FORM 10-Q
UNITED STATES SECURITIES AND EXCHANGE COMMISSION
Washington, D. C. 20549

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15 (d)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended May 31, 2007
Commission File Number 1-4304
COMMERCIAL METALS COMPANY

(Exact Name of registrant as specified in its charter)

Delaware
(State or other Jurisdiction of incorporation of organization)

75-0725338
(I.R.S. Employer Identification Number)

6565 N. MacArthur Blvd.
Irving, Texas 75039

(Address of principal executive offices)
(Zip Code)
(214) 689-4300

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant is a shell company (as defined by Rule 12b-2 of the Exchange Act).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-Accelerated filer

As of July 5, 2007, there were 119,693,752 shares of the Company's common stock issued and outstanding excluding 9,366,912 shares held in the Company's treasury.

Table of Contents**COMMERCIAL METALS COMPANY AND SUBSIDIARIES****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)****NOTE A QUARTERLY FINANCIAL DATA**

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States (GAAP) on a basis consistent with that used in the Company's Annual Report on Form 10-K filed with the Securities and Exchange Commission (SEC) for the year ended August 31, 2006, and include all normal recurring adjustments necessary to present fairly the condensed consolidated balance sheets and statements of earnings, cash flows and stockholders' equity for the periods indicated. These Notes should be read in conjunction with such Form 10-K. The results of operations for the three and nine month periods are not necessarily indicative of the results to be expected for a full year.

NOTE B ACCOUNTING POLICIES**Stock-Based Compensation**

See Note 9, Capital Stock, to the Company's consolidated financial statements for the year ended August 31, 2006 filed on Form 10-K with the SEC for a description of the Company's stock incentive plans.

The Company adopted 123(R) effective September 1, 2005 using the modified prospective method. As a result, compensation expense was recorded for the unvested portion of previously issued awards that were outstanding at September 1, 2005. The Black-Scholes pricing model was used to calculate total compensation cost which is amortized on a straight-line basis over the remaining vesting period of previously issued awards. (See Note 1, Summary of Significant Accounting Policies, to the Company's consolidated financial statements for the year ended August 31, 2006 for the assumptions used to estimate the fair value and the weighted average grant date fair value. The Company developed its volatility assumption based on historical data). The Company recognized after-tax stock-based compensation expense of \$1.3 million and \$1.7 million (\$0.01 per diluted share, respectively) for the three months ended May 31, 2007 and 2006, respectively and \$4.8 million and \$4.6 million (\$0.04 per diluted share, respectively) for the nine months ended May 31, 2007 and 2006, respectively as a component of selling, general and administrative expenses. The cumulative effect of adoption (primarily arising from the recognition of anticipated forfeitures) was not material. At May 31, 2007, the Company had \$4.7 million of total unrecognized compensation cost related to non-vested share-based compensation arrangements. This cost is expected to be recognized over the next 25 months.

Combined information for shares subject to options and SARs for the nine months ended May 31, 2007 was as follows:

	Number	Weighted Average Exercise Price	Price Range Per Share
August 31, 2006

Of the Company's previously granted restricted stock awards 112,833 and 16,000 shares vested during the nine months ended May 31, 2007 and 2006, respectively.

Intangible Assets

The total gross carrying amounts of the Company's intangible assets that were subject to amortization were \$31.1 million and \$22.0 million at May 31, 2007 and August 31, 2006, respectively. Aggregate amortization expense for the three months ended May 31, 2007 and 2006 was \$1.6 million and \$0.8 million, respectively. Aggregate amortization expense for each of the nine months ended May 31, 2007 and 2006 was \$3.2 million and \$2.0 million, respectively.

SFAS No. 159 The Fair Value Option for Financial Assets and Financial Liabilities

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities, including an amendment of FASB Statement No. 115. This statement permits entities to choose to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. SFAS 159 is effective for the Company's fiscal year beginning September 1, 2008. The Company does not expect the adoption of this Standard to have a material impact on its financial statements.

Staff Accounting Bulletin No. 108

In September 2006, the SEC released SAB No. 108, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements* which is effective for the Company's fiscal year beginning September 1, 2007. The Standard requires registrants to consider the effects of the carryover or reversal of prior year misstatements in quantifying a current year misstatement and should quantify errors using both a balance sheet and an income statement approach and evaluate whether either approach results in quantifying a misstatement that, when all relevant quantitative and qualitative factors are considered, is material. The Company does not expect the adoption of this Standard to have a material impact on its financial statements.

FASB Staff Position (FSP) No. AUG AIR-1

In September 2006, the FASB issued FASB Staff Position (FSP) No. AUG AIR-1, *Accounting for Planned Major Maintenance Activities* which is effective for the Company's fiscal year beginning September 1, 2007. The Staff Position prohibits the use of the accrue-in-advance method of accounting for planned major maintenance activities in annual and interim financial reporting periods. The Company does not expect the adoption of this Standard to have a material impact on its financial statements.

NOTE C ACQUISITIONS

During the nine months ended May 31, 2007, the company made the following acquisitions:

On April 17, 2007, the Company completed the acquisition of substantially all the operating assets of the related companies consisting of Nicholas J. Bouras, Inc., United Steel Deck, Inc., The New Columbia Joist Company, and ABA Trucking Corporation. The acquisition establishes CMC as a manufacturer of steel deck and will add to CMC's joist manufacturing capacity to meet the needs of its customers in the Northeastern United States. The acquisition will also provide geographic and product growth opportunities.

Table of Contents

On January 4, 2007, the Company completed the acquisition of the operating assets and inventory of Bruhler Stahlhandel GmbH steel fabrication business in Rosslau/Saxony-Anhalt in eastern Germany. The acquisition was made by CMC's subsidiary Commercial Metals Deutschland GmbH. This acquisition is expected to strengthen the Company's vertical integration and downstream capability in Central Europe and to complement CMC's existing fabrication operation in Zawiercie, Poland

The total purchase price for these acquisitions of approximately \$159.2 million consisted of \$156.5 million in cash consideration and \$2.8 million in liabilities assumed. The following table summarizes the preliminary allocation of the purchase prices to the assets acquired and liabilities assumed based on the fair value at the date of the acquisition (subject to change following management's final evaluation of the fair value):

(in thousands)

Inventories	\$ 87,581
Property, plant and equipment	60,846
Goodwill	1,304
Intangible assets	9,520
Liabilities	(2,790)
Net assets acquired	\$ 156,461

The intangible assets acquired include customer base which will be amortized over 5 years and a backlog, which will be amortized over 9 months.

