General

The Callable Fixed Rate Notes (the "Notes") offered hereunder are not deposit liabilities or other obligations of The Bank of Nova Scotia insured by the Canada Deposit Insurance Corporation pursuant to the *Canadian Deposit Insurance Corporation Act*, the United States Federal Deposit Insurance Corporation, or any other governmental agency of Canada, the United States or any other jurisdiction. The Notes include investment risks including possible loss of the Principal Amount invested due to the credit risk of The Bank of Nova Scotia. As used in this pricing supplement, the Bank, we, us or our refers to The Bank of Nova Scotia.

The Notes will not be listed on any securities exchange or automated quotation system.

Neither the United States Securities and Exchange Commission ("SEC"), the Ontario Securities Commission ("OSC") nor any provincial or state securities commission has approved or disapproved of the Notes or passed upon the accuracy or the adequacy of this document, the accompanying prospectus, prospectus supplement or product supplement. Any representation to the contrary is a criminal offense.

Scotia Capital (USA) Inc., an affiliate of ours, will purchase the Notes from us for distribution to other registered broker dealers or will offer the Notes directly to investors. Scotia Capital (USA) Inc. or any of its affiliates or agents may use the final pricing supplement to which this preliminary pricing supplement relates in market-making transactions in Notes after their initial sale. Unless we, Scotia Capital (USA) Inc., or another of its affiliates or agents selling such Note to you informs you otherwise in the confirmation of sale, the final pricing supplement to which this pricing supplement relates is being used in a market-making transaction. See Supplemental Plan of Distribution (Conflicts of Interest) on page P-7 of this pricing supplement and Supplemental Plan of Distribution on page PS-27 of the accompanying product supplement.

Investment in the Notes involves certain risks. You should refer to Additional Risk Factors beginning on page P-5 of this document and Additional Risk Factors Specific to the Notes beginning on page PS-5 of the accompanying product supplement and Risk Factors beginning on page S-3 of the accompanying prospectus supplement.

	Per Note	Total
Price to public	100%	US\$ 15,000,000
Underwriting commissions ¹	1.60%	US\$240,000
Proceeds to Bank of Nova Scotia ²	98.40%	US\$ 14,760,000

The price at which you purchase the Notes includes costs that the Bank or its affiliates expect to incur and profits that the Bank or its affiliates expect to realize in connection with hedging activities related to the Notes. These costs and profits will likely reduce the secondary market price, if any secondary market develops, for the Notes. As a result, you may experience an immediate and substantial decline in the market value of your Notes on the Issue Date. See

Additional Risk Factors - The Inclusion of Dealer Spread and Projected Profit from Hedging in the Original Issue Price is Likely to Adversely Affect Secondary Market Prices.

If the Notes are priced on the date of this pricing supplement, the price of the Notes would also include a mark-to-market gain to the Bank of approximately \$2.00 per \$1,000 in principal amount of the Notes. Actual profits or losses actually realized over the life of the Notes as a result of variations in the value of the derivative positions embedded in the Notes and the Bank's hedging program may vary from this anticipated amount.

We will deliver the Notes in book-entry form through the facilities of The Depository Trust Company (DTC) on or about August 11, 2011 against payment in immediately available funds.

Scotia Capital (USA) Inc.

¹ Scotia Capital (USA) Inc. or one of our affiliates may pay varying discounts and commissions of 1.60% per \$1,000 Principal Amount of Notes in connection with the distribution of the Notes. See Supplemental Plan of Distribution (Conflicts of Interest) on page P-7 of this pricing supplement.

² Excludes profits from hedging. See second paragraph below this table. For additional considerations relating to hedging activities see Additional Risk Factors - The Inclusion of Dealer Spread and Projected Profit from Hedging in the Original Issue Price is Likely to Adversely Affect Secondary Market Prices on page P-6 below.

The information in this Summary section is qualified by the more detailed information set forth in this pricing supplement, the prospectus, the prospectus supplement and the product supplement.

PAYMENT AT MATURITY

If the Notes have not been called by us, as described under the heading **Summary** above, we will pay you the principal amount of your Notes on the Maturity Date, plus the final Interest payment, if any.

INTEREST

On each Interest Payment Date, for each \$1,000 Principal Amount of Notes, you will be paid an amount equal to the product of (a) \$1,000 multiplied by (b) the Annual Interest Rate multiplied by (c) 1/2. Each expected Interest Payment Date will be the 11th calendar day of each February and August, commencing on February 11, 2012 and ending on August 11, 2023 (which is also the expected Maturity Date). If any Interest Payment Date falls on a day that is not a Business Day (including any Interest Payment Date that is also the Maturity Date or the Call Payment Date), such Interest Payment Date will be the next Business Day. Thus the first actual Interest Payment Date will be Monday, February 13, 2012.

