INCORPORATION BY REFERENCE

Sappi Limited's report for the conformed second quarter results ended March 2012, furnished by the Registrant under this Form 6-K, is incorporated by reference into (i) the Registration Statements on Form S-8 of the Registrant filed December 23, 1999, December 15, 2004 and February 2, 2010 in connection with The Sappi Limited Share Incentive Scheme, (ii) the Section 10(a) Prospectus relating to the offer and sale of the Registrant's shares to Participants under The Sappi Limited Share Incentive Scheme, (iii) the Registration Statements on Form S-8 of the Registrant filed December 15, 2004 and December 21, 2005 in connection with The Sappi Limited 2004 Performance Share Incentive Plan and (iv) the Section 10(a) Prospectus relating to the offer and sale of the Registrant's shares to Participants under The Sappi Limited 2004 Performance Share Incentive Plan. This Form 6-K includes a conformed version of the earnings announcement sent by the Registrant to its shareholders. This conformed version was prepared solely for purposes of supplementing the documents referred to in clauses (i) - (iv) above.

FORWARD-LOOKING STATEMENTS

In order to utilize the "Safe Harbor" provisions of the United States Private Securities Litigation Reform Act of 1995 (the "Reform Act"), Sappi Limited (the "Company") is providing the following cautionary statement. Except for historical information contained herein, statements contained in this Report on Form 6-K may constitute "forward-looking statements" within the meaning of the Reform Act. The words "believe", "anticipate", "expect", "intend", "estimate", "plan", "assume", "positioned", "will", "may", "should", "risk" and other similar expressions, which are predictions of or indicate future events and future trends, which do not relate to historical matters, identify forward-looking statements. In addition, this Report on Form 6-K may include forward-looking statements relating to the Company's potential exposure to various types of market risks, such as interest rate risk, foreign exchange rate risk and commodity price risk. Reliance should not be placed on forward-looking statements because they involve known and unknown risks, uncertainties and other factors which are in some cases beyond the control of the Company, together with its subsidiaries (the "Group"), and may cause the actual results, performance or achievements of the Group to differ materially from anticipated future results, performance or achievements expressed or implied by such forward-looking statements (and from past results, performance or achievements). Certain factors that may cause such differences include but are not limited to:

- the highly cyclical nature of the pulp and paper industry (and the factors that contribute to such cyclicity, such as levels of demand, production capacity, production, input costs including raw material, energy and employee costs, and pricing);
- the impact on the business of the global economic downturn;
- unanticipated production disruptions (including as a result of planned or unexpected power outages);
- changes in environmental, tax and other laws and regulations;
- adverse changes in the markets for the Group's products;
- consequences of the Group's leverage, including as a result of adverse changes in credit markets that affect the Group's ability to raise capital when needed;
- adverse changes in the political situation and economy in the countries in which the Group operates or the effect of governmental efforts to address present or future economic or social problems;
- the impact of restructurings, cost-reduction programmes, acquisitions and dispositions and other strategic initiatives

(including

related financing), any delays, unexpected costs or other problems experienced in connection with dispositions or with

integrating acquisitions and achieving expected savings and synergies; and

- currency fluctuations.

These and other risks, uncertainties and factors are discussed in the Company's Annual Report on Form 20-F and other filings with and submissions to the Securities and Exchange Commission, including this Report on Form 6-K. Shareholders and prospective investors are cautioned not to place undue reliance on these forward-looking statements. These forward-looking statements are made as of the date of the submission of this Report on Form 6-K and are not intended to give any assurance as to future results. The Company undertakes no obligation to publicly update or revise any of these forward looking statements, whether to reflect new information or future events or circumstances or otherwise.

the half-year ended
March 2012
Form S-8 version

Sappi works closely with customers, both direct and indirect, in over 100 countries to provide them with relevant and sustainable paper, paper-pulp and chemical cellulose products and related services and innovations.

Our market-leading range of paper products includes: coated fine papers used by printers, publishers and corporate end-users in the production of books, brochures, magazines, catalogues, direct mail and many other print applications; casting release papers used by suppliers to the fashion, textiles, automobile and household industries; and in our Southern African region, newsprint, uncoated graphic and business papers, premium-quality packaging papers, paper-grade pulp and chemical cellulose.

Our chemical cellulose products are used worldwide by converters to create viscose fibre, acetate tow, pharmaceutical products as well as a wide range of consumer products.

The pulp needed for our products is either produced within Sappi or bought from accredited suppliers.

Across the group, Sappi is close to 'pulp neutral', meaning that we sell almost as much pulp as we buy.

This cover picture is a photograph of a stylised transverse cross-section of Eucalyptus wood.

The large circles are vessels which transport water up and down the tree and the smaller circles are the fibres which we use to make paper and chemical cellulose.

Fibres are separated in the pulping process through the softening and removal of lignin which acts as a glue between the fibres in the wood. In papermaking, fibres are re-formed to form a flat, strong and uniform surface for printing and writing.