The pro forma effect of these acquisitions on consolidated net earnings was not material.

On March 2, 2007, the Company purchased all of the shares of CMCZ owned by the Polish Ministry of State Treasury for approximately \$59.5 million. The shares acquired represent approximately 26.8% of the total CMCZ shares outstanding. The Company intends to redeem the shares and with this purchase and subsequent redemption, CMC holds approximately 99% of the outstanding shares of CMCZ.

NOTE D SALES OF ACCOUNTS RECEIVABLE

The Company has an accounts receivable securitization program which it utilizes as a cost-effective, short-term financing alternative. Under this program, the Company and several of its subsidiaries periodically sell certain eligible trade accounts receivable to the Company's wholly-owned consolidated special purpose subsidiary (CMCRV). CMCRV is structured to be a bankruptcy-remote entity. CMCRV, in turn, sells undivided percentage ownership interests in the pool of receivables to affiliates of two third-party financial institutions. CMCRV may sell undivided interests of up to \$200 million, depending on the Company's level of financing needs.

At May 31, 2007 and August 31, 2006, accounts receivable of \$377 million and \$351 million, respectively, had been sold to CMCRV. The Company's undivided interest in these receivables (representing the Company's retained interest) was 100% at May 31, 2007 and August 31, 2006. The Company did not sell any undivided interests in the pool of receivables to the financial institution buyers during the three months ended May 31, 2007 and the average monthly amount of undivided interests owned by the financial institution buyers was \$8.2 million and \$1.1 million for the nine months ended May 31, 2007 and 2006, respectively.

In addition to the securitization program described above, the Company's international subsidiaries periodically sell accounts receivable without recourse. Uncollected accounts receivable that had been sold under these arrangements and removed from the condensed consolidated balance sheets were \$123.6 million and \$61.9 million at May 31, 2007 and August 31, 2006, respectively. The average monthly amounts of outstanding international accounts receivable sold were \$81.9 million and \$60.6 million for the nine months ended May 31, 2007 and 2006, respectively.

Discounts (losses) on domestic and international sales of accounts receivable were \$1.5 million and \$0.8 million for the three months ended May 31, 2007 and 2006, respectively. For the nine months ended May 31, 2007 and 2006, these discounts were \$3.8 million and \$2.4 million, respectively. These losses primarily represented the costs of funds

and were included in selling, general and administrative expenses.

Table of Contents**NOTE E INVENTORIES**

Before deduction of last-in, first-out (LIFO) inventory valuation reserves of \$249.3 million and \$189.3 million at May 31, 2007 and August 31, 2006, respectively, inventories valued under the first-in, first-out method approximated replacement cost. The majority of the Company's inventories are in finished goods, with minimal work in process. Approximately \$95.9 million and \$54.6 million were in raw materials at May 31, 2007 and August 31, 2006, respectively.

NOTE F CREDIT ARRANGEMENTS

Borrowings outstanding under the Company's commercial paper program were \$146.9 million and none at May 31, 2007 and August 31, 2006, respectively. No borrowings were outstanding under the related revolving credit agreement at May 31, 2007 and August 31, 2006. The company was in compliance with all covenants at May 31, 2007.

The Company has numerous informal credit facilities available from domestic and international banks. These credit facilities are available to support documentary letters of credit (including those with extended terms), foreign exchange transactions and, in certain instances, short-term working capital loans and are priced at bankers' acceptance rates or on a cost of funds basis. Amounts outstanding on these facilities relate to accounts payable settled under documentary letters of credit. The Company has \$5.1 million outstanding under such facility at May 31, 2007.

Long-term debt was as follows:

(in thousands)	May 31, 2007	August 31, 2006
6.80% notes due August 2007	\$ 50,000	\$ 50,000
6.75% notes due February 2009	100,000	100,000
CMCZ term note due March 2009		18,322
5.625% notes due November 2013	200,000	200,000
Other, including equipment notes	14,142	13,926
	364,142	382,248
Less current maturities	54,590	60,162
	\$ 309,552	\$ 322,086

In February 2007, CMCZ entered into a new revolving credit facility agreement. The credit agreement has maximum borrowings of 100 million PLN (\$35.3 million) and interest rate of WIBOR plus 0.55%. The credit facility expires on July 31, 2007 and is not collateralized. The short-term credit facility contains certain financial covenants and CMCZ was in compliance with these covenants at May 31, 2007. Under this facility, 100 million PLN (\$35.3 million) was outstanding at May 31, 2007.

In May 2007, CMCZ renewed its other revolving credit facility that expired on May 11, 2007. The renewed facility has maximum borrowings of 100 million PLN (\$35.3 million) bearing interest at the Warsaw Interbank Offered Rate (WIBOR) plus 0.5%. This facility has an expiration date of May 9, 2008 and is not collateralized. At May 31, 2007, 22.2 million PLN (\$7.8 million) was outstanding under this facility. The revolving credit facilities contain certain financial covenants. CMCZ was in compliance with these covenants at May 31, 2007. There are no guarantees by the Company or any of its subsidiaries for any of CMCZ's debt.

CMC Poland, a wholly-owned subsidiary of the Company, owns and operates equipment at the CMCZ mill site. In connection with the equipment purchase, CMC Poland issued equipment notes under a term agreement dated September 2005 with 34.0 million PLN (\$12.0 million) outstanding at May 31, 2007. Installment payments under these notes are due through 2010. Interest rates are variable based on the Poland Monetary Policy Council's rediscount rate, plus any applicable margin. The weighted average rate as of May 31, 2007 was 4.25%. The notes are substantially secured by the shredder equipment.

