies, primarily in the auto line of business, and a \$3 million increase in unallocated adjustment expenses. Offsetting these increases were decreases of \$78 million in catastrophe losses resulting from fewer and less severe catastrophe events than in the third quarter of 2008, offset by \$34 million less of favorable development of prior year catastrophe claims and \$8 million related to earned exposures.

Other expenses decreased \$12 million due to decreases in information technology infrastructure charges and other operational efficiencies in a number of expense categories.

Underwriting results were unfavorable for the three months ended September 30, 2009 as compared to the corresponding 2008 period, as the combined ratio, including catastrophes, increased to 91.1% from 89.0% for the three months ended September 30, 2008, and the combined ratio, excluding catastrophes, increased to 87.7% from 79.6% for the three months ended September 30, 2008.

Nine Months Ended September 30, 2009 compared with the Nine Months Ended September 30, 2008 Auto & Home

Income from Continuing Operations

Income from continuing operations increased by \$43 million, or 23%, to \$234 million for the nine months ended September 30, 2009 from \$191 million for the comparable 2008 period.

The increase in income from continuing operations was primarily attributable to a \$56 million, net of income tax, decrease in net investment losses, a decrease in policyholder benefits and claims of \$21 million, net of income tax, and a decrease of \$22 million, net of income tax, in other expenses, offset by a decrease of \$38 million, net of income tax, in premiums, a decrease in net investment income of \$10 million, net of income tax and a decrease in other income of \$5 million, net of income tax.

The decrease in net investment losses of \$56 million, net of income tax, was due primarily to higher levels of other-than-temporary losses in 2008 from preferred stocks.

The decrease in policyholder benefits and claims was due to a decrease of \$83 million, net of income tax, from fewer and less severe catastrophe events than 2008 s near record levels and a \$19 million, net of income tax, decrease related to earned exposures. Offsetting these decreases were \$49 million, net of income tax, of less favorable development of prior year non-catastrophe losses, an increase of \$19 million, net of income tax, from higher non-catastrophe claim frequencies, in both the auto and homeowner s lines of business, an increase of \$11 million, net of income tax, in unallocated adjustment expenses.

Also contributing to the increase in income from continuing operations was a decrease of \$22 million, net of income tax, in other expenses resulting from a reduction of information technology infrastructure charges and other operational efficiencies in a number of expense categories as well as a decrease of \$2 million, net of income tax, in policyholder dividends.

These increases in income from continuing operations were offset by a decrease in premiums of \$38 million, net of income tax, which was comprised of a decrease of \$33 million, net of income tax, related to decreased exposures, a decrease of \$6 million, net of income tax, related to a reduction in average earned premium per policy and a decrease of \$1 million, net of income tax, in premiums primarily from various involuntary programs, offset by an increase of \$2 million, net of income tax, from a decrease in catastrophe reinsurance costs.

Also, income from continuing operations decreased due to a decline in net investment income of \$10 million, net of income tax, which was primarily due to a smaller asset base and a decrease of \$5 million, net of income tax, in other revenues.

Income taxes unfavorably impacted income from continuing operations by \$2 million due to the favorable resolution of a prior year audit in 2008 and by an additional \$4 million due to a reduction in tax advantaged investment income.

A smaller proportion of tax advantaged investment income resulted in an increase in the segment s effective tax rate.

Revenues

Total revenues, excluding net investment gains (losses), decreased \$80 million, or 3%, to \$2,331 million for the nine months ended September 30, 2009 from \$2,411 million for the comparable 2008 period.

Premiums decreased \$57 million due to a decrease of \$51 million related to a decrease in exposures, a decrease of \$9 million related to a decrease in average earned premium per policy and a decrease in premiums from various involuntary programs of \$1 million. These decreases in premiums were offset by a decrease of \$4 million in catastrophe reinsurance costs.

Net investment income decreased \$15 million due primarily to a smaller asset base. Other revenues decreased \$8 million primarily related to less income from COLI.

Table of Contents

Expenses

Total expenses decreased \$73 million, or 3%, to \$2,023 million for the nine months ended September 30, 2009 from \$2,096 million for the comparable 2008 period.

Policyholder benefits and claims decreased \$35 million due to a decrease of \$153 million from fewer and less severe catastrophe events than 2008 s near record levels, offset by \$24 million less of favorable development of

prior year catastrophe claims, and due to a \$29 million decrease related to earned exposures. Offsetting these decreases were \$75 million of less favorable development of prior year non-catastrophe losses, an increase of \$28 million from higher non-catastrophe claim frequencies, in both the auto and the homeowner s lines of business, an increase of \$17 million from higher severities, primarily in the auto line of business and a \$3 million increase in unallocated loss adjustment expenses.

Other expenses decreased \$35 million due to decreases in information technology infrastructure charges and other operational efficiencies in a number of expense categories partially offset by an increase in pension and postretirement benefit costs. Policyholder dividends decreased \$3 million due primarily to unfavorable loss experience on participating policies.

Underwriting results, including catastrophes, were favorable for the nine months ended September 30, 2009 as compared to the corresponding 2008 period, as the combined ratio, including catastrophes, decreased to 92.4% from 93.2% for the nine months ended September 30, 2008. Underwriting results, excluding catastrophes, were unfavorable for the nine months ended September 30, 2009, as the combined ratio, excluding catastrophes, increased to 88.0% from 83.1% for the nine months ended September 30, 2008.

Corporate & Other

Corporate & Other contains the excess capital not allocated to the business segments, various start-up entities, MetLife Bank and run-off entities, as well as interest expense related to the majority of the Company s outstanding debt and expenses associated with certain legal proceedings and income tax audit issues. Corporate & Other also includes the elimination of all intersegment amounts, which generally relate to intersegment loans, which bear interest at rates commensurate with related borrowings, as well as intersegment transactions. The operations of RGA, which was disposed of in the third quarter of 2008, are also reported in Corporate & Other as discontinued operations. Additionally, the Company s asset management business, including amounts reported as discontinued operations, is included in the results of operations for Corporate & Other. See Note 18 of the Notes to the Interim Condensed Consolidated Financial Statements for disclosures regarding discontinued operations, including real estate.

The following table presents consolidated financial information for Corporate & Other for the periods indicated:

Three Months Ended September 30, 2009 compared with the Three Months Ended September 30, 2008 Corporate & Other

Loss from Continuing Operations

Loss from continuing operations increased by \$67 million to \$290 million for the three months ended September 30, 2009 from \$223 million for the comparable 2008 period.

Net investment losses increased by \$228 million, net of income tax, to a loss of \$247 million, net of income tax, for the three months ended September 30, 2009 from a loss of \$19 million, net of income tax, for the comparable 2008 period. The increase in net investment losses was primarily due to increased losses on freestanding derivatives, certain foreign currency transactions and embedded derivatives, partially offset by lower losses on fixed maturity securities, equity securities and other limited partnership interests. The increase in the losses on freestanding derivatives was primarily driven by losses on equity options, foreign currency swaps, and purchased protection credit default swaps. Improving equity markets in the current period drove losses on equity options which were entered into as part of a macro-economic hedging strategy to mitigate the Company s equity exposure arising from variable annuity guarantees. Losses on foreign currency derivatives were incurred due to the

U.S. Dollar weakening against several major foreign currencies. Losses on purchased protection credit default swaps were incurred due to narrowing credit spreads. The increase in losses attributable to certain foreign currency transactions was due to the weakening of the U.S. Dollar. Increased losses on embedded derivatives were attributable to foreign currency transaction losses on reinsurance related assets denominated in Canadian dollars. The decrease in fixed maturity securities OTTI credit losses and equity securities losses was attributable to a decrease, year over year, in impairments in the financial services industry sector. In the third quarter of 2008, the stress experienced in the global financial markets, caused several financial institutions to enter bankruptcy, enter FDIC receivership or receive significant government capital infusions. The Company incurred significant impairments on its financial services industry fixed maturity and equity securities holdings in the third quarter of 2008. The decrease in losses on other limited partnership interests was principally due to decreased impairments of certain cost method investments.

Excluding the impact of net investment losses, loss from continuing operations decreased by \$161 million, net of income tax, compared to the comparable 2008 period.

The decrease in loss from continuing operations excluding net investment gains (losses) was primarily attributable to higher other revenues, lower legal costs, and lower policyholder benefits and claims of \$148 million, \$19 million, and \$7 million respectively, each of which were net of income tax. This decrease was partially offset by higher corporate expenses, lower net investment income, and higher interest expenses of \$77 million, \$20 million, and \$13 million, respectively, each of which were net of income tax. Tax benefits increased by \$96 million over the comparable 2008 period due to the difference of finalizing the Company s 2008 tax return in 2009 when compared to finalizing the Company s 2007 tax return in 2008 and the actual and the estimated tax rate allocated to the various segments, as well as the ratio of tax preference items to income before income tax on an annualized basis.

Revenues

Total revenues, excluding net investment gains (losses), increased by \$196 million, or 92%, to \$410 million for the three months ended September 30, 2009 from \$214 million for the comparable 2008 period.

This increase was primarily due to an increase in other revenues of \$230 million, which was principally due to an increase in MetLife Bank loan origination and servicing fees of \$232 million related to acquisitions in 2008.

Net investment income decreased by \$31 million, or 19%, to \$133 million for the three months ended September 30, 2009 from \$164 million for the comparable 2008 period. Management attributes \$67 million of this change to a decrease in yields, partially offset by an increase of \$36 million due to growth in average invested assets. Average invested assets are calculated on the cost basis without unrealized gains and losses. Net investment income, excluding MetLife Bank, decreased mainly due to reduced yields on fixed maturity securities, cash, cash equivalents and short-term investments, and real estate joint ventures, partially offset by a decrease in investment expense. The decrease in fixed maturity securities yields was primarily due to lower yields on floating rate securities due to declines in short-term interest rates and an increased allocation to high quality, lower yielding U.S. Treasury, agency and government guaranteed securities, including FDIC Program bonds, and from decreased securities lending results due to the smaller size of the program, offset slightly by improved spreads. The decrease in short-term investment yields was primarily attributable to declining short-term interest rates. The decrease in yields and the negative returns realized on real estate joint ventures in the third quarter of 2009 were primarily from continued declining property valuations on certain investment funds that carry their real estate at estimated fair value and operating losses incurred on properties that were developed for sale by development joint ventures. The commercial real estate properties underlying these investment funds have experienced declines in estimated fair value driven by capital market factors and deteriorating market conditions, which have led to declining property valuations, while the development joint ventures have experienced fewer property sales due to declining real estate market fundamentals and decreased availability of lending to finance these types of transactions. The decrease in investment expenses was primarily

attributable to lower cost of funds expense on the securities lending program and this decreased cost partially offsets the decrease in net investment income on fixed maturity securities. This decrease in yields was partially offset by a higher asset base, primarily within fixed maturity securities excluding securities lending related to the investment of proceeds from the sale of common stock in October 2008 partially offset by repurchases of outstanding common stock throughout 2008 and the

reduction of commercial paper outstanding. Net investment income at MetLife Bank increased by \$18 million primarily due to increased interest income on consumer loans related to new loan production primarily from acquisitions in 2008. This increase in the net investment income of MetLife Bank was partially offset by MetLife Bank s discontinued participation in the securities lending program.

Premiums decreased by \$3 million as a result of an increase in indemnity reinsurance on certain run-off products. Also included as a component of total revenues was the elimination of intersegment amounts which was offset within total expenses.

Expenses

Total expenses increased by \$95 million, or 18%, to \$630 million for the three months ended September 30, 2009 from \$535 million for the comparable 2008 period.

Corporate expenses were higher by \$121 million primarily due to higher MetLife Bank costs of \$121 million for compensation, rent, and mortgage loan origination and servicing expenses primarily related to operations acquired in 2008. Corporate expenses also increased as a result of acquisition-related costs of \$22 million, higher deferred compensation expenses of \$12 million from improved equity market conditions and a charitable contribution to the MetLife Foundation of \$9 million in the current period. These higher Corporate expenses were offset by lower post employment related costs of \$40 million, which were offset by higher contract costs associated with the termination of an operating lease of \$11 million, both of which are associated with the implementation of an enterprise-wide cost reduction and revenue enhancement initiative, and by lower corporate support expenses of \$14 million, primarily due to reduced incentive compensation and information technology costs. Interest expense was higher by \$20 million due to the issuance of senior notes in March 2009, May 2009, and July 2009 and the issuance of junior subordinated debt securities in August 2008, partially offset by rate reductions on variable rate collateral financing arrangements due to declines in short term interest rates and the reduction of commercial paper outstanding. Legal costs were lower by \$29 million primarily due to prior year asbestos insurance costs of \$38 million, which included \$35 million for the commutation of three asbestos-related excess insurance policies and \$3 million for amortization and valuation of those policies prior to the commutation, and a decrease in other legal fees of \$1 million, and partially offset by an increase of \$10 million resulting from the resolution of certain matters in the prior period. Policyholder benefits and claims were lower by \$12 million primarily as a result of an increase in indemnity reinsurance on certain run-off products. Also included as a component of total expenses was the elimination of intersegment amounts which were offset within total revenues.

Nine Months Ended September 30, 2009 compared with the Nine Months Ended September 30, 2008 Corporate & Other

Loss from Continuing Operations

Loss from continuing operations increased by \$311 million to a loss of \$621 million for the nine months ended September 30, 2009 from \$310 million for the comparable 2008 period.

Net investment losses increased by \$297 million, net of income tax, to a loss of \$358 million, net of income tax, for the nine months ended September 30, 2009 from a loss of \$61 million, net of income tax, for the comparable 2008 period. The increase in net investment losses was primarily due to increased losses on certain foreign currency transactions, freestanding derivatives, real estate joint ventures, equity securities and embedded derivatives, partially offset by decreased impairment losses on fixed maturity securities. The increase in losses attributable to certain foreign currency transactions was due to the weakening of the U.S. Dollar. The increase in losses on freestanding derivatives was primarily attributable to improving equity markets and narrowing credit spreads in the current period,

partially offset by the impact of the U.S. Dollar weakening and mid- and long-term interest rates rising. Improving equity markets drove losses on equity options and gains on equity futures. Narrowing credit spreads drove losses on purchased protection credit default swaps. Rising interest rates drove gains on interest rate swaps. The increase in losses on real estate joint ventures was principally due to higher impairments on cost method real estate joint venture investments resulting from declines in value driven by capital market factors and from the weakening of real estate market fundamentals. The increase in equity securities losses was attributable to an increase in impairments across several industries due to increased financial restructurings, bankruptcy filings,

ratings downgrades or difficult underlying operating environments of the issuer, including impairments on perpetual hybrid securities as a result of deterioration of the credit rating of the issuer to below investment grade and due to a severe and extended unrealized loss position. The decrease in fixed maturity securities OTTI credit losses was attributable to a decrease, year over year, in impairments in the financial services industry sector. In the third quarter of 2008, the stress experienced in the global financial markets, caused several financial institutions to enter bankruptcy, enter FDIC receivership or receive significant government capital infusions. The Company incurred significant impairments on its financial services industry fixed maturity securities holdings in the third quarter of 2008.

Excluding the impact of net investment losses, loss from continuing operations increased by \$14 million, net of income tax, compared to the comparable 2008 period.

The increase in loss from continuing operations excluding net investment gains (losses) was primarily attributable to higher corporate expenses, lower net investment income, and lower premiums of \$416 million, \$226 million, and \$10 million, respectively, each of which were net of income tax. This decrease was partially offset by higher other revenues, lower legal costs, lower policyholder benefits and claims, and lower interest on uncertain tax positions of \$492 million, \$34 million, \$21 million, and \$11 million, respectively, each of which were net of income tax. Tax benefits increased by \$77 million over the comparable 2008 period due to the difference of finalizing the Company s 2008 tax return in 2009 when compared to finalizing the Company s 2007 tax return in 2008 and the actual and the estimated tax rate allocated to the various segments, as well as the ratio of tax preference items to income before income tax on an annualized basis.

Revenues

Total revenues, excluding net investment gains (losses), increased by \$395 million, or 52%, to \$1,150 million for the nine months ended September 30, 2009 from \$755 million for the comparable 2008 period.

This increase was primarily due to an increase in other revenues of \$758 million, which was due to an increase in MetLife Bank loan origination and servicing fees related to operations acquired in 2008.

Net investment income decreased by \$348 million, or 52%, to \$317 million for the nine months ended September 30, 2009 from \$665 million for the comparable 2008 period. Management attributes \$516 million of this change to a decrease in yields, partially offset by an increase of \$168 million due to growth in average invested assets. Average invested assets are calculated on the cost basis without unrealized gains and losses. Net investment income, excluding MetLife Bank, decreased mainly due to reduced yields on fixed maturity securities, mortgage loans, cash, cash equivalents and short-term investments, other limited partnership interests and real estate joint ventures. This decrease was partially offset by a decrease in investment expenses. The decrease in fixed maturity securities yields was primarily due to lower yields on floating rate securities due to declines in short-term interest rates and an increased allocation to high quality, lower yielding U.S. Treasury, agency and government guaranteed securities, including FDIC Program bonds, and from decreased securities lending results due to the smaller size of the program, offset slightly by improved spreads. The decrease in yields associated with our mortgage loan portfolio was primarily attributable to lower prepayments on commercial mortgage loans and lower yields on variable rate loans due to declines in short-term interest rates. The decrease in short-term investment yields was primarily attributable to declining short-term interest rates. The reduction in yields and the negative returns realized on other limited partnership interests were primarily due to lower valuations resulting from significant weakness in the credit and equity markets in the first two quarters of 2009. These returns were partially offset by higher valuations due to the improvement in those markets in the third quarter of 2009. The decrease in yields and the negative returns in the first nine months of 2009 realized on real estate joint ventures were primarily from continued declining property valuations on certain investment funds that carry their real estate at estimated fair value and operating losses incurred on

properties that were developed for sale by development joint ventures. The commercial real estate properties underlying these investment funds have experienced declines in estimated fair value driven by capital market factors and deteriorating market conditions, which have led to declining property valuations, while the development joint ventures have experienced fewer property sales due to declining real estate market fundamentals and decreased availability of lending to finance these types of transactions. The decrease in investment expenses was primarily attributable to lower cost of funds expense on the securities lending

program and this decreased cost partially offsets the decrease in net investment income on fixed maturity securities. This decrease in yields was partially offset by a higher asset base, primarily within fixed maturity securities excluding securities lending, related to the investment of proceeds from the sale of common stock in October 2008 partially offset by repurchases of outstanding common stock throughout 2008 and the reduction of commercial paper outstanding. Net investment income of MetLife Bank increased by \$100 million primarily due to increased interest income on consumer loans related to new loan production primarily from acquisitions in 2008. This increase in net investment income of MetLife Bank was partially offset by discontinued participation in the securities lending program.

