 - Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))
-

Item 2.01 Completion of Acquisition of Assets.

On July 2, 2010, Watson Pharmaceuticals, Inc. (the Company) completed the acquisition of (i) substantially all of the assets of Columbia Laboratories, Inc. (Columbia) which relate primarily to pharmaceutical products containing progesterone as an active ingredient, including CRINONE 8% progesterone gel, PROCHIEVE 8% progesterone gel and PROCHIEVE 4% progesterone gel, each sold by Columbia in the United States (the Progesterone Products), including certain intellectual property, promotional materials, contracts, product data and regulatory approvals and regulatory filings (together, with the Progesterone Products, the Purchased Assets), and (ii) 11,200,000 newly issued restricted shares of the Columbia's common stock, \$.01 par value per share (the Shares). Columbia retained certain assets and rights relating to its progesterone business, including all rights necessary to perform its obligations under its agreement with an affiliate of Merck Serono S.A. CRINONE(R) is currently used for progesterone supplementation or replacement as part of an Assisted Reproductive Technology (ART) treatment for infertile women with a progesterone deficiency. The product is also available under the trade name PROCHIEVE(R) and is available in both 4% and 8% concentrations. PROCHIEVE(R) 4% is indicated for the treatment of secondary amenorrhea.

Pursuant to the terms of the Purchase and Collaboration Agreement (the Agreement), dated as of March 3, 2010, Watson paid Columbia an initial \$47 million payment in exchange for the Purchased Assets and the Shares.

Additional contingent payments related to the successful completion of clinical development milestones, receipt of regulatory approvals and product launches could total up to approximately \$45.5 million. Watson will also pay Columbia a royalty on Watson's sales of the progesterone gel product and any next generation products. Columbia will be responsible for the anticipated clinical and regulatory costs related to obtaining approval for the progesterone gel product for prevention of pre-term birth in women with a short cervix. Excess development costs over a defined cap, if any, as well as costs related to the development of the second generation product will be the responsibility of Watson.

Pursuant to the Agreement, Watson and Columbia have entered into various ancillary agreements, including (i) a Supply Agreement, pursuant to which Columbia will be responsible for the manufacturing and supply of the Progesterone Products to Watson, (ii) a License Agreement relating to the grant of certain intellectual property licenses and (iii) an Investor's Rights Agreement, pursuant to which Watson has the right to designate a member of Columbia's board of directors. Additionally, Watson previously entered into a \$15 million loan agreement with Columbia to support Columbia's ongoing investment in the clinical development of the pre-term birth indication for PROCHIEVE(R), as well as other Columbia capital requirements, of which all principal and accrued interest on the loan has been forgiven.

The news release announcing the completion of the above-described acquisition of assets is attached hereto as Exhibit 99.1

The foregoing description of the Agreement does not purport to be complete and is qualified in its entirety by reference to the full text of the Agreement filed by the Company as Exhibit 2.1 to its current report filed on Form 8-K dated as of March 4, 2010, and incorporated herein by reference.

Item 9.01. Financial Statements and Exhibits.