Interest of \$27.2 million and \$22.4 million was paid in the nine months ended May 31, 2007 and 2006, respectively.

NOTE G INCOME TAXES

The Company paid \$145.0 million and \$149.4 million in income taxes during the nine months ended May 31, 2007 and 2006, respectively.

Table of Contents

Reconciliations of the United States statutory rates to the Company's effective tax rates were as follows:

(in thousands, except share data)	Three Months Ended		Nine months Ended	
	May 31,		May 31,	
	2007	2006	2007	2006
Statutory rate	35.0%	35.0%	35.0%	35.0%
State and local taxes	1.8	3.1	1.8	2.0
Extraterritorial Income Exclusion (ETI)	(0.1)	(0.3)	(0.1)	(0.2)
Foreign rate differential	(4.4)	(1.0)	(3.8)	(0.5)
Domestic production activity deduction	(0.5)	(1.0)	(0.5)	(0.7)
Other	(0.5)	0.5	1.4	0.3
Effective rate	31.3%	36.3%	33.8%	35.9%

In June 2006, the FASB issued FIN 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement 109, which clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FAS No. 109, Accounting for Income Taxes. FIN 48 requires that we recognize, in our financial statements, the impact of a tax position, if that position is more likely than not of being sustained on audit, based on the technical merits of the position. In May 2007, the FASB issued Staff Position FIN No. 48-1, Definition of Settlement in FASB Interpretation No. 48. FSP FIN 48-1 provides guidance on how a company should determine whether a tax position is effectively settled for the purpose of recognizing previously unrecognized tax benefits. The provisions of FIN 48 are effective for the Company's fiscal year beginning September 1, 2007, with the cumulative effect of the change in accounting principle recorded as an adjustment to opening retained earnings. The Company is currently assessing the impact, if any, that the adoption of FIN 48 will have on the Company's financial statements.

NOTE H STOCKHOLDERS EQUITY AND EARNINGS PER SHARE

In calculating earnings per share, there were no adjustments to net earnings to arrive at earnings for the three or nine months ended May 31, 2007 or 2006. The reconciliation of the denominators of the earnings per share calculations is as follows:

	Three Months Ended		Nine months Ended	
	May 31,		May 31,	
	2007	2006	2007	2006
Average shares outstanding for basic earnings per share	118,623,424	119,708,857	117,773,618	117,732,084
Effect of dilutive securities-stock based incentive/purchase plans	3,332,860	5,376,793	3,826,725	5,818,517
Average shares outstanding for diluted earnings per share	121,956,284	125,085,650	121,600,343	123,550,601

All of the Company's outstanding stock options, restricted stock and Stock Appreciation Rights (SARs) with total share commitments of 6,130,725 and 8,943,368 at May 31, 2007 and 2006, were dilutive based on the average share price for the quarters then ended of \$31.90 and \$25.30, respectively. All stock options and SARs expire by 2013. The Company's restricted stock is included in the number of shares of common stock issued and outstanding, but omitted from the basic earnings per share calculation until the shares vest.

At May 31, 2007, the Company had authorization to purchase 2,642,260 of its common shares.

NOTE I DERIVATIVES AND RISK MANAGEMENT

The Company's worldwide operations and product lines expose it to risks from fluctuations in foreign currency exchange rates and metals commodity prices. The objective of the Company's risk management program is to mitigate these risks using futures or forward contracts (derivative instruments). The Company enters into metal commodity forward contracts to mitigate the risk of unanticipated changes in gross margin due to the volatility of the commodities prices, and enters into foreign currency forward contracts, which match the expected settlements for purchases and sales denominated in foreign currencies. Also, when its sales commitments to customers include a fixed price freight component, the Company occasionally enters into freight forward contracts to

Table of Contents

minimize the effect of the volatility of ocean freight rates. Forward contracts on natural gas may also be entered to reduce the price volatility of gas used in production. The Company designates only those contracts which closely match the terms of the underlying transaction as hedges for accounting purposes. These hedges resulted in an immaterial amount of ineffectiveness in the statements of earnings and there were no components excluded from the assessment of hedge effectiveness for the three or nine months ended May 31, 2007 and 2006. Certain of the foreign currency and commodity contracts were not designated as hedges for accounting purposes, although management believes they are essential economic hedges.

The following table shows the impact on the condensed consolidated statements of earnings of the changes in fair value of these economic hedges:

(in thousands)	Three Months Ended May 31,		Nine months Ended May 31,	
	2007	2006	2007	2006
	Earnings (Expense)		Earnings (Expense)	

Net sales (foreign currency instruments)	\$ 177	\$ (421)	\$ 46	\$ (507)
Cost of goods sold (commodity instruments)	2,997	3,958	(727)	4,007

The Company's derivative instruments were recorded as follows on the condensed consolidated balance sheets:

(in thousands)	May 31, 2007	August 31, 2006
Derivative assets (other current assets)	\$7,650	\$5,633
Derivative liabilities (other payables)	6,277	8,323

The following table summarizes activities in other comprehensive income (losses) related to derivatives classified as cash flow hedges held by the Company during the nine months ended May 31, 2007 (in thousands):

Change in market value (net of taxes)	\$ 3,081
(Gains) losses reclassified into net earnings, net	(1,578)
Other comprehensive gain — unrealized gain on derivatives	\$ 1,503

During the twelve months following May 31, 2007, \$2.7 million in losses related to commodity hedges and capital expenditures are anticipated to be reclassified into net earnings as the related transactions mature and the assets are placed into service, respectively. Also, an additional \$112 thousand in gains will be reclassified as interest expense related to an interest rate lock.

All of the instruments are highly liquid, and none are entered into for trading purposes.

NOTE J CONTINGENCIES

See Note 11, Commitments and Contingencies, to the consolidated financial statements for the year ended August 31, 2006 relating to environmental and other matters. There have been no significant changes to the matters noted therein. In the ordinary course of conducting its business, the Company becomes involved in litigation, administrative proceedings and governmental investigations, including environmental matters. Management believes that adequate provision has been made in the condensed consolidated financial statements for the potential impact of these issues, and that the outcomes will not significantly impact the results of operations or the financial position of the Company, although they may have a material impact on earnings for a particular quarter.