Premiums decreased by \$15 million as a result of an increase in indemnity reinsurance on certain run-off products. Also included as a component of total revenues was the elimination of intersegment amounts which was offset within total expenses.

Expenses

Total expenses increased by \$529 million, or 40%, to \$1,844 million for the nine months ended September 30, 2009 from \$1,315 million for the comparable 2008 period.

Corporate expenses were higher by \$638 million primarily due to higher MetLife Bank costs of \$522 million for compensation, rent, and mortgage loan origination and servicing expenses primarily related to acquisitions in 2008. Corporate expenses also increased as a result of higher deferred compensation expenses of \$43 million related to improved equity market conditions, acquisition-related costs of \$33 million, and lease impairments of \$12 million for Company use space that is currently vacant. Also contributing to the increase in corporate expenses were higher corporate support expenses of \$11 million, which included consultant fees, banking fees, advertising, and information technology costs and a charitable contribution to the MetLife Foundation of \$9 million. Costs associated with the implementation of an enterprise-wide cost reduction and revenue enhancement were higher by \$11 million from contract costs associated with the termination of an operating lease offset by lower post employment related costs of \$3 million. Legal costs were lower by \$53 million primarily due to prior year asbestos insurance costs of \$52 million, which included \$35 million for the commutation of three asbestos-related excess insurance policies and \$17 million for amortization and valuation of those policies prior to the commutation and a decrease of \$1 million in other legal fees. Policyholder benefits and claims were lower by \$33 million primarily as a result of an increase in indemnity reinsurance on certain run-off products. Interest expense was lower by \$3 million due to rate reductions on variable rate collateral financing arrangements due to declines in short term interest rates and the reduction of commercial paper outstanding, partially offset by the issuance of senior notes in 2009 and the issuance of junior subordinated debt securities in August 2008 and February 2009. Interest on uncertain tax positions was lower by \$17 million as a result of a settlement payment and a decrease in published IRS interest rates. Also included as a component of total expenses was the elimination of intersegment amounts which were offset within total revenues.

Liquidity and Capital Resources

Overview

Beginning in September 2008, the global financial markets experienced unprecedented disruption, adversely affecting the business environment in general, as well as financial services companies in particular. Conditions in the financial markets have since materially improved, but financial institutions may have to pay higher spreads over benchmark U.S. Treasury securities than before the market disruption began. There is still some uncertainty as to whether the stressed conditions that prevailed during the market disruption will reoccur, which could significantly affect the Company s ability to meet liquidity needs and obtain capital. The following discussion supplements the discussion in the 2008 Annual Report under the caption Management s Discussion and Analysis of Financial Condition and Results

of Operations Liquidity and Capital Resources Extraordinary Market Conditions.

Liquidity Management. Based upon the strength of its franchise, diversification of its businesses and strong financial fundamentals, management continues to believe that the Company has ample liquidity to meet business requirements under current market conditions. The Company s short-term liquidity position (cash and cash equivalents and short-term investments, excluding cash collateral received under the Company s securities

lending program that has been reinvested in cash, cash equivalents, short-term investments and publicly-traded securities and cash collateral received from counterparties in connection with derivative instruments) was \$15.9 billion and \$26.7 billion at September 30, 2009 and December 31, 2008, respectively. This reduction in short-term liquidity reflects the continued improvement in market conditions during the nine months ended September 30, 2009. During 2009, the Company invested a portion of its short-term liquidity in higher quality, more liquid asset types, including government securities and agency residential mortgage-backed securities. Management continuously monitors and adjusts its liquidity and capital plans for the Holding Company and its subsidiaries in light of changing needs and opportunities.

Liquidity Needs of the Business. The liquidity needs of the Company s insurance businesses have not changed materially from the discussion included in the 2008 Annual Report. In the Individual segment, lapses and surrenders have not deviated materially from management expectations. For both fixed and variable annuities, net flows were positive and lapse rates declined for the nine months ended September 30, 2009. In the Institutional segment, the retirement & savings business consists of general account values of \$91.9 billion at September 30, 2009, of which \$88.6 billion is comprised of pension closeouts, other fixed annuity contracts without surrender or withdrawal options as well as global guaranteed interest contracts (GICs) that have stated maturities and cannot be put back to the Company prior to maturity. During the nine months ended September 30, 2009, policyholder account balances and future policy benefits declined by \$7.9 billion, related to a decrease of \$9.2 billion in the retirement & savings business.

With regard to Institutional s retirement & savings liabilities where customers have limited liquidity rights, at September 30, 2009, there were \$2.1 billion of funding agreements and global GICs that could be put back to the Company after a period of notice. While the notice requirements vary, the shortest is 15 days and applies to only \$0.3 billion of these liabilities. The next shortest notice period is 90 days, which applies to \$1.3 billion of these liabilities. The remainder of the notice periods are between 6 and 13 months, so even on the small portion of the portfolio where there is ability to accelerate withdrawal, the exposure is relatively limited. With respect to credit ratings downgrade triggers that permit early termination, \$500 million of the retirement & savings liabilities were subject to such triggers. In addition, such early termination payments are subject to 90 day prior notice. Management controls the liquidity exposure that can arise from these various product features.

During the nine months ended September 30, 2009, the Company renewed maturing funding agreements with the Federal Home Loan Bank of New York (FHLB of New York), primarily replacing shorter term maturities with new agreements for maturities ranging from two to seven years.

At September 30, 2009, the Company held \$2,442 million in residential loans held-for-sale, compared with \$2,012 million at December 31, 2008, an increase of \$430 million. From time to time, MetLife Bank has an increased liquidity need to fund mortgage loans that it generally holds for a relatively short period before selling them to one of the government-sponsored enterprises such as Fannie Mae or Freddie Mac. To meet these increased funding requirements, as well as to increase overall liquidity, MetLife Bank takes advantage of collateralized borrowing opportunities with the Federal Reserve Bank of New York and the FHLB of New York.

Securities Lending. Under the Company s securities lending program, the Company was liable for cash collateral under its control of \$21.1 billion and \$23.3 billion at September 30, 2009 and December 31, 2008, respectively. For further detail on the securities lending program and the related liquidity needs, see Investments Securities Lending.

Internal Asset Transfers. MetLife employs an internal asset transfer process that allows for the sale of securities among the business portfolio segments for the purpose of efficient asset/liability matching. The execution of the internally transferred assets is permitted when mutually beneficial to both business segments. The asset is transferred at estimated fair market value with corresponding net investment gains (losses) being eliminated in Corporate &

Other.

During the nine months ended September 30, 2009, internal asset transfers were utilized to preserve economic value for MetLife by transferring assets across business segments instead of selling them to external parties at depressed market prices. Securities with an estimated fair value of \$6.6 billion were transferred across business segments in the nine months ended September 30, 2009 generating \$674 million in net investment losses,

principally within Individual and Institutional, with the offset in Corporate & Other s net investment gains (losses). Transfers of securities out of the securities lending portfolio to other investment portfolios in exchange for cash and short-term investments represented the majority of the internal asset transfers during this period.

Derivatives and Collateral Financing Arrangements. The Company pledges collateral to, and has collateral pledged to it by, counterparties under the Company s current derivative transactions. With respect to derivative transactions with credit ratings downgrade triggers, a two-notch downgrade would impact the Company s derivative collateral requirements by \$119 million at September 30, 2009. In addition, the Company has pledged collateral and has had collateral pledged to it, and may be required from time to time to pledge additional collateral or have additional collateral pledged to it, in connection with collateral financing arrangements related to the reinsurance of closed block liabilities and universal life secondary guarantee liabilities.

Holding Company. The Holding Company relies principally on dividends from its subsidiaries to meet its cash requirements. The ability of the Holding Company s insurance subsidiaries to pay dividends is subject to regulatory restrictions. None of the Holding Company s long-term debt is due before 2011, so there is no near-term refinancing risk. In addition to its fixed obligations, the Holding Company has pledged collateral and has had collateral pledged to it, and may be required from time to time to pledge additional collateral or have additional collateral pledged to it. See The Holding Company Liquidity and Capital Sources.

Capital. Although the Company raised new capital during the difficult market conditions prevailing since the second half of 2008 (see The Holding Company Liquidity and Capital Sources Debt Issuances and Other Borrowings), the increase in credit spreads experienced since the second half of 2008 has resulted in an increase in the cost of new debt capital. As a result of reductions in interest rates, the Company s interest expense and dividends on floating rate securities has been lower; however, the increase in the Company s credit spreads since the second half of 2008 has caused the Company s letter of credit fees to increase.

The Company manages its capital structure to maintain a level of capital needed for AA financial strength ratings. However, management believes that the rating agencies have recently heightened the level of scrutiny that they apply to insurance companies and are considering several other factors, in addition to the level of capital, in assigning financial strength ratings. The rating agencies may also adjust upward the capital and other requirements employed in their models for maintenance of certain ratings levels.

The Company

Capital

Capital and liquidity represent the financial strength of the Company and reflect its ability to generate strong cash flows at the operating companies, borrow funds at competitive rates and raise additional capital to meet operating and growth needs.

Statutory Capital and Dividends. Our insurance subsidiaries have statutory surplus well above levels to meet current regulatory requirements.

The amount of dividends that our insurance subsidiaries can pay to MetLife, Inc. or other parent entities is constrained by the amount of surplus we hold to maintain our ratings and provide an additional margin for risk protection and invest in our businesses. We proactively take actions to maintain capital consistent with these ratings objectives, which may include adjusting dividend amounts and deploying financial resources from internal or external sources of capital. Certain of these activities may require regulatory approval.

Rating Agencies. Rating agencies assign insurer financial strength ratings to the Company s domestic life subsidiaries and credit ratings to MetLife, Inc. and certain of its subsidiaries. The level and composition of our regulatory capital at the subsidiary level and equity capital of the Company are among the many factors considered in determining the Company s insurer financial strength and credit ratings. Each agency has its own capital adequacy evaluation methodology and assessments are generally based on a combination of factors. Management believes that the rating agencies have recently heightened the level of scrutiny that they apply to insurance companies, and that they may increase the frequency and scope of their credit reviews, may request additional

information from the companies that they rate, and may adjust upward the capital and other requirements employed in the rating agency models for maintenance of certain ratings levels.

The Company s financial strength ratings for its domestic life insurance companies are AA-/Aa2/AA/A+ for Standard & Poor s Ratings Services (S&P), Moody s Investors Service (Moody s), Fitch Ratings (Fitch), and A.M. Company (A.M. Best), respectively. The Company s long-term senior debt credit ratings are A-/A2/A/a- for S&P, Moody s, Fitch, and A.M. Best, respectively. The Company s ratings outlooks are Negative/Negative/Negative/Stable for S&P, Moody s, Fitch, and A.M. Best, respectively.

A downgrade in the credit or financial strength (i.e., claims-paying) ratings of the Company or its subsidiaries would likely impact the cost and availability of unsecured financing for the Company and its subsidiaries and result in additional collateral requirements or other required payments under certain agreements, which are eligible to be satisfied in cash or by posting securities held by the subsidiaries subject to the agreements.

Liquidity and Capital Sources

Cash Flows from Operations. The Company s principal cash inflows from its insurance activities come from insurance premiums, annuity considerations and deposit funds. A primary liquidity concern with respect to these cash inflows is the risk of early contractholder and policyholder withdrawal. See Liquidity and Capital Uses Contractual Obligations.

Cash Flows from Investments. The Company s principal cash inflows from its investment activities come from repayments of principal, proceeds from maturities, sales of invested assets and net investment income. The primary liquidity concerns with respect to these cash inflows are the risk of default by debtors and market volatilities. The Company closely monitors and manages these risks through its credit risk management process.

Liquid Assets. An integral part of the Company s liquidity management is the amount of liquid assets it holds. Liquid assets include cash, cash equivalents, short-term investments and publicly-traded securities, excluding: (i) cash collateral received under the Company s securities lending program that has been reinvested in cash, cash equivalents, short-term investments and publicly-traded securities; (ii) cash collateral received from counterparties in connection with derivative instruments; (iii) cash, cash equivalents, short-term investments and securities on deposit with regulatory agencies; and (iv) securities held in trust in support of collateral financing arrangements and pledged in support of debt and funding agreements. At September 30, 2009 and December 31, 2008, the Company had \$159.0 billion and \$141.7 billion in liquid assets, respectively. For further discussion of invested assets on deposit with regulatory agencies, held in trust in support of collateral financing arrangements and pledged in support of debt and funding agreements. Assets on Deposit, Held in Trust and Pledged as Collateral.

Global Funding Sources. Liquidity is also provided by a variety of short-term instruments, including repurchase agreements and commercial paper. Capital is provided by a variety of instruments, including medium- and long-term debt, junior subordinated debt securities, capital securities and stockholders equity. The diversity of the Company s funding sources, including funding that may be available through certain economic stabilization programs established by various government institutions, enhances flexibility, limits dependence on any one source of funds and generally lowers the cost of funds.

MetLife, Inc. and MetLife Funding, Inc. (MetLife Funding) each have commercial paper programs supported by our \$2.85 billion general corporate credit facility. Access to the commercial paper markets has improved throughout the nine months ended September 30, 2009.

The Federal Reserve Bank of New York s Commercial Paper Funding Facility (CPFF) is intended to improve liquidity in short-term funding markets by increasing the availability of term commercial paper funding to issuers and by providing greater assurance to both issuers and investors that firms will be able to rollover their maturing commercial paper. The CPFF program has been extended to February 1, 2010. MetLife Short Term Funding LLC, the issuer of commercial paper under a program supported by funding agreements issued by MLIC and MetLife Insurance Company of Connecticut (MICC), was accepted in October 2008 for the CPFF and may issue a maximum amount of \$3.8 billion under the CPFF. At September 30, 2009, MetLife Short Term Funding LLC had no drawdown under its CPFF capacity,

compared to \$1,650 million at December 31, 2008. MetLife Funding was accepted in November 2008 for the CPFF and may issue a maximum amount of \$1 billion under the CPFF. No drawdown by MetLife Funding has taken place under this facility at September 30, 2009.

MetLife Bank is a depository institution that is approved to use the Federal Reserve Bank of New York Discount Window borrowing privileges and participate in the Federal Reserve Bank of New York Term Auction Facility. To utilize these facilities, MetLife Bank has pledged qualifying loans and investment securities to the Federal Reserve Bank of New York as collateral. At September 30, 2009 and December 31, 2008, MetLife Bank s liability for advances from the Federal Reserve Bank of New York under these facilities was \$1.2 billion and \$950 million, respectively, which is included in short-term debt. The Company did not participate in these programs during the nine months ended September 30, 2008. See Note 9 of the Notes to the Interim Condensed Consolidated Financial Statements.

As a member of the FHLB of New York, MetLife Bank has entered into repurchase agreements with FHLB of New York on both short- and long-term bases, with a total liability for repurchase agreements with the FHLB of New York of \$2.4 billion and \$1.8 billion at September 30, 2009 and December 31, 2008, respectively. See Note 9 of the Notes to the Interim Condensed Consolidated Financial Statements.

MetLife, Inc. and MetLife Bank elected to continue to participate in the debt guarantee component of the FDIC Program. On March 26, 2009, MetLife, Inc. issued \$397 million of floating-rate senior notes due June 2012 under the FDIC Program, representing all MetLife, Inc. s capacity under the FDIC Program. MetLife Bank may issue up to \$178 million of guaranteed debt under the FDIC Program. Unless extended, the FDIC Program will not apply to debt issued after October 31, 2009.

In addition, the Company had obligations under funding agreements with the FHLB of NY of \$14.3 billion and \$15.2 billion at September 30, 2009 and December 31, 2008, respectively, for MLIC and with the FHLB of Boston of \$326 million and \$526 million at September 30, 2009 and December 31, 2008, respectively, for MICC. The FHLB of Boston had also advanced \$300 million to MICC at December 31, 2008, which was included in short-term debt. There were no such advances at September 30, 2009. See Note 7 of the Notes to the Interim Condensed Consolidated Financial Statements.

At September 30, 2009 and December 31, 2008, the Company had outstanding \$2.1 billion and \$2.7 billion in short-term debt, respectively, and \$13.2 billion and \$9.7 billion in long-term debt, respectively. At September 30, 2009 and December 31, 2008, the Company had outstanding \$5.3 billion and \$5.2 billion in collateral financing arrangements, respectively, and \$3.2 billion and \$3.8 billion in junior subordinated debt, respectively. Short-term and long-term debt include the above-mentioned MetLife Bank funding from the Federal Reserve Bank of New York and the FHLB of NY, as well as the above-mentioned advances from the FHLB of Boston.

Debt Issuances and Other Borrowings. For information on debt issuances and other borrowings entered into by the Company, see The Holding Company Liquidity and Capital Sources Debt Issuances and Other Borrowings.