2

Commentary on the quarter

The improving trend in operating performance continued in the quarter, with the European and North American businesses in particular showing good improvement. The group achieved a profit for the period of US\$58 million (Q2 2011 loss of US\$74 million) and EPS of 11 US cents (Q2 2011 loss 14 US cents) in the second quarter of the 2012 financial year.

Market conditions for coated paper have been weaker than in the equivalent period last year.

Despite this, our operating rates remained good in both Europe and North America. Variable costs and fixed costs are generally lower, particularly in Europe, enabling margins to be maintained or widened.

The Southern African chemical cellulose business continues to perform strongly, driven by strong sales volumes.

Pulp prices, which had been weakening since July 2011, stopped declining midway through the quarter, and have since been gradually increasing. This increase in pulp prices benefits our Southern African and North American businesses as they are net sellers of pulp, but has a negative effect on the input costs of our European business.

Group operating profit for the quarter was US\$120 million compared to a loss of US\$1 million in the equivalent quarter last year. Operating profit excluding special items of US\$125 million for the quarter was similar to that of the equivalent quarter in the prior year, and a significant improvement compared to the quarter ended December 2011. The sequential improvement was driven mainly by the improved performance from the European and North American businesses.

Special items for the quarter were a charge of US\$5 million, largely comprising a plantation price fair value loss.

Finance costs for the quarter of US\$51 million were significantly lower than the US\$68 million incurred in the equivalent quarter last year. The equivalent quarter included breakage fees incurred as a result of the refinancing that we concluded during the 2011 financial year. In addition, the 2011 refinancing and the repayment of debt with cash on hand led to a decrease in interest costs for the quarter.

3

sappi 2nd quarter results**Cash flow and debt**

Cash generated from operations was US\$214 million for the quarter and net cash generated from operating and investing activities was US\$91 million.

Capital expenditure for the quarter was US\$60 million and for the full year is expected to be approximately US\$450 million including the investments in the announced chemical cellulose projects.

Interest-bearing borrowings (including bank overdrafts) less cash and cash equivalents ('net debt') reduced to US\$2,133 million as a result of cash generation during the quarter offset by currency and fair value movements.

After the end of the quarter, a three year South African bond of R750 million (US\$98 million) was raised. The floating rate interest was swapped for a fixed interest rate of approximately 7.8% for the life of the bond. The proceeds of this bond will be used to redeem a 12.1% R500 million (US\$65 million) South African bond due at the end of June, and to reduce other debt.

Operating Review – Quarter ended March 2012 compared with quarter ended March 2011

NOTE: In order to provide greater context to the performance of our regional businesses, the tables below summarise the regional results for 5 consecutive quarters.

The coated paper business in both North America and Europe saw declines in demand compared to the equivalent quarter in the prior year. The overall performance improved compared to the prior quarter as a result of lower costs and an improved operating performance in the North American business, as well as the cost savings achieved in the European business.

Despite subdued market conditions, the European business experienced a further improvement in operating performance during the quarter as a result of the fixed and variable cost reduction actions and lower pulp prices compared to the equivalent quarter in the prior year. We remain on track to meet our cost reduction target of US\$100 million on an annual basis for the year.

Operating rates improved in the quarter despite a slowdown in European demand, helped by a recovery in export sales. Prices realised for coated woodfree paper were 3.6% lower than the equivalent quarter last year and 1.6% higher for coated mechanical paper. The coated specialities business continues to perform well, with an increase in volumes and prices compared to the equivalent quarter in the prior year.

The European business continues to generate strong cash flows, generating a significant portion of the group's net cash.

The performance of the North American business improved, following the scheduled maintenance outages and unplanned pulp production issues at Somerset Mill in the last quarter and which were resolved in the first half of this quarter.

Sales volumes were lower than the equivalent quarter last year. Average prices for coated paper were stable year-on-year, and price increases for coated woodfree paper have been announced for implementation in June.

The casting release business saw a slight improvement in sales volumes and prices compared to the prior quarter and the market continues to improve, particularly in China. Volumes in this business remain below those of the equivalent quarter in the prior year with prices at similar levels.

The Southern African chemical cellulose business continued its strong performance in the quarter. Sales volumes increased over the prior quarter while sales prices, which are generally linked to NBSK prices, declined in Rand terms over the period as a result of a stronger Rand/US Dollar exchange rate and a lower average NBSK US Dollar price. NBSK prices in dollar terms have been increasing since March.

The Southern African paper business experienced a mixed quarter, with graphic paper demand generally good, but with packaging demand constrained by competition from imports. The restructuring announced last year proceeded as planned during the quarter, including the closure of the pulp mill at Enstra Mill, the kraft pulp mill at Tugela Mill and a 10,000-ton kraft paper machine at Tugela Mill. The benefits of these actions should start to materialise from the third quarter.