In February 2007, the Company entered into a guarantee agreement to assist one of the Company's Chinese coke suppliers to obtain pre-production financing from a bank. In addition, we entered into another guarantee agreement for one of our suppliers of finished goods to obtain working capital financing from a financial institution. In the aggregate, the Company's maximum exposure under the guarantees at May 31, 2007 is approximately \$12.3 million.

The fair value of the guarantees is negligible.

NOTE K BUSINESS SEGMENTS

The Company's reportable segments are based on strategic business areas, which offer different products and services. These segments have different lines of management responsibility as each business requires different marketing strategies and management expertise.

The Company has five reportable segments: domestic mills, CMCZ, domestic fabrication, recycling and marketing and distribution.

Table of Contents

The following is a summary of certain financial information by reportable segment:

Three Months Ended May 31, 2007

(in thousands)	Marketing and							Consolidated

NOTE L RELATED PARTY TRANSACTIONS

One of the Company's international subsidiaries has an agreement for steel purchases with a key supplier of which the Company owns an 11% interest. The total amounts of purchases from this supplier were \$273.1 million and \$195.4 million for the nine months ended May 31, 2007 and 2006, respectively.

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

This Management's Discussion and Analysis should be read in conjunction with our Form 10-K filed with the Securities and Exchange Commission (SEC) for the year ended August 31, 2006.

CRITICAL ACCOUNTING POLICIES

Our critical accounting policies are consistent with the information set forth in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, included in our Form 10-K filed with the SEC for the year ended August 31, 2006 and are, therefore, not presented herein.

CONSOLIDATED RESULTS OF OPERATIONS

(in millions)	Three Months Ended			Nine Months Ended		
	2007	2006	% Change	2007	2006	% Change
Net sales	\$2,345.7	\$2,021.3	16%	\$6,348.0	\$5,306.5	20%
Net earnings	99.4	78.0	27%	250.7	227.7	10%
EBITDA	181.4	152.8	19%	486.4	439.0	11%

In the table above, we have included a financial statement measure that was not derived in accordance with GAAP.

We use EBITDA (earnings before interest expense, income taxes, depreciation and amortization) as a non-GAAP performance measure. In calculating EBITDA, we exclude our largest recurring non-cash charge, depreciation and amortization. EBITDA provides a core operational performance measurement that compares results without the need to adjust for federal, state and local taxes which have considerable variation between domestic jurisdictions. Tax regulations in international operations add additional complexity. Also, we exclude interest cost in our calculation of EBITDA. The results are, therefore, without consideration of financing alternatives of capital employed. We use EBITDA as one guideline to assess our unleveraged performance return on our investments. EBITDA is also the target benchmark for our long-term cash incentive performance plan for management. Reconciliations to net earnings are provided below:

(in millions)	Three Months Ended			Nine Months Ended		
	2007	2006	% Change	2007	2006	% Change
Net earnings	\$ 99.4	\$ 78.0	27%	\$250.7	\$227.7	10%
Interest expense	9.6	6.9	39%	26.7	20.8	28%
Income taxes	45.5	46.1	(1)%	133.1	129.0	3%
Depreciation and amortization	26.9	21.8	23%	75.9	61.5	23%
EBITDA	\$181.4	\$152.8	19%	\$486.4	\$439.0	11%

Our EBITDA does not include interest expense, income taxes and depreciation and amortization. Because we have borrowed money in order to finance our operations, interest expense is a necessary element of our costs and our ability to generate revenues. Because we use capital assets, depreciation and amortization are also necessary elements of our costs. Also, the payment of income taxes is a necessary element of our operations. Therefore, any measures that exclude these elements have material limitations. To compensate for these limitations, we believe that it is appropriate to consider both net earnings determined under GAAP, as well as EBITDA, to evaluate our performance. Also, we separately analyze any significant fluctuations in interest expense, depreciation and amortization and income taxes.

Overview This is the strongest third quarter ever reported by the Company. We posted record net earnings and EBITDA of \$99.4 million and \$181.4 million, respectively, for the three months ended May 31, 2007, an increase of

27% and 19% over the same period last year. For the nine months ended May 31, 2007, net earnings increased by 10% to \$250.7 million and EBITDA by 11% to \$486.4 million as compared to the same period ended May 31, 2006. The Company reported net sales of \$2.3 billion and \$6.3 billion for the three and nine months ended May 31, 2007 an improvement of \$0.3 billion and \$1.0 billion, respectively over last year's results. The record results were helped by a strong U.S. nonresidential construction market, favorable global economic conditions and relatively stable international steel prices. For the quarter just ended, four of our five operating segments set third quarter records with CMCZ, our Polish operation, and Marketing and Distribution setting all time quarterly records. Third quarter results were supported by the strong domestic and international nonresidential projects that kept demand strong for our products and sustained higher prices despite

Table of Contents

a slight downward shift in volume shipments and margin squeeze. We expect this pricing trend to continue and to improve as the overall construction market appears to be resilient against the volatility of scrap prices, high construction material costs and softening of the housing construction market. In addition, the demand for our merchant bar and the margin squeeze experienced by our reinforcing bar segment should improve as service center destocking winds down and imports decline as a result of favorable U.S. market conditions and the stabilization of ferrous scrap prices. The following financial events were significant during the third quarter ended May 31, 2007:

Net sales for the three months increased by 16% over last year's third quarter to \$2.3 billion.

After-tax LIFO expense of \$20.1 million or \$0.16 per diluted share as compared with an expense of \$28.6 million or \$0.23 per share per last year's third quarter.

Our Polish (CMCZ) operations achieved record earnings with its adjusted operating profit of \$39.8 million, an increase of 187% over last year's third quarter. Net sales increased \$76 million to \$234 million.

Our Marketing and Distribution segment had a 66% increase in its adjusted operating profit due primarily to an increase in net sales of 11% and a pre-tax LIFO income of \$7.4 million.