Collateral Financing Arrangements. For information on collateral financing arrangements entered into by the Company, see The Holding Company Liquidity and Capital Sources Collateral Financing Arrangements.

Credit and Committed Facilities. The Company maintains unsecured credit facilities and committed facilities aggregating \$3.2 billion and \$11.3 billion, respectively, at September 30, 2009. When drawn upon, these facilities bear interest at varying rates in accordance with the respective agreements.

The unsecured credit facilities are used for general corporate purposes. At September 30, 2009, the Company had outstanding \$537 million in letters of credit and no aggregate drawdowns against these facilities. Remaining unused commitments were \$2.6 billion at September 30, 2009.

The committed facilities are used for collateral for certain of the Company s affiliated reinsurance liabilities. At September 30, 2009, the Company had outstanding \$4.1 billion in letters of credit and \$2.8 billion in aggregate drawdowns against these facilities. Remaining unused commitments were \$4.4 billion at September 30, 2009.

See Note 9 of the Notes to the Interim Condensed Consolidated Financial Statements for further discussion of these facilities.

Management has no reason to believe that its lending counterparties are unable to fulfill their respective contractual obligations under these facilities, and as commitments associated with letters of credit and financing arrangements may expire unused, these amounts do not necessarily reflect the Company s actual future cash funding requirements.

Covenants. Certain of the Company s debt instruments, credit facilities and committed facilities contain various administrative, reporting, legal and financial covenants. The Company believes it is in compliance with all covenants at September 30, 2009.

Liquidity and Capital Uses

Debt Repayments. During the nine months ended September 30, 2009 and 2008, MetLife Bank made repayments of \$220 million and \$171 million, respectively, to the FHLB of NY related to long-term borrowings. During the nine months ended September 30, 2009, MetLife Bank made repayments of \$23.0 billion to the FHLB of NY and \$17.8 billion to the Federal Reserve Bank of New York related to short-term borrowings. During the nine months ended September 30, 2009, MICC made repayments of \$300 million to the FHLB of Boston related to short-term borrowings.

Insurance Liabilities. The Company s principal cash outflows primarily relate to the liabilities associated with its various life insurance, property and casualty, annuity and group pension products, operating expenses and income tax, as well as principal and interest on its outstanding debt obligations. Liabilities arising from its insurance activities primarily relate to benefit payments under the aforementioned products, as well as payments for policy surrenders, withdrawals and loans. See Contractual Obligations.

Investment and Other. Additional cash outflows include those related to obligations of securities lending activities, investments in real estate, limited partnerships and joint ventures, as well as litigation-related liabilities.

Securities Lending. The Company participates in a securities lending program whereby blocks of securities, which are included in fixed maturity securities and short-term investments, are loaned to third parties, primarily major brokerage firms and commercial banks, and the Company receives cash collateral from the borrower, which must be returned to the borrower when the loaned securities are returned to the Company. The Company was liable for cash collateral under its control of \$21.1 billion and \$23.3 billion at September 30, 2009 and December 31, 2008, respectively. The volume of securities lending has decreased in line with reduced demand from counterparties and reduced trading capacity of certain segments of the fixed income securities market. See Investments Securities Lending for further information.

Contractual Obligations. The following table summarizes the Company s major contractual obligations at September 30, 2009:

Contractual Obligations		Total	0	Less Than ne Year	L	More Than one Year and ess Than Three Years (In nillions)	a Tl	More Than Three Years nd Less nan Five Years	Fi	More Than ve Years
Future policy benefits	(1)	\$ 306,645	\$	7,055	\$	10,687	\$	11,452	\$	277,451
Policyholder account balances	(2)	205,581		30,713		30,504		26,333		118,031
Other policyholder liabilities	(3)	6,337		6,337						
Short-term debt	(4)	2,131		2,131						
Long-term debt	(4)	21,268		1,322		3,769		2,597		13,580
Collateral financing arrangements	(4)	6,797		71		141		141		6,444
Junior subordinated debt securities	(4)	10,514		258		517		517		9,222
Payables for collateral under securities										
loaned and other transactions	(5)	24,363		24,363						
Commitments to lend funds	(6)	8,536		8,498		17		2		19
Operating leases	(7)	2,020		283		433		293		1,011
Other	(8)	12,433		12,027		6		6		394
Total		\$ 606,625	\$	93,058	\$	46,074	\$	41,341	\$	426,152

(1) Future policyholder benefits include liabilities related to traditional whole life policies, term life policies, closeout and other group annuity contracts, structured settlements, master terminal funding agreements, single premium immediate annuities, long-term disability policies, individual disability income policies, LTC policies and property and casualty contracts. Included within future policyholder benefits are contracts where the Company is currently making payments and will continue to do so until the occurrence of a specific event such as death, as well as those where the timing of a portion of the payments has been determined by the contract. Also included are contracts where the Company is not currently making payments and will not make payments until the occurrence of an insurable event, such as death or illness, or where the company. The Company has estimated the timing of the cash flows related to these contracts based on historical experience, as well as its expectation of future payment patterns.

Liabilities related to accounting conventions, or which are not contractually due, such as shadow liabilities, excess interest reserves and property and casualty loss adjustment expenses, of \$625 million have been excluded from amounts presented in the table above.

Amounts presented in the table above, excluding those related to property and casualty contracts, represent the estimated cash payments for benefits under such contracts including assumptions related to the receipt of future premiums and assumptions related to mortality, morbidity, policy lapse, renewal, retirement, inflation, disability incidence, disability terminations, policy loans and other contingent events as appropriate to the respective product type. Payments for case reserve liabilities and incurred but not reported liabilities associated with property and casualty contracts of \$1.4 billion have been included using an estimate of the ultimate amount to be settled under the policies based upon historical payment patterns. The ultimate amount to be paid under property and casualty contracts is not determined until the Company reaches a settlement with the claimant, which may vary significantly from the liability or contractual obligation presented above especially as it relates to incurred but not reported liabilities. All estimated cash payments presented in the table above are undiscounted as to interest, net of estimated future premiums on policies currently in-force and gross of any reinsurance recoverable. The more than five years category displays estimated payments due for periods extending for more than 100 years from the present date.

The sum of the estimated cash flows shown for all years in the table of \$306.6 billion exceeds the liability amount of \$134.5 billion included on the consolidated balance sheet principally due to the time value of money, which accounts for at least 80% of the difference, as well as differences in assumptions, most significantly mortality, between the date the liabilities were initially established and the current date.

For the majority of the Company s insurance operations, estimated contractual obligations for future policy benefits and policyholder account balance liabilities as presented in the table above are derived from the annual

asset adequacy analysis used to develop actuarial opinions of statutory reserve adequacy for state regulatory purposes. These cash flows are materially representative of the cash flows under generally accepted accounting principles.

Actual cash payments to policyholders may differ significantly from the liabilities as presented in the consolidated balance sheet and the estimated cash payments as presented in the table above due to differences between actual experience and the assumptions used in the establishment of these liabilities and the estimation of these cash payments.

(2) Policyholder account balances include liabilities related to conventional guaranteed interest contracts, guaranteed interest contracts associated with formal offering programs, funding agreements, individual and group annuities, total control accounts, bank deposits, individual and group universal life, variable universal life and company-owned life insurance.

Included within policyholder account balances are contracts where the amount and timing of the payment is essentially fixed and determinable. These amounts relate to policies where the Company is currently making payments and will continue to do so, as well as those where the timing of the payments has been determined by the contract. Other contracts involve payment obligations where the timing of future payments is uncertain and where the Company is not currently making payments and will not make payments until the occurrence of an insurable event, such as death, or where the occurrence of the payment triggering event, such as a surrender of or partial withdrawal on a policy or deposit contract, is outside the control of the Company. The Company has estimated the timing of the cash flows related to these contracts based on historical experience, as well as its expectation of future payment patterns.

Excess interest reserves representing purchase accounting adjustments of \$597 million have been excluded from amounts presented in the table above as they represent an accounting convention and not a contractual obligation.

Amounts presented in the table above represent the estimated cash payments to be made to policyholders undiscounted as to interest and including assumptions related to the receipt of future premiums and deposits; withdrawals, including unscheduled or partial withdrawals; policy lapses; surrender charges; annuitization; mortality; future interest credited; policy loans and other contingent events as appropriate to the respective product type. Such estimated cash payments are also presented net of estimated future premiums on policies currently in-force and gross of any reinsurance recoverable. For obligations denominated in foreign currencies, cash payments have been estimated using current spot rates.

The sum of the estimated cash flows shown for all years in the table of \$205.6 billion exceeds the liability amount of \$147.5 billion included on the consolidated balance sheet principally due to the time value of money, which accounts for at least 80% of the difference, as well as differences in assumptions between the date the liabilities were initially established and the current date. See the comments under footnote 1 regarding the source and uncertainties associated with the estimation of the contractual obligations related to future policyholder benefits and policyholder account balances. See also Overview.

(3) Other policyholder liabilities are comprised of other policyholder funds, policyholder dividends payable and the policyholder dividend obligation. Amounts included in the table above related to these liabilities are as follows:

a. Other policyholder funds includes liabilities for incurred but not reported claims and claims payable on group term life, long-term disability, LTC and dental; policyholder dividends left on deposit and policyholder dividends due and unpaid related primarily to traditional life and group life and health; and premiums received in advance. Liabilities related to unearned revenue of \$2.1 billion have been excluded from the cash payments presented in

the table above because they reflect an accounting convention and not a contractual obligation. With the exception of policyholder dividends left on deposit, and those items excluded as noted in the preceding sentence, the contractual obligation presented in the table above related to other policyholder funds is equal to the liability reflected in the consolidated balance sheet. Such amounts are reported in the less than one year category due to the short-term nature of the liabilities. Contractual obligations on policyholder dividends left on deposit are projected based on assumptions of policyholder withdrawal activity.

b. Policyholder dividends payable consists of liabilities related to dividends payable in the following calendar year on participating policies. As such, the contractual obligation related to policyholder dividends payable is presented in the table above in the less than one year category at the amount of the liability presented in the consolidated balance sheet.

c. The nature of the policyholder dividend obligation is described in Note 9 of the Notes to the Consolidated Financial Statements included in the 2008 Annual Report. Because the exact timing and amount of the ultimate policyholder dividend obligation is subject to significant uncertainty and the amount of the policyholder dividend obligation is based upon a long-term projection of the performance of the closed block, management has reflected the obligation at the amount of the liability, if any, presented in the consolidated balance sheet in the more than five years category. This was done to reflect the long-duration of the liability and the uncertainty of the ultimate cash payment.

(4) Amounts presented in the table above for short-term debt, long-term debt, collateral financing arrangements and junior subordinated debt securities differ from the balances presented on the consolidated balance sheet as the amounts presented in the table above do not include premiums or discounts upon issuance or purchase accounting fair value adjustments. The amounts presented above also include interest on such obligations as described below.

Short-term debt consists of borrowings with original maturities of less than one year carrying fixed interest rates. The contractual obligation for short-term debt presented in the table above represents the amounts due upon maturity plus the related interest for the period from October 1, 2009 through maturity.

Long-term debt bears interest at fixed and variable interest rates through their respective maturity dates. Interest on fixed rate debt was computed using the stated rate on the obligations through maturity. Interest on variable rate debt is computed using prevailing rates at September 30, 2009 and, as such, does not consider the impact of future rate movements. Long-term debt also includes payments under capital lease obligations of \$3 million, \$4 million, \$0 and \$29 million, in the less than one year, one to three years, three to five years and more than five years categories, respectively.

Collateral financing arrangements bear interest at fixed and variable interest rates through their respective maturity dates. Interest on fixed rate debt was computed using the stated rate on the obligations through maturity. Interest on variable rate debt is computed using prevailing rates at September 30, 2009 and, as such, does not consider the impact of future rate movements. Pursuant to these collateral financing arrangements, the Holding Company may be required to deliver cash or pledge collateral to the respective unaffiliated financial institutions. See The Holding Company Global Funding Sources.

Junior subordinated debt securities bear interest at fixed interest rates through their respective redemption dates. Interest was computed using the stated rates on the obligations through the scheduled redemption dates as it is the Company s expectation that the debt will be redeemed at that time. Inclusion of interest payments on junior subordinated debt through the final maturity dates would increase the contractual obligation by \$4.1 billion.

(5) The Company has accepted cash collateral in connection with securities lending and derivative transactions. As the securities lending transactions expire within the next year or the timing of the return of the collateral is uncertain, the return of the collateral has been included in the less than one year category in the table above. The Company also holds non-cash collateral, which is not reflected as a liability in the consolidated balance sheet, of \$623 million at September 30, 2009.

- (6) The Company commits to lend funds under mortgage loans, partnerships, bank credit facilities, bridge loans and private corporate bond investments. In the table above, the timing of the funding of mortgage loans and private corporate bond investments is based on the expiration date of the commitment. As it relates to commitments to lend funds to partnerships and under bank credit facilities, the Company anticipates that these amounts could be invested any time over the next five years; however, as the timing of the fulfillment of the obligation cannot be predicted, such obligations are presented in the less than one year category in the table above. Commitments to fund bridge loans are short-term obligations and, as a result, are presented in the less than one year category in the table above. See Off-Balance Sheet Arrangements.
- (7) As a lessee, the Company has various operating leases, primarily for office space. Contractual provisions exist that could increase or accelerate those leases obligations presented, including various leases with early buyouts

and/or escalation clauses. However, the impact of any such transactions would not be material to the Company s financial position or results of operations. See Off-Balance Sheet Arrangements.

(8) Other includes those other liability balances which represent contractual obligations, as well as other miscellaneous contractual obligations of \$16 million not included elsewhere in the table above. Other liabilities presented in the table above are principally comprised of amounts due under reinsurance arrangements, payables related to securities purchased but not yet settled, securities sold short, accrued interest on debt obligations, estimated fair value of derivative obligations, deferred compensation arrangements, guaranty liabilities, the estimated fair value of forward stock purchase contracts, as well as general accruals and accounts payable due under contractual obligations. If the timing of any of the other liabilities is sufficiently uncertain, the amounts are included within the less than one year category.

The other liabilities presented in the table above differs from the amount presented in the consolidated balance sheet by \$4.1 billion due primarily to the exclusion of items such as legal liabilities, pension and postretirement benefit obligations, taxes due other than income tax, unrecognized tax benefits and related accrued interest, accrued severance and employee incentive compensation and other liabilities such as deferred gains and losses. Such items have been excluded from the table above as they represent accounting conventions or are not liabilities due under contractual obligations.

The net funded status of the Company s pension and other postretirement liabilities included within other liabilities has been excluded from the amounts presented in the table above. Rather, the amounts presented represent the discretionary contributions of \$53 million, based on the current year s expected gross benefit payments to participants, to be made by the Company to the postretirement benefit plans during 2009. Virtually all contributions to the pension and postretirement benefit plans are made by the insurance subsidiaries of the Holding Company with little impact on the Holding Company s cash flows.

Excluded from the table above are unrecognized tax benefits and accrued interest of \$768 million and \$191 million, respectively, for which the Company cannot reliably determine the timing of payment. Current income tax payable is also excluded from the table.

See also Off-Balance Sheet Arrangements.

Separate account liabilities are excluded from the table above. Generally, the separate account owner, rather than the Company, bears the investment risk of these funds. The separate account assets are legally segregated and are not subject to the claims that arise out of any other business of the Company. Net deposits, net investment income and realized and unrealized capital gains and losses on the separate accounts are fully offset by corresponding amounts credited to contractholders whose liability is reflected with the separate account liabilities. Separate account liabilities are fully funded by cash flows from the separate account assets and are set equal to the estimated fair value of separate account assets.

The Company also enters into agreements to purchase goods and services in the normal course of business; however, these purchase obligations are not material to its consolidated results of operations or financial position at September 30, 2009.

Additionally, the Company has agreements in place for services it conducts, generally at cost, between subsidiaries relating to insurance, reinsurance, loans, and capitalization. Intercompany transactions have appropriately been eliminated in consolidation. Intercompany transactions among insurance subsidiaries and affiliates have been approved by the appropriate departments of insurance as required.

Support Agreements. The Holding Company and several of its subsidiaries (each, an Obligor) are parties to various capital support commitments, guarantees and contingent reinsurance agreements with certain subsidiaries of the Holding Company and a corporation in which the Holding Company owns 50% of the equity. Under these arrangements, each Obligor, with respect to the applicable entity, has agreed to cause such entity to meet specified capital and surplus levels, has guaranteed certain contractual obligations or has agreed to provide, upon the occurrence of certain contingencies, reinsurance for such entity s insurance liabilities. Management anticipates that in the event that these arrangements place demands upon the Company, there will be sufficient liquidity and capital to enable the Company to meet anticipated demands. See The Holding Company Liquidity and Capital Uses Support Agreements.

176

Litigation. Putative or certified class action litigation and other litigation, and claims and assessments against the Company, in addition to those discussed elsewhere herein and those otherwise provided for in the Company s consolidated financial statements, have arisen in the course of the Company s business, including, but not limited to, in connection with its activities as an insurer, employer, investor, investment advisor and taxpayer. Further, state insurance regulatory authorities and other federal and state authorities regularly make inquiries and conduct investigations concerning the Company s compliance with applicable insurance and other laws and regulations.

It is not possible to predict or determine the ultimate outcome of all pending investigations and legal proceedings or provide reasonable ranges of potential losses except as noted elsewhere herein in connection with specific matters. In some of the matters referred to herein, very large and/or indeterminate amounts, including punitive and treble damages, are sought. Although in light of these considerations, it is possible that an adverse outcome in certain cases could have a material adverse effect upon the Company s financial position, based on information currently known by the Company s management, in its opinion, the outcome of such pending investigations and legal proceedings are not likely to have such an effect. However, given the large and/or indeterminate amounts sought in certain of these matters and the inherent unpredictability of litigation, it is possible that an adverse outcome in certain matters could, from time to time, have a material adverse effect on the Company s consolidated net income or cash flows in particular quarterly or annual periods.