7

sappi 2nd quarter results

Directorate

We announced during the quarter that Mr Steve Binnie will join Sappi as Chief Financial Officer Designate on 09 July 2012. Mr Binnie will become Chief Financial Officer and an Executive Director of the company on 01 September 2012, following Mr Mark Thompson's retirement at the end of August 2012 as Chief Financial Officer and as an Executive Director.

Outlook

We expect demand for our coated paper to remain challenging compared to last year, but for most major input costs to remain below the levels seen a year ago. The European and South African businesses will benefit from the restructuring actions taken in these regions.

The Southern African chemical cellulose business is expected to continue to perform well. The conversion projects at Ngodwana and Cloquet mills are on track for start-up in our third financial quarter of 2013. We have received good support from a range of customers for the future increase in production volumes.

Our third financial quarter is historically and seasonally the weakest quarter, and will be further impacted, as it was last year, by planned annual maintenance shuts at a number of our major pulp mills. These shuts will result in an increase in maintenance costs and lost contribution from reduced output and sales. We expect our operating profit excluding special items for the third financial quarter to be in line with the equivalent quarter last year.

For the full year we expect operating profit excluding special items to be in line with the previous financial year, and for the group to generate positive earnings per share.

We expect positive cash generation for the balance of the year, leading to a further reduction in net debt. We will consider refinancing our higher cost debt, including the bonds due in 2014, when market conditions are favourable and it makes economic sense to do so.

sappi 2nd quarter results**Notes to the condensed group results****1. Basis of preparation**

The condensed consolidated interim financial results for the six months ended March 2012 have been prepared in compliance with the Listings Requirements of the JSE Limited and in accordance with the framework concepts and the measurement and recognition requirements of International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board, AC 500 standards issued by the Accounting Practices Board, the requirements of the Companies Act of South Africa and the information required by IAS 34 Interim Financial Reporting. The accounting policies applied in the preparation of these interim financial results are consistent with those applied for the year ended September 2011.

The half-year ended March 2012 consisted of 26 weeks compared to the fiscal half-year ended March 2011 which consisted of 27 weeks.

The preparation of this condensed consolidated financial information was supervised by the Chief Financial Officer, M R Thompson CA (SA).

The results are unaudited.

7. Material balance sheet movements

Cash and cash equivalents, interest-bearing borrowings and other current liabilities

The group repaid US\$174 million of debt from cash resources including the ZAR 10.64% xed rate public bonds in Southern Africa of US\$130 million (ZAR1,000 million) and US\$20 million of the on-balance sheet securitisation debt.

In addition, other current liabilities were reduced by payments of restructuring and accruals.

13

sappi 2nd quarter results**8. Assets held for sale**

Sappi has initiated a plan to sell certain land and buildings within our Sappi Fine Paper European operations.

9. Post balance sheet events

In April 2012, Sappi Southern Africa (Pty) Ltd issued a three-year ZAR750 million (US\$98 million) floating rate bond ('SSA02') at a 144 basis points spread over the government reference rate. The floating rate of the new bond was swapped into a fixed rate of 7.78%.

The proceeds of the bond will partly be used to refinance the ZAR500 million (US\$65 million) bond ('SMF3') maturing on 29 June 2012.

sappi 2nd quarter results**Reconciliation of EBITDA excluding special items and operating profit excluding special items to segment operating profit (loss) and profit (loss) for the period****(1)**

Special items cover those items which management believe are material by nature or amount to operating results and require separate disclosure. Such items would generally include profit or loss on disposal of property, investments and businesses, asset impairments, restructuring charges, non-recurring integration costs related to acquisitions, nancial impacts of natural disasters, non-cash gains or losses on the price fair value adjustment of plantations and alternative fuel tax credits receivable in cash.

(1) In compliance with the U.S. Securities Exchange Commission (“SEC”) rules relating to “Conditions for Use of Non-GAAP Financial Measures”, we have reconciled both operating profit excluding special items and EBITDA excluding special items to profit (loss) for the period, rather than operating profit. We use operating profit excluding special items and EBITDA excluding special items as internal measures of performance to benchmark and compare performance, both between our own operations and as against other companies. Operating profit excluding special items and EBITDA excluding special items are used as measures by the group, together with measures of performance under IFRS, to compare the relative performance of operations in planning, budgeting and reviewing the performances of various businesses. We believe operating profit excluding special items and EBITDA excluding special items are useful measures of nancial performance in addition to net profit, operating profit and other profitability measures under IFRS because it facilitates operating performance comparisons from period to period and company to company. For these reasons, we believe operating profit excluding special items, EBITDA excluding special items and other similar measures are regularly used by the investment community as a means of comparison of companies in our industry. Different companies and analysts may calculate operating profit excluding special items and EBITDA excluding

special items

differently, so making comparisons among companies on this basis should be done very carefully. Operating profit excluding

special items and EBITDA excluding special items are not measures of performance under IFRS and should not be considered

in isolation or construed as a substitute for operating profit or net profit as an indicator of the company's operations in accordance with IFRS.