Our Recycling segment's adjusted operating profit of \$24.7 million increased 10% over last year's third quarter.

Adjusted operating profit for the Domestic Mills segment was up by 6% to \$73.6 million.

Adjusted operating profit of our Domestic Fabrication segment decreased by 37% to \$11.1 million from prior year's quarter due primarily to a margin squeeze caused by the high volatility of steel prices.

Selling, general and administrative expenses included \$13.7 million in costs associated with the investment in the global deployment of SAP software.

On March 2, 2007, the Company purchased all of the minority shares of CMCZ owned by the Polish Ministry of State Treasury for approximately \$59.5 million making CMCZ the owner of approximately 99% of the outstanding shares of CMCZ.

On April 17, 2007, the Company completed the acquisition of substantially all the operating assets of Nicholas J. Bouras, Inc. Net assets acquired approximated \$145.9 million.

SEGMENT OPERATING DATA

See Note K – Business Segments, to the condensed consolidated financial statements.

We use adjusted operating profit (loss) to compare and evaluate the financial performance of our segments. Adjusted operating profit is the sum of our earnings before income taxes, minority interests and financing costs.

The following tables show our net sales and adjusted operating profit (loss) by business segment:

(in thousands)	Three Months Ended			Nine Months Ended		
	2007	2006	% Change	2007	2006	% Change

interests

LIFO Impact on Adjusted Operating Profit LIFO is an inventory costing method that assumes the most recent inventory purchases or goods manufactured are sold first. This results in current sales prices offset against current inventory costs. In periods of rising prices it has the effect of eliminating inflationary profits from net income. In periods of declining prices it has the effect of eliminating deflationary losses from net income. In either case the goal is to reflect economic profit. The table below reflects LIFO income or (expense) representing decreases or (increases) in the LIFO inventory reserve. CMCZ is not included in this table as it uses FIFO valuation exclusively for its inventory:

(in thousands)	Three Months Ended May 31,		Nine Months Ended May 31,	
	2007	2006	2007	2006
Domestic mills	\$(15,394)	\$(14,753)	\$(28,013)	\$(25,111)
Domestic fabrication	(12,251)	(14,674)	(9,187)	(18,885)
Recycling	(10,687)	(10,067)	(9,145)	(14,644)
Marketing and distribution	7,377	(4,569)	(13,656)	(3,051)
Consolidated (decrease) to adjusted profit before tax	\$(30,955)	\$(44,063)	\$(60,001)	\$(61,691)

Domestic Mills We include our four domestic steel and our copper tube minimills in our domestic mills segment. Our domestic mills had an adjusted operating profit for the three months ended May 31, 2007 of \$73.6 million, up by 6% and a pre-tax LIFO expense increase of 4% to \$15.3 million as compared to last year's third quarter. Net sales for the segment increased by 6% to \$447 million as a result of higher average selling prices overcoming a slight decline in tons shipped.

Within the segment, adjusted operating profit for the three months ended May 31, 2007 for our steel minimills was 15% higher than the same period last year on 8% higher net sales or \$382 million. Metal margins expanded over \$10 a ton third quarter to third quarter though shipments dropped 4%. Rebar sales remained strong. Merchant bar tonnages were lower as buyers continued the pattern of overbuying in periods of anticipated or actual rising price increases and lowering their activity in periods of anticipated or actual price declines as occurred in this year's third quarter. On a

year-to-year basis, tonnage melted for the third quarter increased 7% to 596 thousand tons while tonnage rolled was 534 thousand tons, 7% lower than last year's third quarter as planned outages at CMC Alabama reacted to the weaker merchant market. Shipments were 613 thousand tons or 4% lower than last year's third quarter. Our average total selling price was up \$60 per ton to \$575 per ton, while the average selling price for finished goods was up by \$71 per ton to \$601 per ton. By product line, the price premium of merchant bar over reinforcing bar was \$80 per ton, down \$3 from last year. The average scrap purchase cost increased by \$45 per ton a year ago to \$239 per ton. Total utility costs decreased by \$1.2 million compared with the third quarter last year with natural gas and electricity both declining. Year-over-year costs for ferroalloys, graphite electrodes and other supplies were up \$2.9 million.

Table of Contents

The table below reflects steel and ferrous scrap prices per ton:

	Three Months Ended May 31,		Increase		Nine Months Ended May 31,		Increase	
	2007	2006	Amount	%	2007	2006	Amount	%
Average mill selling price (finished goods)	\$601	\$530	\$71	13%	\$577	\$519	\$58	11%
Average mill selling price (total sales)	575	515	60	12%	558	502	56	11%
Average ferrous scrap production cost	267	217	50	23%	231	209	22	11%
Average metal margin	308	298	10	3%	327	293	34	12%
Average ferrous scrap purchase price	239	194	45	23%	209	188	21	11%

The table below reflects our domestic steel minimills' operating statistics (short tons in thousands):

	Three Months Ended May 31,		Increase (Decrease)		Nine Months Ended May 31,		(Decrease)	
	2007	2006	Amount	%	2007	2006	Amount	%
Tons melted	596	557	39	7%	1,659	1,707	(48)	(3)%
Tons rolled	534	572	(38)	(7)%	1,580	1,627	(47)	(3)%
Tons shipped	613	640	(27)	(4)%	1,702	1,867	(165)	(9)%

Two of our domestic steel minimills were more profitable for the three and nine months ended May 31, 2007 as compared to 2006. On a year-to-year basis, our Alabama mill was more profitable with higher margins resulting in an increase in adjusted operating profit of 25% despite planned outages in reaction to a weak merchant market that contributed to a drop in tons melted and rolled of 3% and 20% from last year's third quarter. Our Texas mill was also profitable at a 23% and 9% higher adjusted operating profit for the three and nine months ended May 31, 2007 as compared to 2006 as sales and shredder production set record highs for the quarter. Selling prices at all of our domestic steel mills were higher for the quarter just ended as compared to the same period last year.