Fair Value. The estimated fair value of the Company s fixed maturity securities, equity securities, trading securities, short-term investments, derivatives, and embedded derivatives along with their fair value hierarchy, are described and disclosed in Note 19 of the Notes to the Interim Condensed Consolidated Financial Statements and Investments.

Unprecedented credit and equity market conditions have resulted in difficulty in valuing certain asset classes due to inactive or disorderly markets and less observable market data. Rapidly changing market conditions and less liquid markets could materially change the valuation of securities within our consolidated financial statements and period-to-period changes in value could vary significantly. The ultimate value at which securities may be sold could differ significantly from the valuations reported within the consolidated financial statements and could impact our liquidity.

Further, recent events have prompted accounting standard setters and law makers to study the definition and application of fair value accounting. It appears likely that further disclosures regarding the application of, and amounts carried at, fair value will be required.

Consolidated Cash Flows. Net cash provided by operating activities was \$2.7 billion for the nine months ended September 30, 2009 as compared to \$7.0 billion for the nine months ended September 30, 2008. Accordingly, net cash provided by operating activities decreased by \$4.3 billion for the nine months ended September 30, 2009 as compared to the nine months ended September 30, 2009 as compared to the nine months ended September 30, 2009 as compared to the nine months ended September 30, 2009 was a loss of \$2.6 billion as compared to a profit of \$2.3 billion for the nine months ended September 30, 2008. Accordingly, the decrease in net income of \$4.9 billion exceeded the \$4.3 billion decrease in net cash provided by operating activities for the nine months ended September 30, 2008. Excluding the change in net income, the Company s net cash provided by operating activities was \$5.3 billion for the nine months ended September 30, 2009 compared with \$4.7 billion for the nine months ended September 30, 2008. The net cash generated from operating activities is used to meet the Company s liquidity needs, such as debt and dividend payments, and provides cash available for investing activities. Cash flows from operations are affected by the timing of receipt of premiums and other revenues, as well as the payment of the Company s insurance liabilities.

Net cash used in financing activities was \$4.1 billion for the nine months ended September 30, 2009 as compared to net cash provided by financing activities of \$9.2 billion for the nine months ended September 30, 2008. Accordingly, net cash provided by financing activities decreased by \$13.3 billion for the nine months ended September 30, 2009 as compared to the nine months ended September 30, 2008. Since the third quarter of 2008, the

Company has reduced securities lending activities in line with market conditions, which resulted in a decrease of \$2.2 billion in the cash collateral received in connection with the securities lending program for the nine months ended September 30, 2009, compared to a \$2.1 billion decrease for the nine months ended September 30, 2008. The Company also experienced a \$4.4 billion decrease in cash collateral received under derivatives transactions for the nine months ended September 30, 2008. The cash collateral received under derivatives transactions for the nine months ended September 30, 2008. The cash collateral received under derivatives transactions for the september 30, 2008. The cash collateral received under derivatives transactions is invested in cash, cash equivalents and other short-term investments. Primarily as a result of unfavorable market conditions for the issuance of funding agreements and funding agreement-backed notes during most of the period, net cash flows from policyholder account balances decreased by \$0.8 billion for the nine months ended September 30, 2009, there was a net issuance of long-term debt and junior subordinated debt of \$2.9 billion compared to \$1.6 billion net issuance of long-term debt and junior subordinated debt in the nine months ended September 30, 2008. Finally, during the nine months ended September 30, 2009, the Company did not repurchase any of its common stock under its common stock repurchase programs as compared to \$1.3 billion of repurchases of its common stock during the nine months ended September 30, 2008.

Net cash used in investing activities was \$7.4 billion for the nine months ended September 30, 2009, as compared to \$6.3 billion for the nine months ended September 30, 2008. The net cash used in investing activities in the nine months ended September 30, 2009 corresponded with a net decrease of \$8.7 billion in cash and cash equivalents in the same period, reflecting the Company s effort to redeploy the elevated level of cash and cash equivalents accumulated at year-end 2008 in response to extraordinary market conditions. The net cash used in investing activities in the nine months ended September 30, 2009 was primarily composed of net purchases of \$14.6 billion of fixed maturity securities; partly offset by a net reduction of \$7.0 billion in short-term investments. In the comparable 2008 period, cash and cash equivalents increased by \$9.8 billion and short-term investments were unchanged. Of the net cash used in investing activities in the nine months ended September 30, 2009, a little over half was used for net purchases of mortgage and consumer loans.

The Holding Company

Capital

Restrictions and Limitations on Bank Holding Companies and Financial Holding Companies. The Holding Company and its insured depository institution subsidiary, MetLife Bank, are subject to risk-based and leverage capital guidelines issued by the federal banking regulatory agencies for banks and financial holding companies. The federal banking regulatory agencies are required by law to take specific prompt corrective actions with respect to institutions that do not meet minimum capital standards. At their most recently filed reports with the federal banking regulatory agencies, MetLife, Inc. and MetLife Bank met the minimum capital standards as per federal banking regulatory agencies with all of MetLife Bank s risk-based and leverage capital ratios meeting the federal banking regulatory agencies well capitalized standards and all of MetLife, Inc. s risk-based and leverage capital ratios meeting the adequately capitalized standards.

Liquidity and Capital Sources

Dividends. The primary source of the Holding Company s liquidity is dividends it receives from its insurance subsidiaries. The Holding Company s insurance subsidiaries are subject to regulatory restrictions on the payment of dividends imposed by the regulators of their respective domiciles. The dividend limitation for U.S. insurance subsidiaries is generally based on the surplus to policyholders at the immediately preceding calendar year and statutory net gain from operations for the immediately preceding calendar year. Statutory accounting practices, as prescribed by insurance regulators of various states in which the Company conducts business, differ in certain respects

from accounting principles used in financial statements prepared in conformity with GAAP. The significant differences relate to the treatment of DAC, certain deferred income tax, required investment liabilities, reserve calculation assumptions, goodwill and surplus notes. Management of the Holding Company cannot provide assurances that the Holding Company s insurance subsidiaries will have statutory earnings to support payment of dividends to the Holding Company in an amount sufficient to fund its cash requirements and pay cash dividends and

that the applicable insurance departments will not disapprove any dividends that such insurance subsidiaries must submit for approval.

The table below sets forth the dividends permitted to be paid by the respective insurance subsidiary without insurance regulatory approval:

Company	Permi Appr	009 itted w/o roval (1) nillions)
Metropolitan Life Insurance Company	\$	552
MetLife Insurance Company of Connecticut	\$	714
Metropolitan Tower Life Insurance Company	\$	88
Metropolitan Property and Casualty Insurance Company	\$	9

(1) Reflects dividend amounts that may be paid during 2009 without prior regulatory approval. However, if paid before a specified date during 2009, some or all of such dividends may require regulatory approval. None of these available amounts have been paid as of September 30, 2009.

Liquid Assets. An integral part of the Holding Company s liquidity management is the amount of liquid assets it holds. Liquid assets include cash, cash equivalents, short-term investments and publicly-traded securities. Liquid assets exclude cash collateral received under the Company s securities lending program that has been reinvested in cash, cash equivalents, short-term investments and publicly-traded securities. At September 30, 2009 and December 31, 2008, the Holding Company had 5.0 billion and \$2.7 billion in liquid assets, respectively. In addition, the Holding Company has pledged collateral and has had collateral pledged to it, and may be required from time to time to pledge additional collateral or have additional collateral pledged to it. At September 30, 2009, the Holding Company had pledged \$366 million of liquid assets under collateral support agreements. At December 31, 2008, the Holding Company had pledged \$820 million of liquid assets under collateral support agreements.

Global Funding Sources. Liquidity is also provided by a variety of short-term instruments, including commercial paper. Capital is provided by a variety of instruments, including medium- and long-term debt, junior subordinated debt securities, collateral financing arrangements, capital securities and stockholders equity. The diversity of the Holding Company s funding sources enhances funding flexibility and limits dependence on any one source of funds and generally lowers the cost of funds. Other sources of the Holding Company s liquidity include programs for short-and long-term borrowing, as needed.

Management continuously monitors and adjusts its liquidity and capital plans for the Holding Company and its subsidiaries in light of changing needs and opportunities.

At December 31, 2008, the Holding Company had \$300 million in short-term debt outstanding. There was no short-term debt outstanding at September 30, 2009. At September 30, 2009 and December 31, 2008, the Holding Company had \$10.5 billion and \$7.7 billion of unaffiliated long-term debt outstanding, respectively. At both September 30, 2009 and December 31, 2008, the Holding Company had \$500 million of affiliated long-term debt outstanding. At September 30, 2009 and December 31, 2008, the Holding Company had \$1.7 billion and \$2.3 billion of junior subordinated debt securities outstanding, respectively. At September 30, 2009 and December 31, 2008, the Holding Company had \$1.7 billion and \$2.3 billion of junior subordinated debt securities outstanding, respectively. At September 30, 2009 and December 31, 2008, the Holding Company had \$1.7 billion and \$2.8 billion and \$2.7 billion in collateral financing arrangements outstanding, respectively.

Debt Issuances and Other Borrowings. On July 8, 2009, the Holding Company issued \$500 million junior subordinated debt scheduled for redemption in August 2069. The securities bear interest at a fixed rate of 10.75%, payable semiannually. In connection with the offering, the Holding Company incurred \$5 million of issuance costs which have been capitalized and included in other assets. These costs are being amortized over the term of the notes. See Note 11 of the Notes to the Interim Condensed Consolidated Financial Statements for a description of the terms of the junior subordinated debt securities.

In May 2009, the Holding Company issued \$1,250 million senior notes due June 1, 2016. The notes bear interest at a fixed rate of 6.75%, payable semiannually. In connection with the offering, the Holding Company incurred \$6 million of issuance costs which have been capitalized and included in other assets. These costs are being amortized over the term of the notes.

In March 2009, the Holding Company issued \$397 million of senior notes due June 2012 under the FDIC Program. The notes bear interest at a floating rate equal to 3-month LIBOR, reset quarterly, plus 0.32%. In connection with the offering, the Holding Company incurred \$15 million of issuance costs which have been capitalized and included in other assets. These costs are being amortized over the term of the notes.

In February 2009, the Holding Company closed the successful remarketing of the Series B portion of the junior subordinated debt securities constituting part of its common equity units issued in June 2005. The common equity units consisted of a debt security and a stock purchase contract under which the holders of the units would be required to purchase common stock. The remarketing of the Series A portion of the junior subordinated debt securities and the associated stock purchase contract settlement occurred in August 2008. In the February 2009 remarketing, the Series B junior subordinated debt securities were modified as permitted by their terms to be 7.717% senior debt securities Series B, due February 2019. The Holding Company did not receive any proceeds from the remarketing. Most common equity unit holders chose to have their junior subordinated debt securities remarketed and used the remarketing proceeds to settle their payment obligations under the stock purchase contracts. For those common equity unit holders that elected not to participate in the remarketing and elected to use their own cash to satisfy the payment obligations under the stock purchase contracts, the terms of the debt they received are the same as the terms of the remarketed debt. The subsequent settlement of the stock purchase contracts provided proceeds to the Holding Company delivered 24,343,154 shares of its newly issued common stock to settle the stock purchase contracts in February 2009.

Collateral Financing Arrangements. As described more fully in Note 10 of the Notes to the Interim Condensed Consolidated Financial Statements:

In December 2007, the Holding Company, in connection with the collateral financing arrangement associated with MetLife Reinsurance Company of Charleston s (MRC) reinsurance of the closed block liabilities, entered into an agreement with an unaffiliated financial institution that referenced the \$2.5 billion surplus note issued by MRC. Under the agreement, the Holding Company is entitled to the interest paid by MRC on the surplus note of 3-month LIBOR plus 0.55% in exchange for the payment of 3-month LIBOR plus 1.12%, payable quarterly on such amount as adjusted, as described below.

Under this agreement, the Holding Company may also be required to pledge collateral or make payments to the unaffiliated financial institution related to any decline in the estimated fair value of the surplus note. Any such payments would be accounted for as a receivable and included in other assets on the Company s consolidated balance sheets and would not reduce the principal amount outstanding of the surplus note. Such payments would, however, reduce the amount of interest payments due from the Holding Company under the agreement. Any payment received from the unaffiliated financial institution would reduce the receivable by an amount equal to such payment and increase the amount of interest payments due from the Holding Company under the agreement. In addition, the unaffiliated financial institution may be required to pledge collateral to the Holding Company related to any increase in the estimated fair value of the surplus note. At December 31, 2008, the Company had paid \$800 million and had pledged collateral with an estimated fair value of \$230 million to the unaffiliated financial institution. As a result of continued fluctuations in the estimated fair value of the surplus note, the Holding Company paid an additional \$400 million to the unaffiliated financial institution. At September 30, 2009, the unaffiliated financial institution had pledged

collateral with an estimated fair value of \$257 million to the Holding Company related to an increase in estimated fair value of the surplus note. On October 22, 2009, the Holding Company received \$244 million from the unaffiliated financial institution, which reduced the amount of collateral pledged by the unaffiliated financial institution to the Holding Company in connection with the

collateral financing agreement. The Holding Company may also be required to make a payment to the unaffiliated financial institution in connection with any early termination of this agreement.

In May 2007, the Holding Company, in connection with the collateral financing arrangement associated with MetLife Reinsurance Company of South Carolina s (MRSC) reinsurance of universal life secondary guarantees, entered into an agreement with an unaffiliated financial institution under which the Holding Company is entitled to the return on the investment portfolio held by a trust established in connection with this collateral financial institution of 3-month LIBOR plus 0.70%, payable quarterly. The collateral financing agreement may be extended by agreement of the Holding Company and the unaffiliated financial institution on each anniversary of the closing. The Holding Company may also be required to make payments to the unaffiliated financial institution, for deposit into the trust, related to any decline in the estimated fair value of the assets held by the trust, as well as amounts outstanding upon maturity or early termination of the collateral financing arrangement.

In January 2009, the Holding Company paid \$360 million to the unaffiliated financial institution as a result of the decline in the estimated fair value of the assets in the trust. Cumulatively, the Holding Company has contributed \$680 million as a result of declines in the estimated fair value of the assets in the trust through September 30, 2009, all of which was deposited into the trust.

In addition, the Holding Company may be required to pledge collateral to the unaffiliated financial institution under this agreement. At September 30, 2009 and December 31, 2008, the Holding Company had pledged \$76 million and \$86 million under the agreement, respectively.

Other. On March 2, 2009, the Company completed the sale of Cova, the parent company of Texas Life, for a purchase price of \$134 million, excluding \$1 million of transaction costs. The proceeds of the transaction were paid to the Holding Company.

Credit and Committed Facilities. In 2007, the Holding Company and MetLife Funding entered into a \$2.9 billion credit agreement with various financial institutions. The proceeds of the unsecured credit facility are available to be used for general corporate purposes, as back-up for their commercial paper programs and for the issuance of letters of credit. At September 30, 2009, the Holding Company had outstanding \$537 million in letters of credit and no aggregate drawdowns against this facility.

The Holding Company also maintains or guarantees committed facilities aggregating \$11.3 billion at September 30, 2009. The committed facilities are used for collateral for certain of the Company s affiliated reinsurance liabilities. At September 30, 2009, the Holding Company had outstanding \$300 million in letters of credit and no aggregate drawdowns against these facilities.

See The Company Liquidity and Capital Sources Credit and Committed Facilities.

Covenants. Certain of the Holding Company s debt instruments, credit facilities and committed facilities contain various administrative, reporting, legal and financial covenants. The Holding Company believes it is in compliance with all covenants at September 30, 2009.

Liquidity and Capital Uses

The primary uses of liquidity of the Holding Company include debt service, cash dividends on common and preferred stock, capital contributions to subsidiaries, payment of general operating expenses, acquisitions and the repurchase of

Table of Contents

the Holding Company s common stock.

Dividends

Future common stock dividend decisions will be determined by the Holding Company s Board of Directors after taking into consideration factors such as the Company s current earnings, expected medium- and long-term earnings, financial condition, regulatory capital position, and applicable governmental regulations and policies. Furthermore, the payment of dividends and other distributions to the Holding Company by its insurance subsidiaries is regulated by insurance laws and regulations.

Information on the declaration, record and payment dates, as well as per share and aggregate dividend amounts, for the Holding Company s Floating Rate Non-Cumulative Preferred Stock, Series A and 6.50% Non-Cumulative Preferred Stock, Series B is as follows for the nine months ended September 30, 2009:

				Se	eries			
			Series A		A	Series B		В
Declaration Date	Record Date	Payment Date	Per Share	Aggı	regate	Per Share	Agg	regate
			(In mil	lions,	excep	t per share da	ata)	
August 17, 2009	August 31, 2009	September 15, 2009	\$ 0.2555555	\$	6	\$ 0.4062500	\$	24
May 15, 2009	May 31, 2009	June 15, 2009	\$ 0.2555555		7	\$ 0.4062500		24
March 5, 2009	February 28, 2009	March 16, 2009	\$ 0.2500000		6	\$ 0.4062500		24
				\$	19		\$	72

Affiliated Capital Transactions. During the nine months ended September 30, 2009 and 2008, the Holding Company invested an aggregate of \$828 million and \$1.5 billion, respectively, in various subsidiaries.

