Notes to Schedule of Investments:

\* Portfolio securities and other financial instruments for which market quotations are readily available are stated at market value. Portfolio securities and other financial instruments, for which market quotations are not readily available or if a development/event occurs that may significantly impact the value of a security are fair-valued, in good faith, pursuant to guidelines established by the Board of Directors. The Fund's investments are valued daily using prices supplied by dealer quotations, using the last sale price on the exchange that is the primary market for such securities, or the last quoted mean price for those securities for which the over-the-counter market is the primary market or for listed securities in which there were no sales. Short-term securities maturing in 60 days or less are valued at amortized

cost, if their original term to maturity was 60 days or less, or by amortizing their value on the 61st day prior to maturity, if the original term to maturity exceeded 60 days. The prices used by the Fund to value securities may differ from the value that would be realized if the securities were sold. The Fund's net asset value is normally determined as of the close of regular trading (normally, 4:00 p.m. Eastern time) on the New York Stock Exchange ("NYSE") on each day the NYSE is open for business.

The prices of certain equity securities or other financial instruments may be determined at a time prior to the close of regular trading on the NYSE. When fair valuing securities, the Fund may, among other things, consider significant events (which may be considered to include changes in the value of U.S. securities or securities indices) that occur after the close of the relevant market and before the time the Fund's net asset value is calculated. With respect to Korean securities, the Fund may fair value securities using modeling tools provided by third-party vendors. The Fund has retained a statistical research service to assist in determining the fair value of foreign securities. This service utilizes statistics and programs based on historical performance of markets and other economic data to assist in making fair value estimates. Fair value estimates used by the Fund for foreign securities may differ from the value realized from the sale of those securities.

- (a) Non-income producing.
- (b) The Fund may purchase securities that are subject to legal or contractual restrictions on resale ("restricted securities"). Restricted securities are securities which have not been registered with the Securities and Exchange Commission under the Securities Act of 1933. The Fund may be unable to sell a restricted security and it may be more difficult to determine a market value for a restricted security. Moreover, if adverse market conditions were to develop during the period between the Fund's decision to sell a restricted security and the point at which the Fund is permitted or able to sell such security, the Fund might obtain a price less favorable than the price that prevailed when it decided to sell. This investment practice, therefore, could have the effect of increasing the level of illiquidity of the Fund. The future value of these securities is uncertain and there may be changes in the estimated value of these securities.

|                       | Acquisition | Cost        | Value | % of   |