The table below reflects our copper tube minimill's prices per pound and operating statistics:

	Three Months Ended May 31,		Increase (Decrease)		Nine Months Ended May 31,		Increase (Decrease)	
	2007	2006	Amount	%	2007	2006	Amount	%
Pounds shipped (in millions)	16.7	20.3	(3.60)	(18)%	38.6	52.2	(13.60)	(26)%
Pounds produced (in millions)	14.9	16.9	(2.00)	(12)%	35.4	49.5	(14.10)	(28)%
Average selling price	\$3.89	\$3.32	\$ 0.57	17%	\$3.85	\$2.90	\$ 0.95	33%

Average copper scrap production cost	2.81	2.11	0.70	33%	2.96	1.81	1.15	64%
Average metal margin	1.08	1.21	(0.13)	(11)%	0.89	1.09	(0.20)	(18)%
Average copper scrap purchase price	3.02	2.47	0.55	22%	2.99	2.06	0.93	45%

Our copper tube minimill recorded an adjusted operating profit of \$3.0 million, 65% below that of last year's third quarter on 4% lower net sales. In addition, adjusted operating profit for the quarter ended was affected by a pre-tax LIFO expense of \$4.7 million as compared to a \$3.9 million expense for the same quarter last year and the decrease in pounds shipped of 18% and decrease in margin of 11%. The overhang of a poor residential market coupled with cautious buying and the inability of selling prices to keep up with copper scrap price increases led to the lower profits. The average selling price increased 57 cents to \$3.89 per pound, but metal spreads dropped 13 cents to \$1.08 per pound as scrap prices rose 70 cents to \$2.81. Against the same quarter last year, copper tube production decreased 12% to 14.9 million pounds while shipments were down by 3.6 million pounds to 16.7 million pounds.

Table of Contents

CMCZ Our combined Polish operation continued to achieve record profitability as the adjusted operating profit for the three and nine months ended May 31, 2007 was \$39.8 million and \$91.4 million, respectively, an increase of 187% and 516% over the same period last year. The operating results are not surprising as Poland had the highest steel prices in Europe throughout most of the quarter, which led to a jump in imported material and lower prices by quarter end that caused an increase in the double digits in its average metal margin recoveries. Shipments were the highest in any third quarter since acquisition, and the melt shop set a monthly record of 154,000 tons in April. The average selling price rose substantially to PLN 1,663 (\$582 per ton including 28% billets) from PLN 1,393 (\$445 per ton including 11% billets). During May 2007, our scrap mega-shredder had a record month of over 48,000 tons processed leading to melt shop yields of 89%, a 3% improvement over last year. The change in foreign currency exchange rates had minimal impact on our adjusted operating profit for 2007 and 2006, respectively.

The following table reflects CMCZ's operating statistics and average prices per short ton:

	Three Months Ended				Nine Months Ended			
	May 31,		Increase		May 31,		Increase	
	2007	2006	Amount	%	2007	2006	Amount	%

Average metal margin	\$246	\$204	\$42	21%	\$236	\$190	\$46	24%
Average ferrous scrap purchase price	\$297	\$201	\$96	48%	\$262	\$185	\$77	42%

Domestic Fabrication For the quarter ended May 31, 2007, net sales were up 6% from a year ago, but reported adjusted operating profit fell to \$11.1 million, a 37% decrease compared with last year's \$17.5 million profit. Both quarters absorbed large LIFO expenses, \$12.3 million pre-tax this quarter versus an expense of \$14.7 million the prior year. Increased material costs continued to squeeze margins on older backlog work. Compared with the prior year's third quarter, total shipments from our fab plants decreased 9% to 395 thousand tons, the fall coming in rebar fab

tonnage as projects were delayed (particularly in Texas) by drought-ending rainfall. On a year-to-year basis, total shipments were unchanged as the construction activity remained relatively strong in all sectors, especially in the public infrastructure and bridge sector. The composite average fab selling price (excluding stock and buyouts) rose 16% to \$998 per ton, with realized selling prices up for all products. The Bouras acquisition, now known as CMC Joist & Deck, contributed \$37 million in sales and 19,000 tons shipped (12,000 tons of deck); operationally it broke even with absorption of start-up costs, but the remainder of the joist operations exceeded last year's profits.

Table of Contents

Our domestic fabrication plants' shipments and average selling prices per ton were as follows:

	Three Months Ended				Nine Months Ended			
	May 31,		Increase		May 31,		Increase	
	2007	2006	Amount	%	2007	2006	Amount	%

Deck	12		12		12		12	

Recycling For the three and nine months ended May 31, 2007, net sales for the Recycling segment increased 22% to \$471 million and 35% to \$1.2 billion, respectively, over the same period last year. Despite the quarter being marked by huge swings in ferrous scrap pricing and nonferrous terminal market volatility, the Recycling segment achieved record third quarter results. The adjusted operating profit of \$24.7 million was up 10% from last year's third quarter and 15% over a year-to-year basis at \$63.2 million. LIFO expense was about even at \$10.7 million pre-tax this quarter versus an expense of \$10.1 million in the prior year. The ferrous scrap market hit all-time highs in March only to drop by almost \$100 a ton by quarter end, though ending prices of \$260 a long ton for shredded were still historically strong. Versus last year, the average ferrous scrap sales price for the quarter increased by 20% to \$251 per short ton while stock shipments of ferrous scrap rose 9% to 630 thousand short tons. The average nonferrous scrap sales price for the quarter increased 14% compared with a year ago, while nonferrous stock shipments were 4% higher. The total volume of scrap processed, including all our domestic processing plants, equaled 1,058 thousand tons against 976 thousand tons last year, an increase of 8%.

The following table reflects our recycling segment's average selling prices per ton and tons shipped (in thousands):

	Three Months Ended				Nine Months Ended			
	May 31,		Increase		May 31,		Increase	
	2007	2006	Amount	%	2007	2006	Amount	%

* Includes our processing plants affiliated with our domestic steel mills.