The Holding Company lends funds, as necessary, to its subsidiaries, some of which are regulated, to meet their capital requirements. Such loans are included in loans to subsidiaries and consisted of the following at:

Subsidiaries	Interest Rate	Maturity Date	Septeml 20()9	December 31, 2008 hillions)		
Metropolitan Life Insurance	3-month LIBOR +	December 31,					
Company	1.15%	2009	\$	700	\$	700	
Metropolitan Life Insurance		December 15,					
Company	7.13%	2032		400		400	
Metropolitan Life Insurance							
Company	7.13%	January 15, 2033		100		100	
Total			\$	1,200	\$	1,200	
				,		,	

Share Repurchases. At September 30, 2009, the Company had \$1,261 million remaining on the April 2008 and January 2008 common stock repurchase authorizations. The Company does not intend to make any purchases under the common stock repurchase programs in 2009.

Support Agreements. The Holding Company is party to various capital support commitments and guarantees with certain of its subsidiaries and a corporation in which it owns 50% of the equity. Under these arrangements, the Holding Company has agreed to cause each such entity to meet specified capital and surplus levels or has guaranteed certain contractual obligations. See the 2008 Annual Report for a description of various support arrangements of the Holding Company.

Management anticipates that in the event that these arrangements place demands upon the Holding Company, there will be sufficient liquidity and capital to enable the Holding Company to meet anticipated demands.

Based on management s analysis and comparison of its current and future cash inflows from the dividends it receives from subsidiaries that are permitted to be paid without prior insurance regulatory approval, its asset portfolio and other cash flows and anticipated access to the capital markets, management believes there will be sufficient liquidity and capital to enable the Holding Company to make payments on debt, make cash dividend payments on its common and preferred stock, contribute capital to its subsidiaries, pay all operating expenses and meet its cash needs.

Holding Company Cash Flows. Net cash provided by operating activities was \$61 million and \$453 million for the nine months ending September 30, 2009 and 2008, respectively. Accordingly, net cash provided by operating activities decreased by \$392 million for the nine months ended September 30, 2009 as compared to the nine months ended September 30, 2008. The net cash generated from operating activities is used to meet the Holding Company s liquidity needs, such as debt and dividend payments, and provides cash available for investing activities. Cash flows from operations represent net income earned adjusted for non-cash charges and changes in operating assets and

182

liabilities. The 2008 and 2009 operating activities included net income and earnings from subsidiaries, and changes in current assets and liabilities.

Net cash provided by financing activities was \$2.9 billion for the nine months ended September 30, 2009 compared to \$788 million of net cash used for the nine months ended September 30, 2008. Accordingly, net cash provided by financing activities increased by \$3.7 billion for the nine months ended September 30, 2009 compared to the nine months ended September 30, 2008. During the nine months ended September 30, 2009, there was a net issuance of \$2.1 billion of long-term debt and junior subordinated debt compared to no net issuance in the comparable period of the prior year. Also, in order to strengthen its capital base, during the nine months ended September 30, 2009, the Holding Company did not repurchase any of its common stock under its common stock repurchase programs as compared to the Holding Company repurchasing \$1.3 billion of its common stock in the comparable period of the prior year. An increase in securities lending activity during the nine months ended September 30, 2009 contributed an increase of \$153 million to the Holding Company s cash flows from financing activities compared to a decrease of \$291 million in cash flows from financing activities from securities lending in the comparable period of the prior year. Partially offsetting these increases in cash flows in the current period, the Holding Company repaid \$300 million of short-term debt during the nine months ended September 30, 2009, compared with no repayments during the nine months ended September 30, 2008. Financing activity results relate to the Holding Company s debt and equity financing activities, as well as changes due to the needs and obligations arising from securities lending and collateral financing arrangements.

Net cash used in investing activities was \$2.6 billion for the nine months ended September 30, 2009 compared to \$527 million of net cash provided by investing activities for the nine months ended September 30, 2008. Accordingly, net cash provided by investing activities decreased by \$3.2 billion for the nine months ended September 30, 2009 compared to the prior period. Net purchases of fixed maturity securities for the nine months ended September 30, 2009 were above the comparable 2008 period primarily due to the investment of the net proceeds from the issuance of \$2.1 billion of long-term debt and junior subordinated debt described above. Investing activity results relate to the Holding Company s management of its capital and the capital of its subsidiaries, and any business development opportunities. The Holding Company received \$130 million for the sale of a subsidiary during the nine months ended September 30, 2009 as compared to the use of \$202 million related to acquisitions during the nine months ended September 30, 2008. The Holding Company also made capital contributions of \$730 million to subsidiaries (including \$360 million paid pursuant to a collateral financing arrangement providing statutory reserve support for MRSC associated with its intercompany reinsurance obligations relating to the reinsurance of universal life secondary Collateral Financing Arrangements) during the nine months ended guarantees, as described above under September 30, 2009, compared to \$788 million (including \$205 million paid pursuant to the collateral financing arrangement related to MRSC) during the nine months ended September 30, 2008.

During the nine months ended September 30, 2009, the Holding Company paid \$91 million in dividends on its Series A and Series B preferred shares.

Subsequent Events

On November 3, 2009, the date the September 30, 2009 interim condensed consolidated financial statements of MetLife, Inc. were issued, the Company evaluated the recognition and disclosure of subsequent events.

On October 27, 2009, the Company s Board of Directors approved an annual dividend for 2009 of \$0.74 per common share payable on December 14, 2009 to stockholders of record as of November 9, 2009. The Company estimates the aggregate dividend payment to be \$606 million.

On October 22, 2009, the Holding Company received \$244 million from an unaffiliated financial institution related to the increase in the estimated fair value of the surplus note issued by MRC in connection with the collateral financing arrangement associated with MRC s reinsurance of the closed block liabilities, as described in Note 10 of the Notes to the Interim Condensed Consolidated Financial Statements.

Off-Balance Sheet Arrangements

Commitments to Fund Partnership Investments

The Company makes commitments to fund partnership investments in the normal course of business for the purpose of enhancing the Company s total return on its investment portfolio. The amounts of these unfunded commitments were \$4.1 billion and \$4.5 billion at September 30, 2009 and December 31, 2008, respectively. The Company anticipates that these amounts will be invested in partnerships over the next five years. There are no other obligations or liabilities arising from such arrangements that are reasonably likely to become material.

Mortgage Loan Commitments

The Company has issued interest rate lock commitments on certain residential mortgage loan applications totaling \$4.2 billion and \$8.0 billion at September 30, 2009 and December 31, 2008, respectively. The Company intends to sell the majority of these originated residential mortgage loans. Interest rate lock commitments to fund mortgage loans that will be held-for-sale are considered derivatives pursuant to the guidance on derivatives and hedging, and their estimated fair value and notional amounts are included within interest rate forwards.

The Company also commits to lend funds under certain other mortgage loan commitments that will be held-for-investment. The amounts of these mortgage loan commitments were \$3.5 billion and \$2.7 billion at September 30, 2009 and December 31, 2008, respectively.

The purpose of the Company s loan program is to enhance the Company s total return on its investment portfolio. There are no other obligations or liabilities arising from such arrangements that are reasonably likely to become material.

Commitments to Fund Bank Credit Facilities, Bridge Loans and Private Corporate Bond Investments

The Company commits to lend funds under bank credit facilities, bridge loans and private corporate bond investments. The amounts of these unfunded commitments were \$932 million and \$971 million at September 30, 2009 and December 31, 2008, respectively. There are no other obligations or liabilities arising from such arrangements that are reasonably likely to become material.

Lease Commitments

The Company, as lessee, has entered into various lease and sublease agreements for office space, data processing and other equipment. The Company s commitments under such lease agreements are included within the contractual obligations table. See Liquidity and Capital Resources The Company Liquidity and Capital Uses Investment and Other.

Credit Facilities, Committed Facilities and Letters of Credit

The Company maintains committed and unsecured credit facilities and letters of credit with various financial institutions. See Liquidity and Capital Resources The Company Liquidity and Capital Sources Credit Facilities, Committed Facilities and Letters of Credit for further descriptions of such arrangements.

Guarantees

During the nine months ended September 30, 2009, the Company did not record additional liabilities for indemnities, guarantees and commitments. The Company s recorded liabilities were \$6 million at both September 30, 2009 and

Table of Contents

December 31, 2008.

Other Commitments

MetLife Insurance Company of Connecticut is a member of the Federal Home Loan Bank of Boston and holds \$70 million of common stock of the FHLB of Boston at both September 30, 2009 and December 31, 2008, which is included in equity securities. MICC has also entered into funding agreements with the FHLB of Boston whereby MICC has issued such funding agreements in exchange for cash and for which the FHLB of Boston has been

granted a blanket lien on certain MICC assets, including residential mortgage-backed securities, to collateralize MICC s obligations under the funding agreements. MICC maintains control over these pledged assets, and may use, commingle, encumber or dispose of any portion of the collateral as long as there is no event of default and the remaining qualified collateral is sufficient to satisfy the collateral maintenance level. Upon any event of default by MICC, the FHLB of Boston s recovery on the collateral is limited to the amount of MICC s liability to the FHLB of Boston. The amount of the Company s liability for funding agreements with the FHLB of Boston was \$326 million and \$526 million at September 30, 2009 and December 31, 2008, respectively, which is included in policyholder account balances. MICC had no advances from the FHLB of Boston with original maturities of less than one year and therefore, such advances were included in short-term debt. These advances and the advances on these funding agreements are collateralized by mortgage-backed securities with estimated fair values of \$424 million and \$1,284 million at September 30, 2009 and December 31, 2008, respectively.

Metropolitan Life Insurance Company is a member of the FHLB of NY and holds \$769 million and \$830 million of common stock of the FHLB of NY at September 30, 2009 and December 31, 2008, respectively, which is included in equity securities. MLIC has also entered into funding agreements with the FHLB of NY whereby MLIC has issued such funding agreements in exchange for cash and for which the FHLB of NY has been granted a lien on certain MLIC assets, including residential mortgage-backed securities, to collateralize MLIC s obligations under the funding agreements. MLIC maintains control over these pledged assets, and may use, commingle, encumber or dispose of any portion of the collateral as long as there is no event of default and the remaining qualified collateral is sufficient to satisfy the collateral maintenance level. Upon any event of default by MLIC, the FHLB of NY s recovery on the collateral is limited to the amount of MLIC s liability to the FHLB of NY. The amount of the Company s liability for funding agreements with the FHLB of NY was \$14.3 billion and \$15.2 billion at September 30, 2009 and December 31, 2008, respectively, which is included in policyholder account balances. The advances on these agreements are collateralized by mortgage-backed securities with estimated fair values of \$15.8 billion and \$17.8 billion at September 30, 2009 and December 31, 2008, respectively.

MetLife Bank is a member of the FHLB of NY and holds \$122 million and \$89 million of common stock of the FHLB of NY at September 30, 2009 and December 31, 2008, respectively, which is included in equity securities. MetLife Bank has also entered into repurchase agreements with the FHLB of NY whereby MetLife Bank has issued repurchase agreements in exchange for cash and for which the FHLB of NY has been granted a blanket lien on certain of MetLife Bank s residential mortgages, mortgage loans held-for-sale, commercial mortgages and mortgage-backed securities to collateralize MetLife Bank s obligations under the repurchase agreements. MetLife Bank maintains control over these pledged assets, and may use, commingle, encumber or dispose of any portion of the collateral as long as there is no event of default and the remaining qualified collateral is sufficient to satisfy the collateral maintenance level. The repurchase agreements and the related security agreement represented by this blanket lien provide that upon any event of default by MetLife Bank, the FHLB of NY s recovery is limited to the amount of MetLife Bank s liability under the outstanding repurchase agreements. The amount of MetLife Bank s liability for repurchase agreements entered into with the FHLB of NY was \$2.4 billion and \$1.8 billion at September 30, 2009 and December 31, 2008, respectively, which is included in long-term debt and short-term debt depending upon the original tenor of the advance. During the nine months ended September 30, 2009 and 2008, MetLife Bank received advances related to long-term borrowings totaling \$950 million and \$945 million, respectively, from the FHLB of NY. MetLife Bank made repayments to the FHLB of NY of \$220 million and \$171 million related to long-term borrowings for the nine months ended September 30, 2009 and 2008, respectively. The advances on the repurchase agreements related to both long-term and short-term debt were collateralized by residential mortgages, mortgage loans held-for-sale, commercial mortgages and mortgage-backed securities with estimated fair values of \$4.4 billion and \$3.1 billion at September 30, 2009 and December 31, 2008, respectively.

Collateral for Securities Lending

The Company has non-cash collateral for securities lending on deposit from customers, which cannot be sold or repledged, and which has not been recorded on its consolidated balance sheets. The amount of this collateral was \$40 million and \$279 million at September 30, 2009 and December 31, 2008, respectively.

Goodwill

Goodwill is the excess of cost over the estimated fair value of net assets acquired. Goodwill is not amortized but is tested for impairment at least annually or more frequently if events or circumstances, such as adverse changes in the business climate, indicate that there may be justification for conducting an interim test. Impairment testing is performed using the fair value approach, which requires the use of estimates and judgment, at the reporting unit level. A reporting unit is the operating segment or a business one level below the operating segment, if discrete financial information is prepared and regularly reviewed by management at that level.

Corporate & Other (1)		470		470
m - 1	¢	5.022	¢	5 000
Total	\$	5,033	\$	5,008

(1) The allocation of the goodwill to the reporting units was performed at the time of the respective acquisition. The \$470 million of goodwill within Corporate & Other relates to goodwill acquired as a part of the Travelers acquisition of \$405 million, as well as acquisitions by MetLife Bank which resides within Corporate & Other. For purposes of goodwill impairment testing, the \$405 million of Corporate & Other goodwill has been attributed to the Individual and Institutional segment reporting units. The Individual segment was attributed \$210 million (traditional life \$23 million, variable & universal life \$11 million and annuities

\$176 million), and the Institutional segment was attributed \$195 million (group life \$2 million, retirement & savings \$186 million, and non-medical health & other \$7 million) at both September 30, 2009 and December 31, 2008.

For purposes of goodwill impairment testing, if the carrying value of a reporting unit s goodwill exceeds its estimated fair value, there is an indication of impairment, and the implied fair value of the goodwill is determined in the same manner as the amount of goodwill would be determined in a business acquisition. The excess of the carrying value of goodwill over the implied fair value of goodwill is recognized as an impairment and recorded as a charge against net income. The Company performed its annual goodwill impairment tests during the third quarter of 2009 based upon data at June 30, 2009. The impairment tests indicated that goodwill was not impaired. Previously, due to economic conditions, the sustained low level of equity markets, declining market capitalizations in the insurance industry and lower operating earnings projections, particularly for the Individual segment, management performed an interim goodwill impairment test at December 31, 2008 and again, for certain reporting units most affected by the current economic environment, at March 31, 2009. Based upon the tests performed, management concluded no impairment of goodwill had occurred for any of the Company s reporting units at March 31, 2009 and December 31, 2008.

In performing its goodwill impairment tests, when management believes meaningful comparable market data are available, the estimated fair values of the reporting units are determined using a market multiple approach. When relevant comparables are not available, the Company uses a discounted cash flow model. For reporting units which are particularly sensitive to market assumptions, such as the annuities and variable & universal life reporting units within the Individual segment, the Company may corroborate its estimated fair values by using additional valuation methodologies.

The key inputs, judgments and assumptions necessary in determining estimated fair value include projected earnings, current book value (with and without accumulated other comprehensive loss), the capital required to support the mix of business, long-term growth rates, comparative market multiples, the account value of in-force business, projections of new and renewal business, as well as margins on such business, the level of interest rates, credit spreads, equity market levels and the discount rate management believes appropriate to the risk associated with the respective reporting unit. The estimated fair value of the annuity and variable & universal life reporting units are particularly sensitive to the equity market levels.

When testing goodwill for impairment, management also considers the Company s market capitalization in relation to its book value. Management believes that the overall decrease in the Company s current market capitalization is not representative of a long-term decrease in the value of the underlying reporting units.

Management applies significant judgment when determining the estimated fair value of the Company s reporting units. The valuation methodologies utilized are subject to key judgments and assumptions that are sensitive to change. Estimates of fair value are inherently uncertain and represent only management s reasonable expectation regarding future developments. These estimates and the judgments and assumptions upon which the estimates are based will, in all likelihood, differ in some respects from actual future results. Declines in the estimated fair value of the Company s reporting units could result in goodwill impairments in future periods which could materially adversely affect the Company s results of operations or financial position.

Management continues to evaluate current market conditions that may affect the estimated fair value of the Company s reporting units to assess whether any goodwill impairment exists. Any additional deterioration or adverse market conditions for certain reporting units may have a significant impact on the estimated fair value of these reporting units and could result in future impairments of goodwill.

DAC and VOBA

Note 5 of the Notes to the Interim Condensed Consolidated Financial Statements provides a rollforward of DAC and VOBA for the Company for the nine months ended September 30, 2009, as well as a breakdown of DAC and VOBA by segment and reporting unit at September 30, 2009 and December 31, 2008. At September 30, 2009, DAC and VOBA for the Company was \$19.2 billion. A substantial portion, approximately 79%, of the Company s DAC and VOBA is associated with the Individual segment, which had DAC and VOBA of \$15.2 billion at

September 30, 2009. Amortization of DAC and VOBA associated with the variable & universal life and the annuities reporting units within the Individual segment are significantly impacted by movements in equity markets. The following chart illustrates the effect on DAC and VOBA within the Company s Individual segment of changing each of the respective assumptions, as well as updating estimated gross margins or profits with actual gross margins or profits for the three months and nine months ended September 30, 2009 and 2008, respectively. Increases (decreases) in DAC and VOBA balances, as presented below, result in a corresponding decrease (increase) in amortization.