ADDITIONAL RISK FACTORS

In addition to the following risks included in this pricing supplement, we urge you to read **Additional Risk Factors Specific to the Notes** beginning on page PS-5 of the accompanying product supplement and **Risk Factors** beginning on page S-3 of the accompanying prospectus supplement. You should understand the risks of investing in the Notes and should reach an investment decision only after careful consideration, with your advisers, of the suitability of the Notes in light of your particular financial circumstances and the information set forth in this pricing supplement and the accompanying prospectus, prospectus supplement and product supplement.

Your Investment is Subject to the Credit Risk of The Bank of Nova Scotia.

The Notes are senior unsecured debt obligations of the Issuer, The Bank of Nova Scotia, and are not, either directly or indirectly, an obligation of any third party. As further described in the accompanying prospectus, prospectus supplement and product supplement, the Notes will rank on par with all of the other unsecured and unsubordinated debt obligations of The Bank of Nova Scotia, except such obligations as may be preferred by operation of law. Any payment to be made on the Notes, including the return of the principal amount at maturity or on the Call Payment Date, as applicable, depends on the ability of The Bank of Nova Scotia to satisfy its obligations as they come due. As a result, the actual and perceived creditworthiness of The Bank of Nova Scotia may affect the market value of the Notes and, in the event The Bank of Nova Scotia were to default on its obligations, you may not receive the amounts owed to you under the terms of the Notes.

Your Investment is Subject to a Reinvestment Risk in the Event We Elect to Call the Notes.

We have the ability to call the Notes prior to the Maturity Date. In the event we decide to exercise the Call Provision, the amount of Interest payable would be less than the amount of interest payable if you held the Notes until the Maturity Date. There is no guarantee that you would be able to reinvest the proceeds from an investment in the Notes at a

comparable return for a similar level of risk following our exercise of the Call Provision. We may choose to call the Notes early or choose not to call the Notes early, in our sole discretion. In addition, it is more likely that we will call the Notes prior to maturity if a significant decrease in U.S. interest rates or a significant decrease in the volatility of U.S. interest rates would result in greater Interest payments on the Notes than on instruments of comparable maturity, terms and credit worthiness then trading in the market.

The Price at Which the Notes may be Sold prior to Maturity will Depend on a Number of Factors and May Be Substantially Less Than the Amount for Which They Were Originally Purchased.

The price at which the Notes may be sold prior to maturity will depend on a number of factors. Some of these factors include, but are not limited to: (i) volatility of the level of interest rates and the market's perception of future volatility of the level of interest rates, (ii) changes in interest rates generally, (iii) any actual or anticipated changes in our credit ratings or credit spreads, and (iv) time remaining to maturity. In particular, because the terms of the Notes permit us to redeem the Notes prior to maturity, the price of the Notes may be impacted by the call feature of the Notes. Additionally, the interest rates of the Notes reflect not only our credit spread generally but also the call feature of the Notes and thus may not reflect the rate at which a note without a call feature might be issued and sold.

Depending on the actual or anticipated level of interest rates, the market value of the Notes may decrease and you may receive substantially less than 100% of the issue price if you sell your Notes prior to maturity.

The Inclusion of Dealer Spread and Projected Profit from Hedging in the Original Issue Price is Likely to Adversely Affect Secondary Market Prices.

Assuming no change in market conditions or any other relevant factors, the price, if any, at which Scotia Capital (USA) Inc. or any other party is willing to purchase the Notes at any time in secondary market transactions will likely be significantly lower than the original issue price, since secondary market prices are likely to exclude commissions paid with respect to the Notes and the cost of hedging our obligations under the Notes that are included in the original issue price. The cost of hedging includes the projected profit that we and/or our subsidiaries may realize in consideration for assuming the risks inherent in managing the hedging transactions. These secondary market prices are also likely to be reduced by the costs of unwinding the related hedging transactions. In addition, any secondary market prices may differ from values determined by pricing models used by Scotia Capital (USA) Inc. as a result of dealer discounts, mark-ups or other transaction costs.

Your Investment is Subject to Liquidity Risk.

The Notes will not be listed on any securities exchange or automated quotation system. Therefore, there may be little or no secondary market for the Notes. Scotia Capital (USA) Inc. may, but is not obligated to, make a market in the Notes. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the Notes easily. Because we do not expect that other broker-dealers will participate significantly in the secondary market for the Notes, the price at which you may be able to trade your Notes is likely to depend on the price, if any, at which Scotia Capital (USA) Inc. is willing to purchase the notes from you. If at any time Scotia Capital (USA) Inc. were not to make a market in the Notes, it is likely that there would be no secondary market for the Notes. Accordingly, you should be willing to hold your Notes to maturity.

EVENTS OF DEFAULT AND ACCELERATION

If the Notes have become immediately due and payable following an Event of Default (as defined in the accompanying prospectus) with respect to the Notes, the calculation agent will determine (i) your principal amount and (ii) any accrued but unpaid Interest payable based upon the Annual Interest Rate calculated on the basis of a 360-day year consisting of twelve 30-day months.

If the Notes have become immediately due and payable following an Event of Default, you will not be entitled to any additional payments with respect to the Notes. For more information, see **Description of the Debt Securities** **Events of Default** beginning on Page I-15 of the accompanying prospectus.