Marketing and Distribution For the quarter ended May 31, 2007, adjusted operating profit for the Marketing and Distribution segment of \$33.0 million was an all-time third quarter record, 66% better than last year's third quarter on 11% higher net sales. This segment recorded a pre-tax LIFO income of \$7.4 million compared with an expense of \$4.6 million the year before. U.S. steel import

Table of Contents

volumes and operating profits remained strong although varied by product line. International steel markets remained vibrant with increased pricing from the prior year. Australian steel import markets were solid, but conversely there was some weakness in our domestic sourced distribution operations. German and U. K. markets improved significantly from last year. Industrial products including fluorspar, coke, ferroalloys, and iron ore achieved excellent results. Results from semi-finished nonferrous imports were about even with last year with stronger results in stainless products offset by weaker aluminum and copper product lines.

Corporate and Eliminations Our corporate expenses for the three and nine months ended May 31, 2007 increased \$21.7 and \$35.9 million, respectively, over the prior year due primarily to costs incurred for our investment in the global installation of SAP software.

CONSOLIDATED DATA

On a consolidated basis, for the quarter ended May 31, 2007, the LIFO method of inventory valuation decreased our earnings on a pre-tax basis by \$30.9 million or after-tax 16 cents per diluted share as compared to \$44.0 million or 23 cents per diluted share for the same period last year. For the nine months ended May 31, 2007 and 2006, LIFO decreased our earnings on a pre-tax basis by \$60.0 million or after-tax 32 cents per diluted share and \$61.7 million or 32 cents per diluted share, respectively.

Our overall selling, general and administrative (SG&A) expenses increased by \$32.4 million and \$83.7 million for the three and nine months ended May 31, 2007 as compared to 2006, respectively, because of increases in salary compensation, travel expense, benefits and professional services. For the three and nine months ended May 31, 2007, SG&A includes \$13.7 million and \$24.4 million of costs associated with our investment in the global deployment of SAP software.

During the three and nine months ended May 31, 2007, our interest expense increased by \$2.7 million and \$5.9 million, respectively, as compared to 2006, primarily due to increased discount costs on extended-term documentary letters of credit, higher average short-term borrowings and increased borrowings on our commercial paper program.

Our overall effective tax rate for the three and nine months ended May 31, 2007 was 31.3 % and 33.8 %, respectively as compared to 36.3% and 35.9% for the same periods in 2006, due mainly to the strong contribution to consolidated earnings from our Polish mill operations that caused a shift in profitability from a high to a low tax rate jurisdiction.

CONTINGENCIES

See Note J Contingencies, to the condensed consolidated financial statements.

In the ordinary course of conducting our business, we become involved in litigation, administrative proceedings, governmental investigations including environmental matters, and contract disputes. We may incur settlements, fines, penalties or judgments and otherwise become subject to liability because of some of these matters. While we are unable to estimate precisely the ultimate dollar amount of exposure to loss in connection with these matters, we make accruals as amounts become probable and estimable. The amounts we accrue could vary substantially from amounts we pay due to several factors including the following: evolving remediation technology, changing regulations, possible third-party contributions, the inherent shortcomings of the estimation process and the uncertainties involved in litigation. Accordingly, we cannot always estimate a meaningful range of possible exposure. We believe that we have adequately provided in our financial statements for the estimable potential impact of these contingencies. We also believe that the outcomes will not significantly affect the long-term results of operations, our financial position or cash flows. However, they may have a material impact on earnings for a particular quarter.

We are subject to federal, state and local pollution control laws and regulations in all locations where we have operating facilities. We anticipate that compliance with these laws and regulations will involve continuing capital expenditures and operating costs.

OUTLOOK

We remain optimistic in our outlook. We anticipate a fourth quarter diluted net earnings per share between \$0.85 and \$0.95 (estimated pre-tax LIFO expense of \$10 million) compared to last year's all-time record quarter of \$1.04 per diluted share.

The Company's fiscal fourth quarter should be its strongest quarter of the year. Global economic conditions remain favorable. International steel prices are off their peaks, but should remain relatively stable. China's export tax on many

steel products is a positive. However, China needs to curb excessive capacity growth and steel exports through environmental and energy regulations.

Table of Contents

In the U.S., the nonresidential construction market should continue to be strong. Merchant bar shipments should improve as service center destocking winds down. Rebar shipments should be robust during the peak of the construction season. The level of imports of both rebar and merchant bar are anticipated to decline significantly by the end of the fiscal fourth quarter. Ferrous scrap prices will likely remain relatively stable which would result in stable rebar and merchant bar prices during the fourth quarter.

Recycling should benefit from good flows and good ferrous scrap prices as well as high demand and high prices for nonferrous scrap. Our U.S. steel mills should have better shipments of both rebar and merchant products at relatively stable prices. Copper tube performance should be good, but not at last year's record fourth quarter rate. Our domestic fabrication segment, with a strong backlog, is anticipated to benefit from the stable steel price environment and have stronger shipments. CMCZ (Poland) likely will benefit from the strong construction market in Central and Eastern Europe; however, results may be lower than our third quarter due to reduced prices and shipments. Our Marketing and Distribution segment looks forward to a very good quarter though lower than the record third quarter just achieved. In summary, we anticipate our second best ever fourth quarter.

LIQUIDITY AND CAPITAL RESOURCES

See Note F – Credit Arrangements, to the condensed consolidated financial statements.

Our sources, facilities and availability of liquidity and capital resources as of May 31, 2007 (dollars in thousands):

Source		Availability
Net cash flows from operating activities	\$ 122,362	\$ N/A
Commercial paper program *	400,000	227,044
Domestic accounts receivable securitization	200,000	200,000
International accounts receivable sales facilities	196,856	73,240
Bank credit facilities – uncommitted	1,014,462	426,614
Notes due from 2007 to 2013	350,000	**
Trade financing arrangements	**	As required
CMCZ revolving credit facilities	70,672	27,492
CMCZ & CMC Poland equipment notes	12,775	

* The commercial paper program is supported by our \$400 million unsecured revolving credit agreement. The availability under the revolving credit agreement is reduced by \$26.1 million of stand-by letters of credit issued as of May 31, 2007.