	Three Months Ended September 30,			/Ionths ded Iber 30,							
	2009	2008	2009	2008							
	(In millions)										
Investment return	\$ 57	\$ 1	\$ 107	\$ (31)							
Separate account balances	46	(171)	(60)	(287)							
Net investment gain (loss) related	175	(1)	616	258							
Expense	2	7	(6)	11							
In-force/Persistency	22	(33)	30	(52)							
Policyholder dividends and other	45	(14)	113	(40)							
Total	\$ 347	\$ (211)	\$ 800	\$ (141)							

Prior to late 2008, fluctuations in the amounts presented in the table above arose principally from normal assumption reviews during the period. The following represents significant items contributing to the changes to DAC and VOBA amortization in 2009.

For the Three Months Ended September 30, 2009:

Actual gross profits decreased as a result of increased losses from the portfolio associated with the hedging of guaranteed insurance obligations on variable annuities, resulting in a decrease of DAC and VOBA amortization of \$57 million.

The increase in equity markets during the quarter increased separate account balances resulting in an increase in expected future gross profits on variable universal life contracts and variable deferred annuity contracts resulting in a decrease of \$46 million in DAC and VOBA amortization

Changes in net investment gains (losses) resulted in the following changes in DAC and VOBA amortization:

- Actual gross profits increased as a result of a decrease in liabilities associated with guarantee obligations on variable annuities resulting in an increase of DAC and VOBA amortization of \$128 million, excluding the impact from the Company s own credit and risk margins, which are described below. This increase in actual gross profits was partially offset by freestanding derivative losses associated with the hedging of such guarantee obligations which resulted in a decrease in DAC and VOBA amortization of \$79 million.
- A change in valuation of guarantee liabilities, resulting from the adoption of fair value measurements guidance during 2008, also impacted the computation of actual gross profits and the related amortization of DAC and VOBA. The inclusion of these valuation changes increases the volatility of the related DAC and

VOBA amortization, and the net income of the Company. Higher risk margins increased the guarantee liability valuations, decreased actual gross profits and decreased amortization by \$21 million. In addition, the narrowing of own credit spreads increased the valuation of guarantee liabilities, decreased actual gross profits and decreased amortization by \$197 million.

- The remainder of the impact of net investment gains (losses), which decreased DAC amortization by \$6 million, was primarily attributable to current period investment activities.

Included in policyholder dividends and other is a decrease of amortization of \$13 million due to lower actual gross margins from the closed block in the current period. The remainder of the decrease is due to various

188

immaterial items. Note 8 of the Notes to the Interim Condensed Consolidated Financial Statements provides additional information on the closed block business.

For the Nine Months Ended September 30, 2009:

Actual gross profits decreased as a result of increased losses from the portfolio associated with the hedging of guaranteed insurance obligations on variable annuities, resulting in a decrease of DAC and VOBA amortization of \$107 million.

The decrease in amortization due to the increase in equity markets during the second and third quarter did not fully offset the increase in amortization from the decrease in the equity markets during the first quarter of 2009. As a result, the impact of the separate account performance resulted in a decrease in expected future gross profits on variable universal life contracts and variable deferred annuity contracts resulting in an increase of \$60 million in DAC and VOBA amortization.

Changes in net investment gains (losses) resulted in the following changes in DAC and VOBA amortization:

- Actual gross profits increased as a result of a decrease in liabilities associated with guarantee obligations on variable annuities resulting in an increase of DAC and VOBA amortization of \$758 million, excluding the impact from the Company s own credit and risk margins, which are described below. This increase in actual gross profits was partially offset by freestanding derivative losses associated with the hedging of such guarantee obligations which resulted in a decrease in DAC and VOBA amortization of \$477 million.
- A change in valuation of guarantee liabilities, resulting from the adoption of fair value measurements guidance during 2008, also impacted the computation of actual gross profits and the related amortization of DAC and VOBA. The inclusion of these valuation changes increases the volatility of the related DAC and VOBA amortization, and the net income of the Company. Lower risk margins decreased the guarantee liability valuations, increased actual gross profits and increased amortization by \$11 million. However, the narrowing of MetLife s own credit spread increased the valuation of guarantee liabilities, decreased actual gross profits and decreased amortization by \$499 million.
- The remainder of the impact of net investment gains (losses), which decreased DAC amortization by \$409 million, was primarily attributable to current period investment activities.

Included in policyholder dividends and other is a decrease of amortization of \$41 million due to lower actual gross margins from the closed block in the current period. The remainder of the decrease is due to various immaterial items. Note 8 of the Notes to the Interim Condensed Consolidated Financial Statements provides additional information on the closed block business.

The Company s DAC and VOBA balance is also impacted by unrealized investment gains (losses) and the amount of amortization which would have been recognized if such gains and losses had been recognized. The decrease in unrealized investment losses for the three months and nine months ended September 30, 2009 resulted in a decrease in DAC and VOBA of \$1.7 billion and \$2.5 billion, respectively. Notes 3 and 5 of the Notes to the Interim Condensed Consolidated Financial Statements include the DAC and VOBA offset to unrealized investment gains (losses).

Investments

Investment Risks. The Company s primary investment objective is to optimize, net of income tax, risk-adjusted investment income and risk-adjusted total return while ensuring that assets and liabilities are managed on a cash flow and duration basis. The Company is exposed to four primary sources of investment risk:

credit risk, relating to the uncertainty associated with the continued ability of a given obligor to make timely payments of principal and interest;

interest rate risk, relating to the market price and cash flow variability associated with changes in market interest rates;

liquidity risk, relating to the diminished ability to sell certain investments in times of strained market conditions; and

market valuation risk.

The Company manages risk through in-house fundamental analysis of the underlying obligors, issuers, transaction structures and real estate properties. The Company also manages credit risk, market valuation risk and liquidity risk through industry and issuer diversification and asset allocation. For real estate and agricultural assets, the Company manages credit risk and market valuation risk through geographic, property type and product type diversification and asset allocation. The Company manages interest rate risk as part of its asset and liability management strategies; product design, such as the use of market value adjustment features and surrender charges; and proactive monitoring and management of certain non-guaranteed elements of its products, such as the resetting of credited interest and dividend rates for policies that permit such adjustments. The Company also uses certain derivative instruments in the management of credit and interest rate risks.

Current Environment. Precipitated by housing sector weakness and severe market dislocations, the U.S. economy entered its worst post-war recession in late 2007. Most economists believe this recession ended in June 2009. However, the expected recovery is weaker than normal, and the unemployment rate is expected to remain high for some time. Although the disruption in the global financial markets has moderated, not all global financial markets are functioning normally, and many remain reliant upon government intervention and liquidity.

As a result of this unprecedented disruption and market dislocation, we have experienced both volatility in the valuation of certain investments and decreased liquidity in certain asset classes. Securities that are less liquid are more difficult to value and have fewer opportunities for disposal. Even some of our very high quality assets have been more illiquid for periods of time as a result of the recent challenging market conditions. These market conditions had also led to an increase in unrealized losses on fixed maturity and equity securities in recent quarters, particularly for residential and commercial mortgage-backed, asset-backed and corporate fixed maturity securities and within the Company s financial services industry fixed maturity and equity securities holdings. In the third quarter of 2009, unrealized losses on fixed maturity and equity securities holdings. In the third quarter of 2009, unrealized losses on fixed maturity and equity securities holdings.

Investment Outlook

Although management anticipates that the volatility in the equity, credit and real estate markets will moderate slightly for the remainder of 2009; it could continue to impact net investment income and the related yields on private equity funds, hedge funds and real estate joint ventures, included within our other limited partnership interests and real estate and real estate joint venture, in light of the current market conditions, liquidity will be reinvested in

a prudent manner and invested according to our asset / liability management (ALM) discipline in appropriate assets over time. Considering the uncertain conditions of the equity, credit and real estate markets, management plans to continue to maintain a slightly higher than normal level of short-term liquidity. Net investment income may be adversely affected if the reinvestment process occurs over an extended period of time due to challenging market conditions or asset availability.

Composition of Investment Portfolio and Investment Portfolio Results

The following table illustrates the investment income, net investment gains (losses), annualized yields on average ending assets and ending carrying value for each of the asset classes within the Company s investment portfolio, as well as net investment income for the portfolio as a whole:

- (1) Yields are based on average of quarterly average asset carrying values, excluding recognized and unrealized investment gains (losses), and for yield calculation purposes, average of quarterly ending assets exclude collateral received from counterparties associated with the Company s securities lending program.
- (2) Fixed maturity securities include \$1,970 million and \$787 million at estimated fair value related to trading securities at September 30, 2009 and 2008, respectively. Fixed maturity securities include \$163 million and \$310 million of investment income related to trading securities for the three months and nine months ended September 30, 2009, respectively, and (\$95) million and (\$137) million of investment loss for the three months and nine months ended September 30, 2008, respectively.
- (3) Investment income from mortgage and consumer loans includes prepayment fees.
- (4) Included in investment income (loss) from real estate and real estate joint ventures is \$2 million, \$6 million, \$5 million and \$6 million from discontinued operations for the three months and nine months ended September 30, 2009 and 2008, respectively.
- (5) Included in investment income from other invested assets are scheduled periodic settlement payments on derivative instruments that do not qualify for hedge accounting under derivatives and hedging guidance of (\$4) million and \$59 million for the three months and nine months ended September 30, 2009, respectively, and (\$3) million and (\$47) million for the three months and nine months ended September 30, 2008, respectively. These amounts are excluded from investment gains (losses). Additionally, excluded from investment gains (losses) is \$1 million and (\$1) million for the three months and nine months ended September 30, 2009, respectively, and \$35 million for the three months and nine months ended September 30, 2009, respectively, and \$10 million and \$35 million for the three months and nine months ended September 30, 2008, respectively, related to settlement payments on derivative instruments used to hedge interest rate and currency risk on policyholder account balances that do not qualify for hedge accounting. Such amounts are included within interest credited to policyholder account balances.
- (6) Other invested assets are principally comprised of free-standing derivatives with positive estimated fair values and leveraged leases. Freestanding derivatives with negative estimated fair values are included within other liabilities. As yield is not considered a meaningful measure of performance for other invested assets it has been excluded from the table above.
- (7) Certain prior periods have been reclassified to conform to the current period presentation.
- (8) Derivatives not qualifying for hedge accounting is comprised of amounts for freestanding derivatives of (\$732) million and \$1,148 million; and embedded derivatives of (\$586) million and \$31 million for the three months ended September 30, 2009 and 2008, respectively. For the nine months ended September 30, 2009 and 2008, respectively, it is comprised of amounts for freestanding derivatives of (\$5,480) million and \$785 million; and embedded derivatives of \$1,424 million and (\$29) million.
- (9) Included in investment gains (losses) from other invested assets are the net results of the hedged embedded derivatives related to certain variable annuities with guarantees of consolidated entities and operating joint ventures reported under the equity method of accounting of (\$35) million and \$37 million for the three months ended September 30, 2009 and 2008, respectively. For the nine months ended September 30, 2009 and 2008, respectively. For the nine months ended September 30, 2009 and 2008, respectively. The nine months ended September 30, 2009 and 2008, respectively. The nine months ended September 30, 2009 and 2008, respectively.

(10)

Net investment income and net investment gains (losses) as presented in this table, are presented consistent with the method of presentation in the Company s Quarterly Financial Supplement. The net investment income and net investment gains (losses) presented in this table vary from the amounts presented in the Interim Condensed Consolidated Statements of Income due to certain reclassifications made between net investment income and net investment gains (losses) as described in notes 4, 5 and 9 to this table.

See Results of Operations Three Months Ended September 30, 2009 compared with the Three Months Ended September 30, 2008 Revenues and Expenses Net Investment Income and Net Investment Gains (Losses) and Results of Operations Nine Months Ended September 30, 2009 compared with the Nine Months Ended September 30, 2008 Revenues and Expenses Net Investment Income and Net Investment Gains (Losses) for an analysis of the period over period changes in net investment income and net investment gains (losses).

Fixed Maturity and Equity Securities Available-for-Sale

Fixed maturity securities consisted principally of publicly-traded and privately placed fixed maturity securities, and represented 66% and 58% of total cash and invested assets at September 30, 2009 and December 31, 2008, respectively. Based on estimated fair value, public fixed maturity securities represented \$189.0 billion, or 84%, and \$156.7 billion, or 83%, of total fixed maturity securities at September 30, 2009 and December 31, 2008, respectively. Based on estimated fair value, privately placed fixed maturity securities represented \$34.9 billion, or 16%, and \$31.6 billion, or 17%, of total fixed maturity securities at September 30, 2009 and December 31, 2008, respectively.

Valuation of Securities. Management is responsible for the determination of estimated fair value. The estimated fair value of publicly-traded fixed maturity, equity and trading securities as well as short-term investments is determined by management after considering one of three primary sources of information: quoted market prices in active markets, independent pricing services, or independent broker quotations. The number of quotes obtained varies by instrument and depends on the liquidity of the particular instrument. Generally, we obtain prices from multiple pricing services to cover all asset classes and obtain multiple prices for certain securities, but ultimately utilize the price with the highest placement in the fair value hierarchy. Independent pricing services that value these instruments use market standard valuation methodologies based on inputs that are market observable or can be derived principally from or corroborated by observable market data. Such observable inputs include benchmarking prices for similar assets in active, liquid markets, quoted prices in markets that are not active and observable yields and spreads in the market. The market standard valuation methodologies utilized include: discounted cash flow methodologies, matrix pricing or similar techniques. The assumptions and inputs in applying these market standard valuation methodologies include, but are not limited to, interest rates, credit standing of the issuer or counterparty, industry sector of the issuer, coupon rate, call provisions, sinking fund requirements, maturity, estimated duration, and management s assumptions regarding liquidity and estimated future cash flows. When a price is not available in the active market or through an independent pricing service, management will value the security primarily using independent non-binding broker quotations. Independent non-binding broker quotations utilize inputs that are not market observable or cannot be derived principally from or corroborated by observable market data.

Senior management, independent of the trading and investing functions, is responsible for the oversight of control systems and valuation policies, including reviewing and approving new transaction types and markets, for ensuring that observable market prices and market-based parameters are used for valuation, wherever possible, and for determining that judgmental valuation adjustments, if any, are based upon established policies and are applied consistently over time. Management reviews its valuation methodologies on an ongoing basis and ensures that any changes to valuation methodologies are justified. The Company gains assurance on the overall reasonableness and consistent application of input assumptions, valuation methodologies and compliance with accounting standards for fair value determination through various controls designed to ensure that the financial assets and financial liabilities are appropriately valued and represent an exit price. The control systems and procedures include, but are not limited to, analysis of portfolio returns to corresponding benchmark returns, comparing a sample of executed prices of securities sold to the fair value estimates, comparing fair value estimates to management sknowledge of the current market, reviewing the bid/ask spreads to assess activity and ongoing confirmation that independent pricing services use, wherever possible, market-based parameters for valuation. Management determines the observability of inputs used in estimated fair values received from independent pricing services or brokers by assessing whether these inputs can be corroborated by observable market data. The Company also follows a formal process to challenge any prices received from independent pricing services that are not considered representative of fair value. If we conclude that prices received from independent pricing services are not reflective of market activity or representative of estimated fair value, we will seek independent non-binding broker quotes or use an internally developed valuation to override these prices. Such overrides are classified as Level 3. Despite the credit events prevalent in the current markets, including market dislocation, volatility in valuation of certain investments, and reduced levels of liquidity over the past few quarters, our internally developed valuations of current estimated fair value, which reflect our estimates of

liquidity and non- performance risks, compared with pricing received from the independent pricing services, did not produce material differences for the vast majority of our fixed maturity securities portfolio. Our estimates of liquidity and non-performance risks are generally based on available market

evidence and on what other market participants would use. In absence of such evidence, management s best estimate is used. As a result, we generally continued to use the price provided by the independent pricing service under our normal pricing protocol and pricing overrides were not material. Even some of our very high quality invested assets have been more illiquid for periods of time as a result of the current market conditions. The Company uses the results of this analysis for classifying the estimated fair value of these instruments in Level 1, 2 or 3. For example, management will review the estimated fair values received to determine whether corroborating evidence (i.e., similar observable positions and actual trades) will support a Level 2 classification in the fair value hierarchy. Security prices which cannot be corroborated due to relatively less pricing transparency and diminished liquidity will be classified as Level 3.

For privately placed fixed maturity securities, the Company determines the estimated fair value generally through matrix pricing or discounted cash flow techniques. The discounted cash flow valuations rely upon the estimated future cash flows of the security, credit spreads of comparable public securities and secondary transactions, as well as taking account of, among other factors, the credit quality of the issuer and the reduced liquidity associated with privately placed debt securities.

The Company has reviewed the significance and observability of inputs used in the valuation methodologies to determine the appropriate fair value hierarchy level for each of its securities. Based on the results of this review and investment class analyses, each instrument is categorized as Level 1, 2 or 3 based on the priority of the inputs to the respective valuation methodologies. While prices for certain U.S. Treasury, agency and government guaranteed fixed maturity securities, certain foreign government fixed maturity securities, exchange-traded common stock and certain short-term money market securities have been classified into Level 1 because of high volumes of trading activity and narrow bid/ask spreads, most securities valued by independent pricing services have been classified into Level 2 because the significant inputs used in pricing these securities are market observable or can be corroborated using market observable information. Most investment grade or distressed privately placed fixed maturity securities have been classified within Level 2, while most below investment grade or distressed privately placed fixed maturity securities have been classified within Level 3. Where estimated fair values are determined by independent pricing services or by independent non-binding broker quotations that utilize inputs that are not market observable or cannot be derived principally from or corroborated by observable market data, these instruments have been classified as Level 3. Use of independent non-binding broker quotations generally indicates there is a lack of liquidity or the general lack of transparency in the process to develop these price estimates causing them to be considered Level 3.

Effective April 1, 2009, the Company adopted new accounting guidance that clarified existing guidance regarding (1) estimating the fair value of an asset or liability if there was a significant decrease in the volume and level of trading activity for these assets or liabilities and (2) identifying transactions that are not orderly. The Company s valuation policies as described above and in Summary of Critical Accounting Estimates Estimated Fair Valuation of Investments already incorporated the key concepts from this additional guidance, accordingly, this guidance results in no material changes in our valuation policies. At April 1, 2009 and September 30, 2009, we evaluated the markets that our fixed maturity and equity securities trade in and in our judgment, despite the increased illiquidity discussed above, believe none of these fixed maturity and equity securities trading markets should be characterized as distressed and disorderly. We will continue to re-evaluate and monitor such fixed maturity and equity securities trading markets on an ongoing basis.

Fixed Maturity Securities Credit Quality Ratings. The Securities Valuation Office of the National Association of Insurance Commissioners (NAIC) evaluates the fixed maturity security investments of insurers for regulatory reporting purposes and assigns securities to one of six investment categories called NAIC designations. The NAIC ratings are similar to the rating agency designations of the Nationally Recognized Statistical Rating Organizations (NRSRO) for marketable fixed maturity securities. NAIC ratings 1 and 2 include bonds generally considered investment grade (rated Baa3 or better by Moody s or rated BBB or better by S&P and Fitch), by such rating

organizations. NAIC ratings 3 through 6 include fixed maturity securities generally considered below investment grade (rated Ba1 or lower by Moody s, or rated BB+ or lower by S&P and Fitch).

The following table presents the Company s total fixed maturity securities by Nationally Recognized Statistical Rating Organization designation and the equivalent ratings of the NAIC, as well as the percentage, based on estimated fair value, that each designation is comprised of at:

		Sept	ember 30, 200	9	December 31, 2008

(1) The Company has classified within the U.S. Treasury, agency and government guaranteed securities caption above certain corporate fixed maturity securities issued by U.S. financial institutions that were guaranteed by the FDIC pursuant to the FDIC s Temporary Liquidity Guarantee Program of \$560 million and \$2 million at

¹⁹⁷

estimated fair value with unrealized gains (losses) of \$4 million and less than (\$1) million at September 30, 2009 and December 31, 2008, respectively.

(2) The Company classifies perpetual securities that have attributes of both debt and equity as fixed maturity securities if the security has a punitive interest rate step-up feature, as it believes in most instances this feature will compel the issuer to redeem the security at the specified call date. Perpetual securities that do not have a punitive interest rate step-up are classified as non-redeemable preferred stock. Many of such securities have been issued by non-U.S. financial institutions that are accorded Tier 1 and Upper Tier 2 capital treatment by their respective regulatory bodies and are commonly referred to as perpetual hybrid securities. The following table presents the perpetual hybrid securities held by the Company at:

	Es	ember 30, 2009 timated]	December 31, 2008 Estimated				
Consolidated Balance Sheets	Sector Table	Primary Issuers		Fair Value (In r	nil	Fair Value iillions)		
Equity securities	Non-redeemable preferred stock	Non-U.S. financial institutions	\$	1,136	\$	1,224		
Equity securities	Non-redeemable preferred stock	U.S. financial institutions	\$	332	\$	288		
Fixed maturity securities	Foreign corporate securities	Non-U.S. financial institutions	\$	2,719	\$	2,110		
Fixed maturity securities	U.S. corporate securities	U.S. financial institutions	\$	59	\$	46		

- (3) At September 30, 2009 and December 31, 2008, the Company held \$2,457 million and \$2,052 million at estimated fair value, respectively, of redeemable preferred stock which have stated maturity dates. These securities, commonly referred to as capital securities, are primarily issued by U.S. financial institutions, have cumulative interest deferral features and are included in the U.S. corporate securities sector within fixed maturity securities.
- (4) Equity securities primarily consist of investments in common and preferred stocks, including certain perpetual hybrid securities, and mutual fund interests. Such securities include common stock of privately held companies with an estimated fair value of \$1.1 billion at both September 30, 2009 and December 31, 2008.

Concentrations of Credit Risk (Equity Securities). The Company is not exposed to any significant concentrations of credit risk of any single issuer greater than 10% of the Company s stockholders equity in its equity securities portfolio.

Concentrations of Credit Risk (Fixed Maturity Securities) Summary. The following section contains a summary of the concentrations of credit risk related to fixed maturity securities holdings.

The Company is not exposed to any concentrations of credit risk of any single issuer greater than 10% of the Company s stockholders equity, other than securities of the U.S. government, certain U.S. government agencies, and certain securities guaranteed by the U.S. government. At September 30, 2009 and December 31, 2008, the Company s holdings in U.S. Treasury, agency and government guaranteed fixed maturity securities at estimated fair value were

\$25.5 billion and \$21.3 billion, respectively. As shown in the sector tables above, at both September 30, 2009 and December 31, 2008, the three largest sectors in the Company s fixed maturity security portfolio were U.S. corporate securities, residential mortgage-backed securities, and foreign corporate securities.

See also Investments Fixed Maturity and Equity Securities Available-for-Sale Corporate Fixed Maturity Securities and Structured Securities for a description of concentrations of credit risk related to these asset subsectors.

Fair Value Hierarchy. Fixed maturity securities and equity securities measured at estimated fair value on a recurring basis and their corresponding fair value pricing sources and fair value hierarchy are presented as follows:

	September 30, 2009

Equity securities: Common stock Non-redeemable preferred stock	\$ 489	\$ 1,025 302	\$ 122 1,179	\$ 1,636 1,481
Total equity securities	\$ 489	\$ 1,327	\$ 1,301	\$ 3,117

The composition of, fair value pricing sources for and significant changes in Level 3 securities are as follows:

The majority of the Level 3 fixed maturity and equity securities (88%, as presented above) are concentrated in four sectors: U.S. and foreign corporate securities, asset-backed securities and residential mortgage-backed securities.

Level 3 fixed maturity securities are priced principally through independent broker quotations or market standard valuation methodologies using inputs that are not market observable or cannot be derived principally from or corroborated by observable market data. Level 3 fixed maturity securities consists

of less liquid fixed maturity securities with very limited trading activity or where less price transparency exists around the inputs to the valuation methodologies including newly issued agency-backed residential mortgage-backed securities yet to be priced by independent sources, below investment grade private placements and less liquid investment grade corporate securities (included in U.S. and foreign corporate securities) and less liquid asset-backed securities including securities supported by sub-prime mortgage loans (included in asset-backed securities).

During the three months ended September 30, 2009, Level 3 fixed maturity securities increased by \$2.2 billion or 14%, due primarily to favorable estimated fair value changes recognized in other comprehensive income (loss), and purchases in excess of sales and settlements which were partially offset by realized and unrealized losses included in earnings. The transfers out of Level 3 are described in the discussion after the rollforward table below. The favorable estimated fair value changes in fixed maturity securities were concentrated in U.S. and foreign corporate securities and asset-backed securities (including residential mortgage-backed securities backed by sub-prime mortgage loans) due to current market conditions including narrowing of credit spreads. Net purchases in excess of sales and settlements of fixed maturity securities were concentrated in residential mortgage-backed securities. The realized and unrealized losses included in earnings were primarily due to OTTI credit losses, primarily on perpetual hybrid securities included in foreign corporate securities.

During the nine months ended September 30, 2009, Level 3 fixed maturity securities increased by \$594 million or 3%, due primarily to favorable estimated fair value changes recognized in other comprehensive income (loss) and to a lesser extent purchases in excess of sales and settlements, partially offset by transfers out and realized and unrealized losses included in earnings. The transfers out of Level 3 are described in the discussion after the rollforward table below. The favorable estimated fair value changes in fixed maturity securities were concentrated in U.S. and foreign corporate securities and asset-backed securities (including residential mortgage-backed securities backed by sub-prime mortgage loans) due to current market conditions including narrowing of credit spreads, offset slightly by the effect of rising interest rates on such securities. Net purchases in excess of sales and settlements of fixed maturity securities were concentrated in residential mortgage-backed securities. The realized and unrealized losses included in earnings were primarily due to OTTI credit losses, primarily on perpetual hybrid securities included in foreign corporate securities.

A rollforward of the fair value measurements for fixed maturity securities and equity securities measured at estimated fair value on a recurring basis using significant unobservable (Level 3) inputs for the three months and nine months ended September 30, 2009 is as follows:

	Three Months Ended September 30, 2009			Nine Months Ended September 30, 2009			-	
	Μ	Fixed [aturity curities	Equity Securities (In n		Fixed Maturity Securities nillions)		Equity Securities	
Balance, beginning of period Total realized/unrealized gains (losses) included in:	\$	15,792	\$	1,185	\$	17,408	\$	1,379
Earnings		(192)		(71)		(889)		(329)
Other comprehensive loss		1,656		266		2,651		405
Purchases, sales, issuances and settlements		685		(79)		413		(154)
Transfer in and/or out of Level 3		61				(1,581)		

Balance, end of period	\$	18,002	\$ 1,301	\$	18,002	\$	1,301
------------------------	----	--------	----------	----	--------	----	-------

An analysis of transfers in and/or out of Level 3 for the three months and nine months ended September 30, 2009 is as follows:

Total gains and losses (in earnings and other comprehensive loss) are calculated assuming transfers in or out of Level 3 occurred at the beginning of the period. Items transferred in and out for the same period are excluded from the rollforward.

Total gains and losses for fixed maturity securities included in earnings of (\$26) million and (\$334) million, respectively, and other comprehensive income (loss) of \$55 million and \$19 million, respectively, were incurred for transfers subsequent to their transfer to Level 3, for the three months and nine months ended September 30, 2009, respectively.

Net transfers in and/or out of Level 3 for fixed maturity securities were \$61 million and (\$1,581) million for the three months and nine months ended September 30, 2009, respectively, and were comprised of transfers in of \$607 million and \$3,341 million, respectively, and transfers out of (\$546) million and (\$4,922) million, respectively. There were no net transfers in or out of Level 3 for equity securities for the three months and nine months ended September 30, 2009.

Overall, transfers in and/or out of Level 3 are attributable to a change in the observability of inputs. During the three months and nine months ended September 30, 2009, fixed maturity securities transfers into Level 3 of \$607 million and \$3,341 million, respectively, resulted primarily from current market conditions characterized by a lack of trading activity, decreased liquidity, fixed maturity securities going into default and credit ratings downgrades (e.g., from investment grade to below investment grade). These current market conditions have resulted in decreased transparency of valuations and an increased use of broker quotations and unobservable inputs to determine fair value principally for U.S. and foreign corporate securities and foreign government securities. During the three months and nine months ended September 30, 2009, fixed maturity securities transfers out of Level 3 of (\$546) million and (\$4,922) million, respectively, resulted primarily from increased transparency of both new issuances, that subsequent to issuance and establishment of trading activity, became priced by pricing services and existing issuances that, over time, the Company was able to corroborate pricing received from independent pricing services with observable inputs, primarily for U.S. and foreign corporate securities.

See Summary of Critical Accounting Estimates Investments for further information on the estimates and assumptions that affect the amounts reported above.

Evaluating Investments for an Other-Than-Temporary Impairment

As described more fully in Note 1 of the Notes to the Consolidated Financial Statements included in the 2008 Annual Report, the Company performs a regular evaluation, on a security-by-security basis, of its investment holdings in accordance with its impairment policy in order to evaluate whether such investments are other-than-temporarily impaired.

With respect to fixed maturity securities, the Company considers, amongst other criteria, whether it has the intent to sell a particular impaired fixed maturity security. The assessment of the Company s intent to sell a particular fixed maturity security considers broad portfolio management objectives such as asset/liability duration management, issuer and industry segment exposures, interest rate views and the overall total return focus. In following these portfolio management objectives, changes in facts and circumstances that were present in past reporting periods may trigger a decision to sell securities that were held in prior reporting periods. Decisions to sell are based on current conditions or the Company s need to shift the portfolio to maintain its portfolio management objectives including liquidity needs or duration targets on asset/liability managed portfolios. The Company attempts to anticipate these types of changes and if a sale decision has been made on an impaired security, the security will be deemed other-than-temporarily impaired in the period that the sale decision was made and an OTTI loss will be recorded in earnings. In certain circumstances, the Company may determine that it does not intend to sell a particular security but that it is more likely than not that it will be deemed other-than-temporarily impaired instances, the fixed maturity security will be deemed other-than-temporarily impaired instances, the fixed maturity security will be deemed other-than-temporarily impaired in the period during which it was determined more likely than not that the security will be required to be sold and an OTTI loss will be recorded in the period during which it was determined more likely than not that the security will be deemed other-than-temporarily impaired in the period during which it was determined more likely than not that the security will be required to be sold and an OTTI loss will be recorded in

earnings. If the Company does not have the intent to sell (i.e., has not made the decision to sell) and it does not believe that it is more likely than not that it will be required to sell the security before recovery of its amortized cost, an impairment assessment is made, as described below. If the Company s estimate of the present value of the expected future cash flows to be received from the security is less than the amortized cost, the security will be deemed other-than-temporarily impaired in the period that such present value of the expected future cash flows falls below amortized cost and this difference, referred to as the credit loss, will be recognized in earnings. Any remaining difference between the present value of the

expected future cash flows to be received and the estimated fair value of the security will be recognized as a separate component of other comprehensive loss and is referred to as the noncredit loss. Prior to April 1, 2009, the Company s assessment of OTTI for fixed maturity securities was performed in the same manner as described below for equity securities.

With respect to equity securities, the Company considers in its OTTI analysis its intent and ability to hold a particular equity security for a period of time sufficient to allow for the recovery of its value to an amount equal to or greater than cost. Decisions to sell equity securities are based on current conditions in relation to the same broad portfolio management considerations in a manner consistent with that described above for fixed maturity securities. If a sale decision is made with respect to a particular equity security and that equity security is not expected to recover to an amount at least equal to cost prior to the expected time of the sale, the security will be deemed other-than-temporarily impaired in the period that the sale decision was made and an OTTI loss will be recorded in earnings.

With respect to perpetual hybrid securities, some of which are classified as fixed maturity securities and some of which are classified as non-redeemable preferred stock, the Company considers in its OTTI analysis whether there has been any deterioration in credit of the issuer and the likelihood of recovery in value of the securities that are in a severe and extended unrealized loss position. The Company also considers whether any perpetual hybrid securities, with severe unrealized losses, regardless of credit rating, have deferred any dividend payments.

See Summary of Critical Accounting Estimates.

Net Unrealized Investment Gains (Losses)

The components of net unrealized investment gains (losses), included in accumulated other comprehensive loss, are as follows:

	-	ember 30, 2009 (In 1	December 31, 2008 millions)		
Fixed maturity securities that were temporarily impaired Fixed maturity securities with noncredit OTTI losses in other comprehensive loss	\$	(831) (547)	\$	(21,246)	
Total fixed maturity securities		(1,378)		(21,246)	
Equity securities Derivatives Other		(232) (46) 79		(934) (2) 53	
Subtotal		(1,577)		(22,129)	
Amounts allocated from: Insurance liability loss recognition DAC and VOBA on which noncredit OTTI losses have been recognized DAC and VOBA		(239) 48 475		42 3,025	
Subtotal		284		3,067	

Deferred income tax benefit (expense) on which noncredit OTTI losses have been recognized	172

interests		(10)
Net unrealized investment gains (losses) attributable to MetLife, Inc.	\$ (799)	\$ (12,564)
202		

Fixed maturity securities with noncredit OTTI losses in other comprehensive loss, as presented above, of \$547 million includes \$126 million related to the transition adjustment, \$245 million and \$479 million (\$225 million and \$441 million, net of DAC) of noncredit losses recognized in the three months and nine months ended September 30, 2009, respectively, and \$63 million and \$58 million of subsequent increases in estimated fair market value during the three months and nine months ended September 30, 2009, respectively, on such securities for which a noncredit loss was previously recognized in other comprehensive loss.

The \$6.2 billion decrease in the deferred income tax benefit to \$322 million at September 30, 2009, was primarily the result of the decrease in net unrealized investment gains (losses), which also is a major contributor to the overall decrease in total deferred income tax assets to \$535 million.

The changes in net unrealized investment gains (losses) are as follows:

	Nine Months Ended September 30, 2009 (In millions)

Concentration of Gross Unrealized Loss and OTTI Loss for Fixed Maturity and Equity Securities Available-for-Sale

At September 30, 2009 and December 31, 2008, the Company s gross unrealized losses related to its fixed maturity and equity securities including the portion of OTTI loss on fixed maturity securities recognized in

accumulated other comprehensive loss at September 30, 2009, of \$11.8 billion and \$29.8 billion, respectively, were concentrated, calculated as a percentage of gross unrealized loss and OTTI loss, by sector and industry as follows:

	September 30, 2009	December 31, 2008
Sector:		
U.S. corporate securities	27%	33%
Residential mortgage-backed securities	27	16
Asset-backed securities	14	13
Foreign corporate securities	12	19
Commercial mortgage-backed securities	11	11
State and political subdivision securities	2	3
Foreign government securities	1	1
Other	6	4
Total	100%	100%
Industry:		
Mortgage-backed	38%	27%
Finance	25	24
Asset-backed	14	13

Communications	2	5
Industrial	2	4
Foreign government	1	1
Other	10	7
Total	100%	100%

Evaluating Temporarily Impaired Investments

The following table presents the gross unrealized loss of greater than \$10 million for the Company s fixed maturity and equity securities at:

	September 3	30, 2009	December 3	1, 2008				
	Fixed Maturity Equity Securities Securities		Fixed Maturity Securities	Equity Securities				
	(In millions, except number of securities)							
Number of securities	260	15	699	33				
Total gross unrealized loss	\$ 5,341	\$ 248	\$ 14,485	\$ 699				
Percentage of gross unrealized loss	47%	62%	50%	71%				

The fixed maturity and equity securities, each with a gross unrealized loss greater than \$10 million, decreased \$4.7 billion and \$9.6 billion during the three months and nine months ended September 30, 2009, respectively. These securities were included in the regular evaluation of whether such investments are other-than-temporarily impaired. Based upon the Company s current evaluation of these securities in accordance with its impairment policy, the cause of the decline being primarily attributable to a rise in market yields caused principally by an extensive widening of credit spreads which resulted from a lack of market liquidity and a short-term market dislocation versus a long-term deterioration in credit quality, and its current intentions and assessments (as applicable to the type of security) about holding, selling, and any requirements to sell these securities, the Company has concluded that these securities are not other-than-temporarily impaired.