** With our investment grade credit ratings and current industry conditions we believe we have access to cost-effective public markets for potential refinancing or the issuance of additional long-term debt.

Certain of our financing agreements, both domestically and at CMCZ, include various covenants, of which we were in compliance at May 31, 2007. There are no guarantees by the Company or any of its subsidiaries for any of CMCZ's debt.

Off-Balance Sheet Arrangements For added flexibility, we may secure financing through securitization and sales of certain accounts receivable both in the U.S. and internationally. See Note D – Sales of Accounts Receivable, to the condensed consolidated financial statements. We may continually sell accounts receivable on an ongoing basis to replace those receivables that have been collected from our customers. Our domestic securitization program contains certain cross-default provisions whereby a termination event could occur should we default under another credit arrangement, and contains covenants that conform to the same requirements contained in our revolving credit agreement.

Cash Flows Our cash flows from operating activities primarily result from sales of steel and related products, and to a lesser extent, sales of nonferrous metal products. We have a diverse and generally stable customer base.

Significant fluctuations in working capital:

Increased accounts receivable – increased sales as compared to the same period last year.

Increased inventories more in transit inventory, higher inventory costs in some divisions and inventory acquired in acquisitions.

Increased accounts payable documentary letters of credit issued more documentary letters of credit for purchases.

Table of Contents

We expect our current approved total capital spending for fiscal year 2007 to be approximately \$220 million, including \$20 million to commence the construction of the greenfield micro mill in Phoenix, Arizona and \$20 million to start the installation of a new wire block mill in CMCZ. We invested \$46.7 million in property, plant and equipment during the third quarter just ended. We continuously assess our capital spending and reevaluate our requirements based upon current and expected results. Historically, we have not spent our entire approved budget during the fiscal year.

We are undertaking a 5-year Enterprise Resource Planning (ERP) system implementation program to improve our operating systems and the Company is anticipating capital expenditures of approximately \$28 million during the current fiscal year.

During the quarter ended May 31, 2007, we did not purchase any shares of our common stock as part of our stock repurchase program. Our contractual obligations for the next twelve months of \$1.3 billion are typically expenditures with normal revenue processing activities. We believe our cash flows from operating activities and debt facilities are adequate to fund our ongoing operations and planned capital expenditures.

CONTRACTUAL OBLIGATIONS

The following table represents our contractual obligations as of May 31, 2007:

(dollars in thousands)	Total	Payments Due By Period*			
		Less than 1 Year	1 3 Years	3 5 Years	More than 5 Years
Contractual Obligations:					
Long-term debt ⁽¹⁾	\$ 364,142	\$ 54,590	\$106,471	\$ 3,035	\$200,046
Notes payable	48,244	48,244			
Interest ⁽²⁾	91,336	20,145	29,431	22,530	19,230
Operating leases ⁽³⁾	138,818	36,197	55,767	27,241	19,613
Purchase obligations ⁽⁴⁾	1,631,698	1,186,138	341,128	68,564	35,868
Total contractual cash obligations	\$2,274,238	\$1,345,314	\$352,797	\$121,370	\$274,757

* We have not discounted the cash obligations in this table.

- (1) Total amounts are included in the May 31, 2007 condensed consolidated balance sheet. See Note F, Credit Arrangements, to the condensed consolidated financial statements.
- (2) Interest payments related to our short-term debt are not included in the table as they do not represent a significant obligation as of May 31, 2007.
- (3) Includes minimum lease payment obligations for non-cancelable equipment and real-estate leases in effect as of May 31, 2007.
- (4) About 87% of these purchase obligations are for inventory items to be sold in the ordinary course of business. Purchase obligations include all enforceable, legally binding agreements to purchase goods or services that specify all significant terms, regardless of the duration of the agreement. Agreements with variable terms are excluded because we are unable to estimate the minimum amounts.

Other Commercial Commitments We maintain stand-by letters of credit to provide support for certain transactions that our insurance providers and suppliers request. At May 31, 2007, we had committed \$32.7 million under these arrangements. All of the commitments expire within one year.

FORWARD-LOOKING STATEMENTS

This Form 10-Q contains forward-looking statements regarding the outlook for our financial results including net earnings, product pricing and demand, currency valuation, production rates, energy expense, interest rates, inventory levels, new capital investments, software implementation costs, and general market conditions. These forward-looking statements generally can be identified by phrases such as we expect, anticipate believe, ought, should, likely, project, forecast, or other similar words or phrases of similar impact. There is inherent risk and uncertainty in any forward-looking statements. Variances will occur and

Table of Contents

some could be materially different from our current opinion. Developments that could impact our expectations include the following:

interest rate changes,

construction activity,

metals pricing over which we exert little influence,

increased capacity and product availability from competing steel minimills and other steel suppliers including import quantities and pricing,

court decisions,

industry consolidation or changes in production capacity or utilization,

global factors including political and military uncertainties,

credit availability,

currency fluctuations,

energy prices,

cost of construction,

successful implementation of new technology,

successful integration of acquisitions,

decisions by governments impacting the level of steel imports, and

pace of overall economic activity, particularly China.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information required hereunder for the Company is consistent with the information set forth in Item 7a. Quantitative and Qualitative Disclosures about Market Risk included in the Company's Annual Report on Form 10-K for the year ended August 31, 2006, filed with the Securities Exchange Commission and is, therefore, not presented herein.

Also, see Note I Derivatives and Risk Management, to the condensed consolidated financial statements.

ITEM 4. CONTROLS AND PROCEDURES

The term disclosure controls and procedures is defined in Rules 13a-15(e) of the Securities Exchange Act of 1934, or the Exchange Act. This term refers to the controls and procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files under the Exchange Act is recorded, processed, summarized and reported within required time periods. Our Chief Executive Officer and our Chief Financial Officer have evaluated the effectiveness of our disclosure controls and procedures as of the end of the period covered by this quarterly report, and they have concluded that as of that date, our disclosure controls and procedures were effective at ensuring that required information will be disclosed on a timely basis in our reports filed under the Exchange Act.

No change to our internal control over financial reporting occurred during our last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.