In the Company s impairment review process, the duration of, and severity of an unrealized loss position for equity securities, such as unrealized losses of 20% or more for equity securities, is given greater weight and

consideration than an unrealized loss position of 20% or more for fixed maturity securities. An extended and severe unrealized loss position on a fixed maturity security may not have any impact on the ability of the issuer to service all scheduled interest and principal payments and the Company s evaluation of recoverability of all contractual cash flows or the ability to recover an amount at least equal to its amortized cost based on the present value of the expected future cash flows to be collected. In contrast, for an equity security, greater weight and consideration is given by the Company to a decline in market value and the likelihood such market value decline will recover.

The following table presents certain information about equity securities available-for-sale with a gross unrealized loss of 20% or more at:

				Septen	1ber 30, 2009				
				Non-Red	leemable Prefe	erred Stoc	k

	Loss	Loss	Securities		Stock nillions)	Loss	Industries	Better	
Less than six months More than six months	\$ 13	\$9	69%	\$ 1	11%	\$ 1	100%	100%	
and less than twelve months Twelve months or	88	88	100%	57	65%	51	89%	88%	
greater	212	212	100%	212	100%	212	100%	61%	
All equity securities with gross unrealized loss of 20% or more	\$ 313	\$ 309	99%	\$ 270	87%	\$ 264	98%	66%	

In connection with the equity securities impairment review process at September 30, 2009, the Company evaluated its holdings in non-redeemable preferred stock, particularly those of financial services companies. The Company considered several factors including whether there has been any deterioration in credit of the issuer and the likelihood of recovery in value of non-redeemable preferred stock with a severe or an extended unrealized loss. The Company also considered whether any non-redeemable preferred stock with unrealized losses of 20% or more, regardless of credit rating, have deferred any dividend payments. No such dividend payments were deferred.

With respect to common stock holdings, the Company considered the duration and severity of the unrealized losses for securities in an unrealized loss position of 20% or more and the duration of unrealized losses for securities in an unrealized loss position of 20% or less in an extended unrealized loss position (i.e., 12 months or greater).

Future other-than-temporary impairments will depend primarily on economic fundamentals, issuer performance (including changes in the present value of future cash flows expected to be collected), changes in credit rating,

changes in collateral valuation, changes in interest rates, and changes in credit spreads. If economic fundamentals and any of the above factors deteriorate, additional other-than-temporary impairments may be incurred in upcoming quarters. See also Investments Fixed Maturity and Equity Securities Available-for-Sale.

Net Investment Gain (Loss) Including OTTI Losses Recognized in Earnings

Effective April 1, 2009, the Company adopted new guidance on the recognition and presentation of OTTI. With the adoption of this guidance, for those fixed maturity securities that are intended to be sold or for which it is more likely than not that the security will be required to be sold before recovery of the decline in fair value below amortized cost, the full OTTI loss from the fair value being less than the amortized cost is recognized in earnings. For those fixed maturity securities which the Company has no intent to sell (i.e., has not made the decision to sell) and the Company believes it is not more likely than not that it will be required to sell prior to recovery of the decline in fair value, and an assessment has been made that the amortized cost will not be fully recovered, only the OTTI credit loss component is recognized in earnings, while the remaining decline in fair value is recognized in accumulated other comprehensive income (loss), not in earnings for a fixed maturity security in an unrealized loss position unless it could assert that it had both the intent and ability to hold the fixed maturity security for a period of time to allow for a recovery of fair value to the security is amortized cost basis. There was no change in the

impairment methodology for equity securities which, when an OTTI loss has occurred, continue to be impaired for the entire difference between the equity security s cost and its fair value with a corresponding charge to earnings. The discussion below describes the Company s methodology and significant inputs used to determine the amount of the credit loss effective April 1, 2009.

In order to determine the amount of the credit loss for a fixed maturity security, the Company calculates the recovery value by performing a discounted cash flow analysis based on the present value of future cash flows expected to be received. The discount rate is generally the effective interest rate of the fixed maturity security prior to impairment.

When determining the collectability and the period over which the fixed maturity security is expected to recover, the Company applies the same considerations utilized in its overall impairment evaluation process which incorporates information regarding the specific security, fundamentals of the industry and geographic area in which the security issuer operates, and overall macroeconomic conditions. Projected future cash flows are estimated using assumptions derived from management s best estimates of likely scenario-based outcomes after giving consideration to a variety of variables that include, but are not limited to: general payment terms of the security; the likelihood that the issuer can service the scheduled interest and principal payments; the quality and amount of any credit enhancements; the security s position within the capital structure of the issuer; possible corporate restructurings or asset sales by the issuer; and changes to the rating of the security or the issuer by rating agencies. Additional considerations are made when assessing the unique features that apply to certain structured securities such as residential mortgage-backed securities and asset-backed securities. These additional factors for structured securities include, but are not limited to: the quality of underlying collateral; expected prepayment speeds; current and forecasted loss severity; consideration of the payment terms of the underlying assets backing a particular security; and the payment priority within the tranche structure of the security.

Proceeds from sales or disposals of fixed maturity and equity securities and the components of fixed maturity and equity securities net investment gains (losses) are as follows:

(1) Other OTTI losses recognized in earnings include impairments on equity securities, impairments on perpetual hybrid securities classified within fixed maturity securities where the primary reason for the impairment was the severity and/or the duration of an unrealized loss position, and fixed maturity securities where there is an intent to sell or it is more likely than not that the Company will be required to sell the security before recovery of the decline in fair value.

Overview of Fixed Maturity and Equity Security OTTI Losses Recognized in Earnings. Impairments of fixed maturity and equity securities were \$441 million and \$1,656 million for the three months and nine months ended

September 30, 2009, respectively, and \$1,027 million and \$1,357 million for the three months and nine months ended September 30, 2008, respectively. Impairments of fixed maturity securities were \$405 million and \$1,290 million for the three months and nine months ended September 30, 2009, respectively, and \$748 million and \$961 million for the three months and nine months ended September 30, 2008, respectively. Impairments of equity securities were \$36 million and \$366 million for the three months and nine months ended September 30, 2009, respectively, and \$279 million and \$396 million for the three months and nine months ended September 30, 2008, respectively.

The Company s credit-related impairments of fixed maturity securities were \$223 million and \$966 million for the three months and nine months ended September 30, 2009, respectively, and \$593 million and \$803 million for the three months and nine months ended September 30, 2008, respectively.

The Company s three largest impairments totaled \$183 million and \$455 million for the three months and nine months ended September 30, 2009 and \$506 million and \$521 million for the three months and nine months ended September 30, 2008, respectively.

The Company records OTTI losses charged to earnings as investment losses and adjusts the cost basis of the fixed maturity and equity securities accordingly. The Company does not change the revised cost basis for subsequent recoveries in value.

The Company sold or disposed of fixed maturity and equity securities at a loss that had an estimated fair value of \$2.2 billion and \$7.5 billion during the three months and nine months ended September 30, 2009, respectively, and \$6.9 billion and \$20.0 billion for the three months and nine months ended September 30, 2008, respectively. Gross losses excluding impairments for fixed maturity and equity securities were \$336 million and \$1,050 million for the three months and nine months ended \$1,242 million for the three months and nine months ended \$2.0 billion and \$1,050 million for the three months and nine months ended \$2.0 billion and \$1,050 million for the three months and nine months ended \$2.0 billion and \$1,050 million for the three months and nine months ended \$2.0 billion and \$1,050 million for the three months and nine months ended \$2.0 billion for the three months and \$2.0 billion and \$1,050 million for the three months and nine months ended \$2.0 billion and \$1,050 million for the three months and nine months ended \$2.0 billion and \$1,050 million for the three months and nine months ended \$2.0 billion for the three months and \$1,050 million for the three months and nine months ended \$2.0 billion for the three months and nine months ended \$2.0 billion for the three months and nine months ended \$2.0 billion for the three months and nine months ended \$2.0 billion for the three months and nine months ended \$2.0 billion for the three months and nine months ended \$2.0 billion for the three months and nine months ended \$2.0 billion for the three months ended \$2.0 billion for the

Three Months and Nine Months Ended September 30, 2009 Financial Services Industry including Perpetual Hybrid Securities Impairments. Of the fixed maturity and equity securities impairments of \$441 million and \$1,656 million for the three months and nine months ended September 30, 2009, respectively, \$275 million and \$753 million were concentrated in the Company s financial services industry holdings including \$215 million and \$577 million of perpetual hybrid securities, some classified as fixed maturity securities and some classified as non-redeemable preferred stock. The financial services industry impairments of \$275 million and \$753 million, respectively, in impairments on fixed maturity securities and \$34 million and \$429 million, respectively, in impairments on fixed maturity securities and \$34 million and \$324 million were perpetual hybrid securities included within fixed maturity securities and non-redeemable preferred stock, respectively. The circumstances that gave rise to these financial services industry impairments during the three months and nine months ended September 30, 2009 were financial services industry impairments on perpetual hybrid securities during the three months and nine months ended September 30, 2009 were a result of deterioration in the credit rating of the issuer to below investment grade and due to a severe and extended unrealized loss position.

Three Months and Nine Months Ended September 30, 2009 Summary of Fixed Maturity Security Impairments. Overall OTTI losses recognized in earnings on fixed maturity securities were \$405 million and \$748 million, and \$1,290 million and \$961 million for the three months and nine months ended September 30, 2009 and 2008, respectively.

Three Months Ended September 30, 2009 compared to the Three Months Ended September 30, 2008 In the third quarter of 2008, the stress experienced in the global financial markets, caused several financial

institutions to enter bankruptcy, enter FDIC receivership or receive significant government capital infusions. The Company incurred fixed maturity securities impairments of \$482 million related to security holdings on three such financial institutions in the third quarter of 2008. In addition, the Company incurred fixed maturity security impairments of \$155 million in the third quarter of 2008 on securities the Company either lacked the intent to hold, or due to extensive credit spread widening, the Company was uncertain of its intent

to hold these securities for a period of time sufficient to allow for recovery of the market value decline. Accordingly, fixed maturity security impairments on the Company s financial services industry holdings, and total impairments across all sectors, were higher in the third quarter of 2008 than the third quarter of 2009, as presented in the table below.

Nine Months Ended September 30, 2009 compared to the Nine Months Ended September 30, 2008 Conversely, fixed maturity security impairments for the nine months ended September 2009 were higher than for the nine months ended September 2008, due to increased impairments across several industry sectors as presented in the table below, and not as a result of a concentration in the financial services industry sector. Impairments across these several industry sectors increased due to financial restructurings, bankruptcy filings, ratings downgrades, or difficult operating environments of the issuers.

Overall, \$223 million and \$966 million of the fixed maturity security impairments were considered to be credit-related impairments on fixed maturity securities in the three and nine months ended September 30, 2009.

Fixed maturity security OTTI losses recognized in earnings of \$405 million and \$1,290 million for the three months and nine months ended September 30, 2009, respectively, and \$748 million and \$961 million for the three months and nine months ended September 30, 2008, respectively, related to the following sectors and industries:

	En	Three Months Ended September 30,		onths ed ber 30,

- (1) With respect to common stock holdings, the Company considered the duration and severity of the securities in an unrealized loss position of 20% or more; and the duration of the securities in an unrealized loss position of 20% or less in an extended unrealized loss position (i.e.,12 months or greater) in determining the other-than-temporary impairment charge for such securities.
- (2) Impairment due to a deterioration in the credit rating of the issuer to below investment grade and due to a severe and extended unrealized loss position.

Future Impairments. Future other-than-temporary impairments will depend primarily on economic fundamentals, issuer performance, changes in credit ratings, changes in collateral valuation, changes in interest rates and changes in credit spreads. If economic fundamentals and other of the above factors deteriorate, additional other-than-temporary impairments may be incurred in upcoming periods. See also Investments Fixed Maturity and Equity Securities Available-for-Sale Net Unrealized Investment Gains (Losses).

Portion rated Aaa/AAA	\$ 35,341	81.4%	\$ 33,265	92.3%	

Collateralized mortgage obligations are a type of mortgage-backed security structured by dividing the cash flows of mortgages into separate pools or tranches of risk that create multiple classes of bonds with varying maturities and

priority of payments. Pass-through mortgage-backed securities are a type of asset-backed security that is secured by a mortgage or collection of mortgages. The monthly mortgage payments from homeowners pass from the originating bank through an intermediary, such as a government agency or investment bank, which collects the payments, and for fee, remits or passes these payments through to the holders of the pass-through securities.

The majority of the residential mortgage-backed securities were rated Aaa/AAA by Moody s, S&P or Fitch at September 30, 2009 and December 31, 2008, as presented above. The majority of the agency residential mortgage-backed securities were guaranteed or otherwise supported by the Federal National Mortgage Association (FNMA), the Federal Home Loan Mortgage Corporation (FHLMC) or the Government National Mortgage Association. In September 2008, the U.S. Treasury announced that FNMA and FHLMC had been placed into conservatorship. Prime residential mortgage lending includes the origination of residential mortgage loans to the most credit-worthy customers with high quality credit profiles. Alternative residential mortgage loans (Alt-A) are a classification of mortgage loans where the risk profile of the borrower falls between prime and sub-prime. Sub-prime mortgage

lending is the origination of residential mortgage loans to customers with weak credit profiles. During 2009, the major rating agencies made significant revisions to their ratings methodologies and loss expectations for non-agency residential mortgage-backed securities, resulting in significant downgrades for both prime and Alt-A residential mortgage-backed securities, contributing to the decrease in the percentage of residential mortgage-backed securities with a Aaa/AAA rating of 81.4% at September 30, 2009 as compared to 92.3% at December 31, 2008 as presented above; and the substantial decrease in the Company s Alt-A residential mortgage-backed securities holdings rated Aa/AA or better as of September 30, 2009 as compared to December 31, 2008, as presented below. Vintage year refers to the year of origination and not to the year of purchase. Our analysis suggests that Moody s is applying essentially the same default methodology to all Alt-A securities regardless of the underlying collateral. The Company s Alt-A securities portfolio has superior structure to the overall Alt-A market. At September 30, 2009 and December 31, 2008, the Company's Alt-A securities portfolio has no exposure to option adjustable rate mortgages (ARMs). The portion of our Alt-A holdings that are backed by fixed rate collateral or are hybrid ARMs is presented below. Fixed rate mortgages have performed better than both option ARMs and hybrid ARMs. Additionally, 88% and 83% at September 30, 2009 and December 31, 2008, respectively, of the Company's Alt-A securities portfolio has super senior credit enhancement, which typically provides double the credit enhancement of a standard Aaa/AAA rated bond. Based upon the analysis of the Company s exposure to Alt-A mortgage loans through its exposure to residential mortgage-backed securities, the Company continues to expect to receive payments in accordance with the contractual terms of the securities. The estimated fair value of such Alt-A securities held by the Company by vintage year, net unrealized loss, portion of holdings rated Aa/AA or better by Moody s, S&P or Fitch, and portion of holdings that are backed by fixed rate collateral or hybrid ARMs at September 30, 2009 and December 31, 2008, are presented below.

The following table presents the Company s holdings of Alt-A residential mortgage-backed securities by vintage year and certain other selected data:

				A	lt-A Resider	ntial Mo	rtgage-Back	xed Securitie	es

Asset-Backed Securities. The Company s asset-backed securities are diversified both by sector and by issuer. The estimated fair value by collateral type, amount and portion rated Aaa/AAA by Moody s, S&P or Fitch of such securities held by the Company, and the portion of the asset-backed securities comprised of residential mortgage-backed securities backed by sub-prime mortgage loans credit enhanced by financial guarantor insurers and the related rating of the financial guarantor insurers at September 30, 2009 and December 31, 2008, are presented below. Sub-prime mortgage lending is the origination of residential mortgage loans to customers with weak credit profiles.

The following table presents the asset-backed securities by collateral type, portion rated Aaa/AAA and portion credit enhanced held by the Company at:

		eptember timated	30, 2009		December stimated	31, 2008

Residential mortgage-backed securities backed by sub-prime mortgage loans portion that is credit enhanced by financial guarantor insurers Of the 37.6% and 37.2% credit enhanced, the financial guarantor insurers are rated as follows:			37.6%			37.2%
By financial guarantor insurers rated Aa			16.3%			18.8%
By financial guarantor insurers rated A By financial guarantor insurers rated Baa			7.6% %			% 37.3%

The slowing U.S. housing market, greater use of affordable mortgage products and relaxed underwriting standards for some originators of sub-prime loans have recently led to higher delinquency and loss rates, especially within the 2006 and 2007 vintage years. Vintage year refers to the year of origination and not to the year of purchase. These factors have caused a pull-back in market liquidity and repricing of risk, which has led to higher levels of unrealized losses on securities backed by sub-prime mortgage loans in recent quarters. Based upon the analysis of the Company s sub-prime mortgage loans through its exposure to asset-backed securities, the Company expects to receive payments in accordance with the contractual terms of the securities.

The following tables present the Company s holdings of asset-backed securities supported by sub-prime mortgage loans by credit quality and by vintage year:
